In her 2007 book, In Catastrophic Times: Resisting the Coming Barbarism, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming—the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: La vorágine (José Eustasio Rivera, Colombia, 1924); Distancia de rescate (Samanta Schweblin, Argentina, 2014); Lo que soño Sebastián (Rodrigo Rey Rosa, Guatemala, 1995); Serras da desordem (Andrea Tonacci, Brazil, 2006); Boi Neón (Gabriel Mascaro, Brazil, 2015); American Fork (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: this is the senior seminar required for all Spanish majors

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2019

SEM Section: 01 TF 2:35 pm - 3:50 pm Jennifer L. French

RLSP 402 (S) Senior Seminar Madrid: 1939-2004

In this course we will examine life in Madrid during two key periods: the Franco Dictatorship (1939-1975), and the first four decades of democracy (1975-2016). We will consider how representations of urban landscapes (churches, convents, prisons, museums, slums, bars and schools) have shaped and reflected the lives of madrileñas and madrileños past and present. We will study works by 20th century and contemporary Spanish
How was Madrid's image as international capital of art, sun, soccer and bullfighting forged? What remnants of the past lurk behind this appealing façade? How do the Atocha train Station bombings of 2004 relate to unresolved political tensions from 1939?

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay

Prerequisites: any 300 level RLSP course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Spanish majors and certificate candidates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

RLSP 403  (F) Senior Seminar: Early Modern Love and Marriage

We might think that love is a natural human feeling and marriage its happiest consequence, but in fact these two conditions are among the most carefully constructed phenomena in any society, highly dependent on time period and place. In this senior seminar we will focus on pre-modern Iberia to study the many manifestations and constructions of love (and marriage), several of which continue to influence definitions of both to this day. We will look at sacred, profane, family, and married love through treatises, medical writings, plays, short stories, poems. Our theoretical underpinnings will come from reflections on love from the time period under consideration as well as contemporary critiques of love and marriage. Primary sources will include early lyrical traditions, the poetry of King Alfonso X, the works of Santa Teresa, Lope de Vega, Calderón de la Barca, Cervantes, among others. Conducted in Spanish.

Requirements/Evaluation: regular presentations, two to three short papers, one research paper preceded by class presentation, active participation and regular attendance required

Prerequisites: any 300-level RLSP course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: senior Spanish majors and Comparative Literature seniors with Spanish focus

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Winter Study ---------------------------------------------------------------

RLSP 25 (W) Somos Sur: Mexico-Central American Borderlines and Visual Culture
Cross-listings: RLSP 25 LATS 25

Primary Cross-listing

What are borderlines? How have they been created and how do they affect the lives of those who cross or are being crossed by these borders? Motivated by the attention that borders have drawn recently with the caravans of Central Americans traveling north, we propose a trip to Chiapas, Mexico to explore the realities of the communities, activists, and border entities. This trip will engage students with the visual response and the relationship with spaces created in these borderlands. The class will meet for an intensive week of class on-campus with readings and discussion followed by a 10-12 travel to Chiapas with Borderlinks. The Borderlinks pedagogical model is based on "dynamic educational experiences that connect divided communities, raise awareness about the impact of border and immigration policies, and inspire action for social transformation." Their leaders accompany the delegation at all times. Mellon Post-doctoral Fellow at Williams 2018 - 2020.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: based on statement of interest in the course
Grading: pass/fail only
Materials/Lab Fee: $3,208

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 30 (W) Honors Essay: Spanish
To be taken by candidates for honors other than by thesis route.

Class Format: honors essay
RLSP 31 (W) Senior Thesis: Spanish
To be taken by students registered for Spanish 493-494.

Class Format: thesis
Grading: pass/fail only

RLSP 88 (W) Spanish Sustaining Program
Students registered for RLSP 101-102 are required to attend and pass the Spanish Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar’s Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

Grading: pass/fail option only

RLSP 99 (W) Independent Study: Spanish
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
RUSSIAN (Div I)
Chair: Professor Janneke van de Stadt

- Julie A. Cassiday, Wilcox B. and Harriet M. Adsit Professor of Russian
- Helga Druxes, Paul H. Hunn '55 Professor in Social Studies; on leave Spring 2020
- Vladimir Ivantsov, Visiting Assistant Professor of Russian
- Christophe A. Kone, Assistant Professor of German
- Gail M. Newman, Harold J. Henry Professor of German, Chair of Center for Foreign Languages, Literatures & Cultures
- Janneke van de Stadt, Chair of German and Russian and Professor of Russian

LANGUAGE STUDY
The department provides language instruction to enable students to acquire all five linguistic skills: understanding, speaking, reading, writing, and culture. Russian 101-W88-102 covers the basics of Russian grammar. Russian 151 through 252 offer additional instruction in grammar and vocabulary acquisition, and provide extensive practice in reading and conversation.

STUDY ABROAD
The department strongly encourages students who want fluency in Russian to spend a semester or year studying in Russia or one of the former Soviet republics. Students generally apply to one of several approved foreign study programs. Russian 152 or the equivalent and junior standing are normally prerequisite for study abroad.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
No, generally not until after a student returns and can provide course material for review (e.g. completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
In addition to course title and description, we always have a conversation with our students about the actual work they completed since sometimes syllabi are vague, or not followed with complete thoroughness.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes, four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No, the only candidate for this would be the Senior Seminar, and it has never been an issue.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

LITERATURE AND CULTURE IN TRANSLATION
The department regularly offers courses on Russian literature, culture, and politics in English for those students who have little or no knowledge of Russian, but who wish to become acquainted with Russian literary, cultural, and social history.

THE CERTIFICATE IN RUSSIAN
To enhance a student’s educational and professional profiles, the Certificate in Russian offers a useful tool for using the language in a wide variety
of disciplines. The sequence of language and culture courses is designed to supplement a student's major at Williams by enabling the student to expand their knowledge in a related field.

Students who enter Williams with previous training in Russian may substitute more advanced courses for all the 100-level courses; they can also be exempted from up to two of the required courses. Thus, in order to earn a certificate a student must take no fewer than five courses (including three courses in Russian) after enrolling at Williams. The student must achieve proficiency at the level of a B in RUSS 251 or the equivalent.

**Required Courses**

- 101
- 102
- 103 or 151
- 104 or 152
- one additional course conducted in Russian

**Elective Courses**

- at least one course on Russian cultural history
- at least one course on Russian intellectual, political, or social history, or post-Soviet economics

**THE MAJOR**

The Russian major offers students an interdisciplinary approach to the intellectual and cultural history of Russia and the former Soviet republics. Students complete the major by combining courses in Russian language and literature with courses in history, political science, music, economics, and art. The major requires a minimum of ten courses of which at least six must be conducted in Russian, at least two must be at the 300-level, and one at the 400-level. In addition, students may take up to four related courses offered by other departments and taught in English.

**Examples of appropriate courses in other departments are:**

- HIST 140 Fin-de Siècle Russia: Cultural Splendor, Imperial Decay
- HIST 240 Muscovy and the Russian Empire
- HIST 241 The Rise of the Soviet Union
- HIST 438 Religion and Secularism in Modern Europe and Russia

Students selecting the major must typically complete Russian 104 or 152 (or the equivalent) by the end of the junior year. Majors will normally be expected to take the 400-level seminar offered in their senior year, even if they have previously taken another version of it. Russian majors may receive major credit for summer language study (in consultation with the department) and for as many as four courses taken during study abroad.

**THE DEGREE WITH HONORS IN RUSSIAN**

At the beginning of the second semester of the senior year, students may nominate themselves to candidacy for the degree with honors. By the end of the junior year at the latest, however, they will have established in consultation with the department their qualifications for embarking on the project, the pattern of study to be followed, and the standards of performance.

Students earn a degree with honors by submitting a senior thesis (493-W31-494) of honors quality.

**RUSS 101 (F) Elementary Russian I**

An introduction to contemporary standard Russian, this course provides opportunities to acquire basic proficiency in all five language skills—listening comprehension, speaking, reading, writing, and culture—through immersion, intensive use of authentic materials, and a strong emphasis on the spoken word in all class activities. Greater emphasis is placed on writing in the second semester. For students who already know some Russian, consultation with the department is required before registering for any Russian language course in the sequence 101 through 252.

**Class Format:** class meets five times a week

**Requirements/Evaluation:** active class participation, completion of all assignments, quizzes, tests, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 15

RUSS 140  (S) Crime and Punishment in Russian History  (WS)

Cross-listings: HIST 140  RUSS 140

Secondary Cross-listing

For centuries, people have used crime in Russia and the Russian state’s response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn’s Gulag Archipelago in 1962 and beyond. By semester’s end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner’s work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 140 (D2) RUSS 140 (D1)

Writing Skills Notes: Each student will write five 5-to-7-page papers on which the instructor will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partners' papers. As the final assignment, each student will revise one of their five papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

RUSS 151  (F)  Continuing Russian I

This course develops all five skills—listening comprehension, speaking, reading, writing, and culture—for students who have completed at least one year of college-level Russian. Coursework includes a systematic review of Russian grammar, as well as an examination of a variety of authentic materials from Russian and Soviet culture, current events, and daily life. Intermediate students will concentrate on expanding their vocabulary, while more advanced students will focus on reading and writing about unabridged texts in Russian. Students who complete the yearlong sequence of RUSS 151 and RUSS 152 should be well prepared to undertake study abroad in Russia and are encouraged to do so. Each year this course is custom-designed to meet the needs of those students who enroll, so that both intermediate and advanced students can benefit from taking RUSS 151 and/or RUSS 152 more than once, which may be done with the permission of the instructor.

Class Format: class meets four hours a week, three with the professor and the fourth with the Russian Teaching Associate (time to be arranged)

Requirements/Evaluation: active class participation, completion of all assignments, quizzes, and a final exam

Prerequisites: completion of at least one year of college-level Russian (RUSS 101-102) or permission of instructor

RUSS 203 (F) Nineteenth-Century Russian Literature: Rebels and Rebellion

Cross-listings: RUSS 203 COMP 203

Primary Cross-listing

"God save us from seeing a Russian revolt, senseless and merciless," famously proclaimed Alexander Pushkin. But is revolt always senseless? And if it's not, what is the meaning behind it? Throughout the nineteenth century, Russian literature gave different answers to these questions. In this course, students will familiarize themselves with the masterpieces of the Golden Age of Russian literature with a particular focus on rebellion understood in its broadest sense: philosophical, psychological, social, sexual, and aesthetic. We will examine the confrontation of the archetypal figure of Russian literature, the "superfluous man," with his milieu in Pushkin, Lermontov, Turgenev, and Goncharov. The social and psychological revolt of another key figure--the "little man"--will be addressed in the works of Pushkin and Gogol. We will then discuss woman's sexual rebellion in Nikolai Leskov and the forms of spiritual rebellion in Leo Tolstoy and Dostoevsky. Finally, we will examine the aesthetic revolution of Chekhov's plays, which challenged the principles of the old theater and marked the turn to new modernist drama. All readings are in English.

RUSS 204 (S) Russia's Long Revolution: a Survey of Twentieth- and Twenty-First-Century Russian Culture

Cross-listings: COMP 204 RUSS 204

Primary Cross-listing

With the one-hundredth anniversary of Russia's October Revolution just behind us and the uncertain future of post-Soviet Russia unfolding before us, we can now take stock of the long century of revolutions in art, politics, and society that has brought Russia to Putin. This course takes a comprehensive look at twentieth- and twenty-first-century Russian culture, focusing on the literature, film, theater, and visual art that defined this transformative period in Russia's modern history. Students will explore the radical aesthetic and political ideas that motivated this change, especially the utopian visions of the Russian avant-garde and early-Soviet Marxists, as well as key works that examine the tragic consequences of the failures of these revolutionary experiments for those who, willing or not, became their active participants. As we move on to the late-Soviet years, we will consider the emergence of a new, "conceptualist" avant-garde, which attempted to dismantle Soviet ideology and the totalitarian logic they attributed to the historical avant-garde using postmodern aesthetics. We will conclude the course by surveying literature, film, and performance that capture the traumatic experience of Russia's transition to market capitalism in the 1990s and its slide into authoritarian "stability" under Putin. Readings include works by Babel, Bulgakov, Platonov, Pasternak, Nabokov, Solzhenitsyn, Prigov, Pelevin, Sorokin, and recent Nobel laureate Svetlana Alexievich. Films screenings include the cinema of avant-garde masters Eisenstein and Vertov. All readings are in English.

Class Format: discussion

Requirements/Evaluation: class participation, discussion leading, papers

Prerequisites: none
RUSS 213 (F) Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin’s Russia (DPE)

Cross-listings: GBST 213 RUSS 213 WGSS 214 COMP 257

Primary Cross-listing
Since Vladimir Putin’s rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin’s topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women’s lacy underwear, federal legislation from 2013 prohibiting “homosexual” propaganda, and a 2017 court decision that outlawed a meme of Putin as a “gay clown.” This course examines the Putin regime’s ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens’ performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. All readings will be in English, and all films with have English subtitles.

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: none

RUSS 219 (F) Cults of Personality (WS)

Cross-listings: RUSS 219 COMP 215

Primary Cross-listing
First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase “cult of personality” was formulated to discredit the hero-worship that accompanied Joseph Stalin’s iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China’s Mao Zedong, Iran’s Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history,
sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany, Italy, and Spain, China, Iran, North Korea, and Cuba. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

The course will also require that students write one paper together with their tutorial partner and that they rewrite two different papers, one at midterm and the other at the end of the term.

Fall 2019

TUT Section: T1 TBA Julie A. Cassiday

RUSS 222 (S) Russian Literature and European Existentialism

Cross-listings: COMP 270 RUSS 222

Primary Cross-listing

Existentialism was a highly influential movement in twentieth-century European literature and thought. Nowadays the terms existentialism and existentialist are broadly used to describe the worldview and literary style of writers and thinkers as different as Fyodor Dostoevsky, Leonid Andreyev, Martin Heidegger, Franz Kafka, and Jean-Paul Sartre. Reflecting the shift to irrationalism in early twentieth-century philosophy and psychology, as well as the global cataclysms of the twentieth century, existentialism focuses on the problem of human alienation in the modern world, suggesting ways of overcoming it. In this course addressing the key concepts of existentialist philosophy (angst, borderline situation, the absurd, freedom), we will examine the origins of the existentialist worldview in nineteenth and early twentieth-century Russian literature (Dostoevsky, Chekhov, Leonid Andreyev); read and discuss existentialist texts by Kafka, Albert Camus, and Sartre; and look at the existentialist legacy in contemporary Russian and Western culture, including rock music. All readings are in English.

Requirements/Evaluation: participation, 3 writing assignments, oral presentation, final paper

RUSS 232 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film

Cross-listings: RUSS 232 COMP 271

Primary Cross-listing
In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an oral presentation; a final paper (6 pages)

RUSS 240 (S) The Soviet Experiment

Cross-listings: HIST 240 RUSS 240

Secondary Cross-listing

In 1917, the former Russian Empire became the site of the world's first socialist revolutionary government and the twentieth century's largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history's most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects' and leaders' policies left both at home and abroad, and the impact it had on the people who lived and didn't live to tell the tale.

Requirements/Evaluation: active class participation, two short essays (3-5 pages), one in-class midterm, and one take-home final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History Majors

Secondary Cross-listing

Russia. The name alone evokes wonder, fear, romance, and history itself. Over the past ten centuries, the land that we now call the Russian Federation has witnessed dramatic transformations that underwrote its transition from feudal backwater to global superpower. Its journey from tribalism to imperialism, feudalism to autocracy, agrarianism to industrialization, monarchism to parliamentarianism, Orthodoxy to revolutionary atheism left a mark not just on the collective Russian conscious, but on a world that has grown accustomed to viewing Russia as a test case for ideas, projects, and processes both fortuitous and tragic. How did Russia become the site of such a diverse array of political, social, economic, and cultural experiments? In what ways did they contribute to the formation and exercise of Russian political power? How did they contribute to the creation of a "Russian" identity, and to what effect for Russian citizens? This course will seek to answer these questions through a survey of Russian history from its founding in Kievan Rus’ in the 9th century to the October Revolution of 1917.

Class Format: discussion

Requirements/Evaluation: class attendance and participation, 3 five page papers, ~50 pages of reading a week, one "in-class" midterm exam and one "in-class" final exam

Prerequisites: none, open to all students

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

RUSS 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE)

Cross-listings: RUSS 248 GBST 247 SOC 248

Secondary Cross-listing

 Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks

Prerequisites: none

RUSS 275 (S) Russian and Soviet Cinema

Cross-listings: COMP 287 RUSS 275

Primary Cross-listing
In this course, we will survey over a hundred years of Russian and Soviet film to explore how cinema has reflected and, at times, created the country's most important historical events and cultural myths. We will pay close attention to Russian filmmakers' varied reactions to Hollywood cinema, as well as to the lively body of cinema theory that these reactions generated. Our survey will begin in the pre-Revolutionary era and include representative films from the time of the Bolshevik Revolution, Stalinism and World War II, the Thaw and Stagnation, Glasnost, and the Putin era. In addition to studying films by auteur filmmakers, such as Sergei Eisenstein, Andrei Tarkovsky, and Aleksandr Sokurov, we will watch movies made for the masses,
which have helped to form Russians’ understanding of their country and themselves. All readings will be in English and all films will be viewed with English subtitles.

**Requirements/Evaluation:** completion of all viewing and reading assignments, active participation in class discussions, two short papers, and a final research project

RUSS 286 (F) Russian Politics and Foreign Policy under Vladimir Putin

**Cross-listings:** PSCI 286 RUSS 286

**Secondary Cross-listing**

In 1939, Winston Churchill has famously characterized Russia as a riddle wrapped in a mystery inside an enigma. In the 75 years that followed, Russian politics has continued to defy expectations and conventional explanations. The collapse of the Soviet Communist dictatorship in 1991 has caught most observers by surprise, and has led Russia on a path of political and economic liberalization of an unprecedented scope. But despite the initial optimism, these processes produced a political and economic system characterized by authoritarianism and crony capitalism. Why did Russia follow this particular trajectory? Why did Russia's political and economic transition fail to produce the intended results? What are the factors that gave rise to and sustained Vladimir Putin's system? Why did Putin's Russia adopt an aggressive posture toward its neighbors and the West? And as Russia once again faces extraordinary challenges--marked by the wars in Ukraine and Syria, the economic crisis and social tensions at home, and the looming issue of Vladimir Putin's succession in 2024--what lessons can we draw for the future? This course will explore the key perspectives on these issues. The first part of the course will provide a concise overview of Russia's historical background, the roots of the communist collapse, and the country's subsequent trajectory. The second part of the course will look into the rise of the Putin regime, its key pillars, and its contradictions. The third part of the course will survey the trajectory of Russia's foreign and security policy under Vladimir Putin. This segment will explore the defining events and processes that led to the decline in the relations between Russia and the West, ranging from the Iraq war and the colored revolutions in East Europe, to the annexation of Crimea and the Russian meddling in the US elections. It will also explore how the eroding domestic legitimacy of the Putin regime drives its aggressive behavior abroad.

RUSS 305 (F) Dostoevsky: Navigating Through the Underground

**Cross-listings:** COMP 305 RUSS 305
Primary Cross-listing

In this course, students will acquaint themselves with Dostoevsky's oeuvre--from his early masterpieces to his artistic testament, *The Brothers Karamazov*. The key concept through which we will approach Dostoevsky's various writings will be the underground--a powerful metaphor of spiritual decay, angst, resentment, and rebellion against the whole of creation shared by many Dostoevsky characters, from the anonymous protagonist of *Notes from Underground*, to Raskolnikov (*Crime and Punishment*), to all the brothers Karamazov. Inheriting Dostoevsky's own existential doubts, his major characters strive to find an exit from their various "undergrounds," some with and some without success. What are the philosophical, psychological, and artistic foundations of the underground? How does one end up there in Dostoevsky's view? And what is the way out? These are just a few of the questions to be answered as we explore the primary genius of Russian literature. All readings are in English.

Requirements/Evaluation: attendance and participation in discussion, one 1-page writing assignment, two research papers, digital project, final project (paper)

**RUSS 331 (S) The Brothers Karamazov**

Cross-listings: ENGL 371 COMP 331 RUSS 331

Primary Cross-listing
Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

**Requirements/Evaluation:** completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

**Prerequisites:** at least one 200-level literature class

**RUSS 337 (F) After Stalin: Soviet History from "Thaw" to Collapse**

**Cross-listings:** RUSS 337 HIST 337

**Secondary Cross-listing**

When Joseph Stalin died in 1953, the crowd of people that gathered to view his embalmed body on Moscow's Red Square grew so large, it provoked a stampede that killed nearly 500 people. This moment embodies the uncertainty and challenges that ordinary citizens and state officials faced when they imagined what a post-Stalin future might bring to the Soviet Union. For all the suffering that his rule infected on the Soviet people, Stalin remained for many a reliable constant in a life dominated by revolution and war. Stalin's successors faced a classic dilemma: how to reform and breathe new life into a system without disturbing the foundation it needs to stand intact? Despite superpower status and some stunning achievements at home and abroad, the fault lines in Soviet society ran deep. This course will consider the experiences that grew out of the uncertainty that emerged after Stalin's death. We will examine how the "Soviet experiment" evolved - politically, legally, socially, culturally - once the last of the original Bolshevik revolutionaries left the Kremlin. What opportunities did the post-Stalin moment open up for political elites, members of the professional class, the intelligentsia, and citizens from Soviet republics and satellite states? What obstacles did they face, and how successful were they at overcoming them? In what ways did the spirit of the October and Stalinist Revolutions persist or erode from 1953 until 1991? Most importantly, how did the "children of the revolution" participate in, check out of, or contest the socialist system whose birth their parents witnessed first hand? After all, more generations experienced the Soviet Union without Stalin as their leader than generations who only knew a life with the "Vozhd" in power. Through secondary and primary source readings, we will attempt to recover the voices of those whose lives both shaped and were shaped by the nearly four decades after Joseph Stalin's death.

**Requirements/Evaluation:** active class participation, three short essays (2-3 pages), and one long essay (8-10 pages)

RUSS 341 (S) Collapse: The Fall and Afterlife of the Soviet Union

Cross-listings: RUSS 341 HIST 341

Secondary Cross-listing

On Christmas Day 1991, Mikhail Gorbachev ended two things: his tenure as President of the Soviet Union, and the Soviet Union itself. The following
day, Boris Yeltsin entered office as the first president of the Russian Federation, and without delay, began to institute radical economic and social
reforms. Under his watch, the country privatized national industry, cut the state budget, and courted foreign multinational businesses. The world most
commonly used to describe Russia in the early 1990s is “disappear”: money, jobs, food, and people. The very things that Soviet-style socialism had
committed itself to providing for started to vanish as a result of invisible and market forces. This course will explore what emerged in the spaces left
empty after Soviet-style socialism’s demise in three parts. The first part of the semester will examine the origins of the Soviet Union’s collapse and its
breakup into fifteen successor states. The second part of the semester will survey the political, economic, and social processes that followed the
collapse. Finally, the third part of the course will focus on Putin’s ascendency to the presidency and its consequences for Russian citizens at home and
Russia’s image abroad. By semester’s end, students will have acquired the content and analytical literacy to place present-day Russia in its specific
historical context and identify multiple sources of causation that may help explain Russia’s transition from socialism to capitalism to Putinism during the
past quarter century.

Requirements/Evaluation: active class participation, three short essays (3-5 pages), and one long essay (10-12 pages)

**RUSS 16 (W) Russian Spies in DC: FX's The Americans**

From the beginning of the Cold War to the present, the presence of Russian intelligence operatives in the nation's capital has been the subject of fascination and speculation. In this course, we will examine the FX Channel's series *The Americans*, in light of both the popular imaginary about Russian spies in the United States and the actual history of intelligence wars in Washington. How does the series represent the lives of Russian political and intelligence operatives during the Reagan presidency, and how does it interpret the larger events of the Cold War in its final decade? Readings will draw from accounts on both side of the Cold War, focusing on signature developments such as Jewish immigration from the Soviet Union, the covert biological weapons programs, and Soviet attempts to build relations with progressive movements in the United States. Prior to the beginning of the course, students are expected to view the first two seasons of the series. Adjunct Instructor Bio: Alexandar Mihailovic has taught at Bennington College, Williams College, and Brown and Columbia Universities. His books include "Corporeal Words: Mikhail Bakhtin's Theology of Discourse," "Miti: The Art of Postmodern Protest in Russia", and the edited volume "Tchaikovsky and His Contemporaries: A Centenary Symposium." He has also published articles about cultural relations during the Cold War, African-American studies, art history, and cinema studies.

RUSS 25 (W) Williams in Georgia
Cross-listings: SPEC 25 RUSS 25
Primary Cross-listing

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their overall trip experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Russian or Georgian is not required
Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course
Grading: pass/fail only
Materials/Lab Fee: $2,922

RUSS 88 (W) Russian Sustaining Program

Students registered for RUSS 101-102 are required to attend and pass the Russian Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program, check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation required to earn a "Pass"

Grading: pass/fail option only

RUSS 99 (W) Independent Study: Russian

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only
Science and Technology Studies (STS) is an interdisciplinary program concerned with science and technology and their relationship to society. The community of scholars in the Williams STS program apply methods from diverse disciplines. They seek to illuminate the historical, social, cultural, ethical, and political dimensions of science and technology. By bridging humanities, social sciences, science, and technology, our program seeks to build relationships across campus.

The STS program at Williams takes a broad umbrella approach to the discipline. Topics include: sociology of knowledge production; philosophy of science; history of science and technology; the economics of research and development; science and public policy; technology and the environment; scientometrics; interactions between humans and technology; science fiction and other artistic depictions of science and technology; boundaries between pseudo-science, religion, and science; and the broader ethical issues evoked by science and technology.

Science and Technology Studies concentrators must complete a total of six courses. Five of these must have the STS prefix. Students must take: Introduction to STS; Senior Seminar; and three electives, of which at most two can originate in the same department. In addition, Science and Technology Studies concentrators must complete one course with a laboratory or field work component in natural, social, or computer science; this course may also satisfy one of the divisional distribution requirements.

Students may petition the Chair for recognition of a course as an STS course even if it is not cross-listed in STS. The petitions will be approved or denied on a case-by-case basis.

The program is administered by a chair and an advisory committee of faculty who teach in the program. Students who wish to enroll normally register with the chair by the fall of their junior year.

STUDY ABROAD

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Be sure to check record of enrollment in classes with laboratory of fieldwork components to satisfy program.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

---

**STS 101 (S) Science, Technology, and Human Values**

**Cross-listings:** HSCI 101  STS 101  SOC 201

**Primary Cross-listing**

This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

**Requirements/Evaluation:** two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

---

**STS 106 (F) Being Human in STEM (DPE)**

**Cross-listings:** GEOS 106  PHYS 106  STS 106

**Secondary Cross-listing**

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability, sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students’ abilities to participate in STEM fields. Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

**Class Format:** class discussions, group project work (out of class time required)
**Requirements/Evaluation:** short response papers, class discussion participation, leading class discussions, group work, and final project

**Enrollment Limit:** 15

**Enrollment Preferences:** DIV III majors; statement of interest may be requested

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** does not count towards GEOS or PHYS major credit

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 106 (D3) PHYS 106 (D3) STS 106 (D2)

**Difference, Power, and Equity Notes:** This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

---

**STS 115 AIDS: The Disease and Search for a Cure**

Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus than any other known pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine has now waned and HIV strains that are resistant to drug therapies are common. We are now three decades into the AIDS pandemic and the World Health Organization estimates that there are more than 34 million HIV-infected persons worldwide. After an introduction to chemical structure, we examine the molecular biology of the HIV virus, the molecular targets of anti-HIV drugs, and the prospects for a cure. We look at how HIV-1 interacts with the human immune system and discuss prospects for developing an effective HIV vaccine.

**Class Format:** three hours per week

**Requirements/Evaluation:** problem sets, a midterm, quizzes, a final exam, and a presentation/discussion

**Prerequisites:** none; designed for the non-science major who does not intend to pursue a career in the natural sciences

**Enrollment Limit:** 45

**Expected Class Size:** 45

**Grading:**

**Distributions:** (D3)

**Attributes:** PHLH Biomedical Determinants of Health

**STS 135 (S) Politics After the Apocalypse**

**Cross-listings:** STS 135 PSCI 135

**Secondary Cross-listing**

The zombies are coming! Climate change will destroy us! Bird-flu pandemic! To our horror and delight, reminders are everywhere that the end is near. Some of these projected apocalypses are alarmist, some fanciful...and others all too realistic. What shape will politics take after the apocalypse? What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? And what does it say about politics today that we are so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? In this class, we reconsider what politics is and should be by contemplating accounts of its destruction and rebirth in television, film, literature, activism, social science, and critical theory. We will approach these sources as analogous to political theory's classic thought experiment of the "state of nature" and social contract. We will explore family resemblances between apocalyptic narratives and key concepts in political theory: the state of exception, (post)millennialism, and anarchy. And we will consider what it suggests about our time that we are so eager to imagine ourselves at the beginning of the end.
Indigenous people occupy a paradoxical position in time. On one hand, as survivors of genocide and occupation, they are already post-apocalyptic, occupying what many Indigenous thinkers argue is “our ancestor’s dystopia.” On the other hand, Indigenous people are relegated to the past in settler and colonial discourses, which, in relying heavily on notions of contact, authenticity, and vanishing, preclude Indigenous peoples from not only futurity, but from modernity and associated visions of science and technology too. This tutorial explores how Native science fiction imagines and enacts futurity from this paradoxical Indigenous temporality. Looking across numerous national and transnational Indigenous contexts, in addition to different kinds of media, including short stories, novels, visual art, video games, films, and online platforms like second life, this tutorial foregrounds the ways in which science fiction functions as a mode of Indigenous theory, knowledge production, and claiming of not only the future but of the past and present, as well. Pairing media readings with works in science fiction and Indigenous studies, we will explore the role of indigeneity in the founding and tropes of European and settler science fiction, Native "slipstream” and eco SF, post-post-apocalyptic thinking, space travel and frontiers, Native pessimism, and Indigenous technologies and epistemologies cast into the future. We will pay careful attention to the political stakes of these narratives and expression for Indigenous sovereignty and self-determination.
STS 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: STS 153 ENGL 153

Secondary Cross-listing

In this expository writing course, we will analyze and argue about how near-human and partly human bodies appear in fiction and film. When do these bodies improve the spaces in which they appear? When do they threaten them? How are they gendered, how are they raced, and why? What do they desire? Authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in different ways. Together we will develop our ideas on these topics in clear, strong prose. We will also ask how artists have cast human identities into foreign materials and media, and study the distortions and revelations that result. During museum visits at WCMA, students will use examples of self-portraiture, electrified bodies, and aspirational bodies to explore the representation, imitation, and abstraction of selves. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: five response papers (500 words); four essays (1200-1500 words, each in two drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153 (D2) ENGL 153 (D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written work. Students write five response papers and four five-page essays (in two drafts) over the course of the semester, receiving substantial instructor feedback on all. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

SEM Section: 01 TR 8:30 am - 9:45 am Ezra D. Feldman

STS 211 (F) Scientific Selves: Medicine, Technology, and Identity in Early Modern France

Cross-listings: RLFR 210 STS 211

Secondary Cross-listing

The early modern period has long been associated with scientific discovery and shifting ideology in France. From Copernicus on, thinkers such as René Descartes, Blaise Pascal, and Antoine Lavoisier helped advance the Scientific Revolution, which led to medical and technological breakthroughs, as well as important advances in our understanding of the world and our solar system. This course examines the role that France played in pursuing such discoveries, as well as the ways newfound knowledge impacted notions of belonging and alterity. How did the Scientific Revolution and French colonization lead to the creation of social, cultural, and medical "others”? How did scientific discourse permeate verbal and visual expression and depict those who did not fit into normative paradigms of gender, sexuality, ability, ethnicity, belief, and culture? What avenues for self-expression and definition were available to those whom society excluded? What parallels can we see with twenty-first-century questions of political activism, social justice, sciences, and technology? To explore these questions, we will analyze literary texts, visual representations, and historical documents, such as medical treatises, scientific diagrams, and texts on new technologies. Conducted in French.

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 210 (D1) STS 211 (D2)
STS 228 (F) Feminist Bioethics (WS)

Cross-listings: WGSS 228 STS 228 PHIL 228

Secondary Cross-listing

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we’ll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites: none, although previous coursework in WGSS is desirable

Enrollment Limit: 19

Enrollment Preferences: prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 228 (D2) STS 228 (D2) PHIL 228 (D2)

Writing Skills Notes: Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

STS 229 (F) The Panopticon: Surveillance, Power, and Inequality (DPE)

Cross-listings: SOC 228 STS 229

Secondary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing if they are being observed. In Discipline and Punish, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and
algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Are these technologies always bad? Can they be used for good? Topics include: the historical origins and expansion of surveillance in modern societies, the emerging total surveillance state in Baltimore City, the U.S. military drone program, surveillance in the workplace, and whether social media is turning us all into self-surveillance addicts.

Requirements/Evaluation: discussion participation, six reading responses (1- to 2-page papers), Facebook data essay (3-5 pages), final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 228 (D2) STS 229 (D2)

Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance in Baltimore City and the question of if and when surveillance is appropriate there given the city’s current crisis of gun murders. Students will discuss whether and how to conduct surveillance in a context shaped by deep racial segregation and class inequality.

Fall 2019

SEM Section: 01    MR 2:35 pm - 3:50 pm    Ben Snyder

STS 231 (F) The African Anthropocene (DPE)

Cross-listings: STS 231 AFR 231 ENVI 231

Secondary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, poetry, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Class Format: non-traditional technologies, web-streams, social media (Tumblr/Twitter)

Requirements/Evaluation: assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; juniors and seniors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) AFR 231 (D2) ENVI 231 (D2)

Difference, Power, and Equity Notes: The African Anthropocene” considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

Fall 2019
STS 239 (S) The Ethics of Artificial Intelligence

Cross-listings: STS 239 PHIL 239

Secondary Cross-listing

We will someday live alongside artificially intelligent beings who equal or exceed us. Commentators ranging from technology magnates to physics geniuses-not to mention decades of apocalyptic science fiction-have urged that that future is nothing short of an existential threat to human beings. Whether this is hyperbole or wise prognostication, it cannot be denied that the rise of AI will be a tectonic shift for culture, technology, and our fundamental sense of ourselves. When AI is fully realized, it is likely to be amongst the most important things to happen to our species. Some challenges we face are broad and about the future, though perhaps not the far future. How can we ensure that AI's will act morally? Is a world with AI's overall better or worse for us? How do we create legal and policy frameworks that cover a new kind of thinking being? If they are conscious, will AI's have dignity and rights? Other questions are pressing and immediate: Artificial intelligence techniques are used today to help decide whether someone gets a bank loan, is eligible to be released on bail, or in need of particular medical treatment. And right now there are autonomous vehicles deciding how to behave in traffic, and autonomous weapons capable of delivering lethal force. Is it moral for us to pass along these sorts of decisions to AI's? What if they are biased, unbeknownst to us? What if they are more fair? In this course we will engage ethical questions surrounding the seeming inevitability of AI.

Class Format: mixture of lectures and discussion

Requirements/Evaluation: four short (3- to 4-page) writing assignments and a final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: CSCI or PHIL majors or STS or COGS concentrators

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

STS 250 (S) Environmental Justice (DPE)

Cross-listings: ENVI 250 STS 250

Secondary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxiexposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 250 (D2)  STS 250 (D2)

**Difference, Power, and Equity Notes:** This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

**STS 269  (F)(S) Mindsight: Mindfulness and Medicine  (DPE) (WS)**

**Cross-listings:** REL 269  STS 269  ANTH 269  ASST 269

**Secondary Cross-listing**

This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

**Class Format:** weekly tutorial, context-based learning, experiential learning

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** a course on Buddhism is preferred but not required

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

**Distributions:** (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 269 (D2)  STS 269 (D2)  ANTH 269 (D2)  ASST 269 (D2)

**Writing Skills Notes:** This class will involve weekly tutorial essays of 1200 or 600 words, written feedback on every essay, and a mid-semester 'writing chat' with the instructor to improve patterns in writing.

**Difference, Power, and Equity Notes:** This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can alleviate pervasive and population wide health issues in the US including rising rates of hypertension, anxiety, and mental health issues that are exacerbated by stress related to social inequality and structural violence. It explores and critiques the ways that mindfulness has been marketed as an elite and non-inclusive practice within the US.

STS 272 (S) The History and Mythology of Chinese Scripts

Cross-listings: STS 272 COMP 272 CHIN 272

Secondary Cross-listing

Written scripts using what are most often called “Chinese characters” have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: discussion

Requirements/Evaluation: quizzes, short writing assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

STS 273 (F) Politics without Humans?

Cross-listings: ENVI 273 STS 273 PSCI 273

Secondary Cross-listing

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of “the human” become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which “posthuman” or “transhuman” entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called “singularity” (the merger of humans with computers), science and technology studies, evolutionary anthropology, “new materialist” philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students

Enrollment Limit: 25

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
STTS 276  Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: discussion

Requirements/Evaluation:  4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

STS 319  (F)(S)  Neuroethics  (WS)

Cross-listings: STS 319 NSCI 319 PSYC 319

Secondary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 319 (D2) NSCI 319 (D3) PSYC 319 (D2)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-pagw essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise a their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
STS 338 (F) Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: STS 338 HSCI 338 REL 338 SOC 338

Secondary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Requirements/Evaluation: attendance and participation, informal weekly writing, 15- to 20-page seminar paper

Prerequisites: none

STS 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)

Cross-listings: STS 353 AMST 353

Secondary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with
international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 353 (D2) AMST 353 (D2)

Difference, Power, and Equity Notes: This course will explore how settler sciences have been used as a technology of difference making, dispossession, and genocide in United States history. It will also provide students a theoretical toolkit and historical perspective by which they can grapple with the fact that power structures like settler technoscience can be a source of both colonization and liberation.

STS 364 (S) Mental Health and Illness: Philosophical Considerations

Cross-listings: PHIL 364 STS 364

Secondary Cross-listing

This course will raise and discuss a number of philosophical questions concerning our current understanding of mental health and mental illness. We will begin by examining the general concepts of health and disease, and then apply them to human psychology. Throughout the course, our focus will be on the best theoretical and practical knowledge we now have to diagnose, explain, and alleviate mental illness. Some of the questions that we will discuss are: What is psychopathology and what are its causes? Is it possible to have systematic knowledge of subjective experience? If so, is that knowledge importantly different in kind or in rigor from the knowledge we gain through physics, chemistry or geology? Are there metaphysical and ideological assumptions in contemporary psychiatry, and if so, could and should they be avoided? What is the basis on which current psychiatric diagnostic manuals are organized? Is that principle of organization justifiable or not? Do particular case histories offer good explanations of psychopathology? In framing and answering these questions, we will discuss subjective experience (or phenomenology) of mental illness; holism vs. reductionism; functional, historical and structural explanations of psychopathology; theory formation, evidence, and the role of values in psychology and psychiatry; the diversity and disunity of psychotherapeutic approaches; relationship between knowers and the known; and relationship between theoretical knowledge in psychiatry and the practices of healing.

Requirements/Evaluation: several writing assignments, evenly spaced throughout the semester

Prerequisites: two philosophy courses; or one philosophy and one STS course; or consent of the instructor

Enrollment Limit: 20

Enrollment Preferences: students who took Philosophy of Science or Philosophy of Mind; Philosophy and Psychology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PHIL Contemp Metaphysics + Epistemology Courses
STS 370  (F) Medicine, Pathology, and Power: An Ethnographic View  (DPE)

Cross-listings:  WGSS 371  ANTH 371  STS 370

Secondary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation—which is also known as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Requirements/Evaluation:  four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 371 (D2)  ANTH 371 (D2)  STS 370 (D2)

Difference, Power, and Equity Notes:  This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering.

STS 372  Time and Temporality

Duration, rhythm, speed, pace, trajectory, sequence, articulation, busyness, boredom, flow—time is one of the most fundamental categories of our experience of reality. Since the founding of the discipline, sociologists have been interested in how time, while seemingly given and natural, is deeply influenced by history and society. This two-part course will introduce students to the sociological analysis of time and temporality. In part one, students will explore the emergence of the so-called "modern western temporal order"—the sense of time that many people take for granted as the way things are. We will excavate the historical roots of schedules, clocks, calendars, and time zones; examine how capitalism and colonial conquest disseminated particular notions of time around the globe; and discuss leading theories of how constructions of time change through history and vary among communities. In part two, we will focus on one of the most frequently lamented and celebrated qualities of modern temporality: acceleration. Is the world speeding up? Why do so many people feel always pressed for time? What are the promises and limits of speed, acceleration, and ceaseless change for building a robust democratic society?

Requirements/Evaluation:  participation, time diary analysis (3-5 pages), final paper (10-12 pages)

Prerequisites:  none

Enrollment Limit:  20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: 
Distributions: (D2)
Not offered current academic year

STS 376 (F) Human-Computer Interaction
Cross-listings: CSCI 376 STS 376
Secondary Cross-listing
Human-Computer Interaction (HCI) principles are practiced in the design and evaluation of most software, greatly impacting the lives of anyone who uses interactive technology and other products. There are many ways to design and build applications for people, so what methods can increase the likelihood that our design is the most useful, intuitive, and enjoyable? This course provides an introduction to the field of human-computer interaction, through a user-centered approach to designing and evaluating interactive systems. HCI draws on methods from computer science, the social and cognitive sciences, and interaction design. In this course we will use these methods to: ideate and propose design problems, study existing systems and challenges, explore design opportunities and tradeoffs, evaluate and improve designs, and communicate design problems and solutions to varying audiences.
Requirements/Evaluation: course projects, in-class group work/participation, and exams
Prerequisites: CSCI 136
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 376 (D3) STS 376 (D2)

LEC Section: 01 MR 2:35 pm - 3:50 pm Iris Howley

STS 377 (F) Landscapes in American Literature
Cross-listings: ENGL 376 STS 377 AMST 376
Secondary Cross-listing
This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's Brokeback Mountain.
Requirements/Evaluation: discussion participation; five brief response papers (~2 pages); a mid-semester essay (~5 pages); a final essay (12- to 15-pages)
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? What features do they share as ethical, political, and epistemological practices? What have scientific feminism and feminist science looked like in print and in practice since the middle of the 20th century, and how have they shaped our present, 21st-century technoscientific culture? To address these questions, we will read a set of essays and academic articles that are connected by a trail of citations. We will begin with the editorial introduction to "Science Out of Feminist Theory," a 2017 special issue of Catalyst, and we will circle outward and backward to make sense of the terms and arguments we encounter there. We will read works of theory, like Donna Haraway's "Situated Knowledges," and research write-ups like Pat Treusch's "The Art of Failure in Robotics," and ethnographic work like Sophia Roosth's "Evolutionary Yarns in Seahorse Valley." While some of the readings will be set in advance, students will help shape the syllabus as we travel toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation: discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); final essay (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Science and Technology Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: Central to “Feminist Technoscience” is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also develop feminist accounts of contemporary technoscientific work, even as we critique a number of such accounts from the past several decades.

Winter Study ---------------------------------------------------------------

STS 14 (W) Ethics of Technology

Cross-listings: CSCI 14 PHIL 14 STS 14

Secondary Cross-listing

A prominent company recently realized the machine-learning algorithm trained on its past hiring data had learned a bias against female candidates and so was unsuitable for resume evaluation. But given competing definitions of fairness, how should we decide what it means for an algorithm to be unbiased? Machine vision algorithms are systematically less likely to recognize faces of people of color. Since many face recognition algorithms are used for surveillance, would improving these algorithms promote justice? Deep fakes may pose serious challenges to democratic discourse, as faked videos of political leaders making incendiary statements cast doubt on the provenance of real videos. Do the researchers developing these algorithms, often academics funded by National Science Foundation grants, have an obligation to desist? In a field filled with such vexing questions, the ethical issue most commonly addressed by the media is whether a self-driving car should swerve to hit one person in order to avoid hitting two. In this class, we will go beyond the headlines to explore the ethics of technology. We will discuss issues such as transparency, bias and fairness, surveillance, automation and work, the politics of artifacts, the epistemology of deep fakes, and more. Our discussion will rely on articles from the course packet, enlivened by discussions with experts in the field over Skype. Students will apply their ethical knowledge to write multiple newspaper length op-eds arguing for their views. If students choose to submit these op-eds for publication, the instructor will coach them on appropriate procedures and venues. Adjunct Instructor Bio: Kathleen Creel '10 is an advanced doctoral student in the Department of History & Philosophy of Science at the University of Pittsburgh. Her research focuses on epistemic and ethical issues in computer science and its scientific applications, such as transparency in machine learning and the ability of algorithmic decisions to provide reasons.

Requirements/Evaluation: 3 op-eds for a total of 10 pages

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: based on a written paragraph expressing interest

Grading: pass/fail only

Materials/Lab Fee: $20

This course is cross-listed and the prefixes carry the following divisional credit:

STS 99 (W) Independent Study: Science and Technology Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

- Gregory C. Mitchell, Associate Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology, Chair of Women's, Gender, and Sexuality Studies; affiliated with: Anthropology and Sociology; on leave 2019-2020
- James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Professor of Sociology; on leave 2019-2020
- Grant Shoffstall, Visiting Assistant Professor of Sociology
- Christina E. Simko, Assistant Professor of Sociology
- Ben Snyder, Assistant Professor of Sociology

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements
For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

**Core Courses**
Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**
- ANTH 101 How to Be Human

**Sociology**
- SOC 101 Invitation to Sociology

**Joint Courses**
- ANSO 205 Ways of Knowing
- ANSO 305 Social Theory
- ANSO 402 Senior Seminar

**Elective Courses**
Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

**STATISTICS AND DATA ANALYSIS**
In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

**AREA STUDIES CONCENTRATION**
Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

**LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY**
Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. We credit two, and in special cases three courses.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.
Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

SOC 101  (F)(S) Invitation to Sociology

An introduction to sociological analysis. The course focuses on the relationship of individual men and women to the social world and introduces students to systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Veblen, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict.

Class Format: discussion

Requirements/Evaluation: a take-home midterm exam, a class presentation and a final

Prerequisites: none

SOC 201  (S) Science, Technology, and Human Values

Cross-listings: HSCI 101  STS 101  SOC 201

Secondary Cross-listing

This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to
do cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-years and sophomores

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

SOC 210 (S) Networks of Power: Technology in Human Affairs

Cross-listings: SCST 210 SOC 210

Primary Cross-listing

Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly the constructivist and determinist theories, by examining major technological innovations that shaped society over the past century, including electrification, automobiles and the highway system, radio and television broadcasting, and the internet and social media. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people's lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, 15- to 20-page seminar paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 18

Grading: no pass/fail option, yes fifth course option

Not offered current academic year

SOC 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and
climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

**Class Format:** discussion

**SOC 212 (F) Understanding Social Media**

Over just the last twenty years--beginning with Napster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

**Requirements/Evaluation:** attendance and participation, two 5-page writing assignments, final exam

**Prerequisites:** none

**Enrollment Limit:** 15

---

**SOC 216 (F) The City**

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to
provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

**Requirements/Evaluation:** response papers, mid term exam and final research paper

---

**SOC 218 (S) Law and Modern Society**

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

**Class Format:** discussion

**Requirements/Evaluation:** a short paper and midterm and final exams

**Prerequisites:** none

**Enrollment Limit:** 35

**Expected Class Size:** 35

**Grading:** no pass/fail option, yes fifth course option

---

**SOC 221 (S) Money and Intimacy**

Can money buy love and care? The course will consider this taboo question from a sociological perspective. We will look into how relevant this question has been over the course of history, what forces have contributed to the shift in thinking about it, and, most importantly, how sociological research helps us understand its current ramifications. We will discuss a wide range of aspects of family life: the relationship between arranged marriage and romantic relationship, the role of inheritance in family and social life, the distribution of resources in the context of modern family forms (most notably remarriages), and the outsourcing of care for dependents. Intimacy bears different value and content in these changing contexts. The course will further look into the changing character of new economy where “people’s skills” are ever more required from employees (emotional labor) and where intimacy, care, and/or sex constitute purchasable commodities. A reflection on the growth of new technologies will complicate some of the discussed concepts and notions, but throughout a common denominator of our discussion will be the role of social inequality.

**Requirements/Evaluation:** classroom participation and a final research paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors

Cross-listings:  SOC 228  STS 229
Primary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing if they are being observed. In Discipline and Punish, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Are these technologies always bad? Can they be used for good? Topics include: the historical origins and expansion of surveillance in modern societies, the emerging total surveillance state in Baltimore City, the U.S. military drone program, surveillance in the workplace, and whether social media is turning us all into self-surveillance addicts.

Requirements/Evaluation: discussion participation, six reading responses (1- to 2-page papers), Facebook data essay (3-5 pages), final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 228 (D2) STS 229 (D2)

Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance in Baltimore City and the question of if and when surveillance is appropriate there given the city's current crisis of gun murders. Students will discuss whether and how to conduct surveillance in a context shaped by deep racial segregation and class inequality.

Fall 2019

SEM Section: 01  MR 2:35 pm - 3:50 pm  Ben Snyder

SOC 230  (F) Memory and Forgetting

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include self-identity, memoirs, and oral history; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: active class participation, four response papers (2 pages each), an autobiographical essay (4-5 pages), and a final research paper (8-10 pages) with class presentation
SOC 234 (S) How Emotions Work

What could be more personal and unique than one's own emotions? Over the last century, sociologists, anthropologists, historians, and social psychologists have challenged this taken for granted view of emotion, revealing just how much context, institutional structures, and history shape feeling. Emotion does not just emerge from an individual's brain and body; it is also a product of intersubjective dynamics outside the individual. In this deeply interdisciplinary course, students explore how societies shape emotion. Beginning with psychological research on the brain/body connection, we build a capacious model for how social context, norms, and institutions interact with individual psychology to produce both conscious and unconscious forms of feeling. As the course progresses, we zoom further out from the individual level and unpack emotional dynamics at the national, cross-cultural, and civilizational levels. Along the way, we take a deeper look at specific emotions, including love, shame, sympathy, sadness, and happiness. The course concludes by focusing on a pressing social problem—the seemingly global crisis of mental illness on college and university campuses. What is causing this crisis? What can we do to address this issue right here in our community?

Requirements/Evaluation: participation, reflective essay (3-5 pages), emotion map activity, open space meeting, policy memo (1-2 pages), final paper (8-10 pages)

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Anthropology and Sociology majors

SOC 240 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper
Prerequisites: none

SOC 241 (S) Meritocracy

Cross-listings: PSCI 241 SOC 241

Secondary Cross-listing
Although an infinitesimal number of Americans have degrees from Harvard or Yale Universities, 33% of the top decision makers in the second Obama administration did. So do eight of the country's nine sitting Supreme Court Justices. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy --- rule by the intellectually talented --- in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Requirements/Evaluation: two papers, take-home final exam, class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Political Science and Sociology majors, first-years and sophomores intending a Political Science or Sociology major

SOC 244 (S) What They Saw in America
Cross-listings: AMST 244 SOC 244 HIST 366

Primary Cross-listing
This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.
Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages
Prerequisites: none
Enrollment Limit: 9
Enrollment Preferences: juniors and seniors; final selection for the course will be made on the basis of an interview with the instructor

SOC 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE)
Cross-listings: RUSS 248 GBST 247 SOC 248

Primary Cross-listing
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.
Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Anthropology, Sociology, and Russian majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RUSS 248 (D1) GBST 247 (D2) SOC 248 (D2)

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Not offered current academic year

SOC 252 (F) Moral Life in the Modern World
Cross-listings: SOC 252 REL 286

Primary Cross-listing
This interdisciplinary seminar attempts to locate and examine modern moral life (i.e., the ethical dimension of modern culture) in its broader historical and cultural context. The aim of the course is less to analyze and debate the theoretical moralities of philosophers and theologians, than it is to interpret and attempt to understand the lived moralities that people actually practice and carry out; that shape conduct and selfhood in the modern world. Part I of the course will provide a guided introduction to a range of contested issues in the study of ethics and morality: moralism, moral relativism, and the nature of modern moral discourse; moral truth, and value freedom; the differences between normative and descriptive ethical inquiry; “thick” and “thin” moral concepts, and the historically variable relationships between lived moralities, theoretical moralities, and moral customs. In Part II we will work through a series of case studies that take up the following issues: moral life in corporate, urban, and suburban contexts; media, moralism, and moral panics; business ethics; race and racism; depersonalization, war and genocide. The course will furthermore examine ethics and morality “in,” “through,” and “of” literature, as students will select, read, and critique a work of fiction.

Requirements/Evaluation: weekly discussion précis, film screenings, two book review essays, class presentations, and a take-home midterm

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Sociology and Anthropology students
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option

Not offered current academic year

SOC 264 (S) Transnational Activism: Practice, Problems, Ethics (DPE)
Cross-listings: SOC 264 WGSS 263

Secondary Cross-listing
The world's got problems. These problems don't respect national boundaries. This class looks at how activists have engaged across borders and with transnational institutions in order to address transnational problems like class inequality, sexism, homophobia, climate change, and more. It asks: what are the different forms that transnational activism takes and how have transnational activists advanced their goals? Why and how have transnational activists' efforts failed? What are the practical and ethical difficulties associated with transnational activism? What does ethical transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.

Requirements/Evaluation: class attendance/participation; critical profile of transnational activist; essay or project proposal, final essay or project
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Women's, Gender, and Sexuality Studies majors and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 264 (D2) WGS 263 (D2)

Difference, Power, and Equity Notes: This course centers activism organized around various axes of difference, enabling students to learn about how various groups are defining and pursuing equity. It requires students to explicitly engage the question of ethical intervention in political movements, stressing attentiveness to the dynamics of privilege and marginalization internal to movements.

SEM Section: 01 MR 2:35 pm - 3:50 pm Greta F. Snyder

SOC 291 (S) Religion and the American Environmental Imagination
Cross-listings: REL 291 SOC 291 ENVI 291

Secondary Cross-listing
This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 12

SOC 301 (F) Social Construction (DPE)
Cross-listings: SCST 301 COMP 315 REL 301 SOC 301 WGSS 302

Secondary Cross-listing
“Social construction” can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to
everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

**Requirements/Evaluation:** regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion majors, then majors from cross-listed departments

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

SCST 301 (D2) COMP 315 (D1) REL 301 (D2) SOC 301 (D2) WGSS 302 (D2)

**Difference, Power, and Equity Notes:** Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

**Attributes:** PHIL Related Courses

Not offered current academic year

**SOC 303 (S) Cultures of Climate Change**

**Cross-listings:** ENVI 303 SOC 303

**Secondary Cross-listing**

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

**Requirements/Evaluation:** a 15- to 18-page research paper and several shorter writing assignments

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

SOC 314 (F) The Social Ecology of Racial and Gender Inequity (DPE)

Cross-listings: WGSS 314 SOC 314

Secondary Cross-listing

Why the political furor over monuments? What would a feminist city look like? Does racial justice require integration? This course trains your focus on space and place, asking you to take a socioecological perspective on race, gender, and other axes of privilege and marginalization. In it, we examine how ideas about race, gender and more shape space as well as how the design of space reinforces social constructs and power relations. After examining specific regions (the city, the suburb, the country) and their relation to one another, we examine specific sites (public transport, public toilets, libraries, houses). The course enables students to better understand the tenacity of inequity by drawing attention to its spatial dimension while at the same time introducing students to -- and providing students tools to engage in -- spatial interventions designed to disrupt vicious social-spatial cycles.

Requirements/Evaluation: attendance, class facilitation, problem identification report, two presentations, reflection

Prerequisites: WGSS/SOC Majors

Enrollment Limit: none

Enrollment Preferences: Women’s, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 314 (D2) SOC 314 (D2)

Difference, Power, and Equity Notes: This course introduces students to a socioecological approach, giving them a lens which can help them understand how important axes of difference--race and gender--are socially constructed as well as the stubborn persistence of racial and gender power differentials. Students in this course will be required to apply this lens to their own experience, as well as to discuss difficult questions about different obstacles and potential paths to greater equity in social relations.

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Fall 2019

SEM Section: 01 TF 2:35 pm - 3:50 pm Greta F. Snyder

SOC 315 (F) Culture, Consumption and Modernity

How do lifestyles, fashions and trends appear and evolve? Are we authors of our own taste? What structures our choices of goods and activities? What is it that gives meaning to objects and makes them desirable? Are there non-consumer societies in the modern world? How has globalization changed the ways people consume in different parts of the globe? This course will explore consumption and consumer practices as products of modernity and will analyze the political, cultural and social agendas that have transformed consumption over time. Politics of consumption (the way in which seemingly free and independent consumption choices aggregate into the existing system of global capitalism) will be treated alongside its symbolic element: the role of consumer practices in creating and articulating identities, building relationships and creating solidarities. We will look at fashion, advertising, arts and shopping in places as varied as nineteenth-century France, socialist Russia, and in contemporary United States, tracing both the mechanisms that structure patterns of consumption, and the consequences that these patterns have for the larger social order.

Requirements/Evaluation: full participation, ten journal entries and a 15-page term paper that will go through a draft and revision stage

Prerequisites: none; open to first year students

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Not offered current academic year
SOC 324 (S) Memory and Identity (DPE)

Our sense of self is inextricably tied to our understanding of our past, both as individuals and as members of society. This sense of origins, however, is far from natural; it itself has its origins in the debates and politics of the time, and evolves under an array of influences. This course analyzes discourses of collective and individual identity and the mechanisms involved in the formulation of the individuals' sense of their place in the world. Topics include: media of memory, politics of commemoration, nostalgia and selective forgetting, narratives of trauma and of a "golden age," the invention of tradition, and battles over remembrance and heritage, such as the struggles over the proper way to face the difficult past around the world, with a particular emphasis on the United States and on the memory wars in the post-Soviet space.

Requirements/Evaluation: extensive class participation, several short papers, and a final research project with class presentation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it explores the diversity of the ways in which communities imagine and engage with their past, and puts struggles over memory in the context of groups’ struggles for power and visibility.

Not offered current academic year

SOC 326 (S) Being Mortal

One of the defining features of the human condition is our awareness of our own mortality. How do we cope with this awareness? How does it influence our social institutions? We will begin by exploring how social theorists such as Emile Durkheim, Max Weber, Ernest Becker, and Peter Berger grappled with mortality and its significance for human social life. We will then turn to the social institutions that structure our confrontation with mortality today. How, why, and with what consequences has death been sequestered in modern Western societies and set aside from the social world of the living? What rites and rituals remain for coping with death and dying, and how do our cultural assumptions influence the experiences of grief, loss, and mourning? How does modern medicine, which is oriented toward cure but must ultimately confront the inescapable realities of aging and death, deal with mortality? How have hospice, palliative care, and debates over physician-assisted suicide changed the landscape in recent years? How do societies cope with collective losses in the aftermath of wars, disasters, and atrocities? Our focus will be on the United States, but we will also consider cross-cultural comparisons.

Requirements/Evaluation: three 6- to 7-page papers; an in-class presentation; thoughtful and consistent participation in class discussion
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Sociology and Anthropology majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option

SOC 328 (F) American Social Dramas

Cross-listings: AMST 328 SOC 328 COMP 325 THEA 328
Primary Cross-listing

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention
to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

**SOC 329 (F) Work and Future of Capitalism**

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as global commodity chains, the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. Through a series of essays, culminating in a final paper, the course concludes by asking students to imagine what work might look like in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about restructuring (or even overturning) capitalism to allow them to flourish?

**Requirements/Evaluation:** participation, three utopia essays (3-5 pages), paper workshop, final paper (10-12 pages)

**Prerequisites:** none

**Enrollment Preferences:** Anthropology and Sociology majors

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

Fall 2019

SEM Section: 01  W 1:10 pm - 3:50 pm  Ben Snyder

**SOC 332 (F) Life and Death in Modernity**

Death is a biological fact. Death is also one of the few universal parameters in and through which social worlds and individual lives are created. Death, in other words, is a primary source of the material and symbolic activities through which humans work to construct, legitimate, and maintain social realities. To attend to "ways of death", then, is to attend simultaneously, if only indirectly, to "ways of life"-the hopes and fears, the ways and wants of a people. In this course we will ask: How, why, and with what manner of consequence has it come to be that, under late-western modernity, the aged, the sick, the dying, the bereaved, and indeed death itself, are routinely "set aside", hidden from view and thus awareness, institutionally sequestered from those of us among the living? We will attend to the historical emergence of the institutional forms that perpetrate this sequestration, and show how they have become tightly articulated with one another: hospitals, nursing homes, hospice centers, funeral homes, cemeteries. We will furthermore examine the peculiar bodies of expert knowledge that have arisen in tandem with these institutional forms, among them gerontology, thanatology, and bereavement therapy, showing how they have conspired in the (bio)medicalization of aging, death, and grief. Other topics to be explored include the
commodification and consumption of health and well-being; the emergence of anti-aging medicine and "popular" rationalities of human life extension; cryonic suspension, zombies, and the paranormal.

Class Format: seminar

Requirements/Evaluation: weekly journal entries, film screenings, take-home midterm, class presentations, and a final 12- to 15-page paper to be decided in consultation with the instructor

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Sociology and Anthropology students

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: PHLH Bioethics + Interpretations of Health

Not offered current academic year

SOC 338 (F) Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: STS 338 HSCI 338 REL 338 SOC 338

Primary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism: eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Requirements/Evaluation: attendance and participation, informal weekly writing, 15- to 20-page seminar paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors and Science and Technology Studies concentrators

SOC 350 (S) Max Weber & Critical Theory or Rationalization & Its Discontents

Cross-listings: COMP 349 SOC 350 REL 350

Secondary Cross-listing
We live in an age characterized by unprecedented technological and scientific progress—we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom—and yet modern life often appears fundamentally meaningless and lacking in ultimate value—we work, we eat, we excrete, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become enslaved by the very things that were supposed to have set us free. Weber’s key innovation was to trace the grand trajectory of Western “rationalization”—the historical attempt to produce a world in which “one can, in principle, master all things by calculation.” Further, he demonstrated how this rationalization produced not just mastery over nature, but also “the disenchantment of the world” - value fragmentation, hyper-specialization, bureaucracy, and ultimately the “iron cage” of modernity. The first part of this course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the iron cage of modernity.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly critical reflections, 5- to 6-page midterm paper, 10- to 15-page final essay

Prerequisites: none

Enrollment Limit: 15

SOC 362 (F) Story, Self, and Society

Cross-listings: COMP 362 SOC 362

Primary Cross-listing

From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"-that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This tutorial will grapple with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? Specific topics will include illness narratives, confessional culture, digital stories, oral history, and memoir. As a capstone exercise, each student will construct a narrative analysis focused on a memoir that we will select collectively. The course will conclude with a final seminar meeting during which each student will tell a story of their own, and we will work together to consider how the theories we have encountered throughout the semester might illuminate our own narratives.

Requirements/Evaluation: 5-page paper every other week; comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest; priority consideration will be given to ANSO and COMP majors

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 363 (F) Cold War Technocultures

Cross-listings: SCST 401 SOC 363

Primary Cross-listing

In this seminar students will pursue sociohistorical analyses of Cold War American culture(s) by attending to key points of intersection between politics, aesthetics, and major technoscientific developments during this period. Part I will focus principally on the emergence of the computer and its role in shaping American infrastructure and styles of thought aimed at Soviet “containment.” We will trace the historical threads connecting MIT’s “Whirlwind” computer project and the SAGE continental air defense system; nuclear wargaming at the RAND Corporation and the aesthetics of “thinking the unthinkable”; the science of cybernetics and the prospect of automation; and ultimately the role of computation, intermedia, and systems logic in perpetrating the atrocities of the Vietnam War. Part II will take up the Cold War space race—from Luna 2, Sputnik I, and Yuri Gagarin to Projects Mercury, Gemini, and the Apollo moon landing. Within this context we will also consider the Club of Rome’s Limits to Growth report; plans backed by NASA for the industrialization and colonization of outer space; and the place of science-fiction as a Cold War aesthetic (print, televisual, cinematic). Part III, finally, will explore key moments of conflict, resistance, appropriation, and unintended consequences of Cold War technoscientific developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural casualty of the U.S./CIA-backed Chilean coup of 1973; the New Left, the American counterculture, new social movements, and the countercultural roots of new media and neoliberalism.

Requirements/Evaluation: two 5-page book review essays, weekly 1-page papers, midterm essay exam, final essay exam

Prerequisites: STS 101 or instructor consent; prior coursework in Anthropology and Sociology and/or History

SOC 368 (F) Technology and Modern Society

Cross-listings: SOC 368 ENVI 368

Primary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Medication: those processes by which previously non-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addiction, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. The course will to this end conclude with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture

SOC 372 (S) Time and Temporality

Duration, rhythm, speed, pace, trajectory, sequence, articulation, busyness, boredom, flow--time is one of the most fundamental categories of our experience of reality. Since the founding of the discipline, sociologists have been interested in how time, while seemingly given and natural, is deeply influenced by history and society. This two-part course will introduce students to the sociological analysis of time and temporality. In part one, students will explore the emergence of the so-called "modern western temporal order"--the sense of time that many people take for granted as the way things are. We will excavate the historical roots of schedules, clocks, calendars, and time zones; examine how capitalism and colonial conquest disseminated particular notions of time around the globe; and discuss leading theories of how constructions of time change through history and vary among communities. In part two, we will focus on one of the most frequently lamented and celebrated qualities of modern temporality: acceleration. Is the world speeding up? Why do so many people feel always pressed for time? What are the promises and limits of speed, acceleration, and ceaseless change for building a robust democratic society?

Requirements/Evaluation: participation, time diary analysis (3-5 pages), final paper (10-12 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15
SOC 386 (F) Going Nuclear: American Culture in the Atomic Age

Cross-listings: SOC 386 HIST 387

Primary Cross-listing
Following the first use of nuclear weapons against Japan at the end of World War II, atomic science has fueled Americans' fears, hopes, nightmares, and fantasies. This course will examine various aspects of American nuclear culture in the early-Cold War period. It will consider topics ranging from the Manhattan Project to delivery of the bombs for combat, scientists' movements to abolish atomic weapons and expand peaceful atomic energy production, and the destructive consequences of the bomb's initial use and subsequent testing. The class will also investigate the role of the nuclear arms race in the Cold War, the development of civil defense and bomb shelter culture in the United States, and dystopian fiction about the nuclear apocalypse. Employing both historical and sociological perspectives, we will explore the interactions between science, diplomacy, politics, and culture in the nuclear age.

Class Format: discussion

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper

SOC 11 (W) Excavating the Purple Bubble

Cross-listings: HIST 11 SOC 11

Primary Cross-listing

People often describe Williams College as an “intense” place—a “purple bubble” with its own peculiar micro-culture. This bubble can be stressful, exhausting, and work-obsessed, but also bursting with creative energy and a determination to change the world, not to mention creating experiences and relationships that become deeply nostalgic and lead to a lasting connection. How have these characteristic structures of feeling been built over time? In this course, we will attempt to build a picture of how the emotional cultures of Williams have evolved by excavating their histories. From the powerful emotions triggered by transitional moments in the College’s history, such as feelings of inclusion and exclusion by women and people of color, to the everyday emotions of friendship, romance, and work stress, students will analyze materials from the college archives, the archive of the Record, and other sources of institutional memory to uncover the social history of emotions at Williams. Depending on enrollments, students will divide into research clusters focusing on particular topics, which might include: stress and work-obsession, turning points and change, wonder and discovery, nostalgias, staff morale, mental illness and wellness discourse, among other possible topics. Students will spend time in class discussing readings and curating a small collection of archival materials to be presented at the end of the course. Outside class, students will spend time in the archives. As a theoretical and methodological guide, we will draw primarily on scholarship from the sociology and history of emotion, including Norbert Elias, Cas Wouters, Raymond Williams, William Reddy, and Barbara Rosenswein.

Requirements/Evaluation: final project or presentation

SOC 15 (W) Photographic Literacy and Personal Vision

Cross-listings: SOC 15 ANTH 15

Secondary Cross-listing
When you look at a photograph, what is it really saying? How can you make a photograph that says what you want to say? This course is about seeing with emotion and literacy, and making photographs that reflect your own personal voice and vision. This is not a course on technical photography—this is about breaking down the barrier between your ideas and your camera. Students will conceptualize and photograph a project of their own choosing. Whether a narrative documentary project or a more abstract exploration of form, students are expected to photograph on their own outside of class for at least five hours a week. Students must own or borrow a digital camera. Williams has a stock of excellent cameras available for loan. Mondays and Fridays we'll be looking at amazing historical and contemporary photographic work to cover a broad range of what is possible with the medium and discussing what the current conversations and controversies are within the practice. We'll be looking at slides, screens, photobooks and gallery shows to get a sense of how photographs function differently depending on how they're shown. The work we discuss is always adapted to reflect students' interests. On Wednesdays we critique each others' work—we look at students' top images for the week and try to reconcile them against the project's conceptual basis. We have a focused discussion about each student's work for 20-30 minutes, and how to make each project better. After critiques I'll be sending everyone photographic references to use for inspiration depending on your subject matter and aesthetic approach. At the end of the course the class will design and produce a campus exhibition of their photography. This event will serve as a synthesis of all the knowledge students gained while working together to make each others' projects stronger. No photography experience is necessary! Anyone is ready to start reading photographs critically, and establish a concept-driven workflow that will serve you well as long as you take pictures. Adjunct Instructor Bio: Ben Brody is an award-winning photographer working on long-form projects related to the American wars in Iraq and Afghanistan, and their aftermath. Themes of generational trauma, propaganda, and tragic comedy recur in his visual approach. His new book, Attention Servicemember, published by Red Hook Editions, will be available this fall.

Requirements/Evaluation: final project or presentation

MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics. Students interested in continuing their study of statistics in graduate school should strongly consider taking Math 350/351 in addition to the
other requirements.

Mathematics (2 courses)
- MATH 150 or 151 Multivariable Calculus or equivalent high school course
- MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151) before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

Computer Science (1 course)
- CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

Core Courses (4 courses)
- STAT 201 Statistics and Data Analysis or STAT 202 Introduction to Statistical Modeling
- STAT 346 Regression and Forecasting
- STAT 341 Probability
- STAT 360 Inferential Statistics

Continuation (2 courses)
Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

Capstone Course (1 course)
The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

Colloquium Requirement
Participation in the Department Colloquium, in which each senior major presents a talk on a mathematical or statistical topic of their choice. Each major must also attend at least 20 colloquia, and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

PLACEMENT
Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

NOTES
Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

Double Counting: No course may count towards two different majors.

Early Senior Capstone Course: In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

Planning Courses: Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

THE DEGREE WITH HONORS IN STATISTICS
The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be:
Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)
It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Requirements/Evaluation: quizzes and exams
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit: 50
Expected Class Size: 40
Grading: no pass/fail option, no fifth course option
Unit Notes: students with calculus background and social science interest should consider STAT 161; students with MATH 150 should enroll in STAT 201; students with a 5 on AP Stats should enroll in STAT 202; students with a 4 on AP Stat should consult the department

STAT 201  (F)(S)  Statistics and Data Analysis  (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.
Requirements/Evaluation:  quizzes and exams
Prerequisites:  MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent
Enrollment Limit: 40
Expected Class Size: 40
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  students with a 5 on AP Stats should enroll in STAT 202; students with a 4 on AP Stats should consult the department; students with MATH 130/140 background should consider STAT 161; students with no calc. should consider STAT 101

STAT 202  (F)(S)  Introduction to Statistical Modeling  (QFR)
Data come from a variety of sources sometimes from planned experiments or designed surveys, but also arise by much less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential as well as its limits to answer questions about the world. We'll emphasize applications over theory and analyze real data sets throughout the course.

Requirements/Evaluation: homework, exams and projects
Prerequisites: AP Statistics 5 or STAT 101; 161 or 201 or permission of instructor
Enrollment Limit: 25
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Unit Notes: students with a 4 on the AP Stats exam should contact the department for proper placement

STAT 341  (F)(S)  Probability  (QFR)
Cross-listings: MATH 341  STAT 341
Secondary Cross-listing
While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 250 or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)

STAT 342  (F)  Introduction to Stochastic Processes  (QFR)
Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time $t$ or the accumulated claims paid by an insurance company in an interval of time $t$. This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

**Requirements/Evaluation:** weekly homework, classwork, and exams

**Prerequisites:** STAT 341

**Enrollment Limit:** 30

**Enrollment Preferences:** senior Statistics majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

---

**STAT 344 (F) Statistical Design of Experiments (QFR)**

What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design experiments with the fewest number of observations possible that are still capable of understanding which factors influence the results. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use both the statistics program R and the package JMP to carry out the statistical analyses.

**Requirements/Evaluation:** problem sets, midterm, final exam, project

**Prerequisites:** STAT 201, 202, or equivalent

**Enrollment Limit:** 20

**Enrollment Preferences:** Statistics majors, seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Attributes:** COGS Related Courses

---

**STAT 346 (F)(S) Regression and Forecasting (QFR)**

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the standard method for analyzing continuous response data and their relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

**Requirements/Evaluation:** exams, homework, and a project

**Prerequisites:** STAT 201 or 202, and MATH 150 and 250; or permission of instructor

**Enrollment Limit:** 22

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Attributes:** EVST Methods Courses
STAT 355 (S) Multivariate Statistical Analysis (QFR)
To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.
Requirements/Evaluation: homework and exams
Prerequisites: MATH 250, and STAT 346 or permission of instructor
Enrollment Limit: 25
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

STAT 356 (S) Time Series Analysis (QFR)
Time series--data collected over time--crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams
Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor
Enrollment Limit: 30
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

STAT 359 (S) Statistical Computing (QFR)
This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating, visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats, techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will be project-based.
Requirements/Evaluation: based primarily on projects, homework, and exams
Prerequisites: STAT 201 or 202 and CSCI 134, 135, or 136
Enrollment Limit: 30
Enrollment Preferences: juniors and seniors, Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
STAT 360  (S)  Statistical Inference  (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Requirements/Evaluation: problem sets and exams
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Enrollment Limit: 30
Enrollment Preferences: Statistics majors
Expected Class Size: 30
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)

Spring 2020
LEC Section: 01    MR 2:35 pm - 3:50 pm    Shaoyang Ning

STAT 362  (F)  Design of Experiments  (QFR)
How do you get informative research results? By doing the right experiment in the first place. We'll look at the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. Using a framework of optimal design, we'll examine the theory both of classical designs and of alternatives when those designs aren't appropriate. On the applied side, we'll make extensive use of R to work with real-world data.

Requirements/Evaluation: based primarily on projects, homework, and exams
Prerequisites: STAT 346
Enrollment Limit: 30
Enrollment Preferences: seniors/juniors and Statistics majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3)  (QFR)

STAT 365  (F)  Bayesian Statistics  (QFR)
The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Requirements/Evaluation: homework and exams
Prerequisites: STAT 201 and MATH 150 and 250, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: juniors and seniors, Statistics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
STAT 368 (S) Modern Nonparametric Statistics (QFR)

Many statistical procedures and tools are based on a set of assumptions, such as normality or other parametric models. But, what if some or all of these assumptions are not valid and the adopted models are miss-specified? This question leads to an active and fascinating field in modern statistics called nonparametric statistics, where few assumptions are made on data's distribution or the model structure to ensure great model flexibility and robustness. In this course, we start with a brief overview of classic rank-based tests (Wilcoxon, K-S test), and focus primarily on modern nonparametric inferential techniques, such as nonparametric density estimation, nonparametric regression, selection of smoothing parameter (cross-validation), bootstrap, randomization-based inference, clustering, and nonparametric Bayes. Throughout the semester we will examine these new methodologies and apply them on simulated and real datasets using R.

Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 201 and STAT 346, or permission of instructor.
Enrollment Limit: 30
Enrollment Preferences: senior Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods.

Spring 2020
LEC Section: 01   TR 11:20 am - 12:35 pm   Shaoyang Ning

STAT 372 (S) Longitudinal Data Analysis: Modeling Change over Time (QFR)

This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 201 and STAT 346
Enrollment Limit: 30
Enrollment Preferences: junior and senior Statistics majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

STAT 410 (F) Statistical Genetics (QFR)
Genetic studies explore patterns of genetic variation in populations and the effect of genes on diseases or traits. This course provides an introduction to statistical and computational methods for genetic studies. Topics will include Mendelian traits (such as single nucleotide polymorphisms), genome-wide association studies, pathway-based analysis, and methods for population genetics. Students will be introduced to some of the major computational tools for genetic analysis, including PLINK and R/Bioconductor. The necessary background in genetics and biology will be provided alongside the statistical and computational methods.
Requirements/Evaluation: project work, homework, exams, and contribution to discussion
Prerequisites: STAT 346 and STAT 360, or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Statistics majors, juniors and seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

STAT 440 (F) Categorical Data Analysis (QFR)
This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. All methods can be viewed as extensions of traditional regression models and ANOVA.
Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 346 and STAT 360
Enrollment Limit: 14
Enrollment Preferences: seniors and Statistics Majors
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Attributes: PHLH Statistics Courses
STAT 442  (S)  Statistical Learning and Data Mining  (QFR)

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Requirements/Evaluation:  homeworks and projects
Prerequisites:  STAT 346 or permission of instructor
Enrollment Limit:  14
Enrollment Preferences:  seniors and Statistics Majors
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D3)  (QFR)

LEC Section: 01    MWF 8:30 am - 9:45 am     Richard D. De Veaux

STAT 458  (F)  Spatio-Temporal Data  (QFR)

Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information--introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Requirements/Evaluation:  project work, homework, exams, and contribution to discussion
Prerequisites:  STAT 346, or permission of instructor
Enrollment Limit:  14
Enrollment Preferences:  Seniors and Statistics majors
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Winter Study

---------------------------------
STAT 10 (W) Interactive Data Visualization

Data visualization is an important means of detecting patterns in data and communicating results to the public. However, if designed poorly, data visualizations can also be ineffective or misleading. Tools for interactive data visualization have become increasingly popular in recent years, giving viewers more autonomy in data exploration. In this course, we will learn techniques for effective data visualization and use these criteria to evaluate visualizations (both static and interactive) in academic publications and in the news. This class will meet about 8 hours per week for lecture and discussion. In addition to participating in class discussions, students will be expected to keep a daily journal, complete short R programming exercises, and create a final project using interactive data visualization tools such as R Shiny.

Requirements/Evaluation: class participation, daily journal, final project and presentation

Prerequisites: some experience in R programming

Enrollment Limit: 15

Enrollment Preferences: preference will be given based on a one-paragraph explanation of the student's interest in the course

Grading: pass/fail only

Winter 2020

LEC Section: 01    MWF 10:00 am - 11:50 am     Anna M. Plantinga

STAT 11 (W) Introduction to Statistical Analysis of Network Data

Networks are everywhere in our connected world, from social networks like facebook and twitter, to information networks like citation and coauthors, from biological network like neural and ecological networks, to technological networks like internet connection or power grids. In recent years, there has been an explosion of network data. How do we learn and represent information from these data? In this course, you will see examples from different types of networks. We will learn how to organize, visualize and describe network data using proper tools. Additionally, since things are connected in networks, we will also explore statistical methods to overcome this challenge with dependent data. Tentatively course work includes 2-3 class meetings per weeks for lectures and assignments. Students are also expected to read related materials and finish a final project.

Requirements/Evaluation: final project or presentation

Prerequisites: STAT 201 or equivalent

Enrollment Limit: 10

Enrollment Preferences: students with more statistics background and experience with R have priority

Grading: pass/fail only

Winter 2020

STAT 20 (W) The History, Geography and Economics of the Wines of France

The history of wine making in France is long, dating back to the Greeks and later the Romans. Of course, geography and climate play an essential and important role in grape growing. The first areas to be planted were the areas around present day Marseille, (Massalia in Ancient Greece) in Provence, and the areas just north farther up the Rhône river valley. We will briefly survey the history of wine in France from the Romans through the middle ages, the influence of monasteries on wine production, the impact of the French revolution and the evolution of the modern classification system in the 19th century, which is still in place today. We will look at temperature data and study the relationship between temperature change and quality. We will discuss the impact of wine “scorers” such as Robert Parker as his influence on the economics of the French wine market. Finally, we will discuss the role of wine in French cuisine and the importance of wine to French culture.

THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student’s final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed
Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 30) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department’s recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. Those so interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior Spanish background, the course sequence will consist of Spanish 101-102, Spanish 103 and 104, and three courses in Spanish above the 104 level, with at least one of these courses at the 200-level or higher taken at Williams. If the student starts out the sequence at Spanish 103, in addition to the three courses in Spanish beyond the 104 level (including a 200-level course or higher), two electives may be taken in other departments. One elective should be in Spanish or Latin-American cultural history (art, literature, drama, music) and the other in Spanish or Latin-American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

PLACEMENT

Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, ¡Bienvenida! ¡Bienvenido! We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department's placement exam when it is offered during First Days. The only students who don't need to take the placement exam are those who qualify as “true beginners,” those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar's Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.
Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. Four maximum.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Our Senior Seminars are required for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
This hardly ever happens but could happen if a student doesn’t seek out pre-approval from a faculty member.

RLSP 101 (F) Elementary Spanish
This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.

Class Format: class meets five hours a week and students will complete workbook and lab exercises weekly

Requirements/Evaluation: participation, regular homework exercises, quizzes, a midterm, and a final exam

Prerequisites: This course is for students who have no previous background in Spanish.

Enrollment Limit: 20

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for RLSP 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLSP 101 and 102) are taken

Distributions: (D1)

Fall 2019
LEC Section: 01 M-F 10:00 am - 10:50 am Leyla Rouhi

RLSP 102 (S) Elementary Spanish
This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.

Class Format: the class meets five hours a week; students will complete workbook and lab exercises weekly

Requirements/Evaluation: daily preparation and participation, regular homework assignments, and frequent tests

Prerequisites: RLSP 101; this course is for students who have studied less than two years of Spanish in secondary school

Enrollment Limit: 20
RLSP 103  (F)  Intensive Intermediate Spanish

This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. 
Conducted in Spanish.

Class Format: class meets four hours a week; students in Professor French's conference section will meet with the TA in smaller groups at a time to be scheduled at the start of the semester

Requirements/Evaluation: regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams

Prerequisites: RLSP 101-102 or by Spanish placement exam

Enrollment Limit: 20

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01  MWF 10:00 am - 10:50 am  Jennifer L. French

CON Section: 02  TBA  Jennifer L. French

LEC Section: 03  MWF 12:00 pm - 12:50 pm  Gene H. Bell-Villada

CON Section: 04  W 2:10 pm - 3:00 pm  Gene H. Bell-Villada

RLSP 104  (S)  Upper Intermediate Spanish

This course is a continuation of Spanish 103. It focuses on the review of grammar as well as on refining writing and speaking skills. A variety of written and audiovisual journalistic media will enable students to deepen their understanding of Hispanic cultures.

Class Format: class meets four hours a week

Requirements/Evaluation: weekly 1- to 2-page compositions, regularity of class participation, oral reports, frequent quizzes, a midterm and a final exam

Prerequisites: RLSP 103 or by Spanish placement exam

Enrollment Limit: 22

Expected Class Size: 22

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)
RLSP 105 (F) Advanced Grammar, Composition, Conversation

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with relevant cultural, literary, and political materials centered for the most part on Spain. Students will produce regular grammar and composition exercises as well as oral reports.

Class Format: students are required to participate in the TA sessions once a week in addition to three class sessions

Requirements/Evaluation: regular grammar and composition assignments, a mid-term, a final exam, occasional quizzes, oral reports; active participation and regular attendance required

Prerequisites: RLSP 104, or results of the Williams College Placement Test, or permission of instructor

Enrollment Limit: 22

Enrollment Preferences: first-year students, potential majors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2019

SEM Section: 01 MWF 12:00 pm - 12:50 pm Leyla Rouhi
CON Section: 02 TBA Leyla Rouhi

RLSP 107 (F) Advanced Grammar and Conversation

This course focuses on the development of Spanish linguistic accuracy and oral communication skills. To acquire oral fluency, students will have several opportunities to give presentations in class. They will further guide discussions around topics reviewed in the course. Finally, oral fluency will be developed through daily discussions and conversations with native speakers. Students will perform regular exercises to improve syntax skills, using authentic and meaningful texts. In addition, they will practice their writing by developing different discursive genres.

Requirements/Evaluation: homework, class participation, oral presentations, a midterm and final exam, and a series of communicative projects

Prerequisites: RLSP 104, placement exam results, permission of instructor or Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish majors and certificate students, current and potential

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2019

SEM Section: 01 MWF 8:30 am - 9:45 am Carolina Melgarejo-Torres

RLSP 200 (S) Advanced Grammar and Composition through Literature

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 105, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.
Class Format: discussion

Requirements/Evaluation: a weekly essay based on the stories read in class, written lab exercises, participation in the grammatical and literary discussions, quizzes, a mid-term and a final

Prerequisites: RLSP 105, any course 201+, placement exam or permission of instructor

Enrollment Limit: 19

Expected Class Size: 10-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLSP 201 (F) The Spanish Labyrinth

Do Spaniards really dance flamenco and have dinner at 10:00 pm? Does everyone in Barcelona speak Catalan? How can you learn to separate the stereotypical images of Spain from reality? How can we talk about one "Spain", when the country a complex composite of ancient and diverse cultural remnants mixed with recent influxes of immigrants and separatist movements? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, and times of censorship and repression. Some topics of focus will be the Inquisition, the Civil War, and contemporary Spain's obsession with its own recent past. Secondary texts will also be provided for historical and socio-political background and reference. Conducted in Spanish.

Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Spanish majors and certificate candidates

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

RLSP 202 (S) Introduction to the Analysis of Literature in Spanish (WS)

This course is intended for students who are considering a major in Spanish, including those who have recently completed RLSP 105, 107, or 200. Using a textbook, *Aproximaciones al estudio de la literatura hispánica*, we will study the fundamentals of genre analysis while reading selected works of prose, poetry and drama from Latin America and Spain. Conducted in Spanish. This course is writing intensive because the techniques of planning, writing, and revising essays will all be extensively discussed and put into practice.

Class Format: mixture of lecture, discussion, and writing workshop

Requirements/Evaluation: assignments will include three 5-page essays, a number of shorter papers, and occasional discussion-leading as well as consistent preparation and class participation

Prerequisites: RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who are considering the major in Spanish

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Our commitment to the formal analysis of literature in Spanish lends itself to a sustained and focused attention to student writing. As we learn to analyze works of literature, we will bring our attention to questions of rhetoric, style and structure to bear on our own writing also. Papers will be "work-shopped" throughout the semester; students will also practice peer-editing in pairs. Students will also receive extensive feedback from the professor with the goal of strategic revision.
RLSP 203 (F) From Modernismo to El Boom de la Novela

A survey of some of the leading imaginative writers of Ibero America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the "Boom" period by authors such as Borges, Cortázar, Lispector, and García Márquez. Conducted in Spanish.

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: GBST Latin American Studies Electives

RLSP 205 (F) The Latin-American Novel in Translation (DPE)

Cross-listings: RLSP 205 COMP 205

Primary Cross-listing

A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lispector, the Hour of the Star lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude. Conducted in English

Requirements/Evaluation: class participation, two brief papers, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: Spanish majors, Latina/o Studies concentrators

Expected Class Size: 22

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not carry credit for the Spanish major or the certificate

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 205 (D1) COMP 205 (D1)

Difference, Power, and Equity Notes: This course offers students an opportunity to read some major works of fiction that have challenged the "canon" of European and American literature. Through the readings, class members will understand that great literature comes not only from London or Paris, from the U.S. or Russia. Several of these novels, moreover, directly challenge European and Western cultural hegemony and make an implicit claim for the legitimacy of Latin American cultural concerns.

Attributes: GBST Latin American Studies Electives

Not offered current academic year

RLSP 206 (S) Latin-American Civilizations

An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. Conducted in Spanish.
Class Format: seminar

Requirements/Evaluation: two essays on assigned topics, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLSP 209 (F) Spanish for Heritage Speakers

This course is intended for students of Latino/a heritage. It will address the unique needs of students whose knowledge of Spanish comes primarily from informal and family situations rather than a conventional classroom experience. The goal of the course is to build on and expand students' existing knowledge of Spanish while developing skills for using the language in more formal/academic contexts.

Requirements/Evaluation: homework, class participation, and a series of communicative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: potential Spanish majors/certificate students and LATS concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

SEM Section: 01 MWF 10:00 am - 10:50 am Carolina Melgarejo-Torres

RLSP 211 (S) A Survey of Spanish Literature from the 11th to the 17th Centuries

This course will introduce the student to some of the major works of Spanish literature from its beginnings through the Golden Age. We will study the historical context in which the works were written as well as the literary history of the periods in question. Students will learn methods of textual analysis through readings of relevant literary criticism. Readings will include selected canonical prose, poetry, and drama of the periods; special emphasis will be given to the myth of the coexistence of three religions in Iberia and the often misguided idea of dividing this literature into the categories of 'medieval' and 'Renaissance'. Conducted in Spanish. This course fulfills the pre-1800 requirement for the Spanish major

Requirements/Evaluation: evaluation will be based on class participation, short paper assignments, and a final paper

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2020

LEC Section: 01 TF 1:10 pm - 2:25 pm Leyla Rouhi

RLSP 214 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Primary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the
U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 214 (D1) ENVI 218 (D1)

Difference, Power, and Equity Notes: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"--economic, ecological, and cultural--informs Latin American responses to environmental degradation.

Not offered current academic year

RLSP 220 (S) Women on the Verge

Cross-listings: WGSS 222 RLSP 220

Primary Cross-listing

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish and Comparative Literature majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 222 (D2) RLSP 220 (D1)

Not offered current academic year

RLSP 225 (F) Subalternity, Dictatorship, and the Dream of Emancipation: Paraguay, 1811-Present

Paraguay is at once the most "typical" of Latin American countries and the most enigmatic. With a predominantly Guarani-speaking population, enormous disparities of wealth and poverty, and a political tradition that favors authoritarian dictatorship, Paraguay is also celebrated, in certain circles, as the only Latin American nation that actually achieved economic and political independence when the other republics were fast becoming economic dependencies of Britain and the US in the 19th century. This course explores the subjects of subalternity, dictatorship, and the "dream of emancipation" in Paraguay's cultural production of the 19th, 20th, and 21st centuries. We will examine together the writings of the brilliant novelist Augusto Roa Bastos, especially Son of Man and I the Supreme; stories and poems by Teresa Lamas, Josefina Pla, and others; Paraguay's rich and vibrant tradition of visual art; and works of classic and contemporary film. Conducted in Spanish.

Class Format: seminar

Requirements/Evaluation: three essays of 5-7 pages, shorter writing assignments, discussion-leading, active and engaged class participation
RLSP 228  (S)  Velázquez, Goya, and Picasso

Cross-listings: ARTH 228  RLSP 228

Primary Cross-listing

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Requirements/Evaluation: 3- to 5-page weekly assignment

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Spanish majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

RLSP 230  (F)  Mexican Literature and Film

This course will offer a survey of the rich and varied cultural production of Mexico, from the colonial period to the present. Students will explore a variety of literary genres (novels and shorter works of prose fiction, poetry and essays) as well as film, journalism and other kinds of cultural production within a framework of historical contextualization and formal analysis. Conducted in Spanish.

Requirements/Evaluation: essays, oral presentations, active and engaged class participation

Prerequisites: RLSP 105, placement exam results, permission of instructor or Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish majors and certificate students, current and potential; LATS concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
RLSP 251  (F)  Somos Sur: US-Mexico-Central American Borderlines  (WS)
What are borderlands? How have they been created? How do they affect the life of those who cross or are being crossed by these borders? This course focuses on the cultural production that explores US-Mexico-Central American borderlands and the diverse policies and practices that (re)create and (re)image these borders. In consideration of some of the dictatorships in Central America, the NAFTA agreement and post 9/11 policies, as well as war zones and the drug war; we will explore the concepts of citizenship, migration, nationalism, and (in)visibility in its intersection with gender, racial positioning, and social class. Drawing upon cultural studies, feminist theory, history, and ethnography we will examine materials such as photography, installation art, journalism, literature, film, and music. This interdisciplinary approach aims to shed light on the causes and consequences of the political, cultural, and economic narratives involved in our current understanding of these fronteras. This class is conducted in Spanish; readings will be in both English and Spanish.

Requirements/Evaluation: essays, oral presentation, participation
Prerequisites: RLSP 105, placement exam results, permission of the instructor or the Department Chair
Enrollment Limit: 19
Enrollment Preferences: Spanish majors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D1)  (WS)
Writing Skills Notes: Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

Fall 2019
LEC Section: 01    MR 1:10 pm - 2:25 pm     Roxana A. Blancas Curiel

RLSP 266  (S)  The Exemplary Fiction of Miguel de Cervantes
Miguel de Cervantes (1547-1616) is considered by some to be the father of the modern novel, and known worldwide for authorship of Don Quijote. This course will offer students the opportunity to read another body of work by Cervantes: his collection of short prose works collectively titled Las novelas ejemplares. Attention will be given to the structure and design of the tales, the socio-political and literary context that shaped them, and the often unsettling implications of Cervantes’ approach to themes such as honor, social and moral presuppositions, marriage, adultery, and the place of representation in art and life.

Requirements/Evaluation: active and meaningful participation; three short assignments
Prerequisites: any RLSP 200 taken at Williams, results of the Williams College Placement Test, or permission of the instructor
Enrollment Limit: 25
Enrollment Preferences: Spanish and Comparative Literature majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Attributes: ARTH pre-1800 Courses

RLSP 274  (S) Women’s Contemporary Cultural Production in Latin America  (DPE)
Cross-listings: COMP 286  WGSS 275  RLSP 274

Primary Cross-listing
In Latin America, women have been largely displaced as historical subjects and reduced, in many ways, to symbolic figures or icons whose trajectories have been depicted as essential to the construction of diverse social projects within the context of patriarchal nation-states. Each country has formed a specific idea of what a woman is, and can be, through its cultural production, and this constant erasure/objectification has led to a complex problematic
when it comes to addressing women as cultural producers. Keeping this in mind, in this course we will explore the concept of "Woman" as a representation and women as cultural producers in contemporary Latin America. We will address intersections of race/ethnic positioning, sexual identity, and social class to explore their role in the reception and understanding of the work of these female artists. Through the analysis of varied cultural production, the syllabus will present an interdisciplinary approach to the contributions of female artists to the cultural representation of race/ethnicity, masculinity, femininity, violence, sexuality, gender identity, nationalism, citizenship, and social movements. We will explore the work of artists such as Sara Castrejón, Nahui Ollin, Citlali Fabián, Amparo Dávila, Alejandra Pizarnik, Rosario Castellanos, Reina Roffé, Ana Tijoux, Lucrecia Martel, Chavela Vargas, Graciela Iturbide, Celia Cruz, Lucia Puenzo, Cecilia Barriga, Cristina Rivera Garza, María Novaro, Cristina Peri Rossi, Maruch Sántiz Gómez, Leonora Carrington, and Maris Bustamante, among others. In addition, we will read theoretical texts on diverse subjects corresponding to each specific cultural product.

**Requirements/Evaluation:** essays (7-8 pages), weekly written reports, oral presentation, active and engaged class participation

**Prerequisites:** RLSP 105, placement exam results, permission of instructor or Department Chair

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish majors and certificate students, current and potential; LATS concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 286 (D1) WGSS 275 (D1) RLSP 274 (D1)

**Difference, Power, and Equity Notes:** We will address issues of racial/ethnic positioning, sexuality, gender identity, and social class in light of diverse human experiences in contemporary cultural production in Latin America.

**Attributes:** LATS Countries of Origin + Transnationalism Elect

Not offered current academic year

---

**RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production** (WS)

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals' skin tone. The study showed that "Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts" (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

**Requirements/Evaluation:** essays, oral presentation, participation

**Prerequisites:** RLSP 105, placement exam results, permission from the instructor or the Department Chair

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish major

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

**Attributes:** FMST Related Courses

Spring 2020

LEC Section: 01  W 7:00 pm - 9:40 pm  Roxana A. Blancas Curiel
**RLSP 303 (S) Cervantes’ “Don Quijote”**

A close study, in Spanish, of one of the most influential and early European novels. Don Quijote by Miguel de Cervantes (1547-1616 C.E) was a hit in its day in the seventeenth century, and has not ceased to influence artists and thinkers since. Moving between humorous and serious tones, Cervantes takes on several issues in the Quijote: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experience of religious co-existence, the shapes of friendship, and the task of literary criticism, just to name a few. We will read the book in a fine unabridged edition, and set it in several relevant contexts to better understand its original intellectual horizon as well as the reasons for its continuing relevance.

**Class Format:** discussion conducted in Spanish

**Requirements/Evaluation:** active participation, two short papers, and a final project in close consultation with the instructor

**Prerequisites:** any RLSP 200-level literature class taken at Williams, or permission of the instructor

**Enrollment Limit:** none

**Enrollment Preferences:** Spanish and Comparative Literature majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** this course fulfills one of the requirements for the Spanish major

**Distributions:** (D1)

**RLSP 306 (S) Latino Writing: Literature by U.S. Hispanics**

**Cross-listings:** COMP 302  RLSP 306

**Primary Cross-listing**

Writing by U.S. Hispanics constitutes a new voice in American letters. In this tutorial, we will read and discuss work by U.S. Latinos and examine the social backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: Jose Antonio Villarreal, Tomas Rivera, Richard Rodriguez, Sandra Cisneros, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Diaz and historical texts by Carey McWilliams, and Rodolfo Acuña. Given the absence of a critical consensus around these recent titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and the world. The tutorial will examine one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the artistic features and sociocultural content of the assigned reading. Questioning of the presenter, on the part of the second tutee and the tutor, will follow. The course is designed to accommodate both Spanish and English speaking students. A student able to read and speak Spanish will be paired with another student of similar proficiency. Students who neither read nor speak Spanish will be paired together.

**Class Format:** tutorial

**Requirements/Evaluation:** five short oral presentations/papers (about 20-25 minutes) and a final longer one (about 40-45 minutes)

**Prerequisites:** some previous course work in any literature beyond the 100 level is helpful; students selecting the Spanish option for credit toward the Spanish major must have taken at least one 200-level RLSP course or seek permission of the tutor

**Enrollment Limit:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**RLSP 308 (S) The Subject of Empire: Race, Gender and Power in the Colonial Era**
This class studies Latin American literature of the colonial era (1492-1898) from the perspective of the constitution of the subject: the autobiographical 'yo' that is both the subject of discourse and the object of sovereign power. Our readings will include the most outstanding texts of the group collectively known as the Chronicles of the Conquest—the letters of Christopher Columbus and Hernán Cortés and Bernal Díaz del Castillo's True History of the Conquest of New Spain, among others—whose authors endeavor to establish their historical authority and legitimate their actions before the Spanish king. We will also read later works in which racially and sexually marginalized subjects struggle to contest the identities and the conditions imposed on them by a distant sovereign through far-reaching institutional networks: the mestizo historian known as El Inca Garcilaso de la Vega, the cross-dressed soldier Catalina de Erauso, the poet Sor Juana Inés de la Cruz, and the slave Juan Francisco Manzano.

**Requirements/Evaluation:** one short (7-page) paper, one longer (15-20 page) paper, proposal, bibliography, discussion-leading

**Prerequisites:** one RLSP course at the 200-level or above or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**RLSP 319 (S) Dictatorship and the Latin-American Novel** (DPE)

Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict their experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martínez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive and profound.

**Requirements/Evaluation:** three 8-page papers, an oral report, a final 3-page paper, and class participation

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish majors, Latina/o Studies concentrators

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course focuses on the ultimate sort of power—namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence—Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

**RLSP 322 (S) Islam in Spain**

**Cross-listings:** RLSP 322  ARAB 322

**Primary Cross-listing**

The presence of Islam—in all its diverse manifestations—is not new to Europe, least of all to Spain. In this course we will focus for the most part on the medieval and early modern periods, and study several works—primarily of literature, though we will supplement with other texts—in which Muslims and Islam have been portrayed in the Iberian Peninsula. We will cover a wide range of perspectives that include Christian and Muslim writers as well as converts on both sides. While the bulk of the course is focused on the period prior to 1700 CE, we will devote the final few weeks of class to the study of Islam in contemporary Spain using fiction, legal debates, and issues related to immigration. *Conducted in Spanish*

**Class Format:** seminar

**Requirements/Evaluation:** two short papers, oral presentations, one final project

**RLSP 401 (F) Climate Changes (Latin America): Aesthetics, Politics, Science**

**Cross-listings:** ENVI 301 RLSP 401

**Primary Cross-listing**

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que soño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

**Requirements/Evaluation:** rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

**Prerequisites:** one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** this is the senior seminar required for all Spanish majors

**Distributions:** (D1)

**RLSP 402 (S) Senior Seminar Madrid: 1939-2004**

In this course we will examine life in Madrid during two key periods: the Franco Dictatorship (1939-1975), and the first four decades of democracy (1975-2016). We will consider how representations of urban landscapes (churches, convents, prisons, museums, slums, bars and schools) have shaped and reflected the lives of madrileñas and madrileños past and present. We will study works by 20th century and contemporary Spanish
authors, filmmakers, photographers, and journalists, as well as period advertisements and examples of popular culture. How was Madrid’s image as international capital of art, sun, soccer and bullfighting forged? What remnants of the past lurk behind this appealing façade? How do the Atocha train Station bombings of 2004 relate to unresolved political tensions from 1939?

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay
Prerequisites: any 300 level RLSP course or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Spanish majors and certificate candidates
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

RLSP 403  (F)  Senior Seminar: Early Modern Love and Marriage

We might think that love is a natural human feeling and marriage its happiest consequence, but in fact these two conditions are among the most carefully constructed phenomena in any society, highly dependent on time period and place. In this senior seminar we will focus on pre-modern Iberia to study the many manifestations and constructions of love (and marriage), several of which continue to influence definitions of both to this day. We will look at sacred, profane, family, and married love through treatises, medical writings, plays, short stories, poems. Our theoretical underpinnings will come from reflections on love from the time period under consideration as well as contemporary critiques of love and marriage. Primary sources will include early lyrical traditions, the poetry of King Alfonso X, the works of Santa Teresa, Lope de Vega, Calderón de la Barca, Cervantes, among others. Conducted in Spanish.

Requirements/Evaluation: regular presentations, two to three short papers, one research paper preceded by class presentation, active participation and regular attendance required
Prerequisites: any 300-level RLSP course or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: senior Spanish majors and Comparative Literature seniors with Spanish focus
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

**Winter Study -----------------------------------------------**

**RLSP 25 (W) Somos Sur: Mexico-Central American Borderlines and Visual Culture**

**Cross-listings:** RLSP 25 LATS 25

**Primary Cross-listing**

What are borderlines? How have they been created and how do they affect the lives of those who cross or are being crossed by these borders? Motivated by the attention that borders have drawn recently with the caravans of Central Americans traveling north, we propose a trip to Chiapas, Mexico to explore the realities of the communities, activists, and border entities. This trip will engage students with the visual response and the relationship with spaces created in these borderlands. The class will meet for an intensive week of class on-campus with readings and discussion followed by a 10-12 travel to Chiapas with Borderlinks. The Borderlinks pedagogical model is based on "dynamic educational experiences that connect divided communities, raise awareness about the impact of border and immigration policies, and inspire action for social transformation." Their leaders accompany the delegation at all times. Mellon Post-doctoral Fellow at Williams 2018 - 2020.

**Requirements/Evaluation:** short paper and final project or presentation

THEATRE (Div I)
Chair: Associate Professor David Gürçay-Morris

- Robert E. Baker-White, Professor of Theatre
- Deborah Brothers, Costume Director and Lecturer in Theatre
- David Gürçay-Morris, Chair and Associate Professor of Theatre
- Amy S. Holzapfel, Professor of Theatre; on leave 2019-2020
- Ilya Khodosh, Visiting Lecturer in Theatre
- James L. Pethica, Senior Lecturer in English and Theatre; affiliated with: Theatre Department; on leave Fall 2019
- Shanti Pillai, Assistant Professor of Theatre
- Omar A. Sangare, Professor of Theatre

The Department of Theatre is committed to the merging of embodied practice and scholarship in the fields of theatre and performance studies. The curriculum is dedicated to the study, practice, appreciation, and interpretation of theatre, performance, and other time-based arts. The major in Theatre emphasizes the collaborative nature of the theatre and performance making by drawing upon courses offered by faculty of the Language, Literature, Music, and Art Departments. Although students will be equipped to proceed to graduate and professional schools in theatre, the major is primarily directed toward those interested in studying theatre and performance as artistic phenomenon and as interpretive tools. Because a deep understanding of theatre requires training and experience with the synthesis on stage, the major includes curricular study of production and performance, as well as continued participation in departmental stage production.

The production arm of the Department of Theatre operates under the supervision of the departmental faculty. Major departmental productions as well as laboratory and experimental productions of all kinds are mounted on the new stages of the '62 Center for Theatre and Dance. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

MAJOR

The Major in Theatre consists of nine courses, including the following:

- Theatre 101 The Art of Playing: An Introduction to Theatre and Performance
- Theatre 201 Worldbuilding: Staging and Design For The Theater
- Theatre 301 Embodied Archives: Global Theatre & Performance Histories
- Theatre 406 Practicing Theory: Senior Seminar

Five additional elective courses must be taken from the department’s other offerings (including courses cross-listed with Theatre). Two of the five electives must be taken at the 200-level or higher by the end of the student’s junior year, and an additional two of the five must be taken at the 300-level or higher by the time of graduation. Substitutions of other Williams' courses, or of Study Abroad courses, may be made only with the consent of the department Chair. Students should consult with the department Chair regularly in planning a balance of practice and scholarship in their elective choices and in mapping a route through the major.

Production Requirement for the Theatre Major:

All majors in Theatre are required to participate in a minimum of four department productions. Participation in at least one of these four must be in stage management. Assignment to productions in stage management must be made in consultation with the department Chair. Students participating in a production will be enrolled in THEA 290-299: Theatre Department Production as a partial-credit, fifth course, admitted by permission of the department Chair and evaluated on a Pass/Fail basis only. Students remaining in the course beyond the sixth week of the start of a term will be graded by the instructor. Enrollment is by audition or appointment within the Theatre department. Students who do not wish to enroll for credit will be given the opportunity by the department to be removed from the course. Rehearsals for productions are scheduled TBA, based on the availability of the ensemble, and do not conflict with other academic commitments, such as evening courses or evening exams. The department normally produces three productions per academic year. Students may enroll in multiple productions in the same semester and may repeat a production course by permission of the department Chair. For each departmental production they participate in, a student will receive a partial credit of .5 on their College transcript. Production credits do not accrue, nor do they count towards a student’s 32 required course credits for graduation.
THE DEGREE WITH HONORS IN THEATRE

Candidates for Honors will apply for admission through the submission of a portfolio to the Department Chair by February of their junior year, as well as a description of their proposed project. The project description is a written essay of approximately 750-1000 words that describes in detail the nature, goals, methodology and approximate budget, if applicable, of the proposed course of study to be undertaken in the pursuit of Honors. When developing their project proposal, candidates are encouraged to familiarize themselves with successful past Honors projects from materials provided by the Department. The portfolio will be comprised of four parts:

The first part will include a list of the courses students have taken relevant to their work towards the major. This list will include courses offered by the Theatre Department, but may also include classes taken in other Departments. Students should also list and describe relevant independent studies and production credits.

The second part of the portfolio will include a selection of materials developed for these courses and productions listed in Part 1. The selection should include at least three papers or samples of other written work, and might also include design projects, director’s notebooks, studio art projects, actor’s journals or other forms of documentation of the candidate’s work. For students who have taken a semester away, it is particularly important that they provide the Department with a detailed picture of their activities while studying off-campus. Course descriptions and syllabi should be submitted in addition to a list of courses taken and activities performed.

The third part of the portfolio is an annotated bibliography of approximately twelve dramatic or critical texts the student has read, and that the student feels have had particular relevance in their Theatre education to date. Annotations should be based upon a particular angle of engagement with the text, that reflects the area or areas that the student has chosen to emphasize in their theatrical training. For instance, one might choose to write from the point of view of an actor, a designer, a director, a playwright, or a dramaturg. Generally, annotations should be one or two paragraphs long.

The portfolio should conclude with a retrospective essay that reflects on the materials that are being submitted. Students should look for connections between the various aspects of their work, state any theoretical positions that they have come to embrace, assess their strengths and weaknesses, and discuss their educational goals for their work with the Department during their Senior year.

The portfolio will be examined alongside the student’s record and their project description; a determination will then be made as to admission into the Honors program. Students intending to apply for Honors should meet with the Department Chair or designated Honors Coordinator by the end of the fall semester of their junior year. Once a student is admitted to the Honors program, the department Chair will assign an Honors Project Advisor, who will work with the student to specify a timeline and work program for the completion of the Honors Project. At a minimum, this will entail enrollment in Theatre 493 or 494, plus W32, plus one other course offered either within the department or elsewhere that the candidate and thesis advisor designate as contributing specifically to the overall goals of the honors work. This honors elective may not fulfill any other portion of the Theatre Major, or any other major the student may be pursuing. All honors candidates will present their completed projects to the Department Honors Committee for evaluation.

STUDY ABROAD

The Theatre Department attempts to work individually with majors and prospective majors who desire to study abroad. In general, with careful planning it is usually quite easy for students to complete the major in Theatre if they study abroad for one semester of their junior year. For those wishing to study abroad for more than one semester of junior year, a more complicated situation may arise, but one that can often be successfully managed through close consultation with the department chair. Students are encouraged to consult with the chair early in their Williams careers if they anticipate a combination of Theatre major and study abroad.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

THE NATIONAL THEATRE INSTITUTE

The Department of Theatre is affiliated with the National Theatre Institute, which offers additional theatre study through its resident semester program. The Institute is fully accredited by Connecticut College and is a member of the Twelve-College Exchange. Limited numbers of Williams students can therefore be selected to take a full semester of intensive theatre study at the NTI, located at the Eugene O’Neill Memorial Theatre Centre in Waterford, Connecticut. During the semester, students from participating colleges live and work as members of a theatre company gaining experience with professional theatre artists in a workshop environment. Early application is essential.

THEA 101  (F)  The Art of Playing: An Introduction to Theatre and Performance

Cross-listings:  COMP 151  THEA 101

Primary Cross-listing

An introduction to the global art and practice of making theatre. Students will learn basic principles of different approaches to the actor’s labor, alongside the history, aesthetics, and literature associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, discussions, attendance at live performances, and workshops with guest artists and faculty, we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from the fields of theatre and performance studies. As a capstone project, students will stage and perform selected scenes before an audience, using practical and interpretive skills gained from the course. This course is open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401. Class will meet on Fridays when time is needed for studio exercises, rehearsals, mentoring student projects, or guest artist workshops.

Class Format: course will include both a seminar (1 hour and 15 minutes/week) and studio (2 hours and fifteen minutes/week); the total class meeting time will be 3 hours and 30 minutes per week

Requirements/Evaluation: two 5-page critical essays, journal reflections, performance projects, and active participation in discussions and studio exercises

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: prospective Theatre majors or Theatre majors or Comparative Literature majors

Expected Class Size: 16

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 102  (F)  In the Room Together: An Introduction to Dance, Theatre, and Live Performance

Cross-listings:  ARTS 102  DANC 102  THEA 102

Primary Cross-listing
This course offers an introduction to the time-based art of performance, focusing on the embodied and social act of collaboration. Students will explore through a rotating studio and seminar-based format methods for creating and approaching art across a range of time-based media (dance, theatre, performance art, social media, spoken-word poetry), providing a foundation for the expression of ideas through performance. Over the term, students will develop, workshop and perform site-specific pieces, culminating in a final public presentation to the community. Through independent research projects, writing and class discussion, students will study makers whose work unsettles the boundaries of dance, theatre, and performance, such as: Anne Bogart, Bill T. Jones, Pina Bausch, Meredith Monk, Lin Manuel-Miranda, E. Patrick Johnson, Young Jean Lee, and Beyoncé. Evaluation will be based on an assessment of the student’s work, participation, commitment, practice, curiosity, creativity, and collaboration with peers. Students will be required to attend ’62 Center Series programming as may be required to attend other performance events as well. This course is open to students at all levels of experience and is a gateway and requirement to the major in Theatre.

**Requirements/Evaluation:** Assignments will include writing reflections, showings of works in progress, oral presentations, a final performance, and a 5- to 7-page curatorial paper.

**Prerequisites:** None

**Enrollment Limit:** 18

**Enrollment Preferences:** Students considering the major or already majoring in Theatre

**Expected Class Size:** 18

**Grading:** Yes pass/fail option, yes fifth course option

**Unit Notes:** This course serves as the gateway to the major in Theatre and is a prerequisite for several courses in the Theatre major.

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 102 (D1) DANC 102 (D1) THEA 102 (D1)

*Not offered current academic year*

**THEA 103 (F) Acting: Fundamentals**

In this course students will examine the power of public presence through theory and practice while expanding their talents, sensitivity, and imagination, and will increase their self-awareness, confidence, creativity, and other skills that are useful in social situations, public speaking, and theatre performances.

**Requirements/Evaluation:** Committed participation in class, preparation and performance of assigned material, and some modest written assignments.

**Prerequisites:** None

**Enrollment Limit:** 14

**Expected Class Size:** 14

**Grading:** Yes pass/fail option, yes fifth course option

**THEA 120 (S) Introduction to Performance Art**

**Cross-listings:** ARTS 120 THEA 120

**Secondary Cross-listing**

Historically, artists have turned to performance art during times of collective trauma to observe, analyze, and deconstruct established systems of power. This course will explore the legacy, theory, and practice of this radical and subversive genre. Equal parts studio and seminar students will engage in open dialogue based on assigned readings, screenings, and museum/gallery visits. Starting with the emergence of Dadaism during World War I, and exploration of works by artists that will include: Adrian Piper, David Hammons, Lynda Montano, Chris Burden, Clifford Owens, and Anna Mendieta, students will gain an understanding of the mechanisms of performance: The body as object, The Gaze (the dynamics of viewing/being
viewed), active and inactive participants, and breaking the fourth wall. This class is open to all students that are willing to embrace the awkwardness of their humanity and the vulnerabilities of our collective bodies.

**Class Format:** combined studio/seminar

**Requirements/Evaluation:** completion of 4 assigned projects, assigned readings, active class participation, creation of an independent final project, attend scheduled lectures, museum/gallery trips

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Art Studio majors, first-years, sophomores

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Materials/Lab Fee:** $100 lab fee charged to term bill

**Distributions:** (D1)

**THEA 125 (F) Theater and Politics (WS)**

**Cross-listings:** THEA 125 ENGL 125

**Secondary Cross-listing**

When Plato designed his ideal republic, he excluded theater from it, arguing that indulging in the charms of theatrical representation would make men poor governors of themselves and thus threaten the integrity of fledgling Greek democracies. In the twentieth-century, however, the work of younger artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud provocatively suggested that theater itself could remedy the ills that Plato thought it aggravated by restoring to the people the productive power that the passively on-looking masses had ceded to the charisma of dictators. Today, as rapid changes in media daily transform the way in which we experience the world and understand our place within it, artists, critics, and philosophers continue to draw on the terms of historical debates about theater in attempts to understand the political significance of technologically enhanced forms of global spectatorship, asking what becomes of the traditional roles of viewers and directors on the new world-stage, in an age when revolutions are triggered by cell phone images, but advertising campaigns are also customized to consumers based on automated scans of private information like email. In this seminar, students take a historical approach to these urgent contemporary questions, analyzing the politics of theater in literature, criticism, film, and philosophy from antiquity to the present.

**Requirements/Evaluation:** three papers of increasing length and complexity, one of which you will revise, totaling 20 pages of finished writing, and a portfolio of interpretive questions

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

THEA 129 (S) Institutional Critique (DPE)

Cross-listings: ARTS 129 THEA 129

Secondary Cross-listing

This introductory course will investigate the performance potential of the radical art making methodology known as Institutional Critique. Influenced by Situationalism, and the Fluxus movement, Institutional Critique emerged as a way for artists to respond to the art worlds elitism, monopoly on culture, and dependency on Capitalism. Through collaborative performance based projects and readings students will explore the possibility of art to critically intervene in the hegemonic order and insight change within power relationships. We will also explore related movements such as Socially Engaged Practice, a term that describes art that is participatory and focuses as people as the medium. Artists covered will include: Thomas Hirshhorn, Tim Rollins, and Andrea Fraser. You do not need any prior experience just a willingness to use the power of voice and body.

Requirements/Evaluation: three collaborative projects, final independent project, readings, active participation, museum gallery visits, quality of work

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $125 lab fee

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 129 (D1) THEA 129 (D1)

Difference, Power, and Equity Notes: Through a diverse selection of essays, visual art, and contact with prominent voices operating at the intersection of theory and practice students will examine how the concentration of power in the United States and Europe has contributed to inequities within educational, legislative and artistic institutions. Students will then transfer what they’ve learned to a research based visual practice that priorities social discourse.

Not offered current academic year

THEA 141 (F) Opera

Cross-listings: THEA 141 MUS 141

Secondary Cross-listing

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass and Adams. This course may involve a trip to the Metropolitan Opera.

Class Format: discussion

Requirements/Evaluation: a midterm, a brief paper, an 8-page paper, and a final exam

Prerequisites: none

THEA 150 (S) The Broadway Musical  (DPE)

Cross-listings:  MUS 150  THEA 150

Secondary Cross-listing

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

Class Format: discussion

Requirements/Evaluation: a midterm, a brief paper, an 8-page paper, and a final exam

Prerequisites: none

THEA 201  (S) Worldbuilding: Design for the Theater

Cross-listings:  ARTS 201  THEA 201

Primary Cross-listing

This course examines designers' creative processes as they work to imagine the fictional worlds of theatrical productions. Over a series of practical projects in multiple design disciplines, we will develop techniques for eliciting an initial creative response to a text; developing that response into a point-of-view; communicating that point-of-view with collaborators; and solving the practical needs of the production. Particular emphasis is placed on how design elements synthesize with each other (and with the imagined work of the actors and director) to form the larger intellectual, emotional, and physical context of the production as a whole. Students will adopt various creative roles over a series of projects, giving exposure to the working processes of designers specifically, and that of all collaborators in a theatrical production more generally. Methodologies for critical feedback, as well as presentation skills and techniques, will be taught as crucial elements of the artistic and collaborative process.

Requirements/Evaluation: committed participation in class discussion and feedback; and the thoughtful, timely completion of four design projects plus a month-long final

Prerequisites: THEA 101 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theatre majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course is a prerequisite for all upper-level design and directing courses; this course does not count toward the Art major

THEA 202  (F)  Ways of Knowing: Music, Movement, Memory

Cross-listings:  THEA 202  AFR 215  WGSS 215  DANC 215

Primary Cross-listing

This interdisciplinary seminar proceeds from the premise that the body knows. Ongoing colonial modernity is rooted in a racialized hierarchy: the "civilized" life of the mind vs. the "primitive" instincts of the flesh. According to this binary, the body is marked as irrational, sinful, outside of the archive. The body cannot know because the happenings of the body are ephemeral: unlike documents, they don't last. In this course, we will subject this logic to close scrutiny. As performance scholar Diana Taylor asks, "Whose memories, traditions, and claims to history disappear if performance practices lack the staying power to transmit vital knowledge?" In this course, we look to music, movement, and other repertoires as ways of knowing, remembering, and world-making. How does embodied knowledge travel across time and space? How have performance practices served as modes of what Ashinaabe cultural theorist Gerald Vizenor calls "survivance" (survival + resistance) for indigenous, nomadic, queer, and colored communities. Case studies include: the Middle Passage and the syncretic birth of the Blues in the Americas; nomadism, the nation-state, and the migration of Romani music; and the evolution of queer ball culture. Students will engage with a variety of texts (verbal, sonic, visual, kinesthetic) and respond to them critically not only through writing and discussion, but also through their own performance practices.

Requirements/Evaluation:  in-class participation, creative/critical responses to texts, final paper

Prerequisites:  none

Enrollment Limit:  14

Enrollment Preferences:  Theater majors

Expected Class Size:  14

Grading:  no pass/fail option,  no fifth course option

THEA 204  (S)  Acting: Scene Work

Students will continue to develop technical skills, and the emotional and intellectual resources, required for the actor. The focus will be on the issues of characterization, textual understanding and emotional depth. The means of study and experimentation will be intense scene work requiring thorough preparation and creative collaboration. Improvisation and other exercises will be used to complement the textual work. The dramatic texts providing scenes for class will be from the early realist works onward. Students will be expected to have had previous acting or performance experience, either through completion of Theatre 101, 102, or 103 or through other relevant production experience.

Requirements/Evaluation:  although there will be some modest written assignments, evaluation in the course will principally reflect the degree of committed participation in the preparation and performance of acting exercises

Prerequisites:  THEA 101, 102, or 103, or permission of instructor

Enrollment Limit:  14

Enrollment Preferences:  Theatre majors or prospective Theatre majors

Expected Class Size:  14

Grading:  no pass/fail option,  yes fifth course option

Unit Notes:  this course is intended for students coming out of THEA 101 who are interested in continuing with acting
THEA 206  (S)  Directing for the Stage
An introduction to the resources available to the Stage Director for translating interpretive concepts into stageworthy physical realization. Kinetic and visual directorial controls, as well as textual implications and elements of dramatic structure, and strategies of working with actors and other collaborators will be studied in detail. Most assignments will involve hands-on directing projects presented in class for collective critique.

Requirements/Evaluation: committed participation in the preparation and performance of production exercises; there will be some written assignments

Prerequisites: Theatre 101 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theatre majors and prospective Theatre majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

THEA 207  (S) Acting: Physical Theatre and Body Language
This semester Theatre 207 will focus on processes of Physical Theatre. The class is open to students interested in developing their ability in communication through the art of body language. Assigned research, analysis, discussions, and improvised exercises on stage will give us the opportunity to expand our understanding of physical vocabulary and will help us to express our intentions by evocative behavior. Based on various theatre techniques, this course will hone artistic skills for performance and improve students' confidence in their interactions with other people.

Requirements/Evaluation: committed participation in class, and preparation and performance of assigned material

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

THEA 208  (F) Voice, Speech & Song for the Actor
Continuing the vocal technique work in THEA 205, this course provides an intense practice that further deepens the body-voice connection, builds and troubleshoots speech technique, and expands vocal strength, range and endurance through song. Through incorporating the resonator techniques of Roy Hart and Meredith Monk, the speech drills of Edith Skinner and the fundamentals of musical training for the voice, students finish the course able to complete an hour long full voice/speech/song work out. In addition to building a repertoire of voice, speech and singing drills; students will explore how to "act" a song, combining speaking and singing, using songs from the plays of Bertolt Brecht.

Requirements/Evaluation: attendance, participation, drills, and tests on technique

Prerequisites: Intro to Acting (100-level course) or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Theatre majors, then Music majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

**THEA 211  (F) Performing Greece**

**Cross-listings:**  CLAS 211  THEA 211  COMP 248

**Secondary Cross-listing**

Modern readers often encounter Homer, Sappho, Sophocles, and the Greek orators as written texts, yet their first ancient audiences experienced the words of these authors not in silence and solitude, but in live performance contexts. This course, therefore, will take up performance as a critical lens for interpreting ancient Greek literature, situating these works within a rich culture of song, dance, speech, and debate. From the Homeric epics and the masterpieces of Greek tragedy and comedy to the speeches and dialogues of Demosthenes, Thucydides, and Plato, we will survey the evidence for the musical, visual, and embodied aspects of Greek literature. At the same time, we will reflect on the rewards and limits of enlivening the ancient world through the reconstruction and re-imagination of its performative dimensions. Our attention to performance will give us a distinct perspective on many important topics within the study of Greek civilization, including the construction of personal and collective identity, the workings of Athenian democracy, and the development of literary genres. In addition to a wide selection from Greek poetry, drama, and prose, our readings will include works by ancient and modern theorists of performance and culture. All readings are in translation.

**Requirements/Evaluation:**  class participation, two essays (5 pages), midterm, final exam

**Prerequisites:**  none

**Enrollment Limit:**  40

**THEA 212  (F) From Stage to Page: Writing about Dance**

**Cross-listings:**  THEA 212   DANC 212

**Secondary Cross-listing**

We commonly understand the word “choreography” to mean the creation of dance movement. The Greek roots of choreography, however, are choreia (the synthesis of dance, music and singing) and graphein (to write). For centuries, people have attempted to pin dance down on the page, translating an ephemeral, embodied performance art into written form. In this writing-intensive tutorial, students will investigate four major modes of dance writing: dance notation or scoring, dance criticism, dance ethnography, and dance history, with a shorter fifth unit on a new avant-garde form, “performative writing.” Students will study important examples of each form, such as Rudolf Laban’s famed system of dance notation and Katherine Dunham’s ethnographic account of dance in Jamaica, Journey to Accompong. Students will then delve into each form of writing themselves. For example, they will work with Mellon Artist-in-Residence Emily Johnson as “scribes” for her creative process, attend live dance concerts at the ’62 Center and Mass MoCA as the basis for writing pieces of dance criticism, conduct participation-observation research by attending social dance events to write mini-ethnographies of their experiences, and work with librarians to learn about resources at Sawyer for researching dance history.

**Class Format:**  tutorial

**Requirements/Evaluation:**  short analytical papers every other week, preparedness for being a respondent and discussant

**Prerequisites:**  none

**Enrollment Limit:**  10

**Enrollment Preferences:**  first and second year students

**Expected Class Size:**  10

**Grading:**  no pass/fail option,  no fifth course option

THEA 214 (S) Writing for Stage and Screen

Cross-listings: ENGL 214 THEA 214

Primary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

THEA 215 (F) Performance Ethnography (DPE)

Cross-listings: DANC 214 GBST 215 THEA 215 AMST 214 ANTH 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political
The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Requirements/Evaluation: reading responses and essays, class participation, and presentations
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
THEA 216 (D1) DANC 216 (D1) GBST 214 (D2) AMST 213 (D2)

Difference, Power, and Equity Notes: This course introduces students to the history of Asian-Americans through an analysis of performances by diasporic artists. Student will explore how race was central to the formation of the American nation, and how social and legal discriminatory practices against people of color influenced US popular culture. The assigned course material provide examples of how diasporic artists address these differences in power relations, hold systems of inequality accountable, and claim agency.
THEA 222 (S) Solo Performance

In this tutorial, students will study the process of the creation of one-person performance pieces and will work individually or in collaboration to create original solo works. Each student will perform their own piece at the end of the semester in a final public performance. Students will learn about developing a general production concept and scenic vision, choosing or writing a script, building a character, designing (set, lighting, costume, and sound), publicity, and combining all aspects of theatrical craft to create a successful solo piece. Course time will be divided between class discussion and individual rehearsals with the instructor. Students interested in acting, directing, writing, producing, dramaturgy, design, stage management, and criticism are all welcome.

Requirements/Evaluation: creating a script, building a character, developing various aspects of design, performing a solo piece, and writing a self-evaluation at the end of the semester

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: to be determined by instructor

Expected Class Size: 4

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 225 (F) Gender and Sexuality in Asian American Theater

Cross-listings: COMP 218  THEA 225  WGSS 225

Secondary Cross-listing

This class begins with the premise that intersectional and interdisciplinary studies of gender and sexuality need to be, and in significant ways already are, in conversation with Asian American studies and theater. How might contemporary Western discourses of masculinity and heterosexuality, for example, depend upon theatrical constructions of Eastern sexual alterity? How have Asian American artists managed and critiqued historically gendered and sexualized stereotypes (e.g., hypersexual Dragon Lady, virginal Lotus Blossom, asexual Charlie Chan) through theatrical intervention? This seminar will closely read dramatic literature written by Asian American artists, as well as engage scholarship in Asian American gender and sexuality studies and performance studies. We will read the work of playwrights including Ayad Akhtar, Ping Chong, Frances Ya-Chu Cowhig, Velina Hasu Houston, David Henry Hwang, Young Jean Lee, Diana Son, Lauren Yee, and Chay Yew.

Requirements/Evaluation: in-class participation, weekly reading responses, midterm reflection, in-class reading, short essay, final essay

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: declared WGSS majors

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 226 (S) Gender and the Dancing Body (DPE)

Cross-listings: AMST 226  THEA 226  DANC 226  WGSS 226

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative values. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course but will also include attendance at live performances, film screenings, and discussions with guest artists. No previous dance experience required.

Requirements/Evaluation: class participation, reading responses and essays, and presentations

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 226 (D2) THEA 226 (D1) DANC 226 (D1) WGSS 226 (D2)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body's historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social
inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

Spring 2020
SEM Section: 01  W 1:10 pm - 3:50 pm  Munjulika Tarah

THEA 227  (S) Made in China or Making "China"?: Twentieth-Century Chinese Performative Culture

Cross-listings:  CHIN 227  THEA 227  COMP 227

Secondary Cross-listing

This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of "China." Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion

Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 228  (S) Performance Practices of Global Youth Cultures

Cross-listings:  GBST 228  THEA 228

Primary Cross-listing

This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined "youth" by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

Class Format: reading and discussion

Requirements/Evaluation: includes class discussions, self-reflexive presentations and papers, journal reflections, one 10-page paper based on original research with in-class presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: seniors and juniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

THEA 240 (S) Queer Drama  (DPE)
Cross-listings: WGSS 237  THEA 240

Primary Cross-listing
This seminar course is a deep dive into the richly dissonant dialogue between queer lives and live performance. How have queer artists shaped and reshaped the field of theatre and performance over time? How has drama, in turn, shaped the landscape of queer life? What inventions and innovations might we attribute to the evolution of “queer”? We will look to the work of artists such as Tennessee Williams, Tarell McCraney, Taylor Mac, Reza Abdoh, Sharon Bridgforth, Virginia Grise, and many others as we seek to map the messy topography of queer performance.

Class Format: three hours per week
Requirements/Evaluation: two 5-page papers, participation in text-based seminars, and a final performance

Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: if the class is overenrolled, students will submit a letter of interest in the class

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

THEA 244 (F) Tools for Theatre-Making: Introduction To Theatre Technology

This course will cover the fundamental technology employed in theatrical design disciplines including scenery, lighting, costumes, sound, and video/projection. Students will gain a practical working knowledge of theatre technology and organization, including overviews of performance spaces, design practices, technical production methods, management, and collaborative structures in performance-making. Students will participate in design and technical production labs, attend lectures, and may be required to participate as production crew on one or more departmental productions.

Requirements/Evaluation: weekly practical projects, participation in department productions, and committed, focused participation make up the majority of the evaluation elements for this course

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: $50
THEA 246 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: AMST 249 GBST 246 THEA 246

Primary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: sophomores and juniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 249 (D2) GBST 246 (D2) THEA 246 (D1)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

Fall 2019

SEM Section: 01 M 7:00 pm - 9:40 pm Shanti Pillai

THEA 247 (S) Music for Theater Production

Cross-listings: THEA 247 MUS 247

Secondary Cross-listing

Music written to accompany or to "point up" the action or mood of a dramatic performance on stage can be traced to Ancient Theater. Are the labels of incidental and background music appropriate or patronizing for this genre? What is the difference between the composition of "incidental music" and sound designing? How does creating music to accompany a play differ from writing concert music or music for film, ballet, opera, or musical theater? What makes for effective incidental music? How does the music interact with the spoken drama? Students will discuss music composed for selected plays and will compose music for a scene of a play drawing upon pre-existing works, or creating their own. Format: tutorial. During the first and last weeks of the semester, students will attend two group classes. In the other weeks, students will meet with the instructor in pairs for a one-hour session. Students will write and present a 5- to 6-page paper every other week and a 1- to 2-page response to their partner's paper in the alternate weeks.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on five papers/presentations, and five responses

Prerequisites: ability to read music and permission of the instructor

Enrollment Limit: 10
**Enrollment Preferences:** Music and Theater Majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

THEA 247 (D1) MUS 247 (D1)

Not offered current academic year

THEA 249 (F) Staging Race and Gender (DPE)

**Cross-listings:** ENGL 249 THEA 249 WGSS 269

**Secondary Cross-listing**

This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's *Black Odyssey*, a 21st century production of a black man's coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O'Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as *Queen Sugar*, *This Is Us*, *Atlanta*, and *The Chi*.

**Requirements/Evaluation:** four papers totaling at least 20 pages and in-class group performances

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 249 (D1) THEA 249 (D1) WGSS 269 (D1)

**Difference, Power, and Equity Notes:** This course will explore how race and gender have been constructed in the American theatre from the 19th century to the present. Students will develop skills for interrogating the performativity of race and gender, and achieve proficiency with these skills through critical response papers and short, in-class dramatizations that integrate theoretical perspectives on visual culture, performance, and gender and feminist studies.

**Attributes:** ENGL 200-level Gateway Courses

Not offered current academic year

THEA 250 (F) Gender, Sexuality and Modern Performance

**Cross-listings:** THEA 250 ENGL 253 WGSS 250 COMP 247

**Primary Cross-listing**

This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecionalities of social identities under interrelated systems of oppression. Close analysis of works by dramatists—such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac—will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherrie Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway.

**Class Format:** tutorial

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical
Twenty-four centuries ago Plato argued for censorship of art. In the last century New York City mayor Rudy Giuliani attempted to shut down the Brooklyn Museum "Sensations" exhibit because he claimed it offended Christians, and the Cincinnati Contemporary Arts Center was prosecuted for exhibiting allegedly obscene photographs by Robert Mapplethorpe. Just recently, the magazine The Nation apologized for publishing Anders Carlson-Wee's poem adopting the voice of a homeless person, writing "We are sorry for the pain we have caused to the many communities affected by this poem." At Williams College a mural in The Log was temporarily boarded over, Herman Rosse's painting "Carnival of Life" was removed from the '62 Center, and the Theater department cancelled the production of Aleshea Harris' *Beast Thing*. What should be done about offensive art? What is offensive art? Does it matter who is offended? Does offensive art harm? Is there a difference between being offended and being harmed? Is there a difference between cultural appropriation and cultural appreciation? What are the responsibilities of museum curators and theater producers when presenting art that might offend? Who gets to decide the answer to these questions; indeed, who gets to decide what questions to ask? We will attempt answers by studying classical works (such as Plato's *Republic* and John Stuart Mill's *On Liberty*), contemporary articles, and works of art in various media. Trigger Warning: all the works of art studied in this class will be chosen partly because they have offended a significant number of people. You are very likely to be offended by some of the art we discuss. This will be the only trigger warning for the class; if you don't want to be offended then this course is not for you. This course is part of the John Hyde Teaching Fellowship.

**Requirements/Evaluation:** several short responses (including op-eds on current controversies) and longer final projects (a 12- to 15-page paper or equivalent work in other media)

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** seniors, juniors, then sophomores in that order

**Expected Class Size:** 17

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** potential additional material costs if individual students opt for final projects in other media

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 251 (D1) PHIL 251 (D2)

**Attributes:** PHIL Contemporary Value Theory Courses
This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (Macbeth, Anthony and Cleopatra, Othello), comedies (The Merchant of Venice, A Midsummer Night's Dream, Twelfth Night), and histories (Richard II, Richard III); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

Class Format: in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work

Requirements/Evaluation: weekly performance presentations, weekly 3-page analytical papers, active participation in oral critique

Prerequisites: one college level acting class or significant comparable experience (permission of instructor)

Enrollment Limit: 10

Enrollment Preferences: Theatre majors, or those expressing possible interest in Theatre major

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

THEA 256  (S)  The Expressive Body

This course aims to allow students to develop the body's capacities for expression and reflect on the experience of movement. On one hand, we will enhance our potential as performers -- both in the rehearsal process and on stage. On the other, we will explore how training our corporeal intelligence can enrich our everyday lives. Studio sessions will seek to cultivate strength, endurance, flexibility, alignment, and balance so that we can gradually expand the body's range of safe possibilities as we begin to work with images, gesture, and emotions. Exercises will be drawn from a range of movement and theatrical techniques including yoga, Bharatanatyam, contemporary dance, Grotowski, butoh, and Schechner's Rasaboxes. Integral to our work will be consideration of the relationship between words, objects, and moving. Concurrently, we will read, write, and discuss some significant ideas about the consciousness of the body to expand our understandings of ourselves from various perspectives. The spirit of the class is one of bold investigation and refined observation in the context of supportive camaraderie as we all grapple with encountering the new, the surprising, and the wonderfully unexpected.

Class Format: includes both studio sessions and reading and discussion

Requirements/Evaluation: includes participation in studio exercises, in-class performance of monologues and group movement compositions, journal reflections, and two 2-page reading responses

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniors and juniors in the major

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2020

STU Section: 01  MW 9:00 am - 10:50 am  Shanti Pillai

THEA 260  (F)  Shakespeare on Page, Stage and Screen: Text to Performance  (WS)
Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns—with matters of gender, sexuality, race, class, or materiality, for instance—against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges—and opportunities—multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing, while, at the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: Romeo and Juliet, Henry V, Twelfth Night, Hamlet, Antony and Cleopatra, and A Midsummer Night's Dream. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Class Format: seminar

Requirements/Evaluation: class participation, regular reading responses, three longer papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Theatre and English majors, and prospective majors

THEA 262 (F) Japanese Theatre and its Contemporary Context

Cross-listings: JAPN 260 COMP 262 THEA 262

Secondary Cross-listing

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: discussion

Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper

Prerequisites: none; open to all

Enrollment Limit: 20

THEA 267 (S) Performance Studies: An Introduction (DPE)

Cross-listings: DANC 267 WGSS 267 THEA 267 COMP 267

Secondary Cross-listing

Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing "performance" as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatrics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

Requirements/Evaluation: reflection papers, performance analysis, final paper or performance

Prerequisites: none

Enrollment Limit: 20

THEA 275 (F) American Drama: Hidden Knowledge

Cross-listings: AMST 275 COMP 275 ENGL 224 THEA 275

Primary Cross-listing

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising; theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2019

THEA 282 (S) Writing for Performance

Cross-listings: THEA 282 ENGL 280

Primary Cross-listing

This studio/seminar course is designed for students with some experience in creative writing and/or performance interested in a deep dive into the art of playwriting. What is a play? What distinguishes writing for performance from writing that is meant to be read? How do we craft a blueprint for a live event? In our rapidly evolving digital world, what sorts of stories and phenomena still ask to be experienced live? How are contemporary theater and performance makers pushing the boundaries of what "writing" means and what constitutes "liveness"? We will read works by Sharon Bridgforth, Sarah Ruhl, Tarrell Alvin McCraney, Tony Kushner, Branden Jacobs-Jenkins, Sarah DeLappe, Suzan-Lori Parks, Edward Albee, August Wilson, Chuck Mee, María Irene Fornés, Young Jean Lee, Stew, and Lightning Rod Special, who have deepened and widened the possibilities of the form. We will also write, beginning with exercises in character, dialogue, action, and world-building, and working toward a longer final project. Students will be expected to present their own work and respond to each other's work regularly. At the end of the term, we will present excerpts of our one-act length works as part of an open studio experience.

Requirements/Evaluation: in-class participation, critical/creative responses to readings, various writing exercises, final one-act performance piece, participation in final presentation

Prerequisites: students with some experience in creative writing and/or performance

Enrollment Limit: 14
**THEA 285  (F)  Scenic and Lighting Design for Performance**

**Cross-listings:** THEA 285  DANC 285

**Primary Cross-listing**

The artistic, intellectual, and practical roles of a designer vary widely, from the spectacle of Broadway to the do-it-yourself ingenuity of downtown theater to the conceptual frame of the art gallery space. This course explores the art and techniques of lighting and scenic design for performance. While grounded in a conceptual methodology for development of a design based in textual analysis and research, this course is equally concerned with providing instruction in the techniques and craft necessary for bringing a design to fruition, including: sketching, technical drafting, and model-making; basic physics and theories of color in both surfaces and light; the use of volume, movement, color, intensity, and texture as compositional and storytelling tools; the variety of stage lighting instruments and theatrical soft goods available, and their uses; writing cues; and the translation of concept into light plots, channel hookups, plans and elevations. We will use a variety of performance texts (plays, musicals, opera, and dance) to discover and explore the creative process from the perspective of scenic and lighting designers. The class format will be a combination of lectures, discussions and studio work.

**Requirements/Evaluation:** committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales, focusing on scenic and lighting design, considered both individually and when working in tandem

**Prerequisites:** none

**Enrollment Limit:** 10

**Expected Class Size:** 6

**Grading:** no pass/fail option, yes fifth course option

**THEA 286  (S)  Sound Design**

What is "sound" and how does it work within a design for live performance? Starting from that fundamental question, this course will examine creative, practical, and technical aspects of sound design within a theatrical setting, from the physics of sound and the mechanics of human hearing and perception to sound aesthetics, style, and function. We will learn to effectively analyze a range of scripts and source material, apply research, and make specific choices about world building that serve both the needs of the script and the artist's imaginative impulse. We will experiment with original sound design in a theater space, compare approaches, and learn to listen critically. We will consider how to integrate sound with the other design disciplines, and collaborate effectively to help to create a robust but coherent production.

**Class Format:** a combination of lectures, discussions, and studio work

**Requirements/Evaluation:** committed class participation and thoughtful, timely completion of all assignments and projects

**Prerequisites:** none
Enrollment Limit: 10

Enrollment Preferences: students who have completed THEA 101, 102, 201 or 244, ARTS 100, or equivalent course or practical experience in the performing or studio arts

Expected Class Size: 6

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: $50

Distributions: (D1)

THEA 290  (F)(S)  Theatre Department Production

Participation in the production program is offered as a partial credit fifth course, is open to all students, and can only be taken on a Pass/Fail basis. Theatre Majors are required to participate in four department productions, and must serve as stage manager for one of them. Depending on their role in the production process, students will be admitted to Theatre Production courses by permission of the department Chair, following casting and the assembly of the artistic and production team. Students may participate in a production in one of three major roles: stage management, performing (actor or actress, musician, dancer, etc.), or non-performing (director, designer, dramaturge, choreographer, music director, production manager, etc.).

Stage managers or performers should expect to be in rehearsals, generally scheduled during the evening hours from 6-10PM, for up to twenty hours per week during a five to ten-week long production process, as well as up to ten hours per day during tech weekend and up to six hours per day during the performance run of the show. Non-performing roles may be expected to be involved in the production process before the start of rehearsals, participating in meetings, auditions, as well as a post-mortem process for each show. Entrance into a production for actors and major artistic roles are based on competitive auditions or prior experience. There is no online registration. Repeatable course numbers are designated as follows: 291 (Stage Management Production I); 292 (Stage Management Production II); 293 (Stage Management Production III); 294 (Performing Role Production I); 295 (Performing Role Production II); 296 (Performing Role Production III); 297 (Non-Performing Role Production I); 298 (Non-Performing Role Production II); 299 (Non-Performing Role Production III). Evening courses and exams will take precedence over half credit courses. Students may still participate in department productions even if they choose not to enroll for credit.

Requirements/Evaluation: participation in the collaboration, commitment to being a team player, dedication to the artistic process, and participation in the final public performance event

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 40

Grading: pass/fail option only, half credit fifth course option

THEA 301  (S)  Embodied Archives: Global Theatre and Performance Histories  (DPE)

Cross-listings: THEA 301  COMP 303

Primary Cross-listing

History shapes bodies and is, in turn, shaped by bodies. Whose story is included in the archive? Whose story is left out? What remains over time? What disappears? Why? As theatre and performance historians, our task will be twofold: to study the past but also to question how its been constructed over time. Our obligations will include: handling, analyzing, and contextualizing primary sources; giving equal value to textual and embodied forms of knowledge preservation; taking into account the gender, race, class, status, and ethnicity of the historical participants who occupy the archive; and asking who benefitted from the ideological systems of a given age and who did not. Performance histories to be considered include: West-African Yoruba ritual; pre-Columbian performance in Mesoamerica; ancient Greek civic festivals; labor and guild theatres of Medieval England; print and Kabuki cultures of the Japanese Edo period; eighteenth-century celebrity portraiture across the circum-Atlantic; U.S. Civil War photography
and reenactment; and performance histories drawn from (or unseen by) the archives of Williams College. Our readings and approaches will be informed by leading performance and cultural studies critics, such as: Diana Taylor, Joseph Roach, Saidiya Hartman, Rebecca Schneider, Harvey Young, and Tavia Nyong'o. This course is required for Theatre majors and is a prerequisite for THEA 401.

**Requirements/Evaluation:** weekly "free-writing responses"; two "deep-reads" of archival materials; a 5-page midterm paper; a 10-minute oral report; and a final research project or presentation

**Prerequisites:** THEA 101, 102, 103, 201, 204 or by permission of instructor with evidence of equivalent 100-level course in Division I or Division II

**Enrollment Limit:** 18

**Enrollment Preferences:** Theatre majors

**Difference, Power, and Equity Notes:** This course directly interrogates the power inequities of the historical archive and insists on acknowledging the value of embodied practice as a form of knowledge. Students will learn to question the authorship and ownership of the past by those who controlled its preservation. We will examine primary sources as contextually constructed rather than 'givens,' and we will seek to understand the status of those observers and participants whose stories comprise the archive of performance.

**THEA 305** (F) Project: Costume-Design, Performance, and Beyond

**Cross-listings:** ARTS 200  THEA 305

**Primary Cross-listing**

This course is an intensive study of costume design. Costume designers are always aware of the world around them. They look, listen, reflect, and record. They use inspiration, research, imagination, and innovation for their creations. They simultaneously observe the smallest detail while also picturing the larger world surrounding the pieces they develop. The course focuses on the designer's process, which entails in part: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills, and presentation of designs.

**Requirements/Evaluation:** multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance; students are required to attend two to three Theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work

**Prerequisites:** successful completion of any 200-level course in any of the fine or performing arts or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Theater and Art Studio, sophomores and juniors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy any requirements for the Art major

**Materials/Lab Fee:** $100 lab fee charged to term bill

**THEA 308** (F) Directing: Bodies in Space and Time

This is a laboratory in which we will investigate the holistic art of directing live performance. The director is both a creator and interpreter. Students will
sharpen their visual, spatial, sonic, and kinesthetic sensibilities while developing a clear, cogent directorial voice. We will learn by doing. Assignments will involve hands-on directing projects presented in class for collective critique. Through these weekly assignments, directors will devise and discover strategies for collaboration and vocabularies of action and intention.

**Class Format:** 3 hours per week

**Requirements/Evaluation:** weekly directing projects leading up to a longer final project, reviews of live performances, a portfolio compiled over the course of the semester

**Prerequisites:** none

**Enrollment Limit:** 6

**Enrollment Preferences:** Theater majors; if the course is overenrolled, students will submit an application

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**THEA 311** (S) Theorizing Shakespeare

**Cross-listings:** COMP 310  THEA 311  ENGL 311  WGSS 311

**Secondary Cross-listing**

For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: *The Merchant of Venice*, *Hamlet* and *Antony and Cleopatra*. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

**Requirements/Evaluation:** 20 pages of writing in the form of two short and one longer paper

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**THEA 317** (F) Black Migrations: African American Performance at Home and Abroad

**Cross-listings:** COMP 319  ENGL 317  THEA 317  AFR 317  DANC 317  AMST 317

**Secondary Cross-listing**

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.
Secondary Cross-listing

In 1586, at the age of twenty-three, Christopher Marlowe wrote Tamburlaine the Great. Over the next six years—probably while moonlighting as a government spy—he went on to produce some of the strangest and also most influential works of English drama. Then in 1593, Marlowe was murdered, stabbed through the eye in a tavern brawl. It is often said that Marlowe’s early death, no less than his early success, made the work of Shakespeare possible. In this class we will read Marlowe’s Edward II, the first popular history play in English, and Shakespeare’s Richard II; The Jew of Malta and The Merchant of Venice; Doctor Faustus and Macbeth. We will look at ways in which Marlovian preoccupations—with lurid violence, with debasement, with self-invention—resurface in Shakespeare, in new forms. In the process we will also take up more general questions of literary influence: What do writers borrow from each other? And how does the knowledge of indebtedness—shared to varying degrees with an audience—affect the meaning and impact of their work? Critical readings will include essays by Harry Levin, Julia Lupton and Stephen Greenblatt.

Requirements/Evaluation: two 5- to 7-page papers; a ten page final paper

Prerequisites: 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

THEA 328 (F) American Social Dramas

Cross-listings: AMST 328 SOC 328 COMP 325 THEA 328

Secondary Cross-listing

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded
Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

**Prerequisites:** none

THEA 332 (F) Writing in the Margins: Race, Performance, Plagiarism (DPE)

Cross-listings: COMP 358 THEA 332 ENGL 332

Primary Cross-listing

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered "classic" texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.

Requirements/Evaluation: a 5-page paper, a performance analysis, a short creative work, and a longer final creative work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if the class is overenrolled, students will submit a letter of interest in the class

THEA 341  Performing Utopia: Dreaming Cultures Forward in the U.S. Imaginary

A seminar examining the performative dimensions of utopia and the utopian aspirations of performance. Using a case-study model, we will consider how different modes of performance—in theatre, film, art, and social media—have helped to produce and sustain utopian and new socialities in and across shifting temporalities in the U.S. cultural imaginary. This course will take deep dives into the archives and embodied repertoires of exemplary utopian movements drawn artistic and social spheres. What can be learned by setting the eighteenth-century spiritual collective of The Shakers beside
the egalitarian performance collective of The Wooster Group? What are some key differences between the urban vision of the inclusive, African-American-built enclave of Soul City, established in North Carolina in 1973, and the Afro-futurist conception of Wakanda depicted in the film Black Panther? In what ways might Silicon Valley’s use of performance to promote the utopian promises of social media compare with the performative manipulations of ego-driven utopian cults, like Jim Jones’ The People’s Temple? On the flip side, we will examine how performance has been theorized as a productively utopian realm by critics like Jill Dolan and Jose E. Muñoz, and artists like Miguel Gutierrez, Guillermo Gómez-Peña, Faye Driscoll, Theaster Gates, Nick Cave, and Taylor Mac. What possibilities open up when we approach performance as utopian by design, based on its ability to gather people into a common space and time? Students will be required to attend a day field trip and performances.

Requirements/Evaluation: weekly writing and “deep reads,” a 6- to 8-page essay based on independent archival research, and a final 15-minute performance or other creative public presentation

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Theatre majors; Comparative Literature majors; Art majors
Expected Class Size: 8
Grading:
Distributions: (D1)

THEA 345 (S) Contemporary Theatre and Performance

Cross-listings: COMP 355  ENGL 349  THEA 345

Primary Cross-listing

As Gertrude Stein once remarked, “The hardest thing is to know one’s present moment.” What is going on in the world of theatre and performance today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirguis, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: “What is the most important story to be telling through performance right now?” Students may be required to attend theatre, dance, and other performances at the ’62 Center and beyond.

Requirements/Evaluation: written and dramaturgical-based assignments, an oral presentation, a mid-term paper, in-class discussions, and a final paper or performance

Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Theatre majors; Comparative Literature or English majors
Expected Class Size: 8-10

THEA 350 (S) Devised Performance: The Art of Embodied Inquiry

Cross-listings: ARTS 250  THEA 350

Primary Cross-listing

This studio course offers students hands-on experience in devising new performance work as an ensemble. Looking to the work of practitioners and collectives like Jerzy Grotowski, El Teatro Campesino, Tectonic Theater Project, Pina Bausch, Belarus Free Theatre, Nrityagram, and SITI Company, we will challenge ourselves to really probe what live performance is capable of. How might we think of performance as a research methodology? As a
lifestyle? As a form of political action? This class will function as a laboratory, forming its own unique structure for developing and realizing a live performance. The course provides an opportunity to navigate the complex dynamics present in collaborative creation. Guest classes with practitioners will offer a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will allow the ensemble to receive feedback from small, invited audiences, as well as the opportunity to apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

Requirements/Evaluation: participation, individual presentations, contribution to group work, self-evaluation; students will contribute to the creation and presentation, by the group as a whole, of a newly devised performance piece

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Theatre majors and Art majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

THEA 365 (F) Beckett, Pinter and Stoppard

Cross-listings: ENGL 365 COMP 365 THEA 365

Primary Cross-listing

Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: Endgame, The Caretaker, Rosenkrantz and Guildenstern are Dead, Krapp's Last Tape, The Homecoming, No Man's Land, Betrayal, Waiting for Godot, Dogg's Hamlet, The Invention of Love, Arcadia, Rock 'n' Roll, Not I, Rockaby, A Kind of Alaska, Catastrophe, The Real Thing, Indian Ink, Artist Descending a Staircase and One for the Road. Throughout, we will give consideration to these works as both literary and theatrical texts.

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

THEA 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: ARTS 385 THEA 385

Secondary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will
produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

**Requirements/Evaluation:** the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

**Prerequisites:** successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Art and Theater majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $125

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

**THEA 401 (F)** Senior Seminar: Practicing Theory

Humans seek out patterns and weave them into stories. In a collaborative art like theater those pattern pieces can come from anyone: writer or director, designer or performer; the stagehand placing furniture, the stage manager calling cues. The story is made from the totality of everything experienced by the audience. A relationship between storytelling and audience experience is hardly unique to the theatre. Chefs and game designers and performance artists and architects have all thought deeply about how what they make is experienced by their audience; how it is interacted with, used, and recalled after the experience has ended. How do artists and makers from a broad range of ephemeral disciplines approach the creation of an experience? How do they tell stories within and about the work that is created? How successfully do their theories align with their practice, and how might we re-imagine, reuse, or abuse their ideas in our own work for the live theater? As a culmination of performance studies for the Theatre major, this senior seminar will take a hybrid approach to the study of artist-audience interactivity and storytelling by blending theoretical, historical, and critical readings with a studio component that produces artistic responses to the ideas being studied.

**Requirements/Evaluation:** critical analysis and discussion of readings, and active participation in critiques of made work; assignments consist of response papers alternating with creative projects

**Prerequisites:** limited to senior Theatre majors

**Enrollment Limit:** 5

**Enrollment Preferences:** senior Theatre majors only
Expected Class Size: 5
Grading: no pass/fail option, no fifth course option
Unit Notes: this course is required for the Theatre major

THEA 416 (S) Senior Seminar: The Art of Minor Resistance: Advanced Readings in Race, Gender, Performance
Cross-listings: THEA 416 COMP 404 WGSS 416 ARTH 416
Secondary Cross-listing
This seminar will study stagings and aesthetic theories of dissent in feminist, queer, anti-colonial, and anti-racist performance. An attunement to performance and to the minor is also a turn toward minoritarian knowledges and lifeworlds. Of interest will be modes of sensing and relating that are not often legible as political—including aesthetics of opacity, quiet, disaffection, aloofness, and inscrutability—but could be understood as critiques of political recognition. Performance is a capacious rubric in this class that will include performance art, social media, photography, music videos, poetry, street protest, and everyday life. Students will learn to describe, interpret, and theorize performance through discussion, writing, and creative form.
Requirements/Evaluation: in-class discussion, partner presentation, weekly reading responses, final project
Prerequisites: WGSS 101
Enrollment Limit: 15
Enrollment Preferences: WGSS majors, students with previous performance studies coursework
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

THEA 455 (F)(S) Advanced Practicum
This independently designed practicum offers an opportunity for students to gain practical, hands-on experience in theatre at an advanced level by receiving course credit for serving as an assistant to a faculty member on a Theatre Department production. Students interested in assisting a faculty member or guest artist on a production in any non-acting capacity—directing, design (costume, lighting, multimedia, scenic, sound), dramaturgy, or technical management—may enroll in the Advanced Practicum, pending the approval of a designated faculty advisor as well as the Department Chair. Working closely with the faculty advisor, the student will both serve as an assistant on the production and design a curriculum of readings and assignments intended to complement the experience of the assistantship. If funding allows, practitioners in the professional theatre will be invited as guest evaluators. Though the nature of each assistantship will vary according to the demands of each production, the experience of the assistantship will ideally simulate that which a student might undertake within the professional theatre.
Requirements/Evaluation: research, attendance at rehearsals, studio work, & final portfolio; research, attending weekly production meetings, rehearsals, studio work, and final portfolio, as well as other tasks determined by the faculty advisor
Prerequisites: THEA 101 or THEA 102, and THEA 201
Enrollment Limit: 4
Enrollment Preferences: Theatre majors
Expected Class Size: 2
Grading: no pass/fail option, no fifth course option
THEA 493 (F) Senior Honors Thesis: Theatre
Theatre senior honors thesis; this is part of a full-year thesis (493-494).

Winter Study  ---------------------------------------------------------------

THEA 18 (W) Honors Devised Performance Intensive
This Winter Study course will act as an incubator for one or more Theatre Department productions led by students seeking a degree with Honors in Theatre, which are being developed as "devised" works. "Devised performance" is an umbrella term for ensemble-based approaches to making art using research, improvisation, and in-progress showings in a holistic, creative process to produce new and innovative performance work. By looking beyond the traditional roles, structures, and specializations of mainstream theater, today's most compelling devised theater artists have sought out creative paradigms of shared responsibility, flattened hierarchies, and communication across disciplines. The ensemble or ensembles in question will be formed during the fall semester, begin their devising process during Winter Study and continue into the Spring Semester, with performances in the weeks following spring break. Students wishing to enroll in this Winter Study course may do so as members of the ensemble (which can involve work in acting, design, or technical and support roles) with permission of the instructor. Students may also participate in any of these various functions in the production, including acting, even if they do not choose to enroll in the Winter Study course. In addition to the normal activities associated with a devising process and the development of a new performance piece, students in the Winter Study course will participate in a work-in-progress showing, or produce a written paper or portfolio, in the last week of January documenting their work to date on the project.

Requirements/Evaluation: final project or presentation
Prerequisites: permission of instructor
Enrollment Limit: POI
Enrollment Preferences: permission of instructor
Grading: pass/fail only
Materials/Lab Fee: $15 and cost of books

Winter 2020
THEA 19 (W) Williams on Stage: Workshopping an Original Play

Denmark has "Hamlet." New Orleans has "A Streetcar Named Desire." Oklahoma has "Oklahoma!" But where is the play about Williams College? Where's the dramatic work that explores the history, mythology, and identity of this special place? How do we dramatize pivotal moments through which Williams became itself, and the ways in which it both changes and remains constant? Students taking this Winter Study course will help workshop an original new play about Williams College past, developed with and directed by Professor Omar Sangare, and written by Ilya Khodosh ’08, who will be teaching THEA 214: Writing for Stage and Screen in the spring semester. Our work will culminate in a reading that may lead to a full production, coinciding with our campus-wide celebration of the 90th birthday of Stephen Sondheim ’50.

Adjunct Instructor Bio: Ilya Khodosh ’08 received his D.F.A. from the Yale School of Drama. This spring, he will be teaching THEA 214 Writing for Stage and Screen.

Requirements/Evaluation: students taking this Winter Study course will help workshop an original new play about Williams College past, developed with and directed by Professor Omar Sangare, and written by Ilya Khodosh ’08

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: permission by instructor

Grading: pass/fail only

THEA 22 (W) A Filmmaking Intensive

This course involves students in every aspect of film production. The product of this workshop will be a collection of short films written, acted, designed, directed and edited by the class. In the first week we will break up into groups of four and write. The writing process will be enhanced by a master class led by a notable tv/screenwriter. Week 2 will focus on rehearsal, production design, and making a shot list; a master class in acting technique and direction for film will support the work. Then in week 3: Filming! We will shoot on location in and around campus, town and adjoining areas. Finally, the last week will be all about editing and post-production (music and sound mix). At the end of Winter Study we will hold a screening of our films with an invited audience. The class will expect 12 hours minimum of class time each week (three 4-hour classes) plus additional hours outside of schedule class time for rehearsal, costume and set assembly, foundational film viewing and related reading assignments. This is your crash class in how to make a film!

Adjunct Instructor Bio: Jessica Hecht is known to television audiences as "Susan Bunch" on the iconic television series Friends and "Gretchen Schwarz" on Breaking Bad. She has also played memorable roles on Bored to Death, High Maintenance, Red Oaks, and Succession. Presently she stars in the Netflix series Special. An acclaimed stage actress, Hecht has appeared on Broadway in revivals of The Price opposite Mark Ruffalo, Fiddler on the Roof opposite Danny Burstein, The Assembled Parties opposite Judith Light, Harvey opposite Jim Parsons, After the Fall opposite Carla Gugino, The Last Night of Ballyhoo opposite Paul Rudd, Brighton Beach Memoirs opposite Laurie Metcalf, Julius Caesar opposite Denzel Washington, and A View from the Bridge opposite Liev Schreiber and Scarlett Johansson for which she was nominated for a Tony Award for her performance. She recently appeared on stage at Lincoln Center Theater in Admissions for which she received an Obie Award and was also nominated for an Outer Critics Circle Award. Her foundation, The Campfire Project, brings theatre and wellness into Greek refugee camps www.campfire-project.org

Adjunct Instructor Bio: Adam Bernstein is an Emmy® and Peabody Award winning director whose work spans across television, film and music videos. For his directorial work on the critically-acclaimed 30 Rock, Bernstein earned an Emmy Award and a DGA® nomination in 2007. In 2014, he received an Emmy nomination for his work on the pilot for the Peabody and Golden Globe Award winning limited series, Fargo. Bernstein also directed the pilot episodes for Scrubs, Alpha House and Strangers with Candy. His additional television credits include Fosse/Verdon, Breaking Bad, Billions, Better Call Saul, Californication, Rescue Me, Bored to Death, Weeds, Shameless, Nurse Jackie, Entourage and Oz. In film, Bernstein directed Bad Apple starring Chris Noth, Eliot Gould and Robert Patrick. He also wrote and directed the 1997 feature Six Ways to Sunday starring Norman Reedus and Deborah Harry. He has directed over 70 music videos including "Love Shack" for The B-52's, "Hey Ladies" for the Beastie Boys and "Baby Got Back" for Sir Mix-a-Lot, which earned Bernstein an MTV Award nomination for "Best Rap Video." Bernstein began his career as an animator before going on to produce Nickelodeon's first original scripted live-action comedy, The Adventures of Pete & Pete, at the age of 26. In 1973, he was the recipient of the Good Citizenship Medal from the Daughters of the American Revolution. Bernstein currently lives in New York City with his wife, the actress Jessica Hecht.

Requirements/Evaluation: final project or presentation

Prerequisites: one semester of theatre, art or writing
Enrollment Limit: 24
Enrollment Preferences: based on a paragraph of stated interest in making a film
Grading: pass/fail only

The Tutorial Program offers students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight than regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

Since the program’s inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized:

Tutorials are usually limited to 10 students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students’ independent work. But at the heart of every tutorial is the weekly meeting between the instructor and two students. At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners’ work.

Registration

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

AFR 207  (F)  "Out of Africa": Cinematic Por(Be)trayals of a Continent  (DPE) (WS)

Cross-listings:  AFR 207  ARTH 207

Secondary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newreels about Africa’s ‘fighting men’ to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.
Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 276 (S) Black Europeans

Cross-listings: COMP 276 GERM 276 AFR 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-years, sophomores, and juniors

Expected Class Size: 8

AFR 369  (S)  African Art and the Western Museum
Cross-listings:  AFR 369  ARTH 308

Secondary Cross-listing
This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation:  field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences:  Art History and African Studies Majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369 (D2) ARTH 308 (D1)

Writing Skills Notes: Targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

Spring 2020

AMST 142  (F)  AlterNatives: Indigenous Futurism and Science Fiction  (DPE)

Cross-listings: AMST 142  STS 142

Primary Cross-listing

Indigenous people occupy a paradoxical position in time. On one hand, as survivors of genocide and occupation, they are already post-apocalyptic, occupying what many Indigenous thinkers argue is "our ancestor's dystopia." On the other hand, Indigenous people are relegated to the past in settler and colonial discourses, which, in relying heavily on notions of contact, authenticity, and vanishing, preclude Indigenous peoples from not only futurity, but from modernity and associated visions of science and technology too. This tutorial explores how Native science fiction imagines and enacts futurity from this paradoxical Indigenous temporality. Looking across numerous national and transnational Indigenous contexts, in addition to different kinds of media, including short stories, novels, visual art, video games, films, and online platforms like second life, this tutorial foregrounds the ways in which science fiction functions as a mode of Indigenous theory, knowledge production, and claiming of not only the future but of the past and present, as well. Pairing media readings with works in science fiction and Indigenous studies, we will explore the role of indigeneity in the founding and tropes of European and settler science fiction, Native "slipstream" and eco SF, post-post-apocalyptic thinking, space travel and frontiers, Native pessimism, and Indigenous technologies and epistemologies cast into the future. We will pay careful attention to the political stakes of these narratives and expression for Indigenous sovereignty and self-determination.

Requirements/Evaluation: attendance and participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and your partner's writing

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 142 (D2) STS 142 (D2)

Difference, Power, and Equity Notes: This course will underscore the ways in which structures like race, gender, sexuality, and colonialism are deeply imbedded in every form of cultural production, and will highlight how imagining the future otherwise has real impact and import in the lives and political existence colonized people.

TUT Section: T1    TBA    Eli Nelson

AMST 275  (F)  American Drama: Hidden Knowledge
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Spring 2020
ANTH 134  (S)  Leaving the World Behind: The Literature of Reclusion  (DPE) (WS)

Cross-listings: CHIN 134  REL 134  COMP 134  ANTH 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as an aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary “intentional communities”)? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 134 (D1)  REL 134 (D2)  COMP 134 (D1)  ANTH 134 (D2)

Writing Skills Notes: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner’s paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

Spring 2020

ANTH 246  (F)(S)  India’s Identities: Nation, Community, & Individual

Cross-listings: ASST 246  ANTH 246  WGSS 246  REL 246

Secondary Cross-listing

This tutorial considers India’s legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India’s diverse and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion
Requirements/Evaluation: weekly writing assignments and tutorial attendance every week
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ASST 246 (D2) ANTH 246 (D2) WGSS 246 (D2) REL 246 (D2)

Writing Skills Notes: Weekly writing, writing chats, intensive feedback on writing grammar, style, argument every week.

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by theorizing the ways that social power and equity have been and continue to be a source of struggle and division within Indian society. It analyzes the ways that communities have used religion, gender, ethnicity, and caste to struggle for power and status within Indian society.

ANTH 269 (F)(S) Mindsight: Mindfulness and Medicine (DPE) (WS)
Cross-listings: REL 269 STS 269 ANTH 269 ASST 269

Primary Cross-listing
This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

Class Format: weekly tutorial, context-based learning, experiential learning
Requirements/Evaluation: weekly tutorial papers and discussion
Prerequisites: a course on Buddhism is preferred but not required
Enrollment Limit: 10
Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 269 (D2) STS 269 (D2) ANTH 269 (D2) ASST 269 (D2)
Writing Skills Notes: This class will involve weekly tutorial essays of 1200 or 600 words, written feedback on every essay, and a mid-semester 'writing chat' with the instructor to improve patterns in writing.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can alleviate pervasive and population wide health issues in the US including rising rates of hypertension, anxiety, and mental health issues that are exacerbated by stress related to social inequality and structural violence. It explores and critiques the ways that mindfulness has been marketed as an elite and non-inclusive practice within the US.

ANTH 328 (F) Emotions and the Self
Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

Requirements/Evaluation: typical for that of a tutorial

Prerequisites: none; open to first-year students with instructor's consent

Enrollment Limit: 10

ARAB 212 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: REL 210  ARAB 212  ARTH 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five
1-2-page response papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** First- and second-year students, but open to all

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**ARTH 207 (F)** ”Out of Africa”: Cinematic Por(Be)trayals of a Continent (DPE) (WS)

**Cross-listings:** AFR 207 ARTH 207
This tutorial provides a focused study of the politics/poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film/cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

**ARTH 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art** (WS)

**Cross-listings:** WGSS 231 ARTH 231

**Primary Cross-listing**

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art—never created for its own sake—was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity. When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

**Class Format:** some tutorial meetings will be conducted at local museums

**Requirements/Evaluation:** engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner's tutorial papers

**Prerequisites:** first-year and sophomore students (this class is open to students with no experience in art history)

**Enrollment Limit:** 10

**Enrollment Preferences:** a statement of interest will be requested in the event the course is over-enrolled

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 231 (D2) ARTH 231 (D1)

**Writing Skills Notes:** This course's fundamental goal is to support opportunity and skills to construct compelling and original written arguments. Tutorial partners will share standards and guidelines for strong writing with instructor: common concepts and language for critique, discussion, and applause. We will consider the power of argument inextricable from the quality of writing, and thus address writing issues, strategies, and successes in a deep way, organically and consistently, in every tutorial meeting.
ARTh 239 (F) Social Media in the Nineteenth Century: Prints and Pictorial Persuasion  (WS)

This tutorial surveys the public lives of printed pictures in Europe between 1789 and 1914. Though the history of print extends well beyond these chronological limits, the so-called "long nineteenth century" witnessed the invention of new printmaking technologies. Larger audiences could now stay abreast of the period's revolutions, wars, and breakthroughs both in science and in fashion. Designed for students who have no prior experience studying art history, the course will begin with an overview of printmaking techniques before moving on to focused case studies that include pornographic political engravings made during the French Revolution, etchings created by the Spanish artist Francisco de Goya, and the manipulation of self and space made possible by early photography. We will analyze how these works were produced in multiples, circulated by publishers and dealers, and consumed by viewers across Europe. Readings in cultural theory, intellectual history, the history of technology, and art history will help students develop their own interdisciplinary approach to the print. Together we will ask: what makes this medium social? How is cultural critique made visible? What can print cultures teach us about today's practices of engaging with images digitally?

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2 pages) as well as discussion; three group meetings in WCMA, the Clark, and Chapin Library

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this course, students will write a minimum of 20 pages broken up over several shorter analytical essays. Moreover, they will also write brief responses to their partners' essays in which they consider the craft of writing and composition. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ARTH post-1800 Courses
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 342 (S) Monuments and Miniatures: Architecture and Painting in India (WS)

Cross-listings: ASST 342 ARTH 342

Primary Cross-listing

This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

Prerequisites: none, open to all students

Enrollment Limit: 10

Expected Class Size: 6

ARTS 323 (F) Colour Function

This tutorial places colour as a central consideration in our object making. Experiments and discussions will include development of dyes and inks,
foraging for colours, understanding palettes and their relationship to 'the tasteful' and 'the garish', 'beautiful' and 'the unpleasant', colour blocking, monochromes, culture and colour, and the relationship between a variety of pigments, their medium of suspension, and the material they stain or sit directly on top of, unstable. In this way, we will work with a large selection of media and the assignments will be both foundational and highly experimental; you are creating a hundred new colours within a strict grid—you are mixing two new colours through light and projection alone, with no guides. The course is open to anyone who has taken advanced classes in printmaking + drawing, sculpture, and photography.

**Class Format:** the class will meet in tutorial pairs once a week and collectively whenever there is a skill workshop

**Requirements/Evaluation:** weekly assignments and final project; participation, generosity towards studio and studio members; attendance

**Prerequisites:** any 200-level art studio class or submit a portfolio for consideration

**Enrollment Limit:** 10

**Enrollment Preferences:** Art Studio majors

**Expected Class Size:** 6

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Distributions: (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 269 (D2)  STS 269 (D2)  ANTH 269 (D2)  ASST 269 (D2)

Writing Skills Notes: This class will involve weekly tutorial essays of 1200 or 600 words, written feedback on every essay, and a mid-semester 'writing chat' with the instructor to improve patterns in writing.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can alleviate pervasive and population wide health issues in the US including rising rates of hypertension, anxiety, and mental health issues that are exacerbated by stress related to social inequality and structural violence. It explores and critiques the ways that mindfulness has been marketed as an elite and non-inclusive practice within the US.

ASST 342  (S)  Monuments and Miniatures: Architecture and Painting in India  (WS)

Cross-listings:  ASST 342  ARTH 342

Secondary Cross-listing
This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment
has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

Prerequisites: none, open to all students

Enrollment Limit: 10

ASTR 404 (S) Unsolved Problems in Galaxy Evolution

Cross-listings: ASTR 404

Primary Cross-listing

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets

Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

ASTR 412 (F) Heliophysics

Cross-listings: ASTR 412 PHYS 412
We study all aspects of the Sun, our nearest star. This semester follows the total solar eclipses of August 21, 2017, whose totality crossed the U.S. from coast to coast, and the July 2, 2019, total solar eclipse that crossed Chile and Argentina. In addition to discussing our observations of these eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We hope to observe the transit of Mercury across the face of the Sun on November 11, 2019, during the semester; we also discuss our data analysis of recent transits of Mercury we observed from the ground and from space (most recently in May 2016). We will highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble.

Requirements/Evaluation: biweekly tutorial presentations; biweekly response to colleagues' presentations

BIOL 421  (F) Thermoregulation: From Molecules to Organisms

Thermal physiology involves the study of molecular events, organ systems, and organism-environmental interactions that are involved with heat production and temperature maintenance. The area of thermal physiology has been around for over 100 years. However, only in the last 5-7 years has the science progressed to understanding basic fundamental mechanisms for generating and regulating heat production. This tutorial will focus on four questions: 1) how do organisms generate heat? 2) how do organisms sense the temperature in the environment? 3) how do organisms integrate information about the environment (temperature, humidity, time of day, etc.) with internal information (deep body temperature, energy stores, etc.) to regulate their metabolic production of heat? 4) how do animals make "the decision" to enter a state of torpor?

Requirements/Evaluation: five 4- to 5-page papers; five 1- to 2-page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites: BIOL 205 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Biology majors that have not had a 400-level course, followed by senior Biology majors, followed by junior Biology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: NSCI Group C Electives

Fall 2019
Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in “metagenomics” (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and “metatranscriptomics” (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Requirements/Evaluation: five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic

Prerequisites: BIOL 202

Enrollment Limit: 10

Enrollment Preferences: open to juniors and seniors; senior Biology majors who have not taken a 400-level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: BIMO, BIGP; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (WS)

Writing Skills Notes: Weekly written assignments consisting of four-page critique papers (five total during a semester) and two-page response papers (five total during a semester). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2020

CHIN 134  (S) Leaving the World Behind: The Literature of Reclusion  (DPE) (WS)

Cross-listings: CHIN 134  REL 134  COMP 134  ANTH 134

Primary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion-living a life of seclusion from society-in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state-to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors
**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 134 (D1) REL 134 (D2) COMP 134 (D1) ANTH 134 (D2)

**Writing Skills Notes:** Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

COMP 215 (F) Cults of Personality (WS)

**Cross-listings:** RUSS 219 COMP 215

**Secondary Cross-listing**

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase “cult of personality” was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China’s Mao Zedong, Iran’s Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany, Italy, and Spain, China, Iran, North Korea, and Cuba. All readings will be in English, and all films will have English subtitles.

**Requirements/Evaluation:** completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**Writing Skills Notes:** Students will be writing papers (5-6 pages) every other week and receiving detailed feedback on their writing with the expectation that they will identify areas in need of improvement and work on these throughout the semester. The course will also require that students write one paper together with their tutorial partner and that they rewrite two different papers, one at midterm and the other at the end of the term.

**Fall 2019**

TUT Section: T1 TBA Julie A. Cassiday

COMP 215 (F) Cults of Personality (WS)

**Cross-listings:** COMP 231 ENGL 266
In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

COMP 275 (F) American Drama: Hidden Knowledge

Cross-listings: AMST 275 COMP 275 ENGL 224 THEA 275

Secondary Cross-listing

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what we can learn in particular from American drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

COMP 276 (S) Black Europeans

Cross-listings: COMP 276 GERM 276 AFR 276

Primary Cross-listing

This course explores the invisibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants—such as Hyacinthe Rigaud’s Portrait of Marquise de Louville (1708), Nicolas Lancret’s The Escaped Bird (1730), and Manet’s Olympia (1863) to name a few—and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

COMP 352 (S) Mysticism: Vision, Writing, History (WS)

Cross-listings: ENGL 374 REL 374 COMP 352

Secondary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and
practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century’s most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

**Requirements/Evaluation:** biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Attributes:** ENGL Literary Histories A
Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

**Class Format:** meetings with the instructor in pairs for one hour each week

ECON 538 (S) Resilience and Macroeconomic Policy
Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world's population continue to live in fragile conditions, buffeted by conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers' distorted incentives and governments' internal conflicts, fragility also deteriorates policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.
ENGL 131  (F)  All About Sonnets  (WS)
Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships—the God, Nature, art, a particular place, the State, oppressors—while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. “A sonnet is a moment's monument,” wrote D.G. Rossetti (in, of course, a sonnet)—speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state—but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barrett Browning, D.G and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

Class Format: first week in regular class meetings, followed by weekly tutorial meetings in pairs

Requirements/Evaluation:  five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or “prose sonnets;” thoughtful participation in tutorial meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

Writing Skills Notes: Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner's paper. Regular sonnet paraphrases and or “prose sonnets” that will be critiqued for linguistic precision and succinctness.

ENGL 234 (S) The Video Essay

While students today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think with the medium, exploiting the resources of film and video in their efforts to understand how they work on viewers. The Video Essay offers the chance to do that. After being introduced to the fundamentals of film analysis and trained in the use of Adobe Premiere Pro, students will spend the semester alternately making short video essays and commenting on the essays produced by their partners. Please note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required.

Class Format: we will meet as a group for three weeks, then break into groups of two with whom I will meet weekly; students will alternate between creating video essays on film topics, and writing commentaries on the essays of their partner

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one’s partner’s video essays

Prerequisites: permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; first-year students; English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: course books

Distributions: (D1)

ENGL 244 (F) Interpreting Film (WS)

From the earliest days of narrative film, it was clear that the new medium enjoyed an unparalleled capacity to absorb spectators in the sheer passive enjoyment of the cinematic spectacle, so for many viewers cinema has seemed naturally to be a form of entertainment rather than an art form or a medium for exploring ideas. But not only have entertaining “movies” and artistic “films” always co-existed amicably, but in many cases have coincided:
some of the greatest works of cinematic art first billed themselves unassumingly as enjoyable diversions. In order to appreciate the aesthetic and intellectual richness of such films, one must learn to "read" their crucial scenes closely, analyzing their visual and auditory language as well as their dramatic content, and must learn to interpret their surprisingly complex larger patterns of thought. This tutorial offers concrete training in both of these skills. During the first four weeks, students will write and discuss short weekly papers analyzing key sequences of a film, learning to identify diverse cinematic effects in order to illuminate dramatic patterns. During the last six weeks of the semester each student in a tutorial pairing will write a longer interpretive paper in alternate weeks, learning to construct fuller arguments addressing the whole of a film. Most films will be drawn from classical Hollywood cinema of the 1930s and 1940s, but we will also study European, Indian, and Japanese films. Readings during the first part of the semester will concern technical features of cinema; later readings will address larger interpretive issues (e.g., patterns in film genres, such as the nature of the gangster as a tragic hero; or social issues reflected in films, such as the newly empowered roles of women during the early 1940s and their influence in shaping the dangerous heroines of film noir).

Requirements/Evaluation: six short (2- to 6-page) papers and three short responses to one's partner's paper, totalling 25 pages of writing; active, sustained participation in tutorial discussions

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 10

Enrollment Preferences: sophomores and first-year students who have satisfied or placed out of the English Department's 100-level prerequisite

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Tutorial--constant writing and critique. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 254 (F) 'As If Her Mouth Were a Weapon': Jamaica Kincaid (DPE)

Cross-listings: ENGL 254 WGSS 274

Primary Cross-listing

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include Annie John (1985), Lucy (1990), The Autobiography of My Mother (1996), My Brother (1997), Mr. Potter (2002), and See Now Then (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

Class Format: meeting as a full group two to three times; meeting in tutorial pairs for most of the semester

Requirements/Evaluation: five 4- to 5-page essays and five 2-page critical responses, completed in tutorial pairs, keyword assignment, final roundtable

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENGL 266 (F) Postmodernism (WS)

Cross-listings:  COMP 231  ENGL 266

Secondary Cross-listing

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theoreticians of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

ENGL 374 (S) Mysticism: Vision, Writing, History (WS)

Cross-listings:  ENGL 374  REL 374  COMP 352

Primary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally,
and early modern philosophers’ criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century’s most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ECON 214 ENVI 212

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244 (S) Environmental Ethics  (WS)  
Cross-listings: ENVI 244  PHIL 244
Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion
Prerequisites: ENVI 101 or one course in PHIL
Enrollment Limit: 10
Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: meets Value Theory requirement only if registration is under PHIL
Distributions: (D2)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.
ENVI 248 (F) "Our Response Will Define Our Future": Climate Change Policy Analysis (WS)

In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

Requirements/Evaluation: students alternate in preparing 5- to 7-page papers and 2-page responses (five papers and five responses in total), final paper building on one of the 5- to 7-page papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: 1. second-year students 2. Environmental studies concentrators and majors 3. first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Bi-weekly 5-7 pages long papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

GEOS 250 (S) Tectonic Geomorphology and Landscape Development (WS)

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. Tectonic geomorphology explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate.

Class Format: after an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 201, 202, 301, 302, 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENVI Environmental Policy EVST Culture/Humanities PHIL Contemporary Value Theory Courses
GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips, supplemented by reading assignments, will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. We will also use journal articles to explore ways in which plate tectonics help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: weekly one-hour meetings, in addition, there will be five field trips early in the semester on Thursday from 11:20 to 3:50 pm

Requirements/Evaluation: six papers, three based on field trips and three based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: Six 5- to 10-page papers throughout the semester based on data collected during field trips (3) and journal articles (3). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GERM 276 (S) Black Europeans

Cross-listings: COMP 276 GERM 276 AFR 276

Secondary Cross-listing

This course explores the invisibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 276 (D1) GERM 276 (D1) AFR 276 (D2)

HIST 103 (F) Growing up in Africa/Growing up African (DPE) (WS)

Most African nations today are youthful: while the median age in the United States is 38 years, the median age on the African continent is just 19. Young Africans are portrayed both outside and inside the continent in strikingly contradictory ways: as victims of oppression, dangerous threats to social order, or the saviors of their society. But beyond these stereotypes, what is it like to be young in Africa? This tutorial introduces students to the extremely diverse experiences of childhood and adolescence across the continent, from the 1800s to the present. We will draw on scholarly research as well as novels and biographies. In particular, the course focuses on how young Africans have boldly responded to dominant expectations about their gender formation, sexuality, and their relationship to authority—responses which have often provoked broader social conflicts. The first half of the class examines examples of the lives of children and adolescents born during the eras of slavery, colonial rule and apartheid, and how those institutions changed previous relationships between African youth and their elders. The second half of the course considers attempts by post-colonial African state leaders to mobilize “the youth” as nation builders and manage their behaviors since the 1950s—and how young Africans have reacted. In the class, we will also consider how migration and emigration have impacted Africans’ experiences of growing up outside their home communities. Throughout the semester, students will track how the definition of childhood, adulthood, and intermediary statuses (e.g. youth), has differed across time and place, while also reflecting on how they perceive their own process of “growing up.”

Requirements/Evaluation: five tutorial papers (5 pages each) and five short response papers (2 pages each), alternating each week; one paper will be revised and resubmitted

Prerequisites: first-years and sophomores

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Every week one student will produce an argument-driven essay (~5 pages) on the assigned reading, while the other student will write a 2- to 3-page response. These roles will swap weekly. Instructor will provide regular feedback on argument, content, and structure of the essays and students will choose one essay to revise for resubmission at the end of the semester.

Difference, Power, and Equity Notes: The course looks at how people in Africa have been subject to various forms of social control because of their status as children or youth. At the same time, the examples studied emphasize the creative and powerful ways that young Africans have defined their lives in opposition to various structures of power. The struggles we will examine take place because of differences in age, but also of marital status, social background, class, gender, and race.

HIST 134 (S) The Great War (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for the East and Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; final research paper

Prerequisites: permission of instructor

TUT Section: T1 TBA Alexandra Garbarini
HIST 140 (S) Crime and Punishment in Russian History (WS)

Cross-listings: HIST 140 RUSS 140

Primary Cross-listing

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

TUT Section: T1 TBA Yana Skorobogatov

HIST 155 (F) School Wars (WS)

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Prerequisites: first-years or sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
HIST 484 (F) The Second World War: Origins, Course, Outcomes, and Meaning (WS)

1991 marked the 50th anniversaries of the Nazi invasion of Russia and the Japanese attack on Pearl Harbor. Though war had come to Europe as early as 1939, when Germany invaded Poland, after 1941 the war became a truly global conflict of unprecedented extent, ferocity, and destructiveness. As late as 1943 it still appeared that the Axis powers might win the war. But, by the end of 1945, the bombed-out ruins of Germany and Japan were occupied by the Allies, who were preparing to put the surviving Axis leaders and generals on trial for war crimes. This tutorial will concentrate on important questions and issues that arise from a study of WWII. What were the origins of this central event of the 20th century? How and why did the war begin? Why did the war take the course it did? What were the most crucial or decisive episodes or events? How did the Allies win? Why did the Axis lose? Could the outcome have been different? Many of the topics examined will also have to deal with important questions of human responsibility and the moral or ethical dimensions of the war. Why did France, Britain, and the Soviet Union not stop Hitler earlier? Who was to blame for the fall of France and the Pearl Harbor fiasco? Why did the Allies adopt a policy of extensive firebombing of civilian targets? How could the Holocaust have happened? Could it have been stopped? Did the Atomic bomb have to be dropped? Were the war crime trials justified? By the end of this tutorial, students will have become thoroughly familiar with the general course the war followed as well as acquiring in-depth knowledge of the most decisive and important aspects of the conflict. Students will also have grappled with the task of systematically assessing what combinations of material and human factors can best explain the outcomes of the major turning points of the war, and also have dealt with the problem of assessing the moral and ethical responsibility of those persons, organizations, and institutions involved.

Requirements/Evaluation: will write and present orally an essay of approximately seven double-spaced pages every other week on a topic assigned by the instructor; students not presenting an essay have the responsibility of critiquing the work of their colleague

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: junior and senior History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will present 7 double-spaced pages every other week and a 7-10 page final written exercise. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: HIST Group C Electives - Europe and Russia
a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was "right" or "wrong" or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

**Class Format:** students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay.

**Requirements/Evaluation:** student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** fulfills History's 400-level graduation requirement

**Distributions:** (D2) (WS)

**HIST 487 (S) Archive Stories (WS)**

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, *Archive Fever*, historians, archivists, and cultural theorists have been asking questions about the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is *not* a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

**Requirements/Evaluation:** each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final paper about their work on the Williams archives

**Prerequisites:** open to all junior and senior History majors and others with permission of instructor

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (WS)

**Writing Skills Notes:** Each student will write five 6- to 7-page essays (one every other week) that will be critiqued, both in writing and orally, by the instructor and the student's tutorial partner. The student will also write a final 6- to 7-page essay reflecting on the nature of Williams archival practices in the context of the readings undertaken during the course of the tutorial. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**HIST 492 (S) Revolutionary Thought in Latin America**

For much of Latin America's postcolonial history, political and business elites in the United States have viewed the region as a source of revolutionary threats. Too often histories of actual revolutionary movements and the ideas they promulgated have followed either the self-serving narratives that the revolutionaries have laid out or the similarly limited stories composed by their opponents. This tutorial, by contrast, will delve into the complex, contingent, and at times counterintuitive history of revolutionary thought in modern Latin America. Our readings and discussions will carry us from the nineteenth century to the rise of the "New Left" in the last few years. Throughout the course our principle goal will be to examine the internal logic of the most influential programs of revolutionary thought as well as their relationship to circumstances external to them, both in their home regions and globally. At the same time, we will consider the human or moral promise and price of revolutionary options: did the proposed or alleged aims of revolutionary ideals justify the costs they would impose?

**Class Format:** students will meet with the instructor in pairs for an hour each week

**Requirements/Evaluation:** each student will write and present a 5- to 7-page essay on the readings or offer an oral critique of the work of their partner each week; evaluation will be based on written work and analysis of their partner's work

**Prerequisites:** none; open to all
HIST 495 (F) Memoirs, Memory and the Modern Jewish Experience

Cross-listings: HIST 495 JWST 495

**Primary Cross-listing**

Memoirs have proven to be an increasingly important source for Jewish historians, and particularly for those interested in the impact of modern society on Jewish identity. This tutorial will consider modern Jewish history by focusing on such individual voices. By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as Europe, the United States, Latin America, and the Middle East, we will consider how Jews in different historical settings have understood their "Jewishness" and their relationship to their past, as well as the historian's role in this relationship. In each case, we will ask such questions as: How does the role/importance of religion and ritual shift over time and place? How does the surrounding society shape the author's sense of self and his/her place in society? Similarly, we will consider the impact of economic, occupational, and political factors on understandings of Jewish identity as well as the impact of gender and generational splits on such understandings. In broad terms we will question what (if anything) links the different individuals under study. In other words, is there something about Jewish identity that transcends the historical specificity of the author's setting? Throughout the course, we will also consider how a memoir can be used as an historical source. Can we generalize from individual experience, and if so how do we reconcile contradictions among the multiple voices?

**Requirements/Evaluation:** each student will write and present orally a 3- to 5-page response paper on the assigned readings of the week (alternating weeks); there will be one final 10-page paper

**Prerequisites:** none

Enrollment Limit: 6

Enrollment Preferences: upperclass students, History majors and Jewish Studies concentrators, or those with documented academic interests in the subject matter

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JLST 272 (F) Free Will and Responsibility (WS)

Cross-listings: PHIL 272 JLST 272

Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not
only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We’ll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: five 5-page papers and five 2-page papers

JWST 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: JWST 339 PSCI 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through—and reflected deeply on—two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt’s vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt’s are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

Requirements/Evaluation: five 5-page papers; five 2-page responses; a final revision of a prior paper; participation

Prerequisites: a prior course in political theory, philosophy, or critical theory, or permission of the instructor

TUT Section: T1 TBA Haydee M. A. Lindo

MUS 272 (S) Music and Meaning (WS)

Nearly everyone finds music meaningful, but what exactly does it mean? Without the help of words, this largely non-referential art presents special challenges to interpretation. While most would agree that musical sounds can do such things as mimic the rumbling of thunder, evoke the countryside, suggest the act of chasing, or express rage, the capacity of music to convey meaning remains controversial among scholars, performers, and listeners. Some, following music critic Eduard Hanslick, assert that musical works are essentially "tonally moving forms"—patterns of sound with no reference to the world outside themselves; a work’s meaning derives solely from the interplay of musical elements. Others counter that music can signify aspects of human experience, its sounds and structures not merely referring to the outside world but even relating complex narratives. Certain writers have argued that, without the assistance of language, what music signifies remains vague, while others insist that the meaning of music is actually more precise than that of words. In this tutorial course, we will explore a range of questions regarding musical meaning. How can combinations of pitches, rhythms, and instrumental timbres signify something beyond themselves? Is the subject of musical meaning more relevant to some historical styles or genres than others? How can we glean the meaning(s) of a work? Should we concentrate on formal processes within the music? Consider socially constructed meanings? Seek the composer’s intentions? What makes some interpretations more convincing than others? In grappling with these questions, students will engage with writings by Agawu, Cone, Hanslick, Kramer, Langer, Lewin, Newcomb, and Schopenhauer, among others. Music to be studied includes works by Beethoven, Schubert, Chopin, Brahms, Mahler, Tchaikovsky, Ravel, Stravinsky, Glass, and Adams.

Class Format: during the first and last weeks of the semester, students will attend two group classes; in the other weeks, students will meet with the instructor in pairs for a one-hour session at a mutually convenient time

Requirements/Evaluation: students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner’s paper in the alternate weeks; evaluation will be based on five papers/presentations, and five responses

Prerequisites: ability to read music, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores and juniors
MUS 279 (S)  American Pop Orientalism  (DPE) (WS)

This tutorial will investigate the representation of Asians and Asian Americans in American popular culture since the late nineteenth century. Our focus will be on music's role in Orientalist representation in a wide variety of media and genres, including Hollywood film, television, popular song, music videos, Broadway musicals, hip hop, and novels. We will begin with major texts in cultural theory (Said, Bhabha) and will attempt throughout the semester to revise and refine their tenets. Can American Orientalism be distinguished in any fundamental way from nineteenth-century European imperialist thought? How does Orientalist representation calibrate when the “exotic others” being represented are themselves Americans? Our own critical thought will be sharpened through analysis and interpretation of specific works, such as Madame Butterfly , "Chinatown, My Chinatown," Sayonara , Flower Drum Song , Miss Saigon , Rising Sun , M. Butterfly , Aladdin , and Weezer's Pinkerton . We will end the semester by considering the current state of Orientalism in American popular culture.

Requirements/Evaluation: five 5- to 6-page essays and five critical oral responses

Prerequisites: previous related coursework and/or musical experience is desirable, but is not required

Enrollment Limit: 10

Enrollment Preferences: students with prior related course experience

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)  

Writing Skills Notes: Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students will develop analytical and interpretive skills applicable to their future engagements with a wide range of art forms as we investigate the musical, literary, and visual techniques employed in works of exotic representation. We will focus on how popular culture has shaped and reflected perceptions of race and gender in American history since the late 19th century.

PHIL 104  (S)  Philosophy and Tragedy
Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can be understood by rational means. Furthermore, they share the conviction that the most important components of a successful life are within the control of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The tragedians emphasize the ways in which the cosmos and our role in it resists any attempt to be understood, and emphasize the ways in which in the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians can lead to a thoroughgoing nihilism according to which --the best thing of all [for a human being] is never to have born--but the next best thing is to die soon (Aristotle's *Eudemus* as quoted in Nietzsche's *Birth of Tragedy*; see also Sophocles' *Oedipus at Colonus*).* Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. Furthermore, philosophers have continued to revisit the existential questions vividly raised by Greek tragedy. In this course, we will examine a number of Greek tragedies and philosophical writing on tragedy and the tragic. We will read the *Oresteia* and *Prometheus Bound* by Aeschylus, Sophocles’ *Theban Cycle*, and the *Hippolytus, Bacchae and Philoctetes* by Euripides. As we read through these plays, we will also examine a number of philosophical works about tragedy. We will begin with Aristotle's *Poetics* and will continue with Hume's *Of Tragedy*, Hegel's various writings on tragedy, and Nietzsche's *The Birth of Tragedy*. If possible, we will arrange to see a live performance of a Greek tragedy.
Requirements/Evaluation: five papers, five responses and a final paper in multiple drafts; each week one student will write a paper responding to the week’s readings and the other student will write a response to that paper
Prerequisites: none; this tutorial is an appropriate first course in PHIL

PHIL 122  (F)  Philosophical Approaches to Contemporary Moral Issues  (WS)
In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, and the ethics of protest. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

Requirements/Evaluation: bi-weekly tutorial papers, oral commentaries, and tutorial discussion  
Prerequisites: none; this course is suitable for first-year students  
Enrollment Limit: 10  
Enrollment Preferences: first-year students, then sophomores, then Philosophy majors  
Expected Class Size: 10  
Grading: no pass/fail option, no fifth course option  
Distributions: (D2) (WS)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

TUT Section: T1 TBA Julie A. Pedroni

PHIL 125  (F) Introduction to the Philosophy of Law  (WS)
This tutorial, designed especially for first year students, is a philosophy course, not a prelaw course. We will examine basic questions in the philosophy of law: What is the relationship between law and morality? Why should one obey the law (if one should)? When, if ever, is paternalistic interference by the state into the lives of its citizens justified? We will look at civil disobedience and theories of legal interpretation. We will pay special attention to the first amendment and questions concerning free speech and hate speech. We will read classic works (such as John Stuart Mill, On Liberty and H. L. A. Hart, The Concept of Law), contemporary articles, and United States Supreme Court cases.

Class Format: meeting with the instructor in pairs for an hour each week  
Requirements/Evaluation: a 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks, and revise and re-write  
Prerequisites: none  
Enrollment Limit: 10  
Enrollment Preferences: first-year students  
Expected Class Size: 10  
Grading: yes pass/fail option, no fifth course option  
Distributions: (D2) (WS)

Writing Skills Notes: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks, and revise and re-write one of their papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

PHIL 213  (S) Biomedical Ethics  (WS)
Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the
biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

**Class Format:** students will meet with the professor in pairs for approximately 75 minutes per week, writing and presenting 5- to 7-page essays every other week, and commenting orally on partners' essays in alternate weeks

**Requirements/Evaluation:** bi-weekly papers, oral commentaries, and tutorial discussions

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** PHIL, PHLH or STS majors or concentrators, especially those who need the course to complete their majors/concentrations; and students committed to taking the tutorial

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**PHIL 224 (S) Marx, Nietzsche and Freud** (WS)

The writings of Marx, Nietzsche and Freud continue to influence important debates in the humanities and social sciences. Marx's historical materialism, Nietzsche's post-metaphysical and naturalistic turn in ethics, and Freud's emphasis on the unconscious determinants of human behavior all represent what has been referred to as the decentering of human consciousness in explanations of human history and existence. All three thinkers have had a profound influence on critical theories of the 20th century. In this tutorial, we will focus on questions concerning their methods of critique, and their respective diagnoses of modern culture and societies. All three attempt to explain particular sources of human suffering such as loss of meaning, the sense of alienation from self and others, constraints on free expression, and nihilistic world-weariness. The course texts may include several short selections from important historical influences such as Kant and Hegel as well as 20th century figures who have reacted to, revised, or responded to them in creative ways. Among the latter one could include Louis Althusser, Michel Foucault, Gilles Deleuze, Jacques Lacan, Luce Irigaray, Judith Butler, Wendy Brown, Elizabeth Grosz and Peter Sloterdijk, to name only a few.

**Requirements/Evaluation:** bi-weekly papers, oral commentaries, and tutorial discussions

**Prerequisites:** 100-level Philosophy course, PHIL 202, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors or prospective majors and students with background and interest in critical theories

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write six tutorial papers on assigned topics or questions of 5- to 6-pages in length, one of which they will revise and submit at the end of the term. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments and interpretations.

PHIL 244  (S)  Environmental Ethics  (WS)

Cross-listings:  ENVI 244  PHIL 244

Secondary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation:  six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites:  ENVI 101 or one course in PHIL

Enrollment Limit:  10

Enrollment Preferences:  declared and prospective Environmental Studies majors and concentrators

Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes:  ENVI Environmental Policy  EVST Culture/Humanities  PHIL Contemporary Value Theory Courses

PHIL 250  (F)  Philosophy of Economics  (WS)

The status of economics as a predictive science has been most prominently brought into question, historically, by three unpredicted yet extremely important economic events: the Great Depression of the 1930s, stagflation of the 1970s, and bursting of the mortgage bubble in 2008. The issue of prediction was also raised by economist Donald McCloskey who, in 1988, asked his fellow economists, "If you're so smart, why ain't you rich?" Some critics find predictive failures of economists unsurprising, given the frequent reliance of the latter on assumptions known to be false (e.g., that economic agents are always selfish, have perfect information, and never make mistakes) and on models that unavoidably ignore potentially relevant factors. Perhaps, then, economics is not primarily a predictive science, but instead a descriptive, historical, and/or mathematical one. In this course, relying on works by economists and philosophers, we examine the status of economics as an academic discipline, focusing on its assumptions, methods, and results.

Requirements/Evaluation:  six 6- to 8-page essays, six 2- to 3-page response papers, participation in discussions

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  Philosophy majors and potential majors, then Economics majors and potential majors

PHIL 272  (F)  Free Will and Responsibility  (WS)

Cross-listings: PHIL 272  JLST 272

Primary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

PHIL 281  (S)  Philosophy of Religion  (WS)

Cross-listings: PHIL 281  REL 302

Primary Cross-listing

Our goal will be to determine how far reason can justify belief in God. We will examine well-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, and the argument from evil). For each argument, we will first look at historically important formulations and then turn to contemporary reformulations. Our aim will be to identify and evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. Near the end of the semester, we'll also examine some evolutionary explanations of religious belief. Our tools in this course will be logic and reason, even when we are trying to determine what the limits of reason might be. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, and several contemporary philosophers.

Class Format: students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and
oral argument as well as critical reasoning and writing

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

PHIL 310 (F) Wittgenstein's Later Philosophy (WS)

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published *Philosophical Investigations*, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's *Philosophical Investigations*, one of the greatest books ever written. In the second part of the course, we will read *On Certainty*, and selections from other of Wittgenstein's posthumously published works: *Zettel*, *Philosophical Grammar*, *Remarks on the Philosophy of Psychology, Culture and Value*, *Lectures and Conversations on Aesthetics, Psychology and Religious Belief*, and *The Big Typescript*. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.

Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Prerequisites: two Philosophy courses

Enrollment Limit: 10

Enrollment Preferences: preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two short (about 800 words) seminar papers; five 5-7 pages long papers; five 2-3 pages long comments on their tutorial partner's papers; and a final paper (also 5-7 pages long) which will be a revision of one of the previously written papers. Students will get regular feedback from their tutorial partner and from the instructor on the substance of their work as well as on their oral and writing skills, with suggestions for improvement.

Fall 2019

TUT Section: T1 TF 1:10 pm - 2:25 pm Bojana Mladenovic
"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet from its inception and continuing into the 19th and 20th centuries we find the promise of Enlightenment challenged by colonialist expansion, the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? Should it be? Among the possible topics addressed will be: criticizing capitalism, alienation and objectification, progress and freedom, the entanglements of power and reason, radical liberalism, the future of democracy as well as post-structuralist, post-colonial, feminist and anti-racist critiques of the Frankfurt School. Readings may include historical as well as contemporary figures such as: Kant, Freud, Horkheimer, Adorno, Marcuse, Habermas, McCarthy, Honneth, Fraser, Amy Allen, Foucault, Ranciere, Achilles Mbembe, Judith Butler, Wendy Brown, Spivak, and Charles Mills, among others.

Class Format: students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: each student will write and present five 5- to 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings

Prerequisites: PHIL 202, Kant course, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and students with background in political theory, feminist theory, or post-colonial theory

We study all aspects of the Sun, our nearest star. This semester follows the total solar eclipses of August 21, 2017, whose totality crossed the U.S. from coast to coast, and the July 2, 2019, total solar eclipse that crossed Chile and Argentina. In addition to discussing our observations of these eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We hope to observe the transit of Mercury across the face of the Sun on November 11, 2019, during the semester; we also discuss our data analysis of recent transits of Mercury we observed from the ground and from space (most recently in May 2016). We will highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble.

**Requirements/Evaluation:** biweekly tutorial presentations; biweekly response to colleagues' presentations

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Spring 2020
PSCI 248 (F) The USA in Comparative Perspective (WS)

Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; nationalism and national identity; war and state-building; American exceptionalism, religion, and foreign policy; the role of political and economic institutions; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores and students who have been denied enrollment in the course previously

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, professor meets with them individually to discuss the composition and presentation of each genre.

PSCI 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: JWST 339 PSCI 339

Primary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through—and reflected deeply on—two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

Requirements/Evaluation: five 5-page papers; five 2-page responses; a final revision of a prior paper; participation

Prerequisites: a prior course in political theory, philosophy, or critical theory, or permission of the instructor

PSYC 158  (F)  Freud: A Tutorial  (WS)

Cross-listings:  HIST 485  PSYC 158

Secondary Cross-listing

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud’s work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, “Analysis Terminable and Interminable.” In tutorial, we will consider the development of Freud’s thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud’s ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was “right” or “wrong” or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud’s thought itself.
Class Format: students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

Requirements/Evaluation: student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: fulfills History’s 400-level graduation requirement

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

- HIST 485 (D2)
- PSYC 158 (D2)

Writing Skills Notes: As a tutorial, this course is by definition writing skills, both in terms of the number of papers that students will produce (six) and in terms of the focus on writing during every tutorial session. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: HIST Group C Electives - Europe and Russia

PSYC 319 (F)(S) Neuroethics (WS)

Cross-listings: STS 319 NSCI 319 PSYC 319

Primary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

- STS 319 (D2)
- NSCI 319 (D3)
- PSYC 319 (D2)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: NSCI Group B Electives

PSYC Area 1 - Behavioral Neuroscience
PSYC 358 (S) Developmental Psychopathology: Trajectories of Risk and Resilience

Why do some youth develop psychopathology in the face of adversity whereas others do not? How do we define psychological disorders in youth? Is resilience a static trait, or can it be promoted? How do we prevent youth from developing psychopathology? In this course, students will address these and other questions using a risk and resilience framework that examines the interactions among multiple risk and protective factors in the pathway to psychopathology. Specifically, students will examine the interactions between individual characteristics (e.g., neurobiological, interpersonal, cognitive, and emotional factors) and environmental contexts (e.g., family, school, peer, early adversity) in the development of risk and resiliency. Application of etiological models and empirical findings to prevention and intervention approaches will be explored. Throughout the course, students will evaluate current research based upon theory, methodological rigor, and clinical impact.

Requirements/Evaluation: five 5-page papers, five short response papers, and participation in discussions

Prerequisites: PSYC 252; PSYC 201 recommended

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Public Health concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

REL 134 (S) Leaving the World Behind: The Literature of Reclusion (DPE) (WS)

Cross-listings: CHIN 134 REL 134 COMP 134 ANTH 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion-living a life of seclusion from society-in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state-to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary “intentional communities”)? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 134 (D1) REL 134 (D2) COMP 134 (D1) ANTH 134 (D2)

**Writing Skills Notes:** Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

**REL 210** (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

**Cross-listings:** REL 210 ARAB 212 ARTH 212

**Secondary Cross-listing**

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

**Requirements/Evaluation:** participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** First- and second-year students, but open to all

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 210 (D2) ARAB 212 (D1) ARTH 212 (D1)

**Writing Skills Notes:** In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

**REL 246** (F)(S) India's Identities: Nation, Community, & Individual

**Cross-listings:** ASST 246 ANTH 246 WGSS 246 REL 246

**Primary Cross-listing**
This tutorial considers India's legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India's diverse and fragmented society.

**Class Format:** meetings weekly, weekly writing, and discussion

**Requirements/Evaluation:** weekly writing assignments and tutorial attendance every week

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASST 246 (D2) ANTH 246 (D2) WGSS 246 (D2) REL 246 (D2)

**Writing Skills Notes:** Weekly writing, writing chats, intensive feedback on writing grammar, style, argument every week.

**Difference, Power, and Equity Notes:** This course fulfills the Difference, Power, and Equity by theorizing the ways that social power and equity have been and continue to be a source of struggle and division within Indian society. It analyzes the ways that communities have used religion, gender, ethnicity, and caste to struggle for power and status within Indian society.

**Secondary Cross-listing**

This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

**Class Format:** weekly tutorial, context-based learning, experiential learning

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** a course on Buddhism is preferred but not required
Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

REL 302 (S) Philosophy of Religion (WS)

Cross-listings: PHIL 281 REL 302

Secondary Cross-listing

Our goal will be to determine how far reason can justify belief in God. We will examine well-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, and the argument from evil). For each argument, we will first look at historically important formulations and then turn to contemporary reformulations. Our aim will be to identify and evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. Near the end of the semester, we'll also examine some evolutionary explanations of religious belief. Our tools in this course will be logic and reason, even when we are trying to determine what the limits of reason might be. Authors will include Plato, Anselm, Aquinas, Paley, Kant, and several contemporary philosophers.

Class Format: students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing

Requirements/Evaluation: five 5-page papers and five 2-page papers
Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

REL 374 (S) Mysticism: Vision, Writing, History  (WS)

Cross-listings: ENGL 374  REL 374  COMP 352

Secondary Cross-listing
The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10
Enrollment Preferences: English majors and those intending to major in English

RUSS 140  (S) Crime and Punishment in Russian History  (WS)

Cross-listings: HIST 140  RUSS 140

Secondary Cross-listing
For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

RUSS 219 (F) Cults of Personality (WS)

Cross-listings: RUSS 219  COMP 215

Primary Cross-listing

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany, Italy, and Spain, China, Iran, North Korea, and Cuba. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 219 (D1) COMP 215 (D1)

Writing Skills Notes: Students will be writing papers (5-6 pages) every other week and receiving detailed feedback on their writing with the expectation that they will identify areas in need of improvement and work on these throughout the semester. The course will also require that students write one paper together with their tutorial partner and that they rewrite two different papers, one at midterm and the other at the end of the term.

STS 142 (F) AlterNatives: Indigenous Futurism and Science Fiction (DPE)

Cross-listings: AMST 142  STS 142

Secondary Cross-listing

Indigenous people occupy a paradoxical position in time. On one hand, as survivors of genocide and occupation, they are already post-apocalyptic, occupying what many Indigenous thinkers argue is "our ancestor's dystopia." On the other hand, Indigenous people are relegated to the past in settler and colonial discourses, which, in relying heavily on notions of contact, authenticity, and vanishing, preclude Indigenous peoples from not only futurity, but from modernity and associated visions of science and technology too. This tutorial explores how Native science fiction imagines and enacts futurity
from this paradoxical Indigenous temporality. Looking across numerous national and transnational Indigenous contexts, in addition to different kinds of media, including short stories, novels, visual art, video games, films, and online platforms like second life, this tutorial foregrounds the ways in which science fiction functions as a mode of Indigenous theory, knowledge production, and claiming of not only the future but of the past and present, as well. Pairing media readings with works in science fiction and Indigenous studies, we will explore the role of indigeneity in the founding and tropes of European and settler science fiction, Native "slipstream" and eco SF, post-post-apocalyptic thinking, space travel and frontiers, Native pessimism, and Indigenous technologies and epistemologies cast into the future. We will pay careful attention to the political stakes of these narratives and expression for Indigenous sovereignty and self-determination.

Requirements/Evaluation: attendance and participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and your partner’s writing

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 10

TUT Section: T1 TBA Omar A. Sangare

THEA 255 (S) Performing Shakespeare

This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (Macbeth, Anthony and Cleopatra, Othello), comedies (The Merchant of Venice, A Midsummer Night's Dream, Twelfth Night), and histories (Richard II, Richard III); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

Class Format: in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work

Requirements/Evaluation: weekly performance presentations, weekly 3-page analytical papers, active participation in oral critique

Prerequisites: one college level acting class or significant comparable experience (permission of instructor)

Enrollment Limit: 10

Enrollment Preferences: Theatre majors, or those expressing possible interest in Theatre major

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

THEA 275 (F) American Drama: Hidden Knowledge

Cross-listings: AMST 275 COMP 275 ENGL 224 THEA 275

Primary Cross-listing

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might
say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli’s The Prince, Thomas Carlson’s Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O’Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what we can learn in particular from American drama about a national relationship to honesty and its opposites.

**Requirements/Evaluation:** weekly papers/response papers; weekly meeting with instructor and tutorial partner

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre and English majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**WGSS 110 (S) The Veil: History and Interpretations**  
(DPE) (WS)

**Cross-listings:** ARAB 215 WGSS 110 HIST 110

**Secondary Cross-listing**

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

**Requirements/Evaluation:** each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner’s paper; by semester’s end each student will have written a minimum of 40 pages

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARAB 215 (D2) WGSS 110 (D2) HIST 110 (D2)

**Writing Skills Notes:** Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

WGSS 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art (WS)

Cross-listings: WGSS 231  ARTH 231

Secondary Cross-listing

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art—never created for its own sake—was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions and of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity. When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

Class Format: some tutorial meetings will be conducted at local museums

Requirements/Evaluation: engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner’s tutorial papers

Prerequisites: first-year and sophomore students (this class is open to students with no experience in art history)

Enrollment Limit: 10

Enrollment Preferences: a statement of interest will be requested in the event the course is over-enrolled

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 231 (D2) ARTH 231 (D1)

Writing Skills Notes: This course's fundamental goal is to support opportunity and skills to construct compelling and original written arguments. Tutorial partners will share standards and guidelines for strong writing with instructor: common concepts and language for critique, discussion, and applause. We will consider the power of argument inextricable from the quality of writing, and thus address writing issues, strategies, and successes in a deep way, organically and consistently, in every tutorial meeting.
WGSS 246 (F)(S) India’s Identities: Nation, Community, & Individual  
Cross-listings: ASST 246  ANTH 246  WGSS 246  REL 246  
Secondary Cross-listing  
This tutorial considers India’s legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India’s diverse and fragmented society.  
Class Format: meetings weekly, weekly writing, and discussion  
Requirements/Evaluation: weekly writing assignments and tutorial attendance every week  
Prerequisites: none  
Enrollment Limit: 10  
Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women’s, Gender & Sexuality Studies  
Expected Class Size: 10  
Grading: no pass/fail option, no fifth course option  
Distributions: (D2)  
This course is cross-listed and the prefixes carry the following divisional credit:  
ASST 246 (D2) ANTH 246 (D2) WGSS 246 (D2) REL 246 (D2)  
Writing Skills Notes: Weekly writing, writing chats, intensive feedback on writing grammar, style, argument every week.  
Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by theorizing the ways that social power and equity have been and continue to be a source of struggle and division within Indian society. It analyzes the ways that communities have used religion, gender, ethnicity, and caste to struggle for power within Indian society.

WGSS 274 (F) ‘As If Her Mouth Were a Weapon’: Jamaica Kincaid (DPE)  
Cross-listings: ENGL 254  WGSS 274  
Secondary Cross-listing  
This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include Annie John (1985), Lucy (1990), The Autobiography of My Mother (1996), My Brother (1997), Mr. Potter (2002), and See Now Then (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental...
readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

**Class Format:** meeting as a full group two to three times; meeting in tutorial pairs for most of the semester

**Requirements/Evaluation:** five 4- to 5-page essays and five 2-page critical responses, completed in tutorial pairs, keyword assignment, final roundtable

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 254 (D1) WGSS 274 (D2)

**Difference, Power, and Equity Notes:** Students will center afro-caribbean women's subject formation on the terrain of the literary imagination and develop interpretive and analytical skills to examine the affective dimensions of the racialization and gendering of power, of intimacy, and of national belonging.

WGSS 322  (F) Introduction to Critical Theory  (DPE) (WS)

**Cross-listings:** WGSS 322  PHIL 321

**Secondary Cross-listing**

"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet from its inception and continuing into the 19th and 20th centuries we find the promise of Enlightenment challenged by colonialist expansion, the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? Should it be? Among the possible topics addressed will be: criticizing capitalism, alienation and objectification, progress and freedom, the entanglements of power and reason, radical liberalism, the future of democracy as well as post-structuralist, post-colonial, feminist and anti-racist critiques of the Frankfurt School. Readings may include historical as well as contemporary figures such as: Kant, Freud, Horkheimer, Adorno, Marcuse, Habermas, McCarthy, Honneth, Fraser, Amy Allen, Foucault, Ranciere, Achilles Mbembe, Judith Butler, Wendy Brown, Spivak, and Charles Mills, among others.

**Class Format:** students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** each student will write and present five 5- to 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings

**Prerequisites:** PHIL 202, Kant course, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors and students with background in political theory, feminist theory, or post-colonial theory

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WILLIAMS-EXETER PROGRAMME AT OXFORD UNIVERSITY
Director: Professor Lucie Schmidt

THE PROGRAMME

Williams College offers a year-long program of studies at Oxford University in co-operation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world’s great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city centre. Up to six students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University. A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students on the Williams-Exeter Programme are required to be in residence in Oxford from Monday, 30 September 2019, until all academic work for Trinity term is complete (potentially as late as at least 27 June 2020) with two breaks for vacations between the three terms. Students enroll for the full academic year, which consists of three eight-week terms of instruction: MICHAELMAS TERM (13 October to 7 December 2019), HILARY TERM (19 January to 14 March 2020), and TRINITY TERM (26 April to 20 June 2019). Students are expected to be in residence to write their first tutorial papers in the week before the eight weeks of instruction begin (0th Week) and to remain in residence during the week after the term ends (9th Week) in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford by 30 September 2019 for Programme orientation.

For more general information on the Williams-Exeter Programme, go to exeter.williams.edu.

THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small-group tutorials, in which students meet weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list they will receive at the beginning of each term. In addition to the weekly tutorial, students are usually expected to attend a course of lectures offered by the University that corresponds to the material being addressed in their tutorials.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In their capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter’s subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student’s tutors, supervise the examinations that students sit at the end of each academic term, and report on each student’s academic progress to the Senior Tutor at Exeter College. There are no “add/drop” periods at Oxford; once a student has made a commitment to a particular tutorial course, and the director has then secured a tutor to teach that course, students cannot back out or change the terms of the tutorial. All tutorials at Oxford are graded, although in exceptional circumstances a tutor may be converted to pass/fail before the end of the fourth week of term with the permission of the Programme director.

Students are required to enroll in two tutorial courses during Michaelmas term and two tutorials during Hilary Term (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). During Trinity term, students may choose to enroll in either one or two tutorial courses. Although some students take the minimum five tutorial courses, most have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

GRADUES AND CREDIT

Grades for each tutorial course reflect the grade assigned to all eight tutorial sessions, including their related essays, considered together, as well as the grade for the final examination. Final examinations last three hours and are always sat in the ninth week of term, following the eight weeks of instruction. For some tutorial courses, tutors may elect to offer the student the option of a final paper or project in lieu of an examination.

Upon satisfactory completion of the requirements for the Williams-Exeter Programme at Oxford University, students receive academic credit for a regular Williams academic year, with each eight-session tutorial plus final examination counting as the equivalent of 1.6 regular semester courses taken at Williams. Grades eventually become a part of their Williams transcript and will be included in the computation of their Grade Point Average.
Tutorial courses in Oxford may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses at Oxford meet the Williams College “Writing Intensive” designation, except for those in the studio arts, mathematics, and the sciences.

Tutorial courses in Oxford may also be used to meet major requirements. Students are encouraged to check with their department chair(s) to confirm official department policy.

**THE COURSE OF STUDY**

In addition to the opportunity to pursue British and Commonwealth Studies, Williams students in Oxford will be able to pursue tutorials in fields in which Oxford is particularly noted (Economics, English Literature, Mathematics, Modern History, Philosophy, Politics, Classics, Theology, the Natural Sciences, etc.). Exeter College also has fellows that are committed to teaching Williams students in three fields: English Language and Literature (with a focus on English literature, 1550-1830 and interests in the rise of the novel and women’s writing); History (with interests spanning the areas of Atlantic World, Global, Imperial, early American, Latin American and Caribbean History); and Medical Law and Ethics (with interests in ethics and regulation of emerging technologies such as gene drive and use of artificial intelligence in medical care). Students are thus encouraged to consider undertaking at least one tutorial course in these fields as part of their course of study.

Students should consult the document “How to Make Preliminary Tutorial Choices for WEPO” to get a sense of some of the standard “papers” (courses) available to students studying on the Williams-Exeter Programme at Oxford. The tutorials listed there represent a selection of some of the papers that comprise the Oxford degrees in various subjects and that are taught in tutorial format, although most are not offered every Oxford term. It needs to be emphasized that this is only a partial list, that the tutorial offerings at Oxford University are incredibly rich, and that one of the attractions of the Programme is that it enables students to define, develop, and pursue their academic interests. Students are therefore encouraged to explore all the courses offered at Oxford even if they are not listed in this Catalog.

Tutorial courses are not offered every term and are often accompanied by scheduled lectures. It is therefore imperative that students consult the relevant “faculty” webpages to make sure when the lectures and/or tutorials they wish to take are actually offered. Sometimes, where appropriate, prerequisites are also listed. It must be noted that study in the sciences is not normally accompanied by laboratory work; science majors seeking major credit for tutorials in the sciences should discuss this situation with their major advisors. Students interested in learning more about the possible courses of study available at Oxford should contact the Director of International Education and Study Away.

A full summary of the list of courses offered by subject can be found at: ox.ac.uk/admissions/undergraduate/courses/course-listing. Detailed descriptions of all the courses listed in can be found on the websites of respective departments or faculties the links of which can be found at: ox.ac.uk/about/departments-a_z.

**NON-CREDIT FOREIGN LANGUAGE STUDY**

In addition to their regular tutorial courses, students may begin or continue the study of a wide range of foreign languages on a non-credit basis through a variety of arrangements available through the University as well as a number of other educational and cultural institutions in the city of Oxford. Students may put funds from their Programme Cultural Subsidy towards such study.

**APPLICATION**

Admission to the Programme is competitive. Students must apply to the The Office of International Education and Study Away by the prescribed deadline (normally late January/early February) and, prior to applying, should consult with the chair of their major department. Any questions students might have about curricular offerings at Oxford can also be raised with the director of the Programme in Oxford. In addition to completing the formal application form, students can expect to be interviewed at Williams and will subsequently need to complete an application for Visiting Student status at Oxford University. All admissions to the Programme are subject to approval by Exeter College. Students can expect to be notified of acceptance before Spring Break. It is normally expected that they will have completed the College’s distribution requirement by the end of their sophomore year. In making its decisions, the Admissions Committee of the Williams-Exeter Programme at Oxford University takes student GPA into account, with a general expectation of a minimum GPA of 3.0. More importantly, we expect all applicants to have demonstrated capacity for rigorous independent work and extensive essay writing, and looks favorably on those students whose intellectual maturity, curiosity and enthusiasm would best prepare them for a demanding course of study in Oxford. All applicants must identify two Williams faculty members who are willing to provide references. Because of the emphasis at Oxford on weekly written work for each tutorial course, at least one of those faculty members should be able to offer an assessment of the applicant’s writing ability.

• Phoebe G. Donnelly, Stanley Kaplan Visiting Postdoctoral Fellow in the Department of Political Science and Leadership Studies Program
• Charlie Doret, Assistant Professor of Physics
• Georges B. Dreyfus, Jackson Professor of Religion; on leave Spring 2020
• Helga Druxes, Paul H. Hunn '55 Professor in Social Studies; on leave Spring 2020
• Sara Dubow, Professor of History
• Susan Dunn, Massachusetts Professor of Humanities; affiliated with: Leadership Studies Program
• David B. Edwards, James N. Lambert '39 Professor of Anthropology; on leave Fall 2019
• Holly Edwards, Senior Lecturer in Art
• Joan Edwards, Samuel Fessenden Clarke Professor of Biology
• Radwa M. El Barouni, Visiting Lecturer in Arabic Studies
• Braham El Guabli, Assistant Professor of Arabic Studies
• Susan L. Engel, Senior Lecturer in Psychology, The Class of 1959 Director of Program in Teaching
• Laura D. Ephraim, Associate Professor of Political Science, Chair of Science and Technology Studies
• Amal Eqeiq, Assistant Professor of Comparative Literature; affiliated with: Comparative Literature Program; on leave 2019-2020
Wayne S. Escoffery, Visiting Artist in Residence in Jazz Activities
Pete Farwell, Assistant Professor of Physical Education, Head Cross Country Coach, and Assistant Coach Men's and Women's Track
Steven Fein, Professor of Psychology
Ezra D. Feldman, Visiting Assistant Professor of English
Ronald L. Feldman, Artist in Residence in Orchestral and Instrumental Activities/Lecturer in Music, Director of the Berkshire Symphony
Jessica M. Fisher, Associate Professor of English
Stephen Fix, Robert G Scott '68 Professor of English
Kevin Flaherty, Lecturer in Astronomy and Hopkins Observatory Supervisor; affiliated with: Physics Department
Antonia E. Foias, Professor of Anthropology; on leave 2019-2020
VaNatta S. Ford, Assistant Professor of Africana Studies; on leave 2019-2020
Michael Fortunato, Visiting Professor of Economics
Soledad Fox, V-Nee Yeh '81 Professor of Spanish and Comparative Literature; on leave 2019-2020
Neil K. Freebern, Visiting Artist in Residence in Winds and Director of the Wind Ensemble
Jennifer L. French, Chair of Romance Languages and Professor of Spanish
Stephen N. Freund, Professor of Computer Science
Alexandra Garbarini, Professor of History
Thomas A. Garrity, Webster Atwell Class of 1921 Professor of Mathematics
Prisca Gayles, Gaius Charles Bolin Fellow in Africana Studies
Amy Gehring, Professor of Chemistry
William M. Gentry, Professor of Economics; on leave Fall 2019
Steven B. Gerrard, Professor of Philosophy
Chris Gibson, Stanley Kaplan Distinguished Visiting Professor of American Foreign Policy
Matthew Gibson, Assistant Professor of Economics; on leave Fall 2019
Lisa A. Gilbert, Associate Professor of Geosciences and Marine Sciences at Williams-Mystic; affiliated with: Geosciences Department
Meghan K. Gillis, Assistant Professor of Physical Education and Head Coach of Women's Ice Hockey
Graham K. Giovanetti, Assistant Professor of Physics
Michael A. Glier, Alexander Falck Class of 1899 Professor of Art; on leave 2019-2020
Susan Godlonton, Assistant Professor of Economics
Eva G. Goedhart, Visiting Assistant Professor of Mathematics
Christopher Goh, Associate Professor of Chemistry, Faculty Fellow of the Davis Center and the Office of Institutional Diversity and Equity; affiliated with: The Davis Center, VP-InstDiversityEquity&Inclusion
Sarah L. Goh, Chair and Professor of Chemistry
Leo Goldmakher, Assistant Professor of Mathematics; on leave Fall 2019
Barry Goldstein, Visiting Professor of Humanities
Matthew A. Gold, Artist in Residence in Percussion and Contemporary Music Performance
Ed Gollin, Chair and Professor of Music
Manuel Gonzales, Visiting Assistant Professor of English
Marc Gottlieb, Director of the Graduate Program in Art History and Class of 1955 Memorial Professor of Art; affiliated with: Art Department
• David Gürçay-Morris, Chair and Associate Professor of Theatre
• Daniel R. Greenberg, Assistant Professor of Physical Education and Head Coach of Men's Tennis
• Kai M. Green, Assistant Professor of Women’s, Gender and Sexuality Studies
• Wang Guowei, Artist in Residence in Chinese Music Performance and Director of the Williams College Chinese Ensemble
• Kim Gutschow, Lecturer in Religion and Anthropology/Sociology; affiliated with: Anthropology and Sociology
• Catherine Robinson Hall, Associate Professor at Williams-Mystic; affiliated with: Maritime Studies Program
• Amie A. Hane, Professor of Psychology, Chair of Public Health; affiliated with: Public Health Program
• Ilana Y. Harris-Babou, Visiting Assistant Professor of Art
• Pamela E. Harris, Assistant Professor of Mathematics; on leave 2019-2020
• Katie M. Hart, Assistant Professor of Chemistry; on leave Fall 2019
• Laurie Heatherington, Edward Dorr Griffin Professor of Psychology; on leave Fall 2019
• Guy M. Hedreen, Amos Lawrence Professor of Art
• Peter S. Heller, Visiting Professor of Economics
• Kris Herman, Assistant Professor of Physical Education, Head Softball Coach
• Man He, Assistant Professor of Chinese; on leave Fall 2019
• Bethany Hicok, Lecturer in English
• Jacqueline Hidalgo, Chair of Religion and Associate Professor of Latina/o Studies and Religion; affiliated with: Latina/o Studies Program
• Josh D. Hillman, Lecturer in Physical Education and Head Men’s Golf Coach
• Alan Hirsch, Lecturer in Humanities, Chair of Justice and Law Studies; affiliated with: Justice and Law
• Marjorie W. Hirsch, Professor of Music
• Nate D. Hoey, Assistant Professor of Physical Education, Head Women’s Track & Field Coach
• Cynthia K. Holland, Assistant Professor of Biology
• Amy S. Holzapfel, Professor of Theatre; on leave 2019-2020
• Kiaran Honderich, Chair and Lecturer in Women’s, Gender and Sexuality Studies; affiliated with: Public Health Program
• Scott D. Honecker, Assistant Professor of Physical Education and Head Coach of Wrestling
• Catherine N. Howe, Lecturer in Art
• Nicolas C. Howe, Associate Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology; affiliated with: Anthropology and Sociology, American Studies Program; on leave 2019-2020
• Iris Howley, Assistant Professor of Computer Science
• Vivian L. Huang, Assistant Professor of Women's, Gender, and Sexuality Studies
• Jeffrey I. Israel, Associate Professor of Religion
• Olesya Ivantsova, Visiting Lecturer in the Graduate Program in Art History
• Vladimir Ivantsov, Visiting Assistant Professor of Russian
• Galen E Jackson, Assistant Professor of Political Science
• Sarah A. Jacobson, Associate Professor of Economics
• Joy A. James, Ebenezer Fitch Professor of Humanities; affiliated with: Political Science Department; on leave Fall 2019
• Ju-Yu Scarlett Jang, Professor of Art; affiliated with: Asian Studies Department
• Bill K. Jannen, Assistant Professor of Computer Science
• Anne Jaskot, Assistant Professor of Astronomy and Associate of the Hopkins Observatory; affiliated with: Physics Department
• Katharine E. Jensen, Assistant Professor of Physics
• Cathy M. Johnson, James Phinney Baxter III Professor of Political Science; on leave Spring 2020
• Stewart D. Johnson, Professor of Mathematics; on leave Fall 2019
• Walter Johnston, Lecturer in English
• Kevin M. Jones, William Edward McElfresh Professor of Physics
• Peter Just, Professor of Anthropology
• Shinko Kagaya, Professor of Japanese; on leave Spring 2020
• William Kangas, Assistant Professor of Physical Education and Head Men's Ice Hockey Coach
• Aparna Kapadia, Associate Professor of History; affiliated with: Asian Studies Department
• Anuj Kapoor, Visiting Assistant Professor of English
• Paul M. Karabinos, Charles A. Macilvain Professor in Natural Sciences
• Catherine Kealhofer, Assistant Professor of Physics; on leave 2019-2020
• Christi L. Kelsey, Assistant Professor of Physical Education and Head Women's Volleyball Coach
• Kathryn R. Kent, Chair and Professor of English
• Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies; affiliated with: Asian Studies Department
• Sohaib I. Khan, Mellon Postdoctoral Fellow in Religion
• Savan Kharel, Visiting Assistant Professor of Physics
• Ilya Khodosh, Visiting Lecturer in Theatre
• Anthony Y. Kim, Visiting Assistant Professor of American Studies
• Kris N. Kirby, Professor of Psychology; on leave Fall 2019
• Roger A. Kittleson, Professor of History; affiliated with: Latina/o Studies Program
• John E. Kleiner, Professor of English
• Bernhard Klingenberg, Professor of Statistics; on leave 2019-2020
• Pia M. Kohler, Assistant Professor of Environmental Studies
• Thomas A. Kohut, Sue and Edgar Wachenheim III Professor of History
• Christophe A. Kone, Assistant Professor of German
• Nate Kornell, Associate Professor of Psychology
• Cornelius C. Kubler, Stanfield Professor of Asian Studies; on leave 2019-2020
• Joanna Kurkowicz, Lyell B. Clay Artist in Residence, Violin and Concertmaster, Berkshire Symphony
• Steven Kuster, Assistant Professor of Physical Education and Head Swim Coach
• Kenneth N. Kutner, Robert F. White Class of 1952 Professor of Economics
• Sara LaLumia, Professor of Economics, Chair of Political Economy Program
• Edwin Lawrence, Artist Associate in Harpsichord, Piano and Organ and Lecturer in Music
• Tim J. Lebestky, Associate Professor of Biology, Chair of Neuroscience Program
• Alice Lee, Assistant Professor of Physical Education and Head Women's Lacrosse Coach
• Joel Lee, Assistant Professor of Anthropology; on leave Fall 2019
• Jason Lemieux, Assistant Professor of Physical Education and Head Nordic Ski Coach
• William J. Lenhart, A. Barton Hepburn Professor of Computer Science; on leave Spring 2020
• Kelsey Levine, Assistant Professor of Physical Education and Head Alpine Ski Coach
• Zafi Levy, Assistant Professor of Physical Education and Head Squash Coach
• Michael J. Lewis, Faison-Pierson-Stoddard Professor of Art History
• Scott Lewis, Assistant Professor of Physical Education and Director of Outing Club
• John K. Limon, John J Gibson Professor of English
• Haydee M. A. Lindo, Assistant Professor of Mathematics
• Rob Livingstone, Lecturer in Physical Education, Head Strength and Conditioning Coach
• David W. Loehlin, Assistant Professor of Biology
• Susan R. Loepp, Professor of Mathematics; on leave 2019-2020
• Gretchen Long, Professor of History, Faculty Fellow of the Davis Center and the Office of Institutional Diversity and Equity; affiliated with: The Davis Center, VP-InstDvrsyEquity&Inclusion
• David A. Love, Provost, Class of 1969 Professor of Economics; affiliated with: Economics Department
• Kimberly S. Love, Assistant Professor of English
• Peter D. Low, Professor of Art
• Daniel V. Lynch, Philip and Dorothy Schein Professor of Biology
• Michael D. MacDonald, Frederick L. Schuman Professor of International Relations
• Jenna Maclntire, Lecturer in Chemistry
• Alicia C. Maggard, Postdoctoral Fellow in Maritime History
• James E. Mahon, Woodrow Wilson Professor of Political Science, Chair of Advisory Committee on Shareholder Responsibility
• Protik K. Majumder, Barclay Jermain Professor of Natural Philosophy
• Marc Mandel, Assistant Professor of Physical Education and Head Men's Crew Coach
• Maud Mandel, President, Professor of History; affiliated with: History Department
• James A. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Religion Department, Anthropology and Sociology; on leave 2019-2020
• Rhon S. Manigault-Bryant, Associate Professor of Africana Studies and Faculty Affiliate in Religion; on leave 2019-2020
• Patricia Manning, Assistant Professor of Physical Education and Head Women's Basketball Coach
• Luana S. Maroja, Associate Professor of Biology, Chair of Biochemistry Program
• Brian Martin, Professor of French & Comparative Literature; on leave Spring 2020
• Laura J. Martin, Assistant Professor of Environmental Studies and Faculty Affiliate in History; affiliated with: History Department
• Martha Marvin, Lecturer in Neuroscience
• Aleksandar Matovski, Sorkin Visiting Assistant Professor of Political Science
• James McAllister, Chair of Leadership Studies & Fred Greene Third Century Professor of Political Science; affiliated with: Leadership Studies Program
• Samuel McCauley, Assistant Professor of Computer Science
• George McCormack, Assistant Professor of Physical Education, Head Men's Lacrosse Coach
• Mark T. McDonough, Lecturer in Physical Education, Assistant Football Coach
• Elizabeth P. McGowan, Art Dept Co-Chair & Chair of Art History, Robert Sterling Clark Professor of Art
• Keith E. McPartland, Associate Professor of Philosophy
• Gage C. McWeeny, Professor of English; affiliated with: Oakley Ctr for Human & Soc Sci
• Brittany Mechê, Gaius Charles Bolin Fellow in the Environmental Studies Program
• Lisa Melendy, Chair, Director of Athletics and Assistant Professor in Physical Education
• Carolina Melgarejo-Torres, Visiting Assistant Professor of Spanish
• Nicole E. Mellow, Professor of Political Science; affiliated with: Leadership Studies Program
• April Merleaux, Visiting Assistant Professor of Environmental Studies
• Karen R. Merrill, Frederick Rudolph '42 - Class of 1965 Professor of American Culture
• Carolyn O. Miles, Assistant Professor of Physical Education and Associate Director/Student Athlete Services
• Steven J. Miller, Professor of Mathematics
• Marion Min-Barron, Visiting Assistant Professor
• Gregory C. Mitchell, Associate Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology, Chair of Women's, Gender, and Sexuality Studies; affiliated with: Anthropology and Sociology; on leave 2019-2020
• Bojana Mladenovic, Professor of Philosophy
• Michele Monserrati, Visiting Assistant Professor of Comparative Literature and Romance Languages; affiliated with: Romance Languages Department
• Peter J. Montiel, Fairleigh S. Dickinson, Jr. '41 Professor of Economics; on leave Spring 2020
• Manuel A. Morales, Professor of Biology
• Frank Morgan, Visiting Professor of Mathematics
• Ralph E. Morrison, Assistant Professor of Mathematics; on leave 2019-2020
• Murad K. Mumtaz, Assistant Professor of Art; affiliated with: Graduate Program-Art History
• Ngonidzashe Munemo, Associate Dean for Institutional Diversity, Equity and Inclusion, Professor of Political Science; affiliated with: Political Science Department, Global Studies; on leave Fall 2019
• Tendai Muparutsa, Artist in Residence in African Music Performance, Lecturer in Music, Director of Zambezi, Co-Director of Kusika
• Peter T. Murphy, John Hawley Roberts Professor of English
• Thomas P. Murtagh, John B. McCoy and John T. McCoy Professor of Computer Science
• Steven E. Nafziger, Professor of Economics
• Lama Nassif, Assistant Professor of Comparative Literature; affiliated with: Comparative Literature Program; on leave Fall 2019
• Eli Nelson, Assistant Professor of American Studies
• Gail M. Newman, Harold J. Henry Professor of German, Chair of Center for Foreign Languages, Literatures & Cultures
• Shaoyang Ning, Assistant Professor of Statistics
• Nimu Njoya, Assistant Professor of Political Science
• James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
• Christopher M. B. Nugent, Professor of Chinese, Chair of Comparative Literature Program
• Kevin Ohi, Margaret Bundy Scott Professor of English
• Will Olney, Associate Professor of Economics; on leave 2019-2020
• Sarah E. Olsen, Assistant Professor of Classics
• Ianna Hawkins Owen, Assistant Professor of English
• Allison Pacelli, Professor of Mathematics
• Janine Parker, Artist-in-Residence in Dance
• Lee Y. Park, William R. Kenan, Jr. Professor of Chemistry
• Paul C. Park, Senior Lecturer in English; affiliated with: Graduate Program-Art History
• Jay M. Pasachoff, Chair and Field Memorial Professor of Astronomy
• Darel E. Paul, Professor of Political Science; on leave 2019-2020
• Enrique Peacock-López, Halford R Clark Professor of Natural Sciences
• Lori A. Pedersen, Lecturer in Mathematics
• Julie Pedroni, Lecturer in Philosophy; affiliated with: Ctr-Environmental Studies
• Peter L. Pedroni, Professor of Economics
• Ileana Perez Velazquez, Professor of Music
• James L. Pethica, Senior Lecturer in English and Theatre; affiliated with: Theatre Department; on leave Fall 2019
• Greg Phelan, Assistant Professor of Economics
• Rowan R. Phillips, W. Ford Schumann Distinguished Visiting Professor in Democratic Studies
• Katarzyna M. Pieprzak, Associate Dean of the Faculty, Professor of Francophone Literature, French Language, and Comparative Literature; affiliated with: Romance Languages Department
• Shanti Pillai, Assistant Professor of Theatre
• Michelyne Pinard, Assistant Professor of Physical Education and Head Women's Soccer Coach
• Anna M. Plantinga, Assistant Professor of Statistics
• Amy D. Podmore, Art Dept Co-Chair & Chair of Studio Art, J. Kirk T. Varnedoe 1967 Professor of Art
• Kailani Polzak, Assistant Professor of Art
• Lindsay S. Pope, Visiting Director of Choral/Vocal Activities
• Daniel E. Prindle, Visiting Instructor in Music
• Tim J. Pusack, Assistant Professor at Williams-Mystic
• Christopher L. Pye, Class of 1924 Professor of English; on leave Spring 2020
• Ashok S. Rai, Associate Professor of Economics
• Bob Rawle, Assistant Professor of Chemistry
• Mark R. Raymond, Assistant Professor of Physical Education and Head Coach of Football
• Anjuli F. Raza Kolb, Associate Professor of English; on leave 2019-2020
• Anne Reinhardt, Chair and Professor of History
• Mark T. Reinhartdt, Chair and Class of 1956 Professor of American Civilization; affiliated with: American Studies Program
• Bernard J. Rhie, Associate Professor of English
• David P. Richardson, William R. Kenan, Jr. Professor of Chemistry; on leave Fall 2019
• Neil Roberts, Chair and Associate Professor of Africana Studies and Faculty Affiliate in Political Science and Religion; affiliated with: Religion Department, Political Science Department
• Shivon A. Robinson, Assistant Professor of Psychology
• Shantee Rosado, U.S. Afro-Latinidades Fellow In Latina and Latino Studies
• Nelly A. Rosario, Associate Professor of Latina/o Studies
• Shawn J. Rosenheim, Professor of English, Chair of Campus Environmental Committee
• Jennifer K. Rosenthal, Instructor in Chemistry
• Sidney A. Rothstein, Assistant Professor of Political Science
• Leyla Rouhi, Preston S. Parish '41 Third Century Professor of Romance Languages
• Marketa Rulikova, Visiting Assistant Professor of Sociology
• Bruce Rutherford, Class of 1955 Visiting Professor of International Studies
• Sophie F. Saint-Just, Assistant Professor of French and Francophone Studies; on leave Fall 2019
• Michael Samson, Senior Lecturer in Economics
• Alberto Sandoval-Sanchez, Bennett Boskey Visiting Professor of Latina/o Studies
• Marlene J. Sandstrom, Dean of the College, Hales Professor of Psychology; affiliated with: Psychology Department
• Noah J. Sandstrom, Chair and Professor of Psychology
• Omar A. Sangare, Professor of Theatre
• Robert M. Savage, Professor of Biology
• Kenneth K. Savitsky, Professor of Psychology
• Jana Sawicki, Chair of Philosophy and Morris Professor of Rhetoric
• Kirsten L. Scheid, Clark Oakley Fellow
• Lucie Schmidt, Professor of Economics and Director of the Williams-Exeter Programme at Oxford University; affiliated with: Williams-Exeter Prg at Oxford
• Pallavi Sen, Assistant Professor of Art
• Eun Young Seong, Visiting Assistant Professor of Japanese
• Justin B. Shaddock, Assistant Professor of Philosophy; on leave 2019-2020
• Cheryl Shanks, Professor of Political Science; on leave Fall 2019
• Kelly A. Shaw, Associate Professor of Computer Science
• James R. Shepard, J. Leland Miller Professor of American History, Literature, and Eloquence; on leave Fall 2019
• Karen L. Shepard, Senior Lecturer in English; on leave Fall 2019
• Stephen C. Sheppard, Class of 2012 Professor of Economics
• W. Anthony Sheppard, Marylin & Arthur Levitt Professor of Music; on leave Fall 2019
• Olga Shevchenko, Professor of Sociology; on leave 2019-2020
• Grant Shoffstall, Visiting Assistant Professor of Sociology
• Lara D. Shore-Sheppard, Chair and Kimberly A. '96 and Robert R. '62 Henry Professor of Economics
• Cesar E. Silva, Hagey Family Professor of Mathematics; on leave 2019-2020
• Christina E. Simko, Assistant Professor of Sociology
• Shikha Singh, Assistant Professor of Computer Science
• Eiko Maruko Siniawer, Professor of History; affiliated with: Asian Studies Department; on leave Spring 2020
• Yana Skorobogatov, Assistant Professor of History
• David L. Smith, John W Chandler Professor of English
• Matthew J. Smith, Sterling Brown ’22 Visiting Professor of Africana Studies
• Thomas E. Smith, Professor of African Studies
• Ben Snyder, Assistant Professor of Sociology
• Greta F. Snyder, Visiting Assistant Professor of Women's, Gender, and Sexuality Studies
• Anita R. Sokolsky, Professor of English
• Stefanie Solum, Professor of Art
• Stephanie J. Steele, Visiting Assistant Professor of Psychology
• Doris J. Stevenson, Lyell B. Clay Artist in Residence, Piano
• Mihai Stoiciu, Professor of Mathematics
• Jason Josephson Storm, Professor of Religion; on leave 2019-2020
• Frederick W. Strauch, Chair and Associate Professor of Physics
• Laura R. Strauch, Lecturer in Chemistry
• Catherine B. Stroud, Associate Professor of Psychology
• Erin Sullivan, Assistant Professor of Physical Education, Head Men's Soccer Coach
• Matthew Swagler, Visiting Assistant Professor of History
• Anand V. Swamy, Chair of the Executive Committee for the Center for Development Economics and The Willmott Family Third Century Professor of Economics
• Steven J. Swoap, Professor of Biology
• Nana Takeda, Visiting Lecturer in Japanese
• Munjulika Tarah, Assistant Professor of Dance
• John W. Thoman, J. Hodge Markgraf Professor of Chemistry
• Owen Thompson, Assistant Professor of Economics
• Christian Thorne, Professor of English and Williams-Mystic Faculty Fellow; affiliated with: Williams-Mystic Program
• Ben W. Thuronyi, Assistant Professor of Chemistry
• Stephen J. Tifft, Professor of English
• Claire S. Ting, Professor of Biology
• Matthew Tokeshi, Assistant Professor of Political Science; on leave 2019-2020
• Chad M. Topaz, Professor of Mathematics; on leave Fall 2019
• Cécile Tresfels, Assistant Professor of French
• David R. Tucker-Smith, Professor of Physics
• Laurie L. Tupper, Assistant Professor of Statistics; on leave 2019-2020
• Amanda K. Turek, Assistant Professor of Chemistry
• Daniel B. Turek, Assistant Professor of Statistics; on leave 2019-2020
• Damian Turner, Assistant Professor of Biology
• Elizabeth M. Upton, Assistant Professor of Statistics
• Janneke van de Stadt, Chair of German and Russian and Professor of Russian
• Emily Vasiliauskas, Assistant Professor of English
• Tommy Verdell, Assistant Professor of Physical Education, Associate Athletic Director for Inclusion and Compliance
• Kate Wachala, Assistant Professor of Physical Education and Head Coach of Women's Crew
• Zachary Wadsworth, Assistant Professor of Music
• Chen Wang, Visiting Assistant Professor of Chinese
• Dorothy J. Wang, Professor of American Studies
The Williams College-Mystic Seaport Maritime Studies Program offers students a unique opportunity to explore the ocean, travel the Atlantic, Pacific, and Gulf coasts, and conduct original primary research of their own design in the humanities and sciences. Williams-Mystic is considered the coastal and ocean studies campus of Williams College. Sophomores, juniors, and seniors of all majors welcome to apply. A term at Williams-Mystic includes credit for one semester plus one Winter Study requirement, as well writing-intensive course credit. Four Williams courses are offered as an interdisciplinary curriculum in the semester-long program based at Mystic Seaport, in Mystic, Connecticut (06355): Americans and the Maritime Environment, Literature of the Oceans, Marine Policy, and either Marine Ecology or Oceanographic Processes. Travel includes an offshore voyage on the open ocean sailing aboard a tall ship, a seminar along the Pacific Coast, and a Louisiana field seminar, all of which are cross-disciplinary and interdisciplinary exercises. Students live in historic, cooperative, co-ed houses at Mystic Seaport, the world’s largest maritime museum, and have full access to world-class maritime collections, a maritime library, a state-of-the-art Marine Sciences teaching and research center, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tide pools and salt marshes to sandy beaches and estuaries). Students also participate in maritime skills under professional instruction, with choices such as ship carving, music of the sea, boat building, or small boat handling and sailing. Williams-Mystic seeks candidates who are willing to try new things and work in a compelling academic environment. No sailing experience necessary. Participation in Williams-Mystic can also be used in partial fulfillment of the Maritime Studies Concentration at Williams. Admission is competitive, and interested students should email wmadmissions@williams.edu, call 860-572-5359, or visit the Williams-Mystic website.

BIOL 231  (F)(S)  Marine Ecology

Cross-listings: BIOL 231  MAST 311

Secondary Cross-listing

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the
deep sea are discussed in detail.

**Class Format:** including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** offered only at Mystic Seaport

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIOL 231 (D3) MAST 311 (D3)

**Attributes:** ENVI Natural World Electives EVST Living Systems Courses EXPE Experiential Education Courses

---

**ENGL 26 (W) Reading Moby-Dick on a Whaler**

If you've never read *Moby-Dick*, you might still think that's a heroic adventure story about humanity's struggle against the sea-the sort of book, in other words, that we give young readers, a cracking yarn, like *Treasure Island* only much longer. You might wonder, then, why so many people think it's the greatest novel ever written. You might be all the more puzzled to learn that no-one liked *Moby-Dick* when it was first published. Almost nobody read it. Herman Melville died thinking the book had been a total failure. *Moby-Dick* is peculiar, to be sure: an adventure story without much adventure nor even much story, a novel that doesn't read like a novel-a funny, joking, frightened, philosophical, and extravagant kind of book, a book that pushes readers to figure out their most fundamental attitudes towards the planet. In this class, we will read *Moby-Dick* and only *Moby-Dick*, and we will do so while living in a nineteenth-century whaling port, at Williams-Mystic, the College's coastal and ocean studies campus in Mystic, CT. Students will discuss *Moby-Dick* in the morning and learn nineteenth-century maritime skills in the afternoon: blacksmithing, carving, chantey singing, boat building, letterpress printing, sailmaking, etc. They will have extensive access to nineteenth-century tall ships throughout.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** first-years and sophomores

**Grading:** pass/fail only

**Materials/Lab Fee:** $530

**Attributes:** TRVL Winter Study Travel Course

---

**Winter 2020**

TVL Section: 01 Cancelled

**ENGL 231 (F)(S) Literature of the Sea**

**Cross-listings:** MAST 231 ENGL 231

**Secondary Cross-listing**

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture,
small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

**Class Format**: weekly lectures, including coastal and near-shore field trips and ten days at sea

**Requirements/Evaluation**: regular papers, class participation, journal-writing, and a final paper

**Grading**: no pass/fail option, no fifth course option

**Unit Notes**: offered only at Mystic Seaport

**Distributions**: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

---

ENVI 351 (F)(S) Marine Policy

**Cross-listings**: ENVI 351 PSCI 319 MAST 351

**Secondary Cross-listing**

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

**Class Format**: discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

**Requirements/Evaluation**: an independent research paper, a presentation, and a final exam

**Grading**: yes pass/fail option, yes fifth course option

**Unit Notes**: offered only at Mystic Seaport

**Distributions**: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**Attributes**: ENVI Environmental Policy EXPE Experiential Education Courses POEC International Political Economy Courses

---

GEOS 210 (F)(S) Oceanographic Processes

**Cross-listings**: MAST 211 GEOS 210

**Secondary Cross-listing**

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format**: including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project
**Requirements/Evaluation:** two tests, a research project, and a presentation

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** offered only at Mystic Seaport

---

**HIST 352 (F)(S) American Maritime History** (DPE) (WS)

**Cross-listings:** HIST 352 MAST 352

**Secondary Cross-listing**

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

**Class Format:** classroom discussion as well as field seminars

**Requirements/Evaluation:** class participation, weekly response papers, three longer papers

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

**MAST 211 (F)(S) Oceanographic Processes**

**Cross-listings:** MAST 211 GEOS 210

**Primary Cross-listing**
This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

Class Format: including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Grading: yes pass/fail option, yes fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (F)(S) Literature of the Sea

Cross-listings: MAST 231 ENGL 231

Primary Cross-listing

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example--depending on fall or spring semester--Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

Class Format: weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1)

MAST 352  (F)(S) American Maritime History  (DPE) (WS)

Cross-listings: HIST 352  MAST 352

Primary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea
and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

**Class Format:** classroom discussion as well as field seminars

**Requirements/Evaluation:** class participation, weekly response papers, three longer papers

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

WILLIAMS PROGRAM IN TEACHING
Director: Susan Engel

The Program in Teaching offers a coordinated cluster of courses, advising and field work that give students the opportunity to study the ideas, questions, and practices involved in good teaching at all levels. The Program seeks to promote and facilitate an exchange of ideas about teachers, learners, and schools, within and beyond the Williams campus. The Program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach.

Students may participate in a variety of ways, ranging from taking one course to a sustained in-depth study of teaching and learning geared to those who want to become teachers or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology, for example) and the process of teaching those topics to elementary and high school students. The Program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.

No specific major is required to participate—although some lend themselves easily to certification, such as Mathematics, English, Biology, American History, or French, almost all of our majors can provide the basis of teacher certification. Alternately, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work. More information can be found at program-in-teaching.williams.edu.

TEAC Related Courses

AMST 379 (F) American Pragmatism
Cross-listings: AMST 379 PHIL 379

Secondary Cross-listing
Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments
Prerequisites: at least two PHIL courses
Enrollment Limit: 25
Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major
Expected Class Size: 12-15
Grading: yes pass/fail option, yes fifth course option

PSYC 341 (S) Stereotypes, Prejudice, and Discrimination
Cross-listings: WGSS 339 PSYC 341

Primary Cross-listing
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational...
explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course

Requirements/Evaluation: weekly brief papers, oral reports, two longer papers

Prerequisites: PSYC 201 and 242

Enrollment Limit: 16

Enrollment Preferences: senior, then junior Psychology majors

Distributions: (D2)

Attributes: PSYC 200-level Courses  TEAC Teaching Sequence Courses
PSYC 272 (S) Psychology of Education
This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

Class Format: discussion
Requirements/Evaluation: two exams and a final project
Prerequisites: PSYC 101
Enrollment Limit: 50
Enrollment Preferences: Psychology majors and those who plan to become teachers
Expected Class Size: 50
Grading: no pass/fail option, yes fifth course option

PSYC 332 (S) Children's Mathematical Thinking and Learning
Are babies statistical experts? Will I ever be good at calculus? What are we born with and what do we learn? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their informal understanding of geometry, space, and number to successfully navigate their environments. In this course we read and discuss both foundational and cutting-edge articles from neuroscience, cognitive
science, education, and psychology to understand how humans bridge this gap between the informal and formal mathematical worlds. We will also tackle questions such as: How do culture and language affect numerical understanding? What are the sources of children's mathematical misconceptions? What are the effects of early environmental input or input deprivation on mathematical development? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? For your laboratory component, you will work with a small group of other students to develop an original research project that tests a specific hypothesis about children's mathematical thinking and learning. Data will be collected in community schools, with the permission of parents, teachers, and children. Your results will be written-up in your final paper, which will be in the style of an empirical journal article.

Class Format: community-based data collection in local schools

Requirements/Evaluation: class participation, discussion leader, weekly open-notes reading quizzes, 12- to 15-page final paper, project and lab report

Prerequisites: PSYC 232 or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, upperclassmen, students with a demonstrated interest in the course material

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

PSYC 338  (S) Inquiry, Invention and Ideas

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

Requirements/Evaluation: three 3- to 5-page essays, two child observations and a 7- to 10-page final paper

Prerequisites: PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: preference given to Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PSYC Area 3 - Developmental Psychology  TEAC Teaching Sequence Courses

Spring 2020

SEM Section: 01  W 1:10 pm - 3:50 pm  Susan L. Engel

PSYC 372  (F) Advanced Seminar in Teaching and Learning

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting?
How do we assess teaching practices and the students' learning? What does it take to be an educated person?

**Requirements/Evaluation:** this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

**Prerequisites:** PSYC 232 or PSYC 272 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and those who plan to become teachers

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** ExPE Experiential Education Courses  PSYC Area 7 - Educational Psychology  TEAC Teaching Sequence Courses

WINTER STUDY
Coordinator: Barbara Casey

Winter Study, which began in January of 1968, is intended to provide students and faculty with a dramatically different educational experience. The differences are in the nature of the courses, the nature of the learning experience, and the change of educational pace and format from fall and spring semesters. These differences apply to the faculty and students in several ways: faculty can try out courses with new subjects and techniques that might, if successful, be used later in the regular terms; they can explore subjects not amenable to inclusion in regular courses; and they can investigate fields outside their usual areas of expertise. In their academic work (which is graded Pass, Perfunctory Pass, or Fail) students can explore new fields at low risk, concentrate on one subject that requires a great deal of time, develop individual research projects, or work in a different milieu (as interns, for example, or on trips outside Williamstown). In addition, Winter Study offers students an opportunity for more independence and initiative in a less formal setting, more opportunity to participate in cultural events, and an occasion to get to know one another better. More information can be found on the Winter Study website.

Registration

All students who will be on campus during the academic year must register for a Winter Study course. Registration will take place in early November. If you are registered for a senior thesis in the fall which must be continued through Winter Study by departmental rules, you will be registered for your WSP automatically. In every other case, you must complete registration. First-year students are required to participate in a WSP that will take place on campus; they are not allowed to do 99’s.

If you think your time may be restricted in any way (ski meets, interviews, etc.), clear these restrictions with the instructor before signing up for their project. Remember, for cross-listed projects, you should sign up for the subject you want to appear on your record. For many beginning language courses, you are required to take the Winter Study Sustaining Program in addition to your regular course. You will be automatically enrolled in this Sustaining Program once the Winter Study registration process is complete. Winter Study courses are graded Pass/Perfunctory Pass/Fail. A grade of pass means the student has performed satisfactorily. A grade of perfunctory pass signifies that a student’s work has been significantly lacking but is just adequate to deserve a pass. Students who fail their Winter Study Projects or receive a second Perfunctory Pass will be placed on academic probation by the Committee on Academic Standing and will be required to make up the deficiency. Students who fail through gross neglect of work will normally be required to resign.

99s

Sophomores, juniors, and seniors are eligible to propose “99s,” independent projects arranged with faculty sponsors, conducted in lieu of regular Winter Study courses. Perhaps you have encountered an interesting idea in one of your courses which you would like to study in more depth, or you may have an interest not covered in the regular curriculum. In recent years students have undertaken in-depth studies of particular literary works, interned in government offices, assisted in international and domestic medical clinics, conducted field work in economics in developing countries, and given performances illustrating the history of American dance. Although some 99’s involve travel away from campus, there are many opportunities to pursue intellectual or artistic goals here in Williamstown. More information about Winter Study 99s can be found online.

BIOL 100  (W)  Biology Through the Media Intensive

Biology Through The Media explores the foundational concepts examined in the Department’s introductory series (Biology 101 and Biology 102) by using the ‘greatest hits’ of stories that have made their way into the news outlets, television and film media. The first section of the course investigates cell structure and function in terms of energy needs and how information is conveyed in a cell. The last half the course will focus upon the developmental and evolutionary processes that have given rise to the diversity of life. This is a qualitative-focused, non-majors course and, as such, the students are not expected to have any background in biology. As this class counts as both a semester course and winter study course, the students are expected to attend class and to spend a significant time on the course. The students should dedicate approximately 50 hours per week to this class. The number of topics we will cover is numerous and wide-ranging and will be done so at a faster rate than what is observed during a regular semester. Each afternoon, the TAs and myself will be available to support student learning of the material.

Class Format: about 70 contact hours, plus 6 hours for quizzes and exams

Requirements/Evaluation: Problem sets will be assigned daily; the students are expected to spend a significant amount of time on the homework problems each afternoon and to hand in their assigned work. Grades: evaluation will be based on problem sets, quizzes and exams. Honor code guidelines: quizzes, exams and the write-up of the problems sets must be completed by the student alone, however, students may work together on the problems sets.

Prerequisites: permission of a dean
CHEM 12 (W) Embodying Creativity

Are you writing a thesis? Are you planning your life after graduation? Are you learning a new skill or trying to solve a problem? All these tasks can benefit from creativity. This course is based on the premise that we are all innately creative and can access this part of ourselves by connecting to our bodies through movement and the perceptual senses. By embodying our creative nature, we also develop more confidence in facing the unknown, resiliency in handling conflict, and empowerment in our decisions. Class time will be spent primarily on experiential learning in a dance studio-setting, where we will practice individual and partner techniques geared towards cultivating mindful awareness and bodily presence. Exercises include free writing, blind contour drawing, and Authentic Movement. We will also draw from post-modern experiments from the 1960's and 70's in New York City, concepts in expressive art therapy, and principles in Eastern body-mind healing modalities to establish a framework with which to contextualize our practices. You will then take what you learn in class to support your own creative project outside of class. Required text is Elizabeth Gilbert's Big Magic. We will also use readings from Twyla Tharp's The Creative Habit, Julia Cameron's The Artist's Way, Mabel Todd's The Thinking Body, Barbara Dilley's This Very Moment, Jon Kabat-Zinn's Full Catastrophe Living, Greg Johanson and Ron Kurtz's Grace Unfolding, and selected works by Joseph Campbell. Evaluation will be based on class participation, completion of assignments, midpoint feedback, final 10-page paper or creative project/presentation that demonstrates a level of engagement with class material. We will meet 2 times per week for 3 hours. One minimum individual meeting with the instructor will be scheduled during the course to focus on each student's project. If you have any questions about this course, feel free to contact the instructor at tlhu210@gmail.com. Adjunct Instructor Bio: Tracy Hu is a fourth-year medical student at the University of Texas Medical Branch studying to become a Family Medicine physician. After graduating from Williams in 2013, she investigated the mind-body connection through extensive training in massage, contact improvisation, and meditative practices. She is interested in how modern medicine can benefit from a multidisciplinary approach to understanding disease and promoting wellness on both an individual and community level.

Requirements/Evaluation: 10-page paper or equivalent creative project/presentation demonstrating understanding, application, and integration of class material including but not limited to visual arts piece, performance, writing portfolio, interpretive presentation, etc.

Prerequisites: open to all students; no previous creative work or dance experience required

Enrollment Limit: 10

Enrollment Preferences: statement of interest (a little bit about yourself and your interest in the course)

Grading: pass/fail only

Materials/Lab Fee: approximately $14 for books

CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, preventative medicine, mindfulness and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, and finding your happiness. Evaluation will be based on completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at Nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process. We will meet twice a week for three-hour sessions as a group. The course will include two individual sessions--an initial health assessment plus an additional
session designed to personalize the course and assist the student in applying the learned techniques. Books required for this class may include: *Integrative Nutrition: Feed Your Hunger For Health and Happiness* by Joshua Rosenthal, *Food Rules: An Eaters Manual* by Michael Pollan, *Mind Over Medicine: Scientific Proof That You Can Heal Yourself* by Lissa Rankin, and *The Mindful Twenty-Something* by Holly Rogers. Adjunct Instructor Bio: Nicole Anagnos is health coach and director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Kl¿ Organic Beauty. She also holds a master's degree in education.

**Requirements/Evaluation:** short paper and final project or presentation  

**Prerequisites:** none  

**Enrollment Limit:** 15  

**Enrollment Preferences:** email statement of interest to nicole@zentreewellnesscom  

**Grading:** pass/fail only  

**Materials/Lab Fee:** approximately $75 for books  

**Attributes:** EXPE Experiential Education Courses

**CHEM 15 (W) The Work of the Supreme Court: A Simulation**  

**Cross-listings:** CHEM 15 JLST 15  

**Secondary Cross-listing**  

The objective of this course is to provide students with an understanding of the personal, theoretical, and institutional characteristics that impact the decision making process of the nation's highest court. At the beginning of the course, the students will be provided with briefs, relevant decisions and other materials for a case currently pending before the court. Where possible, cases will be selected that address constitutional issues that also have a political and/or historical significance. Past examples include the constitutionality of provisions in the Affordable Care Act, rights of prisoners held in Guantanamo, the extent of First Amendment rights of students, and the applicability of the State Secrets doctrine to the country's extraordinary rendition program. Four students (two on each side) will be assigned to prepare and present oral arguments to the "Court", which will consist of the other eight students, each playing the role of a Supreme Court Justice. An instructor will act as the Chief Justice to coordinate the student Justices and keep them on focus. After the oral argument, the "Court" will confer and prepare majority and minority opinions, which will be announced in "open court" at the conclusion of the term. Adjunct Instructor Bio: Robert Groban is a former Assistant U.S. Attorney, SDNY, and current partner in Berry Appleman & Leiden LLP. Adjunct Instructor Bio: Thomas Sweeney retired former litigator with Hogan & Hartson and Hogan Lovells.  

**Requirements/Evaluation:** short paper and final project or presentation; oral argument, or written court opinions  

**Prerequisites:** none  

**Enrollment Limit:** 12  

**Enrollment Preferences:** seniority  

**Grading:** pass/fail only  

**Materials/Lab Fee:** $10 and approximately $45 for books  

This course is cross-listed and the prefixes carry the following divisional credit:  

CHEM 15 JLST 15  

Winter 2020  
LEC Section: 01   Cancelled

**CHEM 16 (W) Glass and Glassblowing**  

**Cross-listings:** ARTS 16 CHEM 16  

**Primary Cross-listing**  

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students.
Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Grading: pass/fail only

Materials/Lab Fee: $75

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 16 CHEM 16

Attributes: EXPE Experiential Education Courses

Winter 2020
LEC Section: 01 M-F 9:00 am - 11:50 am John W. Thoman

CHEM 18 (W) Introduction to Research in Biochemistry
An independent experimental project in biochemistry is carried out in collaboration with a member of the Department with expertise in biochemistry. Biochemistry is a branch of chemistry that deals with the molecular details of living systems including the interaction of biologically important molecules. In the Chemistry Department, studies are underway to investigate the structure/function relationship of proteins, the interaction between proteins and RNA and DNA, the molecular basis of bacterial gene regulation, the lipid composition of model membranes, and the molecular underpinnings of viral infection.

Requirements/Evaluation: a 10-page written report is required

Prerequisites: completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

Enrollment Limit: 4

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Winter 2020
LEC Section: 01 M-F 10:00 am - 3:50 pm Amy Gehring, Bob Rawle

CHEM 20 (W) Introduction to Research in Inorganic Chemistry
Students in this course will carry out an independent research project in collaboration with a member of the Department with expertise in inorganic chemistry. Representative projects include the synthesis and study of polymers to encapsulate heavy metals with an eye to environmental remediation and the synthesis of coordination complexes as models of enzymes and as catalysts for the oxidation of organic compounds. The interdisciplinary nature of the project will expose students to a range of inorganic and organic synthetic protocols and analytical and spectroscopic techniques for the characterization of new materials and the monitoring of catalysis. In addition to lab work, participants will engage in an exploration of careers in chemistry and a discussion of topics of interest to chemists, such as ethics and creating a diverse workforce.

Requirements/Evaluation: a 10-page written report is required

Prerequisites: completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

Enrollment Limit: 4

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Materials/Lab Fee: $0
CHEM 23 (W) Introduction to Research in Organic Chemistry
An independent experimental project in organic chemistry is carried out in collaboration with a member of the Department. Representative projects include: Controlled synthesis of block copolymers as self-assembled nanocarriers. Students involved in this work will learn techniques involved in organic synthesis, including analysis by NMR, IR, and SEC.

**Requirements/Evaluation:** a 10-page written report is required

**Prerequisites:** completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

**Enrollment Limit:** POI

**Enrollment Preferences:** expression of student interest

**Grading:** pass/fail only

---

CHEM 24 (W) Introduction to Research in Physical Chemistry
An independent experimental project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, molecular modeling of water clusters, laser spectroscopy of chlorofluorocarbon substitutes, and observing the dynamics in glasses using single molecule spectroscopy and molecular dynamics simulations.

**Requirements/Evaluation:** a 10-page written report is required

**Prerequisites:** completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

**Enrollment Limit:** POI

**Enrollment Preferences:** expression of student interest

**Grading:** pass/fail only

---

CHEM 31 (W) Senior Research and Thesis: Chemistry
To be taken by students registered for Chemistry 493, 494.

**Class Format:** independent study

**Grading:** pass/fail only

---

CHEM 41 (W) It's a Material World-What's It Made Of?-Intensive
We'll talk about how underlying atomic and molecular scale structure gives rise to physical properties that you already have an intuitive sense for: things like hardness, softness, elasticity, color, brittleness, conductivity, transparency... Once we understand how these properties arise, we can start thinking about how and why we use certain materials for particular applications and consider the historical and societal changes that result from choosing or developing new materials for those specific applications. What kinds of materials (or innovations in the skills or techniques used to produce them) have been valued over time? What has been the impact of these technological advances? From there, we can start to think about how
to design new materials with new kinds of properties or combinations of properties. We'll look at old materials as well as new, and venture a bit into the modern world of materials, which involves design and characterization of meso and nanoscale structures. We'll take a little time to do some lab experiments as well, to give you a peek at some strategies used in nanofabrication, as well a chance to use some of the kinds of instrumentation used in studying nanoscale materials. Because this course is designed to count for both a regular full semester credit as well as a winter study credit, it will necessarily be a fairly intense experience. We're going to be moving through material pretty quickly, and it'll be hard for you to tackle the problems that you'll need to on your own at this pace in addition to doing the readings and going over class notes. So rather than structure the course to be 3 hours of uninterrupted class time/day followed by many hours of trying to do the rest of the work on your own, the course will be structured in order to provide a lot of help along the way. We'll be meeting together for more hours each day, and we'll use the extra time to do a lot of problem solving work together, as this is really the best way to work through material, as well as to do a lot of demos that will illustrate what we're talking about. There will be a great deal of support available from course TAs, who will help with the problem solving during the day, as well as be available some evenings for additional help on problem sets, as well as preparation for exams. We'll also break up the classwork with a few days of lab experiments, which will be a chance to try out some new techniques used in nanoscale fabrication, and get a feel for some of the challenges in studying things at this scale. There won't be any lab reports or separate homework associated with the labs that we do, though it's possible that there may be some questions on problem sets or exams that are associated with things you'll have encountered in lab. This course will be a non-majors level introduction to materials chemistry, with no chemistry background required.

Requirements/Evaluation: a series of problem sets, two exams, and a final

Prerequisites: permission of a dean

Enrollment Limit: 15

Enrollment Preferences: students who need to make up a deficiency

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both CHEM 100 and CHEM 41.

Winter 2020

SEM Section: 01 M-F 9:00 am - 12:00 pm M-F 1:00 pm - 4:00 pm Lee Y. Park

CHEM 99 (W) Independent Study: Chemistry

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

CHIN 14 (W) Loyalty and Righteousness: Female Knight Errants in the Chinese Tradition
Cross-listings: CHIN 14 HIST 14
Primary Cross-listing
The aura of the Chinese knight-errant's alternative universe (jianghu, lit. rivers and lakes) has never waned thanks to the thriving literature of Chinese martial arts. Recognized as the oldest genre of Chinese popular fiction still being written today, the martial arts novel constructs a fascinating human sociality where chivalry and altruism govern, stateless subjects wander, and heroic grace unfolds. This course will examine the literary, artistic, and social imagination of this jianghu in selected modern martial arts novels written by Jin Yong (aka Louis Cha Leung-yung) and Gu Long. It also compares Jin Yong's oeuvre, endorsed by die-hard fans, with the breathtaking yet controversial C(H)ollywood martial arts extravaganzas that have been released in the current millennium. Students will inquire into the themes of righteousness and law, self and state, martial arts and medicine, body and gender, and the martial arts world and postcolonial history; as well as traditional philosophical concepts of yin and yang, and "between the people" (minjian) and "all under heaven" (tianxia). Finally, we will explore the genre's aestheticism via literary and visual constructions in the cultural text.
Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: students will be asked to write an essay to explain their interest and rationale for this course
Grading: pass/fail only
Materials/Lab Fee: $35 and cost of books
This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 31 (W) Senior Thesis: Chinese
To be taken by all students who are candidates for honors in Chinese.
Class Format: independent study
CHIN 88 (W) Chinese Sustaining Program
Students registered for CHIN 101-102 are required to attend and pass the Chinese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation
Prerequisites: Chinese 101
Grading: pass/fail option only
Materials/Lab Fee: one Xerox packet

CHIN 99 (W) Independent Study: Chinese
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

CLAS 25 (W) Performance and Place in Ancient Greece
Ancient Greek literature displays a keen awareness of the links between performance and place. Whether referring to the locations of their own performance or conjuring up images of other sites and scenes, Greek songs and speeches demand that we pay attention to setting. This course, therefore, takes an experiential and contextual approach to the study of ancient Greek literature and performance culture. The course will include foundational reading in performance theory, as well as select readings from Greek poetry, drama, and oratory. The core work, however, will occur in Greece, as we visit sites like the Athenian Acropolis, the theater and sanctuary at Epidaurus, and the Temple of Aphaia on the island of Aegina. Each student will be responsible for introducing the class to a specific site, using primary and secondary sources to describe the layout of the space and the kinds of performance events (choral dance, athletic competition, religious ritual, forensic oratory) that took place within it. As a group, we will discuss different approaches to the reconstruction of historical performance events and consider how literary texts of various genres navigate the representation of landscape and architecture. While we will primarily focus on Classical Athens, a brief turn to Greek oratory under imperial Roman rule (the "Second Sophistic") will give us an opportunity to reflect on the ways in which the enduring cultural significance of the city of Athens in later antiquity served as a resource for writers and performers who represent themselves already as belated heirs of an earlier, classical period. This course will encourage us to consider the complex significance of studying ancient authors, performers, and audiences across an unbridgeable gap in time, even as we aim to close the gap in space, in order to explore how physical sites function as archives of memory, practice, and performance that can enrich and nuance our understanding of ancient literature and culture.

Requirements/Evaluation: two reports (one on a site, one on a text) to be researched before departure and delivered in Greece, plus an additional reflective assignment upon return
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference will be given to Classics majors and intending Classics majors, and to those with demonstrated interest in the ancient world who have not previously travelled abroad

COMP 11 (W) Looking at Contemporary Documentary Photography
Cross-listings: ARTH 11 GERM 11 COMP 11
This course explores the evolution of modern documentary photography. We will start with a look back to the work of Lewis Hine, August Sander, Dorothea Lange, Walker Evans and the Magnum Agency photographers. We will then jump to mid 20th-century work of Robert Frank’s *The Americans*, and how Frank’s singular vision deeply shaped the next generation of photographers working the American streets and landscape. Diane Arbus, Vivian Maier, Bruce Davidson, Lee Friedlander, William Klein, Danny Lyon, Gary Winogrand are some of the photographers whose work we will get to know well. Discussions will include the new wave of independent and Magnum photojournalists (Phillip Jones Griffiths, Josef Koudleka, Susan Meiselas, Gilles Peress, James Nachtwey, Alex Webb, Ron Haviv and Tyler Hicks) and the wars from Vietnam to Bosnia to Iraq and Syria they cover as well as the personal visions they explore. Insight into the diverse currents of documentary photography will be covered through the work of Bill Burke, Larry Clark, Larry Fink, Nan Goldin, Emmet Gowin, Sally Mann, Mary Ellen Mark, Nicholas Nixon, Richard Misrach, Joel Sternfeld, Birney Imes, Regan Louie, Edward Burtynsky, Laura Letinsky and Simon Norfolk. Our last classes will be an exploration of social media and the proliferation of diverse voices emerging in documentary photography. The class will meet three mornings a week for two hours. Slide presentations will occupy half of the first meetings and give way to discussion of issues in documentary photography. Each student will be required to make a brief presentation to the class on a documentary topic of their choice. A final paper expanding on this documentary topic will be due at the end of the course. Students will be evaluated on their classroom presentation, general participation and their written work. A field trip to New York will let us see first hand works from the collections at MoMA, etc. Adjunct Instructor Bio: Kevin Bubriski’s fine art photographs are in the permanent collections of the Museum of Modern Art, Metropolitan Museum of Art, San Francisco Museum of Modern Art, and Bibliotheque Nationale, Paris. Kevin has received Guggenheim, Fulbright and NEA fellowships. Bubriski has published eleven books of photography including *Nepal 1975-2011* published by Peabody Museum Press of Harvard University in 2014 and *Legacy in Stone: Syria Before War* in 2019 with powerhouse Books in New York.

CSCI 10 (W) C, Unix and Software Tools
This course serves as a guided introduction to the Unix operating system and the C programming language. The course is designed for individuals who understand basic program development techniques as discussed in an introductory programming course (Computer Science 134 or equivalent), but who wish to become familiar with a broader variety of computer systems and programming languages. Students in this course will work on Unix workstations, available in the Department's laboratory. By the end of the course, students will have developed proficiency with Unix and the C programming language. The exact topics to be covered may vary depending upon the needs and desires of the students.

Requirements/Evaluation: completion of labs and assignments
Prerequisites: CSCI 134 (or equivalent programming experience)
Enrollment Limit: 15
Enrollment Preferences: preference will be given to students who have not yet completed a CSCI course at the 300 level or above
Grading: pass/fail only
Materials/Lab Fee: cost of texts

Winter 2020
LEC Section: 01 TWR 10:00 am - 12:50 pm Lida P. Doret

CSCI 11 (W) Video Game Appreciation (1972-1992)
Many video games from the 1970s and 1980s are still enjoyable today. However, most classics cannot be fully appreciated without proper historical context. For example, [Pong] (Atari, 1972) is trivial when played with modern gamepads but is very challenging with paddle controllers; [Missile Command] (Atari, 1980) fills with tension when its political backdrop is considered; [Pac-Man] (Namco, 1980) is a nimble orchestration when the AI governing each ghost is understood; [Super Mario Bros.] (Nintendo, 1985) is revolutionary only after playing previous platformers; [Mortal Kombat] (Midway, 1992) is only controversial when compared to previous fighting games. Students will immerse themselves in the first 20 years of commercial video game history through instruction, game play, and game development. We will meet three times a week for 2 hour lectures on digital art, music, culture, technology, business, law, and the people behind developments in these areas. The classes are augmented twice a week by 60-minute sessions in the new Williams College video game lab. Throughout the course, special emphasis will be placed on the constraints that shaped the design of classic video games. At the end of the term students demonstrate their newfound knowledge by developing a retro-inspired video game. Enrollment preference will be given to students who have completed CSCI 134 or have a skill related to video game development (e.g. programming, playtesting, level design, storytelling, pixel art, sound engineering, etc.)

Requirements/Evaluation: video game
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: students who have completed CSCI 134 or can demonstrate a skill related to video game development
Grading: pass/fail only
Materials/Lab Fee: $30 for software licenses and routine equipment maintenance of the video game lab

Winter 2020
CSCI 12 (W) Geometry in Stained Glass

Geometry allows us to observe mathematical objects from different viewpoints. It may be approached both visually and algebraically. Building geometric structures in the real world allows us to view them from different angles and sometimes, gain new insights. In this class students will work together to design and build a pentagonal tiling in stained glass. There are only fifteen types of convex pentagons that can tile a two-dimensional surface, and the secret behind their assembly lies in the relationship between edges and angles. We will use Euclidian geometry, drafting by hand using only straightedge and compass, to figure out angles and dimensions. Students will then learn how to cut precise shapes in colored glass, wrap them in copper and solder together into a stained glass window. Students will also work individually or in small groups on projects of their own choosing. These may be two- or three-dimensional geometric figures, including those on non-Euclidian surfaces. In past years a student of organic chemistry modeled cyclohexane and a physics major, the spectral emissions of a star. In 2018 the class built a mirrored glass quasicrystal. Students interested in mathematical tiling patterns, networks, cellular or molecular assembly, crystallography, or simply curious about geometry would be welcome in this class. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up the exhibition and tidying the lab at the end of Winter Study. Please note: we will not be painting images on glass. Adjunct Instructor Bio: Debora Coombs has an MFA from the Royal College of Art in London, England. Her stained glass work is commissioned and exhibited internationally. Debora’s interest in tiling patterns and mathematical projection led to a collaboration with Williams Professor of Computer Science Duane Bailey. Their sculptures are currently on exhibit in the SCHOW science library.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none, however, self-motivated students with good hand skills, patience and an interest in mathematics will find the course most rewarding

Enrollment Limit: 10

Enrollment Preferences: preference to seniors

Grading: pass/fail only

Materials/Lab Fee: $285

Attributes: EXPE Experiential Education Courses

Winter 2020

LEC Section: 01 M-F 10:00 am - 12:50 pm Debora Coombs

CSCI 13 (W) Designing for People

Cross-listings: PSYC 13 CSCI 13

Primary Cross-listing

Many technologically-innovative and aesthetically-beautiful products fail because they are not sensitive to the attitudes and behaviors of the people who interact with them. The field of Human Factors combines aspects of psychology with software development, education, architecture, and physiology, and other fields, to design objects that provide an easy, enjoyable, efficient and safe user experience. The course will provide students with a theoretical framework for analyzing usability, as well as practical knowledge of a variety of human factors testing methodologies. The course will examine the usability of a wide variety of designed objects, including buildings, publications, websites, software applications, and consumer electronics gadgets. Students will demonstrate their understanding of human factors theory through a short paper and participation in class discussion. Students identify a usability problem and design a solution which they will evaluate by heuristic analysis and a usability test with 8-10 human test subjects. Findings will be presented on the final day. Adjunct Instructor Bio: Rich Cohen ’82 has designed communications, social networking and education applications used by over 100 million people and has conducted usability research on four continents.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Instructor seeks a diverse group of students with interests in design, psychology, and human-computer interaction

Grading: pass/fail only

Materials/Lab Fee: none

This course is cross-listed and the prefixes carry the following divisional credit:
A prominent company recently realized the machine-learning algorithm trained on its past hiring data had learned a bias against female candidates and so was unsuitable for resume evaluation. But given competing definitions of fairness, how should we decide what it means for an algorithm to be unbiased? Machine vision algorithms are systematically less likely to recognize faces of people of color. Since many face recognition algorithms are used for surveillance, would improving these algorithms promote justice? Deep fakes may pose serious challenges to democratic discourse, as faked videos of political leaders making incendiary statements cast doubt on the provenance of real videos. Do the researchers developing these algorithms, often academics funded by National Science Foundation grants, have an obligation to desist? In a field filled with such vexing questions, the ethical issue most commonly addressed by the media is whether a self-driving car should swerve to hit one person in order to avoid hitting two. In this class, we will go beyond the headlines to explore the ethics of technology. We will discuss issues such as transparency, bias and fairness, surveillance, automation and work, the politics of artifacts, the epistemology of deep fakes, and more. Our discussion will rely on articles from the course packet, enlivened by discussions with experts in the field over Skype. Students will apply their ethical knowledge to write multiple newspaper length op-eds arguing for their views. If students choose to submit these op-eds for publication, the instructor will coach them on appropriate procedures and venues. Adjunct Instructor Bio: Kathleen Creel '10 is an advanced doctoral student in the Department of History & Philosophy of Science at the University of Pittsburgh. Her research focuses on epistemic and ethical issues in computer science and its scientific applications, such as transparency in machine learning and the ability of algorithmic decisions to provide reasons.

**Requirements/Evaluation:** 3 op-eds for a total of 10 pages

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** based on a written paragraph expressing interest

**Grading:** pass/fail only

**Materials/Lab Fee:** $20

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 14 PHIL 14 STS 14
CSCI 23 (W) Introduction to Research and Development in Computing
An independent project is completed in collaboration with a member of the Computer Science Department. The projects undertaken will either involve the exploration of a research topic related to the faculty member’s work or the implementation of a software system that will extend the students design and implementation skills. It is expected that the student will spend 20 hours per week working on the project. At the completion of the project, each student will submit a 10-page written report or the software developed together with appropriate documentation of its behavior and design. In addition, students will be expected to give a short presentation or demonstration of their work. Prior to the beginning of the Winter Study registration period, any student interested in enrolling must have arranged with a faculty member in the department to serve as their supervisor for the course.

Class Format: TBA individually arranged
Requirements/Evaluation: final paper and presentation/demonstration
Prerequisites: project must be preapproved by the faculty supervisor
Enrollment Limit: POI
Enrollment Preferences: preference given to sophomores and juniors
Grading: pass/fail only
Materials/Lab Fee: none

Winter 2020
LEC Section: 01 TBA Bill K. Jannen

CSCI 28 (W) Solution Design and Product Management
Cross-listings: CSCI 28 ECON 28
Secondary Cross-listing

Google Glass, Blackberry Storm, and the initial Obamacare Website represent just a few of the many failures that litter the IT project graveyard: 40 to 60 percent of large technology projects fail. All too often, the cause has little to do with the quality of technical engineering. More often, companies choose the wrong problem to solve or the wrong way to solve it. Google failed to account for the Google Glass price tag and privacy concerns. Blackberry failed to fully appreciate the touchscreen revolution. The Obamacare website failed to address management issues. The underlying conflict is that engineers and IT teams like to be told what to build, but customers often do not know what they want or how to express it. Identifying the right problem, designing the right solution, communicating the correct specifications to engineers, and delivering the right product to primary stakeholders are all difficult challenges crucial for successful product development. This course will explore various frameworks that product managers use to address these challenges. In doing so, we will model interactions between market forces, corporate directives, engineering challenges, and user experiences to interrogate the resilience of our ideas. We will also analyze and critique methodologies presented in readings by technology management prophets Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Throughout the course, students will work in small teams to develop their own product management toolkit and deploy it towards solving a technology problem of each team’s own choosing.  Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it
Grading: pass/fail only
Materials/Lab Fee: $10 and approximately $30 for books

This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 28 ECON 28
Attributes: EXPE Experiential Education Courses
CSCI 31 (W) Senior Thesis: Computer Science
To be taken by students registered for Computer Science 493-494.
Class Format: independent study
Grading: pass/fail only

CSCI 99 (W) Independent Study: Computer Science
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only

DANC 11 (W) BFF (Ballet Film Festival!)
This course is for ANYONE interested in learning more about ballet, through a variety of experiences. First, of course, will be physical practice. For those who have no (or little) prior ballet training, you'll learn the fundamentals of ballet technique in a safe but challenging class; separate classes will be held for intermediate/advanced dancers. All course participants will gather together twice a week for movie/documentary viewings—wides range of films (primarily) about ballet and ballet dancers from around the world—and once a week for lectures and group discussions, either in a seminar format or during a meal, about the films as well as the history and/or current context related to them. Reading material and other viewings will also be assigned so that all students have a grasp of the overarching history of ballet.
Requirements/Evaluation: short paper and final project or presentation; individual progress in the physical components, as well as on the quality of participation in all activities—physical work as well as discussions and responses to the assignments
Prerequisites: beginner-level students: none; intermediate/advanced level students: sufficient prior ballet training (with permission and/or placement class from instructor)
Enrollment Limit: 30
Enrollment Preferences: students who are planning on taking DANC 203 in the Spring will get preference
Grading: pass/fail only

DANC 13 (W) BFF Intermediate (Ballet Film Festival!)
This course is for ANYONE interested in learning more about ballet, through a variety of experiences. First will be physical practice, 2 times per week. For those who have no (or little) prior ballet training, you'll learn the fundamentals of ballet technique in a safe but challenging class; separate classes will be held for intermediate/advanced dancers. All course participants will gather together twice a week for movie/documentary viewings of a wide range of films (primarily) about ballet and ballet dancers from around the world, and/or group discussions about the films as well as the history and/or current context related to them. Reading and additional viewing material will be assigned. At the end of Winter Study, students will participate in an informal physical presentation. Students must contact the instructor at jmp2@williams.edu for proper level placement.
DANC 15 (W) Introduction to Tap Dance
Cross-listings: DANC 15 PSCI 15

Secondary Cross-listing
This course introduces those with little or no experience in tap dance to the basic techniques and movement/rhythm vocabularies of this musical and quintessentially American style of dance. In twice-weekly studio sessions, students will gain facility with the fundamentals of tap technique, practice basic combinations, and experiment with improvisation. To develop a richer sense of the American cultural context from which tap grew—particularly its roots in African American movement and music traditions and its appropriation by Broadway and the film industry—we will discuss film and writing on the genre's past and present in once-weekly classroom sessions. Students should expect to gain balance, rhythm, improvisational freedom, and confidence in public performance through practicing tap. Evaluation will be based on effort and improvement in studio sessions, participation in discussions, weekly journal reflections, and a final group performance of the shim sham, tap's so-called national anthem.

Requirements/Evaluation: final project or presentation
Prerequisites: none; course is only open to those with little or no tap experience
Enrollment Limit: 15
Enrollment Preferences: brief personal statements
Grading: pass/fail only
Materials/Lab Fee: approximately $50 for books

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 15 PSCI 15

DANC 16 (W) The GYROKINESIS® Movement Method
Cross-listings: DANC 16 SPEC 28

Secondary Cross-listing
The Gyrokinesis Method is an original and unique movement practice, which has roots in Yoga, Tai Chi, gymnastics, dance, and swimming. This method gently works the entire body, opening energy pathways, stimulating the nervous system, increasing range of motion and creating functional strength through rhythmic, flowing movement sequences performed with corresponding breathing patterns. We will work in a group setting. Students will learn the basic concepts of this movement system, as well as more complex sequences. They will be expected to learn and execute all sequences for Format I. They will be asked to practice between classes. Ultimately, students will be paired up to teach each other, which will increase their understanding of this unique form of exercise. Finally, students will be expected to perform all Format I sequences as a group with music. They will then be qualified to take the Gyrokinesis Pre-training Course. Each student will receive a questionnaire at the beginning of the course and, again, at the end, to understand how their experience has changed their answers and how they can apply this movement system to their everyday life, their sport and, their chosen course of study at Williams. Method of evaluation/requirements: Questionnaire at the beginning and then again at the end of this course, teaching each other, and a final performance as a group. Adjunct Instructor Bio: Patrie Sardo has been a Licensed Gyrotonic & Gyrokinesis Trainer and Pre-Trainer for over 10 years. She owns her own studio in Santa Monica, Ca and is licensed to teach all Gyrotonic Specialty equipment; Archway, Jumping Stretching Board, Leg Extension, and the Gyrotoner.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Dance majors, athletes, seniors
DANC 17 (W) Introduction to Argentine Tango

Cross-listings: DANC 17 MUS 17

Secondary Cross-listing

Through reading, film viewings, and participating in musical exercises and dance workshops, students will explore the sounds and movements of Argentine tango, while also considering its broader social and historical context both in Argentina and abroad. No prior musical or dance experience necessary. Students' grades will be based on course participation, regular journal entries, and an individual final project with a written component.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: preference given to music and dance majors, seniors

Grading: pass/fail only

Materials/Lab Fee: $30

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 17 MUS 17

IND Section: 01  TBA  Sandra L. Burton

ECON 10 (W) Securities Markets and Investment Banking

An overview of the Financial Markets and the role of Investment Banks. Topics will include: Financial Asset Valuation, Mergers and Acquisitions, Securities Sales and Trading, Bonds and Bond Math, Public Equities, Private Equity/Leveraged Buy-outs, and Risk Management. The class emphasizes real-life practices and will include visiting expert guest speakers and case studies. The class begins with the basics of financial instruments, time value of money, and asset valuation. We then move on to fundamentals of corporate finance and conclude with financial markets. Course Goals: (1) to provide an understanding of how modern capital markets operate from a practical, real-life perspective (2) to help the student think critically about issues affecting the stock and bond markets, and (3) to have fun and instill a passion for future study and/or work in the financial industry. Required Readings: (1) Understanding Wall Street (Fifth Edition) by Jeffrey Little and Lucien Rhodes (2) Packet of Case Studies and Industry Notes (3) Wall Street Journal (Business & Finance section) and the "Money Stuff" blog on each day that class meets. Group Assignment (Case study): At the end of the first class, students will be divided into several groups. Each group will be assigned a case study to be presented orally to the class
for further discussion (slides or other visual aids will be used to help organize the discussion). Adjunct Instructor Bio: Tim Bock '88 worked at Credit Suisse for 28 years where he ran Global Capital Markets, leading a unit of 250 Investment Bankers responsible for Credit Suisse's global financing businesses, including equity capital markets, debt capital markets, leveraged finance origination and corporate derivatives. Tim held several other leadership roles at CS, including Co-head of Global Products in the Private Bank and Head of Derivatives Origination in the Equity and Fixed Income Departments.

Requirements/Evaluation: short paper, case study presentation, and class participation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: statement of interest
Grading: pass/fail only
Materials/Lab Fee: approximately $55 for books

ECON 13  (W)  Tools for Moving from Good Ideas to Successful Businesses and Organizations
This course is based on a proven methodology for turning business ideas into successful businesses and organizations. Student working in teams generate business ideas and then work to develop a business model to take the ideas to start and beyond. The course provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business and engineering schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research results. The class is appropriate to all students regardless of major who want to learn how to build a startup that succeeds. The class meets for two and a half hours three days a week for short lectures, discussions, group work, and presentations, There will also be outside guests who have created successful businesses. Outside of class, students will be required to watch online lectures and videos, read handouts, and do short papers. The primary work is to work in teams to research their business idea using the Lean Launchpad approach. Teams will develop a research plan, interview potential customers, analyze the results, and revise their business models. The teams will meet with the instructor regularly. Each team will develop weekly progress presentations as well as a final presentation. They will also develop a team video showing lessons the team learned during the course. Students will also be required to provide a three-page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has worked with startup businesses for over 35 years. He has trained over 2,000 people who have started over 1,200 businesses and provided continuous support to a number of these businesses over the course of years. He has taught Winter Study nine times and is available to work with students throughout the year after the course ends.

Requirements/Evaluation: final project or presentation; contributions in class and as part of their teams based on presentations, papers and class participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors first if the course is over-enrolled
Grading: pass/fail only
Materials/Lab Fee: approximately $40 for books
Attributes: EXPE Experiential Education Courses

Winter 2020
LEC Section: 01 MTWR 10:00 am - 12:50 pm  Steven P. Fogel

ECON 14  (W)  Housing Markets and Community Impacts Represented in Film
A house provides not only shelter and protection for its occupants, but also signals to others the characteristics of those occupants and determines the context within which we live, work and recreate. The private home and its neighborhood are clearly linked, and economic studies suggest that between 25% and 50% of the market value of residential property depends on such factors as school quality, crime and environmental quality that characterize the neighborhood. In this short course we will explore--through film, discussion and economics--the importance of and linkages between houses and communities. We will view and discuss 7-8 films that tell stories, imagined or real, about houses, living conditions, communities, and the housing
market. In addition to developing an appreciation of the economic, social and psychological importance of these ideas we will discuss associated significance for the economy.

Class Format: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: students who have completed ECON 110 or equivalent will be preferred
Grading: pass/fail only

Winter 2020
LEC Section: 01 TWR 1:00 pm - 3:50 pm Stephen C. Sheppard

ECON 15 (W) Management Consulting: A Primer for Williams Students
This course provides a broad overview of the management consulting industry from the perspective of an experienced practitioner. The objectives of the class are to provide a real-world view of what consultants do and to help prepare students who are considering joining a management consulting firm post-Williams. The class will begin with a broad discussion of the differences in the types of business consulting and how management consulting firms are utilized by corporations and private equity firms. The next section will review how management consultants structure frameworks to address strategic issues facing their clients. Students will be provided instruction on (and practice with) the tools utilized by strategy consultants to evaluate business units, analyze markets, evaluate competitive environments, and synthesize customer information in order to develop insights for strategic recommendations. Additionally, one class session will be devoted to tips for getting a job in management consulting including how to ace case interviews. The final small group project will be the development and delivery of a consulting presentation for a business with a strategic need. Adjunct Instructor Bio: Peter McKelvey '86 was with L.E.K. Consulting for 29 years including leading the Boston office and Private Equity practice and serving 6 years as President of the Americas Region. He has extensive experience in corporate and business unit strategy development and mergers and acquisitions advisory services. In addition to a BA in economics from Williams, Peter holds an MBA from The Wharton School of the University of Pennsylvania.

Requirements/Evaluation: final project or performance; class participation and homework assignments
Prerequisites: ECON 110
Enrollment Limit: 20
Enrollment Preferences: priority will be based on written statement of interest
Grading: pass/fail only
Materials/Lab Fee: $40

Winter 2020
LEC Section: 01 TWR 10:00 am - 11:50 am Peter McKelvey

ECON 16 (W) Venture Capital
The course will examine the venture capital industry from both a theoretical and practical perspective and will focus on the interplay of the legal, business, economic and financial issues that need to be dealt with in the formation, organization, governance and financing of new enterprises. The course is designed to provide students with a fundamental knowledge of the corporate and other laws applicable to venture capital, as well as with an appreciation of the concerns of entrepreneurs, venture capitalists and early employees. Class sessions will be devoted primarily to a discussion of business cases taken from the entrepreneurial curriculum of the Harvard Business School. In addition, students will be required to participate in small groups prior to class to prepare advice for entrepreneurs or key employees in three scenarios--an early stage company negotiating with a key executive the company is seeking to hire, a company considering two competing term sheets for venture financing and a company faced with the need for additional financing in a distressed situation. An alternative to one of these scenarios would involve splitting the class into small groups designated as either founders or investors and requiring the groups to negotiate investment terms. As a capstone to the class, students will participate in an in-class business simulation game developed at Wharton that will require students to interact in assigned roles as founders, investors or key employees. In addition to reading and analyzing the assigned business cases prior to class, students will be asked to review various background materials. Classes will meet for at least six hours per week, with additional sessions scheduled for meetings with outside industry experts that accept invitations to address the class. Adjunct Instructor Bio: Mr. Schwed retired from the law firm of WilmerHale in December 2015 after a 40-year career
focused on private equity and venture capital. For nine years, he was an adjunct professor at George Washington University Law School teaching a course on venture capital law. He taught this course during Winter Study the last three years. Mr. Schwed graduated from Williams with a degree in Economics in 1971 and from Harvard Law School in 1974.

Requirements/Evaluation: participation in class, preparation of discussion outlines (each equivalent to a 3- to 4-page paper) in connection with the small group assignments, and participation in the business simulation game

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: by lot with preference for seniors

Grading: pass/fail only

Materials/Lab Fee: $100

Winter 2020
LEC Section: 01    MWF 10:00 am - 11:50 am     Robert A. Schwed

ECON 17  (W)  The Fun of Fundraising

According to the National Center for Charitable Statistics, there are 1.5 million non-profit organizations registered in the U.S., and each of those organizations needs to actively fundraise in order to sustain their operations. Each year, hundreds of billions of dollars are contributed to charities from donors across the U.S. What is it that makes people want to give? What do donors consider when choosing what organizations to support? What type of an impact do individuals want to make through their philanthropy? This class will examine these questions and more through case studies, conversations with non-profit leaders and board members, and philanthropists. Students will gain a basic understanding of a non-profit financial model, as well as the different ways in which fundraising can actually be fun and can inform a potential career in the non-profit sector. Much of the course reading will involve actual fundraising materials and collateral, including appeals, brochures, grant applications, and stewardship reports. Final projects will give students the opportunity to try their own hand at creation of stewardship or solicitation pieces, potentially in partnership with/for the benefit of a local non-profit. In addition to regular course meetings, occasional meetings with non-profit leaders or donors may be required; whenever possible (based on the schedule of the guest speaker), these will be scheduled during the day, and any evening events would be optional. Adjunct Instructor Bio: Laura Day ’04 first became involved in fundraising for non-profits in elementary school, when she would help her mother produce mailings for her employer (a community-based social service organization). After eight years working in the NYC non-profit arts scene, Laura is now director of annual giving for Williams, and co-chair of the board of Berkshire Nursing Families (BNF).

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: priority given to seniors

Grading: pass/fail only

Winter 2020
LEC Section: 01    WR 10:00 am - 12:50 pm     Laura E. Day

ECON 18  (W)  Crossing Borders: Migration in Social Sciences, Literature, and Film

Migration has played a central role in shaping world history and impacted the social, political, economic, and cultural development of human societies. Movement of people across vast geographical terrains intensified in the 20th century and has become a defining feature of the 21st-century life. Today, debates about immigrant integration and exclusion, arguments for and against an impact of immigration on receiving and sending societies, and speculations over meanings of cultural difference are more intense than ever. This class will engage with cultural and political representations, definitions, and experiences of a particular experience of migration, a process of crossing borders. We will examine the notion of borders as they are constructed and deconstructed in social sciences, media, literature, and films. Through this concept, we will address the following questions: Why do people cross borders (and why do they stay?) Who defines the rules and conditions of belonging and has the power to enforce them? What are long- and short-term implications of border management? Is the rise of anti-immigrant sentiments an unavoidable feature of our lives and can it be contained or counteracted? To address these questions, we will bring together critical theoretical texts of this and past century with seminal literary works and documentary and feature films. Remarque and Agamben, Hosseini and Said, Naipaul and Deleuze & Guattari will lead us as we examine border
crossings in Southern US, refugee crisis in Europe, cross-continental migrations in Africa among other topics. Documentary and feature films will further our engagement with the topic and will allow us to explore different modes of representing and analyzing relevant concepts and ideas. The class is open to anyone and everyone interested in current affairs, politics, culture, literature, film, humanitarian work, the environment, their fellow citizens, the world. No previous experience in anything necessary. Just an appetite for reading & discussion. We will meet twice a week for three-hour sessions.

**Requirements/Evaluation:** evaluation will be based on class participation in discussions, 2 short film reviews and a 5-7 page paper on a topic developed in consultation with the instructor

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** open to anyone and everyone interested in current affairs, politics, culture, literature, film, humanitarian work, the environment, their fellow citizens, the world

**Grading:** pass/fail only

**Materials/Lab Fee:** (books): approximately $50

Winter 2020

LEC Section: 01   TWR 1:00 pm - 3:50 pm   Lisa A. Koryushkina

**ECON 19 (W) From Rockefeller to Tesla, 150 Years of US Energy Disruption**

In just the last two decades, the United States has gone from being the world's largest energy importer to being close to a net energy exporter. What accounts for this remarkable and globally disruptive transformation, and what are its long-term implications? To be sure, oil shale production technology, aka "fracking," has been a critical driver. However, alternative energy (wind, solar) and conservation have also played important parts. This course starts with a historical perspective, examining the roots of the modern energy industry via John D Rockefeller's autobiography. We then study the evolution of global supply and demand for oil, natural gas, and alternatives, including the important role of market price signals and volatility. Which technologies, including fracking in the 2000s, have been historically the most important? More broadly, we also review how geo-politics has often been a function of geology (energy's location). Course includes: 1) team debate where students pair-up, select a topic from current energy issues, and then be randomly assigned to defend one side of the issue; 2) 10-page paper. 

**Adjunct Instructor Bio:** James F. Clark '84 is a Partner and Investment Committee member at Sound Shore Management, Inc., a value investment manager. Previously, Jim was at Credit Suisse First Boston where he was Managing Director, Director of Research, and the firm's International and Domestic Oil equity research analyst. During his equity research tenure, he was selected to 14 Institutional Investor All-America research team positions, and also was a Wall Street Journal All-Star and Hall of Fame member.

**Requirements/Evaluation:** final project and a 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** seniors; Economics majors; History majors

**Grading:** pass/fail only

**Materials/Lab Fee:** $30 and cost of books

Winter 2020

LEC Section: 01   W 1:00 pm - 3:50 pm R 10:00 am - 12:50 pm   James F Clark

**ECON 21 (W) Fieldwork in International Development**

This course involves an internship, volunteer work, or a research project in a developing economy and an academic analysis of the relevant development issues. The instructors will work with interested students to help arrange a placement and to help secure funding through Williams Financial Aid or other sources. Such arrangements must be made well in advance of Winter Study. Spanish speakers are especially encouraged to apply as there will likely be a few fieldwork possibilities in coffee-growing areas of Latin America. Students will read relevant background articles distributed at the end of fall term and must agree to keep a journal, maintain contact with the instructors, and write a final paper on development issues raised by their specific internship. A group meeting of all students will occur after Winter Study to reflect on individual experiences. Students are also encouraged to attend development talks at the Center for Development Economics throughout the academic year. Requirements: 90 hours of

ECON 22  (W)  Volunteer Income Tax Assistance
Cross-listings:  POEC 22  ECON 22

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons
Requirements/Evaluation:  10-page paper; complete IRS certification to assist in tax preparation; volunteer work
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: written statement of interest
Grading: pass/fail only
Materials/Lab Fee: $10

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 23  (W)  Investing

ECON 23 is designed to provide students with a window into the world of endowment and investment management and is taught by members of the Williams College Investment Office. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, fixed income, and impact investing. Students will gain practical skills in excel and will have the opportunity to learn from experienced investment professionals through guest lectures. Through presentations, discussions, readings, and project work, students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored, from the perspective of an endowment. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete
an introductory excel course. The course is open to freshmen, sophomores, and juniors. To apply, please send an email with your resume and a short personal statement discussing why you are interested in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019. Adjunct Instructor Bio: Abigail Wattley serves as a Managing Director in the Williams College Investment Office where she oversees investments in hedge funds and credit. Ms. Wattley holds a B.A. from Williams College and an MBA from Harvard Business School.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** mail your resume and a short personal statement discussing your interest in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019; if overenrolled: phone interviews

**Grading:** pass/fail only

**Materials/Lab Fee:** approximately $40 for books

**Attributes:** EXPE Experiential Education Courses

Winter 2020

LEC Section: 01  TWR 10:00 am - 11:50 am  Abigail G. Wattley

**ECON 24 (W) Economics, Geography and Appreciation of Wine**

This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.

**Requirements/Evaluation:** final project or presentation and a blind tasting exam

**Prerequisites:** none, but students must be 21 years old on or before the first day of class

**Enrollment Limit:** 10

**Enrollment Preferences:** mix of academic record and diversity of backgrounds and interests; students are invited to email the instructor with a brief description of background and interests, but are not required to do so

**Grading:** pass/fail only

**Materials/Lab Fee:** $300

Winter 2020

**ECON 28 (W) Solution Design and Product Management**

**Cross-listings:** CSCI 28  ECON 28

**Primary Cross-listing**

Google Glass, Blackberry Storm, and the initial Obamacare Website represent just a few of the many failures that litter the IT project graveyard: 40 to 60 percent of large technology projects fail. All too often, the cause has little to do with the quality of technical engineering. More often, companies choose the wrong problem to solve or the wrong way to solve it. Google failed to account for the Google Glass price tag and privacy concerns. Blackberry failed to fully appreciate the touchscreen revolution. The Obamacare website failed to address management issues. The underlying conflict is that engineers and IT teams like to be told what to build, but customers often do not know what they want or how to express it. Identifying the right problem, designing the right solution, communicating the correct specifications to engineers, and delivering the right product to primary stakeholders are all difficult challenges crucial for successful product development. This course will explore various frameworks that product managers use to address these challenges. In doing so, we will model interactions between market forces, corporate directives, engineering challenges, and user experiences to interrogate the resilience of our ideas. We will also analyze and critique methodologies presented in readings by technology management prophets Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Throughout the course, students will work in small teams
to develop their own product management toolkit and deploy it towards solving a technology problem of each team’s own choosing. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it
Grading: pass/fail only
Materials/Lab Fee: $10 and approximately $30 for books

ECON 30 (W) Honors Project: Economics
The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. They should register for this WSP as their first choice.
Class Format: honors project
Grading: pass/fail only

Winter 2020
HON Section: 01 TBA Steven E. Nafziger

ECON 31 (W) Honors Thesis: Economics
To be taken by students participating in year-long thesis research Economics 493-494.
Class Format: thesis
Grading: pass/fail only

Winter 2020
HON Section: 01 TBA Steven E. Nafziger

ECON 52 (W) Micro-Simulation Modeling for Ex Ante Policy Analysis
Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions. During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and
students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis.

Enrollment Limit: 10

Enrollment Preferences: CDE Students only, not open to undergraduate students

Grading: no pass/fail option, no fifth course option

Winter 2020
LEC Section: 01 TBA Michael Samson

ECON 55 (W) Monetary Policy in Emerging and Developing Economies
This is an introduction to the empirical analysis of macro and monetary policy issues, building on the material covered in Econ 505/506 and 502/503. The goals are threefold: (1) to become familiar with some of the econometric tools used in macroeconomics, (2) to be able to understand and critique empirical macro research, and (3) to practice the writing and presentation skills used in economic research. The emphasis will be on practical issues, such as working with macro data, rather than on formal econometric methods.

Prerequisites: CDE Students only, not open to undergraduate students

Grading: no pass/fail option, no fifth course option

Winter 2020
LEC Section: 01 TBA Kenneth N. Kuttner

ECON 56 (W) Macroeconomics and Reality: Interpreting the Data
This winter study course complements the macroeconomic theory courses students took in the fall. It is designed to provide hands-on experience using macroeconomic data to assess the state of the economy. The course will augment students' skills relating to finding, downloading, displaying, graphing, and analyzing economic data. The course will focus on three aspects of the economy: the real sector, the government sector, and the external sector. Students will learn to measure and compute output gaps, expenditure contributions to growth, Taylor and inflation-targeting rules, cyclically-adjusted fiscal balances, and reserve adequacy. They will also learn how to assess the sustainability of public and external debt and identify the key economic risks. The main format of the course will be hands-on workshops, interspersed with some lectures and readings. A short research project, including a presentation to the class.

Requirements/Evaluation: a short research project, including a presentation to the class

Prerequisites: CDE Students only, not open to undergraduate students

Grading: no pass/fail option, no fifth course option

Winter 2020
LEC Section: 01 TBA Hali J. Edison

ECON 99 (W) Independent Study: Economics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2020
IND Section: 01 TBA Lara D. Shore-Sheppard
ENGL 11 (W) Black Arts Multiculturalism
The Black Arts "neo-hoodoo" wordsmith Ishmael Reed is credited (especially by himself) as having coined the term "multiculturalism." This WSP course will examine how writers of the Black Arts Movement explicitly used and explored "multiculturalism" in their work, not just as a concept of ethnicity but also as a deliberate incorporation of various aesthetic traditions and forms into their own work. A poem may contain or enact jazz. A theatrical scene may morph into a cartoon or a blues performance. We will examine how writers used this process and what they said about it. The class will read works by writers such as Reed, Amiri Baraka, and Ntozake Shange. We will also consider works and artists in other media who inspired these writers. Students will write 12-page final papers that compare two or more notable examples of "multiculturalism" in works by different artists or in contrasting works by the same writers.

Requirements/Evaluation: 10-page paper
Prerequisites: a 100-level English course
Enrollment Limit: 12
Enrollment Preferences: English majors and Africana Studies concentrators will receive first priority
Grading: pass/fail only
Materials/Lab Fee: cost of books

Winter 2020
LEC Section: 01 Cancelled

ENGL 12 (W) Spenser's "The Faerie Queene"
In this course, we will read the first book of Edmund Spenser's The Faerie Queene, a poem that seeks to tell the story of England as a Protestant nation, that seeks to instill virtue in the elite young men to whom it is addressed, and that is all the more compelling for the ways it fails to accomplish its stated goals. For example, Spenser hopes that his readers will grow in holiness by reading stories about this subject in Book I, but he writes in the mode of allegory, a kind of representation that excludes the possibility of moral transformation. We will spend a lot of time thinking about Spenser's aspirations--especially his hope that reading might make human beings better--and about how and why those aspirations falter, from almost the very beginning. If the only good this poem can do is to demonstrate its incapacity to accomplish a moral project, then does that mean that literature is itself implicated in the problems Spenser diagnoses in ourselves and in our world? We will discuss these issues in their historical context, but we will also think about how they resonate beyond sixteenth-century England, including in a contemporary moment. The course will be conducted as a reading group rather than as a formal seminar. We will spend a lot of time reading together aloud. Conversation will be relaxed, open-ended, surprising, and profound. Bring your old friends, and come to make new ones.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: based on brief interviews with the instructor
Grading: pass/fail only
Materials/Lab Fee: approximately $25 for books

Winter 2020
LEC Section: 01 MTWR 10:00 am - 11:50 am Emily Vasiliauskas

ENGL 13 (W) Talking With Strangers
This is a workshop in making short audio documentaries. Students will learn basic interview, audio recording, and editing techniques. Our focus will be in learning how to identify and capture some of the manifold stories circulating invisibly around us, through the process of interviewing strangers about their lives. Course requirements include five hours of class meetings, two or three technical workshops, and five hours of outside listening and reading per week. Investigating stories, interviewing subjects, and editing stories will also require ten to twelve hours weekly. Students will be required to participate in a final listening session in which we will share finished projects.

Requirements/Evaluation: students will create three short audio pieces
Prerequisites: none

In this class we'll read and discuss in depth the literary and imaginative richness of J. R. R. Tolkien's beloved fantasy novels The Hobbit and The Lord of the Rings, as well as the aspects of his biography and the scholarly works he wrote while an Oxford professor that most illuminate his fantastical writings: "On Fairy-Stories," "Beowulf: The Monsters and the Critics," and "Chaucer as a Philologist." By combining the fantastical and the academic in Tolkien, we'll get a better view of his imagined fortresses, castles, strongholds, of his elves, dragons and shires, as well as a better view of "the city of dreaming spires," his beloved Oxford nestled in the green hills of its own Oxfordshire. Students are asked to participate in all class discussions, and, at the end of the class, students will be asked to submit a ten-page paper. Class will meet four times a week (Monday, Tuesday, Wednesday, and Thursday) for one hour and fifteen minutes each session, and to prepare for each class you will be asked to read about fifty pages.  Adjunct Instructor Bio: Ryan Riley earned a master's degrees in literature from both Oxford and Yale, and a bachelor's in literature from Harvard, where he started a literary discussion and writing group inspired by Tolkien's Inklings.

Requirements/Evaluation: 10-page paper
Prerequisites: none; if student has already read some or all of Tolkien's writings or seen the films, no need to worry, as there will still be much to learn about his imaginative world
Enrollment Limit: 30
Enrollment Preferences: preference will be given to students who write the instructor a short email explaining their interest in the class
Grading: pass/fail only
Materials/Lab Fee: approximately $36 for books

Winter 2020
LEC Section: 01 MTWR 10:00 am - 11:50 am Ryan M. Riley

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 17 ENGL 17
ENGL 18  (W)  Can I Ask You Something?

Cross-listings:  ARTS 18  ENGL 18

Primary Cross-listing

"Can I Ask You Something?" takes students on an exploration of the ways personal narrative can become fuel for making art. For their project, each student will begin by interviewing a meaningful person in their lives (this can be a family member, a mentor, a friend, or even someone you have never met and have been dying to talk to!) and recording the interview in video or audio form. The interviews will revolve around questions which are personally meaningful and urgent to each student, for example, but not limited to: identity and its relationship to the body; the politics of everyday life, family dynamics and the way they affect one's identity and worldview. These recorded interviews will then become the fuel for artworks ranging in media from video, performance and dance to sculpture, photography, drawing, and audio collage. Each student's trajectory will be completely unique and informed by their own curiosity, the art-making techniques they wish to learn, and the topics explored in their interviews. In addition, we will learn about contemporary artists who have used interviews and personal narratives as the inspiration and jumping-off point for their work.  

Adjunct Instructor Bio: Gabriela Vainsencher is a Brooklyn-based visual artist who makes videos, site-specific installations, drawings, and sculptures. Vainsencher was Williams College's Levitt fellow in 2009, and since then she has taught a winter study class in 2012-2018. She is also a curator and an art critic. Vainsencher's recent exhibitions include a solo exhibition at A.I.R. Gallery in New York and a two-person show at the MuMA museum in Le Havre, France. She is also a Bronx Museum AIM Fellow for 2019-20.

Requirements/Evaluation:  final project or presentation

Prerequisites:  none

Enrollment Limit:  12

Enrollment Preferences:  preference will be given to students who write the instructor about why they are interested in the class

Grading:  pass/fail only

Materials/Lab Fee:  $40

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 18  ENGL 18

ENGL 19  (W)  The Personal is Political: A Nonfiction Writing Workshop

Since St. Augustine's Confessions, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual...reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a nonfiction project-memoir, personal essay, or a hybrid form--the final draft of which will determine half of your grade. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy significantly more time outside of the classroom-roughly twenty hours a week-during which you'll be engaged in the writing process and reading for class. Adjunct Instructor Bio: Julia McKenzie Munemo earned a master's degree in education from Harvard and an MFA in creative nonfiction from the Stonecoast Program, and worked in educational publishing for the decades in between. She is thrilled to point out that [The Book Keeper: A Memoir of Race, Love, and Legacy]--her own political memoir--will come out on January 14, 2020, right in the middle of winter study.

Requirements/Evaluation:  10-page paper

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  at the discretion of the instructor
ENGL 20  (W)  Humor Writing
Cross-listings: ENGL 20  MATH 20

Secondary Cross-listing
What is humor? The dichotomy inherent in the pursuit of comedic intent while confronting the transient nature of adversity can ratchet up the devolving psyche's penchant for explication to a catastrophic threshold, thwarting the existential impulse and pushing the natural proclivity for causative norms beyond the possibility of pre-situational adaptation. Do you know what that means? If so, this is not the course for you. No, we will write funny stuff, day in and day out. Or at the very least, we will think it's funny. Stories, essays, plays, fiction, nonfiction, we'll try a little of each. And we'll read some humor, too. Is laughter the body's attempt to eject excess phlegm? Why did Plato write dialogues instead of monologues? Who backed into my car in the Sawyer parking lot on the afternoon of March 2, 2019? These are just a few of the questions we will not explore in this course. No, we won't have time because we will be busy writing. (But if you know the answer to the third question, there's a $10 reward.) Plan to meet 6 hours a week, and to spend at least 20 hours a week on the course. No slackers need apply. Produce or become produce. We will put on a reading/performance at the end of winter study.

Requirements/Evaluation: at least 10 pages of writing and a final performance
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: based on writing samples
Grading: pass/fail only

Materials/Lab Fee: approximately $50 for books

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 20  MATH 20

ENGL 25  (W)  Journalism Today

This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace.  Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. He graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 10

Enrollment Preferences: priority will be given to seniors and juniors, with a preference for students with a demonstrated interest in journalism (as expressed in a statement of interest, if needed)
ENGL 26 (W) Reading Moby-Dick on a Whaler

If you've never read *Moby-Dick*, you might still think that's a heroic adventure story about humanity's struggle against the sea—the sort of book, in other words, that we give young readers, a cracking yarn, like *Treasure Island* only much longer. You might wonder, then, why so many people think it's the greatest novel ever written. You might be all the more puzzled to learn that no-one liked *Moby-Dick* when it was first published. Almost nobody read it. Herman Melville died thinking the book had been a total failure. *Moby-Dick* is peculiar, to be sure: an adventure story without much adventure nor even much story, a novel that doesn't read like a novel—a funny, joking, frightened, philosophical, and extravagant kind of book, a book that pushes readers to figure out their most fundamental attitudes towards the planet. In this class, we will read *Moby-Dick* and only *Moby-Dick*, and we will do so while living in a nineteenth-century whaling port, at Williams-Mystic, the College's coastal and ocean studies campus in Mystic, CT. Students will discuss *Moby-Dick* in the morning and learn nineteenth-century maritime skills in the afternoon: blacksmithing, carving, chantey singing, boat building, letterpress printing, sailmaking, etc. They will have extensive access to nineteenth-century tall ships throughout.

Requirements/Evaluation: 10-page paper

ENGL 41 (W) Intensive Expository Writing Workshop
This course allows students who need to make up a deficiency to do so over January term. The course totals the same number of class hours as a full semester plus a winter study, which is a lot—three hours a day, five days a week over four weeks. I also will require six or so writing assignments, with mandatory revisions. This is an English class, which means we will also be reading a lot of short stories. Some, but not all, of the assignments will consist of literary interpretations or analysis. The stories we read will be science-fiction stories, which tend to involve the same technical problems as expository essays: they include an unusual burden of exposition, and an explicit or implied thesis, often one of each. Because of this, they will also provide structural models for us, under the guiding principle that your essays can benefit from learning basic storytelling techniques: how to hook the reader, how to build suspense, how to handle exposition, how to provide a satisfying conclusion— in short, how to make your writing interesting.

**Prerequisites:** permission of a dean

**Enrollment Preferences:** students who need to make up a deficiency

**Grading:** pass/fail only

**Unit Notes:** This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 102 and ENGL 41.

**LEC Section:** 01  M-F 10:00 am - 1:00 pm  Paul C. Park

---

**ENGL 42 (W) Designer Genes Intensive**

In his book *High Noon: 20 Global Problems, 20 Years to Solve Them*, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.'" Collins and his associates couldn’t have picked a more resonant text from which to quote than Shakespeare’s play, *The Tempest*, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with—or exploit—the revolution in contemporary genetics. These texts—many of which also provide a model of exceptional writing—will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.

**Prerequisites:** permission of a dean

**Enrollment Preferences:** students who need to make up a deficiency

**Grading:** pass/fail only

**Unit Notes:** This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.

Winter 2020
SEM Section: 01  M-F 10:00 am - 1:00 pm  Paul C. Park

ENGL 103 (W) Designer Genes Intensive (WS)
In his book High Noon: 20 Global Problems, 20 Years to Solve Them, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.' " Collins and his associates couldn't have picked a more resonant text from which to quote than Shakespeare's play, The Tempest, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics. These texts--many of which also provide a model of exceptional writing--will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.

Prerequisites: permission of a dean
Enrollment Preferences: students who need to make up a deficiency
Grading: no pass/fail option, no fifth course option
Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.
Distributions: (D1) (WS)
Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Winter 2020
LEC Section: 01  M-F 10:00 am - 12:50 pm  Bethany Hicok

ENVI 12 (W) Geology of the National Parks
Cross-listings: ENVI 12 GEOS 12
Secondary Cross-listing
A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text PARKS AND PLATES and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation: final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately $150 for books

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 12 GEOS 12

Winter 2020
LEC Section: 01 TBA Cancelled

Cross-listings: ENVI 13 JLST 13

Secondary Cross-listing

Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law's early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term "law" includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term "literature" includes not just the written word (the first book we look at is "The Lorax" by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues. Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

Requirements/Evaluation: five single-spaced, 1-page papers called "clerk's notes," class performance, including a team approach to the Pebble
ENVI 15 (W) Bridges over Troubled Waters: Environmental and Public Health Advocacy for Safe Drinking Water

Go behind the headlines to learn about the issues and advocates involved in recent drinking water crises, including lead in Flint, Michigan, Pittsburgh, Pennsylvania, and Newark, New Jersey; chemicals in Hoosick Falls, New York; and crumbling infrastructure in Puerto Rico. This course will introduce students to basic drinking water science, public health data, laws and regulations, types of lawsuits, and advocacy tools involved in today’s most pressing drinking water threats. We will discuss issues such as environmental justice, citizen science, corporate responsibility, grassroots organizing, and the role of government and law in addressing public health crises. The course is geared towards interested water consumers and students interested in pursuing careers in environmental or public health advocacy alike. Students will be assigned brief readings drawn from journal and popular news articles and excerpts from nonfiction books, and to view a couple films (either during evening group screenings or independently). In conjunction with this course, and in addition to attending hour-long Friday seminar discussions, students will be expected to attend Friday Log Lunches during Winter Study, which will feature drinking water advocates. Evaluation will be based on class participation and a short (3-5 page) paper and (5-10 minute) presentation on a topic of students’ choice involving a drinking water threat or community that is experiencing or has confronted a drinking water threat. Adjunct Instructor Bio: Joya Sonnenfeldt ’10 was Williams’ first Environmental Policy major. She also holds a law degree and a masters in environmental management from Yale University. She has spent the majority of her career on the litigation team of the Natural Resources Defense Council, largely working to secure safe drinking water. Most recently, she clerked for the Honorable Patty Seawright on the United States Court of Appeals for the Third Circuit.

ENVI 16 (W) Sensing Place

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how those histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a “sense” of ownership and domination? Is something more symbiotic possible? To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers, and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and
active participation in class discussions will also be required. We will typically meet three times a week for three-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: more senior students will be given priority

Grading: pass/fail only

Materials/Lab Fee: $50

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 17 (W) Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

Cross-listings: ANTH 16 ENVI 17

Secondary Cross-listing

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to "care" for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students' understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: seniority; students may be asked to send the instructor and email explaining why they are interested in the course

Grading: pass/fail only

Materials/Lab Fee: approximately $80 for books

ANTH 16 ENVI 17

Winter 2020
ENVI 25 (W) Tropical Marine Conservation

Cross-listings: BIOL 25  ENVI 25

Secondary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor

Enrollment Limit: 8

Enrollment Preferences: preference will be given to juniors and seniors

Grading: pass/fail only

GERM 11 (W) Looking at Contemporary Documentary Photography

Cross-listings: ARTH 11  GERM 11  COMP 11

Primary Cross-listing

This course explores the evolution of modern documentary photography. We will start with a look back to the work of Lewis Hine, August Sander,
Dorothea Lange, Walker Evan and the Magnum Agency photographers. We will then jump to mid 20th century work of Robert Frank’s *The Americans*, and how Frank’s singular vision deeply shaped the next generation of photographers working the American streets and landscape. Diane Arbus, Vivian Maier, Bruce Davidson, Lee Freidlander, William Klein, Danny Lyon, Gary Winogrand are some of the photographers whose work we will get to know well. Discussions will include the new wave of independent and Magnum photojournalists (Phillip Jones Griffiths, Josef Koudleka, Susan Meiselas, Gilles Peress, James Nachtwey, Alex Webb, Ron Haviv and Tyler Hicks) and the wars from Vietnam to Bosnia to Iraq and Syria they cover as well as the personal visions they explore. Insight into the diverse currents of documentary photography will be covered through the work of Bill Burke, Larry Clark, Larry Fink, Nan Goldin, Emmet Gowin, Sally Mann, Mary Ellen Mark, Nicholas Nixon, Richard Misrach, Joel Sternfeld, Birney Imes, Regan Louie, Edward Burtynsky, Laura Letinsky and Simon Norfolk. Our last classes will be an exploration of social media and the proliferation of diverse voices emerging in documentary photography. The class will meet three mornings a week for two hours. Slide presentations will occupy half of the first meetings and give way to discussion of issues in documentary photography. Each student will be required to make a brief presentation to the class on a documentary topic of their choice. A final paper expanding on this documentary topic will be due at the end of the course. Students will be evaluated on their classroom presentation, general participation and their written work. A field trip to New York will let us see first hand works from the collections at MoMA, etc. Adjunct Instructor Bio: Kevin Bubriski’s fine art photographs are in the permanent collections of the Museum of Modern Art, Metropolitan Museum of Art, San Francisco Museum of Modern Art, and Bibliotheque Nationale, Paris. Kevin has received Guggenheim, Fulbright and NEA fellowships. Bubriski has published eleven books of photography including *Nepal 1975-2011* published by Peabody Museum Press of Harvard University in 2014 and *Legacy in Stone: Syria Before War* in 2019 with powerhouse Books in New York.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** at the discretion of the instructor

HIST 11  (W) Excavating the Purple Bubble
Cross-listings: HIST 11  SOC 11

Secondary Cross-listing
People often describe Williams College as an “intense” place—a “purple bubble” with its own peculiar micro-culture. This bubble can be stressful, exhausting, and work-obsessed, but also bursting with creative energy and a determination to change the world, not to mention creating experiences and relationships that become deeply nostalgic and lead to a lasting connection. How have these characteristic structures of feeling been built over time? In this course, we will attempt to build a picture of how the emotional cultures of Williams have evolved by excavating their histories. From the
powerful emotions triggered by transitional moments in the College's history, such as feelings of inclusion and exclusion by women and people of color, to the everyday emotions of friendship, romance, and work stress, students will analyze materials from the college archives, the archive of the Record, and other sources of institutional memory to uncover the social history of emotions at Williams. Depending on enrollments, students will divide into research clusters focusing on particular topics, which might include: stress and work-obsession, turning points and change, wonder and discovery, nostalgias, staff morale, mental illness and wellness discourse, among other possible topics. Students will spend time in class discussing readings and curating a small collection of archival materials to be presented at the end of the course. Outside class, students will spend time in the archives. As a theoretical and methodological guide, we will draw primarily on scholarship from the sociology and history of emotion, including Norbert Elias, Cas Wouters, Raymond Williams, William Reddy, and Barbara Rosenswein.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: anthropology, sociology and history majors, followed by students' expression of interest

Grading: pass/fail only

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 11 SOC 11

Winter 2020

LEC Section: 01 Cancelled

HIST 12 (W) The East is Red? Socialism in Asia

Cross-listings: PSCI 11 ASST 12 HIST 12

Secondary Cross-listing

This course provides a historical and political overview of socialism in Asia from the 1910s to the present. It examines the spread and influence of Marxism in Asia, the policies of socialist states and movements in relation to decolonization, the Cold War, and the Sino-Soviet split, and the marriage between market reforms and ostensibly socialist governments in the present day. In addition to looking at the socialist governments of China, North Korea, Vietnam, and Cambodia, we will examine cases of "unsuccessful" socialist parties in Japan, Indonesia, and India. Class materials include memoirs of survival by non-state actors, the writings of socialist leaders (Mao Zedong, Ho Chi Minh, M.N. Roy, etc), and cultural constructions such as revolutionary theatre, songs, and contemporary films. Questions that will be addressed include: Why did Marxism, a Eurocentric theory of revolution intended for advanced capitalist societies, find such resonance in Asia? How was Marxism adapted for an Asian environment? Twenty-five years after the fall of communism, why have Asian socialist states remained in power? And in the scales of history, how should we judge the effects of socialism in Asia? Evaluation will be based on two in-class presentations and a final research paper. Attendance and participation will also be taken into account. We will meet three times a week for two-hour sessions. Adjunct Bio: John Knight has a Ph.D in East Asian History with a focus on Modern China. He graduated in 2017 from The Ohio State University. He has previously taught East Asian and World History at the Rhode Island School of Design, Ohio State University, Capital University, and Seton Hall.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference will be given to students majoring in Asian Studies, History, or Political Science

Grading: pass/fail only

Materials/Lab Fee: $15

HIST 13 (W) Eyewitness to the Civil Rights Movement: Mississippi 1964-65
During sixteen months in 1964-'65, the instructor worked as a civil rights organizer in rural Mississippi with the Student Nonviolent Coordinating Committee (SNCC). He witnessed and aided in the heroic efforts by black citizens to dismantle the pervasive structure of Jim Crow that had oppressed them for generations. He met relatively uneducated people with the stature of giants. What he encountered was an apartheid America—a vicious police state reinforced by government and vigilante violence—beyond the understanding of most Americans and certainly beyond the imagination of young people today. The course will explore this transformative moment in recent American history through documentary film, popular music of the time and discussion. Topics include nonviolence and armed self-defense, the role of the black church, women and whites, Malcolm X and Black Power and the third party politics of the Mississippi Freedom Democratic Party. Students will read and discuss three books. Evaluation will be based on class participation and a final project in any media. It is the intent of the instructor to convey the immediacy that only first person experience can invoke.  

Adjunct Instructor Bio: Chris Williams worked as the college architect at Williams for many years. Now retired, he lives on the back roads of Vermont with his wife and hound dog.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: random drawing

LEC Section: 01  Cancelled

HIST 14  (W) Loyalty and Righteousness: Female Knight Errants in the Chinese Tradition

Cross-listings:  CHIN 14  HIST 14

Secondary Cross-listing
The aura of the Chinese knight-errant's alternative universe (jianghu, lit. rivers and lakes) has never waned thanks to the thriving literature of Chinese martial arts. Recognized as the oldest genre of Chinese popular fiction still being written today, the martial arts novel constructs a fascinating human sociality where chivalry and altruism govern, stateless subjects wander, and heroic grace unfolds. This course will examine the literary, artistic, and social imagination of this jianghu in selected modern martial arts novels written by Jin Yong (aka Louis Cha Leung-yung) and Gu Long. It also compares Jin Yong's oeuvre, endorsed by die-hard fans, with the breathtaking yet controversial C(H)ollywood martial arts extravaganzas that have been released in the current millennium. Students will inquire into the themes of righteousness and law, self and state, martial arts and medicine, body and gender, and the martial arts world and postcolonial history; as well as traditional philosophical concepts of yin and yang, and "between the people" (minjian) and "all under heaven" (tianxia). Finally, we will explore the genre's aestheticism via literary and visual constructions in the cultural text.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: students will be asked to write an essay to explain their interest and rationale for this course
Grading: pass/fail only
Materials/Lab Fee: $35 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 15  (W) Contemporary Indian Society

Cross-listings:  ASST 15  HIST 15

Primary Cross-listing
With a population of nearly 1.4 billion, India is one of the fastest growing regions of Asia and the world. It is also the largest and most diverse country
in South Asia. What are some of the most important social and political concerns in India today? How do Indians think of questions of culture and identity in a globally connected world? What are the interests and aspirations of India’s youth? How are forces of nationalism and divisive politics defining Indian society today? In this course, we will explore these questions through the most recent non-fiction books on Indian history and society. We will also watch a number of documentaries that address some of these questions. The objective of the course is to engage students in lively discussion and debates about these issues that shape India today.

**Requirements/Evaluation:** participation in discussions, student-led discussions in addition to a 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** short written application

**Grading:** pass/fail only

**Materials/Lab Fee:** cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 15  HIST 15

LEC Section: 01   Cancelled

**HIST 18 (W) Kurt Vonnegut in History**

Kurt Vonnegut, an Indiana native and former General Electric employee, rose to international prominence during the second half of the twentieth century as a cult novelist, anti-war activist, socialist, and humanist. Readers from seemingly disparate parts of a divided world--from prairie towns in the American midwest to university halls in the Soviet Union to smoky cafés in de Gaulle's Paris--developed a voracious appetite for cult classics like *Slaughterhouse-Five*, *Cat's Cradle*, and *Breakfast of Champions*. What explains Vonnegut's appeal both past and present? In what ways did his views on free speech, technology, war, nuclear weapons, gender, human rights, labor, the environment, and the flaws of humankind reflect or subvert the norms of the postwar and cold war worlds. This course explores Kurt Vonnegut's place in the postwar world as a novelist, thinker, and celebrity. In addition to reading works from the Kurt Vonnegut canon, we will read newspaper articles and literary criticism, watch a film and a handful of interview clips, to examine both the world that Vonnegut created and the world that created him.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors and juniors have priority

**Grading:** pass/fail only

**Materials/Lab Fee:** $10 and approximately $50 for books

**HIST 19 (W) Special Collections: Curating Rare Books and Manuscripts for Our Times**

What makes a library’s books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing? This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable -- and not just in terms of their cost. We'll consider how historical events are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and make a day trip to visit a bookseller and curators at a peer institution. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections. 

Adjunct Instructor Bio: Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography. Adjunct Instructor Bio: Lisa Conathan is Head of Special Collections at Williams College, overseeing the Chapin Library of Rare Books and the College Archives. She holds a BA in Linguistics from Dartmouth College, a PhD in Linguistics from the University of California, Berkeley, and a Master of Library Science from the University of Maryland.
**Requirements/Evaluation:** final project or presentation

**HIST 20 (W) France under the Nazis 1940-45: Democracy Abandoned, Antisemitism Unleashed**

**Cross-listings:** ASTR 20 HIST 20  
**Secondary Cross-listing**

France was Europe's cultural avatar in the 17th century, father of the Rights of Man in the 18th century, Art Capital of the World in the 19th Century, and essential in the 20th to victory in World War I. How did it find itself subservient to the dictates of a foreign ruling power in 1940 and helpless to prevent the usurpation of its democracy? How did France fail to protect the very rights of man that it had long-struggled to establish and achieve? In this course we will examine what happened politically and socially during the Vichy regime of 1940 to 1945. And when Germany's hegemony was upended in 1945 with the victory of the Allies in World War II, how did the French explain to those allies, and to themselves, how France had achieved its salvation? To explain all this, we will examine break-through historical studies from the 1970s, novels written at the time of the occupation and popular today, films of the era and beyond, as well as examples of analyses of French and foreign thinkers following the war and continuing into this century. Classes will meet twice a week for 2-3 hours. Students will be responsible for daily reading of secondary sources in the reading packets. They will view on Glow films from the Vichy era and beyond and be asked to analyze and share their impressions. Each student will be assigned a novel set in Vichy times; they will prepare a concise report for the group and 5-page paper explaining how the novel confirmed or countered their impressions of the era. Adjunct Instructor Bio: Ms. Bowden graduated magna cum laude from Vassar College, studying European history there, and subsequently at Columbia University. She has taught history at independent schools in New York and in the Queen's College graduate Education division.

**Requirements/Evaluation:** active class participation re readings and film topics, 5-page paper assessing assigned novel, thoughtful synopsis for fellow students  
**Prerequisites:** none, though knowledge of French enriches the experience  
**Enrollment Limit:** 12  
**Grading:** pass/fail only  
**Materials/Lab Fee:** $36 plus cost of books

**HIST 30 (W) Workshop in Independent Research**

This course is designed for junior majors and sophomores who are considering pursuing a senior thesis in History. It can either provide students greater experience in independent research or allow for an in-depth exploration of a specific topic under consideration for the thesis. The course will focus on key methods of historical research, such as defining a topic, familiarizing oneself with historiography, and finding and using primary sources. Students may pursue any topic, and assignments may be modified to fit students' particular needs and interests. The majority of class time will consist of individual meetings with the professor as well as consultations with librarians and other experts in your field. Students are expected to devote considerable time outside of class to independent research. The final assignment will be a 10-page paper, which can either be a detailed prospectus for a senior thesis or a research paper.

**Class Format:** independent research
**Requirements/Evaluation:** 10-page paper; weekly assignment  

**Prerequisites:** none  

**Enrollment Limit:** 10  

**Enrollment Preferences:** instructor will send students questions over email about their research plans; students with evidence of more formulated plans will receive preference  

**Grading:** pass/fail only

Winter 2020  
IND Section: 01    TBA    Jason Josephson Storm
The Restless Collection, led by San Francisco-based independent curator Jordan Stein with curatorial staff from the Williams College Museum of Art (WCMA), investigates the WCMA permanent collection and other regional art collections as resources for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, agitation, and power, students will conduct both a broad survey of the WCMA collection and in-depth case studies of several artworks. The course’s final project includes generating a speculative exhibition proposal against the backdrop of the current political moment. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? What is an exhibition and who governs the terms of its engagement? How has the form been activated not only by curators, but also by artists as a poem, proposal, or declaration? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries by employing "the exhibition" as a vehicle for ideas. The course further offers the chance to collaborate with WMCA and WC staff, including representatives from various departments, including archives, curatorial, collections, engagement, digital media, installation/preparation, and more. Potential site visits include Hancock Shaker Village, Bennington Museum, Williamstown Historical Society, and other special meetings. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition-making, over-looked and under-sung histories of art, and linking the past and present through the varied presentation of critical objects, non-objects, and ideas. He has organized exhibitions in a variety of institutions and scales, including the Berkeley Art Museum and Pacific Film Archive, Artists Space (New York), Matthew Marks Gallery (New York), the Renaissance Society (Chicago), The Glass House (New Canaan, CT), and San Francisco City Hall. He is a co-founder of the interdisciplinary collaborative group Will Brown, which realized over three dozen exhibitions and programs in their Mission District storefront from 2012-2015 before working parasitically with other organizations. He founded Cushion Works, a just-in-time gallery on the second floor of an active cushion-making workshop, in 2017. With Will Brown, he is the author of Bruce Conner: Brass Handles, and with Jason Fulford is the editor of Where to Score, a collection of hippie-era classified advertisements. Please see http://jordanstein.com/ for more information.

Class Format: workshop/seminar
Requirements/Evaluation: exhibition proposal
Prerequisites: keen interest in museums, art collections and culture
Enrollment Limit: 8
Enrollment Preferences: random selection
Grading: pass/fail only

Cross-listings: ENVI 13 JLST 13

Primary Cross-listing
Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law’s early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term “law” includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term “literature” includes not just the written word (the first book we look at is “The Lorax” by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect
the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues.  

Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

Requirements/Evaluation: five single-spaced, 1-page papers called "clerk's notes," class performance, including a team approach to the Pebble Mine, Alaska, permitting controversy

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: seniors first, then juniors, etc

JLST 15 (W) The Work of the Supreme Court: A Simulation

Cross-listings: CHEM 15 JLST 15

Primary Cross-listing

The objective of this course is to provide students with an understanding of the personal, theoretical, and institutional characteristics that impact the decision making process of the nation's highest court. At the beginning of the course, the students will be provided with briefs, relevant decisions and other materials for a case currently pending before the court. Where possible, cases will be selected that address constitutional issues that also have a political and/or historical significance. Past examples include the constitutionality of provisions in the Affordable Care Act, rights of prisoners held in Guantanamo, the extent of First Amendment rights of students, and the applicability of the State Secrets doctrine to the country's extraordinary rendition program. Four students (two on each side) will be assigned to prepare and present oral arguments to the "Court", which will consist of the other eight students, each playing the role of a Supreme Court Justice. An instructor will act as the Chief Justice to coordinate the student Justices and keep them on focus. After the oral argument, the "Court" will confer and prepare majority and minority opinions, which will be announced in "open court" at the conclusion of the term.  Adjunct Instructor Bio: Robert Groban is a former Assistant U.S. Attorney, SDNY, and current partner in Berry Appleman & Leiden LLP.  Adjunct Instructor Bio: Thomas Sweeney retired former litigator with Hogan & Hartson and Hogan Lovells.

Requirements/Evaluation: short paper and final project or presentation; oral argument, or written court opinions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniority

Grading: pass/fail only

Winter 2020
LEC Section: 01    Cancelled
JLST 17 (W) State Constitutions, State Courts, and Individual Rights

Cross-listings: PSCI 17  JLST 17

Secondary Cross-listing

Most people are familiar with the idea that the federal constitution, as interpreted by the U.S. Supreme Court, can serve as an important (albeit controversial) tool for vindicating individual rights. Cases involving rights to same-sex marriage, abortion, and gun ownership are just a few recent examples of the U.S. Supreme Court and the federal constitution taking center stage in battles over individual rights. But there is another, equally important, source of individual rights that is sometimes overlooked and understudied: state constitutions. Each state has its own constitution, which may contain different rights and protections from those in the federal constitution, and its own courts, which interpret that constitution. In this class, we'll take a look at the role of state constitutions and courts in protecting individual rights and influencing federal constitutional interpretation. From assessing the constitutionality of compelled sterilization to protecting citizens from unreasonable searches and seizures, we'll examine the interplay between state and federal courts and constitutions. To do this, we'll read the book *51 Imperfect Solutions: States and the Making of American Constitutional Law* by Judge Jeffrey S. Sutton (class of 1983). As a final project, students will choose a legal issue, evaluate its chances of success under the federal constitution and their home state constitution (or state constitution of their choosing), develop a basic litigation strategy aimed at achieving their objectives, and present that evaluation and strategy to the class. Adjunct Instructor Bio: Erin Lagesen (class of 1991) is a judge on the Oregon Court of Appeals. At Williams, she double majored in Mathematics and English. Adjunct Instructor Bio: Susan Yorke (class of 2006) is an appellate attorney in San Francisco, and she also graduated from Williams with a double major in Mathematics and English.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

LATS 25 (W) Somos Sur: Mexico-Central American Borderlines and Visual Culture
Cross-listings: RLSP 25 LATS 25
Secondary Cross-listing

What are borderlines? How have they been created and how do they affect the lives of those who cross or are being crossed by these borders? Motivated by the attention that borders have drawn recently with the caravans of Central Americans traveling north, we propose a trip to Chiapas, Mexico to explore the realities of the communities, activists, and border entities. This trip will engage students with the visual response and the relationship with spaces created in these borderlands. The class will meet for an intensive week of class on-campus with readings and discussion followed by a 10–12 travel to Chiapas with Borderlinks. The Borderlinks pedagogical model is based on "dynamic educational experiences that connect divided communities, raise awareness about the impact of border and immigration policies, and inspire action for social transformation." Their leaders accompany the delegation at all times. Mellon Post-doctoral Fellow at Williams 2018 - 2020.

LEAD 12 (W) Principles of Effective Leadership
This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. Each student will be asked to host a guest at dinner or breakfast before we meet, to introduce him or her to the class, and to stimulate discussion. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 10-page final paper which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals.

Requirements/Evaluation: 10-page paper and an in-class presentation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Leadership Studies concentrators, preference to seniors and juniors
Grading: pass/fail only
Materials/Lab Fee: cost of books

Winter 2020

LEAD 14 (W) Mock Trial
Offered for the seventh time as a Winter Study Program, Mock Trial provides students with the opportunity for collaboration, teamwork to solve common problems, and critical analysis of facts and documents in the context of a legal dispute. Two teams are formed, and the teams work as units to review and analyze a fact pattern secured from the American Mock Trial Association. The "final exam" is the presentation of two trials with the teams switching sides for the two trials. The adjunct professors (both Williams graduates) are experienced trial attorneys. The class is limited to 16 students to form the two 8-member teams. The course has been well received as a Winter Study offering, and potential students are encouraged to review prior evaluations. As a Leadership Studies offering, this course allows students to work together to select a case strategy, determine what facts and documents will support the selected strategy, perform direct and cross examination of witnesses, and deliver opening statements and closing arguments. The course meets twice a week, usually on Mondays and Tuesdays for 3.5 hours each day.  Adjunct Instructor Bio: Mr. Olson graduated from Williams in 1971 and practiced civil litigation for 40 years with the same firm in Cincinnati, Ohio. In 2019 he relocated to Boston to be nearer his family but continues to practice law. The practice focuses on construction law and specifically suretyship. In 2019 he argued a suretyship case in the Federal Court of Appeals. He has taught the Mock Trial Winter Study Course in 6 prior years and has enjoyed the opportunity to work with his students.  Adjunct Instructor Bio: Steve Brown graduated from Williams in 1971. After graduating from Villanova Law School where he was Editor-in-Chief of the Law Review, Steve has been a litigator and trial lawyer for 40 years concentrating his practice in white-collar criminal defense and civil rights. He was a partner at Dechert LLP from 1991 to 2016, when he retired and became Civil Rights Counsel to the firm. He has spent much of his career doing pro bono work including representing Guantanamo Bay detainees and people and prisoners whose constitutional rights have been violated. Steve has represented or supervised young lawyers at Dechert in over 150 prisoner civil rights cases, including 40 trials in federal courts.
LEAD 16 (W) Speechwriting as Craft and Career

Cross-listings: PSCI 16 LEAD 16

Secondary Cross-listing

Whether your ideal is Reverend Martin Luther King, Jr., telling Americans "I have a dream" or Ronald Reagan ordering Mikhail Gorbachev to "tear down this wall!", speeches can change cultures or minds, move a nation or a single human heart. This writing-intensive course will introduce you to the history and importance of speechwriting and rhetoric, provide you with direct experience writing and delivering speeches, and introduce you to career possibilities in speechwriting and related fields. Our course materials, professional guests and class discussions will consider diverse rhetorical traditions within the U.S. and around the world. The modern profession of speechwriting involves much more than writing remarks for someone using a podium or teleprompter. It may include developing a TED Talk, producing a video, writing social media posts or ghostwriting op-eds and even memoirs (!). That's because speechwriters at their best are more than writers: They're trusted advisors on the art of persuasive communication, and of leadership more generally. Whether you want to develop your own public speaking skills or write for a politician, CEO, or cultural leader, this class will teach you about poetics, persuasion, and the pretty peculiar principles involved in writing words that another human being will be credited (or blamed) for-not to mention a sense of the career opportunities in politics, education, the arts and industry. The course will meet 3x/week for 2 hours at a time. Work outside class-including readings, film viewings, writing assignments and associated research, rehearsal of speeches, etc.-will require another 20 hours per week. During the course all students will be expected to write and deliver multiple speeches.

Adjunct Instructor Bio: Jim Reisch is Chief Communications Officer at Williams College.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: at the discretion of the instructor
Grading: pass/fail only
Materials/Lab Fee: approximately $40 for books

LEAD 19 (W) The Restless Collection

Cross-listings: INTR 19 LEAD 19 ARTS 19 ARTH 19

Secondary Cross-listing

The Restless Collection, led by San Francisco-based independent curator Jordan Stein with curatorial staff from the Williams College Museum of Art (WCMA), investigates the WCMA permanent collection and other regional art collections as resources for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, agitation, and power, students will conduct both a broad survey of the WCMA collection and in-depth case studies of several artworks. The course’s final project includes generating a speculative exhibition proposal against the backdrop of the current political moment. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? What is an exhibition and who governs the terms of its engagement? How has the form been activated not only by curators, but also by artists as a poem, proposal, or declaration? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries by employing “the exhibition” as a vehicle for ideas. The course further offers the chance to collaborate with WMCA and WC staff, including representatives from various departments, including archives, curatorial, collections, engagement, digital media, installation/preparation, and more. Potential site visits include Hancock Shaker Village, Bennington Museum, Williamstown Historical Society, and other special meetings. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition-making, over-looked and under-sung histories of art, and linking the past and present through the varied presentation of critical objects, non-objects, and ideas. He has organized exhibitions in a variety of institutions and scales, including the Berkeley Art Museum and Pacific Film Archive, Artists Space (New York), Matthew Marks Gallery (New York), the Renaissance Society (Chicago), The Glass House (New Canaan, CT), and San Francisco City Hall. He is a co-founder of the interdisciplinary collaborative group Will Brown, which realized over three dozen exhibitions and programs in their Mission District storefront from 2012-2015 before working parasitically with other organizations. He founded Cushion Works, a just-in-time gallery on the second floor of an active cushion-making workshop, in 2017. With Will Brown, he is the author of Bruce Conner: Brass Handles, and with Jason Fulford is the editor of Where to Score, a collection of hippie-era classified advertisements. Please see http://jordanstein.com/ for more information.

Class Format: workshop/seminar

Requirements/Evaluation: exhibition proposal

Prerequisites: keen interest in museums, art collections and culture

Enrollment Limit: 8

Enrollment Preferences: random selection

LEAD 20 (W) ”Real” World Problem Solving

Cross-listings: PSCI 20 LEAD 20

Secondary Cross-listing

This course will introduce you to tools and techniques to solve problems for impact not in the classroom, but in the White House Situation Room, the
We will focus on how to define and structure policy or strategy problems, and then identify and test hypotheses for impact. We will explore the necessity of using pragmatic "mental models" to inform our analyses and decision making. Along the way, we will explore cognitive biases, implementation challenges, and techniques to manage them. The best recommendations only come to life through compelling communication. We will build these skills, therefore, through "real" life exercises. These will include drafting talking points for a "principal" (e.g., the President, Secretary of State, a CEO, or a Governor), preparing a policy or strategy memo, and developing a compelling PowerPoint briefing for a senior executive audience. Case studies will provide the foundation for many class discussions. The class will be "tri-sector"—open to examples from the private, government, and nonprofit sectors. Source material will include: Graham Allison and Philip Zelikow, The Essence of Decision: Explaining the Cuban Missile Crisis (2nd edition); Richard Haass, The Bureaucratic Entrepreneur: How to be Effective in Any Unruly Organization; Richard Neustadt and Ernest May, Thinking in Time: The Uses of History for Decision Makers; Michael Lewis, The Undoing Project: A Friendship that Changed Our Minds; select podcasts and journal articles; and three films "Thirteen Days," "Moneyball," and "The Big Short." Assessment: class participation; final memo (5-8 pages) and class presentation on a real world issue. Adjunct Instructor Bio: Drew Erdmann '88 is Chief Operating Officer of the State of Missouri with responsibility for managing the ~50,000 employee, $28 billion enterprise. After receiving his PhD in American History, Drew's career included government service with the State Department, Defense Department in Iraq, and White House, and over a decade with the global consultancy McKinsey & Company where his experience spanned the retail, media, energy, aerospace & defense industries, and the public and nonprofit sectors.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: preference for juniors and sophomores; students will have to send brief memo explaining why they are interested in course, with their resume
Grading: pass/fail only
Materials/Lab Fee: $20 and cost of books

LEAD 21 (W) Wilderness Leadership and Outdoor Skills Development
This Winter Study course is for students who would like to participate in a nationally recognized outdoor skills program, in example NOLS (National Outdoor Leadership School) or Outward Bound program. The individual student would meet with the current Director of the Williams Outing Club to identify a program that best fits the student’s needs and meets the minimum criteria of at least a 14 day instructed program. The potential student would also meet to discuss the educational goals of learning about leadership and group dynamics in a wilderness setting.

Requirements/Evaluation: final project or presentation
Prerequisites: none; not open to first-year student
Enrollment Limit: none
Enrollment Preferences: none
Grading: pass/fail only
Materials/Lab Fee: varies, depending on the program

Winter 2020
LEC Section: 01 TBA Scott A. Lewis

LEAD 22 (W) Outdoor Emergency Care
Cross-listings: SPEC 22 LEAD 22

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in
outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon: 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development. 2. CPR for the Professional Rescuer. 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques. Specifically, the course teaches how to recognize and provide emergency medical care for: - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, sprains, etc.) - Shock, Respiratory, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory.

Adjunct Instructor Bio: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

Requirements/Evaluation: completion of daily homework; written and practical final exam
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: ski/snowboard proficiency; prior first aid experience
Grading: pass/fail only
Materials/Lab Fee: $180 and approximately $110 for books

MATH 11 (W) Narrative Structure Through Dungeons & Dragons

Dungeons & Dragons (5th edition) is a classic and ever-evolving tabletop role-playing game. One major component for the dungeon master is to develop and tell a story for the players to embark upon while simultaneously being willing to improvise based on player decisions. In this course, we will begin by learning the basics of the game and building a character. The students will then divide into groups and cycle through the role of dungeon master and player character to team build a narrative arc.

Requirements/Evaluation: DM execution and notes, player participation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Mathematics majors and seniority
Grading: pass/fail only
Materials/Lab Fee: $10 and cost of books

Winter 2020

MATH 12 (W) The Mathematics of Lego Bricks

This course is a modification of six previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell. Almost surely there will be a speed build challenge (college teams vs elementary school teams).

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: discretion of the instructor
Grading: pass/fail only
Materials/Lab Fee: $45

MATH 13 (W) Reality Real Estate

Cross-listings: MATH 13   SPEC 13
Primary Cross-listing

Is the reality of real estate the way it looks on TV? Learn about buying and selling, real estate investments, mortgages, renovation, construction, and design. Class will meet Monday, Tuesday, and Wednesday afternoons. Students will learn about each of the topics above, and have the opportunity to do a final project on a real estate topic of their choice, from architecture to designing their dream home to proposing a successful real estate investment to on-site construction work. Guest lecture(s) by experts in the field. The instructor Allison Pacelli is a licensed MA real estate agent, and co-owner of a design and renovation business that renovates investment properties as well as clients' homes.

Requirements/Evaluation: final project, equivalent to a 10-page paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: questionnaire

MATH 14 (W) Introductory Photography: People and Places

Cross-listings: SPEC 29 MATH 14

Primary Cross-listing

This is an introductory course in photography, both color and black & white photography, and using the digital camera. The main themes will be people and the landscape. No previous knowledge is assumed, but students are expected to have access to a 35 mm (or equivalent) digital camera, with manual override or aperture priority. The topics covered will include composition, exposure, camera use, direction and properties of light, and digital imaging. Students will develop their eye through the study of the work of well-known photographers and the critical analysis of their own work. We will discuss the work of contemporary photographers such as Mary Ellen Mark, Joel Meyerowitz, Constantine Manos, and Eugene Richards. Students will be expected to spend a considerable amount of time practicing their own photography outside of class. There will be three required local half-day field trips. Students will also be introduced to Photoshop and Lightroom, and will work on their own images with these programs. In 2010 Adjunct Instructor Bio: Mr. Washburne joined the stable of photographic artists who are represented by the Sun to Moon gallery in Dallas. Since then he has worked exclusively as a fine art photographer concentrating on landscapes, abstracts and street shooting. He also published travel stories alongside his photography in both D Magazine and The Robb Report.

Requirements/Evaluation: class participation, an in-class quiz and a final project

MATH 15 (W) Exploring the Primes: A Crash Course in Analytic Number Theory

This will be a crash course in analytic number theory. Given our time constraints, our goal will be to obtain a big-picture view of the field by understanding the outline of proofs of the most important results in the field. Among other topics we'll discuss the Riemann zeta function, the Prime
Number Theorem, the Riemann Hypothesis, Dirichlet's theorem on primes in arithmetic progressions, and Roth's theorem on arithmetic progressions. There will be no written problem sets, but students will be expected to present solutions to problems in class. Each student will also be expected to write up a class summary (in LaTeX) for one of our meetings.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** complex analysis or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** interview with instructor

**Grading:** pass/fail only

Winter 2020

LEC Section: 01  TWR 10:00 am - 11:50 am  Leo Goldmakher

**MATH 16 (W) Women and Minorities in Science**

This course will be centered on learning about the achievements of women and minorities who have made significant contributions to science and the scientific community. We will discuss both historical and modern challenges faced by women and under-represented minorities in the sciences. Students will conduct an independent research project on a scientist of their choosing and lead a discussion based on that individual. Additional reading for this course will include the book *Hidden Figures: The American Dream and the Untold Story of the Black Women Mathematicians Who Helped Win the Space Race*, which was made into the 2016 film *Hidden Figures*.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

Winter 2020

LEC Section: 01  TR 10:00 am - 12:50 pm  Julie C. Blackwood

**MATH 17 (W) Tournament Bridge**

We'll study, prepare, and play in as many bridge tournaments in the area as possible, coupled with analysis, reading, and writing. Tournament play followed by analysis and the writing up of lessons learned is an essential part of the study of bridge. At this level, it is much more than a "game": it is an intense intellectual and academic activity. Tournament time (including days, nights, and weekends) averaging about 12 hours per week, other class time about 6 hours per week, homework 4 hours per week. Text: Larry Cohen https://www.larryco.com/bridge-learning-center  Adjunct Instructor Bio: Frank Morgan is Atwell Professor of Mathematics, Emeritus, at Williams College and a Silver Life Master with the American Contract Bridge League.

**Requirements/Evaluation:** participation in competition and write-ups (totaling more than 10 pages)

**Prerequisites:** knowing how to play bridge

**Enrollment Limit:** 15

**Enrollment Preferences:** bridge playing knowledge and experience

**Grading:** pass/fail only

**Materials/Lab Fee:** $200

Winter 2020

LEC Section: 01  M-F 10:00 am - 11:50 am  Frank Morgan

**MATH 20 (W) Humor Writing**

**Cross-listings:** ENGL 20  MATH 20
What is humor? The dichotomy inherent in the pursuit of comedic intent while confronting the transient nature of adversity can ratchet up the devolving psyche’s penchant for explication to a catastrophic threshold, thwarting the existential impulse and pushing the natural proclivity for causative norms beyond the possibility of pre-situational adaptation. Do you know what that means? If so, this is not the course for you. No, we will write funny stuff, day in and day out. Or at the very least, we will think it's funny. Stories, essays, plays, fiction, nonfiction, we'll try a little of each. And we'll read some humor, too. Is laughter the body's attempt to eject excess phlegm? Why did Plato write dialogues instead of monologues? Who backed into my car in the Sawyer parking lot on the afternoon of March 2, 2019? These are just a few of the questions we will not explore in this course. No, we won't have time because we will be busy writing. (But if you know the answer to the third question, there's a $10 reward.) Plan to meet 6 hours a week, and to spend at least 20 hours a week on the course. No slackers need apply. Produce or become produce. We will put on a reading/performance at the end of winter study.

Requirements/Evaluation: at least 10 pages of writing and a final performance

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: based on writing samples

Grading: pass/fail only

Materials/Lab Fee: approximately $50 for books

MATH 99 (W)  Independent Study: Mathematics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only
MUS 11 (W) The World and Wes Anderson

Among commercially successful filmmakers of the new millennium, Wes Anderson has cultivated one of the most strongly recognizable styles. Focusing on Anderson's films, this course will build an intimate knowledge of Anderson's personal style while also deeply exploring broader topics like filmmaking techniques and narrative structures. It will also use these films as a jumping-off point for discussions about the broad network of influences and outside references found therein, including visual art, interior design, film history, music history, political history, celebrity, philosophy, typography, and the environment. Importantly, the course will also ask questions about representation and identity in Anderson's work. Three weekly class meetings will consist of lecture, discussion, group viewing sessions, and student presentations. Outside of the classroom, students will be expected to read articles, watch videos, complete an Anderson-inspired creative project, and write a medium-length essay. No previous experience studying film or music is required.

Requirements/Evaluation: creative project, presentation, short paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference will go to students who have taken courses about film in any department
Grading: pass/fail only
Materials/Lab Fee: approximately $45 for books

MUS 13 (W) Javanese Gamelan Ensemble

The Gamelan Ensemble performs classical music from Central Java, Indonesia. Javanese Gamelan is a vibrant tradition of gong-chime music that incorporates unique tuning systems, intricate melodies, lively rhythms, and flexible interaction among musicians. Students will gain valuable musicianship skills, enhanced musical memory, and have the opportunity to learn several different instruments over the course of the term. The group will play on a beautiful gamelan set crafted by Tentrem Sarwanto, a renowned Javanese gong-smith. The course culminates in a final noontime concert and a brief essay on Javanese music. Adjunct Instructor Bio: Phil Acimovic studied Javanese Gamelan in Surakarta, Indonesia with the support of two Darmasiswa scholarships. He is a student of Bp. Wakidi Dwidjomartono and Bp. Darsono Hadiraharjo, and formerly directed gamelans at UC Davis, UC Santa Cruz, and the Mynah Music School. He regularly performs with gamelan groups across the northeast. Acimovic is also a composer of modern classical music.

Requirements/Evaluation: concert and short essay
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: preference will be given to graduating seniors and upperclass students
Grading: pass/fail only

MUS 14 (W) Experimental Music: Species, Monsters, and Things Artificial

Cross-listings: PHYS 14 MUS 14
Secondary Cross-listing

In this project-based course we will make rooms into resonant instruments, create topographies of sound through interference patterns, and temper our tastes through chance procedures. We will study the tradition of North American experimental music through listening, performing, composing, and reading. Students will complete audio editing assignments in the software Reaper and carry out composition/performance projects. Listening and reading will be assigned for most class meetings. For the final project students will make a piece of experimental music. "If this word 'music' is sacred
and reserved for 18th- and 19th-century instruments, we can substitute a more meaningful term: organization of sound." So wrote John Cage in 1937, voicing the new attitude of the experimental music tradition. In this class we explore the expanded field of the modes of intervention into the flux of sound. Adjunct Instructor Bio: Daniel Fox is a composer and a mathematician based in New York City. His writing has appeared in Hyperallergic, Van Magazine, Perspectives of New Music, and Transactions of the American Mathematical Society. His compositions have been performed by the Jack Quartet, Mivos Quartet, Talea Ensemble, Miranda Cuckson, and Contemporaneous. His doctoral dissertation is on the role of acoustic resonance in American experimental music. His website is thoughtstodefine.com.

Requirements/Evaluation: short technical assignments, two mid-term projects, and a final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniority
Grading: pass/fail only
Materials/Lab Fee: $20

LEC Section: 01 Cancelled

MUS 15 (W) Contemporary American Songwriting

Cross-listings: MUS 15 AMST 15

Primary Cross-listing
This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio:
Singer/Songwriter Bernice Lewis has been teaching her Winter Study Course on performing and songwriting since 1995. She is also a published poet, a producer, and a sought after coach. She holds an M.Ed from the University of Massachusetts in Amherst.

Requirements/Evaluation: final performance and a 2- to 3-page paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: at the discretion of the instructor
Grading: pass/fail only
Materials/Lab Fee: $35 and cost of books

**NSCI 10 (W) The Neuroscience of Learning**

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in evaluating primary neuroscience research articles using the medical model to evaluate validity. They will develop their own evaluation systems for identifying valid research related to learning and the brain. Small groups of 2-3 students will be assigned different articles on the same topic and engage in class discussions based on their reading. These will include their interpretations of the research and potential applications to learning strategies and interventions. A final project will be a paper and class presentation about topics they select based on their interests and goals for taking the course. Adjunct Instructor Bio: Judy Willis, M.D. combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to become a leading authority in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles for professional journals applying neuroscience research to successful teaching strategies. She is on expert consulting staff for NBC News Education Nation, Edutopia, and media liaison for American Academy of Neurology.

**Requirements/Evaluation:** short paper and final project or presentation

**PHIL 11 (W) Philosophy of Chess**

Chess is one of the noblest and most fascinating of human endeavors. We will examine chess in many of its facets: its history, philosophy and
literature. We will look at the art of chess and the art that chess has inspired. Above all, we will work together on improving our playing skills: we will study chess openings, middle games and endgames, and engage in continual tournament play. Evaluation will be based on class participation and problem assignments.

Requirements/Evaluation: final project or presentation
Prerequisites: all students should know the rules of chess and be able to read chess notation
Enrollment Limit: 20
Enrollment Preferences: students will be selected according to playing strength, as indicated by USCF ratings, results in the College chess club, or other measures
Grading: pass/fail only

PHIL 14 (W) Ethics of Technology
Cross-listings: CSCI 14 PHIL 14 STS 14
Primary Cross-listing

A prominent company recently realized the machine-learning algorithm trained on its past hiring data had learned a bias against female candidates and so was unsuitable for resume evaluation. But given competing definitions of fairness, how should we decide what it means for an algorithm to be unbiased? Machine vision algorithms are systematically less likely to recognize faces of people of color. Since many face recognition algorithms are used for surveillance, would improving these algorithms promote justice? Deep fakes may pose serious challenges to democratic discourse, as faked videos of political leaders making incendiary statements cast doubt on the provenance of real videos. Do the researchers developing these algorithms, often academics funded by National Science Foundation grants, have an obligation to desist? In a field filled with such vexing questions, the ethical issue most commonly addressed by the media is whether a self-driving car should swerve to hit one person in order to avoid hitting two. In this class, we will go beyond the headlines to explore the ethics of technology. We will discuss issues such as transparency, bias and fairness, surveillance, automation and work, the politics of artifacts, the epistemology of deep fakes, and more. Our discussion will rely on articles from the course packet, enlivened by discussions with experts in the field over Skype. Students will apply their ethical knowledge to write multiple newspaper length op-eds arguing for their views. If students choose to submit these op-eds for publication, the instructor will coach them on appropriate procedures and venues. Adjunct Instructor Bio: Kathleen Creel ’10 is an advanced doctoral student in the Department of History & Philosophy of Science at the University of Pittsburgh. Her research focuses on epistemic and ethical issues in computer science and its scientific applications, such as transparency in machine learning and the ability of algorithmic decisions to provide reasons.

Requirements/Evaluation: 3 op-eds for a total of 10 pages
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: based on a written paragraph expressing interest
Grading: pass/fail only
Materials/Lab Fee: $20

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 19 (W) Living a Good Life: Insights from Philosophy and the Science of Human Nature
Cross-listings: PHIL 19 PSYC 19
Primary Cross-listing

This course pairs central test from the classical and contemporary Western philosophical tradition with recent findings in cognitive science and related fields. In addition, life-long learners from the Berkshire Osher Life-Long Learning Institute will be paired with Williams students from all years and all
readings from classical and contemporary western philosophy, and recent findings in the cognitive sciences will provide a context for intergenerational participants from the Osher Lifelong Learning Institute and Williams College to explore promising answers to fundamental questions like the following: What makes life most worth living? What is happiness? What are the components of human flourishing and how can they be best secured for as many people as possible, now and in the future? What kinds of answers can we anticipate from philosophical reflection and empirical research? Required reading: Selections from Plato Crito, The Republic and Aristotle Nicomachean Ethics; articles from psychology journals: books available at the college bookstore: Thomas Hurka The Best Things in Life; Jonathan Haidt The Happiness Hypothesis; Martin Seligman Learned Optimism; Williams MacAskill Doing Good Better. Adjunct Instructor Bio: Virginia O'Leary received her Ph.D. in Social Psychology at Wayne State University in 1969. Her early research was on women and work. Later she focused on resilience and thriving in the face of adversity and gender in cross-cultural context. Adjunct Instructor Bio: Tom Hodgson received his MA in philosophy from Yale University, after majoring in philosophy and in religion at Williams. He taught philosophy and coached various sports at Phillips Academy for 40 years, helped found the urban squash program in Lawrence, MA, and directed summer programs in Kunming, China. He currently coaches squash at Williams.

Requirements/Evaluation: 10-page paper; short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: lottery; 15 williams students 15 OLI students
Grading: pass/fail only
Materials/Lab Fee: $50 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 25 (W) Eye Care and Culture in Nicaragua

We will spend around ten days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where student--in conjunction with optometrists who volunteer their time for the tri--will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip. We will spend nine days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students--in conjunction with the optometrists (usually three) who volunteer their time for the trip--will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings.

Requirements/Evaluation: class participation and journals as described above, along with on-site observation of the students’ participation in the eye clinics
Prerequisites: none, though it is helpful to include three to six students who are fluent in Spanish
Enrollment Limit: 12
Enrollment Preferences: students will submit applications indicating why they want to take the course
Grading: pass/fail only
Materials/Lab Fee: $3,350
Attributes: EXPE Experiential Education Courses TRVL Winter Study Travel Course

Winter 2020
TVL Section: 01 Cancelled

PHIL 26 (W) Morocco

Students spend winter study in Morocco, a country at the intersection of the Middle East, Africa, and Europe. Threads of Islam, Arab traditions, and the
heritage of the native Berber people are woven into a distinctive cultural tapestry, while traces of French colonialism can still be seen in the political and social structure. Travel there is a powerful way to introduce intellectual themes that require and reward a subtle blend of insight from history, literature, political science, religion, and philosophy. Students spend the first 8-10 days studying at the Center for Cross Cultural Learning (CCCL) in Rabat, attending lectures by local university faculty on various aspects of Moroccan history and culture, and taking introductory lessons in Moroccan Arabic. During this period students live with Moroccan host families in the Rabat medina. In the final week of the course, students travel in the interior of Morocco, exploring contemporary urban centers such Fez, Marrakesh, and Casablanca along with remote Berber villages in the Atlas Mountains. Evaluation based on active participation in all lectures and language instruction; a 10- to 15-page research paper before the trip on some facet of Moroccan culture (e.g., politics, religion, literature, history, architecture, gender relations); a 5-page reflective addendum to the paper after returning from Morocco.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: 1-page essay describing background and interests in the course; interviews
Grading: pass/fail only
Materials/Lab Fee: $3,600.
Attributes: TRVL Winter Study Travel Course

PHLH 15 (W) The Human Side of Medicine and Medical Practice

In today's health care atmosphere of physician accountability, advanced medical technology, and evidence-based diagnosis, the "human side" of medical practice is often minimized or even disregarded. Medical schools debate how or whether to emphasize this more interpersonal aspect of medicine within their curriculums. This concern with the patient/physician relationship becomes particularly relevant with today's reliance upon personal devices and with a culture promoting medicine as a big business model. Increasingly research shows that the combination of both perspectives--patient centered understanding and technical proficiency--lead to better diagnosis and treatment; to improved patient compliance and satisfaction; and to increased physician professional satisfaction. The doctor/patient relationship will be placed within the broader context of cybersecurity concerns, the opioid epidemic, and new disruptive models of health care. Original thinking, examining personal/family experiences, in-class skill practice and frequent class guest speakers will provide much of the learning experience. This seminar works well for those who have shadowed physicians or are planning to shadow, but ALL MAJORS ARE WELCOME. Lively discussion is key. Reading includes Every Patient Tells A Story (Lisa Sanders), When Breath Becomes Air (Paul Kalanithi), Black Man In A White Coat (Damon Tweedy) as well as a reading packet distributed by the instructor. Adjunct Instructor Bio: Sandra Goodbody is a clinical social worker, with a private psychotherapy practice in Washington DC. She has worked at the Institute of Medicine (National Academies) and has taught at The George Washington School of Medicine.

Requirements/Evaluation: final project plus three 2-page papers
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: student interest
Grading: pass/fail only
Materials/Lab Fee: $15 and approximately $55 for books

Winter 2020
LEC Section: 01 TWR 10:00 am - 11:50 am Sandra Goodbody

PHLH 25 (W) Public Health, Community Action, and Education in Rural India

This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future is entirely dependent upon the health of its population, specifically its most vulnerable--and most vital--members: women and children. To understand how public health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (http://fphed.org/). A UP-based organization with its own campus, FPHED's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHED will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. She conducted community-based participatory research on government reproductive health programs in rural India through a Fulbright-Nehru Fellowship. She has spent a cumulative 17 months to-date studying and researching reproductive health in rural India. She is currently a Health Care Assistant at Planned Parenthood in Boston.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Public Health students, then by seniority
Grading: pass/fail only
Materials/Lab Fee: $3,260
Attributes: EXPE Experiential Education Courses TRVL Winter Study Travel Course
PHLH 99 (W) Independent Study: Public Health
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

PHYS 10 (W) Light and Holography
This course will examine the art and science of holography. It will introduce modern optics at a level appropriate for a non-science major, giving the necessary theoretical background in lectures and discussions. Demonstrations will be presented and students will make several kinds of holograms in the lab. Thanks to a grant from the National Science Foundation, we have 7 well-equipped holography darkrooms available for student use. At the beginning of WSP, the class will meet for lecture and discussion three mornings a week and for lab 2 afternoons a week. The later part of the month will be mainly open laboratory time during which students, working in small groups, will conduct an independent project in holography approved by the instructor. Attendance at lectures and laboratory is required.

Requirements/Evaluation: regular attendance, completion of 4 laboratory exercises, and a holography laboratory project (approved by the instructor) with a poster presentation to the class at the end of WSP; attendance at all classes and labs is required for a passing grade
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: preference to students with no physics above Physics 109; then seniors, juniors, sophomores and first-years
Grading: pass/fail only
Materials/Lab Fee: $50

PHYS 12 (W) Drawing as a Learnable Skill
Representational drawing is not merely a gift of birth, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing. By using simple techniques and extensive exercises you will develop your ability to accurately see and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and teach creative problem solving abilities. Students need no previous artistic experience, just the willingness and desire to learn. Students will be expected to attend and participate in all sessions. The class will meet twice a week on Tuesday and Thursday mornings. Students will also be required to keep a sketchbook for all assignments (both in class and out-of-class work) and complete a final project. There will be a final exhibition of student work on the last day of class. Adjunct Instructor Bio: Stella Ehrich is a professional painter whose work includes portraits, landscapes and still life subjects. She studied for seven years at Studio Simi in Florence, she holds an MFA in painting from Bennington College and a BFA from the Memphis Academy of Art. Stella studied for seven years in Florence, Italy in the studio of Nerina Simi and later earned an Master's degree from Bennington College with a concentration in painting. She is a portrait painter who lives and works in Vermont.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: seniority
Grading: pass/fail only
Materials/Lab Fee: $12

PHYS 14  (W)  Experimental Music: Species, Monsters, and Things Artificial

Cross-listings: PHYS 14  MUS 14

Primary Cross-listing
In this project-based course we will make rooms into resonant instruments, create topographies of sound through interference patterns, and temper our tastes through chance procedures. We will study the tradition of North American experimental music through listening, performing, composing, and reading. Students will complete audio editing assignments in the software Reaper and carry out composition/performance projects. Listening and reading will be assigned for most class meetings. For the final project students will make a piece of experimental music. "If this word 'music' is sacred and reserved for 18th- and 19th-century instruments, we can substitute a more meaningful term: organization of sound." So wrote John Cage in 1937, voicing the new attitude of the experimental music tradition. In this class we explore the expanded field of the modes of intervention into the flux of sound. Adjunct Instructor Bio: Daniel Fox is a composer and a mathematician based in New York City. His writing has appeared in Hyperallergic, Van Magazine, Perspectives of New Music, and Transactions of the American Mathematical Society. His compositions have been performed by the Jack Quartet, Mivos Quartet, Talea Ensemble, Miranda Cuckson, and Contemporaneous. His doctoral dissertation is on the role of acoustic resonance in American experimental music. His website is thoughtstodefinite.com.

Requirements/Evaluation: short technical assignments, two mid-term projects, and a final project
Prerequisites: none
Enrollment Limit: 20

Enrollment Preferences: seniority
Grading: pass/fail only
Materials/Lab Fee: $20

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 14 MUS 14

Winter 2020
LEC Section: 01      Cancelled

PHYS 15  (W)  Cooking for the Real World

Students will learn the basic cooking techniques needed to survive for their lives after graduation. They will learn how to make cookies, pasta, pies, protein cookery, and knife skills to better prepare themselves after their time at William's. Please when applying for the class include year of graduation and why food matters so much to you. Normally students will email me why and how food means to them. Emails will help determine who gets into the class of 10.  Adjunct Instructor Bio: CJ Hazell is currently working in Williams' dining services, preparing meals for over 2000 students. Prior to coming to the college, he ran a small cafe and before that was the kitchen manager and saucier at a French Fine Dining establishment.

Requirements/Evaluation: students will write a reflection comparing their initial email application and what they have learned throughout class
Prerequisites: Junior or Senior
Enrollment Limit: 10

Enrollment Preferences: email application explaining how much food means to them
Grading: pass/fail only
Materials/Lab Fee: cost of books
Attributes: EXPE Experiential Education Courses
PHYS 16 (W) The Way Things Work
How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What's inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we'll explore the way things work! Class will meet four afternoons a week for a mixture of lecture, discussion, build time, local field trips, and lots of hands-on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinker-time. Early in the course we'll team-engineer and build a large project as a class. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice. These will culminate in either building a final project with a short writeup or writing a 6-page paper, and a presentation to the class.

Requirements/Evaluation: class participation; midterm group project; final project with short writeup or a 6-page paper; presentation of final project/paper to the class
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: by seniority, and by requesting an interest statement
Grading: pass/fail only
Materials/Lab Fee: $40 and approximately $35 for books
Attributes: EXPE Experiential Education Courses

PHYS 22 (W) Research Participation
Several members of the department will have student projects available dealing with their own research or that of current senior thesis students. Approximately 35 hours per week of study and actual research participation will be expected from each student.

Class Format: to be arranged with instructor
Requirements/Evaluation: students will be required to keep a notebook and write a 5-page paper summarizing their work
Prerequisites: permission of instructor
Enrollment Limit: 1-2
Enrollment Preferences: permission of instructor
Grading: pass/fail only

PHYS 31 (W) Senior Research: Physics
To be taken by students registered for Physics 493, 494.

Class Format: thesis
Grading: pass/fail only

POEC 22  (W) Volunteer Income Tax Assistance
Cross-listings: POEC 22  ECON 22
Secondary Cross-listing
This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons
Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: written statement of interest
Grading: pass/fail only
Materials/Lab Fee: $10

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 11 (W) The East is Red? Socialism in Asia

Cross-listings: PSCI 11 ASST 12 HIST 12

Secondary Cross-listing

This course provides a historical and political overview of socialism in Asia from the 1910s to the present. It examines the spread and influence of Marxism in Asia, the policies of socialist states and movements in relation to decolonization, the Cold War, and the Sino-Soviet split, and the marriage between market reforms and ostensibly socialist governments in the present day. In addition to looking at the socialist governments of China, North Korea, Vietnam, and Cambodia, we will examine cases of “unsuccessful” socialist parties in Japan, Indonesia, and India. Class materials include memoirs of survival by non-state actors, the writings of socialist leaders (Mao Zedong, Ho Chi Minh, M.N. Roy, etc), and cultural constructions such as revolutionary theatre, songs, and contemporary films. Questions that will be addressed include: Why did Marxism, a Eurocentric theory of revolution intended for advanced capitalist societies, find such resonance in Asia? How was Marxism adapted for an Asian environment? Twenty-five years after the fall of communism, why have Asian socialist states remained in power? And in the scales of history, how should we judge the effects of socialism in Asia? Evaluation will be based on two in-class presentations and a final research paper. Attendance and participation will also be taken into account. We will meet three times a week for two-hour sessions. Adjunct Bio: John Knight has a Ph.D in East Asian History with a focus on Modern China. He graduated in 2017 from The Ohio State University. He has previously taught East Asian and World History at the Rhode Island School of Design, Ohio State University, Capital University, and Seton Hall.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference will be given to students majoring in Asian Studies, History, or Political Science
Grading: pass/fail only
Materials/Lab Fee: $15

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 12 (W) First Amendment Law and Policy
Intensive examination of first amendment law and policy, providing twice the time and attention to expressive rights than a survey course or civil liberties course. The most important decisions, opinions and dissents will be covered. The tension between expressive rights (speech, religion, assembly) and other civil liberties (equality, privacy, others) will be discussed as will the rationale for permitting or restricting speech involving falsity, obscenity, "fighting words," hate speech, child pornography and depictions of violence, cruelty and sexual domination. Adjunct Instructor Bio: Lloyd Constantine has argued many constitutional law cases in SCOTUS and "inferior" federal courts. He has taught law school (Fordham) and both civil liberties and first amendment law and policy to undergraduates (SUNY). He taught this course during Williams 2019 Winter Study period.
Requirements/Evaluation: 10-page paper or 90-minute oral examination--the students’ choice
Prerequisites: none, but if oversubscribed priority will be given to students who have taken constitutional law
Enrollment Limit: 30
Enrollment Preferences: students who have a background in or have taken constitutional law or civil liberties or plan to attend law school will be given priority
Grading: pass/fail only
Materials/Lab Fee: cost of books

Winter 2020
LEC Section: 01 Cancelled

PSCI 13 (W) American First & Int'l Democracy Promotion: Democracy Promotion in US Foreign Policy & Int'l Devt.
Beginning from modest, ad hoc efforts in the 1980s, international democracy promotion has evolved into an international norm and an influential subfield of international development assistance. Beyond rhetoric and high-level diplomacy, democracy promotion now encompasses technical advice and assistance to help build democratic institutions, support democratic actors, and encourage democratic development in other countries. The U.S. and other developed countries support ambitious programs to encourage democracy, good governance, and human rights, including efforts addressing elections, political parties, civil society, institutions of governance, and the rule of law. Funding and policy influence for these programs have grown dramatically over the past several decades. At the same time, the Trump Administration’s "America First" approach has raised questions about U.S. leadership in this field. This course integrates theory with analysis of current policy and practice. Drawing on political science concepts and practical experience, we will analyze and critique the design, theory of change, and implementation of international democracy programs. We will address what democracy promotion is, how democracy programs work, and whether they are effective. We will consider current trends and new challenges, including closing political space, conflict, violent extremism, and manipulation through social media as well as the changing U.S. role in the world. The course will also familiarize students with career opportunities in human rights, international development, and foreign policy. As the basis for class discussion and presentations, we will read selected materials from recent books, journal articles, published reports, and project documents as well as review film excerpts and consult on-line sources. The class will meet twice a week for three hours. As a final paper, students will prepare project proposals in response to actual U.S. government RFPs. Adjunct Instructor Bio: Eric Bjornlund, Williams ’80, is a lawyer and President of Democracy International. Over the past 30 years, he has designed, managed, evaluated and taught in democracy and governance programs in 70 countries. An adjunct professor at Georgetown University, he has also served as visiting scholar in Myanmar and guest lecturer at universities in the US and abroad. He is author of Beyond Free and Fair: Monitoring Elections and Building Democracy and holds a JD from Columbia and an MPA from Harvard. Xlist:
Requirements/Evaluation: written project proposal in response to actual US government request for proposals (RFP)
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: based on a paragraph about why you are interested, taking account of seniority
Grading: pass/fail only
Materials/Lab Fee: $20 and cost of books

Winter 2020

PSCI 15  (W)  Introduction to Tap Dance

Cross-listings: DANC 15  PSCI 15

Primary Cross-listing
This course introduces those with little or no experience in tap dance to the basic techniques and movement/rhythm vocabularies of this musical and quintessentially American style of dance. In twice-weekly studio sessions, students will gain facility with the fundamentals of tap technique, practice basic combinations, and experiment with improvisation. To develop a richer sense of the American cultural context from which tap grew—particularly its roots in African American movement and music traditions and its appropriation by Broadway and the film industry—we will discuss film and writing on the genre's past and present in once-weekly classroom sessions. Students should expect to gain balance, rhythm, improvisational freedom, and confidence in public performance through practicing tap. Evaluation will be based on effort and improvement in studio sessions, participation in discussions, weekly journal reflections, and a final group performance of the shim sham, tap's so-called national anthem.

Requirements/Evaluation: final project or presentation
Prerequisites: none; course is only open to those with little or no tap experience
Enrollment Limit: 15
Enrollment Preferences: brief personal statements
Grading: pass/fail only
Materials/Lab Fee: approximately $50 for books

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings:  PSCI 16  LEAD 16

Primary Cross-listing
Whether your ideal is Reverend Martin Luther King, Jr., telling Americans "I have a dream" or Ronald Reagan ordering Mikhail Gorbachev to "tear down this wall!!", speeches can change cultures or minds, move a nation or a single human heart. This writing-intensive course will introduce you to the history and importance of speechwriting and rhetoric, provide you with direct experience writing and delivering speeches, and introduce you to career possibilities in speechwriting and related fields. Our course materials, professional guests and class discussions will consider diverse rhetorical traditions within the U.S. and around the world. The modern profession of speechwriting involves much more than writing remarks for someone using a podium or teleprompter. It may include developing a TED Talk, producing a video, writing social media posts or ghostwriting op-eds and even memoirs (!). That's because speechwriters at their best are more than writers: They're trusted advisors on the art of persuasive communication, and of leadership more generally. Whether you want to develop your own public speaking skills or write for a politician, CEO, or cultural leader, this class will
teach you about poetics, persuasion, and the pretty peculiar principles involved in writing words that another human being will be credited (or blamed) for—not to mention a sense of the career opportunities in politics, education, the arts and industry. The course will meet 3x/week for 2 hours at a time. Work outside class—including readings, film viewings, writing assignments and associated research, rehearsal of speeches, etc.—will require another 20 hours per week. During the course all students will be expected to write and deliver multiple speeches. Adjunct Instructor Bio: Jim Reisch is Chief Communications Officer at Williams College.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: at the discretion of the instructor

Grading: pass/fail only

Materials/Lab Fee: approximately $40 for books

PSCI 17 (W) State Constitutions, State Courts, and Individual Rights

Cross-listings: PSCI 17  JLST 17

Primary Cross-listing

Most people are familiar with the idea that the federal constitution, as interpreted by the U.S. Supreme Court, can serve as an important (albeit controversial) tool for vindicating individual rights. Cases involving rights to same-sex marriage, abortion, and gun ownership are just a few recent examples of the U.S. Supreme Court and the federal constitution taking center stage in battles over individual rights. But there is another, equally important, source of individual rights that is sometimes overlooked and understudied: state constitutions. Each state has its own constitution, which may contain different rights and protections from those in the federal constitution, and its own courts, which interpret that constitution. In this class, we'll take a look at the role of state constitutions and courts in protecting individual rights and influencing federal constitutional interpretation. From assessing the constitutionality of compelled sterilization to protecting citizens from unreasonable searches and seizures, we'll examine the interplay between state and federal courts and constitutions. To do this, we'll read the book 51 Imperfect Solutions: States and the Making of American Constitutional Law by Judge Jeffrey S. Sutton (class of 1983). As a final project, students will choose a legal issue, evaluate its chances of success under the federal constitution and their home state constitution (or state constitution of their choosing), develop a basic litigation strategy aimed at achieving their objectives, and present that evaluation and strategy to the class. Adjunct Instructor Bio: Erin Lagesen (class of 1991) is a judge on the Oregon Court of Appeals. At Williams, she double majored in Mathematics and English. Adjunct Instructor Bio: Susan Yorke (class of 2006) is an appellate attorney in San Francisco, and she also graduated from Williams with a double major in Mathematics and English.

Requirements/Evaluation: short paper and final project or presentation

PSCI 18 (W) Brexit: The Irish Factor

Ireland and the United Kingdom advanced their century old process of reconciliation when they joined the European Community in 1972. For a
millennium Celtic Ireland had tried to sustain a separate political, cultural, and religious identity from England. Recent BREXIT negotiations designed to facilitate UK's exit from the EU focused uncomfortable attention on the evolving but still painful reconciliation process begun in the early nineteenth century. Ireland is adamant about maintaining the European connection; Northern Ireland, still part of the United Kingdom, cherishes the British connection but seeks to maintain economic and cultural ties to the Republic of Ireland. The course will feature six two hour lectures on the contours of Catholic and Celtic Ireland's relationship to the United Kingdom since 1801. Northern Ireland is central to this difficult but of late constructive dialogue. Students will be asked to identify a chapter in this difficult relationship as the focus for research supporting a ten page paper and a brief class presentation. All students will meet one on one with the instructor for at least one hour each week to define a topic, assess research materials, draft a paper, share impressions on their academic experience, and prepare a fifteen minute class presentation. Adjunct Instructor Bio: Mr. Brynn holds MA and Ph.D degrees in British History (Stanford) and M.Litt and Ph.D degrees in Irish Politics (Trinity College Dublin). During thirty years in the Foreign Service he was Ambassador/Chief of Mission in five African countries and Principal Deputy Secretary for African Affairs.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: preference will be given to students enrolled in their first and second academic year at Williams
Grading: pass/fail only
Materials/Lab Fee: approximately $20

PSCI 19 (W) Law as a Tool for Social Justice
The law may be deployed to achieve social justice in different ways: through the use of the judicial system, by the enactment of legislation, and at times through the ballot. While we will see the law work positively, we also will examine its limitations and failures due to societal, economic and human obstacles. The class will read 3 books in full and one in part, all of which relate compelling stories. We begin with Devil in the Grove (winner, 2013 Pulitzer Prize for non-fiction), which centers on a highly publicized 1949 Florida case involving 3 young black men who are defended against the charge of raping a white woman by Thurgood Marshall, then with the NAACP, at risk to his life. While we will encounter the brutal obstacles to obtaining justice in the deep South in 1949, the book also serves in part as a mini-biography of Marshall, and we will read about the great victories he achieves at the national level in the Supreme Ct. in cases involving voting, housing and education. Next is Gideon's Trumpet, a classic in the field of constitutional law by the renowned Anthony Lewis about winning the right of a pauper to be provided with legal counsel in all state felony cases. The book elegantly describes the structure of our Federal system, delineating the tension between the rights reserved to the states in the area of criminal law, and the umbrella of protection provided to individuals by the Bill of Rights. The third book is Winning Marriage, The Inside Story of how Same-Sex Couples Took on the Politicians and Pundits - and Won (2014) by Marc Solomon. The book narrates the incredibly successful effort by those in the LGBT community and their allies to win for same-sex couples the right to marry over a relatively short time. The book focuses on the gritty political battles at the state level, ultimately moving to the Federal stage. The class will read key segments of the book, and also will read the landmark Obergefell Supreme Ct. decision establishing the right of same-sex couples to marry. The final book is JUST MERCY by Bryan Stevenson (2014), a NYT Times Notable Book, which is a moving account of Bryan's experiences with the US criminal justice system. It is about his establishing the Equal Justice Initiative, which has worked to free wrongfully convicted inmates on Death Row, children who have been unjustly sentenced to life without parole, mentally disabled persons who have received excessive sentences, and children who have been unjustly thrown into adult prisons. Not an abstract book, it deals with individual wrenching cases of injustice handled by the author. Adjunct Instructor Bio: Richard Pollet graduated from Williams College in 1969, cum laude, with Honors in Political Science and Columbia U. Law School J.D. in 1973. He has 40+ years practicing law, the last 26 as General Counsel of J. Walter Thompson (JWT). He retired in June 2013. Subsequently he has done some consulting for WPP, the parent company of JWT. He has taught this course several times.

Class Format: mornings
Requirements/Evaluation: 10 page paper

PSCI 20  (W)  "Real" World Problem Solving

Cross-listings:  PSCI 20  LEAD 20

Primary Cross-listing

This course will introduce you to tools and techniques to solve problems for impact not in the classroom, but in the White House Situation Room, the corporate board room, and even a forward operating base. We will focus on how to define and structure policy or strategy problems, and then identify and test hypotheses for impact. We will explore the necessity of using pragmatic "mental models" to inform our analyses and decision making. Along the way, we will explore cognitive biases, implementation challenges, and techniques to manage them. The best recommendations only come to life through compelling communication. We will build these skills, therefore, through "real" life exercises. These will include drafting talking points for a "principal" (e.g., the President, Secretary of State, a CEO, or a Governor), preparing a policy or strategy memo, and developing a compelling PowerPoint briefing for a senior executive audience. Case studies will provide the foundation for many class discussions. The class will be "tri-sector"--open to examples from the private, government, and nonprofit sectors. Source material will include: Graham Allison and Philip Zelikow, *The Essence of Decision: Explaining the Cuban Missile Crisis* (2nd edition); Richard Haass, *The Bureaucratic Entrepreneur: How to be Effective in Any Unruly Organization*; Richard Neustadt and Ernest May, *Thinking in Time: The Uses of History for Decision Makers*; Michael Lewis, *The Undoing Project: A Friendship that Changed Our Minds*; select podcasts and journal articles; and three films "Thirteen Days," "Moneyball," and "The Big Short."

Assessment: class participation; final memo (5-8 pages) and class presentation on a real world issue. Adjunct Instructor Bio: Drew Erdmann ’88 is Chief Operating Officer of the State of Missouri with responsibility for managing the ~50,000 employee, $28 billion enterprise. After receiving his PhD in American History, Drew's career included government service with the State Department, Defense Department in Iraq, and White House, and over a decade with the global consultancy McKinsey & Company where his experience spanned the retail, media, energy, aerospace & defense industries, and the public and nonprofit sectors.

Requirements/Evaluation:  short paper and final project or presentation

Prerequisites:  none

Enrollment Limit:  18

Enrollment Preferences:  preference for juniors and sophomores; students will have to send brief memo explaining why they are interested in course, with their resume

Grading:  pass/fail only

PSCI 20 LEAD 20

Winter 2020

LEC Section: 01    Cancelled

PSCI 21  (W)  Fieldwork in Public Affairs and Private Non-Profits

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

Grading:  pass/fail only
PSCI 22 (W) Learning Intervention for Teens
This course pairs Williams students with adolescents involved in the juvenile court system of Berkshire County. Judges assign teenagers (ages 13-17) to this program, an official Commonwealth of Massachusetts probation program. Our goal is to empower the teenagers through positive peer mentorship and allow them to take ownership of an independent project of the teen's choosing. The project and other program activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting and communication, which the teenagers can transfer to their school, work, and home lives. The course ends with a presentation in which each adolescent/Williams student pair formally presents its work to an audience that includes the employees of the juvenile court system, elected officials, chiefs of police, district attorneys, the teens' peers and families, and Williams faculty and community members. Williams students learn to mentor teenagers and gain insight into the juvenile justice system. Williams students are expected to attend trainings, meet with their teens three times a week, co-give a final presentation, and keep a weekly journal detailing their meetings. This is a student-led course, sponsored by Police Chief Mike Wynn and Professor Cheryl Shanks but entirely run by trained Williams students who have served as mentors in the past. Because Learning Intervention for Teens is an after-school program for the teens, this course meets Tuesday through Thursday from 306pm. In order to enroll in the course, when preregistering, all students must write a paragraph explaining why they believe they'd be a successful mentor in this program. Students should email their paragraphs to student coordinators Rebecca Tauber at ret5@williams.edu and Jamie Nichols jm2@williams.edu and cc: cshanks@williams.edu.

Class Format: afternoons
Requirements/Evaluation: journal and final reflection totaling 10-15 pages, final project with teenager
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: by paragraph of interest
Grading: pass/fail only
Materials/Lab Fee: none

PSYC 10 (W) Yoga, Mindfulness and Creativity

The greatest obstacles to creativity are distraction and stress. The goal of this course is to unplug, refresh, and reunite with your creative, productive, true self. Exploring the correlation between yoga, mindfulness and creativity, we will practice yoga, tour the wonderful museums in our area, make individual mandalas in an art workshop, and go on a 2-night/3-day stay at the renowned yoga retreat Kripalu. In this class, focused primarily on yoga, students will meet 4 - 5 hours per week to practice open-level yoga, and explore the core asanas (yoga poses), healthy alignment, asana variations and creative sequencing, as well as other techniques to cultivate mindfulness: pranayama (breath work) and meditation. Time in the yoga studio will be complemented by visits to the Clark Art Institute, the Williams College Museum of Art, and MassMoCA. In these museums, we will be guided by museum staff and learn how their philosophies and practices relate to our focus on creativity and mindfulness. We will take ample time for mindful observation, and some of our yoga practice may take place inside these museum galleries. Throughout the course, students will be expected to journal on various open-ended prompts and occasionally discuss them. After the first two weeks we will participate in a mandala making workshop led by local artist Zoe Doucette. Whether we think of ourselves as artistic or not, this workshop will encourage us to create something visually unique and personally meaningful. The highlight of the course will come at the end, when we'll spend two nights and three days at the world-renowned yoga retreat Kripalu, located in nearby Stockbridge, MA, where students will be free to explore a variety of classes and yoga styles, vegan food, meditation, and more. Back on campus, we will end the course in the same biometrics lab in which the course began, in order to assess how our yoga practice and breathing techniques have affected our heart rates. Final projects will consist of 1. Regular journal entries 2. Creative visual project (mandala or other) 3. 3-5-page research paper or 3-5-minute presentation on breathing techniques or guided meditation.  Adjunct Instructor Bio: Mary Edgerton is a certified yoga instructor at Williams College. She also teaches throughout Berkshire County through her business NightSkyYoga.com.

Requirements/Evaluation: journaling 3x/week and final project
**PSYC 11 (W) Designing your Life and Career After Williams**

This course takes a psychological approach to helping you figure out what to do with your life. We start by reviewing your life story up until now and determining how it has shaped you. We discuss, for example, whether you feel pressured to go down a certain road, whether you feel torn between your head and your heart, or whether you feel directionless. Then we take stock of who you really are now, including your core interests, tendencies, strengths, and weaknesses. We try to identify life designs that play to your signature strengths, as opposed to situations that are a setup for frustration and failure. The class encourages you to let go of comparing yourself to your peers, as different people need different things. You explore your underlying values and what you find most important in life. You consider the level of meaning you need in your work, as well as how much you care about money, status, fame, independence, connection, and creativity. The class introduces you to the concept of "flow," the feeling you get when engaging in activities that provide ideal levels of challenge and mastery. By designing lives and careers that promote flow states, you will be most likely to thrive and not merely succeed. Indeed, it is important not to design a life that appears successful but feels miserable. Your choice of a romantic partner can also have huge implications for the trajectory of your life. The class helps you to identify typical traps, such as staying with someone who is a bad match, and discusses how to make constructive relationship choices. Ultimately, as there are likely multiple valid life and career paths for you to take, you identify and develop three different plans that feel authentic and inspiring to you.  

**Adjunct Instructor Bio:** Dr. Johnson received his B.A. from Williams College, his Ph.D. in clinical psychology from Yale University, and is a Clinical Associate Professor at Brown University. He has taught this Winter Study for the last three years and deeply enjoys mentoring students around career issues.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** preference will be given to juniors and seniors if the course is overenrolled

**Grading:** pass/fail only

**Materials/Lab Fee:** approximately $51 for books

---

**PSYC 12 (W) Towards a Fuller Life: The Role of Joy, Creativity, Play and Gratitude**

*What does it mean to live a full life? How does one bring joy, creativity, play and gratitude into daily living?* In this experiential course, students will explore concepts and complexities related to play, creativity, joy and gratitude across cultures and develop realistic practices for integrating these qualities into daily life. Students will participate in discussions, experiential activities, wellbeing challenges, journaling and community projects. Out of class time will emphasize practice opportunities for each of the pillars of the course.

**Requirements/Evaluation:** weekly practice plan and reflection papers

**Prerequisites:** ability to laugh--out loud or silently

**Enrollment Limit:** 16

**Enrollment Preferences:** at the discretion of the instructor

**Grading:** pass/fail only

**Materials/Lab Fee:** $10

Winter 2020
PSYC 13 (W) Designing for People

Cross-listings: PSYC 13 CSCI 13

Secondary Cross-listing

Many technologically-innovative and aesthetically-beautiful products fail because they are not sensitive to the attitudes and behaviors of the people who interact with them. The field of Human Factors combines aspects of psychology with software development, education, architecture, and physiology, and other fields, to design objects that provide an easy, enjoyable, efficient and safe user experience. The course will provide students with a theoretical framework for analyzing usability, as well as practical knowledge of a variety of human factors testing methodologies. The course will examine the usability of a wide variety of designed objects, including buildings, publications, websites, software applications, and consumer electronics gadgets. Students will demonstrate their understanding of human factors theory through a short paper and participation in class discussion. Students identify a usability problem and design a solution which they will evaluate by heuristic analysis and a usability test with 8-10 human test subjects. Findings will be presented on the final day. Adjunct Instructor Bio: Rich Cohen ’82 has designed communications, social networking and education applications used by over 100 million people and has conducted usability research on four continents.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Instructor seeks a diverse group of students with interests in design, psychology, and human-computer interaction

Grading: pass/fail only

PSYC 14 (W) JA SelCom: A Case Study in Selection Processes

The majority of the time will be dedicated toward selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in the selection? These are just a few of the questions that we will seek to understand through guest speakers from the Davis Center, Psychology Department, Admissions, and the Career Center. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality. To enroll in this course, you must apply via this form (https://forms.gle/BjWA1tTIFQweAvq8) by 11:59 pm on October 25. Those who are not selected will be notified in time so that they can still register for another Winter Study course during the first round of registration.

Requirements/Evaluation: short writing assignments totaling 10 pages

Prerequisites: none

Enrollment Limit: 21-30

PSYC 15 (W) Ephquilts! An Introduction to Traditional Quilting

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods
included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: Pieces of the Past by Nancy J. Martin; Stitching Memories: African-American Story Quilts by Eva Ungar Grudin; Sunshine and Shadow: The Amish and Their Quilts by Phyllis Haders; A People and Their Quilts by John Rice Irwin; Treasury of American Quilts by Cyril Nelson and Carter Houck; The Quilt: New Directions for an American Tradition, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects. Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: seniors, juniors, sophomores, first years
Grading: pass/fail only
Materials/Lab Fee: $250

PSYC 19  (W)  Living a Good Life: Insights from Philosophy and the Science of Human Nature

Cross-listings:  PHIL 19  PSYC 19

Secondary Cross-listing

This course pairs central test from the classical and contemporary Western philosophical tradition with recent findings in cognitive science and related fields. In addition, life-long learners from the Berkshire Osher Life-Long Learning Institute will be paired with Williams students from all years and all readings from classical and contemporary western philosophy, and recent findings in the cognitive sciences will provide a context for intergenerational participants from the Osher Lifelong Learning Institute and Williams College to explore promising answers to fundamental questions like the following: What makes life most worth living? What is happiness? What are the components of human flourishing and how can they be best secured for as many people as possible, now and in the future? What kinds of answers can we anticipate from philosophical reflection and empirical research? Required reading: Selections from Plato Crito, The Republic and Aristotle Nicomachean Ethics; articles from psychology journals; books available at the college bookstore: Thomas Hurka The Best Things in Life, Jonathan Haidt The Happiness Hypothesis; Martin Seligman Learned Optimism; Williams MacAskell Doing Good Better. Adjunct Instructor Bio: Virginia O'Leary receed her Ph.D. in Social Psychology at Wayne State University in 1969. Her early research was on women and work. Later she focused on resilience and thriving in the face of adversity and gender in cross-cultural context. Adjunct Instructor Bio: Tom Hodgson received his MA in philosophy from Yale University, after majoring in philosophy and in religion at Williams. He taught philosophy and coached various sports at Phillips Academy for 40 years, helped found the urban squash program in Lawrence, MA, and directed summer programs in Kunming, China. He currently coaches squash at Williams.

Requirements/Evaluation:  10-page paper; short paper and final project or presentation

PSYC 22  (W) Introduction to Research in Psychology
This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course. In addition, students should discuss with faculty what the weekly time requirements will be.

Requirements/Evaluation: quality of research participation, student's lab journal, and either an oral presentation or a written 10-page report of the research project

Prerequisites: permission of faculty mentor

Enrollment Limit: POI

Enrollment Preferences: selection will be based on evaluation of departmental application and number of faculty available as mentors

Grading: pass/fail only

PSYC 23  (W) STEAM Sandboxes: Public Pedagogy and Transformative Learning
Cross-listings: ARTH 23  PSYC 23  ARTS 23

Primary Cross-listing

Where, when, and how do children learn outside of school? What is STEAM education, and who has access to it? Why does creative youth development matter in our society? Creative problem solving—the flexibility, persistence, and openness to generate and apply novel solutions to problems—is essential for success in school, the workplace, and beyond. The Bay Area Discovery Museum (BADM) has developed a pedagogical framework for educators to build children's creative problem-solving skills through intentional experiences. We will use this framework to guide our exploration of informal learning environments, including museums, libraries, and other out-of-school places, investigating how children—and adults in their lives—access learning in STEAM content areas, especially the sciences and the arts. In addition to class meeting time, we plan to take two or three day-long field trips to local and regional museums and other educational sites. Alongside our research in the field and discussions in class, students will create a journal in the medium of their choice (written, visual, aural) to document and reflect on their learning. Students will also work individually or collaboratively to design a prototype for a STEAM exhibition, event, song, podcast, video, or project of their choosing that they will present at the end of the session. We welcome anyone with an interest in contributing to the field of education, making, creating, and innovating! This course is not limited to students with backgrounds in psychology, the sciences, or art. Class is scheduled for M and W afternoons with mandatory all- and partial-day field trips scheduled during Weeks 1-3. Dates of the field trips are TBD, and may fall either on Tuesdays, Wednesdays, or Thursdays. Helen Hadani, Director of Research at BADM, and Molly Polk, from the Center for Learning in Action, will co-teach this course. Adjunct Instructor Bio: Molly was the founding education coordinator and curator for KidSpace at MASS MoCA and has taught children of all ages in informal learning environments, including museum galleries and dance studios, ski trails and forest floors, food pantries and assisted living centers. She works with
Williams students who teach and mentor K-6 students at Brayton and Greylock Schools in North Adams. Her research areas of interest include student-driven learning and equity of access in K-12 public education. Adjunct Instructor Bio: Helen Hadani is the Director of Research at the Center for Childhood Creativity (CCC)--the research and advisory division of the Bay Area Discovery Museum (BADM)--and authors publications that synthesize scientific findings on children's learning and cognition for parents and educators.

**Requirements/Evaluation:** final project (individual or collaborative) in a medium of choice, accompanied by an informal presentation; as part of the process in developing their final projects, students will work together to provide feedback to each other prior to presenting their work; a rubric based on the CREATE framework will be available for students to use as a guideline for their projects as they consider pedagogical approaches, design features, and the learning outcomes for young people

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** students who have relevant experience through course- or fieldwork in Psychology and/or education will be given priority

**Grading:** pass/fail only

**Materials/Lab Fee:** $35

**PSYC 31 (W) Senior Thesis: Psychology**

To be taken by students registered for Psychology 493-494.

**Requirements/Evaluation:** determined by faculty

**Prerequisites:** PSYC 493 or NSCI 493

**Enrollment Limit:** POI

**Enrollment Preferences:** all will be enrolled

**Grading:** pass/fail only

Winter 2020

HON Section: 01    TBA    Amie A. Hane

**PSYC 99 (W) Independent Study: Psychology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Winter 2020

**REL 14 (W) Yogic Meditation: A Dynamic Synergy of Experience and Understanding**

Would you like to learn to meditate with ease? Are you interested in texts and explanations that support a meditation practice? This course is an experiential immersion into a deep practice of meditation that works with the nature of the body and the mind. It is also an exploration and familiarization with key ideas and understandings about how meditation actually works. No particular faith or beliefs are necessary for this practice. This course is not about becoming part of any group, but rather establishing yourself in deep meditation practice that supports your life. At the
beginning of the course, you receive personal instruction and learn your meditation practice. Having learned an effective practice you are not required to forcefully concentrate or wrestle with your mind. Instead the practice unfolds naturally. Understanding how this might work involves study. To anchor key understandings of yogic meditation in a larger context, we study important texts from the non-dual Shaiva Tantras. Moreover we delve into some of the roots of this particular meditation practice in the earlier Classical Yoga. In addition to written texts, you will work with audio recordings and study guides that explore both the theory and the practice of Neelakantha Meditation. This particular practice, Neelakantha Meditation as taught in Blue Throat Yoga (https://www.bluethroatyoga.com/), is specifically intended for those of us active in the world. So it is oriented to provide rest, restore well being, and also to up level our capacities for skillful, wise and compassionate activity in the world. This class meets four three hours a week for 1.5 hours to meditate and discuss the foundational concepts. We also learn additional practices that support meditation including chanting, breathing and light yoga asana. On your own you meditate twice a day, read and contemplate texts, listen to audio recordings, and journal. Each week you submit a 3-4 pg. journal reflecting on your practice and study. Individual Personal Instruction in Neelakantha Meditation at taught in Blue Throat Yoga is required, and may take place outside normal class hours January 6-8. Adjunct Instructor Bio: Tasha Judson is director and teacher at Tasha Yoga in Williamstown. She has been teaching yoga asana for over 25 years. In 2016, she became an Authorized Teacher of Neelakantha Meditation as taught in Blue Throat Yoga after eight years of intensive study and practice. She has traveled to India multiple times to related sacred places and communities.

Requirements/Evaluation: three papers of 3-4 pages each

Prerequisites: interest in learning a natural and easeful meditation practice; receiving formal personal meditation instruction is required, and may be scheduled outside posted class times within the first three days of the course

Enrollment Limit: 15

Enrollment Preferences: based on statement of interest and seniority

Grading: pass/fail only

Materials/Lab Fee: $300

Winter 2020

LEC Section: 01 MTWR 1:00 pm - 2:50 pm Natasha Judson

REL 18 (W) Rare and Wondrous Bibles of the Chapin Library

What does a Bible from 1462 feel like? Smell like? In this course, students will touch, smell, and examine early and rare Bibles from the world-class collection of Bibles housed in Williams’s own Chapin Library. Highlights of the collection include multiple significant 15th and 16th century Bibles, as well as a 1611 King James Bible. Through class readings and discussions, as well as a small project, students will learn about the history of the book, the history of the Bible as a book, and the specific histories of one or more rare Chapin Bibles of their choosing. The major project for the course will be for students to experiment with and curate an Instagram account together as an online "exhibit" of the rare and wondrous Bibles of the Chapin Library.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: preference will be given to Religion majors, followed by History majors, and then by seniority

Grading: pass/fail only

Materials/Lab Fee: approximately $80 for books

Winter 2020

LEC Section: 01 TR 1:00 pm - 3:50 pm Phillip J. Webster

REL 19 (W) Charmed: Amulets and Talismans to Protect, Heal, Curse, and Influence Others

For much of human history, if you wanted healing from illness, to get someone to like you, or to make your enemies fail, and you lacked money or political influence, you would turn to an amulet maker. But what were these amulets, how did they function, and how were they made? In this course, we will explore the role of amulets in popular religious cultures around the world, and we'll even take a crack at making our own. This course is recommended for students interested in religion or who want to learn how to get someone to fall in love with them. ;-) Rabbi Seth Wax is the Jewish Chaplain at Williams.
REL 30 (W) Senior Project: Religion
An advanced course for senior Religion majors (who are not writing theses) to further develop their senior seminar paper into a polished 25 page research paper (which will also be the focus of a brown-bag presentation during the spring semester). The course will help the students with general research methods, workshopping, paper writing, and presentation practice.

Class Format: senior project
Grading: pass/fail only

REL 99 (W) Independent Study: Religion
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

RLFR 13 (W) Creative Portraiture in the Darkroom
Cross-listings: ARTS 13 RLFR 13

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to...
use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: knowledge of black and white analog photography is preferred, but not required
Enrollment Limit: 10
Enrollment Preferences: Art major and minors then random
Grading: pass/fail only
Materials/Lab Fee: $120

RLSP 25 (W) Somos Sur: Mexico-Central American Borderlines and Visual Culture
Cross-listings: RLSP 25 LATS 25

Primary Cross-listing
What are borderlines? How have they been created and how do they affect the lives of those who cross or are being crossed by these borders? Motivated by the attention that borders have drawn recently with the caravans of Central Americans traveling north, we propose a trip to Chiapas, Mexico to explore the realities of the communities, activists, and border entities. This trip will engage students with the visual response and the relationship with spaces created in these borderlands. The class will meet for an intensive week of class on-campus with readings and discussion followed by a 10-12 travel to Chiapas with Borderlinks. The Borderlinks pedagogical model is based on “dynamic educational experiences that connect divided communities, raise awareness about the impact of border and immigration policies, and inspire action for social transformation.” Their leaders accompany the delegation at all times. Mellon Post-doctoral Fellow at Williams 2018 - 2020.

RUSS 16  (W)  Russian Spies in DC: FX's *The Americans*

From the beginning of the Cold War to the present, the presence of Russian intelligence operatives in the nation's capital has been the subject of fascination and speculation. In this course, we will examine the FX Channel's series *The Americans*, in light of both the popular imaginary about Russian spies in the United States and the actual history of intelligence wars in Washington. How does the series represent the lives of Russian political and intelligence operatives during the Reagan presidency, and how does it interpret the larger events of the Cold War in its final decade? Readings will draw from accounts on both side of the Cold War, focusing on signature developments such as Jewish immigration from the Soviet Union, the covert biological weapons programs, and Soviet attempts to build relations with progressive movements in the United States. Prior to the beginning of the course, students are expected to view the first two seasons of the series.  Adjunct Instructor Bio: Alexandar Mihailovic has taught at Bennington College, Williams College, and Brown and Columbia Universities. His books include "Corporeal Words: Mikhail Bakhtin's Theology of Discourse," "Mitki: The Art of Postmodern Protest in Russia," and the edited volume "Tchaikovsky and His Contemporaries: A Centenary Symposium." He has also published articles about cultural relations during the Cold War, African-American studies, art history, and cinema studies.

**Requirements/Evaluation:** 10-page paper and final project or presentation

RUSS 25  (W) Williams in Georgia

**Cross-listings:** SPEC 25  RUSS 25

**Primary Cross-listing**

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at *The Georgian Times*, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their overall trip experience.  Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none; knowledge of Russian or Georgian is not required

**Enrollment Limit:** 8

**Enrollment Preferences:** interested students must attend an informational meeting and submit a short essay about their interest in the course

**Grading:** pass/fail only

SOC 11 (W) Excavating the Purple Bubble

Cross-listings:  HIST 11  SOC 11

Primary Cross-listing

People often describe Williams College as an "intense" place--a "purple bubble" with its own peculiar micro-culture. This bubble can be stressful, exhausting, and work-obsessed, but also bursting with creative energy and a determination to change the world, not to mention creating experiences and relationships that become deeply nostalgic and lead to a lasting connection. How have these characteristic structures of feeling been built over time? In this course, we will attempt to build a picture of how the emotional cultures of Williams have evolved by excavating their histories. From the
powerful emotions triggered by transitional moments in the College’s history, such as feelings of inclusion and exclusion by women and people of color, to the everyday emotions of friendship, romance, and work stress, students will analyze materials from the college archives, the archive of the Record, and other sources of institutional memory to uncover the social history of emotions at Williams. Depending on enrollments, students will divide into research clusters focusing on particular topics, which might include: stress and work-obsession, turning points and change, wonder and discovery, nostalgias, staff morale, mental illness and wellness discourse, among other possible topics. Students will spend time in class discussing readings and curating a small collection of archival materials to be presented at the end of the course. Outside class, students will spend time in the archives. As a theoretical and methodological guide, we will draw primarily on scholarship from the sociology and history of emotion, including Norbert Elias, Cas Wouters, Raymond Williams, William Reddy, and Barbara Rosenswein.

Requirements/Evaluation: final project or presentation

SOC 15 (W) Photographic Literacy and Personal Vision

Cross-listings: SOC 15 ANTH 15

Secondary Cross-listing

When you look at a photograph, what is it really saying? How can you make a photograph that says what you want to say? This course is about seeing with emotion and literacy, and making photographs that reflect your own personal voice and vision. This is not a course on technical photography—this is about breaking down the barrier between your ideas and your camera. Students will conceptualize and photograph a project of their own choosing. Whether a narrative documentary project or a more abstract exploration of form, students are expected to photograph on their own outside of class for at least five hours a week. Students must own or borrow a digital camera. Williams has a stock of excellent cameras available for loan. Mondays and Fridays we’ll be looking at amazing historical and contemporary photographic work to cover a broad range of what is possible with the medium and discussing what the current conversations and controversies are within the practice. We’ll be looking at slides, screens, photobooks and gallery shows to get a sense of how photographs function differently depending on how they’re shown. The work we discuss is always adapted to reflect students’ interests. On Wednesdays we critique each others’ work—we look at students’ top images for the week and try to reconcile them against the project’s conceptual basis. We have a focused discussion about each student’s work for 20-30 minutes, and how to make each project better. After critiques I’ll be sending everyone photographic references to use for inspiration depending on your subject matter and aesthetic approach. At the end of the course the class will design and produce a campus exhibition of their photography. This event will serve as a synthesis of all the knowledge students gained while working together to make each others’ projects stronger. No photography experience is necessary! Anyone is ready to start reading photographs critically, and establish a concept-driven workflow that will serve you well as long as you take pictures. Adjunct Instructor Bio: Ben Brody is an award-winning photographer working on long-form projects related to the American wars in Iraq and Afghanistan, and their aftermath. Themes of generational trauma, propaganda, and tragic comedy recur in his visual approach. His new book, Attention Servicemember, published by Red Hook Editions, will be available this fall.

Requirements/Evaluation: final project or presentation

SPEC 10 (W) Counseling Skills Intensive
Whether you want to better support your friends, be more effective as a leader, or pursue a career in the helping professions, good listening and communication skills are essential. This course will prepare you to be a better listener and a more effective, confident communicator. You will learn techniques that help put others at ease while you learn and practice active listening over a variety of topical areas that increase in intensity as we learn and build trust as a group. We will also address what is needed in more charged, personal or urgent situations, exploring our limits, values and responsibilities. You will learn to communicate skillfully about sensitive issues, support others with different experiences/identities than your own, and find your own style in a helping role. Besides improving self-awareness and interpersonal self-confidence, students have found this training applicable to subsequent leadership roles in campus life and beyond. We will meet twice a week for 3 hour sessions. This is an experiential training augmented by relevant readings and out-of-class assignments designed to deepen your understanding and practice of communication, connection and basic counseling skills.  Adjunct Instructor Bio: Karen Theiling is a licensed mental health counselor at Integrative Wellbeing Services and has worked at Williams in this capacity for about 20 years. Though she loves the work of psychotherapy, she is passionate about opportunities to teach students to be more skillful in their lives through teaching, trainings, outreach, and group experiences.  Adjunct Instructor Bio: Laini Sporbert is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

SPEC 11 (W) Climate Justice & Audio Storytelling: Podcasting Climate Change, Equity, and a Sustainable Future
How do issues of climate change and equity intersect? While we've heard that climate change disproportionately affects vulnerable and marginalized
communities, what does that look like, how do those inequities pile up, and what are the avenues of resistance and progress? In this course, students will explore the links between environmental justice and climate justice first in class and then in conversation with members, various communities impacted by climate change and societal inequities, and then weave these stories into compelling audio stories. Students will research climate change impacts and the related inequities in a community with which they have a personal relationship (such as their home community or the greater Northern Berkshires) and conduct interviews with people who can speak from personal experience about how climate change has affected their community and the justice implications. Students will learn interviewing, storytelling, and podcasting best practices in order to gather intriguing stories and to weave those interviews into compelling audio stories that are both rich in content and in sound. Guiding questions will include: How does one tell a story in a way that is universal or at least relevant to one’s intended audience? What are the opportunities to enhance storytelling by using an audio format as the medium? How does one tell a story that honors and doesn't exploit interviewees' experiences. Informative and impressive podcast creations will be used as resources on the Williams sustainability website and will be posted to iTunes and other places where you get your music and podcasts. Assignments will involve listening to and critically analyzing podcasts, writing, editing, and giving positive and constructive feedback to peers. Our time together will be a combination of learning about climate justice, analyzing content and audio choices, practicing interview techniques, and getting feedback from peers. Adjunct Instructor Bio: Mike Evans is the Assistant Director of the Zilkha Center for Environmental Initiatives at Williams College where he delves into issues of sustainable food, waste diversion, the built environment, and equity and justice. Prior to his time at Williams, he worked in the nonprofit world--in Boston, Austin, and Salt Lake City--at organizations focusing on food security, youth development, sustainable agriculture, urban farming, and food justice.

Requirements/Evaluation: participation and a final project audio story
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference will be given to sophomores and juniors and the need to create a group that is diverse in terms of majors and interests
Grading: pass/fail only
Materials/Lab Fee: cost of books

Winter 2020
LEC Section: 01 Cancelled

SPEC 12 (W) Introduction to Advertising and Creativity
First offered in 2019, this course is an introduction to the field of advertising with a special emphasis on creativity. Topics include the nature of brands; how they are created and sustained in today's consumer, media and technology environments; how brands are positioned (and repositioned); how agencies are organized; the role of big ideas in leading brands to success; what distinguishes an effective ad from an ineffective one?; and the vital and powerful importance of creativity in connecting with audiences on multiple platforms. The course will be of interest to students considering a future in advertising, marketing or journalism--but also to anyone curious about the pervasive influence of marketing communications in culture, style and politics. Classes are a combination of lecture and the presentation of short team projects in which students collaborate to research and analyze ads and other communications related to the topic of the day. Final projects include developing and presenting an original ad and a deep dive into a single brand across all media. There will be two, three-hour classes per week. Out-of-class work will include readings, a short reflective final paper and team research projects examining advertising on assigned topics. Adjunct Instructor Bio: Steve Harty '73 worked in advertising for 30 years. Along the way he served major clients like JetBlue, American Express, Ally Bank, Mercedes-Benz, Miller Lite and AT&T working for agencies such as Ogilvy, Lowe and BBH in addition to co-founding Merkley Newman Harty. He is now a strategy consultant and Executive-in-Residence at Columbia Business School. For Williams, Steve is president of his class and a trustee emeritus.

Requirements/Evaluation: short paper and final project or presentation; each student will develop and present a script for an original ad
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: a mix of students from all class years and backgrounds is the goal
Grading: pass/fail only
Materials/Lab Fee: approximately $30 for books

Winter 2020

Cross-listings:  AMST 14  SPEC 14

Secondary Cross-listing

This course will explore the educational experience of Black students as portrayed in popular culture and compare that to the K-12 and higher education literature that documents and examines the lived experiences of Black students. How accurately do we see the experience of Black students represented in popular culture? What choices or biases might be reflected in these depictions? What might the consumption of these media have on the ways in which people build narratives around the experiences of Black students throughout the American educational system? Potential topics include the experience of students at historically Black colleges and universities (A Different World, School Daze, The Quad), experiences in gifted and talented education (Smart Guy, Akeelah and the Bee, Finding Forrester), experiences at predominately White institutions (Higher Learning, Grown-ish, Dear White People), experiences as student-athletes (Love and Basketball, Coach Carter), and experiences in public and public charter schools (Lean on Mean, The Steve Harvey Show, Dangerous Minds, On My Block, Boston Public, Waiting for Superman, The Lottery). Students will be expected to choose some popular culture medium and explore how it connects to the literature in a final paper of 10-12 pages and contribute actively to classroom discussions.

Adjunct Instructor Bio: Christopher Sewell is an Associate Dean of the College at Williams College in Williamstown, Massachusetts. His scholarship focuses on studying the experiences of gifted students of color, how schooling and policies around gifted and talented education affect students of color long-term experiences, the ways in which LGBTQ+ gifted students negotiate their academic, racial and sexual identities, and the experiences of Black students at Predominantly White Institutions.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference given to first-years and seniors

Grading: pass/fail only

Materials/Lab Fee: $25

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 14 SPEC 14

Winter 2020
**SPEC 15 (W) An Introduction to Spatial Science and GIS**

**Cross-listings:** SPEC 15 ANSO 15

**Secondary Cross-listing**

Space and place are so ubiquitous in our lived experience that we often fail to take their significance into account when directing and designing scientific research. How do spatial relations (presence/absence, proximity, preference/avoidance) shape natural and cultural phenomena? How do space and place reflect cultural perceptions and practices? How are landscapes and environments engineered to shape individual and social behavior? This intensive course explores the fundamentals of spatial theory and methods, with an emphasis on technical skill, data evaluation, and research design. Through readings, lectures, discussions, and exercises you will be encouraged to think spatially and to apply spatial thinking to your areas of interest. Priority for enrolling in this course will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis. Students who have not taken GEOS 214 have enrollment preference in this course; this course is not a prerequisite for GEOS 214 and students who take this course may also take GEOS 214.

**Requirements/Evaluation:** combination of class participation, short essays on assigned readings, successful completion of class exercises, and a 10-page research design paper

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** Priority will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis; students who have not taken GEOS 214 have preference in this course; this is not a prerequisite for GEOS 214

**Grading:** pass/fail only

**Materials/Lab Fee:** approximately $70 for books

This course is cross-listed and the prefixes carry the following divisional credit:

**SPEC 16 (W) Liberal Arts for Epic Challenges: Design Thinking for Social Change**

A workshop that will involve learning and applying design thinking techniques to develop creative human-centered solutions to a significant, complex social problem, like loneliness in the community or transforming travel around small towns. The actual topic will be one of several proposed in a global competition from London's Royal Society of Arts; course projects will be submitted against students from around the world in March. Work will occur in two teams; the experience will emphasize techniques for creative confidence, learning to take risks and advance from failures, creative collaboration, and focusing problem solving on human-centered solutions-similar to how innovation is explored in design firms, start-ups, government agencies, and NGOs. The workshop will meet twice a week for 3 hours. There are few readings (mostly manuals on techniques from leading consultancies), but will involve ethnographic research in observing and exploring how real people perceive the problem and solution and team meetings between classes to brainstorm ideas. For more on design thinking, see Williams.edu/designthinking.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** experience, curiosity, interests of students in applying problem solving techniques to complex world problems

**Grading:** pass/fail only

Winter 2020

LEC Section: 01 TR 10:00 am - 11:50 am Ric Grefé

---

**SPEC 17 (W) Emergent Strategy: Creating Systemic Change from Small to Large**
Albert Einstein said “we cannot solve our problems with the same level of thinking that created them,” encouraging us to rethink our assumptions and process for instigating change. But what kind of thinking and process should we use to solve our problems? This course will use the guiding principles of adrienne maree brown's Emergent Strategy to explore how to build the community and the economic, political, social, and interpersonal systems that we want to see in the world. We need not confine ourselves, in defeat, to incremental lifestyle changes because we feel we do not have the power to incite large scale change; rather we will work to embody, through a varied practice of reflection, movement work, conversation, facilitation, and peer-to-peer dialogue and mediation, the world we want to construct. How can we institutionalize justice and sustainability in the place of institutional racism, heteropatriarchy, xenophobia, exploitation etc.? We will explore how systems of oppression shape and intersect with daily habits and community structures even as we build movements to overcome these oppressive systems. For instance how can we challenge our inclination for hierarchical and majority-rules group governance, or how do we create and maintain boundaries for working relationships that effectively disrupt implicit biases and inherent power imbalances? The course will meet frequently with practitioners, educators, and researchers who are doing movement building work. Students will learn facilitation skills and use systems theory throughout course discussions in order to address challenging topics that they identify. This course relies on numerous perspectives from readings, audio stories, and in-person/video conversations with movement builders from on campus and across the Northeast. Adjunct Instructor Bio: Caroline Bruno is the Sustainability Coordinator at the Zilkha Center for Environmental Initiatives and works to incite and connect conversations across campus about enacting social change, meaningful community involvement, environmental justice and sustainability.

Requirements/Evaluation: the course will focus heavily on personal reflection and active participation, including a final reflection paper and an outline for a teach-in/session created by the class to be presented at Claiming Williams Day 2020 and other points throughout the end of Winter Study and/or Spring Semester

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students will be asked to write 1-2 paragraphs explaining their interest in the course; preference will go to students demonstrating passion and nuanced thinking related to the subject matter

Grading: pass/fail only

Materials/Lab Fee: cost of books

Winter 2020

LEC Section: 01 TWR 1:00 pm - 2:50 pm Caroline Bruno

SPEC 18 (W) Peer Health Call In Walk In Training

Cross-listings: PSYC 18 SPEC 18

Primary Cross-listing

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies. Adjunct Instructor Bio: Laini is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: current members of Peer Health will be chosen first; other students will be enrolled based on stated commitment to Peer Health

Grading: pass/fail only

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 18 SPEC 18

Winter 2020
SPEC 19 (W) Healthcare Internships

Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which health care is delivered. Students will be introduced to fundamental concepts related to patient interviewing and history taking, diagnosis and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus— from the perspective of the individual provider-patient relationship and within a systems-level context. Didactic sessions for (on-campus students) will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally. Students will be introduced to concepts of health and wellness, epigenetics, and environmental influences that have a demonstrable, sustained impact on individuals before and after clinical symptoms of illness emerge. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and factors affecting the health of individuals and communities.

Requirements/Evaluation: 10-page paper
Prerequisites: not open to first-years
Enrollment Preferences: grade level and potential as applicant to professional programs
Grading: pass/fail only

SPEC 20 (W) The Writing Process: from Inquiry to Essay

In a perfect world, we all have a fully-developed, time-proven writing process. It's the approach that you read about in well-intended books on effective writing and that professors occasionally recommend, where you start an essay well before the deadline, progressing thoughtfully and methodically toward a completed essay that is thoughtful, effective, and on time. But for most of us, the reality falls well short of that ideal. We procrastinate, stress out, glare at the empty computer screen, and ultimately rush at the last minute to crank out something that hopefully fulfills the assignment. In fact, for many, this is the only way essays get written. This course provides an opportunity for you to develop a better approach to writing assignments: one where completing an essay is less about a looming deadline and more about the meaningful exploration and masterful articulation of your ideas. Each class meeting will be a writing workshop guided by prompts that will navigate you through the cumulative process of composing a single essay. You'll leave the course with a fresh outlook on the real purpose of academic writing and new methods for approaching essay assignment in your classes. Whether you're a first-year student still getting a feel for college writing or senior finally hoping to make writing more manageable, this course will help you develop the writing process that works for you. Topics covered will include: * attending to the writing assignment * finding a meaningful topic * developing an effective argument * incorporating research * determining structure and organization * understanding voice and style * appreciating the impact of audience

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: preference will be given to first-year students
Grading: pass/fail only
Materials/Lab Fee: approximately $25 for books

SPEC 21 (W) Experience in the Workplace; an Internship with Williams Alumni/Parents
Field experience is a critical component of the decision to enter a profession. Through these field placements, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. In order to participate in this course, students must apply to the winter study internships listed in this syllabus. The expectation is that each student will observe and participate in some aspect of the profession for at least 30 hours per week, 6 hours per day for 5 days each week. It is also expected that the instructor will assign a specific project to be completed within the 3-4 week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization, and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience.

Teaching Associates: Williams College Alumni/Parents will be recruited to become teaching associates for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course instructor in person or via telephone conference. Students will be required to read one of two books selected for this course. Bibliography: a bibliography of readings would be selected from such works as: *What Should I do with My Life?* by Po Bronson; 2003; *Working* by Studs Terkel, 2004.

**Requirements/Evaluation:** it is expected that students will complete assigned readings (read one of two books assigned to this course), write a daily journal, and write a 5- to 7-page expository review; evaluation will become public record as a resource for other students

**Prerequisites:** interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific WS internships listed in the SPEC 21 syllabus; application are submitted via Handshake

**Enrollment Preferences:** 1st priority--students applying for winter study internships listed in the SPEC 21 syllabus; 2nd priority--students developing independent Internships with Williams alumni/parents; first-years limited to applying for local internships

**Grading:** pass/fail only

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

**SPEC 22  (W) Outdoor Emergency Care**

**Cross-listings:** SPEC 22  LEAD 22

**Secondary Cross-listing**

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon: 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques. Specifically, the course teaches how to recognize and provide emergency medical care for: - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, sprains, etc.) - Shock, Respiratory, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. *Attendance at all classes is mandatory.* The course is limited to 12 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Tom Feist is an alumnus of Williams College (’85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

**Requirements/Evaluation:** completion of daily homework; written and practical final exam

**Prerequisites:** none

**Enrollment Limit:** 12
Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading: pass/fail only

Materials/Lab Fee: $180 and approximately $110 for books

SPEC 24 (W) Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs—estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

Class Format: wsp internship

Requirements/Evaluation: Evaluation will be based on a journal and a 5-page paper

Prerequisites: prerequisites: Sophomore, Junior or Senior standing; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: statement of interest

Grading: pass/fail only

Materials/Lab Fee: $400

SPEC 25 (W) Williams in Georgia

Cross-listings: SPEC 25 RUSS 25

Secondary Cross-listing

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their overall trip experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Requirements/Evaluation: 10-page paper
**Prerequisites:** none; knowledge of Russian or Georgian is not required

**Enrollment Limit:** 8

**Enrollment Preferences:** interested students must attend an informational meeting and submit a short essay about their interest in the course

**Grading:** pass/fail only

**SPEC 26 (W) Essentials for Entrepreneurship: An Immersion In the San Francisco Start-Up Culture**

Interested inEntrepreneurship and seeing first-hand what it takes to launch a venture? Visit over ten startups in the Bay area to find out! This course is designed to give students interested in Entrepreneurship in-depth insight into the Customer Discovery process, i.e. how startups figure out if their ideas are worth pursuing. We will meet with the founders of 10-15 start-ups in the Bay Area and track their professional and personal journeys. We will look at the impact of company culture, the Bay Area ecosystem and values, financing, and how a Liberal Arts background prepares students for the challenges of entrepreneurship. Student teams will have the opportunity to work on an actual project for one or more of the companies to be visited and present their findings to senior management. We will also visit the Google campus and Stanford School. While many of the companies will be technology driven, no technical background is needed and we will strive to have a diverse background in the class. The course will start in Williamstown with a review of idea development tools used in today's startup environment, particularly those pioneered by Stanford d.School called the Business Model Canvas. Workshops on Design Thinking and maximizing the Williams network will round out the pre-trip coursework. Reading will include "The Lean Startup" by Eric Ries, "Zero to One" by Peter Thiel and Edward deBono's "Thinking Course" as well as articles and podcasts. Then we will go see what is actually happening in the market! Meeting times: 1/6/20 - 1/14/20 Williamstown. 10am-1pm 1/15/20 travel to San Francisco 1/16/20-1/28/20 San Francisco 10am-5pm or as needed based upon project 1/29/20 Travel back to Williamstown  Adjunct Instructor Bio: Tonio Palmer is the Entrepreneur in Residence at Williams. Tonio has had a long career in international business and founded a number of companies. He holds an MBA from Wharton and MA from UPenn as a graduate of the Lauder Institute.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none; not open to first-year students

**Enrollment Limit:** 12

**Enrollment Preferences:** preference given to students with a demonstrated interest in entrepreneurship

**SPEC 27 (W) Community Development Health and Education Work Project in Liberia, W. Africa**

Interested in a great opportunity to immerse yourself in the culture of West Africa and do some service work at the same time? This course will explore the close historical ties that exist between Liberia, the US and Williams and how NGO's have succeeded and not succeeded. We'll experience rural living in the tropical environment of the interior of Liberia as we work in the River Gee county. Our project will include health care and preparing classes to be presented in the local schools. We will be directed and supported by the Honorable Francis Dopoh, II, CDE class of 2010 who represents this county in the Liberian Congress.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** informational and training meetings with the instructor and some reading of current books on Liberia, eg. "The House at Sugar Beach" by Helene Cooper
Enrollment Limit: 8
Enrollment Preferences: any student interested in this offering will be required to attend an informational meeting and be required to submit a written statement of purpose as to why they want to participate and what they hope to gain from this experience
Grading: pass/fail only
Materials/Lab Fee: $3,150

SPEC 28 (W) The GYROKINESIS® Movement Method
Cross-listings: DANC 16 SPEC 28

Primary Cross-listing
The Gyrokinesis Method is an original and unique movement practice, which has roots in Yoga, Tai Chi, gymnastics, dance and swimming. This method gently works the entire body, opening energy pathways, stimulating the nervous system, increasing range of motion and creating functional strength through rhythmic, flowing movement sequences performed with corresponding breathing patterns. We will work in a group setting. Students will learn the basic concepts of this movement system, as well as more complex sequences. They will be expected to learn and execute all sequences for Format I. They will be asked to practice between classes. Ultimately, students will be paired up to teach each other, which will increase their understanding of this unique form of exercise. Finally, students will be expected to perform all Format I sequences as a group with music. They will then be qualified to take the Gyrokinesis Pre-training Course. Each student will receive a questionnaire at the beginning of the course and, again, at the end, to understand how their experience has changed their answers and how they can apply this movement system to their everyday life, their sport and, their chosen course of study at Williams. Method of evaluation/requirements: Questionnaire at the beginning and then again at the end of this course, teaching each other, and a final performance as a group. Adjunct Instructor Bio: Patrie Sardo has been a Licensed Gyrotonic & Gyrokinesis Trainer and Pre-Trainer for over 10 years. She owns her own studio in Santa Monica, Ca and is licensed to teach all Gyrotonic Specialty equipment; Archway, Jumping Stretching Board, Leg Extension, and the Gyrotoner.
Requirements/Evaluation: short paper and final project or presentation

SPEC 29 (W) Introductory Photography: People and Places
Cross-listings: SPEC 29 MATH 14

Secondary Cross-listing
This is an introductory course in photography, both color and black & white photography, and using the digital camera. The main themes will be people and the landscape. No previous knowledge is assumed, but students are expected to have access to a 35 mm (or equivalent) digital camera, with manual override or aperture priority. The topics covered will include composition, exposure, camera use, direction and properties of light, and digital imaging. Students will develop their eye through the study of the work of well-known photographers and the critical analysis of their own work. We will discuss the work of contemporary photographers such as Mary Ellen Mark, Joel Meyerowitz, Constantine Manos, and Eugene Richards. Students will be expected to spend a considerable amount of time practicing their own photography outside of class. There will be three required local half-day field trips. Students will also be introduced to Photoshop and Lightroom, and will work on their own images with these programs. In 2010 Adjunct Instructor Bio: Mr. Washburne joined the stable of photographic artists who are represented by the Sun to Moon gallery in Dallas. Since then he has
worked exclusively as a fine art photographer concentrating on landscapes, abstracts and street shooting. He also published travel stories alongside his photography in both D Magazine and The Robb Report.

Requirements/Evaluation: class participation, an in-class quiz and a final project
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: e-mail questionnaire
Grading: pass/fail only
Materials/Lab Fee: $35 and cost of books

STAT 10 (W) Interactive Data Visualization
Data visualization is an important means of detecting patterns in data and communicating results to the public. However, if designed poorly, data visualizations can also be ineffective or misleading. Tools for interactive data visualization have become increasingly popular in recent years, giving viewers more autonomy in data exploration. In this course, we will learn techniques for effective data visualization and use these criteria to evaluate visualizations (both static and interactive) in academic publications and in the news. This class will meet about 8 hours per week for lecture and discussion. In addition to participating in class discussions, students will be expected to keep a daily journal, complete short R programming exercises, and create a final project using interactive data visualization tools such as R Shiny.
Requirements/Evaluation: class participation, daily journal, final project and presentation
Prerequisites: some experience in R programming
Enrollment Limit: 15
Enrollment Preferences: preference will be given based on a one-paragraph explanation of the student's interest in the course
Grading: pass/fail only

STAT 11 (W) Introduction to Statistical Analysis of Network Data
Networks are everywhere in our connected world, from social networks like facebook and twitter, to information networks like citation and coauthors, from biological network like neural and ecological networks, to technological networks like internet connection or power grids. In recent years, there has been an explosion of network data. How do we learn and represent information from these data? In this course, you will see examples from different types of networks. We will learn how to organize, visualize and describe network data using proper tools. Additionally, since things are connected in networks, we will also explore statistical methods to overcome this challenge with dependent data. Tentatively course work includes 2-3 class meetings per weeks for lectures and assignments. Students are also expected to read related materials and finish a final project.

Requirements/Evaluation: final project or presentation
Prerequisites: STAT 201 or equivalent
Enrollment Limit: 10
Enrollment Preferences: students with more statistics background and experience with R have priority
Grading: pass/fail only

Winter 2020

STAT 20 (W) The History, Geography and Economics of the Wines of France
The history of wine making in France is long, dating back to the Greeks and later the Romans. Of course, geography and climate play an essential and important role in grape growing. The first areas to be planted were the areas around present day Marseille, (Massalia in Ancient Greece) in Provence, and the areas just north farther up the Rhône river valley. We will briefly survey the history of wine in France from the Romans through the middle ages, the influence of monasteries on wine production, the impact of the French revolution and the evolution of the modern classification system in the 19th century, which is still in place today. We will look at temperature data and study the relationship between temperature change and quality. We will discuss the impact of wine "scorers" such as Robert Parker as his influence on the economics of the French wine market. Finally, we will discuss the role of wine in French cuisine and the importance of wine to French culture. SELECTED REFERENCES [1] Climate, hydrology, land use, and environmental degradation in the lower Rhone Valley during the Roman period, SE Van der Leeuw - Comptes Rendu, Geosciences, 2005, Elsevier [2] The red and the white : a history of wine in France and Italy in the nineteenth century / by Leo A. STS 14 (W) Ethics of Technology

Cross-listings: CSCI 14 PHIL 14 STS 14

Secondary Cross-listing

A prominent company recently realized the machine-learning algorithm trained on its past hiring data had learned a bias against female candidates and so was unsuitable for resume evaluation. But given competing definitions of fairness, how should we decide what it means for an algorithm to be unbiased? Machine vision algorithms are systematically less likely to recognize faces of people of color. Since many face recognition algorithms are used for surveillance, would improving these algorithms promote justice? Deep fakes may pose serious challenges to democratic discourse, as faked videos of political leaders making incendiary statements cast doubt on the provenance of real videos. Do the researchers developing these algorithms, often academics funded by National Science Foundation grants, have an obligation to desist? In a field filled with such vexing questions, the ethical issue most commonly addressed by the media is whether a self-driving car should swerve to hit one person in order to avoid hitting two. In this class, we will go beyond the headlines to explore the ethics of technology. We will discuss issues such as transparency, bias and fairness, surveillance, automation and work, the politics of artifacts, the epistemology of deep fakes, and more. Our discussion will rely on articles from the course packet, enlivened by discussions with experts in the field over Skype. Students will apply their ethical knowledge to write multiple newspaper length op-eds arguing for their views. If students choose to submit these op-eds for publication, the instructor will coach them on appropriate procedures and venues. Adjunct Instructor Bio: Kathleen Creel ’10 is an advanced doctoral student in the Department of History & Philosophy of Science at the University of Pittsburgh. Her research focuses on epistemic and ethical issues in computer science and its scientific applications, such as transparency in machine learning and the ability of algorithmic decisions to provide reasons.

Requirements/Evaluation: 3 op-eds for a total of 10 pages
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: based on a written paragraph expressing interest
Grading: pass/fail only
Materials/Lab Fee: $20

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 18 (W) Honors Devised Performance Intensive
This Winter Study course will act as an incubator for one or more Theatre Department productions led by students seeking a degree with Honors in Theatre, which are being developed as "devised" works. "Devised performance" is an umbrella term for ensemble-based approaches to making art using research, improvisation, and in-progress showings in a holistic, creative process to produce new and innovative performance work. By looking beyond the traditional roles, structures, and specializations of mainstream theater, today's most compelling devised theater artists have sought out creative paradigms of shared responsibility, flattened hierarchies, and communication across disciplines. The ensemble or ensembles in question will be formed during the fall semester, begin their devising process during Winter Study and continue into the Spring Semester, with performances in the weeks following spring break. Students wishing to enroll in this Winter Study course may do so as members of the ensemble (which can involve work in acting, design, or technical and support roles) with permission of the instructor. Students may also participate in any of these various functions in the production, including acting, even if they do not choose to enroll in the Winter Study course. In addition to the normal activities associated with a devising process and the development of a new performance piece, students in the Winter Study course will participate in a work-in-progress showing, or produce a written paper or portfolio, in the last week of January documenting their work to date on the project.
Requirements/Evaluation: final project or presentation
Prerequisites: permission of instructor
Enrollment Limit: POI
Enrollment Preferences: permission of instructor
Grading: pass/fail only
Materials/Lab Fee: $15 and cost of books

LEC Section: 01    TBA    David Gürçay-Morris

THEA 19 (W) Williams on Stage: Workshopping an Original Play
Denmark has "Hamlet." New Orleans has "A Streetcar Named Desire." Oklahoma has "Oklahoma!" But where is the play about Williams College? Where's the dramatic work that explores the history, mythology, and identity of this special place? How do we dramatize pivotal moments through which Williams became itself, and the ways in which it both changes and remains constant? Students taking this Winter Study course will help workshop an original new play about Williams College past, developed with and directed by Professor Omar Sangare, and written by Ilya Khodosh '08,
who will be teaching THEA 214: Writing for Stage and Screen in the spring semester. Our work will culminate in a reading that may lead to a full production, coinciding with our campus-wide celebration of the 90th birthday of Stephen Sondheim '50. Adjunct Instructor Bio: Ilya Khodosh '08 received his D.F.A. from the Yale School of Drama. This spring, he will be teaching THEA 214 Writing for Stage and Screen.

**Requirements/Evaluation:** students taking this Winter Study course will help workshop an original new play about Williams College past, developed with and directed by Professor Omar Sangare, and written by Ilya Khodosh '08

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** permission by instructor

**Grading:** pass/fail only

---

**THEA 22 (W) A Filmmaking Intensive**

This course involves students in every aspect of film production. The product of this workshop will be a collection of short films written, acted, designed, directed and edited by the class. In the first week we will break up into groups of four and write. The writing process will be enhanced by a master class led by a notable tv/screenwriter. Week 2 will focus on rehearsal, production design, and making a shot list; a master class in acting technique and direction for film will support the work. Then in week 3: Filming! We will shoot on location in and around campus, town and adjoining areas. Finally, the last week will be all about editing and post-production (music and sound mix). At the end of Winter Study we will hold a screening of our films with an invited audience. The class will expect 12 hours minimum of class time each week (three 4-hour classes) plus additional hours outside of schedule class time for rehearsal, costume and set assembly, foundational film viewing and related reading assignments. This is your crash course in how to make a film! Adjunct Instructor Bio: Jessica Hecht is known to television audiences as "Susan Bunch" on the iconic television series *Friends* and "Gretchen Schwarz" on *Breaking Bad*. She has also played memorable roles on *Bored to Death*, *High Maintenance*, *Red Oaks*, and *Succession*. Presently she stars in the Netflix series *Special*. An acclaimed stage actress, Hecht has appeared on Broadway in revivals of *The Price* opposite Mark Ruffalo, *Fiddler on the Roof* opposite Danny Burstein, *The Assembled Parties* opposite Judith Light, *Harvey* opposite Jim Parsons, *After the Fall* opposite Carla Gugino, *The Last Night of Ballyhoo* opposite Paul Rudd, *Brighton Beach Memoirs* opposite Laurie Metcalf, *Julius Caesar* opposite Denzel Washington, and *A View from the Bridge* opposite Liev Schreiber and Scarlett Johansson for which she was nominated for a Tony Award for her performance. She recently appeared on stage at Lincoln Center Theater in *Admissions* for which she received an Obie Award and was also nominated for an Outer Critics Circle Award. Her foundation, The Campfire Project, brings theatre and wellness into Greek refugee camps [www.campfire-project.org](http://www.campfire-project.org).

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** one semester of theatre, art or writing

**Enrollment Limit:** 24

**Enrollment Preferences:** based on a paragraph of stated interest in making a film

**Grading:** pass/fail only

**Materials/Lab Fee:** $25

WGSS 10 (W) Inventing Joan of Arc: The History of a Hero(ine) in Pictures and Film
Cross-listings: WGSS 10 ARTH 10
Secondary Cross-listing
Joan of Arc (known during her own lifetime most commonly as Jeanne "la Pucelle," or Joan "the Maid") was one of the most dynamic and yet enigmatic personalities of the European Middle Ages. Born into a peasant family in the French border province of Lorraine in 1412, she gained control of an army, won brilliant military victories, crowned a king, and was burnt at the stake as a heretic, all before her twentieth birthday. Triply marginalized by gender, age, and socio-economic status, she nonetheless managed to shake the Church and State establishments to their very core. But who was Joan of Arc? Nationalist martyr? Pioneer feminist? Champion of the people? Instrument of God's grace? Victim of post-traumatic stress disorder? Exemplary transgender warrior? Over the centuries since her death, artists—and not just politicians and scholars—have attempted to answer this...
question, creating myriad visions of la Pucelle under the influence of an ever-changing lens of contemporary tastes and concerns. Through readings and discussion, this course will survey the history of representations of Joan of Arc in painting, prints, sculpture, and film, from the time of her death to the present.

Requirements/Evaluation: 10-page project or comparable creative project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: statement of interest
Grading: pass/fail only

AMST 12  (W)  Podcasting: Writing and Producing for the Ear

Anyone can make a podcast. But is it a podcast worth listening to? Or is it just another hot take recorded poorly in a closet? This hands-on course, taught by former National Public Radio correspondent Elizabeth Arnold, will introduce you to the art of writing and producing audio through the creation of your own podcast. Audio is compelling because of the power of sound to tell a story, the expressiveness of the human voice and the intimacy of the medium. Classes will cover the basics: from how to write for the ear to multi-track mixing. Students will learn to record, edit and critique their own short audio stories and develop the first episode of a podcast for broadcast. The in-class portion of the course will focus on interviewing and production skills, along with critiques of outside-of-class audio assignments. Assignments will include listening to a range of audio stories and podcasts. With student consent, final projects may be submitted for broadcast. Adjunct Instructor Bio: Elizabeth Arnold is a former National Public Radio (NPR) White House and Congressional correspondent. For more than twenty years, she covered politics and the environment in the U.S. China and Russia. She currently teaches journalism at the University of Alaska and reports on climate change in the Arctic.

Requirements/Evaluation: grade will be based on both weekly audio story assignments and a final project which is the first episode of a podcast, suitable for broadcast; the final project must also include a storyboard and outline of content for the continuation of the series
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: if necessary, preference will be given based on expressed interest in the course
Grading: pass/fail only
AMST 14  (W) Race, Education, and Pop Culture

Cross-listings: AMST 14  SPEC 14

Primary Cross-listing

This course will explore the educational experience of Black students as portrayed in popular culture and compare that to the K-12 and higher education literature that documents and examines the lived experiences of Black students. How accurately do we see the experience of Black students represented in popular culture? What choices or biases might be reflected in these depictions? What might the consumption of these media have on the ways in which people build narratives around the experiences of Black students throughout the American educational system? Potential topics include the experience of students at historically Black colleges and universities (A Different World, School Daze, The Quad), experiences in gifted and talented education (Smart Guy, Akeelah and the Bee, Finding Forrester), experiences at predominately White institutions (Higher Learning, Grown-ish, Dear White People), experiences as student-athletes (Love and Basketball, Coach Carter), and experiences in public and public charter schools (Lean on Mean, The Steve Harvey Show, Dangerous Minds, On My Block, Boston Public, Waiting for Superman, The Lottery). Students will be expected to choose some popular culture medium and explore how it connects to the literature in a final paper of 10-12 pages and contribute actively to classroom discussions.

Adjunct Instructor Bio: Christopher Sewell is an Associate Dean of the College at Williams College in Williamstown, Massachusetts. His scholarship focuses on studying the experiences of gifted students of color, how schooling and policies around gifted and talented education affect students of color long-term experiences, the ways in which LGBTQ+ gifted students negotiate their academic, racial and sexual identities, and the experiences of Black students at Predominantly White Institutions.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference given to first-years and seniors

Grading: pass/fail only

Materials/Lab Fee: $25

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 14 SPEC 14

AMST 15  (W) Contemporary American Songwriting

Cross-listings: MUS 15  AMST 15

Secondary Cross-listing

This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class.

Adjunct Instructor Bio: Singer/Songwriter Bernice Lewis has been teaching her Winter Study Course on performing and songwriting since 1995. She is also a published poet, a producer, and a sought after coach. She holds an M.Ed from the University of Massachusetts in Amherst.

Requirements/Evaluation: final performance and a 2- to 3-page paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: at the discretion of the instructor
Grading: pass/fail only

Materials/Lab Fee: $35 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

ANSO 11 (W) Introduction to Indian Cuisine
India is a diverse country. The ingredients and dishes cooked in the Northern part of India vary immensely from those cooked in the South and coastal regions. This course will begin with an introduction into the origin and use of spices in Indian cooking and then go into a hands-on demonstration of some popular dishes from the above regions of India. The focus will be to learn to cook healthy vegetarian food, but we will also be making the popular chicken tikka masala. The class will meet for 6 hours each week (January 7, 8, 14, 15, 28, and 29, plus compulsory field trip). There will be assigned readings and a compulsory 3-day trip to New York (January 20-22) where we visit restaurants and spice markets in the boroughs of Manhattan and Queens to further your understanding of the diversity within the Indian cuisine. The trip will feature cooking demonstrations at various restaurants, including one with the chef from the Pierre. The course will require students to create a food blog, post photographs, and make a number of blog entries about the Indian cuisine. Final evaluation will be based on a cooking project as well as the quality of blog entries.

Adjunct Instructor Bio: Ramaa Reddy Raghavan is a freelance broadcast and print journalist who is passionate about food and travel. She is a graduate of the Columbia School of Journalism. Her work has been published in Huffington Post, NBC, WHYY, BBC, NPR, and PRI's The World.

Requirements/Evaluation: final project or presentation and blog entries

Prerequisites: interest in food and cooking

Enrollment Limit: 8

Enrollment Preferences: students will be selected on a written 350 word piece as to why they want to be in the class

Grading: pass/fail only

Materials/Lab Fee: $420

Winter 2020
ANSO 15 (W) An Introduction to Spatial Science and GIS

Cross-listings: SPEC 15 ANSO 15

Primary Cross-listing

Space and place are so ubiquitous in our lived experience that we often fail to take their significance into account when directing and designing scientific research. How do spatial relations (presence/absence, proximity, preference/avoidance) shape natural and cultural phenomena? How do space and place reflect cultural perceptions and practices? How are landscapes and environments engineered to shape individual and social behavior? This intensive course explores the fundamentals of spatial theory and methods, with an emphasis on technical skill, data evaluation, and research design. Through readings, lectures, discussions, and exercises you will be encouraged to think spatially and to apply spatial thinking to your areas of interest. Priority for enrolling in this course will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis. Students who have not taken GEOS 214 have enrollment preference in this course; this course is not a prerequisite for GEOS 214 and students who take this course may also take GEOS 214.

Requirements/Evaluation: combination of class participation, short essays on assigned readings, successful completion of class exercises, and a 10-page research design paper

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: Priority will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis; students who have not taken GEOS 214 have preference in this course; this is not a prerequisite for GEOS 214

Grading: pass/fail only

Materials/Lab Fee: approximately $70 for books

This course is cross-listed and the prefixes carry the following divisional credit:

SPEC 15 ANSO 15

Winter 2020

ANSO 16 (W) Jacques Ellul's The Technological Society

The work of the late French historian and sociologist Jacques Ellul (1912-1994) suffers from nothing less than a tragic paradox. On the one side, there is arguably no one whose sociohistorical analyses have done more to explicate the relationship between technology and the most pressing issues of our day. On the other side, despite the profundity and contemporary relevance of Ellul's work, it has been widely misinterpreted, dismissed as both "pessimistic" and "technologically deterministic." This course invites students to carry out a close reading of Ellul's most (in)famous study--The Technological Society (1964). We will situate this text relative to the circumstances in which Ellul lived and worked, and in relation to his two principle influences: Karl Marx and Søren Kierkegaard. Together, we will then work our way through the text's key themes: Ellul's distinction between technology and technique and the latter's distinctly modern characteristics; technique and economy; technique and the state; and finally, human techniques (e.g. therapy, medicine, management, education, propaganda, sport). In the course of proceeding as such, students will be asked to consider, critique, and elaborate Ellul's ideas in light of contemporary technological developments.

Requirements/Evaluation: several short papers and class presentations

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students will be asked to submit a brief statement of interest

Grading: pass/fail only

Materials/Lab Fee: approximately $14 for books

Winter 2020
ANSO 99 (W) Independent Study: Anthropology & Sociology

ANTH 15 (W) Photographic Literacy and Personal Vision

Cross-listings: SOC 15 ANTH 15

Primary Cross-listing

When you look at a photograph, what is it really saying? How can you make a photograph that says what you want to say? This course is about seeing with emotion and literacy, and making photographs that reflect your own personal voice and vision. This is not a course on technical photography--this is about breaking down the barrier between your ideas and your camera. Students will conceptualize and photograph a project of their own choosing. Whether a narrative documentary project or a more abstract exploration of form, students are expected to photograph on their own outside of class for at least five hours a week. Students must own or borrow a digital camera. Williams has a stock of excellent cameras available for loan. Mondays and Fridays we'll be looking at amazing historical and contemporary photographic work to cover a broad range of what is possible with the medium and discussing what the current conversations and controversies are within the practice. We'll be looking at slides, screens, photobooks and gallery shows to get a sense of how photographs function differently depending on how they're shown. The work we discuss is always adapted to reflect students' interests. On Wednesdays we critique each others' work--we look at students' top images for the week and try to reconcile them against the project's conceptual basis. We have a focused discussion about each student's work for 20-30 minutes, and how to make each project better. After critiques I'll be sending everyone photographic references to use for inspiration depending on your subject matter and aesthetic approach. At the end of the course the class will design and produce a campus exhibition of their photography. This event will serve as a synthesis of all the knowledge students gained while working together to make each others' projects stronger. No photography experience is necessary! Anyone is ready to start reading photographs critically, and establish a concept-driven workflow that will serve you well as long as you take pictures. Adjunct Instructor Bio: Ben Brody is an award-winning photographer working on long-form projects related to the American wars in Iraq and Afghanistan, and their aftermath. Themes of generational trauma, propaganda, and tragic comedy recur in his visual approach. His new book, Attention Servicemember, published by Red Hook Editions, will be available this fall.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: instructor will determine selection
Grading: pass/fail only

ANTH 16 (W) Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

Cross-listings: ANTH 16 ENVI 17

Primary Cross-listing

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize
Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to "care" for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students’ understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: seniority; students may be asked to send the instructor an email explaining why they are interested in the course
Grading: pass/fail only
Materials/Lab Fee: approximately $80 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 16 ENVI 17

Winter 2020
LEC Section: 01 Cancelled

Winter 2020
HON Section: 01 TBA James L. Nolan

ANTH 99 (W) Independent Study: Anthropology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only

Winter 2020
IND Section: 01 TBA James L. Nolan

ARAB 10 (W) Cooking Moroccan Food From Couscous to Tea
Students enrolled in this course will learn about the history of Moroccan cuisine and its uses in activism before engaging in cooking Moroccan dishes themselves. From couscous to mint tea, Moroccan cuisine's history encompasses colonial legacies, state-building efforts, and histories of importation of spices and ingredients from exotic places. State legitimacy and social prominence required the royal court, governors, and wealthy individuals to present their guests with the most exquisite dishes to mark their status and entrench their prominence in their communities. Historically, Moroccan Sultans and governors contributed to the creation of a distinct Moroccan cuisine with its set of rituals and traditions that are still observed in the official arenas today. However, the last twenty years have witnessed the emergence of a strong civil society alongside women's organizations whose investment in revenue-generating projects as a way to empower women has transformed Moroccan cuisine. In this context, cuisine has become a site of liberation, democratization, and search of equality in the Morocco. Moreover, these transformative projects draw on culinary memory to effectuate change within continuity in a country that has been in transition for a while. The first week of the course will be dedicated to the discussion of Moroccan cuisine and the ways in which cuisine relates to state policies and civil society's activism. The second and the third weeks will be organized in the form of workshops to train students to cook Moroccan tajine, tea, lamsmen, baghrir, omelettes, couscous, cookies, soups, and other dishes. All students are required to participate actively in the culinary workshop throughout the duration of the winter study course.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: interview
Grading: pass/fail only
Materials/Lab Fee: $80

ARAB 11 (W) How Does Language Vary in Society? The Fascinating Case of Arabic
How Does Language Vary in Society? The Fascinating Case of Arabic Description: Sociolinguistics is the study of how aspects of society influence how language is used by the society members, and how the very act of language use constructs those societies and positions speakers in them. This course will provide an introduction to questions of interest to sociolinguists. These include: 1) How and why do languages change? How do different speech communities use language? 3) In what ways does language reflect a person's identity? 4) In what ways does language construct a person's identity? 5) How does language intersect with power? This course will address these questions with a focus on a unique case study: Arabic. Arabic is a classical example of a diglossic language. Two varieties with marked differences and specific functional distributions co-exist in Arabic speech communities: Modern Standard Arabic (MSA), a variety with a higher sociopolitical status as the symbol of pan-Arabism and the official language of twenty three Arab countries, and colloquial Arabic (CA), the symbol of local identities. CA itself varies widely along geographical, religious, gender, age, and socio-economic lines within and between Arab countries. Arabic speakers mix between MSA and CA and shift their language use within a mosaic of language variation that would fascinate all those interested in the study of sociolinguistics. Readings, movies, and audiovisual materials in this course will provide a glimpse of this sociolinguistic scene. Knowledge of Arabic is not required to take this course. Students are expected to actively engage in class discussions based on course materials, and will write a 10-page final paper based on a sociolinguistic project.

Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Arabic is not required to take this course
Enrollment Limit: 20
Enrollment Preferences: interest in linguistics and/or Arabic
Grading: pass/fail only
Materials/Lab Fee: approximately $50 for books

Winter 2020

**ARTH 10 (W) Inventing Joan of Arc: The History of a Hero(ine) in Pictures and Film**

**Cross-listings:** WGSS 10 ARTH 10

**Primary Cross-listing**

Joan of Arc (known during her own lifetime most commonly as Jeanne "la Pucelle," or Joan "the Maid") was one of the most dynamic and yet enigmatic personalities of the European Middle Ages. Born into a peasant family in the French border province of Lorraine in 1412, she gained control of an army, won brilliant military victories, crowned a king, and was burnt at the stake as a heretic, all before her twentieth birthday. Triply marginalized by gender, age, and socio-economic status, she nonetheless managed to shake the Church and State establishments to their very core. But who was Joan of Arc? Nationalist martyr? Pioneer feminist? Champion of the people? Instrument of God's grace? Victim of post-traumatic stress disorder? Exemplary transgender warrior? Over the centuries since her death, artists—and not just politicians and scholars—have attempted to answer this question, creating myriad visions of la Pucelle under the influence of an ever-changing lens of contemporary tastes and concerns. Through readings and discussion, this course will survey the history of representations of Joan of Arc in painting, prints, sculpture, and film, from the time of her death to the present.

**Requirements/Evaluation:** 10-page project or comparable creative project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** statement of interest

**Grading:** pass/fail only

**Materials/Lab Fee:** $10 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 10 ARTH 10
ARTh 11 (W) Looking at Contemporary Documentary Photography

Cross-listings: ARTh 11  GERM 11  COMP 11

Secondary Cross-listing

This course explores the evolution of modern documentary photography. We will start with a look back to the work of Lewis Hine, August Sander, Dorothea Lange, Walker Evan and the Magnum Agency photographers. We will then jump to mid 20th century work of Robert Frank's *The Americans*, and how Frank's singular vision deeply shaped the next generation of photographers working the American streets and landscape. Diane Arbus, Vivian Maier, Bruce Davidson, Lee Freidlander, William Klein, Danny Lyon, Gary Winogrand are some of the photographers whose work we will get to know well. Discussions will include the new wave of independent and Magnum photojournalists (Philip Jones Griffiths, Josef Koudelka, Susan Meiselas, Gilles Peress, James Nachtwey, Alex Webb, Ron Haviv and Tyler Hicks) and the wars from Vietnam to Bosnia to Iraq and Syria they cover as well as the personal visions they explore. Insight into the diverse currents of documentary photography will be covered through the work of Bill Burke, Larry Clark, Larry Fink, Nan Goldin, Emmet Gowin, Sally Mann, Mary Ellen Mark, Nicholas Nixon, Richard Misrach, Joel Sternfeld, Birney Imes, Regan Louie, Edward Burtynsky, Laura Letinsky and Simon Norfolk. Our last classes will be an exploration of social media and the proliferation of diverse voices emerging in documentary photography. Each student will be required to make a brief presentation to the class on a documentary topic of their choice. A final paper expanding on this documentary topic will be due at the end of the course. Students will be evaluated on their classroom presentation, general participation and their written work. A field trip to New York will let us see first hand works from the collections at MoMA, etc.  Adjunct Instructor Bio: Kevin Bubriski's fine art photographs are in the permanent collections of the Museum of Modern Art, Metropolitan Museum of Art, San Francisco Museum of Modern Art, and Bibliotheque Nationale, Paris. Kevin has received Guggenheim, Fulbright and NEA fellowships. Bubriski has published eleven books of photography including *Nepal 1975-2011* published by Peabody Museum Press of Harvard University in 2014 and *Legacy in Stone: Syria Before War* in 2019 with powerhouse Books in New York.

ARTh 15 (W) Introduction to Indian Drawing Techniques

Cross-listings: ARTh 15  ARTS 15

Secondary Cross-listing

The jewel-like world of Indian painting is famous for its stylized naturalism and mastery of line. This course will introduce students to the technique and imagery of this art form. The course is designed as a workshop in which students will learn to use traditional materials and techniques. The class will focus on the practice of copying and taking inspiration from original masterworks of Indian art housed in the Williams College Museum of Art (WCMA). By engaging with a non-western practice, the aim of the course is to expose students to a pluralistic engagement with art and art history. In addition to learning the basics of drawing and painting techniques, students will also learn paper and pigment preparation. The workshop will focus on the siah qalam brush and ink rendering technique, the backbone for the more advanced techniques of neemrang and gadrang, which pertain to color application. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples. Students will have the opportunity to exhibit their final projects at Spencer Hall.

Requirements/Evaluation:  final project or presentation

Prerequisites:  none
Enrollment Limit: 12

Enrollment Preferences: response to one question: why is it important for you to take this course?

Grading: pass/fail only

Materials/Lab Fee: $35

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 15 ARTS 15

Winter 2020
LEC Section: 01 Cancelled

ARTH 16 (W) Sensing Place

Cross-listings: ENVI 16 ARTH 16

Primary Cross-listing

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how those histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a "sense" of ownership and domination? Is something more symbiotic possible?

To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers, and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and active participation in class discussions will also be required. We will typically meet three times a week for three-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.

Requirements/Evaluation: 10-page paper

ARTH 19 (W) The Restless Collection

Cross-listings: INTR 19 LEAD 19 ARTS 19 ARTH 19

Secondary Cross-listing

The Restless Collection, led by San Francisco-based independent curator Jordan Stein with curatorial staff from the Williams College Museum of Art (WCMA), investigates the WCMA permanent collection and other regional art collections as resources for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, agitation, and power, students will conduct both a broad survey of the WCMA collection and in-depth case studies of several artworks. The course’s final project includes generating a speculative exhibition proposal against the backdrop of the current political moment. Fundamental questions include: How is an art collection assembled, let alone maintained and
mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? What is an exhibition and who governs the terms of its engagement? How has the form been activated not only by curators, but also by artists as a poem, proposal, or declaration? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries by employing "the exhibition" as a vehicle for ideas. The course further offers the chance to collaborate with WMCA and WC staff, including representatives from various departments, including archives, curatorial, collections, engagement, digital media, installation/preparation, and more. Potential site visits include Hancock Shaker Village, Bennington Museum, Williamstown Historical Society, and other special meetings. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition-making, over-looked and under-sung histories of art, and linking the past and present through the varied presentation of critical objects, non-objects, and ideas. He has organized exhibitions in a variety of institutions and scales, including the Berkeley Art Museum and Pacific Film Archive, Artists Space (New York), Matthew Marks Gallery (New York), the Renaissance Society (Chicago), The Glass House (New Canaan, CT), and San Francisco City Hall. He is a co-founder of the interdisciplinary collaborative group Will Brown, which realized over three dozen exhibitions and programs in their Mission District storefront from 2012-2015 before working parasitically with other organizations. He founded Cushion Works, a just-in-time gallery on the second floor of an active cushion-making workshop, in 2017. With Will Brown, he is the author of Bruce Conner: Brass Handles, and with Jason Fulford is the editor of Where to Score, a collection of hippie-era classified advertisements. Please see http://jordanstein.com/ for more information.

LEC Section: 01    MWR 10:00 am - 10:50 am    Jordan Stein, Christina Yang

**ARTH 23 (W) STEAM Sandboxes: Public Pedagogy and Transformative Learning**

**Cross-listings:** ARTH 23  PSYC 23  ARTS 23

**Secondary Cross-listing**

Where, when, and how do children learn outside of school? What is STEAM education, and who has access to it? Why does creative youth development matter in our society? Creative problem solving--the flexibility, persistence, and openness to generate and apply novel solutions to problems--is essential for success in school, the workplace, and beyond. The Bay Area Discovery Museum (BADM) has developed a pedagogical framework for educators to build children's creative problem-solving skills through intentional experiences. We will use this framework to guide our exploration of informal learning environments, including museums, libraries, and other out-of-school places, investigating how children--and adults in their lives--access learning in STEAM content areas, especially the sciences and the arts. In addition to class meeting time, we plan to take two or three day-long field trips to local and regional museums and other educational sites. Alongside our research in the field and discussions in class, students will create a journal in the medium of their choice (written, visual, aural) to document and reflect on their learning. Students will also work individually or collaboratively to design a prototype for a STEAM exhibition, event, song, podcast, video, or project of their choosing that they will present at the end of the session. We welcome anyone with an interest in contributing to the field of education, making, creating, and innovating! This course is not limited to students with backgrounds in psychology, the sciences, or art. Class is scheduled for M and W afternoons with mandatory all-and partial-day field trips scheduled during Weeks 1-3. Dates of the field trips are TBD, and may fall either on Tuesdays, Wednesdays, or Thursdays. Helen Hadani, Director of Research at BADM, and Molly Polk, from the Center for Learning in Action, will co-teach this course. Adjunct Instructor Bio: Molly was the founding education coordinator and curator for Kidspace at MASS MoCA and has taught children of all ages in informal learning environments, including museum galleries and dance studios, ski trails and forest floors, food pantries and assisted living centers. She works with Williams students who teach and mentor K-6 students at Brayton and Greylock Schools in North Adams. Her research areas of interest include student-driven learning and equity of access in K-12 public education. Adjunct Instructor Bio: Helen Hadani is the Director of Research at the Center for Childhood Creativity (CCC)--the research and advisory division of the Bay Area Discovery Museum (BADM)--and authors publications that synthesize scientific findings on children's learning and cognition for parents and educators.
Requirements/Evaluation: final project (individual or collaborative) in a medium of choice, accompanied by an informal presentation; as part of the process in developing their final projects, students will work together to provide feedback to each other prior to presenting their work; a rubric based on the CREATE framework will be available for students to use as a guideline for their projects as they consider pedagogical approaches, design features, and the learning outcomes for young people

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have relevant experience through course- or fieldwork in Psychology and/or education will be given priority

Grading: pass/fail only

Materials/Lab Fee: $35

Grading: pass/fail only

Winter 2020
IND Section: 01   TBA   Elizabeth P. McGowan
ARTS 10 (W) Relief Printmaking--The Woodcut

This course will explore relief printmaking through the lens of the woodcut. Wood is sculptural--soft, hard, porous, inconsistent, it has knots and grain. Cedar cuts like butter while mahogany seems impossible to penetrate. We will learn how to capitalize on these inconsistencies by working with the material to realize unique prints. We will explore an array of cutting strategies as we apply them to various types of wood. Students will learn how to use the press, register prints, and how to make a small edition. The course will begin with translating drawing into a print with one matrix, leading students to make a color reduction print and a multi-block print. We will look at these techniques from a historical lens, its relevance to the textile industry and its applications in anti-establishment Latin American image culture. We will read texts that address the conceptual implications of mechanical production by Renee Green, Luis Camnitzer, and Franz Kafka. Through discussions and critiques, we will examine this practice from a variety of cultural, conceptual, and historical standpoints, both within the conventions of printmaking as well as in its experimental applications. The class will meet for three hours on Thursday and Friday. Students will be expected to complete work outside of class to present the following week. There is a $70 lab fee per student that covers materials and travel allowance. We will take one field trip to The Clark Institute, where we will look at historical woodcuts in the Manton Study Center for Works on Paper. Adjunct Instructor Bio: Chris Domenick is an interdisciplinary artist living and working in Western, MA.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: juniors and seniors will be given priority
Grading: pass/fail only
Materials/Lab Fee: $70

Winter 2020
LEC Section: 01 RF 1:00 pm - 3:50 pm Chris Domenick

ARTS 13 (W) Creative Portraiture in the Darkroom

Cross-listings: ARTS 13 RLFR 13

Secondary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: knowledge of black and white analog photography is preferred, but not required
Enrollment Limit: 10
Enrollment Preferences: Art major and minors then random
Grading: pass/fail only
Materials/Lab Fee: $120

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 13 RLFR 13
Attributes: EXPE Experiential Education Courses
ARTS 14 (W) Introduction to Ceramic Sculpture
This course will provide students with a foundation in the ceramic process, its history, and its evolving role in contemporary art. We will explore a variety of construction methods, hand building techniques, glazing, and firing. Through lectures, demonstrations, and group discussion, we will think critically about the role of this ancient material in both fine art and everyday life. Emphasis will be placed upon experimentation; conventions will be learned and disrupted. Students will develop a personal language in the material, exhibiting an independent project at the end of the term. Work will be evaluated both conceptually and technically during a final group critique. Regular attendance and active participation are essential. We will meet twice a week in three-hour sessions. Students are expected to spend a significant amount of time outside of class working independently.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference will be given to seniors
Grading: pass/fail only
Materials/Lab Fee: $125

ARTS 16 (W) Glass and Glassblowing
Cross-listings: ARTS 16  CHEM 16
Secondary Cross-listing

Winter 2020
LEC Section: 01  Cancelled
This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students.

Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

**Requirements/Evaluation:** class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

**Grading:** pass/fail only

**Materials/Lab Fee:** $75

This course is cross-listed and the prefixes carry the following divisional credit:

---

**ARTS 18 (W) Can I Ask You Something?**

**Cross-listings:** ARTS 18  ENGL 18

**Secondary Cross-listing**

"Can I Ask You Something?" takes students on an exploration of the ways personal narrative can become fuel for making art. For their project, each student will begin by interviewing a meaningful person in their lives (this can be a family member, a mentor, a friend, or even someone you have never met and have been dying to talk to!) and recording the interview in video or audio form. The interviews will revolve around questions which are personally meaningful and urgent to each student, for example, but not limited to: identity and its relationship to the body; the politics of everyday life, family dynamics and the way they affect one's identity and worldview. These recorded interviews will then become the fuel for artworks ranging in media from video, performance and dance to sculpture, photography, drawing, and audio collage. Each student's trajectory will be completely unique.
and informed by their own curiosity, the art-making techniques they wish to learn, and the topics explored in their interviews. In addition, we will learn about contemporary artists who have used interviews and personal narratives as the inspiration and jumping-off point for their work. Adjunct Instructor Bio: Gabriela Vainsencher is a Brooklyn-based visual artist who makes videos, site-specific installations, drawings, and sculptures. Vainsencher was Williams College's Levitt fellow in 2009, and since then she has taught a winter study class in 2012-2018. She is also a curator and an art critic. Vainsencher's recent exhibitions include a solo exhibition at A.I.R. Gallery in New York and a two-person show at the MuMA museum in Le Havre, France. She is also a Bronx Museum AIM Fellow for 2019-20.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference will be given to students who write the instructor about why they are interested in the class
Grading: pass/fail only
Materials/Lab Fee: $40

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 19 (W) The Restless Collection

Cross-listings: INTR 19 LEAD 19 ARTS 19 ARTH 19
Primary Cross-listing

The Restless Collection, led by San Francisco-based independent curator Jordan Stein with curatorial staff from the Williams College Museum of Art (WCMA), investigates the WCMA permanent collection and other regional art collections as resources for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, agitation, and power, students will conduct both a broad survey of the WCMA collection and in-depth case studies of several artworks. The course's final project includes generating a speculative exhibition proposal against the backdrop of the current political moment. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? What is an exhibition and who governs the terms of its engagement? How has the form been activated not only by curators, but also by artists as a poem, proposal, or declaration? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries by employing "the exhibition" as a vehicle for ideas. The course further offers the chance to collaborate with WMCA and WC staff, including representatives from various departments, including archives, curatorial, collections, engagement, digital media, installation/preparation, and more. Potential site visits include Hancock Shaker Village, Bennington Museum, Williamstown Historical Society, and other special meetings. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition-making, over-looked and under-sung histories of art, and linking the past and present through the varied presentation of critical objects, non-objects, and ideas. He has organized exhibitions in a variety of institutions and scales, including the Berkeley Art Museum and Pacific Film Archive, Artists Space (New York), Matthew Marks Gallery (New York), the Renaissance Society (Chicago), The Glass House (New Canaan, CT), and San Francisco City Hall. He is a co-founder of the interdisciplinary collaborative group Will Brown, which realized over three dozen exhibitions and programs in their Mission District storefront from 2012-2015 before working parasitically with other organizations. He founded Cushion Works, a just-in-time gallery on the second floor of an active cushion-making workshop, in 2017. With Will Brown, he is the author of Bruce Conner: Brass Handles, and with Jason Fulford is the editor of Where to Score, a collection of hippie-era classified advertisements. Please see http://jordanstein.com/ for more information.

Class Format: workshop/seminar
Requirements/Evaluation: exhibition proposal
Prerequisites: keen interest in museums, art collections and culture
Enrollment Limit: 8
Enrollment Preferences: random selection
Grading: pass/fail only

ARTS 23 (W) STEAM Sandboxes: Public Pedagogy and Transformative Learning

Cross-listings: ARTH 23  PSYC 23  ARTS 23

Secondary Cross-listing

Where, when, and how do children learn outside of school? What is STEAM education, and who has access to it? Why does creative youth development matter in our society? Creative problem solving—the flexibility, persistence, and openness to generate and apply novel solutions to problems—is essential for success in school, the workplace, and beyond. The Bay Area Discovery Museum (BADM) has developed a pedagogical framework for educators to build children's creative problem-solving skills through intentional experiences. We will use this framework to guide our exploration of informal learning environments, including museums, libraries, and other out-of-school places, investigating how children—and adults in their lives—access learning in STEAM content areas, especially the sciences and the arts. In addition to class meeting time, we plan to take two or three day-long field trips to local and regional museums and other educational sites. Alongside our research in the field and discussions in class, students will create a journal in the medium of their choice (written, visual, aural) to document and reflect on their learning. Students will also work individually or collaboratively to design a prototype for a STEAM exhibition, event, song, podcast, video, or project of their choosing that they will present at the end of the session. We welcome anyone with an interest in contributing to the field of education, making, creating, and innovating! This course is not limited to students with backgrounds in psychology, the sciences, or art. Class is scheduled for M and W afternoons with mandatory all- and partial-day field trips scheduled during Weeks 1-3. Dates of the field trips are TBD, and may fall either on Tuesdays, Wednesdays, or Thursdays. Helen Hadani, Director of Research at BADM, and Molly Polk, from the Center for Learning in Action, will co-teach this course.  Adjunct Instructor Bio: Molly was the founding education coordinator and curator for Kidspace at MASS MoCA and has taught children of all ages in informal learning environments, including museum galleries and dance studios, ski trails and forest floors, food pantries and assisted living centers. She works with Williams students who teach and mentor K-6 students at Brayton and Greylock Schools in North Adams. Her research areas of interest include student-driven learning and equity of access in K-12 public education.  Adjunct Instructor Bio: Helen Hadani is the Director of Research at the Center for Childhood Creativity (CCC)—the research and advisory division of the Bay Area Discovery Museum (BADM)—and authors publications that synthesize scientific findings on children’s learning and cognition for parents and educators.

Requirements/Evaluation: final project (individual or collaborative) in a medium of choice, accompanied by an informal presentation; as part of the process in developing their final projects, students will work together to provide feedback to each other prior to presenting their work; a rubric based on the CREATE framework will be available for students to use as a guideline for their projects as they consider pedagogical approaches, design features, and the learning outcomes for young people

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have relevant experience through course- or fieldwork in Psychology and/or education will be given priority

Grading: pass/fail only

Materials/Lab Fee: $35

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 31 (W) Senior Studio: Independent Project Art Studio

Independent project to be taken by candidates for honors in Art Studio.

Class Format: Independent project

Grading: pass/fail only
ARTS 99 (W) Independent Study: Art Studio
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

ASST 12 (W) The East is Red? Socialism in Asia
Cross-listings: PSCI 11 ASST 12 HIST 12

Primary Cross-listing
This course provides a historical and political overview of socialism in Asia from the 1910s to the present. It examines the spread and influence of Marxism in Asia, the policies of socialist states and movements in relation to decolonization, the Cold War, and the Sino-Soviet split, and the marriage between market reforms and ostensibly socialist governments in the present day. In addition to looking at the socialist governments of China, North Korea, Vietnam, and Cambodia, we will examine cases of "unsuccessful" socialist parties in Japan, Indonesia, and India. Class materials include memoirs of survival by non-state actors, the writings of socialist leaders (Mao Zedong, Ho Chi Minh, M.N. Roy, etc), and cultural constructions such as revolutionary theatre, songs, and contemporary films. Questions that will be addressed include: Why did Marxism, a Eurocentric theory of revolution intended for advanced capitalist societies, find such resonance in Asia? How was Marxism adapted for an Asian environment? Twenty-five years after the fall of communism, why have Asian socialist states remained in power? And in the scales of history, how should we judge the effects of socialism in Asia? Evaluation will be based on two in-class presentations and a final research paper. Attendance and participation will also be taken into account. We will meet three times a week for two-hour sessions. Adjunct Bio: John Knight has a Ph.D in East Asian History with a focus on Modern China. He graduated in 2017 from The Ohio State University. He has previously taught East Asian and World History at the Rhode Island School of Design, Ohio State University, Capital University, and Seton Hall.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference will be given to students majoring in Asian Studies, History, or Political Science
Grading: pass/fail only
Materials/Lab Fee: $15

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 11 ASST 12 HIST 12

ASST 14 (W) Martial Arts in Movies and Real Life
Movies that feature martial arts action rarely win Oscars or get much critical attention. Nevertheless, the best of these films can inspire extraordinary devotion amongst fans, spark bitter feuds regarding which martial arts star would win in a fight, and are often the reason new students arrive at the door of a martial arts school and begin a journey which changes their lives forever. A case can also be made that, by providing an experience of extraordinary and cathartic violence, they help individuals and society regulate their less civilized impulses. They are also a lot more fun to watch when you know something about martial arts--and the only legitimate way to know something about martial arts is to experience them first hand, rather than only on screen. This course blends two hours of daily training with twice-weekly screenings of some of the best martial arts films ever made. The
Martial Arts training (10am-Noon each weekday morning in Currier Ballroom) will mostly be in the Japanese art of Aikido, a synthesis of the Samurai arts of Kenjutsu (swordsmanship) and Jujutsu (grappling). Training will improve each student's strength, balance, posture, and flexibility. Everyone will also learn how to throw friends twice their size across the room. 25% of training time will be devoted to sword, staff, and dagger techniques. Joining us for several sessions will be Stage Combat Instructor and fight choreographer Alexei Syssoyeva, who will oversee students choreographing their own fight sequence, using stage combat techniques (i.e. the skills required to make it look like a real fight when it isn't). Additional relevant experiences, such as meditation practice and outdoor misogi will be woven into the course as schedules and weather permit. The films: 7 Samurai, Last Samurai, Uzumasa Limelight, Enter the Dragon, Crouching Tiger Hidden Dragon, Robin Hood (Errol Flynn version), Brotherhood of the Wolf, Kill Bill (volume 1).

Adjunct Instructor Bio: Robert Kent '84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt), having studied for 21 years at Aikido West in Redwood City under Frank Doran Shihan. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity.

Requirements/Evaluation: 10-page paper
Prerequisites: same physician’s approval on file as the school requires to participate on sports teams; students do not have to be especially athletic, and in Aikido women train as equals with men
Enrollment Limit: 20
Enrollment Preferences: selection via questionnaire
Grading: pass/fail only
Materials/Lab Fee: $175

Winter 2020

ASST 15  (W) Contemporary Indian Society
Cross-listings: ASST 15  HIST 15

Secondary Cross-listing
With a population of nearly 1.4 billion, India is one of the fastest growing regions of Asia and the world. It is also the largest and most diverse country in South Asia. What are some of the most important social and political concerns in India today? How do Indians think of questions of culture and identity in a globally connected world? What are the interests and aspirations of India's youth? How are forces of nationalism and divisive politics defining Indian society today? In this course, we will explore these questions through the most recent non-fiction books on Indian history and society. We will also watch a number of documentaries that address some of these questions. The objective of the course is to engage students in lively discussion and debates about these issues that shape India today.

Requirements/Evaluation: participation in discussions, student-led discussions in addition to a 10-page paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: short written application
Grading: pass/fail only
Materials/Lab Fee: cost of books
This course is cross-listed and the prefixes carry the following divisional credit:

Class Format: independent study
Grading: pass/fail only
AN INFINITY OF WORLDS: PLANETS AND THE SEARCH FOR LIFE

Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using remotely-operated telescopes in Australia to gather data on new planets. This course, meant for non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Majors may take this course with additional reading and assignments. Adjunct Bio: Rob Wittenmyer '98 is Professor of Astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 20 published planet discoveries, and is the Chief Investigator of the Minerva-Australis observatory which is NASA's key Southern ground support for the Transiting Exoplanet Survey Satellite.

Requirements/Evaluation: 10-page paper
Prerequisites: none; majors may take this course with additional reading and assignments
Enrollment Limit: 20
Enrollment Preferences: preference will be given to first years and sophomores
Grading: pass/fail only
Materials/Lab Fee: approximately $30 for books

FRANCE UNDER THE NAZIS 1940-45: DEMOCRACY ABANDONED, ANTISEMITISM UNLEASHED

France was Europe's cultural avatar in the 17th century, father of the Rights of Man in the 18th century, Art Capital of the World in the 19th Century, and essential in the 20th to victory in World War I. How did it find itself subservient to the dictates of a foreign ruling power in 1940 and helpless to prevent the usurpation of its democracy? How did France fail to protect the very rights of man that it had long-struggled to establish and achieve? In this course we will examine what happened politically and socially during the Vichy regime of 1940 to 1945. And when Germany's hegemony was upended in 1945 with the victory of the Allies in World War II, how did the French explain to those allies, and to themselves, how France had achieved its salvation? To explain all this, we will examine break-through historical studies from the 1970s, novels written at the time of the occupation and popular today, films of the era and beyond, as well as examples of analyses of French and foreign thinkers following the war and continuing into this century. Classes will meet twice a week for 2-3 hours. Students will be responsible for daily reading of secondary sources in the reading packets. They will view on Glow films from the Vichy era and beyond and be asked to analyze and share their impressions. Each student will be assigned a
novel set in Vichy times; they will prepare a concise report for the group and 5-page paper explaining how the novel confirmed or countered their impressions of the era. Adjunct Instructor Bio: Ms. Bowden graduated magna cum laude from Vassar College, studying European history there, and subsequently at Columbia University. She has taught history at independent schools in New York and in the Queen’s College graduate Education division.

Requirements/Evaluation: active class participation re readings and film topics, 5-page paper assessing assigned novel, thoughtful synopsis for fellow students
Prerequisites: none, though knowledge of French enriches the experience
Enrollment Limit: 12
Grading: pass/fail only
Materials/Lab Fee: $36 plus cost of books

BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES
BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week, students will learn to set up fish matings and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd-grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Adjunct Instructor Bio: Jennifer Swoap, Associate Director at The Center for Learning in Action, is a former third-grade teacher. She currently coordinates Williams Elementary Outreach, where Williams students teach and mentor K-6 students at area elementary schools. Adjunct Instructor Bio: Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

Requirements/Evaluation: final project or presentation; review of pre- and post-survey assessments
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: preference to seniors
Grading: pass/fail only
Attributes: EXPE Experiential Education Courses

Winter 2020
LEC Section: 01   M-F 10:00 am - 2:50 pm   Jennifer C. Swoap, Renee Schiek

BIOL 13 (W) Introduction to Animal Tracking
This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. Students will be expected to visit their study spots everyday for a minimum of 1 hour of tracking journaling and data collection. The course will meet twice a week for 4-5 hour sessions, primarily in the field. One field trip to a nearby state forest is scheduled for the fourth or fifth class meeting day. This day may extend to 4:00. Students are expected to have appropriate outdoor gear for winter. Adjunct Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York as well as his own independent programs.

Requirements/Evaluation: attendance, participation, a final presentation of their study sites, maps and journals, a field test and a 3-page research paper
Prerequisites: none
BIOL 14 (W) Ethical Issues in Surgical Care

The ethical issues faced by surgeons have never been more challenging than they are today. As patients have become more sophisticated consumers of medical care, there has been a shift from paternalism to a more participatory model in medical decision-making. We will explore the ethical aspects of the surgeon-patient relationship, as well as the impact of surgical innovations and rapid advances in medical and pharmaceutical discoveries. By examining clinical cases, we will explore the role of legal health care documents on surgical decision-making (Do Not Resuscitate orders, Advanced Treatment Directives, Living Will). We will discuss issues with informed consent, disclosure of errors, conflicts of interest, relationships with industry, experimental procedures, and rationalizing the cost of newer treatments. We will discuss the ethical issues and innovative advances in training surgeons. I will include invited speakers in person or by webchat. This course is designed for both interactive discussions and the development of critical writing skills. We will meet twice a week for 3 hours per day (Mon. and Tues. 10-11:30, 1-2:30). Students will be expected to write a 1-page paper after the first meeting about what they hope to learn from the course and to list topics that they would like to discuss. We will discuss Dr. Atul Gawande's book "Being Mortal." Students will research and write three 4-page papers (one per week), excerpts of which will be discussed in class the following week. Adjunct Bio: Robert Eyre, M.D. is an Associate Professor of Surgery (Urology) at Harvard Medical School. He has had an active academic and clinical practice in Boston for 39 years, teaching medical students and surgical residents. He has served on the editorial boards of numerous peer-reviewed scientific journals in addition to authoring many articles and book chapters in the fields of urology and surgery.

Requirements/Evaluation: class participation and three 4-page papers

Prerequisites: open to all students with preference for junior and senior pre-meds

Enrollment Limit: 12

Enrollment Preferences: open to all students with preference for junior and senior pre-meds

Grading: pass/fail only

Materials/Lab Fee: approximately $12 for books

Winter 2020

LEC Section: 01  TR 10:00 am - 2:50 pm  Dan Yacobellis
BIOL 22 (W) Introduction to Biological Research

An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Class Format: Independent study

Prerequisites: none

Enrollment Limit: POI

Grading: pass/fail only

LEC Section: 01    TBA    Lois M. Banta

BIOL 25 (W) Tropical Marine Conservation

Cross-listings: BIOL 25  ENVI 25

Primary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems.

Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor

Enrollment Limit: 8

Enrollment Preferences: preference will be given to juniors and seniors

Grading: pass/fail only

Materials/Lab Fee: cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 25 ENVI 25

Attributes: TRVL Winter Study Travel Course

Winter 2020

TVL Section: 01    TBA    Sonya K. Auer, Sarah Gardner

BIOL 31 (W) Senior Thesis: Biology

To be taken by students registered for Biology 493, 494.

Class Format: independent study

Grading: pass/fail only
BIOL 41 (W) Biology Through the Media Intensive

Biology Through The Media explores the foundational concepts examined in the Department's introductory series (Biology 101 and Biology 102) by using the 'greatest hits' of stories that have made their way into the news outlets, television and film media. The first section of the course investigates cell structure and function in terms of energy needs and how information is conveyed in a cell. The last half the course will focus upon the developmental and evolutionary processes that have given rise to the diversity of life. This is a qualitative-focused, non-majors course and, as such, the students are not expected to have any background in biology. As this class counts as both a semester course and winter study course, the students are expected to attend class and to spend a significant time on the course. The students should dedicate approximately 50 hours per week to this class. The number of topics we will cover is numerous and wide-ranging and will be done so at a faster rate than what is observed during a regular semester. Each afternoon, the TAs and myself will be available to support student learning of the material.

Class Format: about 70 contact hours, plus 6 hours for quizzes and exams

Requirements/Evaluation: Problem sets will be assigned daily; the students are expected to spend a significant amount of time on the homework problems each afternoon and to hand in their assigned work. Grades: evaluation will be based on problem sets, quizzes and exams. Honor code guidelines: quizzes, exams and the write-up of the problems sets must be completed by the student alone, however, students may work together on the problems sets.

Prerequisites: permission of a dean

Enrollment Limit: 18

Enrollment Preferences: students who need to make up a deficiency

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both BIOL 100 and BIOL 41.

BIOL 99 (W) Independent Study: Biology

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only
Winter Study Specials

SPEC, short for Specials, are courses with topics that are outside our academic department areas of study OR are being sponsored by the Winter Study Committee.

SPEC 10 (W) Counseling Skills Intensive
Whether you want to better support your friends, be more effective as a leader, or pursue a career in the helping professions, good listening and communication skills are essential. This course will prepare you to be a better listener and a more effective, confident communicator. You will learn techniques that help put others at ease while you learn and practice active listening over a variety of topical areas that increase in intensity as we learn and build trust as a group. We will also address what is needed in more charged, personal or urgent situations, exploring our limits, values and responsibilities. You will learn to communicate skillfully about sensitive issues, support others with different experiences/identities than your own, and find your own style in a helping role. Besides improving self-awareness and interpersonal self-confidence, students have found this training applicable to subsequent leadership roles in campus life and beyond. We will meet twice a week for 3 hour sessions. This is an experiential training augmented by relevant readings and out-of-class assignments designed to deepen your understanding and practice of communication, connection and basic counseling skills. Adjunct Instructor Bio: Karen Theiling is a licensed mental health counselor at Integrative Wellbeing Services and has worked at Williams in this capacity for about 20 years. Though she loves the work of psychotherapy, she is passionate about opportunities to teach students to be more skillful in their lives through teaching, trainings, outreach, and group experiences. Adjunct Instructor Bio: Laini Sporbert is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

Requirements/Evaluation: 10-page paper

Enrollment Limit: 20
Enrollment Preferences: reverse seniority: preference given to 1st yrs, etc
Grading: pass/fail only

Winter 2020
LEC Section: 01 MR 1:00 pm - 3:50 pm Karen M. Theiling, Laini Sporbert

SPEC 11 (W) Climate Justice & Audio Storytelling: Podcasting Climate Change, Equity, and a Sustainable Future
How do issues of climate change and equity intersect? While we've heard that climate change disproportionately affects vulnerable and marginalized communities, what does that look like, how do those inequities pile up, and what are the avenues of resistance and progress? In this course, students
will explore the links between environmental justice and climate justice first in class and then in conversation with members, various communities impacted by climate change and societal inequities, and then weave these stories into compelling audio stories. Students will research climate change impacts and the related inequities in a community with which they have a personal relationship (such as their home community or the greater Northern Berkshires) and conduct interviews with people who can speak from personal experience about how climate change has affected their community and the justice implications. Students will learn interviewing, storytelling, and podcasting best practices in order to gather intriguing stories and to weave those interviews into compelling audio stories that are both rich in content and in sound. Guiding questions will include: How does one tell a story in a way that is universal or at least relevant to one’s intended audience? What are the opportunities to enhance storytelling by using an audio format as the medium? How does one tell a story that honors and doesn't exploit interviewees' experiences. Informative and impressive podcast creations will be used as resources on the Williams sustainability website and will be posted to iTunes and other places where you get your music and podcasts. Assignments will involve listening to and critically analyzing podcasts, writing, editing, and giving positive and constructive feedback to peers. Our time together will be a combination of learning about climate justice, analyzing content and audio choices, practicing interview techniques, and getting feedback from peers. Adjunct Instructor Bio: Mike Evans is the Assistant Director of the Zilkha Center for Environmental Initiatives at Williams College where he delves into issues of sustainable food, waste diversion, the built environment, and equity and justice. Prior to his time at Williams, he worked in the nonprofit world--in Boston, Austin, and Salt Lake City--at organizations focusing on food security, youth development, sustainable agriculture, urban farming, and food justice.

**Requirements/Evaluation:** participation and a final project audiostory

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference will be given to sophomores and juniors and the need to create a group that is diverse in terms of majors and interests

**Grading:** pass/fail only

**Materials/Lab Fee:** cost of books

---

**SPEC 12 (W) Introduction to Advertising and Creativity**

First offered in 2019, this course is an introduction to the field of advertising with a special emphasis on creativity. Topics include the nature of brands; how they are created and sustained in today's consumer, media and technology environments; how brands are positioned (and repositioned); how agencies are organized; the role of big ideas in leading brands to success; what distinguishes an effective ad from an ineffective one?; and the vital and powerful importance of creativity in connecting with audiences on multiple platforms. The course will be of interest to students considering a future in advertising, marketing or journalism--but also to anyone curious about the pervasive influence of marketing communications in culture, style and politics. Classes are a combination of lecture and the presentation of short team projects in which students collaborate to research and analyze ads and other communications related to the topic of the day. Final projects include developing and presenting an original ad and a deep dive into a single brand across all media. There will be two, three-hour classes per week. Out-of-class work will include readings, a short reflective final paper and team research projects examining advertising on assigned topics. Adjunct Instructor Bio: Steve Harty '73 worked in advertising for 30 years. Along the way he served major clients like JetBlue, American Express, Ally Bank, Mercedes-Benz, Miller Lite and AT&T working for agencies such as Ogilvy, Lowe and BBH in addition to co-founding Merkley Newman Harty. He is now a strategy consultant and Executive-in-Residence at Columbia Business School. For Williams, Steve is president of his class and a trustee emeritus.

**Requirements/Evaluation:** short paper and final project or presentation; each student will develop and present a script for an original ad

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a mix of students from all class years and backgrounds is the goal

**Grading:** pass/fail only

**Materials/Lab Fee:** approximately $30 for books
**SPEC 13 (W) Reality Real Estate**

**Cross-listings:** MATH 13  SPEC 13

**Secondary Cross-listing**

Is the reality of real estate the way it looks on TV? Learn about buying and selling, real estate investments, mortgages, renovation, construction, and design. Class will meet Monday, Tuesday, and Wednesday afternoons. Students will learn about each of the topics above, and have the opportunity to do a final project on a real estate topic of their choice, from architecture to designing their dream home to proposing a successful real estate investment to on-site construction work. Guest lecture(s) by experts in the field. The instructor Allison Pacelli is a licensed MA real estate agent, and co-owner of a design and renovation business that renovates investment properties as well as clients' homes.

**Requirements/Evaluation:** final project, equivalent to a 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** questionnaire

**Grading:** pass/fail only

**Materials/Lab Fee:** $80 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

---

**SPEC 14 (W) Race, Education, and Pop Culture**

**Cross-listings:** AMST 14  SPEC 14

**Secondary Cross-listing**

This course will explore the educational experience of Black students as portrayed in popular culture and compare that to the K-12 and higher education literature that documents and examines the lived experiences of Black students. How accurately do we see the experience of Black students represented in popular culture? What choices or biases might be reflected in these depictions? What might the consumption of these media have on the ways in which people build narratives around the experiences of Black students throughout the American educational system? Potential topics include the experience of students at historically Black colleges and universities (A Different World, School Daze, The Quad), experiences in gifted and talented education (Smart Guy, Akeelah and the Bee, Finding Forrester), experiences at predominately White institutions (Higher Learning, Grown-ish, Dear White People), experiences as student-athletes (Love and Basketball, Coach Carter), and experiences in public and public charter schools (Lean on Mean, The Steve Harvey Show, Dangerous Minds, On My Block, Boston Public, Waiting for Superman, The Lottery). Students will be expected to choose some popular culture medium and explore how it connects to the literature in a final paper of 10 -12 pages and contribute actively to classroom discussions. Adjunct Instructor Bio: Christopher Sewell is an Associate Dean of the College at Williams College in Williamstown, Massachusetts. His scholarship focuses on studying the experiences of gifted students of color, how schooling and policies around gifted and talented education affect students of color long-term experiences, the ways in which LGBTQ+ gifted students negotiate their academic, racial and sexual identities, and the experiences of Black students at Predominantly White Institutions.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** preference given to first-years and seniors

**Grading:** pass/fail only

**Materials/Lab Fee:** $25

This course is cross-listed and the prefixes carry the following divisional credit:

SPEC 15 (W) An Introduction to Spatial Science and GIS

Cross-listings: SPEC 15 ANSO 15

Secondary Cross-listing

Space and place are so ubiquitous in our lived experience that we often fail to take their significance into account when directing and designing scientific research. How do spatial relations (presence/absence, proximity, preference/avoidance) shape natural and cultural phenomena? How do space and place reflect cultural perceptions and practices? How are landscapes and environments engineered to shape individual and social behavior? This intensive course explores the fundamentals of spatial theory and methods, with an emphasis on technical skill, data evaluation, and research design. Through readings, lectures, discussions, and exercises you will be encouraged to think spatially and to apply spatial thinking to your areas of interest. Priority for enrolling in this course will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis. Students who have not taken GEOS 214 have enrollment preference in this course; this course is not a prerequisite for GEOS 214 and students who take this course may also take GEOS 214.

Requirements/Evaluation: combination of class participation, short essays on assigned readings, successful completion of class exercises, and a 10-page research design paper

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: Priority will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis; students who have not taken GEOS 214 have preference in this course; this is not a prerequisite for GEOS 214

Grading: pass/fail only

Materials/Lab Fee: approximately $70 for books

This course is cross-listed and the prefixes carry the following divisional credit:
SPEC 15 ANSO 15

Winter 2020
LEC Section: 01 Cancelled

SPEC 16 (W) Liberal Arts for Epic Challenges: Design Thinking for Social Change

A workshop that will involve learning and applying design thinking techniques to develop creative human-centered solutions to a significant, complex social problem, like loneliness in the community or transforming travel around small towns. The actual topic will be one of several proposed in a global competition from London's Royal Society of Arts; course projects will be submitted against students from around the world in March. Work will occur in two teams; the experience will emphasize techniques for creative confidence, learning to take risks and advance from failures, creative collaboration, and focusing problem solving on human-centered solutions-similar to how innovation is explored in design firms, start-ups, government agencies, and NGOs. The workshop will meet twice a week for 3 hours. There are few readings (mostly manuals on techniques from leading consultancies), but will involve ethnographic research in observing and exploring how real people perceive the problem and solution and team meetings between classes to brainstorm ideas. For more on design thinking, see Williams.edu/designthinking.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: experience, curiosity, interests of students in applying problem solving techniques to complex world problems

Grading: pass/fail only

Winter 2020
LEC Section: 01 TR 10:00 am - 11:50 am Ric Grefé

SPEC 17 (W) Emergent Strategy: Creating Systemic Change from Small to Large

Albert Einstein said "we cannot solve our problems with the same level of thinking that created them." encouraging us to rethink our assumptions and process for instigating change. But what kind of thinking and process should we use to solve our problems? This course will use the guiding principles
of Adrienne Maree Brown’s Emergent Strategy to explore how to build the community and the economic, political, social, and interpersonal systems that we want to see in the world. We need not confine ourselves, in defeat, to incremental lifestyle changes because we feel we do not have the power to incite large scale change; rather we will work to embody, through a varied practice of reflection, movement work, conversation, facilitation, and peer-to-peer dialogue and mediation, the world we want to construct. How can we institutionalize justice and sustainability in the place of institutional racism, heteropatriarchy, xenophobia, exploitation etc.? We will explore how systems of oppression shape and intersect with daily habits and community structures even as we build movements to overcome these oppressive systems. For instance how can we challenge our inclination for hierarchical and majority-rules group governance, or how do we create and maintain boundaries for working relationships that effectively disrupt implicit biases and inherent power imbalances? The course will meet frequently with practitioners, educators, and researchers who are doing movement building work. Students will learn facilitation skills and use systems theory throughout course discussions in order to address challenging topics that they identify. This course relies on numerous perspectives from readings, audio stories, and in-person/video conversations with movement builders from on campus and across the Northeast. Adjunct Instructor Bio: Caroline Bruno is the Sustainability Coordinator at the Zilkha Center for Environmental Initiatives and works to incite and connect conversations across campus about enacting social change, meaningful community involvement, environmental justice and sustainability.

Requirements/Evaluation: The course will focus heavily on personal reflection and active participation, including a final reflection paper and an outline for a teach-in/session created by the class to be presented at Claiming Williams Day 2020 and other points throughout the end of Winter Study and/or Spring Semester

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: students will be asked to write 1-2 paragraphs explaining their interest in the course; preference will go to students demonstrating passion and nuanced thinking related to the subject matter
Grading: pass/fail only

Materials/Lab Fee: cost of books

Winter 2020
LEC Section: 01 TWR 1:00 pm - 2:50 pm Caroline Bruno

SPEC 18 (W) Peer Health Call In Walk In Training

Cross-listings: PSYC 18 SPEC 18

Primary Cross-listing

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies. Adjunct Instructor Bio: Laini is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

Requirements/Evaluation: final project or presentation

Prerequisites: none
Enrollment Limit: 24
Enrollment Preferences: current members of Peer Health will be chosen first; other students will be enrolled based on stated commitment to Peer Health
Grading: pass/fail only

SPEC 19 (W) Healthcare Internships

Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which health care is delivered. Students will be introduced to fundamental concepts related to patient interviewing and history taking, diagnosis and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus— from the perspective of the individual provider-patient relationship and within a systems-level context. Didactic sessions for (on-campus students) will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally. Students will be introduced to concepts of health and wellness, epigenetics, and environmental influences that have a demonstrable, sustained impact on individuals before and after clinical symptoms of illness emerge. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and factors affecting the health of individuals and communities.

Requirements/Evaluation: 10-page paper
Prerequisites: not open to first-years
Enrollment Preferences: grade level and potential as applicant to professional programs
Grading: pass/fail only

SPEC 20 (W) The Writing Process: from Inquiry to Essay

In a perfect world, we all have a fully-developed, time-proven writing process. It's the approach that you read about in well-intended books on effective writing and that professors occasionally recommend, where you start an essay well before the deadline, progressing thoughtfully and methodically toward a completed essay that is thoughtful, effective, and on time. But for most of us, the reality falls well short of that ideal. We procrastinate, stress out, glare at the empty computer screen, and ultimately rush at the last minute to crank out something that hopefully fulfills the assignment. In fact, for many, this is the only way essays get written. This course provides an opportunity for you to develop a better approach to writing assignments: one where completing an essay is less about a looming deadline and more about the meaningful exploration and masterful articulation of your ideas. Each class meeting will be a writing workshop guided by prompts that will navigate you through the cumulative process of composing a single essay. You'll leave the course with a fresh outlook on the real purpose of academic writing and new methods for approaching essay assignment in your classes. Whether you're a first-year student still getting a feel for college writing or senior finally hoping to make writing more manageable, this course will help you develop the writing process that works for you. Topics covered will include: "attending to the writing assignment "finding a meaningful topic "developing an effective argument "incorporating research "determining structure and organization "understanding voice and style "appreciating the impact of audience

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: preference will be given to first-year students
Grading: pass/fail only
Materials/Lab Fee: approximately $25 for books

Winter 2020
LEC Section: 01 TW 1:00 pm - 3:50 pm Cancelled

SPEC 21 (W) Experience in the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical component of the decision to enter a profession. Through these field placements, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the
workplace. In order to participate in this course, students must apply to the winter study internships listed in this syllabus. The expectation is that each student will observe and participate in some aspect of the profession for at least 30 hours per week, 6 hours per day for 5 days each week. It is also expected that the instructor will assign a specific project to be completed within the 3-4 week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization, and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience.

Teaching Associates: Williams College Alumni/Parents will be recruited to become teaching associates for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course instructor in person or via telephone conference. Students will be required to read one of two books selected for this course. Bibliography: a bibliography of readings would be selected from such works as: What Should I do with My Life? by Po Bronson, 2003; Working by Studs Terkel, 2004.

Requirements/Evaluation: it is expected that students will complete assigned readings (read one of two books assigned to this course), write a daily journal, and write a 5- to 7-page expository review; evaluation will become public record as a resource for other students

Prerequisites: interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific WS internships listed in the SPEC 21 syllabus; application are submitted via Handshake

Enrollment Preferences: 1st priority--students applying for winter study internships listed in the SPEC 21 syllabus; 2nd priority--students developing independent Internships with Williams alumni/parents; first-years limited to applying for local internships

Grading: pass/fail only

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

SPEC 22 (W) Outdoor Emergency Care

Cross-listings: SPEC 22 LEAD 22

Secondary Cross-listing

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon: 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques Specifically, the course teaches how to recognize and provide emergency medical care for: - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, sprains, etc.) - Shock, Respiratory, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 12 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Tom Feist is an alumni of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

Requirements/Evaluation: completion of daily homework; written and practical final exam

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading: pass/fail only
Materials/Lab Fee: $180 and approximately $110 for books

SPEC 24  (W)  Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

Class Format: wsp internship

Requirements/Evaluation: Evaluation will be based on a journal and a 5-page paper

Prerequisites: prerequisites: Sophomore, Junior or Senior standing; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: statement of interest

Grading: pass/fail only

Materials/Lab Fee: $400

SPEC 25  (W)  Williams in Georgia

Cross-listings: SPEC 25 RUSS 25

Secondary Cross-listing

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their overall trip experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Requirements/Evaluation: 10-page paper

Prerequisites: none; knowledge of Russian or Georgian is not required

Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course

Grading: pass/fail only

**SPEC 26 (W) Essentials for Entrepreneurship: An Immersion In the San Francisco Start-Up Culture**

Interested in Entrepreneurship and seeing first-hand what it takes to launch a venture? Visit over ten startups in the Bay area to find out! This course is designed to give students interested in Entrepreneurship in-depth insight into the Customer Discovery process, i.e. how startups figure out if their ideas are worth pursuing. We will meet with the founders of 10-15 start-ups in the Bay Area and track their professional and personal journeys. We will look at the impact of company culture, the Bay Area ecosystem and values, financing, and how a Liberal Arts background prepares students for the challenges of entrepreneurship. Student teams will have the opportunity to work on an actual project for one or more of the companies to be visited and present their findings to senior management. We will also visit the Google campus and Stanford School While many of the companies will be technology driven, no technical background is needed and we will strive to have a diverse background in the class. The course will start in Williamstown with a review of idea development tools used in today's startup environment, particularly those pioneered by Stanford d.School called the Business Model Canvas. Workshops on Design Thinking and maximizing the Williams network will round out the pre-trip coursework. Reading will include *The Lean Startup* by Eric Ries, *Zero to One* by Peter Thiel and Edward deBono’s *Thinking Course* as well as articles and podcasts. Then we will go see what is actually happening in the market! Meeting times: 1/6/20 - 1/14/20 Williamstown. 10am-1pm  1/15/20 travel to San Francisco 1/16-20/1-28/20 San Francisco 10am-5pm or as needed based upon project 1/29/20 Travel back to Williamstown  Adjunct Instructor Bio: Tonio Palmer is the Entrepreneur in Residence at Williams. Tonio has had a long career in international business and founded a number of companies. He holds an MBA from Wharton and MA from Upenn as a graduate of the Lauder Institute.

**SPEC 27 (W) Community Development Health and Education Work Project in Liberia, W. Africa**

Interested in a great opportunity to immerse yourself in the culture of West Africa and do some service work at the same time? This course will explore the close historical ties that exist between Liberia, the US and Williams and how NGO's have succeeded and not succeeded. We'll experience rural living in the tropical environment of the interior of Liberia as we work in the River Gee county. Our project will include health care and preparing classes to be presented in the local schools. We will be directed and supported by the Honorable Francis Dopoh,Il, CDE class of 2010 who represents this county in the Liberian Congress.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: informational and training meetings with the instructor and some reading of current books on Liberia, eg. *The House at Sugar Beach* by Helene Cooper

Enrollment Limit: 8

Enrollment Preferences: any student interested in this offering will be required to attend an informational meeting and be required to submit a written
statement of purpose as to why they want to participate and what they hope to gain from this experience

Grading: pass/fail only

Materials/Lab Fee: $3,150

SPEC 28 (W) The GYROKINESIS® Movement Method

Cross-listings: DANC 16 SPEC 28

Primary Cross-listing

The Gyrokinesis Method is an original and unique movement practice, which has roots in Yoga, Tai Chi, gymnastics, dance and swimming. This method gently works the entire body, opening energy pathways, stimulating the nervous system, increasing range of motion and creating functional strength through rhythmic, flowing movement sequences performed with corresponding breathing patterns. We will work in a group setting. Students will learn the basic concepts of this movement system, as well as more complex sequences. They will be expected to learn and execute all sequences for Format I. They will be asked to practice between classes. Ultimately, students will be paired up to teach each other, which will increase their understanding of this unique form of exercise. Finally, students will be expected to perform all Format I sequences as a group with music. They will then be qualified to take the Gyrokinesis Pre-training Course. Each student will receive a questionnaire at the beginning of the course and, again, at the end, to understand how their experience has changed their answers and how they can apply this movement system to their everyday life, their sport and, their chosen course of study at Williams. Method of evaluation/requirements: Questionnaire at the beginning and then again at the end of this course, teaching each other, and a final performance as a group. Adjunct Instructor Bio: Patrie Sardo has been a Licensed Gyrotonic & Gyrokinesis Trainer and Pre-Trainer for over 10 years. She owns her own studio in Santa Monica, Ca and is licensed to teach all Gyrotonic Specialty equipment; Archway, Jumping Stretching Board, Leg Extension, and the Gyrotoner.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Dance majors, athletes, seniors

Grading: pass/fail only

SPEC 29 (W) Introductory Photography: People and Places

Cross-listings: SPEC 29 MATH 14

Secondary Cross-listing

This is an introductory course in photography, both color and black & white photography, and using the digital camera. The main themes will be people and the landscape. No previous knowledge is assumed, but students are expected to have access to a 35 mm (or equivalent) digital camera, with manual override or aperture priority. The topics covered will include composition, exposure, camera use, direction and properties of light, and digital imaging. Students will develop their eye through the study of the work of well-known photographers and the critical analysis of their own work. We will discuss the work of contemporary photographers such as Mary Ellen Mark, Joel Meyerowitz, Constantine Manos, and Eugene Richards. Students will be expected to spend a considerable amount of time practicing their own photography outside of class. There will be three required local half-day field trips. Students will also be introduced to Photoshop and Lightroom, and will work on their own images with these programs. In 2010 Adjunct Instructor Bio: Mr. Washburne joined the stable of photographic artists who are represented by the Sun to Moon gallery in Dallas. Since then he has worked exclusively as a fine art photographer concentrating on landscapes, abstracts and street shooting. He also published travel stories alongside his photography in both D Magazine and The Robb Report.
Requirements/Evaluation: class participation, an in-class quiz and a final project
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: e-mail questionnaire
Grading: pass/fail only
Materials/Lab Fee: $35 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:
SPEC 29 MATH 14

Winter 2020
LEC Section: 01 MT 10:00 am - 11:15 am R 10:00 am - 11:50 am Dick Washburne

SPEC 30 (W) Emergency Medical Technician Training
This course will prepare students for National Registry of Emergency Medical Technicians (NREMT) certification. Upon successful completion of this course and the Commonwealth of Massachusetts Psychomotor (Practical) Examination students are eligible to sit for the National Registry of Emergency Medical Technicians (NREMT) computer-based cognitive exam. Please Note: A special pre-enrollment process is required for this course. Please contact the course instructor for further information.

WOMEN'S, GENDER AND SEXUALITY STUDIES (Div II)
Chair: Lecturer Kiaran Honderich

Advisory Committee

- Maria Elena Cepeda, Chair and Professor of Latina/o Studies; affiliated with: Women, Gender & Sexuality Stdy, American Studies Program
- Kai M. Green, Assistant Professor of Women's, Gender and Sexuality Studies
- Kiaran Honderich, Chair and Lecturer in Women's, Gender and Sexuality Studies; affiliated with: Public Health Program
- Vivian L. Huang, Assistant Professor of Women's, Gender, and Sexuality Studies
- Gregory C. Mitchell, Associate Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology, Chair of Women's, Gender, and Sexuality Studies; affiliated with: Anthropology and Sociology; on leave 2019-2020
- Greta F. Snyder, Visiting Assistant Professor of Women's, Gender, and Sexuality Studies

Women’s, Gender and Sexuality Studies can be defined as the study of how gender is constructed, how it is inflected by differences of race, ethnicity, sexuality, class, and so on, how gender affects the experiences and situations of men and women, and how assumptions about gender influence the construction of knowledge and experience. Scholarship in Women’s, Gender and Sexuality Studies has brought neglected material into established fields and raised important methodological questions that cross disciplinary boundaries and challenge established intellectual frameworks. The program in Women’s, Gender and Sexuality Studies thus includes courses from a wide variety of disciplines that focus in a coherent way on gender issues and/or sexuality issues, as well as core courses that acquaint students with the interdisciplinarity of the field.

THE MAJOR

The Women’s, Gender and Sexuality Studies major encourages students’ exposure to the interdisciplinary character of feminist and sexuality-focused scholarship. In addition, majors are required to gain some knowledge of methods within a field or discipline (3 courses in one of the categories listed below), to appreciate the importance of diversity (racial, sexual, class, ethnic, national, etc.) in scholarship on gender and sexuality, to gain exposure to feminist and/or queer theory, and to pursue work at an advanced level (3 courses at the 300-level).

In order to ensure that students reflect about the paths that they choose through the major, each major will be assigned to an advisor in the spring of the sophomore year. With the advisor, the student will establish a revisable course of study for the following two years. Students interested in declaring a major should contact the Chair of the Program.

Required Courses

The major consists of at least 9 courses. The following are required:

- WGSS 101 Introduction to Women’s, Gender and Sexuality Studies
- WGSS 202 Foundations in Sexuality Studies
- WGSS 400-level Junior/Senior Seminar in Women’s, Gender and Sexuality Studies. The seminar explores topics in Women’s, Gender and Sexuality Studies, and varies from year to year. Majors may take more than one seminar, space permitting.

In addition to these three required courses, students are required to take six electives. In consultation with their major advisor and with approval from the chair, these six elective courses should include:

- Courses from at least 3 different disciplinary traditions.
- At least 3 courses at the 300-level.
- At least 1 course that emphasizes feminist/queer theories and/or methodologies.
- At least 1 course that emphasizes a diversity of racial, sexual, religious, and/or cultural identities and practices.

In the final semester of their senior year, all majors will be required to write a reflective intellectual autobiography of their WGSS major, in which they explain how their courses meet the goals of the major, and analyze the relationship among the courses they have taken, the papers they have written, and the research projects undertaken.

THE DEGREE WITH HONORS

Honors in Women’s, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a
public presentation of the work, and is awarded honors by the Women’s, Gender and Sexuality Studies Committee. The honors project may be fall semester (plus winter study) or a year-long project. It may consist of a conventional research thesis of 40-70 pages or of other modes of presentation (e.g., art, music, poetry, theater, fiction). Proposals for non-thesis projects should include evidence of experience and competence in the chosen mode.

A student may become a candidate for honors in Women’s, Gender and Sexuality Studies after the following criteria are met:

In April of the junior year, submission and Women’s, Gender and Sexuality Studies Committee approval of a 4- to 6-page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.

At the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;

In the first week of classes of the senior year, submission and approval by the faculty advisor and second reader of a 5- to 10-page “Plan of Action” (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate, students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women’s, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s).

STUDY ABROAD

The Williams College Women’s, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women’s issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester-long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

Antioch College: Comparative Women’s Studies in Europe fall semester

Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester

School for International Training: The Balkans: Women and Democratization, fall or spring semester

Jamaica: Gender and Development, fall or spring semester

Mali: Gender and Development, fall or spring semester

The Netherlands: Identity, Gender and Sexuality, fall or spring semester

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. Depends on the level for which the student is seeking major credit (200- vs 300-).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 101 and 402 cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when
weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

WGSS 101  (F)(S)  Introduction to Women’s, Gender & Sexuality Studies  (DPE)
This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues--historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

Class Format: mix of lecture and seminar meetings
Requirements/Evaluation: two short papers, research proposal and final paper; participation
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Unit Notes: required course for the Women's, Gender and Sexuality Studies major
Distributions: (D2)  (DPE)
Difference, Power, and Equity Notes: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies’ history, activism, and theory.

WGSS 102  (F)  West Africa through Women's Voices  (DPE) (WS)
Cross-listings: WGSS 102  HIST 102
Secondary Cross-listing
This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources--oral tradition, legal records, women's popular songs, Islamic pedagogical verse, personal correspondence and novels--we will consider how women's experiences challenge dominant narratives of history that have often excluded them. The course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

Requirements/Evaluation: discussion participation, map quiz, weekly response papers and a 10-page final academic paper or creative writing
Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 102 (D2) HIST 102 (D2)

Writing Skills Notes: Students will write short papers (2 pages) each week in response to a prompt about the assigned reading. Instructor will provide feedback on argument and content for each paper, with suggestions for improvement. Students will also write a 10-page review of a recent novel that integrates historical research. The review project will be broken down into multiple drafts throughout the semester, with feedback provided by the instructor and peers.

Difference, Power, and Equity Notes: Texts in this class lay the groundwork for discussions about how different groups of women in West Africa have experienced power and inequality along differences of gender, race, slave/free status, marital and motherhood statuses, religion, and class. Close readings of primary texts equip students to understand how women in West Africa have understood and responded to structures of power and inequality. Students analyze how historical narratives change when marginalized actors are prioritized.

Not offered current academic year

WGSS 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: WGSS 105 ENGL 105 AMST 105

Secondary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105 (D2) ENGL 105 (D1) AMST 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Fall 2019
WGSS 110  (S)  The Veil: History and Interpretations  (DPE) (WS)

Cross-listings:  ARAB 215  WGSS 110  HIST 110

Secondary Cross-listing
This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation:  each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites:  first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 215 (D2) WGSS 110 (D2) HIST 110 (D2)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

WGSS 113  (F)  The Feminist Poetry Movement  (DPE) (WS)

Cross-listings:  ENGL 113  AMST 113  WGSS 113

Secondary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation:  three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Not offered current academic year

WGSS 132 (F) Black Writing To/From/About Prison (DPE) (WS)

Cross-listings: ENGL 132 WGSS 132

Secondary Cross-listing
This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. The primary project in this course is the development of open letter writing skills. This epistolary form allows both for the intimate engagement of individual, familiar contact and the deft inclusion of targeted eavesdroppers in order to raise the consciousness of listeners and affirm the value of personal relationships. Course texts will include letters to and from prison; documentaries; selections from anthologies like If They Come in the Morning and Captive Genders: Trans Embodiment and the Prison Industrial Complex; autobiographies like that by Malcolm X, Wailah Imarisha, and Assata Shakur; poetry by Ericka Huggins, Huey Newton, and Terrance Hayes; and critical interventions by scholars like Nikki Jones, Victor Rios, Michelle Alexander, and Angela Davis. We will also look at contemporary groups organizing around abolition and prisoner support including Critical Resistance, Photos From Solitary, and TGIJP (Transgender Gender Variant Intersex Justice Project).

Class Format: discussion, engagement with guest speakers, engagement with Special Collections

Requirements/Evaluation: four open letters developed with critical feedback (4-5 pages), a twice weekly question diary, an organization report and presentation, a collectively decided project

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 132 (D1) WGSS 132 (D2)

Writing Skills Notes: Open letters are a mainstay of black literature allowing for intimate engagement of the individual and the deft inclusion of targeted eavesdroppers to raise the consciousness of listeners and affirm the value of personal relationships. Students will learn to write letters with purpose to facilitate a felt relationship to the topic; enhance writing skills including achieving clarity and aesthetic value; practice curation of references. Four 5-page letters with rigorous feedback to sharpen form.

Difference, Power, and Equity Notes: This class studies the historical development of mass incarceration of black folk from its roots in American slavery and white supremacist policy. This class also studies the impact of the prison industrial complex on transgender and queer folk in reproducing gender binaries and sexual abuse in and outside prison walls. The politics of prison abolition and gender self determination present critical interventions into the hegemonic structures of normalized racial dominance and gender oppression.

WGSS 138 (S) Spectacular Sex

Cross-listings: WGSS 138 ANTH 138

Primary Cross-listing

From Beyoncé's Super Bowl halftime show to Donald Trump's presidential campaign, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

Requirements/Evaluation: weekly response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students; a statement of interest will be solicited from pre-registrants

Not offered current academic year

WGSS 139 (S) Living a Feminist Life (DPE) (WS)

Cross-listings: ENGL 139 COMP 139 WGSS 139

Secondary Cross-listing

The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the ways we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, Living a Feminist Life, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmes' lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's A Small Place, Audre Lorde's Sister Outsider, Djamila Boupacha's memoir, Ana Lily Amirpour's film A Girl Walks Home Alone at Night, Sara Ahmed's Living a Feminist Life, Valerie Solanas's SCUM Manifesto, and bell hooks's Teaching to Transgress. In their writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

Requirements/Evaluation: five short written assignments and one final research project

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 139 (D1) COMP 139 (D1) WGSS 139 (D2)

Writing Skills Notes: This course will center writing and research skills with at least one session per week devoted to ladder development and revision. Five short papers (3-4 pages) with one revision (5-6 pages) as well as a bibliography and final research paper (12-15 pages).

Difference, Power, and Equity Notes: This course will examine the generative intersectional site of feminism, antiracism, and anticapitalism to provide an alternative introduction to feminist thought, writing, and practice. The syllabus centers women and femme writers of color.

WGSS 152 (S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)

Cross-listings: HIST 152 WGSS 152

Secondary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper
**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** given first to those who have been dropped from this class previously, then to first-years, then to sophomores

**Expected Class Size:** 15-19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
HIST 152 (D2) WGSS 152 (D2)

**Writing Skills Notes:** Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

WGSS 154 (S) History of American Feminisms (DPE) (WS)

**Cross-listings:** HIST 154  WGSS 154

**Secondary Cross-listing**

This class studies the historical development of feminist movements and ideas in the United States from the women's rights movement in the 19th century to the present. The class will examine how diverse groups of activists organized for and understood the goal of women's and/or gender equality, focusing especially on the ways that race, class, and sexual identity intersected with political demands over time. This is a writing intensive class in which students will have the chance to analyze historical documents, assess scholarly studies of feminism, and conduct original research.

**Requirements/Evaluation:** participation; three 5-page essays; one longer research paper due at the end of the semester with a research precis, annotated bibliography, and draft due earlier

**Prerequisites:** first-year students

**Enrollment Limit:** 19

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
HIST 154 (D2) WGSS 154 (D2)

**Writing Skills Notes:** Three 5-page essays evenly spaced throughout the semester; one longer research paper (10 pages) due at the end of the semester with a research precis, annotated bibliography, and draft due earlier. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Looking historically at the ways that activists have mobilized to address sex-based inequalities and for social justice, this class examines ways that gender identities intersect with race, class, and sexual identity. The course encourages thoughtful discussion about how difference works historically, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity.

WGSS 177 (S) Gender and Sexuality in Music  (DPE)

Cross-listings:  WGSS 177  MUS 177

Secondary Cross-listing

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation:  attendance/participation, short assignments, midterm project, final paper

Prerequisites:  open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit:  19

Enrollment Preferences:  WGSS and MUSC majors/prospective majors

Expected Class Size:  15

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 177 (D2) MUS 177 (D1)

Difference, Power, and Equity Notes:  This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as 'natural,' and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources—elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

WGSS 201  (F) War and Resistance: Two Centuries of War Literature in France (1804-2016)

Cross-listings:  WGSS 201  RLFR 202

Secondary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to the recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. Conducted in French.

Requirements/Evaluation:  active class participation, midterm exam, and two to three papers

Prerequisites:  exceptional performance in RLFR 105; successful performance in RLFR 106 or 107; or by French placement exam; or by permission of instructor

Enrollment Limit:  20

Enrollment Preferences:  French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

WGSS 202 (F)(S) Foundations in Sexuality Studies (DPE)
This course will offer an introduction to the burgeoning interdisciplinary field of sexuality studies in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. It explores the role of race, class, religion, science, region, and nation in the construction of modern gender and sexual identities and in the lived experiences of dissident genders and sexualities. We will examine a range of issues, including histories and strategies of resistance; transgender and intersex theory and activism; critiques of the white racial hegemony of lesbian and gay studies; the consequences of gay marriage; the politics of AIDS and its theoretical implications; globalization and sexuality; the rise of queer visibility and its relation to commodity culture; and recent conceptualizations of homonormativity. The goal of the course is not to achieve any kind of political or intellectual consensus, but to have rigorous debate over some of the key issues in queer studies.

Class Format: discussion
Requirements/Evaluation: short papers, possible creative assignments, final essay exam
Prerequisites: none, though WGSS 101 may be helpful, but not required
Enrollment Limit: 20
Enrollment Preferences: Women's Gender & Sexuality Studies majors, short statement of interest in case of over-enrollment
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines sexual diversity in various forms and asks students to interrogate questions of privilege and positionality, including the intersectional contemplation of sexuality’s relationship to race, ethnicity, ability, class, religion, and other axes of identity. It investigates not only sexual difference, but the history of sexual identity and progressive narratives of “gay rights” that have developed over time.

WGSS 203 (F) Chicana/o Film and Video
Cross-listings: ARTH 203 WGSS 203 LATS 203 AMST 205
Secondary Cross-listing
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab
Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays
Prerequisites: none

WGSS 205  (S)  Gender and Economics
Cross-listings: ECON 203  WGSS 205
Secondary Cross-listing
This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women's employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How successful are government policies that primarily affect women (e.g., comparable worth policies, AFDC/TANF, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.
Class Format: discussion
Requirements/Evaluation: weekly discussion papers, two midterms, and a final paper and presentation

WGSS 207  (F)  She Speaks in Color: Examining the ‘Color Complex’ in Toni Morrison's Writings
Cross-listings: COMP 236  AFR 205  WGSS 207
Secondary Cross-listing
The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), Sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015). In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and
consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Class Format: tutorial

Requirements/Evaluation: six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography

WGSS 212 (S) Ethics and Reproductive Technologies

Cross-listings: WGSS 212 SCST 212 PHIL 212

Secondary Cross-listing

In her groundbreaking book, *The Tentative Pregnancy*, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the
more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

WGSS 213  (S)  Race, Gender, and the Alien Body: Octavia Butler's Science Fiction

Cross-listings: WGSS 213  SCST 213  AFR 213

Secondary Cross-listing

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

WGSS 214  (F)  Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin's Russia  (DPE)

Cross-listings: GBST 213  RUSS 213  WGSS 214  COMP 257
Secondary Cross-listing
Since Vladimir Putin's rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time
that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in
Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting
"homosexual" propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's
ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has
changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical
turn in official policy and inspired resistance and protest among Russian feminists and queers. All readings will be in English, and all films with have
English subtitles.
Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

WGSS 215 (F) Ways of Knowing: Music, Movement, Memory
Cross-listings: THEA 202 AFR 215 WGSS 215 DANC 215
Secondary Cross-listing
This interdisciplinary seminar proceeds from the premise that the body knows. Ongoing colonial modernity is rooted in a racialized hierarchy: the
"civilized" life of the mind vs. the "primitive" instincts of the flesh. According to this binary, the body is marked as irrational, sinful, outside of the archive.
The body cannot know because the happenings of the body are ephemeral: unlike documents, they don't last. In this course, we will subject this logic
close scrutiny. As performance scholar Diana Taylor asks, "Whose memories, traditions, and claims to history disappear if performance practices
lack the staying power to transmit vital knowledge?" In this course, we look to music, movement, and other repertoires as ways of knowing,
remembering, and world-making. How does embodied knowledge travel across time and space? How have performance practices served as modes of
what Ashinaabe cultural theorist Gerald Vizenor calls "survivance" (survival + resistance) for indigenous, nomadic, queer, and colored communities.
Case studies include: the Middle Passage and the syncretic birth of the Blues in the Americas; nomadism, the nation-state, and the migration of
Romani music; and the evolution of queer ball culture. Students will engage with a variety of texts (verbal, sonic, visual, kinesthetic) and respond to
them critically not only through writing and discussion, but also through their own performance practices.
Requirements/Evaluation: in-class participation, creative/critical responses to texts, final paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Theater majors
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option

WGSS 218  (S)  Gender and Sexuality in the Neo-slave Narrative  (DPE) (WS)

Cross-listings:  WGSS 218  AMST 218  ENGL 218  AFR 218

Secondary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's Kindred, Jewelle Gomez's Gilda Stories, Glenn Ligon's "Runaways", and Jordan Peele's Get Out. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation:  mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit:  19

Enrollment Preferences:  sophomores

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 218 (D2) AMST 218 (D2) ENGL 218 (D1) AFR 218 (D2)

Writing Skills Notes: Three thesis papers at 5 pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the work of black writers and artists engaged with the archival silences imposed by the
The power dynamics of racial hierarchy which constrained the birth of African American literature (the slave narrative). In particular, we examine the meaningful/wilful/and censorial omissions that shape the treatment of gender and sexuality in these texts including and especially the silences around sexual abuse and sexual assault practiced by beneficiaries of white supremacy.

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.

In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert.

**Requirements/Evaluation:** active class participation, two shorter papers, a midterm, and a longer final paper

Difference, Power, and Equity Notes:  In the course, students will explore the concept of gender as a social construction and how the body's historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

WGSS 228 (F)  Feminist Bioethics  (WS)

Cross-listings:  WGSS 228  STS 228  PHIL 228

Secondary Cross-listing

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format:  discussion

Requirements/Evaluation:  active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites:  none, although previous coursework in WGSS is desirable

Enrollment Limit:  19
Enrollment Preferences: prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 228 (D2) STS 228 (D2) PHIL 228 (D2)

Writing Skills Notes: Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

WGSS 230 (F) Gender, Sexuality, and Global HIV/AIDS

Cross-listings: WGSS 230 AFR 230

Primary Cross-listing

The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic’s social, economic and political causes, impact, and conundrums—the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa.

Requirements/Evaluation: two short papers and a research paper; class participation will form part of the grade

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Women’s, Gender and Sexuality Studies majors, Public Health concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

WGSS 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art (WS)

Cross-listings: WGSS 231 ARTH 231

Secondary Cross-listing

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of
Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art—never created for its own sake—was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions and of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity. When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

Class Format: some tutorial meetings will be conducted at local museums

Requirements/Evaluation: engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner's tutorial papers

Prerequisites: first-year and sophomore students (this class is open to students with no experience in art history)

Enrollment Limit: 10

Enrollment Preferences: a statement of interest will be requested in the event the course is over-enrolled

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 231 (D2) ARTH 231 (D1)

Writing Skills Notes: This course's fundamental goal is to support opportunity and skills to construct compelling and original written arguments. Tutorial partners will share standards and guidelines for strong writing with instructor: common concepts and language for critique, discussion, and applause. We will consider the power of argument inextricable from the quality of writing, and thus address writing issues, strategies, and successes in a deep way, organically and consistently, in every tutorial meeting.

WGSS 232  (S)  Approaches to Media Studies: Analyzing Mediated Difference

Cross-listings: LATS 231  AMST 231  WGSS 232

Secondary Cross-listing

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography, and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option
WGSS 233 (F) Chemical Intimacies (DPE)

**Cross-listings:** SCST 233  WGSS 233  ARTH 243  ENGL 243

**Primary Cross-listing**

This is a research seminar that understands human-chemical entanglement in relationship to environment, sexuality, geography, ecology, and capacity. It doubles as a research class in which students choose a project of chemical intimacy to investigate as their own through the course of the semester. In the first half, we will together read and discuss forms of human-chemical entanglement, whether a matter of industrial pollution, pharmaceutical use, habitual intoxication, gendered self-care or enhancement, or built environment; the goal is to achieve a broad sensibility for the concept as well as a familiarity with thinking biochemically and biopolitically about living bodies, while consistently registering questions of race, gender, class, sexuality, disability, and more. In the second half, each participant will choose and research a historically and geopolitically specific scenario of chemical entanglement, while 1) considering the political, legal, cultural, and labor contexts of the case; 2) exploring relationships between "actual" and "represented" (protest slogans or visual productions in the case of environmental justice activism, for example); 3) examining other research questions germane to their site of interest and their chosen discipline of study. We will take one field trip to a local site.

**Requirements/Evaluation:** individual research project

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, Art History majors, English majors, Environmental Studies majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

| LATS 231 (D2) | AMST 231 (D2) | WGSS 232 (D2) |

**Difference, Power, and Equity Notes:** The course gives special attention to forms of human-chemical entanglement that are related to environmental justice (pollution), and gender, racial, sexual, indigenous, and disability politics.

Not offered current academic year

WGSS 235 (F) Innovation, Gender, and Sustainable Development (DPE)

**Cross-listings:** WGSS 235  SCST 235

**Primary Cross-listing**

Technological innovation is vital for communities, businesses and nations seeking to adapt to a globalized, competitive world. But any innovation also has impacts on all three dimensions of sustainability: the ecological, the economic, and the social. For example, such impacts may either exacerbate or mitigate gender inequalities. This course uses a gender studies lens to study innovation in the development of sustainable practices in the present and for the future. We will look at the impact of gender stereotypes on innovation, including the co-construction of gender and technology. Since the course is taught by a visiting scholar from Sweden, a particular focus will be the EU's policy of "Gender Mainstreaming" which requires all proposed policies to be assessed for their impact on gender inequality. The course looks at technical development as necessary and valuable, while investigating power relations and taken-for-granted views embedded in the particular forms it takes. The course will rely largely on analysis of case studies, and students will be encouraged to apply the analytic tools of the course to develop US-based case studies of their own.

**Class Format:** combination of lecture and discussion

**Requirements/Evaluation:** reading journal, mid-term exam, and a final research project

**Prerequisites:** none
Enrollment Limit: 15
Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Environmental Studies majors, students who have taken WGSS 101
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 235 (D2) SCST 235 (D2)
Difference, Power, and Equity Notes: The course focuses specifically on tools for analyzing the potential differential impacts of sustainable development projects along gender lines.
Not offered current academic year

WGSS 237 (S) Queer Drama (DPE)
Cross-listings: WGSS 237 THEA 240
Secondary Cross-listing
This seminar course is a deep dive into the richly dissonant dialogue between queer lives and live performance. How have queer artists shaped and reshaped the field of theatre and performance over time? How has drama, in turn, shaped the landscape of queer life? What inventions and innovations might we attribute to the evolution of "queer"? We will look to the work of artists such as Tennessee Williams, Tarell McCraney, Taylor Mac, Reza Abdoh, Sharon Bridgforth, Virginia Grise, and many others as we seek to map the messy topography of queer performance.
Class Format: three hours per week
Requirements/Evaluation: two 5-page papers, participation in text-based seminars, and a final performance
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: if the class is overenrolled, students will submit a letter of interest in the class
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 237 (D2) THEA 240 (D1)
Difference, Power, and Equity Notes: This course takes "queer" as an analytical and methodological lens for approaching questions of power, performance, and self-making.

WGSS 239 (S) History of Sexuality
Cross-listings: GBST 241 REL 241 HIST 292 WGSS 239
Secondary Cross-listing
Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.
Requirements/Evaluation: reading responses, two essays, and final research paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Religion, History, and Women's, Gender and Sexuality Studies majors

WGSS 240 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Primary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: a short statement of interest will be solicited

WGSS 241 (S) Sex and Gender in Ancient Greece and Rome

Cross-listings: WGSS 241 CLAS 241 COMP 241

Secondary Cross-listing
From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

WGSS 242 (S) Women, Gender, and Sexuality in Islam (DPE)
Cross-listings: ARAB 242 REL 242 WGSS 242

Secondary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors
Expected Class Size: 14
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 242 (D2) REL 242 (D2) WGSS 242 (D2)

Difference, Power, and Equity Notes: This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

Not offered current academic year

WGSS 243 (F) Islamic Law: Past and Present
Cross-listings: WGSS 243 ARAB 243 HIST 302 REL 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.
WGSS 244  (F)  Actually Existing Alternative Economies  (DPE)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including ‘Solidarity Economy’ and ‘New Economy’ to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, ‘a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.’ Feminist geographers Julie Graham and Katherine Gibson developed practices of ‘mapping’ local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

Not offered current academic year
This tutorial considers India's legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India's diverse and fragmented society.

**Class Format:** meetings weekly, weekly writing, and discussion

**Requirements/Evaluation:** weekly writing assignments and tutorial attendance every week

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 246 (D2) ANTH 246 (D2) WGSS 246 (D2) REL 246 (D2)

**Writing Skills Notes:** Weekly writing, writing chats, intensive feedback on writing grammar, style, argument every week.

**Difference, Power, and Equity Notes:** This course fulfills the Difference, Power, and Equity by theorizing the ways that social power and equity have been and continue to be a source of struggle and division within Indian society. It analyzes the ways that communities have used religion, gender, ethnicity, and caste to struggle for power and status within Indian society.

**WGSS 248 (F) Carmen, 1845 to Now**

**Cross-listings:** WGSS 248 MUS 278

**Secondary Cross-listing**

The story of the gypsy *femme fatale* Carmen has endured for over 150 years. In Western culture she exemplifies the seductive, exotic, independent, and forbidden woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal narrative, starting with Prosper Mérimée's 1845 novella on which Bizet based his beloved 1875 opera *Carmen*. We will consider various staged and film versions of the opera itself, including Francesco Rosi's stunning 1984 movie, and discuss various other film transformations of the story, from DeMille's 1915 silent film through Hammerstein's 1954 all-black musical *Carmen Jones*, to the MTV version *A Hip Hopera* of 2004. Comic approaches will also be assessed, from Charlie Chaplin's *Carmen Burlesque* of 1915 through Spike Jones' '52 *Carmen Murdered!* and *The Naked Carmen* of 1970. We will explore remarkable dance interpretations ranging from Carlos Saura's 1983 flamenco version through David Bourne's choreography in his 2001 gay reading called *The Car Man*.

**Class Format:** after initial group meetings to discuss Mérimée's novella and Bizet's music, students will meet with the instructor in pairs for one hour each week

**Requirements/Evaluation:** each student will write a 5- to 6-page essay every other week (five in all), and provide peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation

**Prerequisites:** none; ability to read music useful but not necessary

**Enrollment Limit:** 10
**WGSS 250 (F) Gender, Sexuality and Modern Performance**

**Cross-listings:** THEA 250 ENGL 253 WGSS 250 COMP 247

**Secondary Cross-listing**

This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecionalities of social identities under interrelated systems of oppression. Close analysis of works by dramatists--such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac--will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherrie Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway.

**Class Format:** tutorial

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores and above; majors in Theatre, English or Women's, Gender and Sexuality Studies

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**WGSS 255 (F) “Disease” in Modern Chinese Literature and Culture**

**Cross-listings:** WGSS 255 CHIN 253 COMP 254

**Secondary Cross-listing**

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "diseases" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease"; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers’ analytical essays and fictional writings in the 20th century; we examine how metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are “practiced” in literature...
circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** regular in-class presentation, three short papers (3-5 pages) and one final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 255 (D2) CHIN 253 (D1) COMP 254 (D1)

**Attributes:** PHLH Bioethics + Interpretations of Health

Not offered current academic year

WGSS 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE)

**Cross-listings:** ANTH 256 REL 256 ASST 256 WGSS 256

**Secondary Cross-listing**

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity.

Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

**Requirements/Evaluation:** class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 256 REL 256 ASST 256 WGSS 256

**Difference, Power, and Equity Notes:** The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality.

WGSS 258 (F) Black Women in African American Literature and Culture
Cross-listings: AMST 248  WGSS 258  ENGL 248

Secondary Cross-listing

This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange's For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf), and socio-political propaganda (the "Black is Beautiful" movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series Insecure.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages; final project on the hashtag #blackgirlmagic

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

WGSS 259  (S) Adultery in the Nineteenth-Century Novel

Cross-listings: COMP 259  WGSS 259  ENGL 261

Secondary Cross-listing

In this tutorial, we will read four novels written between 1850 and 1900, all of which focus on the figure of the adulteress: Gustave Flaubert's Madame Bovary (1856), Lev Tolstoy's Anna Karenina (1873-77), Leopoldo Alas y Ureña's La Regenta (1884-85), and Theodor Fontane's Effi Briest (1894). For each week of class, students will read one of these primary texts, as well as a selection of secondary literature that will allow us to understand, over the course of the semester, how and why the adulteress played a key role in the cultural imagination of Europe during this time. All works will be read in English translation.

Class Format: tutorial; students will meet with the professor in pairs, with one student from each pair writing a 5-page paper for each class session

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have already taken at least one course devoted to literature at Williams

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 260  (F) Power, Feminist-Style  (DPE) (WS)
Cross-listings:  WGSS 260  PSCI 260

Primary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice—the concept of power—from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation:  eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  Women's, Gender, and Sexuality Studies majors
Expected Class Size:  19
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 260 (D2) PSCI 260 (D2)

Writing Skills Notes:  This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes:  This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

WGSS 261  (S)  The Saint and the Countess: Lost Voices of Medieval Women

Cross-listings:  WGSS 261  MUS 261

Secondary Cross-listing

Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs.

Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.

Requirements/Evaluation:  several short papers and presentations, and a final project and presentation
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  current or prospective Music and Women's Gender & Sexuality Studies majors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option

WGSS 262  (S)  Gender and Conflict in International Relations
Cross-listings: WGSS 262  PSCI 261
Secondary Cross-listing
This course explores gender dynamics in modern conflicts from the perspective of civilian societies, state militaries and non-state armed groups. The course will look at gender roles, relations, and symbols, throughout different phases of conflict including the precursors to conflict, during a conflict, and finally in the aftermath of active conflict. We will examine contemporary security debates related to gender including violent extremism, women in the military, and post-conflict reconstruction. We also look at case studies from several regions including Uganda, El Salvador, Sierra Leone, and Northern Ireland. Gender, in this course, will be used as a lens to understand different identities in conflict and expectations for women, men, boys, and girls, as well as examine femininities and masculinities. The course will use literature from scholars in the field of gender and conflict but will also include literature on conflict that does not have a gender perspective, with the aim to encourage students to add their own gendered analysis or questioning of current theories of conflict in international relations.
Requirements/Evaluation: short writing assignments; some combination of take-home exams and in-class presentations; class participation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: potential and actual Political Science majors or Women's, Gender and Sexuality Studies majors
Expected Class Size: 18

WGSS 263  (S)  Transnational Activism: Practice, Problems, Ethics  (DPE)
Cross-listings: SOC 264  WGSS 263
Primary Cross-listing
The world's got problems. These problems don't respect national boundaries. This class looks at how activists have engaged across borders and with transnational institutions in order to address transnational problems like class inequality, sexism, homophobia, climate change, and more. It asks: what are the different forms that transnational activism takes and how have transnational activists have advanced their goals? Why and how have transnational activists' efforts failed? What are the practical and ethical difficulties associated with transnational activism? What does ethical transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.
Requirements/Evaluation: class attendance/participation; critical profile of transnational activist; essay or project proposal, final essay or project
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Women's, Gender, and Sexuality Studies majors and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 264 (F) Bodies, Genders, and Sexualities in the Early Christian World (DPE)

Cross-listings: REL 264 WGSS 264

Secondary Cross-listing
What does it mean to be a woman or a man? To have body? A gender? A sexuality? In this course we will explore the ways in which bodies, genders, and sexualities were experienced and described in Mediterranean antiquity. Ancient experiences of and ideas about bodies, genders, and sexualities were often very different than those of the contemporary world. Nevertheless, because Greek and Roman antiquity and Christian beginnings oftentimes functioned as the imagined origins of "Western" (or European and American) "civilization," these ancient ideas about bodies, genders, and sexuality, maintain an out-sized presence in current debates about the "normal" body, gender practices, and the contour of sexuality. With a focus on early Christianity, the course seeks, on the one hand, to introduce students to the early history of Christianity through an inspection of its pluriform discourses on the meaning and regulation of bodies, genders, and sexuality, even as it keeps an eye toward the modern legacy of these ideas. On the other hand, the course gives students the opportunity to be introduced to key questions and theories in Women's, Gender, and Sexuality Studies through the study of early Christianity and its environs

Requirements/Evaluation: weekly response papers, 5- to 6-page paper, 8- to 10-page pap
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: majors, student seniority by class
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: The course's focus on the production and use of difference in terms of bodies, genders, and sexualities, and how those putative differences were used to authorize the social distribution of power, qualify this course as meeting the DPE distribution requirement.

Not offered current academic year

WGSS 267 (S) Performance Studies: An Introduction (DPE)

Cross-listings: DANC 267 WGSS 267 THEA 267 COMP 267

Secondary Cross-listing
Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing "performance" as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatrics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance
studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

**Requirements/Evaluation:** reflection papers, performance analysis, final paper or performance

**Prerequisites:** none

**Enrollment Limit:** 20

**WGSS 269 (F) Staging Race and Gender** (DPE)

**Cross-listings:** ENGL 249  THEA 249  WGSS 269

**Secondary Cross-listing**

This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley’s *Black Odyssey*, a 21st century production of a black man’s coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O’Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as *Queen Sugar*, *This Is Us*, Atlanta, and The Chi.

**Requirements/Evaluation:** four papers totaling at least 20 pages and in-class group performances

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 249 (D1) THEA 249 (D1) WGSS 269 (D1)

**Difference, Power, and Equity Notes:** This course will explore how race and gender have been constructed in the American theatre from the 19th century to the present. Students will develop skills for interrogating the performativity of race and gender, and achieve proficiency with these skills through critical response papers and short, in-class dramatizations that integrate theoretical perspectives on visual culture, performance, and gender and feminist studies.

**Attributes:** ENGL 200-level Gateway Courses

Not offered current academic year
WGSS 274 (F) ‘As If Her Mouth Were a Weapon’: Jamaica Kincaid  (DPE)

Cross-listings: ENGL 254  WGSS 274

Secondary Cross-listing

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include *Annie John* (1985), *Lucy* (1990), *The Autobiography of My Mother* (1996), *My Brother* (1997), *Mr. Potter* (2002), and *See Now Then* (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

Class Format: meeting as a full group two to three times; meeting in tutorial pairs for most of the semester

Requirements/Evaluation: five 4- to 5-page essays and five 2-page critical responses, completed in tutorial pairs, keyword assignment, final roundtable

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

WGSS 275 (S) Women’s Contemporary Cultural Production in Latin America  (DPE)

Cross-listings: COMP 286  WGSS 275  RLSP 274

Secondary Cross-listing

In Latin America, women have been largely displaced as historical subjects and reduced, in many ways, to symbolic figures or icons whose trajectories have been depicted as essential to the construction of diverse social projects within the context of patriarchal nation-states. Each country has formed a specific idea of what a woman is, and can be, through its cultural production, and this constant erasure/objectification has led to a complex problematic when it comes to addressing women as cultural producers. Keeping this in mind, in this course we will explore the concept of "Woman" as a representation and women as cultural producers in contemporary Latin America. We will address intersections of race/ethnic positioning, sexual identity, and social class to explore their role in the reception and understanding of the work of these female artists. Through the analysis of varied cultural production, the syllabus will present an interdisciplinary approach to the contributions of female artists to the cultural representation of race/ethnicity, masculinity, femininity, violence, sexuality, gender identity, nationalism, citizenship, and social movements. We will explore the work of artists such as Sara Castrejón, Nahui Ollin, Ciltali Fabián, Amparo Dávila, Alejandra Pizarnik, Rosario Castellanos, Reina Roffé, Ana Tijoux, Lucrecia Martel, Chavela Vargas, Graciela Iturbide, Celia Cruz, Lucía Puenzo, Cecilia Barriga, Cristina Rivera Garza, María Novaro, Cristina Peri Rossi, Maruch Sántiz Gómez, Leonora Carrington, and Maris Bustamante, among others. In addition, we will read theoretical texts on diverse subjects corresponding to each specific cultural product.

Requirements/Evaluation: essays (7-8 pages), weekly written reports, oral presentation, active and engaged class participation

Prerequisites: RLSP 105, placement exam results, permission of instructor or Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish majors and certificate students, current and potential; LATS concentrators
Difference, Power, and Equity Notes: We will address issues of racial/ethnic positioning, sexuality, gender identity, and social class in light of diverse human experiences in contemporary cultural production in Latin America.

WGSS 279  (F)  Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings:  COMP 279  REL 271  WGSS 279  ASST 271

Secondary Cross-listing

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yoogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper

WGSS 283  (F)  Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings:  WGSS 283  ENGL 286  AFR 283  AMST 283

Primary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009),
Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

WGSS 300 (F) Advanced Ballet--Technique, Repertoire, & Revolution: Women at the Barre, on Stage, at the Helm

Cross-listings: WGSS 300 DANC 300

Secondary Cross-listing

To loosely paraphrase the feminist Emma Goldman, “If I can't dance, I don't want to be part of your revolution.” Designed for intermediate/advanced ballet dancers, in this course students will explore different topics in past and current ballet history through the lens of famous ballets, dancers, choreographers, etc. In Fall 2019, we will focus on some of the notable female figures in the world of ballet: while ballet is often perceived as a primarily "female" art form-and indeed, there are many more females vying for positions in ballet companies than males-historically, women have held far fewer leadership positions than men, and have had fewer choreographic opportunities. In addition to technique classes, variations and/or ensemble sections from selected ballets will be taught and coached to students. This is primarily a studio course, although readings relevant to our coursework will be assigned. These assignments will offer historical context, as well as provide rigorous looks at some of the ways in which ballet hasn't always lived up to its potential as a dance form for all people regardless of class, race, and gender. We'll consider basic information-the plotlines of the ballets-as well as more subtle ideas-famous dancers' takes on these roles, the socio-political aspects of the works themselves and the times they were created in. Viewings will also be assigned to allow students to fully explore and grasp the ballets and to provide additional contextualization. Students will submit (informal) written responses to the assignments. The class may go on one or two field trips to attend performances and will write response papers when applicable. This course MAY BE REPEATED for general academic credit (but not for additional WGGS major credit). ANY student with adequate prior training is welcome to this class! Material will be introduced at an intermediate/advanced level, and individuals will be assessed on their own personal progress.

Requirements/Evaluation: quality of participation and progress (throughout the semester) in classes, rehearsals, presentations, and assignment responses

Prerequisites: a minimum of three years prior training in ballet, and a demonstrated ability to safely keep up with this level of instruction; permission of instructor required

Enrollment Limit: 20

Enrollment Preferences: students with demonstrated ability and desire to continue rigorous study

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: ballet class attire: leotard, tights/leggings, ballet slippers; and for those on pointe, pointe shoes

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 301 (F) Sexual Economies  (DPE)
Cross-listings:  WGSS 301  AMST 334  ANTH 301
Primary Cross-listing

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We will have either guest speakers or a field trip to hear from people working in various commercial sex sectors.

Requirements/Evaluation:  midterm essay exam, final research paper, research proposal/annotated bibliography
Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required
Enrollment Limit: 20
Expected Class Size: 20
Grading: yes pass/fail option,  yes fifth course option
Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 301 (D2) AMST 334 (D2) ANTH 301 (D2)

Difference, Power, and Equity Notes: We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

Not offered current academic year

WGSS 302 (F) Social Construction  (DPE)
Cross-listings: SCST 301  COMP 315  REL 301  SOC 301  WGSS 302
Secondary Cross-listing

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Requirements/Evaluation:  regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Religion majors, then majors from cross-listed departments
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SCST 301 (D2) COMP 315 (D1) REL 301 (D2) SOC 301 (D2) WGSS 302 (D2)

Difference, Power, and Equity Notes: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

WGSS 303 (S) Humans and Bodies: Theories of Embodiment

Cross-listings: WGSS 303 REL 313
Secondary Cross-listing

What is the body? Does "the body" precede culture, or is "the body" society's own creation, a contingent assemblage of matter, sensations, and psychosomatics? How does the self, and various types of self, relate to the body? How do sexual selves, racial selves, and gendered selves relate to their own bodies, to other bodies and selves? How are these selves produced through or with the body? How does the self-sense its "own" body? And does the body construct the self, or the self the body? In this course, we'll ask big questions about the body, its relation to the self, and about embodiment, through reading the most important and timely theories of the body, the self, and embodiment, especially as found in psychoanalytic, phenomenological, feminist, trans, and queer theories and methods.

WGSS 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall

Cross-listings: GERM 304 WGSS 304
Secondary Cross-listing

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, Die Ermittlung, Heinrich Böll, Und sagte kein einziges Wort, Gisela Elsner, Riesenzwerge, Emine Sevgi Özdamar, Das Leben ist eine Karawanserei, Volker Braun, Unvollendete Geschichte, Alice Schwarzer, Der kleine Unterschied und seine großen Folgen, Christian Kracht, Faserland, Thomas Brussig, Wasserfarben. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula,"
**Class Format:** tutorial

**Requirements/Evaluation:** alternating 4-page tutorial papers, and 2-page critiques

**Prerequisites:** GERM 202 and permission of the instructor

**Enrollment Limit:** 10

**Cross-listings:** ENGL 309 AMST 308 WGSS 308 COMP 300

**Secondary Cross-listing**

Water imagery has been central to black diasporic culture since its beginnings in the Middle Passage---suggesting imprisonment, isolation, escape, ancestral communion, and death, for example. This course wrestles with the significance of water in diasporic literature---how it endures, how it has diminished, how it slips away from us. Black diaspora theory was revolutionized by Paul Gilroy's *The Black Atlantic*, which urged us to consider more deeply the role of the ship, the routes, and the roots entailed in the formation of diasporic consciousness. This course aims to expand students' theoretical skills as we discuss cornerstone and cutting edge texts of diaspora theory, with an emphasis on theories that work with the relationship to water, such as those by Jacqueline Nassy Brown, Omise'eke Tinsley, and Vanessa Agard-Jones. Primary texts will include *The Big Sea* by Langston Hughes, *Sugar and Slate* by Charlotte Williams, Barry Jenkins' *Moonlight*, and more.

**Requirements/Evaluation:** weekly reading responses, presentations, one 10-page paper, engaged feedback process, and thoughtful class participation

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**WGSS 310 (F) Womanist/Black Feminist Thought**

**Cross-listings:** REL 310 AFR 310 WGSS 310 AMST 309

**Secondary Cross-listing**

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon,
and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

Class Format: discussion

Requirements/Evaluation: class participation, three short response papers, and the completion of an original research paper or project

Prerequisites: none

WGSS 311 (S) Theorizing Shakespeare

Cross-listings: COMP 310 THEA 311 ENGL 311 WGSS 311

Secondary Cross-listing

For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: *The Merchant of Venice*, *Hamlet* and *Antony and Cleopatra*. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

Requirements/Evaluation: 20 pages of writing in the form of two short and one longer paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

WGSS 313 (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: LATS 313 AMST 313 AFR 326 WGSS 313

Secondary Cross-listing

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as
activist strategy challenge traditional understandings of feminist political activity?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, and Women's, Gender and Sexuality Studies majors by seniority

WGSS 314 (F) The Social Ecology of Racial and Gender Inequity (DPE)

Cross-listings: WGSS 314 SOC 314

Primary Cross-listing

Why the political furor over monuments? What would a feminist city look like? Does racial justice require integration? This course trains your focus on space and place, asking you to take a socioecological perspective on race, gender, and other axes of privilege and marginalization. In it, we examine how ideas about race, gender and more shape space as well as how the design of space reinforces social constructs and power relations. After examining specific regions (the city, the suburb, the country) and their relation to one another, we examine specific sites (public transport, public toilets, libraries, houses). The course enables students to better understand the tenacity of inequity by drawing attention to its spatial dimension while at the same time introducing students to -- and providing students tools to engage in -- spatial interventions designed to disrupt vicious social-spatial cycles.

Requirements/Evaluation: attendance, class facilitation, problem identification report, two presentations, reflection

Prerequisites: WGSS/SOC Majors

WGSS 315 (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)

Cross-listings: WGSS 315 RLFR 316
Secondary Cross-listing

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been feted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet.Conducted in French.

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor

Fall 2019
WGSS 317  (F)  The New Woman in Weimar Culture  (WS)

Cross-listings:  GERM 317  WGSS 317

Secondary Cross-listing

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation: papers and oral presentations

Prerequisites: for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

Enrollment Limit:  19

WGSS 318  (S)  Black Masculinities  (DPE)

Cross-listings:  AMST 350  WGSS 318  ENGL 375  AFR 331

Primary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men¿s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation:  students will be responsible for 2 short papers and a final project

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size:  14
Grading: yes pass/fail option, yes fifth course option

Cross-listings: WGSS 322  PHIL 321

Secondary Cross-listing

"Dare to know! Have courage to use your own reason-that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet from its inception and continuing into the 19th and 20th centuries we find the promise of Enlightenment challenged by colonialist expansion, the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? Should it be? Among the possible topics addressed will be: criticizing capitalism, alienation and objectification, progress and freedom, the entanglements of power and reason, radical liberalism, the future of democracy as well as post-structuralist, post-colonial, feminist and anti-racist critiques of the Frankfurt School. Readings may include historical as well as contemporary figures such as: Kant, Freud, Horkheimer, Adorno, Marcuse, Habermas, McCarthy, Honneth, Fraser, Amy Allen, Foucault, Ranciere, Achilles Mbembe, Judith Butler, Wendy Brown, Spivak, and
Charles Mills, among others.

Class Format: students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: each student will write and present five 5- to 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings

Prerequisites: PHIL 202, Kant course, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and students with background in political theory, feminist theory, or post-colonial theory

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: juniors and seniors

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Secondary Cross-listing

Birth, childhood, adolescence, college, adulthood, career, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

Class Format: tutorial

Requirements/Evaluation: Class attendance, analytical essays, responses, and revised essays. Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week’s reading. The other student will respond orally with a 2-page response to their partner's paper. Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester.

Prerequisites: none

WGSS 328  (F)  Austen and Eliot

Cross-listings: WGSS 328 ENGL 328

Secondary Cross-listing

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context—Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism—we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's Pride and Prejudice, Emma, Mansfield Park, and Persuasion; Eliot's The Mill on the Floss, The Lifted Veil; and Daniel Deronda; selected letters and prose; and critical essays.

Class Format: discussion

Requirements/Evaluation: two papers of approximately 8-10 pages

WGSS 329  (S)  Sexuality and US Literatures of the 19th Century

Cross-listings: WGSS 329 AMST 349 ENGL 329

Secondary Cross-listing

If homosexuality and heterosexuality, as it is commonly argued, only came into being as legible identities at the end of the nineteenth century, what constituted "sexualities" before that? This course will explore how sexualities were expressed, regulated, denied and embraced "before identity" through reading closely some of the most central literary and cultural works of the period alongside a set of methodologically and theoretically diverse critical works that engage this query. Some questions we may explore include: What counts as sex and why would that be important to understanding a work of literature? What effect does race, ethnicity, gender, class and other differences make on sexual expression and regulation? How does literature itself represent, theorize, and respond to discourses of desire? Authors whose works we may explore include Emily Dickinson, Frederick Douglass, Harriet Jacobs, Henry James, Herman Melville, and Ralph Waldo Emerson.

Class Format: seminar

Requirements/Evaluation: engaged and thoughtful discussion, in-class writings, oral presentation, one 5- to 7-page paper and one 8- to 10-page paper

Prerequisites: none

Enrollment Preferences: ENGL, WGSS, and AMST majors
WGSS 331  (S)  Queer Europe: Sexualities and Politics since 1850  (DPE)
Cross-listings:  WGSS 331  HIST 332
Secondary Cross-listing
This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but Italy and Russia will also be the focus of some meetings. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

Requirements/Evaluation:  class discussion, the posting of four 500 word response papers, two 7- to 8-page interpretive essays, and a final research paper of 12- to 15-pages

Prerequisites:  none

Enrollment Limit:  25

Enrollment Preferences:  junior and senior History and Women's, Gender and Sexuality Studies majors

Difference, Power, and Equity Notes: Queer Europe is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

WGSS 333  (F)  The Nineteenth-Century British Novel
Cross-listings:  WGSS 333  ENGL 333
Secondary Cross-listing
In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling social issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people
trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in—and sometimes out of—love. Since so many of these stories of everyday life are familiar as, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers’ understanding of themselves as subjects and agents of an ongoing social history.

Requirements/Evaluation: flexible writing requirement includes options for short essays, journal, research paper and exam

WGSS 334 (F) Islam and Feminism

Cross-listings: REL 332 ARAB 332 WGSS 334

Secondary Cross-listing

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 15

WGSS 337 (S) Race, Sex & Gender in Brazil (DPE)

Cross-listings: WGSS 337 ANTH 337

Primary Cross-listing

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and
contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: The seminar will include a mandatory spring break trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. These form the basis of their final research paper. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

Requirements/Evaluation: research paper and its various components, participation

Prerequisites: none

Enrollment Limit: 7

Enrollment Preferences: students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: the cost of the spring break trip is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student

WGSS 339 (S) Stereotypes, Prejudice, and Discrimination

Cross-listings: WGSS 339 PSYC 341

Secondary Cross-listing

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people’s perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course

Requirements/Evaluation: weekly brief papers, oral reports, two longer papers

Prerequisites: PSYC 201 and 242

Enrollment Limit: 16

Enrollment Preferences: senior, then junior Psychology majors

### Cross-listings:
WGSS 340 COMP 342 ENGL 340 AMST 340

#### Secondary Cross-listing
Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

#### Class Format:
three hours per week, in addition to small group discussion and archival research

#### Requirements/Evaluation:
two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

#### Prerequisites:

**Cross-listings:** AMST 341 WGSS 342 ENGL 341

**Secondary Cross-listing**

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods—roughly 1880-1940 (when the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), and the contemporary context of the "postmodern" 21-century—we will explore what it means to read and theorize "queerly." Among the questions we will ask: What counts as "sex" or "sexual identity" in a text? Are there definably lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammonds, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films.

**Class Format:** discussion/seminar

**Requirements/Evaluation:** active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper

**Writing Skills Notes:** Weekly (1000 words) papers to be graded P/F; three letter-graded papers (five pages each), and one final paper (10 pages). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.  
**Difference, Power, and Equity Notes:** DPE themes are central to this course, given how most societies discriminate on the basis of sex, sexual practice, money, power, and, yes, religion.
Shakespeare's plays portray a remarkably wide range of female characters from serving women to queens, from innocent, subservient young women to powerful authoritative adults. His plays explore female friendships, parents and children, love affairs and marriages, male actors playing female roles and female characters playing male roles. Looking closely at five plays—Twelfth Night, Much Ado Nothing, Hamlet, Macbeth, Antony and Cleopatra—we will examine the ways in which attitudes toward female stereotypes, sexuality, gender, subjectivity, social norms and performance evolve as Shakespeare's poetic style and dramatic technique mature, and the genre shifts from comedy to tragedy.

Class Format: tutorial

Requirements/Evaluation: active engagement in tutorial sessions, five 4- to 5-page papers, and five 1- to 2-page responses

Cross-listings: AFR 337  WGSS 346  AMST 337

Primary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

**Cross-listings:** ARTH 348  ENGL 348  SCST 348  WGSS 348

**Primary Cross-listing**

In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal--indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

WGSS 352 (S) *Mystic Spirituality in Black Women's Social Justice Activism: Brazil-USA*

**Cross-listings:** REL 352  WGSS 352  AFR 352

**Secondary Cross-listing**

This course examines the meanings and manifestations of mystic spirituality in the lives and work of selected Black women artists/activists in the USA and Brazil. The writings of Lucille Clifton (poet), Rosemarie Freeney Harding (activist and counselor) and Makota Valdina Pinto (activist and Candomblé ritual elder) are key texts for our exploration of the uses of mystic sensibilities and Afro-Atlantic ritual traditions--such as dreams and visions, prayer, divination, sacred dance, healing rites and other forms of unmediated intimate encounter with the sacred--as resources for creativity, community organizing, self-care and as aspects of political and social critique in African American and Afro-Brazilian contexts. The methodology of the course blends historical, literary and womanist approaches in an investigation of the conjunctions of spiritual practice and activism in the experience of women in the Afro-Atlantic diaspora.

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages) and a final project

Cross-listings:  ENGL 353  WGSS 353

Secondary Cross-listing

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel—two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, Jane Eyre, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall, to Emily's singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 Life of Charlotte Bronte, the first full-length biography of a woman novelist by a woman novelist, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Anne's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

Requirements/Evaluation: discussion, two critical essays and two short creative pieces

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: none

Enrollment Preferences: English majors, WGSS majors, seniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

WGSS 355  (S)  Asexuality and Other Absences

Cross-listings:  ENGL 355  WGSS 355

Secondary Cross-listing

What is asexuality? The asexual individual is commonly defined as "one who does not experience sexual attraction" but, under examination, this keyword quickly gives way a growing body of meanings, feelings, affiliations, and associations. How might asexuality transform or expand our understandings of sexuality, desire, romance, legibility, health, and violence? This seminar will explore the emergent field of asexuality studies while examining various kinds of sexual and romantic absences in contemporary fiction, film, and new media with particular attention to race and disability. How might asexuality disrupt or reify our conceptions of these terms of embodiment?

Requirements/Evaluation: kindness and generosity; engaged classroom presence; online discussion; annotated bibliography; roundtable discussion; visual object analysis; comic memoir; final presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: ENGL and WGSS majors

WGSS 368 (F) Arab Women Writers: Remapping Urban Narratives

Cross-listings: COMP 368 WGSS 368 ARAB 368

Secondary Cross-listing

In "The Lover of Blue Writing above the Sea," (1995) a poem written to console a lover after the death of his beloved, Syrian poet, Ghada al-Samman, pens: "If you are sad and burn the edge of my book/I shall come to you/like the genie in my grandmother'sDamascene stories..." As these lines imply, the fantastic grandmother's Damascene stories have the power to equally amend broken hearts and restore memories of loss. In this course, we will adopt "the grandmother's Damascene stories" as a conceptual metaphor that guides our line inquiry into the intersection of Arab women's narrative and the city. We will read novels and short stories by Arab women writers about cities and capitals in the Arab world and the diaspora. The goal of this course is not only to familiarize students with prominent Arab women novelists, such as Hoda Barakat, Radwa Ashur, Liana Badr, Raja'a Alem, Alia Mamduh, and Ahlam Mosteghanemi, among others, but also to introduce them to the literary and visual cartography of Beirut, Granada (via Cairo), Ramallah, Mecca, Baghdad, and Constantine, respectively. We will also read short stories about other cities in the world, such as New York, Paris, London, Buenos Aires and Tokyo among other world metropolis. Questions we will address include: How does the city appear as a protagonist? How do Arab women novelists represent nationhood, modernity, memory, love, war, sexuality and religion, among other themes, in their construction of urban narratives? How do these narratives map an Arab feminist metropolis? How do Arab women writers represent cities beyond the Arab world? To answer these questions, we will also look at Arab women's blogs and watch films that focus on the city as a site for spatial articulation of national histories, popular revolutions, and feminist public spheres.

Requirements/Evaluation: active class participation, several short response papers, three short papers (3-5 pages), a final performance project, and a final paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and Comparative Literature majors

WGSS 371 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE)

Cross-listings: WGSS 371 ANTH 371 STS 370

Secondary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none
Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 371 (D2) ANTH 371 (D2) STS 370 (D2)

Difference, Power, and Equity Notes: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering.

WGSS 376 (S) Sex, Gender, and the Law in U.S. History (DPE)

This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

Requirements/Evaluation: four papers, including three 4- to 6-page papers, and one final paper of 8-10 pages

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors, Women's, Gender and Sexuality Studies majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

WGSS 377 (F) Legacies of the Gothic Novel: Feminism and Horror in the Transatlantic World (DPE)

Cross-listings: ENGL 377 WGSS 377 COMP 377

Secondary Cross-listing

Much maligned as a popular or "low" genre at its inception in the late eighteenth century, the gothic form has persisted in its popularity as well as crossed into "higher" forms of modernism, postmodernism, and postcolonialism. In this course, we will read key texts in the gothic mode-Frankenstein, Jane Eyre, and Wuthering Heights among others-and follow the ways in which they are revisited and rewritten by contemporary American and
Caribbean writers, filmmakers, and artists. Particularly, we will examine how these texts subvert the realist leanings of Anglo-American narrative fiction and its assumptions of enlightenment rationalism by way of two main processes: narrative hypertrophy and feminist revisions of horror. The class will take up select contemporary criticism on the gothic and horror in literature, film, and art. This course will be of interest to students curious about feminism, postcolonialism, cultural criticism, horror, and comparative literature.

Requirements/Evaluation: presentation, paper plus revision, final research project
Prerequisites: one literature or related course
Enrollment Limit: 25
Enrollment Preferences: any student with relevant coursework in ENGL, COMP, or WGSS
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

WGSS 378 (S) Uncontrollable: Deconstructing Stereotypes of Black Womanhood in the Americas
Cross-listings: WGSS 378 AFR 378
Secondary Cross-listing
In Black Feminist Thought Patricia Hill Collins powerfully illustrates how "portraying African-American women as stereotypical mammys, matriarchs, welfare recipients, and hot mommas has been essential to the political economy of domination fostering Black women's oppression." This course explores how similar social constructions of race and womanhood have evolved in Latin American countries affected by slavery and colonialism. We begin by revisiting Collins' seminal text, as well as the work of other feminist scholars, as a starting point from which to deconstruct controlling images of Black women in Latin American nations. We will then explore clips from films, television series, advertisements, and comic strips to analyze different iterations of stereotypes and their impact on Afro-Latin American women's life chances. The second component of this course will engage with Black women's resistance throughout Latin America. We will engage songs, poetry, and empirical data on Black women's resistance to examine how they have and continue to challenge stereotypes, educate the public, and construct their own narratives of black womanhood.
Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a final paper (12-15 pages)

WGSS 379 (F) Black Women in the United States
As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

Class Format: discussion

Requirements/Evaluation: student participation, three papers, and a brief oral presentation

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women’s work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas’ work and their households in their home countries? How have economic changes and government policies shaped Latinas’ migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households’ needs?

WGSS 389 (F) Fiction of Virginia Woolf

Cross-listings: ENGL 389 WGSS 389

Secondary Cross-listing

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

WGSS 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)
Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

Class Format: three hours per week

Requirements/Evaluation: three 3-page papers, a short oral presentation, a 15-page final paper

Prerequisites: 300-level course

Enrollment Limit: 25

Enrollment Preferences: Comparative Literature majors and advanced students in other fields with permission of instructor

WGSS 408 (F) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers

Cross-listings: RLF R 412 WGSS 408

Secondary Cross-listing

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

WGSS 409 (F) Transnationalism and Difference: Comparative Perspectives
Cross-listings: LATS 409  AMST 411  WGSS 409

Secondary Cross-listing
In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Requirements/Evaluation: student participation, an original 12-15 page research paper conducted in stages, and peer editing

WGSS 411 (S) Advanced Readings and Research
This capstone readings and research seminar for WGSS majors will culminate in a substantial independent research project. In the first half of the semester, we will examine the disciplinary and interdisciplinary development of the field(s) of WGSS; read classic texts and examples of more recent scholarship representing a range of WGSS theories and methods; and explore a variety of methods and strategies for crafting research within the field of WGSS. In the second half of the semester, students will design and conduct their own WGSS-related research projects.

Requirements/Evaluation: weekly discussion questions, research proposal, substantial final research project, and oral presentation
Prerequisites: WGSS 101
Enrollment Limit: none
Enrollment Preferences: WGSS majors
Expected Class Size: 5
WGSS 412  (S)  Graphic Sex: Queer Ethnographic Writing

Cross-listings:  WGSS 412  ANTH 412

Primary Cross-listing

This seminar examines recent and canonical work in queer anthropology, exploring how different cultures construct sexual and gender identities and subjectivities, and what happens when dominant paradigms such as the Euro-American LGBT model become enmeshed in globalization, late capitalism, and consumerism. We begin with a series of case studies highlighting alternative gender and sexual formations in various cultures around the world, emphasizing how these seemingly "authentic" local categories are themselves the products of historical shifts, colonial relations, and political economy. We also examine how these categories overlap, conflict with, subvert, or syncretize with the increasingly global category of "gay." In addition to reading queer ethnographies, we will also learn the methods required for doing ethnography ourselves, including interviewing techniques, participant observation, writing thick description, data analysis, and editing.

Requirements/Evaluation:  ethnographic writing assignments (e.g., interviews, field notes, essays, etc.)
Prerequisites:  none
Enrollment Limit:  15
Enrollment Preferences:  Women's, Gender and Sexuality Studies majors and others with substantial background in Women's, Gender and Sexuality Studies or Anthropology and Sociology Studies; statements of interest will be solicited
Expected Class Size:  15
Grading:  no pass/fail option, yes fifth course option
Unit Notes:  WGSS junior/senior seminar

Cross-listings:  WGSS 413  STS 413

Secondary Cross-listing

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? What features do they share as ethical, political, and epistemological practices? What have scientific feminism and feminist science looked like in print and in practice since the middle of the 20th century, and how have they shaped our present, 21st-century technoscientific culture? To address these questions, we will read a set of essays and academic articles that are connected by a trail of citations. We will begin with the editorial introduction to "Science Out of Feminist Theory," a 2017 special issue of Catalyst, and we will circle outward and backward to make sense of the terms and arguments we encounter there. We will read works of theory, like Donna Haraway’s "Situated Knowledges," and research write-ups like Pat Treusch’s "The Art of Failure in Robotics," and ethnographic work like Sophia Roosth’s "Evolutionary Yarns in Seahorse Valley." While some of the readings will be set in advance, students will help shape the syllabus as we travel toward a better understanding of feminist technoscience’s potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation:  discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); final essay (12-15 pages)
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences:  Science and Technology Studies concentrators

WGSS 416 (S) Senior Seminar: The Art of Minor Resistance: Advanced Readings in Race, Gender, Performance

**Cross-listings:** THEA 416 COMP 404 WGSS 416 ARTH 416

**Primary Cross-listing**

This seminar will study stagings and aesthetic theories of dissent in feminist, queer, anti-colonial, and anti-racist performance. An attunement to performance and to the minor is also a turn toward minoritarian knowledges and lifeworlds. Of interest will be modes of sensing and relating that are not often legible as political—including aesthetics of opacity, quiet, disaffection, aloofness, and inscrutability—but could be understood as critiques of political recognition. Performance is a capacious rubric in this class that will include performance art, social media, photography, music videos, poetry, street protest, and everyday life. Students will learn to describe, interpret, and theorize performance through discussion, writing, and creative form.

**Requirements/Evaluation:** in-class discussion, partner presentation, weekly reading responses, final project

**Prerequisites:** WGSS 101

**Enrollment Limit:** 15

**Enrollment Preferences:** WGSS majors, students with previous performance studies coursework

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**Spring 2020**

SEM Section: 01  TR 8:30 am - 9:45 am  Vivian L. Huang

WGSS 453 (S) Women, Gender, and Social Movements in U.S. History

**Cross-listings:** WGSS 453 HIST 453

**Secondary Cross-listing**

This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women's groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.
**WGSS 468  (S) Practicum in Curating: Visual Art for a Garden**

**Cross-listings:** WGSS 468  ARTH 468

**Secondary Cross-listing**

This course aims to develop the wide range of skills needed to realize an art exhibition in a botanical garden (specifically Marie Selby Botanical Gardens in Sarasota where the instructor is Curator at Large. The course responds to her charge to exhibit artists with 100% name recognition for the first five years of Selby's new "Living Museum" initiative which puts works of art in dialogue with botanicals. In the wake of shows devoted to Marc Chagall (2017), Andy Warhol (2018) and Paul Gauguin (forthcoming, 2019), each student will research and choose a non-male and/or non-white artist of some renown and construct an exhibition of works that might be possible to borrow. Course work includes 1) research on the artist and the concept, the focal works of art, auxiliary objects that do not require climate control (e.g. photographs and other works on paper), social history and other methodological frameworks  2) writing requests e.g., loans, rights; and 3) preparations for several of the following: press release, wall texts, wall labels, audio guide, and programming for the exhibition. The final project includes a 10-page synthetic research paper, written for a general audience, about the artist and their use of flowers as well as the projected installation of the climate-controlled gallery. Students may have the opportunity to participate in a WSP in situ in which they will experience all sectors of the museum, glass house, and gardens.

**Class Format:** this is a practicum so while it meets 3 hours/week as a seminar does, it is hands on in a different way (e.g., co-peer and one-on-one reviewing by me in class)

**Requirements/Evaluation:** in-class presentations of research (weekly or bi-weekly), a substantive annotated bibliography, several short writing assignments (e.g. letters, queries, reviews), reading and critiques of others' work, in-class presentation of two drafts of the final paper and installation

**Prerequisites:** at least one 100-level course in ARTH

**Enrollment Limit:** 10

**Enrollment Preferences:** junior and senior art majors, especially those who have had either methods or a senior seminar and/or those with strong research, writing, and design skills

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** field trip expenses that may not be funded by the department (not to exceed $100)

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

Winter Study   ---------------------------------------------------------------
Joan of Arc (known during her own lifetime most commonly as Jeanne "la Pucelle," or Joan "the Maid") was one of the most dynamic and yet enigmatic personalities of the European Middle Ages. Born into a peasant family in the French border province of Lorraine in 1412, she gained control of an army, won brilliant military victories, crowned a king, and was burnt at the stake as a heretic, all before her twentieth birthday. Triply marginalized by gender, age, and socio-economic status, she nonetheless managed to shake the Church and State establishments to their very core. But who was Joan of Arc? Nationalist martyr? Pioneer feminist? Champion of the people? Instrument of God's grace? Victim of post-traumatic stress disorder? Exemplary transgender warrior? Over the centuries since her death, artists--and not just politicians and scholars--have attempted to answer this question, creating myriad visions of la Pucelle under the influence of an ever-changing lens of contemporary tastes and concerns. Through readings and discussion, this course will survey the history of representations of Joan of Arc in painting, prints, sculpture, and film, from the time of her death to the present.

Requirements/Evaluation: 10-page project or comparable creative project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: statement of interest

Grading: pass/fail only

Materials/Lab Fee: $10 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

WRITING SKILLS (WS)

The Writing Skills (WS) requirement is to improve student writing proficiency across disciplines. Students in these courses will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester. This may be achieved through brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WS courses may also include multiple drafts, peer review, conferences or class discussions designed to improve writing skills. (A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered a writing skills course.)

The primary function of the WS designation is to indicate that the course will provide consistent and ongoing feedback on students’ writing. Thus, the amount of writing should be substantial and well spaced, followed by timely evaluation and suggestions for improvement. Specifically, a WS course should require multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Because WS course instructors must pay attention to students’ writing skills as well as to their mastery of the content of the course, WS courses have a maximum enrollment of 19.

All students are required to take TWO WS courses: one by the end of sophomore year and one by the end of junior year. Students will benefit most from WS courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.

AFR 126  (F)  Black Literature Matters  (DPE)  (WS)

Cross-listings: ENGL 126  AFR 126  AMST 126

Secondary Cross-listing

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course; Africana Studies concentrators; American Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 126 (D1)  AFR 126 (D2)  AMST 126 (D2)

Writing Skills Notes: Students will write and receive feedback on four papers. Papers will range from 3 to 7 pages, and feedback will focus on argument/claim development, critical inquiry, and structure.

Difference, Power, and Equity Notes: Through discussions and short essays, students will develop skills for analyzing the role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present.

Fall 2019

SEM Section: 01    TR 8:30 am - 9:45 am     Gretchen Long
AFR 167  (F)  Let Freedom Ring? African Americans and Emancipation  (WS)

Cross-listings: AMST 167  AFR 167  HIST 167

Secondary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 167 (D2)  AFR 167 (D2)  HIST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

AFR 207  (F)  "Out of Africa": Cinematic Por(Be)trayals of a Continent  (DPE) (WS)

Cross-listings:  AFR 207  ARTH 207

Secondary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa’s 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors
Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WS)

Cross-listings: WGSS 218 AMST 218 ENGL 218 AFR 218

Secondary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's Kindred, Jewelle Gomez's Gilda Stories, Glenn Ligon's "Runaways", and Jordan Peele's Get Out. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation: mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 218 (D2) AMST 218 (D2) ENGL 218 (D1) AFR 218 (D2)

Writing Skills Notes: Three thesis papers at 5 pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the work of black writers and artists engaged with the archival silences imposed by the power dynamics of racial hierarchy which constrained the birth of African American literature (the slave narrative). In particular, we examine the meaningful/wilful/and censorial omissions that shape the treatment of gender and sexuality in these texts including and especially the silences around sexual abuse and sexual assault practiced by beneficiaries of white supremacy.
AFR 223 (F) Politics of Performance/Performing Politics in Contemporary Africa (DPE) (WS)

Cross-listings: MUS 222  AFR 223  

Secondary Cross-listing

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQIA community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres-among them Afrobeat, kwaito, soukous, rai, mbalax, Chimurenga music, and a variety of rap and hip-hop styles-are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: this class places a strong emphasis on discussion

Requirements/Evaluation: in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project

Prerequisites: some familiarity with music terminology encouraged

Enrollment Limit: 15

Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 222 (D1) AFR 223 (D2)

Writing Skills Notes: Students receive regular feedback on multiple short assignments throughout the semester. Particular focus is dedicated to crafting and substantiating written arguments.

Difference, Power, and Equity Notes: Throughout the course, students engage with case studies concerning specific socio-political contexts within Africa, with an emphasis placed on music's role as a social agent. Topics include representational politics, music as a tool for the powerful as well as the politically disempowered, and music's role in conflict resolution.

AFR 275 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: AFR 275  AMST 276  ENGL 275

Secondary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.
Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 275 (D2) AMST 276 (D2) ENGL 275 (D1)

Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.

SEM Section: 01 Cancelled

AFR 360 (F) The Political Thought of Frantz Fanon (WS)

Cross-listings: LEAD 360 PHIL 360 PSCI 370 AFR 360

Primary Cross-listing
Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Requirements/Evaluation: attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

AFR 369  (S)  African Art and the Western Museum  (DPE) (WS)

Cross-listings: AFR 369  ARTH 308

Secondary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369 (D2) ARTH 308 (D1)

Writing Skills Notes: Targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African ‘art’ has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

AMST 101  (F)  America: The Nation and Its Discontents  (DPE) (WS)

America has always named something more than a geographical place; being “American” has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power, citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

Requirements/Evaluation: total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first- and second-year students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access
to power, wealth, citizenship, and education in the U.S., and in its recognition and analysis of forms of resistance to and corrections of such inequities.

AMST 105  (F)(S) American Girlhoods  (DPE) (WS)
Cross-listings: WGSS 105  ENGL 105  AMST 105

Secondary Cross-listing
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 105 (D2) ENGL 105 (D1) AMST 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

AMST 113  (F) The Feminist Poetry Movement  (DPE) (WS)
Cross-listings: ENGL 113  AMST 113  WGSS 113

Secondary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also
help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

**AMST 126 (F) Black Literature Matters** (DPE) (WS)

**Cross-listings:** ENGL 126 AFR 126 AMST 126

**Secondary Cross-listing**

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts---essays, novels, drama, music, and poetry---by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

**Requirements/Evaluation:** four papers totaling at least 20 pages, active class participation, class presentation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level English course; Africana Studies concentrators; American Studies majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
**ENGL 126 (D1) AFR 126 (D2) AMST 126 (D2)**

**Writing Skills Notes:** Students will write and receive feedback on four papers. Papers will range from 3 to 7 pages, and feedback will focus on argument/claim development, critical inquiry, and structure.

**Difference, Power, and Equity Notes:** Through discussions and short essays, students will develop skills for analyzing the role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present.

**Cross-listings:** AMST 163 HIST 163

**Secondary Cross-listing**

How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original
Class Format: discussion

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 163 (D2) HIST 163 (D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course delves into histories and experiences of diverse early Americans, including substantial focus on Native American/Indigenous and African/African American peoples. It introduces students to foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories, along with critical vantages on Euro-American settler colonialism and the complex entanglements that arose in multiracial communities.

AMST 167 (F) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AMST 167 AFR 167 HIST 167

Secondary Cross-listing

This course will examine African Americans’ transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**AMST 218 (S) Gender and Sexuality in the Neo-slave Narrative**  (DPE) (WS)

**Cross-listings:** WGSS 218  AMST 218  ENGL 218  AFR 218

**Secondary Cross-listing**

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's Kindred, Jewelle Gomez's Gilda Stories, Glenn Ligon's "Runaways", and Jordan Peele's Get Out. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

**Requirements/Evaluation:** mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Enrollment Preferences:** sophomores

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

ANTH 134  (S)  Leaving the World Behind: The Literature of Reclusion  (DPE) (WS)

Cross-listings:  CHIN 134  REL 134  COMP 134  ANTH 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as an aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary “intentional communities”)? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation:  tutorial papers, responses, and an individual project

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 134 (D1) REL 134 (D2) COMP 134 (D1) ANTH 134 (D2)

Writing Skills Notes:  Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner’s paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

Difference, Power, and Equity Notes:  This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

Spring 2020

ANTH 246  (S)  India's Identities: Nation,Community, & Individual  (DPE) (WS)

Cross-listings:  ANTH 246  ASST 246  WGSS 246  REL 246

Secondary Cross-listing

This tutorial considers India’s legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India’s diverse and fragmented society.
**Class Format:** meetings weekly, weekly writing, and discussion

**Requirements/Evaluation:** weekly writing assignments and tutorial attendance every week

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Cross-listings:** REL 269  STS 269  ANTH 269  ASST 269

**Primary Cross-listing**

This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

**Class Format:** weekly tutorial, context-based learning, experiential learning

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** a course on Buddhism is preferred but not required

**Enrollment Limit:** 10

**Enrollment Preferences:** ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

**ARAB 201 (F) Intermediate Arabic I (WS)**

In this course we will continue to study the Modern Standard Arabic and one variety of spoken Arabic. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing an increased vocabulary and cultural appreciation of Arabic-speaking countries.

**Class Format:** the class meets four hours a week with the fourth hour a conversation section

**Requirements/Evaluation:** quizzes, tests, homework, and active class participation

**Prerequisites:** ARAB 101-102 or permission of instructor

---

**ARAB 212 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)**

**Cross-listings:** REL 210  ARAB 212  ARTH 212

**Secondary Cross-listing**

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

**Requirements/Evaluation:** participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

**Prerequisites:** none

Cross-listings: ARAB 215 WGSS 110 HIST 110

Secondary Cross-listing
This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 215 (D2) WGSS 110 (D2) HIST 110 (D2)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

TUT Section: T1 TBA Magnús T. Bernhardsson

ARAB 249 (F) Trauma and Memory in Maghrebi and Middle Eastern Literatures (DPE) (WS)
Cross-listings: ARAB 249 COMP 249

Primary Cross-listing
Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs, films, and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The
different novels and films assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

Requirements/Evaluation: regular posts on Glow, two five-page papers, one ten-page final paper, one presentation, and participation in class

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 249 (D1) COMP 249 (D1)

Writing Skills Notes: Students in the course will write: 1) 400-word weekly, focused responses on Glow; 2) a book review (600 words); 3) two five-page papers as mid-terms; 4) one ten-page paper as a final paper for the course. Students are required to present an outline of their papers before submitting a draft paper. Students will receive detailed and consistent feedback on the writing. Students are required to incorporate the feedback to improve their drafts before they become final.

Difference, Power, and Equity Notes: Students in this course will learn how to identify and analyze gender, class, and power-related aspects of traumatic memory. The different readings assigned in this course will help students develop critical skills to examine how various forms of power and social inequality play out in memories of war, political detention, forcible disappearance, and social ostracism in the Maghreb and the Middle East.

ARAB 301 (F) Advanced Arabic 1 (DPE) (WS)

A continuation of Intermediate Arabic, ARAB 301 aims to expand students' listening, reading, writing, and speaking skills in Arabic. The course will also stimulate students' intellectual curiosity about the Arabic-speaking regions and enhance their cultural competence. Using al-Kitaad as well as a variety of authentic written and audiovisual materials to immerse students in Arabic language and culture, the course will allow students to achieve an advanced grammatical, cultural and oral proficiency in Modern Standard Arabic. The course will also encourage students to engage critically with a wide variety of topics in Arabic language as they enrich their knowledge of the different aspects of Arabic language and culture. Students at this stage will also be assisted to generate more complex written and oral assignments entirely in Arabic.

Requirements/Evaluation: active class participation, completion of all written assignments, quizzes, a midterm, and a final exam

Prerequisites: ARAB 202

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic language, students will also be doing translations from Arabic into English or vice-versa; and all written work from students will be evaluated, and students will receive feedback to reread it. Students will receive detailed and consistent feedback about their writing in Arabic language.

Difference, Power, and Equity Notes: Students will understand the relations of power between the different varieties of Arabic language. Students will grasp the gendered aspects of Arabic language and understand how it relates English. Through their engagement with Arabic texts and audiovisual materials, students will deconstruct cultural and sociopolitical issues that directly related to the environment, society, politics, and power.
**ARAB 302 (S) Advanced Arabic 2** (DPE) (WS)

A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students' listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials in Modern Standard Arabic. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with and in MSA in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

**Requirements/Evaluation:** quizzes, exams, presentations, papers, midterm examinations, and projects

**Prerequisites:** ARAB 301 or equivalent

**Enrollment Limit:** none

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic language; students will also be doing translations from Arabic into English or vice-versa; and all written work from students will evaluated, and students will receive feedback to rework it. Students will receive detailed and consistent feedback about their writing in Arabic language.

**Difference, Power, and Equity Notes:** Students will learn about gender relations and power dynamics in the Arabic-speaking region; students will produce projects that address language politics, colonialism, sexism, feminism, and environmental losses in the Maghreb and the Middle East; and students will acquire the language necessary to discuss diverse topics related to power, gender, and the environment, such as recycling, new economies, and changing gender roles in society.

---

**ARAB 329 (F)(S) Against the Grain: The Counternarratives of Historical Fiction in the Arab World** (DPE) (WS)

In 2011, a few months after the large scale protests in Egypt that led to Mubarak's forced abdication of power, a story circulated in social media that was then picked up by traditional media about the fabrication of a key image that goes back to the 1973 war. Every October on the annual anniversary of the war, pictures reappeared in the media, commemorating the event. A widespread one was one of Mubarak, then a major general in the army and commander of the air force, standing right next to al-Sadat looking lost in thought, while everyone else is focused on al-Sadat as he explains routes and war plans on the maps in front of them. The image had been photoshopped. Sa'd al-Shathl' who was chief of staff during the 1973 war was "airbrushed out of history" to be replaced by Mubarak in the photo, allowing for an altered historical narrative about each man's respective role and importance. Because of such incidents, the difficulty or impossibility of accessing "official" archives and the control of historical narratives by the state, historical fiction as a genre is of added significance in the Arab world. In this course, we will be examining eight works of Arabic historical fiction in translation, transregionally from the late nineteenth century to the present, with a focus more on the last few decades. Historical fiction will be examined both as *epistêmê* and as *technê* to explore its associated aesthetics and incorporation of different archives, documents and forms. We will be exploring the possibility of considering historical fiction as an alternative archive that opens up new definitions and forms of experiences, community and subjectivity instead of the traditional narrative of the nation-state. Alongside the novels that will vary from a whodunnit in contemporary Lebanon (*The Mehlis Report* by Rabee Jaber) to a work that is about the fall of Granada in 15th century Spain (*Granada* by Radwa Ashour), we will be reading theoretical texts alongside the novels.

**Requirements/Evaluation:** participation and engagement with material in class: 30%; four 5 page papers: 20%; presentations/debates: 15%; midterm term project: 15%; end of term paper: 20%

**Prerequisites:** statement of interest

**Enrollment Limit:** 19

**Enrollment Preferences:** Arabic Studies majors and certificate students

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Four 5-page papers long papers evenly spaced through the semester, a mid-term project and a research paper 10 pages long.

Difference, Power, and Equity Notes: The course aims to engage with how historical narratives have traditionally privileged those who have power, and thus see literary texts as an alternative archive that allows for counter narratives that show an array of experiences and redefinition of subjectivity and community outside of the traditional paradigm of the nation state and which allows the dismantling of the monolithic presentation of historical narratives in and of the Arab world.

Fall 2019

SEM Section: 01  MR 2:35 pm - 3:50 pm  Radwa M. El Barouni

ARAB 363 (S) Where are all the Jews?  (DPE) (WS)

Cross-listings: ARAB 363  COMP 363  JWST 268  HIST 311  REL 268

Primary Cross-listing
Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 363 (D1) COMP 363 (D1) JWST 268 (D2) HIST 311 (D2) REL 268 (D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

Attributes: JWST Core Electives
ARTh 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: AFR 207 ARTH 207

Primary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

ARTh 212 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: REL 210 ARAB 212 ARTH 212

Primary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different
cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

**Requirements/Evaluation:** participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** First- and second-year students, but open to all

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 210 (D2) ARAB 212 (D1) ARTH 212 (D1)

**Writing Skills Notes:** In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

**ARTH 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art (WS)**

**Cross-listings:** WGSS 231  ARTH 231

**Primary Cross-listing**

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art—never created for its own sake—was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions and of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

**Class Format:** some tutorial meetings will be conducted at local museums

**Requirements/Evaluation:** engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner's tutorial papers

**Prerequisites:** first-year and sophomore students (this class is open to students with no experience in art history)

**Enrollment Limit:** 10

**Enrollment Preferences:** a statement of interest will be requested in the event the course is over-enrolled

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 231 (D2) ARTH 231 (D1)

**Writing Skills Notes:** This course's fundamental goal is to support opportunity and skills to construct compelling and original written arguments. Tutorial partners will share standards and guidelines for strong writing with instructor: common concepts and language for critique, discussion, and
applause. We will consider the power of argument inextricable from the quality of writing, and thus address writing issues, strategies, and successes in a deep way, organically and consistently, in every tutorial meeting.

TUT Section: T1    TR 11:20 am - 12:35 pm    Stefanie Solum

ARTH 239 (F) Social Media in the Nineteenth Century: Prints and Pictorial Persuasion (WS)
This tutorial surveys the public lives of printed pictures in Europe between 1789 and 1914. Though the history of print extends well beyond these chronological limits, the so-called "long nineteenth century" witnessed the invention of new printmaking technologies. Larger audiences could now stay abreast of the period's revolutions, wars, and breakthroughs both in science and in fashion. Designed for students who have no prior experience studying art history, the course will begin with an overview of printmaking techniques before moving on to focused case studies that include pornographic political engravings made during the French Revolution, etchings created by the Spanish artist Francisco de Goya, and the manipulation of self and space made possible by early photography. We will analyze how these works were produced in multiples, circulated by publishers and dealers, and consumed by viewers across Europe. Readings in cultural theory, intellectual history, the history of technology, and art history will help students develop their own interdisciplinary approach to the print. Together we will ask: what makes this medium social? How is cultural critique made visible? What can print cultures teach us about today's practices of engaging with images digitally?

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2 pages) as well as discussion; three group meetings in WCMA, the Clark, and Chapin Library

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this course, students will write a minimum of 20 pages broken up over several shorter analytical essays. Moreover, they will also write brief responses to their partners' essays in which they consider the craft of writing and composition. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ARTH 301  (F)(S) Methods of Art History  (WS)

This course on the methods and historiography of art history offers art-history majors an overview of the discipline since the late 18th century. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; art and the material world; art, gender, and sexuality; and art as a global phenomenon.

Class Format: discussion

Requirements/Evaluation: six 1,000-word analytical essays plus one 2,000-word writing project

Prerequisites: any 100-level ARTH course or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Art History majors and required of them

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. In addition, they submit a 2,000 writing project at the end of term. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both outside of class in office hours and also in class.

ARTH 308  (S) African Art and the Western Museum  (DPE) (WS)

Cross-listings: AFR 369  ARTH 308

Primary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.
**Requirements/Evaluation:** field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History and African Studies Majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369 (D2) ARTH 308 (D1)

**Writing Skills Notes:** Targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

Spring 2020

TUT Section: T1 TBA Michelle M. Apotsos

**ARTH 332 (F) Abstraction in Action: Global Modern and Contemporary Art (WS)**

Abstraction, be it gestural or geometrical, was a protagonist in the story of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, cultural co-optation, revolutionary politics, as well as racial, feminist, and queer critique. This object-oriented course will delve deeply into non-representation in global modern and contemporary art; we will supplement our careful study of artworks with primary documents, as well as with canonical theoretical frameworks and the reassessments that have sought to complicate these. This seminar is organized into two weekly sessions—a lecture and a discussion—to introduce key concepts and issues and to allow for ample group dialogue on these. Ultimately, the course seeks to revise and expand the cartographies and ontologies of abstraction in the 20th and 21st centuries. As such, it welcomes students with an interest in modern and contemporary art, yet does not require previous coursework in either.

**Class Format:** biweekly seminar, with one lecture session and one discussion session

**Requirements/Evaluation:** participation, weekly assignments, final 12- to 15-page paper written in stages throughout the semester

**Prerequisites:** must have previously taken one Art History course in any area

**Enrollment Limit:** 19

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will complete short written assignments and will prepare a final paper in three stages throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** ARTH post-1800 Courses

**ARTH 342 (S) Monuments and Miniatures: Architecture and Painting in India (WS)**

**Cross-listings:** ASST 342 ARTH 342

Primary Cross-listing
This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

**Requirements/Evaluation:** bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

**Prerequisites:** none, open to all students

**Enrollment Limit:** 10

**ASST 115 (F) The World of the Mongol Empire  (WS)**

**Cross-listings:** HIST 115 ASST 115

**Secondary Cross-listing**

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler's accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

**Requirements/Evaluation:** active participation in discussion, several short papers, and a final research paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 15-19

**Grading:** yes pass/fail option, no fifth course option

**ASST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis**  (WS)

**Cross-listings:** GBST 117  HIST 117  ASST 117

**Secondary Cross-listing**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar

**Secondary Cross-listing**

This tutorial considers India's legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India's diverse
and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

ASST 342  (S)  Monuments and Miniatures: Architecture and Painting in India  (WS)
Cross-listings:  ASST 342  ARTH 342
Secondary Cross-listing
This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums
Prerequisites: none, open to all students

BIOL 430 (S) Genome Sciences: At the Cutting Edge (WS)

Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in "metagenomics" (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and "metatranscriptomics" (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Requirements/Evaluation: five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic

Prerequisites: BIOL 202

Enrollment Limit: 10

Enrollment Preferences: open to juniors and seniors; senior Biology majors who have not taken a 400-level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: BIMO, BIGP; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (WS)

Writing Skills Notes: Weekly written assignments consisting of four-page critique papers (five total during a semester) and two-page response papers (five total during a semester). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

TUT Section: T1 TR 9:55 am - 11:10 am Claire S. Ting
Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as an aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary “intentional communities”)? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component
Requirements/Evaluation: tutorial papers, responses, and an individual project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 134 (D1) REL 134 (D2) COMP 134 (D1) ANTH 134 (D2)
Writing Skills Notes: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner’s paper. Papers will receive substantial writing-based feedback from both the instructor and partner.
Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

Spring 2020
TUT Section: T1 TBA Christopher M. B. Nugent

The modern Olympic games are one of the most visible traces of ancient Greek influence on contemporary culture. Less well-known, however, are the complex and challenging poems (originally songs) of Pindar and Bacchylides that celebrated the victors of the archaic Greek games. These victory odes are a rich source for the study of Greek culture, from their vivid descriptions of heroic feats to their philosophical claims about human life and divine favor. Athletic competition provides the impetus for these songs and constitutes one of their major themes, yet their significance extends far beyond a single athlete or festival. In this course, we will interrogate the relationship between athletics and literary production in the ancient Greek world. We will use both primary and secondary sources to develop familiarity with major festivals, games, events, and figures, and use that knowledge to contextualize our analysis of Greek literature. Ancient Greek athletic discourse will thus provide an entry point to broader reflections on the literary construction and representation of the body and its movement, as well as the interplay between literature and its cultural contexts.

Requirements/Evaluation: brief writing assignments, essays, class participation

COMP 105  (S) "Make it New": The Modernist Experiment (WS)

Cross-listings: COMP 105 ENGL 106

Secondary Cross-listing

In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S.Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation: active class participation; three papers rising from 3-7 pages; three two-page reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students who have not taken or placed out of a 100-level ENGL course

COMP 111  (F) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Primary Cross-listing

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical
texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Requirements/Evaluation: active and meaningful class participation; two shorter papers, longer final paper including a draft worked up in tutorial format

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students considering a major in Comparative Literature and/or who have studied a foreign language

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 111 (D1) ENGL 120 (D1)

Writing Skills Notes: The two shorter papers will receive extensive comments from the instructor; the instructor will meet individually with students to discuss their writing after the second paper. A partial draft of the final longer paper will be worked up with the instructor plus a peer partner in tutorials; the tutorials will provide feedback for expanding and deepening the final paper.

**COMP 139 (S) Living a Feminist Life (DPE) (WS)**

**Cross-listings:** ENGL 139  COMP 139  WGSS 139

**Secondary Cross-listing**

The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, Living a Feminist Life, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmes' lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's A Small Place, Audre Lorde's Sister Outsider, Djamila Boupacha's memoir, Ana Lily Amirpour's film A Girl Walks Home Alone at Night, Sara Ahmed's Living a Feminist Life, Valerie Solanas's SCUM Manifesto, and bell hooks's Teaching to Transgress. In their writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

**Requirements/Evaluation:** five short written assignments and one final research project

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**COMP 215 (F) Cults of Personality (WS)**

**Cross-listings:** RUSS 219  COMP 215

**Secondary Cross-listing**

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and
updated for different cultural and political purposes in fascist Germany, Italy, and Spain, China, Iran, North Korea, and Cuba. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

COMP 230  (S)  The Renaissance in England and the European Continent: Self and World  (DPE) (WS)

Cross-listings: COMP 230  ENGL 228

Secondary Cross-listing
At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: five 4-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 230 (D1) ENGL 228 (D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing
In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

Attributes: ENGL Criticism Courses
literary theory in relation to texts and worlds.

Class Format: discussion

Requirements/Evaluation: frequent short papers totaling 20 pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 230 (D1) COMP 240 (D1)

Writing Skills Notes: The course fulfills the writing skills requirement by asking students to complete four five-page papers evenly spaced over the course of the semester, providing an opportunity for revision. Each paper will receive full comments on writing and argumentation, as well as on content.

COMP 249 (F) Trauma and Memory in Maghrebi and Middle Eastern Literatures (DPE) (WS)

Cross-listings: ARAB 249 COMP 249

Secondary Cross-listing

Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs, films, and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels and films assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

Requirements/Evaluation: regular posts on Glow, two five-page papers, one ten-page final paper, one presentation, and participation in class

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 249 (D1) COMP 249 (D1)

Writing Skills Notes: Students in the course will write: 1) 400-word weekly, focused responses on Glow; 2) a book review (600 words); 3) two five-page papers as mid-terms; 4) one ten-page paper as a final paper for the course. Students are required to present an outline of their papers before submitting a draft paper. Students will receive detailed and consistent feedback on the writing. Students are required to incorporate the feedback to improve their drafts before they become final.

Difference, Power, and Equity Notes: Students in this course will learn how to identify and analyze gender, class, and power-related aspects of traumatic memory. The different readings assigned in this course will help students develop critical skills to examine how various forms of power and social inequality play out in memories of war, political detention, forcible disappearance, and social ostracism in the Maghreb and the Middle East.
COMP 252  (S)  Athletics and Literature in Ancient Greece  (WS)

Cross-listings:  COMP 252  CLAS 214

Secondary Cross-listing

The modern Olympic games are one of the most visible traces of ancient Greek influence on contemporary culture. Less well-known, however, are the complex and challenging poems (originally songs) of Pindar and Bacchylides that celebrated the victors of the archaic Greek games. These victory odes are a rich source for the study of Greek culture, from their vivid descriptions of heroic feats to their philosophical claims about human life and divine favor. Athletic competition provides the impetus for these songs and constitutes one of their major themes, yet their significance extends far beyond a single athlete or festival. In this course, we will interrogate the relationship between athletics and literary production in the ancient Greek world. We will use both primary and secondary sources to develop familiarity with major festivals, games, events, and figures, and use that knowledge to contextualize our analysis of Greek literature. Ancient Greek athletic discourse will thus provide an entry point to broader reflections on the literary construction and representation of the body and its movement, as well as the interplay between literature and its cultural contexts.

Requirements/Evaluation:  brief writing assignments, essays, class participation

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  majors, first-years, sophomores

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 252  (D1) CLAS 214  (D1)

Writing Skills Notes:  Weekly (pass/fail) writing assignments (1-2 pages), five graded essays (two of which will be revisions and expansions of previous work, 4-5 pages each), regular in-class workshops on writing style and essay structure. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

COMP 265  (S) Theories of Language and Literature  (WS)

Cross-listings:  ENGL 209  COMP 265

Secondary Cross-listing

This course is made up of questions: What is literature and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Requirements/Evaluation:  informal writing every week; three 6-page papers; class attendance and participation

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 209 (D1) COMP 265 (D1)

**Writing Skills Notes:** Informal writing before every class (about 500 words); three 6-page essays, plus a lead-in assignment on which the professor comments; two special writing sessions; fifteen pages of writing advice. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**COMP 273 (S) Detection Without Borders**  (DPE)  (WS)

**Cross-listings:** ENGL 273  COMP 273

**Primary Cross-listing**

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories from around the world. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. At the same time the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows and films noir will also be included in the course material. All readings will be in English.

**Requirements/Evaluation:** short papers, one research paper, oral presentations, midterm, class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature and English majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option,  yes fifth course option

**Unit Notes:** COMP core course

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 273 (D1) COMP 273 (D1)

**Writing Skills Notes:** This is a writing skills course which requires weekly short papers, blog entries and three 5- to 7-page papers which will test students' ability in close-reading, comparative readings and research analysis. I will provide written feedback regarding grammar, style, and argument.

**Difference, Power, and Equity Notes:** A significant part of the course addresses issues of post-colonial critical theory, by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

SEM Section: 01  MR 2:35 pm - 3:50 pm  Michele Monserrati

**COMP 280 (F) Art at its Limits: Representing the Holocaust**  (DPE)  (WS)

**Cross-listings:** COMP 280  JWST 280  GERM 280

**Secondary Cross-listing**

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it.
Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Rózewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.

**Requirements/Evaluation:** three 2-page critical responses, oral presentation, final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** German and Comparative Literature majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

**Writing Skills Notes:** Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Fall 2019

SEM Section: 01 Cancellation

**COMP 293 (S) Great Big Books** (WS)

Cross-listings: COMP 293 ENGL 233

Secondary Cross-listing

Some of the greatest novels are really, really long-so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: *War and Peace* (1869), Leo Tolstoy's epic of the Napoleonic Wars, and *Parade's End* (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

**Requirements/Evaluation:** regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

**Prerequisites:** a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

COMP 339  (F) Posthuman Ecologies: Bodies, Environments, Art  (DPE)  (WS)

Cross-listings:  ENVI 340  GERM 339 COMP 339

Secondary Cross-listing

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of own bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include Mad Max: Fury Road, Metropolis, Ex-Machina, and episodes of West World and Black Mirror.

Requirements/Evaluation: four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D1)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 340  (D1) GERM 339  (D1) COMP 339  (D1)

Writing Skills Notes: The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019

SEM Section: 01   Cancelled

COMP 352  (S) Mysticism: Vision, Writing, History  (WS)
Secondary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors and those intending to major in English

Spring 2020
SEM Section: 01 Cancelled

ECON 214 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ECON 214 ENVI 212

Primary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

ECON 299 (F) Economic Liberalism and Its Critics (WS)

Cross-listings: POEC 250 ECON 299 PSCI 238

Secondary Cross-listing
Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: discussion

Requirements/Evaluation: eight short essays, several short homework assignments, and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 35

Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

Fall 2019
LEC Section: 01 MR 2:35 pm - 3:50 pm Jon M. Bakija, James E. Mahon

ENGL 102 (W) Intensive Expository Writing Workshop (WS)

This course allows students who need to make up a deficiency to do so over January term. The course totals the same number of class hours as a full semester plus a winter study, which is a lot--three hours a day, five days a week over four weeks. I also will require six or so writing assignments, with mandatory revisions. This is an English class, which means we will also be reading a lot of short stories. Some, but not all, of the assignments will consist of literary interpretations or analysis. The stories we read will be science-fiction stories, which tend to involve the same technical problems as expository essays: they include an unusual burden of exposition, and an explicit or implied thesis, often one of each. Because of this, they will also provide structural models for us, under the guiding principle that your essays can benefit from learning basic storytelling techniques: how to hook the reader, how to build suspense, how to handle exposition, how to provide a satisfying conclusion--in short, how to make your writing interesting.

Prerequisites: permission of a dean

Enrollment Preferences: students who need to make up a deficiency

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 102 and ENGL 41.

Distributions: (D1) (WS)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Winter 2020

SEM Section: 01 M-F 10:00 am - 1:00 pm Paul C. Park
In his book *High Noon: 20 Global Problems, 20 Years to Solve Them*, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.' " Collins and his associates couldn't have picked a more resonant text from which to quote than Shakespeare's play, *The Tempest*, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics. These texts--many of which also provide a model of exceptional writing--will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.

**Prerequisites:** permission of a dean

**Enrollment Preferences:** students who need to make up a deficiency

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Winter 2020

LEC Section: 01  M-F 10:00 am - 12:50 pm  Bethany Hicok

---

In this course we will read some of the most prominent practitioners of creative non-fiction--writers like John McPhee, Joan Didion, Malcolm Gladwell, Susan Orlean, Ta-Nehisi Coates, Michael Pollan, Zadie Smith and Oliver Sacks. Students will also write in a variety of non-fiction modes--explainers, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.

**Class Format:** workshop

**Requirements/Evaluation:** four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

SEM Section: 01  MWF 8:30 am - 9:45 am  John E. Kleiner

---

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries.
What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105 (D2) ENGL 105 (D1) AMST 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class, and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

ENGL 106 (S) "Make it New": The Modernist Experiment (WS)

Cross-listings: COMP 105 ENGL 106

Primary Cross-listing

In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S. Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation: active class participation; three papers rising from 3-7 pages; three two-page reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)**

**Cross-listings:** ENGL 113 AMST 113 WGSS 113

**Primary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Fall 2019

SEM Section: 01   MWF 8:30 am - 9:45 am   Bethany Hicok

**ENGL 114 (F) Literary Speakers (WS)**

The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how--and with what
effects--poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on the twentieth century (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

**Requirements/Evaluation:** 5-6 papers, of varying length, spaced throughout the term (about 20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not yet taken a 100-level course in English

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** There will be 5-6 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to 5-6 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least two classes during the term will be specifically devoted to issues related to paper writing.

---

ENGL 120 (F) The Nature of Narrative (WS)

**Cross-listings:** COMP 111 ENGL 120

**Secondary Cross-listing**

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, Garcia Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

**Requirements/Evaluation:** active and meaningful class participation; two shorter papers, longer final paper including a draft workshopped in tutorial format

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students considering a major in Comparative Literature and/or who have studied a foreign language

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 111 (D1) ENGL 120 (D1)

**Writing Skills Notes:** The two shorter papers will receive extensive comments from the instructor; the instructor will meet individually with students to discuss their writing after the second paper. A partial draft of the final longer paper will be workshopped with the instructor plus a peer partner in tutorials; the tutorials will provide feedback for expanding and deepening the final paper.

ENGL 125 (F) Theater and Politics (WS)

---

Fall 2019

ENGL 120 (F) The Nature of Narrative (WS)

ENGL 125 (F) Theater and Politics (WS)
Primary Cross-listing

When Plato designed his ideal republic, he excluded theater from it, arguing that indulging in the charms of theatrical representation would make men poor governors of themselves and thus threaten the integrity of fledgling Greek democracies. In the twentieth-century, however, the work of younger artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud provocatively suggested that theater itself could remedy the ills that Plato thought it aggravated by restoring to the people the productive power that the passively on-looking masses had ceded to the charisma of dictators. Today, as rapid changes in media daily transform the way in which we experience the world and understand our place within it, artists, critics, and philosophers continue to draw on the terms of historical debates about theater in attempts to understand the political significance of technologically enhanced forms of global spectatorship, asking what becomes of the traditional roles of viewers and directors on the new world-stage, in an age when revolutions are triggered by cell phone images, but advertising campaigns are also customized to consumers based on automated scans of private information like email. In this seminar, students take a historical approach to these urgent contemporary questions, analyzing the politics of theater in literature, criticism, film, and philosophy from antiquity to the present.

Requirements/Evaluation: three papers of increasing length and complexity, one of which you will revise, totaling 20 pages of finished writing, and a portfolio of interpretive questions

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 126  (F)  Black Literature Matters  (DPE) (WS)

Cross-listings: ENGL 126  AFR 126  AMST 126

Primary Cross-listing

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 126 (D1) AFR 126 (D2) AMST 126 (D2)

**Writing Skills Notes:** Students will write and receive feedback on four papers. Papers will range from 3 to 7 pages, and feedback will focus on argument/claim development, critical inquiry, and structure.

**Difference, Power, and Equity Notes:** Through discussions and short essays, students will develop skills for analyzing the role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present.

Fall 2019

SEM Section: 01    TR 8:30 am - 9:45 am     Gretchen Long

**ENGL 131 (F) All About Sonnets** (WS)

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships—to God, Nature, art, a particular place, the State, oppressors—while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. “A sonnet is a moment’s monument,” wrote D.G. Rossetti (in, of course, a sonnet)—speaking of the sonnet’s tendency to offer just a snapshot of the poet’s mental and emotional state—but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

**Class Format:** first week in regular class meetings, followed by weekly tutorial meetings in pairs

**Requirements/Evaluation:** five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or “prose sonnets;” thoughtful participation in tutorial meetings

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner’s paper. Regular sonnet paraphrases and or “prose sonnets” that will be critiqued for linguistic precision and succinctness.

Fall 2019

TUT Section: T1   Cancelled

**ENGL 132 (F) Black Writing To/From/About Prison** (DPE) (WS)

**Cross-listings:** ENGL 132  WGSS 132

**Primary Cross-listing**

This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. The primary project in this course is the development of open letter writing skills. This epistolary form allows both for the intimate engagement of individual, familiar contact and the deft inclusion of targeted eavesdroppers in order to raise the consciousness of listeners and affirm the value of personal relationships. Course texts will include letters to and from prison; documentaries; selections
from anthologies like If They Come in the Morning and Captive Genders: Trans Embodiment and the Prison Industrial Complex; autobiographies like that by Malcolm X, Walidah Imarisha, and Assata Shakur; poetry by Ericka Huggins, Huey Newton, and Terrance Hayes; and critical interventions by scholars like Nikki Jones, Victor Rios, Michelle Alexander, and Angela Davis. We will also look at contemporary groups organizing around abolition and prisoner support including Critical Resistance, Photos From Solitary, and TGJJP (Transgender Gender Variant Intersex Justice Project).

Class Format: discussion, engagement with guest speakers, engagement with Special Collections

Requirements/Evaluation: four open letters developed with critical feedback (4-5 pages), a twice weekly question diary, an organization report and presentation, a collectively decided project

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 132 (D1) WGSS 132 (D2)

Writing Skills Notes: Open letters are a mainstay of black literature allowing for intimate engagement of the individual and the deft inclusion of targeted eavesdroppers to raise the consciousness of listeners and affirm the value of personal relationships. Students will learn to write letters with purpose to facilitate a felt relationship to the topic; enhance writing skills including achieving clarity and aesthetic value; practice curation of references. Four 5-page letters with rigorous feedback to sharpen form.

Difference, Power, and Equity Notes: This class studies the historical development of mass incarceration of black folk from its roots in American slavery and white supremacist policy. This class also studies the impact of the prison industrial complex on transgender and queer folk in reproducing gender binaries and sexual abuse in and outside prison walls. The politics of prison abolition and gender self determination present critical interventions into the hegemonic structures of normalized racial dominance and gender oppression.

Attributes: ENGL Literary Histories C

Fall 2019

SEM Section: 01 MW 7:00 pm - 8:15 pm Ianna Hawkins Owen

ENGL 134 (F) Contemporary US Literature, Postcolonial Studies, & The Politics of Culture in the Age of Trump (DPE) (WS)

In this course we will read a handful of contemporary US novels and explore whether postcolonial theory can provide a critical vocabulary that helps situate the "others" of contemporary nationalism in an intersectional framework. From the enduring legacies and ongoing violence of settler colonial genocide and transatlantic slavery to the xenophobic disregard for human life during the war in Iraq and the current war on immigrants, we will consider how these novels expose the deeply engrained forms of racism, fear, privilege, and paranoia that subvert dominant discourses of US nationalism in the age of Trump. Over the course of the semester, we will explore the power and allure of this exclusionary nationalism as well as how it is constructed and reproduced through cultural fantasies such as American innocence and exceptionalism, the American dream, and the American frontier. We will pay equally close attention to the ways that the works we read radically unsettle the conceptual borders of geographical space and historical time that regulate who is included and who is excluded from -- to use Benedict Anderson's influential formulation -- the "imagined political community" of the United States. Readings will include There There by Tommy Orange, Signs Preceding the End of the World by Yuri Herrera, Homegoing by Yaa Gyasi, and The Book of Collateral Damage by Sinan Antoon.

Requirements/Evaluation: at least 20 pages of writing; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will do at least 20 pages of writing including three papers, a revision of one paper with editorial changes explained in endnotes, as well as two editorial responses to the work of another student. In addition to two in-class workshops, significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor.
Difference, Power, and Equity Notes: In course readings, written assignments, and seminar discussions, students will address contemporary debates related to US nationalism and its "Others." During the semester students will consider the disturbing normalization of white nationalism as well as the imperatives of thinking about collectivity and self/other relations beyond assimilative understandings of diversity and multiculturalism.

Fall 2019
SEM Section: 01    MW 8:30 am - 9:45 am    Anuj Kapoor

ENGL 138 (S) What is a Self? Investigations in Literature, Philosophy, and Psychology (WS)
The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what, exactly, is a self? Is it the unchanging essence of who we are as individuals (like what Christians call the soul)? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and neuroscientists have argued in their own different idioms more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it. Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we will study include: Tim O'Brien's The Things They Carried, Toni Morrison's Beloved, Ta-Nehisi Coates' Between the World and Me, Paul Kalanithi's When Breath Becomes Air, and theoretical writings on the self by Plato, Descartes, Thoreau, Sartre, and Bruner, among others. Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four analytical papers totaling 20 pages; active class participation; participation in other short writing assignments
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 139 (S) Living a Feminist Life (DPE) (WS)
Cross-listings: ENGL 139 COMP 139 WGSS 139
Primary Cross-listing
The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, Living a Feminist Life, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmest's lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's A Small Place, Audre Lorde's Sister Outsider, Djamila Boupacha's memoir, Ana Lily Amirpour's film A Girl Walks Home Alone at Night, Sara Ahmed's Living a Feminist Life, Valerie Solanas's SCUM Manifesto, and bell hooks' Teaching to Transgress. In their writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

Requirements/Evaluation: five short written assignments and one final research project
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 139 (D1) COMP 139 (D1) WGSS 139 (D2)

Writing Skills Notes: This course will center writing and research skills with at least one session per week devoted to ladder development and revision. Five short papers (3-4 pages) with one revision (5-6 pages) as well as a bibliography and final research paper (12-15 pages).

Difference, Power, and Equity Notes: This course will examine the generative intersectional site of feminism, antiracism, and anticapitalism to provide an alternative introduction to feminist thought, writing, and practice. The syllabus centers women and femme writers of color.

Attributes: ENGL Literary Histories C

Spring 2020
SEM Section: 01 Cancelled

ENGL 151 (S) Reading and Writing Science Fiction (WS)
This course will explore some of the themes and techniques of modern science fiction by examining a range of published stories, while at the same time making some new stories of our own. Writers of fiction and non-fiction often watch each other with suspicion, as if from opposing sides of an obvious frontier. Though the goals of both forms of writing--the disciplined articulation of brainy thoughts and mighty feelings--are similar, there is a tendency in both camps to think their methods different and exclusive. The conceit of this class is to imagine that constructing a plot and constructing an argument, say, are complementary skills, and that the tricks and techniques of one type of writing can profitably be applied to the other. With this in mind, the class is made of two strands twisted together--a creative writing workshop and a course in critical analysis. There will be short weekly assignments in both types of writing, as well as two larger projects: an original science fiction short story and an interpretive/analytical essay. Assigned readings will include stories and essays by Terry Bisson, Octavia Butler, Samuel R. Delany, Karen Joy Fowler, Carol Emshwiller, and John Crowley, among many others.

Class Format: discussion
Requirements/Evaluation: active participation in class and about thirty pages of writing, both critical and creative; two 12- to 20-page writing assignments (short story and analytical/interpretive essay), with revisions; half-dozen shorter writing assignments, plus written responses
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: This course will require two long writing assignments, twelve to twenty pages, one critical and one creative, each of which will go through an extensive revision process. In addition, I will assign a half-dozen shorter assignments of both types (critical and creative) and single-page critical responses to all workshopped assignments, for a total of thirty or so pages of required writing. A crucial component of the course will be its attention to writing style, strategy, and organization.

Spring 2020
SEM Section: 01 TF 2:35 pm - 3:50 pm Paul C. Park

ENGL 153 (S) Androids, Cyborgs, Selves (WS)
Cross-listings: STS 153 ENGL 153
Primary Cross-listing

In this expository writing course, we will analyze and argue about how near-human and partly human bodies appear in fiction and film. When do these bodies improve the spaces in which they appear? When do they threaten them? How are they gendered, how are they raced, and why? What do they
desire? Authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in different ways. Together we will develop our ideas on these topics in clear, strong prose. We will also ask how artists have cast human identities into foreign materials and media, and study the distortions and revelations that result. During museum visits at WCMA, students will use examples of self-portraiture, electrified bodies, and aspirational bodies to explore the representation, imitation, and abstraction of selves. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: five response papers (500 words); four essays (1200-1500 words, each in two drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153 (D2) ENGL 153 (D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written work. Students write five response papers and four five-page essays (in two drafts) over the course of the semester, receiving substantial instructor feedback on all. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Spring 2020

SEM Section: 01 TR 8:30 am - 9:45 am Ezra D. Feldman

ENGL 157 (F) Reading the ‘Inferno’ (WS)

This is an expository writing course, but also a journey through hell---more precisely, through Dante’s Inferno. Over the course of the semester, as we wind our way through the underworld, we will consider the circumstances of the damned, their guilt, their punishments, and the overall aims of Dante’s extraordinary vision. How and why are the condemned sentenced to an eternal afterlife in this underground kingdom of cruelty? What are we to make of the poem’s humor and malevolence, and how are we to understand its vast architecture? In writing about the fate of these sins and sinners we will focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Requirements/Evaluation: four short 3-page essays and one 6- to 8-page essay

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing course. I plan on assigning series of three-page essays, one every other week, as we work our way through Dante's Inferno at the rate of three or four cantos per week. These shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. This should provide sustained and structured feedback to the students. A final extended essay of six to eight pages will required.

Fall 2019

SEM Section: 01 MWF 8:30 am - 9:45 am Alan W. De Gooyer

ENGL 162 (F) Robots, Puppets, and Dolls (WS)

Is Pinocchio alive? How about the Terminator, or the operating system in Her? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automata and cyborgs) and what they suggest about human identity, independence, and free will. We’ll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world (“reborn” dolls, therapy robots). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects).

Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we
ENGL 205  (F)  The Art of Poetry: The History and Theory of Lyric  (WS)

"If I read a book and it makes my whole body so cold no fire can ever warm me I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only way I know it. Is there any other way?" This excerpt from a letter by Emily Dickinson indicates both the particular pleasures of reading poetry, and also the persistent difficulty of defining poetry as a genre. In this course, we will train our focus on lyric poetry in particular, tracing its long history as well as trends in the theory of lyric. We'll begin by uncovering the roots of lyric in antiquity before shifting our focus to the development of lyric in English. We'll read closely the work of such poets as Wyatt, Donne, Wordsworth, Keats, Hopkins, and Dickinson before turning to questions of lyric in the 20th and 21st centuries. Along the way, we'll examine the trends in criticism responsible for the conflation of lyric and poetry in our time, and will get a strong sense of the current state of lyric theory.

Requirements/Evaluation: frequent short writing assignments totaling 20+ pages, thoughtful participation in discussions
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1)  (WS)
Writing Skills Notes: Frequent informal writing assignments and two formal papers: one (5-7 pages) due at the midterm, and one final paper (10-12 pages), in preparation for which students will submit a proposal and meet with the professor as their research develops. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Attributes: ENGL 200-level Gateway Courses

ENGL 206  (F)  We Aren't The World: "Global" Anglophone Literature and the Politics of Literary Language  (DPE)  (WS)

An eighteenth-century diplomat once referred to the British colonies as a "vast empire on which the sun never set," and at the time, he was right: the British controlled an enormous portion of the globe for nearly three centuries, from the Caribbean to South Asia, from Oceania to Africa. One outcome of this vast empire was the creation of a rich and diverse literary tradition in the English language--now called Anglophone literature--from far-flung places around the globe. This course will introduce students to select works of global Anglophone literature in the twentieth century, and consider the ways in which writers from around the world have used a variety of literary forms, such as the bildungsroman, national allegory, and testimony, to participate in and reshape conversations about culture, globalization, aesthetics, and politics. Readings will include novels, poetry, short stories, and film by writers including Kipling, Kincaid, Achebe, Rushdie, Conrad, Coetzee, and Roy, among others. The course will expose students to a variety of global English idioms, as well as literary traditions from, or in conversation with, non-Western countries.

Requirements/Evaluation: four short papers (5 pages), a presentation, and a final research project
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: potential English majors and those who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will write daily in class, submit four short (5-page) and one longer paper (10-page), as well as reading questions before each class. At least one class session per week will center writing skills and revision.

Difference, Power, and Equity Notes: This course will introduce students to the colonial legacies of literary language politics. Authors represent a range of literary traditions from West Africa to the Caribbean to South and South East Asia and beyond. Class discussion will also focus on issues of gender, race, and class in imperial history and neoimperialism.

Fall 2019

SEM Section: 01 Cancelled

ENGL 209 (S) Theories of Language and Literature (WS)

Cross-listings: ENGL 209 COMP 265

Primary Cross-listing

This course is made up of questions: What is literature and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Requirements/Evaluation: informal writing every week; three 6-page papers; class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 209 (D1) COMP 265 (D1)

Writing Skills Notes: Informal writing before every class (about 500 words); three 6-page essays, plus a lead-in assignment on which the professor comments; two special writing sessions; fifteen pages of writing advice. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WS)

Cross-listings: WGSS 218 AMST 218 ENGL 218 AFR 218

Primary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle
with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's Kindred, Jewelle Gomez's Gilda Stories, Glenn Ligon's "Runaways", and Jordan Peele's Get Out. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation: mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 218 (D2) AMST 218 (D2) ENGL 218 (D1) AFR 218 (D2)

Writing Skills Notes: Three thesis papers at 5 pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the work of black writers and artists engaged with the archival silences imposed by the power dynamics of racial hierarchy which constrained the birth of African American literature (the slave narrative). In particular, we examine the meaningful/willful/and censorial omissions that shape the treatment of gender and sexuality in these texts including and especially the silences around sexual abuse and sexual assault practiced by beneficiaries of white supremacy.

Spring 2020

SEM Section: 01 TR 11:20 am - 12:35 pm Ianna Hawkins Owen

ENGL 222 (S) Lyric Poetry (WS)

The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on lyrics--relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the mid-nineteenth century. Among the poets likely to be studied are: Jonson, Gray, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden, Frost, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

Requirements/Evaluation: active participation in seminar discussions, and four or five papers (about 20 pages total)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4-5 papers assigned, ranging in length from 4-6 pages, spaced evenly throughout the term. Total writing will be 20 pages or more. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper.

Spring 2020
ENGL 228 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: COMP 230 ENGL 228

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: five 4-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 230 (D1) ENGL 228 (D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

Spring 2020

ENGL 230 (F) Introduction to Literary Theory (WS)

Cross-listings: ENGL 230 COMP 240

Primary Cross-listing

This course introduces students to some of the most significant and compelling trends in modern criticism—such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can Othello, for instance, be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.

Class Format: discussion
ENGL 233 (S) Great Big Books (WS)
Cross-listings: COMP 293 ENGL 233
Primary Cross-listing

Some of the greatest novels are really, really long-so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: War and Peace (1869), Leo Tolstoy's epic of the Napoleonic Wars, and Parade's End (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision
Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

COMP 293 (D1) ENGL 233 (D1)

Writing Skills Notes: Four 5-page papers, two of them submitted in both a draft and a revision; two mandatory paper conferences; occasional in-class discussion of issues of writing and argumentation.
Attributes: ENGL 200-level Gateway Courses ENGL Literary Histories B
ENGL 238  (S)  Key Topics in Literary Theory: The "Critique of the Subject"  (WS)

This course will introduce students to one of the core topics in the field of literary theory: the "critique of the subject." Is the "subject" (i.e. the "self", what we refer to when we use the word "I") coherent, bounded, and autonomous, like what Christians mean when they speak of the soul? Or is the subject, rather, the contingent product of historical and political forces (like the media, gender norms, and beliefs about race, property, and the law)? Is language best thought of as something humans use to express their thoughts to communicate with one another? Or is language, rather, something which shapes and determines the very forms that human subjectivity can take in the first place? Is "the subject" really real? Or is our sense of self ultimately just an illusion: an effect of language, power, or history? We will consider all these possibilities, and more. We will begin the course by reading classical accounts of subjectivity by Descartes, Kant, and Husserl, before studying a dizzying array of theoretical "critiques" of this philosophical tradition. Not only will the sheer variety of theories be somewhat dizzying, many of the theories themselves are truly mind-blowing (in the best sense), many of them totally upending our sense of what it means to have a self or to think of ourselves as human in the first place. By the end of the semester, students will be familiar with versions of the "critique of the subject" that are associated with a number of influential theoretical approaches, including: phenomenology, psychoanalysis, Marxism, feminism, deconstruction, New Historicism, postcolonial theory, and queer theory. We will read a few literary texts in tandem with various theories, but students should know that the emphasis throughout will fall squarely on the theoretical texts themselves: in particular, how to understand them, how to write about them, and how to put radically different theories in meaningful conversation with one another.

Requirements/Evaluation:  four papers totaling about 20 pages; engaged participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit:  19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size:  19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: Each student will write four 5-page papers on which I will provide written feedback regarding grammar, style, and argument.

Attributes: ENGL Criticism Courses  ENGL 200-level Gateway Courses

Spring 2020

ENGL 244  (F)  Interpreting Film  (WS)

From the earliest days of narrative film, it was clear that the new medium enjoyed an unparalleled capacity to absorb spectators in the sheer passive enjoyment of the cinematic spectacle, so for many viewers cinema has seemed naturally to be a form of entertainment rather than an art form or a medium for exploring ideas. But not only have entertaining "movies" and artistic "films" always co-existed amicably, but in many cases have coincided: some of the greatest works of cinematic art first billed themselves unassumingly as enjoyable diversions. In order to appreciate the aesthetic and intellectual richness of such films, one must learn to "read" their crucial scenes closely, analyzing their visual and auditory language as well as their dramatic content, and must learn to interpret their surprisingly complex larger patterns of thought. This tutorial offers concrete training in both of these skills. During the first four weeks, students will write and discuss short weekly papers analyzing key sequences of a film, learning to identify diverse cinematic effects in order to illuminate dramatic patterns. During the last six weeks of the semester each student in a tutorial pairing will write a longer interpretive paper in alternate weeks, learning to construct fuller arguments addressing the whole of a film. Most films will be drawn from classical Hollywood cinema of the 1930s and 1940s, but we will also study European, Indian, and Japanese films. Readings during the first part of the semester will concern technical features of cinema; later readings will address larger interpretive issues (e.g., patterns in film genres, such as the nature of the gangster as a tragic hero; or social issues reflected in films, such as the newly empowered roles of women during the early 1940s and their influence in shaping the dangerous heroines of film noir).

Requirements/Evaluation: six short (2- to 6-page) papers and three short responses to one's partner's paper, totalling 25 pages of writing; active, sustained participation in tutorial discussions

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate
Enrollment Limit: 10

Enrollment Preferences: sophomores and first-year students who have satisfied or placed out of the English Department's 100-level prerequisite

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Tutorial--constant writing and critique. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL Literary Histories C

Fall 2019

TUT Section: T1 TBA Stephen J. Tifft

ENGL 246 (S) The Love of Literature (DPE) (WS)

If love "makes the world go 'round," then literature, love's chronicler, may contain the key for understanding this world-formative passion. In this seminar, we will explore representations of love in works of poetry, drama, prose fiction, and philosophy from antiquity to the present. From the philosophical love extolled in Plato's dramatic dialogue The Symposium to the Christian love of Paul's epistles; the Romantic love of Goethe's Elective Affinities to the modern love of Woolf's To the Lighthouse and beyond, we will see how love, like literature, at once reflects and produces historically significant changes in the ways that human beings relate to one another, to themselves, and to the world in which they live. In addition to the authors already mentioned, readings may include literary works by Virgil, Mary Shelley, Wordsworth, Baldwin, and theoretical works by Freud, Foucault, and Luhmann.

Requirements/Evaluation: three papers of increasing length and complexity, totaling 20 pages of finished writing

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: those interested in majoring in English

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The seminar includes extensive discussion of writing strategies throughout, frequent writing assignments, and substantive, writing-strategies focused feedback on writing assignments.

Difference, Power, and Equity Notes: The course materials and discussion emphasizes questions of gender, sexuality, and race.

Attributes: ENGL Criticism Courses ENGL 200-level Gateway Courses ENGL Literary Histories B

Spring 2020

SEM Section: 01 MWF 11:00 am - 12:15 pm Walter Johnston

ENGL 258 (S) Poetry and the City (WS)

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as Man with a Movie Camera, Rear Window, and Breathless.

Class Format: discussion-based
ENGL 264 (S) Introduction to Global Literature & Film: Narrative, Aesthetics, & The Politics of Visual Culture  (DPE) (WS)

One defining feature of Global Literature is that it addresses some aspect of globalization, whether it is the transnational flow of cultures, commodities, and capital, or an increased awareness of an interdependent world. But what do we "see" when we watch films or read books about places we've never been, events we've never lived through, or people we've never met? As Edward Said has noted, another defining feature of Global Literature is that it constructs "imaginative geographies," fantasies of space that, in and through their circulation and consumption, come to define and limit what that space is and could potentially be. In this course, we will explore how such "imaginative geographies" unsettle the critical distinctions often drawn between the "aesthetics" of global literary texts that are non-mimetic and unrealistic and the "politics" of global literary texts that are more realistic in their representation of globalization. We will also pay close attention to what WJT Mitchell has called "watching seeing," or the ways that global narratives draw attention to the pre-existing visual and perceptual frameworks that encourage us to read them one way or another. Whether we are reading texts about momentous global events like the Arab Spring or a 19th century slave insurrection off the coast of Chile, or texts that explore more quotidian experiences such as sadomasochism in a hotel on the coast of Japan or the burlesque banality of Palestinian life in Nazareth, our goal in this course will be to examine how textual incitements to "watching seeing" contest dominant fantasies about what a given place is and can be beyond the cartographic abstractions and violently policed borders of the globalizing world. Readings will include novels by Ahmed Naji and Yoko Ogawa, films by Elia Suleiman and Hou Hsiao-Hsien, poetry by Solmaz Sharif, as well as the architectures of occupation and resistance in contemporary Palestine and at the US/Mexico partition wall.

Requirements/Evaluation: three papers and a series of writing assignments (including GLOW/Blog Posts) totaling 20 pages
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be required to complete a series of short writing assignments that will culminate in three formal papers: a close reading, a close reading that incorporates a peer-reviewed, secondary source, and a research paper developed through stages that will include a proposal, workshops, and editorial revision. Students will receive extensive feedback, written and oral, on their work, and there will be class time reserved for reviewing basic strategies for effective academic writing.

Difference, Power, and Equity Notes: This course examines the visual politics of global literature. That is, students will consider how conceptions of difference -of class, race, gender, ethnicity, and more - are produced, reproduced, and contested through narrative and aesthetics. This class will also examine the forms of dispossession, violence, and inequality generated by processes of globalization.

Attributes: ENGL 200-level Gateway Courses
ENGL 266  (F)  Postmodernism  (WS)
Cross-listings:  COMP 231  ENGL 266

Secondary Cross-listing

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format:  after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week
Requirements/Evaluation:  participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)
Prerequisites:  a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor
Enrollment Limit:  10
Enrollment Preferences:  Comparative Literature majors, students with a demonstrated interest
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

Fall 2019
TUT Section:  T1   TBA   Christopher A. Bolton

ENGL 273  (S)  Detectives Without Borders  (DPE)  (WS)
Cross-listings:  ENGL 273  COMP 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories from around the world. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. At the same time the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows and films noir will also be included in the course material. All readings will be in English.

Requirements/Evaluation:  short papers, one research paper, oral presentations, midterm, class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature and English majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: COMP core course
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 273 (D1) COMP 273 (D1)
Writing Skills Notes: This is a writing skills course which requires weekly short papers, blog entries and three 5- to 7-page papers which will test students' ability in close-reading, comparative readings and research analysis. I will provide written feedback regarding grammar, style, and argument.
Difference, Power, and Equity Notes: A significant part of the course addresses issues of post-colonial critical theory, by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

ENGL 275 (S) Southern Literary Aesthetics (DPE) (WS)
Cross-listings: AFR 275 AMST 276 ENGL 275
Primary Cross-listing
Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.
Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AFR 275 (D2) AMST 276 (D2) ENGL 275 (D1)
Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.
Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.
Attributes: ENGL 200-level Gateway Courses
ENGL 320 (S) Marlowe and Shakespeare  (WS)

Cross-listings: ENGL 320 THEA 320

Primary Cross-listing

In 1586, at the age of twenty-three, Christopher Marlowe wrote Tamburlaine the Great. Over the next six years—probably while moonlighting as a government spy—he went on to produce some of the strangest and also most influential works of English drama. Then in 1593, Marlowe was murdered, stabbed through the eye in a tavern brawl. It is often said that Marlowe's early death, no less than his early success, made the work of Shakespeare possible. In this class we will read Marlowe's Edward II, the first popular history play in English, and Shakespeare's Richard II; The Jew of Malta and The Merchant of Venice; Doctor Faustus and Macbeth. We will look at ways in which Marlovian preoccupations—with lurid violence, with debasement, with self-invention—resurface in Shakespeare, in new forms. In the process we will also take up more general questions of literary influence: What do writers borrow from each other? And how does the knowledge of indebtedness—shared to varying degrees with an audience—affect the meaning and impact of their work? Critical readings will include essays by Harry Levin, Julia Lupton and Stephen Greenblatt.

Requirements/Evaluation: two 5- to 7-page papers; a ten page final paper

Prerequisites: 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 320 (D1) THEA 320 (D1)

Writing Skills Notes: Two 5- to 7-page papers. A 10-page final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL Literary Histories A

ENGL 374 (S) Mysticism: Vision, Writing, History  (WS)

Cross-listings: ENGL 374 REL 374 COMP 352

Primary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors and those intending to major in English

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 374 (D1) REL 374 (D2) COMP 352 (D1)

Writing Skills Notes: This course will develop students’ writing skills through biweekly 5-page analytical papers and biweekly 2-page response papers. Written feedback will be provided by the instructor and by the tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ECON 214 ENVI 212

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
POEC 214 (D2) ECON 214 (D2) ENVI 212 (D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks
Prerequisites: ENVI101 or permission of the instructor
Enrollment Limit: 10
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: No divisional credit (WS)
Writing Skills Notes: Weekly tutorial paper or response paper for which the instructor will provide feedback on writing skills as well as content. Opportunities to revise.
Attributes: ENVI Humanities, Arts + Social Science Electives ENVI Natural World Electives

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: ENVI 244 PHIL 244

Primary Cross-listing
What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion
Prerequisites: ENVI 101 or one course in PHIL
Enrollment Limit: 10
Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: meets Value Theory requirement only if registration is under PHIL
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

ENVI 248 (F) "Our Response Will Define Our Future": Climate Change Policy Analysis (WS)

In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We
will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

**Requirements/Evaluation:** students alternate in preparing 5- to 7-page papers and 2-page responses (five papers and five responses in total), final paper building on one of the 5- to 7-page papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** 1. second-year students 2. Environmental studies concentrators and majors 3. first-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Bi-weekly 5-7 pages long papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** ENVI Environmental Policy

---

**ENVI 340 (F) Posthuman Ecologies: Bodies, Environments, Art** (DPE) (WS)

**Cross-listings:** ENVI 340 GERM 339 COMP 339

**Secondary Cross-listing**

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of own bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include Mad Max: Fury Road, Metropolis, Ex-Machina, and episodes of West World and Black Mirror.

**Requirements/Evaluation:** four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

**Prerequisites:** none

**Enrollment Limit:** none

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

**Writing Skills Notes:** The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.
ENVI 412  (S)  Senior Seminar: Perspectives on Environmental Studies  (WS)

Cross-listings:  MAST 402  ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Requirements/Evaluation:  active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites:  declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit:  14

Enrollment Preferences:  Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size:  14

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  required course for students wishing to complete the Maritime Studies concentration

Distributions:  No divisional credit  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 117  (S)  Bombay/Mumbai: Making of a Modern Metropolis  (WS)

Cross-listings:  GBST 117  HIST 117  ASST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general?  This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation:  assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Prerequisites:  first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit:  19
Enrollment Preferences:  first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size:  15-19  

Grading:  no pass/fail option,  no fifth course option  

Distributions:  (D2)  (WS)  

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 203  (F)  Field Methods and Structural Geology  (WS)  
The structure of the Earth's crust is constantly changing and the rocks making up the crust must deform to accommodate these changes. Rock deformation occurs over many scales ranging from individual mineral grains to mountain belts. This course deals with the geometric description of structures and the large scale forces responsible for crustal deformation. The laboratories introduce students to best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, geologic maps and cross sections, folds, and faults. Students will develop skill for presenting field data in papers, figures, and oral presentations.

Class Format: discussion, three hours per week and laboratory, three hours per week  

Requirements/Evaluation:  short weekly writing assignments, two 10-page papers based on field trips, and a one-hour exam  

Prerequisites:  any 100-level Geosciences course or permission of instructor  

Enrollment Limit:  16  

Enrollment Preferences:  Geosciences majors or students with a strong interest in geosciences  

Expected Class Size:  12  

Grading:  no pass/fail option,  no fifth course option  

Materials/Lab Fee:  $15 for field supplies  

Distributions:  (D3)  (WS)  

Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip for evaluation by the instructor and peers. The shorter assignments will be incorporated in the field reports. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 250  (S)  Tectonic Geomorphology and Landscape Development  (WS)  
Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. Tectonic geomorphology explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate.
Class Format: after an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 201, 202, 301, 302, 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 302 (S) Sedimentology (WS)

Sediments and sedimentary rocks preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the processes by which they were lithified. This course introduces the principles of sedimentology, including sediment composition, fluid mechanics, bedform analysis, and depositional environments. This course is in the Sediments and Life group for the Geosciences major.

Class Format: discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

Requirements/Evaluation: lab work, writing assignments, participation in discussions, and a final exam

Prerequisites: at least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips, supplemented by reading assignments, will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. We will also use journal articles to explore ways in which plate tectonics help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: weekly one-hour meetings, in addition, there will be five field trips early in the semester on Thursday from 11:20 to 3:50 pm

Requirements/Evaluation: six papers, three based on field trips and three based on journal articles, and critiques of partner's papers
Prerequisites: GEOS 301 or 303 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

GERM 280 (F)  Art at its Limits: Representing the Holocaust  (DPE) (WS)
Cross-listings: COMP 280  JWST 280  GERM 280
Primary Cross-listing
The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel Maus really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró'ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Pawe' Pawlikowski, and Steven Spielberg.
Requirements/Evaluation: three 2-page critical responses, oral presentation, final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: German and Comparative Literature majors
Expected Class Size: 14
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)
Writing Skills Notes: Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Difference, Power, and Equity Notes: This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Fall 2019

GERM 317 (F)  The New Woman in Weimar Culture (WS)

Cross-listings:  GERM 317  WGSS 317

Primary Cross-listing

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation:  papers and oral presentations

Prerequisites:  for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

Enrollment Limit:  19

Expected Class Size:  8

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 317 (D1) WGSS 317 (D2)

Writing Skills Notes:  Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

SEM Section: 01  MR 1:10 pm - 2:25 pm  Christophe A. Kone

GERM 320 (S)  German Romanticism (WS)

German Romanticism is a multifaceted, even contradictory phenomenon. Its earliest practitioners Novalis (Friedrich von Hardenberg) and Friedrich Schlegel could be seen as enacting a culmination of Enlightenment optimism about the emancipatory potential of the human mind, with their advocacy of an "aesthetic revolution," equality for women and Jews, and a holistic relationship to nature. Later, some of the first feminists (Caroline Schlegel-Schelling, Bettina Brentano von Arnim) worked side-by-side with authors who essentialized women into primal lures and primal threats (Ludwig Tieck, Joseph von Eichendorff). One of the most famous Romantics of all, E. T. A. Hoffmann, combined high irony and a penchant for the irrational in his fascinating works. This course will explore the paradoxes of German Romanticism through close readings of aphorisms, stories, fairy tales, poetry, essays, and music.

Requirements/Evaluation:  intensive participation,  frequent written responses, two shorter papers to be written in stages, and a longer final project

Prerequisites:  GERM 202 or the equivalent

Enrollment Limit:  none

Enrollment Preferences:  German students

Expected Class Size:  8

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

Writing Skills Notes:  The course will involve intensive work with writing analytical papers, including short responses to most texts, two papers that will be written in stages, and a longer final project that will include work shopping drafts in tutorial format
GERM 334 (S) Playing with Language in Austrian Literature: Interpretation, Translation, Writing (WS)

In his Chandos-Brief, Hugo von Hofmannsthal famously details a writer's crisis of language, in the process creating, ironically, a stunningly beautiful piece of linguistic art. Since 1902, when Hofmannsthal presented his paradoxical fictional manifesto, language has preoccupied many Austrian writers. This course will provide the opportunity to explore the intricacies of the German language via three routes: the study and interpretation of Austrian short stories from the twentieth and twenty-first centuries, experiments with translating poetry and prose from German to English, and creative writing in German. The latter will take place in the context of workshops with the contemporary Austrian writer Gabriele Petricek, who will spend two weeks in Williamstown as a Writer-in-Residence. In addition to Hofmannsthal, authors read might include Arthur Schnitzler, Joseph Roth, Franz Kafka, Ingeborg Bachmann, Ilse Aichinger, Ernst Jandl, Elisabeth Reichart, and Gerhard Roth.

**Requirements/Evaluation:** active class participation, two 3- to 5-page analytical papers, one short translation plus a discussion of translation process, one short creative piece

**Prerequisites:** GERM 202 or the equivalent

**Enrollment Limit:** none

**Enrollment Preferences:** German majors and other serious students of German

**Expected Class Size:** 8

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Two analytical papers, both revised; one translation, including a written reflection on process, and a workshopped creative piece. All writing in German.

GERM 339 (F) Posthuman Ecologies: Bodies, Environments, Art (DPE) (WS)

**Cross-listings:** ENVI 340  GERM 339  COMP 339

**Primary Cross-listing**

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of own bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include *Mad Max: Fury Road*, *Metropolis*, *Ex-Machina*, and episodes of *West World* and *Black Mirror*.

**Requirements/Evaluation:** four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

**Writing Skills Notes:** The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper
in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019

SEM Section: 01  Cancelled

**HIST 103 (F) Growing up in Africa/Growing up African** (DPE) (WS)

Most African nations today are youthful: while the median age in the United States is 38 years, the median age on the African continent is just 19. Young Africans are portrayed both outside and inside the continent in strikingly contradictory ways: as victims of oppression, dangerous threats to social order, or the saviors of their society. But beyond these stereotypes, what is it like to be young in Africa? This tutorial introduces students to the extremely diverse experiences of childhood and adolescence across the continent, from the 1800s to the present. We will draw on scholarly research as well as novels and biographies. In particular, the course focuses on how young Africans have boldly responded to dominant expectations about their gender formation, sexuality, and their relationship to authority—responses which have often provoked broader social conflicts. The first half of the class examines examples of the lives of children and adolescents born during the eras of slavery, colonial rule and apartheid, and how those institutions changed previous relationships between African youth and their elders. The second half of the course considers attempts by post-colonial African state leaders to mobilize "the youth" as nation builders and manage their behaviors since the 1950s—and how young Africans have reacted. In the class, we will also consider how migration and emigration have impacted Africans' experiences of growing up outside their home communities. Throughout the semester, students will track how the definition of childhood, adulthood, and intermediary statuses (e.g. youth), has differed across time and place, while also reflecting on how they perceive their own process of "growing up."

**Requirements/Evaluation:** five tutorial papers (5 pages each) and five short response papers (2 pages each), alternating each week; one paper will be revised and resubmitted

**Prerequisites:** first-years and sophomores

**Enrollment Limit:** 10

**Enrollment Preferences:** first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with permission of instructor

**Expected Class Size:** 10

**Grading:** no pass/fail option. no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Every week one student will produce an argument-driven essay (~5 pages) on the assigned reading, while the other student will write a 2- to 3-page response. These roles will swap weekly. Instructor will provide regular feedback on argument, content, and structure of the essays and students will choose one essay to revise for resubmission at the end of the semester.

**Difference, Power, and Equity Notes:** The course looks at how people in Africa have been subject to various forms of social control because of their status as children or youth. At the same time, the examples studied emphasize the creative and powerful ways that young Africans have defined their lives in opposition to various structures of power. The struggles we will examine take place because of differences in age, but also of marital status, social background, class, gender, and race.

**HIST 110 (S) The Veil: History and Interpretations** (DPE) (WS)

**Cross-listings:** ARAB 215  WGSS 110  HIST 110

**Primary Cross-listing**

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with
the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 215 (D2) WGSS 110 (D2) HIST 110 (D2)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

HIST 117  (S) Bombay/Mumbai: Making of a Modern Metropolis  (WS)

Cross-listings: GBST 117  HIST 117  ASST 117

Primary Cross-listing
Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

HIST 134  (S) The Great War  (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for the East and Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; final research paper

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

HIST 137  (F)  Victorian Britain and the Anglo-Afghan Wars  (WS)

Long before the US and its allies fought the recent war in Afghanistan (2001-14), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the “Great Game”, the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the second (1878-1881) generated considerable domestic discord, and the third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of Britain's Afghan wars but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

Requirements/Evaluation: participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and a final research paper (10-12 pages)

Prerequisites: first-year or sophomore standing

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not taken a 100-level seminar

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

Writing Skills Notes: Students will write two document analyses (750 words) and two guided research essays (5 pages), all of which will be letter-graded and returned with comments. Also, students will write a final research paper (10-12 pages) in consultation with the instructor; a working bibliography and prospectus and a rough draft will be required in advance of submission of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 140  (S)  Crime and Punishment in Russian History  (WS)

Cross-listings: HIST 140  RUSS 140

Primary Cross-listing

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 140 (D2) RUSS 140 (D1)

Writing Skills Notes: Each student will write five 5-to-7-page papers on which the instructor will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partners' papers. As the final assignment, each student will revise one of their five papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 143 (F) Soccer and History in Latin America: Making the Beautiful Game (WS)

This course examines the rise of soccer (fútbol/futebol) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about race, masculinity, and regional and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have affected on the game and its meanings for Latin Americans.

Requirements/Evaluation: class participation, a series of short papers, and an 8- to 10-page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an application process may be developed to determine admission to the course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write three 3-page papers on set topics. They will revise the first of these. Topics involve interpreting different kinds of sources as well as conflicting arguments. They will also write an 8- to 10-page research paper, with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 152 (S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)

Cross-listings: HIST 152 WGSS 152

Primary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and
rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to those who have been dropped from this class previously, then to first-years, then to sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 152 (D2) WGSS 152 (D2)

Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

SEM Section: 01 TR 11:20 am - 12:35 pm Sara Dubow

HIST 155 (F) School Wars (WS)

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of “school wars” in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day “school wars”? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Prerequisites: first-years or sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
HIST 156  (F)  The Manifesto in U.S. Politics  (WS)
Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across different historical junctures in the U.S., frequent short essay assignments, and an original research project of students' own choosing.

Requirements/Evaluation: three graded essays (3-5 pages each), handed in as drafts, given comments, with time for revision; 3-5 ungraded assignments; one graded, final research paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate doing short graded and ungraded assignments in the first eight weeks of the class: the three graded assignments (3-5 pages in length) each will involve first a draft, and then a revision based on comments; the 3-5 ungraded assignments are either informal responses to the reading or discussion questions. Students also will write their own manifestos. The last month will focus on gaining the library skills to do a small research project (6-8 pages).

HIST 163 (S) From Wampum to Phillis Wheatley: Communications in Early America (DPE) (WS)

Cross-listings: AMST 163 HIST 163

Primary Cross-listing

How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: discussion

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 163 (D2) HIST 163 (D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course delves into histories and experiences of diverse early Americans, including substantial focus on Native American/Indigenous and African/African American peoples. It introduces students to foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories, along with critical vantages on Euro-American settler colonialism and the complex entanglements that arose in multiracial communities.

HIST 165 (F) The Age of McCarthy: American Life in the Shadow of the Cold War (WS)
The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by a intensifying Soviet-American rivalry abroad coupled with dramatic Red baiting and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Sputnik and the space race, and links between the Cold War and Civil Rights. Using scholarly books and articles, primary sources, novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

Requirements/Evaluation: class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write several short essays (2-4 pages each) as well as a final research paper (10-12 pages). Over the course of the semester, students will submit a research proposal as well as several working drafts of the final research paper. These drafts will be discussed in small group workshops, including the professor. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 167 (F) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AMST 167 AFR 167 HIST 167

Primary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 167 (D2) AFR 167 (D2) HIST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
In 2011, a few months after the large scale protests in Egypt that led to Mubarak's forced abdication of power, a story circulated in social media that was then picked up by traditional media about the fabrication of a key image that goes back to the 1973 war. Every October on the annual anniversary of the war, pictures reappeared in the media, commemorating the event. A widespread one was one of Mubarak, then a major general in the army and commander of the air force, standing right next to al-Sadat looking lost in thought, while everyone else is focused on al-Sadat as he explains routes and war plans on the maps in front of them. The image had been photoshopped. Sa'd al-Shathl' who was chief of staff during the 1973 war was "airbrushed out of history" to be replaced by Mubarak in the photo, allowing for an altered historical narrative about each man's respective role and importance. Because of such incidents, the difficulty or impossibility of accessing "official" archives and the control of historical narratives by the state, historical fiction as a genre is of added significance in the Arab world. In this course, we will be examining eight works of Arabic historical fiction in translation, transregionally from the late nineteenth century to the present, with a focus more on the last few decades. Historical fiction will be examined both as epistêmê and as technê to explore its associated aesthetics and incorporation of different archives, documents and forms. We will be exploring the possibility of considering historical fiction as an alternative archive that opens up new definitions and forms of experiences, community and subjectivity instead of the traditional narrative of the nation-state. Alongside the novels that will vary from a whodunnit in contemporary Lebanon (The Mehlis Report by Rabee Jaber) to a work that is about the fall of Granada in 15th century Spain (Granada by Radwa Ashour), we will be reading theoretical texts alongside the novels.

Requirements/Evaluation: participation and engagement with material in class: 30%; four 5 page papers: 20%; presentations/debates: 15%; midterm term project: 15%; end of term paper: 20%

Prerequisites: statement of interest

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 303 (D2) ARAB 329 (D1)

Writing Skills Notes: Four 5-page papers long papers evenly spaced through the semester, a mid-term project and a research paper 10 pages long.

Difference, Power, and Equity Notes: The course aims to engage with how historical narratives have traditionally privileged those who have power, and thus see literary texts as an alternative archive that allows for counter narratives that show an array of experiences and redefinition of subjectivity and community outside of the traditional paradigm of the nation state and which allows the dismantling of the monolithic presentation of historical narratives in and of the Arab world.
France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 363 (D1) COMP 363 (D1) JWST 268 (D2) HIST 311 (D2) REL 268 (D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students’ writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Secondary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America’s maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America’s maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely
Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

HIST 434  (S)  The Meaning of Diaspora and the Jews of Europe  (WS)

Cross-listings: HIST 434  REL 335  JWST 434

Primary Cross-listing
Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews¿ diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students¿ work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

HIST 457  (S)  Floridas  (DPE)  (WS)

Florida, the sunshine state with 1350 miles of coastline was once an outpost of Spain's 17th century empire. Its history comprises Disney World, the
largest Cuban community outside of Cuba, a haven for enslaved Catholics in the 17th century and for an aging, largely white middle class in the 20th. It is the site of the nation's oldest city, and the home to range of Native peoples. A land of swamps, plantations, cities, islands, strip malls and theme parks is now ground zero in climate change discussions. This "purple state" has decided more than one presidential election. This course will explore the history of the many Floridas. We will move roughly through time as we seek to understand Florida and its place in United States culture. Why do people often think of Florida as "not quite southern" although it borders Georgia and Alabama? When and why did Spain colonize the area? How did they lose it? What is the history of the original inhabitants of Florida and how does that story help us understand it now?

Requirements/Evaluation: class discussion, three short writing assignments and a final research paper of 15-20 pages on a topic that grows out of our reading

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: seniors and History majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Writing Skills Notes: Students will be writing three shorter papers throughout the semester. Two of these will be building up towards the final research paper. The third will be more "experimental"... perhaps a piece of historical fiction or eye witness account. The final paper should exceed 15 pages. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: We will consider how Florida has defined itself, and been defined throughout American history largely based on various groups that occupied space with combinations of military, technological and economic power. This class will investigate the histories and dynamics of these various occupations and settlements, paying close attention the conflicts over space in rural and urban areas. Histories of African Americans and Native people will be central to our investigation.

HIST 484 (F) The Second World War: Origins, Course, Outcomes, and Meaning (WS)

1991 marked the 50th anniversaries of the Nazi invasion of Russia and the Japanese attack on Pearl Harbor. Though war had come to Europe as early as 1939, when Germany invaded Poland, after 1941 the war became a truly global conflict of unprecedented extent, ferocity, and destructiveness. As late as 1943 it still appeared that the Axis powers might win the war. But, by the end of 1945, the bombed-out ruins of Germany and Japan were occupied by the Allies, who were preparing to put the surviving Axis leaders and generals on trial for war crimes. This tutorial will concentrate on important questions and issues that arise from a study of WWII. What were the origins of this central event of the 20th century? How and why did the war begin? Why did the war take the course it did? What were the most crucial or decisive episodes or events? How did the Allies win? Why did the Axis lose? Could the outcome have been different? Many of the topics examined will also have to deal with important questions of human responsibility and the moral or ethical dimensions of the war. Why did France, Britain, and the Soviet Union not stop Hitler earlier? Who was to blame for the fall of France and the Pearl Harbor fiasco? Why did the Allies adopt a policy of extensive firebombing of civilian targets? How could the Holocaust have happened? Could it have been stopped? Did the Atomic bomb have to be dropped? Were the war crime trials justified? By the end of this tutorial, students will have become thoroughly familiar with the general course the war followed as well as acquiring in-depth knowledge of the most decisive and important aspects of the conflict. Students will also have grappled with the task of systematically assessing what combinations of material and human factors can best explain the outcomes of the major turning points of the war, and also have dealt with the problem of assessing the moral and ethical responsibility of those persons, organizations, and institutions involved.

Requirements/Evaluation: will write and present orally an essay of approximately seven double-spaced pages every other week on a topic assigned by the instructor; students not presenting an essay have the responsibility of critiquing the work of their colleague

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: junior and senior History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Distributions:  (D2)  (WS)

Writing Skills Notes: Students will present 7 double-spaced pages every other week and a 7-10 page final written exercise. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 485  (F)  Freud: A Tutorial  (WS)
Cross-listings:  HIST 485  PSYC 158
Primary Cross-listing
This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, “Analysis Terminable and Interminable.” In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was “right” or "wrong" or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

Class Format: students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

Requirements/Evaluation: student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

Prerequisites: none

Enrollment Limit:  10

Enrollment Preferences:  juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  fulfills History’s 400-level graduation requirement

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 485  (D2)  PSYC 158  (D2)

Writing Skills Notes: As a tutorial, this course is by definition writing skills, both in terms of the number of papers that students will produce (six) and in terms of the focus on writing during every tutorial session. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019
TUT Section: T1   TBA   Thomas A. Kohut

HIST 487  (S)  Archive Stories  (WS)

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive?

For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, *Archive Fever*, historians, archivists, and cultural theorists have been asking questions about the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is not a hands-on course about how to use an archive, nor a
celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and
the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of
recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's
encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the
colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not
merely the written document; and the new archives of cyberspace.

**Requirements/Evaluation:** each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final
paper about their work on the Williams archives

**Prerequisites:** open to all junior and senior History majors and others with permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Each student will write five 6- to 7-page essays (one every other week) that will be critiqued, both in writing and orally, by the
instructor and the student's tutorial partner. The student will also write a final 6- to 7-page essay reflecting on the nature of Williams archival practices
in the context of the readings undertaken during the course of the tutorial. Students will receive from the instructor timely comments on their writing
skills, with suggestions for improvement.

**HIST 495 (F) Memoirs, Memory and the Modern Jewish Experience** (DPE) (WS)

**Cross-listings:** HIST 495 JWST 495

**Primary Cross-listing**

Memoirs have proven to be an increasingly important source for Jewish historians, and particularly for those interested in the impact of modern society
on Jewish identity. This tutorial will consider modern Jewish history by focusing on such individual voices. By comparing memoirs from the early
modern period through contemporary times and from widely divergent geographical settings such as Europe, the United States, Latin America, and the
Middle East, we will consider how Jews in different historical settings have understood their "Jewishness" and their relationship to their past, as well as
the historian's role in this relationship. In each case, we will ask such questions as: How does the role/importance of religion and ritual shift over time
and place? How does the surrounding society shape the author's sense of self and his/her place in society? Similarly, we will consider the impact of
economic, occupational, and political factors on understandings of Jewish identity as well as the impact of gender and generational splits on such
understandings. In broad terms we will question what (if anything) links the different individuals under study. In other words, is there something about
Jewish identity that transcends the historical specificity of the author's setting? Throughout the course, we will also consider how a memoir can be
used as an historical source. Can we generalize from individual experience, and if so how do we reconcile contradictions among the multiple voices?

**Requirements/Evaluation:** each student will write and present orally a 3- to 5-page response paper on the assigned readings of the week
(alternating weeks); there will be one final 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 6

**Enrollment Preferences:** upperclass students, History majors and Jewish Studies concentrators, or those with documented academic interests in the
subject matter

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JLST 272 (F) Free Will and Responsibility (WS)

Cross-listings: PHIL 272  JLST 272

Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

JWST 280  (F)  Art at its Limits: Representing the Holocaust  (DPE) (WS)

Cross-listings: COMP 280  JWST 280  GERM 280

Secondary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel Maus really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró'ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Pawe' Pawlikowski, and Steven Spielberg.

Requirements/Evaluation: three 2-page critical responses, oral presentation, final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: German and Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)
Writing Skills Notes: Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

JWST 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: JWST 339 PSCI 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through—and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities--as some recent commentators have--that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

Requirements/Evaluation: five 5-page papers; five 2-page responses; a final revision of a prior paper; participation

Prerequisites: a prior course in political theory, philosophy, or critical theory, or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Political Theory concentrators, Political Science majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 339 (D2) PSCI 339 (D2)

Writing Skills Notes: You will receive feedback from me and your tutorial partner on your five papers (each 5 pages long and spaced evenly through the semester). This feedback will inform the revision you submit at the end of the semester of a paper of your choosing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

JWST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)

Cross-listings: HIST 434 REL 335 JWST 434

Secondary Cross-listing
Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews’ diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students’ work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

JWST 495 (F) Memoirs, Memory and the Modern Jewish Experience (DPE) (WS)

Cross-listings: HIST 495 JWST 495

Secondary Cross-listing

Memoirs have proven to be an increasingly important source for Jewish historians, and particularly for those interested in the impact of modern society on Jewish identity. This tutorial will consider modern Jewish history by focusing on such individual voices. By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as Europe, the United States, Latin America, and the Middle East, we will consider how Jews in different historical settings have understood their “Jewishness” and their relationship to their past, as well as the historian's role in this relationship. In each case, we will ask such questions as: How does the role/importance of religion and ritual shift over time and place? How does the surrounding society shape the author's sense of self and his/her place in society? Similarly, we will consider the impact of economic, occupational, and political factors on understandings of Jewish identity as well as the impact of gender and generational splits on such understandings. In broad terms we will question what (if anything) links the different individuals under study. In other words, is there something about Jewish identity that transcends the historical specificity of the author's setting? Throughout the course, we will also consider how a memoir can be used as an historical source. Can we generalize from individual experience, and if so how do we reconcile contradictions among the multiple voices?

Requirements/Evaluation: each student will write and present orally a 3- to 5-page response paper on the assigned readings of the week (alternating weeks); there will be one final 10-page paper

Prerequisites: none

Enrollment Limit: 6

Enrollment Preferences: upperclass students, History majors and Jewish Studies concentrators, or those with documented academic interests in the
subject matter
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 314 (S) How Change Happens in American Politics (WS)

Cross-listings: LEAD 314 PSCI 314

Secondary Cross-listing

Does the rise of Donald Trump signal something new in the U.S.? How unprecedented is the current political moment? What might we expect to come next? From the Founding to the present, the American political order has undergone incredible, cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that individual leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor demands, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

Class Format: research seminar

Requirements/Evaluation: several short essays, weekly writing assignments, and a longer research paper with presentation

LEAD 332  (F)  New York City Politics from the Blackout to Bloomberg  (WS)

Cross-listings:  LEAD 332  PSCI 332

Secondary Cross-listing

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation:  active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites:  none

MAST 352 (F)(S) American Maritime History (DPE) (WS)
Cross-listings: HIST 352 MAST 352

Primary Cross-listing
This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars
Requirements/Evaluation: class participation, weekly response papers, three longer papers
Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Grading: no pass/fail option, no fifth course option
Unit Notes: offered only at Mystic Seaport
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

**Cross-listings:** MUS 222  AFR 223

**Primary Cross-listing**

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQIA community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres-among them Afrobeat, kwaito, soukous, rai, mbaiax, Chimurenga music, and a variety of rap and hip-hop styles—are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

**Class Format:** this class places a strong emphasis on discussion

**Requirements/Evaluation:** in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project

**Prerequisites:** some familiarity with music terminology encouraged

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

- MUS 222 (D1) AFR 223 (D2)

**Writing Skills Notes:** Students receive regular feedback on multiple short assignments throughout the semester. Particular focus is dedicated to crafting and substantiating written arguments.

**Difference, Power, and Equity Notes:** Throughout the course, students engage with case studies concerning specific socio-political contexts within Africa, with an emphasis placed on music’s role as a social agent. Topics include representational politics, music as a tool for the powerful as well as
Nearly everyone finds music meaningful, but what exactly does it mean? Without the help of words, this largely non-referential art presents special challenges to interpretation. While most would agree that musical sounds can do such things as mimic the rumbling of thunder, evoke the countryside, suggest the act of chasing, or express rage, the capacity of music to convey meaning remains controversial among scholars, performers, and listeners. Some, following music critic Eduard Hanslick, assert that musical works are essentially "tonally moving forms"—patterns of sound with no reference to the world outside themselves; a work's meaning derives solely from the interplay of musical elements. Others counter that music can signify aspects of human experience, its sounds and structures not merely referring to the outside world but even relating complex narratives. Certain writers have argued that, without the assistance of language, what music signifies remains vague, while others insist that the meaning of music is actually more precise than that of words. In this tutorial course, we will explore a range of questions regarding musical meaning. How can combinations of pitches, rhythms, and instrumental timbres signify something beyond themselves? Is the subject of musical meaning more relevant to some historical styles or genres than others? How can we glean the meaning(s) of a work? Should we concentrate on formal processes within the music? Consider socially constructed meanings? Seek the composer's intentions? What makes some interpretations more convincing than others? In grappling with these questions, students will engage with writings by Agawu, Cone, Hanslick, Kramer, Langer, Lewin, Newcomb, and Schopenhauer, among others. Music to be studied includes works by Beethoven, Schubert, Chopin, Brahms, Mahler, Tchaikovsky, Ravel, Stravinsky, Glass, and Adams.

Class Format: during the first and last weeks of the semester, students will attend two group classes; in the other weeks, students will meet with the instructor in pairs for a one-hour session at a mutually convenient time

Requirements/Evaluation: students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks; evaluation will be based on five papers/presentations, and five responses

Prerequisites: ability to read music, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this tutorial course, students will write and present a 5- to 6-page paper every other week (five papers total) and a 1- to 2-page response to their partner's paper in the alternate weeks (five responses total). Through discussion in the tutorial sessions, comments on the papers, and opportunities for revision, the course will place strong emphasis on developing students' critical thinking and writing skills.

TUT Section: T1   TBA   Marjorie W. Hirsch

MUS 279 (S) American Pop Orientalism (DPE) (WS)

This tutorial will investigate the representation of Asians and Asian Americans in American popular culture since the late nineteenth century. Our focus will be on music's role in Orientalist representation in a wide variety of media and genres, including Hollywood film, television, popular song, music videos, Broadway musicals, hip hop, and novels. We will begin with major texts in cultural theory (Said, Bhabha) and will attempt throughout the semester to revise and refine their tenets. Can American Orientalism be distinguished in any fundamental way from nineteenth-century European imperialist thought? How does Orientalist representation calibrate when the "exotic others" being represented are themselves Americans? Our own critical thought will be sharpened through analysis and interpretation of specific works, such as Madame Butterfly, "Chinatown, My Chinatown," Sayonara, Flower Drum Song, Miss Saigon, Rising Sun, M. Butterfly, Aladdin, and Weezer's Pinkerton. We will end the semester by considering the current state of Orientalism in American popular culture.

Requirements/Evaluation: five 5- to 6-page essays and five critical oral responses
Music is often said to derive its own special quality from the fact that it exists outside of visual representation and is not contained within a physical form, yet musical sound and practice are created through and act upon bodies in numerous ways. This course aims to address how music and bodies shape and respond to one another. Drawing from sources across musical sub-disciplines and extending to fields including cognitive science, sound studies, performance studies, and anthropology, we will follow four lines of inquiry related to music and corporeality: Embodied practices: techniques and pedagogies in performance and in listening (including praxis [Bourdieu], Deep Listening [Oliveros, Becker], Alexander Technique); Music's physical effects and affects: pleasure and pain, the vocalic body [Bonefant, Connor], cognitive processes; Ideological moves: questioning the universality of music and of bodies (including works by Blacking, Miller, and Geurts); Music and bodies at their limits: cyberfeminism, futurism, disembodiment, ecstasy, questions of artificiality/virtuality. Musical examples will be drawn from classical and popular sources from Euro/American idioms and beyond, predominantly from the late 20th and 21st centuries.

Requirements/Evaluation: midterm project, final paper (including rough draft and final copy) and presentation, intermittent 1- to 3-page papers and exercises

Prerequisites: familiarity with music terminology and the ability to read music notation is expected; questions can be directed to the instructor

Enrollment Limit: 12

Enrollment Preferences: senior and junior Music majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course culminates in a final presentation and paper, meant to showcase the student's critical achievements, including their ability to formulate and substantiate their argument. Assignments and exercises throughout the course are aimed at honing students' ability to write and present effectively.
pharmacology” to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

TUT Section: T1 Cancelled

**PHIL 115 (F)(S) Personal Identity** (WS)

Through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. Persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. Thus, the concept of person plays a significant role in most branches of philosophy: metaphysics, epistemology, moral and political philosophy, and of course in the philosophy of mind. Conceptions of person are equally important for scientific research programs (especially in psychology), for Law, and for the arts (especially mimetic arts). Questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. The aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. Some of the questions which we will discuss are: What is a person? How do I know that I am one? What constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? What makes me the particular person that I am, and how is my identity as this individual person preserved over time? While addressing these questions through lectures and class discussions, the course will place special emphasis on developing students' intellectual skills in the following domains: - close, analytical reading; - recognizing, reconstructing and evaluating claims and reasons that support them; - producing original ideas and arguments, orally and in writing; - responding to the claims and arguments presented in texts and in class; - writing clear, polished, well-argued papers.

**Class Format:** discussion

**Requirements/Evaluation:** class attendance, preparedness and participation; small group weekly meetings; weekly short writing assignments

**Prerequisites:** none; open to first year students

**Enrollment Limit:** 19

**Enrollment Preferences:** freshmen, sophomores, and philosophy majors who need a 100 level course to satisfy requirement for the major

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** meets 100-level PHIL major requirement

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write a short paper (about 800 words) every week. Six of these will be letter-graded, and six will be graded
pass/fail. All papers will receive detailed comments on substance as well as on writing skills and strategies. There will be no final paper.

PHIL 119  (S) Justice, Democracy and Freedom: Plato with Footnotes  (WS)
This course addresses a central question in both ethics and political philosophy: How should we live? The question has two parts: What is the best life for individuals? And what social and political arrangements make such a life possible? In attempting to answer these questions we also engage related theoretical questions concerning what is real and how we have access to it. We begin with readings from Plato’s Republic, a seminal work in the history of philosophy that has exerted a powerful influence on nearly every subsequent attempt to answer these questions in the context of the Western philosophical tradition. After reading from early Platonic dialogues and the Republic, we also consider some of the best of these attempts in the Western philosophical canon (“footnotes on Plato”) and the challenges they present to Plato’s conclusions. Our principal focus will be on issues that continue to be of paramount importance in the world today, namely, democracy, justice and the meaning of freedom.

Requirements/Evaluation:  eight 2-page response papers based on readings (first three are pass/fail), two five-page papers, and class participation
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  none, open to all students
Expected Class Size:  19
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  meets 100-level PHIL major requirement
Distributions:  (D2)  (WS)
Writing Skills Notes:  Professor will provide detailed comments on short and long writing responses; facilitate peer review of short papers in class; and discuss frequent types of errors, writing in philosophy, writing approach and process, drafting, and the importance of using writing tutors. Handouts will be provided on both informal fallacies and numerous writing tips. Students will be encouraged, but are not required, to make appointments to discuss ideas and drafts.

PHIL 122  (F) Philosophical Approaches to Contemporary Moral Issues  (WS)
In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, and the ethics of protest. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

Requirements/Evaluation:  bi-weekly tutorial papers, oral commentaries, and tutorial discussion
Prerequisites:  none; this course is suitable for first-year students
Enrollment Limit:  10
Enrollment Preferences:  first-year students, then sophomores, then Philosophy majors
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (WS)
Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 123  (F)(S) Objectivity in Ethics  (WS)
Is morality simply a matter of opinion? In this course we'll examine several influential attempts to provide a rational foundation for morality, along with Nietzsche's wholesale rejection of these efforts. Readings will include work by Plato, Hobbes, Kant, Mill, Nietzsche, and contemporary authors.
Requirements/Evaluation: participation in discussion; short response papers; four 5-page papers, evenly spaced throughout the semester
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores and students who need to fulfill their 100-level requirement for the philosophy major
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: meets 100-level PHIL major requirement
Distributions: (D2) (WS)
Writing Skills Notes: Four 5-page papers, evenly spaced throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PHIL 125  (F) Introduction to the Philosophy of Law  (WS)
This tutorial, designed especially for first year students, is a philosophy course, not a prelaw course. We will examine basic questions in the philosophy of law: What is the relationship between law and morality? Why should one obey the law (if one should)? When, if ever, is paternalistic interference by the state into the lives of its citizens justified? We will look at civil disobedience and theories of legal interpretation. We will pay special attention to the first amendment and questions concerning free speech and hate speech. We will read classic works (such as John Stuart Mill, On Liberty and H. L. A. Hart, The Concept of Law), contemporary articles, and United States Supreme Court cases.
Class Format: meeting with the instructor in pairs for an hour each week
Requirements/Evaluation: a 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
PHIL 213 (S) Biomedical Ethics (WS)

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Class Format: students will meet with the professor in pairs for approximately 75 minutes per week, writing and presenting 5- to 7-page essays every other week, and commenting orally on partners' essays in alternate weeks

Requirements/Evaluation: bi-weekly papers, oral commentaries, and tutorial discussions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: PHIL, PHLH or STS majors or concentrators, especially those who need the course to complete their majors/concentrations; and students committed to taking the tutorial

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Spring 2020

TUT Section: T1  TBA  Julie A. Pedroni

PHIL 224 (S) Marx, Nietzsche and Freud (WS)

The writings of Marx, Nietzsche and Freud continue to influence important debates in the humanities and social sciences. Marx's historical materialism, Nietzsche's post-metaphysical and naturalistic turn in ethics, and Freud's emphasis on the unconscious determinants of human behavior all represent what has been referred to as the decentering of human consciousness in explanations of human history and existence. All three thinkers have had a profound influence on critical theories of the 20th century. In this tutorial, we will focus on questions concerning their methods of critique, and their respective diagnoses of modern culture and societies. All three attempt to explain particular sources of human suffering such as loss of meaning, the sense of alienation from self and others, constraints on free expression, and nihilistic world-weariness. The course texts may include several short selections from important historical influences such as Kant and Hegel as well as 20th century figures who have reacted to, revised, or responded to them in creative ways. Among the latter one could include Louis Althusser, Michel Foucault, Gilles Deleuze, Jacques Lacan, Luce Irigaray, Judith Butler, Wendy Brown, Elizabeth Grosz and Peter Sloterdijk, to name only a few.

Requirements/Evaluation: bi-weekly papers, oral commentaries, and tutorial discussions

Prerequisites: 100-level Philosophy course, PHIL 202, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors or prospective majors and students with background and interest in critical theories

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

**Class Format:** discussion

**Requirements/Evaluation:** active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

**Prerequisites:** none, although previous coursework in WGSS is desirable

**Enrollment Limit:** 19

**Enrollment Preferences:** prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** meets Contemporary Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 228 (D2) STS 228 (D2) PHIL 228 (D2)

**Writing Skills Notes:** Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

**Attributes:** AMST Critical and Cultural Theory Electives  JLST Interdepartmental Electives  PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health
What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**PHIL 250 (F) Philosophy of Economics (WS)**

The status of economics as a predictive science has been most prominently brought into question, historically, by three unpredicted yet extremely important economic events: the Great Depression of the 1930s, stagflation of the 1970s, and bursting of the mortgage bubble in 2008. The issue of prediction was also raised by economist Donald McCloskey who, in 1988, asked his fellow economists, “If you're so smart, why ain't you rich?” Some critics find predictive failures of economists unsurprising, given the frequent reliance of the latter on assumptions known to be false (e.g., that economic agents are always selfish, have perfect information, and never make mistakes) and on models that unavoidably ignore potentially relevant factors. Perhaps, then, economics is not primarily a predictive science, but instead a descriptive, historical, and/or mathematical one. In this course, relying on works by economists and philosophers, we examine the status of economics as an academic discipline, focusing on its assumptions, methods, and results.

**Requirements/Evaluation:** six 6- to 8-page essays, six 2- to 3-page response papers, participation in discussions

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors and potential majors, then Economics majors and potential majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Six 6- to 8-page essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** PHIL Contemporary Value Theory Courses
PHIL 272 (F) Free Will and Responsibility (WS)

Cross-listings: PHIL 272 JLST 272

Primary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

PHIL 281 (S) Philosophy of Religion (WS)

Cross-listings: PHIL 281 REL 302

Primary Cross-listing

Our goal will be to determine how far reason can justify belief in God. We will examine well-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, and the argument from evil). For each argument, we will first look at historically important formulations and then turn to contemporary reformulations. Our aim will be to identify and evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. Near the end of the semester, we'll also examine some evolutionary explanations of religious belief. Our tools in this course will be logic and reason, even when we are trying to determine what the limits of reason might be. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, and several contemporary philosophers.

Class Format: students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

PHIL 310 (F) Wittgenstein’s Later Philosophy (WS)

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published Philosophical Investigations, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein’s later philosophy. In the first part of the course, we will read Wittgenstein’s Philosophical Investigations, one of the greatest books ever written. In the second part of the course, we will read On Certainty, and selections from other of Wittgenstein’s posthumously published works: Zettel, Philosophical Grammar, Remarks on the Philosophy of Psychology, Culture and Value, Lectures and Conversations on Aesthetics, Psychology and Religious Belief, and The Big Typescript. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.

Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Prerequisites: two Philosophy courses

Enrollment Limit: 10

Enrollment Preferences: preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two short (about 800 words) seminar papers; five 5-7 pages long papers; five 2-3 pages long comments on their tutorial partner’s papers; and a final paper (also 5-7 pages long) which will be a revision of one of the previously written papers. Students will get regular feedback from their tutorial partner and from the instructor on the substance of their work as well as on their oral and writing skills, with suggestions for improvement.

PHIL 321 (F) Introduction to Critical Theory (DPE) (WS)

Cross-listings: WGSS 322 PHIL 321

Primary Cross-listing

"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet from its
inception and continuing into the 19th and 20th centuries we find the promise of Enlightenment challenged by colonialist expansion, the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? Should it be? Among the possible topics addressed will be: criticizing capitalism, alienation and objectification, progress and freedom, the entanglements of power and reason, radical liberalism, the future of democracy as well as post-structuralist, post-colonial, feminist and anti-racist critiques of the Frankfurt School. Readings may include historical as well as contemporary figures such as: Kant, Freud, Horkheimer, Adorno, Marcuse, Habermas, McCarthy, Honneth, Fraser, Amy Allen, Foucault, Ranciere, Achilles Mbembe, Judith Butler, Wendy Brown, Spivak, and Charles Mills, among others.

Class Format: students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: each student will write and present five 5- to 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings

Prerequisites: PHIL 202, Kant course, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and students with background in political theory, feminist theory, or post-colonial theory

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students write weekly online reading response papers, two 7-page essays, and one 20-page final research paper. Students receive written feedback from me throughout, meet with me 1-on-1 to discuss 7-page essays to then revise/re-submit and also receive written
Global malnutrition continues to represent one of the most challenging issues of international development. Problems of both under- and overnutrition beginning as early as [in utero] can detrimentally influence the health, development and survival of resource-limited populations. This course introduces students to the most prevalent nutritional issues through a food policy perspective and exposes them to a wide variety of interventions, policies and current debates in the field of international nutrition. In addition to exploring the multi-level programmatic approaches for the prevention and treatment of the related nutritional problems, students will gain exposure and experience in program design and program proposal writing.

Readings will involve both real-world programmatic documents/evaluations as well as peer-reviewed journal articles. Examples will be drawn from Africa, Asia and Latin America. This course was previously titled Nutrition in the Developing World.

Requirements/Evaluation: six 1-page essays, one situation analysis paper (5-7 pages), one final term paper (10-15 pages), one oral presentation, and active class participation

Prerequisites: PHLH 201 or equivalent

Enrollment Limit: 19

Enrollment Preferences: Public Health concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: As a writing skills course, students will write six 1-page essays (each with an optional rewrite) and a 5- to 7-page, country assessment paper which will help build the specific writing skills necessary for the final 10- to 15-page paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course exposes the issues of difference, power and inequity by exploring the unequal distribution of resources and power at the global, national and intra-national level within the international nutrition context. We will also critically engage with issues of power, cultural difference and related ethics in the context of nutrition program design and implementation.

Cross-listings: POEC 250 ECON 299 PSCI 238

Primary Cross-listing
Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: discussion
Requirements/Evaluation: eight short essays, several short homework assignments, and a final exam
Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

Fall 2019
LEC Section: 01 MR 2:35 pm - 3:50 pm Jon M. Bakija, James E. Mahon
The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This course focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age. Most readings will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Requirements/Evaluation: four 5-page papers and a final 10-page paper that is a revision and extension of a short paper

Prerequisites: none; not suitable for first-year students

Enrollment Limit: 19

Enrollment Preferences: Political Science majors with concentration in American politics and Political Economy majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Four 5-page papers, peer review, and a revision of extension of one of these papers into a 10-page paper at the end of the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PSCI 238 (F) Economic Liberalism and Its Critics (WS)

Cross-listings: POEC 250 ECON 299 PSCI 238

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx’s revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: discussion

Requirements/Evaluation: eight short essays, several short homework assignments, and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 35

Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

POEC 250 (D2) ECON 299 (D2) PSCI 238 (D2)
Writing Skills Notes: Students write at least eight 650-word graded reaction papers, across twelve weekly opportunities, during the semester. An instructor meets with each student after the first few weeks to go over their work and to discuss methods of composition.

PSCI 248  (F) The USA in Comparative Perspective  (WS)
Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; nationalism and national identity; war and state-building; American exceptionalism, religion, and foreign policy; the role of political and economic institutions; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores and students who have been denied enrollment in the course previously

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, professor meets with them individually to discuss the composition and presentation of each genre.

PSCI 260  (F) Power, Feminist-Style  (DPE) (WS)

Cross-listings: WGSS 260  PSCI 260

Secondary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice, the concept of power from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 260 (D2) PSCI 260 (D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

PSCI 314  (S) How Change Happens in American Politics  (WS)

Cross-listings: LEAD 314  PSCI 314

Primary Cross-listing

Does the rise of Donald Trump signal something new in the U.S.? How unprecedented is the current political moment? What might we expect to come next? From the Founding to the present, the American political order has undergone incredible, cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that individual leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor demands, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

Class Format: research seminar

Requirements/Evaluation: several short essays, weekly writing assignments, and a longer research paper with presentation

Prerequisites: previous course in American politics or American history

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Spring 2020
SEM Section: 01    MR 2:35 pm - 3:50 pm     Nicole E. Mellow
This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

PSCI 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: JWST 339 PSCI 339

Primary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through—and reflected deeply on—two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

Requirements/Evaluation: five 5-page papers; five 2-page responses; a final revision of a prior paper; participation
**Prerequisites:** a prior course in political theory, philosophy, or critical theory, or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Political Theory concentrators, Political Science majors

**Expected Class Size:** 10

With the passing of the Castro brothers' regime on the horizon, we examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. It begins with the political economy of the colony, then covers the Cuba- US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual orientation; social programs; political institutions; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

**Class Format:** a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

**Requirements/Evaluation:** five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

**PSYC 158 (F) Freud: A Tutorial**  (WS)

**Cross-listings:** HIST 485  PSYC 158

**Secondary Cross-listing**

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, “Analysis Terminable and Interminable.” In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was “right” or “wrong” or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

**Class Format:** students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

**Requirements/Evaluation:** student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** fulfills History’s 400-level graduation requirement

**Distributions:** (D2) (WS)

PSYC 319  (F)(S)  Neuroethics  (WS)

Cross-listings: STS 319  NSCI 319  PSYC 319

Primary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of “abnormal” personality; the use of “cosmetic pharmacology” to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions:  (D2)  (WS)

REL 134  (S)  Leaving the World Behind: The Literature of Reclusion  (DPE)  (WS)

Cross-listings: CHIN 134  REL 134  COMP 134  ANTH 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion-living a life of seclusion from society-in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely
separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 210  (S) Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)

Cross-listings: REL 210 ARAB 212 ARTH 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First- and second-year students, but open to all

Cross-listings: ANTH 246 ASST 246 WGSS 246 REL 246

Primary Cross-listing

This tutorial considers India’s legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions— including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India’s diverse and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women’s, Gender & Sexuality Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

REL 268 (S) Where are all the Jews? (DPE) (WS)
Cross-listings: ARAB 363 COMP 363 JWST 268 HIST 311 REL 268

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israélite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a
socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

REL 269 (F)(S) Mindsight: Mindfulness and Medicine (DPE) (WS)

Cross-listings: REL 269 STS 269 ANTH 269 ASST 269

Secondary Cross-listing

This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

Class Format: weekly tutorial, context-based learning, experiential learning

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: a course on Buddhism is preferred but not required

Enrollment Limit: 10
**Enrollment Preferences:** ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
REL 269 (D2) STS 269 (D2) ANTH 269 (D2) ASST 269 (D2)

**Writing Skills Notes:** This class will involve weekly tutorial essays of 1200 or 600 words, written feedback on every essay, and a mid-semester 'writing chat' with the instructor to improve patterns in writing.

**Difference, Power, and Equity Notes:** This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can alleviate pervasive and population wide health issues in the US including rising rates of hypertension, anxiety, and mental health issues that are exacerbated by stress related to social inequality and structural violence. It explores and critiques the ways that mindfulness has been marketed as an elite and non-inclusive practice within the US.

**REL 302 (S) Philosophy of Religion (WS)**

**Cross-listings:** PHIL 281  REL 302

**Secondary Cross-listing**
Our goal will be to determine how far reason can justify belief in God. We will examine well-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, and the argument from evil). For each argument, we will first look at historically important formulations and then turn to contemporary reformulations. Our aim will be to identify and evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. Near the end of the semester, we'll also examine some evolutionary explanations of religious belief. Our tools in this course will be logic and reason, even when we are trying to determine what the limits of reason might be. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, and several contemporary philosophers.

**Class Format:** students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing

**Requirements/Evaluation:** five 5-page papers and five 2-page papers

**Prerequisites:** one PHIL course

**Enrollment Limit:** 10

**Enrollment Preferences:** current and prospective Philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

REL 335 (S) The Meaning of Diaspora and the Jews of Europe  (WS)

Cross-listings: HIST 434 REL 335 JWST 434

Secondary Cross-listing

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews’ diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students’ work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper

Prerequisites: none

REL 374 (S)  Mysticism: Vision, Writing, History  (WS)
Cross-listings:  ENGL 374  REL 374  COMP 352

Secondary Cross-listing
The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation:  biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions
Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit:  10
Enrollment Preferences:  English majors and those intending to major in English
Expected Class Size:  10

RLSP 202 (S)  Introduction to the Analysis of Literature in Spanish  (WS)

This course is intended for students who are considering a major in Spanish, including those who have recently completed RLSP 105, 107, or 200. Using a textbook, Aproximaciones al estudio de la literatura hispánica, we will study the fundamentals of genre analysis while reading selected works of prose, poetry and drama from Latin America and Spain. Conducted in Spanish. This course is writing intensive because the techniques of planning, writing, and revising essays will all be extensively discussed and put into practice.
Class Format: mixture of lecture, discussion, and writing workshop

Requirements/Evaluation: assignments will include three 5-page essays, a number of shorter papers, and occasional discussion-leading as well as consistent preparation and class participation

Prerequisites: RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who are considering the major in Spanish

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Our commitment to the formal analysis of literature in Spanish lends itself to a sustained and focused attention to student writing. As we learn to analyze works of literature, we will bring our attention to questions of rhetoric, style and structure to bear on our own writing also. Papers will be "work-shopped" throughout the semester; students will also practice peer-editing in pairs. Students will also receive extensive feedback from the professor with the goal of strategic revision.

RLSP 251 (F) Somos Sur: US-Mexico-Central American Borderlines (WS)

What are borderlands? How have they been created? How do they affect the life of those who cross or are being crossed by these borders? This course focuses on the cultural production that explores US-Mexico-Central American borderlands and the diverse policies and practices that (re)create and (re)image these borders. In consideration of some of the dictatorships in Central America, the NAFTA agreement and post 9/11 policies, as well as war zones and the drug war; we will explore the concepts of citizenship, migration, nationalism, and (in)visibility in its intersection with gender, racial positioning, and social class. Drawing upon cultural studies, feminist theory, history, and ethnography we will examine materials such as photography, installation art, journalism, literature, film, and music. This interdisciplinary approach aims to shed light on the causes and consequences of the political, cultural, and economic narratives involved in our current understanding of these fronteras. This class is conducted in Spanish; readings will be in both English and Spanish.

Requirements/Evaluation: essays, oral presentation, participation

Prerequisites: RLSP 105, placement exam results, permission of the instructor or the Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

Fall 2019

LEC Section: 01 MR 1:10 pm - 2:25 pm Roxana A. Blancas Curiel

RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals’ skin tone. The study showed that “Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts” (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their
intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In
addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do
not consider themselves Mexican citizens. This class will be conducted in Spanish.

Requirements/Evaluation: essays, oral presentation, participation
Prerequisites: RLSP 105, placement exam results, permission from the instructor or the Department Chair
Enrollment Limit: 19
Enrollment Preferences: Spanish major
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will
be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

RUSS 140 (S) Crime and Punishment in Russian History (WS)
Cross-listings: HIST 140 RUSS 140
Secondary Cross-listing
For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and
the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can
speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of
original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval
Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an
understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked
among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for
offering an oral critique of their partner's work
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 140 (D2) RUSS 140 (D1)
Writing Skills Notes: Each student will write five 5-to-7-page papers on which the instructor will provide written feedback regarding grammar, style,
and argument. Each student will write five 3-page critiques of their partners' papers. As the final assignment, each student will revise one of their five
papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

RUSS 219 (F) Cults of Personality (WS)
First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase “cult of personality” was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany, Italy, and Spain, China, Iran, North Korea, and Cuba. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
RUSS 219 (D1) COMP 215 (D1)

Writing Skills Notes: Students will be writing papers (5-6 pages) every other week and receiving detailed feedback on their writing with the expectation that they will identify areas in need of improvement and work on these throughout the semester. The course will also require that students write one paper together with their tutorial partner and that they rewrite two different papers, one at midterm and the other at the end of the term.

Fall 2019

TUT Section: T1 TBA Julie A. Cassiday

STS 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: STS 153 ENGL 153

Secondary Cross-listing

In this expository writing course, we will analyze and argue about how near-human and partly human bodies appear in fiction and film. When do these bodies improve the spaces in which they appear? When do they threaten them? How are they gendered, how are they raced, and why? What do they desire? Authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in different ways. Together we will develop our ideas on these topics in clear, strong prose. We will also ask how artists have cast human identities into foreign materials and media, and study the distortions and revelations that result. During museum visits at WCMA, students will use examples of self-portraiture, electrified bodies, and aspirational bodies to explore the representation, imitation, and abstraction of selves. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: five response papers (500 words); four essays (1200-1500 words, each in two drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 153 (D2) ENGL 153 (D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written work. Students write five response papers and four five-page essays (in two drafts) over the course of the semester, receiving substantial instructor feedback on all. Students
will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

STS 228  (F) Feminist Bioethics  (WS)
Cross-listings:  WGSS 228  STS 228  PHIL 228

Secondary Cross-listing

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format: discussion

Requirements/Evaluation:  active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper ( 5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites:  none, although previous coursework in WGSS is desirable

Enrollment Limit:  19

Enrollment Preferences:  prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 228  (D2) STS 228  (D2) PHIL 228  (D2)

Writing Skills Notes:  Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

THEA 125 (F) Theater and Politics (WS)
Cross-listings: THEA 125 ENGL 125
Secondary Cross-listing

When Plato designed his ideal republic, he excluded theater from it, arguing that indulging in the charms of theatrical representation would make men poor governors of themselves and thus threaten the integrity of fledgling Greek democracies. In the twentieth-century, however, the work of younger artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud provocatively suggested that theater itself could remedy the ills that Plato thought it aggravated by restoring to the people the productive power that the passively on-looking masses had ceded to the charisma of dictators. Today, as rapid changes in media daily transform the way in which we experience the world and understand our place within it, artists, critics, and philosophers continue to draw on the terms of historical debates about theater in attempts to understand the political significance of technologically enhanced forms of global spectatorship, asking what becomes of the traditional roles of viewers and directors on the new world-stage, in an age when revolutions are triggered by cell phone images, but advertising campaigns are also customized to consumers based on automated scans of private information like email. In this seminar, students take a historical approach to these urgent contemporary questions, analyzing the politics of theater in literature, criticism, film, and philosophy from antiquity to the present.

Requirements/Evaluation: three papers of increasing length and complexity, one of which you will revise, totaling 20 pages of finished writing, and a portfolio of interpretive questions

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 125 (D1) ENGL 125 (D1)
Writing Skills Notes: The seminar includes extensive discussion of writing strategies throughout, frequent writing assignments, substantive feedback on writing assignments, and revision in response to that feedback.

THEA 320 (S) Marlowe and Shakespeare (WS)
Cross-listings: ENGL 320 THEA 320
Secondary Cross-listing

In 1586, at the age of twenty-three, Christopher Marlowe wrote Tamburlaine the Great. Over the next six years—probably while moonlighting as a
government spy—he went on to produce some of the strangest and also most influential works of English drama. Then in 1593, Marlowe was murdered, stabbed through the eye in a tavern brawl. It is often said that Marlowe's early death, no less than his early success, made the work of Shakespeare possible. In this class we will read Marlowe's Edward II, the first popular history play in English, and Shakespeare's Richard II; The Jew of Malta and The Merchant of Venice; Doctor Faustus and Macbeth. We will look at ways in which Marlovian preoccupations—with lurid violence, with debasement, with self-invention-resurface in Shakespeare, in new forms. In the process we will also take up more general questions of literary influence: What do writers borrow from each other? And how does the knowledge of indebtedness—shared to varying degrees with an audience—affect the meaning and impact of their work? Critical readings will include essays by Harry Levin, Julia Lupton and Stephen Greenblatt.

Requirements/Evaluation: two 5- to 7-page papers; a ten page final paper

Prerequisites: 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 320 (D1) THEA 320 (D1)

Writing Skills Notes: Two 5- to 7-page papers. A 10-page final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

WGSS 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: WGSS 105 ENGL 105 AMST 105

Secondary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105 (D2) ENGL 105 (D1) AMST 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

WGSS 110  (S)  The Veil: History and Interpretations  (DPE) (WS)

Cross-listings:  ARAB 215  WGSS 110  HIST 110

Secondary Cross-listing
This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit:  10

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113  (F)  The Feminist Poetry Movement  (DPE) (WS)

Cross-listings:  ENGL 113  AMST 113  WGSS 113

Secondary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.
Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

WGSS 132 (F) Black Writing To/From/About Prison (DPE) (WS)

Cross-listings: ENGL 132 WGSS 132

Secondary Cross-listing

This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. The primary project in this course is the development of open letter writing skills. This epistolary form allows both for the intimate engagement of individual, familiar contact and the deft inclusion of targeted eavesdroppers in order to raise the consciousness of listeners and affirm the value of personal relationships. Course texts will include letters to and from prison; documentaries; selections from anthologies like If They Come in the Morning and Captive Genders: Trans Embodiment and the Prison Industrial Complex; autobiographies like that by Malcolm X, Walidah Imarisha, and Assata Shakur; poetry by Ericka Huggins, Huey Newton, and Terrance Hayes; and critical interventions by scholars like Nikki Jones, Victor Rios, Michelle Alexander, and Angela Davis. We will also look at contemporary groups organizing around abolition and prisoner support including Critical Resistance, Photos From Solitary, and TGIJP (Transgender Gender Variant Intersex Justice Project).

Class Format: discussion, engagement with guest speakers, engagement with Special Collections

Requirements/Evaluation: four open letters developed with critical feedback (4-5 pages), a twice weekly question diary, an organization report and presentation, a collectively decided project

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 132 (D1) WGSS 132 (D2)

Writing Skills Notes: Open letters are a mainstay of black literature allowing for intimate engagement of the individual and the deft inclusion of
targeted eavesdroppers to raise the consciousness of listeners and affirm the value of personal relationships. Students will learn to write letters with purpose to facilitate a felt relationship to the topic; enhance writing skills including achieving clarity and aesthetic value; practice curation of references. Four 5-page letters with rigorous feedback to sharpen form.

**Difference, Power, and Equity Notes:** This class studies the historical development of mass incarceration of black folk from its roots in American slavery and white supremacist policy. This class also studies the impact of the prison industrial complex on transgender and queer folk in reproducing gender binaries and sexual abuse in and outside prison walls. The politics of prison abolition and gender self determination present critical interventions into the hegemonic structures of normalized racial dominance and gender oppression.

**WGSS 139 (S) Living a Feminist Life (DPE) (WS)**

**Cross-listings:** ENGL 139, COMP 139, WGSS 139

**Secondary Cross-listing**

The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, Living a Feminist Life, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmes' lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's A Small Place, Audre Lorde's Sister Outsider, Djamila Boupacha's memoir, Ana Lily Amirpour's film A Girl Walks Home Alone at Night, Sara Ahmed's Living a Feminist Life, Valerie Solanas's SCUM Manifesto, and bell hooks's Teaching to Transgress. In their writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

**Requirements/Evaluation:** five short written assignments and one final research project

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 139 (D1) COMP 139 (D1) WGSS 139 (D2)

**Writing Skills Notes:** This course will center writing and research skills with at least one session per week devoted to ladder development and revision. Five short papers (3-4 pages) with one revision (5-6 pages) as well as a bibliography and final research paper (12-15 pages).

**Difference, Power, and Equity Notes:** This course will examine the generative intersectional site of feminism, antiracism, and anticapitalism to provide an alternative introduction to feminist thought, writing, and practice. The syllabus centers women and femme writers of color.

**WGSS 152 (S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)**

**Cross-listings:** HIST 152, WGSS 152

**Secondary Cross-listing**

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War,
and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to those who have been dropped from this class previously, then to first-years, then to sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 152 (D2) WGSS 152 (D2)

Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

WGSS 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WS)

Cross-listings: WGSS 218 AMST 218 ENGL 218 AFR 218

Secondary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's Kindred, Jewelle Gomez's Gilda Stories, Glenn Ligon's "Runaways", and Jordan Peele's Get Out. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation: mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 218 (D2) AMST 218 (D2) ENGL 218 (D1) AFR 218 (D2)

Writing Skills Notes: Three thesis papers at 5 pages each (each receiving critical feedback from professor); one thesis paper revision with critical
feedback from professor and peers including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course examines the work of black writers and artists engaged with the archival silences imposed by the power dynamics of racial hierarchy which constrained the birth of African American literature (the slave narrative). In particular, we examine the meaningful/willful/censorial omissions that shape the treatment of gender and sexuality in these texts including and especially the silences around sexual abuse and sexual assault practiced by beneficiaries of white supremacy.

**WGSS 228 (F) Feminist Bioethics**  (WS)

**Cross-listings:** WGSS 228  STS 228  PHIL 228

**Secondary Cross-listing**

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

**Class Format:** discussion

**Requirements/Evaluation:** active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

**Prerequisites:** none, although previous coursework in WGSS is desirable

**Enrollment Limit:** 19

**Enrollment Preferences:** prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

**Expected Class Size:** 19

**Grading:** yes pass/fail option,  yes fifth course option

**Unit Notes:** meets Contemporary Value Theory requirement only if registration is under PHIL

**Distributions:** (D2)  (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 228 (D2)  STS 228 (D2)  PHIL 228 (D2)

**Writing Skills Notes:** Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

**WGSS 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art**  (WS)
Cross-listings: WGSS 231  ARTH 231

Secondary Cross-listing

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art—never created for its own sake—was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions and of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity. When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

Class Format: some tutorial meetings will be conducted at local museums

Requirements/Evaluation: engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner's tutorial papers

Prerequisites: first-year and sophomore students (this class is open to students with no experience in art history)

Enrollment Limit: 10

Enrollment Preferences: a statement of interest will be requested in the event the course is over-enrolled

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 231 (D2) ARTH 231 (D1)

Writing Skills Notes: This course's fundamental goal is to support opportunity and skills to construct compelling and original written arguments. Tutorial partners will share standards and guidelines for strong writing with instructor: common concepts and language for critique, discussion, and applause. We will consider the power of argument inextricable from the quality of writing, and thus address writing issues, strategies, and successes in a deep way, organically and consistently, in every tutorial meeting.

WGSS 246  (S)  India's Identities: Nation,Community, & Individual  (DPE) (WS)

Cross-listings: ANTH 246 ASST 246 WGSS 246 REL 246

Secondary Cross-listing

This tutorial considers India's legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India's diverse and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10
Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 246 (D2) ASST 246 (D2) WGSS 246 (D2) REL 246 (D2)

Writing Skills Notes: Weekly writing, writing chats, intensive feedback on writing grammar, style, argument every week.

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by theorizing the ways that social power and equity have been and continue to be a source of struggle and division within Indian society. It analyzes the ways that communities have used religion, gender, ethnicity, and caste to struggle for power and status within Indian society.

WGSS 260 (F) Power, Feminist-Style (DPE) (WS)

Cross-listings: WGSS 260  PSCI 260

Primary Cross-listing
This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice, the concept of power, from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 260 (D2) PSCI 260 (D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

Attributes: WGSS Theory Courses

Fall 2019
This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Ilmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation: papers and oral presentations

Prerequisites: for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

Enrollment Limit: 19

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 317 (D1) WGSS 317 (D2)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Prerequisites: PHIL 202, Kant course, or permission of instructor

Enrollment Limit: 10
