What is a panic? This course takes up questions of what has defined, caused, and shaped panics of various kinds—political, societal, moral, medical, and financial. We will consider what has fueled panics, what has prevented them, what their effects have been, how they have ended, who has panicked, who has been the victim of panics, and what has distinguished premodern from modern incarnations of the phenomenon. Central themes will include the relationship between panics and emotions (anxiety, fear, insecurity, irrationality, hysteria), communication (rumor, gossip, mass media), technology (electricity, vaccines, the computer), and violence (persecution, revolution, psychological torment). With a multidisciplinary approach informed by sociology, economics, psychology, and history, our examination will span different times and different places and will encompass witch hunts of many sorts, infectious diseases, financial crises, cultural scares, and more.

**Requirements/Evaluation:** class participation, response papers, one short 5-page paper, and a research paper

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, potential History majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)
HIST 395  (F)  Signs of History
Cross-listings:  HIST 395  ENGL 395  COMP 395

Secondary Cross-listing

What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Requirements/Evaluation:  two papers, one 6 and one 10-12 pages in length, and general participation

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit:  25

Enrollment Preferences:  English, Comparative Literature, History and German majors

Expected Class Size:  15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)

HIST 409  (F)  Crescent, Cross, and Star. Religion and Politics in the Middle East
Cross-listings:  GBST 409  ARAB 409  HIST 409

Primary Cross-listing

Is religion the most powerful force in the Middle East? Is religion becoming more prominent in the political sphere and what impact will that have on religious minorities and the status of women in the Middle East? Using a case study and historical approach, this course will consider the development of religiously inspired political ideologies in the Middle East in the 19th and 20th century. We will explore the experience of Iran, Turkey, Israel, Egypt, Saudi Arabia, Lebanon and Jordan and evaluate role of religious actors, institutions, and ideologies in constructing national identities, policymaking, state-building, regime change, conflict, and war.

Requirements/Evaluation:  class participation and a 25-page research paper

Prerequisites:  none; preference will be given to History, Jewish Studies and Arabic Studies Majors and to those who have taken History 207

Enrollment Limit:  19

Enrollment Preferences:  History majors

HIST 411  (F)  Happy Holidays! A Comparative History of Commemorations and Festivals
Cross-listings:  REL 321  HIST 411  ARAB 411
Primary Cross-listing

What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Requirements/Evaluation: several short response papers and a 20- to 25-page final paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: seniors, especially History and Arabic Studies majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

HIST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)
Cross-listings: REL 335 HIST 434 JWST 434
Primary Cross-listing

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews' diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students’ work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: History majors and Jewish Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Students will write two drafts of their research paper before submitting the final paper for a grade. They will receive timely comments on drafts from professor and peers, to be incorporated into their final paper.
**HIST 443  (S)  Race and Ethnicity in Latin America**

**Cross-listings:**  AFR 383  HIST 443

**Primary Cross-listing**

Race and ethnicity have been central to the formation of national identities in Latin America, as well as to the creation of transnational networks that include Latin Americans. This seminar will critically examine familiar characterizations of Brazil and other countries as “racial democracies” and look at the historical roots and political impact of both “positive” and “negative” stereotypes of race relations in the region. To do this we will explore the rise and decline of slavery, the changing constructions of indigenous and Afro-Latin American identities at national and transnational levels, and to the emergence of new Black Movements and other racial and ethnic activism in Colombia, Guatemala, Brazil, and elsewhere.

**Requirements/Evaluation:**  class participation, one short paper, and a substantial (20-25 page) research paper

**Prerequisites:**  none

**Enrollment Limit:**  15

**Enrollment Preferences:**  History majors and Latino/a Studies concentrators

**Expected Class Size:**  10-15

---

**HIST 453  (S)  Women, Gender, and Social Movements in U.S. History**

**Cross-listings:**  HIST 453  WGSS 453

**Primary Cross-listing**

This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women's groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

**Requirements/Evaluation:**  20- to 25-page research paper

**Prerequisites:**  none

**Enrollment Limit:**  15

**Enrollment Preferences:**  senior History majors

**Expected Class Size:**  10

**Grading:**  no pass/fail option, no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 455  (S)  The Afterlives of Objects: Telling American Histories through Material Culture and Museums  (DPE)

**Cross-listings:**  HIST 455  AMST 455

**Primary Cross-listing**

Material culture studies examine relationships between people and objects. Tangible artifacts like furniture, clothing, ceramics, tools, and buildings give insight into communities' identities, aspirations, and struggles. This course approaches American histories through objects, and considers how interdisciplinary methodologies can reveal alternative understandings of the past. The course traces changing theories and practices of preservation, curation, and display; shifting conceptions of "heritage" among diverse peoples; and ethical challenges posed by Native American and African American items held in museums, particularly in relation to repatriation considerations. The course involves a staged set of class visits to work with collections at the Williams College Archives/Special Collections and Art Museum as well as local/regional repositories and historic sites. While the scope of the course is continental and at times transoceanic, it includes substantial focus on the Northeast/New England and the material assemblages and landscapes that shape western Massachusetts. Students will build familiarity with appropriate techniques for handling objects, cultivate skills for developing and carrying out an original research project, and explore diverse modes of analysis and expression for telling the stories of objects and their associated communities.

**Requirements/Evaluation:**  active participation in class discussion and museum visits, in-class presentation about one week's readings, research project prospectus, research project

**Prerequisites:**  none

**Enrollment Limit:**  15

**Enrollment Preferences:**  junior and senior History and American Studies majors

**Expected Class Size:**  15

**Grading:**  yes pass/fail option,  yes fifth course option

**Distributions:**  (D2)  (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 455  (D2) AMST 455  (D2)

**Difference, Power, and Equity Notes:**  This course examines diverse historical experiences of North American peoples, including Native Americans and African Americans, in conjunction with responses to Euro-American settler colonialism. It introduces students to foundational methodologies in object studies including decolonizing approaches, and explores key debates about possession, interpretation, and repatriation of objects to descendant communities, such as the Native American Graves Protection and Repatriation Act (NAGPRA).

HIST 457  (S)  Floridas  (DPE)  (WS)

Florida, the sunshine state with 1350 miles of coastline was once an outpost of Spain's 17th century empire. Its history comprises Disney World, the largest Cuban community outside of Cuba, a haven for enslaved Catholics in the 17th century and for an aging, largely white middle class in the 20th. It is the site of the nation's oldest city, and the home to range of Native peoples. A land of swamps, plantations, cities, islands, strip malls and theme parks is now ground zero in climate change discussions. This "purple state" has decided more than one presidential election. This course will explore the history of the many Floridas. We will move roughly through time as we seek to understand Florida and its place in United States culture. Why do people often think of Florida as "not quite southern" although it borders Georgia and Alabama? When and why did Spain colonize the area? How did they lose it? What is the history of the original inhabitants of Florida and how does that story help us understand it now?

**Requirements/Evaluation:**  class discussion, three short writing assignments and a final research paper of 15-20 pages on a topic that grows out of our reading

**Prerequisites:**  none

**Enrollment Limit:**  19

**Enrollment Preferences:**  seniors and History majors
**Expected Class Size:** 19  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Students will be writing three shorter papers throughout the semester. Two of these will be building up towards the final research paper. The third will be more "experimental"... perhaps a piece of historical fiction or eye witness account. The final paper should exceed 15 pages. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** We will consider how Florida has defined itself, and been defined throughout American history largely based on various groups that occupied space with combinations of military, technological and economic power. This class will investigate the histories and dynamics of these various occupations and settlements, paying close attention the conflicts over space in rural and urban areas. Histories of African Americans and Native people will be central to our investigation.

**HIST 471 (S) Comparative Latina/o Migrations**

**Cross-listings:** HIST 471 LATS 471  
**Secondary Cross-listing**

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

**Class Format:** discussion
Requirements/Evaluation: class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources

Prerequisites: none

Enrollment Limit: 15

HIST 476 (F) CAPSTONE: Black Radicalism

Cross-listings: AFR 476 HIST 476

Secondary Cross-listing

Amandla! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery--brought about by the Haitian Revolution, slave rebellions, maroons, Quilombos, Civil War and various other means of resistance--transatlantic people of African descent have demanded radical change in the organization of modern societies. Their struggles and ideas have changed the ways we think and study--through the formation of African/African-American/Black-Studies--and the ways in which we express ideas--through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960's, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, and Caribbean and African radical movements, with an eye to examining their relevance to Black radical movements today.

Requirements/Evaluation: student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork, etc.

HIST 478 (S) Cold War Landscapes

Cross-listings: AMST 478 HIST 478 ENVI 478

Primary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and
industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct “Cold War landscapes” in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Requirements/Evaluation: class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 10

HIST 480 (F) Interpretations of the Israeli Palestinian Conflict (DPE)

Cross-listings: ARAB 480 GBST 480 JWST 480 HIST 480

Primary Cross-listing

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 481 (S) History of Taiwan (WS)

Cross-listings: ASST 413 HIST 481

Primary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an “inalienable part” of the much larger and more powerful People’s Republic of China? Part of the argument for Taiwan’s separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the
distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History or Asian Studies majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

HIST 482 (F) Race and American Foreign Relations (WS)
From its origins, American society has been suffused with notions of white superiority and racial hierarchies that have underpinned the nation's foreign policy. Ideologies of race factored heavily into the nineteenth century process by which the United States expanded its territorial control across the North American continent and established an empire of its own. Racialized thinking persisted at the heart of U.S. foreign relations in the twentieth century, influencing everything from the administration of empire in the Caribbean and the Pacific and commercial expansion into central America to the decision to use nuclear weapons against Japan, the diplomatic path to war in Vietnam, and more. The defeat of fascism and Nazism in World War II posed serious challenges to the premises of white supremacy, while ushering in a Cold War that would become inextricably bound with the process of decolonization. American diplomats were forced to recon with the challenges domestic racism posed to their foreign policy goals, while black internationalists became increasingly involved with global struggles for liberation and equality. While the global color line grew more hotly contested, white supremacist thinking proved as enduring as it was mutable. This upper division tutorial surveys leading scholarship on a range of topics that centers race as a category for understanding American foreign relations.

Class Format: This tutorial can be take entirely remotely. On campus students may request in-person tutorial sessions, pending the agreement of other students and the availability of appropriate rooms.
Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.
Prerequisites: None, open to all students
Enrollment Limit: 10
Enrollment Preferences: Preference will be given to history majors and students with prior coursework related to U.S. foreign relations. If the course is overenrolled, students may be asked to complete a questionnaire to determine enrollment.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers’ writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

Fall 2020
TUT Section: RT1    TBA    Jessica Chapman
HIST 483 (S) Sport and Diplomacy (WS)
Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

Requirements/Evaluation:  Students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-3 page written critique
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences: History majors and students with some prior course work in foreign relations and/or international history
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (WS)
Writing Skills Notes: Students will each write six (6) tutorial papers of 5-7 pages and six (6) critiques of 2-3 pages. The professor will provide weekly written feedback on each of these papers, and they will be discussed at length in tutorial sessions.
Attributes:  HIST Group F Electives - U.S. + Canada  HIST Group G Electives - Global History

Spring 2021
TUT Section: T1   TBA   Jessica Chapman

HIST 484 (F) Victorian Psychology (WS)
Although the Victorian era has traditionally been considered a psycho-social model of emotional inhibition and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This course will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course will concentrate on the close reading and analysis of primary documents from the era.

Class Format:  This tutorial will be taught remotely on Zoom. Once they have been selected, student pairs will meet with the professor for an hour at a regularly scheduled time each week.
Requirements/Evaluation:  Students will meet with the instructor using Zoom in pairs once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.
Prerequisites:  None
Enrollment Limit:  10
Enrollment Preferences:  Junior and senior History majors
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  Fulfills the department's seminar requirement for graduation with a degree in History
Distributions:  (D2)  (WS)
Writing Skills Notes:  As a tutorial, with each student writing a paper every other week, this course meets the writing skills requirement.
Attributes:  HIST Group C Electives - Europe and Russia
HIST 485 (S) Freud: A Tutorial (WS)

Cross-listings: HIST 485 PSYC 158

Primary Cross-listing

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, "Analysis Terminable and Interminable." In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was "right" or "wrong" or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

Class Format: students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

Requirements/Evaluation: student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: fulfills History's 400-level graduation requirement

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 485 (D2) PSYC 158 (D2)

Writing Skills Notes: As a tutorial, this course is by definition writing skills, both in terms of the number of papers that students will produce (six) and in terms of the focus on writing during every tutorial session. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2021

HIST 486 (S) Islam in European Culture from Muhammad to Modernity (DPE)

From the Crusades to modern colonialism, the relationship between Muslims and Western Christians has often been recounted as the clash of two opposing civilizations, a history of warfare and of incompatible values. This tutorial takes a different point of departure, namely the recent scholarly recognition that relationships between Muslims and Western Christians were often rooted in the intimacy of frequent interaction. We will delve into the many ways in which Muslim peoples shaped European culture from the Middle Ages to the present. We will explore different domains, from one of the first translations of the Qur'an into any language, the Latin version done in Toledo in 1143, to the many goods made by Muslim craftsmen that filled the homes of Renaissance Europe, and the roles of early modern Muslims as captives, slaves, diplomats, travelers, and converts. In the modern period, Muslims continued to inflect European culture both as colonial subjects and as domestic minorities, producing and inspiring art, imaginative literature, and critiques of European power. Our investigation will encompass music, visual art and film in addition to written works. How do we make sense of this intricately interwoven history? And what are its legacies for the present? Sources both primary and secondary will include Leo Africanus, Lady Montagu, Montesquieu, Mozart, al-Tahtawi, Flaubert, Sayyid Qutb and Fatima Mernissi.
Requirements/Evaluation: five tutorial papers (5-7 pages) and five shorter responses; occasional presentations

Prerequisites: History majors; juniors and seniors

Enrollment Limit: 10

Enrollment Preferences: if the course is overenrolled, a statement of interest will be requested

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This tutorial takes the approach of cultural history; discussions will heed the politics of translation across religious, cultural, and linguistic boundaries. We will historicize the way “difference” has been understood, and see that the alterity that was once viewed as theological was in other eras seen as the product of culture or politics. In addition, the tutorial recovers the rich artistic and literary production that intercultural interactions inspired--a legacy worthy of study.

HIST 487 (S) Archive Stories (WS)

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, Archive Fever, historians, archivists, and cultural theorists have been asking questions about the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is not a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

Requirements/Evaluation: each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final paper about their work on the Williams archives

Prerequisites: open to all junior and senior History majors and others with permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 6- to 7-page essays (one every other week) that will be critiqued, both in writing and orally, by the instructor and the student's tutorial partner. The student will also write a final 6- to 7-page essay reflecting on the nature of Williams archival practices in the context of the readings undertaken during the course of the tutorial. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 488 (F) Fictions of African American History (DPE) (WS)

Cross-listings: HIST 488 AMST 488

Primary Cross-listing

This course examines African American fiction, largely from the late 19th and very early 20th century. These Black authors, none of them professional historians, try to bring African American History to light in an era before this history was taken seriously by the white academy. Many of the authors we examine were activists and journalists who set their novels and short stories during Slavery and Emancipation. We will consider inherently radical act of reading and writing in a society where black literacy was illegal until after the Civil War. Alongside the fiction we will read modern historiography of
the era. We will also delve into some of slave narratives published after Emancipation. Readings will include works by Booker T. Washington, James Weldon Johnson, Charles Chesnutt, Paul Laurence Dunbar, and Sutton Griggs. This is a tutorial and will be taught online.

Requirements/Evaluation: Every week a student will write either an essay or a critique. For the final assignment students may either write a review of 2-3 works of historiography OR substantially revise an essay or critique they did during the semester.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History, Africana, and American Studies Majors will have preference. As well as students who have never taken a tutorial.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 488 (D2) AMST 488 (D2)

Writing Skills Notes: Students will write every week (essays and critiques) and receive feedback from their partners and from the professors. The final assignment of the semester is major revision of a one essay or critique. Students will receive feedback on their paper's organization and argument as well as points of style. Since we will be reading both fiction and historiography, we will discuss as a group the different challenges each form poses to essay writing.

Difference, Power, and Equity Notes: African Americans writing during this time lived under the laws and customs of Jim Crow and White Supremacy. Lacking political power, they turned to the power of the written word. We will evaluate the way writing and fiction helped ameliorate (or not) the racial power structures.

HIST 489  (F)  Appropriating History. Who Owns the Past?  (DPE) (WS)

Cross-listings: HIST 489  ARAB 408

Primary Cross-listing

Who owns the past? How have modern states appropriated history? The political use of history is a critical ingredient in any nationalist discourse. In such narratives, the selective utilization of archaeology and ancient history often serves important functions in articulating a conscious and deliberate national history. Thus, in nationalist renderings, archaeological sites and artifacts are not merely relics of the past; they can also be potent and conspicuous symbols of national identity for the modern nation-state. In the Middle East, with its rich archaeological heritage, the relationship among politics, nationalism, and archeology has been particularly strong and interesting. This tutorial addresses the powerful nexus between history and nationalism with a special emphasis on the Middle East. It will explore the battle over who controls history and the "stuff" of history such as antiquities, land, heritage sites, and museum exhibitions and how that control has expressed itself in several Middle Eastern countries, including Iraq, Israel, Turkey, Egypt, Lebanon, and Iran. Furthermore, it will discuss how archaeology entered the political discourse, the ethics of repatriation and appropriation, and archaeology's role in contested terrains and political disputes.

Class Format: This tutorial can be taken entirely Remote. On campus students may request in-person tutorial sessions, pending the agreement of other students and the availability of appropriate rooms.

Requirements/Evaluation: Format: tutorial. Requirements: 5-7 page essays or 2-3 response papers due each week

Prerequisites: None, though a demonstrated interest in the Middle East is important.

Enrollment Limit: 10

Enrollment Preferences: Seniors and to History and Arabic Studies majors.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 489 (D2) ARAB 408 (D2)
**Writing Skills Notes:** As a tutorial, students will receive extensive feedback on their writing each week both from the professor and their partner. Further, students will be given the opportunity to rewrite two of their papers in light of the criticism that they receive during the semester.

**Difference, Power, and Equity Notes:** This is a tutorial on a particular form of power, namely how the powerful seek to control the past. The ultimate question that this tutorial seeks to answer is: who owns the past? Which history is emphasized and which histories are overlooked? How do modern nation states in different Middle Eastern states cherry-pick the past in order to maintain and develop a national narrative that is suitable to the political and economic powers often at the expense of religious or linguistic minorities.

**HIST 490 (S) Memory, History, and the Extermination of the Jews of Europe** (WS)

**Cross-listings:** HIST 490  JWST 490

**Primary Cross-listing**

This course is about the postwar legacy of the Holocaust. Nazi Germany’s extermination of European Jews has come to be a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust “unprecedented” and “unimaginable”? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the “bystanders” as compared to the “perpetrators”? Were the postwar trials of perpetrators a travesty of justice? What “lessons” have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations’ pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies’ efforts to confront their own traumatic pasts.

**Class Format:** tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

**Requirements/Evaluation:** Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written exercise is a thought piece on the issues raised in the tutorial to cap off the semester's work.

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 490 (D2) JWST 490 (D2)

**Writing Skills Notes:** Bi-weekly 5- to 7-page- papers. Students will receive regular and individualized feedback on their writing to help them work on different writing issues throughout the semester.

Spring 2021

TUT Section: T1    TBA     Alexandra Garbarini

**HIST 491 (F) The Suburbs**
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I'll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
HIST 493 (F) Senior Thesis: Research Seminar
This seminar is intended solely for writers of senior theses. Although each student’s major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

Class Format: seminar will meet remotely
Requirements/Evaluation: class participation and completed written work, and will determine if a student will continue in the thesis program
Prerequisites: limited to seniors accepted into the History Department's Thesis Program
Enrollment Limit: None
Enrollment Preferences: limited to seniors accepted into the History Department's Thesis Program
Expected Class Size: 10-15
Grading: no pass/fail option, no fifth course option

HON Section: 01    TBA     Alexandra Garbarini

HIST 495 (S) Stalinism (WS)
The quarter century during which Joseph Stalin ruled the Soviet Union witnessed some of the twentieth century's most dramatic events: history's fastest plunge into modernity, an apocalyptic world war, and the emergence of a socialist state as a competitive world power. This tutorial will offer students a deep dive not only into the historical depths of the Stalin era but into the gloriously complex historiographical debates that surround it. Some
of the questions that will animate the readings, writings, and discussions that tutorial students will engage in are as follows: Did Stalin depart from or represent a continuation of the policies introduced by his predecessor Vladimir Lenin? Did he rule in a totalitarian fashion or in ways comparable to other twentieth century regimes? Were his policies destructive or possibly productive? And perhaps most boggling of all: why did no one resist Stalinist rule?

Class Format: TBD

Requirements/Evaluation: Each week, a student either will write a 5-7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner’s work. Both tutorial partners will be responsible for completing 150-250 pages of reading each week.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 5-to-7-page papers on which the instructor will provide written feedback regarding grammar, style, and argument. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 496 (F) Gandhi: History, Ideas and Legacy (WS)

Cross-listings: REL 412 LEAD 412 ASST 412 GBST 412 HIST 496

Primary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India’s freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the ‘father of the Indian nation’, however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of ‘Mahatma’ or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi’s own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Winter Study

HIST 30 (W) Workshop in Independent Research
This course is designed for junior majors and sophomores who are considering pursuing a senior thesis in History. It can either provide students greater experience in independent research or allow for an in-depth exploration of a specific topic under consideration for the thesis. The course will focus on key methods of historical research, such as defining a topic, familiarizing oneself with historiography, and finding and using primary sources. Students may pursue any topic, and assignments may be modified to fit students' particular needs and interests. The majority of class time will consist of individual meetings with the professor as well as consultations with librarians and other experts in your field. Students are expected to devote considerable time outside of class to independent research. The final assignment will be a 10-page paper, which can either be a detailed prospectus for a senior thesis or a research paper.

Class Format: independent research
Requirements/Evaluation: 10-page paper; weekly assignment
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: instructor will send students questions over email about their research plans; students with evidence of more formulated plans will receive preference
Grading: pass/fail only
Not offered current academic year

HIST 31 (W) Senior Thesis: History
To be taken by all senior honors students who are registered for HIST 493 (Fall) and HIST 494 (Spring), HIST 31 allows thesis writers to complete their research and prepare a draft chapter, due at the end of Winter Study.

Class Format: thesis
Requirements/Evaluation: thesis chapter
Prerequisites: HIST 493
Enrollment Limit: 20
Enrollment Preferences: only students writing a thesis in History can enroll for this course
Grading: pass/fail only

Not offered current academic year

HIST 99 (W) Independent Study: History
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only

Not offered current academic year
A major in the History of Science is not offered, but the occasional Contract Major or a related interdisciplinary field is possible. Courses in the History of Science are designed primarily to complement and strengthen work in other major fields. Although any of the courses may be taken separately, studying related courses in other departments will enhance their value, because by nature, History of Science is interdisciplinary.

The following will serve as examples: HSCI 101 is an introduction to science and technology studies, and concentrates on key aspects of contemporary science and technology relevant to many issues of living in a technological society. HSCI 224 Scientific Revolutions deals with the emergence of modern science in the 1600s and 1700s, and with subsequent revolutions in scientific thought; as such it complements courses related to modern European history. HSCI 240 traces the influential role of science and invention in the shaping of American culture, and complements offerings in American Studies and American History. HSCI 320, an historical overview of the ideas, practice, and organization of medicine, provides context for related coursework in History, Philosophy, and the Premed Program.

Courses of Related Interest

Taught by: Bojana Mladenovic
Catalog details

SOC 368 / ENVI 368 Technology and Modern Society
Taught by: James Nolan
Catalog details

HSCI 101  (F)(S)  Science, Technology, and Human Values

Secondary Cross-listing
This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: Remote
Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: first-years and sophomores
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

**HSCI 240 (F) Great Astronomers and Their Original Publications** (WS)

**Cross-listings:** ASTR 240  STS 240  HSCI 240  LEAD 240

**Secondary Cross-listing**

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams's Chapin Library of rare books, and facsimiles or digital copies will be provided for remote learning. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the *Gutenberg Bible* (c. 1450) and a Shakespeare *First Folio* (1623, with a discussion of astronomical references in Shakespeare's plays). We evaluate a trove of books and papers about historic transits of Venus. We discuss matters of fraud and authenticity, especially the case of a purported *Sidereus Nuncius*, shown to be a modern construction. The course will be taught in collaboration between an astronomer and a rare books librarian, with remote lectures by experts from around the world.

**Class Format:** Meeting on campus in the Chapin Library classroom (Sawyer 452) or remotely; students who are not on campus can visit the original books at a later time/year.

**Requirements/Evaluation:** class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** if overenrolled, preference by written paragraph of explanation of why student wants to take the course
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option

Secondary Cross-listing
A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zaprunder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Requirements/Evaluation: biweekly 5-page papers, participation in discussions, and a 15-page final paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy

HSCI 338  (F)  Transhumanism: Religion, Technoscience, Obsolescence
Cross-listings: HSCI 338  SOC 338  STS 338  REL 338
Secondary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the transhumanist movement and its overriding aims: the augmentation, transformation, and eventual transcendence of human biological constitution; the realization, through speculative technoscientific means, of an enhanced or even "postbiological existence"—a "posthuman condition," "Humanity 2.0." Through close readings of primary historical documents, transhumanist texts, scholarship on transhumanism, works of science-fiction film, literature, and popular culture, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas and practices have emerged, circulated, and taken up residence. To that end, we will consider the ties of transhumanism to eugenics and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of beliefs, practices, and forms of association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about religion, technology, embodiment, and ways of being human.

Class Format: Remote

Requirements/Evaluation: informal weekly writing, two short review essays, and one 15-page seminar paper

Prerequisites: Prior coursework in sociology-anthropology, history, religion, or science and technology studies.

Winter Study

HSCI 99 (W) Indep Study: History of Science

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar’s deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

INTR 219 (F) Women and Girls in (Inter)National Politics (DPE)

Cross-listings: AFR 217 PSCI 219 INTR 219 WGSS 219 LEAD 219

INTR 220 (S) Cold War Intellectuals: Civil Rights, Writers and the CIA (DPE)

Cross-listings: AFR 224 PSCI 221 AMST 201 LEAD 220 INTR 220

Primary Cross-listing

This tutorial focuses on US-based views of the Cold War. It examines how intelligence agencies and intellectuals, as well as government officials, viewed civil rights, human rights, and US hegemony. Readings include: Williams J. Maxwell (F. B. Eyes: How J. Edgar Hoover’s Ghostreaders Framed African American Literature); James Baldwin (The Fire Next Time); Ralph Ellison (The Collected Essays of Ralph Ellison); Report to the President by the Commission on CIA Activities Within the United States (1975, VP Nelson Rockefeller, chair); Hugh Wilford (The Mighty Wurlitzer: How the CIA Played America); Hannah Arendt (The Origins of Totalitarianism; On Violence; “Reflections on Little Rock”); Frances Stonor Saunders (Who Paid the Piper? The CIA and the Cultural Cold War). Students alternate weekly between 5-page primary and 2-page secondary papers on assigned readings.

Requirements/Evaluation: Attend all classes; submit completed papers 24 hours before seminar meets.

Prerequisites: none

Enrollment Limit: 10
**Enrollment Preferences:** Juniors and Seniors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cfllc.williams.edu/italian.

**RLIT 101 (F)  Elementary Italian**

This course is designed for beginners. Its goal is to give students the opportunity to develop a basic oral/aural and reading/writing proficiency in Italian. During the semester you will be given training in grammar, pronunciation, aural-oral skills, reading and writing in Italian through the study of a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, to describe your family, your town, your friends and to discuss about your interests. You will also be able to talk in Italian about present and past events and to converse with your peers about your daily activities. Your listening skills will allow you to understand short dialogues and conversations, to watch clips from mainstream Italian films, and to write short compositions. *Conducted entirely in Italian.* This will be an online course, with a mix of synchronous and asynchronous elements. Students will meet twice a week with me and once a week with the TA in small groups of 4-6 students.

**Class Format:** five hours a week with the professor  
**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams  
**Prerequisites:** none; not open to those who have had one year or more of high school Italian  
**Enrollment Limit:** 12  
**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams  
**Expected Class Size:** 12  
**Grading:** no pass/fail option, no fifth course option  
**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken  
**Distributions:** (D1)

Fall 2020  
SEM Section: R1  M-F 1:30 pm - 2:20 pm  Michele Monserrati

**RLIT 102 (S)  Elementary Italian**

This course is designed for beginners who have already some basic knowledge of Italian. Its goal is to give students the opportunity to review and expand their oral/aural and reading/writing proficiency in Italian. During the semester you will continue to learn grammar, vocabulary, pronunciation, while improving your aural-oral skills, reading and writing in Italian. To achieve these goals, you will be presented with a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, your life, to describe your town and its history, your dreams and interests, and to express your opinion on complex topics. You will also be able to talk in Italian about present, past, and future events and to express doubts and hopes. You will be able to understand more complex conversations and clips from mainstream Italian films, and to write longer compositions. *Conducted entirely in Italian.*

**Class Format:** five hours a week with the professor  
**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams  
**Prerequisites:** RLIT 101; not open to those who have had one year or more of high school Italian  
**Enrollment Limit:** 20
Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

RLIT 105 (F) Pathway to Proficiency

The course taught in Italian aims primarily at fine-tuning the student's speaking, reading and writing ability, while providing an introduction to the formal study of Italian culture and society through the analysis of short literary texts, articles, films, and plays. This course will also offer an exploration of Italy's lesser-known cultural and natural sites in an attempt to highlight what Italy has to offer in terms of eco-friendly and sustainable tourism and cultural diversity. In the wake of the Black Lives Matter's quest for social justice, a part of this course will be dedicated to Italian black writers and artists to explore how the Italian colonial past is affecting Italy's racial discourse and the construction of its national identity. Students will review and expand the grammar structures learned in the previous semesters to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. This will be an online course, with a mix of synchronous and asynchronous elements. Students will meet twice a week in small groups of 4-6 students. Students will have the option to practice oral communication through 30-minute weekly conversations with native speakers available on the online platform Talkabroad.

Requirements/Evaluation: oral presentations, midterm and final exams, tests, compositions, participation

Prerequisites: RLIT 101/102 or by permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Students from 101/102 classes, as well as study-abroad returnees.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

- Scott Wong, Charles R. Keller Professor of History

Visitors:
- Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies
- Eun Young Seong, Visiting Assistant Professor of Japanese
- Kaoruko Minamoto, Visiting Lecturer in Japanese
- Chen Wang, Visiting Assistant Professor of Chinese

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Japanese Major

The Japanese major consists of a core language curriculum and a variety of interdisciplinary courses offered in the Asian Studies Department. In the Japanese language courses, students attain linguistic and cultural proficiency from the elementary through the advanced level. The interdisciplinary courses are designed to deepen students’ understanding of and familiarity with diversity and dynamicity in Japanese culture.
Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL intermediate-high to advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Conduct research by engaging in cross-linguistic, cross-cultural, and comparative historical analysis with problem-solving and critical thinking skills.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

Due to the Covid-19 pandemic: the Chinese and Japanese programs have decided it would be best to reduce the number of courses required for their respective majors to nine for the graduating classes of 21, 22, and 23. Requirements are as follows:

Eight semesters of Chinese or Japanese language (at least four of them should be 300-level or higher). For Chinese one additional course, Chinese 312 (Classical Chinese) is required. In Japanese, one faculty-approved elective is also required. For students with higher language proficiency who are placed out of any of the core language courses (101 through 402), they can take an equal number of faculty-approved electives taught either in Chinese or Japanese or English on literature, linguistics, culture studies or related China or Japanese studies disciplines (e.g., art history, history, political science) to fulfill the core language requirement. The Asian Studies major is also reduced to nine for the classes of 21, 22, 23. The requirements are:

- Four semesters of Chinese or Japanese, a faculty-approved three course disciplinary qualification, one comparative Asian Studies course, and one Asian Studies elective, which can include further language study.
- We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Japanese are indicated below:

Japanese Major

- Four additional semesters of Japanese language (300-level or higher).
- One approved course in Japanese language (400-level), literature or culture.
- One approved elective on Japan.

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.
FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

THE DEGREE WITH HONORS
Students interested in writing an honors thesis in Japanese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for JAPN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT
The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

JAPN 101  (F)  Elementary Japanese
An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of “act” classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and “fact” classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: daily classroom performance, homework, quizzes, a midterm, and a final exam
Prerequisites: none
JAPN 102 (S) Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used to facilitate learning. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily classroom performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 101

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

JAPN 131 (F) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25
JAPN 201 (F) Intermediate Japanese
This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 101-102 or permission of instructor
Enrollment Limit: 10
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

JAPN 220 (S) Being Korean in Japan
Cross-listings: JAPN 220 ASST 220
Primary Cross-listing
Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore
little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

**Requirements/Evaluation:** active participation in the class discussion, weekly reaction paper, quiz, final paper

**Prerequisites:** none

**Enrollment Limit:** none

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**JAPN 223 (S) Japanese Food Culture in a Global Context**

**Cross-listings:** JAPN 223 COMP 223

**Primary Cross-listing**

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

**Requirements/Evaluation:** active class participation, three response papers, two small projects (including descriptions and class presentations), and one research paper and presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

**JAPN 258 (S) Language and Literacy Development**

**Cross-listings:** PSYC 258 JAPN 258

**Primary Cross-listing**

Language is uniquely a human function and fundamental to one’s participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How “natural” is it to learn to read?

**Requirements/Evaluation:** active participation in the class discussion, weekly reaction paper, quiz, final paper
JAPN 260  (F)  Japanese Theatre and its Contemporary Context

Cross-listings:  THEA 262  COMP 262  JAPN 260

Primary Cross-listing

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, “of what relevance is each to a contemporary audience?” Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: discussion

Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course

Prerequisites:  none

Enrollment Limit:  10
Enrollment Preferences:  Japanese majors

**JAPN 406 (F) Advanced Japanese: JLPT 1, 2 or 3**

This course is for advanced students, especially for those who would aim to pass Level 1, 2, or 3 of the Japanese Language Proficiency Test (JLPT) offered by the Japan Foundation and Japan Educational Exchanges and Services. JLPT not only measures examinees' skill level, but has been used as a form of qualification, and also often for employment screening and evaluation. Students will work on all five areas of chôkai (listening comprehension), dokkai (reading comprehension), bunpô (grammar), goi (vocabulary) and kanji, based on their skill level.

**Requirements/Evaluation**: daily preparation and in-class performance, a weekly journal, and taking the JLPT exam suited to your level in December

**Prerequisites**: any one of Japanese 300- or 400-level courses or permission of instructor

**Enrollment Limit**: 5

**Expected Class Size**: 4

**Grading**: yes pass/fail option, yes fifth course option

**Distributions**: (D1)

Not offered current academic year

**JAPN 407 (F) An Exploration of Japanese Language and Culture**

**Cross-listings**: JAPN 407 ASST 207

**Primary Cross-listing**

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech,
youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

**Requirements/Evaluation:** attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

**Prerequisites:** none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective Japanese, Chinese, and Asian Studies majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

Winter Study ---------------------------------------

JAPN 31 (W) Senior Thesis: Japanese
To be taken by all students who are candidates for honors in Japanese.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year

JAPN 88 (W) Japanese Sustaining Program
Students registered for JAPN 101-102 are required to attend and pass the Japanese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program. Check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation
Prerequisites: Japanese 101
Grading: pass/fail option only
Materials/Lab Fee: one Xerox packet

Not offered current academic year

JAPN 99 (W) Independent Study: Japanese
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
JEWISH STUDIES (Div II)
Chair: Professor Edan Dekel

Advisory Committee

- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; affiliated with: Religion Department
- Alexandra Garbarini, Professor of History
- Jeffrey I. Israel, Associate Professor of Religion; on leave Fall 2020

THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

Gateway Courses (can also count as core courses):
REL 201 / COMP 201 / JWST 201 The Hebrew Bible
  Taught by: Edan Dekel
  Catalog details
REL 203 / JWST 101 Judaism: Before The Law
  Taught by: Jeffrey Israel
  Catalog details

Core Courses
ANTH 334 / COMP 334 / JWST 334 / REL 334 Imagining Joseph
  Taught by: Peter Just
  Catalog details
ARAB 363 / JWST 268 / REL 268 / COMP 363(F) Where are all the Jews?
  Taught by: Brahim El Guabli
  Catalog details
HIST 230 / JWST 230 Modern European Jewish History, 1789-1948
  Taught by: Alexandra Garbarini
  Catalog details

REL 202 / JWST 202 / COMP 214 Moses: Stranger in a Strange Land
  Taught by: Edan Dekel
  Catalog details
REL 205 / CLAS 205 / JWST 205 / COMP 217 Ancient Wisdom Literature
  Catalog details
Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

**CRHE 101** Elementary Hebrew
Taught by: TBA
Catalog details

**CRHE 102** Elementary Hebrew
Taught by: TBA

**REL 330 / PSCI 375 / JWST 492** Modern Jewish Political Theory
THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

Croghan Professorship

Each year, in addition to the regular course offerings listed above, Williams sponsors the Croghan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity.

OVERSEAS STUDIES

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad program towards up to two core requirements.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Gateway course and Capstone course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

FUNDING

The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman ’50, Samuel Bronfman II ’75, and Matthew Bronfman ’80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College’s formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener ’56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener ’56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.
JWST 101  (F)  Judaism: Before The Law

Cross-listings:  REL 203  JWST 101

Secondary Cross-listing

This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Kafka's *The Trial* with his parable "Before The Law," Woody Allen's film *Crimes and Misdemeanors*, and ethnographic accounts of contemporary Jewish observance. *All readings will be in translation.*

JWST 201  (F)  The Hebrew Bible

Cross-listings:  JWST 201  COMP 201  REL 201

Secondary Cross-listing

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

JWST 202  (S)  Moses: Stranger in a Strange Land

Cross-listings: COMP 214  REL 202  JWST 202

Secondary Cross-listing

As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

JWST 205  (S)  Ancient Wisdom Literature

Cross-listings: JWST 205  CLAS 205  COMP 217  REL 205
Secondary Cross-listing

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible’s canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod’s Works and Days, Aesop’s fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin’s Poor Richard’s Almanack. All readings are in translation.

JWST 206 (S) The Book of Job and Joban Literature

Cross-listings: REL 206 JWST 206 COMP 206

Secondary Cross-listing

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man’s struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka’s The Trial, Archibald MacLeish’s J.B., Robert Frost’s “Masque of Reason,” Carl Jung’s Answer to Job, and William Blake’s Illustrations to the Book of Job. All readings are in translation.

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to some continuations of these variant traditions in medieval literature, with particular attention to the material on the figures of Cain and Noah. All readings are in translation.

Class Format: For the fall of 2020, this course will be taught online. The seminar will meet the regularly scheduled time twice a week.

JWST 209 (S) Jewish America
Cross-listings: REL 209 JWST 209
Secondary Cross-listing
Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like The Jazz Singer (1927 and 1980), Exodus and Annie Hall; read John Updike's Bech: A Book, Philip Roth's Operation Shylock or Cynthia Ozick's The Puttermesser Papers; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's Dearborn Independent, the Menorah Journal or Commentary; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of Bridget Loves Bernie, Northern Exposure and Curb Your Enthusiasm. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.
Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

JWST 219  (S) Judaism Under Ancient Greek and Roman Imperialisms

Cross-listings: CLAS 219  REL 219  JWST 219

Secondary Cross-listing

How did ancient Greek and Roman empires shape the beginnings of Judaism? In this course, we will examine how Greek and Roman imperial systems of identity, ethnicity, law, religion, and knowledge affected Judaism as a religious and cultural system. We will pay particular attention to the ways that Jews/Judeans responded to these imperial pressures, especially as those responses articulated “hybrid” versions of Judaism that were informed both by resistance to imperial centers as well as the sheer hegemony of those cultural systems. The course thus uses (and introduces students to) postcolonial theory to study the history of Judaism under Greek and Roman empires. Readings for this course will include a wide array of ancient Jewish works, such as the books of Maccabees, Flavius Josephus, Philo of Alexandria, the Dead Sea Scrolls, and the Mishnah. The course will also include select readings from early Christian texts and postcolonial theory.

JWST 222  (F) The Jewish Art of Interpretation

Cross-listings: JWST 222  REL 222  COMP 211

Secondary Cross-listing

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain “everything” within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will
develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

**Cross-listings:** HIST 230 JWST 230

**Secondary Cross-listing**

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

**Class Format:** discussion

**JWST 249** (F) Anti-Semitism (DPE)

**Cross-listings:** JWST 249 REL 249

**Secondary Cross-listing**

This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews,
Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

**Requirements/Evaluation:** three short papers (4-5 pages), one longer final paper (6-8 pages)

**JWST 259 (S) Ethics of Jewish American Fiction**

**Cross-listings:** ENGL 259 REL 259 JWST 259

**Secondary Cross-listing**

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

**Requirements/Evaluation:** class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

**Prerequisites:** none

**Cross-listings:** REL 268 ARAB 363 JWST 268 COMP 363

**Secondary Cross-listing**

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance
Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Class Format: The course will be offered both in-person and remotely. Students enrolled remotely are required to watch the recorded videos of the in-person sessions in order to stay abreast of the discussions that take place in the classroom and enrich their engagement with the materials assigned in the course.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 268 (D2) ARAB 363 (D1) JWST 268 (D2) COMP 363 (D1)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

JWST 280  (F) Art at its Limits: Representing the Holocaust  (DPE) (WS)

Cross-listings: COMP 280  JWST 280  GERM 280

Secondary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman’s graphic novel Maus really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Róśewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Taranino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.
**Requirements/Evaluation:** three 2-page critical responses, oral presentation, final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** German and Comparative Literature majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

**Writing Skills Notes:** Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

**JWST 289 (S) The Talmud on What it Means to be Human**

**Cross-listings:** REL 289 JWST 289

**Secondary Cross-listing**

The Talmud, a central text in Judaism, is one of the richest and most sophisticated works of literature and thought ever produced. In this course, students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud theorizes and prescribes a certain type of bodily self in its rereading of the Biblical laws of purity and impurity. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary questions regarding the self and its making.

**Requirements/Evaluation:** 1-2 page weekly papers, final essay, participation

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Religion majors, Jewish Studies students

**Expected Class Size:** 8

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01 TBA Phillip J. Webster

**JWST 334 (S) Imagining Joseph**

**Cross-listings:** REL 334 JWST 334 COMP 334 ANTH 334

**Secondary Cross-listing**

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and
Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: 3- to 5-page weekly response papers; 15-page final paper; class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: based on responses to a questionnaire

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

JWST 338 (F) The History of the Holocaust

Cross-listings: HIST 338  JWST 338  REL 296

Secondary Cross-listing

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

Class Format: mostly discussion

Requirements/Evaluation: class participation, weekly reading responses, a map quiz, two papers (5-7 pages) on class readings, a final research paper (10-12 pages)

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History majors and Jewish Studies concentrators

JWST 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: PSCI 339  JWST 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through--and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the
Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities--as some recent commentators have--that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

**Requirements/Evaluation:** five 5-page papers; five 2-page responses; a final revision of a prior paper; participation

**Prerequisites:** a prior course in political theory, philosophy, or critical theory, or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Political Theory concentrators, Political Science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**JWST 434 (S) The Meaning of Diaspora and the Jews of Europe** (WS)

**Cross-listings:** REL 335 HIST 434 JWST 434

**Secondary Cross-listing**

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews¿ diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students¿ work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

**Requirements/Evaluation:** class participation, several short papers, oral presentations, and a 20-page research paper

**Prerequisites:** none

JWST 490 (S) Memory, History, and the Extermination of the Jews of Europe (WS)

Cross-listings: HIST 490 JWST 490

Secondary Cross-listing

This course is about the postwar legacy of the Holocaust. Nazi Germany’s extermination of European Jews has come to be a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and
adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.

**Class Format:** tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

**Requirements/Evaluation:** Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written exercise is a thought piece on the issues raised in the tutorial to cap off the semester's work.

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**JWST 492 (S) Modern Jewish Political Theory**

**Cross-listings:** JWST 492 PSCI 375 REL 330

**Secondary Cross-listing**

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of “Jews” and “Judaism” in these arguments. And we will ask persistently: what constitutes a “Jewish justification” for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

**Requirements/Evaluation:** six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

**Prerequisites:** none

Advisory Committee

- Melissa J. Barry, Professor of Philosophy
- Justin Crowe, Chair of Leadership Studies and Associate Professor of Political Science; affiliated with: Leadership Studies Program
- Sara Dubow, Associate Dean of the Faculty, Professor of History; affiliated with: History Department
- William M. Gentry, Professor of Economics
- Nimu Njoya, Lecturer in Political Science
- James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
- Cheryl Shanks, Professor of Political Science

Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

THE CONCENTRATION

The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Other courses, not listed below, may be approved by the Chair.

Students may declare a program concentration at any point during their academic career.

Senior Seminar

In 2018-19, the senior seminar will be *The Unwritten Constitution* taught by Professor Hirsch.

JLST 101 (S) Introduction to Justice and Law

This course will examine various aspects of America’s legal system, including its historical and constitutional underpinnings; the processes of resolving disputes, e.g., trials, plea-bargaining, and civil settlement; and the roles of diverse participants in the system, e.g., judges, jurors, litigants, lawyers, and legislators. The course will emphasize the deeply interdisciplinary nature of law, exploring the law’s intersections with politics, history, economics, anthropology, statistics, psychology, philosophy, art, sports, science, religion, and cyberspace.

Class Format: lecture-discussion

Requirements/Evaluation: three papers, a final exam, and class participation; attendance is mandatory; Williams’ honor code applies to all assignments

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)
JLST 272 (F) Free Will and Responsibility (WS)

Cross-listings: PHIL 272 JLST 272

Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

IND Section: 01 TBA Alan Hirsch

JLST 401 (S) The Unwritten Constitution

"The eight thousand words of America's written constitution only begin to map out the basic ground rules that actually govern our land." So begins Akhil Amar's book *America's Unwritten Constitution*. Amar recasts the debate over whether America has a "living Constitution," a debate usually revolving around whether change in constitutional meaning requires resort to the formal amendment process or can be achieved through judicial interpretation. Amar supports the latter view, but proposes something far-reaching: history itself effectively amends the Constitution. Thus, for
example, he argues that speeches by Martin Luther King and precedents set by George Washington, as well as the daily activities and assumptions of ordinary Americans, have become constitutional subtext requiring consideration when we interpret the Constitution. Is that notion convincing? Preposterous? A healthy way of understanding the inevitable intersection of law, history, and politics? A transparent excuse to read one's own views into the Constitution? Through a careful reading of Amar, and other important constitutional theorists, we will probe different ways of thinking about the supreme law of the land.

Requirements/Evaluation: three papers and class participation

JLST 403 (S) Senior Seminar in Human Rights in International Politics and Law
Cross-listings: JLST 403 PSCI 420 PSCI 422

Secondary Cross-listing
The idea that all humans have rights simply because they are human-independent of anything they might do or achieve-has transformed local and international politics, probably permanently. This concept's place in international politics, its strengths and limitations, depend on how people use it. Beginning with the 18th-century's transatlantic movement to abolish slavery, we will examine international movements and institutions that have affected what human rights mean, to whom, and where. Readings draw on philosophy, history, sociology, and international relations, but as a political science class we emphasize politics. Who benefits from the idea of universal human rights? Who loses? How does this idea about individual value liberate and entrap? Does this idea ultimately reinforce American hegemony, or plant the seeds of a non-American order?

Requirements/Evaluation: three lead essays, three critique essays, and one final essay
Prerequisites: PSCI 202, senior standing, permission of instructor
Enrollment Limit: 18

CLASSICS (Div I)

LATIN

Chair: Professor Edan Dekel

- Nicole G. Brown, Assistant Professor of Classics; on leave 2020-2021
- Kerry A. Christensen, Garfield Professor of Ancient Languages; on leave Fall 2020
- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; affiliated with: Religion Department
- Morgan V. King, Visiting Assistant Professor of Classics
- Sarah E. Olsen, Assistant Professor of Classics
- Amanda R. Wilcox, Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY
We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

CLLA 101 (F) Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid’s *Metamorphoses*) and prose (e.g., Piny’s *Letters*).

Class Format: For Fall 2020, this course will use hybrid instruction, with synchronous meetings for both in-person and remote students (at the regularly scheduled times), video lectures, and online submissions.

Requirements/Evaluation: frequent quizzes, classroom exercises, two midterms, a final project

Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

Enrollment Limit: 15
Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken

Distributions: (D1)

Fall 2020

LEC Section: H1   MWF 12:00 pm - 12:50 pm   Morgan V. King

CLLA 102 (S) Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and prose (e.g., Piny's Letters).

Class Format: recitation/discussion

Requirements/Evaluation: frequent quizzes, tests, classroom exercises, and a final exam

Prerequisites: CLLA 101 or permission of department

Enrollment Limit: 18

Enrollment Preferences: Students who have completed CLLA 101

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken

Distributions: (D1)

Spring 2021

LEC Section: 01   TBA   Amanda R. Wilcox

CLLA 201 (F) Intermediate Latin: The Late Republic

In this course we will read selections from Cicero's fiery speeches against Mark Antony, the political heir apparent to Julius Caesar after his assassination. We will pair Cicero's prose with selections from the poetry of Catullus, including verses targeting Caesar and his friends. As we read, we will review the fundamentals of Latin grammar and work towards reading fluency in Latin and a better appreciation of linguistic nuance. Moreover, these texts reflect and directly intervene in one of the most tumultuous periods of Roman history. By examining these texts also as evidence for the culture and politics of their time, we will consider the nature of political resistance in late Republican Rome, and investigate the wider cultural assumptions about gender, power, and community that these verbal attacks reveal.

Class Format: For Fall 2020, this course will use hybrid instruction, with synchronous meetings for both in-person and remote students (at the regularly scheduled times)

Requirements/Evaluation: classroom performance, quizzes, short written assignments, a final project

Prerequisites: CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

Enrollment Limit: 12

Enrollment Preferences: Classics majors and prospective majors

Expected Class Size: 6-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2020

LEC Section: H1   MWF 10:40 am - 11:30 am   Morgan V. King
CLLA 302  (S)  Vergil's "Aeneid"
This course is a comprehensive introduction to Vergil's Aeneid. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem's literary, social, and political dimensions with special attention to Vergil's consummate poetic craftsmanship.

Class Format: discussion/recitation
Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites:  CLLA 201 or permission of instructor
Enrollment Limit:  12
Expected Class Size:  10
Grading:   yes pass/fail option,   yes fifth course option
Distributions:   (D1)

Spring 2021
SEM Section:  01    TBA    Edan Dekel

CLLA 403  (S)  The Invention of Love: Catullus and the Roman Elegists
This course will explore the development of Latin love poetry in the first century BCE. Beginning with Catullus, we will examine the influence of Greek lyric poetry on the evolution of the genre as well as Roman attitudes toward love exhibited in other literature of the Late Republic. We will then turn to the full development of the elegiac form in the love poems of Propertius, Tibullus, and Sulpicia. Finally, we will explore the transformation of the genre in Ovid's Amores. The goal throughout is to investigate the conventions, innovations, and problems of expressing personal desire and longing amid the social and political upheaval of the transition from Republic to Principate.

Class Format: discussion/recitation
Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam
Prerequisites:  CLLA 302 or permission of instructor
Enrollment Limit:  12
Enrollment Preferences: Classics majors
Expected Class Size:  10-12
Grading:   yes pass/fail option,   yes fifth course option
Distributions:   (D1)

Spring 2021
LEC Section:  01    TBA    Morgan V. King

CLLA 406  (F)  Horace's Odes
This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites:  CLLA 302 or permission of instructor
Enrollment Limit:  15
Enrollment Preferences: Classics majors
Expected Class Size:  10
Grading:   yes pass/fail option,   yes fifth course option
Distributions: (D1)

Not offered current academic year

CLLA 407  (F)  Caesar and Cicero

The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries and Cicero's speeches and correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

Class Format: discussion

Requirements/Evaluation: class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper

Prerequisites:  CLLA 302 or permission of instructor

Enrollment Limit:  12

Expected Class Size:  6-9

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Not offered current academic year

CLLA 408  (F)  Roman Comedy

The comic plays that still survive all had their first productions within roughly forty years between 200 and 160 BCE, as Rome rapidly expanded its military, economic, and political reach beyond the Apennine peninsula. They present critically important evidence for how Roman literature and cultural identity developed in the second century, and they document formulas for slapstick action and low-brow jokes that remain in use even today. Staged in Greek costume and featuring ostensibly Greek characters, the comedies revel in mocking stereotypical Roman values but ultimately reassert them. Sometimes what the Romans found funny is all too familiar; sometimes it’s shocking. Our main focus will be on the Mostellaria of Plautus, often translated as "The Haunted House." Characteristic of its genre, the Mostellaria focuses on generational conflict within a household, especially between father and son. To enrich our conversation, we will read several other comedies in translation as well as selected scholarly investigations of this play, its genre, and the historical context.

Class Format: Discussion/recitation. For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice per week.

Requirements/Evaluation: Evaluation will be based on class participation, several written assignments of varying length, and possibly short quizzes as well as a midterm exam and a final exam and/or essay.

Prerequisites:  CLLA 302 or permission of instructor

Enrollment Limit:  12

Expected Class Size:  8-10

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Fall 2020

SEM Section: R1    TF 3:15 pm - 4:30 pm     Amanda R. Wilcox

CLLA 409  (S)  Seneca and the Self

This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the
personae theory of Panaetius as transmitted by Cicero’s De Officiis. Moreover, we will read and discuss reflections on selfhood from some of Seneca’s most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

**Requirements/Evaluation:** class participation, several short written and oral assignments, midterm and final exams, and a final paper

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**CLLA 414 (F) Vergil’s Eclogues and Georgics**

This course will explore the two major works of Vergil that precede the Aeneid: the Eclogues, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the Georgics, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship.

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**CLLA 415 (S) Ovid’s Metamorphoses**

This course will explore Ovid's greatest work, an epic poem in fifteen books entitled Metamorphoses. Ovid's poem narrates the story of the world from its beginning down to his own day, the reign of Augustus, via a series of tales closely woven together through the theme of change. We will translate and discuss large portions of the Latin text along with selections from contemporary scholarship in order to consider the poem in its original political and cultural context as well as its relationship to earlier models and its post-classical reception.

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**Winter Study**

**CLLA 99 (W) Independent Study: Latin**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
LATINA/O STUDIES (Div II)
Chairs: Professor María Elena Cepeda & Professor Carmen Whalen

- Maria Elena Cepeda, Chair and Professor of Latina/o Studies; affiliated with: Women, Gender & Sexuality Stdy, American Studies Program
- C. Ondine Chavoya, Professor of Art; affiliated with: Latina/o Studies Program
- Jacqueline Hidalgo, Associate Dean for Institutional Diversity, Equity and Inclusion, Professor of Latina/o Studies and Religion; affiliated with: Religion Department, Latina/o Studies Program
- Roger A. Kittleson, Professor of History; affiliated with: Latina/o Studies Program
- Nelly A. Rosario, Associate Professor of Latina/o Studies; on leave 2020-2021
- Alberto Sandoval-Sanchez, Bennett Boskey Visiting Professor
- Eddy Sandoval, Gaius Charles Bolin Fellow in Latina/o Studies
- Carmen T. Whalen, Carl W. Vogt '58 Professor of History, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion; affiliated with: The Davis Center, VP-InstDivrstyEquty&Inclusion, Latina/o Studies Program

Latina/o Studies is an interdisciplinary and comparative field of study that explores the histories, representations, and experiences of Latinas and Latinos in the United States. Latinas and Latinos include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as more recent migrations from a wide variety of Central and South American countries. Courses, most of which use a comparative approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest growing populations in the contemporary era, provides an opportunity to explore complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION

The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:

One of the following 400-level seminars:

LATS 408 / AMST 408 Envisioning Urban Life: Objects, Subjects, and Everyday People
Taught by: Mérida Rúa
Catalog details

LATS 409 / WGSS 409 / AMST 411(S) Transnationalism and Difference: Comparative Perspectives
Taught by: María Elena Cepeda
Catalog details

LATS 420 / ENVI 421 Latinx Ecologies
Taught by: Jacqueline Hidalgo
Catalog details

LATS 428(F) Performing Latina/o Cultural Citizenship
Taught by: Alberto Sandoval-Sanchez
Catalog details

LATS 471 / HIST 471 Comparative Latina/o Migrations
Taught by: Carmen Whalen
Catalog details

Two of the following core electives:

HIST 385 / LATS 385(S) Latinx Politics in New York City and Beyond
Taught by: Carmen Whalen
Catalog details
LATS 112 Caribbean Diasporic Aesthetics: An Introduction
Taught by: Sebastian Perez
Catalog details
LATS 114 / AMST 114 Caravans and Narcos: U.S. Media Narratives about Central and South America
Taught by: Maria Elena Cepeda
Catalog details
LATS 203 / ARTH 203 / WGSS 203 / AMST 205(S) Chicano/a/x Film and Video
Taught by: C. Ondine Chavoya
Catalog details
LATS 220 / AMST 221 / ENV 221 Introduction to Urban Studies: Shaping and Living the City
Taught by: Merida Rua
Catalog details
LATS 222 / ENGL 252 Ficciones: A Writing Workshop
Taught by: Nelly Rosario
Catalog details
LATS 224 / AMST 224 / REL 224 U.S. Latinx Religions
Taught by: Jacqueline Hidalgo
Catalog details
LATS 228 / REL 223 / AFR 228 / AMST 228 Revolt and Revelation in 20th-Century Americas
Taught by: Jacqueline Hidalgo
Catalog details
LATS 232 / ENGL 232 People in the Stacks: Democracy and Literatures of Archives
Taught by: Nelly Rosario
Catalog details
LATS 234(S) From Conga to Hip Hop: Center-staging Latinidades on Broadway
Taught by: Eddy Sandoval
Catalog details
LATS 240 / COMP 210 / AMST 240 Latina/o Language Politics: Hybrid Voices
Taught by: Maria Elena Cepeda
Catalog details
LATS 246 / AMST 246 Aesthetics and Place-making in Latina/o New York
Taught by: Sebastian Perez
Catalog details
LATS 252 / AMST 252 Puerto Rico and Its Diaspora
Taught by: Merida Rua
Catalog details
LATS 286 / HIST 286(S) Conquests and (Im)migrations: Latina/o History, 1848 to the Present
Taught by: Carmen Whalen
Catalog details
LATS 312 / AMST 312 / ENVI 313 Chicago
Taught by: Merida Rua
Catalog details
LATS 313 / AMST 313 / WGSS 313 / AFR 326(S) Gender, Race, and the Power of Personal Aesthetics
Taught by: Maria Elena Cepeda
Catalog details
LATS 316 The Graphic Narrative: A "Global South" Perspective
Taught by: TBA
Catalog details
LATS 320 The Latina/o AIDS Archive: A Cultural Recovery and Revisionary Project in Progress
Taught by: Alberto Sandoval-Sanchez
Catalog details
LATS 330 DNA + Latinx: Decoding the "Cosmic Race"
Taught by: Nelly Rosario
Catalog details
LATS 335(S) Contemporary Immigration Landscapes
Taught by: Eddy Sandoval
Catalog details
LATS 338 / WGSS 338 / AMST 339 Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality
Taught by: Maria Elena Cepeda
Catalog details
LATS 340 U.S. Afro-Latinidades
Taught by: Shantee Rosado
Catalog details
LATS 346 / AMST 346(F) Latinas/os and the Media: From Production to Consumption
Taught by: Maria Elena Cepeda
Catalog details
LATS 348 / AMST 348 / COMP 348 Graphic Narratives as Democratic Ideals
Taught by: Nelly Rosario
Catalog details

LATS 358 / ARTH 358 Latinx Installation and Site-Specific Art
Taught by: C. Ondine Chavoya
Catalog details

LATS 386 / HIST 386 / WGSS 386 Latinas in the Global Economy: Work, Migration, and Households
Taught by: Carmen Whalen
Catalog details

One additional related course from either of the following subcategories OR from the core electives above:

Countries of Origin and Transnationalism

AFR 248 / HIST 248 The Caribbean: From Slavery to Independence
Taught by: Shanti Singham
Catalog details

ARTH 210 Intro to Latin American and Latina/o Art: Contradictions & Continuities, Postcolonial to the Present
Taught by: Mari Rodriguez Binnie
Catalog details

ARTH 440 / LATS 440 Contemporary Exhibitions: Los Angeles and Latin America
Taught by: C. Ondine Chavoya
Catalog details

HIST 143(F) Soccer and History in Latin America: Making the Beautiful Game
Taught by: Roger Kittleson
Catalog details

HIST 243 Modern Latin America, 1822 to the Present
Taught by: Roger Kittleson
Catalog details

HIST 346 / AFR 346 Modern Brazil
Taught by: Roger Kittleson
Catalog details

HIST 347(S) Democracy and Dictatorship in Latin America
Taught by: Roger Kittleson
Catalog details

HIST 492 T Revolutionary Thought in Latin America
Taught by: Roger Kittleson
Catalog details

LATS 114 / AMST 114 Of Caravans and Narcos: U.S. Media Narratives about Central and South America
Taught by: Maria Elena Cepeda
Catalog details

PSCI 266 The United States and Latin America
Taught by: James Mahon
Catalog details

PSCI 349 T Cuba and the United States
Taught by: James Mahon
Catalog details

PSCI 352 / GBST 352(F) Politics in Mexico
Taught by: James Mahon
Catalog details

RLSP 274 / WGSS 275 / COMP 286 Women's Contemporary Cultural Production in Latin America
Taught by: Roxana Blancas Curiel
Catalog details

WGSS 337 / ANTH 337 Race, Sex & Gender in Brazil
Taught by: Gregory Mitchell
Catalog details
Comparative Race and Ethnic Studies

Students can check with the program chair to see if other courses not listed here might count as electives.

AFR 200(F, S) Introduction to Africana Studies
  Taught by: VanNatta Ford, Neil Roberts
  Catalog details

AMST 403 / AFR 333 / LATS 403 New Asian American, African American, Native American, and Latina/o Writing
  Taught by: Dorothy Wang
  Catalog details

ARTH 462 / AMST 462 / LATS 462 / ARTH 562(F) Art of California: Pacific Standard Time
  Taught by: C. Ondine Chavoya
  Catalog details

HIST 380(F) Comparative American Immigration History
  Taught by: Scott Wong
  Catalog details

WGSS 240 / SOC 240 / AMST 241 / LATS 241 / THEA 241(S) Performing Masculinity in Global Popular Culture
  Taught by: Gregory Mitchell
  Catalog details

THE DEGREE WITH HONORS

Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by her/his advisor and two other faculty readers. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

The honors project will be completed over one semester plus winter study. It may consist of a conventional research thesis of 40-70 pages or of other forms of presentation (e.g., video, art, theater). It may also combine a shorter research thesis with another medium.

To be accepted as a candidate for honors in Latina/o Studies, a student must meet these criteria:

Submit and earn approval of a project proposal in April of the junior year. The proposal should be no longer than 5 pages and should lay out the project’s aim and methodology, identify the student’s advisor for the work, and include evidence of competence in the necessary media for projects that include non-thesis forms.

Achieve a grade point average generally of at least 3.33 in LATS courses at the time of application.

Students admitted to the honors program must submit a 5-to 8-page revised proposal, with an annotated bibliography, by the second week of classes in the fall semester of her/his senior year. They should register either for LATS 493 in the fall semester and LATS 031 in Winter Study, or for LATS 031 in Winter Study and LATS 494 in the spring semester. These courses will be in addition to the 5 courses that make up the regular concentration.

STUDY ABROAD

Study abroad and other off-campus programs offer excellent opportunities for students to build on, and expand, the intellectual interests they develop as part of the Latina/o Studies concentration. Through their connections to various institutions in the U.S. and other nations, Latina/o Studies faculty can help place students in U.S. borderlands programs as well as programs in Mexico, Cuba, and other “countries of origin.” Any student seeking to include courses as part of a concentration in Latina/o Studies should feel free to contact the Program chair or other faculty. A maximum of 1 course taken away from Williams can count (as an elective) toward the completion of the concentration.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description. Although syllabus and description, including readings and assignments, would be preferable.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. 1 of 5 for the concentration and can only count as an elective.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.
Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

LATS 105  (F)  Latina/o Identities: Constructions, Contestations, and Expressions
What, or who, is a Hispanic or Latina/o? At present, individuals living in the United States who are classified as such number approximately 57 million, constituting the country's largest "minority" group. In this course, we will study the interdisciplinary field that has emerged in response to this growing population, as we focus on the complex nature of "identity." Viewing identities as historically and socially constructed, we begin with a brief assessment of how racial, ethnic, class, and gendered identities take shape in the Hispanic Caribbean and Latin America. We then examine the impact of (im)migration and the rearticulation of identities in the United States, as we compare each group's unique history, settlement patterns, and transnational activity. Identity is also a contested terrain. As immigrants and migrants arrive, the United States' policymakers, the media, and others seek to define the "newcomers" along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. In this light, we conclude the course with an exploration of these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

Class Format: The course will feature synchronous online class meetings with some small discussion groups.

Requirements/Evaluation: participation and several short papers (1-5 pages) throughout the semester

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for concentration in Latina/o Studies

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora

Fall 2020
LEC Section: R1    MW 10:00 am - 11:15 am     C. Ondine Chavoya, Maria Elena Cepeda

LATS 112  (F)  Caribbean Diasporic Aesthetics: An Introduction
This course explores how aesthetics can serve as an organizing principle for the critique, analysis, and theorizing of racial and diasporic formations across the 20th century, with a specific focus on Caribbean diasporic populations and their cultural production. We will think about aesthetics as literary, visual, and sonic representations authored by and about communities of color in response to the uneven processes of racialization, migration, colonization, and nation-state formation that inflect how identity is shaped and experienced across time and space. Engaging the work of artists like Hew Locke, María Magdalena Campos-Pons, Kara Walker, and Miguel Luciano in conversation with Stuart Hall, José Quiroga, Krista Thompson, and Michelle Ann Stephens among others will illuminate these inquiries. The circuits of culture, goods, ideas, labor, and peoples that flow between the archipelagos of the Caribbean and the metropoles such as Miami, New York, and London will serve as critical sites to map our interventions.

Requirements/Evaluation: attendance and class participation, short writing assignments, a 4- to 5-page midterm paper, and a 10-page final paper

Prerequisites: none

Enrollment Limit: 20
**LATS 114 (S) Of Caravans and Narcos: U.S. Media Narratives about Central and South America (DPE)**

**Cross-listings:** LATS 114 AMST 114

**Primary Cross-listing**

What do contemporary U.S. media discourses about Central and South America reveal about relationships of power in the Americas? How does the systematic analysis of visual, textual, and sonic media discourse enhance our comprehension of broader social dynamics? How do South and Central Americans in the diaspora actively counter dominant media narratives about their communities? And what does it mean to center the unique histories, cultures, and political contexts of diasporic Central and South Americans within Latina/o/x Studies? Drawing from a wide range of scholarly materials and media platforms, this interdisciplinary course assumes a transnational approach to these issues, with an emphasis on how to conduct effective discourse analysis of everyday media texts. Above all, we will highlight the ways in which ethno-racial identity, gender, sexuality, class, and nation intersect to inform mainstream U.S. media narratives and our understandings of past and present modes of representation.

**Class Format:** discussion

**Requirements/Evaluation:** two short (5- to 7-page) essays; one class presentation; final take-home examination (5-7 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** LATS concentrators by seniority; AMST majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**LATS 203 (S) Chicana/o/x Film and Video**

**Cross-listings:** AMST 205 WGSS 203 LATS 203 ARTH 203

**Primary Cross-listing**

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicans in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

**Class Format:** Discussion-oriented lecture class. In addition to class meetings and readings, students will be expected to watch 3-4 hours of film per week on GLOW or in the library.

**Requirements/Evaluation:** one short paper, mid-term exam, final exam and take home essays
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Art majors; LATS concentrators

LATS 220 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 LATS 220 ENVI 221

Primary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first- and second-year students as well as American Studies majors and Latina/o Studies concentrators

LATS 222 (S) Ficciones: A Writing Workshop (DPE)

Cross-listings: ENGL 252 LATS 222

Primary Cross-listing

This course is focused on the art and practice of writing fiction. Sessions are divided into workshop and seminar. Workshop: Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Seminar: We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help
students further strengthen their narrative skills.

**Class Format:** workshop

**Requirements/Evaluation:** attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final writing portfolio

**Prerequisites:** none

**LATS 224 (S) U.S. Latinx Religions**

**Cross-listings:** REL 224 AMST 224 LATS 224

**Primary Cross-listing**

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. Given the plurality of Latinx communities and religious lives in the U.S.A., we can only consider select contexts that help us understand the challenges of studying and defining the "religious" and "hybridity" in Latinx contexts. We will survey certain selected religious traditions and practices --such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería-- by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film.

**Class Format:** discussion

**LATS 228 (F) Revolt and Revelation in 20th-Century Americas**

**Cross-listings:** AFR 228 AMST 228 REL 223 LATS 228

**Primary Cross-listing**

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked “Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?” Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply
shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings—such as those of Gutiérrez—and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

**Requirements/Evaluation:** participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

LATS 232 (S) We the People in the Stacks: Democracy and Literatures of Archives

**Cross-listings:** LATS 232 ENGL 232

**Primary Cross-listing**

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." --Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives—their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

**Requirements/Evaluation:** attendance and class participation, short writing exercises, midterm project, final creative project

LATS 234 (S) From Conga to Hip Hop: Center-staging Latinidades on Broadway

Carmen Miranda and Desi Arnaz caused a sensation when they appeared on Broadway musicals in 1939 and 1940 respectively. Little did they know that their spectacular performances would inaugurate the stereotypes of the Latin Bombshell and the Latin Lover within the American national imaginary. In this course, we will examine Latina/o representation in The Great White Way at the intersection between identity, ethnicity, race, class, and gender. The course will introduce students to the Broadway musical genre and focus on the politics of Latina/o Otherness and Difference across time and space within the framing of a chronological and hemispheric/domestic perspective. Emphasis will be placed on how stereotypes are constructed, mobilized, and circulated and how Latinidades, agency, and empowerment result from the entanglement between ideology and given structures of feeling. In so doing, students will critically explore the cultural dynamics, historical contexts, and power relations at work in West Side Story, A Chorus Line, The Capeman, Rent, In the Heights, and other musicals.

**Class Format:** discussion
**Requirements/Evaluation:** attendance, class presentations, 2-page essays; 5-page take-home midterm essay, 10-page final researched archival project on a topic of interest

**LATS 240  (F)  Latina/o Language Politics: Hybrid Voices**

**Cross-listings:** AMST 240  COMP 210  LATS 240

**Primary Cross-listing**

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching, bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

**Requirements/Evaluation:** participation, two essays, final take-home examination

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

**LATS 241  (S)  Performing Masculinity in Global Popular Culture**

**Cross-listings:** THEA 241  WGSS 240  SOC 240  AMST 241  LATS 241

**Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.
**Requirements/Evaluation:** masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**LATS 252 (S) Puerto Rico and its Diaspora**

**Cross-listings:** AMST 252  LATS 252

**Primary Cross-listing**

On September 20, 2018, Maria---a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution
inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 8

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

LATS 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present (DPE)

Cross-listings: LATS 286 HIST 286

Primary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format. It will be offered in a "hybrid" format with synchronous class meetings and group discussion sections, offered in-person and remote.

Requirements/Evaluation: Class participation with short 1-2 page writing assignments; two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

LATS 309 (S) Scriptures and Race

Cross-listings: REL 309 AFR 309 LATS 309

Secondary Cross-listing

This course focuses on the relationships between constructions of race in the post-1492 American world and “Christian scriptures.” The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage “scriptures”? In what ways do “scriptures” informed how people imagine themselves, their communities, and their relationship to religious and racial “others”? How did “scriptures” and “race” inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Requirements/Evaluation: participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay

LATS 312 (S) Chicago

Cross-listings: LATS 312 ENVI 313 AMST 312

Primary Cross-listing

"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)
Prerequisites: none
Enrollment Limit: 20
LATS 313  (S)  Gender, Race, and the Power of Personal Aesthetics

Cross-listings:  WGSS 313  AFR 326  AMST 313  LATS 313

Primary Cross-listing

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as an activist strategy challenge traditional understandings of feminist political activity?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

Prerequisites:  LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

LATS 320 (S) The Latina/o AIDS Archive: A Cultural Recovery and Revisionary Project in Progress

The AIDS crisis is not over. The protease inhibitors made HIV/AIDS a treatable, chronic disease since 1996, but we must ask who has access to the health care system and the cocktail. The official story only showcased the experience of urban privileged white middle-class gay men. Minorities and women were marginalized and ignored. Puerto Rico and the Mexican Borderlands must be included in the AIDS archive since Latino/a bodies continually inhabited transnational spaces and circuits of migration that propagated the transmission of the virus since the beginning of the AIDS crisis.

For many, addressing AIDS four decades into the epidemic, its effects on the Latina/o communities and familias is nothing but an anachronism. In this course students will visit alternative archives in order to recover the silenced history of the Latino/a AIDS crisis toward a revisioning of the hegemonic cultural narrative and rhetorical representation of the epidemic. Given that the Latino/a AIDS crisis remains untold, students will piece together the fragmentary narratives and images, reconsider critical moments, and collect the relegated voices of those who died and are still unaccounted for—los/as desaparecidos/as. Can the SIDA cultural production, material conditions, and lived experiences be recovered, touched, and felt to honor the dead? From an interdisciplinary perspective, this course will critically analyze film, documentaries, video, theater, solo performances, artwork, testimonials, interviews, poems, novels, memorials, the AIDS Quilt, and obituaries that document the Latino/a AIDS everyday experiences, survival practices, and artistic expressions. Among the topics to be covered are: the temporality of illness, mourning, memorialization, activism, and aesthetic intervention. The students will be introduced to the notions of "AmnesiAIDS" and "NostalgiAIDS" to theoretically understand a wide spectrum of conceptual issues such as memory, canonization, temporality, and historicism.

Class Format: discussion

Requirements/Evaluation: attendance, class presentations, 2-page critical essays; a 5-page take-home midterm essay and a 10-page final researched archival project essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

LATS 327 (S) Racial and Religious Mixture (DPE)

Cross-listings: REL 314  AFR 357  LATS 327  AMST 327

Primary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion

Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper
**Prerequisites:** none  
**Enrollment Limit:** 19  
**Enrollment Preferences:** seniors, concentrators, majors, those with prior relevant coursework  
**Expected Class Size:** 10  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D2) (DPE)

**LATS 330 (S) DNA + Latinx: Decoding the "Cosmic Race"** (DPE)  

Scientists working to assemble maps of the human genome have found a goldmine in the DNA of Latinx, Latin American, and other populations that derive ancestry from multiple continents. In this interdisciplinary course, we will explore Latinidades through a genealogical lens: What culture-specific issues emerge around history, identity, ethics, forensics, immigration, commerce, surveillance, art, science, and medicine? Readings will include *The Cosmic Race* by José Vasconcelos, *The Cosmic Serpent* by Jeremy Narby, *Bird of Paradise: How I Became Latina* by Raquel Cepeda, and *The Social Life of DNA: Race, Reparations, and Reconciliation After the Genome* by Alondra Nelson.

**Requirements/Evaluation:** attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final writing portfolio

**Prerequisites:** none  
**Enrollment Limit:** 15  
**Enrollment Preferences:** Latina/o Studies concentrators  
**Expected Class Size:** 15  
**Grading:** no pass/fail option, no fifth course option  
**Distributions:** (D2) (DPE)  

**Difference, Power, and Equity Notes:** Readings and class discussion offer students the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change

**LATS 335 (S) Contemporary Immigration Landscapes**  

What is the relationship between racial formations, transnational migrations, and power? How do geometries of power shape our relationship to place? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, Indigenous studies, and postcolonial theories to enrich our understanding of human geography. We will look at the use of ethnic and racial formations as a bridge between cultural and political geography in the contemporary US immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of experiences of migrants and how these communities’ lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and environmental justice, among others. Through materials that embrace both historical and contemporary perspectives, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities’ cultural place-making practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of transnational racial formations to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).

**Requirements/Evaluation:** Class Participation (15%): Preparation for, and active participation in, class discussions. Teach-In Facilitation (20%): Group (3-4), led discussion for one 30 minute class segment. Essays (30%): Two 3-5 page essays, each comprising 15% of the final grade. Final
**Paper (35%):** An examination of the articulation of Latinx migrations and belonging in a case study that interrogates and builds on a major course theme, approximately 12 pages double-spaced, plus references / endnotes / images.

**Prerequisites:** None

**Enrollment Limit:** 30

**Enrollment Preferences:** LATS concentrators

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**LATS 338 (S) Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality (WS)**

**Cross-listings:** LATS 338 AMST 339 WGSS 338

**Primary Cross-listing**

In this class we will investigate a wide variety of Latina/o/x popular musical forms, with particular attention to issues of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o/x popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are hybrid Latina/o/x identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

**Requirements/Evaluation:** class participation, one semester-long original research project conducted in stages

**Prerequisites:** prior courses in AMST, LATS, or WGSS; not open to first-year students

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**LATS 340 (F) U.S. Afro-Latinidades**

This course takes an interdisciplinary approach to examine the history, lived experiences, and cultural productions of Afro-Latínx in the United States. Discussions in the course will center on three related questions: What is Afro-Latinidad? How does Blackness in Latin America differ from its articulation among Afro-Latínx in the United States? And, how have migration and sociopolitical processes impacted the lives of U.S. Afro-Latínx and our collective understanding of Afro-Latinidad? Throughout the course, we will draw on literature in the social sciences and humanities to examine the transnational nature of race and Blackness across the Americas, as well as the intersection between these identities and gender, sexuality, and class. We will also examine several media and cultural productions of U.S. Afro-Latínx (poems, novels, documentary films, blogs, and social media sites) and critically analyze their articulation of the Afro-Latínx experience.
LATS 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: LATS 346 AMST 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

LATS 348 (F) Graphic Narratives as Democratic Ideals

Cross-listings: COMP 348 AMST 348 LATS 348

Primary Cross-listing

This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. The primary focus will be on texts that explore themes of democracy and Latinidades. We will also discuss the "graphic activism" of artists like Sharon Lee De La Cruz of Digital Citizens Lab, a design collective with a focus on civic technology. Throughout the course, students will have the opportunity to create their own graphic narratives, either digitally or in print. Possible guest speaker: comic book artist Ivan Vélez (Planet Bronx, 2015 Creative Capital Award in Visual Arts).

Class Format: workshop

Requirements/Evaluation: attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page
LATS 358  (S)  Latinx Installation and Site-Specific Art

Cross-listings:  LATS 358  ARTH 358

Primary Cross-listing

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

Class Format: discussion

Requirements/Evaluation:  two short papers, periodic research reports, final research paper, and presentation

Prerequisites:  LATS 105 or ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

LATS 385  (S)  Latinx Politics in New York City and Beyond  (DPE)

Cross-listings:  HIST 385  LATS 385

Secondary Cross-listing

Latinas and Latinos have long sought inclusion in the U.S. polity and society. The meanings and terms of inclusion have shifted historically, as have the methods for seeking that inclusion. This course explores activism that has included community building to meet immediate needs, social service approaches, community-based organizing, political and social movements, and participation in pre-existing unions and political groups, as well as electoral politics. At times working within existing structures, Latinx communities have also questioned and challenged those existing structures. Activists have addressed a wide variety of often intersecting issues including education, workers' rights, women's rights and feminism, immigration rights and legal status, environmental justice, LGBTQ+ visibility and rights, as well as others. New York City has long been home to a diverse group of Latinas and Latinos, and provides an important lens to Latinidades and to the politics of recognition, inclusion, and radical transformation. For final projects, students will select a contemporary issue to explore in greater depth and/or explore Latinx politics in another community.
Class Format: discussion-based course

Requirements/Evaluation: class participation and short writing assignments, two essays of 3-5 pages each, final project of 7 to 10 pages, and final presentation

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History majors and Latina/o Studies concentrators, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

LATS 386 (S) Latinas in the Global Economy: Work, Migration, and Households

Cross-listings: HIST 386 WGSS 386 LATS 386

Primary Cross-listing

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

Class Format: discussion

Requirements/Evaluation: class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

LATS 403 (S) New Asian American, African American, Native American, and Latina/o Writing

Cross-listings: AMST 403  LATS 403  AFR 333

Secondary Cross-listing
The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it be divorced from history and politics, even, or especially, a radical politics.

LATS 408 (F) Envisioning Urban Life: Objects, Subjects, and Everyday People

Cross-listings: LATS 408  AMST 408
What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

Requirements/Evaluation: class participation, a short essay, a series of writing exercises, and a semester-long final project

LATS 409 (S) Transnationalism and Difference: Comparative Perspectives

Cross-listings: LATS 409 WGSS 409 AMST 411

Primary Cross-listing

In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Requirements/Evaluation: student participation, an original 12-15 page research paper conducted in stages, and peer editing

Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

LATS 420  (S)  Latinx Ecologies

Cross-listings:  LATS 420  ENVI 421

Primary Cross-listing

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords’ garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena Maria Viramontes’ *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodriguez’s theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

LATS 428  (F)  Performing Latina/o Cultural Citizenship  (WS)

Being conscious of citizenship is a commonplace preoccupation for most Latinas/os in the United States of America. How can Latinas/os belong to the national imagined community when many are reminded daily that they are second-class citizens, and even presumed to be criminals, rapists, and drug dealers? How do Latinas understand and negotiate an imperialist and colonial past of violence and deterritorialization? How do Latinas/os feel when they historicize citizenship and discover hidden archival scripts documenting how their ancestors’ land was stolen, or how they were forced to migrate in response to military interventions or invasions that caused economic devastation and death? In this course students will critically think about past and present everyday performances and transactions of citizenship, its many embodiments, and structures of feeling. Most important, students will embark on a theoretical journey of research and readings to make sense of how citizenship is experienced and felt and how it is historically situated en el aquí y ahora. Students will explore, within an interdisciplinary perspective and a critical cultural studies framework, the many forms of citizenship, including sexual citizenship, intimate citizenship, economic citizenship, diasporic citizenship, transnational citizenship, academic citizenship and others.

Requirements/Evaluation:  none

Cross-listings: LATS 440 ARTH 440

Secondary Cross-listing

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalization and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

Prerequisites: ARTH 102 (graduate students are exempt from the prerequisite)

Enrollment Limit: 15

Enrollment Preferences: senior Art majors and senior Latina/o Studies concentrators

Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 462 (D2) ARTH 462 (D1) ARTH 562 (D1) LATS 462 (D2)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Course themes of art and activism, borders and diaspora, globalism and modernism in the visual arts and how they intersect with the exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Through discussion, presentations, and writing assignments students will develop skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice.

LATS 471 (S) Comparative Latina/o Migrations

Cross-listings: HIST 471 LATS 471

Primary Cross-listing

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

Class Format: discussion

Requirements/Evaluation: class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Latina/o Studies concentrators

Expected Class Size: 8-15

Grading: no pass/fail option, yes fifth course option

Winter Study ---------------------------------

LATS 31  (W) Senior Thesis: Latina/o Studies
Students must register for this course to complete an honors project begun in the fall or begin one to be finished in the spring.
Class Format: thesis
Prerequisites: approval of program chair
Enrollment Preferences: limited to senior honors candidates
Grading: pass/fail only
Not offered current academic year

LATS 99  (W) Independent Study: Latina/o Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, a number of questions are addressed through the curriculum. How have men and women defined leadership and what are the bases of leaders’ legitimacy in different historical contexts? How do leaders in different contexts emerge? Through tradition, charisma, or legal sanction? How do different types of leaders exercise and maintain their domination? What are the distinctive habits of mind of leaders in different historical contexts? What are the moral dilemmas that leaders in different contexts face? What are the typical challenges to established leadership in different historical contexts? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year.

**LEADERSHIP STUDIES—TRADITIONAL TRACK**

The introductory course:

**LEAP/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies**

One required course on ethical issues related to leadership, typically:

**PHIL 119 Justice, Democracy and Freedom: Plato with Footnotes**
- Taught by: Jana Sawicki
- *Catalog details*

**PSCI 203(F, S) Introduction to Political Theory**
- Taught by: Mark Reinhardt, Laura Ephraim
- *Catalog details*

Two core courses dealing with specific facets or domains of leadership, such as:

**ARTH 501 / LEAD 301 / ARTH 303(S) Museums: History and Practice**
- Taught by: Michael Conforti
- *Catalog details*

**ASTR 240 / HSCI 240 / LEAD 240 / STS 240(F) Great Astronomers and Their Original Publications**
- Taught by: Jay Pasachoff, Wayne Hammond
- *Catalog details*

**CLAS 323 / HIST 323 / LEAD 323 From Achilles to Alexander: Leadership and Community in Ancient Greece**
- Taught by: Kerry Christensen
- *Catalog details*

**HIST 111 / ARAB 111 / LEAD 150 Movers and Shakers in the Middle East**
- *Catalog details*
One required course on issues related to American domestic leadership, such as:

HIST 207 / GBST 101 / ARAB 207 / LEAD 207 / JWST 217 / REL 239 The Modern Middle East

LEAD 205 / PSCI 212 From Tocqueville to Trump: Leadership and the Making of American Democracy

LEAD 212 / HIST 393(S) Sister Revolutions in France and America

LEAD 285 / PSCI 285 / HIST 354(F) The Revolutionary Generation: Galaxy of Leaders

LEAD 320 / PSCI 320 Heroes and Villains: Iconic Leadership and the Politics of Memory

LEAD 402(S) The Art of Presidential Leadership

PSCI 206 T / LEAD 206 Dangerous Leadership in American Politics

PSCI 215 / LEAD 215 Race and Inequality in the American City

PSCI 216 / LEAD 216 American Constitutionalism I: Structures of Power

PSCI 217 / LEAD 217(S) American Constitutionalism II: Rights and Liberties

PSCI 218 / LEAD 218(S) The American Presidency

PSCI 310 / LEAD 332 New York City Politics from the Blackout to Bloomberg

PSCI 312 T / LEAD 312(S) American Political Thought

PSCI 314 / LEAD 314 How Change Happens in American Politics

PSCI 345 / ASST 345(S) The Meaning of Life and Politics in Ancient Chinese Thought

One Leadership Studies Winter Study course (listed separately in the catalog)

Capstone course:

LEAD 402 The Art of Presidential Leadership

LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK

An introductory course:

HIST 262 The United States and the World, 1776 to 1914

HIST 263 The United States and the World, 1914 to the Present

PSCI/LEAD 120 America and the World

PSCI/LEAD 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on issues related to American domestic leadership, such as:
LEAD 125 / PSCI 125 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies
  Taught by: Charles Zug
  Catalog details

LEAD 205 / PSCI 212 (F) From Tocqueville to Trump: Leadership and the Making of American Democracy
  Taught by: Mason Williams
  Catalog details

LEAD 255 / PSCI 255 (S) Weaponized Leadership: Demagoguery and Populism in Contemporary Perspective
  Taught by: Charles Zug
  Catalog details

LEAD 277 / PSCI 261 (F) Conspiracy Theories in American Politics
  Taught by: Charles Zug
  Catalog details

LEAD 285 / PSCI 285 / HIST 354 (F) The Revolutionary Generation: Galaxy of Leaders
  Taught by: Susan Dunn
  Catalog details

LEAD 320 / PSCI 320 (S) Heroes and Villains: Iconic Leadership and the Politics of Memory
  Taught by: Mason Williams
  Catalog details

LEAD 350 / PSCI 356 (S) Leadership in American Political Development
  Taught by: Charles Zug
  Catalog details

LEAD 369 / PSCI 369 (S) The Crisis of Leadership
  Taught by: Mason Williams
  Catalog details

PSCI 206 T / LEAD 206 (T) Dangerous Leadership in American Politics
  Taught by: Nicole Mellow
  Catalog details

PSCI 218 / LEAD 218 (S) The American Presidency
  Taught by: Nicole Mellow
  Catalog details

PSCI 258 (F) The Media and American Democracy
  Taught by: TBA
  Catalog details

PSCI 310 / LEAD 332 (F) New York City Politics from the Blackout to Bloomberg
  Taught by: Mason Williams
  Catalog details

Three required courses dealing with specific facets of American foreign policy leadership, such as:

HIST 263 / LEAD 261 (F) The United States and the World, 1898 to the Present
  Taught by: Jessica Chapman
  Catalog details

HIST 388 (S) Decolonization and the Cold War
  Taught by: Jessica Chapman
  Catalog details

HIST 389 / ASST 389 / LEAD 389 (S) The Vietnam Wars
  Taught by: Jessica Chapman
  Catalog details

PSCI 225 / LEAD 225 (S) International Security
  Taught by: Galen E Jackson
  Catalog details

PSCI 262 / HIST 261 / LEAD 262 (T) America and the Cold War
  Taught by: Robert McMahon
  Catalog details

PSCI 266 (S) The United States and Latin America
  Taught by: James Mahon
  Catalog details

PSCI 362 T / LEAD 362 (S) The Wilsonian Tradition in American Foreign Policy
  Taught by: James McAllister
  Catalog details

One capstone course:

LEAD 402 The Art of Presidential Leadership

PSCI/LEAD 327 Leadership and Strategy
PSCI/LEAD 365 U.S. Grand Strategy (W)

PSCI/LEAD 367 The Politics of American National Security

(There is no winter study component to the American Foreign Policy Leadership track.)

Students should check with the program chair to see if other courses not listed here might count as electives.

HONORS IN LEADERSHIP STUDIES

Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, not formally, but it is not been an issue yet. To the best of my knowledge, students have requested one course be counted toward the concentration at most.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Introductory course, Winter Study course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The Introductory course has historically been taught only in the fall.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

LEAD 120 (S) America and the World

Cross-listings: LEAD 120 GBST 101 PSCI 120

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion
LEAD 125 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

Cross-listings: LEAD 125 PSCI 125

Primary Cross-listing

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality—can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Class Format: This course will be hybrid, combining elements of synchronous meetings and asynchronous content so as to allow both in-person and remote students to participate.

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

LEAD 127 (S) America First? The Trump Era and the Future of World Politics

Cross-listings: LEAD 127 PSCI 127

Secondary Cross-listing
"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindberg in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal international internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free trade, and conflicts in the Middle East.

Requirements/Evaluation: two analytical essays, short response papers, and final group project

Prerequisites: none

Cross-listings: LEAD 205 PSCI 212

Primary Cross-listing

America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and
technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams

LEAD 206 (F) Dangerous Leadership in American Politics

Cross-listings: LEAD 206 PSCI 206

Secondary Cross-listing

"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

LEAD 212  (S)  Sister Revolutions in France and America

Cross-listings: LEAD 212  HIST 393

Primary Cross-listing

In the late-eighteenth century, two revolutions burst forth—they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

Requirements/Evaluation: three papers, several class presentations, and active participation in class discussions

LEAD 215  (S)  Race and Inequality in the American City

Cross-listings: LEAD 215  PSCI 215

Secondary Cross-listing
In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

LEAD 216  (F)  American Constitutionalism I: Structures of Power

Cross-listings: LEAD 216  PSCI 216

Secondary Cross-listing
How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the conservative ascendancy of the late twentieth century. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Secondary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on rights and liberties -- freedom of speech and religion, property, criminal process, autonomy and privacy, and equality. The specific disputes under these rubrics range from abortion to affirmative action, hate speech to capital punishment, school prayer to same-sex marriage; the historical periods to be covered include the early republic, the ante-bellum era, the Civil War and Reconstruction, World Wars I and II, the Warren Court, and contemporary America. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional rights and constitutional meaning in American history.

LEAD 218 (S) The American Presidency

Cross-listings: PSCI 218 LEAD 218

Secondary Cross-listing

Many argue that the presidency has been fundamentally changed by the tenure of Donald Trump. Is this right? To study the presidency is to study human nature and individual personality, constitution and institution, strategy and contingency. This course will examine the problems and paradoxes
that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with domestic priorities such as the protection of civil liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? Exploration of these questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership issues, congressional-executive relations, the media, and emergency powers. Attention will focus largely on the modern presidency, though older historical examples will also be used to help us gain perspective on these problems.

**Class Format:** discussion

**Requirements/Evaluation:** three short to medium length papers, small group projects, and class participation

**Prerequisites:** none

**Enrollment Limit:** 30

LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: Hybrid: this class will be mostly remote, but there may be some in-person meetings outside for those on campus and interested, weather permitting.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none
LEAD 223 (S) Roman History

Cross-listings: CLAS 223  HIST 223  LEAD 223

Secondary Cross-listing

The study of Roman history involves questions and problematics central to the development of Western institutions, religion, and modes of thought. Roman history also encompasses the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until perhaps contemporary times. As this course addresses the history of Rome from its mythologized beginnings through the reign of the emperor Constantine, it will place special emphasis on the Roman ability time and again to turn crisis and the unexpected into a rich source of cultural development, as well as the complex tendency later to interpret and present such ad hoc responses as predestined and inevitable. The Romans also provide a vivid portrait of the relationship between power and self-confidence on the one hand, and violence and ultimate disregard for dissent and difference on the other. Readings for this course will include a wide variety of original sources, and there will be a strong emphasis on problems of historical interpretation.

Class Format: The course features a mix of lecture and discussion. There will also be a visit to WCMA's collection of ancient Roman artifacts.

Requirements/Evaluation: Class preparation and participation, several short response papers, one 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better may substitute a 10 to 15-page research paper for the final exam.

Prerequisites: None; open to all

Enrollment Limit: 20

Enrollment Preferences: Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

LEAD 227  (F)(S) International Relations of the Middle East
Cross-listings: PSCI 227  LEAD 227
Secondary Cross-listing
This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. Classes will be taught remotely. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Class Format: This course will be taught remotely. There will be brief lectures, which will be either put on the work website prior to class or given at the start of each class. But the class will mainly consist of in-depth, synchronous classroom discussions.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Political Science majors with an International Relations concentration, History majors
Expected Class Size: 15

LEAD 239 (S) Music in the Global Cold War (WS)

Cross-listings: MUS 239 LEAD 239

Secondary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both reflected and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Copland; Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

Class Format: Class discussion will be central to this course.

Requirements/Evaluation: 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students with relevant experience in Political Science, History, or Music studies.

LEAD 240 (F) Great Astronomers and Their Original Publications (WS)

Cross-listings: ASTR 240 STS 240 HSCI 240 LEAD 240

Secondary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams's Chapin Library of rare books, and facsimiles or digital copies will be provided for remote learning. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1450) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). We evaluate a trove of books and papers about historic transits of Venus. We discuss matters of fraud and
authenticity, especially the case of a purported *Sidereus Nuncius*, shown to be a modern construction. The course will be taught in collaboration between an astronomer and a rare books librarian, with remote lectures by experts from around the world.

**Class Format:** Meeting on campus in the Chapin Library classroom (Sawyer 452) or remotely; students who are not on campus can visit the original books at a later time/year.

**Requirements/Evaluation:** class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

**Prerequisites:** none

LEAD 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

**Cross-listings:** HIST 254  AMST 254  LEAD 254

**Secondary Cross-listing**

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations’ multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

**Class Format:** Remote class. Class will blend short pre-recorded lectures with weekly Zoom discussion sections/seminar format, plus time for virtual one-on-one conversations with the instructor.

**Requirements/Evaluation:** active participation in class discussion, several short essays based on readings and discussion topics, (virtual) museum/archives exercise, final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History or American Studies majors, followed by first- and second-year students

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**LEAD 255 (S) Weaponized Leadership: Demagoguery and Populism in Contemporary Perspective**

**Cross-listings:** LEAD 255 PSCI 255

**Primary Cross-listing**

Since Donald Trump began his rhetorical assault on immigrants, the political establishment, and the free press, all in the name of "the American people," terms like demagoguery and populism have come to dominate American political discourse. Demagogues and populists are often defined as bad leaders who manipulate the emotions of their audiences for the sake of personal ambition--leaders who turn a good thing (popular government) into something dangerous. At the same time, and as Trump has shown, many of the tactics that populists and demagogues deploy are politically effective. Protest leaders tell their audiences to get angry and to stand up and fight precisely because this kind of rhetoric can move an audience to action when rational persuasion cannot. And, many of the leaders we think of as great today were regarded as demagogues and populists during their own times. Puzzles like these point to our current political moment. How useful are terms like demagoguery and populism for understanding leadership? How have these terms been weaponized to distort politics instead of clarifying it? Should we reserve these terms for leaders who are truly bad, and if so, what counts as a "truly" bad leader (as opposed to one we just happen not to like)? Or can demagogic and populist tactics be deployed in better and worse ways? We will approach these questions through a survey of classic and contemporary writings on popular leadership, from Thucydides and Machiavelli to present-day social science. With these competing theories in view, we will read historical and biographical accounts of some of history's most controversial leaders--including Bolivar, Lenin, FDR, and Hugo Chavez--so as to better understand the popular leaders who dominate much of our politics today.

**LEAD 258 The Media and American Democracy**

The course examines the relationship between the press and government, its watchdog function, how social media and the Internet are changing its role, the emergence of independent investigative bodies such as Pro Publica, and the myriad ways in which the press has helped shape American history, for better or worse. The course goes behind the headlines to examine the delicate interplay between government and press, peels back the familiar classics of American journalism, but also incorporates the current conflicts and tensions between the press and government. In the new age, how does the press define or redefine balance, neutrality, the quest for objectivity, and restraint. Who is a journalist, a once relatively easy question,
but one now fraught with complexity? There has been a tectonic shift in the fundamental standards and practices of the press in recent years. What are those changes and how does it augur for the future of the press and democratic institutions?

Requirements/Evaluation: Several short papers, 10-15 page research paper.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Preference to Leadership Studies concentrators and Political Science majors.

LEAD 262 (F) America and the Cold War

Cross-listings: HIST 261 LEAD 262 PSCI 262

Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required
LEAD 269  The CIA and American Foreign Policy

Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. Still, it took the shock of Pearl Harbor for the United States to establish a permanent peacetime civilian intelligence service independent of another federal department--the Central Intelligence Agency. Since then, the agency and others which comprise the loose entity called the Intelligence Community (IC) have played a pivotal albeit intensely controversial role in US foreign and national security policies. Yet their roles and missions remain largely misunderstood and divisive, as attested to by recent debates surrounding the multiple investigations of the 9/11 tragedy, the flawed pre-war estimates of Iraq's Weapons of Mass Destruction (WMD) capabilities, the reporting on Benghazi, the Snowden revelations, and much more. This course seeks to provide greater understanding of the relationship between intelligence and US foreign and national security policy by examining the CIA's and IC's roles and responsibilities, illuminating their history alongside the history of America and the World, assessing their successes and failures, evaluating their reforms, and correlating their behavior and capabilities with US values and institutions. Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. LEAD 277  (F)  Conspiracy Theories in American Politics

Cross-listings:  PSCI 261  LEAD 277

Primary Cross-listing

The phrase "conspiracy theory" typically evokes images of paranoid cranks--of cars plastered with vituperative bumper-stickers and of people who wear tin-foil hats. To be sure, the claims that conspiracy theorists advance can be astonishing, from Pizzagate--alleging that Democratic Party officials ran a human trafficking ring out of a Washington, D.C. pizza restaurant--to the Flat Earth movement, which holds that the earth is, indeed, flat. At the same time, the persistence and power of conspiracy theories in American politics should provoke us to wonder why such preposterous-sounding
notions gain traction in the first place, and who benefits from them. That conspiracy theories tend to advance a partisan or ideological view, often intended to discredit a competing movement or ideology, suggests that conspiracy theories can function as a kind of remote leadership—"leadership" without any clear leaders at the helm. This course will examine notable American conspiracy theories, such as the Kennedy Assassination theory, "9/11 Truth," and "Birthright-ism," in light of recent scholarship on conspiracism, demagoguery, and populism. Our goal will be to understand the political and discursive forces that empower conspiracy theories and the functions they serve in American politics. Where and with whom do conspiracy theories originate? Why do some gain traction while others quickly wither? How can we distinguish between a conspiracy theory based on plausible evidence and one that exists simply to create chaos? And why do some conspiracy theories persist even in the face of direct public refutation?

**Class Format:** This course will be hybrid, combining elements of synchronous meetings and asynchronous content so as to allow both in-person and remote students to participate.

**Requirements/Evaluation:** Several short essays, weekly writing assignments, and a longer research paper with presentation.

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Leadership Studies Concentrators and Political Science Majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**LEAD 280 (S) Emancipation to BlackLivesMatter**

**Cross-listings:** AFR 280 HIST 280 LEAD 280

**Secondary Cross-listing**

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** students with demonstrated interest in material

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

LEAD 285 (F) The Revolutionary Generation: Galaxy of Leaders

Primary Cross-listing

The American Revolution produced a galaxy of brilliant and creative statesmen and intellectuals: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Class Format: Remote via Zoom.

Requirements/Evaluation: three papers, weekly class presentations, and active participation in all discussions

Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

Enrollment Limit: 12

Enrollment Preferences: students with a background in Leadership Studies, American History or American Political Science

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

LEAD 301 (S) Museums: History and Practice

Secondary Cross-listing

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in the institutions of our time. The seminar will focus on museums past and present internationally as it also considers the future of museums, doing so as it examines governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues associated with the repatriation and restitution of cultural property. The course will consider current trends in exhibition, public education and other programming in art museums that range in size and type from the "encyclopedic" or "universal" to newly established contemporary arts institutions and alternative spaces. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 10

Enrollment Preferences: graduate students, then senior art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the seminar requirement for the undergraduate Art History major

LEAD 311 (F) Congress

Cross-listings: LEAD 311 PSCI 311

Secondary Cross-listing

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

Class Format: For fall of 2020, this class will be remote, with twice weekly synchronous discussion sessions. A few brief lectures will be put up on Glow to review before the relevant class section. Class discussion will draw on student questions posted on Glow as well as the process of developing and conducting original research.

Requirements/Evaluation: class participation, two short papers, and a final research paper

Prerequisites: PSCI 201 or permission of instructor

Enrollment Limit: 12

LEAD 312 (S) American Political Thought

Cross-listings: LEAD 312 PSCI 312

Secondary Cross-listing

From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Prerequisites: none

system of separated powers. Yet they have also been disparaged for inflaming divisions among people and grid-locking the government. Critics of the two-party system have castigated the major parties for failing to offer citizens meaningful choices; the Republican and Democratic parties are likened to a choice between “tweedledee and tweedledum.” This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. How and why have the parties changed over time? Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? We will seek answers to these questions both in seminar discussion and through substantial independent research projects.

Requirements/Evaluation: weekly writing assignments, two 5-page papers, one 15- to 20-page paper, class presentation, and class participation

LEAD 320  (F) Heroes and Villains: Iconic Leadership and the Politics of Memory

Cross-listings:  PSCI 320  LEAD 320

Primary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation’s past. Does Thomas Jefferson’s statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman’s portrait replace Andrew Jackson’s on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders’ images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What’s really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Requirements/Evaluation:  two short (5- to 6-page) essays and a 10- to 12-page research paper

Prerequisites:  previous course in Leadership Studies, or Political Science, or permission of instructor

LEAD 321  (S) History of U.S.-Japan Relations, 1853-Present  (DPE)

Cross-listings:  LEAD 321  ASST 321  HIST 321

Secondary Cross-listing

An unabating tension between conflict and compromise has been an undercurrent of U.S.-Japan relations since the 1850s, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the Difference, Power, and Equity requirement by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other.

Class Format:  discussion

Requirements/Evaluation:  class participation, response papers (500 words), two short papers (5 pages), and a self-scheduled final exam or research paper (12-15 pages)

Prerequisites:  none; open to first-year students with instructors permission

Enrollment Limit:  25

Enrollment Preferences:  History or Asian Studies majors/prospective majors

LEAD 323  (F)  From Achilles to Alexander: Leadership and Community in Ancient Greece

Cross-listings: HIST 323  CLAS 323  LEAD 323

Secondary Cross-listing

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

LEAD 325  (S)  The Roosevelt Style of Leadership

Cross-listings: LEAD 325  HIST 358

Primary Cross-listing

In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor Roosevelt play? In addition to studying biographies, their writings and speeches, we will do research using the Proquest data base of historical
newspapers, to see history as it was being made.

Requirements/Evaluation: participation in class discussions, oral reports, two research papers

Prerequisites: none; courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar

Enrollment Limit: 15

Enrollment Preferences: Leadership Studies concentrators and students with a background in American history and Political Science

LEAD 332  (F)  New York City Politics from the Blackout to Bloomberg  (WS)

Cross-listings: PSCI 310  LEAD 332  PSCI 332

Secondary Cross-listing

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how these contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

LEAD 336  (S)  Science, Pseudoscience, and the Two Cultures

Cross-listings: LEAD 336 ASTR 336 HSCI 336

Secondary Cross-listing
A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent “Science Wars” over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in *Fads and Fallacies in the Name of Science*, and using such recent journals as *The Skeptical Inquirer* and *The Scientific Review of Alternative Medicine*, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's *Arcadia* and Michael Frayn's *Copenhagen*.

**LEAD 348 (S) The Black Radical Tradition**

Cross-listings: PSCI 348 AFR 348 LEAD 348

Secondary Cross-listing

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Requirements/Evaluation: attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

Prerequisites: none; open to all

This course is cross-listed and the prefixes carry the following divisional credit:
LEAD 350 (S) Leadership in American Political Development

Cross-listings: PSCI 356 LEAD 350

Primary Cross-listing

Major change in American politics takes place when an old political order collapses and a new one emerges to replace it, sometimes through violent struggle. Before the Civil War and Reconstruction, for example, states enjoyed autonomy over most areas of politics—including whether or not to maintain slavery. Afterwards, the Federal Government began to assert itself vis-à-vis civil rights and liberties in ways it had never previously done. Relatively, before the Great Depression, state government basically managed their own economies; but the New Deal gave the federal government power to create and manage a new, national economy. What are the deep sources of these architectonic changes? Who or what is responsible for them? And what is the best way to study them? This course will survey the alternative and competing ways in which leading thinkers and scholars answer these questions. Some argue that dynamic individuals—such as Lincoln and Franklin Roosevelt—drive political change, and that change would not happen without such leaders. Others contend that these so-called “leaders” are themselves mere by-products of impersonal forces, such as party realignments, critical elections, and social, economic, and technological changes. Our goal will be to understand these theories on their own terms, and then to evaluate them with reference to some case studies from American history. To this end, we will study theoretical writings but we will also read selections from histories and biographies that draw a more intimate, nuanced picture of the leaders, groups, and personalities involved in America’s most transformative political moments.

Requirements/Evaluation: several short essays, weekly writing assignments, and a longer research paper with presentation.

**LEAD 362 (S) The Wilsonian Tradition in American Foreign Policy**

**Cross-listings:** PSCI 362 LEAD 362

**Secondary Cross-listing**

During and after the First World War, President Woodrow Wilson developed an approach to international relations that challenged the dominant assumptions of Realism. Instead of a world order marked by alliances, arms races, and wars, Wilson offered a vision of a peaceful world and the rule of international law. While America ultimately rejected the League of Nations, the Wilsonian tradition has continued to exert a powerful influence on scholars and policymakers. This tutorial will intensively examine Wilson's efforts to recast the nature of the international system, the American rejection of his vision after the First World War, and the reshaping of Wilsonianism after the Second World War. We will spend equal time in the tutorial on both the theoretical and historical dimensions of Wilsonianism.

**Requirements/Evaluation:** 4 papers of 7-8 pages and response papers

**Prerequisites:** PSCI 120, 202, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Political Science majors and Leadership Studies Concentrators (Kaplan track)

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**LEAD 369 (S) The Crisis of Leadership**

**Cross-listings:** PSCI 369 LEAD 369

**Primary Cross-listing**

It is now a commonplace that the liberal democracies of Europe and North America (and beyond) are facing a "crisis of leadership." In country after country, champions of cosmopolitan values and moderate reform are struggling to build sufficient popular support for their programs. These failures have created space for a politics of populism, ethno-nationalism, and resentment--an "anti-leadership insurgency" which, paradoxically, has catapulted charismatic (their critics would say demagogic) leaders to the highest offices of some of the largest nations on earth. In this course, we will seek to understand the challenges liberal, cosmopolitan leadership has encountered in the 21st century and the reasons why populist, nationalist leadership has proven resurgent. We will begin by examining institutional constraints facing political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment. Then we will look at some important factors which shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. Our primary questions will be these: Why is transformative leadership so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world?
LEAD 389 (S) The Vietnam Wars

Cross-listings: ASST 389 LEAD 389 HIST 389

Secondary Cross-listing

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community.

Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: History and Asian Studies majors

LEAD 402 (S) The Art of Presidential Leadership

In this seminar, we will focus on the leadership skills, strategies, successes and failures of some of the greatest American presidents--Washington, Jefferson, Theodore Roosevelt, FDR, Reagan--as well as some of the most controversial--Lyndon Johnson and Nixon. We will investigate how these presidents developed as leaders before as well as after their election to the presidency. How did they determine their goals and assemble their leadership teams? How did they mobilize followers and connect with them? What challenges did they face and what principles guided them? What failures did they meet and why? Readings will include correspondence, speeches, and biographies. Students will make extensive use the Proquest data base of historical newspapers to study history as it was being made.

Requirements/Evaluation: three papers, several class presentations, and active participation in all discussions

Prerequisites: LEAD 125 or permission of instructor

LEAD 412 (F) Gandhi: History, Ideas and Legacy (WS)

Cross-listings: REL 412 LEAD 412 ASST 412 GBST 412 HIST 496

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T
will not be permitted to take this class.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

LEAD 420 (F) Senior Seminar: The Nuclear Revolution
Cross-listings: LEAD 420 PSCI 420

Secondary Cross-listing
This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. Classes will be taught remotely. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Class Format: This course will be taught remotely. All class discussions will be synchronous.
Requirements/Evaluation: class participation, three 8- to 10-page papers
Prerequisites: PSCI 202
Enrollment Limit: 15
Enrollment Preferences: Political Science major seniors with an International Relations concentration
Expected Class Size: 15

Winter Study

LEAD 99 (W) Independent Study: Leadership Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
How is language structured? What are the social forces associated with the development of language? How does the mind process and produce language? What are the best methods for teaching and learning a new language? Linguistics is a vibrant and multifaceted field that bridges the academic and the everyday. From Sociolinguistics to Linguistic Anthropology to Applied Linguistics, each of the various disciplines associated with the general area of Linguistics provides an illuminating perspective on the ways in which language works.

At Williams, students can gain insight into the intricacies of linguistic functions in courses located in several different academic units.

**Linguistics**

**ANTH 227 (F) Language and Society: What Does Your Speech Say About You?**

**Cross-listings:** ANTH 227 ARAB 227

**Secondary Cross-listing**

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

**Requirements/Evaluation:** active class participation, response essays, assignments, article presentation, variation paper, final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**ANTH 262 (S) Language and Power**

A language is a dialect with an army and a navy. " This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained or subverted by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to the partition of Hindi and Urdu in colonial South Asia. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in our local community.

**Requirements/Evaluation:** regular postings of critical response papers and an ethnographic final project

**Prerequisites:** none

**Enrollment Limit:** 20
**Enrollment Preferences:** Anthropology or Sociology majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**ASST 207 (F) An Exploration of Japanese Language and Culture**

**Cross-listings:** JAPN 407  ASST 207

**Secondary Cross-listing**

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women’s speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the “easy Japanese movement,” which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

**Requirements/Evaluation:** attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

**Prerequisites:** none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN
Enrollment Limit:  10
Enrollment Preferences:  current or prospective Japanese, Chinese, and Asian Studies majors
Expected Class Size:  10

CHIN 252  (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language
This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. All readings in English with some examples in Chinese.

Class Format: discussion
Requirements/Evaluation:  class participation, several oral presentations and short papers, and a final research project
Prerequisites:  CHIN 101 or permission of instructor
Enrollment Limit:  19
Expected Class Size:  12

CHIN 272  (S) The History and Mythology of Chinese Scripts
Cross-listings:  STS 272  CHIN 272  COMP 272

Primary Cross-listing
Written scripts using what are most often called “Chinese characters” have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: discussion
Requirements/Evaluation:  quizzes, short writing assignments, a midterm, and a final exam
Prerequisites:  none

Enrollment Preferences:  none
COGS 222  (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science

Cross-listings:  PSYC 222  PHIL 222  COGS 222

Primary Cross-listing

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: This hybrid course will meet in-person and will also be available for remote video attendance and participation. Remote students will be expected to attend class synchronously with the in-person lecture and will not be able to watch lectures at other times, so must be available during the class hours in the catalog. Supplemental material--e.g., office hours, study sessions for exams, background discussion for weekly assignments--will be delivered on-line.

Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises

Prerequisites: PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended. It is not necessary to contact the instructor to indicate a special interest in the course.

Enrollment Limit: 20

Enrollment Preferences: sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

**JAPN 131  (F)  Introduction to Japanese Linguistics**

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

**Requirements/Evaluation:** class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

**Prerequisites:** no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

**Enrollment Limit:** 25

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**JAPN 258  (S)  Language and Literacy Development**

Cross-listings: PSYC 258  JAPN 258

**Primary Cross-listing**

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How “natural” is it to learn to read?

**Requirements/Evaluation:** active participation in the class discussion, weekly reaction paper, quiz, final paper

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Japanese, Chinese, Asian Studies, and Psychology majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

MATH 338 (F)  Intermediate Logic  (QFR)

Cross-listings:  MATH 338  PHIL 338

Secondary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we
will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation: problem sets and exams
Prerequisites: some class in which student has studied formal reasoning
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors; juniors and seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
MATH 338 (D3) PHIL 338 (D2)
Quantative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.
Attributes: Linguistics
Not offered current academic year

PHIL 203  (S)  Logic and Language  (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's Tractatus), and to examine some of the connections between logic and philosophy.
Class Format: discussion
Requirements/Evaluation: a midterm, a final, frequent homework and problem sets
Prerequisites: none
Enrollment Limit: 40/sect
Enrollment Preferences: Philosophy majors, seniors, juniors, sophomores, first-years in that order.
Expected Class Size: 40/sect
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: The main part of the course is learning two formal languages of logic: sentential logic predicate logic
Attributes: Linguistics  PHIL Contemp Metaphysics + Epistemology Courses

PHIL 308  (F)  Wittgenstein's "Philosophical Investigations"

Bertrand Russell claimed that Ludwig Wittgenstein was "perhaps the most perfect example I have ever known of genius as traditionally conceived--passionate, profound, intense, and dominating." Wittgenstein's two masterpieces, the *Tractatus Logico-Philosophicus* and the *Philosophical Investigations*, stand like opposing poles around which schools of twentieth-century analytic philosophy revolve. The Wittgenstein of the *Tractatus* is known as the "earlier Wittgenstein," the Wittgenstein of the *Investigations* is known as the "later Wittgenstein." This course is an intensive, line-by-line study of the *Investigations*--one of the greatest (and thus, one of the most controversial) books in the history of philosophy. Aside from its overwhelming influence on 20th and 21st century philosophy and intellectual culture, any book which contains the remark, “If a lion could talk, we could not understand him,” deserves serious attention.

**Requirements/Evaluation:** one short midterm paper (5-7 pages) and one longer final paper (12-15 pages)

**Prerequisites:** at least two Philosophy Courses, PHIL 202 highly recommended

**Enrollment Limit:** 19

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** Linguistics  PHIL History Courses

Not offered current academic year

PHIL 310  (F)  Wittgenstein's Later Philosophy  (WS)

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published *Philosophical Investigations*, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's *Philosophical Investigations*, one of the greatest books ever written. In the second part of the course, we will read *On Certainty*, and selections from other of Wittgenstein's posthumously published works: *Zettel*, *Philosophical Grammar*, *Remarks on the Philosophy of Psychology, Culture and Value*, *Lectures and Conversations on Aesthetics, Psychology and Religious Belief*, and *The Big Typescript*. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.
**Requirements/Evaluation:** tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

**Prerequisites:** two Philosophy courses

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write two short (about 800 words) seminar papers; five 5-7 pages long papers; five 2-3 pages long comments on their tutorial partner’s papers; and a final paper (also 5-7 pages long) which will be a revision of one of the previously written papers. Students will get regular feedback from their tutorial partner and from the instructor on the substance of their work as well as on their oral and writing skills, with suggestions for improvement.

**Attributes:** Linguistics  PHIL History Courses

**Not offered current academic year**

**PHIL 338  (F)  Intermediate Logic  (QFR)**

**Cross-listings:** MATH 338  PHIL 338

**Primary Cross-listing**

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

**Requirements/Evaluation:** problem sets and exams

**Prerequisites:** some class in which student has studied formal reasoning

**Enrollment Limit:** 20

**Enrollment Preferences:** Philosophy majors; juniors and seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 338 (D3)  PHIL 338 (D2)

**Quantitative/Formal Reasoning Notes:** This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

**Attributes:** Linguistics

**Not offered current academic year**

**PSYC 222  (F)  Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science**

**Cross-listings:** PSYC 222  PHIL 222  COGS 222

**Secondary Cross-listing**

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the
philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: This hybrid course will meet in-person and will also be available for remote video attendance and participation. Remote students will be expected to attend class synchronously with the in-person lecture and will not be able to watch lectures at other times, so must be available during the class hours in the catalog. Supplemental material—e.g., office hours, study sessions for exams, background discussion for weekly assignments—will be delivered on-line.

Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises

Prerequisites: PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended. It is not necessary to contact the instructor to indicate a special interest in the course.

Enrollment Limit: 20

Enrollment Preferences: sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 258 (S) Language and Literacy Development

Cross-listings: PSYC 258 JAPN 258

Secondary Cross-listing

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatical studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: discussion

Requirements/Evaluation: quizzes, short writing assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Alex Apotsos, Visiting Lecturer in Geosciences
Henry W. Art, Professor of Biology and Environmental Studies
Sonya Auer, Visiting Assistant Professor of Biology
Lois M. Banta, Professor of Biology
Ron D. Bassar, Assistant Professor of Biology
Ben Benedict, Lecturer in Art
Mary K. Bercaw-Edwards, Associate Professor for Literature of The Sea, Williams-Mystic Maritime Studies Program
Julie C. Blackwood, Assistant Professor of Mathematics
Roger E. Bolton, Professor of Economics, Emeritus
Cory E. Campbell, instructional Technology Specialist
Phoebe A. Cohen, Associate Professor of Geosciences
Anthony J. Carrasquillo, Assistant Professor of Chemistry
David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies
Jose E.A. Constantine, Assistant Professor of Geosciences
Mea S. Cook, Associate Professor of Geosciences
David P. Dethier, Professor of Geosciences
Joan Edwards, Professor of Biology
Laura Ephraim, Associate Professor of Political Science
Michael Evans, Assistant Director of The Zilkha Center for Environmental initiatives
Jessica M. Fisher, Assistant Professor of English
Antonia Foias, Professor of Anthropology and Sociology
Jennifer L. French, Professor of Spanish
Sarah S. Gardner, Lecturer in Environmental Studies
Matthew Gibson, Assistant Professor of Economics
Lisa Gilbert, Associate Professor of Geosciences and Marine Sciences
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;

• Understand the political and economic factors that inform, enable, and constrain environmental policy;

• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;

• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;

• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

  Introductory Course

  MAST/ENVI/GEOS 104 Oceanography

  Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

  Capstone Course

  ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

  MAST/ENGL 231 Literature of the Sea

  MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

  MAST/ENVI 351/ PSCI 319 Marine Policy

  MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.
INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

- MAST 397, 398 Independent Study: Maritime Studies
- MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN MARITIME STUDIES
Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 104 (S) Oceanography

Cross-listings: GEOS 104 MAST 104 ENVI 104

Secondary Cross-listing

The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: two midterm exams, homework, lab work, participation in the field trip, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 211 (S) Oceanographic Processes

Cross-listings: MAST 211 GEOS 210

Primary Cross-listing

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean’s role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option
MAST 231 (S) Literature of the Sea

Cross-listings: ENGL 231 MAST 231

Primary Cross-listing
Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville’s masterpiece Moby-Dick aboard Mystic Seaport’s historic whaleship, the Charles W. Morgan, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

Class Format: weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1)

MAST 245 (F) Hydrothermal Vents (WS)

Cross-listings: GEOS 245 MAST 245 ENVI 245

Secondary Cross-listing
Hydrothermal vents are perhaps the most alien places on Earth. Many are located on active volcanoes, especially at mid-ocean ridges, where magma super-heats water to form underwater hot springs. Others are located at deep-sea fracture zones, where the exothermic reaction of serpentinization provides the heat to drive hydrothermal circulation. Hydrothermal vents are extreme environments which host unique organisms, like giant tubeworms and giant hydrothermal clams, that are found only at these deep sea oases. This tutorial will examine how and where hydrothermal vents form, the strange and ancient life there, and why they are relevant despite feeling so far removed from our daily lives. Hydrothermal vent science draws on geology, physics, chemistry, and biology, so prior interest or coursework in one or more of those fields is suggested. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class will meet remotely. Students will meet in pairs weekly with the instructor for one hour. The entire class will meet once at the beginning of the semester for organizational purposes and at the end of the semester for a synthesis.

Requirements/Evaluation: Five 5-page papers, critiques of tutorial partner’s papers, final reflection, and participation

Prerequisites: none, open to all students

Enrollment Limit: 10

Enrollment Preferences: 1. sophomores, 2. first-years, 3. junior and senior GEOS majors and MAST concentrators
Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 245 (D3) MAST 245 (D3) ENVI 245 (D3)

Writing Skills Notes: Students will write six 5-page papers. The first five papers will be written every other week, alternating with a tutorial partner. Students will receive oral and written feedback during a discussion with the instructor and their tutorial partner. Students will write a final 5-page reflection paper to synthesize their learning.

MAST 263 (F) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Primary Cross-listing

Though it covers most of the planet, the ocean’s importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world’s oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: BIOL 165 MAST 265 ENVI 265

Primary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's
functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Does not count for Biology major credit.

**MAST 267 (F) Coastal Communities and Climate Justice** (DPE)

**Cross-listings:** PSCI 256  GEOS 257  MAST 267  ENVI 267

**Primary Cross-listing**

Climate change poses extraordinary challenges to our country's coastal communities; the impacts of which will not be borne equally. Access to innovative technological, scientific, financial and legal resources is controlled by policy makers. Equal access is critical for the sustainability of our coastal communities. But fair decisions require vulnerable communities to have a voice in local climate change adaptation decisions. This seminar course will introduce you to basic concepts of climate justice in the context of our Nation's coastal communities, guided by the UN Framework Convention on Climate Change. The course will introduce you to fundamental coastal and ocean-based climate-induced impacts with a focus on sea level rise, ocean warming, ocean acidification and coastal infrastructure. We will examine these impacts, as well as local, state, regional and federal policy responses to them through the lens of climate justice. We will identify what's working and what more needs to be done to advance climate equity and justice in the wake of formidable global and local change. Proficiency will be demonstrated through class participation, work conducted in small group strategy exercises, discussion board posts, short research assessment papers and a final written project. There are three goals in this course: first to broaden your understanding of the disproportionate effects of climate change to underrepresented, disempowered, poor, urban and indigenous populations living in American coastal communities; second to provide you with tools to identify inequity; third, to increase your own voice to promote avenues to seek climate justice.

**Class Format:** remote

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small group strategy exercises; Four on-line discussion board posts; Two 2-3-page data & research assessment papers; Final written project--multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** social science; This course does not count toward the Geosciences Major.

**Distributions:** (D2) (DPE)

MAST 324 (S) Corals and Sea Level
Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing
In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10
MAST 351 (S) Marine Policy (WS)

Cross-listings: ENVI 351 MAST 351 PSCI 319

Primary Cross-listing

This seminar considers contemporary issues in our relationship with our ocean and marine environment and the critical roles our oceans and coasts play in our Nation's environmental sustainability, and ocean and coastal climate resiliency and stability. By analyzing case and statutory law and policies that relate to our rich and diverse coastal and marine environment, we critically examine the many conflict of use issues present in the coastal and marine environment. The course examines coastal zone management, climate change, fisheries, environmental justice, ocean and coastal pollution, marine biodiversity and admiralty, through the lens of coastal and ocean governance and policy-making. Semester-long independent research engages students with ocean and coastal stakeholders to develop policy strategies and solutions to contemporary issues impacting America's coastlines and oceans.

Class Format: seminar, discussions, guest lectures by active professionals, and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore

Requirements/Evaluation: an independent research project, and two presentations.

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Connecticut

Expected Class Size: 22

Grading: no pass/fail option, yes fifth course option

Unit Notes: offered only at Williams-Mystic at Mystic Seaport Museum in CT

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 351 (D2) MAST 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student writes a short paper identifying research goals, a draft outline of the research paper, a draft of the research paper (10-15 pp.), as well as a final 8-10 pp. research paper. Each submission receives written feedback from professor, including additional research resources, input on grammar, structure, language, analysis as well as an assessment of and assistance with credibility and feasibility of proposed final policy recommendation; several individual conferences held as well.

MAST 352 (S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MAST 402  (S)  Senior Seminar: Perspectives on Environmental Studies  (WS)

Cross-listings: MAST 402  ENVI 412

Secondary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration
MAST 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 404 MAST 404 GEOS 404

Secondary Cross-listing
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor
Enrollment Limit: none
Enrollment Preferences: senior Geosciences majors, then juniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Not offered current academic year
MATERIALS SCIENCE STUDIES (Div III)

Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.

MTSC Courses

CHEM 336 (S) Materials Chemistry
Materials Science focuses on the study of bulk physical properties such as hardness, electrical conductivity, optical behavior, and elasticity. Materials chemists bridge the gap between traditional synthetic chemists and materials scientists, by working to understand the relationships between bulk physical properties, length scale (mesoscale, nanoscale), and molecular structure. This course will cover a variety of different types of materials and their properties including solids (insulators, semiconductors, conductors, superconductors, magnetic materials), soft materials (polymers, gels, liquid crystals), nanoscale structures, and organic electronics. We'll examine some of the latest developments in materials chemistry, including new strategies for the synthesis and preparation of materials on different length scales, as well as a variety of potential applications of emerging technologies.

Class Format: three hours per week
Requirements/Evaluation: problem sets, reviews of research articles, hour exams, and a final exam
Prerequisites: CHEM 155 or 256 and 251/255
Enrollment Limit: 24
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: MTSC Courses

Not offered current academic year

CHEM 348 (S) Polymer Chemistry
From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: lecture three hours per week and laboratory four hours per week
Requirements/Evaluation: weekly literature discussions, two exams, and a final project
Prerequisites: CHEM 251/255
Enrollment Limit: 12
Enrollment Preferences: Chemistry majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

CHEM 364  (F)  Instrumental Methods of Analysis

Cross-listings:  ENVI 364  CHEM 364

Primary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Lectures will cover the theory and uses of these techniques. By exploring the primary literature and review articles we will discuss recent advances in instrumental methods that address today's analytical questions. The theoretical knowledge will be complemented by hands-on use of our research instruments to study molecules and materials of interest. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: hybrid: classroom/online activities (2 x 75 min); 4 h per week of laboratory (M or W; segmented into discussion and experimental periods with 30-min break)

Requirements/Evaluation:  class participation, two mid-term exams, problem sets, oral presentations and discussions of selected topics, an independent project and performance in the laboratories including lab reports

Prerequisites:  CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit:  6/lab

Enrollment Preferences:  Chemistry and Environmental Studies majors

Expected Class Size:  12

Grading:  no pass/fail option,  no fifth course option

GEOS 202  (F)  Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

Class Format: Hybrid. lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation:  one hour test, lab work, and a final exam

Prerequisites:  one 100-level GEOS course or permission of instructor

Enrollment Limit:  14
Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option

GEOS 234 (S) Introduction to Materials Science (QFR)
Cross-listings: GEOS 234  PHYS 234
Secondary Cross-listing
Materials Science is the study of how the microscopic structure of materials--whether steel, carbon fiber, glass, wood, plastic, or mayonnaise--determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.
Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)
Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component
Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: based on students' scientific background and seniority
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course does not count toward the Geosciences major.
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 234 (D3) PHYS 234 (D3)
Attributes: MTSC Courses
Not offered current academic year

PHYS 451 (S) Condensed Matter Physics (QFR)
Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.
Requirements/Evaluation: weekly readings and problem sets, and exams
Prerequisites: PHYS 301, PHYS 302 (may be taken simultaneously) preferred; or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Physics majors
Expected Class Size: 4-6
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Attributes: MTSC Courses

MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.
Calculus (2 courses)
Mathematics 140 Calculus II
Mathematics 150 or 151 Multivariable Calculus

Applied/Discrete Mathematics/Statistics (1 course)
or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)
or Mathematics 200 Discrete Mathematics
or Statistics 201 Statistics and Data Analysis
Mathematics 309 Differential Equations
or a more advanced applied/discrete/statistics course with prior department approval

Core Courses (3 courses)
Mathematics 250 Linear Algebra
Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis
Mathematics 355 Abstract Algebra

Completion (3 courses plus colloquium)
Two electives from courses numbered 300 and above

One Senior Seminar: Any course numbered between 400 and 479, taken in the junior or senior year.

Participation in the Department Colloquium, in which all senior majors present a talk on a mathematical or statistical topic of their choice. Each major must attend at least 20 colloquia (reduced to 15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

Pass/Fail policies during the Academic Year 2020-2021
Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found here.

ADVANCED PLACEMENT
Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

CALCULUS PLACEMENT
Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:

BC 1, 2 or AB 2, 3 Math 140
AB 4 or 5 Math 150
BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

NOTES
Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the “Budapest Semester in Mathematics” are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow
students to spend more easily a semester away.

**Double Counting:** No course may count towards two different majors.

**Planning Courses:** Core courses Mathematics 350/351 and 355, are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.

Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

**Course Admission:** Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

- Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

**THE DEGREE WITH HONORS IN MATHEMATICS**

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a “minithesis” and a presentation. Note that during the Academic Year 2020-2021 the winter study requirement for thesis and “minithesis” is waved. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

**APPLIED MATHEMATICS TRACK**

Students interested in applied mathematics, engineering, or other sciences should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Statistics 201 Statistics and Data Analysis
Mathematics 250 Linear Algebra
Mathematics 351 Applied Real Analysis
Mathematics 355 Abstract Algebra
Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you’ve had CSCI 134)
MATH 309 or Post-core Differential Equations/Numerical Methods
Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

GRADUATE SCHOOL TRACK
Students interested in continuing their study of mathematics in graduate school should consider:

Mathematics 140 Calculus II
Mathematics 150 or 151 Multivariable Calculus
Mathematics 250 Linear Algebra
Mathematics 350 Real Analysis
Mathematics 355 Abstract Algebra
Complex Analysis
Topology
Some second semester analysis
Some second semester algebra
Some post-core geometry
Thesis

[With prior permission, in unusual circumstances, senior seminar can be waived in favor of harder post-core electives.]

Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.

Students interested in studying statistics in graduate school should take STAT 201, 346, 360, a 400 level statistics course and MATH 350/351 and 341 in addition to their other math requirements.

OTHER CAREER PATHS

Other Graduate and Professional Schools: An increasing number of graduate and professional schools require mathematics and statistics as a prerequisite to admission or to attaining their degree. Students interested in graduate or professional training in business, medicine, economics, or psychology are advised to find out the requirements in those fields early in their college careers.

Statistics and Actuarial Science: Students interested in statistics or actuarial science should consider Mathematics 341, Statistics courses, and Economics 255. Additionally, students should consider taking some number of the actuarial exams given by the Society of Actuaries, which can constitute part of an honors program in actuarial studies (see section on honors above).

Teaching: Students interested in teaching mathematics at the elementary or secondary school level should consider courses on teaching, number theory, geometry, statistics, and practice as a tutor or teaching assistant. Winter study courses that provide a teaching practicum are also highly recommended. Consult the Program in Teaching (Professor Susan Engel) and the Office of Career Counseling.

Business and Finance: Students interested in careers in business or finance should consider Mathematics 333 and Statistics courses. Since these courses address different needs, students should consult with the instructors to determine which seem to be most appropriate for individuals.

There are three types of 300-level courses. There are the core courses: Real Analysis, MATH 350/351, and Abstract Algebra Math 355. There are the "precore" courses, which do not have the core courses as prerequisites and have numbers 300-349. Finally, there are those courses that have an Abstract Algebra or Real Analysis prerequisite, which are numbered 360-399.
MATH 102 (F) Foundations in Quantitative Skills
This course will strengthen a student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will be at the college algebra/precalculus level, and covered in a tutorial format with students working in small groups with the professor. Access to this course is limited to placement by a quantitative skills counselor.

Requirements/Evaluation: homework, presentations during the tutorial meetings, and projects
Prerequisites: access to the course is limited to placement by a quantitative skills counselor
Enrollment Limit: 10
Enrollment Preferences: students who need most help with the quantitative reasoning
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Fall 2020
TUT Section: HT1 TBA Mihai Stoiciu

MATH 110 (F) Logic and Likelihood (QFR)
How best can we reason in the face of uncertainty? We will begin with an examination of rationality and the reasoning process including a survey of formal logic. Starting with uncertainty from a psychological and philosophical viewpoint, we will move to a careful theory of likelihood and how to reason with probabilistic models. The course will conclude with a consideration of observation and information, how to test hypotheses, and how we update our beliefs to incorporate new evidence.

Requirements/Evaluation: homework, essays, presentations, exams, and participation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-year students
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course will be covering formal logic and probability theory at sufficient depth to place this course on level with other QFR designated courses.
Not offered current academic year

MATH 113 (S) The Beauty of Numbers (QFR)
Have you ever wondered what keeps your credit card information safe everytime you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization.

Requirements/Evaluation: projects, homework assignments, and exams
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor
Enrollment Limit: 25
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Not offered current academic year

MATH 119  (F)  The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses  (QFR)

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation:  Homework, writing, class participation.
Prerequisites:  none
Enrollment Limit:  30
Enrollment Preferences:  all students will have an equal chance; if possible none will be turned away.
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3) (QFR)
Quantative/Formal Reasoning Notes:  We will discuss mathematical models and use statistics to analyze data.

Fall 2020
LEC Section: H1    MWF 10:40 am - 11:30 am     Steven J. Miller

MATH 130  (F)(S)  Calculus I  (QFR)

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation:  Weekly homework and quizzes, 2 exams during the semester, and one final
Prerequisites:  MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before
Enrollment Limit:  30
Enrollment Preferences:  first-year students
Expected Class Size:  20
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor
Distributions:  (D3) (QFR)
Quantative/Formal Reasoning Notes:  This a calculus course.

Fall 2020
LEC Section: H1    TF 1:30 pm - 2:45 pm     Lori A. Pedersen
LEC Section: H2    TF 3:15 pm - 4:30 pm     Lori A. Pedersen

Spring 2021
LEC Section: 01    TBA     Lori A. Pedersen

MATH 140  (F)(S)  Calculus II  (QFR)
Mastery of calculus requires understanding how integration computes areas and business profit and acquiring a stock of techniques. Further methods solve equations involving derivatives (“differential equations”) for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams

Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit: 30

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above

Distributions: (D3) (QFR)

Fall 2020
LEC Section: R1    TF 1:30 pm - 2:45 pm    Josh Carlson
LEC Section: R2    TF 3:15 pm - 4:30 pm    Josh Carlson

Spring 2021
LEC Section: 01    TBA    Josh Carlson

MATH 150  (F)(S)  Multivariable Calculus  (QFR)

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations. Note: This course will be taught via flipped-course method, an instructional strategy reversing the traditional learning environment by delivering instructional content outside of the classroom. This includes prerecorded lectures along with questions that students must watch and answer prior to attending class. Class time include synchronous meetings clarifying concepts and working in small groups through challenging problems with the support of the professor and peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this course.

Requirements/Evaluation: Video readiness assessments, problem sets, exams, and participation.

Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

Enrollment Limit: 30

Enrollment Preferences: Professor's discretion

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: mathematics

Spring 2021
SEM Section: 01    TBA    Steven J. Miller

MATH 151  (F)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

**Class Format:** Hybrid; short lectures will be asynchronous, with longer synchronous in-person problem sessions (these will be available remotely, and uploaded later for asynchronous viewing)

**Requirements/Evaluation:** homework, quizzes, and exams

**Prerequisites:** AP BC 3 or higher or integral calculus with infinite series

**Enrollment Limit:** 30

**Enrollment Preferences:** First-years, sophomores, and juniors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course builds quantitative skills

---

**MATH 200 (F)(S) Discrete Mathematics (QFR)**

This course will help you understand the world through a mathematical lens and will develop your powers of argumentation and critical thinking. We will explore and utilize diverse areas of discrete mathematics including logic, set theory, functions and relations, combinatorics, probability, networks, and more. We also will discuss methods and styles of mathematical proofs in order to prepare you for more advanced math courses. Finally, while mathematical knowledge is often perceived as being “pure,” we will highlight some ways in which it is socially constructed and hence subject to human limitations and biases.

**Class Format:** To afford students flexibility during the COVID pandemic, this course is taught online. Students will watch lecture material asynchronously and will participate in a once-per-week synchronous small-group tutorial meeting with the instructor via video chat.

**Requirements/Evaluation:** Students will complete checkpoint quizzes on videos and reading assignments, regularly assigned homework problems, and reflective writing assignments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

**Prerequisites:** Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

**Enrollment Limit:** 30

**Enrollment Preferences:** As determined by instructor.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course involve developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.
MATH 210  (S) Mathematical Methods for Scientists  (QFR)
Cross-listings: PHYS 210  MATH 210

Secondary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week
Requirements/Evaluation: several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210 (D3) MATH 210 (D3)

Spring 2021
LEC Section: 01   TBA   Allison Pacelli

MATH 250  (F)(S) Linear Algebra  (QFR)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely.
Requirements/Evaluation: homework, exams, and possibly short remote meetings outside of class.
Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 30
Enrollment Preferences: Students who have officially declared a major that requires Math 250.
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: In this course, students will engage in both quantitative and formal reasoning.
Attributes: COGS Related Courses

LEC Section: H2   TF 3:15 pm - 4:30 pm   Susan R. Loepp
MATH 306 (S) Fractals and Chaos (QFR)
Early in the course we introduce the notion of dynamical systems. Then we will develop the mathematics behind iterated function systems and study
the notions of fractals and chaos. There will be a lot of computer experimentation with various programs and resources which the students are
expected to use to learn and discover properties of fractals. The final topics will include dimension complex dynamics and the Mandelbrot set.
Requirements/Evaluation: homework, projects and exams
Prerequisites: MATH 250
Enrollment Limit: 30
Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

MATH 307 (S) Computational Linear Algebra (QFR)
Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining,
computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors,
convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large
scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear
equations; approximation and statistical function estimation; optimization; interpolation; and Monte Carlo techniques. This course could also be
considered a course in numerical analysis or computational science.
Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Prerequisites: MATH 250, some elementary computer programming experience is strongly recommended
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Spring 2021
LEC Section: 01 TBA Chad M. Topaz

MATH 309 (F) Differential Equations (QFR)
Ordinary differential equations (ODE) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of
ODE from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors,
constant coefficient linear equations, and power series solutions. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find
analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain some information about the behavior of the ODE without
explicitly knowing the solution.
Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely
Requirements/Evaluation: quizzes/exams, problem sets, participation, and possible activities
Prerequisites: MATH 150/151 and MATH 250
Enrollment Limit: 20
Enrollment Preferences: discretion of the instructor
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
MATH 310  (F)  Mathematical Biology  (QFR)

Cross-listings: BIOL 210  MATH 310

Primary Cross-listing

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper

Prerequisites: MATH 250 and MATH 309, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 210 (D3)  MATH 310 (D3)

Quantative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.

Attributes: PHLH Methods in Public Health

MATH 312  (F)  The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses  (QFR)

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation: Class participation, writing, homework problems.

Prerequisites: Linear algebra recommended.

Enrollment Limit: none

Enrollment Preferences: all students will have an equal chance; if possible none will be turned away.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.
MATH 313 (S) Introduction to Number Theory (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will be using an active learning method, an instructional strategy reversing the traditional learning environment by supplying instructional content outside of the classroom. This will include reading the textbook and completing other assigned activities prior to attending class. Class time will be spent clarifying concepts and working in small groups through challenging problems with the support of the professor and peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this class.

Class Format: This course will employ an active learning method rather than the traditional lecture. Please see the course description for details.

Requirements/Evaluation: Daily class participation (individual and group based), weekly homework and quizzes, in class exams, and a cumulative final.

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: All are welcome regardless of major or year. In case of over-enrollment, preference will be given to those needing the course for graduation.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2021

LEC Section: 01 TBA Eva Goedhart

MATH 314 (S) Cryptography (QFR)
An introduction to the techniques and practices used to keep secrets over non-secure lines of communication, including classical cryptosystems, the data encryption standard, the RSA algorithm, discrete logarithms, hash functions, and digital signatures. In addition to the specific material, there will also be an emphasis on strengthening mathematical problem solving skills, technical reading, and mathematical communication.

Requirements/Evaluation: exams, homework, and quizzes

Prerequisites: MATH 250

Enrollment Limit: 30

Enrollment Preferences: graduating seniors and Math majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course will contain mathematical proofs.

Not offered current academic year

MATH 315 (S) Methods for Solving Diophantine Equations (QFR)
A Diophantine equation is an equation with integer (or rational) coefficients that is to be solved in integers (or rational numbers). A focus of study for hundreds of years, Diophantine analysis remains a vibrant area of research. It has yielded a multitude of beautiful results and has wide ranging applications in other areas of mathematics, in cryptography, and in the natural sciences. In this project-based tutorial, we will focus on studying and
implementing various methods for solving previously unsolved infinite families of Diophantine equations. Depending on their interests, students may choose one or several methods to apply to open problems in the field.

**Requirements/Evaluation:** Weekly homework and oral presentations, and a final written project manuscript that will be continually edited all semester (the length of which will depend on the mathematical content and choice of topic)

**Prerequisites:** MATH 250 or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Sophomores, Juniors, and Seniors based on a short questionnaire of interests.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (QFR)

**Quantitative/Formal Reasoning Notes:** This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2021

**MATH 317 (F) Introduction to Operations Research** (QFR)

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial stats component approved by the instructor.

**Prerequisites:** Linear Algebra (MATH 250) and one other 200-level or higher CSCI, MATH or STATS course.

**Requirements/Evaluation:** homework, exams, projects

**Prerequisites:** MATH 150, MATH 250 and one other 200-level or higher CSCI, MATH or STATS course

**Enrollment Limit:** 40

**Enrollment Preferences:** Computer Science, Mathematics and Statistics majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** [http://web.williams.edu/Mathematics/sjmiller/public_html/317/](http://web.williams.edu/Mathematics/sjmiller/public_html/317/)

**MATH 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab** (QFR)

**Cross-listings:** MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

**Secondary Cross-listing**

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory
mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** two afternoons of lab, with one hour of lecture, per week

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2021

SEM Section: 01  TBA  Lois M. Banta

**MATH 321 (S) Knot Theory** (QFR)

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

**Requirements/Evaluation:** problem sets, midterms, a paper and a final exam

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 30

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

Not offered current academic year

**MATH 325 (F) Set Theory** (QFR)

Set theory is the traditional foundational language for all of mathematics. We will be discussing the Zermelo-Fraenkel axioms, including the Axiom of Choice and the Continuum Hypothesis, basic independence results and, if time permits, incompleteness theorems. At one time, these issues tore at the foundations of mathematics. They are still vital for understanding the nature of mathematical truth.

**Requirements/Evaluation:** exams and homework

**Prerequisites:** MATH 250

**Enrollment Limit:** 30

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option
MATH 328 (S) Combinatorics (QFR)
Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.

Class Format: interactive activities and discussion
Requirements/Evaluation: quizzes/exams, homework, activities
Prerequisites: MATH 200 and MATH 250
Enrollment Limit: 30
Enrollment Preferences: discretion of the instructor
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

MATH 329 (S) Discrete Geometry (QFR)
Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of the ancient Greeks to the modern day applications of convex optimization and linear programming. In this tutorial we will learn about polygons and their higher-dimensional cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as "posted to the internet yesterday."

Requirements/Evaluation: participation, problem sets, oral presentations, an oral exam, and a final project
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first-years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

MATH 331 (F) The little Questions (QFR)
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/331/
MATH 334 (S) Graph Theory (QFR)
A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We will learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

Requirements/Evaluation: problem sets and exams
Prerequisites: MATH 200 or MATH 250
Enrollment Limit: 35
Enrollment Preferences: Math majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Spring 2021
LEC Section: 01 TBA Josh Carlson

MATH 337 (F) Electricity and Magnetism for Mathematicians (QFR)
Maxwell’s equations are four simple formulas, linking electricity and magnetism, that are among the most profound equations ever discovered. These equations led to the prediction of radio waves, to the realization that a description of light is also contained in these equations and to the discovery of the special theory of relativity. In fact, almost all current descriptions of the fundamental laws of the universe are deep generalizations of Maxwell’s equations. Perhaps even more surprising is that these equations and their generalizations have led to some of the most important mathematical discoveries (where there is no obvious physics) of the last 25 years. For example, much of the math world was shocked at how these physics generalizations became one of the main tools in geometry from the 1980s until today. It seems that the mathematics behind Maxwell is endless. This will be an introduction to Maxwell’s equations, from the perspective of a mathematician.

Requirements/Evaluation: performance on homework and exams
Prerequisites: MATH 250; no physics background required
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Not offered current academic year

MATH 338 (F) Intermediate Logic (QFR)
Cross-listings: MATH 338 PHIL 338
Secondary Cross-listing
In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel’s Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to
cover.

**Requirements/Evaluation:** problem sets and exams  
**Prerequisites:** some class in which student has studied formal reasoning  
**Enrollment Limit:** 20  
**Enrollment Preferences:** Philosophy majors; juniors and seniors  
**Expected Class Size:** 15  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D2) (QFR)  

This course is cross-listed and the prefixes carry the following divisional credit:  
MATH 338 (D3) PHIL 338 (D2)  

**Quantitative/Formal Reasoning Notes:** This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.  
**Attributes:** Linguistics  

Not offered current academic year

**MATH 340 Applications of Mathematics to the Real World** (QFR)

Often for real world applications one does not need to find the optimal solution, which can be extremely difficult, but instead just find something close, or at least better than what is currently being done. We will develop material and techniques from mathematics, statistics and allied fields with an eye to applications. In addition to standard homework assignments and exams there will be a group project where students will work with a local business, write a report and present the results. Pre-requisites are multivariable calculus and linear algebra, or permission of the instructor. Knowledge of some statistics or programming is beneficial but not required.  

**Class Format:** In addition to standard lectures and assignments, we will be partnering with local businesses to apply mathematics to solve real world problems.  
**Requirements/Evaluation:** Lectures and class participation, homework, exams and encouragement to do a project. We already have several local businesses with projects for students. Working on a project will entail meeting with officials from the company, clearly defining what the problem is, and writing a solution. This will include a presentation, a write-up, and potentially implementable code. Based on previous similar courses, these papers typically run from 10 to 40 pages.  
**Prerequisites:** Mathematics 150 or 151, and Linear Algebra, or permission of the instructor.  
**Enrollment Limit:** 40  
**Enrollment Preferences:** Students who have taken at least one statistics or computer science class  
**Expected Class Size:** 25  
**Grading:**  
**Distributions:** (D3) (QFR)  
**Quantitative/Formal Reasoning Notes:** This is a 300 level mathematics class  

Not offered current academic year

**MATH 341 (F)(S) Probability** (QFR)

**Cross-listings:** STAT 341 MATH 341

**Primary Cross-listing**

While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.  
**Requirements/Evaluation:** homework, classwork, and exams  
**Prerequisites:** MATH 250 or permission of the instructor  
**Enrollment Limit:** 20
Enrollment Preferences: Priority will be given to Stats majors.

Expected Class Size: 20

MATH 350 (F)(S) Real Analysis (QFR)

Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what does that actually mean? More fundamentally, what is the definition of a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions on them. Along the way we’ll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet’s and Riemann’s rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

Class Format: Discussion-based course held remotely.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Seniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

MATH 351 (S) Applied Real Analysis (QFR)

Real analysis or the theory of calculus-derivatives, integrals, continuity, convergence--starts with a deeper understanding of real numbers and limits. Applications in the calculus of variations or “infinite-dimensional calculus” include geodesics, harmonic functions, minimal surfaces, Hamilton’s action and Lagrange’s equations, optimal economic strategies, non-Euclidean geometry, and general relativity.

Requirements/Evaluation: exams, homework and quizzes

Prerequisites: MATH 150 and MATH 250, or permission of instructor

Enrollment Limit: 50

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)
MATH 355 (F)(S) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Class Format: Remote lectures. TA sessions will be held in person. If taken pass/fail, this course does not count towards the Mathematics major.

Requirements/Evaluation: problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: Questionnaires.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

MATH 361 (F)(S) Theory of Computation (QFR)
Cross-listings: MATH 361 CSCI 361
Secondary Cross-listing
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: Lecture content will be through asynchronously viewed video modules. Two scheduled course sections will be used for synchronous conference meetings. One section (MR) will be in-person and the other section (TR) will be remote. Students should sign up for lecture and one conference.

Requirements/Evaluation: online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination
Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor
Enrollment Limit: 20(10/sec)
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
MATH 361 (D3) CSCI 361 (D3)
Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

MATH 368 (S) Positive Characteristic Commutative Algebra  (QFR)
In commutative algebra, one of the most basic invariants of a ring is its characteristic. This is the smallest multiple of 1 that equals 0. Working over a ring of characteristic zero, versus a ring of characteristic p>0, dramatically changes the proof techniques available to us. This realization has had tremendous consequences in commutative algebra. One of the most useful tools in characteristic p is the Frobenius homomorphism. In this course we will study several standard notions in commutative algebra, such as regularity of a ring, Cohen-Macaulayness, and being normal and we will see how various "splittings" of the Frobenius allow us to easily detect these properties. Many of these methods are not only applicable to commutative algebra, but also to number theory and algebraic geometry.

Requirements/Evaluation: homework and a final exam
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Math majors primarily, and juniors and seniors secondarily
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

MATH 374 (S) Topology  (QFR)
In Real Analysis you learned about metric spaces -- any set of objects endowed with a way of measuring distance -- and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it has become a vital part of data analysis and is also connected to many areas of math and physics. This course is excellent preparation for graduate programs in mathematics.

Requirements/Evaluation: homework, tutorials, and exams
Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323. Familiarity with basic group theory recommended, but not required.
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Math

Spring 2021
MATH 390  Undergraduate Research Topics in Algebra  (QFR)

The well-known trace map on matrices can be generalized to a map on other algebraic objects. Undergraduates, graduates students and experts in Representation Theory, Commutative Algebra and Algebraic Geometry have been driving recent developments in the theory of trace modules and finding exciting new applications in all of these three fields. This course will serve as an introduction to mathematical research with the aim of producing original research in modern trace theory. Students in this tutorial will read and synthesize research papers, discuss the formation of research questions in pure mathematics, and engage in original mathematical research.

Requirements/Evaluation: oral presentations; writing assignments (summarizing papers, reflections on mathematical research, original research); participation in the course project
Prerequisites: Math 355
Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors
Expected Class Size: 7
Grading:
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is post-core math class; students will be required to produce mathematical proofs.

Not offered current academic year

MATH 391  (F) Introduction to computer algebra  (QFR)

Students will learn new mathematics in the context of computer-based exposition, experimentation, and interaction. They will gain proficiency with Sage, GAP, Macaulay2, or Mathematica, and possibly one of the more-specialized systems SnapPea, kenzo, magma, MATLAB, Perseus, coq, etc. Individuals and teams will build interactive demonstrations of mathematical theorems, which will then be appreciated by the instructor and the rest of the class. No prior programming experience is expected.

Class Format: Class will be held online, but there will be recorded components, asynchronous interactive components, and outside-of-class small-group online meetings.

Requirements/Evaluation: exams, homework, projects
Prerequisites: Math 355 or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: math majors
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Mathematical programming requires complete synthesis of abstract concepts to produce computer code, which is necessarily formal.

MATH 392  (S) Undergraduate Research Topics in Graph Theory  (QFR)

Graph theory is a vibrant area of research with many applications to the social sciences, psychology, and economics. In this tutorial we focus on two topics of mathematical research in graph theory: evasion-pursuit games on graphs and domination theory. Students in this project-based tutorial will select among the presented topics, and will begin original research on an open problem in the field. Student assessment is based on problem sets, drafts of research project manuscript, and a final oral class presentation.

Requirements/Evaluation: homework assignments, oral presentations, and written project manuscript
Prerequisites: MATH 355 or permission of the instructor
Enrollment Limit: 10
Enrollment Preferences: programming experience, students with interests in the intersection of combinatorics and graph theory
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

MATH 402 (F) Measure Theory and Hilbert Spaces (QFR)
How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this set? What's the dimension? In this course we'll come up with precise ways to measure size -- length, area, volume, dimension -- that apply to a broad array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields like quantum mechanics and machine learning. This material provides good preparation for graduate studies in mathematics, statistics and economics.

Class Format: Discussion-based course held remotely.
Requirements/Evaluation: performance on homework assignments and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Seniors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Math
MATH 403 (S) Measure and Ergodic Theory  (QFR)
An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesgue and Borel measures, measurable functions, and Lebesgue integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, and Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

Requirements/Evaluation: homework and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Mathematics majors
Expected Class Size: 15-20
Grading: yes pass/fail option, yes fifth course option
Unit Notes: senior major course
Distributions: (D3) (QFR)

Not offered current academic year

MATH 404 (F) Random Matrix Theory  (QFR)
Initiated by research in multivariate statistics and nuclear physics, the study of random matrices is nowadays an active and exciting area of mathematics, with numerous applications to theoretical physics, number theory, functional analysis, optimal control, and finance. Random Matrix Theory provides understanding of various properties (most notably, statistics of eigenvalues) of matrices with random coefficients. This course will provide an introduction to the basic theory of random matrices, starting with a quick review of Linear Algebra and Probability Theory. We will continue with the study of Wigner matrices and prove the celebrated Wigner’s Semicircle Law, which brings together important ideas from analysis and combinatorics. After this, we will turn our attention to Gaussian ensembles and investigate the Gaussian Orthogonal Ensemble (GOE) and the Gaussian Unitary Ensemble (GUE). The last lectures of the course will be dedicated to random Schrodinger operators and their spectral properties (in particular, the phenomenon called Anderson localization). Applications of Random Matrix Theory to theoretical physics, number theory, statistics, and finance will be discussed throughout the semester.

Requirements/Evaluation: homework assignments and exams
Prerequisites: experience with Real Analysis (MATH 350 or MATH 351) and with Probability (MATH 341 or STAT 201)
Enrollment Limit: 40
Enrollment Preferences: Mathematics and Statistics majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course expands ideas in probability and statistics from random variables (1x1 random matrices) to nxn random matrices. The students will learn to model complex physical phenomena using random matrices and study them using rigorous mathematical tools and concepts.

Not offered current academic year

MATH 407 (F) Dance of the Primes  (QFR)
Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems
in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

**Requirements/Evaluation:** exams and weekly homework assignments

**Prerequisites:** MATH 350 or MATH 351, and MATH 355

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** It is a math course.

Not offered current academic year

**MATH 408  (F)  L-Functions and Sphere Packing  (QFR)**

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

**Requirements/Evaluation:** Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

**Prerequisites:** Math 350 or 351

**Enrollment Limit:** 40

**Enrollment Preferences:** Senior math majors, students planning on graduate study in a STEM field

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This is a 400 level math class

Fall 2020

LEC Section: H1    MWF 12:00 pm - 12:50 pm    Steven J. Miller

**MATH 411  (S)  Commutative Algebra  (QFR)**

Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of “prime ideals,” and how they generalize the well-known notion of primality in the set of integers. Possible topics include Noetherian rings, primary decomposition, localizations and quotients, height, dimension, basic module theory, and the Krull Altitude Theorem.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 355 or permission of instructor

**Enrollment Limit:** 30

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)
MATH 419  (S)  Algebraic Number Theory  (QFR)
We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.
Requirements/Evaluation:  homework assignments and exams
Prerequisites:  MATH 355, or permission of instructor
Enrollment Limit:  25
Expected Class Size:  20
Grading:  yes pass/fail option, yes fifth course option
Distributions:  (D3)  (QFR)

MATH 420  (S)  Analytic Number Theory  (QFR)
How many primes are smaller than x? How many divisors does an integer n have? How many different numbers appear in the N x N multiplication table? Over the course of the past 150 years, tremendous progress has been made towards resolving these and similar questions in number theory, relying on tools and methods from analysis. The goal of this tutorial is to explain and motivate the ubiquitous appearance of analysis in modern number theory—a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc). Topics to be covered include: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method, the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and the circle method, gaps between primes, and other topics as time and interest allow.
Requirements/Evaluation:  Regularly preparing lectures and writing expository essays in LaTeX. No exams.
Prerequisites:  MATH 350 or MATH 351 and familiarity with basic modular arithmetic are hard prerequisites. Familiarity with complex analysis and abstract algebra recommended, but not required.
Enrollment Limit:  10
Enrollment Preferences:  Those with complex analysis background will be given priority.
Expected Class Size:  10
Grading:  no pass/fail option, no fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  Math

Spring 2021
TUT Section:  T1  TBA  Leo Goldmakher

MATH 421  (S)  Quandles, Knots and Virtual Knots  (QFR)
A quandle is an algebraic object that, like a group, has a "multiplication" of pairs of elements that satisfies certain axioms. But the quandle axioms are very different from the group axioms, and quandles turn out to be incredibly useful when considering the mathematical theory of knots. In this course, we will learn about this relatively new area of research (1982) and learn some knot theory and see how quandles apply to both classical knot theory and the relatively new area of virtual knot theory (1999).
Requirements/Evaluation:  problem sets, tests, and a 3-page paper
Prerequisites:  MATH 355
Enrollment Limit:  40
Enrollment Preferences:  discretion of the instructor
MATH 422 (F) Algebraic Topology (QFR)
Is a sphere really different from a torus? Can a sphere be continuously deformed to a point? Algebraic Topology concerns itself with the classification and study of topological spaces via algebraic methods. The key question is this: How do we really know when two spaces are different and in what senses can we claim they are the same? Our answer will use several algebraic tools such as groups and their normal subgroups. In this course we will develop several notions of "equality" starting with the existence of homeomorphisms between spaces. We will then explore several weakenings of this notion, such as homotopy equivalence, having isomorphic homology or fundamental groups, and having homeomorphic universal covers.

Requirements/Evaluation: homework and exams
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Math majors primarily, the juniors and seniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

MATH 426 (F) Differential Topology (QFR)
Differential topology marries the rubber-like deformations of topology with the computational exactness of calculus. This sub field of mathematics asks and answers questions like "Can you take an integral on the surface of doughnut?" and includes far-reaching applications in relativity and robotics. This tutorial will provide an elementary and intuitive introduction to differential topology. We will begin with the definition of a manifold and end with a generalized understanding of Stokes Theorem.

Requirements/Evaluation: weekly homework, weekly presentations, and final paper
Prerequisites: MATH 350 (students who have not taken MATH 250 may enroll only with permission of the instructor)
Enrollment Limit: 10
Enrollment Preferences: seniors, majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: There will be weekly math problem sets.
Not offered current academic year

MATH 427 (S) Tiling Theory (QFR)
Since humans first used stones and bricks to tile the floors of their domiciles, tiling has been an area of interest. Practitioners include artists, engineers, designers, architects, crystallographers, scientists and mathematicians. This course will be an investigation into the mathematical theory of tiling. The course will focus on tilings of the plane, including topics such as the symmetry groups of tilings, the topology of tilings, the ergodic theory of tilings, the classification of tilings and the aperiodic Penrose tilings. We will also look at tilings in higher dimensions, including "knotted tilings".

Requirements/Evaluation: problem assignments, exams and a presentation/paper
Prerequisites: MATH 250 Linear Algebra and MATH 355 Abstract Algebra
Enrollment Limit: 30
Enrollment Preferences: senior majors, seniors, juniors, sophomores, first-year students (this is a senior seminar, one of which is required for all senior majors, so they have first preference)
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Materials/Lab Fee: cost of book which will be under $50
Distributions: (D3) (QFR)

Not offered current academic year

MATH 428 (S) Catching Robbers and Spreading Information (QFR)
Cops and robbers is a widely studied game played on graphs that has connections to searching algorithms on networks. The cop number of a graph is the smallest number of cops needed to guarantee that the cops can catch a robber in the graph. Similar combinatorial games such as "zero forcing" can be used to model the spread of information. The idea of "throttling" is to spread the information (or catch the robber) as efficiently as possible. This course will survey some of the main results about cops and robbers and the cop number. We will also explore recent research on throttling for cops and robbers, zero forcing, and other variants.

Class Format: interactive activities and discussion
Requirements/Evaluation: problem sets, investigation journal, final presentation
Prerequisites: MATH 200 and MATH 355
Enrollment Limit: 25
Enrollment Preferences: seniors
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: The course will involve mathematical proofs.
Not offered current academic year

MATH 433 (S) Mathematical Modeling (QFR)
Mathematical modeling means (1) translating a real-life problem into a mathematical object, and (2) studying that object using mathematical techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology, economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for students who have a strong enthusiasm for applied mathematics.

Class Format: discussion, research
Requirements/Evaluation: writing assignments, modeling activities, presentations, research project
Prerequisites: MATH 250, MATH 309 or similar, and some experience with computer programming (equivalent to CSCI 134 or MATH 307)
Enrollment Limit: 24
Enrollment Preferences: Professor's discretion
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Spring 2021
LEC Section: 01 TBA Chad M. Topaz

MATH 434 (F) Applied Dynamics and Optimal Control (QFR)
We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin's maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study.

Requirements/Evaluation: exams and homework assignments
MATH 453 (F) Partial Differential Equations (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, fluid dynamics, neuroscience, thermodynamics, and more. We introduce PDE models and develop techniques for studying them. Topics include: derivation, classification, and physical interpretation of canonical PDE; solution techniques, including separation of variables, series solutions, integral transforms, and characteristics; and application to problems in the natural and social sciences.

Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Prerequisites: MATH 150-151; MATH 209 or MATH/PHYS 210 or MATH 309
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Not offered current academic year

MATH 456 (F) Representation Theory (QFR)

Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.

Requirements/Evaluation: evaluation will be based primarily on homework, in class presentations, and exams
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: junior and senior Math majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a 400-level Math course.

MATH 458 (S) Algebraic Combinatorics (QFR)

Algebraic combinatorics is a branch of mathematics at the intersection of combinatorics and algebra. On the one hand, we study combinatorial structures using algebraic techniques, while on the other we use combinatorial arguments and methods to solve problems in algebra. This course will
focus on the study of symmetric functions, young tableaux, matroids, graph theory, and other related topics.

**Requirements/Evaluation:** homework assignments, proof portfolio, individual and group projects

**Prerequisites:** MATH 200 and MATH 355

**Enrollment Limit:** 25

**Enrollment Preferences:** seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Mathematics course in the area of algebraic combinatorics.

Not offered current academic year

---

MATH 459  (S)  Applied Partial Differential Equations  (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today's cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

**Requirements/Evaluation:** participation, problem sets, oral presentations, oral exams, and a final project

**Prerequisites:** MATH 209 or MATH/PHYS 210 or MATH 309 or permission of instructor; students who have taken MATH 453 may not enroll in MATH 458 without permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** students with an interest in applied mathematics, selected to create a diverse set of tutorial participants

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This tutorial involves regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Not offered current academic year

---

MATH 466  (F)  Advanced Applied Analysis  (QFR)

This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field, as well as applications in industry. Topics include Benford's law of digit bias, random matrix theory, and Fourier analysis, and as time permits additional areas based on student interest from analytic number theory, generating functions and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will assist in writing both reviews for MathSciNet and referee reports for papers for journals, write programs to investigate and conjecture, and read classic and current research papers, and possibly apply these and related methods to real world problems.

**Requirements/Evaluation:** homework, exams, possible paper/presentation

**Prerequisites:** MATH 350 or MATH 351

**Enrollment Limit:** 40

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

Not offered current academic year
MATH 474  (S)  Tropical Geometry  (QFR)

This course offers an introduction to tropical geometry, a young subject that has already established deep connections between itself and pure and applied mathematics. We will study a rich variety of objects arising from polynomials over the min-plus semiring, where addition is defined as taking a minimum, and multiplication is defined as usual addition. We will learn how these polyhedral objects connect to other areas of mathematics like algebraic geometry, and how they can be applied to solve problems in scheduling theory, phylogenetics, and other diverse fields.

Requirements/Evaluation: participation, problem sets, quizzes, exams, and a final project

Prerequisites: MATH 355 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: senior Math majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course builds quantitative skills

Spring 2021

LEC Section: 01    TBA    Ralph E. Morrison

MATH 482  (F)  Homological Algebra  (QFR)

Though a relatively young subfield of mathematics, Homological Algebra has earned its place by supplying powerful tools to solve questions in the much older fields of Commutative Algebra, Algebraic Geometry and Representation Theory. This class will introduce theorems and tools of Homological Algebra, grounding its results in applications to polynomial rings and their quotients. We will focus on some early groundbreaking results and learn some of Homological Algebra's most-used constructions. Possible topics include tensor products, chain complexes, homology, Ext, Tor and Hilbert's Syzygy Theorem.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 355

Enrollment Limit: 20

Enrollment Preferences: junior and senior math majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

Distributions: (D3) (QFR)

Not offered current academic year

MATH 484  (S)  Galois Theory  (QFR)

Some equations--such as \( x^5 - 1 = 0 \)--are easy to solve. Others--such as \( x^5 - x - 1 = 0 \)--are very hard, if not impossible (using standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

Requirements/Evaluation: written homeworks, oral presentations, and exams

Prerequisites: MATH 355

Enrollment Limit: 15

Enrollment Preferences: discretion of the instructor

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option
MATH 485 (F) Complex Analysis  (QFR)
The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called \textit{residue calculus} permits the computation of \textit{impossible} integrals, and \textit{conformal mapping} reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 40
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Advanced mathematics course with weekly or daily problem sets.
Not offered current academic year

MATH 487 (S) Computational Algebraic Geometry  (QFR)
Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.

Requirements/Evaluation: homework, exams, and final project
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: instructor decision
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major
Distributions: (D3) (QFR)
Not offered current academic year

MATH 493 (F) Senior Honors Thesis: Mathematics
Mathematics senior honors thesis; this is part of a full-year thesis (493-494). Each student carries out an individual research project under the direction of a faculty member that culminates in a thesis. See description under \textit{The Degree with Honors in Mathematics}.

**Winter Study**

**MATH 30 (W) Senior Project: Mathematics**
To be taken by candidates for honors in Mathematics other than by thesis route.
**Class Format:** honors project
**Grading:** pass/fail only

Not offered current academic year
**MATH 31 (W) Senior Thesis: Mathematics**

To be taken by students registered for Mathematics 493-494.

**Class Format:** thesis

**Grading:** pass/fail only

*Not offered current academic year*

---

**MATH 99 (W) Independent Study: Mathematics**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics. Students interested in continuing their study of statistics in graduate school should strongly consider taking Math 350/351 in addition to the other requirements.
Mathematics (2 courses)
  MATH 150 or 151 Multivariable Calculus or equivalent high school course
  MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151) before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

Computer Science (1 course)
  CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

Core Courses (4 courses)
  STAT 201 Statistics and Data Analysis, STAT 202 Introduction to Statistical Modeling or STAT 302 Applied Statistical Modeling
  STAT 346 Regression and Forecasting
  STAT 341 Probability
  STAT 360 Inferential Statistics

Continuation (2 courses)
  Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

Capstone Course (1 course)
  The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

Pass/Fail policies during the Academic Year 2020-2021
  Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found here.

Colloquium Requirement
  Participation in the Department Colloquium, in which each senior major presents a talk on a mathematical or statistical topic of their choice. Each major must also attend at least 20 colloquia (15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Up to 5 colloquia in mathematics or computer science may also be counted. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

PLACEMENT
  Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

NOTES
  Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

  These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

  Double Counting: No course may count towards two different majors.

  Early Senior Capstone Course: In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

  Planning Courses: Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

  Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ
  Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

  Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. During the Academic Year 2020-2021 the winter study requirement for the honors program in Statistics is waived. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)

It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: Hybrid format with both synchronous and asynchronous elements.

Requirements/Evaluation: quizzes and exams and course project

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 25

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with MATH130 but no statistics should enroll in STAT161; students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161/201 should enroll in STAT 202 (if no calc background) or 302 (MATH140 prereq).

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is a quantitative course.
STAT 161  (F)(S)  Introductory Statistics for Social Science  (QFR)
This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences and sciences. Topics include
exploratory data analysis, elements of probability theory, basic statistical inference, and introduction to statistical modeling. The course focuses on the
application of statistics tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.
Requirements/Evaluation:  students complete homework, multiple choice quizzes and exams (including remote oral exams), but also present applied
projects. Students can expect to spend time getting familiar with statistical software.
Prerequisites:  MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent
Enrollment Limit:  25
Enrollment Preferences:  Economics majors, sophomores
Expected Class Size:  25
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  students with calculus background should consider STAT 201, 202 or 302 instead. Students without any calculus background should
consider STAT 101. Please refer to the placement chart on the department website for more information.
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  Course analyzes data
Attributes:  PHLH Statistics Courses

STAT 201  (F)(S)  Statistics and Data Analysis  (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often
based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped
back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract
information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear
regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves
computational programming and incorporates modern statistical techniques.
Class Format:  Hybrid format: lecture material will be prerecorded, and you will be asked to attend (in person or virtually) one class session a week,
during which we will briefly review lecture materials, allow time for questions, and work through a lab in RStudio to practice using the techniques
discussed during that week’s lectures.
Requirements/Evaluation:  weekly homework; quizzes and exams
Prerequisites:  MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent
Enrollment Limit:  25
Enrollment Preferences:  Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors
Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202 (if no calc background) or 302 (MATH 140 prereq). Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Students will learn to interpret, choose, carry out, and communicate analyses of data.

STAT 202 (F)(S) Introduction to Statistical Modeling (QFR)
Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: Introductory lectures will be available asynchronously as text and video; synchronous sessions will discuss questions from lecture, dive further into the material, and work on examples. You'll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. The professor and TAs will also offer optional synchronous office hours/review sessions.

Requirements/Evaluation: Homework problems; quizzes; a final project (on a topic that interests you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

Prerequisites: AP Statistics 4 or 5, or STAT 101, or STAT 161, or STAT 201, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Prospective Statistics majors and more senior students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with a 4 on the AP Stats exam should contact the department for proper placement

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Attributes: EVST Methods Courses PHLH Statistics Courses

STAT 302 (F)(S) Applied Statistical Modeling (QFR)
Data may come from various sources and studies with different purpose of analysis. Statistical modeling provides a unified framework to embrace different data types, and focuses on the goals of understanding relationships, assessing differences and making predictions. We will explore different
types of statistical models (linear regression, ANOVA, logistic regression etc), and focus on their conditions, the interactive modeling process, as well as the statistical inference tools for drawing conclusions from them. Throughout the course, real datasets will be modeled for interesting questions about the world, and the limitations will be addressed as well.

Class Format: This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements.

Requirements/Evaluation: weekly homework assignments (consist of both theoretical and applied questions), short quizzes, possibly two exams and a course project.

Prerequisites: One of the following: i) STAT 201; ii) MATH 140 and STAT 101/161/AP Statistics 4/5; iii) Permission of instructor

Enrollment Limit: 19

Enrollment Preferences: students interested in statistics which have solid background in math and stat

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Fall 2020
LEC Section: H1 MWF 11:45 am - 1:00 pm Xizhen Cai

Spring 2021
LEC Section: 01 TBA Xizhen Cai

STAT 310 (F) Data Visualization (QFR)

This course is about preparing, visualizing, reporting and presenting different types of data. We will start with creating common plots (e.g., barcharts, histograms, density plots, boxplots, time series and lattice plots), but also discuss visualizing results of statistical models, such as linear or logistic regression models. We will use the ggplot library in R but then switch to the plotly library for interactive graphs with mouse-over and click events. Using R’s shiny and DT libraries, we will learn how to create and publish web-apps and dashboards that explore datasets and support online filtering. We will end the class with creating web apps that contain multiple graphs or maps which react to user inputs (such as selecting which variables to plot) or provide real time monitoring of streaming data. Throughout, we will use version control software (Github) to organize and keep track of our code. This course will be taught in a semi-flipped style. While the instructor will introduce certain topics, students will often be responsible for reading material ahead of time and then work individually or in pairs to reproduce material or implement it on their own data.

Requirements/Evaluation: Grading will almost entirely be based on class participation, individual and team-work, project presentations and the student's portfolio.

Prerequisites: Stat 201/202/302; Good knowledge of R

Enrollment Limit: 15

Enrollment Preferences: Preference may be given to stats majors who need the course in order to graduate, but then random selection.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course teaches how to organize and present data graphically, but also how to critique existing data visualizations.

Fall 2020
LEC Section: R1 MW 10:00 am - 11:15 am Bernhard Klingenberg

STAT 315 (S) Applied Machine Learning (QFR)

How does Netflix recommend films based on your viewing history? How does Facebook group its users and send out targeted ads? How did Google select from thousands of search terms to predict flu? Machine learning (ML) is a rapidly growing field that is concerned with algorithms and models to find patterns in data and solve these practical problems at the intersection between statistics, data science and computer science. This course provides a broad introduction to ideas and methods in machine learning, with emphasis on statistical intuitions and practical data analysis. Topics
including regularized regression, SVM, supervised/unsupervised learning, text analysis, neural networks will be covered. Students will use R extensively throughout the course while getting introduced to some ML tools in Python.

**Requirements/Evaluation:** weekly homework, one class project, and two or three exams  
**Prerequisites:** MATH 140, and STAT 201/202, or equivalent; or permission of instructor  
**Enrollment Limit:** 30

**STAT 335 (S) Biostatistics and Epidemiology** (QFR)  
Epidemiology, a public health discipline, is the study of disease and disability in human populations. Biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and a brief introduction to regression with correlated data.  
**Requirements/Evaluation:** evaluation will be primarily based on weekly homework, two midterm exams, an in-class final exam, and a data analysis project  
**Prerequisites:** STAT 201 or 202 and MATH 140, or permission of instructor  
**Enrollment Limit:** 30  
**Enrollment Preferences:** Junior and senior statistics majors; public health concentrators  
**Expected Class Size:** 15  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D3) (QFR)  
**Quantitative/Formal Reasoning Notes:** This is a statistics course with a focus on quantitative methods relevant to public health studies.  
**Attributes:** PHLH Statistics Courses

Spring 2021

**STAT 341 (F)(S) Probability** (QFR)  
**Cross-listings:** STAT 341 MATH 341  
**Secondary Cross-listing**  
While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.  
**Requirements/Evaluation:** homework, classwork, and exams  
**Prerequisites:** MATH 250 or permission of the instructor  
**Enrollment Limit:** 20  
**Enrollment Preferences:** Priority will be given to Stats majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
STAT 341 (D3) MATH 341 (D3)

Quantitative/Formal Reasoning Notes: This is a 300-level Math/Stat course

Spring 2021
LEC Section: 01 TBA Mihai Stoiciu

STAT 342 (F) Introduction to Stochastic Processes (QFR)
Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time t or the accumulated claims paid by an insurance company in an interval of time t. This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

Requirements/Evaluation: weekly homework, classwork, and exams
Prerequisites: STAT 341
Enrollment Limit: 30
Enrollment Preferences: senior Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

Not offered current academic year

STAT 344 (F) Statistical Design of Experiments (QFR)
How do you get informative research results? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. We'll look at classical tools like one- and two-way ANOVA and fractional factorial designs, but we'll also look at optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of R to work with real-world data.

Class Format: Introductory lectures will be available asynchronously as text and video; synchronous sessions will discuss questions from lecture, dive further into the material, and work on examples. You'll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. There will also be optional synchronous office hours/review sessions.

Requirements/Evaluation: Homework problems; quizzes; a final project (on a topic that interests you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While most assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.
Prerequisites: STAT 201, 202, or equivalent, or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Statistics majors, seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to design experiments, analyze their results, and assess their effectiveness. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 346 (F)(S) Regression Theory and Applications (QFR)
This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear, logistic and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Requirements/Evaluation: exams, homework, and a project

Prerequisites: MATH 250 and at least one of STAT 201, 202 or 302. Or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Statistics Majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

STAT 355 (F) Multivariate Statistical Analysis (QFR)
To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

Class Format: This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements

Requirements/Evaluation: homework, project/presentations, possibly one or two exams.

Prerequisites: MATH 250, and STAT 346 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: students interested in statistics which have solid background in math and stat

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses
STAT 356 (S) Time Series Analysis (QFR)

Time series—data collected over time—crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.

Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams
Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor
Enrollment Limit: 30
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

LEC Section: 01 TBA Laurie L. Tupper

STAT 359 (S) Statistical Computing (QFR)

This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating, visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats, techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will be project-based.

Requirements/Evaluation: based primarily on projects, homework, and exams
Prerequisites: STAT 201 or 202 and CSCI 134, 135, or 136
Enrollment Limit: 30
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Not offered current academic year

STAT 360 (S) Statistical Inference (QFR)

How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Requirements/Evaluation: problem sets and exams
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Enrollment Limit: 30
Enrollment Preferences: Statistics majors
Expected Class Size: 30
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
STAT 362 (F) Design of Experiments (QFR)

How do you get informative research results? By doing the right experiment in the first place. We'll look at the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. Using a framework of optimal design, we'll examine the theory both of classical designs and of alternatives when those designs aren't appropriate. On the applied side, we'll make extensive use of R to work with real-world data.

Requirements/Evaluation: based primarily on projects, homework, and exams
Prerequisites: STAT 346
Enrollment Limit: 30
Enrollment Preferences: seniors/juniors and Statistics majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Not offered current academic year

STAT 365 (F) Bayesian Statistics (QFR)

The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Requirements/Evaluation: homework and exams
Prerequisites: STAT 201 and MATH 150 and 250, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: juniors and seniors, Statistics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Not offered current academic year

STAT 368 (S) Modern Nonparametric Statistics (QFR)

Many statistical procedures and tools are based on a set of assumptions, such as normality or other parametric models. But, what if some or all of these assumptions are not valid and the adopted models are miss-specified? This question leads to an active and fascinating field in modern statistics called nonparametric statistics, where few assumptions are made on data's distribution or the model structure to ensure great model flexibility and robustness. In this course, we start with a brief overview of classic rank-based tests (Wilcoxon, K-S test), and focus primarily on modern nonparametric inferential techniques, such as nonparametric density estimation, nonparametric regression, selection of smoothing parameter (cross-validation), bootstrap, randomization-based inference, clustering, and nonparametric Bayes. Throughout the semester we will examine these new methodologies and apply them on simulated and real datasets using R.

Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 201 and STAT 346, or permission of instructor.
Enrollment Limit: 30
Enrollment Preferences: senior Statistics majors
Expected Class Size: 15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods.

Not offered current academic year

STAT 372  (F)  Longitudinal Data Analysis: Modeling Change over Time  (QFR)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Class Format: Hybrid format. Approximately 2/3 of class time will be lecture (in person for students who are on campus, recorded for remote students). All synchronous students (whether in person or online) will attend a remote lab/discussion section each week. Asynchronous options will be provided for students unable to participate synchronously.

Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 201 and STAT 346
Enrollment Limit:  15
Enrollment Preferences:  junior and senior Statistics majors
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes: The course will cover a variety of statistical analysis methods for longitudinal data.

STAT 440  (F)  Categorical Data Analysis  (QFR)

This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. All methods can be viewed as extensions of traditional regression models and ANOVA.

Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 346 and STAT 360
Enrollment Limit: 14
Enrollment Preferences: seniors and Statistics Majors

STAT 442  (S)  Statistical Learning and Data Mining  (QFR)

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Requirements/Evaluation: homeworks and projects
Prerequisites: STAT 346 or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: seniors and Statistics Majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information—introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Requirements/Evaluation: project work, homework, exams, and contribution to discussion
Prerequisites: STAT 346, or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Seniors and Statistics majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Not offered current academic year

Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. Indeed, the Bayesian approach is now recognized across scientific disciplines as a modern and powerful tool. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to performing Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods, before moving on to multivariate sampling methods and methodology. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing. The course will culminate in an independent Bayesian research project.

Statistics senior honors thesis.

Class Format: thesis
Grading: pass/fail only
Not offered current academic year

STAT 99 (W) Indep Study: Statistics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Not offered current academic year
COURSES AND COURSE-NUMBERING

100-level courses are introductory in nature. They aim to acquaint students with a variety of topics in music, ranging from the materials of music (introductory music theory and musicianship) to various musical cultures (African, American, Asian, Caribbean, and European) and styles within those cultures (classical, folk, and popular). Most 100-level courses are designed for the general student and have no prerequisites; they assume no prior musical training, and are open to all students interested in increasing their understanding and appreciation of music. The two 100-level courses that can serve to satisfy specific music theory requirements for the music major (MUS 103 and 104a or 104b) require a working knowledge of musical notation; these courses are geared to potential majors and students with strong instrumental or vocal background, and are particularly suitable for first-year students interested in taking more advanced courses in music.

200-level courses offer students the opportunity to explore a range of more specialized musical topics, from performance, technology, and musicianship-based classes to courses focused on specific styles, periods, composers, and examinations of meaning in music. Most regular 200-level courses have no prerequisites but do require the ability to read music, and are usually open to all students who can do so, regardless of class year. Some 200-level tutorials and writing intensive courses have no prerequisites and do not require the ability to read music, but the workload and more advanced approach to the subject matter makes these courses best suited to sophomores, juniors, and seniors. The two 200-level courses that complete the music theory requirements for the music major (MUS 201 and 202) have prerequisites; these courses are geared to potential majors, majors, and students with strong instrumental or vocal background.

300-level courses are designed for sophomores, juniors, and seniors with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. All require at least one semester of music theory or its equivalent. Some 300-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis. 300-level courses are intended for advanced juniors and seniors, usually music majors, wishing to pursue thesis, independent study, or small seminar coursework in composition, theory and analysis, musicology, ethnomusicology, or performance, under the guidance of an individual faculty member.
A minimum of ten courses are required for the major, as detailed below.

Four courses in Music Theory and Musicianship to be taken in sequence:

- Music 103
- Music 104a (Music Theory and Musicianship I) or Music 104b (Jazz Theory and Improvisation I)
- Music 201
- Music 202

Three courses in European and American Music History:

- Music 231
- Music 232
- Music 233

Majors may choose to replace a maximum of one of these three specific courses with a course in music history covering aspects of the same period. The courses that may substitute for MUS 231, 232, and 233 are listed below:

- Music 231: 163, 164, or 261
- Music 232: 165, 166, 236, or 266T
- Music 233: 119, 138, 150, 151, 238, 244, 251, 252 or 254

One course in World Music/Ethnomusicology from the following:

- DANC 201 / AFR 201 / MUS 220: African Dance and Percussion
  - Taught by: Sandra Burton
  - Catalog details
- DANC 202 / AFR 206 / MUS 221: African Dance and Percussion
  - Taught by: Sandra Burton
  - Catalog details
- DANC 330 / AFR 330 / MUS 330: Modern Folklore: Postcolonial Dance and Music in Africa
  - Taught by: Sandra Burton
  - Catalog details
- MUS 111(F): Music Cultures of the World
  - Taught by: Corinna Campbell
  - Catalog details
- MUS 120 / AFR 113: Musics of Africa
  - Taught by: Corinna Campbell
  - Catalog details
- MUS 211(F): Music, Nationalism, and Popular Culture
  - Taught by: Corinna Campbell
  - Catalog details
- MUS 222 / AFR 223: Politics of Performance/Performing Politics in Contemporary Africa
  - Taught by: Corinna Campbell
  - Catalog details
- MUS 323(S): Arts Organizing in Africa and the Diaspora
  - Taught by: Corinna Campbell, Tendai Muparutsa
  - Catalog details

Two electives:

One must be taken in the senior year and at the 400-level to serve as a capstone course. The second semester of a year-long honors thesis, MUS 494, will satisfy the 400-level elective requirement; for students in the class of 2024 and subsequent years, Advanced Musical Performance, MUS 491 or 492, will not satisfy the 400-level capstone elective. The other elective may be fulfilled in any semester by any Music course but must be taken in addition to courses selected to satisfy the history, theory, and world music/ethnomusicology requirements detailed above.

Majors are required to participate in faculty-directed departmental ensembles for at least four semesters.

Majors must enroll in partial credit music lessons for at least two semesters.
THE DEGREE WITH HONORS IN MUSIC

Three routes provide the opportunity for honors or highest honors consideration in the Music major:

Composition: A Composition thesis must include one major work completed during the senior year supported by a 10- to 15-page discussion of the student's work or analysis of a major 20th century or contemporary work. The student’s general portfolio of compositions completed during the junior and senior years will also be considered in determining honors.

Performance: A Performance thesis must include an honors recital given during the spring of the senior year supported by a 15- to 20-page discussion of one or more of the works performed. The student’s general performance career will also be considered in determining honors.

History, Theory and Analysis, or Ethnomusicology: A written Historical, Theoretical/Analytical, or Ethnomusicological thesis between 65 and 80 pages in length. A written thesis should offer new insights based on original research. A public oral thesis defense is also required.

In order for a thesis proposal to be approved, a student must have at least a 3.3 GPA in Music courses (this GPA must be maintained in order to receive honors), and must have demonstrated outstanding ability and experience through coursework and performance in the proposed thesis area. Students are encouraged to seek the advice of their potential thesis advisor early in the junior year and no later than the first month of the second semester. A 1- to 2-page proposal written in consultation with the faculty advisor must be received by the Music chair by the end of spring break.

Honors candidates must enroll in Music 493(F)-W31-494(S) during their senior year. A student who is highly qualified for honors work, but is unable to pursue a year-long project for compelling reasons, may petition the department for permission to pursue a WS/one-semester thesis. The standards for evaluating such a thesis remain the same. Completed thesis is due by April 15.

LESSONS

Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the lesson commitment. (See Music 281-288 and Advanced Musical Performance 391, 392, 491, 492). For further information, check the Music Department webpage or contact the Department of Music.

STUDY ABROAD

One study abroad course may satisfy the one free elective requirement for the major, if approved by the department. A second study abroad course might satisfy any one of the specific required courses if the proposed course is clearly equivalent and if the substitution is approved by the department. Majors planning to study abroad should meet with the department chair to propose specific study abroad courses that might be approved to satisfy major requirements under this policy. No more than two courses taken abroad may count toward the major. Music lesson courses and ensemble participation pursued while studying abroad may count toward the performance requirements with approval of the department.

MUS 101  (F)  Listening to Music: An Introduction to the Western Classical Tradition

When you listen to music -- on your phone or computer, on the radio, at a concert -- how much do you really hear? This course refines students' listening skills through study of the major composers, styles, and genres of the Western classical tradition. We will explore music from the Baroque, Classical, Romantic, and Modern eras, including works by Bach, Mozart, Beethoven, Chopin, Tchaikovsky, Brahms, Stravinsky, and other composers. Genres to be covered include the symphony, string quartet, sonata, opera, song, and choral music.

Class Format: The course will be taught remotely, involving short lectures, asynchronous and synchronous discussion, and individual reading and listening.

Requirements/Evaluation: Grades will be based on participation, GLOW posts, several quizzes, a midterm exam, and a final exam.

Prerequisites: none; intended for non-major students with little or no formal training in music

Enrollment Limit: 15

Enrollment Preferences: first-years, sophomores and any student who expresses a strong interest in the course

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D1)

Fall 2020

LEC Section: R1  MR 1:30 pm - 2:45 pm   Marjorie W. Hirsch
MUS 102 (F) Introduction to Music Theory

The course presents an introduction to the materials and structures of music. Through a variety of practical exercises and daily worksheets, students will develop an understanding of the elements of music (e.g. pitch, scales, triads, rhythm, meter, and their notation) and explore their combination and interaction in the larger-scale organization of works of classical, jazz and popular music (i.e. harmony, counterpoint, form, rhetoric). Practical musicianship skills will be developed through in-class and prepared singing, keyboard and rhythmic exercises.

Class Format: two weekly lectures

Requirements/Evaluation: written and practical quizzes, projects, participation

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: first-year students

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

---

MUS 103 (F) Music Theory and Musicianship I

MUS 103 and 104 are designed for potential majors and for students with strong instrumental or vocal backgrounds. Students entering MUS 103 should have a solid understanding of musical rudiments (intervals, scales, keys) and reading proficiency in both bass and treble clefs. A short diagnostic exam will be administered at the first class meeting of MUS 103 to determine if a student requires any additional work to complement and fortify course work during the early weeks of the semester, or whether placement in MUS 102 would be more appropriate. Students with a strong background in music theory may take a placement exam during First Days to see whether they can pass out of one or both semesters. MUS 103 and 104 are required for the music major.

MUS 103 presents the materials, structures and procedures of tonal music, with an emphasis on the harmonic and contrapuntal practice of the baroque and classical periods (ca. 1650-1825). The course explores triadic harmony, voice leading, and counterpoint with an emphasis on the chorale style of J.S. Bach and his predecessors. Keyboard harmony and figured bass exercises, sight singing, dictation, analysis of repertoire, written exercises and emulation projects will develop both an intellectual and an aural understanding of music of the period. Projects include chorale harmonization, arranging, and the composition of canons.

Class Format: This is a hybrid course. In addition to the two scheduled lectures each week, the class requires a weekly aural skills meeting, a weekly keyboard skills meeting, and a weekly composition meeting, to be scheduled in the first week of class. The one-on-one meetings will take place with a lab instructor or with the course head and last approximately 10-15 minutes each.

Requirements/Evaluation: weekly written work, written and keyboard quizzes, and midyear and final projects

Enrollment Limit: 24

Enrollment Preferences: first-years, potential Music majors, and those with strong musicianship backgrounds

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

MUS 104 (S) Music Theory and Musicianship I

Music 104a continues the practical musicianship work of Music 103, while expanding the scope of harmonic topics to include seventh chords and chromatic harmony. Music 104a further explores the transformation of chorale harmony in contrapuntal works of the eighteenth century. Projects include the composition and performance of preludes, fugues, and organ chorale preludes on baroque models.

Class Format: lecture two days a week; a conference meeting one day a week; ear training/keyboard skills lab meeting twice a week

Requirements/Evaluation: weekly written work, written and keyboard quizzes, and midterm and final projects
Prerequisites:  MUS 103
Enrollment Limit:  24
Enrollment Preferences:  first-years, potential or declared Music majors, and those with strong musicianship backgrounds
Expected Class Size:  21
Grading:  no pass/fail option,  yes fifth course option
Unit Notes:  this course will share aural skills labs with MUS 104b; students considering taking this course should consult the lab times and plan their schedules accordingly
Distributions:  (D1)
Not offered current academic year

MUS 104  (S) Jazz Theory and Improvisation I
The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments-competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.
Class Format:  alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire
Requirements/Evaluation:  weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance
Prerequisites:  MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged
Enrollment Limit:  15
Enrollment Preferences:  prospective Music majors, then Jazz Ensemble members, then Music majors
Expected Class Size:  12
Grading:  no pass/fail option,  yes fifth course option
Unit Notes:  this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

MUS 110  (F)(S) Electronic Music Genres, a Creative Approach
In this course, students will study the theoretical and practical fundamentals of audio technology, MIDI production, and interactive composition. Students are not required to have any background in Music Technology. We will start by covering the basics of Electronic Music but the class will move at a fast pace covering more advance subjects in a short period of time. We will go over concepts of Physics acoustic, MIDI (sequencing, etc), Sound editing, Digital Signal Processing Effects, Sound Synthesis, and Interactive electronic music composition using Ableton Live, Max4Live, as well as Max MSP for students to learn how to program their own virtual synthesizers and/ or algorithmic composition to create interactive music in real time. Electronic Music Composition is a central part of the class. Students can choose any aesthetic of their choice for the composition projects, since the the focus of the class is on teaching students the technological tools to create the music of their choice. Students will be encouraged to mix different styles of music creating fusion.
Class Format:  Remote. Access to the software used in class will be provided for all the students registered in class
Requirements/Evaluation:  Four fusion composition projects and weekly presentation of students mini-projects focused on the electronic music techniques studied in class, and based on student research of musical styles chosen for their projects.
Prerequisites:  One of the following: MUS 102, MUS 103, or permission of instructor for those students that have taken music lessons in their
MUS 111  (F)  Music Cultures of the World  (DPE)
This course introduces a variety of musical genres and practices from around the world, alongside a discussion of the processes and politics of their global circulation. Through learning about a combination of contemporary styles and longstanding musical traditions spanning a broad geographical range, students will develop a working knowledge of musical terms, concepts, and influential musicians. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. In particular, we will consider music's global circulation, and how its contents and meanings reflect those processes. Genres covered in the course vary intermittently but often include: “throat singing” genres in Tuva and Sardinia, Zimbabwean mbira and Chimurenga music, Argentine Tango, Ghanaian azonto and highlife, Balinese gamelan, and North Indian classical music. No prior musical training is required.

Class Format: This course is offered remotely. Online meetings will be a mixture of large group lecture/discussion and smaller breakout groups.

Requirements/Evaluation: class attendance and participation, regular short writing assignments and projects, and a 10-12 page final paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: current or prospective majors in Music, Anthropology, Sociology, and Arabic, Asian, Africana, and Latino/a Studies.

Expected Class Size: 15

Grading:  no pass/fail option,   yes fifth course option

Distributions:  (D1)  (DPE)

Difference, Power, and Equity Notes: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music's potential in situations of political unrest.

Attributes: MUS World Music/Ethnomusicology

MUS 119  (S)  Popular Music: Revolutions in the History of Rock
This course will trace the history of rock music from the 1950s to the present, focusing on those musicians who revolutionized the genre in various periods. Such “revolutions” are discovered in the use of new sounds and musical forms, in the relationship between lyrics and musical setting, and in the conception of rock's role in society. Three objectives will underpin our studies: to develop listening skills with music that one often hears, but perhaps rarely listens to intently; to determine in what ways popular music can be interpreted as reflecting its cultural context; and to encounter the work of several of the more innovative musicians in the history of rock. Finally we will interrogate our own activities by asking why the study of the “merely popular” should be pursued in a liberal arts education, whether new approaches can be developed for this endeavor, and what makes music "popular."

Class Format: discussion

Requirements/Evaluation: evaluation will be based on two tests, two papers, and a final exam
**MUS 120 (S) Musics of Africa**

Cross-listings: AFR 113 MUS 120

**Primary Cross-listing**

This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chants, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

**Class Format:** discussion

**Requirements/Evaluation:** grade based on a listening journal, bi-weekly short assignments, a final paper, and class participation

**Prerequisites:** no prerequisites: prior musical background is not essential for this class

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective Music majors and Africana Studies concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

---

**MUS 141 (F) Opera**

Cross-listings: THEA 141 MUS 141

**Primary Cross-listing**

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass and Adams. This course may involve a trip to the Metropolitan Opera.

**Class Format:** discussion

**Requirements/Evaluation:** a midterm, a brief paper, an 8-page paper, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 149  (S)  The Language of Film Music
Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Requirements/Evaluation: assignments, quizzes, midterm essay, final creative project
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: given to juniors and seniors
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

MUS 150  (S)  The Broadway Musical  (DPE)

Cross-listings: MUS 150  THEA 150

Primary Cross-listing
Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

Class Format: discussion
Requirements/Evaluation: a midterm, a brief paper, an 8-page paper, and a final exam
Prerequisites: none
Enrollment Limit: 30

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 150 (D1) THEA 150 (D1)

Difference, Power, and Equity Notes: We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped,
and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."

Not offered current academic year

MUS 151 (F) History of Jazz
"There are only three things that America will be remembered for 200 years from now when they study the civilization: The Constitution, Jazz Music and Baseball. These are the three most beautiful things this culture's ever created."--(Gerald Early) Jazz is the most common name for a great African American Art form that still defies definition. Over the past century this elastic tradition has laid down firm roots for numerous other American and World musics, while itself in the throes of a seemingly permanent identity crisis. Jazz is perennially declared dead or dying yet consistently summoned by advertisers to lend vitality and sex appeal to liquor or automobiles. By any name and regardless of its health status, jazz has a rich history of conservative innovators, at once restless and reverent, who made fascinating leaps of creativity out of inspiration or necessity. This "listening intensive" class will look at the past century of jazz music through ideas, "what-if" questions and movements that changed the way the music was created, presented and perceived. Both musical concepts (such as syncopation and cross instrumental-influence) and cultural connections (racial, technological and economic) will be examined, giving us freedom to link similar kinds of musical thought across disparate settings and decades. Our inquiry will include (but not be limited to) the lives and music of Louis Armstrong, Fletcher Henderson, Mary Lou Williams, Duke Ellington, Charlie Parker, Thelonious Monk, Dizzy Gillespie, Art Blakey, John Lewis, Miles Davis, John Coltrane, and Wayne Shorter.

Class Format: All meetings online. Some meetings will be in smaller discussion groups
Requirements/Evaluation: class participation including regular reading and listening assignments; 4 quizzes, two short papers/projects
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first-years and sophomores
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

LEC Section: R1  TR 6:45 pm - 8:00 pm  Kris  Allen

MUS 164 (F) Bach and Handel: Their Music in High Baroque Culture
This course explores the lives and music of two great composers of the High Baroque, Johann Sebastian Bach and George Frideric Handel. We will examine their dramatically contrasting life experiences and musical pursuits within the larger social and cultural framework of the period: Bach as a provincial composer, servant to minor German aristocrats and the Lutheran Church, virtuoso organist and pedagogue; Handel as a cosmopolitan celebrity and entrepreneur, creator of operatic and instrumental entertainments for both the Italian and English nobility and the paying public. Development of listening skills and understanding of Baroque music styles, genres, and forms will be stressed. Bach's Brandenburg Concerti and Mass in B-minor, and Handel's opera Giulio Cesare and Water Music Suite are just a few of the works to be discussed and enjoyed.

Class Format: discussion, two meetings per week, and a field trip may be required
Requirements/Evaluation: participation, two papers, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

MUS 165 (F) Mozart
This course will examine the extraordinary life and musical genius of Wolfgang Amadeus Mozart. Through lectures, discussion, readings, and guided listening, students will gain appreciation of Mozart's classical compositional style and familiarity with many of his greatest works. The class will explore Mozart's pivotal position as a musician in Viennese society; his strange combination of bawdy behavior and sublime artistry; his relationship with his domineering father Leopold, as well as with Haydn, Beethoven, and Salieri; and the myths about Mozart that have sprung up in the two centuries since his death.

Class Format: discussion

Requirements/Evaluation: class participation, listening quizzes, two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with demonstrated interest in music

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 166 (F) Beethoven
2020 marks the 250th anniversary of Ludwig van Beethoven's birth. This course provides an introduction to the celebrated composer's life and music. Beethoven's difficult childhood, tragic loss of hearing, secret affair with his "Immortal Beloved," and tempestuous relationship with his suicidal nephew, along with important political, philosophical, social, and cultural developments of the time, will inform our consideration of his monumental artistic achievements. Students will listen to a broad selection of Beethoven's music, including piano sonatas, string quartets, symphonies, overtures, concertos, choral works, and opera. We will discuss a range of topics, including the nature of his genius, his relation to composers such as Haydn and Mozart, and his impact on posterity.

Class Format: lecture/discussion

Requirements/Evaluation: two 5-7 page papers, midterm and final exams, and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 171 (S) Music and Spirituality: Cross-Cultural Perspectives

Cross-listings: REL 171 MUS 171

Primary Cross-listing

How does the sacred sound? Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music reflect and produce spiritual experience? This team-taught course will take a comparative approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, music and dance in spiritual practice, and the role of music created in the face of death and its aftermath. Working from both musicological and ethnomusicological perspectives, we will explore the possibilities of sensory ethnography for better understanding the role of perception and the body in spiritual experiences with music. Our comparisons will draw from Western and world Christian traditions from medieval to modern times, and on conversations with musicians immersed in the music of other faith traditions (including Jewish, Hindu, and Muslim). We will explore connections between music and spirituality through a wide variety of repertoires, including plainchant and Renaissance sacred choral music; the music and dance of traditional West African religions like vodun and orisa; music from the Western classical tradition by such composers as Bach, Beethoven, and Messiaen; American hymnody and spirituals; gospel music in the U.S. and Africa; and selected artists from the world of jazz and popular music, such as John Coltrane and Leonard Cohen.
MUS 174  (F)  The Singing Voice: Structure, Styles and Meaning
What makes an opera singer sound different than a pop singer? How does the sound of each contribute to musical meaning for listeners? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, importantly, through singing. We examine histories of styles, cultural contexts as well as basic physiology, acoustics and techniques. We will explore the basics of yodeling, Tuvan throat singing, and belting, among other styles. Basic knowledge of musical notation strongly recommended.

Class Format: studio/brief lectures

Requirements/Evaluation: one quiz, one short 2- to 4-page paper, journaling and a final paper (6-8 page) and presentation

MUS 175  (F)  Sound Art, Public Music
Cross-listings: MUS 175  ARTS 273

Primary Cross-listing

Western music performance traditionally occurs within contained spaces in which performer and audience adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and expectations of performance and reception have loosened, often moving into public spaces: from sound art installations to ambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course examines the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Hildegard Westerkamp, Brian Eno and John Luther Adams, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of sound art works inspired by ideas and creators we are studying.

Requirements/Evaluation: class participation, three short (2- to 4-page) essays, a response journal and the creation of four sound art works
This course is cross-listed and the prefixes carry the following divisional credit:
MUS 175 (D1) ARTS 273 (D1)

Fall 2020

SEM Section: H1    MR 3:15 pm - 4:30 pm     Brad  Wells

MUS 177  (S)  Gender and Sexuality in Music  (DPE)

Cross-listings: MUS 177  WGSS 177

Primary Cross-listing

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, short assignments, midterm project, and either a 12-page final paper or a project with supplementary paper (length to be determined in consultation with the instructor).

Prerequisites: open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit: 19

Enrollment Preferences: WGSS and MUSC majors/prospective majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 177 (D1) WGSS 177 (D2)

Difference, Power, and Equity Notes: This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as 'natural,' and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources--elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

Spring 2021

SEM Section: 01    TBA     Corinna S. Campbell

MUS 201  (F)  Music Theory and Musicianship II

Music 201 continues to greater degrees the study of music techniques from the common practice period by means of analysis, composition, written exercises, sightsinging, and dictation. We will expand our understanding of chromaticism. We will learn how chromaticism is used as a voice-leading tool, and how it participates in music even at deeper levels of the structure. We will learn about innovations that occurred from the early 19th century through the beginning of the 20th century and will trace the origins for these new harmonic tendencies. We will also learn how composers create larger formal structures.

Class Format: Remote. In addition to the scheduled lecture block, the class requires a weekly aural-skills meeting, to be scheduled in the first week of class. The one-on-one meeting will take place with a lab instructor for approximately 10-15 minutes

Requirements/Evaluation: homework, theory quizzes, analysis papers, compositional projects, final project, class attendance, preparation, participation, and on the results of the lab portion of the class

Prerequisites: MUS 104

Enrollment Limit: 12
Enrollment Preferences: Music majors and potential Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

MUS 207 (S) Jazz Improvisation

This class is for the intermediate and advanced player with (some) experience improvising. The goal is to build on each student’s existing improvisational abilities, and the coursework will be somewhat tailored to the needs of the students enrolled. Students will study intermediate and advanced concepts for improvisation and learn the essentials of the jazz language through solo transcription and analysis. There will be time spent learning important jazz compositions and a focus on using improvisational devices and techniques learned in class on these compositions. Much of class time will be spent playing through exercises and patterns, playing ideas in twelve keys and implementing the learned class material into solos over standard jazz compositions.

Class Format: combining theory and performance

Requirements/Evaluation: completion of two to three solo transcription assignments, composition assignments, and short quizzes

Prerequisites: some experience improvising in jazz contexts on a pitched instrument, a basic understanding of jazz nomenclature

Enrollment Limit: 19

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 210 (S) Music Technology I

Designed for students with some music background who wish to learn basic principles of Musical Technology and practical use of current software and hardware. Topics include acoustics, MIDI sequencing, digital recording and editing, sampling, analog and digital synthesis, digital signal processing, and instrument design. Lectures will provide technical explanations on those topics covered in class and an historical overview of electronic music.

Requirements/Evaluation: weekly assignments, a midterm exam, a final paper and two composition projects

Prerequisites: MUS 102 or 103, or permission of instructor; knowledge of and proficiency with musical notation is required; some background in
acoustics/physics is desirable

Enrollment Limit: 8

Enrollment Preferences: Music majors and those planning to major

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

**MUS 211 (F) Music, Nationalism, and Popular Culture (DPE)**

This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel), international forums for the expression of national sentiment (the Olympics, Miss Universe and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Ernest Gellner, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

**Class Format:** This course is a hybrid model, involving a combination of exclusively remote all-class meetings and small group meetings in which remote students and in-person students will meet separately.

**Requirements/Evaluation:** Class participation, regular short (1 page) written responses, two 5- to 6-page papers, a Final Paper/Project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Upperclass students and music majors, international students who need to fulfill in-person requirement.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the DPE requirement. Topics include the use of music for social control and subversion in Mobutu's Zaire, its affective power in U.S. campaign ads, and the ways in which constructions of 'folk music' impact power differentials in a national political structure. Assignments help students develop an awareness of the specific strategies whereby music mobilizes national ideologies.

**MUS 220 (S) African Dance and Percussion**

**Cross-listings:** AFR 201 MUS 220 DANC 201

**Secondary Cross-listing**

We will examine two forms that embody continuity of tradition or the impact of cultural shifts in generations. Lamban was created by the Djeli, popularly called Griots who historically served many roles in traditional society from the Kingdom of Ghana and Old Mali spanning the 12th-current centuries. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it was created and practiced by the Mandinka people. Bira is an ancient and contemporary spiritual practice of Zimbabwe's Shona people. Both of these forms are enduring cultural practices while Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth at the end of the 1950s. This course can be taken for academic and/or PE credit

**Class Format:** class hours will be divided among research and discussion of the dance, percussion, and music of two forms, as well as physical learning and group projects; also includes field trips to view an area performance and the archives at Jacob Pillow

**Requirements/Evaluation:** discussion of assignments, group response performances, and short research paper. Students enrolled for PE credit are
MUS 221 (F) African Dance and Percussion

Cross-listings: AFR 206  MUS 221  DANC 202

Secondary Cross-listing

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated new physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

Class Format: class hours will be divided among discussion of media and readings; rehearsal of dance and music techniques; field trips to view performances; research at the Jacob Pillow's archives; and interaction with visiting artists

Requirements/Evaluation: a series of discussion, research, and individual and group projects; all of which will inform collaboration on mid-term and final projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who have taken DANC 100 or DANC 201; have experience in a campus-based performance ensemble; or have permission of the instructors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

MUS 222 (F) Politics of Performance/Performing Politics in Contemporary Africa (DPE) (WS)

Cross-listings: MUS 222  AFR 223

Primary Cross-listing

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful
and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQIA community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres—among them Afrobeat, kwaito, soukous, raï, mbalax, Chimurenga music, and a variety of rap and hip-hop styles—are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: this class places a strong emphasis on discussion
Requirements/Evaluation: in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project
Prerequisites: some familiarity with music terminology encouraged
Enrollment Limit: 15
Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

MUS 230 (S) Musical Ethnography

Music provides a constant accompaniment to most of our lives, from mundane activities to personal or collective moments of celebration and grief. Often, we experience music's impact on us without fully considering how it shapes our ideas and experiences. Drawing on ethnomusicology, anthropology, and related fields, this course explores how music can illuminate people's practices of being-in-the-world. Musical ethnography describes both the means by which scholars pursue this line of questioning, and also the written work that results from such an investigation. This course features a hands-on approach to musical ethnography. Students will each conduct ethnographic fieldwork in a musical community within Williamstown and the surrounding area. Coursework will survey approaches to methodology (modes and degrees of researcher involvement, practical skills related to documentation), issues of ethics, and social and musical analysis.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, small assignments (four 1-2 page assignments), interview transcript with commentary, reading response, final project and presentation
Prerequisites: some musical training/experience necessary, see instructor for more information
Enrollment Limit: 10
Enrollment Preferences: Seniors, music and anthropology/sociology majors
Expected Class Size: 6
Grading: no pass/fail option, yes fifth course option
Unit Notes: MUS World Music/Ethnomusicology
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

MUS 231 (S) Music in History I: Bach and Before

This course explores 1000 years of music-making in Western European culture, beginning with the philosophical and theoretical origins of that music
in ancient Greece and extending to the life and music of J.S. Bach. Topics covered will include how the sound of music changed over a millennium; the different functions it served and how genres developed to serve these functions; the lives of the men and women who composed, performed, and wrote about music; and how the changing notation and theory of music related to its practice over the centuries. At the same time, the course provides an introduction to the modern study of music history, sampling a broad range of recent scholarship reflecting an array of critical approaches to the study of early music in our own day.

Class Format: discussion-based, two meetings per week, concert and workshop attendance required

Requirements/Evaluation: in-class and online discussion participation, two medium-length papers, and midterm and final exams

Prerequisites: ability to read music; open to qualified non-majors with the permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Music majors and those planning to major

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for Music majors

Distributions: (D1)

MUS 232  (S)  Music in History II: Classical and Romantic Music

This course traces the development of Western art music from 1750-1900. We will explore the works of many eighteenth- and nineteenth-century composers, probing connections between their music and Classical and Romantic aesthetics, as well as political, philosophical, social, and cultural developments of the time. Composers to be studied include Haydn, Mozart, Beethoven, Schubert, Robert and Clara Schumann, Berlioz, Chopin, Verdi, Wagner, Tchaikovsky, Brahms, Mahler, and others. Topics for discussion include the changing role of composers in society, music's relation to the other arts, challenges faced by female composers, controversies surrounding music and meaning, the interaction of music and drama in opera, and musical nationalism.

Class Format: lecture-discussion

Requirements/Evaluation: class participation, two 5-7 page papers, class presentations, a midterm, and a final exam

Prerequisites: ability to read music

Enrollment Limit: 15

Enrollment Preferences: Music majors, or those planning to major

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Music majors may not take MUS 232 as pass/fail or 5th course option if they are using it to fulfill the Classical-Romantic music history requirement for the music major.

MUS 238 (F) Music in Modernism
The synthesis of the arts was a primary pursuit of modernist composers, artists, choreographers, and writers. Seeking either to realize Wagner’s "total work of art" in the theater, or to uncover the more general correspondences celebrated by Baudelaire, modernists consistently looked beyond their own media. Collaborations on works of "total theater" were common: Satie, Cocteau, Massine, Picasso; Brecht, Hindemith, Weill; Stravinsky, Nijinsky, Bakst; Claudel, Honegger, Rubinstein. Modernists explored new connections between music and color (Scriabin, Kandinsky), music and literature (Joyce, Mann), and music and dance (Duncan, Graham). Occasionally, modernists attempted to unite the arts on their own: Schoenberg painted, Pound composed, and Kokoschka wrote. Our focus will be on those works of music, art, dance, and literature that explored new relationships between the arts. One goal will be to investigate whether specific equivalents exist between techniques of modernist painting, poetics, choreography, and composition. Aware of the risks and rewards of interdisciplinary study, we will attempt our own theories of artistic synthesis. This course is designed to bring multiple perspectives to the study of music in modernism.

Class Format: discussion
Requirements/Evaluation: three papers (6, 8, and 12 pages in length) and on class participation; drafts of two of these papers will be required; students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

MUS 239 (S) Music in the Global Cold War (WS)
Cross-listings: MUS 239 LEAD 239

Primary Cross-listing
Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both reflected and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Copland; Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music’s political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

Class Format: Class discussion will be central to this course.
Requirements/Evaluation: 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period
Prerequisites: none
Enrollment Limit: 19

Enrollment Preferences: Students with relevant experience in Political Science, History, or Music studies.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Students will write three papers during the semester: a 6 page, 8 page, and a 12 page paper. Drafts of papers 2 and 3 will be required prior to the due dates listed below. This is a "writing skills" course. Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments.

Spring 2021

LEC Section: 01    TBA    W. Anthony Sheppard

MUS 252  (F)  Introduction to the Music of John Coltrane

Cross-listings:  AFR 242  MUS 252

Primary Cross-listing

This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane's compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane's musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial listening and reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Requirements/Evaluation: in-class participation including small quizzes, midterm, class presentation, and final paper

Prerequisites: MUS 103 and/or 203 strongly recommended; musical literacy sufficient to deal with the material and/or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: musically literate students and Music majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 242 (D2) MUS 252 (D1)

Attributes:  AMST Arts in Context Electives

Not offered current academic year

MUS 254  (F)  Bebop: The (R)evolution of Modern Jazz

Cross-listings:  AFR 254  MUS 254

Primary Cross-listing

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study and guided listening assignments, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and it's evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Requirements/Evaluation: weekly reading, listening, short written responses to discussion prompts and participation in class discussion; quizzes on
MUS 271  (F)  Sonic Art
Cross-listings: ARTS 271  MUS 271
Primary Cross-listing
The course explores sound art through research and hands-on creative projects. Students will create original sound works, working collaboratively with partners from complementary disciplines. Precedents for sound installation, sonic pavilions, sound performance and artist-made instruments will be reviewed. Example works include texts on an ancient Greek Chythonic cult, instruments created by contemporary Brazilian transdisciplinary artists, the collaborative group Experiments in Art and Technology (E.A.T.) as well as works by artists showing at Mass MoCa and Documenta 14.
Requirements/Evaluation: presentation of students mini projects (20%), four artistic projects (20%)
Prerequisites: none
Enrollment Limit:  8
Enrollment Preferences:  students with either Studio Art or Music experience
Expected Class Size:  8
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 271 (D1) MUS 271 (D1)
Not offered current academic year

MUS 272  (S)  Music and Meaning  (WS)
Nearly everyone finds music meaningful, but what exactly does it mean? Without the help of words, this largely non-referential art presents special challenges to interpretation. While most would agree that musical sounds can do such things as mimic the rumbling of thunder, evoke the countryside, suggest the act of chasing, or express rage, the capacity of music to convey meaning remains controversial among scholars, performers, and listeners. Some, following music critic Eduard Hanslick, assert that musical works are essentially "tonally moving forms"--patterns of sound with no reference to the world outside themselves; a work's meaning derives solely from the interplay of musical elements. Others counter that music can signify aspects of human experience, its sounds and structures not merely referring to the outside world but even relating complex narratives. Certain writers have argued that, without the assistance of language, what music signifies remains vague, while others insist that the meaning of music is actually more precise than that of words. In this tutorial course, we will explore a range of questions regarding musical meaning. How can combinations of pitches, rhythms, and instrumental timbres signify something beyond themselves? Is the subject of musical meaning more relevant to some historical styles or genres than others? How can we glean the meaning(s) of a work? Should we concentrate on formal processes within the music? Consider socially constructed meanings? Seek the composer's intentions? What makes some interpretations more convincing than others? In grappling with these questions, students will engage with writings by Agawu, Cone, Hanslick, Kramer, Langer, Lewin, Newcomb, and Schopenhauer, among others. Music to be studied includes works by Beethoven, Schubert, Chopin, Brahms, Mahler, Tchaikovsky, Ravel, Stravinsky, Glass, and Adams.
Class Format: during the first and last weeks of the semester, students will attend two group classes; in the other weeks, students will meet with the instructor in pairs for a one-hour session at a mutually convenient time
Requirements/Evaluation: students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks; evaluation will be based on five papers/presentations, and five responses

Prerequisites: ability to read music, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores, juniors, and any student who expresses a strong interest in the course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this tutorial course, students will write and present a 5- to 6-page paper every other week (five papers total) and a 1- to 2-page response to their partner's paper in the alternate weeks (five responses total). Through discussion in the tutorial sessions, comments on the papers, and opportunities for revision, the course will place strong emphasis on developing students' critical thinking and writing skills.

Spring 2021

TUT Section: T1 TBA Marjorie W. Hirsch

MUS 273 (F) Dangerous Music (WS)

As a largely non-referential art whose meanings are far from transparent, music might seem to pose little danger. How could mere sounds represent a threat? Yet precisely because its meanings can be obscure, enabling it to achieve its ends surreptitiously, music has intertwined with danger throughout history. With its power to stir the emotions, stimulate bodily movement, encode messages, and foment rebellion, music has often been perceived as an agent of harm. Plato claimed that too much music could make a man effeminate or neurotic, and warned that certain musical modes, melodies, and rhythms promote licentious behavior and anarchic societies. Puritans, Victorians, and totalitarians, as well as opponents of ragtime, rock 'n roll, and rap, have also accused certain musical genres or styles of exerting dangerous influences, and sought to limit or suppress them. In Afghanistan, the Taliban banned music altogether. While music has often been unfairly accused, its potential for placing people in actual danger is undeniable. Works that are played at ear-splitting decibel levels, that call upon performers to injure themselves, that are used as a form of psychological torture, or that incite violence demand reconsideration of the widely shared view that music is fundamentally a form of entertainment.

Class Format: Will be taught remotely

Requirements/Evaluation: evaluation will be based on participation, five 5-6-page papers/presentations, and five 1-2 page responses

Prerequisites: an ability to read music is desirable but not required

Enrollment Limit: 10

Enrollment Preferences: students with demonstrated interest in music

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write five 5-6 page papers and five 1-2 page responses, and will receive extensive feedback on their writing.

Fall 2020

TUT Section: RT1 TBA Marjorie W. Hirsch

MUS 275 (F) Shakespeare through Music

The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies Romeo and Juliet and Othello, and the comedy Midsummer Night's Dream--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative
analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

**Requirements/Evaluation**: each student will write five 6- to 7-page essays, and provide five peer reviews; evaluation will be based on the quality of written work and discussion

**Prerequisites**: none

**Enrollment Limit**: 10

**Enrollment Preferences**: second-year students

**Expected Class Size**: 8

**Grading**: no pass/fail option, no fifth course option

**Distributions**: (D1)

**Not offered current academic year**

**MUS 276  (F)  Music and the Internet**

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

**Class Format**: discussion

**Requirements/Evaluation**: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

**Prerequisites**: none

**Enrollment Limit**: 19

**Expected Class Size**: 14

**Grading**: yes pass/fail option, yes fifth course option

**Distributions**: (D1)

**Attributes**: FMST Core Courses

**Not offered current academic year**

**MUS 278  (S) Carmen, 1845 to Now  (DPE) (WS)**

**Cross-listings**: MUS 278  WGSS 248

**Primary Cross-listing**

The story of the gypsy femme fatale Carmen has endured for over 150 years. In Western culture and beyond, she has come to exemplify the seductive, exotic, independent, and dangerous woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal narrative, starting with Prosper Mérimée's 1845 novella on which Bizet based his beloved 1875 opera Carmen. We will consider various staged and film versions of the opera itself, including Francesco Rosi’s stunning 1984 movie, and discuss various other film transformations of the story, from DeMille’s 1915 silent film through Hammerstein’s 1954 all-black musical Carmen Jones, to the MTV version A Hip Hopera of 2004. Comic approaches will also be assessed, from Charlie Chaplin's Carmen Burlesque of 1915 through Spike Jones’ 1952 Carmen Murdered! and The Naked Carmen of 1970. We will explore remarkable dance interpretations ranging from Carlos Saura’s 1983 flamenco version through David Bourne's choreography in his 2001 gay reading called The Car Man. Our journey concludes with a comparison of two post-colonial sub-Saharan African films— the Senegalese director Ramaka’s Karmen Geï (2001) and U-Carmen eKhayelitsha (2005) by the South African director Domford-May—that push critical reaction to Bizet's story and music beyond Western cultural boundaries.

**Class Format**: After two initial group meetings to discuss Mérimée’s novella and Bizet's music, students will meet with the instructor in pairs for one hour each week. The scheduled seminar time is obligatory only for the first two meetings.

**Requirements/Evaluation**: Each student will write a 5- to 6-page essay every other week (five in all), and provide peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation
Prerequisites: None; ability to read music useful but not necessary
Enrollment Limit: 10
Enrollment Preferences: Preference given to current or prospective Music and Women's Gender & Sexuality Studies majors, then seniors and juniors.
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 278 (D1) WGSS 248 (D2)

Writing Skills Notes: Students will write five short essays of 5-6 pages each, and receive oral and written feedback addressing structure, argumentation, and style from their tutorial partner and the instructor on every essay.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement through a critical examination of the ways in which the Carmen story has served as a stage on which multifaceted textual and musical constructions and conflicts express the power dynamics between individual and group identities, encompassing gender and sexuality, nationality, race, ethnicity, and class.

Spring 2021
TUT Section: T1 TBA M. Jennifer Bloxam

MUS 279 (F) American Pop Orientalism (DPE) (WS)
This tutorial will investigate the representation of Asians and Asian Americans in American popular culture since the late nineteenth century. Our focus will be on music's role in Orientalist representation in a wide variety of media and genres, including Hollywood film, television, popular song, music videos, Broadway musicals, hip hop, and novels. We will begin with major texts in cultural theory (Said, Bhabha) and will attempt throughout the semester to revise and refine their tenets. Can American Orientalism be distinguished in any fundamental way from nineteenth-century European imperialist thought? How does Orientalist representation calibrate when the "exotic others" being represented are themselves Americans? Our own critical thought will be sharpened through analysis and interpretation of specific works, such as Madame Butterfly, "Chinatown, My Chinatown," Sayonara, Flower Drum Song, Miss Saigon, Rising Sun, M. Butterfly, Aladdin, and Weezer's Pinkerton. We will end the semester by considering the current state of Orientalism in American popular culture.
Requirements/Evaluation: five 5- to 6-page essays and five critical oral responses
Prerequisites: previous related coursework and/or musical experience is desirable, but is not required
Enrollment Limit: 10
Enrollment Preferences: students with prior related course experience
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students will develop analytical and interpretive skills applicable to their future engagements with a wide range of art forms as we investigate the musical, literary, and visual techniques employed in works of exotic representation. We will focus on how popular culture has shaped and reflected perceptions of race and gender in American history since the late 19th century.

MUS 280 (S) Dancing the Score/Scoring the Dance
Cross-listings: MUS 280 DANC 280
This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire music as well as music inspiring dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one's group is central, sharing responsibility for the development of others' as well as one's own work.

Class Format: each student choreographer will work with a student composer; they will share responsibility choosing, creating, developing, completing, and presenting their projects.

Requirements/Evaluation: 10% class participation, 20% written assignments, 70% composition assignments

Prerequisites: permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 281 (S) Individual Vocal and Instrumental Instruction
Individual vocal or instrumental lessons offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade. (Note: partial credit music lessons taken pass/fail do not count as one of the three pass/fail options available to students for regular semester courses.) Students are required to prepare for 10 lessons during the semester with a minimum expectation of one hour practice per day and to perform publicly on at least one departmental studio recital during the semester. Lessons are scheduled TBA based upon instructor schedule. Make-up lessons are given at the discretion of the instructor. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 10 lesson commitment. There is no registration via Williams Student Records. To register for the course, a student must first contact the appropriate teacher; they may do this using the inquiry form. The inquiry form, an outline of the registration process, and the lesson registration deadlines are available on the Music Department website at https://music.williams.edu/courses/#individual-vocal-and-instrumental-instruction. Students will be reassigned to course numbers 281-288 based on the number of semesters of instruction already taken in one particular section. Specific instrument or voice sections are as follows: 01 Bassoon, 02 Cello, 03 Clarinet, 04 Bass, 05 Flute, 06 Guitar, 07 Harpsichord, 08 Horn, 09 Jazz Piano, 10 Oboe, 11 Organ, 12 Percussion, 13 Piano, 14 Classical Saxophone, 15 Trumpet, 16 Viola, 17 Violin, 18 Voice, 19 Jazz Bass, 20 Jazz Vocal, 21 Trombone, 22 Harp, 23 Jazz Drum, 24 Jazz Saxophone, 25 Jazz Trumpet, 26 Euphonium, 27 Tuba, 28 African Drumming, 29 Jazz Guitar, 30 Mbira, 31 Vocal/Songwriting, 32 Jazz Trombone 33 Sitar, 34 Tabla, 35 Erhu, 36 Yangqin, 37 Zheng, 38 Liuqin/Pipa, 39 Zhongruan, 99 Musicianship

Requirements/Evaluation: Lesson preparation, public performance, and progress throughout the semester.

Prerequisites: permission of the individual instructor; enrollment limits apply to each section based upon studio space and student qualifications

Enrollment Limit: none

Expected Class Size: NA

Grading: yes pass/fail option, half credit fifth course option

Unit Notes: Enrollment in more than one studio must be approved each semester by the chair beforehand.
**Distributions:** No divisional credit

**MUS 291 (S) Chamber Music Workshop**

Classical and Jazz Chamber Music and other small departmental ensembles (including Chamber Choir, Percussion Ensemble, Chinese Music Ensemble, and Brass Ensemble) coached by faculty on a weekly basis culminating in a performance. Offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade, but as with all fifth courses, pass/fail is also an option. Students in ad hoc groups organized each semester by the director of the chamber music or jazz programs are required to prepare for 10 one-hour coaching sessions during the semester. It is recommended that each group rehearse a minimum of 2 hours each week in preparation of the coaching. Each ensemble is responsible for keeping a weekly log of rehearsal times and attendance. The logs are to be handed in to the coaches at the end of the semester. In addition students are expected to practice the assigned music individually and are required to perform on the Classical or Jazz Chamber Music concert at the end of the semester. For students in continuing departmental small ensembles, students are expected to practice the assigned music individually and keep a log of their practices, attend all rehearsals, and participate in all concerts presented during the semester. To register for the course, a student must contact the Chamber Music Performance Coordinator, and fill out a registration contract to be signed by the Coordinator, the coach, and the student. Information on the registration process is available on the Music Department website [https://music.williams.edu/courses](https://music.williams.edu/courses) under "Chamber Music Workshop." The ensembles will be organized based on skill levels and the instruments represented.

**Requirements/Evaluation:** preparation for weekly coachings

**Prerequisites:** permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability

**Enrollment Limit:** 12

**Enrollment Preferences:** more advanced students, to be determined by audition as necessary

**Expected Class Size:** 12

**Grading:** yes pass/fail option, half credit fifth course option

**Unit Notes:** students should register for 291 for their first semester enrolled in this course and should use the numbers 292-298 for subsequent semesters; registration is through the Music department

**Distributions:** No divisional credit

Not offered current academic year

**MUS 301 (F) Counterpoint**

Counterpoint, the study of the ways independent melodic lines can be joined in music, has been essential to musical and compositional instruction for centuries. Counterpoint was taught by Mozart, studied by Beethoven, and to this day remains an integral part of compositional training. The course will introduce students to species counterpoint in two and three voices--exercises that develop discipline in polyphonic writing, hearing, and thinking. The exercises will focus on the constraints of sixteenth-century vocal polyphony (music of Palestrina and Lassus) but will illustrate how such contrapuntal discipline is also manifest in music of Corelli, Bach, Brahms and Debussy.

**Class Format:** Hybrid--lectures will be a mix of pre-recorded video content, and working through sample exercises in person or online as conditions require.

**Requirements/Evaluation:** written exercises and emulation projects

**Prerequisites:** MUS 103 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Music majors and those with previous music theory training

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2020

**MUS 309 (S) Jazz Arranging and Composition**

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

**Class Format:** weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

**Requirements/Evaluation:** project based 4-5 compositions/arrangements
Prerequisites: MUS 104B and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

MUS 323 (S) Arts Organizing in Africa and the Diaspora (DPE)

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls’ education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Class Format: This is a remote course.

Requirements/Evaluation: Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If the course exceeds the maximum enrollment, selection will be made based on students explanations for why they want to take the class.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities’ interactions with multinational corporations, and representational politics in performance.

MUS 327 (S) Sounds and Pressures: Music in the 1970s Caribbean

Cross-listings: AFR 327  HIST 342  MUS 327

Secondary Cross-listing

For the Caribbean the 1970s was a decade of cultural excitement and political tragedy. 1960s radical consciousness contributed to rapidly changing music styles that formed by the early seventies and blossomed on the world stage as the decade progressed. This was the period when Jamaican
Reggae, Haitian Konpa, and Spanish Caribbean Salsa, asserted their presence in the mainstream. But the countries that birthed these popular music forms were locked in political crisis. In Jamaica, political violence escalated, Haiti faced a brutal dictatorship and Cuba was caught in the midst of Cold War strain. A common response to these challenges was massive emigration from the Caribbean to the United States. This course will examine the music produced in the 1970s Caribbean and its relationship to the forces of migration, national politics, and inter-regional contact. After a background on Cuban and Haitian music, the course will give greatest focus to Jamaican politics its relationship with Reggae, which reached further than any other Caribbean music form in the 1970s. It will explore the journeys of the music as it accompanied and oftentimes preceded the arrival of large numbers of Caribbean immigrants. In the process, the US imaginary of the Caribbean was reshaped by the popularization of Caribbean commercial music.

Requirements/Evaluation: class participation, 3-4 short papers (5-7 pages)
Prerequisites: none

MUS 330 (S) Modern Folklore: Postcolonial Dance and Music in Africa

Cross-listings: AFR 330  MUS 330  DANC 330
Secondary Cross-listing
"Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old."  - Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950's-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final projects
Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors
Enrollment Limit: 14
Enrollment Preferences: students who have taken DANC 201, 202 or any of the courses listed in the prerequisites
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option

MUS 352 (S) Interplay: Collaborative Traditions in Jazz

"Meaningful theorizing about jazz improvisation at the level of the ensemble must take the interactive, collaborative context of musical invention as a point of departure"- Ingrid Monson, Saying Something. Collaboration gives birth to specific musical moments, shapes the dramatic arc of whole pieces
and performances, and is the foundation out of which the styles and larger artistic identities of individuals and groups arise. This class is an opportunity for advanced students of jazz music to investigate the uniquely collaborative nature of jazz language assimilation and communication. Participants will transcribe and analyze examples of musical interplay from the recorded works of the Miles Davis Quintet of the 1960's, the John Coltrane Quartet of the 1960’s, and other notable jazz ensembles. They will also undertake a thorough profile of a modern-day ensemble, including a performance-based final project. Essays on jazz aesthetics by Berliner, Monson, Hobson and Rinzler among others will serve to broaden our discussions as we examine the ideas of musical collaboration and group identity through social and commercial lenses.

**Requirements/Evaluation:** an assortment of weekly writing/listening/transcription/analysis/composition/performance projects

**Prerequisites:** advanced jazz theory and performance skills, permission of instructor, MUS 104b, 204 highly suggested

**Enrollment Limit:** 10

**Enrollment Preferences:** Music majors, jazz ensemble members

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

Spring 2021

**MUS 381 (S) Choral Conducting**

Choral conducting techniques will be developed through exercises and projects that encompass the many facets of this activity. Using the class as the primary practice choir, students will focus on conducting patterns applied to elements of interpretation, keyboard and vocal skills, issues of tuning and blend, rehearsal techniques, score study, and style and repertoire. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.

**Class Format:** coaching sessions

**Requirements/Evaluation:** regular conducting assignments and final projects

**Prerequisites:** MUS 103 and 104

**Enrollment Limit:** 6

**Enrollment Preferences:** upperclass students

**Expected Class Size:** 4

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

**MUS 382 (S) Orchestral Conducting**

This course will introduce and develop a broad range of subjects associated with conducting, including: leadership, rehearsal techniques, physical and aural skills, interpretation, performance practices, and programming. Related areas to be discussed include: balance, intonation, rhythm, articulation, bowings, and complex meters. Weekly conducting and score reading assignments will form the core of the workload. Larger projects may include conducting existing instrumental ensembles, and along with score reading, will be the basis of the midterm and final exams. This course includes instrument demos, conducting videos and a trip to audit a private Boston Symphony rehearsal at Symphony Hall in Boston.

**Class Format:** lab

**Requirements/Evaluation:** class participation, regular conducting assignments, midterm and final projects

**Prerequisites:** membership in a Music Department ensemble preferred, permission of instructor

**Enrollment Limit:** 6

**Enrollment Preferences:** Music department ensemble members/upperclass students

**Expected Class Size:** 2-4

**Grading:** yes pass/fail option, yes fifth course option
MUS 391 (S) Advanced Musical Performance

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons can be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student.

Class Format: individual instruction

Requirements/Evaluation: lesson preparation, public performance, and progress throughout the semester.

Prerequisites: completed application, registration and instructor recommendation must be submitted by the instructor by the Tuesday before the first Friday of the semester

Enrollment Limit: none

Enrollment Preferences: intended primarily for music majors; students must obtain the application and registration forms from the Music Department Office

Expected Class Size: NA

Grading: no pass/fail option, yes fifth course option

Unit Notes: Music majors may register for a total of four semesters, non-majors may register for two semesters: the specific name of the project elected is to be specified after the title "Music Performance Studies"

Distributions: (D1)

Not offered current academic year

MUS 392 (S) Advanced Musical Performance

Distributions: (D1)

Not offered current academic year
MUS 471 (S) Timbre

Timbre is central to the experience of all music and often enables us to identify styles and cultures nearly instantaneously. However, timbre is not commonly discussed in detail since our technical vocabulary for describing this musical element has been comparatively limited. Our work in this seminar will involve readings in music theory and history, ethnomusicology, and cognitive studies as well as in the emerging field of sound studies as we attempt to define timbre, explore its manifestations in a wide variety of music, and develop an analytical approach and descriptive vocabulary specifically to this musical element. We will consider how composers and performers of both art and popular musics have wielded timbre as an expressive device and how technology may allow us to analyze details of timbral performance and perception. We will investigate the relationship between timbre and orchestration, from the rise of Haydn's orchestra to the Klangfarbenmelodie of Schoenberg. We will consider extremes of timbral distortion in both vocal and electric guitar effects in rock music as well in such traditions as Korean p'ansori and will explore various forms of speech music and the work of composers of spectral music to expand our case studies. Finally, our own experiments with timbral effects will bring our seminar to bear on our musical performance.

Requirements/Evaluation: evaluation will be based on papers, presentations, and class participation

Prerequisites: MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents). MUS 201-202 are also recommended.

Enrollment Limit: 10

Enrollment Preferences: senior Music majors, junior Music majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2021

SEM Section: 01  TBA  W. Anthony Sheppard

MUS 472 (S) Bach's Legacy

How have composers after Bach engaged with his legacy? This seminar will trace the course of the Classical and early Romantic period "Bach Revival" through Mozart, Beethoven, Mendelssohn, and Clara and Robert Schumann, and explore how he was venerated in the later Romantic era by Brahms and Busoni. Our main focus, however, will be on how composers of the modern era have viewed him and used his music. We will test critical conceptual frameworks offered by David Lowenthal’s "The Past is a Foreign Country" and Harold Bloom’s "The Anxiety of Influence," using them as lenses through which to view contemporary classical composers’ Bach-inspired creations, ranging from Schoenberg and Webern through Sophia Gubaidulina, George Crumb, and David Lang. Finally, we will consider both the musical techniques and meanings of reworkings and quotations of Bach's music in film, jazz and popular music.

Requirements/Evaluation: several papers totaling at least 20 pages, presentations, and class participation

Prerequisites: MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents); MUS 201-202 and MUS 231 and/or 233 highly recommended

Enrollment Limit: 12

Enrollment Preferences: junior and senior Music majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

MUS 473 (S) Process Music

The course explores process music—music organized by the unfolding of various mathematical or mechanistic procedures—as defined by Steve Reich’s "Music as Gradual Process." The seminar centers upon Reich's process music, placing it in the context of its intellectual and musical precursors, the process and minimalist music of his contemporaries, and the subsequent generations of composers who built on Reich's foundation. The course will develop analytical tools to both define the processes that composers use in their music and to explore the particular relation between the musical materials (melodic, rhythmic) a composer chooses and the processes to which those material are subject. Reich's process music and its techniques will serve as both a lens and mirror to examine and reflect upon precursor repertoires, including the contrapuntal music of Bach, isorhythmic motets of the middle ages and their cyclic counterparts in the music of Messiaen, serial procedures of the 1950s, and Ghanaian ensemble drumming. Contemporary musicians/composers to be explored as lecture topics and student projects will include Riley, Glass, Tenney, Lang, Tom
MUS 474  (S)  Music and Corporeality  (WS)

Music is often said to derive its own special quality from the fact that it exists outside of visual representation and is not contained within a physical form, yet musical sound and practice are created through and act upon bodies in numerous ways. This course aims to address how music and bodies shape and respond to one another. Drawing from sources across musical sub-disciplines and extending to fields including cognitive science, sound studies, performance studies, and anthropology, we will follow four lines of inquiry related to music and corporeality: Embodied practices: techniques and pedagogies in performance and in listening (including praxis [Bourdieu], Deep Listening [Oliveros, Becker], Alexander Technique); Music’s physical effects and affects: pleasure and pain, the vocalic body [Bonefant, Connor], cognitive processes; Ideological moves: questioning the universality of music and of bodies (including works by Blacking, Miller, and Geurts); Music and bodies at their limits: cyberfeminism, futurism, disembodiment, ecstasy, questions of artificiality/virtuality. Musical examples will be drawn from classical and popular sources from Euro/American idioms and beyond, predominantly from the late 20th and 21st centuries.

Requirements/Evaluation: midterm project, final paper (including rough draft and final copy) and presentation, intermittent 1- to 3-page papers and exercises

Prerequisites: familiarity with music terminology and the ability to read music notation is expected; questions can be directed to the instructor

Enrollment Limit: 12

Enrollment Preferences: senior and junior Music majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course culminates in a final presentation and paper, meant to showcase the student's critical achievements, including their ability to formulate and substantiate their argument. Assignments and exercises throughout the course are aimed at honing students' ability to write and present effectively.

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons can be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student.

Class Format: individual instruction

Requirements/Evaluation: lesson preparation, public performance, and progress throughout the semester.

Prerequisites: completed application, registration and instructor recommendation must be submitted by the instructor by the Tuesday before the first Friday of the semester

Enrollment Limit: none

Enrollment Preferences: intended primarily for music majors; students must obtain the application and registration forms from the Music Department Office

Expected Class Size: NA

Grading: no pass/fail option, yes fifth course option

Unit Notes: Music majors may register for a total of four semesters, non-majors may register for two semesters: the specific name of the project elected is to be specified after the title "Music Performance Studies"

Distributions: (D1)

Not offered current academic year

MUS 493 (F) Senior Thesis: Music

Music senior thesis; this is part of a full-year thesis (493-494). Required for all students approved for thesis work in music. Please refer to "The Degree with Honors in Music" for deadlines and other requirements.

Requirements/Evaluation: Please refer to "The Degree with Honors in Music" on the Music Department website for requirements.

Prerequisites: permission of department

Enrollment Limit: none

Enrollment Preferences: Only Music Majors with a minimum gpa of 3.3

Expected Class Size: NA

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2020

HON Section: H1    TBA    Ed Gollin

MUS 494 (S) Senior Thesis: Music

Music senior thesis; this is part of a full-year thesis (493-494). Required for all students approved for thesis work in music. Please refer to "The Degree with Honors in Music" for deadlines and other requirements.
Requirements/Evaluation: Please refer to "The Degree with Honors in Music" on the Music Department website for requirements.

Prerequisites: permission of department

Enrollment Limit: none

Enrollment Preferences: Only Music Majors with a minimum gpa of 3.3

Expected Class Size: NA

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2021
HON Section: 01    TBA    Ed Gollin

MUS 497 (F) Independent Study: Music

All independent study proposals must be approved by the entire music faculty. Proposals must be completed and signed by faculty sponsor, and submitted to department chair, by the day PRIOR to the first day of classes of the semester. No proposals will be accepted or considered if this deadline is missed. Proposals for full-year projects must be complete at the beginning of the fall semester.

Requirements/Evaluation: Undefined - specific to the proposal

Prerequisites: permission of department

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: NA

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2020
IND Section: H1    TBA    Ed Gollin

MUS 498 (S) Independent Study: Music

All independent study proposals must be approved by the entire music faculty. Proposals must be completed and signed by faculty sponsor, and submitted to department chair, by the day PRIOR to the first day of classes of the semester. No proposals will be accepted or considered if this deadline is missed. Proposals for full-year projects must be complete at the beginning of the fall semester.

Requirements/Evaluation: Undefined - specific to the proposal

Prerequisites: permission of department

Enrollment Limit: none

Enrollment Preferences: none

Winter Study

MUS 31 (W) Senior Thesis: Music

To be taken by students registered for Music 493-494.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

MUS 99 (W) Independent Study: Music
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Distributions: (D1)
Not offered current academic year
Neuroscience is a rapidly growing interdisciplinary field concerned with understanding the relationship between brain, mind, and behavior. The interdisciplinary nature of the field is apparent when surveying those who call themselves neuroscientists. Among these are anatomists, physiologists, chemists, psychologists, philosophers, molecular biologists, computer scientists, linguists, and ethologists. The areas that neuroscience addresses are equally diverse and range from physiological and molecular studies of single neurons, to investigations of how systems of neurons produce phenomena such as vision and movement, to the study of the neural basis of complex cognitive phenomena such as memory, language, and consciousness. Applications of neuroscience research are rapidly growing and include the development of drugs to treat neurodegenerative disorders such as Alzheimer’s disease and Parkinson’s disease, the use of noninvasive techniques for imaging the human brain such as fMRI and near infrared optical imaging, and the development of methods for repair of the damaged human brain such as the use of brain explants and implants. Combining this wide range of approaches and research methods to study a single remarkably complex organ—the brain—and the behavioral outcomes of its activity requires a unique interdisciplinary approach. The Neuroscience Program is designed to provide students with the opportunity to explore this approach.

THE PROGRAM

The program in neuroscience consists of seven courses: The Cell (Biology 101); Introductory Psychology (Psychology 101); Neuroscience (Neuroscience 201); Topics in Neuroscience (Neuroscience 401); and three electives. Either Biology 101 or Psychology 101 must be taken prior to enrolling in the core course, Neuroscience (Neuroscience 201), which is the foundational neuroscience course and provides the background for upper-level electives in the concentration. Ideally, Neuroscience is taken the fall of the sophomore year. Electives are designed to provide in-depth coverage of specific areas within the field and many electives include laboratory experiences. At least one elective course is required from those designated as Group A (Neuroscience courses cross-listed with Biology). At least one elective course is required from those designated as Group B (Neuroscience courses cross-listed with Psychology). A third required elective may come from Group A or Group B offerings or it may come from Group C which consists of courses that are not cross-listed with neuroscience but include significant neuroscience content. Students may also petition the advisory committee to consider courses that are not listed among these groups including neuroscience-related courses that may be taken while studying abroad. Topics in Neuroscience (Neuroscience 401) is designed to provide an integrative culminating experience and is taken by all senior concentrators during the senior year.

Required Courses

**Biol 101(F) The Cell**
Taught by: Lois Banta, Cynthia Holland, Daniel Lynch, Damian Turner
Catalog details

**NSCI 201 / BIOL 212 / PSYC 212(F) Neuroscience**
Taught by: Shivon Robinson, Tim Lebestky
Catalog details

**NSCI 401(S) Topics in Neuroscience**
Taught by: Tim Lebestky
Catalog details

**Psyc 101(F, S) Introductory Psychology**
Students can ask the Neuroscience Program Chair whether courses not listed here might count as electives.

**Elective Courses**

Three elective courses are required. At least one elective must be from Group A and at least one elective must be from Group B. The third elective may come from Group A, Group B, or Group C. Students may also consult the Chair to consider courses that are not listed among these groups including neuroscience-related courses that may be taken while studying abroad.

**Group A**

- **BIOL 311 / NSCI 311 (F)** Neural Systems and Circuits
  - Taught by: Matt Carter
  - Catalog details

- **BIOL 312 / NSCI 312 (F)** Sensory Biology
  - Taught by: Heather Williams
  - Catalog details

- **BIOL 407 / NSCI 347** Neurobiology of Emotion
  - Taught by: TBA
  - Catalog details

- **BIOL 412 / NSCI 342 (S)** Neural and Hormonal Basis of Hunger
  - Taught by: Matt Carter
  - Catalog details

**Group B**

- **PSYC 312 / NSCI 322 (S)** From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology
  - Taught by: Victor Cazares
  - Catalog details

- **PSYC 313 / NSCI 313 (S)** Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic
  - Taught by: Shivon Robinson
  - Catalog details

- **PSYC 315 / NSCI 315** Hormones and Behavior
  - Taught by: Noah Sandstrom
  - Catalog details

- **PSYC 319 T / NSCI 319 / STS 319** Neuroethics
  - Taught by: TBA
  - Catalog details

**Group C**

- **BIOL 204 (S)** Animal Behavior
  - Taught by: Heather Williams
  - Catalog details

- **BIOL 421** Thermoregulation: From Molecules to Organisms
  - Taught by: Steven Swoap
  - Catalog details

- **PSYC 335 (F)** Early Experience and the Developing Infant
  - Taught by: Amie Hane
  - Catalog details

**THE DEGREE WITH HONORS IN NEUROSCIENCE**

The degree with honors in Neuroscience provides students with the opportunity to undertake an original research project under the supervision of one or more of the Neuroscience faculty. In addition to completing the requirements of the Neuroscience Program, candidates for an honors degree must enroll in Neuroscience 493-W31-494 and write a thesis based on an original research project. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Students interested in pursuing a degree with honors should contact the Neuroscience Advisory Committee by winter study of their junior year.

**STUDY ABROAD**
FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions). Securing syllabi is often difficult, so a discussion with the program Chair is certainly necessary. Under no circumstances should a student assume that a course taken at another institution will count toward the concentration.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

The program Chair and advisory committee will consider the course title, course description, and complete syllabus, including readings/assignments. Exams or other written work will also be considered. Written work may be requested if the course description suggests that it is only tangentially related to the field of neuroscience. Written work would, therefore, need to demonstrate that there was sufficient emphasis on neuroscience material.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Generally there is a maximum of 2 credits that can be completed through a study abroad program.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. NSCI 201 and NSCI 401 can not generally be completed abroad. NSCI should be taken during the sophomore year if possible and includes a laboratory component that is rarely comparable in study abroad courses.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

NSCI 201 is only taught during the fall semester. As such, students planning to study away should plan to take it during the sophomore year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Some students (rarely) have failed to discuss the course in advance of their study abroad experiences. They may also have assumed that approval of a course by another department (e.g., Biology or Psychology) would necessarily mean that they would receive Neuroscience credit for the course. This is not necessarily the case.

NSCI 201 (F) Neuroscience

Cross-listings: BIOL 212 NSCI 201 PSYC 212

Primary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers. Lectures will be pre-recorded and shared asynchronously. Students will be divided into small groups (~6 students each) that will meet synchronously with the instructors once a week for 30 minutes to further discuss concepts covered in the lecture. These meetings will take place within the scheduled class period and be in either in-person or online formats. If in-person numbers are too low to populate a given discussion subgroup, then that group would meet via the previously described online format. The lab component will be available to remote students in modified form, and will cover much of the same content as the in-person sections. Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, two midterm exams, and a final exam.

Class Format: Lectures will be pre-recorded and shared asynchronously. Students will be divided into small groups that will meet synchronously with
the instructors once a week for 30 minutes to further discuss concepts covered in the lecture. The lab component will be available to remote students in modified form, and will cover much of the same content as the in-person sections.

**Requirements/Evaluation:** Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, two midterm exams, and a final exam.

**Prerequisites:** PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

**Enrollment Limit:** 36

**Enrollment Preferences:** sophomores and Biology and Psychology majors

**Expected Class Size:** 36

**Grading:** yes pass/fail option, no fifth course option

**Secondary Cross-listing**

This course will examine the functional organization of the mammalian brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections encode sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the nervous system regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Journal article discussions will complement course topics, providing experience in reading, understanding, and critiquing primary research papers. Writing an original literature review article will provide experience in expository writing and anonymous peer review. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

**Class Format:** In Fall 2020, this course will be offered in a hybrid format, with in-person experiences for students on campus, as well as the ability to complete discussions/labs remotely. Exact details to be announced prior to the first day of the course.

**Requirements/Evaluation:** Class participation, completion of labs, literature review assignment, hour exams, a final exam

**Prerequisites:** BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205

**Enrollment Limit:** 12

**Enrollment Preferences:** Biology majors and Neuroscience concentrators

**Expected Class Size:** 12
**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

**NSCI 312 (F) Sensory Biology**

**Cross-listings:** BIOL 312 NSCI 312

**Secondary Cross-listing**

How do animals sense properties of the physical world? How do they convert physical or chemical energy to a signal within a cell that carries information? How is that information represented? What are the limits on what can be sensed? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction, and how these mechanisms constrain the types of information that the nervous system encodes and processes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world, and what adaptations allow some species to have "special" senses. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrine cells in the mammalian retina), the constant reshaping of the olfactory system (chemical mapping of odors), what makes a touch stimulus noxious, and enhanced color vision (in birds, bees, and shrimp). This course will be "flipped", with readings and on-line presentations to be done before class and in-class time devoted to short quizzes, additional explanations of the material, and discussions of the primary literature. Laboratory exercises will focus on the nematode C. elegans, an important model system, to explore and extend how we understand touch, temperature sensation, and chemosensation.

**Class Format:** Prior to each class, students will do assigned readings and view on-line presentations of material. The "lecture" hours will be used to complete short quizzes (~5 minutes), go over concepts and experiments that require elaboration, answer questions, and discuss assigned papers from the primary literature. The lab program will have 5 pre-designed labs; the remainder of the semester will be devoted to independent projects.

**Requirements/Evaluation:** Four take-home exams, an independent research project (proposal, followed by results/discussion), presentation about a non-standard sensory system, short quizzes, lab and class participation.

**Prerequisites:** Either BIOL 212 or BIOL 205

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference to senior Biology majors who need a 300-level course; then to senior Neuroscience concentrators who need a Bio elective; then to Biology majors. Not open to students who have taken Biology 213.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

NSCI 313 (S) Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic

Cross-listings: NSCI 313 PSYC 313

Secondary Cross-listing

Opioid misuse, including addiction, has emerged as a major health epidemic in the United States. This course will explore the science of opioids as well as the historical and societal context surrounding their use and abuse. We will examine the neurobiological mechanisms through which opioids interact with pain pathways and reward circuits within the brain and we will explore how changes in these systems contribute to opioid tolerance, dependence, and addiction. We will consider how genetic, environmental and behavioral factors can powerfully influence these processes. Finally, we will consider alternative approaches to pain management as well as interventions for the treatment of opioid abuse. Students will be expected to design and conduct an empirical project related to the course material. Critical evaluation of peer-reviewed primary literature from animal and human studies will serve as a foundation for class discussions. Evaluation will be based on class presentations, participation in discussions and empirical projects, written assignments, and a poster presentation of the empirical project.

Class Format: empirical lab course

Requirements/Evaluation: class presentations, participation in discussions and empirical projects, five short position papers (approximately 2 pages double-spaced), an APA style empirical paper (approximately 20 pages double-spaced) and poster presentation of the empirical project.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

NSCI 315 (F) Hormones and Behavior

Cross-listings: PSYC 315 NSCI 315

Secondary Cross-listing

In all animals, hormones are essential for the coordination of basic functions such as development and reproduction. This course studies the dynamic relationship between hormones and behavior. We will review the mechanisms by which hormones act in the nervous system. We will also investigate the complex interactions between hormones and behavior. Specific topics to be examined include: sexual differentiation; reproductive and parental behaviors; stress; aggression; and learning and memory. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

Class Format: empirical lab course

Requirements/Evaluation: presentations and participation in discussions, approximately seven 1-2 page response papers, midterm, written (15-20 page) and oral presentation of the research project

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Secondary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

NSCI 322  (S)  From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology
Cross-listings: NSCI 322  PSYC 312

Secondary Cross-listing

This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience using the research tools discussed in class to explore novel research questions.

Class Format: empirical lab course
Requirements/Evaluation: class presentations, participation in discussions, midterm exam, and participation in all phases of the empirical project research experience including oral and written presentation of key findings
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 16
NSCI 342 (S) Neural and Hormonal Basis of Hunger

Cross-listings: BIOL 412 NSCI 342

Secondary Cross-listing

Hunger and satiety are highly regulated behavioral states that maintain energy homeostasis in animals. This course will focus on readings from the primary literature to track numerous recent advances in how the brain and endocrine systems regulate appetite. Topics include how organ systems communicate with the brain to regulate appetite, how different populations of neurons in the brain interact to regulate appetite, how brain systems that regulate appetite affect other behaviors, and how the neural and hormonal basis of hunger compare with brain systems that regulate other homeostatic systems such as thirst. By tracing the advances in appetite regulation within the past decade, we will also trace the advent of cutting-edge molecular, genetic, and optical-based tools that are transforming multiple fields within physiology and neuroscience. Students in this class will have the opportunity to improve skills in written and oral scientific presentation.

Requirements/Evaluation: written assignments, oral presentations, and participation

Prerequisites: BIOL 205 or BIOL/PSYC 212, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: seniors who have not taken a 400-level course

**NSCI 401 (S) Topics in Neuroscience**
Neuroscientists explore issues inherent in the study of brain and behavior. The overall objective of this seminar is to create a culminating senior experience in which previous course work in specific areas in the Neuroscience Program can be brought to bear in a synthetic, interdisciplinary approach to understanding complex problems. The specific goals for students in this seminar are to evaluate original research and critically examine the experimental evidence for theoretical issues in the discipline. Topics and instructional formats will vary somewhat from year to year, but in all cases the course will emphasize an integrative approach in which students will be asked to consider topics from a range of perspectives including molecular, cellular, systems, behavioral and clinical neuroscience. Previous topics have included autism, depression, stress, neurogenesis, novel neuromodulators, language, retrograde messengers, synaptic plasticity, and learning and memory.

**Requirements/Evaluation:** presentations, short papers, and a term paper

**Prerequisites:** open only to seniors in the Neuroscience program
Enrollment Limit: 18
Enrollment Preferences: Senior Neuroscience concentrators

Expected Class Size: 14
Grading: no pass/fail option, yes fifth course option
Unit Notes: required of all senior students in the Neuroscience program

Distributions: (D3)
Attributes: NSCI Required Courses

Spring 2021
SEM Section: 01 TBA Tim J. Lebestky

**NSCI 455 (S) Neural Regeneration**

**Cross-listings:** NSCI 455 BIOL 455

**Secondary Cross-listing**

Injury to the human nervous system can cause lasting impairment, but non-mammalian animals have prodigious capacity to regenerate neurons, regrow axons, and repair scars. What accounts for these differences? Regeneration can occur in multiple modes: replacement of injured neurons, repairs such as axonal regrowth to reconnect to a target structure, or repurposing existing neurons for new tasks through neural plasticity. We will explore the molecular foundations that underlie neuronal proliferation, neural plasticity, and inflammatory responses. We will consider the potential for translating these findings to inform treatments for humans who suffer from neural injury or neurodegenerative disease. Class discussions will focus on readings from the primary literature.

**Class Format:** Discussion, 3 hours per week

**Requirements/Evaluation:** Evaluation will be based on class participation, brief weekly responses, and four short research proposals.

**Prerequisites:** BIOL 212/NSCI 201 or permission of instructor.

Enrollment Limit: 10
Enrollment Preferences: Biology seniors who have not yet taken a 400 level course and Neuroscience senior concentrators who need a Group A elective.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

**NSCI 493 (F) Senior Thesis: Neuroscience**

Neuroscience senior thesis; this is part of a full-year thesis (493-494). Independent research for two semesters and a winter study under the guidance of one or more neuroscience faculty. After reviewing the literature in a specialized field of neuroscience, students design and conduct an original research project, the results of which are reported in a thesis. Senior thesis work is supervised by the faculty participating in the program.

**Class Format:** This course will meet in a hybrid or remote format determined in collaboration with the supervising faculty member.

**Requirements/Evaluation:** Determined by the thesis advisor

**Prerequisites:** Permission of the thesis advisor

Enrollment Limit: none

Enrollment Preferences: Senior Neuroscience concentrator
**NSCI 494 (S) Senior Thesis: Neuroscience**

Neuroscience senior thesis; this is part of a full-year thesis (493-494). Independent research for two semesters and a winter study under the guidance of one or more neuroscience faculty. **Winter Study**

---

**NSCI 31 (W) Senior Thesis: Neuroscience**

To be taken by students registered for Neuroscience 493-494.

**Class Format:** thesis  
**Grading:** pass/fail only  
*Not offered current academic year*

**NSCI 99 (W) Independent Study: Neuroscience**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study  
**Grading:** pass/fail only  
*Not offered current academic year*
To engage in philosophy is to ask a variety of questions about the world and our place in it—questions that we confront in our everyday lives or that underlie our ordinary practices. What is a good, meaningful, or happy human life (ethics and politics)? What do we owe non-human species and future generations (applied ethics/practical philosophy)? Does god exist? (metaphysics)? What can we know, and what makes a belief or statement true (epistemology)? Are there objective standards for judging works of art? Thus, philosophers also address questions relevant to many disciplines.

The program in philosophy is designed to aid students in thinking about such questions, by acquainting them with influential work in the field, past and present, and by giving them tools to grapple with these issues themselves. The program emphasizes training in clear, critical thinking and in effective writing. Most of our courses are offered as small seminars or tutorials in which students have multiple opportunities to develop skills in reasoning and writing interpretive and critical essays.

**MAJOR**

The Philosophy major consists of nine semester courses: three required courses and six electives. The required courses are: any 100-level philosophy course, Philosophy 201 (History of Ancient Greek Philosophy) or Philosophy 202 (History of Modern Philosophy), and Philosophy 401 (Senior Seminar). The six electives are structured by a distribution requirement. Students must take at least one course in each of three areas: Contemporary Metaphysics and Epistemology [M&E], Contemporary Value Theory [V], and History [H]. These requirements apply to majors in the Class of 2018 and after.

Courses taught in other departments at Williams or at other institutions will not count toward the distribution requirement (Williams-Exeter tutorials may count, however, with the approval of the Department Chair). Up to two cross-listed courses taught in other departments may count as electives toward the major. No more than one 100-level course may count toward the major (and one 100-level course is required for the major—no exceptions).

**We recommend the following trajectory through the major:**

By the end of the first year, take a 100-level philosophy course (this is typically the first step in the major) and one other philosophy course.

By the end of the second year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least one other philosophy course. (If you will be away for the whole of your junior year, you should complete at least five courses by the end of the second year, preferably six.)

By the end of the junior year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least four other philosophy courses.

Other recommendations: take at least one tutorial; distribute your six electives evenly across the three distribution baskets; take a logic course; and take both PHIL 201 and PHIL 202.

**The Degree with Honors in Philosophy**

The degree with honors in Philosophy is awarded to the student who has demonstrated outstanding achievement in a program of study that extends beyond the requirements of the major. The extension beyond major requirements may take the form either of independent work culminating in a senior essay or thesis (the independent-study route) or of additional course work (the directed-study route). Candidates must have GPAs of 3.6 or higher in their courses in philosophy at the end of the junior and senior years. The independent-study route to honors requires the completion and defense of either a senior essay produced in the fall semester plus winter study period (maximum 40 pages) or a year-long senior thesis (maximum 75 pages). Plans for either essay or thesis (including a brief proposal and bibliography, worked out in consultation with an advisor) must be submitted to
the department in mid-March (before spring break) of the junior year. The directed-study route to honors requires the completion of two courses in philosophy in addition to the nine required for the major. Candidates taking this route must also submit to the department revised copies of two term papers (15 pages or longer) written for philosophy courses they have taken. Students should register for a directed study over their senior year winter study and work with an advisor on the paper revisions. A recommendation for graduation with honors will be made on the basis of the thoroughness, independence, and originality of the student's work.

STUDY AWAY

The Williams-Exeter Programme at Oxford (WEPO): the first full Oxford philosophy tutorial will count as the equivalent of two full-semester philosophy courses at Williams; the second full Oxford philosophy tutorial will count as the equivalent of one full-semester philosophy course at Williams, for a total of three Williams philosophy courses. Courses must be pre-approved by the Chair of the Philosophy Department, who will also determine which, if any, courses will count toward the philosophy major distribution requirements.

Courses taken in other Study Away programs: Students may petition the Philosophy Department for credit for philosophy courses taken at their Study Away institution. They should consult with the department Chair before they commit to a program. Final determinations will be made on the basis of the course syllabus and the quality of the student’s written work for the course. Typically, courses taken while studying away will not fulfill distribution requirements for the philosophy major at Williams.

PHILOSOPHY RELATED COURSES

The following courses offered in other departments, while not cross-listed with Philosophy, may be of interest to philosophy students:

ARTh 541 Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud
  Taught by: Emmelyn Butterfield-Rosen
  Catalog details
ENGL 324 / ENVI 323 World's End: Literary Ecologies of the Limit
  Taught by: Christopher Pye
  Catalog details
ENGL 456 / COMP 456 Topics in Critical Theory: Hegel and the Dialectic
  Taught by: Christian Thorne
  Catalog details
HIST 301 Approaching the Past: Other People's History
  Taught by: Alexander Bevilacqua
  Catalog details
HIST 331 European Intellectual History from Aquinas to Kant
  Taught by: Alexander Bevilacqua
  Catalog details
HIST 485 T / PSYC 158 Freud: A Tutorial
  Taught by: Thomas Kohut
  Catalog details
PSCI 203(F, S) Introduction to Political Theory
  Taught by: Mark Reinhardt, Laura Ephraim
  Catalog details
PSCI 235 / ENVI 235 Survival and Resistance: Environmental Political Theory
  Taught by: TBA
  Catalog details
PSCI 273 / ENVI 273 / STS 273 Politics without Humans?
  Taught by: Laura Ephraim
  Catalog details
PSCI 312 T / LEAD 312(S) American Political Thought
  Taught by: Justin Crowe
  Catalog details
PSCI 334 Theorizing Global Justice
  Taught by: Nimu Njoya
  Catalog details
PSCI 339 T / JWST 339 Politics in Dark Times: Hannah Arendt
  Taught by: Laura Ephraim
  Catalog details
REL 238(S) Faith and Rationality in Islam: Skepticism and the Quest for Certainty
  Taught by: Zaid Adhami
  Catalog details
REL 250 / ASST 250 Scholars, Saints and Immortals: Virtue Ethics in East Asia
  Taught by: Jason Josephson Storm
  Catalog details
REL 255 / ANTH 255 Buddhism: Ideas and Practices
  Taught by: Georges Dreyfus
PHIL 104 (S) Philosophy and Tragedy

Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can be understood by rational means. Furthermore, they share the conviction that the most important components of a successful life are within the control of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The tragedians emphasize the ways in which the cosmos and our role in it resists any attempt to be understood, and emphasize the ways in which the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians can lead to a thoroughgoing nihilism according to which --the best thing of all [for a human being] is never to have born--but the next best thing is to die soon (Aristotle's Eudemus as quoted in Nietzsche's Birth of Tragedy; see also Sophocles' Oedipus at Colonus).* Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. Furthermore, philosophers have continued to revisit the existential questions vividly raised by Greek tragedy. In this course, we will examine a number of Greek tragedies and philosophical writing on tragedy and the tragic. We will read the Oresteia and Prometheus Bound by Aeschylus, Sophocles' Theban Cycle, and the Hippolytus, Bacchae and Philoctetes by Euripides. As we read through these plays, we will also examine a number of philosophical works about tragedy. We will begin with Aristotle's Poetics and will continue with Hume's Of Tragedy, Hegel's various writings on tragedy, and Nietzsche's The Birth of Tragedy. If possible, we will arrange to see a live performance of a Greek tragedy.

Requirements/Evaluation: five papers, five responses and a final paper in multiple drafts; each week one student will write a paper responding to the week's readings and the other student will write a response to that paper

Prerequisites: none; this tutorial is an appropriate first course in PHIL

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

PHIL 109 (F) Skepticism and Relativism (WS)

Intellectually, we are ready skeptics and relativists. We doubt, we point out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, agnosticism is the only alternative to foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will investigate the nature of skepticism and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from...
anthropology, physics, psychology, and linguistics. We will look at relativism with respect to reason and truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughgoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our skepticism and relativism are the result of our own laziness and failure? Of course, this question cannot really be answered, nor is there any value in trying to answer it, and any "answer" will only be "true" for you. Right?

Class Format: This tutorial will convene remotely via Zoom video according to a fixed weekly schedule agreed upon by the instructor and the two tutorial participants at the beginning of the semester.

Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work.

Prerequisites: none; this tutorial is an appropriate first course in PHIL.

Enrollment Limit: 8

Enrollment Preferences: first-year students; there is no need to write to the instructor indicating a special interest in the tutorial. If oversubscribed, students will be selected randomly.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Students will write a tutorial essay every other week and will receive written feedback on composition and structure. Essays later in the semester will reflect the writing lessons of earlier in the semester.

Fall 2020
TUT Section: RT1 TBA Joseph L. Cruz

PHIL 114 (F) Freedom and Society

Freedom is one of our fundamental values as Americans. It is emphasized in our founding documents, and it occupies a central place in our contemporary political discourse. But do we ask: What is freedom? and Why do we value it? In the first unit of this course, we will consider the relationship between freedom and social order. Do society's laws limit our freedom in order to make us safe? Or do laws somehow enhance or enable our freedom? We will read Thomas Hobbes, John Locke, and Jean-Jacques Rousseau in seeking answers to these questions. We will then turn to some specific social forms in the second unit. We will ask whether they promote or preclude our freedom. We will read Adam Smith and Karl Marx on capitalism, and Simone de Beauvoir on gender.

Requirements/Evaluation: weekly reading response papers; take-home midterm and final exams

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2)

Attributes: JLST Interdepartmental Electives

Not offered current academic year

PHIL 115 (S) Personal Identity (WS)

Through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. Persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. Thus, the concept of person plays a significant role in most branches of philosophy, e.g. metaphysics, epistemology, moral and political philosophy, philosophy of mind. Conceptions of person are equally
important in science (especially in psychology), law, and the arts. Questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. The aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. Some of the questions which we will discuss are: What is a person? How do I know that I am one? What constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? What makes me the particular person that I am, and how is my identity as this individual person preserved over time? The course will place special emphasis on developing students' intellectual skills in close, analytical reading; reconstructing and evaluating claims and reasons that support them; producing original ideas and arguments, orally and in writing; responding to the claims and arguments presented in texts and in class; and writing clear, polished, well-argued papers.

Class Format: discussion

Requirements/Evaluation: class attendance, preparedness and participation; small group weekly meetings; frequent short writing assignments.

Prerequisites: none; open to first year students

Enrollment Limit: 12

Enrollment Preferences: freshmen, sophomores, and philosophy majors who need a 100 level course to satisfy requirement for the major

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Students will write eight short papers (800-1000 words each), and revise two of them. All papers will receive detailed comments on substance as well as on writing skills and strategies.

Spring 2021

SEM Section: 01 TBA Bojana Mladenovic

PHIL 116 (S) Perception and Reality (WS)

This course is an introduction to philosophy through four major themes: The nature of the universe, the existence of gods, thought itself, and the mind/body problem. Throughout, we will appeal to reason and evidence in forming our best beliefs. Our discussions will range over historical and contemporary works in the Western tradition.

Requirements/Evaluation: active participation; four (5-6 page) essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores; there is no need to email the professor in advance to indicate interest in the course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Students will craft 4 six page essays, each with extensive comments on structure and composition with an eye toward developing their skills in philosophical writing.

Spring 2021

SEM Section: 01 TBA Joseph L. Cruz

PHIL 119 (S) Justice, Democracy and Freedom: Plato with Footnotes (WS)

This course addresses a central question in both ethics and political philosophy: How should we live? The question has two parts: What is the best life for individuals? And what social and political arrangements make such a life possible? In attempting to answer these questions we also engage related theoretical questions concerning what is real and how we have access to it. We begin with readings from Plato’s Republic, a seminal work in the history of philosophy that has exerted a powerful influence on nearly every subsequent attempt to answer these questions in the context of the Western philosophical tradition. After reading from early Platonic dialogues and the Republic, we also consider some of the best of these attempts in
the Western philosophical canon (“footnotes on Plato”) and the challenges they present to Plato’s conclusions. Our principal focus will be on issues that continue to be of paramount importance in the world today, namely, democracy, justice and the meaning of freedom.

Requirements/Evaluation: eight 2-page response papers based on readings (first three are pass/fail), two five-page papers, and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none, open to all students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Professor will provide detailed comments on short and long writing responses; facilitate peer review of short papers in class; and discuss frequent types of errors, writing in philosophy, writing approach and process, drafting, and the importance of using writing tutors. Handouts will be provided on both informal fallacies and numerous writing tips. Students will be encouraged, but are not required, to make appointments to discuss ideas and drafts.

Attributes: JLST Interdepartmental Electives  LEAD Ethical Issues of Leadership

Not offered current academic year

PHIL 121  (F)(S)  Truth, Goodness, and Beauty  (WS)

In our everyday lives, we routinely assume that our clocks can tell us the truth about what time it is, that committing murder is wrong, and that there are people, landscapes, and works of art that are beautiful. But we are also aware that people can and often do disagree about what is true, what is good or right, and what is beautiful. Should the fact of such disagreement lead us to conclude that truth, goodness, and beauty are in some basic sense relative to human beings, perhaps as individuals, perhaps as members of societies or cultures? Some philosophers defend such conclusions, but others argue that truth, goodness, and beauty are “objective,” in some important sense, despite the fact that people disagree about them. This introductory course addresses these and related issues.

Class Format: Virtual

Requirements/Evaluation: Attendance, participation in class discussions, comments added to essays during class discussion.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students and potential Philosophy majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Students write 1-page papers on assigned topics for most classes. I will grade and comment on 18 and a teaching assistant will comment on but not grade another 13. Comments will aim to enable students to improve their writing skills.

Fall 2020
SEM Section: H1  MWF 10:40 am - 11:30 am  Alan White

Spring 2021
SEM Section: 01  TBA  Alan White

PHIL 122  (F)  Philosophical Approaches to Contemporary Moral Issues  (WS)

In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, and the ethics of protest. The course will use a
case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

Requirements/Evaluation: bi-weekly tutorial papers, oral commentaries, and tutorial discussion
Prerequisites: none; this course is suitable for first-year students
Enrollment Limit: 10
Enrollment Preferences: first-year students, then sophomores, then Philosophy majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Not offered current academic year

PHIL 123 (S) Objectivity in Ethics (WS)
Is morality simply a matter of opinion? In this course we'll examine several influential attempts to provide a rational foundation for morality, along with Nietzsche's wholesale rejection of these efforts. Readings will include work by Plato, Hobbes, Kant, Mill, Nietzsche, and contemporary authors.

Requirements/Evaluation: participation in discussion; short response papers; four 5-page papers, evenly spaced throughout the semester
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores and students who need to fulfill their 100-level requirement for the philosophy major
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: meets 100-level PHIL major requirement
Distributions: (D2) (WS)

Writing Skills Notes: Four 5-page papers, evenly spaced throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

PHIL 125 (F) Introduction to the Philosophy of Law (WS)
This tutorial, designed especially for first year students, is a philosophy course, not a prelaw course. We will examine basic questions in the philosophy of law: What is the relationship between law and morality? Why should one obey the law (if one should)? When, if ever, is paternalistic interference by the state into the lives of its citizens justified? We will look at civil disobedience and theories of legal interpretation. We will pay special attention to the first amendment and questions concerning free speech and hate speech. We will read classic works (such as John Stuart Mill, On Liberty and H. L. A. Hart, The Concept of Law), contemporary articles, and United States Supreme Court cases.

Class Format: meeting with the instructor in pairs for an hour each week
Requirements/Evaluation: a 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks, and revise and re-write one of their papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

PHIL 126 (F) Paradoxes (WS)
There are three grains of sand on my desk. This is unfortunate, but at least there isn’t a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don’t know how exactly how many grains of sand are in this heap, but let’s say 100,000. My daughter removes one grain of sand. I don’t know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can’t change a heap of sand into something that isn’t a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand—I don’t know what she wants with all this sand, but I’m starting to worry about that girl—there is still a heap of sand in my backyard. But three grains isn’t enough for a heap. So there is not a heap in my backyard. Now I’m confused. Where did my reasoning go wrong?

What we have here is an example of the sorites paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we’ll work together to think through some ancient and contemporary paradoxes. We’ll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno’s paradoxes of motion and plurality, the liar’s paradox, the surprise-exam paradox, paradoxes of material constitution, Newcomb’s Problem, and the Prisoner’s Dilemma.

Class Format: The format of this class is different this year. The instructor will record 2-3 lectures per week which will be made available online. We will also have small tutorial-style meetings each week for which some students will write papers and others will comment on these papers. These tutorial-style meetings will be in-person or via zoom. Finally, there will be synchronous weekly meetings of the class as a whole for discussion and review.

Requirements/Evaluation: (i) Weekly small group papers (4-5 pages) or comments (1-2 pages) on papers of peers; (ii) Final term-paper (~10 pages) in multiple drafts; (iii) Active and informed participation in class discussions.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: First and second year students. Prospective philosophy majors.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: Meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Students will write a number of short papers and responses to papers of their peers. Both the content and the writing will be evaluated. These papers will focus on clear and precise presentation and evaluation of arguments. Each student will also write a final term-paper in multiple drafts. For the final paper, each student will develop a topic in consultation with the instructor and will do independent research. They will submit a first draft and will then revise that draft.

Fall 2020

SEM Section: H1 MWF 8:15 am - 9:30 am Keith E. McPartland

PHIL 127 (F)(S) Meaning and Value (WS)
What gives an individual life meaning? Pleasure? Success in achieving desires? Flourishing in ways distinctive to a rational agent or a human being (including, for example, developing rational capacities and self-mastery, succeeding in worthwhile projects, cultivating relationships, living morally, developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty here? Does the fact that our lives will end threaten their meaning? Can luck spoil an otherwise meaningful life? Can science contribute to our understanding of these issues? We'll examine these and related questions through historical and contemporary readings.

Class Format: This tutorial will meet remotely by Zoom on a fixed weekly schedule agreed to by the instructor and participants.

Requirements/Evaluation: Five tutorial papers (5-6 pages in length), five critiques (2-3 pages in length), and one rewrite.
Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that the earth is at the center of the cosmos. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of western thought in every area of philosophy. No one can have an adequate understanding of western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato's dialogues, examining Plato's portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. Finally, we will examine some of Aristotle's works on metaphysics, epistemology and ethics, considering some of the ways Aristotle's thought responds to that of predecessors.

**Class Format:** The format of this class is going to be different this year. We will not have in-person lectures. Instead, approximately three 1-hour recorded lectures will be made available each week for students to watch. There will also be meetings of 3-4 students with the instructor each week for which some students will write papers and others will prepare comments. These will be either in-person or via zoom. Finally, there will be a synchronous zoom session each week for larger group discussion.

**Requirements/Evaluation:**
1. Students will write papers (4-6 pages) for the small groups meetings and will comment on the papers of their peers (1-2 pages);
2. There will be two take-home exams including a comprehensive final exam;
3. Active and informed participation in small group discussions.

**Prerequisites:**  none

**Enrollment Limit:**  20

**Enrollment Preferences:**  Philosophy and Classics Majors.

**Expected Class Size:**  15-20

**Grading:**  no pass/fail option, yes fifth course option

**Unit Notes:**  Philosophy majors must take either PHIL 201 or PHIL 202 (and are encouraged to take both)

**Distributions:**  (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

CLAS 203 (D1) PHIL 201 (D2)
PHIL 202 (S) History of Modern Philosophy
This course is a survey of 17th- and 18th-century European philosophy with a focus on the nature of reality and the limits of knowledge (metaphysics and epistemology, respectively). That span—the “modern” era of philosophy—was active and exciting in a way that continues to attract much scholarly interest. Moreover, it remains a crucial inspiration for many contemporary philosophical approaches and themes. Understanding modern philosophy is to confront the ambitions and hopes of the Enlightenment, and to uncover the foundations and assumptions of contemporary Western philosophy. Topics include the origin and composition of the universe, the relation of mind and body, skepticism, free will, rationality, and the role of science in human understanding.

Requirements/Evaluation: weekly papers plus midterm and final exams
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Philosophy majors must take either PHIL 201 or PHIL 202 (and can take both)
Distributions: (D2)

Spring 2021
LEC Section: 01  TBA  Justin B. Shaddock

PHIL 203 (S) Logic and Language  (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein’s *Tractatus*), and to examine some of the connections between logic and philosophy.

Class Format: discussion
Requirements/Evaluation: a midterm, a final, frequent homework and problem sets
Prerequisites: none
Enrollment Limit: 40/sect
Enrollment Preferences: Philosophy majors, seniors, juniors, sophomores, first-years in that order.
Expected Class Size: 40/sect
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)  (QFR)
Quantative/Formal Reasoning Notes: The main part of the course is learning two formal languages of logic: sentential logic predicate logic
Attributes: Linguistics  PHIL Contemp Metaphysics + Epistemology Courses
Not offered current academic year

PHIL 204 (F) Hegel and Marx
This course will explore the themes of alienation, fetishism, ideology, dialectic, sociality, and freedom in the philosophical writings of G.W.F. Hegel and Karl Marx. We will focus our study on Hegel's *Phenomenology of Spirit* and Marx's early writings. We will conclude by considering some critical appropriations of Marx by 20th Century philosophers, including Georg Lukacs, Max Horkheimer, and Theodor Adorno.

Requirements/Evaluation: midterm and final papers
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Philosophy majors
PHIL 209  (S)  Philosophy of Science
Cross-listings: STS 209  PHIL 209  SCST 209

Primary Cross-listing
It is a generally held belief, in our time and culture, that science is the best source of our knowledge of the world, and of ourselves. The aim of this course is to examine the origins, grounds, and nature of this belief. We will analyze and discuss various accounts of scientific method, structure and justification of scientific theories, scientific choice, change, and the idea that scientific knowledge is progressive. The course will begin with the “received view” of science, advanced by logical empiricists, which assumes the objectivity and the rationality of science. We will then discuss philosophies of science which emerged out of various criticisms of this view - especially those of Popper, Lakatos, Kuhn and Feyerabend - and the challenges to the assumptions of scientific objectivity and rationality their works provoked. This discussion will naturally lead us to the relativist and social-constructivist views developed within contemporary science studies. Finally, we will analyze the current debate about cognitive credentials of science and proper approach to the study of science, which came to be known as “the science wars.”

Class Format: short lecture component in each class
Requirements/Evaluation: class attendance, preparedness and participation; three short assignments; three 5 pages long papers, the last of which will be the final paper, due a week after the end of classes
Prerequisites: one PHIL course, or declared major in a natural science, or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Philosophy majors and prospective majors

PHIL 211  (F)  Ethics of Public Health  (WS)

From questions about contact tracing apps to racial and age disparities in health risk and outcomes, the COVID-19 pandemic has foregrounded the importance of ethics as a key concern in public health policies and activities. Moreover, the ethical issues that are implicated in responses to the pandemic reflect the range of those manifested across the field of public health as a whole. In this course, we will survey the ethics of public health through the lens of the COVID-19 pandemic, investigating concepts and arguments that are central to the ethics of public health research and practice. For example, we will examine the ethics of disease surveillance, treatment and vaccine research, resource allocation and rationing, compulsion and voluntariness in public health measures, and social determinants of health outcomes, among other topics. To do this, we will need to become familiar with key ethical theories; think deeply about such concepts as privacy, paternalism and autonomy, exploitation, cost-benefit analysis and justice; and compare the function of these concepts in the context of the COVID-19 pandemic with the way they work in responses to other public health concerns.

Class Format: This class will be conducted remotely, via weekly synchronous tutorial meetings on Zoom or Google Meet.
Requirements/Evaluation: Biweekly 5-7 page papers, oral commentaries, and tutorial discussions.
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: declared and prospective Philosophy majors and Public Health concentrators, students with a specific curricular need for the course, and students with a high level of interest who are unlikely to have an opportunity to take the course in a future term

Not offered current academic year
PHIL 212  (S)  Ethics and Reproductive Technologies

Cross-listings: WGSS 212  PHIL 212  STS 212  SCST 212

Primary Cross-listing

In her groundbreaking book, *The Tentative Pregnancy*, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites: none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit: 19

Enrollment Preferences: WGSS and PHIL majors or prospective majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health

Not offered current academic year

PHIL 213  (S)  Biomedical Ethics  (WS)

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs.
research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Class Format: students will meet with the professor in pairs for approximately 75 minutes per week, writing and presenting 5- to 7-page essays every other week, and commenting orally on partners' essays in alternate weeks.

Requirements/Evaluation: bi-weekly papers, oral commentaries, and tutorial discussions.

Prerequisites: none.

Enrollment Limit: 10

Enrollment Preferences: PHIL majors, PHLH concentrators, those who have a curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option.

Distributions: (D2) (WS)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**PHIL 216 (S) Philosophy of Animals**

**Cross-listings:** ENVI 216 PHIL 216

**Primary Cross-listing**

Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper

Prerequisites: none.

Enrollment Limit: 19

Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option.

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL.

Spring 2021
PHIL 220 (F) Happiness

According to Aristotle the ultimate good is happiness—everything we desire we desire for the sake of happiness. Yet what is it to be happy? Should we value other things (say justice or passionate commitment and curiosity) over happiness? Are happiness and pleasure the same thing? Is happiness an emotional or mental state or is it a social construct? What do the social and psychological sciences have to teach us about happiness? Philosophy? Is the happy life a life of virtue? Does being virtuous guarantee happiness? How important are honor, money, love, work, friendship and our connections to others to our happiness? In this tutorial we will read from Ancient, modern and contemporary philosophical sources as well several relevant studies in the social sciences and positive psychology movement in order to engage questions concerning happiness.

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students interested in philosophy and/or happiness

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

PHIL 222 (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science

Cross-listings: PSYC 222 PHIL 222 COGS 222

Secondary Cross-listing

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: This hybrid course will meet in-person and will also be available for remote video attendance and participation. Remote students will be expected to attend class synchronously with the in-person lecture and will not be able to watch lectures at other times, so must be available during the class hours in the catalog. Supplemental material—e.g., office hours, study sessions for exams, background discussion for weekly assignments—will be delivered on-line.

Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises

Prerequisites: PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended. It is not necessary to contact the instructor to indicate a special interest in the course.

Enrollment Limit: 20

Enrollment Preferences: sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

PHIL 223 (S) Philosophy of Sport
Sports: many of us (at Williams, in the US, throughout most of the world) play them, yet more of us watch them, and we invest not only our time but enormous amounts of money in them (we build sports arenas, not cathedrals; in 2013, in 40 of the 50 United States, the highest-paid public official was a football or basketball coach). Why do sports matter so much to us? Should they? The topics we consider in responding thoughtfully to these questions will include sports and health, sports and education, ethical issues in sports (including issues of class, gender, and race), and sports and beauty.

Class Format: discussion
Requirements/Evaluation: short writing assignments for most classes
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

PHIL 224 (S) Marx, Nietzsche and Freud (WS)
The writings of Marx, Nietzsche and Freud continue to influence important debates in the humanities and social sciences. Marx's historical materialism, Nietzsche's post-metaphysical and naturalistic turn in ethics, and Freud's emphasis on the unconscious determinants of human behavior all represent what has been referred to as the decentering of human consciousness in explanations of human history and existence. All three thinkers have had a profound influence on critical theories of the 20th century. In this tutorial, we will focus on questions concerning their methods of critique, and their respective diagnoses of modern culture and societies. All three attempt to explain particular sources of human suffering such as loss of meaning, the sense of alienation from self and others, constraints on free expression, and nihilistic world-weariness. The course texts may include several short selections from important historical influences such as Kant and Hegel as well as 20th century figures who have reacted to, revised, or responded to them in creative ways. Among the latter one could include Louis Althusser, Michel Foucault, Gilles Deleuze, Jacques Lacan, Luce Irigaray, Judith Butler, Wendy Brown, Elizabeth Grosz and Peter Sloterdijk, to name only a few.

Requirements/Evaluation: bi-weekly papers, oral commentaries, and tutorial discussions
Prerequisites: 100-level Philosophy course, PHIL 202, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors or prospective majors and students with background and interest in critical theories
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write six tutorial papers on assigned topics or questions of 5- to 6-pages in length, one of which they will revise and submit at the end of the term. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments and interpretations.

Attributes: PHIL History Courses

Not offered current academic year

PHIL 225 (F) Existentialism
We will study the philosophical and literary works of Soren Kierkegaard, Friedrich Nietzsche, Jean-Paul Sartre, Simone de Beauvoir, and Albert Camus. What makes these thinkers "Existentialists"? It's not merely that they ask the question, "What gives meaning to a human life?" And, it's not merely that their answers invoke our freedom to determine our own identities. More than this, Existentialists emphasize the subjective relation we bear to our belief systems, moral codes, and personal identities. Existentialists investigate irrational phenomena of human life, including anxiety, boredom, tragedy, despair, meaning, death, faith, sexuality, love, hate, sadism, masochism, and authenticity. And, Existentialists express their thought in philosophical treatises as often as in literary works. In this course we will attempt to understand the dimensions in which Existentialism is a distinctive intellectual tradition.
**PHIL 227 (F) Death and Dying** (WS)

In this course we will examine traditional philosophical approaches to understanding death and related concepts, with a special focus on the ethical concerns surrounding death and care for the dying. We will begin with questions about how to define death, as well as reflections on its meaning and function in human life. We will move on to examine ethical issues of truth-telling with terminally ill patients and their families, decisions to withdraw or withdraw life-sustaining treatments, the care of seriously ill newborns, physician-assisted suicide, euthanasia, and posthumous interests. In addition to key concepts of death, dying, and terminal illness, we will develop and refine notions of medical futility, paternalism and autonomy, particularly within the context of advance directives and surrogate decision making.

**Class Format:** discussion

**Requirements/Evaluation:** class attendance and participation, periodic short essays (3 or 4 total, 2-3 pages each), two mid-length papers (5-7 pages and 7-10 pages, respectively); possible experiential learning component

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** PHIL majors, PHLH and STS concentrators, and students with curricular need for the course.

**Expected Class Size:** 15-19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

**Attributes:** PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health

Not offered current academic year

**PHIL 228 (F) Feminist Bioethics** (WS)

**Cross-listings:** PHIL 228  STS 228  WGSS 228

**Primary Cross-listing**

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second
portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites: none, although previous coursework in WGSS is desirable

PHIL 231 (S) Ancient Political Thought

Cross-listings: PHIL 231 PSCI 231

Secondary Cross-listing

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: discussion

Requirements/Evaluation: three 7- to 8-page papers

Prerequisites: none

Enrollment Limit: 25

Secondary Cross-listing

This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: Class meetings will be conducted remotely using zoom.

Requirements/Evaluation: three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings

Prerequisites: none; open to all

Enrollment Limit: 12

Enrollment Preferences: Political Theory concentrators, then Political Science majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

PHIL 235 (S) Morality and Partiality: Loyalty, Friendship, Patriotism

The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious and political communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect: it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people--such as friendships, familial ties, love, patriotism--seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

Class Format: tutorial pairs will meet with the instructor for one hour a week

Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Prerequisites: none; open to first year students

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and then sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PHIL Contemporary Value Theory Courses
PHIL 236 (F) Contemporary Ethical Theory (WS)
This course will examine central questions in normative ethics, including the following: Which features of actions are morally important and why (e.g., their motive, their intrinsic nature, or their consequences)? Which characteristics of persons give them moral status? How should moral equality be understood, and what is its foundation? When should we give morality priority over personal commitments and relationships, and why? What makes an individual's life go well? Are we capable of disinterested altruism, or are we motivated solely by self-interest? By which methods should we pursue these questions? We will examine these and related issues by looking in depth at contemporary defenses of consequentialist, deontological, and contractualist theories.

Class Format: This tutorial will meet remotely by Zoom on a fixed weekly schedule agreed upon by the instructor and participants.

Requirements/Evaluation: Six tutorial papers (5-6 pages in length) and six critiques (2-3 pages in length).
Prerequisites: at least one PHIL course or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Current and prospective philosophy majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, spaced evenly throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

Attributes: PHIL Contemporary Value Theory Courses

PHIL 239 (S) The Ethics of Artificial Intelligence

Cross-listings: STS 239 PHIL 239

Primary Cross-listing
We will someday live alongside artificially intelligent beings who equal or exceed us. Commentators ranging from technology magnates to physics geniuses—not to mention decades of apocalyptic science fiction—have urged that that future is nothing short of an existential threat to human beings. Whether this is hyperbole or wise prognostication, it cannot be denied that the rise of AI will be a tectonic shift for culture, technology, and our fundamental sense of ourselves. When AI is fully realized, it is likely to be amongst the most important things to happen to our species. Some challenges we face are broad and about the future, though perhaps not the far future. How can we ensure that AI's will act morally? Is a world with AI's overall better or worse for us? How do we create legal and policy frameworks that cover a new kind of thinking being? If they are conscious, will AI's have dignity and rights? Other questions are pressing and immediate: Artificial intelligence techniques are used today to help decide whether someone gets a bank loan, is eligible to be released on bail, or in need of particular medical treatment. And right now there are autonomous vehicles deciding how to behave in traffic, and autonomous weapons capable of delivering lethal force. Is it moral for us to pass along these sorts of decisions to AI's? What if they are biased, unbeknownst to us? What if they are more fair? In this course we will engage ethical questions surrounding the seeming inevitability of AI.

Class Format: mixture of lectures and discussion
Requirements/Evaluation: four short (3- to 4-page) writing assignments and a final essay (8-10 pages)
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: CSCI or PHIL majors or STS or COGS concentrators
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

PHIL 240  (F)  Philosophy of Education

Cross-listings:  PHIL 240  INTR 240

Primary Cross-listing

Why are you here? What do you expect to learn? How do you expect to learn? The College Mission Statement says that "Williams seeks to provide the finest possible liberal arts education by nurturing in students the academic and civic virtues, and their related traits of character." How have you already been taught the academic and civic virtues? Where have you been taught them? In school? On the sports field? At home? How did you develop your character? This first-year seminar will examine the philosophy of education through educational autobiographies: works that tell the story of a moral and intellectual education. Each book was chosen by and will be introduced by a professor from a different department, and then Professor of Philosophy Steve Gerrard will continue the discussion.

Requirements/Evaluation:  several short papers

Prerequisites:  none

Enrollment Limit:  12

Enrollment Preferences:  only first-year students

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 240 (D2) INTR 240 (D2)

Not offered current academic year

PHIL 241  (F)  Contemporary Metaphysics

In this course, we will examine a number of issues in contemporary metaphysics through a discussion of the nature of kinds. The problem of universals has vexed philosophers at least since the time of Plato. Oscar is a dog and Annie is a dog. Oscar and Annie aren't identical but they have something in common; each of them is a dog, each of them belongs to a single kind and they share the property of being a dog. But what is going on here? We, at least most of us, are happy to say that Oscar and Annie exist. But is there a third entity that we need to countenance: the universal caninity? If we do think that there is such a thing as caninity, what sort of thing is it? If we don't, what accounts for the truth of our judgment that Oscar and Annie have something in common? Scientists often give explanations for the behavior of objects in terms of their properties. What role do properties play in causation, explanation and laws of nature? Finally there are different kinds of kind. Some kinds or properties seem to be pretty natural, e.g. being an electron or a dog. Other kinds seem to be less natural and seem somehow to be socially constructed, e.g. being a work of art, an American or a sausage. But are there really natural kinds? Can we, as Plato put it, "carve nature at the joints", or are all kinds constructed rather than discovered? Furthermore what is involved in the social construction of a kind? Finally, the nature and existence of some kinds is a hotly contested political matter. How should we think about racial kinds or about gender kinds? While we will be concerned to place our discussions of these issues in historical context, most of the reading for the class will consist in articles written by contemporary philosophers.

Class Format:  discussion

Requirements/Evaluation:  one 10 page midterm paper and one 15 page final paper which will involve draft and revision, possible short response papers, and active participation in class

Prerequisites:  one PHIL course; familiarity with formal logic helpful but not required; or permission of instructor

Enrollment Limit:  18

Expected Class Size:  10-15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)

Attributes:  PHIL Contemp Metaphysics + Epistemology Courses
PHIL 243  (F)  The Philosophy of Higher Education: College Controversies  (WS)
What are the purposes of higher education? What are the purposes of liberal arts colleges in America? What should be the goals of Williams College? We will begin examining these questions by studying the history of controversies in American higher education, concentrating especially on debates about the curriculum. We will then turn to contemporary controversies such as campus free speech. Assigned works will include Booker T. Washington, Industrial Education, W.E.B. Dubois, The Talented Tenth, Frederick Rudolph, Williams College 1793-1993: Three Eras, Three Cultures, Michael S. Roth, Beyond the University: Why Liberal Education Matters, Allan Bloom, The Closing of the American Mind, Martha Nussbaum, Cultivating Humanity, William Deresiewicz, Excellent Sheep: The Miseducation of the American Elite and the Way to a Meaningful Life, Greg Lukianoff and Jonathan Haidt, The Coddling of the American Mind: How Good Intentions and Bad Ideas Are Setting Up a Generation for Failure, and Anthony T. Kronman, The Assault on American Excellence.

Class Format: This course is a tutorial. Students will meet in pairs with the instructor one hour per week. The default assumption is that this course will meet on-line. If the weather permits we could sometimes meet outside. If there is a reasonably sized well ventilated classroom we could occasionally meet there.

Requirements/Evaluation:  A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  I will be seeking a balance of interests and backgrounds; preference given to students who have taken at least one philosophy course
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (WS)
Writing Skills Notes:  A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks, and will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PHIL 244  (S)  Environmental Ethics  (WS)
Cross-listings:  ENVI 244  PHIL 244
Secondary Cross-listing
What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.
Requirements/Evaluation:  six essays (5-7 pages each) and six carefully prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion
Prerequisites:  ENVI 101 or one course in PHIL
Enrollment Limit:  10
Enrollment Preferences:  declared and prospective Environmental Studies majors and concentrators
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 245 Mind and Persons in Indian Thought

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

Class Format: discussion

Requirements/Evaluation: full attendance and participation, three short essays (6 pages each)

Expected Class Size: 18

Grading:

Distributions: (D2)

Attributes: GBST South + Southeast Asia Studies Electives

Not offered current academic year

PHIL 248 (S) Free Speech and Its Enemies

The Williams College Mission statement says that "free inquiry requires open-mindedness, and commitment to community draws on concern for others". The question of this course is whether these values are in conflict. Does free inquiry clash with concern for others, or do they (or can they) work together? We will begin with John Stuart Mill's powerful defense of free speech in On Liberty, but will then investigate challenges to Mill's traditional liberalism from thinkers, such as Catharine MacKinnon, who believe that such rights are never neutral. Our subjects will include hate speech, press censorship, pornography, controversial art, sacrilegious speech and campus controversies. We will, undoubtedly, have to adjust the syllabus to respond to breaking international, national and local news. The course will, I hope, provide the students an opportunity and the tools to intellectually examine deeply emotional and contentious issues. This course is part of the John Hyde Teaching Fellowship.

Requirements/Evaluation: several short responses (including op-eds on current controversies) and longer final projects (a 12- to 15-page paper or equivalent work in other media)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
PHIL 250  (F)  Philosophy of Economics  (WS)

The status of economics as a predictive science has been most prominently brought into question, historically, by three unpredicted yet extremely important economic events: the Great Depression of the 1930s, stagflation of the 1970s, and bursting of the mortgage bubble in 2008. The issue of prediction was also raised by economist Donald McCloskey who, in 1988, asked his fellow economists, "If you're so smart, why ain't you rich?" Some critics find predictive failures of economists unsurprising, given the frequent reliance of the latter on assumptions known to be false (e.g., that economic agents are always selfish, have perfect information, and never make mistakes) and on models that unavoidably ignore potentially relevant factors. Perhaps, then, economics is not primarily a predictive science, but instead a descriptive, historical, and/or mathematical one. In this course, relying on works by economists and philosophers, we examine the status of economics as an academic discipline, focusing on its assumptions, methods, and results.

Requirements/Evaluation: six 6- to 8-page essays, six 2- to 3-page response papers, participation in discussions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and potential majors, then Economics majors and potential majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

Writing Skills Notes: Six 6- to 8-page essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: PHIL Contemporary Value Theory Courses

PHIL 251  (S)  Offensive Art

Cross-listings: THEA 251  PHIL 251

Primary Cross-listing

Twenty-four centuries ago Plato argued for censorship of art. In the last century New York City mayor Rudy Giuliani attempted to shut down the Brooklyn Museum "Sensations" exhibit because he claimed it offended Christians, and the Cincinnati Contemporary Arts Center was prosecuted for exhibiting allegedly obscene photographs by Robert Mapplethorpe. Just recently, the magazine The Nation apologized for publishing Anders Carlson-Wee's poem adopting the voice of a homeless person, writing "We are sorry for the pain we have caused to the many communities affected by this poem." At Williams College a mural in The Log was temporarily boarded over, Herman Rosse's painting "Carnival of Life" was removed from the '62 Center, and the Theater department cancelled the production of Aleshea Harris' Beast Thing. What should be done about offensive art? What is offensive art? Does it matter who is offended? Does offensive art harm? Is there a difference between being offended and being harmed? Is there a difference between cultural appropriation and cultural appreciation? What are the responsibilities of museum curators and theater producers when presenting art that might offend? Who gets to decide the answer to these questions; indeed, who gets to decide what questions to ask? We will attempt answers by studying classical works (such as Plato's Republic and John Stuart Mill's On Liberty), contemporary articles, and works of art in various media. Trigger Warning: all the works of art studied in this class will be chosen partly because they have offended a significant number of people. You are very likely to be offended by some of the art we discuss. This will be the only trigger warning for the class; if you don't want to be offended then this course is not for you. This course is part of the John Hyde Teaching Fellowship.

Requirements/Evaluation: several short responses (including op-eds on current controversies) and longer final projects (a 12- to 15-page paper or equivalent work in other media)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniors, juniors, then sophomores in that order

Expected Class Size: 17

Grading: yes pass/fail option, yes fifth course option
Materials/Lab Fee: potential additional material costs if individual students opt for final projects in other media.

PHIL 252  (F)  Autopoietic Systems  (WS)

Cross-listings: PHIL 252 STS 252

Primary Cross-listing

In ancient Greece, Democritus took his ontological bearings by atoms he took not to come to be, change, or pass away, but to move and interconnect in space so as to compose everything else. Plato also took his ontological bearings by entities that do not change, but ones that are not in space or time: mathematical structures and, at least aspirationally, the forms or ideas of the good, the beautiful, etc. Aristotle, finally, took his ontological bearings by temporal entities, i.e., organisms. In these terms, modern science combines central teachings of Democritus and Plato: the universe is understood as a mechanism whose components--ultimately, atoms--interact in ways governed by mathematical laws, and--for Descartes and his followers--animals, too, are machines rather than organisms. Hence, Laplace's (1814) thesis that "An intellect which at a certain moment would know all forces that set nature in motion, and all positions of all items of which nature is composed, if this intellect were also vast enough to submit these data to analysis, it would embrace in a single formula the movements of the greatest bodies of the universe and those of the tiniest atom; for such an intellect nothing would be uncertain and the future just like the past would be present before its eyes." This deterministic, mechanistic, and reductionist way of thinking has, for the past several hundred years, powerfully influenced such diverse fields as philosophy, biology, and economics. Over the past few decades, however, it has been challenged by new discoveries, particularly in physics and biology, and by theoreticians in a variety of disciplines. These theoreticians focus on complex, dynamic systems as, in one terminology, wholes that are more than the sums of their constituents. In this tutorial, we examine some of the most promising and intriguing trends in this potentially revolutionary movement. Our central focus will be on autopoietic systems, i.e., entities that subsist over time despite changing their material constituents. The smallest such entities are cells, but the tissues, organs, and organisms of which many cells are constituents are also autopoietic systems, as are yet more complex entities such as universities, economies, ecosystems, and states. The process ontology required by autopoietic systems is a radical alternative to the ontology that has been dominant for the past several centuries. It has many exciting implications for various subdisciplines in philosophy and for various academic disciplines beyond philosophy.

Class Format: Virtual

Requirements/Evaluation: Presentations, responses to presentations, essays, response papers, participation in discussions.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and potential majors.

PHIL 272  (F)  Free Will and Responsibility  (WS)
Cross-listings: PHIL 272  JLST 272

Primary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

Expected Class Size: 10

PHIL 281  (S)  Philosophy of Religion  (WS)

Cross-listings: PHIL 281  REL 302

Primary Cross-listing

Our goal will be to determine how far reason can justify belief in God. We will examine well-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, and the argument from evil). For each argument, we will first look at historically important formulations and then turn to contemporary reformulations. Our aim will be to identify and evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. Near the end of the semester, we'll also examine some evolutionary explanations of religious belief. Our tools in this course will be logic and reason, even when we are trying to determine what the limits of reason might be. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, and several contemporary philosophers.

Class Format: students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing

Requirements/Evaluation: five 5-page papers and five 2-page papers

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

PHIL 288  (F)  Embodiment and Consciousness: A Cross-Cultural Exploration

Cross-listings: REL 288  PHIL 288

Secondary Cross-listing

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Requirements/Evaluation:  regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)

Prerequisites: any introduction to philosophy and at least two upper level courses in PHIL, at least one of which meets the Contemporary Metaphysics or Epistemology distribution requirement for the major, no exceptions;

Enrollment Limit:  18

Enrollment Preferences:  Religion and Philosophy majors

PHIL 306  (S)  The Good Life in Greek and Roman Ethics

Cross-listings: CLAS 306  PHIL 306

Primary Cross-listing

Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato’s early dialogues and his Republic. We will then turn to Aristotle’s Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero’s On the Ends of Good and Evil. As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Requirements/Evaluation:  several short response pieces; a final paper of 10-15 pages

Prerequisites: none

Enrollment Limit:  9
**Enrollment Preferences:** juniors & seniors & students who can demonstrate an interest in the subject matter of the class; there will not be any preference purely on the basis of major; final selection for the course will be made on the basis of an interview with the instructor

**Expected Class Size:** 9

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**PHIL 307 (F) Augustine's Confessions**

**Cross-listings:** CLAS 307  PHIL 307  REL 303

**Primary Cross-listing**

No thinker has done more to shape the Western intellectual tradition than Augustine (354-430 CE), and no book displays Augustine's dynamic vision of reality more compellingly than the *Confessions*. Its probing and intimate reflections on the meaning of human life, the nature of God and mind, time and eternity, will and world, good and evil, love and sexuality have challenged every generation since Augustine's own. The seminar will be structured around a close, critically engaged reading of the *Confessions* (in English translation) and will give attention to its historical context and significance as well as to its philosophical and theological ideas. (There will be optional, supplementary opportunity to engage with the Latin text for interested students with some facility with Latin.)

**Class Format:** The course will be taught in a hybrid (partly in-person, partly remote) or wholly remote format--a final decision about format will be made in early September, prior to the first class. Class meetings (in whatever format) will consist primarily in student presentations and open, directed discussion of assigned readings.

**Requirements/Evaluation:** Regular reading assignments from the Confessions and related secondary literature. Weekly participation in online discussion on Glow (15% of final grade); 3 class presentations (of various lengths and kinds) (20%); a short paper (maximum 1500 words) due around the middle of the semester (20%); a term paper in two drafts (maximum 3000 words) due near and the end of the semester (40%); preparation for and participation in class that shows thoughtful engagement with the assigned readings (5%).

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Advanced students in Philosophy, Religion and/or Classics

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

Fall 2020

SEM Section: H1  TR 6:45 pm - 8:00 pm  Scott C. MacDonald

**PHIL 308 (F) Wittgenstein's "Philosophical Investigations"**

Bertrand Russell claimed that Ludwig Wittgenstein was "perhaps the most perfect example I have ever known of genius as traditionally conceived--passionate, profound, intense, and dominating." Wittgenstein's two masterpieces, the *Tractatus Logico-Philosophicus* and the *Philosophical Investigations*, stand like opposing poles around which schools of twentieth-century analytic philosophy revolve. The Wittgenstein of the *Tractatus* is known as the "earlier Wittgenstein," the Wittgenstein of the *Investigations* is known as the "later Wittgenstein." This course is an intensive, line-by-line study of the *Investigations*--one of the greatest (and thus, one of the most controversial) books in the history of philosophy. Aside from its overwhelming influence on 20th and 21st century philosophy and intellectual culture, any book which contains the remark, " if a lion could talk, we could not understand him," deserves serious attention.
PHIL 310  (F)  Wittgenstein's Later Philosophy  (WS)

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published Philosophical Investigations, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's Philosophical Investigations, one of the greatest books ever written. In the second part of the course, we will read On Certainty, and selections from other of Wittgenstein's posthumously published works: Zettel, Philosophical Grammar, Remarks on the Philosophy of Psychology, Culture and Value, Lectures and Conversations on Aesthetics, Psychology and Religious Belief, and The Big Typescript. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.

Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Prerequisites: two Philosophy courses
Enrollment Limit: 10
Enrollment Preferences: preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions:  (D2)  (WS)

PHIL 312  (S)  Philosophical Implications of Modern Physics  (QFR)

Cross-listings: SCST 312  PHYS 312  STS 312  PHIL 312

Secondary Cross-listing

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper
Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors and Physics majors
PHIL 315 (F) Kant's Critique of Pure Reason

Kant's *Critique of Pure Reason* is perhaps the most significant text in the history of philosophy. It puts an end to the Early Modern traditions of Rationalism and Empiricism, and it stands at the beginning of both the Analytic and Continental traditions in contemporary philosophy. Love it or hate it, you cannot ignore it. In this course, we will study the most important and influential chapters of the *Critique* with the help of some secondary literature.

Class Format: This course will implement the tutorial format and be conducted remotely. Each week, students will watch a pre-recorded lecture given by the professor (asynchronously), and meet in pairs with the professor for roughly 75 minutes on Zoom (synchronously).

Requirements/Evaluation: Each week, students will complete the assigned readings, watch a lecture by the professor, write an essay, and meet in pairs with the professor. Students will take turns as the leader one week, and the respondent the next. The week's leader will write a 6-page essay on the assigned reading, due 48 hours before the meeting. The week's respondent will write a 2- to 3-page essay on the leader's essay due at the time of the meeting. At the meetings, both students will present their essays and hold a discussion about the readings. Students will be evaluated cumulatively on their essays and contributions to discussion.

Prerequisites: PHIL 202

Enrollment Limit: 10

PHIL 321 (F) Introduction to Critical Theory (DPE) (WS)

Cross-listings: PHIL 321 WGSS 322

Primary Cross-listing

"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet from its inception and continuing into the 19th and 20th centuries we find the promise of Enlightenment challenged by colonialist expansion, the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? Should it be? Among the possible topics addressed will be: criticizing capitalism, alienation and objectification, progress and freedom, the entanglements of power and reason, radical liberalism, the future of democracy as well as post-structuralist, post-colonial, feminist and anti-racist critiques of the Frankfurt School. Readings may include historical as well as contemporary figures such as: Kant, Freud, Horkheimer, Adorno, Marcuse, Habermas, McCarthy, Honneth, Fraser, Amy Allen, Foucault, Ranciere, Achilles Mbembe, Judith Butler, Wendy Brown, Spivak, and Charles Mills, among others.

Class Format: students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: each student will write and present five 5- to 6-page paper every other week and a commentary on their partner's essay
on alternate weeks; evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings.

**Prerequisites:** PHIL 202, Kant course, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors and students with background in political theory, feminist theory, or post-colonial theory

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 321 (D2) WGSS 322 (D2)

**Writing Skills Notes:** Tutorial format requires significant writing (six 5-page papers), weekly commentary on writing, and instructor comments on papers.

**Difference, Power, and Equity Notes:** In this course power, differences, and overcoming injustice, inequality, and domination are central topics.

**PHIL 323 Critical Theory: Praxis and Critique (DPE) (WS)**

What is to be done? This question haunts critical theory. To be sure, critical theories are important, even indispensable. They enable us to see the world in new ways, and to unmask pernicious relations of power. They can even produce an incentive to work for change. Yet, as critical theorist Bernard Harcourt notes: "Tragically, we remain impoverished when it comes to critically thinking through practice." Critical theories tend to privilege theory over practice--reasoning, knowledge and wisdom over action, doing, and being. To be sure, in the nineteenth century, Marx called for a philosophy oriented toward change, not merely contemplation. In his later works, Foucault too endorsed a shift from the Socratic injunction "know thyself," to care for the self. He identified courageous truth-telling as essential to political practices. Yet the model of the courageous individual speaking truth to power is not sufficient as an account of praxis. In this course we explore a range of contemporary understandings of critical social and political practice. Readings may include recent work by Hannah Arendt, Seyla Benhabib, Judith Butler, Michael Hardt and Antonio Negri, Fred Moten, Bruno Latour and Chantal Mouffe. Among the topics discussed will be performative assembly, the "undercommons," climate politics, and the idea of a left populism. The course draws generously from materials used in Harcourt's 13/13 seminar series at Columbia University.

**Class Format:** We may schedule two seminar meetings in addition to weekly tutorial meetings.

**Requirements/Evaluation:** 6 five-page papers on assigned or chosen topics, 6 2-page commentaries on tutorial partner's papers as well as quality of engagement and evidence of preparation in weekly tutorial meetings.

**Prerequisites:** At least two courses in philosophy, including 202, or 204, or 224T or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with demonstrated background in critical theory as well as majors or prospective majors in philosophy.

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** This is a tutorial. Students will write six five-page papers and receive extensive commentary on their writing every other week by tutorial partners and the professor.

**Difference, Power, and Equity Notes:** Critical theories explore questions concerning inequality, difference, domination and oppression as well as ideology and identity. This course will do the same.

**Attributes:** PHIL History Courses

Not offered current academic year

---

**PHIL 327 (S) Foucault on Power and Knowledge (DPE) (WS)**

**Cross-listings:** WGSS 327 PHIL 327

**Primary Cross-listing**

This course begins with a brief introduction to some of Foucault's early writings but focuses on a close reading of a selection of middle and late texts.
that have become central to debates about the significance and value of his work such as: *Discipline and Punish*, *The History of Sexuality* (vols. 1-3), and selected interviews and course lectures. We will focus particularly on how subjects are positioned in relation to his writings on power and knowledge with particular attention to the later so-called ethical writings in the years before his untimely death in 1984.

**Requirements/Evaluation:** evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

**Prerequisites:** at least two courses in PHIL or political or critical theory, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective Philosophy and Women's, Gender and Sexuality Studies majors

**Expected Class Size:** 8-10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets History requirement only if registration is under PHIL

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 327 (D2) PHIL 327 (D2)

**Writing Skills Notes:** Students will write between 40-50 pages by the end of the semester and receive regular feedback on their written work from the instructor and their tutorial partner. They will write both expository, interpretive and critical essays and will regularly be asked to defend their interpretations and arguments.

**Difference, Power, and Equity Notes:** This is a course about power and freedom. We read genealogical histories of disciplinary institutions that exclude and aim to correct "dangerous" or "abnormal" individuals, or attach them to identities and desires in order to manage them. We also address power at the level of population management, the emergence of the neoliberal idea of the self as enterprise, and the promise of resistance in the form of ethical practices of freedom.

**Attributes:** AMST Critical and Cultural Theory Electives PHIL History Courses WGSS Theory Courses
In this course we will study Aristotle’s *Metaphysics* concentrating on books *gamma-theta*. Aristotle sets out to study being *qua* being, or what is insofar as it is. The thoughts that Aristotle expresses in these books were instrumental in setting an intellectual agenda that dominated western thought through the Middle Ages and provided the backdrop against which the modern philosophical tradition arose. Furthermore, many of the issues that Aristotle takes up in these books remain of central importance in contemporary philosophy. Our main goal in this course is to work our way through Aristotle’s text which can be extremely daunting, and to reconstruct his central positions and his arguments for these positions. We will also read selections from the vast secondary literature on Aristotle’s *Metaphysics*.

**Requirements/Evaluation:** discussion leadership, weekly short papers, term paper

**Prerequisites:** PHIL 201, CLAS 203

**Enrollment Limit:** 12

**Enrollment Preferences:** Philosophy and Classics majors

**Expected Class Size:** 8-10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**PHIL 336 (S) Political Liberalism and its Critics** (WS)

Political liberalism has been both celebrated and lamented. The philosopher John Rawls is widely credited with reviving liberalism in the late 20th century and providing its most persuasive defense. In this tutorial, we’ll read portions of Rawls’ major works, *A Theory of Justice* and *Political Liberalism*, and trace how his theory evolved in response to an array of critics, including libertarians, perfectionists, communitarians, feminist philosophers, and critical race theorists. Among other things, these critics challenged Rawls’ interpretation and defense of the social contract framework, the ideals of freedom and equality, the content of principles of justice, political neutrality about the good, the nature of the self, the division between public and private spheres, and the distinction between ideal and non-ideal theory. We’ll examine these criticisms in depth. If time permits, we’ll also look briefly at some recent post-Rawlsian debates about the nature of distributive justice (e.g., luck vs. relational egalitarianism, or global justice).

**Class Format:** This class will meet once per week at a time agreed upon by the instructor and participants.

**Requirements/Evaluation:** Six tutorial papers (5-6 pages in length) and six critiques (2-3 pages in length)

**Prerequisites:** Two PHIL courses, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Current and prospective philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

**Attributes:** PHIL Contemporary Value Theory Courses

TUT Section: T1 TBA Melissa J. Barry

**PHIL 337 (F) Justice in Health Care** (WS)

Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we’ll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice specifically within the health care context. While social justice and distributive justice are deeply intertwined in the health care context and we will
discuss both, we will focus primarily on the concept of distributive justice. This theoretically oriented work will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform; justice in health care rationing and access to health care, with particular attention to the intersections of rationing criteria with gender, sexuality, race, disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in low resource settings.

Class Format: This class will be conducted remotely, via weekly synchronous tutorial meetings on Zoom or Google Meet.

Requirements/Evaluation: biweekly papers, oral commentaries, and tutorial discussions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: PHIL majors, PHLH concentrators, those with curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment, and those who are unlikely to have an opportunity to take the course in a later term

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 338  (F) Intermediate Logic  (QFR)

Cross-listings: MATH 338  PHIL 338

Primary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation: problem sets and exams

Prerequisites: some class in which student has studied formal reasoning

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors; juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 350  (S)  Emotions

Philosophy is often described as “thinking about thinking;” variously conceived inquiries into the nature, scope and limits of human reasoning have always been at its heart. Without challenging the centrality of such projects for philosophy, this tutorial will focus on a less emphasized, but equally essential aspect of our lives: emotions. What are emotions, and how should we think about them? What is the proper ‘geography’—classification and analysis—of our emotions, and what is their relation to our somatic states, feelings, beliefs, judgments, evaluations and actions? Do we have any control over our emotions? Could we (individually and socially) educate and cultivate them? How are conscious and unconscious emotions related to a person’s action, character, and her social world? In addressing these questions, we will simultaneously consider which methodological approach—if a single one can be privileged—should we adopt for examining emotions. We will try to determine what is the scope and nature of an adequate theory of emotions, what are the desiderata for such a theory, and what should count as evidence in its favor. We will examine a variety of philosophical and scientific theories of emotion, as well as some issues concerning normative aspects of emotions: the role of emotions in a good life and the concept of emotional maturity.

Requirements/Evaluation:  Class attendance, preparedness and participation; weekly meetings with the tutorial partner outside of the class; five lead papers (5-7 pages) and five short response papers (2-3 pages); and a 5-7 pages long final paper.

Prerequisites:  two philosophy courses.

Enrollment Limit:  10

Enrollment Preferences:  philosophy majors and prospective majors, then psychology majors.

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)
PHIL 360 (F) The Political Thought of Frantz Fanon (WS)
Cross-listings: PSCI 370 PHIL 360 AFR 360 LEAD 360

Secondary Cross-listing

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Requirements/Evaluation: attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option

PHIL 364 (S) Mental Health and Illness: Philosophical Considerations
Cross-listings: STS 364 PHIL 364

Primary Cross-listing

This course will raise and discuss a number of philosophical questions concerning our current understanding of mental health and mental illness. We will begin by examining the general concepts of health and disease, and then apply them to human psychology. Throughout the course, our focus will be on the best theoretical and practical knowledge we now have to diagnose, explain, and alleviate mental illness. Some of the questions that we will discuss are: What is psychopathology and what are its causes? Is it possible to have systematic knowledge of subjective experience? If so, is that knowledge importantly different in kind or in rigor from the knowledge we gain through physics, chemistry or geology? Are there metaphysical and ideological assumptions in contemporary psychiatry, and if so, could and should they be avoided? What is the basis on which current psychiatric diagnostic manuals are organized? Is that principle of organization justifiable or not? Do particular case histories offer good explanations of psychopathology? In framing and answering these questions, we will discuss subjective experience (or phenomenology) of mental illness; holism vs. reductionism; functional, historical and structural explanations of psychopathology; theory formation, evidence, and the role of values in psychology and psychiatry; the diversity and disunity of psychotherapeutic approaches; relationship between knowers and the known; and relationship between theoretical knowledge in psychiatry and the practices of healing.

Requirements/Evaluation: several writing assignments, evenly spaced throughout the semester
Prerequisites: two philosophy courses; or one philosophy and one STS course; or consent of the instructor

PHIL 379 (F) American Pragmatism
Cross-listings: PHIL 379 AMST 379
Primary Cross-listing
Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments
Prerequisites: at least two PHIL courses
Enrollment Limit: 25
Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major
Expected Class Size: 12-15

PHIL 388 (S) Consciousness
The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience—what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, waking perspective at all—resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science’s most elusive puzzle. In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and free will, pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

Class Format: expect several short lectures by the instructor over the course of the semester where all the tutorial members convene

Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work on off weeks
Prerequisites: any introduction to philosophy and at least two upper level courses in PHIL, at least one of which meets the Contemporary Metaphysics or Epistemology distribution requirement for the major, no exceptions; no need to email the professor in advance
PHIL 401 (F) Senior Seminar: Metaphilosophy

Put simply, metaphilosophy is reflection on the nature of philosophy, i.e., What is it? What is its aim? Its purpose? Its methods? Are such questions meaningful or important? Can the discipline be unified? Should it be? Unsurprisingly, philosophers have proffered a variety of answers to these questions, prompting one philosopher to remark, half-jokingly, that "there are as many definitions of philosophy as there are philosophers..." Thus, Plato described the philosopher as "the one who beholds all Time and all Being." Wilford Sellars regarded as uncontroversial, the view that it is "an attempt to see how things, in the broadest possible sense of the term, hang together in the broadest possible sense of the term." Critical theorists regard philosophy as social and ideology critique. Some understand its aim to be to answer normative questions about the nature of truth, justice, goodness and rationality. Finally, there are those who do not think philosophy can contribute much at all to answering such questions. In this senior seminar we will read a range of philosophical texts (Analytic, Pragmatist, and Continental or European) that either engage meta-philosophical debates or exemplify particular philosophical styles and methods in order to enrich our understanding of the discipline and of the value of meta-philosophical inquiry itself.

Class Format: This will be taught remotely. The professor will consult with members of the class to devise the optimal formats to ensure educational value and active engagement by the students. Students should expect to meet in a seminar format once a week, and in regular smaller tutorial style groups either weekly or every other week unless we decide on a different format.

Requirements/Evaluation: short (750 word) weekly seminar or tutorial response papers, several 6000 word tutorial papers, and a 12,000 word final paper.

Prerequisites: required of, and open only to, senior Philosophy majors

The instructional Physical Education Program at Williams is an integral part of the student’s total educational experience. As a part of the liberal arts concept, the program develops the mind-body relationship, which is dependent upon the proper integration of physical and intellectual capacities. The main objective of the physical education program is to develop in each student an appreciation of physical fitness and wellness, and to expose them to a variety of activities that are suitable for lifetime participation.

Four credits of Physical Education represent one of the requirements for the College degree. There are five physical education units during the year. In the fall academic semester, there are two six-week physical education quarters. Winter Study is another unit, and there are two physical education quarters in the spring academic semester. Two different activities must be completed in the fulfillment of the requirement. Students must complete two physical education credits during the first year, all four physical education credits must be completed by the end of sophomore year if the student wishes to study abroad.

A schedule listing all courses offered is issued to every student before each quarter and Winter Study. Classes may vary according to availability of instructors and interest of students. More information can be found at athletics.williams.edu/physical-education.

The following courses are offered at various times during the year:

- Aqua Fitness
- Badminton
- Basketball
- Bicycling
- Boot Camp
- Bowling
- Canoeing
- Core and Conditioning
- Dance (African, Ballet, Modern)
- Diving
- Erg Fitness
- Figure Skating
- Futsol
- Golf
- Hiking
- Ice Climbing
- Kayaking
- Lifeguarding
- Lifetime Sports
- Mountain Biking
- Muscle Fitness
- Outdoor Living Skills
- Pickle Ball
- Pilates
- Rape Aggression Defense (RAD)
- Rock Climbing
- Rowing
- Running
Skiing (Alpine and Cross Country)
Snowboarding
Snowshoeing
Soccer
Spinning
Squash
Street Hockey
Swim for Fitness
Swimming
Telemarking
Tennis
Trail Crew
Volleyball
Weight Training
Wellness
Wilderness Leadership
Yoga
Zumba
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major (administered jointly with the Physics Department) are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY
The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students' undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

| Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond |
| Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement |
| Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics |
| Physics 201 Electricity and Magnetism |
| Physics 202 Waves and Optics |
| Physics/Mathematics 210 Mathematical Methods for Scientists |
| Physics 301 Introductory Quantum Physics |
| Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus |
| Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following: |
| Astronomy 211 Astronomical Observing and Data Analysis |
| Physics 302 Statistical Physics |
| Physics 402T Applications of Quantum Mechanics |
| Physics 405T Electromagnetic Theory |
| Physics 411T Classical Mechanics; |
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.
ASTR 101 (F) Stars: From Suns to Black Holes
For the new era of "multimessenger astronomy" (not only light and its like but also particles from space and gravitational waves): What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? How and what have we found out about the recently gravitational radiation resulting from two giant black holes merging and, with additional signals in the spectrum, from the merger of two neutron stars? What do we learn about the Sun from total solar eclipses? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We pay special attention to recent exciting discoveries, including regular briefings and current emails plus bonus coverage of NASA's Mars2020 to Mars with the participation of Williams alumni/ae. Topics include discoveries with the Hubble Space Telescope, missions to discover planets around other stars, the latest huge telescopes and some results; how astronomers interpret the light received from distant celestial objects; and the Sun as a typical star. We discuss how pulsars and black holes result from the evolution of massive stars and how supermassive black holes lurk in galaxies/quasars. We discuss the discovery of thousands of "exoplanets" around stars other than the Sun, validating our choice of topics. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of and on the same level as Astr 102 (solar system)/104 (galaxies/cosmology); students who have taken those courses are welcome. Observing sessions will include remote use of the telescopes for nighttime observations and daytime observations of the Sun, mainly remotely but with on-campus possibilities. There will be five laboratories, available both in afternoon sessions on campus or remotely.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration, available both in place and remotely. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first enrolled
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course
Distributions: (D3)

Fall 2020
LEC Section: H1 TR 9:45 am - 11:00 am Jay M. Pasachoff
LAB Section: H2 MR 1:30 pm - 2:45 pm Kevin Flaherty
LAB Section: H3 MR 3:15 pm - 4:30 pm Kevin Flaherty

ASTR 102 (S) Our Solar System and Others
What makes Earth different from all the other planets? What has NASA's Curiosity on Mars found about Mars's past running water and suitability for life? We will follow the February 2021 landing of NASA's Mars2020 with its alumni/ae participation! How has knowledge about Pluto been transformed by NASA's 2015 flyby and the associated ground-based studies with which Williams College faculty and students participate? Will asteroids or comets collide with the Earth again? What is a solar eclipse like? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system, will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. A planetarium demonstration will also take place, available both in place and remotely. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously.
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless "island universes" in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered "chirp" from gravitational radiation (reported in 2016) resulting from two giant black holes merging, and the "chirp" from two neutron stars merging, also producing light, radio and x-ray radiation, has opened a whole different way of observing the Universe from the traditional use of light and other forms of electromagnetic radiation. We are now therefore in the new era of multimessenger astronomy. Further, the Hubble Space Telescope and the Chandra X-ray Observatory bring exceptionally clear images over a wider range of the spectrum; their images are aiding astronomers to better understand the past and future of the Universe, and new infrared images are expected with the launch of the James Webb Space Telescope. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the Planck spacecraft) and large-scale mapping programs such as the Sloan Digital Sky Survey, the European Space Agency's Gaia, and the Dark Energy Survey. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, explores the answers to questions like: What is the Milky Way?; Why are quasars so luminous?; Is the Universe made largely of "dark matter" and "dark energy"?; What determines the ultimate fate of the Universe? How have studies of Cepheid variables and distant supernovae with the Hubble Space Telescope determine that the Universe is 13.8 billion years old and indicated that the Universe's expansion is accelerating? How significant is the current discrepancy between the age and expansion rate of the Universe as measured from supernova observations as opposed to measurements from the cosmic background radiation? We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration, available both in place and remotely. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation:  two hour tests, a final exam, lab reports, and an observing portfolio
Prerequisites:  none; not open to students who have taken or are taking ASTR 330
Enrollment Limit:  25
Expected Class Size:  15
Grading:  yes pass/fail option,  no fifth course option
Unit Notes:  non-major course
Distributions:  (D3)

ASTR 107  (F)  Astrobiology

Cross-listings:  GEOS 107  ASTR 107
Secondary Cross-listing
Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and virtual visits from some of the country’s leading Astrobiology researchers.

Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, reconstructing the geological history of Mars using satellite imagery, and modeling exoplanet atmospheres using computer simulations. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will write a mock NASA mission proposal. This course is in the Sediments and Life group for the Geosciences major.

Class Format: All lecture components will be via asynchronous online content. Labs will have in person and remote options; in person lab group will meet every other week and have virtual group project work on alternate weeks.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will write a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 111  (F) Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes remotely to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: This is a hybrid course. Lectures will be provided both in-person and for remote viewing. Students will work in small groups on discussions and calculations. Each group can choose to meet remotely or in class. Students can switch groups, and groups can switch format, as needed. Prof. Jaskot will meet with remote groups during their discussion to answer questions. The class has 6 afternoon labs, with both in-person and remote options. Remote observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, one hour-long test, a final project, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15
Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2020
LEC Section: H1  TR 11:30 am - 12:45 pm  Anne Jaskot
LAB Section: H2  T 1:00 pm - 3:00 pm  Kevin Flaherty
LAB Section: H3  W 1:00 pm - 3:00 pm  Kevin Flaherty

ASTR 211  (S)  Astronomical Observing and Data Analysis  (QFR)
How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing
Requirements/Evaluation: weekly problem sets, lab work, and observing projects
Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required
Enrollment Limit: 14
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.
Not offered current academic year

ASTR 217 (S) Planets and Moons
Cross-listings: ASTR 217  GEOS 217
Secondary Cross-listing
This course examines the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises. This course is in the Solid Earth group for the Geosciences major.
Requirements/Evaluation: Periodic short quizzes, reading journal, lab exercises, class participation
Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 240  (F) Great Astronomers and Their Original Publications  (WS)

Cross-listings:  ASTR 240  STS 240  HSCI 240  LEAD 240

Primary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams's Chapin Library of rare books, and facsimiles or digital copies will be provided for remote learning. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1450) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). We evaluate a trove of books and papers about historic transits of Venus. We discuss matters of fraud and authenticity, especially the case of a purported Sidereus Nuncius, shown to be a modern construction. The course will be taught in collaboration between an astronomer and a rare books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452) or remotely; students who are not on campus can visit the original books at a later time/year.

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 317  (S) Advanced Planetary Geology  (WS)

Cross-listings:  GEOS 317  ASTR 317

Secondary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will
read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth's moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

Requirements/Evaluation: Evaluation is based on tutorial papers and critiques.

Prerequisites: GEOS/ASTR 217 OR any two courses at 200-level or higher in Geosciences and/or Astronomy

Enrollment Limit: 10

Enrollment Preferences: Geosciences and Astronomy majors and prospective majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 317 (D3) ASTR 317 (D3)

Writing Skills Notes: This tutorial focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

TUT Section: T1 TBA Rónadh Cox

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.

Class Format: discussion three hours per week

Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

ASTR 336 (S) Science, Pseudoscience, and the Two Cultures

Cross-listings: LEAD 336 ASTR 336 HSCI 336

Primary Cross-listing
A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely
discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several
aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his
critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent “Science
Wars” over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and
Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience,
like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and
Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we
consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic
and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination
policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government
and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI)
and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination
programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the
2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot
movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and
Michael Frayn's Copenhagen.

Requirements/Evaluation: biweekly 5-page papers, participation in discussions, and a 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)

The matter between the stars--the interstellar medium--tells the story of the past and future evolution of galaxies and the stars within them. Stars are
accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they
evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich
the interstellar medium with the products of the stars’ nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most
powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar
medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the
physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines,
collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical
compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is
observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of
the interstellar medium using the equipment on our observing deck.

Class Format: plus observing projects

Requirements/Evaluation: weekly problem sets, two in-class exams, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option
Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2021
LEC Section: 01    TBA     Anne Jaskot

ASTR 404 (S) Unsolved Problems in Galaxy Evolution

Cross-listings: ASTR 404

Primary Cross-listing

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets

Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 404 (D3)

Not offered current academic year

ASTR 412 (F) Heliophysics

Cross-listings: ASTR 412 PHYS 412

Primary Cross-listing

We study all aspects of the Sun, our nearest star. This semester follows the total solar eclipses of August 21, 2017, whose totality crossed the U.S. from coast to coast, and the July 2, 2019, total solar eclipse that crossed Chile and Argentina. In addition to discussing our observations of these eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We hope to observe the transit of Mercury across the face of the Sun on November 11, 2019, during the semester; we also discuss our data analysis of recent transits of Mercury we observed from the ground and from space (most recently in May 2016). We will highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble.

Requirements/Evaluation: biweekly tutorial presentations; biweekly response to colleagues' presentations

**ASTR 99 (W) Independent Study: Astronomy or Astrophysics**
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
**Grading:** pass/fail only

Not offered current academic year
What is light? How does a laser work? What is a black hole? What are the fundamental building blocks of the universe? Physics majors and Astrophysics majors study these and related questions to understand the physical world around us, from the very small to the very large. A physics student practices the experimental methods used to learn about this world and explores the mathematical techniques and theories developed to explain these physical phenomena. A Physics major or Astrophysics major serves as preparation for further work in physics, astrophysics, applied physics, other sciences, engineering, medical research, science teaching and writing, and other careers involving critical thinking, problem-solving, and insight into the fundamental principles of nature.

ASTROPHYSICS MAJOR

The Physics Department, in cooperation with the Astronomy Department, offers a major in Astrophysics. More information about the Astrophysics major can be found on the Astronomy Department site.

PHYSICS MAJOR

Introductory Courses

Students considering a major in physics should take both physics and mathematics as first-year students. Students typically begin with Physics 141 and Mathematics 150 or 151 (multivariable calculus); students who wish to begin with Physics 131 should consult with the department.

Physics 131 Introduction to Mechanics. This is designed as a first course in physics. It is suitable for students who either have not had physics before or have had some physics but are not comfortable solving “word problems” that require calculus.

Physics 141 Mechanics and Waves. Students in this course should have solid backgrounds in science and calculus, either from high school or college, including at least a year of high school physics.

The Department of Mathematics will place students in the appropriate introductory calculus course. The physics major sequence courses all make use of calculus at increasingly sophisticated levels. Therefore, students considering a Physics major should continue their mathematical preparation without interruption through the introductory calculus sequence (Mathematics 130, 140, and 150 or 151). Students are encouraged to take Physics 210 as early as possible.

ADVANCED PLACEMENT

Students with unusually strong backgrounds in calculus and physics may place out of Physics 141 and either: 1) begin with the special seminar course Physics 151 in the fall (typically followed by Physics 210 in the spring), or 2) begin with Physics 142 in the spring (possibly along with Physics 210). Students may take either 151 or 142 but not both. On rare occasions a student with an exceptional background will be offered the option of enrolling in Physics 201.

Placement is based on AP scores, consultation with the department, and results of a placement exam administered during First Days. The exam can also be taken later in the year by arrangement with the department chair. The exam covers classical mechanics, basic wave phenomena, and
REQUIREMENTS FOR THE MAJOR

A total of ten courses, nine in physics and one in mathematics, are required to complete the Physics major.

Required Physics Sequence Courses (7)

- Physics 141 Mechanics and Waves
- Physics 142 Foundations of Modern Physics
- or Physics 151 Seminar in Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics 210 Mathematical Methods for Scientists
- Physics 301 Quantum Physics
- Physics 302 Statistical Mechanics and Thermodynamics

Required Mathematics Course (1)

- Mathematics 150 or 151 Multivariable Calculus

Students entering with Advanced Placement in mathematics may obtain credit toward the major for the equivalent Mathematics 150 or 151 taken elsewhere.

Elective Courses (2)

At least two more physics courses above the 100 level (or other approved courses as noted below) must be taken, bringing the total number of courses for the major to ten.

Students who place out of Physics 141 must substitute one additional elective course, for a total of ten courses.

Students who place out of both Physics 141 and 142 and begin their studies in Physics 201 must substitute one additional elective course, for a total of nine courses.

Options

- Mathematics 209 or 309 may substitute for Physics 210.
- Astronomy 111 may count in place of Physics 141 if a student places out of 141 (see “advanced placement” above).
- An additional Astronomy or Astrophysics course above the introductory level that is acceptable for the astrophysics major may be counted.
- Two approved Division III courses may be substituted for one Physics course. Approval is on an individual basis at the discretion of the department chair.
- Honors work is in addition to completion of the basic major so Physics 493 and 494 do not count towards the ten courses in the major.

PREPARATION FOR ADVANCED STUDY

Students who wish to do graduate work in physics, astrophysics, or engineering should elect courses in both physics and mathematics beyond the minimum major requirements. The first-year graduate school curriculum in physics usually includes courses in quantum mechanics, electromagnetic theory, and classical mechanics that presuppose intermediate level study of these subjects as an undergraduate. Therefore, students planning graduate work in physics should elect all of the following courses:

- Physics 402T Applications of Quantum Mechanics
- Physics 405T Electromagnetic Theory
- Physics 411T Classical Mechanics

ADVISING

Both majors and non-majors are encouraged to consult with the department chair or course instructors about course selections or other matters.

THE DEGREE WITH HONORS IN PHYSICS

The degree with honors in Physics will be awarded on the basis of a senior thesis presenting the results of a substantial experimental or
theoretical investigation carried out under the direction of a faculty member in the department. There is no rigid grade point average required for admission to the program or for the awarding of the degree with honors, but it is normally expected that honors students will maintain at least a B average in physics and mathematics. Students will normally apply for admission to the program early in the spring of their junior year and during senior year these students will normally elect Physics 493, W31, and 494 in addition to the usual requirements for the major. At the end of winter study, the department will decide whether the student will be admitted to honors candidacy. Both a written thesis and a colloquium presentation of the results are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill them with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

STUDY ABROAD

The physics community is international in scope and a career in physics (or a related field) can provide many opportunities for travel and contact with individuals from outside the United States. The physics major at Williams is a carefully structured four-year program designed to prepare students who are so inclined for graduate study at leading research institutions. While it is possible to complete the major requirements in three years, such a major will not usually not lead to further study in the field. With careful early planning on the part of a student, and close consultation with the department chair, it is possible to complete a strong major and still study abroad provided the foreign institution can provide courses which reasonably substitute or supplement those in the Williams major program. Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Here are answers to frequently asked questions related to study abroad:

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The laboratory component of Physics 301 serves as our “advanced lab course.” Students often cannot get equivalent experience abroad and must take this when they return senior year (non-credit). Unless there has been a recent change, our own Oxford Program is one place students cannot get lab experience.

OPTIONS FOR NON-MAJORS

Many students want to take a self-contained and rigorous full-year survey of physics. For such students, the most appropriate sequence will be either Physics 131 or Physics 141 followed by Physics 132, depending on the student’s background in science and mathematics (see Introductory Courses above). Either of these sequences satisfies the physics requirement for medical school.

The department also offers one-semester courses designed for non-majors, including Physics 107, Physics 108, and Physics 109.

PHYS 106  (F)  Being Human in STEM  (DPE)

Cross-listings:  PHYS 106  GEOS 106  STS 106

Primary Cross-listing

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability,
sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students' abilities to participate in STEM fields. Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

Class Format: class discussions, group project work (out of class time required)

Requirements/Evaluation: short response papers, class discussion participation, leading class discussions, group work, and final project

Enrollment Limit: 15

Enrollment Preferences: DIV III majors; statement of interest may be requested

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not count towards GEOS or PHYS major credit

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 106 (D3) GEOS 106 (D3) STS 106 (D2)

Difference, Power, and Equity Notes: This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

Not offered current academic year

PHYS 107 (F) Spacetime and Quanta (QFR)

Quantum mechanics and Einstein's relativity both drastically altered our view of the physical world when they were developed in the early twentieth century. In this course we will learn about the central concepts that define relativity and quantum mechanics, along with some of the diverse phenomena the two theories describe. These investigations will prepare us to discuss developments in condensed matter: explaining what makes materials different along with discussing exotic effects like superconductivity and superfluidity. We will also discuss recent developments in cosmology, where observations have produced a surprising picture for the make-up of our universe. This course is intended for students whose primary interests lie outside of the natural sciences and mathematics. The mathematics used will be algebra and trigonometry.

Class Format: lecture twice a week and conference section once a week (20 per conference section)

Requirements/Evaluation: weekly problem sets, quizzes, two midterms, and a final exam, all with a significant quantitative component

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: by seniority

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

PHYS 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Primary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.
**Class Format:** twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

**Requirements/Evaluation:** weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

**Prerequisites:** high school physics, high school chemistry, and mathematics at the level of MATH 130

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 108 (D3) PHYS 108 (D3)

**Attributes:** ENVI Natural World Electives

Not offered current academic year

**PHYS 109 (F) Sound, Light, and Perception** (QFR)

Light and sound allow us to perceive the world around us, from appreciating music and art to learning the details of atomic structure. Because of their importance in human experience, light and sound have long been the subject of scientific inquiry. How are sound and light related? How do physiology and neural processing allow us to hear and see the world around us? What are the origins of color and musical pitch? This course introduces the science and technology of light and sound to students not majoring in physics. We will start with the origins of sound and light as wave phenomena, and go on to topics including color, the optics of vision, the meaning of musical pitch and tone, and the physical basis of hearing. We will also discuss some recent technological applications of light, such as lasers and optical communications. The class will meet for two 75-minute periods each week for a variable mixture of lecture, discussion, and hands-on, interactive experiments.

**Class Format:** each student will attend one lecture plus one conference section weekly

**Requirements/Evaluation:** class participation, problem sets, in-class exams, oral presentations, and a final exam, all with a quantitative component

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students signing up for the Thursday 2:35 PM conference section must also be available on Thursdays from 1:10-2:25 PM

**Distributions:** (D3) (QFR)

Not offered current academic year

**PHYS 131 (F) Introduction to Mechanics** (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

**Class Format:** hybrid

**Requirements/Evaluation:** exams, labs, and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

**Enrollment Limit:** 30

**Enrollment Preferences:** seniority

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)
PHYS 132  (S) Electromagnetism and the Physics of Matter  (QFR)
This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

Requirements/Evaluation: weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

PHYS 141  (F) Mechanics and Waves  (QFR)
This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: This will be a hybrid course with both recorded and in-person lecture/demonstration material, both "at home" and in-person hands-on/laboratory exercises, problem-solving group sessions and office hours (available both in person and remote), as well as several short tests/quizzes and a final exam.

Requirements/Evaluation: weekly problem sets, labs, three or more short quizzes/tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: high school physics and MATH 130 or equivalent placement, or permission of the instructor

Enrollment Limit: 30

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.
PHYS 142 (S) Foundations of Modern Physics  (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.

This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, two hours weekly; problem-solving conference session, one hour weekly; laboratory, 2-3 hours most weeks, alternating between 'hands-on' and computational sessions (limit 22 per lab, 18 per conference section)

Requirements/Evaluation: weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 18 per CON

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.

Spring 2021

LEC Section: 01 TBA Charlie Doret

PHYS 151 (F) Seminar in Modern Physics  (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same basic material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: This will be a hybrid course format, with some online and some in-person components. All in-person components will have a remote option. Lecture 3 hours per week (synchronous interactive video or in-person), Laboratory/Conference section 2.5 hours per week (synchronous interactive video or in-person). Compared to previous years, some of the laboratory activities in the course will be replaced by assignments that can be completed remotely.

Requirements/Evaluation: class participation, weekly lab/conference assignments, weekly problem sets, final paper, two hour-exams and a final exam;

Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

Enrollment Limit: 18

Enrollment Preferences: first-years

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option
**Unit Notes:** this is a small seminar designed for first-year students who have placed out of PHYS 141

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** besides the final paper, all assignments in the course have a substantial quantitative component

---

**PHYS 201 (F) Electricity and Magnetism** (QFR)

The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell’s equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

**Class Format:** Hybrid: online with some in-person components. All in-person components will have a remote option. Lecture: three hours per week. Laboratory/conference section: two hours per week.

**Requirements/Evaluation:** problem sets, labs/conference section assignments, two take-home midterms, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

**Enrollment Limit:** 10 per lab

**Enrollment Preferences:** prospective physics majors, then by seniority

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

---

**PHYS 202 (S) Vibrations, Waves and Optics** (QFR)

Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

**Class Format:** lecture three hours per week and laboratory three hours per week

**Requirements/Evaluation:** problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

**Enrollment Limit:** none

**Enrollment Preferences:** none
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

PHYS 210 (S) Mathematical Methods for Scientists (QFR)
Cross-listings: PHYS 210 MATH 210

Primary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week
Requirements/Evaluation: several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2021
LEC Section: 01 TBA Frederick W. Strauch

PHYS 234 (S) Introduction to Materials Science (QFR)
Cross-listings: GEOS 234 PHYS 234

Primary Cross-listing
Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)
Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component
Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: based on students' scientific background and seniority
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course does not count toward the Geosciences major.
This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 234 (D3) PHYS 234 (D3)

Attributes: MTSC Courses

Not offered current academic year

PHYS 301 (F) Quantum Physics (QFR)

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics. After a brief discussion of historical origins of the quantum theory, we introduce the Schrödinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

Class Format: Phys 301 will be taught in a hybrid format, with in-person and remote elements. Remote options will be available for in-person components. Lecture will meet for 3 hours weekly, with synchronous elements wherever feasible (either in-person or via videoconference). Laboratories will meet for 2 hours weekly, with some additional individual preparation required, with laboratory groups being mixed between in-person and remote students.

Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 20

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

PHYS 302 (S) Stat Mechanics & Thermodynamics (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways—obeying the Schrödinger equation, Newton's and Coulomb's Laws—and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and laboratory three hours per week

Requirements/Evaluation: weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 209; recommended: PHYS 202, PHYS 301

Enrollment Limit: 10 per lab

Expected Class Size: 10 per lab

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Cross-listings: MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Secondary Cross-listing
What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.
Enrollment Limit: 12
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

**Enrollment Preferences:** majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

---

**PHYS 412 (F) Heliophysics**

**Cross-listings:** ASTR 412 PHYS 412

**Secondary Cross-listing**

We study all aspects of the Sun, our nearest star. This semester follows the total solar eclipses of August 21, 2017, whose totality crossed the U.S. from coast to coast, and the July 2, 2019, total solar eclipse that crossed Chile and Argentina. In addition to discussing our observations of these eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We hope to observe the transit of Mercury across the face of the Sun on November 11, 2019, during the semester; we also discuss our data analysis of recent transits of Mercury we observed from the ground and from space (most recently in May 2016). We will highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble.

**Requirements/Evaluation:** biweekly tutorial presentations; biweekly response to colleagues' presentations

**Prerequisites:** ASTR 111 or a 200-level Physics course; or permission of the instructor

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

---

**PHYS 418 (S) Gravity** (QFR)

This course is an introduction Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of
Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

Requirements/Evaluation: weekly problem sets, a midterm exam, and a final exam, all of which have a substantial quantitative component

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
The Political Economy major is designed to give students a grasp of the ways in which political and economic forces interact in shaping public policy. The major includes substantial study of the central analytical approaches in both Political Science and Economics and seeks to surmount the sometimes artificial barriers of specialization that may characterize either discipline taken by itself. Three of the required Political Economy courses undertake a conscious merging of the approaches in the two fields. These courses are designed by, and usually are taught jointly by, political scientists and economists. Political Economy 250 examines major theoretical texts in political economy and analyzes economic liberalism and critiques of economic liberalism in the context of current policy issues. Political Economy 401 examines contemporary issues in political economy in their domestic, comparative and international contexts. Political Economy 402 asks students to research and make proposals in policy areas of current importance. Background for the two senior courses is acquired through introductory courses in Economics and Political Science, a course in empirical methods, and elective courses in international, domestic and comparative economics, politics and policy.

Students in Political Economy 402 visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their Political Economy 402 group projects. This is a course requirement and thus a requirement for the major.

MAJOR

The Political Economy major requires students to complete eleven (11) courses: two introductory courses each in Economics and Political Science; one empirical methods course; three core courses specific to the Political Economy Program; and three electives, one from each of three categories. In order to balance students’ educations, majors must take at least one elective in Economics and one elective in Political Science; the third elective may come from either Economics or Political Science. In light of the public policy orientation of the program, all majors are also required to complete one course with a substantial experiential education component which is related to the making or effect of public policy. The purpose of the experiential education requirement is for the student to get out into the world and interact with people in cases where the stakes are real, often involving some element of community service or participation in the political process or in the making of or analysis of public policy, in order to learn something about public policy that one cannot get from a purely academic experience. This requirement must be fulfilled prior to taking POEC 402. It can be fulfilled through a regular semester-length course (which might also serve as an elective in the major), a winter study course, a study abroad academic internship, a winter study internship, or a summer internship. The chair distributes a list of approved experiential courses to majors at the beginning of each academic year. For an internship to satisfy the requirement, its focus must be the making or effect of public policy. Approval of the chair is required to use an internship to fulfill this requirement.

Two Introductory Economics Courses

- ECON 110 Principles of Microeconomics
- ECON 120 Principles of Macroeconomics

Two Introductory Political Science Courses

For students in the class of 2019 and earlier:

- PSCI 201 Power, Politics, and Democracy in America

or

- PSCI 203 Introduction to Political Theory

- PSCI 202 World Politics: An Introduction to International Relations
or PSCI 204 Introduction to Comparative Politics: State, Nation, and Democracy

For students in the class of 2020 and later:

PSCI 201 Power, Politics, and Democracy in America
PSCI 202 World Politics: An Introduction to International Relations
or PSCI 203 Introduction to Political Theory
or PSCI 204 Introduction to Comparative Politics: State, Nation, and Democracy

One Empirical Methods Course
POEC 253 Empirical Methods in Political Economy
or ECON 255 Econometrics

Three Political Economy Program Courses
POEC 250/ECON 299/PSCI 238 Economic Liberalism and Its Critics
POEC 401 Contemporary Problems in Political Economy
POEC 402 Political Economy of Public Policy Issues

Three Elective Courses
Students must take at least one elective in Economics and at least one elective in Political Science; the third elective may come from either Economics or Political Science.

Please see the online catalog for up-to-date information on which courses are being offered in the current year.

One Comparative Political Economy/Public Policy Course
ECON 204 / ENVI 234(S)Economics of Developing Countries
Taught by: Michael Samson
Catalog details
ECON 213 / ENVI 213(F)Introduction to Environmental and Natural Resource Economics
Taught by: Sarah Jacobson
Catalog details
ECON 214 T / ENVI 212 / POEC 214(S)The Economics and Ethics of CO2 Offsets
Taught by: Ralph Bradburd
Catalog details
ECON 228 T / ENVI 228Water as a Scarce Resource
Taught by: Ralph Bradburd
Catalog details
ECON 232Financial Markets, Institutions and Policies
Taught by: Neal Rappaport
Catalog details
ECON 233(S)Behavioral Economics and Public Policy
Taught by: Matthew Chao
Catalog details
ECON 238 / ENVI 238(F)Sustainable Economic Growth
Taught by: Gregory Casey
Catalog details
ECON 240 TColonialism and Underdevelopment in South Asia
Taught by: Anand Swamy
Catalog details
ECON 242Evaluating the Costs and Benefits of Public Policies
Taught by: Mikael Svensson
Catalog details
ECON 377Inspiration/Perspiration: The Economics of Innovation
Taught by: Steven Nafziger
Catalog details
ECON 378Long-Run Comparative Development
Taught by: Quamrul Ashraf
Catalog details
ECON 380 / ECON 519(S)Population Economics
Taught by: Lucie Schmidt
Catalog details
ECON 381(S) Global Health Policy Challenges

Taught by: Susan Godlonton
Catalog details
ECON 387 / ENVI 387 / ECON 522(F) Economics of Climate Change

Taught by: Matthew Gibson
Catalog details
ECON 390 T / ECON 536 Financial Crises: Causes and Cures

Taught by: Gerard Caprio
Catalog details
ECON 394 European Economic History

Taught by: Steven Nafziger
Catalog details
ECON 453(F) Research in Labor Economics and Policy

Taught by: Owen Thompson
Catalog details
ECON 455 Research in Economic History

Taught by: Steven Nafziger
Catalog details
ECON 465(F) Pollution and Labor Markets

Taught by: TBA
Catalog details
ECON 470(F) The Indian Economy: Development and Social Justice

Taught by: Anand Swamy
Catalog details
ECON 476(S) Behavioral Economics: Theory and Methods

Taught by: Matthew Chao
Catalog details
ECON 477 / ENVI 376(F) Economics of Environmental Behavior

Taught by: Sarah Jacobson
Catalog details
ECON 501 Economic Growth and Development

Taught by: Quamrul Ashraf
Catalog details
ECON 504 Public Economics in Developing Countries

Taught by: Jon Bakija
Catalog details
ECON 505 Developing Country Macroeconomics I: Theory

Taught by: Peter Montiel
Catalog details
ECON 510 / ECON 352 Financial Development and Regulation

Taught by: Gerard Caprio
Catalog details
ECON 514 / ECON 389 Tax Policy in Global Perspective

Taught by: William Gentry
Catalog details
ECON 523 / ECON 379(S) Program Evaluation for International Development

Taught by: Pamela Jakiela
Catalog details
ECON 532 T / ECON 375(S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Taught by: Michael Samson
Catalog details
ECON 534 T Long Term Fiscal Challenges

Taught by: Peter Heller
Catalog details
ECON 548 Human Capital and Development

Taught by: Melinda Petre
Catalog details
ENVI 283 / PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes

Taught by: Pia Kohler
Catalog details
MAST 351 / PSCI 319 / ENVI 351 Marine Policy

Taught by: Catherine Robinson Hall
Catalog details
PSCI 224 Neo-liberalism: What Is It and Why Does It Matter?
Taught by: Michael MacDonald
Catalog details
PSCI 241 / SOC 241(S) Meritocracy

Taught by: Darel Paul
Catalog details
PSCI 246(F) The Politics of Capitalism

Taught by: Sidney Rothstein
Catalog details
PSCI 247 / ASST 249(S) Political Power in Contemporary China

Taught by: George Crane
Catalog details
PSCI 248 T The USA in Comparative Perspective

Taught by: James Mahon
Catalog details
PSCI 268 Israeli Politics

Taught by: Michael MacDonald
Catalog details

CREDIT FOR COURSEWORK DONE ELSEWHERE

The three Political Economy Program courses (POEC 250, 401, and 402) must be completed at Williams without exception. Students are strongly encouraged to complete the empirical methods course (POEC 253 or ECON 255) and PSCI 201 at Williams, as versions of these courses offered elsewhere are usually highly imperfect substitutes that will not provide adequate preparation for the senior seminars; students may in rare cases be able to complete either of these requirements during study at another college or university (e.g. during study abroad), but only with prior permission from the chair. The three electives and other introductory courses in Political Science may be completed during study at another college or university (e.g. during study abroad) with permission of the chair. The general policy of the Program is to grant credit for one course per semester abroad and in extraordinary circumstances, credit for three courses for an entire year abroad. Students who score a 5 on the AP exam in Microeconomics, Macroeconomics, or Comparative Government and Politics may receive credit towards the major for the cognate introductory economics or political science course(s). Credit for A levels and IB exams in Economics and for introductory microeconomics and macroeconomics classes taken at other colleges and universities (subject to approval by the Economics department study away coordinator) is given consistent with the current policy of the Economics Department. Students whose economics department placement exam scores allow them to place out of ECON 110 and/or ECON 120 may receive credit towards the major for the corresponding class. No substitute higher-level coursework is required for majors receiving credit in this way, although it is certainly encouraged. Students in the class of 2019 and earlier who score a 5 on the AP exam in U.S. Government and Politics may receive credit towards the major for the cognate introductory political science course(s). Students in the class of 2020 and later classes cannot substitute AP credit for PSCI 201.

RECOMMENDED PROGRESSION THROUGH THE REQUIRED MAJOR COURSES

Students considering a major in Political Economy are encouraged to begin with ECON 110 and 120 and any one of PSCI 201, 202, 203, or 204 in their first year, as these courses are the prerequisites or co-requisites for POEC 250. All prospective POEC majors are encouraged to take PSCI 201, and indeed are required to do so if they are in the class of 2020 or later, as it provides tools of political analysis that will be essential for the projects all POEC majors will undertake in POEC 402. Students should plan to complete both of their two required introductory PSCI courses during either the first or second year at Williams, as first- and second-year students get enrollment preference in these classes. Students should plan to take POEC 250 and POEC 253 (or ECON 255) during the sophomore and junior years, keeping in mind that both POEC 250 and POEC 253 are offered only in the fall, and that ECON 255 requires STAT 161, STAT 201, or STAT 202 as a prerequisite (STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018). POEC 401, taken fall of senior year, requires POEC 253 or ECON 255 as a prerequisite, so that prerequisite must be completed before the start of senior year. Students should also get started on their electives during sophomore and junior year.

THE DEGREE WITH HONORS IN POLITICAL ECONOMY

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis. Seniors may pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. The third course contributing to such an honors program would normally be an elective in Political Science or Economics taken during the junior year. This course, which may be one of the required electives, must be closely related, indeed must prepare the ground for the honors thesis.

Juniors in the Political Economy major with at least a 3.5 GPA in the program may apply for the honors thesis program by means of a written proposal submitted to the chair by the end of the first week after spring vacation. Written guidelines for such proposals are available in the chair’s office and on the program website. The proposal should have been discussed with at least two faculty members, and at least one faculty advisor from each discipline must be solicited by the student prior to submission of the proposal.
Final decisions about admission to the honors program will be made in late May after spring grades become available.

To achieve the degree with honors in Political Economy, the thesis must be completed by the end of winter study period and be judged of honors quality by a committee consisting of the two advisors and a third reader. A thesis judged to be of particular distinction will qualify its author for the degree with highest honors.

STUDY ABROAD

Despite the fact that Political Economy requires more courses than the typical major, many Political Economy majors go abroad. Since POEC 250 and POEC 253 are offered in the fall, students considering spending only one semester abroad often find spring to be the better choice. Nonetheless, many students study away for the fall or the whole year. Political Economy majors have often been overrepresented in Williams at Oxford. Students planning to be abroad in the fall should take POEC 250 in their sophomore year if at all possible. Similarly, it is necessary to plan ahead to find the best way to satisfy the empirical methods requirement (POEC 253 or ECON 255) before the fall of the senior year. The easiest major credits to obtain abroad are the electives in Political Science and Economics.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, although because so many of the classes in the program are Williams-specific, there is an effective limit of 2-3.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Only Economics or Political Science courses can be awarded credit, and they must satisfy one of the elective categories (or in rarer cases one of the ECON or PSCI intro requirements).

Are there specific major requirements that cannot be fulfilled while on study away?

Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The POEC major requires 3 specific POEC courses (250, 401, and 402), and one empirical methods course (POEC 253 or ECON 255). The POEC courses are only offered in a single semester (fall for 250, 253, and 401 and spring for 402), and 401 and 402 must be taken in the senior year. 253 can be replaced with ECON 255, which is offered in fall or spring, but ECON 255 has an additional prerequisite of STAT 161, STAT 201, or STAT 202 (STAT 101 can also serve as a prerequisite, but only if taken prior to the fall of 2018). Studying abroad in POEC requires careful planning.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

No, but students have discovered upon reaching their destination that the course is different than described so were forced to change or not count the course.

POEC 214 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ENVI 212 ECON 214

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets
compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

POEC 214 (D2) ENVI 212 (D2) ECON 214 (D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

TUT Section: T1 TBA Ralph M. Bradburd

POEC 250 (F) Economic Liberalism and Its Critics

Cross-listings: ECON 299 PSCI 238 POEC 250

Primary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: Lectures recorded for viewing prior to class sessions; discussion in separate sections for in-person and remote students. Section 01 (afternoon) is in-person and section R2 (evening) is remote. Cap for both sections combined is 25. Students taking the class in-person should register for 01, and students taking the class remotely should register for R2. We will allow enrollment to be unbalanced between the two sections subject to the constraint that the total number of students cannot exceed 25.

Requirements/Evaluation: six short essays, several short homework assignments, and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 12

Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

POEC 253  (F)  Empirical Methods in Political Economy  (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

Class Format: The class will be remote. I will present the material using a mix of synchronous and asynchronous methods. We will use the synchronous time for discussion and Q and A as well.

Requirements/Evaluation: Problem sets, group project, midterm exam, final exam
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Limit: 20
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics and political science.

POEC 280  (F)  Silicon Valley: Digital Transformation and Democracy
Cross-listings: POEC 280  PSCI 280  STS 280
Secondary Cross-listing
Nearly every country in the world seeks to drive economic growth by promoting digital technologies. In the twenty-first century, the universal model is Silicon Valley. But as much as tech may drive economic growth, it may also threaten democratic politics. This tutorial explores this tension. We do so in four steps by examining (1) the origins of the Silicon Valley model, (2) other countries’ attempts to emulate it, (3) what it’s like to work in tech, and (4) possibilities for regulating the tech sector. Each step will deepen students’ understanding of tech. By engaging multiple analytical lenses, students will develop the tools to articulate the possibilities and imperatives of democratic politics in the twenty-first century.

Requirements/Evaluation: Five 5-page papers; five 2-page responses; participation
Prerequisites: One introductory course in political science and/or permission of the instructor.
Enrollment Limit: 10
Enrollment Preferences: Preference will be given to sophomores or juniors majoring in a Division II field

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

POEC 388 (S) Comparative Political Economy

Cross-listings: PSCI 388 POEC 388

Secondary Cross-listing
This tutorial considers the relationships between broad economic structures and political institutions in the modern world. We consider why and how it that the expansion of capitalism led to the birth of democracy in some countries, but dictatorships in others? What, if any, is the relationship between economic development and the organization of power (regime type)? Does economic development lead to the spread of democracy? Or are economic crises the key to understanding the conditions under which dictatorships fall? Finally, has the emergence of a neoliberal economic order affected the organization of political society?

Class Format: Hybrid taught in tutorial-style format

Requirements/Evaluation: class participation, 4 tutorial-style papers, 6 response papers, 1 revised paper

Prerequisites: PSCI 201-04 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science Majors, Political Economy Majors

POEC 402 (S) Political Economy of Public Policy Issues
In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

Class Format: student presentations
Requirements/Evaluation: group policy projects including an 80- to 100-page paper and 2-hour presentation
Prerequisites: POEC 253 or ECON 255, POEC 250, POEC 401; open only to Political Economy majors
Enrollment Limit: 19
Enrollment Preferences: open only to Political Economy majors
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: required for the Political Economy major
Distributions: (D2)

Winter Study

POEC 31 (W) Honors Thesis: Political Economy
To be taken by students registered for Political Economy 493.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

POEC 99 (W) Independent Study: Political Economy
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
POLITICAL SCIENCE (Div II)  
Chair: Professor Mark Reinhardt

- Arturo Chang, Gaius Charles Bolin Fellow in Political Science
- George T. Crane, Chair of Asian Studies and the Edward S. Greenbaum 1910 Professor of Political Science; affiliated with: Asian Studies Department
- Justin Crowe, Chair of Leadership Studies and Associate Professor of Political Science; affiliated with: Leadership Studies Program
- Laura D. Ephraim, Associate Professor of Political Science
- Galen E Jackson, Assistant Professor of Political Science
- Joy A. James, Ebenezer Fitch Professor of Humanities; affiliated with: Political Science Department
- Cathy M. Johnson, James Phinney Baxter III Professor of Political Science
- Michael D. MacDonald, Frederick L. Schuman Professor of International Relations
- James E. Mahon, Woodrow Wilson Professor of Political Science; on leave Spring 2021
- James McAllister, Fred Greene Third Century Professor of Political Science; affiliated with: Leadership Studies Program
- Nicole E. Mellow, Professor of Political Science; affiliated with: Leadership Studies Program
- Ngonidzashe Munemo, Professor of Political Science, Chair of Global Studies; affiliated with: Global Studies
- Nimu Njoya, Lecturer in Political Science
- Darel E. Paul, Professor of Political Science
- Mark T. Reinhardt, Chair and Class of 1956 Professor of American Civilization; affiliated with: American Studies Program
- Neil Roberts, Chair and Professor of Africana Studies and Faculty Affiliate in Political Science and Religion; affiliated with: Religion Department, Political Science Department
- Sidney A. Rothstein, Assistant Professor of Political Science
- Cheryl Shanks, Professor of Political Science
- Matthew Tokeshi, Assistant Professor of Political Science; on leave Fall 2020
- Elizabeth Iams Wellman, Visiting Assistant Professor of Political Science
- Mason B. Williams, Assistant Professor of Leadership Studies and Political Science; affiliated with: Political Science Department; on leave 2020-2021

Politics is most fundamentally about forging and maintaining community, about how we manage to craft a common destiny guided by shared values. Communities need a way to reconcile conflicts of interest among their members and to determine their group interest; they need to allocate power and to determine its just uses. Power may be used wisely or foolishly, rightly or cruelly, but it is always there; it cannot be wished away. Political science attends to the ways that social power is grasped, maintained, challenged, or justified. The contests over power and the values that it should be used to further give politics its drama and pathos. The effort to understand politics aims not only to describe and explain, but also to improve political life.

The Political Science major is structured to allow students either to participate in the established ways of studying politics or to develop their own focus. To this end, the department offers two routes to completing the major, each requiring nine courses. We invite students either to organize their major through the subfields that structure the discipline of political science (American politics, international relations, political theory, and comparative politics), or to develop individual concentrations reflecting their particular interests, regardless of subfields.

MAJOR  
Subfield Concentration Route: Upon declaring a major, students choose one subfield: American politics, international relations, political theory, or comparative politics. The subfield concentration draws at least four (4) of the nine courses from one subfield including the appropriate core course from 201-204, two electives of the student’s choice at the 200 or 300 level and the senior seminar (or an individual project) in the student’s subfield. Students selecting political theory as their subfield concentration must take Political Science 231 or Political Science 232 as one of their four subfield
courses, in addition to taking Political Science 203 and prior to taking Political Science 430. With permission of the department chair, students may take a senior seminar in a different subfield, providing they take a third elective in the subfield of concentration. In addition, students must take courses in two subfields outside the subfield of concentration to satisfy the breadth requirement (all methods courses also count toward the breadth requirement). The faculty advisor must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level courses can count toward the major.

**Individual Concentration Route**: Alternatively, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, four are electives at the 200 or 300 level, including one from 201-204, and one is a senior seminar or individual project. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has their choice of any two other courses within the Political Science Department. The faculty advisor and the department chair must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level courses can count toward the major.

**ADVICEMENT**

When a student chooses to major in Political Science (usually at the end of the sophomore year), they may register with any Political Science faculty member. The registering faculty member will ask for preferences for a permanent faculty advisor and will assist undecided students in finding an advisor. In all cases, students will be paired by the beginning of junior year with an advisor who will continue with them through graduation.

**COURSE NUMBERING**

The course numbering used by the Political Science Department reflects the format and specialization of a course. The 100-level courses are designed to address political topics from multiple subfield perspectives; many are seminars designed for first-year students. The 200-level courses are divided between our core courses and our electives. The core courses, numbered from 201-204, serve as introductions both to the substance of politics and the subfields organizing the study of politics. The introductory subfield course must be completed before the senior year. The 200-level elective courses delve into political processes, problems and philosophies. 100-level and 200-level courses have no prerequisites. 300-level courses are more specialized and have prerequisites. 400-level courses are senior seminars offered for students in the major; senior seminars also are open to juniors and to non-majors if space permits. In general, the main subfield of non-core courses can be read from the middle digit of the course number: 0, 1 or 5 for American politics; 2 or 6 for international relations; 3 or 7 for political theory; 4 or 8 for comparative politics. Because the relevant course number is not available, and as some courses may not fit the subfields, please check the “attributes” entry to confirm how the course is categorized by the department.

**WINTER STUDY PROJECT**

The department welcomes relevant WSP 99 proposals that can make important contributions to the student’s understanding of public affairs and politics. Majors, seniors, and students without previous WSP 99 experience have preference.

**THE JUNIOR YEAR ABROAD**

A major in Political Science can be readily and usefully combined with study off-campus. Generally, only one course taken per semester abroad in a program approved by the College may be counted toward the requirements for a degree in Political Science.

**FAQ**

- **Can your department or program typically pre-approve courses for major/concentration credit?**
  - Yes, in many cases, though students should be sure to contact the department.

- **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**
  - Course title and description, though sometimes a syllabus may be needed. How much we need may depend on our familiarity with the institution or program.

- **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**
  - Yes. Typically we allow not more than one course per semester, or two per year, to count for major credit. In special circumstances, the chair may consider granting an exemption and allow an additional course.

- **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**
  - No, although this depends on the course. If, after considering description and institution we feel it is not rigorous enough, we will not count it.
Are there specific major requirements that cannot be fulfilled while on study away?

Yes. We do not allow the senior seminar requirement to be fulfilled by study abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. One such required course (either Ancient or Modern Political Thought for those specializing in political theory within the major) can be fulfilled by an appropriate study abroad course.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

When issues arise that’s almost always because the student did not keep department adequately informed of evolving plans.

PREPARATION FOR GRADUATE STUDY

The Department recommends that students contemplating graduate school, especially if they plan to study fields outside political theory, take a course in research and quantitative methods, such as PSCI 300 or, if it is not taught, ECON/POEC 253.

THE DEGREE WITH HONORS IN POLITICAL SCIENCE

To become a candidate for honors the student must (1) apply in the second semester of the junior year, (2) submit a research proposal acceptable to the department’s honors committee and for which an appropriate advisor is available, (3) have a record of academic excellence in Political Science. The last includes not only the student’s cumulative GPA in Political Science, generally 3.5 or above, but also demonstrated research and writing skills, evidenced by one or two examples of graded work submitted along with the thesis proposal. Along with the successful completion of a high-quality thesis, the degree with honors in Political Science requires enrollment in the year-long senior thesis seminar, in addition to the other nine (9) courses of the regular major requirements.

ADVANCED STUDY IN AMERICAN POLITICS

The Department of Political Science provides the opportunity for an unusually gifted student to engage in an entire year’s advanced research in American politics under singularly favorable conditions. Supported by income derived from an endowment fund, the student, designated the Sentinels of the Republic Scholar (after the name of the fund), receives a substantial research stipend to cover costs associated with the proposed project.

This unique research course (Political Science 481-W33-482) is designed to encourage the pursuit of excellence among the most talented Williams students of Political Science. Admission to it is awarded to the most distinguished candidate on the basis of demonstrated capacity for outstanding work and of the project’s promise for creative contributions to the understanding of American politics, political institutions and thought.

PSCI 118  (F)  Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. The current pandemic, related economic distress, and social protests have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty—the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. This class is extensively hybrid by design; it is largely remote with some in-person sessions. Remote sessions include substantial collaboration with a similarly structured first-year course being taught by a sociologist at the University of North Carolina. Williams and UNC students will work together in small groups and will present their project findings to both classes.

Requirements/Evaluation: active class participation, three 4-page essays, group assignments, and class presentation

Prerequisites: first-year students

Enrollment Limit: 15

Enrollment Preferences: first-year students

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
**PSCI 120  (S) America and the World**

**Cross-listings:** LEAD 120 GBST 101 PSCI 120

**Primary Cross-listing**

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a “grand strategy.” By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** short papers, class participation, and final exercise

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** LEAD 125 PSCI 125

**Secondary Cross-listing**

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality—can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

**Class Format:** This course will be hybrid, combining elements of synchronous meetings and asynchronous content so as to allow both in-person and remote students to participate.

**Requirements/Evaluation:** active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

**PSCI 126  Religion, Politics, and Society: A Global Perspective  (DPE)**  
In spite of predictions that religion would wither away with in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to make sense of the relation between religion, politics, and society, discussing especially the concept of the ‘secular.’ The second part discusses religion in the US society. Here, we will discuss if the American society can be called secular, the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their mobilization, religious minorities in the United States and many other aspects of religion in the US society. The third part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi’a) and Judaism. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the moral questions raised by the interaction of these two forces.  
**Requirements/Evaluation:** Class participation and three papers, in these proportions: 20% participation; 25% first paper (7 pages); 30% second paper (8-10 pages); and 25% third paper (7 pages). No final exam.  
**Prerequisites:** none  
**Enrollment Limit:** 35  
**Enrollment Preferences:** Global Studies concentrators and intended concentrators; Religion majors and intended majors  
**Expected Class Size:** 25  
**Grading:**  
**Unit Notes:** Core course for GBST  
**Distributions:** (D2) (DPE)  
**Difference, Power, and Equity Notes:** An engagement with religious difference in the world, with a spotlight on how religion and politics—that is, power—interact globally and in the USA.  
**Not offered current academic year**

**PSCI 127  (S)  America First? The Trump Era and the Future of World Politics**  
**Cross-listings:** LEAD 127  PSCI 127  
**Primary Cross-listing**  
"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindberg in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal international internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free trade, and conflicts in the Middle East.  

---
PSCI 132 (F) Contemporary Africana Social and Political Philosophy

Cross-listings: AMST 132 AFR 132 PSCI 132

Secondary Cross-listing
This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzegwu, Lucius Outlaw, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: first- and second-year students

PSCI 135 (F) Politics after the Apocalypse

Cross-listings: STS 135 PSCI 135

Primary Cross-listing
What shape will politics take after the apocalypse? Even before the coronavirus pandemic gave us reason to wonder if we are, in fact, living through an apocalypse, speculation about the end of the world and its aftermath pervaded recent television, movies, literature, philosophy, and critical theory. In this class we draw these works into conversation with political theories of the "state of nature" and "state of exception" to better understand what political possibilities are opened and foreclosed in times of crisis. What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? What does it say about pre-pandemic politics that we were so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? And how will the unfolding pandemic change how we respond to these stories? Class will be driven primarily by discussion, typically introduced by a brief lecture.

Class Format: Class meetings will be conducted remotely using zoom.
Requirements/Evaluation: two 3-5 page papers, one short story (7-15 pages and including an explanatory cover letter), contributions to a class project documenting and analyzing the pandemic, and class participation
Prerequisites: first- or second-year students, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: first-year students

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 150 (D2) GBST 101 (D2)

Not offered current academic year

PSCI 160  (F)  Refugees in International Politics  (DPE) (WS)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic. We investigate who refugees are, in international law and popular understanding; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations' roles in managing population displacement; look at the way that images convey stereotypes; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation: eleven essays: five lead, five response, and one statement. The first two weeks' essays' grades will be unrecorded.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In addition to writing every week, students will have a chance to write ungraded work; will have a chance to revise submitted work; and will have a chance to work on specific skills cumulatively.

Difference, Power, and Equity Notes: This course examines the way in which home states categorize people and oppress some, producing
refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.

PSCI 201  (F)(S)  Power, Politics, and Democracy in America

Begun as an experiment over 200 years ago, the United States has grown into a polity that is simultaneously praised and condemned, critiqued and mythologized, modeled by others and remodeled itself. This course introduces students to the dynamics and tensions that have animated the American political order and that have nurtured these conflicting assessments. Topics include the founding of the American system and the primary documents (the Declaration of Independence, the Constitution, and the Federalist Papers), the primary institutions of national government then and now (Congress, the Presidency, and the Supreme Court), and the politics of policy-making in the United States. We study structures, processes, key events, and primary actors that have shaped American political development. In investigating these topics, we explore questions such as these: How is power allocated? What produces political change? Is there a trade-off between democratic accountability and effective governance? How are tensions between liberty and equality resolved? Do the institutions produce good policies, and how do we define what is good?

Class Format: For fall 2020, this course will be taught remotely, with twice-weekly synchronous Zoom sessions as a class, occasional recorded mini-lectures for asynchronous viewing, and perhaps a few small group Zoom sessions for further discussion.

Requirements/Evaluation: two 5-7 page essays, one 4 page reflection, two 2 page reading responses, a final essay or exam, and class participation

Prerequisites: this is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with the permission of instructor and under special circumstances

Enrollment Limit:  12

Enrollment Preferences: first-years and sophomores

PSCI 202  (F)(S)  World Politics: An Introduction to International Relations

This course will provide an overview of the central theoretical concepts and debates in the field of international relations. The first part of the course will focus on theoretical questions that have preoccupied scholars since the time of Thucydides: What are the implications of an anarchic political structure for order and justice in world politics? What are the necessary conditions for peace and stability? Is military power all that matters in determining politics among nations? What role do moral, legal, and humanitarian considerations play in the conduct of international relations? Have new norms about human rights and humanitarian intervention changed the way that states interact with each other and their populations? How do important theoretical approaches like Realism and Liberalism help us understand world politics in the 21st century? This course is not explicitly focused on current events, but since our subject matter involves theoretical and conceptual issues about the nature of world politics, all students will be required to keep up to date on important world events and policy debates.

Class Format: This course will largely be run as a synchronous seminar, although some lectures might be posted on GLOW.

Requirements/Evaluation: several short papers, weekly GLOW posting, and class participation

Prerequisites: this is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with permission of instructor and under special circumstances
Enrollment Limit: 15
Enrollment Preferences: first-year students and sophomores intending to major in Political Science

PSCI 203  (F)(S)  Introduction to Political Theory

Is politics war by other means? Is it merely a practical way to meet our needs? Or is it, rather, the activity through which citizens pursue justice and the good life? And what is justice? How can it be established and secured? Where does it apply? To whom? What are the powers and obligations of citizenship? Who decides? On what basis? Political theory addresses questions such as these as it investigates the fundamental problems of how people can, do, and ought to live together. The questions have sparked controversy since the origins of political thinking; the answers remain controversial now. This course addresses the controversies, drawing examples from struggles over such matters as racism, colonialism, revolution, political founding, economic order, and the politics of sex and gender, while focusing on major works of ancient, modern, and contemporary theory by such authors as Plato, Aristotle, Machiavelli, Hobbes, Rousseau, Mill, Marx, Nietzsche, Beauvoir, Arendt, Fanon, Rawls, Foucault, and Young. Themes may include power, authority, freedom, justice, equality, democracy, neoliberalism, feminism, and violence, though the emphases will vary from semester to semester.

Class Format: For fall of 2020, this course will take place primarily through twice-weekly synchronous meetings on Zoom. The professor will regularly post brief recorded lectures to Glow before the relevant class session so that class time can be spent entirely on discussion.

Requirements/Evaluation: Three papers, class participation, and, if practicable, participation in a weekly small, student-only discussion group outside of class hours.

Prerequisites: none; this is an introductory course, open to all, including first-year students
Enrollment Limit: 12
Enrollment Preferences: first-years and sophomores

PSCI 204  (F)(S)  Introduction to Comparative Politics: Democracy, Authoritarianism, Nationalism

The comparative study of politics looks mainly at what goes on inside countries, the domestic dynamics of power and institutions and identities. The purpose is to deepen our understanding of politics. In this class we will consider a number of analytic concepts central to the study of politics generally--the state, legitimacy, democracy, authoritarianism, nationalism--to comprehend political processes and transformations in various parts of the world. We will focus particularly on three themes: what is democracy and how might it fail? Why do certain authoritarian regimes persist while...
"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well—whether in the presidency, the parties, social movements, organizations, or local communities—are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention—as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

Requirements/Evaluation: six 5-page essays; six 2-page response papers; and one final 5-page rewritten essay
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Political Science majors and Leadership Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

PSCI 208  (F) Wealth in America  (WS)
The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This course focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age. Most readings will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Requirements/Evaluation: four 5-page papers and a final 10-page paper that is a revision and extension of a short paper
Prerequisites: none; not suitable for first-year students
Enrollment Limit: 19
Enrollment Preferences: Political Science majors with concentration in American politics and Political Economy majors
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: American concentration
Distributions: (D2) (WS)
Writing Skills Notes: Four 5-page papers, peer review, and a revision of extension of one of these papers into a 10-page paper at the end of the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Cross-listings: WGSS 209  PSCI 209
Primary Cross-listing
Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Class Format: discussion

Spring 2021
LEC Section: 01    TBA     Cathy M. Johnson
America’s founding documents explicitly state that the will of the people is the authority upon which our government rests. But do the people actually govern, and should they? Pessimists point out that most Americans know very little about politics and lack coherent political views, are easily manipulated by media and campaigns, and are frequently ignored by public officials anyway. Optimists counter that, even if individuals are often ignorant and/or confused about politics, in the aggregate, the public sends a coherent signal to public officials, who usually carry out the public’s general wishes. In addition to engaging this debate about what the public thinks about politics, we will also explore how people behave in the political realm. What are the forces that shape whether citizens pay attention to politics, vote, work on campaigns, protest, or engage in other types of political action? How do resource gaps tied to inequalities in society (such as race, class, and gender) influence political behavior? And how do institutions such as the media and campaigns encourage or discourage it?

**Requirements/Evaluation:** class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Political Science majors

**Secondary Cross-listing**

America’s founders didn’t mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy—and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy—and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America’s democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

**Requirements/Evaluation:** bi-weekly short writing assignments, term paper, midterm and final in-class exams

PSCI 214 (S) Racial and Ethnic Politics in America

Arguably, the dominant discourse in the presidency of Donald Trump and the battle to succeed him is about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

PSCI 215 (S) Race and Inequality in the American City

Cross-listings: LEAD 215 PSCI 215

Primary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership
produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Cross-listings: LEAD 216 PSCI 216

Primary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the conservative ascendancy of the late twentieth century. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: discussion

Requirements/Evaluation: three 5- to 7-page essays, a final exam, and class participation

PSCI 218 (S) The American Presidency
Cross-listings: PSCI 218 LEAD 218

Primary Cross-listing
Many argue that the presidency has been fundamentally changed by the tenure of Donald Trump. Is this right? To study the presidency is to study human nature and individual personality, constitution and institution, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with domestic priorities such as the protection of civil liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? Exploration of these questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership issues, congressional-executive relations, the media, and emergency powers. Attention will focus largely on the modern presidency, though older historical examples will also be used to help us gain perspective on these problems.

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation:  grading will be determined by class participation, two short essays, and a 15-page research paper

AFR 224 (D2) PSCI 221 (D2) AMST 201 (D2) LEAD 220 (D2) INTR 220 (D2)  

Difference, Power, and Equity Notes:  This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.  

Spring 2021  
TUT Section: T1    TBA     Joy A. James  

PSCI 223  (F)  International Law  
International law embodies the rules that govern the society of states. It spells out who can be a sovereign state and how to become one, what states can do, what they cannot do, and who can punish transgressions. It also creates status used by other actors, such as international organizations, soldiers, national liberation movements, refugees, transnational air and sea shipping companies, and multinational corporations. International law is similar to domestic law, with one very crucial difference: it is not in theory enforced by a centralized, sovereign state. In most other respects, it is the same: it protects the status quo, including the distribution of power among its members; it spells out legitimate and illegitimate ways of resolving conflicts of interest; it is biased toward the powerful and legitimates their interests; it tells its members how to act to coordinate their interests and minimize direct conflict; some of it is purely aspirational, some of it necessary for survival. And like domestic law, it is enforced only some of the time, and then against the weak more than the strong. Yet, law is still where we look for justice and, perhaps, the legitimation of order.  

Class Format:  The lectures will be on Powerpoint slides that students can review at any time before class, as they do the readings. Synchronous
class time will be devoted to discussion: clarifying, extrapolating, interpreting.

Requirements/Evaluation: six quizzes, weekly Glow posts, two 4-page papers on assigned topics, one final project (video, audio, or paper), and one final exam

Prerequisites: None, although those who have not taken PSCI 202 at Williams will be required to do one additional small set of readings and a lecture, and pass a basic quiz based on them during the first week.

PSCI 227 (F)(S) International Relations of the Middle East

Cross-listings: PSCI 227 LEAD 227

Primary Cross-listing

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. Classes will be taught remotely. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Class Format: This course will be taught remotely. There will be brief lectures, which will be either put on the work website prior to class or given at the start of each class. But the class will mainly consist of in-depth, synchronous classroom discussions.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

PSCI 228 (S) International Organization

Tens of thousands of international organizations populate our world. IGOs, whose members are governments of sovereigns, range from the Nordic Association for Reindeer Research to the UN and NATO; NGOs, whose members are private groups and individuals, include the International Seaweed Association as well as the International Committee of the Red Cross. We will examine where they come from, what they do, and to whom they matter, and will examine their agency, efficiency, and accountability. We cover the history, structures and functions of international organizations using case studies.

Requirements/Evaluation: three short papers, a midterm exam, one longer paper on an assigned topic
PSCI 229 (F) Global Political Economy

This course offers a broad introduction to the contemporary global political economy, emphasizing the inherent and inseparable intertwining of politics and economics, power and wealth, the state and the market. The core of the course is made up of analyses of global trade, global finance, development, and migration, with special attention to subjects such as free trade, foreign aid, industrial policy, and border walls. We conclude the course with a look at the global pandemic and its implications for the future of global capitalism.

Class Format: recorded lectures with once weekly seminar-format discussions

Requirements/Evaluation: one 5-7 page paper, one 7-10 page paper, in-class debate, final exam, course discussion

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science and Political Economy majors

Expected Class Size: 20

PSCI 231 (S) Ancient Political Thought

Cross-listings: PHIL 231 PSCI 231

Primary Cross-listing

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: discussion

Requirements/Evaluation: three 7- to 8-page papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option
PSCI 232  (F) Modern Political Thought
Cross-listings:  PSCI 232  PHIL 232

Primary Cross-listing
This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: Class meetings will be conducted remotely using zoom.
Requirements/Evaluation: three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings
Prerequisites: none; open to all
Enrollment Limit: 12
Enrollment Preferences: Political Theory concentrators, then Political Science majors
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)

PSCI 233  (F) Rastafari: Dread, Politics, Agency
Cross-listings:  REL 261  AFR 299  PSCI 233

Secondary Cross-listing
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a 12- to 15-page final paper
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators and majors in Political Science and Religion
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 235  (S)  Survival and Resistance: Environmental Political Theory

Cross-listings:  PSCI 235  ENVI 235

Primary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have “rights”? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet’s health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory’s traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  formal and informal writing assignments and class participation

PSCI 238  (F)  Economic Liberalism and Its Critics

Cross-listings:  ECON 299  PSCI 238  POEC 250

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx’s revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format:  Lectures recorded for viewing prior to class sessions; discussion in separate sections for in-person and remote students. Section 01
(afternoon) is in-person and section R2 (evening) is remote. Cap for both sections combined is 25. Students taking the class in-person should register for 01, and students taking the class remotely should register for R2. We will allow enrollment to be unbalanced between the two sections subject to the constraint that the total number of students cannot exceed 25.

Requirements/Evaluation: six short essays, several short homework assignments, and a final exam
Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

PSCI 241  (S)  Meritocracy
Cross-listings: PSCI 241  SOC 241
Primary Cross-listing
Although less than 1% of Americans have a degree from the country’s top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the New York Times, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy—rule by the intelligent—in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.
Requirements/Evaluation: three papers, take-home final exam, class participation

**PSCI 242 (S) The Politics of Waste**  
**Cross-listings:** ENVI 241  PSCI 242  
**Primary Cross-listing**  

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science—perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

**PSCI 244 Anti-Muslim Racism: A Global Perspective** (DPE)  
The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be
relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading:

Unit Notes: Also qualifies for the GBST Urbanizing World track

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

PSCI 246  (F) The Politics of Capitalism
Must we choose between "socialism or barbarism?" A century after Rosa Luxemburg's challenge, it is clear that socialism did not win. Does this mean that we have descended to barbarism? Tracing the path of capitalist development in the rich democracies suggests a range of responses. Some states have developed robust institutions that provide for citizens' basic needs and check the power of business; others leave the poor threatened by starvation and workers exposed to exploitation. How and why has capitalism evolved in different forms in different countries? This course addresses the politics of capitalism by examining the struggles between social groups that lead to variation in distributional outcomes and economic performance. The course concludes by investigating these struggles in light of contemporary challenges, in particular, transnational governance and technological change.

Class Format: Hybrid: in person/online

PSCI 247  (S)  Political Power in Contemporary China

Cross-listings: ASST 249  PSCI 247

Primary Cross-listing

The People's Republic of China has experienced rapid and extensive economic, social and cultural transformation over the past forty years. Its political system, however, is little changed. The Communist Party still monopolizes power and works hard to suppress organized opposition. Political dissent has taken various forms since 1979 but the regime has found ways to repress and divert it. Yet, in spite of the state's efforts, opposition and dissent continue to bubble to the surface. The course will review the political development of the PRC since 1949 and, then, focus on the dynamics of political contention and regime persistence since the Tiananmen Crisis of 1989.

Class Format: discussion

PSCI 248  (F)  The USA in Comparative Perspective  (WS)

Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; nationalism and national identity; war and state-building; American exceptionalism, religion, and foreign policy; the role of political and economic institutions; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites: none

Enrollment Limit: 10
PSCI 253  (S)  The Tragedy of Venezuela

The recent history of Venezuela offers a window into many of the most important political and economic issues faced by people in developing countries. Why does an abundance of oil seem to solve some problems while often leading to perverse economic and political outcomes? How can democracy be made to work better for ordinary people? What does it mean for a government to be truly sovereign? How does corruption grow and what can we do about it? When should we leave important decisions to technocratic experts? What does it mean today to be progressive? The course first briefly reviews Venezuelan post-Independence history, with an emphasis on the post-1958 democratic settlement. It then explores more deeply the reasons for the breakdown of this settlement, the rise of Hugo Chavez, and the decay of the "21st Century Socialist" regime under Chavez and Maduro. Materials include biographies, documentary films, short videos, economic data, and news reports.

Class Format: discussion
Requirements/Evaluation: a map quiz and four short papers
Prerequisites: a course in comparative politics and a course in economics, or permission of the instructor
Enrollment Limit: 35
Enrollment Preferences: sophomores and PSCI majors

PSCI 255  (S)  Weaponized Leadership: Demagoguery and Populism in Contemporary Perspective

Cross-listings: LEAD 255  PSCI 255
Secondary Cross-listing

Since Donald Trump began his rhetorical assault on immigrants, the political establishment, and the free press, all in the name of "the American people," terms like demagoguery and populism have come to dominate American political discourse. Demagogues and populists are often defined as bad leaders who manipulate the emotions of their audiences for the sake of personal ambition--leaders who turn a good thing (popular government) into something dangerous. At the same time, and as Trump has shown, many of the tactics that populists and demagogues deploy are politically effective. Protest leaders tell their audiences to get angry and to stand up and fight precisely because this kind of rhetoric can move an audience to action when rational persuasion cannot. And, many of the leaders we think of as great today were regarded as demagogues and populists during their own times. Puzzles like these point to our current political moment. How useful are terms like demagoguery and populism for understanding leadership? How have these terms been weaponized to distort politics instead of clarifying it? Should we reserve these terms for leaders who are truly bad, and if so, what counts as a "truly" bad leader (as opposed to one we just happen not to like)? Or can demagogic and populist tactics be deployed in better and worse ways? We will approach these questions through a survey of classic and contemporary writings on popular leadership, from Thucydides and Machiavelli to present-day social science. With these competing theories in view, we will read historical and biographical accounts of some of history's most controversial leaders--including Bolivar, Lenin, FDR, and Hugo Chavez--so as to better understand the popular leaders who dominate much of our politics today.

Requirements/Evaluation: several short essays, weekly writing assignments, and a final exam

PSCI 256 (F) Coastal Communities and Climate Justice (DPE)
Cross-listings: PSCI 256 GEOS 257 MAST 267 ENVI 267
Secondary Cross-listing
Climate change poses extraordinary challenges to our country’s coastal communities; the impacts of which will not be borne equally. Access to innovative technological, scientific, financial and legal resources is controlled by policy makers. Equal access is critical for the sustainability of our coastal communities. But fair decisions require vulnerable communities to have a voice in local climate change adaptation decisions. This seminar course will introduce you to basic concepts of climate justice in the context of our Nation’s coastal communities, guided by the UN Framework Convention on Climate Change. The course will introduce you to fundamental coastal and ocean-based climate-induced impacts with a focus on sea level rise, ocean warming, ocean acidification and coastal infrastructure. We will examine these impacts, as well as local, state, regional and federal policy responses to them through the lens of climate justice. We will identify what’s working and what more needs to be done to advance climate equity and justice in the wake of formidable global and local change. Proficiency will be demonstrated through class participation, work conducted in small group strategy exercises, discussion board posts, short research assessment papers and a final written project. There are three goals in this course: first to broaden your understanding of the disproportionate effects of climate change to underrepresented, disempowered, poor, urban and indigenous populations living in American coastal communities; second to provide you with tools to identify inequity; third, to increase your own voice to promote avenues to seek climate justice.

Class Format: remote
Requirements/Evaluation: Weekly Readings; Class Participation; Small group strategy exercises; Four on-line discussion board posts; Two 2-3-page data & research assessment papers; Final written project--multiple formats available
Prerequisites: none
Enrollment Limit: 20

SEM Section: R1 MR 3:15 pm - 4:30 pm Catherine Robinson Hall
PSCI 257  (F)  Iran, Islam, and the Last Great Revolution

Cross-listings:  ARAB 257  PSCI 257

Primary Cross-listing

The title and inspiration for this course comes from Robin Wright's book The Last Great Revolution. Wright argues that the 1979 Revolution in Iran completes the promise of the Modern Era, "launched in the West" but "adopted by or adapted to all other parts of the world." The overthrow of 2500 years of monarchy "paved the way for using Islam to push for empowerment." It is this empowerment, of nations and of ordinary individuals, that stands as the signal quality of modernity. The notion that post revolutionary Iran offers an alternative path to modernity is hardly conventional wisdom in the United States or Europe, where images of men draped in religious passion and women in forbidding black chadors are as common as the belief that the 1979 Revolution set Iran spinning back thirteen centuries in time. If westerners do not view Iran as entirely anti-modern, then at best they see it as a country filled with "paradoxes" and "puzzles," one in which indie rock bands play underground, figuratively and literally beneath the feet of retrograde religious fanatics, or unveiled women attend all-night parties only to slip back into proper hejab the next morning. The class will ask you to consider why these assumptions exist, whether they are the symptoms of a western civilization "clashing" with the east, and if they are exclusive to the United States or Europe. Does there also exist an "orientalism in reverse," a negative gaze of Iranians towards the west and towards their fellow, "backwards" citizens?

PSCI 258  The Media and American Democracy

The course examines the relationship between the press and government, its watchdog function, how social media and the Internet are changing its role, the emergence of independent investigative bodies such as Pro Publica, and the myriad ways in which the press has helped shape American history, for better or worse. The course goes behind the headlines to examine the delicate interplay between government and press, peels back the familiar classics of American journalism, but also incorporates the current conflicts and tensions between the press and government. In the new age, how does the press define or redefine balance, neutrality, the quest for objectivity, and restraint. Who is a journalist, a once relatively easy question, but one now fraught with complexity? There has been a tectonic shift in the fundamental standards and practices of the press in recent years. What are those changes and how does it augur for the future of the press and democratic institutions?

Requirements/Evaluation:  Several short papers, 10-15 page research paper.

Prerequisites:  None

Enrollment Limit:  14

PSCI 260  (F)  Power, Feminist-Style  (DPE) (WS)
Cross-listings: WGSS 260  PSCI 260

Secondary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice—the concept of power—from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 260 (D2) PSCI 260 (D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

PSCI 261 (F) Conspiracy Theories in American Politics

Cross-listings: PSCI 261 LEAD 277

Secondary Cross-listing

The phrase "conspiracy theory" typically evokes images of paranoid cranks--of cars plastered with vituperative bumper-stickers and of people who wear tin-foil hats. To be sure, the claims that conspiracy theorists advance can be astonishing, from Pizzagate--alleging that Democratic Party officials ran a human trafficking ring out of a Washington, D.C. pizza restaurant--to the Flat Earth movement, which holds that the earth is, indeed, flat. At the same time, the persistence and power of conspiracy theories in American politics should provoke us to wonder why such preposterous-sounding notions gain traction in the first place, and who benefits from them. That conspiracy theories tend to advance a partisan or ideological view, often intended to discredit a competing movement or ideology, suggests that conspiracy theories can function as a kind of remote leadership--"leadership" without any clear leaders at the helm. This course will examine notable American conspiracy theories, such as the Kennedy Assassination theory, "9/11 Truth," and "Birther-ism," in light of recent scholarship on conspiracism, demagoguery, and populism. Our goal will be to understand the political and discursive forces that empower conspiracy theories and the functions they serve in American politics. Where and with whom do conspiracy theories originate? Why do some gain traction while others quickly wither? How can we distinguish between a conspiracy theory based on plausible evidence and one that exists simply to create chaos? And why do some conspiracy theories persist even in the face of direct public refutation?

Class Format: This course will be hybrid, combining elements of synchronous meetings and asynchronous content so as to allow both in-person and remote students to participate.

Requirements/Evaluation: Several short essays, weekly writing assignments, and a longer research paper with presentation.
This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

Enrollment Limit: 19

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 19

PSCI 265  (S)  The International Politics of East Asia

This course examines the political, economic, and cultural determinants of conflict and cooperation in East Asia. Throughout the semester, we will examine three distinct but inter-related aspects of international relations in East Asia: Security, economy, and culture by using some core concepts and theoretical arguments widely accepted in the study of international relations. We will engage some of the central questions and issues in the current debate on East Asia. Do East Asian countries seek security and prosperity in a way fundamentally different from the Western system? Is there a single best way to maintain regional order and cooperation across regions? Will a strong China inevitably claim its traditional place under the sun? Will Japan continue to live as a nation with enormous economic power but limited military means? What is the choice for South Korea between security alliance with the United States and national reconciliation with the North? What should be done to dissuade the authoritarian regime in North Korea from acquiring nuclear capabilities and lead it to different paths toward national survival? By the end of the semester, you will gain both a general perspective and substantive knowledge on East Asian international politics.
Class Format: discussion
Requirements/Evaluation: midterm exam, team debate, take-home final exam, class participation and other assignments
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science and Asian Studies majors

PSCI 266  (S)  The United States and Latin America  (DPE)
This course examines the most important political and diplomatic divide in the Western Hemisphere. The first half is a historical survey of U.S.-Latin American foreign relations from the early Spanish American independence movements through the end of the Cold War, with some emphasis on the latter. We consider how this history confirms or undermines influential views about U.S. foreign relations and about international relations generally. We also compare historical U.S. foreign policy toward the hemisphere to current policy globally. The second half covers the most important current issues in hemispheric relations: the rise of leftist governments in Latin America; the war on drugs; immigration and border security; and competition with China for influence. At the end we briefly reconsider current U.S. policies, in view of the economic and political evolution of Latin America, in historical perspective.
Class Format: more lecture in the first half, more discussion and several in-class debates in the second
Requirements/Evaluation: a map quiz, two short papers, a longer paper, and either another policy paper and a regular final exam, or a 10-page research paper and a short final exam
Prerequisites: none
Enrollment Limit: 35
Enrollment Preferences: Political Science majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)
Difference, Power, and Equity Notes: In the paper that considers the first part of the course, the students weigh to what extent U.S. policy toward Latin America was affected by the largely derogatory attitudes of U.S. diplomats toward Latin Americans. A unit in the second part of the course critically analyzes current U.S. immigration policy in this context.

PSCI 269  The CIA and American Foreign Policy

Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. Still, it took the shock of Pearl Harbor for the United States to establish a permanent peacetime civilian intelligence service independent of another federal department—the Central Intelligence Agency. Since then, the agency and others which comprise the loose entity called the Intelligence Community (IC) have played a pivotal albeit intensely controversial role in US foreign and national security policies. Yet their roles and missions remain largely misunderstood and divisive, as attested to by recent debates surrounding the multiple investigations of the 9/11 tragedy, the flawed pre-war estimates of Iraq's Weapons of Mass Destruction (WMD) capabilities, the reporting on Benghazi, the Snowden revelations, and much more. This course seeks to provide greater understanding of the relationship between intelligence and US foreign and national security policy by examining the CIA's and IC's roles and responsibilities, illuminating their history alongside the history of America and the World, assessing their successes and failures, evaluating their reforms, and correlating their behavior and capabilities with US values and institutions. Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. PSCI 271  (F)  Religion and the State

Cross-listings:  REL 214  PSCI 271  
Secondary Cross-listing

The First Amendment of the U.S. Constitution begins: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." What does "religion" mean in this formulation? Should "religion" be singled-out for exclusion from government? Are "religious" reasons ever legitimate reasons for laws, policies or popular political action? Should "religious" organizations be exempt from otherwise generally applicable laws? Is "religion" good or necessary for democratic societies? In this course we will respond to these and related questions through an investigation of "religion" as a concept in political theory. Particular attention will be given to the modern liberal tradition and its critics. Coverage will range from modern classics to innovative contemporary arguments. Classics may include John Locke's *A Letter Concerning Toleration*, selections from Jean-Jacques Rousseau's *The Social Contract*, James Madison's *Memorial and Remonstrance Against Religious Assessments*, Immanuel Kant's *Religion Within the Boundaries of Mere Reason*, John Stewart Mill's *Three Essays On Religion*, and John Dewey's *A Common Faith*. More recent arguments may come from John Rawls, Alasdair MacIntyre, Nicholas Wolterstorff, Martha Nussbaum, Jeffrey Stout, Winnifred Sullivan, Brian Leiter and Andrew Koppelman.

Requirements/Evaluation:  class participation, two short papers, a midterm take-home exam, and a final take-home exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Religion majors, those interested in being Religion majors, and Political Science majors concentrating on Political Theory

PSCI 273  (F)  Politics without Humans?
**Cross-listings:** ENVI 273  STS 273  PSCI 273
*Primary Cross-listing*
Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

**Requirements/Evaluation:** three 5- to 7-page papers, regular Glow posts, class participation
Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students
Enrollment Limit: 25

PSCI 274  (S)  Revolutions
Why do revolutions occur, or perhaps more to the point, why do they fail to occur? When do they end and what do they actually achieve? What, in other words, is so revolutionary about revolutions? This course considers whether and how revolutions differ from social movements, coups d'etats, and armed rebellions by looking at a broad range of uprisings, from the "colored revolutions" and liberating "springs" of recent years to the classical examples of the French, American, Mexican, Chinese, Cuban, and Iranian revolutions, as well as the challenging cases of Haiti and South Africa. This class seeks a subversive politics of its own. There is a certain, shiny allure to revolutions, particularly within political science. In a field committed to the dry study and explanation of social phenomena, revolutions are the sexy exception, the example of politics par excellence. Our goal ought to be to call the allure into question, to ask whether this is a merit of undeserved distinction, particularly given recent developments in Egypt and Syria, as well as the ongoing consequences of revolutions in Russia, Iran, China, many years after the fact, after the last triumphant regiment rolled through capital streets.

**Requirements/Evaluation:** first short essay, 3-5 pages (15%); second short essay, 3-5 pages (15%); final essay, 15-20 pages (20%); participation, (30%)

PSCI 280 (F) Silicon Valley: Digital Transformation and Democracy

Cross-listings: POEC 280  PSCI 280  STS 280

Primary Cross-listing

Nearly every country in the world seeks to drive economic growth by promoting digital technologies. In the twenty-first century, the universal model is Silicon Valley. But as much as tech may drive economic growth, it may also threaten democratic politics. This tutorial explores this tension. We do so in four steps by examining (1) the origins of the Silicon Valley model, (2) other countries' attempts to emulate it, (3) what it's like to work in tech, and (4) possibilities for regulating the tech sector. Each step will deepen students' understanding of tech. By engaging multiple analytical lenses, students will develop the tools to articulate the possibilities and imperatives of democratic politics in the twenty-first century.

Requirements/Evaluation: Five 5-page papers; five 2-page responses; participation

Prerequisites: One introductory course in political science and/or permission of the instructor.

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to sophomores or juniors majoring in a Division II field

PSCI 281 (S) Contemporary African Politics (DPE)

This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.

Class Format: A typical class session will be about 40% lecture and 60% discussion

Requirements/Evaluation: Class Participation, Map Quiz, Country Case Study (12 - 15 pages, written incrementally throughout semester) and Presentation

Prerequisites: None.

Enrollment Limit: 25
Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course takes the racial, ethnic, linguistic, and religious diversity of sub-Saharan Africa as a starting point for understanding the contemporary politics of the region. The course addresses the legacies of systemic inequality as well as strategies of resistance to oppression. We also examine how ethnic and religious diversity shape political institutions, competition, and conflict, comparing different countries and over time.

PSCI 282  (F)  Africanist Project to Black Consciousness

Cross-listings:  PSCI 282  GBST 282

Primary Cross-listing

In 1957, when it was clear the African Nation Congress was unwilling to change its multiracialist and nonracialist language in favor of Africanist pronouncements, Robert Mangaliso Sobukwe left the party and became the editor of The Africanist newspaper. Two years later he formed the Pan-Africanist Congress. Similarly frustrated that the National Union of South African Students was dominated by white liberals, in 1968 Bantu Steve Biko helped form the black-only South Africa Students' Organization and, four years later, was the key figure in founding of the Black People's Convention, created to promote black consciousness ideas within the broader South African population. This course focuses on Sobukwe's Africanist project and Biko's Black Consciousness Movement, the strategies against apartheid they promoted, and the visions of a free South Africa they imagined.

Class Format: Hybrid

Requirements/Evaluation: class participation; 3 two-page response papers; and a 10-12 final paper.

PSCI 283  (F)  Dirty Politics: Regulating Hazardous Chemicals and Wastes

Cross-listings:  ENVI 283  PSCI 283

Secondary Cross-listing

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food
preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Requirements/Evaluation: participation, several smaller assignments, and a final research project

Prerequisites: ENVI 101 or permission of instructor

PSCI 285 (F) The Revolutionary Generation: Galaxy of Leaders

Cross-listings: LEAD 285 PSCI 285 HIST 354

Secondary Cross-listing

The American Revolution produced a galaxy of brilliant and creative statesmen and intellectuals: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton’s Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Class Format: Remote via Zoom.

Requirements/Evaluation: three papers, weekly class presentations, and active participation in all discussions

Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar
Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

Requirements/Evaluation: five 5-to 7-page essays, five 2- to 3-page critiques, and a final 4-page reflection

Prerequisites: none

PSCI 303 (S) Authoritarian Politics

For most of history, human societies have been ruled by dictators of one sort or another. Despite repeated tides of democratization, over 40 percent of the countries in the world today and half its population are still ruled by non-democracies. The aim of this course is to provide a critical understanding of the dynamics of contemporary authoritarianism, the sources of its resilience, and its impact on global politics. First, the course will examine the key differences between democracy and autocracy, and among different types of autocracies. The second part will investigate the means by which contemporary autocracies stay in power. In addition to traditional tactics like repression, clientelism and propaganda, we will explore how autocracies adopted economic, nationalist and populist appeals, and nominally democratic institutions like parties, legislatures and elections, to sustain their rule. This segment will also explore the societies ruled by dictatorships, as well as the forces behind the waves of democratization and authoritarian resurgence. It will look at popular opinion and mobilization in autocracies, the sources of resistance, and the dynamics of protests and rebellions that sometimes topple these regimes. The third part of the course will focus on the international behavior and impact of autocracies. Are autocracies more likely to initiate domestic and international conflicts? Can they effectively integrate in the global economic currents and develop their countries? Or are all forms of authoritarianism doomed to eventually result in underdevelopment, corruption and cronyism? Can Western democracies establish and
maintain workable relationships with authoritarian regimes and contain their worst tendencies? This segment will examine the accumulated evidence on these issues and discuss the potential future of authoritarianism in global politics.

PSCI 306  (S)  What is Power?

Cross-listings: STS 308  REL 308  PSCI 306  SOC 308

Secondary Cross-listing

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual’s power is supposed to equal their capacity to produce a change in someone else’s behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect. We will trace classic philosophical accounts of power and causation (in European and Chinese philosophy), as well as more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Hobbes, Hume, Locke, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, Sunzi, and Max Weber.

Requirements/Evaluation: weekly critical reflections, midterm review essay (4-6 pages), final essay (10-12 pages)

Prerequisites: None.

PSCI 308  (F)  In Search of the American State

When Donald Trump campaigned in 2016 to "drain the swamp," he built on the idea held by Republicans since Ronald Reagan's 1981 pronouncement that "government is not a solution to our problem, government is the problem." Skepticism of government has deep roots and strong resonance throughout American political history. Despite this, national government has grown in scope and size for much of this history, including under both Democratic and Republican administrations. This tension over what government is doing and what it should be doing is only heightened in times of
crisis, such as the moment the country is in now. This course explores the relationship between citizens and their government by examining the growth of the American state in various arenas over time, as well as the assaults on government legitimacy in recent years. We will assess traditional theories about the weakness of the American state in light of arguments about the state as: regulator of family and “private” life, adjudicator of relations between racial and ethnic groups, manager of economic inequalities, insurer of security, and arbiter of the acceptable uses of violence and surveillance.

Class Format: This course will be taught remotely, in a quasi-tutorial style with students meeting with the instructor weekly in small discussion groups.

Requirements/Evaluation: Students will be responsible for writing three 5-page papers and three 2-page papers, and will also be asked to take responsibility for managing discussion and presenting work at different points in the semester.

Prerequisites: at least one class in American politics

Enrollment Limit: 12

Enrollment Preferences: Political Science majors

PSCI 310  (F) New York City Politics from the Blackout to Bloomberg  (WS)

Cross-listings: PSCI 310  LEAD 332  PSCI 332

Primary Cross-listing

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Cross-listings: LEAD 311 PSCI 311  

Primary Cross-listing

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

Class Format: For fall of 2020, this class will be remote, with twice weekly synchronous discussion sessions. A few brief lectures will be put up on Glow to review before the relevant class section. Class discussion will draw on student questions posted on Glow as well as the process of developing and conducting original research.

PSCI 312 (S) American Political Thought  

Cross-listings: LEAD 312 PSCI 312  

Primary Cross-listing

From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

PSCI 314  (S)  How Change Happens in American Politics  (WS)

Cross-listings:  LEAD 314  PSCI 314

Primary Cross-listing

Does the rise of Donald Trump signal something new in the U.S.? How unprecedented is the current political moment? What might we expect to come next? From the Founding to the present, the American political order has undergone incredible, cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that individual leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor demands, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

Class Format: research seminar

Requirements/Evaluation:  several short essays, weekly writing assignments, and a longer research paper with presentation

PSCI 315  (S)  Parties in American Politics

Cross-listings: LEAD 315  PSCI 315

Primary Cross-listing

Political parties have played a central role in extending democracy and organizing power in the United States, yet their worth is a continuing subject of debate. Parties have been celebrated for linking citizens to their government and providing the coherency and unity needed to govern in a political system of separated powers. Yet they have also been disparaged for inflaming divisions among people and grid-locking the government. Critics of the two-party system have castigated the major parties for failing to offer citizens meaningful choices; the Republican and Democratic parties are likened to a choice between "tweedledee and tweedledum." This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. How and why have the parties changed over time? Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? We will seek answers to these questions both in seminar discussion and through substantial independent research projects.

Requirements/Evaluation: weekly writing assignments, two 5-page papers, one 15- to 20-page paper, class presentation, and class participation

PSCI 316  (S)  Policy Making Process

Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does that mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as unusual" look like anyway? This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

Requirements/Evaluation: several short papers, research paper, class participation

Prerequisites: one course in PSCI or permission of instructor

PSCI 317 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Secondary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

PSCI 320  (F)  Heroes and Villains: Iconic Leadership and the Politics of Memory

Cross-listings:  PSCI 320  LEAD 320

Secondary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Requirements/Evaluation:  two short (5- to 6-page) essays and a 10- to 12-page research paper

Prerequisites:  previous course in Leadership Studies, or Political Science, or permission of instructor

PSCI 321  (F)  Immigration Politics in the U.S.

The U.S. Census Bureau estimates that non-Hispanic whites will no longer be the majority racial group in the U.S. by 2044. This demographic change is fueled by past and current immigration, and the politics surrounding American immigration policy have intensified as a result. Donald Trump's rise to the presidency was fueled in part by his pledge to build a wall between the U.S. and Mexico. Meanwhile, efforts to reform the nation's immigration laws have been stuck in gridlock for years. How did we get to this point and what does the future hold? Why is immigration policy so contentious? What is at stake, and what do different groups believe to be at stake? To answer these questions, we will examine immigration from a multidisciplinary lens, but with special attention to immigration politics and policy. We will examine the history of immigration to the U.S. and the policies that have shaped it; recent developments in electoral and protest politics; the policy initiatives of the Trump administration, the Republican Congress, and state and local governments; and the incorporation of immigrants into U.S. society and politics, past and present.

Requirements/Evaluation:  one 2- to 3-page paper; one 5- to 7-page paper; one oral presentation; one 15- to 20-page research paper; and class
**PSCI 323 (F) Law and Politics of the Sea**

The United Nations Convention on the Law of the Sea gathered into one place what most countries considered in 1982 to be scattered ancient laws about piracy, transit through other countries' territorial waters, jurisdiction over ships, and so forth. It also created ocean zones, with rules for each, and proposed a system for taxing firms that it licensed to exploit minerals on the high seas. This course explores the politics and practices that arise from UNCLOS. We first engage with the treaty's content and exclusions, next examine the incentives it provides states and criminals, and last assess the way that geopolitical and climate change create new opportunities and constraints for states, firms, international organizations, and activists. Cases include piracy, claims in the South China Sea, bonded labor, refugee quarantine, Arctic transit, and ocean pollution.

**PSCI 330 (S) American Political Thought in Hemispheric Context**

**Cross-listings:** PSCI 330 GBST 330

Primary Cross-listing
Actors living during the Age of Revolutions witnessed an astounding number of social, political, and cultural changes. In the short period between 1775 and 1830 virtually the entire American hemisphere collectivized through insurgency movements that aimed to subvert colonial power through radical republican language. In this course we contend with the hemispheric components of the revolutionary period and the importance of Pan-American discourse at subnational, national, and international levels of politics. We trace the comparative features of American post-colonial projects by emphasizing the importance of indigenized, raced, gendered, and ethnicized imaginaries for establishing unity across colonial spaces. The end goal is to reconstruct the boundaries of American Political Thought through a similarly comparative approach that remains attune to the malleability of national boundaries, nationalities, collective histories, and international communities of the period. This course divides the development of early modern American thinking into two waves of political thought. First, the insurgency period of the mid 18th and early 19th centuries in which debates on colonial subjection frame the ends of post-colonial change. Second, in the late 19th and early 20th century when nascent American states shift toward questions of institutional design, social inequalities, and civic protections in the post-independence context. Readings may include primary works by early modern thinkers of the Americas like Simon Bolivar, James Madison, and Fray Servando Teresa de Mier. Contemporary work on republicanism, nationalism, and citizenship by theorists like Benedict Anderson, Hannah Arendt, Partha Chatterjee, and others, will provide frameworks for our discussion. Students will also engage with archival materials that better illustrate the lives of indigenous actors, slaves, mulattos, mestizos, and creoles living in the Americas.

Requirements/Evaluation: Regular attendance, consistent class participation, three Glow posts, three two-page reflection papers, and a final research paper of 10-12 pages

Prerequisites: At least one prior course in political theory, social theory, history of the Americas (either the United States or Latin America), or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Concentrators in political theory in Political Science, then majors or concentrators in Political Science, American Studies, Global Studies, and Latino/a Studies

PSCI 332 (S) The Body as Property (DPE)

From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan "my body, my choice"; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Prerequisites: prior coursework in political theory, cultural theory, philosophy or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Political Science majors with a concentration in Political Theory, then other Political Science majors

Expected Class Size: 10
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course fulfills the Difference, Power, and Equity (DPE) requirement by examining how, in the context of legally-sanctioned power relations, bodily differences are constructed, monetized, and used to generate wealth. Race, class, and gender inequalities are central to the analysis.

PSCI 334 (S) Theorizing Global Justice
While economic exchanges, cultural convergence, and technological innovations have brought people in different parts of the world closer together than ever before, globalization has also amplified differences in material wealth and social inequalities. Ill health, inadequate sanitation, and lack of access to safe drinking water are increasingly common. Yet, more than ever before, the means exist in affluent regions of the world to alleviate the worst forms of suffering and enhance the well-being of the poorest people. How are we to understand this contradiction as a matter of justice? What is the relationship between justice and equality, and what do we owe one another in a deeply divided world? Course readings will engage your thinking on the central debates in moral philosophy, normative approaches to international political economy, and grassroots efforts to secure justice for women and other severely disadvantaged groups. Key theorists include Amartya Sen, Martha Nussbaum, John Rawls, Thomas Pogge, Nancy Fraser, Paul Farmer, Vandana Shiva, Majid Rahnema, and Enrique Dussel.

Class Format: discussion
Requirements/Evaluation: oral presentation, weekly blog posts, and three papers (3 pages, 7 pages and 8-10 pages)

PSCI 335 (F) Racial Equity, Liberal Democracy, and Democratic Theory (DPE)
In Ta-Nehisi Coates' best-selling book Between the World and Me, he says that in the wake of the non-indictment of former police officer Darren Wilson in the death of Michael Brown "I did not tell [my son] that it would be okay, because I have never believed it would be okay." With admissions like this, Coates stoked a long-standing debate about the prospects for racial equity in liberal democracies like the United States. In this course, we look at this debate, examining what black thinkers in particular have said about whether racial equity can be achieved in a liberal democracy founded on racial domination and why they come to the conclusions they do. Then, we examine what contemporary democratic theorists have had to say about how racial equity might be achieved and how they have sought to advance this goal through their writing. Can the strategies theorists propose and employ really aid in the advancement of racial equity? Which are more and less promising? We end by asking: Do anti-democratic means have to be employed to fully realize democracy? What anti-democratic means? Authors we will engage include Coates, bell hooks, Charles Mills, Melvin Rogers, Chris Lebron, Lawrie Balfour, and Danielle Allen.

Requirements/Evaluation: class facilitation, group reflections (three 4-page responses), book review (6-8 pages), final essay (12-14 pages)
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Political Science majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This class centers sociological and political theoretical questions about race inequity and equity in a liberal democratic society. It features black writers' perspectives on inequity and equity. The course nurtures the skill of speaking across difference by requiring students to write responses as groups and encouraging deep student participation by making students class facilitators.

PSCI 337 (S) Visual Politics

Cross-listings: PSCI 337 ARTH 337

Primary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, cognitive science, and STS. Possible authors include Arendt, Bal, Beltling, Benjamin, Browne, Buck-Morss, Butler, Clark, Connolly, Crary, Deleuze, Fanon, Foucault, Freedberg, Garland-Thompson, Hobbes, Kittler, Machiavelli, Mercer, Mitchell, Mulvey, Plato, Rancière, Sartre, Virilio, Warburg, and Zeki.

Requirements/Evaluation: regular, engaged class participation, several Glow posts, and three 7- to 8-page papers

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

Expected Class Size: 19

PSCI 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: PSCI 339 JWST 339

Primary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through—and reflected deeply on—two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the
contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

Requirements/Evaluation: five 5-page papers; five 2-page responses; a final revision of a prior paper; participation

Prerequisites: a prior course in political theory, philosophy, or critical theory, or permission of the instructor

Enrollment Limit: 10

PSCI 340 (S) Why States Fail

This course considers the origins of political violence and state failure at the end of the 20th century. It seeks to address why there was a resurgence of political violence at the dawn of the 21st century. Toward that end, we begin by considering competing explanations of political violence (ethnicity, democratization, natural-resource endowments, and predatory elites). We then move on to the empirical section of the course in which we cover case studies of state failure in parts of Eastern Europe, Africa and the Middle East.

Class Format: discussion

Requirements/Evaluation: seminar participation, two oral presentations and a research paper proposal

Prerequisites: one of the following: PSCI 201, 202, 203, 204, 229, 243, 250, 254 or the permission of instructor

PSCI 342 (S) Beyond the welfare state

"Not me. Us" became a rallying cry of Bernie Sanders' presidential campaign in late 2019. Sanders' slogan reflects a vision of a robust welfare state, defined by a widespread commitment to solidarity, where citizens share social risks as well as economic rewards. But what role can the welfare state play in the twenty-first century? How have its constitutive institutions, from pensions to unemployment insurance, evolved since the post-war "Golden Age"? Is solidarity still possible? This course identifies the political conditions under which welfare states developed in the twentieth century, and examines how they have responded to globalization, immigration, digital transformation, and other contemporary challenges. If the welfare state has a future, it will look different from the past, but how? Taking up a handful of alternative paradigms, from social investment to mutual aid, we will assess different trajectories of solidarity in the twenty-first century.

PSCI 343 (F) Democratic Erosion

Cross-listings: GBST 342  PSCI 343

Primary Cross-listing

A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is not intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage, critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

Class Format: As a hybrid course, the class will feature both in-person and online components. I will post 1-2 short lectures on GLOW to accompany assigned readings/media for the week. Our scheduled course time will be a mix of discussions, interactive learning exercises, and presentations. At least one class per week will be held in-person; whether the other class will be online or in-person will depend on a number of factors, including the distribution of students taking the course on campus or remotely.

Requirements/Evaluation: Active Class Participation, 3 Short Response Papers, Country Case Study (15-20 pages, written incrementally throughout semester) and Presentation.

Prerequisites: Prior coursework in political science or permission of instructor.

PSCI 345 (S) The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings: PSCI 345  ASST 345

Primary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the
meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yi Jing, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.

Class Format: discussion

Requirements/Evaluation: two 5-page papers and one 15-page paper

PSCI 348 (S) The Black Radical Tradition

Cross-listings: PSCI 348 AFR 348 LEAD 348

Secondary Cross-listing

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and
humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Requirements/Evaluation: attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class
Prerequisites: none; open to all

PSCI 349  (S)  Cuba and the United States  (WS)
With the passing of the Castro brothers' regime on the horizon, we examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. It begins with the political economy of the colony, then covers the Cuba- US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual orientation; social programs; political institutions; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week
Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class
Prerequisites: any course on Latin America or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Political Science majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, professor meets with them individually to discuss the composition and presentation of each genre.

PSCI 351  (S)  The New Left and Neoliberalism in Latin America  (DPE)
Cross-listings: PSCI 351 GBST 351
Primary Cross-listing
Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.
Class Format: discussion then seminar

Requirements/Evaluation: three short essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

PSCI 352 (F) Politics in Mexico (DPE)

Cross-listings: GBST 352 PSCI 352

Primary Cross-listing

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.

Class Format: lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

Requirements/Evaluation: map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

Prerequisites: some knowledge of Mexican history

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and seniors

PSCI 356  (S)  Leadership in American Political Development

Cross-listings:  PSCI 356  LEAD 350

Secondary Cross-listing
Major change in American politics takes place when an old political order collapses and a new one emerges to replace it, sometimes through violent struggle. Before the Civil War and Reconstruction, for example, states enjoyed autonomy over most areas of politics—including whether or not to maintain slavery. Afterwards, the Federal Government began to assert itself vis-á-vis civil rights and liberties in ways it had never previously done. Relatedly, before the Great Depression, state government basically managed their own economies; but the New Deal gave the federal government power to create and manage a new, national economy. What are the deep sources of these architectonic changes? Who or what is responsible for them? And what is the best way to study them? This course will survey the alternative and competing ways in which leading thinkers and scholars answer these questions. Some argue that dynamic individuals—such as Lincoln and Franklin Roosevelt—drive political change, and that change would not happen without such leaders. Others contend that these so-called "leaders" are themselves mere bi-products of impersonal forces, such as party realignments, critical elections, and social, economic, and technological changes. Our goal will be to understand these theories on their own terms, and then to evaluate them with reference to some case studies from American history. To this end, we will study theoretical writings but we will also read selections from histories and biographies that draw a more intimate, nuanced picture of the leaders, groups, and personalities involved in America's most transformative political moments.

Requirements/Evaluation:  several short essays, weekly writing assignments, and a longer research paper with presentation.

PSCI 360 (S) Right-Wing Populism (WS)
After the fall of the Berlin Wall in 1989, the political scientist Francis Fukuyama famously declared "the end of history". From now on only liberal democracy, free market capitalism, and global integration had a future. Everything else—including political ideology, nationalism, conservative religion, and sovereignty—was consigned to the ash heap. Thirty years later the future looks seriously derailed. A right-wing populism marked by Brexit, Trump, Le Pen, and a host of 'far-right' political movements in the very heartland of democratic globalizing capitalism has shaken liberal certainties. This course is an investigation into contemporary right-wing populism in Europe and North America in its social, economic, and political context. We will discuss theories of right-wing populism's appeal from both Left and Right perspectives. We will also investigate several cases of right-wing populism including France's National Front, Sweden's Swedish Democrats, Hungary's Fidesz and Jobbik, Poland's Law and Justice Party, as well as Donald Trump and the American alt-right. Finally we will entertain right-wing populism as both a cause and a symptom of a crisis in liberal democracy.

Requirements/Evaluation: two short papers; one major research paper written in steps; discussion questions; class participation

Prerequisites: one course in comparative politics or social theory; or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Political Science majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write three papers, one being a major research paper in steps over the second half of the semester on a topic of their choice related to contemporary right-wing populism, 6000-8000 words including notes and bibliography. Steps include: research question; annotated bibliography; thesis paragraph; detailed paper outline; first draft; final paper. Instructor feedback at each stage of the writing process on structure, style, and argumentation. Peer feedback on draft.

PSCI 369 (S) The Crisis of Leadership

Cross-listings: PSCI 369  LEAD 369

Secondary Cross-listing

It is now a commonplace that the liberal democracies of Europe and North America (and beyond) are facing a "crisis of leadership." In country after country, champions of cosmopolitan values and moderate reform are struggling to build sufficient popular support for their programs. These failures have created space for a politics of populism, ethno-nationalism, and resentment—an "anti-leadership insurgency" which, paradoxically, has catapulted charismatic (their critics would say demagogic) leaders to the highest offices of some of the largest nations on earth. In this course, we will seek to understand the challenges liberal, cosmopolitan leadership has encountered in the 21st century and the reasons why populist, nationalist leadership has proven resurgent. We will begin by examining institutional constraints facing political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment. Then we will look at some important factors which shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. Our primary questions will be these: Why is transformative leadership so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world?

Requirements/Evaluation: class participation, regular response papers, research proposal, research paper; this is a research course; the primary written assignment will be a research paper which students will develop over the course of the semester

PSCI 375  (S)  Modern Jewish Political Theory

Cross-listings: JWST 492  PSCI 375  REL 330

Secondary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

PSCI 376  (F)  Angela Davis: Political Theory, Activism, and Alliances  (DPE) (WS)

Cross-listings: LEAD 319  PSCI 376  INTR 320

Secondary Cross-listing
This seminar examines the political thought, activism, and iconography of abolitionist Angela Davis. The seminar involves a critical engagement with the philosopher, former political prisoner, and their relationship with other theorists, authors and activists. Readings include: *Angela Davis: An Autobiography; Soledad Brother: The Prison Letters of George Jackson; The Morning Breaks: The Trial of Angela Davis; Women, Race, and Class; If They Come in the Morning*.

**Requirements/Evaluation:** Requirements: students attend each seminar class and come prepared to discuss the readings. Papers are due by email 24 hours before the seminar begins.

**Prerequisites:** Preferences: Juniors and Seniors who have taken courses in Africana Studies, American Studies, Political Science, Philosophy.

**Enrollment Limit:** 19

**Enrollment Preferences:** Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

- LEAD 319 (D2)
- PSCI 376 (D2)
- INTR 320 (D2)

**Writing Skills Notes:** Three thesis papers at five pages each will receive critical feedback from the professor; one of the three papers will be revised with critical feedback from professor and peers, accompanied by a one-page statement explaining student's revisions; one keyword glossary where students define their key terms used in the paper; one roundtable discussion based on the final paper.

**Difference, Power, and Equity Notes:** This course examines political activism in the 1960s-1970s during the Cold War in which the civil rights, black power and student anti-war movements challenged traditional US domestic and foreign policies. Examining the differential powers of university Regents, governors, presidents, and police forces and prison administrations in relation to social justice movements led by people under the age of thirty, we examine the structures of institutional power and the agency of cadre theorists.

**PSCI 382 (F) The Politics of Migration: Citizen, Immigrant, Alien, Refugee (DPE)**

Currently 272 million international migrants live in a country different from where they were born, an increase of 78% since 1990. What are the social, economic, and political consequences of unprecedented global mobility in both destination countries and countries of origin? This class investigates one of the most polarizing and relevant issues of our time: the politics of migration. Throughout the semester we interrogate four themes central to migration politics: rights, representation, access, and agency. The course is organized with a focus on status: which "categories" of people (i.e. citizens, migrants, refugees) have differential access to rights, services, and representation and why. Drawing on political speeches, documentary films, humanitarian campaigns, and a variety of academic texts, we critically analyze how those categories are constructed, as well as the political work they do in making claims, justifying policies, and shaping public opinion. The class situates contemporary US migration policies within a global context and over time, placing the US case in conversation with considerations of migration politics and policies in countries around the world. As an experiential education course, we will (virtually) attend a US naturalization ceremony as well as interview officials from organizations working with migrants and refugees here and abroad.

**Class Format:** As a hybrid course, the class will feature both in-person and online components. I will post 1-2 short lectures on GLOW to accompany assigned readings/media for the week. Our scheduled course time will be a mix of discussions, interactive learning exercises, and presentations. At least one class per week will be held in-person; whether the other class will be online or in-person will depend on a number of factors, including the distribution of students taking the course on campus or remotely.

**Requirements/Evaluation:** Active class participation, 3 short papers (3 pages each), policy project (8-10 pages), and presentation.

**Prerequisites:** Prior course work in political science or global studies.

**Enrollment Limit:** 12

**Enrollment Preferences:** Political Science majors, Global Studies Concentrators.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option
**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines the politics of migration with a focus on the power inherent within particular categorizations of people in relation to the state (i.e. citizens, migrants, aliens, refugees). We compare policies shaping the lives of migrants around the world, with particular considerations of how race, gender, age, and religion shape migration experiences (and migration policy). We focus on rights, access, and migrant agency throughout the course.

Fall 2020

SEM Section: H1    MR 3:15 pm - 4:30 pm    Elizabeth Iams Wellman

**PSCI 386** (F) **Identity Politics: Conflicts in Bosnia, Israel-Palestine, Northern Ireland, & South Africa**

Identities have been either the stakes, or the guise taken by other kinds of conflicts, in Bosnia, Israel-Palestine, Northern Ireland, and South Africa for centuries. They have led to, or expressed, political divisions, clashing loyalties, and persistent and sometimes consuming violence. They also have produced attempts by both internal and external actors to resolve the issues. This research seminar will engage the origins of the conflicts and the role of identities in them, the role of disputes about sovereign power in creating and intensifying them, the strategies for reconciling them that are adopted domestically and internationally, the deals that have been struck or have not been struck to bring peace in these societies, and the outcomes of the various efforts in their contemporary politics. The course will begin by reading about both the general theoretical issues raised by conflicts in these "divided societies" and various responses to them. After familiarizing ourselves with what academic and policy literatures have to say about them, we then will read about the histories and contemporary politics in each society. With that as background, students will choose an aspect or aspects of these conflicts as a subject for their individual research.

**Requirements/Evaluation:** 2 10-12-page papers

**Prerequisites:** Political Science majors

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors or permission of instructor

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**PSCI 388** (S) **Comparative Political Economy**

**Cross-listings:** PSCI 388  POEC 388

**Primary Cross-listing**

This tutorial considers the relationships between broad economic structures and political institutions in the modern world. We consider why and how is it that the expansion of capitalism led to the birth of democracy in some countries, but dictatorships in others? What, if any, is the relationship between economic development and the organization of power (regime type)? Does economic development lead to the spread of democracy? Or are economic crises the key to understanding the conditions under which dictatorships fall? Finally, has the emergence of a neoliberal economic order affected the organization of political society?

**Class Format:** Hybrid taught in tutorial-style format

**Requirements/Evaluation:** class participation, 4 tutorial-style papers, 6 response papers, 1 revised paper

**Prerequisites:** PSCI 201-04 or permission of the instructor

**PSCI 410 (S) Senior Seminar in American Politics: The Politics of Belonging**

Although many people have described America as inclusive, political debates about belonging have often been contentious and hard-fought. This seminar will focus on the politics of belonging in America. What does it mean to be an American? If the U.S. is a nation of immigrants, why is immigration reform so difficult to achieve? Are legal citizenship and formal political rights sufficient for belonging? Or does full inclusion rest on the ability to exercise civil and social rights as well? Does income inequality threaten the political equality necessary for a strong democracy? As we examine the debates over inclusion, we will consider different views about the relationship among political, civil, and social rights as well as different interpretations of American identity, politics, and democracy.

**Requirements/Evaluation:** class participation, short weekly writing assignments, two short papers, a 20-page research paper and presentation

**Prerequisites:** at least one course in American politics

**Enrollment Limit:** 14

**Enrollment Preferences:** senior Political Science majors with American Politics concentration

PSCI 412  (F)  Senior Seminar: Interpretations of American Politics

American politics are in upheaval, and most Americans believe the country to be headed down "the wrong track." Yet assessments of what is at the heart of the country's problems vary. Critics on the left worry that the United States in 2016 elected a proto-fascist who will consolidate white nationalist power and corporate rule. Critics on the right worry that the U.S. has abandoned the Anglo-Protestant traditions that made it strong and has entered a period of moral decay and decline. What are we to make of these different assessments? What do left and right see when they survey the nation, and why is what they see so different? Any diagnosis of contemporary maladies is premised on a vision of what a healthy functioning republic looks like. Our task in the seminar is to uncover and interrogate those visions. We will do this by exploring different interpretations of American politics, each with its own story of narrative tensions and possible resolutions. We will then use our investigation of how different authors, and different traditions, understand the nation to help us assess contemporary politics and come to our own conclusions about what animates them.

Requirements/Evaluation: brief weekly writing assignments; two short essays; one longer paper; and oral presentation
Prerequisites: at least one course in American politics
Enrollment Limit: 10
Enrollment Preferences: senior Political Science majors
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option

PSCI 413  (F)  Senior Seminar in American Politics: Polarized America

With red states and blue states, partisan divisions in Congress, and even disputes about wearing masks to protect against the coronavirus, few question the fact of a polarized America. But what is the polarization about and what caused it? Is it manufactured by a political elite using the rules of the game to maintain power while ignoring the concerns of the people? Is it a capitalist strategy to divide the public in order to advance the interests of the wealthy corporate elite? Does it reflect a polity divided by racial and ethnic tensions with different visions of the nation's past and future? Does it reflect increased inequality in a fast-changing global economy? How can a government of separated institutions operate and come to collective decisions given this discord? Can the framers' vision of deliberative, representative government meet the challenges of a polarized polity?

Class Format: For fall of 2020, this course will be remote, with twice weekly online discussions. Students will submit discussion questions through Glow and those will be used to set the agenda for our conversations. Each student will be responsible for planning and leading one class meeting.
Requirements/Evaluation: class participation, weekly writing assignments, two short papers, final project
Prerequisites: At least one course in American politics
Enrollment Limit: 12
Enrollment Preferences: Seniors majoring in political science with concentration in American politics

Fall 2020
PSCI 420 (F) Senior Seminar: The Nuclear Revolution

Cross-listings: LEAD 420 PSCI 420

Primary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. Classes will be taught remotely. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Class Format: This course will be taught remotely. All class discussions will be synchronous.

Requirements/Evaluation: class participation, three 8- to 10-page papers

Prerequisites: PSCI 202

Enrollment Limit: 15

Enrollment Preferences: Political Science major seniors with an International Relations concentration

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

PSCI 421 (S) Senior Seminar: The Liberal Project in International Relations

Cross-listings: PSCI 441 PSCI 421

Primary Cross-listing

The most powerful actors in the international system are liberal ones, and a liberal project around democratic states, international law and organizations, and free trade dominates the global agenda. This course is an investigation into this liberal international relations project, engaging both theory and practice. We will discuss signature liberal theorists both classic and current as well as some of their most notable critics. We will also attend to empirical evaluations of signature liberal efforts around democratization, human rights, and economic development. The course ends with a discussion of the successes and failures of the European Union as the principal embodiment of the liberal project in international relations.

Requirements/Evaluation: 2-4 papers of 5-7 pages, several short oral presentations, daily discussion questions, 12-15 page final paper, class participation

Prerequisites: senior Political Science major or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: senior Political Science majors concentrating in International Relations or Comparative Politics

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 422 (S) Senior Seminar in Human Rights in International Politics and Law

Cross-listings: JLST 403  PSCI 420  PSCI 422

Primary Cross-listing

The idea that all humans have rights simply because they are human-independent of anything they might do or achieve-has transformed local and international politics, probably permanently. This concept's place in international politics, its strengths and limitations, depend on how people use it. Beginning with the 18th-century's transatlantic movement to abolish slavery, we will examine international movements and institutions that have affected what human rights mean, to whom, and where. Readings draw on philosophy, history, sociology, and international relations, but as a political science class we emphasize politics. Who benefits from the idea of universal human rights? Who loses? How does this idea about individual value liberate and entrap? Does this idea ultimately reinforce American hegemony, or plant the seeds of a non-American order?

Requirements/Evaluation: three lead essays, three critique essays, and one final essay

PSCI 423 (S) Humanitarianism as Ideology and Strategy

Since the mid-1980s, humanitarianism has been one dominant way that powerful countries, organizations and people have approached disaster elsewhere. Humanitarianism aims at immediate rescue, striving to keep people alive until some solution can be found. It aims not to address crises' causes nor to assist with solutions--which it considers political--just to keep human bodies alive. Critics contend that humanitarianism produces harm, providing structural incentives for people to do more or less than they need to, and that it deepens and restructures inequality between subjects and objects. They contend also that it justifies the way of things. This course confronts humanitarianism through reading its defenders and critics, by looking at accounts by individuals and organizations, and by assessing its usefulness as an international political strategy from realist, liberal, materialist, and constructivist points of view.

Class Format: three students start class discussion every day; one reads a short (4-page) essay and two read shorter (two-page) essays

Requirements/Evaluation: three longer essays, six shorter essays, constructive participation

Prerequisites: PSCI 202 and at least one elective in international relations

Enrollment Limit: 18

Enrollment Preferences: Political science seniors then juniors; other seniors, then juniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

PSCI 431 Senior Seminar in Political Theory: Rethinking the Political

What is politics? The question, an important part of political theory at least since Socrates, has taken on renewed significance in recent years, as theorists have sought to rethink the political in response to twentieth century dictatorships and world wars; feminist, queer, anti-racist, post- and decolonial struggles; the transformations wrought by neoliberal globalization; the emergence of "algorithmic governance"; the recent resurgence of populist nationalism; and deepening recognition of climate crises. This seminar engages some of the major attempts at rethinking produced in the 20th and 21st centuries, particularly at those that, characterizing liberalism as masking structures of subordination and elements of conflict in political life, undervaluing the importance of citizen action and public space, or being ill-suited to altered technological and ecological conditions, seek to rework or move beyond it. In addition to those who argue for an expanded and emancipatory conception of politics, we will consider arguments against politics as primary path to improvement or focus of commitment. Authors read may include Schmitt, Strauss, Rawls, Arendt, Wolin, Rancière, Brown, Connolly, Hartman, Sharpe, Moten, Wynter, Sexton, Edelman, Muñoz, Couthard, Simpson, Lazzarato, Haraway, Latour.

Requirements/Evaluation: Regular, engaged class participation; short Glow posts; one 6-8 page paper; one 10-12 page paper

Prerequisites: Junior or senior standing and two or more theory courses or consent of instructor. Non-majors with theory interests and backgrounds are welcome

Enrollment Limit: 15

Enrollment Preferences: Juniors and seniors concentrating in political theory

Expected Class Size: 11

Grading:

Distributions: (D2)

Attributes: PSCI Political Theory Courses

Not offered current academic year

PSCI 432 (S) Senior Seminar: Critical Theory

This course takes a critical look at the nexus of money and political power in the United States and world politics, using the concept of "racket society" to guide our inquiry. The theory of "rackets" was first put forward by Frankfurt School theorists in the 1940s as a way of analyzing linkages among organized crime, cartels, monopolies, corporate interests, and political institutions. Their project, which we will recreate in this course, was to trace the effects of the adaptation of the legal system (and other state institutions) to the conglomeration of capital and the concentration of wealth in a few hands. The flow of money offers insights into these deeper trends. Course readings begin with the work of Max Horkheimer, Theodor Adorno, Franz Neumann, Friedrich Pollock, and Herbert Marcuse, paying special attention to their discussion of the anti-democratic effects of money on political institutions. We will also look carefully at their critique of legal frameworks that protect the wealthy while criminalizing the poor. Although these concerns were not exclusive to the Frankfurt School, the approach they took had some unique features. Having fled Nazi Germany and re-established their research institute in exile the United States, Horkheimer and his colleagues brought an outsider-insider perspective to the problem. Among our questions are the following: How did the intellectual heritage of the Frankfurt School and their experiences in Germany shape their analysis of racket society in 1940s America? Does the theory of rackets still have analytical power today? Given the massive expansion of the U.S. economy and the role of transnational capital in driving economic globalization in recent decades, what insights might the early Frankfurt School offer critics of anti-democratic tendencies in world politics today?

Requirements/Evaluation: regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay

Winter Study ---------------------------------------------------------------

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits
This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

Grading: pass/fail only

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

Not offered current academic year

PSCI 30 (W) Senior Essay: Political Science
Political Science senior essay.

Class Format: senior essay

Grading: pass/fail only

Not offered current academic year

PSCI 31 (W) Senior Thesis: Political Science
To be taken by students registered for Political Science 493-494.
**PSCI 32 (W) Individual Project: Political Science**
To be taken by students registered for Political Science 495 or 496.

**Class Format:** independent study
**Grading:** pass/fail only

Not offered current academic year

**PSCI 33 (W) Advanced Study in American Politics**

**Class Format:** independent study
**Grading:** pass/fail only

Not offered current academic year

**PSCI 99 (W) Independent Study: Political Science**
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study
**Grading:** pass/fail only

Not offered current academic year
PSYCHOLOGY

(Div II, with some exceptions as noted in course descriptions)

Chair: Professor Noah Sandstrom

- Victor A. Cazares, Assistant Professor of Psychology; affiliated with: Neuroscience Program
- Jeremy D. Cone, Assistant Professor of Psychology
- Eliza L Congdon, Assistant Professor of Psychology
- Susan L. Engel, Senior Lecturer in Psychology, The Class of 1959 Director of Program in Teaching; on leave Spring 2021
- Steven Fein, Professor of Psychology
- Amie A. Hane, Professor of Psychology, Chair of Public Health; affiliated with: Public Health Program, Neuroscience Program; on leave Spring 2021
- Nicole T. Harrington, Visiting Assistant Professor of Psychology
- Laurie Heatherington, Edward Dorr Griffin Professor of Psychology
- Kris N. Kirby, Professor of Psychology
- Nate Kornell, Associate Professor of Psychology; on leave 2020-2021
- Shivon A. Robinson, Assistant Professor of Psychology; affiliated with: Neuroscience Program
- Marlene J. Sandstrom, Dean of the College, Hales Professor of Psychology; affiliated with: Psychology Department
- Noah J. Sandstrom, Chair and Professor of Psychology; affiliated with: Neuroscience Program
- Kenneth K. Savitsky, Professor of Psychology
- Jeremy C Simon, Visiting Assistant Professor of Psychology
- Stephanie J. Steele, Visiting Assistant Professor of Psychology
- Catherine B. Stroud, Associate Professor of Psychology
- Safa R. Zaki, Dean of the Faculty, Professor of Psychology; affiliated with: Psychology Department

MAJOR

For the degree in Psychology, students must complete a minimum of nine courses as outlined below:

PSYC 101 Introductory Psychology
PSYC 201 Experimentation and Statistics

Three 200-level courses from the list below:

- COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
- NSCI 201/BIOL 212/PSYC 212 Neuroscience
- PSYC 221 Cognitive Psychology
- PSYC 232 Developmental Psychology
- PSYC 242 Social Psychology
- PSYC 252 Psychological Disorders
- PSYC 272 Psychology of Education

Either PSYC 221 or 222, but not both, can count towards the three required 200-level courses.

Three 300-level courses from at least two of the areas listed below:

- Area 1: Behavioral Neuroscience (courses with middle digit 1)
Area 2: Cognitive Psychology (courses with middle digit 2)

Area 3: Developmental Psychology (courses with middle digit 3)

Area 4: Social Psychology (courses with middle digit 4)

Area 5: Clinical Psychology (courses with middle digit 5)

Area 6: Other/Interdisciplinary Psychology (courses with middle digit 6)

Area 7: Educational Psychology (courses with middle digit 7)

At least one of these courses must be from among those carrying the format designation Empirical Lab Course.

One 400-level Psychology course.

Students who place out of Psychology 101 are still required to take nine courses to complete the major.

The department recommends that students take Psychology 201 in their sophomore year. The department requires that 201 be completed by the end of the junior year.

**COURSE NUMBERING RATIONALE**

As is the case in all departments, the first digit of a Psychology course number indicates the relative level of the course. Where appropriate, the second digit corresponds to the Areas listed above.

**THE DEGREE WITH HONORS IN PSYCHOLOGY**

Students who are candidates for honors need take only two 300-level courses from two different areas, but they must enroll in Psychology 493-W31-494 and write a thesis based on original empirical work. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Guidelines for pursuing the degree with honors are available from the department.

**STUDY ABROAD**

With some advance planning, studying abroad (especially for one semester) can easily be worked into the psychology major. To facilitate this, we recommend that students:

- Meet with the Study Abroad advisor as soon as they decide that they are interested in studying abroad.
- Take PSYC 201 (Experimentation and Statistics) in the sophomore year.

Think ahead to the 300-level courses they are interested in taking so that they can fulfill the 200-level prerequisites before they go away or, if possible, while they are away. In our experience, study abroad programs in the following places are most likely to offer psychology courses: England, Ireland, Scotland, Spain, Australia, New Zealand, Hawaii, and Scandinavia. Students should procure the descriptions of the psychology courses they are considering taking and bring them to their meeting with the advisor.

There are some costs to studying away, particularly for the year. This limits students’ opportunity to choose the particular 300-level courses they would like to take and they must sometimes settle for those that are open, those which happen to be offered, or those for which they have the prerequisites, once they return in their senior year. Many students who are keen on psychology begin doing research with professors during their junior year, and for some this leads to an honors thesis in the senior year, summer research, etc. If you are going away for the entire year and do not make such connections with a professor ahead of time (i.e., before you go), you may lose out on some of these opportunities to deepen your involvement in the major on campus. On the other hand, studying abroad can be an invaluable learning experience, so you need to think carefully, in consultation with your advisor and/or the Study Abroad advisor, about the costs and benefits of it. Very occasionally, a student who just begins taking psychology courses late in the sophomore year and wishes to go abroad for the year finds that they are not able to do both, or is restricted in the choice of study-abroad programs.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. In addition, the course content cannot overlap substantially with material already taken at Williams.
Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students are required to take at least one empirical project course (which includes a lab component and data collection). This must be completed at Williams.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. The empirical project course must be completed here (see answer to previous question above). Other major requirements that must be completed here are the Senior Seminar and our Statistics and Experimentation course (PSYC 201). On very rare occasions students have been given credit for PSYC 201 taken elsewhere, but this is extremely unlikely. Most institutions break the material up into two different courses, or don’t include all of the components that we feel are an important foundation for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students should be sure that have taken PSYC 201 PRIOR to their senior year at the latest. It is best to take it during sophomore year whenever possible.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

There have been instances.

**PSYC 101** *(F)(S) Introductory Psychology*

An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

**Class Format:** The lectures will be done remotely. There will also be opportunities for small group sessions for labs and/or discussion sections. These will be scheduled at a variety of times to accommodate student schedules. Some of these labs/sections will be remote, but we are hoping that some may have an in-person element.

**Requirements/Evaluation:** five unit quizzes, a final exam, and two brief lab reports (or related brief reports, depending on the availability of labs)

**Prerequisites:** none

**Enrollment Limit:** 160

**Expected Class Size:** 160

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** NSCI Required Courses  TEAC Teaching Sequence Courses

Fall 2020

LEC Section: R1  MWF 10:40 am - 11:30 am  Steven Fein, Clarence J. Gillig

Spring 2021

LEC Section: 01  TBA  Kris N. Kirby

**PSYC 127** *(F) The Psychology of Success*

This course will examine the psychology of success from a scientific perspective. After considering what success means, we will examine two broad influences on success: personality (e.g., intelligence, grit, and mental illness) and environment (e.g., schooling, parenting, and practice). Other topics will include how discrimination affects success, cross-cultural differences in how children are cared for, and the self-help industry.

**Requirements/Evaluation:** written work and discussion of that work; a five page paper will be due every other week

**Prerequisites:** none
Enrollment Limit: 10
Enrollment Preferences: highest priority will be given to incoming first-years followed by rising sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Not offered current academic year

**PSYC 158 (S) Freud: A Tutorial** (WS)

**Cross-listings:** HIST 485 PSYC 158

**Secondary Cross-listing**

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, “Analysis Terminable and Interminable.” In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was “right” or “wrong” or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

**Class Format:** students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

**Requirements/Evaluation:** student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

**Prerequisites:** none

**Enrollment Limit:** 10

**Expected Class Size:** 10
Grading: no pass/fail option, no fifth course option

**Unit Notes:** fulfills History's 400-level graduation requirement

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**HIST 485 (D2) PSYC 158 (D2)**

**Writing Skills Notes:** As a tutorial, this course is by definition writing skills, both in terms of the number of papers that students will produce (six) and in terms of the focus on writing during every tutorial session. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**PSYC 161 (F) Nonviolence and Positive Psychology**

In this course we will explore the theory and practice of nonviolence in the context of research in Positive Psychology. Nonviolence means choosing not to threaten or injure others, and its practice requires cultivating personal qualities that enable such a choice. Positive Psychology refers to the scientific study of those qualities that enable people to live happy and fulfilling lives. We will begin by studying the history and moral theories of nonviolence. We will then evaluate the claims of those theories regarding the positive effects of nonviolence by discussing research on psychological benefits to the practitioner, attitude change in the adversary, and effects on the larger community. Topics will include self-control, empathy,
forgiveness, tolerance, aggression, resisting violent assault, civil disobedience, and courage. Along the way we will introduce basic concepts in research design and interpretation of data to help us evaluate the research with a critical eye. This course is a part of a joint program between Williams’ Center for Learning in Action and the Berkshire County Jail, in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Classes will be held at the jail, with transportation provided by the college. * Please note the atypical class hours, Tuesday, 4:45-8:30 pm.

Requirements/Evaluation: class attendance and participation, short essays, and a final paper
Prerequisites: not open to first-year students
Enrollment Limit: 9
Enrollment Preferences: selection will be based on student interviews
Expected Class Size: 9
Grading: yes pass/fail option, no fifth course option
Unit Notes: this class will include 9 Williams students and 9 inmates
Distributions: (D2)
Attributes: PSYC Area 6 - Other/Interdisciplinary Psychology

PSYC 201  (F)(S)  Experimentation and Statistics  (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis.

Class Format: Prof. Savitsky's section will be taught remotely. Synchronous lectures and lab meetings will be recorded for those who can't attend but synchronous participation is preferred, especially in lab. In Prof. Cone's section, many lectures will be held via synchronous, remote gatherings. Periodically, students who can meet in person will gather for discussions, problem solving sessions, and lab work with others joining remotely. You must register for lab and lecture with the same instructor.

Requirements/Evaluation: research reports, exams, and weekly problem sets
Prerequisites: PSYC 101; not open to first-year students except with permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Psychology majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: This course has weekly problem sets focused on experimental design and quantitative data analysis. Students will design and conduct several experiments, analyze the data, and report their findings.

PSYC 212  (F)  Neuroscience
Cross-listings: BIOL 212 NSCI 201 PSYC 212
Secondary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers. Lectures will be pre-recorded and shared asynchronously. Students will be divided into small groups (~6 students each) that will meet synchronously with the instructors once a week for 30 minutes to further discuss concepts covered in the lecture. These meetings will take place within the scheduled class period and be in either in-person or online formats. If in-person numbers are too low to populate a given discussion subgroup, then that group would meet via the previously described online format. The lab component will be available to remote students in modified form, and will cover much of the same content as the in-person sections. Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, two midterm exams, and a final exam.

Class Format: Lectures will be pre-recorded and shared asynchronously. Students will be divided into small groups that will meet synchronously with the instructors once a week for 30 minutes to further discuss concepts covered in the lecture. The lab component will be available to remote students in modified form, and will cover much of the same content as the in-person sections.

Requirements/Evaluation: Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, two midterm exams, and a final exam.

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 36

Enrollment Preferences: sophomores and Biology and Psychology majors

Expected Class Size: 36

Grading: yes pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 222 (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science

Cross-listings: PSYC 222 PHIL 222 COGS 222

Secondary Cross-listing

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: This hybrid course will meet in-person and will also be available for remote video attendance and participation. Remote students will be expected to attend class synchronously with the in-person lecture and will not be able to watch lectures at other times, so must be available during the class hours in the catalog. Supplemental material—e.g., office hours, study sessions for exams, background discussion for weekly assignments—will be delivered on-line.

Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises

Prerequisites: PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended. It is not necessary to contact the instructor to indicate a special interest in the course.

Enrollment Limit: 20

Enrollment Preferences: sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2020
LEC Section: H1 TR 11:30 am - 12:45 pm Joseph L. Cruz

PSYC 232 (F) Developmental Psychology

An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal and infant development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development. These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, dynamic systems, information processing, social learning, attachment, parenting, and family systems.

Class Format: This course will be taught entirely remotely. Live, synchronous lectures will take place on Zoom during scheduled course meeting hours (in Eastern Standard time). Students may be assigned to smaller student groups for some class projects. Those groups are permitted to meet on campus following appropriate safety protocols and if everyone in the group is comfortable with the arrangement. Otherwise, all course-related meetings and class presentations will occur remotely.

Requirements/Evaluation: The main form of evaluation will be 3 online written exams (2 midterm, 1 final). Depending on enrollment numbers, there
may be an oral exam component to supplement the online exams. Students will also be expected to participate in smaller "book/journal club" meetings throughout the semester and from these meetings, will produce 5 brief writing assignments (2-3 pages each) and a final 15-20 minute group presentation. Attendance is required and active participation during lectures is strongly encouraged.

**Prerequisites:** PSYC 101

**Enrollment Limit:** 30

**Enrollment Preferences:** Preference will be given to sophomore and junior psychology majors and senior psychology majors who still need to fulfill a 200-level requirement.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** PSYC 200-level Courses  TEAC Teaching Sequence Courses

---

**Fall 2020**

LEC Section: R1  MR 1:30 pm - 2:45 pm  Eliza L Congdon

**PSYC 242  (F)(S)  Social Psychology**

A survey of theory and research in social psychology. Topics include conformity, group dynamics, stereotyping and prejudice, aggression, altruism, attraction and love, the self, social perception, attitudes and attitude change, and cultural psychology. Applications in the areas of advertising, law, business, and health will also be discussed.

**Class Format:** Lectures will be remote. We will also have some discussion meetings with smaller groups (primarily during the regular class time) and possibly an occasional other small-group activity). These also will probably be remote, but there is a possibility we will have some in-person element, depending on how things are going on campus and the availability of rooms.

**Requirements/Evaluation:** two in-class exams, one paper (7 - 10 pages), and an optional final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**PSYC 252  (F)(S)  Psychological Disorders**

A study of the phenomenology, etiology, and treatment of the major forms of psychological disorders: depression, bipolar disorder, the schizophrenias, dissociative disorders, anxiety disorders, personality disorders, eating disorders, addictions, and others. The course emphasizes an integrative approach which incorporates and analyzes theories and research from psychological, biological, interpersonal, and sociocultural perspectives.

**Class Format:** This course will be offered remotely, and all meetings will be synchronous. Class meetings will include lecture, discussion, and use of small breakout groups for experiential activities and small group work. Attendance at all meetings will be strongly encouraged, and participation will be evaluated. This course will meet 2 (of the possible 3) days per week; those 2 days may vary on a weekly basis.

**Requirements/Evaluation:** short papers (total of 10 pages distributed over assignments), 2 in-class exams, and participation

**Prerequisites:** PSYC 101; open to first-year students

**Enrollment Limit:** 30
Enrollment Preferences: Psychology majors, then sophomores, then by seniority

PSYC 258 (S) Language and Literacy Development

Cross-listings: PSYC 258  JAPN 258

Secondary Cross-listing

Language is uniquely a human function and fundamental to one’s participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese, and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How “natural” is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 258 (D2) JAPN 258 (D1)

Attributes: Linguistics

Not offered current academic year

PSYC 272 (S) Psychology of Education

This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

Class Format: discussion

Requirements/Evaluation: two exams and a final project

Prerequisites: PSYC 101
Enrollment Limit: 50

Expected Class Size: 50

Grading: no pass/fail option, yes fifth course option

PSYC 312  (S)  From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology

Cross-listings: NSCI 322  PSYC 312

Primary Cross-listing

This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience using the research tools discussed in class to explore novel research questions.

Class Format: empirical lab course

Requirements/Evaluation: class presentations, participation in discussions, midterm exam, and participation in all phases of the empirical project research experience including oral and written presentation of key findings

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 313  (S)  Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic

Cross-listings: NSCI 313  PSYC 313

Primary Cross-listing

Opioid misuse, including addiction, has emerged as a major health epidemic in the United States. This course will explore the science of opioids as well as the historical and societal context surrounding their use and abuse. We will examine the neurobiological mechanisms through which opioids interact with pain pathways and reward circuits within the brain and we will explore how changes in these systems contribute to opioid tolerance, dependence, and addiction. We will consider how genetic, environmental and behavioral factors can powerfully influence these processes. Finally, we will consider alternative approaches to pain management as well as interventions for the treatment of opioid abuse. Students will be expected to design and conduct an empirical project related to the course material. Critical evaluation of peer-reviewed primary literature from animal and human studies will serve as a foundation for class discussions. Evaluation will be based on class presentations, participation in discussions and empirical projects, written assignments, and a poster presentation of the empirical project.

Class Format: empirical lab course
**PSYC 315 (F) Hormones and Behavior**

**Cross-listings:** PSYC 315  NSCI 315

**Primary Cross-listing**

In all animals, hormones are essential for the coordination of basic functions such as development and reproduction. This course studies the dynamic relationship between hormones and behavior. We will review the mechanisms by which hormones act in the nervous system. We will also investigate the complex interactions between hormones and behavior. Specific topics to be examined include: sexual differentiation; reproductive and parental behaviors; stress; aggression; and learning and memory. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

**Class Format:** empirical lab course

**Requirements/Evaluation:** presentations and participation in discussions, approximately seven 1-2 page response papers, midterm, written (15-20 page) and oral presentation of the research project

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201)

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

NSCI 315 (D3) PSYC 315 (D3)

Spring 2021

SEM Section: 01  TBA  Shivon A. Robinson

**PSYC 319 (S) Neuroethics** (WS)

**Cross-listings:** NSCI 319  PSYC 319  STS 319

**Primary Cross-listing**

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In
addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**Requirements/Evaluation:** six 5-page position papers and five 2-page response papers as well as participation in discussions

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 319 (D3) PSYC 319 (D3) STS 319 (D2)

**Writing Skills Notes:** In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** NSCI Group B Electives PSYC Area 1 - Behavioral Neuroscience

Not offered current academic year

**PSYC 322 (S) Concepts: Mind, Brain, and Culture**

Every time we see something as a kind of thing, every time that we decide that an object is a cup rather than a glass, when we recognize a picture of a familiar face as a picture of ourselves, or even when we understand speech, we are employing categories. Most categorization decisions are automatic and unconscious, and therefore have the illusion of simplicity. The complexity of these decisions, however, becomes apparent when we attempt to build machines to do what humans perform so effortlessly. What are the systems in place that allow us this extraordinary ability to segment the world? Are they universal? How does conceptual knowledge differ across cultural groups? How do concepts affect our perception? How do the categories of experts differ from the categories of novices? Do children have the same kind of conceptual knowledge as adults? How are categories represented in the brain? In this course, we explore various empirical findings from cognitive psychology, cognitive neuroscience, and anthropology that address these questions.

**Class Format:** empirical lab course

**Requirements/Evaluation:** short papers, class presentation, and research paper

**Prerequisites:** PSYC 221 or 222 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Cognitive Science concentrators

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** COGS Interdepartmental Electives PSYC Area 2 - Cognitive Psychology PSYC Empirical Lab Course

Not offered current academic year

**PSYC 324 (S) Great Debates in Cognition**

The field of cognition is filled with controversies about how the mind really works. For example, is there sufficient evidence for a system in vision that can become aware of things without actually "seeing" them? Is it necessary to assume that babies come into the world armed with innate linguistic knowledge? Are humans inherently rational? Can we make inference about the mind using neuroimaging? These debates, and others that we will consider, help fuel scientific discovery in cognition in interesting ways. In this class, we will consider some of these contemporary debates, weigh evidence on both sides, and discuss the implications for what we know about the mind.

**Class Format:** students will meet in pairs with the instructor for an hour each week

**Requirements/Evaluation:** weekly papers and oral arguments

**Prerequisites:** PSYC 221 or 222 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Cognitive Science concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Not offered current academic year

PSYC 326  (F) Choice and Decision Making
Being human means that we sometimes make choices that we know are bad for us. In this course we survey theoretical and experimental approaches to understanding our strengths and weaknesses as decision makers. Topics include rationality, the debate over cognitive biases, fast and frugal heuristics, impulsivity and self-control, addictions and bad habits, paternalism, and moral decision making.
Class Format: Lectures and labs will be remote, conducted via Zoom during the scheduled time slots, with recordings posted on Glow for students who cannot attend during those slots.
Requirements/Evaluation: problem sets, essay papers, class and lab participation, and a research report
Prerequisites: PSYC 221 or 222 or permission of instructor; permission is typically given to students who have successfully completed ECON 110
Enrollment Limit: 12
Enrollment Preferences: senior Psychology majors who need the course to fulfill the major
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option

PSYC 332  (S) Children's Mathematical Thinking and Learning
Are babies statistical experts? Will I ever be good at calculus? What are we born with and what do we learn? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their informal understanding of geometry, space, and number to
successfully navigate their environments. In this course we read and discuss both foundational and cutting-edge articles from neuroscience, cognitive science, education, and psychology to understand how humans bridge this gap between the informal and formal mathematical worlds. We will also tackle questions such as: How do culture and language affect numerical understanding? What are the sources of children's mathematical misconceptions? What are the effects of early environmental input or input deprivation on mathematical development? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? For your laboratory component, you will work with a small group of other students to develop an original research project that tests a specific hypothesis about children's mathematical thinking and learning. Data will be collected in community schools, with the permission of parents, teachers, and children. Your results will be written-up in for your final paper, which will be in the style of an empirical journal article.

Class Format: community-based data collection in local schools

Requirements/Evaluation: class participation, discussion leader, weekly open-notes reading quizzes, individual 12- to 15-page final paper based on empirical group research project

Prerequisites: PSYC 201 and PSYC 232 or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, upperclassmen, students with a demonstrated interest in the course material

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

PSYC 334  (F)  Defining and Disrupting the School-to-Prison Pipeline

Cross-listings:  PSYC 334  AFR 318

Secondary Cross-listing

The school-to-prison pipeline describes a system of processes that pushes children out of school into jails and prisons. This course will explore the pipeline and the relationships between school, prison, and society. We will begin with the history and creation of the modern-day school-to-prison pipeline, focusing on the educational and public policies that encourage the criminalization of "others", with particular emphasis on folks of color and under-resourced communities. We will also look to firsthand accounts from those pushed into the pipeline to humanize the topic and engage in thoughtful and compassionate discussion. Together, we will define "school" and "prison", identifying how these definitions are aligned with the most current iteration of the pipeline, and how they can help us as we work to dismantle it.

Requirements/Evaluation: Assignments for the course include ongoing journal assignments, two 3-5 page papers, and a final project.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Africana Studies concentrators and Psychology Majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

PSYC 335  (F)  Early Experience and the Developing Infant
The period from conception to age three is marked by impressive rapidity in development and the plasticity of the developing brain affords both fetus and infant an exquisite sensitivity to context. This course delves into the literature that highlights the dynamic interactions between the developing fetus/infant and the environment. The course readings span a range of disciplines and cover a diversity of hot topics in the study of prenatal and infant development, including empirical research drawn from the developmental, neuroscience, psychopathology, and pediatric literatures.

Class Format: Classes will be held synchronously, live and in Zoom.

Requirements/Evaluation: active class participation, weekly three-page papers, two oral presentations (20 minutes each and using PowerPoint), and one final 10-12 page paper on an independent research topic related to course content

Prerequisites: PSYC 201, PSYC 212, and PSYC 232 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Psychology majors and Neuroscience concentrators

PSYC 337 (S) Critical Perspectives in Special Education

Cross-listings: AFR 324 PSYC 337

Secondary Cross-listing

What makes special education "special"? This course will explore the role, purpose, and function of special education in the United States. Given special education's assumption of dis/ability (Baglieri, 2012), we will also create collective and individual frameworks for discussing and deconstructing dis/ability. This course will examine history, policy, and pedagogy related to special education; we will also discuss how law and school practices have systemically and systematically excluded students of color from general education classrooms, leading to the overrepresentation of Black, Indigenous, and Latinx children in special education. We will listen to narratives shared by people with dis/abilities and our educational histories to understand how personal connections to special education influence our current beliefs and future practice.

Requirements/Evaluation: Assignments for the course include ongoing journal assignments, two 3-5 page papers, and a final project.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Africana Studies concentrators and Psychology Majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

PSYC 338 (S) Inquiry, Invention and Ideas

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look
at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

Requirements/Evaluation: three 3- to 5-page essays, two child observations and a 7- to 10-page final paper
Prerequisites: PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: preference given to Psychology majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Not offered current academic year

PSYC 341 (S) Stereotypes, Prejudice, and Discrimination
Cross-listings: PSYC 341  WGSS 339

Primary Cross-listing
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people’s perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.
Class Format: empirical lab course
Requirements/Evaluation: weekly brief papers, oral reports, two longer papers
Prerequisites: PSYC 201 and 242
Enrollment Limit: 16
Enrollment Preferences: senior, then junior Psychology majors
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

PSYC 342 (S) Social Judgment
This course focuses on how people make judgments and decisions in their social lives and why they are sometimes biased and irrational in their choices. We will place a strong emphasis on exploring how ideas from the judgment and decision-making literature can aid in our understanding of social psychological phenomena, including planning for the future, understanding other people, and resolving interpersonal conflicts. We will also place an emphasis on people's judgments and decisions as they pertain to their happiness and well-being, exploring how concepts in the judgment and decision-making literature can help us to understand why certain types of outcomes are more satisfying than others and why people sometimes choose in ways that fail to maximize their well-being. As we explore these questions, we will survey a variety of methods and perspectives, ranging from classic social psychological experiments to techniques imported from behavioral economics and cognitive psychology.
Requirements/Evaluation: a series of short papers; two essay exams; written and oral report of a research proposal
Prerequisites: PSYC 242 and PSYC 201, or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Spring 2021
SEM Section: 01 TBA Jeremy D. Cone

PSYC 346 (S) Environmental Psychology
Cross-listings: ENVI 346 PSYC 346

Primary Cross-listing
This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnection with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Environmental Studies concentrators
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives PSYC Area 4 - Social Psychology

Not offered current academic year

PSYC 348 (F) Psychology of Prejudice (DPE)

Prejudice is everywhere. This class is intended to help you understand why. Readings and discussion will seek to illuminate the roots of prejudice, its many forms, and how it may be reduced. We will investigate how scientists measure undesirable and even unacknowledged attitudes, and consider the effects of people being unaware of their own biases, both psychologically and societally. Overall, we will use scientific evidence to inform our understanding of social identities, their complexities, and their consequences, and students will design and conduct empirical research projects based on the course material.

Class Format: This is a hybrid course for both remote and in-person students. We will meet on campus twice a week for seminar-style discussions, with a synchronous video link provided for those who are not physically present. Weekly lab sessions will primarily be conducted remotely, with students completing projects over the course of the semester in groups of 3 or 4. This structure is subject to change, however, in consultation with the whole class about their experience.

Requirements/Evaluation: participation in class discussions, oral reports, several brief (1-2 page) writing assignments, and participation in the empirical project including a final written report
Prerequisites: PSYC 201 and PSYC 242 or permission of instructor

Enrollment Limit: 12
Enrollment Preferences: senior, then junior Psychology majors
PSYC 349  (S)  Psychology and Law
This course examines the legal system in light of psychological research findings, Supreme Court rulings, wrongful conviction cases and illustrative crimes. The law's informal theories of human behavior will be compared to what psychologists know on the basis of theories and research regarding such topics as Miranda, lie detection, police interrogation, false confessions, eyewitness identification, repressed and recovered memories, forensic evidence, and juries. The course will also explore the psychological mechanisms underlying legal decisions, and demonstrate how psychological findings can contribute to legal system reform.
Requirements/Evaluation: exams, a series of papers
Prerequisites: PSYC 201 and PSYC 242 or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Psychology majors
Expected Class Size: 18
Grading: no pass/fail option, yes fifth course option
Unit Notes: either PSYC 347 or PSYC 349 may be taken for credit, but not both
Distributions: (D2)
Attributes: PSYC Area 4 - Social Psychology
Not offered current academic year

PSYC 352  (F)  Clinical and Community Psychology
This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.
Requirements/Evaluation: field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper
Prerequisites: PSYC 252
Enrollment Limit: 15
Enrollment Preferences: senior, then junior, Psychology majors; you MUST have permission of instructor to register for this course
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: EXPE Experiential Education Courses  PHLH Reproductive, Maternal and Child Health  PSYC Area 5 - Clinical Psychology
Not offered current academic year

PSYC 355  (S)  Psychotherapy: Theory and Research
Psychotherapy is a young, barely 100-year old psychological endeavor which attempts to promote change and healing through social interaction. How can it be that talking with a psychotherapist can help people change -- emotionally, cognitively, and/or behaviorally -- and how exactly does it help people achieve relief from psychological disorders and problems? In this course, we will study some of the key approaches to psychotherapy by examining the theories and scientific research that surround them, and considering theory and research in juxtaposition. This will be accomplished by a close reading and critical analysis of primary source theoretical papers, the "raw data" (videotapes and transcripts) of therapy sessions, case studies, and contemporary empirical research on the outcomes and change processes of psychotherapy. Students will learn how to evaluate the efficacy claims of both standard and new therapies and how to evaluate claims about the mechanisms by which those therapies work. Current controversies in psychotherapy and psychotherapy research will be addressed and debated as well. All students will design and conduct an empirical research project based on the course material.

Class Format: empirical lab course

Requirements/Evaluation: attendance and active class participation, weekly 2-3 page reading response papers, APA style research report and poster/oral presentation of the research project

Prerequisites: PSYC 201 and PSYC 252

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PSYC Area 5 - Clinical Psychology PSYC Empirical Lab Course

Spring 2021

SEM Section: 01 TBA Laurie Heatherington

PSYC 356 (F) The Science of Suicide and Related Psychopathology

The course will provide students with a comprehensive understanding of the science and study of suicide and related psychopathology (e.g., non-suicidal self-injury) in both clinical and community samples. Course topics will include prevalence across the lifespan, current models of etiology, distal and proximal indicators of suicide risk, risk assessment and safety planning, suicide prevention and science-based interventions, an exploration of cultural factors/issues of diversity and social justice, and current/future directions in this particular area of research and clinical practice. Readings will involve empirical studies and theoretical models that have shaped the study of suicidality, and recent studies that have taken a multidisciplinary approach (e.g., neuropsychological research; machine learning) to understanding suicide. Students will evaluate published research based on theory, methodological rigor, ethical considerations, diversity/inclusion, and current gaps in the literature that contribute to difficulty in predicting and preventing suicide. Students will design and conduct an empirical research project based on the course readings and topics discussed, such as analyzing existing data sets, examining media depictions/reporting, and/or conducting online surveys. These projects will be completed in pairs or teams.

Class Format: This course will be taught remotely; seminar discussions will occur synchronously twice/week to maximize the opportunity for active group participation of these pressing topics. Empirical labs will also occur synchronously each week; these labs are particularly well-suited to be adapted to remote instruction and will include full group discussions and activities, as well as "breakout" pair/group meetings to focus on empirical projects.

Requirements/Evaluation: attendance and active class participation, weekly 2-3 page reading response papers, student-led discussions (3 per student), a 4-5 page project proposal, a 15-20 page APA-style research paper, poster/oral presentation of the research paper

Prerequisites: PSYC 201 and PSYC 252 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Psychology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PSYC Area 5 - Clinical Psychology PSYC Empirical Lab Course
PSYC 357 (F) Depression
This course will provide students with a comprehensive understanding of depression. Topics will include assessment, models of etiology and course, effective approaches to prevention and intervention, and depression in specific populations. Readings will expose students to seminal works in the field as well as current methods and research findings. Throughout the course, students will evaluate current research based on theory, methodological rigor, and potential impact on prevention and intervention efforts.
Requirements/Evaluation: class participation, five 1 page response papers, 2 class presentations, final paper
Prerequisites: PSYC 201; PSYC 252 recommended
Enrollment Limit: 18
Enrollment Preferences: Psychology majors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: PSYC Area 5 - Clinical Psychology
Not offered current academic year

PSYC 358 (F) Developmental Psychopathology: Trajectories of Risk and Resilience
Why do some youth develop psychopathology in the face of adversity whereas others do not? How do we define psychological disorders in youth? Is resilience a static trait, or can it be promoted? How do we prevent youth from developing psychopathology? In this course, students will address these and other questions using a risk and resilience framework that examines the interactions among multiple risk and protective factors in the pathway to psychopathology. Specifically, students will examine the interactions between individual characteristics (e.g., neurobiological, interpersonal, cognitive, and emotional factors) and environmental contexts (e.g., family, school, peer, early adversity, poverty) in the development of risk and resiliency. Application of etiological models and empirical findings to prevention and intervention approaches will be explored. Throughout the course, students will evaluate current research based upon theory, methodological rigor, and clinical impact.
Class Format: This course will be offered remotely. Each week the professor and the tutorial pair will meet for 60 minutes in a synchronous online meeting. The meetings will be scheduled between 9am and 4pm EST based upon student and professor availability. Attendance will be required at the weekly synchronous online meeting.
Requirements/Evaluation: six 5-page papers, six short response papers, and participation in discussions
Prerequisites: PSYC 252; PSYC 201 recommended
Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Public Health concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: PHLH Reproductive, Maternal and Child Health PSYC Area 5 - Clinical Psychology

PSYC 359 (S) Anxiety: Responses to Danger, Both Real and Imagined
This is an advanced course on anxiety that takes an in depth look at the theory and research on the normative psychological processes that influence responses to danger, both real and imagined. Specifically, it examines the empirical research on psychological responses to traumatic experiences, such as combat, rape, and natural disasters. Responses to perceived or imagined threats are also discussed as the underpinnings of such anxiety
disorders as Panic Disorder, Generalized Anxiety Disorder, Social Phobia, Specific Phobia and OCD. Discussions focus on commonalities and differences in empirically supported treatments for anxiety disorders as well as controversies in the field.

Requirements/Evaluation: active class participation, frequent response papers, midterm examination and final term paper

Prerequisites: PSYC 252

Enrollment Limit: 18

Enrollment Preferences: Psychology Majors; preference given to those with outstanding major requirements

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: PSYC Area 5 - Clinical Psychology

Not offered current academic year

PSYC 361 (S) Psychology of Nonviolence

Nonviolence refers to choice behavior in interpersonal interactions in which physical injury to others is rejected as an option. In this course we will study moral and psychological theories of nonviolence, and evaluate the empirical support for their central claims of psychological benefits to the practitioner, attitude change in the adversary, and positive exemplary effects on social interaction. Topics include empathy, tolerance, forgiveness, aggression, courage, resisting violent assault, and civil resistance.

Class Format: discussion

Requirements/Evaluation: class attendance and participation, discussion leadership, one 5-page essay, and a final paper of approximately 10 page

Prerequisites: any 200-level course in PSYC or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: PSYC Area 6 - Other/Interdisciplinary Psychology

Not offered current academic year

PSYC 372 (F) Advanced Seminar in Teaching and Learning

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and those who plan to become teachers

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: EXPE Experiential Education Courses PSYC Area 7 - Educational Psychology TEAC Teaching Sequence Courses

Not offered current academic year
PSYC 373 (F) Critical Issues in Learning and Teaching
In this seminar we will take a deep dive into several key topics in education. We will examine psychological research as well as a range of other materials (essays, film, recordings of children and personal experiences) to help answer a series of questions, including: Does the kind or quality of schooling have a measurable impact on children? How do you create curriculum? How does one conduct high quality classroom observations? What do good teachers have in common? What is the best way to help teachers get better at what they do? Can remote learning work well in K-12 settings?

Class Format: The course will be taught in a hybrid form (remotely for some and in person for others). Students will meet in small groups with the professor. Each group will meet for a tutorial-like session once a week. We will use students’ papers as a jumping off point for our discussions.

Requirements/Evaluation: Regular class attendance and full participation (whether remote or in-person), five 5-page papers, and regular written responses to other students’ papers. We will also do a variety of in-class activities that may require some independent preparation (gathering materials, or doing brief interviews) and some coordination with one another outside of class time.

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Psychology majors and those involved in the Program in Teaching
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: PSYC Area 7 - Educational Psychology  TEAC Teaching Sequence Courses

SEM Section: H1  MWF 8:15 am - 9:30 am  Susan L. Engel

PSYC 397 (F) Independent Study: Psychology
Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

Class Format: This course will meet in a hybrid or remote format determined in collaboration with the supervising faculty member.

Requirements/Evaluation: Determined by individual instructors
Prerequisites: Permission of instructor
Enrollment Limit: none
Enrollment Preferences: Upperclass students
Expected Class Size: NA
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

Fall 2020
IND Section: H1  TBA  Noah J. Sandstrom

PSYC 398 (S) Independent Study: Psychology
Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

Requirements/Evaluation: Determined by individual instructors
Prerequisites: Permission of instructor
Enrollment Limit: none
Enrollment Preferences: Upperclass students
PSYC 401  (F) Psychology in Popular Discourse: A Critical Examination
This course considers several important contemporary topics from diverse psychological perspectives. These topics—which may include issues such as personal and external influences on success; technology and relationships; addiction—will be introduced via popular books, films, or podcasts, and we will analyze them more deeply with original research articles from across multiple approaches and sub-disciplines of psychology. A central goal in this course is for students to develop and apply the skills necessary to critically evaluate psychological ideas as they exist in the broader popular culture. The course will primarily be discussion based, and the students will lead these discussions.

Class Format: student-facilitated discussions
Requirements/Evaluation: participation in class discussions, choosing relevant research articles, and three position papers
Prerequisites: senior Psychology majors, or permission of instructor in rare cases
Enrollment Limit: 36(12/sec)
Enrollment Preferences: senior Psychology majors
Expected Class Size: 36
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Not offered current academic year

PSYC 403  (F) The Psychology of Love
This seminar will examine psychological approaches to the study of attraction, affiliative bonds, attachment, and relationship health across the lifespan. These topics will be introduced via review articles, books, and films. Students will analyze these topics more deeply with presentations and student-led discussions of original research articles from across multiple perspectives and subdisciplines of psychology.

Class Format: Class will meet remotely in live, synchronous settings. Student discussion leaders will also meet with Professor over Zoom in advance of co-leading live, online discussions. Each class will begin with analysis of student-selected music that is used to generate a class playlist on Spotify. Movie nights will be held together as watch parties.
Requirements/Evaluation: participation in class discussion, selection and presentation of relevant empirical papers, three position papers
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: senior Psychology majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

Fall 2020
SEM Section: R1  MW 10:00 am - 11:15 am  Amie A. Hane

PSYC 405  (F) Why Do We Believe What We Believe?
As scientists, we aspire to hold beliefs that are based in evidence. As humans, however, we are likely to embrace beliefs influenced by a variety of social, historical, cultural, political, racial and religious factors. In this class, we will explore the question of why we cling to certain beliefs, even in the face of significant contradictory evidence. For example, what assumptions do we make about strangers and why are we so convinced these assumptions are correct? How does our culture affect our parenting choices and why do we hold them so fiercely? What assumptions do we make
about the nature of memory and are these assumptions valid? Are there "defensive moves" that we make when we are challenged racially, even when we are committedly antiracist? And, if so, why? In class, we will explore source material from popular culture: books, films, podcasts and popular press articles, and we will examine claims made about different belief systems. We will then critically evaluate these claims by exploring the available empirical psychological evidence. The format of this class is student-led discussions.

**Class Format:** My goal is to conduct as many of our classes in-person as reasonably feasible. Students who are on-campus will be encouraged to attend the seminar in person. Those who are unable to attend in person will join remotely. Students will be required to meet with me in small groups prior to leading discussions to review their discussion plan. These meetings will occur in person or remotely, depending on scheduling availability.

**Requirements/Evaluation:** Students will be required to develop and lead rigorous generative discussions with their classmates several times during the semester. In addition, students will be expected to actively participate in discussions and to write three 5-7 page position papers.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Psychology majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

Fall 2020

SEM Section: H1    MR 3:15 pm - 4:30 pm    Nicole T. Harrington

**PSYC 407 (F) Success and Failure**

The theme of this psychology senior seminar will be success. We will discuss the path to personal success, including the relative importance of hard work, genetic talent, and luck; barriers to success like poverty, discrimination, and incarceration; what parents should want, and do, for their children; how having a disability changes one's definition of success; what success means, and requires, during a war; and how science itself has been weakened by scientists' ambition for success. We will read a book or watch a film about each topic we choose, then delve deeper by reading and discussing scientific journal articles. Class meetings will be student-led discussions. You will learn how to assess an argument skeptically, seek additional evidence, and argue for solutions. You will practice useful life skills such as how to lead and participate in a meeting (i.e., a class discussion) and how to write engagingly and convincingly. The larger goal will be to leave this class more prepared to develop and communicate informed opinions in the future.

**Class Format:** student-led discussions

**Requirements/Evaluation:** participating in and leading class discussions, choosing topics and readings, and writing essays

**Prerequisites:** senior Psychology majors or permission of instructor in rare cases

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Psychology majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

Not offered current academic year

**PSYC 408 (F) The Psychology of College**

What do people learn in college? Are students fundamentally transformed by their college experience, and if so, what specific features of college actually make a difference? Most people's ideas about the impact of college come from personal experience, and the strongly held views of journalists, filmmakers, college spokespeople, relatives and public figures. Those beliefs are often misguided. Yet research can help us develop an accurate picture of just what it is that college does and doesn't do. Drawing on films, popular books and articles, as well as research from across the subdisciplines within psychology, we will examine some of the most common beliefs, and then delve into the psychological evidence that supports or refutes them. Our goal will be to develop a scientifically-based understanding of the psychological impact of college, and redesign various features of college to reflect our conclusions. Empirical work on this topic presents unique methodological challenges, so we will also spend some time designing studies that overcome those challenges.
Class Format: Students who are on-campus are encouraged to attend the seminar in person. Those who are unable to attend in person will join remotely. Students should expect several additional small group meetings outside the scheduled time period for additional discussions, to plan presentations, etc.

Requirements/Evaluation: weekly readings, leading two class discussions, and writing three 5-7 page papers

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: senior Psychology majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2020

SEM Section: H1 TR 11:30 am - 12:45 pm Susan L. Engel

PSYC 412 (F)  Feelings & Emotions: Shaping the Brain and Society

This course will explore what emotions are, the evolutionary origins of emotions, and the tools and techniques researchers use to study emotions both in humans and in animal models. We will examine how brain state(s) may underlie different emotions and challenge widely held notions about how an individual's emotion can influence behavior and social factors. Questions we will explore include: Is it better to be emotional or rational? What are 'gut feelings'? Are there gender differences in emotionality and, if so, what are their origins? Popular press literature and scientific studies will fuel student-led discussions as we seek to develop an evidence-based understanding of emotions and how they shape the world around us.

Class Format: This is a hybrid course. Students who are on-campus are encouraged to attend the seminar in person. This course will meet 2 (of the possible 3) days per week; those 2 days may vary on a weekly basis. Those who are unable to attend in person will join remotely. Students should expect several additional small group meetings outside the scheduled time period for additional discussions, to plan presentations, etc.

Requirements/Evaluation: Course requirements include weekly readings, leading two class discussions, and writing three 5-7 page papers, including at least one newspaper-ready op-ed.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Senior psychology majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2020

SEM Section: H1 MWF 11:45 am - 1:00 pm Victor A. Cazares

PSYC 413 (F)  The Resilient Mind

In this seminar, we will explore the psychological, environmental, and biological variables that shape an individual's response to stress and/or adversity. We will discuss how factors such as personality, coping style, social network/community, gender, brain mechanisms, and genes can influence one's ability to adapt and recover from a crisis. Students will critically examine depictions of resilience in popular literature and film, and employ empirical scientific articles from across multiple approaches and sub-disciplines of psychology to delve deeper into their analyses. Class meetings will be primarily discussion based and student-led, with the central goal of developing skills in forming and communicating evidence-based arguments.

Class Format: Class meetings will take place synchronously within the scheduled class period. Students will be able to attend class in-person or remotely via an online format.

Requirements/Evaluation: participating in and leading discussions, selection and presentation of relevant topics and readings, and three position papers (approximately 5-7 pages double-spaced)

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: senior Psychology majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

Fall 2020
SEM Section: H1  MR 1:30 pm - 2:45 pm  Shivon A. Robinson

PSYC 493 (F) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. This is part of a full-year thesis (493-494). After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available from the department and on our website.

Class Format: This course will meet in a hybrid or remote format determined in collaboration with the supervising faculty member.

Requirements/Evaluation: Determined by thesis advisor
Prerequisites: permission of the thesis advisor
Enrollment Limit: none
Enrollment Preferences: Senior Psychology major
Expected Class Size: NA
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Fall 2020

Winter Study -------------------------------------------------------------

PSYC 21 (W) Psychology Internships
Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or another setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Requirements/Evaluation: 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation

Prerequisites: approval by Ken Savitsky is required

Enrollment Limit: 20

Enrollment Preferences: random selection

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

Not offered current academic year

**PSYC 22 (W) Introduction to Research in Psychology**

This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course. In addition, students should discuss with faculty what the weekly time requirements will be.

Requirements/Evaluation: quality of research participation, student's lab journal, and either an oral presentation or a written 10-page report of the research project

Prerequisites: permission of faculty mentor

Enrollment Limit: POI

Enrollment Preferences: selection will be based on evaluation of departmental application and number of faculty available as mentors

Grading: pass/fail only

Not offered current academic year

**PSYC 31 (W) Senior Thesis: Psychology**

To be taken by students registered for Psychology 493-494.

Requirements/Evaluation: determined by faculty

Prerequisites: PSYC 493 or NSCI 493

Enrollment Limit: POI

Enrollment Preferences: all will be enrolled

Grading: pass/fail only

Not offered current academic year

**PSYC 99 (W) Independent Study: Psychology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
Public health seeks to understand, and also to protect and improve, health at the level of a community or population. Communities make decisions and allocate resources that, intentionally or not, fundamentally shape human life. For example, great reductions in sickness and early death have come from social interventions with relatively low financial cost, such as physically separating drinking water from sewage, or distributing aspirin, condoms, mosquito nets, vaccines or soap, or sharing new ideas about life’s possibilities. The way a society is organized affects the way that social and scientific knowledge is distributed within it; access to that knowledge shapes health at the individual level. At its heart, the study of public health focuses on questions about relationships between science and society, and between reality and possibility: what effective public health policy is and how we can measure its effectiveness; what the relationship is, and ought to be, between research and policy; how we reconcile important moral and economic claims, or balance other values that compete with maximizing health; what counts as disease, over time and among cultures; how we think about cause and responsibility; what constitutes a healthy environment; how our fundamental beliefs determine our approaches to health decisions; and how such decisions ought to be made.

Requirements

Application to the concentration must be completed in the Spring of sophomore year. Applications are due during pre-registration. Application materials can be obtained on the public health website public-health.williams.edu by early April or by e-mailing the chair of the program. Due to excess demand for the concentration, applicants are not guaranteed admittance to the program. Depending on availability, a few students may be admitted in the Spring of Junior year with a mid-April deadline.

All students wishing to pursue the Area of Concentration should take this course early in their careers, preferably sophomore year. Students may petition the advisory committee to substitute a course taken in a study-abroad program focused on global health, providing that the course is equivalent in scope. However, students who plan to take advantage of this option should have taken at least two other courses from among the electives by the end of their sophomore year, and should recognize that those who lack a foundation in the core issues of the field may find it more challenging to prepare their proposal for admission to the concentration.

Statistics

Statistical analysis is at the heart of the quantitative tools necessary to study the health of populations. One course in statistics from the list below is required of all concentrators.

Elective Courses

Concentrators must take at least three electives, with at least two different prefixes, from the list below. Elective courses are grouped by category, but these clusters are not meant to constrain students to a single “track” within the program. Instead, each student is free to determine, with the guidance of an advisory committee member(s), a set of electives that provides an intellectually coherent exploration of their particular areas of interest within the field of public health. In choosing electives, students should consider the balance of breadth versus depth that will allow them to gain theoretical and methodological sophistication in one or more areas. Students may not substitute an independent study for any of these electives. Winter Study courses may not be counted towards the electives.

Experiential Component

Because many public health challenges cannot be fully appreciated until one has hands-on experience with real communities and actual populations, each concentrator must have at least one relevant field-based educational experience with a research component. This requirement may be met through participation in an approved study abroad program (see below), one of the Winter study courses marked with an asterisk, a WS99 project, or a not-for-credit summer or academic-year internship. In every case, the advisory committee must approve the project in advance. Please note that experiential component should address both the “public” and “health” in public health. Projects that center on clinical or lab or that do not have a meaningful health component will generally not satisfy the PH experiential requirement.

PHLH 402 (S) Senior Seminar in Public Health
The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

**Written Proposal**

To be considered for admission to the Area of Concentration in Public Health, students must submit a written statement describing the portfolio of courses, study abroad, and experiential learning component(s) they intend to pursue. In this proposal, candidates for the concentration should describe their intellectual goals, and if relevant, how these relate to their professional goals. A fundamental purpose of the proposal requirement is to encourage the student to consider concretely how s/he will engage with socio-cultural, behavioral, policy, and/or biomedical aspects of population health. To this end, students should address whether a methodological or disciplinary emphasis ties their chosen courses together, and how the intended experiential component will relate to this set of questions. This proposal is due by the end of course registration period in the spring of the sophomore year, and should be prepared in consultation with a member of the advisory committee. Concentrators are required to revisit and update their proposal prior to registration in the spring of the junior year, and to provide documentation of their internship experience both prospectively and retrospectively. Please note electives will not be offered every year. Students should check the course catalog as they considering possible electives.

STUDY ABROAD AND INTERNSHIPS

Although not a requirement for the PH concentration, study abroad and/or overseas internships provide a crucial opportunity to engage with global health issues through field-based coursework and independent research projects. The Public Health program in coordination with the Study Abroad Advisor and the Office of Career Counseling will advise students on opportunities in these areas. In particular, students may want to consider one of the several Global Health options offered through SIT. One or more courses completed on an approved study abroad program can be counted toward the three elective courses, with permission of the Chair. You can find general study away guidelines for Public Health at public-health.williams.edu.

PHLH 201 (S) Dimensions of Public Health (DPE) (WS)
Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential
element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises, covering infectious disease epidemics and prevention, sexual health, and mental health.

Requirements/Evaluation: two papers on a selected population or country and health issue, peer reviews and active contribution to class discussion, including on Glow

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores, potential Public Health concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: No divisional credit (DPE) (WS)

Writing Skills Notes: Given the interdisciplinary and collaborative nature of public health work we will have the students work in peer groups giving feedback on each other's written work, followed by opportunities to revise for clarity and content.

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because of its central focus on the ways that difference and power shape health outcomes in the U.S. and internationally. It uses an interdisciplinary approach to explore issues including the historical relations between communities of color, healthcare providers, and public health practitioners; contestation over the role of markets and government in public health; and differing explanations for the patterns of race, class, etc., in health outcomes.

Attributes: PHLH Core Courses

Spring 2021

SEM Section: 01 TBA Kiaran Honderich

PHLH 220 (F) International Nutrition (DPE) (WS)

Global malnutrition continues to represent one of the most challenging issues of international development. Problems of both under- and overnutrition beginning as early as in utero can detrimentally influence the health, development and survival of resource-limited populations. This course introduces students to the most prevalent nutritional issues through a food policy perspective and exposes them to a wide variety of interventions, policies and current debates in the field of international nutrition. In addition to exploring the multi-level programmatic approaches for the prevention and treatment of the related nutritional problems, students will gain exposure and experience in program design and program proposal writing. Readings will involve both real-world programmatic documents/evaluations as well as peer-reviewed journal articles. Examples will be drawn from Africa, Asia and Latin America.

Class Format: This class will be remote. Each week students will typically be asked to (1) watch a series of short lectures - think 10-15' clips, (2) read peer reviewed articles and post on discussion boards (3) attend synchronous meetings - both in small groups of and as a whole class during assigned class time. Instructor will also be available for one-on-one online meetings/check-ins.

Requirements/Evaluation: six 1-page essays, one final term paper (10-15 pages), one oral presentation, and active class participation

Prerequisites: PHLH 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Public Health concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: As a writing skills course, students will write six 1-page essays (each with an optional rewrite) which will help build the specific writing skills necessary for the final 10- to 15 page paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course exposes the issues of difference, power and inequity by exploring the unequal distribution of resources and power at the global, national and intra-national level within the international nutrition context. We will also critically engage with issues of power, cultural difference and related ethics in the context of international development and nutrition programming.
PHLH 250  (F)  Qualitative Research Methods in Public Health

Qualitative methods provide the opportunity to add in-depth meaning and context regarding research on individuals and the environments of study. This course introduces students to qualitative research theory in Public Health and gives them the opportunity to 'practice' three qualitative research methods; (1) in-depth interviewing, (2) focus groups and (3) participant observation. Students will have the opportunity to pilot each of these three qualitative research methods, analyze a subset of the data via qualitative analysis software, and design a qualitative research study (including the research instrument). We will cover best practices in reporting qualitative results (for the purposes of peer-reviewed publication) and learn about the advantages and disadvantages of qualitative research in various domestic and international settings related to public health (such as nutrition, HIV and physical activity).

Requirements/Evaluation:  three 1-page reflection papers, transcription/field notes of one qualitative method (5-7 pages), one research proposal (10-15 pages), and an oral presentation

Prerequisites:  PHLH 201 or equivalent

Enrollment Limit:  19

Enrollment Preferences:  Public Health concentrators

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)

Attributes:  PHLH Methods in Public Health

Not offered current academic year

PHLH 255  (S)  Research Methods in Public Health

This course will introduce students to three common research methods utilized within Public Health: qualitative methods, survey methods and epidemiology. We will cover the basic research design process, integrating and comparing the qualitative methods of interviewing and focus groups, survey instrument design and pretesting as well as basic epidemiologic methods and concepts. Readings and discussions will engage with best practices in reporting these types of methods (for the purposes of peer-reviewed publication). Lastly, students will have the opportunity to design research instruments, pilot some of these methods, and analyze a subset of the data via analysis software. Students who have taken PHLH 250 should not enroll in PHLH 255.

Requirements/Evaluation:  three 1-page reflection papers, development of two research instruments (3-5 pages), one critique of a journal article (5 pages), an oral presentation and active class participation

Prerequisites:  PHLH 201 or equivalent AND at least one Statistics course

Enrollment Limit:  19

Enrollment Preferences:  Public Health concentrators

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)

Attributes:  PHLH Methods in Public Health

Not offered current academic year

PHLH 310  Equity in Health

Equity in health has been defined as inequalities in health outcomes based on irrelevant social characteristics. The Sustainable Development Goals and Agenda 2030 highlight equity in health as a main focus and key to achieving social sustainability. This course will introduce students to the concept of equity in health, and discuss the theoretical underpinnings of the pathways to unequal health outcomes. The social determinants of health and how they translate to uneven outcomes will be explored and discussed. There will also be a special focus on gender and gender-based violence.
as a driver of ill health. How to reduce inequity in health will be discussed and debated. Readings will involve some of the classic texts on health equity as well as recent explorations of the area.

Requirements/Evaluation: weekly short reflection papers and one final paper (10-12 pages)
Prerequisites: PHLH 201 Dimensions of Public Health or Permission of Instructor
Enrollment Limit: 16
Enrollment Preferences: Public Health Concentrators
Expected Class Size: 16
Grading:
Distributions: (D2)

Distributions: (D2)
Not offered current academic year

PHLH 402 (S) Senior Seminar in Public Health
Public health is a cross-disciplinary field and draws on theoretical and applied research in the social sciences, natural sciences and humanities. In this capstone course, we will begin by reflecting on student experiential components undertaken and sharing the contributions each discipline brings to public health. Then, by way of an example we will examine how a "proven" medical innovation moves into the public health landscape, and how health research from a range of disciplines is critical to that transition. Then, we will review and expand students' tool-kit in public health research methods. We will begin by studying a range of sampling approaches and thinking critically about various public health indicators; followed by some coverage of a subset of quantitative public health methods. This will be complemented by learning a variety of qualitative methods in the lab. This broad-based approach is specifically intended to grow the toolkit of concentrators to think critically about the most appropriate research method or set of methods to best answer a specific public health research question. In lab, students will work in small groups and develop a research question that examines a public health problem in the local community. The research question will be answered through a synthesis of literature as well as primary qualitative data collection and analysis.

Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper
Prerequisites: completion of at least four courses counting towards the PHLH concentration
Enrollment Limit: 14
Enrollment Preferences: senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: No divisional credit
Attributes: EXPE Experiential Education Courses PHLH Core Courses

Spring 2021
SEM Section: 01 TBA Susan Godlonton
Winter Study

PHLH 99 (W) Independent Study: Public Health

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
The Quantitative/Formal Reasoning (QFR) requirement is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, use numbers comfortably, and employ the research tools necessary to analyze data lessens barriers to carrying out professional and economic roles. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Prior to senior year, all students must satisfactorily complete ONE QFR course. Students requiring extra assistance (as assessed during First Days) are normally placed into Mathematics 100/101/102, which is to be taken before fulfilling the QFR requirement.

ASTR 111  (F)  Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes remotely to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: This is a hybrid course. Lectures will be provided both in-person and for remote viewing. Students will work in small groups on discussions and calculations. Each group can choose to meet remotely or in class. Students can switch groups, and groups can switch format, as needed. Prof. Jaskot will meet with remote groups during their discussion to answer questions. The class has 6 afternoon labs, with both in-person and remote options. Remote observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, one hour-long test, a final project, lab reports, and an observing portfolio
Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent
Enrollment Limit: 28
Enrollment Preferences: potential Astronomy majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2020

LAB Section: H3  W 1:00 pm - 3:00 pm  Kevin Flaherty

ASTR 402  (S)  Between the Stars: The Interstellar Medium  (QFR)

The matter between the stars--the interstellar medium--tells the story of the past and future evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines,
collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using the equipment on our observing deck.

Class Format: plus observing projects

Requirements/Evaluation:  weekly problem sets, two in-class exams, 10-page final paper, and observing projects

Prerequisites:  ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  juniors and seniors

Expected Class Size:  6

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D3) (QFR)

Quantitative/Formal Reasoning Notes:  In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

BIMO 321  (F)(S)  Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Cross-listings:  BIMO 321  BIOL 321  CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.

Class Format: Lecture, three hours per week and laboratory, two hours per week. Hybrid course. Most lecture material will be presented asynchronously, and scheduled class time for both in-person and remote students will focus on discussion of the material and problem-solving.
Enrollment in the appropriate laboratory section is required for both in-person and remote students.

**Requirements/Evaluation:** Quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites:** BIOL 101 and CHEM 251/255 and CHEM 155/256

**Enrollment Limit:** 8/lab

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**BIOL 202 (F) Genetics (QFR)**

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping. This COVID year we will have in-person lectures and labs. Furthermore all students will have access to recorded lectures, notes, slides and handouts. For remote students, lab reports will also be required (writing and data analysis). Remote students will be able to collect data for some of the labs or otherwise will have access to class data for analyses.

Class Format: six hours per week

Requirements/Evaluation: bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations

Prerequisites: BIOL 101 and 102

Enrollment Limit: 60

Enrollment Preferences: Students planning on Biology major

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This course has a large quantitative component, mainly probabilities and basic statistics. Lab reports and data analyses are a large component of the grade.

**BIOL 203 (F) Ecology (QFR)**

Cross-listings: ENVI 203  BIOL 203

Primary Cross-listing

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and
animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). In Fall 2020, the course will use a hybrid model, with recorded lecture material available to all students. In person and remote class meetings will focus on problem sets and interactive case studies. Labs will be available in either in person or remote modalities. Remote participants will have the opportunity to collect their own data for some lab exercises, while in other cases will receive background information and media describing the data collection process. All students will be required to complete all data analyses and written lab reports.

Class Format: Six hours per week. All labs will be available in both remote and in-person modalities. All students (whether in person or remote) may choose their preferred modality for each lab module. Due to COVID-19 distancing requirements, some labs will require walking to field sites. The instructor will work with individual students to identify accommodations that support in person lab participation as needed.

Requirements/Evaluation: problem sets, lab reports, hour exams, and a final exam
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: students planning to pursue Biology and/or ENVI
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203 (D3) BIOL 203 (D3)

Quantative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component. Students are introduced to t-tests, Mann-Whitney U tests, chi-square analysis, and regression.

BIOL 210  (F)  Mathematical Biology  (QFR)
Cross-listings: BIOL 210 MATH 310

Secondary Cross-listing
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely
Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper
Prerequisites: MATH 250 and MATH 309, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

BIOL 222  (S) Essentials of Biochemistry  (QFR)
This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

Requirements/Evaluation: regular quizzes, final exam, writing assignments (including problem sets), and lab assignments

Prerequisites: BIO 101 and CHEM 156; not open to students who have taken BIO 321 or BIO 322

Enrollment Limit: 24

Enrollment Preferences: seniors who need to fulfill the biochemistry requirement for premedical school

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the biology major in addition to either BIO 321 or BIO 322; cannot be counted towards the BIMO concentration

Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

BIOL 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)

Cross-listings:  MATH 319  CHEM 319  BIOL 319  PHYS 319  CSCI 319

Primary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation:  lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites:  BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit:  12

Enrollment Preferences:  seniors, then juniors, then sophomores

Expected Class Size:  12

Grading:  yes pass/fail option, yes fifth course option

Unit Notes:  does not satisfy the distribution requirement for the Biology major

Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantative/Formal Reasoning Notes:  Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

BIOL 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Cross-listings:  BIMO 321  BIOL 321  CHEM 321

Secondary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.
Class Format: Lecture, three hours per week and laboratory, two hours per week. Hybrid course. Most lecture material will be presented asynchronously, and scheduled class time for both in-person and remote students will focus on discussion of the material and problem-solving. Enrollment in the appropriate laboratory section is required for both in-person and remote students.

Requirements/Evaluation: Quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 8/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

BIOL 322  (S)  Biochemistry II: Metabolism  (QFR)

Cross-listings: BIOL 322  CHEM 322  BIMO 322

Secondary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture three hours per week and laboratory three hours per week

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the

**BIOL 329 (F) Conservation Biology** (QFR)

**Cross-listings:** ENVI 339 BIOL 329

**Primary Cross-listing**

This course examines the application of population genetics, population ecology, community ecology, and systematics to the conservation of biological diversity. The overarching theme of the course is on the role of stochastic processes for small populations. Lecture/discussion topics will include extinction, the genetics of small populations, metapopulations, and importantly, conservation strategies. Labs will include a mixture of computer and lab projects.

**Class Format:** lecture and discussion, 3 hours per week; lab, 1.25 hours per week. students will be assigned to a lab section (block AA - either W or F from 1:30-2:45) during the first week of class.

**Requirements/Evaluation:** Evaluation will be based on lab assignments, two exams, discussion participation, and an independent project

**Prerequisites:** BIOL 203/ENVI 203, or BIOL 305, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Biology majors, seniors, and juniors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Satisfies the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 339 (D3) BIOL 329 (D3)

Quantitative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

**CHEM 114 (S) The Science Behind Materials: Shaping the Past and Future of Society** (QFR)

We are surrounded by materials. They have fulfilled human needs since ancient times. From Phoenician glass to flexible OLED displays, materials have impacted society and changed the way humans lead their lives. What makes materials the way they are? Why are some brittle while others are ductile? How can we design materials with specific properties that will solve tomorrow's problems? To answer these questions, we have to think about materials at the atomic scale, looking at how their smallest building blocks organize into specific structures. In this course, we will discuss how a material's structure relates to its properties. Then, we will dive into how different types of materials have been used in the past, how they were produced, the needs they satisfied, and how they shaped human civilization. This course will also cover both traditional and novel methods used to fabricate and analyze materials. We will talk about some of the cutting-edge research that materials scientists are working on today, concluding with an outlook to potential applications of emerging technologies.

**Requirements/Evaluation:** Weekly quizzes and problem sets, two exams, and a presentation
Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences.

Enrollment Limit: 20

Enrollment Preferences: juniors and seniors; not appropriate for CHEM, BIOL, PHYS majors, or for those who have taken CHEM 151, 153, or 155

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2021

LEC Section: 01    TBA     Amnon G Ortoll-Bloch

CHEM 117  (S)  Roses are Red, Violets are Blue: The Origins, Perception, and Impact of Color  (QFR)

Have you ever been tickled pink? Felt blue? Seen red?, Been green with envy? The course will consider color, starting with the physical and chemical origins of color (the electromagnetic spectrum, the absorption and emission of electromagnetic radiation, refraction, diffraction, incandescence, fluorescence, phosphorescence, iridescence). We will develop an understanding of chemical bonding and how that influences color. We will cover how we measure and describe color from a scientific perspective as well as how we can generate materials and devices with different color properties (liquid crystal displays, light emitting diodes for instance). From there we will discuss pigments used in works of art and textiles over time, the characteristics that make certain pigments suitable for particular applications. If we have time, we will touch on the historical and cultural impacts and meanings of different pigments and hues, the biological perception of color, and some color theory.

Class Format: There may be some brief laboratory exercises, which will require some extra time blocks, to be scheduled later.

Requirements/Evaluation: exams, problem sets, as well as a final paper; there may also be some brief laboratory exercises

Prerequisites: non-science students; students who have taken any introductory chemistry or physics courses are ineligible

Enrollment Limit: 20

Enrollment Preferences: first-years and sophomores

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course will require students to become comfortable with some quantitative descriptions of light and its interaction with matter.

Spring 2021

LEC Section: 01    TBA     Lee Y. Park

CHEM 151  (F)  Introductory Chemistry  (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibrium, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education.

Class Format: pre-recorded lectures, two hours per week; recitations, two 75-minute meetings per week (in-person or remote); laboratory, one 2-hour lab per week (in-person or remote)

Requirements/Evaluation: frequent electronic and written weekly problem set assignments, laboratory work and analysis, quizzes, two tests, and a final exam

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course
CHEM 153 (F) Concepts of Chemistry (QFR)

This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on data analysis, literature, scientific writing, ethics, and other skills critical to students' development as scientists. There may also be the opportunity for some hands-on laboratory experience for students who are on-campus. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: Lecture/discussion, three hours per week and laboratory, two hours per week

Requirements/Evaluation: quantitative weekly problem set assignments, laboratory work and reports, hour tests, and a final exam

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement); incoming first-year students are required to meet with a faculty member during First Days.

Enrollment Limit: 8/lab

Enrollment Preferences: incoming first year students also must meet with a faculty member during First Days

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 153 or its equivalent is a prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CHEM 155  (F)  Principles of Modern Chemistry  (QFR)

This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory/discussion periods will focus on data analysis, literature, scientific writing, ethics, and other skills critical to students’ development as scientists. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who want to explore the fundamental ideas of chemistry as part of their general education.

CHEM 156  (S)  Organic Chemistry: Introductory Level  (QFR)
This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: quantitative problem sets, laboratory performance, including written lab reports, three midterm exams, and a final exam

Prerequisites: CHEM 151 or 153 or 155 or placement exam or permission of instructor

Enrollment Limit: 16/lab

Cross-listings: MATH 319  CHEM 319  BIOL 319  PHYS 319  CSCI 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

CSCI 134 (F)(S) Introduction to Computer Science (QFR)

This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

Class Format: Each lab section will meet only once per week, on either Monday or Tuesday.

Requirements/Evaluation: weekly programming projects, weekly written homeworks, and two examinations.

Prerequisites: none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required

Enrollment Limit: 30(10/lab)

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: BIGH Courses COGS Interdepartmental Electives
CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)

This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Class Format: Lecture content will be through asynchronously viewed video modules. Three scheduled (MWF) course sections will be used for synchronous conference meetings. Two sections will be in-person and one will be remote. There will be 5 scheduled weekly lab sections that will be remote. Students should sign up for the lecture section, one conference, and one lab.

Requirements/Evaluation:  programming and written assignments, quizzes, examinations

Prerequisites: CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

Enrollment Limit: 60

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 60

Grading: yes pass/fail option,  no fifth course option

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 256  (F)(S)  Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include induction, divide-and-conquer, dynamic programming, and greedy algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Class Format: Lectures will be simultaneously recorded in classroom and broadcast over Zoom. Office hours will be done over Zoom. Some additional course materials (examples, solutions, definitions and core concepts, etc.) may be provided as prerecorded videos.

Requirements/Evaluation:  Problem sets, midterm and final examinations

Prerequisites:  CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit:  20

Enrollment Preferences:  Preference will be given to students who need the class in order to complete the major. Ties will be broken by seniority (seniors first, then juniors, etc.).

Expected Class Size:  20

Grading:  yes pass/fail option,  no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets in which students will formally prove statements about the behavior and performance of algorithms. In short, the entirety of the course is about applying abstract and mathematical reasoning to the way computers work.

CSCI 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antiseria to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantitative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

CSCI 333 (S) Storage Systems (QFR)

This course will examine topics in the design, implementation, and evaluation of storage systems. Topics include the memory hierarchy; ways that data is organized (both logically and physically); storage hardware and its influence on storage software designs; data structures; performance models; and system measurement/evaluation. Readings will be taken from recent technical literature, and an emphasis will be placed on identifying
and evaluating design trade-offs.

**Requirements/Evaluation:** programming assignments, quizzes, midterm examination, and a final project

**Prerequisites:** CSCI 136; CSCI 237 or permission of instructor

**Enrollment Limit:** 40

**Enrollment Preferences:** current Computer Science majors, students with research experience or interest

**Expected Class Size:** 40

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course will have students develop quantitative/formal reasoning skills through problem sets and programming assignments.

---

**CSCI 334  (F)(S)  Principles of Programming Languages  (QFR)**

This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

**Class Format:** There is no scheduled time for lectures. They will be available online for asynchronous viewing. Each conference section will meet once per week, on either Monday or Tuesday. Students should sign up for lecture and one conference.

**Requirements/Evaluation:** weekly problem sets and programming assignments, a midterm examination, and a final examination

**Prerequisites:** CSCI 136

**Enrollment Limit:** 20(5/conf)

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

**CSCI 357  (F)  Algorithmic Game Theory  (QFR)**

This course focuses on topics in game theory and mechanism design from a computational perspective. We will explore questions such as: how to design algorithms that incentivize truthful behavior, that is, where the participants have no incentive to cheat? Should we let drivers selfishly minimize their commute time or let a central algorithm direct traffic? Does Arrow's impossibility result mean that all voting protocols are doomed? The overarching goal of these questions is to understand and analyze selfish behavior and whether it can or should influence system design. Students will learn how to model and reason about incentives in computational systems both theoretically and empirically. Topics include types of equilibria,
efficiency of equilibria, auction design, network games, two-sided markets, incentives in computational applications such as file sharing and cryptocurrencies, and computational social choice.

**Class Format:** Synchronous in-class lectures will be broadcast live to remote students via zoom and recorded for asynchronous viewing. Lecture content may additionally be supplemented with prerecorded videos, and scheduled class time used as exercise or review sessions.

**Requirements/Evaluation:** weekly problem sets and/or programming assignments, two midterm exams, and a final project.

**Prerequisites:** CSCI 256 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** The course will consist problem sets and programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 361 (F)(S) Theory of Computation (QFR)

**Cross-listings:** MATH 361   CSCI 361

**Primary Cross-listing**

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** Lecture content will be through asynchronously viewed video modules. Two scheduled course sections will be used for synchronous conference meetings. One section (MR) will be in-person and the other section (TR) will be remote. Students should sign up for lecture and one conference.

**Requirements/Evaluation:** online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 20(10/sec)

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 361 (D3) CSCI 361 (D3)

**Quantative/Formal Reasoning Notes:** This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2021
CSCI 374  (F)(S) Machine Learning  (QFR)
This tutorial examines the design, implementation, and analysis of machine learning algorithms. Machine Learning is a field that derives from Artificial Intelligence, Statistics, and others, and aims to develop algorithms that will improve a system's performance. Improvement might involve acquiring new factual knowledge from data, learning to perform a new task, or learning to perform an old task more efficiently or effectively. This tutorial will cover examples of supervised learning algorithms (including Bayesian approaches, support vector machines, and neural networks -- both deep and traditional), unsupervised learning algorithms (including k-means and expectation maximization), and possibly reinforcement learning algorithms (such as Q learning and temporal difference learning). It will also introduce methods for the evaluation of learning algorithms, as well as topics in computational learning theory and ethics.

Class Format: Though this course will be offered remotely by the instructor, pairs of students on campus may choose to meet in person for their tutorial sessions. If so, a classroom will be scheduled for them by the instructor.

Requirements/Evaluation: presentations, problem sets, programming exercises, empirical analyses of algorithms, critical analysis of current literature; the final two weeks are focused on a project of the student's design.

Prerequisites: CSCI 136 and CSCI 256 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Computer Science majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course heavily relies on discrete mathematics, calculus, and elementary statistics. Students will be proving theorems, among many other mathematically oriented assignments. Additionally, they will be programming, which involves analytical and logical thinking.

Attributes: COGS Interdepartmental Electives

CSCI 377  (F)(S) Human Work in Computational Systems  (QFR)

Cross-listings: CSCI 377  STS 375

Primary Cross-listing

As far as we know, the technological singularity has not yet arrived. Therefore, humans remain a part of our current computation pipeline. However, the role humans play varies greatly: self-driving cars aim to have human involvement only in development and emergencies, whereas educational tools are built for constant human involvement. In this course, we broadly explore human work within computational systems through topics such as crowdsourcing, educational technology, citizen science, human computation, open-source software, micro-labor markets, and online gaming. Students should expect broad exposure to a wide variety of human computing topics and group projects on building and evaluating computational systems that use human work.

Class Format: Lectures will be held on Wednesday and Friday each week. Conference sections will each meet only once per week, on either Wednesday or Thursday. Students should sign up for the lecture section and one conference.

Requirements/Evaluation: Course projects, in-class group work/participation, weekly written homework assignments/readings.

Prerequisites: CSCI 136

Enrollment Limit: 18

Enrollment Preferences: Preference for current CS majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option
Materials/Lab Fee: $75 for purchase of software and work on crowdsourcing platforms.

Distributions:  (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 377 (D3) STS 375 (D2)

ECON 110  (F)(S) Principles of Microeconomics  (QFR)

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Class Format: Sections taught by Professors Bradburd and Chao will be strictly remote, with both asynchronous and synchronous components. All other sections will be taught in a hybrid format and will include in-person elements.

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms, final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

Expected Class Size: 30

Grading: yes pass/fail option,  no fifth course option

Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

Distributions:  (D2) (QFR)

Quantative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

ECON 120 (F)(S) Principles of Macroeconomics (QFR)

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Class Format: Fall semester sections will be entirely remote, with both asynchronous and synchronous components. Spring section formats are TBD.

Requirements/Evaluation: Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.

Prerequisites: ECON 110

Enrollment Limit: 30

Enrollment Preferences: First-year students and sophomores.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

---

ECON 213 (F) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 ENVI 213

Primary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade. Consideration of justice and equity will be woven through the whole semester.

Class Format: We will likely use small, focused discussion groups in combination with lectures

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include poster, presentation, brief writing assignment

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option
Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213 (D2) ENVI 213 (D2)

Fall 2020
LEC Section: H1    MW 6:45 pm - 8:00 pm    Sarah A. Jacobson

ECON 251  (F)(S)  Price and Allocation Theory  (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Class Format: Sections taught by Professors Jakiela and Sheppard in the fall will be strictly remote, with both asynchronous and synchronous components. Spring section formats are TBD.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes or short essays.

Prerequisites: ECON 110 and MATH 130 or its equivalent

Enrollment Limit: 20

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

Fall 2020

ECON 252  (F)(S)  Macroeconomics  (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Class Format: Sections taught by Professor Pedroni in the fall will be strictly remote, with both asynchronous and synchronous components. Professor Montiel's fall section will be taught in person. Spring section formats are TBD.

Requirements/Evaluation: problem sets and/or written assignments, midterm(s), and a final exam

Prerequisites: ECON 110 and 120 and MATH 130 or its equivalent

Enrollment Limit: 20
Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

ECON 255  (F)(S)  Econometrics  (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Class Format: Professor Ozier's fall section will be strictly remote, with both asynchronous and synchronous components. Professor Zimmerman's fall section will be taught in a hybrid format and will include in-person elements. Spring section formats are TBD.

Requirements/Evaluation: problem sets, two exams, group project, and possible additional assignments

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 20

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

ECON 360  (S)  Monetary Economics  (QFR)
This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be discussed include: What causes inflation? What are the channels through which monetary policy affects the economy? Why should central banks commit to policy rules? How do exchange rates respond to monetary policy? How did the gold standard work? And will cryptocurrencies replace the dollar? In addition, we will develop and learn how to simulate the "New Keynesian" macroeconomic model, which has become the standard framework for
monetary policy analysis for central banks around the world.

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

Enrollment Limit: 20

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.

Spring 2021

LEC Section: 01 TBA Kenneth N. Kuttner

ECON 376 (F) The Economics of Global Inequality (QFR)

This course focuses on the proximate and ultimate causes of global economic inequality across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about global economic inequality remain difficult to answer.

Class Format: This course will be taught in hybrid format in Fall 2020. All classroom lectures will be recorded and made available for remote learners unable to attend lectures virtually. Problem set assignments and exams may be submitted electronically as needed, and all exams will be "take home." Additional office hours will be offered to accommodate the needs of remote learners.

Requirements/Evaluation: Problem sets, one midterm exam, final exam.

Prerequisites: ECON 252 and either ECON 255 or STAT 346. ECON 251 recommended but not required.

Enrollment Limit: 20

Enrollment Preferences: Junior and senior economics majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and cross-country comparative development. Students will routinely work on sophisticated mathematical models of economic growth, involving the application of solution concepts from dynamic optimization and differential equations. Students will also be required to perform some econometric analyses in their assignments.

Attributes: GBST Economic Development Studies Electives

Fall 2020

LEC Section: H1 TF 1:30 pm - 2:45 pm Quamrul H. Ashraf

ECON 384 (F) Corporate Finance (QFR)
This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions. In the fall of 2020, special consideration will be given to how both financial and real economic shocks interact with firms’ financial decisions.

Class Format: Lecture / discussion; in the fall of 2020, some weeks we will meet for one 75-minute section (in person when possible) and break into smaller groups for one hour section groups (most likely remote). The timing of the sections will be arranged at the beginning of the semester.

Requirements/Evaluation: class participation, problem sets, short quizzes, short projects such as case write ups, a midterm exam, a final exercise and a research paper (possibly written with a partner)

Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

Enrollment Limit: 20

Enrollment Preferences: Senior Economics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.

Fall 2020

ECON 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Primary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China’s cap-and-trade programs, the EU ETS, and US state policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Class Format: Lectures, office hours and TA sessions will take place on Zoom.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 20

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Quantitative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.

Attributes: ENVI Environmental Policy MAST Interdepartmental Electives POEC Comparative POEC/Public Policy Courses
ECON 477 (F) Economics of Environmental Behavior  (QFR)

Cross-listings:  ECON 477  ENVI 376

Primary Cross-listing
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation:  regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites:  ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit:  15

Enrollment Preferences:  senior Economics majors

Expected Class Size:  15

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 477 (D2) ENVI 376 (D2)

Quantitative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

ECON 522 (F) Economics of Climate Change  (QFR)

Cross-listings:  ECON 522  ENVI 387  ECON 387

Secondary Cross-listing
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's cap-and-trade programs, the EU ETS, and US state policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Class Format: Lectures, office hours and TA sessions will take place on Zoom.

Requirements/Evaluation:  problem sets, midterm, group presentation, final exam

Prerequisites:  ECON 251, familiarity with statistics

Enrollment Limit:  20

Enrollment Preferences:  Junior/Senior Economics majors and CDE fellows

Expected Class Size:  20
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203 (D2) BIOL 203 (D2)

Quantitative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.

Attributes: ENVI Natural World Electives EVST Environmental Science EVST Living Systems Courses
Secondary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade. Consideration of justice and equity will be woven through the whole semester.

Class Format: We will likely use small, focused discussion groups in combination with lectures

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include poster, presentation, brief writing assignment

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213 (D2) ENVI 213 (D2)

Quantitative/Formal Reasoning Notes: We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

Attributes: ENVI Environmental Policy EVST Social Science/Policy MAST Interdepartmental Electives POEC Comparative POEC/Public Policy Courses

Fall 2020

LEC Section: H1  MW 6:45 pm - 8:00 pm  Sarah A. Jacobson

ENVI 339  (F) Conservation Biology  (QFR)

Cross-listings: ENVI 339  BIOL 329

Secondary Cross-listing

This course examines the application of population genetics, population ecology, community ecology, and systematics to the conservation of biological diversity. The overarching theme of the course is on the role of stochastic processes for small populations. Lecture/discussion topics will include extinction, the genetics of small populations, metapopulations, and importantly, conservation strategies. Labs will include a mixture of computer and lab projects.

Class Format: lecture and discussion, 3 hours per week; lab, 1.25 hours per week. students will be assigned to a lab section (block AA - either W or F from 1:30-2:45) during the first week of class.

Requirements/Evaluation: Evaluation will be based on lab assignments, two exams, discussion participation, and an independent project

Prerequisites: BIOL 203/ENVI 203, or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Biology majors, seniors, and juniors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 339 (D3) BIOL 329 (D3)

Quantitative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present
results in graphical and statistical forms.

**MATH 119 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)**

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

**Requirements/Evaluation:** Homework, writing, class participation.

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** all students will have an equal chance; if possible none will be turned away.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** We will discuss mathematical models and use statistics to analyze data.

---

**MATH 130 (F)(S) Calculus I (QFR)**

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

**Requirements/Evaluation:** Weekly homework and quizzes, 2 exams during the semester, and one final

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

**Enrollment Limit:** 30

**Enrollment Preferences:** first-year students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor
Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This a calculus course.

MATH 140  (F)(S)  Calculus II  (QFR)
Mastery of calculus requires understanding how integration computes areas and business profit and acquiring a stock of techniques. Further methods solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams
Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor
Enrollment Limit: 30
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above
Distributions: (D3) (QFR)

Fall 2020
LEC Section: R1  TF 1:30 pm - 2:45 pm  Josh Carlson
LEC Section: R2  TF 3:15 pm - 4:30 pm  Josh Carlson

Spring 2021
LEC Section: 01  TBA  Josh Carlson

MATH 150  (F)(S)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations. Note: This course will be taught via flipped-course method, an instructional strategy reversing the traditional learning environment by delivering instructional content outside of the classroom. This includes prerecorded lectures along with questions that students must watch and answer prior to attending class. Class time include synchronous meetings clarifying concepts and working in small groups through challenging problems with the support of the professor and peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this course.

Requirements/Evaluation: Video readiness assessments, problem sets, exams, and participation.
Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.
Distributions: (D3) (QFR)
MATH 151 (F) Multivariable Calculus (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Class Format: Hybrid; short lectures will be asynchronous, with longer synchronous in-person problem sessions (these will be available remotely, and uploaded later for asynchronous viewing)

Requirements/Evaluation: homework, quizzes, and exams

Prerequisites: AP BC 3 or higher or integral calculus with infinite series

Enrollment Limit: 30

Enrollment Preferences: First-years, sophomores, and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course builds quantitative skills
Enrollment Limit: 30
Enrollment Preferences: As determined by instructor.
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course involve developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

Fall 2020

LEC Section: 01   TBA   Allison Pacelli

MATH 210  (S) Mathematical Methods for Scientists  (QFR)
Cross-listings: PHYS 210  MATH 210

Secondary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week
Requirements/Evaluation: several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210 (D3) MATH 210 (D3)

Spring 2021
LEC Section: 01   TBA   Frederick W. Strauch

MATH 250  (F)(S) Linear Algebra  (QFR)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely.
Requirements/Evaluation: homework, exams, and possibly short remote meetings outside of class.
Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 30
Enrollment Preferences: Students who have officially declared a major that requires Math 250.
MATH 307 (S) Computational Linear Algebra (QFR)
Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; and Monte Carlo techniques. This course could also be considered a course in numerical analysis or computational science.

Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Prerequisites: MATH 250, some elementary computer programming experience is strongly recommended
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Spring 2021
LEC Section: 01 TBA Chad M. Topaz

MATH 309 (F) Differential Equations (QFR)
Ordinary differential equations (ODE) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODE from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, constant coefficient linear equations, and power series solutions. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain some information about the behavior of the ODE without explicitly knowing the solution.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely
Requirements/Evaluation: quizzes/exams, problem sets, participation, and possible activities
Prerequisites: MATH 150/151 and MATH 250
Enrollment Limit: 20
Enrollment Preferences: discretion of the instructor
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: 300-level mathematics course
MATH 310 (F) Mathematical Biology (QFR)
Cross-listings: BIOL 210 MATH 310
Primary Cross-listing
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely
Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper
Prerequisites: MATH 250 and MATH 309, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 210 (D3) MATH 310 (D3)
Quantative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.
Attributes: PHLH Methods in Public Health

Fall 2020
LEC Section: R1 TR 11:30 am - 12:45 pm Julie C. Blackwood

MATH 312 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)
The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.
Requirements/Evaluation: Class participation, writing, homework problems.
Prerequisites: Linear algebra recommended.
Enrollment Limit: none
Enrollment Preferences: all students will have an equal chance; if possible none will be turned away.
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.
MATH 313 (S) Introduction to Number Theory (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will be using an active learning method, an instructional strategy reversing the traditional learning environment by supplying instructional content outside of the classroom. This will include reading the textbook and completing other assigned activities prior to attending class. Class time will be spent clarifying concepts and working in small groups through challenging problems with the support of the professor and peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this class.

Class Format: This course will employ an active learning method rather than the traditional lecture. Please see the course description for details.

Requirements/Evaluation: Daily class participation (individual and group based), weekly homework and quizzes, in class exams, and a cumulative final.

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: All are welcome regardless of major or year. In case of over-enrollment, preference will be given to those needing the course for graduation.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2021
LEC Section: 01 TBA Eva Goedhart

MATH 315 (S) Methods for Solving Diophantine Equations (QFR)
A Diophantine equation is an equation with integer (or rational) coefficients that is to be solved in integers (or rational numbers). A focus of study for hundreds of years, Diophantine analysis remains a vibrant area of research. It has yielded a multitude of beautiful results and has wide ranging applications in other areas of mathematics, in cryptography, and in the natural sciences. In this project-based tutorial, we will focus on studying and implementing various methods for solving previously unsolved infinite families of Diophantine equations. Depending on their interests, students may choose one or several methods to apply to open problems in the field.

Requirements/Evaluation: Weekly homework and oral presentations, and a final written project manuscript that will be continually edited all semester (the length of which will depend on the mathematical content and choice of topic)

Prerequisites: MATH 250 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Sophomores, Juniors, and Seniors based on a short questionnaire of interests.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2021
TUT Section: T1 TBA Eva Goedhart

MATH 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)
What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

MATH 350 (F)(S) Real Analysis (QFR)

Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what does that actually mean? More fundamentally, what is the definition of a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions on them. Along the way we’ll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet’s and Riemann’s rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

Class Format: Discussion-based course held remotely.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Seniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Math

MATH 351 (S) Applied Real Analysis (QFR)
Real analysis or the theory of calculus-derivatives, integrals, continuity, convergence--starts with a deeper understanding of real numbers and limits. Applications in the calculus of variations or “infinite-dimensional calculus” include geodesics, harmonic functions, minimal surfaces, Hamilton’s action and Lagrange’s equations, optimal economic strategies, non-Euclidean geometry, and general relativity.

Requirements/Evaluation: exams, homework and quizzes
Prerequisites: MATH 150 and MATH 250, or permission of instructor
Enrollment Limit: 50
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Core mathematics major course with daily problem sets.

Spring 2021
LEC Section: 01 TBA Stewart D. Johnson

MATH 355 (F)(S) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Class Format: Remote lectures. TA sessions will be held in person. If taken pass/fail, this course does not count towards the Mathematics major.
Requirements/Evaluation: problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: Questionnaires.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: 300-level math course

MATH 361 (F)(S) Theory of Computation (QFR)
Cross-listings: MATH 361 CSCI 361
Secondary Cross-listing
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: Lecture content will be through asynchronously viewed video modules. Two scheduled course sections will be used for synchronous conference meetings. One section (MR) will be in-person and the other section (TR) will be remote. Students should sign up for lecture and one
**MATH 361 (D3) Topology** (QFR)

In Real Analysis you learned about metric spaces -- any set of objects endowed with a way of measuring distance -- and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it has become a vital part of data analysis and is also connected to many areas of math and physics. This course is excellent preparation for graduate programs in mathematics.

**Requirements/Evaluation:** homework, tutorials, and exams

**Prerequisites:** MATH 350 or 351; not open to students who have taken MATH 323. Familiarity with basic group theory recommended, but not required.

**Enrollment Limit:** 30

**Enrollment Preferences:** Juniors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Math

---

**MATH 391 (F) Introduction to computer algebra** (QFR)

Students will learn new mathematics in the context of computer-based exposition, experimentation, and interaction. They will gain proficiency with Sage, GAP, Macaulay2, or Mathematica, and possibly one of the more-specialized systems SnapPea, kenzo, magma, MATLAB, Perseus, coq, etc. Individuals and teams will build interactive demonstrations of mathematical theorems, which will then be appreciated by the instructor and the rest of
the class. No prior programming experience is expected.

Class Format: Class will be held online, but there will be recorded components, asynchronous interactive components, and outside-of-class small-group online meetings.

Requirements/Evaluation: exams, homework, projects

Prerequisites: Math 355 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: math majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Mathematical programming requires complete synthesis of abstract concepts to produce computer code, which is necessarily formal.

Fall 2020

LEC Section: R1    TR 6:45 pm - 8:00 pm    John D. Wiltshire-Gordon

MATH 392  (S)  Undergraduate Research Topics in Graph Theory  (QFR)

Graph theory is a vibrant area of research with many applications to the social sciences, psychology, and economics. In this tutorial we focus on two topics of mathematical research in graph theory: evasion-pursuit games on graphs and domination theory. Students in this project-based tutorial will select among the presented topics, and will begin original research on an open problem in the field. Student assessment is based on problem sets, drafts of research project manuscript, and a final oral class presentation.

Requirements/Evaluation: homework assignments, oral presentations, and written project manuscript

Prerequisites: MATH 355 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: programming experience, students with interests in the intersection of combinatorics and graph theory

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Spring 2021

TUT Section: T1    TBA    Pamela E. Harris

MATH 402  (F)  Measure Theory and Hilbert Spaces  (QFR)

How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this set? What's the dimension? In this course we'll come up with precise ways to measure size -- length, area, volume, dimension -- that apply to a broad array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields like quantum mechanics and machine learning. This material provides good preparation for graduate studies in mathematics, statistics and economics.

Class Format: Discussion-based course held remotely.

Requirements/Evaluation: performance on homework assignments and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Seniors
MATH 408  (F)  L-Functions and Sphere Packing  (QFR)
Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

Requirements/Evaluation: Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

Prerequisites: Math 350 or 351

Enrollment Limit: 40

Enrollment Preferences: Senior math majors, students planning on graduate study in a STEM field

Expected Class Size: 20

Gradings: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This is a 400 level math class

Fall 2020
LEC Section: R1    TF 3:15 pm - 4:30 pm    Leo Goldmakher
MATH 433  (S)  Mathematical Modeling  (QFR)
Mathematical modeling means (1) translating a real-life problem into a mathematical object, and (2) studying that object using mathematical
techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology,
economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for
students who have a strong enthusiasm for applied mathematics.

Class Format: discussion, research

Requirements/Evaluation: writing assignments, modeling activities, presentations, research project
Prerequisites: MATH 250, MATH 309 or similar, and some experience with computer programming (equivalent to CSCI 134 or MATH 307)
Enrollment Limit: 24
Enrollment Preferences: Professor's discretion
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3)  (QFR)

MATH 434  (F)  Applied Dynamics and Optimal Control  (QFR)
We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might
manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and
difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin's maximum principle and
Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic
models from these fields to motivate our study.

Requirements/Evaluation: exams and homework assignments
Prerequisites: MATH 209 or PHYS 210, and MATH 350 or 351, or permission of the instructor
Enrollment Limit: 20
Enrollment Preferences: Preference will be given to senior math majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)

MATH 456  (F)  Representation Theory  (QFR)
Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of
structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the
representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a
variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.
MATH 474 (S) Tropical Geometry (QFR)
This course offers an introduction to tropical geometry, a young subject that has already established deep connections between itself and pure and applied mathematics. We will study a rich variety of objects arising from polynomials over the min-plus semiring, where addition is defined as taking a minimum, and multiplication is defined as usual addition. We will learn how these polyhedral objects connect to other areas of mathematics like algebraic geometry, and how they can be applied to solve problems in scheduling theory, phylogenetics, and other diverse fields.

Requirements/Evaluation: participation, problem sets, quizzes, exams, and a final project
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: senior Math majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course builds quantitative skills

PHYS 131 (F) Introduction to Mechanics (QFR)
We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Class Format: hybrid
Requirements/Evaluation: exams, labs, and weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead
Enrollment Limit: 30
Enrollment Preferences: seniority
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
Unit Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This class will have weekly problem sets requiring substantial quantitative reasoning.

Fall 2020

PHYS 132 (S) Electromagnetism and the Physics of Matter (QFR)
This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

Requirements/Evaluation: weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Spring 2021

LEC Section: 01  TBA  Henrik Ronellenfitsch

PHYS 141 (F) Mechanics and Waves (QFR)
This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: This will be a hybrid course with both recorded and in-person lecture/demonstration material, both "at home" and in-person hands-on/laboratory exercises, problem-solving group sessions and office hours (available both in person and remote), as well as several short tests/quizzes and a final exam.

Requirements/Evaluation: weekly problem sets, labs, three or more short quizzes/tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: high school physics and MATH 130 or equivalent placement, or permission of the instructor

Enrollment Limit: 30

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.
PHYS 142 (S) Foundations of Modern Physics (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires we rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, two hours weekly; problem-solving conference session, one hour weekly; laboratory, 2-3 hours most weeks, alternating between 'hands-on' and computational sessions (limit 22 per lab, 18 per conference section)

Requirements/Evaluation: weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 18 per CON

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.

Spring 2021

LEC Section: 01  TBA  Charlie Doret

PHYS 151 (F) Seminar in Modern Physics (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same basic material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: This will be a hybrid course format, with some online and some in-person components. All in-person components will have a remote option. Lecture 3 hours per week (synchronous interactive video or in-person), Laboratory/Conference section 2.5 hours per week (synchronous interactive video or in-person). Compared to previous years, some of the laboratory activities in the course will be replaced by assignments that can be completed remotely.

Requirements/Evaluation: class participation, weekly lab/conference assignments, weekly problem sets, final paper, two hour-exams and a final exam;

Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

Enrollment Limit: 18

Enrollment Preferences: first-years

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this is a small seminar designed for first-year students who have placed out of PHYS 141
Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: besides the final paper, all assignments in the course have a substantial quantitative component

Fall 2020

LAB Section: H2  MR 1:30 pm - 2:45 pm  Catherine Kealhofer
LAB Section: H3  MR 3:15 pm - 4:30 pm  Catherine Kealhofer

PHYS 201 (F) Electricity and Magnetism (QFR)
The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

Class Format: Hybrid: online with some in-person components. All in-person components will have a remote option. Lecture: three hours per week. Laboratory/conference section: two hours per week.

Requirements/Evaluation: problem sets, labs/conference section assignments, two take-home midterms, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

Enrollment Limit: 10 per lab

Enrollment Preferences: prospective physics majors, then by seniority

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

LAB Section: H4  T 3:30 pm - 5:30 pm  David R. Tucker-Smith

PHYS 202 (S) Vibrations, Waves and Optics (QFR)
Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

Class Format: lecture three hours per week and laboratory three hours per week

Requirements/Evaluation: problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20
PHYS 210  (S) Mathematical Methods for Scientists  (QFR)

Cross-listings: PHYS 210  MATH 210

Primary Cross-listing

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and on weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210 (D3) MATH 210 (D3)

Spring 2021

LEC Section: 01  TBA  Graham K. Giovanetti

PHYS 301  (F) Quantum Physics  (QFR)

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics. After a brief discussion of historical origins of the quantum theory, we introduce the Schrödinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

Class Format: Phys 301 will be taught in a hybrid format, with in-person and remote elements. Remote options will be available for in-person components. Lecture will meet for 3 hours weekly, with synchronous elements wherever feasible (either in-person or via videoconference). Laboratories will meet for 2 hours weekly, with some additional individual preparation required, with laboratory groups being mixed between in-person and remote students.

Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 20

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets,
examinations, and laboratories.

PHYS 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)
Cross-listings: MATH 319  CHEM 319  BIOL 319  PHYS 319  CSCI 319
Secondary Cross-listing
What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells.
Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.
Enrollment Limit: 12
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 12
**Grading:** yes pass/fail option, yes fifth course option

**Spring 2021**

**SEM Section: 01** TBA Lois M. Banta

**PHYS 321 (S) Introduction to Particle Physics (QFR)**

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

**Class Format:** three hours a week

**Requirements/Evaluation:** weekly problem sets, a midterm exam, and a final exam

**Prerequisites:** PHYS 301, which may be taken concurrently, plus permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** 1. Students that have taken Phys 301. 2. By seniority.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

---

**Spring 2021**

**LEC Section: 01** TBA David R. Tucker-Smith

**PHYS 402 (S) Applications of Quantum Mechanics (QFR)**

This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

**Requirements/Evaluation:** weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 301

**Enrollment Limit:** 10 per sec

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

---

**Spring 2021**

**TUT Section: T1** TBA Catherine Kealhofer
PHYS 411  (F) Classical Mechanics  (QFR)
This course will explore advanced topics in classical mechanics including the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, non-linear dynamics and chaos, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), and rigid-body rotations. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet once a week as a whole to discuss new material.
Class Format: hybrid
Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209
Enrollment Limit: 10/section
Enrollment Preferences: majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

Fall 2020
TUT Section: HT1  F 1:30 pm - 2:45 pm  Henrik Ronellenfitsch, Kevin M. Jones
TUT Section: HT2  F 1:30 pm - 2:45 pm  Henrik Ronellenfitsch, Kevin M. Jones
TUT Section: HT3  F 1:30 pm - 2:45 pm  Henrik Ronellenfitsch, Kevin M. Jones

POEC 253  (F) Empirical Methods in Political Economy  (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.
Class Format: The class will be remote. I will present the material using a mix of synchronous and asynchronous methods. We will use the synchronous time for discussion and Q and A as well.
Requirements/Evaluation: Problem sets, group project, midterm exam, final exam
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Limit: 20
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics and political science.
Attributes: EVST Methods Courses  PHLH Statistics Courses  POEC Required Courses

Fall 2020
PSYC 201  (F)(S)  Experimentation and Statistics  (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis.

Class Format: Prof. Savitsky's section will be taught remotely. Synchronous lectures and lab meetings will be recorded for those who can't attend but synchronous participation is preferred, especially in lab. In Prof. Cone's section, many lectures will be held via synchronous, remote gatherings. Periodically, students who can meet in person will gather for discussions, problem solving sessions, and lab work with others joining remotely. You must register for lab and lecture with the same instructor.

Requirements/Evaluation:  research reports, exams, and weekly problem sets
Prerequisites:  PSYC 101; not open to first-year students except with permission of instructor
Enrollment Limit:  12
Enrollment Preferences:  Psychology majors
Expected Class Size:  12
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D2)  (QFR)

Quantative/Formal Reasoning Notes: This course has weekly problem sets focused on experimental design and quantitative data analysis. Students will design and conduct several experiments, analyze the data, and report their findings.

STAT 101  (F)(S)  Elementary Statistics and Data Analysis  (QFR)
It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: Hybrid format with both synchronous and asynchronous elements.
Requirements/Evaluation:  quizzes and exams and course project
Prerequisites:  MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit:  25
Enrollment Preferences:  sophomores, juniors, and seniors
Expected Class Size:  20
Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  students with MATH130 but no statistics should enroll in STAT161; students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161/201 should enroll in STAT 202 (if no calc background) or 302 (MATH140 prereq).
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes: It is a quantitative course.
STAT 161 (F)(S) Introductory Statistics for Social Science  (QFR)

This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences and sciences. Topics include exploratory data analysis, elements of probability theory, basic statistical inference, and introduction to statistical modeling. The course focuses on the application of statistics tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation: students complete homework, multiple choice quizzes and exams (including remote oral exams), but also present applied projects. Students can expect to spend time getting familiar with statistical software.

Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent

Enrollment Limit: 25

Enrollment Preferences: Economics majors, sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: students with calculus background should consider STAT 201, 202 or 302 instead. Students without any calculus background should consider STAT 101. Please refer to the placement chart on the department website for more information.

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: Course analyzes data

Attributes:  PHLH Statistics Courses

STAT 201 (F)(S) Statistics and Data Analysis  (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: Hybrid format: lecture material will be prerecorded, and you will be asked to attend (in person or virtually) one class session a week, during which we will briefly review lecture materials, allow time for questions, and work through a lab in RStudio to practice using the techniques discussed during that week’s lectures.

Requirements/Evaluation: weekly homework; quizzes and exams

Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

Enrollment Limit: 25

Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors

Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202 (if no calc background) or STAT 302 (MATH 140 prereq). Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Students will learn to interpret, choose, carry out, and communicate analyses of data.

STAT 202  (F)(S)  Introduction to Statistical Modeling  (QFR)
Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: Introductory lectures will be available asynchronously as text and video; synchronous sessions will discuss questions from lecture, dive further into the material, and work on examples. You'll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. The professor and TAs will also offer optional synchronous office hours/review sessions.

Requirements/Evaluation: Homework problems; quizzes; a final project (on a topic that interests you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

Prerequisites: AP Statistics 4 or 5, or STAT 101, or STAT 161, or STAT 201, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Prospective Statistics majors and more senior students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 302  (F)(S)  Applied Statistical Modeling  (QFR)
Data may come from various sources and studies with different purpose of analysis. Statistical modeling provides a unified framework to embrace different data types, and focuses on the goals of understanding relationships, assessing differences and making predictions. We will explore different types of statistical models (linear regression, ANOVA, logistic regression etc), and focus on their conditions, the interactive modeling process, as well
as the statistical inference tools for drawing conclusions from them. Throughout the course, real datasets will be modeled for interesting questions about the world, and the limitations will be addressed as well.

Class Format: This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements.

Requirements/Evaluation: weekly homework assignments (consist of both theoretical and applied questions), short quizzes, possibly two exams and a course project.

Prerequisites: One of the following: i) STAT 201; ii) MATH 140 and STAT 101/161/AP Statistics 4/5; iii) Permission of instructor

Enrollment Limit: 19

Enrollment Preferences: students interested in statistics which have solid background in math and stat

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

STAT 310  (F)  Data Visualization  (QFR)

This course is about preparing, visualizing, reporting and presenting different types of data. We will start with creating common plots (e.g., barcharts, histograms, density plots, boxplots, time series and lattice plots), but also discuss visualizing results of statistical models, such as linear or logistic regression models. We will use the ggplot library in R but then switch to the plotly library for interactive graphs with mouse-over and click events. Using R's shiny and DT libraries, we will learn how to create and publish web-apps and dashboards that explore datasets and support online filtering. We will end the class with creating web apps that contain multiple graphs or maps which react to user inputs (such as selecting which variables to plot) or provide real time monitoring of streaming data. Throughout, we will use version control software (Github) to organize and keep track of our code. This course will be taught in a semi-flipped style. While the instructor will introduce certain topics, students will often be responsible for reading material ahead of time and then work individually or in pairs to reproduce material or implement it on their own data.

Requirements/Evaluation: Grading will almost entirely be based on class participation, individual and team-work, project presentations and the student's portfolio.

Prerequisites: Stat 201/202/302; Good knowledge of R

Enrollment Limit: 15

Enrollment Preferences: Preference may be given to stats majors who need the course in order to graduate, but then random selection.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course teaches how to organize and present data graphically, but also how to critique existing data visualizations.

Fall 2020

LEC Section: R1  MW 10:00 am - 11:15 am  Bernhard Klingenberg

STAT 315  (S)  Applied Machine Learning  (QFR)

How does Netflix recommend films based on your viewing history? How does Facebook group its users and send out targeted ads? How did Google select from thousands of search terms to predict flu? Machine learning (ML) is a rapidly growing field that is concerned with algorithms and models to find patterns in data and solve these practical problems at the intersection between statistics, data science and computer science. This course provides a broad introduction to ideas and methods in machine learning, with emphasis on statistical intuitions and practical data analysis. Topics including regularized regression, SVM, supervised/unsupervised learning, text analysis, neural networks will be covered. Students will use R
extensively throughout the course while getting introduced to some ML tools in Python.

Requirements/Evaluation: weekly homework, one class project, and two or three exams

Prerequisites: MATH 140, and STAT 201/202, or equivalent; or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Statistics majors, seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

STAT 335 (S) Biostatistics and Epidemiology (QFR)

Epidemiology, a public health discipline, is the study of disease and disability in human populations. Biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and a brief introduction to regression with correlated data.

Requirements/Evaluation: evaluation will be primarily based on weekly homework, two midterm exams, an in-class final exam, and a data analysis project

Prerequisites: STAT 201 or 202 and MATH 140, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Junior and senior statistics majors; public health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics course with a focus on quantitative methods relevant to public health studies.

Spring 2021

LEC Section: 01 TBA Richard D. De Veaux

STAT 355 (F) Multivariate Statistical Analysis (QFR)

To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at a time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

Class Format: This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements

Requirements/Evaluation: homework, project/presentations, possibly one or two exams.

Prerequisites: MATH 250, and STAT 346 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: students interested in statistics which have solid background in math and stat

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Fall 2020

LEC Section: H1 WF 1:30 pm - 2:45 pm Xizhen Cai

STAT 356 (S) Time Series Analysis (QFR)

Time series--data collected over time--crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.

Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams

Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor

Enrollment Limit: 30

Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)

Spring 2021
LEC Section: 01   TBA   Bernhard Klingenberg

STAT 372  (F)  Longitudinal Data Analysis: Modeling Change over Time  (QFR)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Class Format: Hybrid format. Approximately 2/3 of class time will be lecture (in person for students who are on campus, recorded for remote students). All synchronous students (whether in person or online) will attend a remote lab/discussion section each week. Asynchronous options will be provided for students unable to participate synchronously.

Requirements/Evaluation:  performance on exams, homework, and a project
Prerequisites:  STAT 201 and STAT 346
Enrollment Limit:  15
Enrollment Preferences:  junior and senior Statistics majors
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  The course will cover a variety of statistical analysis methods for longitudinal data.
Attributes:  PHLH Statistics Courses

Fall 2020

STAT 442  (S)  Statistical Learning and Data Mining  (QFR)
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today’s data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Requirements/Evaluation:  homeworks and projects
Prerequisites:  STAT 346 or permission of instructor
STAT 465 (F) Bayesian Statistics  (QFR)
Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. Indeed, the Bayesian approach is now recognized across scientific disciplines as a modern and powerful tool. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to performing Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods, before moving on to multivariate sampling methods and methodology. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing. The course will culminate in an independent Bayesian research project.

Requirements/Evaluation:  Homework, exams, and project
Prerequisites:  STAT 346, or permission of instructor

Spring 2021
LEC Section: 01   TBA   Xizhen Cai

STS 375 (F)(S) Human Work in Computational Systems  (QFR)
As far as we know, the technological singularity has not yet arrived. Therefore, humans remain a part of our current computation pipeline. However, the role humans play varies greatly: self-driving cars aim to have human involvement only in development and emergencies, whereas educational tools are built for constant human involvement. In this course, we broadly explore human work within computational systems through topics such as crowdsourcing, educational technology, citizen science, human computation, open-source software, micro-labor markets, and online gaming. Students should expect broad exposure to a wide variety of human computing topics and group projects on building and evaluating computational systems that use human work.

Class Format:  Lectures will be held on Wednesday and Friday each week. Conference sections will each meet only once per week, on either Wednesday or Thursday. Students should sign up for the lecture section and one conference.
Requirements/Evaluation:  Course projects, in-class group work/participation, weekly written homework assignments/readings.
Prerequisites:  CSCI 136

Fall 2020

THEA 310  (F) Playwriting: Facing the Blank Page  (WS) (QFR)

I believe that after food and shelter, humans need stories to survive. This class will focus on each writer's dreams, fears and desires and how to turn them into plays. Students will explore the fundamentals of playwriting. This will include writing exercises, weekly pages, hearing your scenes out loud and at the end of the semester the first draft of a new play.

Class Format: Hybrid

Requirements/Evaluation: Upon completion of the semester, you will be able to demonstrate and ability to: draft, rewrite, discuss and continue to rewrite; engage verbal discussion of your work and your colleagues work; place the work in context of other artists and artistic pursuits; place work in context of culture and society; complete a full draft of your play.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Theater majors first, then Concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS) (QFR)

Writing Skills Notes: You are expected to attend class, to keep up with required writing, readings drafts pages to class and participate in all discussions.

Quantitative/Formal Reasoning Notes: You are also expected to think critically and articulate your thoughts.

SEM Section: H1  RF 3:15 pm - 4:30 pm

ASTR 111  (F) Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes remotely to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.
Class Format: This is a hybrid course. Lectures will be provided both in-person and for remote viewing. Students will work in small groups on discussions and calculations. Each group can choose to meet remotely or in class. Students can switch groups, and groups can switch format, as needed. Prof. Jaskot will meet with remote groups during their discussion to answer questions. The class has 6 afternoon labs, with both in-person and remote options. Remote observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, one hour-long test, a final project, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2020

ASTR 402  (S) Between the Stars: The Interstellar Medium  (QFR)
The matter between the stars--the interstellar medium--tells the story of the past and future evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using the equipment on our observing deck.

Class Format: plus observing projects

Requirements/Evaluation: weekly problem sets, two in-class exams, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

BIMO 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.

Class Format: Lecture, three hours per week and laboratory, two hours per week. Hybrid course. Most lecture material will be presented asynchronously, and scheduled class time for both in-person and remote students will focus on discussion of the material and problem-solving. Enrollment in the appropriate laboratory section is required for both in-person and remote students.

Requirements/Evaluation: Quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 8/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 202 (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping. This COVID year we will have in-person lectures and labs. Furthermore all students will have access to recorded lectures, notes, slides and handouts. For remote students, lab reports will also be required (writing and data analysis). Remote students will be able to collect data for some of the labs or otherwise will have access to class data for analyses.

Class Format: six hours per week

Requirements/Evaluation: bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations

Prerequisites: BIOL 101 and 102

Enrollment Limit: 60

Enrollment Preferences: Students planning on Biology major
Expected Class Size: 60
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course has a large quantitative component, mainly probabilities and basic statistics. Lab reports and data analyses are a large component of the grade.

BIOL 203 (F) Ecology (QFR)
Cross-listings: ENVI 203 BIOL 203
Primary Cross-listing

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). In Fall 2020, the course will use a hybrid model, with recorded lecture material available to all students. In person and remote class meetings will focus on problem sets and interactive case studies. Labs will be available in either in person or remote modalities. Remote participants will have the opportunity to collect their own data for some lab exercises, while in other cases will receive background information and media describing the data collection process. All students will be required to complete all data analyses and written lab reports.

Class Format: Six hours per week. All labs will be available in both remote and in-person modalities. All students (whether in person or remote) may choose their preferred modality for each lab module. Due to COVID-19 distancing requirements, some labs will require walking to field sites. The instructor will work with individual students to identify accommodations that support in person lab participation as needed.

Requirements/Evaluation: problem sets, lab reports, hour exams, and a final exam
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: students planning to pursue Biology and/or ENVI
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203 (D3) BIOL 203 (D3)
Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used...
to describe ecological systems. The laboratory section of this course also contains a large data analysis component. Students are introduced to t-tests, Mann-Whitney U tests, chi-square analysis, and regression.

**BIOL 210  (F) Mathematical Biology  (QFR)**

**Cross-listings:** BIOL 210  MATH 310

**Secondary Cross-listing**

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Class Format:** Unless circumstances change, students will have the option of taking the course in person or remotely

**Requirements/Evaluation:** problem sets, quizzes/exams, participation, final project and paper

**Prerequisites:** MATH 250 and MATH 309, or permission of instructor

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**BIOL 222  (S) Essentials of Biochemistry  (QFR)**

This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

**Requirements/Evaluation:** regular quizzes, final exam, writing assignments (including problem sets), and lab assignments

**Prerequisites:** BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322

**Enrollment Limit:** 24

**Enrollment Preferences:** seniors who need to fulfill the biochemistry requirement for premedical school

**Expected Class Size:** 24
BIOL 305 (S)  Evolution  (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors
Expected Class Size: 24
Grading: yes pass/fail option, yes fifth course option

BIOL 319  (S)  Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)

Cross-listings: MATH 319  CHEM 319  BIOL 319  PHYS 319  CSCI 319

Primary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12
Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

CHEM 114  (S) The Science Behind Materials: Shaping the Past and Future of Society  (QFR)
We are surrounded by materials. They have fulfilled human needs since ancient times. From Phoenician glass to flexible OLED displays, materials have impacted society and changed the way humans lead their lives. What makes materials the way they are? Why are some brittle while others are ductile? How can we design materials with specific properties that will solve tomorrow's problems? To answer these questions, we have to think about materials at the atomic scale, looking at how their smallest building blocks organize into specific structures. In this course, we will discuss how a material's structure relates to its properties. Then, we will dive into how different types of materials have been used in the past, how they were produced, the needs they satisfied, and how they shaped human civilization. This course will also cover both traditional and novel methods used to fabricate and analyze materials. We will talk about some of the cutting-edge research that materials scientists are working on today, concluding with an outlook to potential applications of emerging technologies.
Requirements/Evaluation: Weekly quizzes and problem sets, two exams, and a presentation
Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences.
Enrollment Limit: 20
Enrollment Preferences: juniors and seniors; not appropriate for CHEM, BIOL, PHYS majors, or for those who have taken CHEM 151, 153, or 155
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2021

CHEM 117  (S) Roses are Red, Violets are Blue: The Origins, Perception, and Impact of Color  (QFR)
Have you ever been tickled pink? Felt blue? Seen red?, Been green with envy? The course will consider color, starting with the physical and chemical origins of color (the electromagnetic spectrum, the absorption and emission of electromagnetic radiation, refraction, diffraction, incandescence, fluorescence, phosphorescence, iridescence). We will develop an understanding of chemical bonding and how that influences color. We will cover how we measure and describe color from a scientific perspective as well as how we can generate materials and devices with different color properties (liquid crystal displays, light emitting diodes for instance). From there we will discuss pigments used in works of art and textiles over time, the characteristics that make certain pigments suitable for particular applications. If we have time, we will touch on the historical and cultural impacts and meanings of different pigments and hues, the biological perception of color, and some color theory.
Class Format: There may be some brief laboratory exercises, which will require some extra time blocks, to be scheduled later.
Requirements/Evaluation: exams, problem sets, as well as a final paper; there may also be some brief laboratory exercises
**Prerequisites:** non-science students; students who have taken any introductory chemistry or physics courses are ineligible

**Enrollment Limit:** 20

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course will require students to become comfortable with some quantitative descriptions of light and its interaction with matter.

---

**Spring 2021**

LEC Section: 01   TBA   Lee Y. Park

**CHEM 151 (F) Introductory Chemistry** (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibrium, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education.

**Class Format:** pre-recorded lectures, two hours per week; recitations, two 75-minute meetings per week (in-person or remote); laboratory, one 2-hour lab per week (in-person or remote)

**Requirements/Evaluation:** frequent electronic and written weekly problem set assignments, laboratory work and analysis, quizzes, two tests, and a final exam

**Prerequisites:** Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement); incoming first-year students are required to meet with a faculty member during First Days.

**Enrollment Limit:** 8/lab

**Enrollment Preferences:** first-year students; students who have studied chemistry for one or more years are directed to CHEM 153 or 155

**Expected Class Size:** 32

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is a prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** BIMO Required Courses

CHEM 153 (F) Concepts of Chemistry (QFR)
This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on data analysis, literature, scientific writing, ethics, and other skills critical to students' development as scientists. There may also be the opportunity for some hands-on laboratory experience for students who are on-campus. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: Lecture/discussion, three hours per week and laboratory, two hours per week
Requirements/Evaluation: quantitative weekly problem set assignments, laboratory work and reports, hour tests, and a final exam
Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement); incoming first-year students are required to meet with a faculty member during First Days.
Enrollment Limit: 8/lab
Enrollment Preferences: incoming first year students also must meet with a faculty member during First Days
Expected Class Size: 60
Grading: yes pass/fail option, no fifth course option
Unit Notes: CHEM 153 or its equivalent is a prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CHEM 155 (F) Principles of Modern Chemistry (QFR)
This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory/discussion periods will focus on data analysis, literature, scientific writing, ethics, and other skills critical to students' development as scientists. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week and laboratory, two hours per week

CHEM 156  (S)  Organic Chemistry: Introductory Level  (QFR)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: quantitative problem sets, laboratory performance, including written lab reports, three midterm exams, and a final exam

Prerequisites: CHEM 151 or 153 or 155 or placement exam or permission of instructor

Enrollment Limit: 16/lab

Expected Class Size: 120

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Attributes: BIMO Required Courses

CHEM 319  (S)  Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)

Cross-listings:  MATH 319  CHEM 319  BIOL 319  PHYS 319  CSCI 319

Secondary Cross-listing
What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high throughput approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CHEM 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321

Secondary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.

Class Format: Lecture, three hours per week and laboratory, two hours per week. Hybrid course. Most lecture material will be presented asynchronously, and scheduled class time for both in-person and remote students will focus on discussion of the material and problem-solving. Enrollment in the appropriate laboratory section is required for both in-person and remote students.

Requirements/Evaluation: Quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 8/lab
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

CHEM 322  (S)  Biochemistry II: Metabolism (QFR)

Cross-listings: BIOL 322  CHEM 322  BIMO 322

Secondary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture three hours per week and laboratory three hours per week

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

Attributes: BIGP Courses  BIMO Required Courses
CSCI 134  (F)(S)  Introduction to Computer Science  (QFR)
This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

Class Format: Each lab section will meet only once per week, on either Monday or Tuesday.
Requirements/Evaluation: weekly programming projects, weekly written homeworks, and two examinations.
Prerequisites: none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required
Enrollment Limit: 30(10/lab)
Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department
Distributions: (D3)  (QFR)
Quantative/Formal Reasoning Notes: This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: BIGP Courses  COGS Interdepartmental Electives

CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)
This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Class Format: Lecture content will be through asynchronously viewed video modules. Three scheduled (MWF) course sections will be used for synchronous conference meetings. Two sections will be in-person and one will be remote. There will be 5 scheduled weekly lab sections that will be remote. Students should sign up for the lecture section, one conference, and one lab.
Requirements/Evaluation:  programming and written assignments, quizzes, examinations
Prerequisites:  CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required
Enrollment Limit:  60(12/lab)
Enrollment Preferences:  if the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size:  60
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 237  (F)(S)  Computer Organization  (QFR)
This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.
Class Format:  There is no scheduled time for lectures. They will be available for asynchronous viewing. Each lab section will meet once per week, on either Tuesday or Wednesday. Students should sign up for lecture and one lab.
Requirements/Evaluation:  weekly programming assignments and/or problem sets, midterm and final exams
Prerequisites:  CSCI 136
Enrollment Limit:  40(7/lab)
Enrollment Preferences:  current or expected Computer Science majors
Expected Class Size:  40
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2020

LAB Section: 04  WF 1:30 pm - 2:45 pm  Kelly A. Shaw
CSCI 256  (F)(S)  Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include induction, divide-and-conquer, dynamic programming, and greedy algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Class Format: Lectures will be simultaneously recorded in classroom and broadcast over Zoom. Office hours will be done over Zoom. Some additional course materials (examples, solutions, definitions and core concepts, etc.) may be provided as prerecorded videos.

Requirements/Evaluation: Problem sets, midterm and final examinations

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to students who need the class in order to complete the major. Ties will be broken by seniority (seniors first, then juniors, etc.).

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets in which students will formally prove statements about the behavior and performance of algorithms. In short, the entirety of the course is about applying abstract and mathematical reasoning to the way computers work.

CSCI 333  (S)  Storage Systems  (QFR)
This course will examine topics in the design, implementation, and evaluation of storage systems. Topics include the memory hierarchy; ways that data is organized (both logically and physically); storage hardware and its influence on storage software designs; data structures; performance models; and system measurement/evaluation. Readings will be taken from recent technical literature, and an emphasis will be placed on identifying and evaluating design trade-offs.

Requirements/Evaluation: programming assignments, quizzes, midterm examination, and a final project

Prerequisites: CSCI 136; CSCI 237 or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: current Computer Science majors, students with research experience or interest

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course will have students develop quantitative/formal reasoning skills through problem sets and programming assignments.

Spring 2021

LEC Section: 01  TBA  Bill K. Jannen

CSCI 334  (F)(S)  Principles of Programming Languages  (QFR)
This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Class Format: There is no scheduled time for lectures. They will be available online for asynchronous viewing. Each conference section will meet once per week, on either Monday or Tuesday. Students should sign up for lecture and one conference.

Requirements/Evaluation: weekly problem sets and programming assignments, a midterm examination, and a final examination

Prerequisites: CSCI 136
Enrollment Limit: 20

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 357  (F) Algorithmic Game Theory  (QFR)
This course focuses on topics in game theory and mechanism design from a computational perspective. We will explore questions such as: how to design algorithms that incentivize truthful behavior, that is, where the participants have no incentive to cheat? Should we let drivers selfishly minimize their commute time or let a central algorithm direct traffic? Does Arrow’s impossibility result mean that all voting protocols are doomed? The overarching goal of these questions is to understand and analyze selfish behavior and whether it can or should influence system design. Students will learn how to model and reason about incentives in computational systems both theoretically and empirically. Topics include types of equilibria, efficiency of equilibria, auction design, network games, two-sided markets, incentives in computational applications such as file sharing and cryptocurrencies, and computational social choice.

Class Format: Synchronous in-class lectures will be broadcast live to remote students via zoom and recorded for asynchronous viewing. Lecture content may additionally be supplemented with prerecorded videos, and scheduled class time used as exercise or review sessions.

Requirements/Evaluation: weekly problem sets and/or programming assignments, two midterm exams, and a final project.

Prerequisites: CSCI 256 or permission of instructor

Enrollment Limit: 20

CSCI 361  (F)(S) Theory of Computation  (QFR)
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of
complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** Lecture content will be through asynchronously viewed video modules. Two scheduled course sections will be used for synchronous conference meetings. One section (MR) will be in-person and the other section (TR) will be remote. Students should sign up for lecture and one conference.

**Requirements/Evaluation:** online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 20(10/sec)

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 361 (D3) CSCI 361 (D3)

**Quantative/Formal Reasoning Notes:** This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** COGS Interdepartmental Electives

**CSCI 374 (F)(S) Machine Learning (QFR)**

This tutorial examines the design, implementation, and analysis of machine learning algorithms. Machine Learning is a field that derives from Artificial Intelligence, Statistics, and others, and aims to develop algorithms that will improve a system's performance. Improvement might involve acquiring new factual knowledge from data, learning to perform a new task, or learning to perform an old task more efficiently or effectively. This tutorial will cover examples of supervised learning algorithms (including Bayesian approaches, support vector machines, and neural networks -- both deep and traditional), unsupervised learning algorithms (including k-means and expectation maximization), and possibly reinforcement learning algorithms (such as Q learning and temporal difference learning). It will also introduce methods for the evaluation of learning algorithms, as well as topics in computational learning theory and ethics.

**Class Format:** Though this course will be offered remotely by the instructor, pairs of students on campus may choose to meet in person for their tutorial sessions. If so, a classroom will be scheduled for them by the instructor.

**Requirements/Evaluation:** presentations, problem sets, programming exercises, empirical analyses of algorithms, critical analysis of current literature; the final two weeks are focused on a project of the student's design.

**Prerequisites:** CSCI 136 and CSCI 256 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Computer Science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course heavily relies on discrete mathematics, calculus, and elementary statistics. Students will be proving theorems, among many other mathematically oriented assignments. Additionally, they will be programming, which involves analytical and logical thinking.
As far as we know, the technological singularity has not yet arrived. Therefore, humans remain a part of our current computation pipeline. However, the role humans play varies greatly: self-driving cars aim to have human involvement only in development and emergencies, whereas educational tools are built for constant human involvement. In this course, we broadly explore human work within computational systems through topics such as crowdsourcing, educational technology, citizen science, human computation, open-source software, micro-labor markets, and online gaming. Students should expect broad exposure to a wide variety of human computing topics and group projects on building and evaluating computational systems that use human work.

**Class Format:** Lectures will be held on Wednesday and Friday each week. Conference sections will each meet only once per week, on either Wednesday or Thursday. Students should sign up for the lecture section and one conference.

**Requirements/Evaluation:** Course projects, in-class group work/participation, weekly written homework assignments/readings.

**Prerequisites:** CSCI 136

**Enrollment Limit:** 18

**Enrollment Preferences:** Preference for current CS majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Materials/Lab Fee:** $75 for purchase of software and work on crowdsourcing platforms.

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 377 (D3) STS 375 (D2)

**Quantitative/Formal Reasoning Notes:** This course includes regular homework and projects in which quantitative/formal reasoning skills are practiced and evaluated.

**ECON 110 (F)(S) Principles of Microeconomics (QFR)**

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.
**Class Format:** Sections taught by Professors Bradburd and Chao will be strictly remote, with both asynchronous and synchronous components. All other sections will be taught in a hybrid format and will include in-person elements.

**Requirements/Evaluation:** problem sets, quizzes, short essays, two midterms, final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

**Attributes:** POEC Required Courses

**ECON 120 (F)(S) Principles of Macroeconomics** (QFR)

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

**Class Format:** Fall semester sections will be entirely remote, with both asynchronous and synchronous components. Spring section formats are TBD.

**Requirements/Evaluation:** Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.

**Prerequisites:** ECON 110

**Enrollment Limit:** 30

**Enrollment Preferences:** First-year students and sophomores.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

**Attributes:** POEC Required Courses
ECON 213 (F) Introduction to Environmental and Natural Resource Economics  (QFR)

Cross-listings:  ECON 213  ENVI 213

Primary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade. Consideration of justice and equity will be woven through the whole semester.

Class Format: We will likely use small, focused discussion groups in combination with lectures

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include poster, presentation, brief writing assignment

Prerequisites:  ECON 110 or equivalent

Enrollment Limit:  25

Enrollment Preferences:  first-year and sophomore students

Expected Class Size:  25

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  this course will count toward both the Environmental Studies major and concentration

Distributions:  (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213 (D2)  ENVI 213 (D2)

Quantitative/Formal Reasoning Notes:  We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

Attributes:  ENVI Environmental Policy  EVST Social Science/Policy  MAST Interdepartmental Electives  POEC Comparative POEC/Public Policy

Courses

ECON 251  (F)(S)  Price and Allocation Theory  (QFR)

A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Class Format: Sections taught by Professors Jakiela and Sheppard in the fall will be strictly remote, with both asynchronous and synchronous components. Spring section formats are TBD.

Requirements/Evaluation:  Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes or short essays.

Prerequisites:  ECON 110 and MATH 130 or its equivalent

Enrollment Limit:  20
**Enrollment Preferences:** Current or prospective Economics majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

**Fall 2020**

LEC Section: R2   TF 3:15 pm - 4:30 pm   Pamela Jakiela
LEC Section: R1   TF 1:30 pm - 2:45 pm   Pamela Jakiela
LEC Section: R4   MR 3:15 pm - 4:30 pm   Stephen C. Sheppard
LEC Section: R3   MR 1:30 pm - 2:45 pm   Stephen C. Sheppard

**Spring 2021**

LEC Section: 01   TBA   Sarah A. Jacobson, Ashok S. Rai

**ECON 252 (F)(S) Macroeconomics** (QFR)

A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

**Class Format:** Sections taught by Professor Pedroni in the fall will be strictly remote, with both asynchronous and synchronous components. Professor Montiel's fall section will be taught in person. Spring section formats are TBD.

**Requirements/Evaluation:** problem sets and/or written assignments, midterm(s), and a final exam

**Prerequisites:** ECON 110 and 120 and MATH 130 or its equivalent

**Enrollment Limit:** 20

**Enrollment Preferences:** Current or prospective Economics majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

**Fall 2020**

LEC Section: R3   TF 3:15 pm - 4:30 pm   Peter L. Pedroni
LEC Section: R2   TF 1:30 pm - 2:45 pm   Peter L. Pedroni
LEC Section: 01   MWF 8:15 am - 9:30 am   Peter J. Montiel

**Spring 2021**

LEC Section: 01   TBA   Kenneth N. Kuttner, Peter L. Pedroni, Greg Phelan

**ECON 255 (F)(S) Econometrics** (QFR)

An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

**Class Format:** Professor Ozier's fall section will be strictly remote, with both asynchronous and synchronous components. Professor Zimmerman's fall section will be taught in a hybrid format and will include in-person elements. Spring section formats are TBD.
Requirements/Evaluation: problem sets, two exams, group project, and possible additional assignments

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 20

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

Attributes: EVST Methods Courses  PHLH Statistics Courses  POEC Required Courses

---

**ECON 360 (S) Monetary Economics (QFR)**

This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be discussed include: What causes inflation? What are the channels through which monetary policy affects the economy? Why should central banks commit to policy rules? How do exchange rates respond to monetary policy? How did the gold standard work? And will cryptocurrencies replace the dollar? In addition, we will develop and learn how to simulate the “New Keynesian” macroeconomic model, which has become the standard framework for monetary policy analysis for central banks around the world.

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

Enrollment Limit: 20

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.

Attributes: GBST Economic Development Studies Electives  PHELH Statistics Courses  POEC International Political Economy Courses

---

**ECON 376 (F) The Economics of Global Inequality (QFR)**

This course focuses on the proximate and ultimate causes of global economic inequality across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population
growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about global economic inequality remain difficult to answer.

**Class Format:** This course will be taught in hybrid format in Fall 2020. All classroom lectures will be recorded and made available for remote learners unable to attend lectures virtually. Problem set assignments and exams may be submitted electronically as needed, and all exams will be "take home." Additional office hours will be offered to accommodate the needs of remote learners.

**Requirements/Evaluation:** Problem sets, one midterm exam, final exam.

**Prerequisites:** ECON 252 and either ECON 255 or STAT 346. ECON 251 recommended but not required.

**Enrollment Limit:** 20

**Enrollment Preferences:** Junior and senior economics majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** The course material will draw heavily on mathematical and statistical models of economic growth and cross-country comparative development. Students will routinely work on sophisticated mathematical models of economic growth, involving the application of solution concepts from dynamic optimization and differential equations. Students will also be required to perform some econometric analyses in their assignments.

**Attributes:** GBST Economic Development Studies Electives

---

**ECON 384 (F) Corporate Finance** (QFR)

This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions. In the fall of 2020, special consideration will be given to how both financial and real economic shocks interact with firms’ financial decisions.

**Class Format:** Lecture / discussion; in the fall of 2020, some weeks we will meet for one 75-minute section (in person when possible) and break into smaller groups for one hour section groups (most likely remote). The timing of the sections will be arranged at the beginning of the semester.

**Requirements/Evaluation:** class participation, problem sets, short quizzes, short projects such as case write ups, a midterm exam, a final exercise and a research paper (possibly written with a partner)

**Prerequisites:** ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

**Enrollment Limit:** 20

**Enrollment Preferences:** Senior Economics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** The course uses quantitative models to evaluate decisions.
ECON 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522, ENVI 387, ECON 387

Primary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's cap-and-trade programs, the EU ETS, and US state policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Class Format: Lectures, office hours and TA sessions will take place on Zoom.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 20

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 522 (D2), ENVI 387 (D2), ECON 387 (D2)

Quantative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.

Attributes: ENVI Environmental Policy, MAST Interdepartmental Electives, POEC Comparative POEC/Public Policy Courses

Fall 2020

LEC Section: R1 MR 1:30 pm - 2:45 pm Matthew Gibson

ECON 477 (F) Economics of Environmental Behavior (QFR)

Cross-listings: ECON 477, ENVI 376

Primary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation: regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 477 (D2), ENVI 376 (D2)
Quantitative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

Attributes: ENVI Humanities, Arts + Social Science Electives  MAST Interdepartmental Electives  POEC Comparative POEC/Public Policy Courses

ENVI 203  (F)  Ecology  (QFR)

Cross-listings: ENVI 203  BIOL 203

Secondary Cross-listing

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). In Fall 2020, the course will use a hybrid model, with recorded lecture material available to all students. In person and remote class meetings will focus on problem sets and interactive case studies. Labs will be available in either in person or remote modalities. Remote participants will have the opportunity to collect their own data for some lab exercises, while in other cases will receive background information and media describing the data collection process. All students will be required to complete all data analyses and written lab reports.

Class Format: Six hours per week. All labs will be available in both remote and in-person modalities. All students (whether in person or remote) may choose their preferred modality for each lab module. Due to COVID-19 distancing requirements, some labs will require walking to field sites. The
instructor will work with individual students to identify accommodations that support in person lab participation as needed.

**Requirements/Evaluation:** problem sets, lab reports, hour exams, and a final exam

**Prerequisites:** BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** students planning to pursue Biology and/or ENVI

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203 (D3) BIOL 203 (D3)

**Quantitative/Formal Reasoning Notes:** Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component. Students are introduced to t-tests, Mann-Whitney U tests, chi-square analysis, and regression.

**Distributions:** (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 213 (D2) ENVI 213 (D2)

**Quantitative/Formal Reasoning Notes:** We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

**Attributes:** ENVI Environmental Policy  EVST Social Science/Policy  MAST Interdepartmental Electives  POEC Comparative POEC/Public Policy Courses
ENVI 339 (F) Conservation Biology  (QFR)

Cross-listings: ENVI 339  BIOL 329

Secondary Cross-listing

This course examines the application of population genetics, population ecology, community ecology, and systematics to the conservation of biological diversity. The overarching theme of the course is on the role of stochastic processes for small populations. Lecture/discussion topics will include extinction, the genetics of small populations, metapopulations, and importantly, conservation strategies. Labs will include a mixture of computer and lab projects.

Class Format: lecture and discussion, 3 hours per week; lab, 1.25 hours per week. Students will be assigned to a lab section (block AA - either W or F from 1:30-2:45) during the first week of class.

Requirements/Evaluation: Evaluation will be based on lab assignments, two exams, discussion participation, and an independent project

Prerequisites: BIOL 203/ENVI 203, or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Biology majors, seniors, and juniors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 339 (D3) BIOL 329 (D3)

Quantative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

Cross-listings: ECON 477  ENVI 376

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation: regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 477 (D2) ENVI 376 (D2)

Quantitative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

ENVI 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's cap-and-trade programs, the EU ETS, and US state policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Class Format: Lectures, office hours and TA sessions will take place on Zoom.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 20

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 522 (D2) ENVI 387 (D2) ECON 387 (D2)

Quantitative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.

MATH 119 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation: Homework, writing, class participation.
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: all students will have an equal chance; if possible none will be turned away.
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.

Fall 2020
LEC Section: H1  MWF 10:40 am - 11:30 am  Steven J. Miller

MATH 130  (F)(S)  Calculus I  (QFR)
Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.
Requirements/Evaluation: Weekly homework and quizzes, 2 exams during the semester, and one final
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before
Enrollment Limit: 30
Enrollment Preferences: first-year students
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This a calculus course.

Fall 2020
LEC Section: H2  TF 3:15 pm - 4:30 pm  Lori A. Pedersen
LEC Section: H1  TF 1:30 pm - 2:45 pm  Lori A. Pedersen

Spring 2021
LEC Section: 01  TBA  Lori A. Pedersen

MATH 140  (F)(S)  Calculus II  (QFR)
Mastery of calculus requires understanding how integration computes areas and business profit and acquiring a stock of techniques. Further methods solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.
Requirements/Evaluation: homework, quizzes, and/or exams
Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor
Enrollment Limit: 30
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above
Distributions: (D3) (QFR)

Fall 2020
LEC Section: R2    TF 3:15 pm - 4:30 pm     Josh  Carlson

Spring 2021
LEC Section: 01    TBA     Josh  Carlson

MATH 150  (F)(S)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations. Note: This course will be taught via flipped-course method, an instructional strategy reversing the traditional learning environment by delivering instructional content outside of the classroom. This includes prerecorded lectures along with questions that students must watch and answer prior to attending class. Class time include synchronous meetings clarifying concepts and working in small groups through challenging problems with the support of the professor and peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this course.

Requirements/Evaluation:  Video readiness assessments, problem sets, exams, and participation.
Prerequisites:  MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination
Enrollment Limit:  30
Enrollment Preferences:  Professor's discretion
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.
Distributions:  (D3) (QFR)
Quantative/Formal Reasoning Notes:  mathematics

Spring 2021
SEM Section: 01    TBA     Steven J. Miller

MATH 151  (F)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Class Format:  Hybrid; short lectures will be asynchronous, with longer synchronous in-person problem sessions (these will be available remotely, and uploaded later for asynchronous viewing)
Requirements/Evaluation:  homework, quizzes, and exams
Prerequisites:  AP BC 3 or higher or integral calculus with infinite series
Enrollment Limit:  30
Enrollment Preferences: First-years, sophomores, and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course builds quantitative skills

Fall 2020

LEC Section: H3 MWF 12:00 pm - 12:50 pm Ralph E. Morrison
LEC Section: H2 MWF 10:40 am - 11:30 am Ralph E. Morrison
LEC Section: H1 MWF 9:20 am - 10:10 am Ralph E. Morrison

MATH 200 (F)(S) Discrete Mathematics (QFR)

This course will help you understand the world through a mathematical lens and will develop your powers of argumentation and critical thinking. We will explore and utilize diverse areas of discrete mathematics including logic, set theory, functions and relations, combinatorics, probability, networks, and more. We also will discuss methods and styles of mathematical proofs in order to prepare you for more advanced math courses. Finally, while mathematical knowledge is often perceived as being “pure,” we will highlight some ways in which it is socially constructed and hence subject to human limitations and biases.

Class Format: To afford students flexibility during the COVID pandemic, this course is taught online. Students will watch lecture material asynchronously and will participate in a a once-per-week synchronous small-group tutorial meeting with the instructor via video chat.

Requirements/Evaluation: Students will complete checkpoint quizzes on videos and reading assignments, regularly assigned homework problems, and reflective writing assignments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of “ungrading.” Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

Enrollment Limit: 30

Enrollment Preferences: As determined by instructor.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involve developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

MATH 210 (S) Mathematical Methods for Scientists (QFR)

Cross-listings: PHYS 210 MATH 210

Secondary Cross-listing

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We
study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and on weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210 (D3) MATH 210 (D3)

Spring 2021

LEC Section: 01 TBA Frederick W. Strauch

MATH 250 (F)(S) Linear Algebra (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely.

Requirements/Evaluation: homework, exams, and possibly short remote meetings outside of class.

Prerequisites: MATH 150/151 or MATH 200

Enrollment Limit: 30

Enrollment Preferences: Students who have officially declared a major that requires Math 250.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will engage in both quantitative and formal reasoning.

MATH 307 (S) Computational Linear Algebra (QFR)

Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; and Monte Carlo techniques. This course could also be considered a course in numerical analysis or computational science.

Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
**MATH 309 (F) Differential Equations**  (QFR)

Ordinary differential equations (ODE) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODE from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, constant coefficient linear equations, and power series solutions. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain some information about the behavior of the ODE without explicitly knowing the solution.

**Class Format:** Unless circumstances change, students will have the option of taking the course in person or remotely

**Requirements/Evaluation:** quizzes/exams, problem sets, participation, and possible activities

**Prerequisites:** MATH 150/151 and MATH 250

**Enrollment Limit:** 20

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** 300-level mathematics course

---

**MATH 310 (F) Mathematical Biology**  (QFR)

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Class Format:** Unless circumstances change, students will have the option of taking the course in person or remotely

**Requirements/Evaluation:** problem sets, quizzes/exams, participation, final project and paper

**Prerequisites:** MATH 250 and MATH 309, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 210 (D3) MATH 310 (D3)

Quantitative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.

Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.

Fall 2020
LEC Section: H1  MWF 10:40 am - 11:30 am  Steven J. Miller

MATH 313 (S) Introduction to Number Theory (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will be using an active learning method, an instructional strategy reversing the traditional learning environment by supplying instructional content outside of the classroom. This will include reading the textbook and completing other assigned activities prior to attending class. Class time will be spent clarifying concepts and working in small groups through challenging problems with the support of the professor and peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this class.
Class Format: This course will employ an active learning method rather than the traditional lecture. Please see the course description for details.
Requirements/Evaluation: Daily class participation (individual and group based), weekly homework and quizzes, in class exams, and a cumulative final.
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 40
Enrollment Preferences: All are welcome regardless of major or year. In case of over-enrollment, preference will be given to those needing the course for graduation.
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving
mathematical results using logical reasoning practices.

Spring 2021
LEC Section: 01    TBA     Eva  Goedhart

MATH 315 (S)  Methods for Solving Diophantine Equations  (QFR)
A Diophantine equation is an equation with integer (or rational) coefficients that is to be solved in integers (or rational numbers). A focus of study for hundreds of years, Diophantine analysis remains a vibrant area of research. It has yielded a multitude of beautiful results and has wide ranging applications in other areas of mathematics, in cryptography, and in the natural sciences. In this project-based tutorial, we will focus on studying and implementing various methods for solving previously unsolved infinite families of Diophantine equations. Depending on their interests, students may choose one or several methods to apply to open problems in the field.

Requirements/Evaluation: Weekly homework and oral presentations, and a final written project manuscript that will be continually edited all semester (the length of which will depend on the mathematical content and choice of topic)

Prerequisites: MATH 250 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Sophomores, Juniors, and Seniors based on a short questionnaire of interests.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

MATH 319 (S)  Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)
Cross-listings: MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Secondary Cross-listing
What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantitative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

STAT 341 (D3) MATH 341 (D3)
Quantitative/Formal Reasoning Notes: This is a 300-level Math/Stat course
**MATH 350 (F)(S) Real Analysis (QFR)**

Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what does that actually mean? More fundamentally, what is the definition of a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions on them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

**Class Format:** Discussion-based course held remotely.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Math

---

**MATH 351 (S) Applied Real Analysis (QFR)**

Real analysis or the theory of calculus-derivatives, integrals, continuity, convergence--starts with a deeper understanding of real numbers and limits. Applications in the calculus of variations or “infinite-dimensional calculus” include geodesics, harmonic functions, minimal surfaces, Hamilton's action and Lagrange's equations, optimal economic strategies, nonEuclidean geometry, and general relativity.

**Requirements/Evaluation:** exams, homework and quizzes

**Prerequisites:** MATH 150 and MATH 250, or permission of instructor

**Enrollment Limit:** 50

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Core mathematics major course with daily problem sets.

---

**MATH 355 (F)(S) Abstract Algebra (QFR)**

Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well
as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

**Class Format:** Remote lectures. TA sessions will be held in person. If taken pass/fail, this course does not count towards the Mathematics major.

**Requirements/Evaluation:** problem sets and exams

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** Questionnaires.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** 300-level math course

**MATH 361 (F)(S) Theory of Computation** (QFR)

**Cross-listings:** MATH 361  CSCI 361

**Secondary Cross-listing**

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** Lecture content will be through asynchronously viewed video modules. Two scheduled course sections will be used for synchronous conference meetings. One section (MR) will be in-person and the other section (TR) will be remote. Students should sign up for lecture and one conference.

**Requirements/Evaluation:** online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 20(10/sec)

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 361 (D3) CSCI 361 (D3)

**Quantative/Formal Reasoning Notes:** This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** COGS Interdepartmental Electives

CON Section: 02  MR 1:30 pm - 2:45 pm  Aaron M. Williams
MATH 374 (S) Topology  (QFR)
In Real Analysis you learned about metric spaces -- any set of objects endowed with a way of measuring distance -- and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it has become a vital part of data analysis and is also connected to many areas of math and physics. This course is excellent preparation for graduate programs in mathematics.

Requirements/Evaluation: homework, tutorials, and exams
Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323. Familiarity with basic group theory recommended, but not required.
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Math
select among the presented topics, and will begin original research on an open problem in the field. Student assessment is based on problem sets, drafts of research project manuscript, and a final oral class presentation.

**Requirements/Evaluation:** homework assignments, oral presentations, and written project manuscript

**Prerequisites:** MATH 355 or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** programming experience, students with interests in the intersection of combinatorics and graph theory

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

Spring 2021

TUT Section: T1    TBA    Pamela E. Harris

**MATH 402 (F) Measure Theory and Hilbert Spaces** (QFR)

How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this set? What's the dimension? In this course we'll come up with precise ways to measure size -- length, area, volume, dimension -- that apply to a broad array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields like quantum mechanics and machine learning. This material provides good preparation for graduate studies in mathematics, statistics and economics.

**Class Format:** Discussion-based course held remotely.

**Requirements/Evaluation:** performance on homework assignments and exams

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Math

Fall 2020

LEC Section: R1    TF 3:15 pm - 4:30 pm    Leo Goldmakher

**MATH 408 (F) L-Functions and Sphere Packing** (QFR)

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

**Requirements/Evaluation:** Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

**Prerequisites:** Math 350 or 351
Enrollment Limit: 40
Enrollment Preferences: Senior math majors, students planning on graduate study in a STEM field
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a 400 level math class

Fall 2020
LEC Section: H1 MWF 12:00 pm - 12:50 pm Steven J. Miller

MATH 420 (S) Analytic Number Theory (QFR)
How many primes are smaller than x? How many divisors does an integer n have? How many different numbers appear in the N x N multiplication table? Over the course of the past 150 years, tremendous progress has been made towards resolving these and similar questions in number theory, relying on tools and methods from analysis. The goal of this tutorial is to explain and motivate the ubiquitous appearance of analysis in modern number theory--a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc). Topics to be covered include: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method, the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and the circle method, gaps between primes, and other topics as time and interest allow.
Requirements/Evaluation: Regularly preparing lectures and writing expository essays in LaTeX. No exams.
Prerequisites: MATH 350 or MATH 351 and familiarity with basic modular arithmetic are hard prerequisites. Familiarity with complex analysis and abstract algebra recommended, but not required.
Enrollment Limit: 10
Enrollment Preferences: Those with complex analysis background will be given priority.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Math

Spring 2021
TUT Section: T1 TBA Leo Goldmakher

MATH 433 (S) Mathematical Modeling (QFR)
Mathematical modeling means (1) translating a real-life problem into a mathematical object, and (2) studying that object using mathematical techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology, economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for students who have a strong enthusiasm for applied mathematics.
Class Format: discussion, research
Requirements/Evaluation: writing assignments, modeling activities, presentations, research project
Prerequisites: MATH 250, MATH 309 or similar, and some experience with computer programming (equivalent to CSCI 134 or MATH 307)
Enrollment Limit: 24
Enrollment Preferences: Professor's discretion
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
MATH 434 (F) Applied Dynamics and Optimal Control (QFR)

We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin’s maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study.

Requirements/Evaluation: exams and homework assignments
Prerequisites: MATH 209 or PHYS 210, and MATH 350 or 351, or permission of the instructor
Enrollment Limit: 20
Enrollment Preferences: Preference will be given to senior math majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a 400 level math course.

MATH 456 (F) Representation Theory (QFR)

Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.

Requirements/Evaluation: evaluation will be based primarily on homework, in class presentations, and exams
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: junior and senior Math majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a 400-level Math course.

MATH 474 (S) Tropical Geometry (QFR)

This course offers an introduction to tropical geometry, a young subject that has already established deep connections between itself and pure and applied mathematics. We will study a rich variety of objects arising from polynomials over the min-plus semiring, where addition is defined as taking a minimum, and multiplication is defined as usual addition. We will learn how these polyhedral objects connect to other areas of mathematics like algebraic geometry, and how they can be applied to solve problems in scheduling theory, phylogenetics, and other diverse fields.

Requirements/Evaluation: participation, problem sets, quizzes, exams, and a final project
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: senior Math majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course builds quantitative skills

Spring 2021
LEC Section: 01    TBA    Ralph E. Morrison

PHYS 131  (F) Introduction to Mechanics  (QFR)
We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Class Format: hybrid
Requirements/Evaluation: exams, labs, and weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead
Enrollment Limit: 30
Enrollment Preferences: seniority
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
Unit Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This class will have weekly problem sets requiring substantial quantitative reasoning

Fall 2020
LEC Section: H1    MWF 8:00 am - 8:50 am    Graham K. Giovanetti
LAB Section: H2    M 1:00 pm - 3:00 pm    Graham K. Giovanetti
LAB Section: H3    W 1:00 pm - 3:00 pm    Graham K. Giovanetti

PHYS 132  (S) Electromagnetism and the Physics of Matter  (QFR)
This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week
Requirements/Evaluation: weekly problem sets, labs, quizzes and exams
Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)
Enrollment Limit: 22 per lab
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
PHYS 141  (F) Mechanics and Waves  (QFR)
This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: This will be a hybrid course with both recorded and in-person lecture/demonstration material, both "at home" and in-person hands-on/laboratory exercises, problem-solving group sessions and office hours (available both in person and remote), as well as several short tests/quizzes and a final exam.

Requirements/Evaluation: weekly problem sets, labs, three or more short quizzes/tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: high school physics and MATH 130 or equivalent placement, or permission of the instructor

Enrollment Limit: 30

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.

PHYS 142  (S) Foundations of Modern Physics  (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires we rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.
This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, two hours weekly; problem-solving conference session, one hour weekly; laboratory, 2-3 hours most weeks, alternating between 'hands-on' and computational sessions (limit 22 per lab, 18 per conference section)

Requirements/Evaluation: weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 18 per CON

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same basic material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: This will be a hybrid course format, with some online and some in-person components. All in-person components will have a remote option. Lecture 3 hours per week (synchronous interactive video or in-person), Laboratory/Conference section 2.5 hours per week (synchronous interactive video or in-person). Compared to previous years, some of the laboratory activities in the course will be replaced by assignments that can be completed remotely.

Requirements/Evaluation: class participation, weekly lab/conference assignments, weekly problem sets, final paper, two hour-exams and a final exam;

Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

Enrollment Limit: 18

Enrollment Preferences: first-years

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this is a small seminar designed for first-year students who have placed out of PHYS 141

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: besides the final paper, all assignments in the course have a substantial quantitative component
PHYS 202  (S) Vibrations, Waves and Optics  (QFR)
Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

Class Format: lecture three hours per week and laboratory three hours per week
Requirements/Evaluation: problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

PHYS 210  (S) Mathematical Methods for Scientists  (QFR)
Cross-listings: PHYS 210  MATH 210
Primary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week
Requirements/Evaluation: several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2021

LEC Section: 01    TBA    Frederick W. Strauch

PHYS 301  (F) Quantum Physics  (QFR)

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics. After a brief discussion of historical origins of the quantum theory, we introduce the Schrödinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

Class Format: Phys 301 will be taught in a hybrid format, with in-person and remote elements. Remote options will be available for in-person components. Lecture will meet for 3 hours weekly, with synchronous elements wherever feasible (either in-person or via videoconference). Laboratories will meet for 2 hours weekly, with some additional individual preparation required, with laboratory groups being mixed between in-person and remote students.

Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 20

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation:  lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites:  BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit:  12

Enrollment Preferences:  seniors, then juniors, then sophomores

Expected Class Size:  12

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  does not satisfy the distribution requirement for the Biology major

Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantative/Formal Reasoning Notes:  Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

Attributes:  BIGP Courses  BIMO Interdepartmental Electives

Spring 2021

PHYS 321  (S)  Introduction to Particle Physics  (QFR)

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

Class Format: three hours a week

Requirements/Evaluation:  weekly problem sets, a midterm exam, and a final exam

Prerequisites:  PHYS 301, which may be taken concurrently, plus permission of instructor

Enrollment Limit:  15

Enrollment Preferences:  1. Students that have taken Phys 301. 2. By seniority.
PHYS 402  (S) Applications of Quantum Mechanics  (QFR)
This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 301
Enrollment Limit: 10 per sec
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

**Class Format:** The class will be remote. I will present the material using a mix of synchronous and asynchronous methods. We will use the synchronous time for discussion and Q and A as well.

**Requirements/Evaluation:** Problem sets, group project, midterm exam, final exam

**Prerequisites:** MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255

**Enrollment Limit:** 20

**Enrollment Preferences:** Political Economy majors, Environmental Policy majors and sophomores

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** The course teaches econometrics, i.e. statistics as economists use it, with applications in economics and political science.

**Attributes:** EVST Methods Courses  PHLH Statistics Courses  POEC Required Courses

---

**PSYC 201  (F)(S) Experimentation and Statistics**  (QFR)

An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis.

**Class Format:** Prof. Savitsky's section will be taught remotely. Synchronous lectures and lab meetings will be recorded for those who can't attend but synchronous participation is preferred, especially in lab. In Prof. Cone's section, many lectures will be held via synchronous, remote gatherings. Periodically, students who can meet in person will gather for discussions, problem solving sessions, and lab work with others joining remotely. You must register for lab and lecture with the same instructor.

**Requirements/Evaluation:** research reports, exams, and weekly problem sets

**Prerequisites:** PSYC 101; not open to first-year students except with permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** This course has weekly problem sets focused on experimental design and quantitative data analysis. Students will design and conduct several experiments, analyze the data, and report their findings.

**Attributes:** COGS Related Courses  PHLH Statistics Courses

---

Fall 2020
STAT 101 (F)(S) Elementary Statistics and Data Analysis  (QFR)

It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: Hybrid format with both synchronous and asynchronous elements.

Requirements/Evaluation: quizzes and exams and course project

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 25

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with MATH130 but no statistics should enroll in STAT161; students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161/201 should enroll in STAT 202 (if no calc background) or 302 (MATH140 prereq).

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is a quantitative course.

Attributes: BIGP Courses COGS Related Courses PHLH Statistics Courses

Fall 2020

STAT 161 (F)(S) Introductory Statistics for Social Science  (QFR)

This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences and sciences. Topics include exploratory data analysis, elements of probability theory, basic statistical inference, and introduction to statistical modeling. The course focuses on the application of statistics tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation: students complete homework, multiple choice quizzes and exams (including remote oral exams), but also present applied projects. Students can expect to spend time getting familiar with statistical software.

Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent

Enrollment Limit: 25

Enrollment Preferences: Economics majors, sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: students with calculus background should consider STAT 201, 202 or 302 instead. Students without any calculus background should consider STAT 101. Please refer to the placement chart on the department website for more information.

Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Course analyzes data

Spring 2021

LEC Section: 01  TBA  Bernhard Klingenberg, Daniel B. Turek

STAT 201 (F)(S)  Statistics and Data Analysis  (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can't make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: Hybrid format: lecture material will be prerecorded, and you will be asked to attend (in person or virtually) one class session a week, during which we will briefly review lecture materials, allow time for questions, and work through a lab in RStudio to practice using the techniques discussed during that week's lectures.

Requirements/Evaluation: weekly homework; quizzes and exams

Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

Enrollment Limit: 25

Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202 (if no calc background) or 302 (MATH 140 prereq). Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: Students will learn to interpret, choose, carry out, and communicate analyses of data.

LEC Section: 01  TBA  Anna M. Plantinga, Richard D. De Veaux

STAT 202 (F)(S)  Introduction to Statistical Modeling  (QFR)

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: Introductory lectures will be available asynchronously as text and video; synchronous sessions will discuss questions from lecture, dive further into the material, and work on examples. You'll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. The professor and TAs will also offer optional synchronous office hours/review sessions.

Requirements/Evaluation: Homework problems; quizzes; a final project (on a topic that interests you!). You'll be given the opportunity to assess your
own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

**Prerequisites:** AP Statistics 4 or 5, or STAT 101, or STAT 161, or STAT 201, or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Prospective Statistics majors and more senior students

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students with a 4 on the AP Stats exam should contact the department for proper placement

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

**Attributes:** EVST Methods Courses  PHLH Statistics Courses

**Fall 2020**
LEC Section: R1  MWF 12:00 pm - 12:50 pm  Laurie L. Tupper

**Spring 2021**
LEC Section: 01  TBA  Laurie L. Tupper

**STAT 302  (F)(S)  Applied Statistical Modeling  (QFR)**

Data may come from various sources and studies with different purpose of analysis. Statistical modeling provides a unified framework to embrace different data types, and focuses on the goals of understanding relationships, assessing differences and making predictions. We will explore different types of statistical models (linear regression, ANOVA, logistic regression etc), and focus on their conditions, the interactive modeling process, as well as the statistical inference tools for drawing conclusions from them. Throughout the course, real datasets will be modeled for interesting questions about the world, and the limitations will be addressed as well.

**Class Format:** This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements.

**Requirements/Evaluation:** weekly homework assignments (consist of both theoretical and applied questions), short quizzes, possibly two exams and a course project.

**Prerequisites:** One of the following: i) STAT 201; ii) MATH 140 and STAT 101/161/AP Statistics 4/5; iii) Permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** students interested in statistics which have solid background in math and stat

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** It is an advanced statistics class with prerequisites that are QFR courses

**STAT 310  (F)  Data Visualization  (QFR)**

This course is about preparing, visualizing, reporting and presenting different types of data. We will start with creating common plots (e.g., barcharts, histograms, density plots, boxplots, time series and lattice plots), but also discuss visualizing results of statistical models, such as linear or logistic regression models. We will use the ggplot library in R but then switch to the plotly library for interactive graphs with mouse-over and click events. Using
R's shiny and DT libraries, we will learn how to create and publish web-apps and dashboards that explore datasets and support online filtering. We will end the class with creating web apps that contain multiple graphs or maps which react to user inputs (such as selecting which variables to plot) or provide real time monitoring of streaming data. Throughout, we will use version control software (Github) to organize and keep track of our code. This course will be taught in a semi-flipped style. While the instructor will introduce certain topics, students will often be responsible for reading material ahead of time and then work individually or in pairs to reproduce material or implement it on their own data.

Requirements/Evaluation: Grading will almost entirely be based on class participation, individual and team-work, project presentations and the student's portfolio.

Prerequisites: Stat 201/202/302; Good knowledge of R

Enrollment Limit: 15

Enrollment Preferences: Preference may be given to stats majors who need the course in order to graduate, but then random selection.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course teaches how to organize and present data graphically, but also how to critique existing data visualizations.

Fall 2020
LEC Section: R1  MW 10:00 am - 11:15 am  Bernhard Klingenberg

STAT 315  (S)  Applied Machine Learning  (QFR)

How does Netflix recommend films based on your viewing history? How does Facebook group its users and send out targeted ads? How did Google select from thousands of search terms to predict flu? Machine learning (ML) is a rapidly growing field that is concerned with algorithms and models to find patterns in data and solve these practical problems at the intersection between statistics, data science and computer science. This course provides a broad introduction to ideas and methods in machine learning, with emphasis on statistical intuitions and practical data analysis. Topics including regularized regression, SVM, supervised/unsupervised learning, text analysis, neural networks will be covered. Students will use R extensively throughout the course while getting introduced to some ML tools in Python.

Requirements/Evaluation: weekly homework, one class project, and two or three exams

Prerequisites: MATH 140, and STAT 201/202, or equivalent; or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Statistics majors, seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods

Spring 2021
LEC Section: 01  TBA  Shaoyang Ning

STAT 335  (S)  Biostatistics and Epidemiology  (QFR)

Epidemiology, a public health discipline, is the study of disease and disability in human populations. Biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and a brief introduction to regression with correlated data.

Requirements/Evaluation: evaluation will be primarily based on weekly homework, two midterm exams, an in-class final exam, and a data analysis project
Prerequisites: STAT 201 or 202 and MATH 140, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Junior and senior statistics majors; public health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a statistics course with a focus on quantitative methods relevant to public health studies.

STAT 344 (F) Statistical Design of Experiments (QFR)

How do you get informative research results? By doing the right experiment in the first place. We’ll explore the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. We’ll look at classical tools like one- and two-way ANOVA and fractional factorial designs, but we’ll also look at optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we’ll make extensive use of R to work with real-world data.

Class Format: Introductory lectures will be available asynchronously as text and video; synchronous sessions will discuss questions from lecture, dive further into the material, and work on examples. You’ll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. There will also be optional synchronous office hours/review sessions.

Requirements/Evaluation: Homework problems; quizzes; a final project (on a topic that interests you!). You’ll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While most assignments will be submitted (and graded)
individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

**STAT 346 (F)(S) Regression Theory and Applications (QFR)**

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear, logistic and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

**Requirements/Evaluation:** exams, homework, and a project

**Prerequisites:** MATH 250 and at least one of STAT 201, 202 or 302. Or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Statistics Majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

**STAT 355 (F) Multivariate Statistical Analysis (QFR)**

To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

**Class Format:** This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements

**Requirements/Evaluation:** homework, project/presentations, possibly one or two exams.

**Prerequisites:** MATH 250, and STAT 346 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: students interested in statistics which have solid background in math and stat
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Fall 2020
LEC Section: H1    WF 1:30 pm - 2:45 pm     Xizhen  Cai

STAT 356 (S)  Time Series Analysis (QFR)
Time series--data collected over time--crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.

Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams
Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor
Enrollment Limit: 30
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Spring 2021
LEC Section: 01    TBA     Laurie L. Tupper

STAT 360 (S)  Statistical Inference (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Requirements/Evaluation: problem sets and exams
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Enrollment Limit: 30
Enrollment Preferences: Statistics majors
Expected Class Size: 30
Grading: no pass/fail option, yes fifth course option

Spring 2021
LEC Section: 01    TBA     Bernhard  Klingenberg

STAT 372 (F)  Longitudinal Data Analysis: Modeling Change over Time (QFR)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.
Class Format: Hybrid format. Approximately 2/3 of class time will be lecture (in person for students who are on campus, recorded for remote students). All synchronous students (whether in person or online) will attend a remote lab/discussion section each week. Asynchronous options will be provided for students unable to participate synchronously.

Requirements/Evaluation: performance on exams, homework, and a project
Prerequisites: STAT 201 and STAT 346
Enrollment Limit: 15
Enrollment Preferences: junior and senior Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course will cover a variety of statistical analysis methods for longitudinal data.

Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Spring 2021
LEC Section: 01  TBA  Xizhen Cai

STAT 465  (F)  Bayesian Statistics  (QFR)
Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. Indeed, the Bayesian approach is now recognized across scientific disciplines as a modern and powerful tool. We begin with an introduction to Bayes’ Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700’s, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to performing Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods, before moving on to multivariate sampling methods and methodology. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing. The course will culminate in an independent Bayesian research project.

Requirements/Evaluation: Homework, exams, and project
Prerequisites: STAT 346, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Juniors and Seniors, and Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)(QFR)

Quantitative/Formal Reasoning Notes: This course mandates significant mathematical and statistical prowess.

Fall 2020

STS 375 (F)(S) Human Work in Computational Systems (QFR)

Cross-listings: CSCI 377 STS 375

Secondary Cross-listing

As far as we know, the technological singularity has not yet arrived. Therefore, humans remain a part of our current computation pipeline. However, the role humans play varies greatly: self-driving cars aim to have human involvement only in development and emergencies, whereas educational tools are built for constant human involvement. In this course, we broadly explore human work within computational systems through topics such as crowdsourcing, educational technology, citizen science, human computation, open-source software, micro-labor markets, and online gaming. Students should expect broad exposure to a wide variety of human computing topics and group projects on building and evaluating computational systems that use human work.

Class Format: Lectures will be held on Wednesday and Friday each week. Conference sections will each meet only once per week, on either Wednesday or Thursday. Students should sign up for the lecture section and one conference.

Requirements/Evaluation: Course projects, in-class group work/participation, weekly written homework assignments/readings.

Prerequisites: CSCI 136

Enrollment Limit: 18

Enrollment Preferences: Preference for current CS majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $75 for purchase of software and work on crowdsourcing platforms.

Distributions: (D2)(QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 377 (D3) STS 375 (D2)

Quantitative/Formal Reasoning Notes: This course includes regular homework and projects in which quantitative/formal reasoning skills are practiced and evaluated.

THEA 310 (F) Playwriting: Facing the Blank Page (WS)(QFR)

I believe that after food and shelter, humans need stories to survive. This class will focus on each writer's, dreams, fears and desires and how to turn them into plays. Students will explore the fundamentals of playwriting. This will include writing exercises, weekly pages, hearing your scenes out loud and at the end of the semester the first draft of a new play.

Class Format: Hybrid

Requirements/Evaluation: Upon completion of the semester, you will be able to demonstrate and ability to: draft, rewrite, discuss and continue to
rewrite; engage verbal discussion of your work and your colleagues work; place the work in context of other artists and artistic pursuits; place work in context of culture and society; complete a full draft of your play.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Theater majors first, then Concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS) (QFR)

**Writing Skills Notes:** You are expected to attend class, to keep up with required writing, readings drafts pages to class and participate in all discussions.

**Quantitative/Formal Reasoning Notes:** You are also expected to think critically and articulate your thoughts.

- Jason Josephson Storm, Chair and Professor of Religion, Chair of Science and Technology Studies
- Phillip J. Webster, Visiting Assistant Professor of Religion
- Saadia Yacoob, Assistant Professor of Religion; on leave Fall 2020

MAJOR

The major in Religion is designed to perform two related functions: to expose the student to the methods and issues involved in the study of religion as a phenomenon of psychological, sociological, and cultural/historical dimensions; and to confront students with the beliefs, practices, and values of specific religions through a study of particular religious traditions. It is a program that affords each student an opportunity to fashion their own sequence of study within a prescribed basic pattern constructed to ensure both coherence and variety. Beginning with the class of 2016, the major in Religion will consist of at least nine semester courses as follows:

Required Sequence Courses

REL 200 Theories and Methods in the Study of Religion

One 300-level seminar or tutorial

REL 401 Senior seminar

Elective Courses

Six electives at the 100-, 200-, or 300-level (with a maximum of one 100-level class to count towards major).

In addition, each major will select a specialization route in the major in conversation with and with the approval of the department. The specialization will consist of at least four courses. There are two ways to meet this requirement. A major could fulfill the requirement by concentration in one of the College’s coordinate programs or by designating four specialization courses that can be supported by the resources of the Religion department faculty and the College. In other words, these four courses might be from among the six electives and one 300-level seminar or tutorial or might include additional coursework from other programs and departments (whether cross-listed or not).
The major will culminate in a year-long senior project. The first semester will remain a seminar (REL 401) on a topic in the study of religion set by the faculty member in consultation with incoming seniors. The spring semester will consist of participation in a research colloquium (not a course taken for credit). In this colloquium, each senior major will present their individual research projects, begun in the senior seminar, drawing on their specializations and advised by members of the faculty.

For those who wish to go beyond the formally-listed courses into a more intensive study of a particular religious tradition, methodological trend, or religious phenomenon (e.g., ritual, symbol-formation, mysticism, theology, etc.), there is the opportunity to undertake independent study or, with the approval of the department, to pursue a thesis project.

The value of the major in Religion derives from its fostering of a critical appreciation of the complex role religion plays in every society, even those that consider themselves non-religious. The major makes one sensitive to the role religion plays in shaping the terms of cultural discourse, of social attitudes and behavior, and of moral reflection. But it also discloses the ways in which religion and its social effects represent the experience of individual persons and communities. In doing these things, the major further provides one with interdisciplinary analytical tools and cross-cultural experience and opens up new avenues for dealing with both the history of a society and culture and the relationships between different societies and cultures. What one learns as a Religion major is therefore remarkably applicable to a wide range of other fields of study or professions.

Students declaring Religion as a major will identify an area of specialization and link it to their senior seminar final paper and be expected to present it in a spring colloquium during their senior year.

THE DEGREE WITH HONORS IN RELIGION

The degree with honors in Religion requires the above-mentioned nine courses and the preparation of a thesis of 75+ pages with a grade of B+ or better. A thesis may combine revised work done in other courses with new material prepared while enrolled either in Religion 493-W31 or Religion W31-494. Up to two-thirds of the work in the thesis may be such revised work, but at least one-third must represent new work. The thesis must constitute a coherent whole either by its organizing theme or by a focus on a particular religious tradition. Candidates will also be expected to present the results of their thesis orally in a public presentation. Students who wish to be candidates for honors in Religion will submit proposals and at least one paper that may be included in the thesis to the department in the spring of their junior year. Students must normally have at least a 3.5 GPA in Religion to be considered for the honors program.

The chair will serve as advisor to non-majors.

STUDY ABROAD

The Williams College Religion Department encourages potential majors to study abroad in order to enhance their education and gain international perspectives on religious studies. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. Many of our majors study in the Williams College Oxford Program, but our majors also regularly pursue a semester or year-long study in other programs.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description. Sometimes a course title is sufficient, but for many courses we also need to see a description of some sort because the title is unclear.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 3 courses: Religion 200, one 300-level Religion seminar or tutorial, and Religion 401 Senior Seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Make sure that they have or will be able to take REL 200, because it is offered only once a year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
Violent conflicts throughout the world are animated by religious rhetoric, driven by religious actors, and sanctioned by religious authorities. At the same time, religious and "interfaith" organizations are often prominent participants in peace advocacy and conflict resolution. What are the varieties of religious involvement in war and peace? What can we learn about "religion" from the conflicts and cooperative initiatives that are labeled "religious"? Does the modern nation-state increase the likelihood of religious conflict? Will 21st century globalization support more or less conflict and/or cooperation? We will investigate these and other questions through contemporary case studies. In some cases we will focus on conflicts over territory: the Temple Mount/Noble Sanctuary in Jerusalem, the Babri Mosque/Birthplace of Rama in Ayodhya, India, the Black Hills in South Dakota. But we will also study the rhetoric of Usama Bin Laden and the role of spirit possession in the formation of the Lord's Resistance Army in Uganda. Finally, we will consider efforts to end such conflicts peacefully and delegitimize militant groups. In each case, we will see how competition for control over what counts as "Judaism," "Hinduism," "religion," "religious," and so forth is central to these conflicts and to the goals of those who seek to resolve them.

Requirements/Evaluation: two short papers, an in-class mid-term exam, and a final paper or project

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: first-year students and potential Religion majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

**REL 108 (F) Technologies of Religious Experience**

In 1962, ten Harvard Divinity School students received a capsule of white powder before Good Friday services. The powder was psilocybin, a psychedelic. One of them soon ran out of chapel to announce that the Messiah had arrived. Seven others reported profound mystical experiences, which they reported even years later as exerting continued influence on their life and work. Is psilocybin a technology for producing religious experience? Should religions find and employ technologies that engender religious feeling? Are such experiences any less true or authentic than ones that aren't technologically mediated? More humbly, how is a religious service experienced differently when it's viewed online or through a TV? How can an amulet, icon, or statue be used as a technology of religion? Drawing from a broad range of sources, this course will introduce students to the critical study of religion through its consideration of religious experience as both central to religious life and as (almost always) technologically mediated. The course thus aims to expose students to a wide variety of religions and technologies of religion, while simultaneously offering a them a chance to explore Technology Studies as one critical lens for studying religion and religious experience.

**Requirements/Evaluation:** short response papers, one longer non-research paper

**REL 109 Apocalypse (WS)**

An end of days. A utopia to come. A great cosmic reversal of fortune. A revelation of truth that leads to radical transformation. Each of these themes and many more fall under the genre of imagination that we associate with the apocalypse. In order to understand the persistence and prevalence of apocalyptic imaginations, we will move back and forth through time. On the one hand, we will read the Book of Revelation in relationship to a selection of ancient Zoroastrian, Jewish, Greek, Christian, and Muslim texts identified with apocalyptic traditions. On the other hand, we will read these texts in relationship to and alongside select literature and movements of apocalypse in the U.S.A. We will pay particular attention to how apocalyptic imaginations reflect upon and interact with social structures of class, colonization, ethnicity, gender, race, and sexuality.

**Requirements/Evaluation:** grading will be based on participation, short P/F papers, a graded 3-page essay that will be revised, a 5-page second essay, and a final 7- to 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years and sophomores preferred or Religion majors

**Expected Class Size:** 15

**Grading:**
Distributions: (D2)  (WS)

Writing Skills Notes: As a WS course, grading will be based on short, weekly P/F papers, a graded 3-page essay that will be revised for credit, a 5-page second essay, and a final 7- to 10-page paper for which a draft will be peer reviewed. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

REL 110  (F) Living Religion: The Study of Religion in Everyday Life

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

REL 126 Religion, Politics, and Society: A Global Perspective  (DPE)

In spite of predictions that religion would wither away with in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to make sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular.' The second part discusses religion in the US society. Here, we will discuss if the American society can be called secular, the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their mobilization, religious minorities in the United States and many other aspects of religion in the US society. The third part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a) and Judaism. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the moral questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 20% participation; 25% first paper (7 pages); 30% second paper (8-10 pages); and 25% third paper (7 pages). No final exam.

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Global Studies concentrators and intended concentrators; Religion majors and intended majors

REL 133 (S)  Buddhist Literature

Cross-listings: REL 133 ENGL 147 ASST 133

Primary Cross-listing

This course introduces students to the diverse literary culture of Buddhist Asia. Through close readings of particular influential Buddhist texts, we will analyze not only what the texts say and mean, but also learn about the "social life" of these texts--i.e., what is the socio-historical context of these texts, who are the intended audience, what is the relationship of these texts with their particular communities, how do these communities engage with their texts, including how texts have been translated, taught, worshipped and ritualized. We will also explore the materiality of these texts, which is as diverse as the languages in which these texts are written. Alongside an exploration of materiality requires that we reflect on what counts as "text". Moreover, by sampling different genres of Buddhist texts (e.g., philosophical, historical, narrative, grammatical, cosmological, astrological, magical), we will discuss what makes them Buddhist and what makes them literary. The Lotus Sutra, the Heart Sutra, the Dhammapada, and Vessantara Jataka are just some of the texts we will study in this course. No prior knowledge about Buddhism is required.

Requirements/Evaluation: Attendance and active participation 20%; Short writing assignments 25% (i.e., a one-page, single-space, critical response based on the class reading x 5 total); Mid-term exam (in-class: identification terms and short essay) 25%; Final project and presentation 30% (the final grade includes initial consultation with the instructor regarding topic selection, annotated bibliography, project outline, final presentation, and final written report).

REL 134 (S)  Leaving the World Behind: The Literature of Reclusion (DPE) (WS)

Cross-listings: ANTH 134 CHIN 134 COMP 134 REL 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion-living a life of seclusion from society-in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state-to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none
Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

REL 149  (S)  The Sacred in South Asia

Cross-listings: ANTH 249  REL 149

Secondary Cross-listing

The jinn--Islamic spirits born of fire--are sought out for their healing and other powers not only by Muslims in Delhi, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia--where a fifth of humanity lives--provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being--pluralistic and composite on the one hand, singular and majoritarian on the other--reflective of two different conceptions of selfhood? What if we turn from questions of community and 'identity' to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of 'syncretic' ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

REL 168 (F) Making God Real

Is God real? Are Spirits? Divine messengers? What would it mean to say "yes" to any of these questions if we don't "believe" in supernatural beings at all? This course will explore how God(s), spirits, ancestors, and other super-human beings have been seen, heard, and felt by humans. Instead of rehearsing now tired debates between believers and skeptics, this class will combine cognitive sciences approaches to the study of religion with new perspectives on the nature of ontology--the nature of being--to examine how God and other super-human beings exist in and through their effects.
upon humans. From this perspective, we'll see how, even if God(s) and other supernatural beings don't exist in the heavens, they nevertheless act in this world through the ways that humans experience them. The puzzle for us will be, how do God(s), spirits, and/or divine messengers act? How do we feel, see, or hear beings that might not be there? What kind of reality do God(s) and spirits have in such scenarios? What is the nature of their being?

Class Format: Remote; synchronous learning

Requirements/Evaluation: Students will be required to take notes on course readings, write weekly or biweekly response papers, and submit a final essay at the end of the course.

Prerequisites: No prerequisites

REL 171 (S) Music and Spirituality: Cross-Cultural Perspectives

Cross-listings: REL 171 MUS 171

Secondary Cross-listing

How does the sacred sound? Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music reflect and produce spiritual experience? This team-taught course will take a comparative approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, music and dance in spiritual practice, and the role of music created in the face of death and its aftermath. Working from both musicological and ethnomusicological perspectives, we will explore the possibilities of sensory ethnography for better understanding the role of perception and the body in spiritual experiences with music. Our comparisons will draw from Western and world Christian traditions from medieval to modern times, and on conversations with musicians immersed in the music of other faith traditions (including Jewish, Hindu, and Muslim). We will explore connections between music and spirituality through a wide variety of repertoires, including plainchant and Renaissance sacred choral music; the music and dance of traditional West African religions like vodun and orisa; music from the Western classical tradition by such composers as Bach, Beethoven, and Messiaen; American hymnody and spirituals; gospel music in the U.S. and Africa; and selected artists from the world of jazz and popular music, such as John Coltrane and Leonard Cohen.

Requirements/Evaluation: class participation; class journal; presentation with annotated bibliography; ethnographic field study; final project with presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music, religion, and/or anthropology/sociology

Expected Class Size: 15

REL 200 (S) What is Religion? Theories and Methods in the Study of Religion

As recently as the 1960s, the most influential theorists of modernity were predicting that religion would eventually vanish, while theologians lamented what they called the "Death of God." But one has only to glance at today's headlines to see that accounts of religion's demise were premature. Indeed a basic knowledge of religion is indispensable to understanding the current global moment as well as a range of fields from political science to English
literature and history. To explore the meaning of religion, this course will introduce the debates around which the discipline of religious studies has been constituted. It will familiarize students with the discipline's most significant theorists (both foundational and contemporary) and trace their multidisciplinary—philosophical, sociological, anthropological, and psychological—modes of inquiry. At stake are questions such as: How does one go about studying religion? Is "religion" a cultural universal? What is religion's relationship to the "European Enlightenment"? to God? to science? to society? to secularism? to colonialism? to ethics? to politics? to violence? to sex? to freedom? Has religion changed fundamentally in modernity? And if so, what is its future?

Requirements/Evaluation: class participation, weekly short (max 2 page) writing assignments, a 5-page midterm paper, and a 10-page final paper

Prerequisites: none, although a previous course on religion is recommended

Enrollment Limit: 15

Enrollment Preferences: Religion majors

REL 201 (F) The Hebrew Bible

Cross-listings: JWST 201 COMP 201 REL 201

Primary Cross-listing

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: discussion

REL 202 (S) Moses: Stranger in a Strange Land

Cross-listings: COMP 214 REL 202 JWST 202

Primary Cross-listing

As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Isrealite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and
impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described “stranger in a strange land.” We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and two or three longer papers

REL 205  (S)  Ancient Wisdom Literature

**Cross-listings:** JWST 205  CLAS 205  COMP 217  REL 205

**Primary Cross-listing**

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of *hokhmah*, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible’s canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod’s *Works and Days*, Aesop’s fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin’s *Poor Richard’s Almanack*.

All readings are in translation.

REL 206  (S)  The Book of Job and Joban Literature

**Cross-listings:** REL 206  JWST 206  COMP 206

**Primary Cross-listing**

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man’s struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and
historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. *All readings are in translation.*

**Class Format:** discussion

**Requirements/Evaluation:** evaluation will be based on class participation, weekly short written assignments, and two longer papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**REL 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis**

**Cross-listings:** COMP 250 REL 207 JWST 207 CLAS 207

**Primary Cross-listing**

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to some continuations of these variant traditions in medieval literature, with particular attention to the material on the figures of Cain and Noah. *All readings are in translation.*

**Class Format:** For the fall of 2020, this course will taught online. The seminar will meet at the regularly scheduled time twice a week.

**Requirements/Evaluation:** Class participation and several writing assignments.

**Prerequisites:** None.

**Enrollment Limit:** 12

**Enrollment Preferences:** If the class is overenrolled, preference will be given to students who have already taken a course in Biblical literature.

**REL 208 (S) Genesis: The Family Saga**

**Cross-listings:** COMP 207  REL 208  JWST 208

**Primary Cross-listing**

The Book of Genesis has rightly been described as the masterpiece of Hebrew biblical narrative. In particular, the continuous tale that begins with Abraham and Sarah and extends four generations to the children of Jacob, Leah, and Rachel is one of the most extraordinary examples of literary artistry in any time or tradition. As one family wrestles with the promise of becoming a chosen people, the narrative explores themes of marriage, parenthood, sibling rivalry, land, violence, wandering, and, above all, the complex relationship between humanity and God. This course will examine those themes through a close reading of Genesis in translation, from Abraham and Sarah's first appearance on the scene to the death of Jacob. We will consider the text from multiple perspectives with an eye toward understanding the literary, philosophical, and psychological dimensions that continue to amaze and perplex readers to this day.

**Requirements/Evaluation:** class participation, a series of short writing assignments, and two longer papers

**Prerequisites:** none

**REL 209 (S) Jewish America**

**Cross-listings:** REL 209  JWST 209

**Primary Cross-listing**

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like *The Jazz Singer* (1927 and 1980), *Exodus* and *Annie Hall*; read John Updike's *Bech: A Book*, Philip Roth's *Operation Shylock* or Cynthia Ozick's *The Puttermesser Papers*; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's *Dearborn Independent*, the *Menorah Journal* or *Commentary*; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of *Bridget Loves Bernie*, *Northern Exposure* and *Curb Your Enthusiasm*. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

**Requirements/Evaluation:** class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and students who are interested in either of these options

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)
REL 210 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: ARTH 212 REL 210 ARAB 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First- and second-year students, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 211 Christians versus Pagans: Ancient Egypt

This course explores the religious terrain of ancient Egypt in the Greek and Roman periods. Focused mostly on the rise of Christianity, this course asks big questions about what changes and what stays the same when major religious movements emerge in a place. What parts of Christianity were new to Egypt and were premised upon a rejection and displacement of Egyptian religious practices and beliefs? What parts of Egyptian religious life, rather than being replaced or transformed by Christianity, were adopted into Christianity? And what parts of Egyptian religious practice resisted Christianity? And how and where did it resist?

Requirements/Evaluation: 1-2 page weekly papers, final paper, participation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Religion Majors

Expected Class Size: 12
REL 213  Patrons, Rituals, and Living Images in Japanese Buddhism

This course introduces students to Japanese Buddhist art and architecture. We begin with the introduction of continental monks, Buddhist images and texts, and ritual paraphernalia to Japan in the mid-sixth century. We focus on the ways different communities—the imperial court, immigrant artists, monks, women, and commoners—employed and venerated Buddhist images for political legitimacy, personal salvation, and worldly benefit. We consult inscriptions, court diaries, and Buddhist sutras translated into English to consider how believers instilled liveliness and power in Buddhist images. This course also examines how Japanese Buddhist imagery became aestheticized in the early twentieth century and appropriated later in modern and contemporary visual culture. Some of the topics to be discussed include the reception of continental styles of Buddhist bronze sculpture, the relationship between mandalas and rituals, the role of women in developing Buddhist embroideries, and the Western reappraisal of Zen arts. Students will develop familiarity with the concepts and ideas underlying the production of Buddhist images and will gain foundational skills for analyzing the visual, material, and iconographic qualities of Japanese Buddhist art. For the final project, students will design a digital exhibition focused around one of the topics of the course.

Requirements/Evaluation: Class participation, group presentations, 4 reading and object response papers (2-3 pages), and digital exhibition project (8-10-page proposal written in stages over the semester including a 10-minute presentation)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: First- and second-year students, but open to all

REL 214  (F)  Religion and the State

Cross-listings: REL 214  PSCI 271

Primary Cross-listing

The First Amendment of the U.S. Constitution begins: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." What does "religion" mean in this formulation? Should "religion" be singled-out for exclusion from government? Are "religious" reasons ever legitimate reasons for laws, policies or popular political action? Should "religious" organizations be exempt from otherwise generally applicable laws? Is "religion" good or necessary for democratic societies? In this course we will respond to these and related questions through an investigation of "religion" as a concept in political theory. Particular attention will be given to the modern liberal tradition and its critics. Coverage will range from modern classics to innovative contemporary arguments. Classics may include John Locke's A Letter Concerning Toleration, selections from Jean-Jacques Rousseau's The Social Contract, James Madison's Memorial and Remonstrance Against Religious Assessments, Immanuel Kant's Religion Within the Boundaries of Mere Reason, John Stewart Mill's Three Essays On Religion, and John Dewey's A Common Faith. More recent arguments may come from John Rawls, Alasdair MacIntyre, Nicholas Wolterstorff, Martha Nussbaum, Jeffrey Stout, Winnifred Sullivan, Brian Leiter and Andrew Koppelman.

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final take-home exam

Cross-listings: CLAS 215 REL 215

Primary Cross-listing

In this course, students will be introduced to the New Testament through an exploration of how the New Testament became a book. We will start by examining the letters of Paul--its earliest texts--in terms of the habits and traditions of ancient letter-writing. We will similarly place the other texts of the New Testament in the context of Greek, Roman, and Jewish literary traditions and conventions. As the semester moves forward, we will examine how the New Testament itself became a material object--a book--and how its changing material status shaped its meaning and functioning. We will see the New Testament transform from a library of separate scrolls and/or codices (a library which was occasionally bound together into a single codex), to a luxury object in the Middle Ages, to a cheap printed object in the wake of the printing revolution of the 19th century, to its modern life as both a highly marketed object and a searchable digital thing in online spaces and mobile apps.

REL 216 (S) Greek Art and the Gods

Cross-listings: ARTH 238 REL 216 CLAS 248

Secondary Cross-listing

In the Iliad, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympos, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: discussion

Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper

Prerequisites: none

REL 217 (F) Religion and American Politics

Cross-listings: REL 217 HIST 257

Primary Cross-listing

This course examines the intersection of religion and American politics, from the colonial era to the present. It focuses especially on electoral politics and social movements, exploring the role of religion in conflicts over racial equality, capitalism, gender and sexuality, and church-state relations. Students will tackle questions with both historical and present-day relevance, such as: Was America founded as a Christian nation? Has religion been a source of revolutionary change, or a mere 'opiate of the masses'? How have religious ethics shaped the politics of race, gender, and class? How has growing religious diversity affected civic unity? What role should religion play in American political life? The course will cover such topics as the religious views of the 'Founders;' debates over slavery; spiritualism & women's rights; state treatment of religious minorities; the Scopes Trial and scientific modernity; the Social Gospel and modern capitalism; the New Left and the Moral Majority; and late 20th-century religious battles over war, civil rights, feminism, and democracy itself.

Requirements/Evaluation: class participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (8-10 pages)

REL 218 (F) Foundations of China

Cross-listings: HIST 214 CHIN 214 ANTH 212 GBST 212 REL 218

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

REL 219  (S) Judaism Under Ancient Greek and Roman Imperialisms

Cross-listings:  CLAS 219  REL 219  JWST 219

Primary Cross-listing

How did ancient Greek and Roman empires shape the beginnings of Judaism? In this course, we will examine how Greek and Roman imperial systems of identity, ethnicity, law, religion, and knowledge affected Judaism as a religious and cultural system. We will pay particular attention to the ways that Jews/Judaean responded to these imperial pressures, especially as those responses articulated "hybrid" versions of Judaism that were informed both by resistance to imperial centers as well as the sheer hegemony of those cultural systems. The course thus uses (and introduces students to) postcolonial theory to study the history of Judaism under Greek and Roman empires. Readings for this course will include a wide array of ancient Jewish works, such as the books of Maccabees, Flavius Josephus, Philo of Alexandria, the Dead Sea Scrolls, and the Mishnah. The course will also include select readings from early Christian texts and postcolonial theory.

REL 222  (F) The Jewish Art of Interpretation
Cross-listings: JWST 222 REL 222 COMP 211

Primary Cross-listing

*Turn it and turn it, for everything is in it.* This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

REL 223 (F) Revolt and Revelation in 20th-Century Americas

Cross-listings: AFR 228 AMST 228 REL 223 LATS 228

Secondary Cross-listing

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked “Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?” Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of “God-talk” broadly termed “liberation theologies” that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

REL 226 (F) Spiritual But Not Religious

Cross-listings: REL 226 ANTH 226

Primary Cross-listing

Today, more than one in five people in the United States identify as "none" when asked about their religious affiliation. Yet that does not mean that religious sentiment or spirituality is on the decline. On the contrary, talk of "spirituality" is more pervasive than ever in popular discourse. Increasingly Americans claim that they are "spiritual but not religious" or that they prefer "individual religion" over "organized religion." This course seeks to understand and investigate this phenomenon. What is the lived experience of being "spiritual but not religious"? What counts as spirituality? Is there a meaningful distinction between spirituality and religion? What does this distinction assume about the nature of organized religion? What is the history that led us to this ideology of individualized spirituality? And what are the social and political implications of this trend? We will explore these questions and study this phenomenon through an engagement with ethnography (the qualitative research method generally described as "participant-observation"). Over the course of the semester, students will be expected to conduct an ethnographic research project within local communities in Williams College and Williamstown. Alongside our central readings on spirituality, we will also be studying some background in the theory and practice of this methodology. Throughout the semester, students will work together on developing the practical skills necessary to conduct an ethnographic project, and will be gradually executing their own individual projects. This will include: designing a feasible project and research question, selecting research sites and interlocutors, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Requirements/Evaluation: regular reading responses; semester-long research project with frequent small assignments building up to the final product (15- to 20-page paper)

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2020, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read a variety of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to contemporary novels like Ruth Ozeki's *A Tale for the Time Being*. And we'll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like mindfulness into higher education: students will learn a variety of meditation techniques, and we'll spend time each week practicing and reflecting upon those practices. Students will be expected to maintain a daily meditation practice outside of class (10-15 minutes a day), with the help of one of those newfangled meditation apps no less! No prior experience with meditation is necessary. Just an open mind. (For detailed information about the format of this hybrid course, please visit: www.tinyurl.com/Engl239)

Class Format: This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements. The whole class will meet on Zoom every other week; small groups of 4-6 students (these groups will be entirely in-person or entirely remote) will meet once a week, either on campus or on Zoom. More detailed information about the format of this course can be found at: www.tinyurl.com/Engl239 (I strongly encourage interested students to visit this URL.)

Requirements/Evaluation: Because this class will meet only once a week and in small groups, regular attendance will be strictly required; substantial weekly Glow posts; and a final critical or creative project (like an 8-10 page essay, podcast episode, or zine).

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference will go to 1st and 2nd year students; students who pre-register should email a brief explanation of why they want to take this course to brhie@williams.edu, which will be used to decide enrollment. For more info: www.tinyurl.com/Engl239

REL 232  (S)  Buddhist Economics

Cross-listings:  REL 232  ASST 232

Primary Cross-listing

Or, "From 'Shark Tank' to 'Monk Cave': Business and Socially Engaged Buddhism". Television shows like Shark Tank, featuring a panel of potential investors who consider propositions from aspiring entrepreneurs, evinces that popular culture values only the making of profit. In such a capitalistic world, who are the "winners" and "losers"? What impact does a business/product have beyond its intended consumer benefits? What is the Buddhist response to business and commerce and its overall effects on individuals, society, and ecology? This course will challenge students to research, analyze, and devise resolutions for real world issues, by having students employ Buddhist solutions informed by concepts such as compassion, interconnectedness, and Socially Engaged Buddhism. Students will scrutinize the related concept of "structural violence". We will look at examples from Bhutan's "Gross Domestic Happiness", Thailand's "Sufficiency Economy", China's state-led religious charities under the name of "Humanistic Buddhism", as well as the ordination of trees. This course hopes to prepare students to be critical, rather than merely passive, world citizens,
especially in the realm of business, and to be more conscious and aware of their everyday life choices and its impact on every aspect of society.

Requirements/Evaluation: attendance and active participation 20%; experiential exercises 25% (i.e., critical reflection that incorporates class readings with personal experience of the various experiential exercises conducted throughout the term: mainly, a 30-day social-media cleanse, and meditation sessions); Mid-term exam (in-class: identification terms and short essay) 25%; Final project and presentation 30% (the final grade includes initial consultation with the instructor regarding topic selection, annotated bibliography, project outline, final presentation, and final written report)

REL 233 (S) Islam and the West: A Clash of Civilizations?

"This idea that all religions share the same values is bulls**t and we need to call it bulls**t," the popular political commentator and critic Bill Maher has said on multiple occasions. "If you are in this religion [Islam], you probably do have values that are at odds [with American values]. This is what liberals don't want to recognize." Maher has acquired a reputation for making strong statements like this about the need for Americans (and liberals in particular) to stand up for their secular liberal values, which are in conflict with and superior to the values of Islam. Maher's comments are only one recent manifestation of a long line of pundits making such claims. This is best exemplified by Samuel Huntington's "Clash of Civilizations" thesis, which famously predicted that there would inevitably be a violent clash between the Islamic and Western Civilizations. This course investigates such ideas about the inherent conflict between Islam and the West. How should we understand the nature of Islamic and Western civilizations and the relation between them? What is the history of this relationship? What has given rise to these standard representations of Islam and Muslims? What are the political stakes and consequences of these representations? How should we understand the phenomenon of "Islamophobia"? We will explore these questions through an in-depth and critical investigation into the history of Euro-American nationalism and colonialism, the concepts of "civilizations" and "religions", the history of modern Islam, and the nature of Orientalism and secularism.

Requirements/Evaluation: regular reading responses, 5- to 6-page midterm essay, group social-media project (research-based, creating a video essay), final 7- to 8-page essay

Prerequisites: none

REL 234 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 REL 234 GBST 234 HIST 208

Primary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments
through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

**Requirements/Evaluation:** reading responses, two essays, final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

**REL 235 (S) The Garden in the Ancient World**

**Cross-listings:** COMP 235 REL 235 ENVI 232 CLAS 235

**Secondary Cross-listing**

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

**Cross-listings:** ARAB 236 COMP 213 REL 236 GBST 236

**Primary Cross-listing**

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the
context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

REL 237 (S) Islam in the United States: From Black Muslims to the War on Terror

Cross-listings: REL 237 AMST 237 AFR 237

Primary Cross-listing

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How have national narratives around 9/11 and the "War on Terror" impacted these debates over identity and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

**REL 238 (S) Faith and Rationality in Islam: Skepticism and the Quest for Certainty**

Religious faith is generally perceived as being diametrically opposed to reason and rationality. Islam in particular is often assumed to be even more dogmatic in its demand for blind unquestioning faith. This course will explore the lively debates among Muslim theologians regarding the complex relationship between faith, rationality, and skepticism. Is faith compatible with reason and rationality? Can the foundations of Islamic belief be proven to be true? Are there limits to what can be known rationally? Are people justified in holding religious beliefs? Does faith require absolute certainty? What room is there for doubt and skepticism in Islam? We will explore these questions through an array of primary and secondary readings in Islamic theology, philosophy, and mysticism from the medieval period.

REL 241 (S) History of Sexuality

Cross-listings: GBST 241  WGSS 239  REL 241  HIST 292

Primary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Cross-listings: REL 242  WGSS 242  ARAB 242

Primary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

REL 243 (F) Islamic Law: Past and Present

Cross-listings: ARAB 243 WGSS 243 REL 243 HIST 302

Primary Cross-listing

From fear of the Shari’a to its implementation in so-called “Islamic countries,” Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari’a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

REL 244 (S) Mind and Persons in Indian Thought

Cross-listings: REL 244 ASST 244

Primary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of “the West,” Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

This tutorial considers India’s legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India’s diverse and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women’s, Gender & Sexuality Studies

Expected Class Size: 10

REL 247 Anti-Muslim Racism: A Global Perspective (DPE)

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.
**Prerequisites:** none  
**Enrollment Limit:** 25

**REL 249 (F) Anti-Semitism (DPE)**  
**Cross-listings:** JWST 249 REL 249  
**Primary Cross-listing**  
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?  
**Requirements/Evaluation:** three short papers (4-5 pages), one longer final paper (6-8 pages)  
**Prerequisites:** none  
**Enrollment Limit:** 30  
**Enrollment Preferences:** Jewish Studies concentrators, Religion majors, and students who have taken JWST 203  
**Expected Class Size:** 18  
**Grading:** no pass/fail option, no fifth course option

**REL 250 (F) Scholars, Saints and Immortals: Virtue Ethics in East Asia**  
**Cross-listings:** REL 250 ASST 250  
**Primary Cross-listing**  
In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from *moral paragons*—stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a
pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others.

**REL 253 (S) Spiritual Crossroads: Religious Life in Southeast Asia**

**Cross-listings:** ANTH 233 ASST 233 REL 253

**Secondary Cross-listing**

No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

**Requirements/Evaluation:** midterm, short essays, term paper

**Prerequisites:** none; open to non-majors

**Enrollment Limit:** 19

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**REL 254 (S) The Theory and Practice of Meditation in the Modern World**

This course invites students to examine theoretically and experientially meditation. Throughout the course, we examine meditations belonging to various Buddhist traditions through our own practice. We study some of the manuals where these meditations are taught and connect these practices to some of the more important ideas of the tradition. In studying and practicing meditation, we follow a gradual approach, starting from the most basic practices to more advanced ones. We also connect the practices and ideas we consider with modern scientific approaches, examining practices such as mindfulness therapy and the practice of positive emotions from a psychological perspective. In the process, we re-contextualize Buddhist ideas by connecting them with modern approaches, particularly those inspired by biology, psychology and ecology. Throughout the course, students will keep a
daily practice of meditation and record their experiences in a journal so as to be able to come to an informed understanding combining a theoretical grasp of the issues raised by meditation and their own personal appreciation.

Class Format: mixture of lecture, discussion, and practice of meditation

Requirements/Evaluation: full attendance and participation, regular practice of meditation, two middle-length essays, and a meditation journal

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Religion majors, students who have taken REL 288

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

REL 255 (S)  Buddhism: Ideas and Practices
Cross-listings: ANTH 255  REL 255  ASST 255

Primary Cross-listing

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

Requirements/Evaluation: full attendance and active participation; two essays

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

REL 256 (F)  Buddhism, Sex, & Gender: #MeToo Then and Now  (DPE)
Cross-listings: ANTH 256  WGSS 256  REL 256  ASST 256

Primary Cross-listing

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decrtes harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity,
and female liberation. We pursue an intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option

REL 257 (S) Tibetan Buddhism: Embodying Wisdom and Compassion
We begin by considering the basic ideas and practices of Tibetan Buddhist traditions and the ways in which the ideals of wisdom and compassion have shaped Tibetan culture. We then proceed to examine particular aspects of the tradition such as the role of the teacher or lama and their various manifestations, from the exotic figure of the tantric guru to that of the Dalai Lama, a charismatic world teacher engaged in both religious and political affairs. We also examine a wide range of lay and monastic practices, from the life of large monasteries and their unique culture to the practices of nuns and lay people. Throughout this course, we consider not just the variety of exoteric practice forms but also the esoteric tantric tradition that pervades Tibetan life. We examine the various meditative practices that revolve around this profound and often misunderstood tradition. In doing so, we do not consider tantra as just a set of strange practices sometimes revolving around sex and violence. Rather we examine how it manifests a philosophy of embodiment that has profound implications for thinking about who we are as human beings.

REL 258 (F) American Conservatism
Cross-listings: HIST 378  REL 258
Secondary Cross-listing
This course traces the history of modern conservatism in the United States, from the early 20th century to the present. Students will examine the key ideas, leaders, and social movements that fueled and defined the rise of the modern right, broadly construed. In the process, they will go beyond electoral politics, exploring the relationship between conservatism and American life more broadly - especially in the realms of race relations, gender
and sexuality, religion, and capitalism. Students will be asked to think historically, considering how the right rose from obscurity to political ascendance over the course of the 20th century. And they will be asked to engage theoretically, considering what (if anything) has defined conservatism in principle and in practice. In the process, they will examine such topics as Christian fundamentalism; anti-New Deal organizing; Cold War nationalism; the GOP’s ‘Southern Strategy;’ law and order politics; anti-feminism and the culture wars; neoliberal economics; and neoconservative foreign policy.

Class Format: This course will be hybrid -- accessible to both on-campus and fully remote students. It is designed as a seminar, in which course meetings will revolve around synchronous discussion. Remote learners will be expected to digitally attend and participate in those meetings through Zoom (or a similar program).

Requirements/Evaluation: Participation in group discussion; five response papers (300-400 words); two essays (4-6 pp); final research paper (8-10 pp).

Prerequisites: None, open to all students.

Enrollment Limit: 15

Enrollment Preferences: History and Religion majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

REL 259 (S) Ethics of Jewish American Fiction

Cross-listings: ENGL 259 REL 259 JWST 259

Primary Cross-listing

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and English majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

REL 261 (F) Rastafari: Dread, Politics, Agency

Cross-listings: REL 261 AFR 299 PSCI 233

Secondary Cross-listing

The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a 12- to 15- page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators and majors in Political Science and Religion

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

REL 262 (F) Time and Blackness

Cross-listings: AFR 208 REL 262 AMST 208

Secondary Cross-listing

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, “Time and Blackness,” we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

REL 264 (F) Bodies, Genders, and Sexualities in the Early Christian World (DPE)

Cross-listings: REL 264 WGSS 264

Primary Cross-listing

What does it mean to be a woman or a man? To have body? A gender? A sexuality? In this course we will explore the ways in which bodies, genders, and sexualities were experienced and described in Mediterranean antiquity. Ancient experiences of and ideas about bodies, genders, and sexualities were often very different than those of the contemporary world. Nevertheless, because Greek and Roman antiquity and Christian beginnings often function as the imagined origins of "Western" (or European and American) "civilization," these ancient ideas about bodies, genders, and sexuality maintain an out-sized presence in current debates about the "normal" body, gender practices, and the contour of sexuality. With a focus on early Christianity, the course seeks, on the one hand, to introduce students to the early history of Christianity through an inspection of its pluralist discourses on the meaning and regulation of bodies, genders, and sexuality, even as it keeps an eye toward the modern legacy of these ideas. On the other hand, the course gives students the opportunity to be introduced to key questions and theories in Women's, Gender, and Sexuality Studies through the study of early Christianity and its environs.

Requirements/Evaluation: weekly response papers, 5- to 6-page paper, 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors, student seniority by class

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

REL 266 (S) Being American, Being Muslim: American Muslim Literature in the 21st century (DPE)

Cross-listings: COMP 228 AMST 266 ENGL 268 REL 266

Primary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves. We will address questions such as: How have American Muslims understood their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? What are the competing claims and contestations about authentic expressions of Islam? How are Muslims approaching the tensions between communal belonging and individuality? We will be engaging such questions primarily through an analysis of popular memoirs, autobiographies, novels, and short stories, but will also explore some plays, films, poetry, and comedy.

Requirements/Evaluation: regular reading responses, two short essays (3-4 pages), final presentation, and final paper (7-8 pages)

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 228 (D1) AMST 266 (D2) ENGL 268 (D1) REL 266 (D2)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing
claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

REL 267 (F) The Art of Friendship

Cross-listings: COMP 267 CLAS 212 REL 267 COMP 288

Secondary Cross-listing

The idea of friendship has captivated poets, philosophers, and their audiences for over three millennia. The subtle dynamics of this fundamental relationship between humans have been a source of inspiration, consolation, and consternation for countless writers and readers. What are the different types of friendship? How does one make a friend, and what makes a good friend? How does a friend differ from an acquaintance, an ally, an accomplice, an enemy? Can the beloved also be a friend? Ancient Greek and Latin writers took up these and other questions about friendship in philosophical dialogues and treatises, epic and lyric poems, tragic and comic plays, oratory, and correspondence. This course will explore ancient theories and representations of friendship through readings from many of the most important texts and authors of antiquity, including Gilgamesh, the Hebrew Bible, Homer, Sappho, Euripides, Plato, Aristotle, Cicero, Virgil, Seneca, and the Epistles of Paul. We will also consider the wide-ranging responses to these meditations and depictions in later traditions from the Middle Ages to modernity, in such writers as Heloise and Abelard, Aelred of Rievaulx, Aquinas, Montaigne, Ralph Waldo Emerson, Emily Dickinson, Elizabeth Bishop, Jack Kerouac, and Susan Sontag. All readings are in translation.

REL 268 (F) Where are all the Jews? (DPE) (WS)

Cross-listings: REL 268 ARAB 363 JWST 268 COMP 363

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israélite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Class Format: The course will be offered both in-person and remotely. Students enrolled remotely are required to watch the recorded videos of the in-person sessions in order to stay abreast of the discussions that take place in the classroom and enrich their engagement with the materials assigned in the course.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 268 (D2) ARAB 363 (D1) JWST 268 (D2) COMP 363 (D1)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

REL 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: REL 269  STS 269  ASST 269  ANTH 269

Secondary Cross-listing

This course offers a social analysis and condensed genealogy of mindfulness from its roots as a Buddhist meditation practice through its modern application as a tool to improve our awareness of the related processes of mind, behavior, and emotions. We consider how mindfulness relates to Buddhist discourses and practices, and to the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How and why has the research on mindfulness and other applied meditative practices exploded since 2000? How has this research helped us understand and explain the intersection of mind, emotion, behavior, and human development? We critically examine the models of the mind developed by clinical and evolutionary psychologists and researchers in fields such as affective neuroscience to better understand the applications of mindfulness in the US today. Specifically, we consider how mindfulness and other forms of meditation are being used to improve the training of health care providers and educators, while augmenting and deepening the quality of their engagement with patients, students, and others they serve. We examine and train in a variety of meditation practices including mindfulness and forest bathing, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to engage in mindfulness practices the entire semester.

Class Format: Offered in a hybrid format, but students are encouraged to attend in person if they can. Studies will be grouped in pairs or threesomes, that will meet in-person or remotely. Please email me (Kgutsch@williams.edu) to indicate whether you intend to take this class in-person or remotely.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269 (D2) STS 269 (D2) ASST 269 (D2) ANTH 269 (D2)

Writing Skills Notes: This class will involve weekly tutorial essays of 1200 or 600 words, written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can alleviate pervasive and population-wide health issues in the US including rising rates of anxiety, depression, and other mental health issues that are exacerbated by stress related to social inequality and structural violence. It also explores the ways that mindfulness has been marketed
as an elite and non-inclusive practice within the US.
