LEC Section: 03 M 7:00 pm - 9:40 pm Peter L. Pedroni

ECON 255 (F)(S) Econometrics (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

ECON 257 (F) The Economics of Race (DPE)
This course will examine the causes and consequences of racial disparities in economic outcomes. Specific topics will include the economic history of slavery, Reconstruction and the Civil Rights Movement; racial gaps in earnings, wealth, educational attainment, standardized test scores, and health outcomes; formal models of taste-based and statistical discrimination; and the structure and efficacy of government anti-discrimination policies. Much of the course will focus on racial discrimination faced by African Americans specifically, but there will also be coverage of other racial and ethnic minority groups. The course will additionally focus almost exclusively on the US, although many of the theories and techniques we will develop are
The course will utilize basic microeconomic tools, such as straightforward extensions of the supply and demand model, and ECON 110 is a prerequisite. We will also make extensive use of descriptive statistics, and an introductory statistics course such as STAT 101 will be useful, but is not required.

**Class Format:** I anticipate conducting the "hybrid" version of the course broadly similarly to the in-person version, but with students participating remotely attending synchronous discussions/lectures via Zoom. A teaching assistant will monitor the Zoom feed so I can respond to questions and comments from students participating online.

**Requirements/Evaluation:** exams, short written responses, problem sets, participation

**Prerequisites:** ECON 110

**Enrollment Limit:** 25

**Enrollment Preferences:** First- and second-year students.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** The course is well suited for the DPE distribution requirement as it will develop in detail not only the existence of race-based differences in a wide variety of key socioeconomic outcomes, but also explore the historical and contemporary processes that lead to those differences.

**Attributes:** POEC U.S. Political Economy + Public Policy Course

ECON 299 (F) Economic Liberalism and Its Critics

Cross-listings: ECON 299 PSCI 238 POEC 250

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This class uses a flipped classroom approach, where before each class meeting, students watch a lecture video, and sometimes write an essay or solve some problems on relating to the assigned reading and video, and then in-person class is devoted primarily to discussion.

Requirements/Evaluation: six short essays, several short homework assignments, and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 30

Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

ECON 345 (S) Growth Diagnostics (QFR)

Cross-listings: ECON 545 ECON 345

Primary Cross-listing

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given
developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

**Requirements/Evaluation:** extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth diagnostic, and a team presentation on the diagnostic

**Prerequisites:** for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

**Enrollment Limit:** 19

**Enrollment Preferences:** CDE fellows and senior Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**Cross-listings:** ECON 548 ECON 348

**Primary Cross-listing**

Children around the world face unequal opportunities to attend school, and to learn. This course will introduce students to economic studies of education, focusing on pre-school through high school. The course will mainly cover research in low-income and middle-income countries, but will also discuss connections to policy debates in the United States and elsewhere. Topics will include the importance of early-life conditions and investments; the connections between health and education; the roles of information, incentives, inputs, and technology; research methods; and decisions between policy options. Students in this course will analyze data themselves, and will critically read published research.

**Requirements/Evaluation:** Grades are principally based on problem sets, two in-class exams, and short presentations by students.

**Prerequisites:** ECON 255, POEC 253, STAT 346, or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 20

**ECON 352 (S) Financial Development and Regulation**

**Cross-listings:** ECON 352 ECON 510

**Secondary Cross-listing**

This course focuses on the financial system in developing countries and its role in economic development. The first part explores the functions of finance, how it contributes to growth and poverty alleviation, as well as examining what can be done to increase financial inclusion. It will look at experiences with financial sector repression and subsequent liberalization, and investigate the causes and impact of financial crises. Then it will study
how to make finance effective in dealing with a variety of risks facing societies, including aging and climate change. A key focus will be how to prevent or minimize crises, analyzing government's role as regulator, supervisor, standard setter, contract enforcer, and owner. In this final part, attention will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

Class Format: discussion

Requirements/Evaluation: Midterm, participation in class discussion and formal debates, and a final research paper.

Prerequisites: For undergraduates, POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 25

Enrollment Preferences: CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

ECON 353 (F) Mathematical Economics (QFR)

This course integrates economics at the intermediate level with the tools of mathematics. Topics such as univariate and multivariate calculus will be reviewed or introduced in the context of how these mathematical concepts enhance economic analysis. The combination of economic and mathematical analysis will provide a strong foundation for thesis writing and advanced study of economic theory.

Requirements/Evaluation: quizzes, midterm and a final

Prerequisites: ECON 251 and MATH 130

Enrollment Limit: 25

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Not offered current academic year

ECON 356 (S) Empirical Methods in Macroeconomics (QFR)

Cross-listings: ECON 513 ECON 356

Secondary Cross-listing

Macroeconomics and related fields in international finance and macro development have evolved specialized empirical techniques, known generally as macroeconometrics, which are designed to meet the practical challenges that the data and the empirical questions pose in these fields. The course will introduce the theory and application of these techniques, and students will learn how to implement these techniques using real world data to address practical questions drawn from the field of macro development The course is also available to undergraduates with permission of the instructor. However, in lieu of Econ 356, undergraduates with good quantitative skills are encouraged to take Econ 371, which will cover a broader range of topics in greater depth.

Requirements/Evaluation: weekly homework assignments, term paper

Prerequisites: ECON 252, ECON 255 or equivalent Students may not earn credit for both Econ 356 and Econ 371

Enrollment Limit: 19

Enrollment Preferences: Economics majors and CDE fellows

ECON 362 (S) Global Competitive Strategies

Econ 362 acknowledges both the importance of large, diversified multinational firms in global economic activity, and the forms of strategic thinking that often displace, in practice, the optimization models of traditional economic analysis. In this course, we seek to describe competition in global markets by developing competence in decoding and critiquing (and even formulating) varieties of business and corporate strategies employed during the past forty years. While we treat a variety of theoretical models that seek or have sought to explain patterns of international economic activity, our priority is to ascertain their descriptive integrity and usefulness today. Our historical interest begins with mercantilism and covers Smith, comparative advantage, varieties of factor endowment theories, and much more, proceeding to strategic management perspectives and contributions of the 20th and early 21st century. We complete these efforts with a few original attempts to reconcile modern growth theory (e.g., Romer) with modern strategic practice (e.g., Porter). Further, substantial recent shifts in the nature of globalized economic activity, including the changing relative mobility and power of capital and labor, are examined. While the course is largely descriptive, it cannot fail to treat a few normative issues. We treat the efficacy of various government policies in promoting the competitiveness of home-based industries in regional and global markets. Finally, welfare propositions and policy ideas for addressing welfare impacts in a descriptively accurate context are advanced.

Class Format: mix of lecture, discussion, and case analyses

Requirements/Evaluation: written cases (in teams), class participation, a mid-term exam, and a final paper (can be co-authored) or exam are expected

Prerequisites: ECON 251

Enrollment Limit: 25

Enrollment Preferences: senior Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

LEC Section: 01 W 7:00 pm - 9:40 pm Michael Fortunato

ECON 364 (F) Theory of Asset Pricing

What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course
theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

Requirements/Evaluation: problem sets and exams  
Prerequisites: ECON 251 or ECON 252; and ECON 255 or STAT 201  
Enrollment Limit: 20  
Enrollment Preferences: Economics majors  
Expected Class Size: 20  
Grading: no pass/fail option, yes fifth course option  
Distributions: (D2)  
Not offered current academic year

ECON 366 (S) International Trade and Development  
Cross-listings: ECON 516 ECON 366  
Secondary Cross-listing  
This course will examine the causes and consequences of globalization and its implications for less-developed countries. We will study the classic models of international trade and discuss the empirical relevance of these theories. In addition, we will focus on other dimensions of globalization that are of particular importance to developing countries such as trade and education, emigration, brain drain, remittances, foreign direct investment, trade policies, infant industry protection, trade and growth, the resource course, and trade agreements.  
Class Format: discussion  
Requirements/Evaluation: problem sets, midterm, presentation, and final  
Prerequisites: ECON 251 and ECON 255; undergraduate enrollment limited and requires instructor's permission  
Enrollment Limit: 19

Spring 2022  
SEM Section: 01 TR 9:55 am - 11:10 am Will Olney

ECON 370 Data Science for Economic Analysis  
The goal of data science is to use empirical information from a broad range of sources to improve our understanding of the world around us. Economists increasingly rely on the tools of data science to access novel sources of data and information, characterize the economic environment, and conduct empirical analysis. This course provides hands-on introduction to data science tools most relevant for economic analysis including data visualization, exploratory data analysis, and statistical learning. The objective of the course is to help students: (i) formulate economic research questions that can be explored using data science tools, (ii) identify sources of data and prepare data for analysis, (iii) produce persuasive visualizations, and (iv) analyze data using both classical statistics and machine learning.  
Class Format: The course includes traditional lectures, interactive activities in both Stata and R, and in-class presentations by students. Some prior knowledge of either Stata or R is helpful, but not required.  
Requirements/Evaluation: Grades are based on in-class participation and performance on two take-home exams as well as problem sets and data visualization/analysis projects.  
Prerequisites: ECON 255 or STAT 201, STAT 202, or STAT 346 or permission of instructor
ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro (QFR)
Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for analysis of short dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

Requirements/Evaluation: term paper and regular homework assignments
Prerequisites: ECON 252 and either ECON 255 or STATS 346
Enrollment Limit: 19
Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.
Not offered current academic year

ECON 373 (F) The Economics of Immigration (QFR)
This course will explore migration across national borders from an economic perspective, with a focus on migration to the United States. Who migrates, and why? What are the impacts on the economies of the origin country and the destination country, and on migrants themselves? What policies shape immigration and enforcement of immigration law, and what are their impacts? What is the role of immigrants in the broader society? We will emphasize empirical analysis as a data-driven way of understanding the economics of immigration.
Class Format: Class will periodically meet in a small-group seminar format.
Requirements/Evaluation: Requirements: active participation, 3 empirical assignments, 2 short papers, 2 presentations, and a final 12-15 page paper.
Prerequisites: Econ 251 and Econ 255, or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Economics majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: This course will use quantitative tools of economics.

Fall 2021
ECON 374 (F) Poverty and Public Policy (WS)

Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in this country. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and functioning of these programs, focusing on questions economists typically ask when evaluating public policy such as: What are the goals of the policy and does the policy achieve them? Does the design of the policy lead to unintended effects (either good or bad)? What are the trade-offs inherent in the policy’s design? Could the policy be redesigned to achieve its goals more effectively? Through in-depth study of these programs, students will learn how economists bring theoretical models and empirical evidence to bear on important questions of public policy.

Requirements/Evaluation: evaluation will be based on six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: POEC 253 or ECON 255 or STAT 346 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Economics majors, Political Economy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 5- to 7-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 2- to 3-page critiques of their partners' papers. Midway through the semester, each student will revise one of their first three papers.

Fall 2021

TUT Section: T1 TBA Lara D. Shore-Sheppard

ECON 375 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings: ECON 532 ECON 375

Secondary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10
Enrollment Preferences:  Junior and senior Economics majors

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

ECON 376  (F)  The Economics of Global Inequality  (QFR)
This course focuses on the proximate and ultimate causes of global economic inequality across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about global economic inequality remain difficult to answer.

Class Format:  This course will be taught in hybrid format in Fall 2020. All classroom lectures will be recorded and made available for remote learners unable to attend lectures virtually. Problem set assignments and exams may be submitted electronically as needed, and all exams will be "take home." Additional office hours will be offered to accommodate the needs of remote learners.

Requirements/Evaluation:  Problem sets, one midterm exam, final exam.

Prerequisites:  ECON 252 and either ECON 255 or STAT 346. ECON 251 recommended but not required.

Enrollment Limit:  20

Enrollment Preferences:  Junior and senior economics majors.

Expected Class Size:  20

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (QFR)

Quantitative/Formal Reasoning Notes:  The course material will draw heavily on mathematical and statistical models of economic growth and cross-country comparative development. Students will routinely work on sophisticated mathematical models of economic growth, involving the application of solution concepts from dynamic optimization and differential equations. Students will also be required to perform some econometric analyses in their assignments.

Not offered current academic year

ECON 377  (F)  Inspiration/Perspiration: The Economics of Innovation
From the iron plow, to the steam engine, to modern biotechnology, innovation drives economic growth and raises living standards. Whether we are talking about great inventions or small tweaks, the tools of economics can help us understand how new ideas and technologies emerge, spread, and become obsolete. In this course, we will examine the creation of new knowledge, the translation of ideas and scientific advances into practical applications, and the adoption of new technologies by producers and consumers. We will study the incentives that potential innovators face, how these are affected by patents and other forms of intellectual property rights, how entrepreneurs finance and market their innovations and how different market structures can influence the resulting trajectory of innovation and adoption. We will also discuss how government policies can foster the financing and development of innovation. Throughout the course, we will explore historical and contemporary case studies of the creation, exploitation,
ECON 378  (F)  Long-Run Comparative Development  (QFR)  
The world today is marred by vast disparities in the standard of living, with about a 30-fold difference in real GDP per capita between the poorest and most affluent of nations. What are the causes of such differences in prosperity across countries? Are the origins of global inequality to be found in underlying differences among societies over the past few decades, the past few centuries, or the past few millennia? If contemporary differences in living standards have such "deep" historical roots, what scope exists for policies to reduce global inequality today? Can we expect inequality to be reduced through some natural process of macroeconomic development, or is it likely to persist unless acted upon by policy? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficacy for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in the course of industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the enduring effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the composition of traits in populations across the globe.  

Class Format: discussion  
Requirements/Evaluation: problem sets, at least one exam, a research paper, and a class presentation  
Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346  
Enrollment Limit: 25  
Enrollment Preferences: junior and senior Economics majors

ECON 379  (S)  Program Evaluation for International Development  
Cross-listings: ECON 523  ECON 379  
Secondary Cross-listing  
Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide
range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

**Requirements/Evaluation:** Empirical exercises, exams, writing assignments, and collaborative projects

**Prerequisites:** one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

**Enrollment Limit:** 20

**Enrollment Preferences:** CDE Students, but undergraduates with the prerequisites are welcome

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 523 (D2) ECON 379 (D2)

**Attributes:** PHLH Methods in Public Health POEC Comparative POEC/Public Policy Courses

---

**ECON 380 (S) Population Economics**

**Cross-listings:** ECON 380 ECON 519

**Primary Cross-listing**

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

**Class Format:** Course will be remote and will include synchronous lecture/discussion, possibly combined with some asynchronous components.

**Requirements/Evaluation:** at least one exam, a research paper and a class presentation

**Prerequisites:** ECON 251; POEC 253 or ECON 255 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** If overenrolled, students will be asked to submit a brief statement of interest.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 380 (D2) ECON 519 (D2)

**Attributes:** PHLH Social Determinants of Health POEC Comparative POEC/Public Policy Courses

---

**ECON 381 (S) Global Health Policy Challenges**

Poor health is both a cause and a consequence of poverty. It can trap individuals in poverty and reduce aggregate economic growth. This course will be structured around major global health challenges, including maternal health, infectious diseases (e.g. HIV/AIDS, tuberculosis, COVID), neglected tropical diseases (e.g malaria, dengue, Ebola), nutritional deficiencies, and mental health. We will focus primarily, but not exclusively, on health in low-income countries in this course. Students will read papers and conducted empirical assignments related to the various topics, as well as develop their own research idea during the semester related to one of the topics covered.
**Requirements/Evaluation:** empirical problem sets, midterm exam and a substantive research paper that includes some analysis of existing data

**Prerequisites:** ECON 251 and (POEC 253 or ECON 255 or STAT 346) or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** juniors and sophomores

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** PHLH Decision-Making by Institutions + Individuals, POEC Comparative POEC/Public Policy Courses

*Not offered current academic year*

**ECON 382 (S) Gentrification and Neighborhood Change (DPE)**

While the phenomenon we call "gentrification" was first noted in the 1960s, these changes in urban neighborhoods have recently drawn increasing scrutiny and concern. Coming at a time of growing income inequality, the movement of higher income households into neighborhoods previously occupied by lower-income households has raised concerns about displacement, housing affordability, access to employment and other problems that may be associated with a gentrifying city. These problems may be further exacerbated by residential segregation and reduced support for public housing and transportation. This course will provide an opportunity to study these issues in depth. What, exactly, is gentrification? What do we know about the economic causes and consequences of gentrification and neighborhood change? How are these causes and consequences affected by growing income inequality and continued segregation in housing? What policy options might be pursued that could improve the well-being of existing and potential residents of the neighborhoods in US cities?

**Class Format:** The initial meeting of the class and all meetings of tutorial pairs will be held remotely via Zoom teleconference. Students will need a computer and reliable internet connection to participate.

**Requirements/Evaluation:** Students will meet in pairs once per week. On alternate weeks students will write a 10-12 page primary paper on an assigned topic, and on the next week write a 4-5 page comment and discussion on the primary paper. At least one of the primary papers written by each student during the course must incorporate some analysis of data on gentrification using data introduced in discussion.

**Prerequisites:** Economics 251 (Price and Allocation Theory), Statistics 161 or Economics 255 (Econometrics) or POEC 253 (Empirical Methods in Political Economy) or instructor permission.

**Enrollment Limit:** 10

**Enrollment Preferences:** Economics and Political Economy majors, Juniors and Seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Gentrification has been identified in the survey of DPE suggestions as a worthwhile and important topic for a course satisfying the DPE requirement. Gentrification, with its consequent displacement of low-income and frequently minority households in cities is widely viewed as a problem and there have been increasing demands for local policies to limit the rate or extent of gentrification. We will address the causes, measurement of gentrification and extent to which it burdens poor households.

*Not offered current academic year*

**ECON 383 (S) Cities, Regions and the Economy**

Cities and urbanization can have significant impacts on the economy. In many developed economies, a process of regional decline is associated with older, industrial cities. In developing countries, the process of economic growth is generally associated with increasing urbanization. Urbanization, with its increasing concentration of population and production, puts particular pressure on markets to allocate resources for provision of land, housing, transportation, labor and public goods. Urbanization can alter the productivity of land, labor, and capital in ways that can improve the welfare of residents and the performance of the broader economy. In this course we will examine these conflicting economic forces and examine some recent research that contributes to our understanding of the difference between regional growth and decline, and the role that the urban structure plays in these processes. We will examine the function of land, housing, transportation, and labor markets in the urban context, and the scope for public policies to improve the performance of the regional economy.

**Class Format:** This class will be conducted remotely, with lecture/discussions recorded as videos available on Glow, and class discussions held during the assigned meeting time of the class via Zoom teleconference. Students will need a computer and reliable internet connection to participate.
Requirements/Evaluation: Two midterms and a research paper on an approved topic that is at least 5000 words in length.
Prerequisites: ECON 251 or instructor's permission
Enrollment Limit: 20
Enrollment Preferences: Seniors and Juniors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: AMST Space and Place Electives GBST Urbanizing World Electives POEC U.S. Political Economy + Public Policy Course

ECON 384 (F) Corporate Finance (QFR)
This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions. In the fall of 2020, special consideration will be given to how both financial and real economic shocks interact with firms' financial decisions.

Class Format: Lecture / discussion; in the fall of 2020, some weeks we will meet for one 75-minute section (in person when possible) and break into smaller groups for one hour section groups (most likely remote). The timing of the sections will be arranged at the beginning of the semester.

Requirements/Evaluation: class participation, problem sets, short quizzes, short projects such as case write ups, a midterm exam, a final exercise and a research paper (possibly written with a partner)
Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)
Enrollment Limit: 20
Enrollment Preferences: Senior Economics majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.
Not offered current academic year

ECON 385 (S) Games and Information
This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games and enforcement, and information asymmetries and signaling, will be introduced. Applications will be drawn from economics and politics around the globe.

Requirements/Evaluation: Two exams, regular problem sets and assignments in which students create models based on assigned readings.
Prerequisites: ECON 251 and MATH 150.
Enrollment Limit: 25
Enrollment Preferences: Juniors and seniors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Unit Notes: students who have taken MATH 335 cannot receive credit for this class
Distributions: (D2)

LEC Section: 01    MR 2:35 pm - 3:50 pm    Ashok S. Rai
ECON 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Primary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 30

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 522 (D2) ENVI 387 (D2) ECON 387 (D2)

Quantitative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.

ECON 389 (S) Tax Policy in Global Perspective (QFR)

Cross-listings: ECON 514 ECON 389

Secondary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, tax policy lessons are universal so we will learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered; and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus “flat” taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 390 (S) Financial Crises: Causes and Cures

Cross-listings: ECON 390  ECON 536

Primary Cross-listing

Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students

Prerequisites: ECON 252 and 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 390 (D2) ECON 536 (D2)

Attributes: POEC Comparative POEC/Public Policy Courses

ECON 394 (F) European Economic History

Economic history directly informs our understanding of the process of economic development. With this in mind, this course will explore a series of questions related to the economic development of Europe from the early modern period until today. Why did modern economic growth first occur in Europe, and not in China or the Middle East? Why did the Industrial Revolution occur in Britain and not France? What was the role of colonialism in the acceleration of European growth? What explains the rise and fall of the Soviet economy? What are the causes and consequences of European economic integration since World War II? To answer these and other questions, we will investigate how institutional changes, the evolution of technology, aspects of globalization, and various forms of government intervention have impacted economic growth and living standards in European history, and how those developments have affected the rest of the world. Drawing on a wide variety of empirical and theoretical readings, the course will focus on how economic historians marshall evidence and construct arguments in ways that borrow from and contribute to other fields of economics.

Class Format: discussion

Requirements/Evaluation: class participation, reading responses, short assignments, and a final research paper

Prerequisites: ECON 251 or ECON 252 AND (ECON 255 or POEC 253 or STAT 346)

Enrollment Limit: 25
ECON 397  (F)  Independent Study: Economics (Advanced)
Students are invited to apply to undertake independent study on subjects of their own choosing. Interested students should consult with a faculty member about designing an appropriate project well in advance of fall registration.

Requirements/Evaluation: Determined in consultation with the faculty member advising the independent study
Prerequisites: At least one of (Econ 251, Econ 252, or Econ 255), consent of an instructor and of the department chair
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: NA
Grading: yes pass/fail option, yes fifth course option
Unit Notes: An approved project may count as one of the two advanced electives required for the major
Distributions: (D2)

Fall 2021

Spring 2022
IND Section: 01    TBA     Lara D. Shore-Sheppard

ECON 451  (F) Topics in Economic Growth
In this seminar, we will discuss some of the 'big questions' in macroeconomics, with a particular focus on economic growth. For example: Why are some countries richer than others? How does government intervention affect economic growth? Is it possible to have continued economic growth while avoiding dangerous levels of climatic change? Does inequality help or harm growth? How will automation and artificial intelligence affect growth, inequality, and unemployment? In addition to class discussions, students will complete an independent research project on a topic related to economic growth.

Class Format: About half of the class sessions will be lecture-based. The other half will be devoted to class discussion.
Requirements/Evaluation: class presentations, problem sets, short-writing assignments, research paper
Prerequisites: ECON 251, ECON 252, and (ECON 255 or STAT 346)
**ECON 453 (F) Research in Labor Economics and Policy**

The labor market plays a crucial role in people's lives worldwide. In industrialized countries, most households contain at least one wage earner, and income from working represents the largest component of total income. Thus analyses of the labor market are fundamentally relevant to both public policy and private decision-making. This seminar will explore the structure and functioning of the labor market using theoretical and empirical tools. Topics to be covered include labor supply and demand, minimum wages, labor market effects of social insurance and welfare programs, the collective bargaining relationship, discrimination, human capital, immigration, wage distribution, and unemployment. As labor economics is an intensely empirical subfield, students will be expected to analyze data as well as study the empirical work of others.

**Class Format:** I anticipate conducting the "hybrid" version of the course broadly similarly to the in-person version, but with students who are participating remotely attending synchronous class sessions via Zoom. Some use of written discussion boards to supplement in-person discussion and Socratic dialogues is also likely. That is my plan for now, but I will of course flexibly adapt the format as needed, both over the remainder of the summer and once the class begins.

**Requirements/Evaluation:** a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper (written in stages)

**Prerequisites:** ECON 251 and ECON 255 or POEC 253

---

**ECON 455 (F) Research in Economic History**

Historical approaches towards understanding economic development and current economic issues are increasingly in vogue. This course will explore new developments in the field of economics history, focusing on how economic historians are using old and new, qualitative and quantitative, data and methods to address questions of historical and current relevance. Along the way, we will consider works from both sides of the history-economics boundary, focusing on the ways that the two disciplines can and should borrow from one another. We will range widely across space and time, but some possible topics to be investigated include technological innovation, labor coercion, migration, trade and capital flows, colonialism, corporate governance, and political economy. Students are expected to not only read and analyze recent scholarship in economic history, but to also produce and present their own original research over the semester.

**Requirements/Evaluation:** short writing assignments and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original research paper (written in stages)

**Prerequisites:** ECON 251 and ECON 255 or consent of instructor; a previous economic history course is recommended but not required

---

**Enrollment Limit:** 15
**Enrollment Preferences:** senior Economics majors
**Expected Class Size:** 15
**Grading:** yes pass/fail option, yes fifth course option
**Distributions:** (D2)
ECON 456 (F) Income Distribution
This course examines the distribution of income in the United States. Questions to be addressed may include the following: How have wage inequality and the skill premium evolved over time? What factors explain a rising skill premium? How does income differ with race and gender? How is poverty measured, and what are the factors associated with living in poverty? How do government programs change the distribution of income? How much income mobility is there across generations? Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Requirements/Evaluation: short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 20

Enrollment Preferences: senior Economics majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: POEC U.S. Political Economy + Public Policy Course

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Sara LaLumia

ECON 458 (S) Economics of Risk
Risk and uncertainty are pervasive features of economic decisions and outcomes. Individuals face risk about health status and future job prospects. For a firm, developing new products is risky; furthermore, once a product has been developed, the firm faces product liability risk if it turns out to be unsafe. Investment decisions—from managing a portfolio to starting a business—are also fraught with uncertainty. Some risks are environmental—both manmade problems and natural disasters; other risks include the possibility of terrorist attack and, more locally, issues of campus safety. This tutorial explores both the private market responses to risk (e.g., financial markets, insurance markets, private contracting, and precautionary investments and saving) and government policies towards risk (e.g., regulation, taxation, and the legal system). From a theoretical standpoint, the course will build on expected utility theory, diversification, options valuation, principal-agent models, contract theory, and cost-benefit analysis. We will apply these tools to a wide variety of economic issues such as the ones listed above. One goal of the course is to discover common themes across the disparate topics. Students will be expected to read and synthesize a variety of approaches to risk and uncertainty and apply them to various issues.

Class Format: tutorial; students will meet with the instructor in pairs in each week

Requirements/Evaluation: For the first ten weeks, each student will write a 5 - 7 page paper every other week, and comment (of 2 - 3 pages) on their partner's work in the other weeks; the final two weeks will be reserved for papers on a topic of each student's interest (again, 5 - 7 pages but without needing to write a comment on their partner's work); one of the papers during the term will be revised to reflect feedback from the instructor and the student's partner

Prerequisites: ECON 251, 252, and 255

Enrollment Limit: 10

Enrollment Preferences: senior Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ECON 459 (S) Institutions and Development
Why are some societies rich and others poor? While typical answers emphasize proximate causes like factor accumulation (i.e., growth in physical and human capital), technological progress, and demographic change, the institutional approach highlights the role of social, political, and cultural factors, broadly defined, as fundamental determinants of economic prosperity. The central idea is that the value-added of economic activities to society is primarily conditioned by the social arrangements within which these activities occur -- namely, arrangements that generate a structure of private incentives, which can either promote behavior that is conducive to economic development or lead to the pursuit of private gain at the expense of the common good. Thus, the key to economic development in this approach is the emergence of complementary institutions and structures of governance in society. This course will survey the recent literature on the topic of institutions and economic development, with an emphasis on empirical evidence in the context of both historical and contemporary societies. The purpose of the course will be to expose students to the core ideas and empirical tools employed at the frontier of research in this area. The readings will primarily comprise published journal articles and unpublished working papers, and students should expect to apply concepts from across all the core courses in economics.

Requirements/Evaluation: extensive class participation, two 5-page review papers, two class presentations, and one 15- to 20-page empirical research paper (written in stages)

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Quamrul H. Ashraf

ECON 463 (S) Financial History

What can we learn from financial history to understand the successes and failures of finance today and in coming years? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of credit and more generally finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the US; the evolution of money, from stones or cigarettes to Bitcoin; the relationship between finance and government, and the extent to which it has changed over time; lessons from early asset bubbles and more recent crises (including that of 2008-09) for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today. The course also examines the tools that were developed in earlier eras to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation, including how financial systems can be prepared, if possible, for the risks that are already unfolding -- such as technology changes and climate risk.

Class Format: As of October 2020, the spring 2021 class will be remote. While many sessions will include the entire class, if we are at the cap (15 students), for some topics I will break the class up into smaller groups. For those in town, when the weather warms up, I hope to include distanced meetings outside, doing separate meetings for any students who are remote only. Liberal use of discussion boards will be made.

Requirements/Evaluation: Either 6 short papers or 3 short papers and one longer research paper (student choice), at least two oral presentations, and contributions to class discussions.

Prerequisites: ECON 251, ECON 252, and ECON 255 (or STAT 346 or Poli Ec 253) are required.

Enrollment Limit: 15

Enrollment Preferences: Senior Economics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 465 (F) Pollution and Labor Markets

If your home town has polluted air, does that reduce your wage? Do you work less? Are you less likely to finish high school? These are specific
instances of an important general question: how does pollution affect labor market outcomes? The answer matters for individual decisions (where to live) and government policies (air pollution regulations). This seminar begins from theories of optimizing worker behavior in the presence of pollution. Building on this foundation, we will critically evaluate new empirical research into the impacts of pollution on human capital, labor supply, and productivity. We will also study the impact of pollution regulations on wages and employment. Included papers will cover both developed and developing countries.

Requirements/Evaluation: class discussion, presentation of reading, paper replication, 15- to 20-page empirical paper (written in stages) and accompanying short presentation

Prerequisites: ECON 251 and ECON 255; STAT 201/346 acceptable in place of ECON 255 prerequisite with instructor permission

Enrollment Limit: 19

Enrollment Preferences: Economics majors, seniority

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2021

SEM Section: 01 TF 2:35 pm - 3:50 pm Matthew Gibson

ECON 468  (F) Your Money or Your Life: Health Disparities in the United States

A 25-year-old man living in a high-income household can expect to live 10 years longer than his low-income counterpart. There are also stark differences in mortality and health by race, education, employment status, region, and gender. This course will explore many of the potential explanations for health disparities, including access to insurance and health care, health behaviors, stress, environmental exposure, trust in institutions, and intergenerational transmission of health. We will emphasize causal inference and focus on assessing the quality of evidence. We will also investigate how government policies contribute to or ameliorate health disparities in the U.S.

Class Format: including frequent small group meetings that may occur outside regularly scheduled class times

Requirements/Evaluation: Class discussion, oral presentations, six short response papers, two 5-page critiques of published articles, three Stata exercises, and one 15-page original empirical research paper. Please note that the course can be taken P/F only by those who do not intend to use it to satisfy the requirements for the Economics major.

Prerequisites: ECON 251 and ECON 255 or equivalent, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

ECON 470  (S) The Indian Economy: Development and Social Justice

The Indian economy has (usually) grown rapidly in the last three decades, but poverty has declined relatively slowly, malnutrition remains high, and the sex ratio remains heavily biased against women. Is this the persistence of long-standing historical disadvantages such as those faced by Scheduled Castes and Tribes? Does this reflect failures in policy, in areas such as trade, credit, or labor law? Or is the quality of governance primarily to blame? We will use the traditional theoretical and quantitative methods of an economist to consider these questions.

Requirements/Evaluation: Five short response papers to assigned readings; one classroom presentation/commentary on assigned reading; empirical research project; classroom presentation of empirical research project; participation in classroom discussion.
**Prerequisites:** ECON 251 and 255, or equivalent, or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** junior and senior economics majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

SEM Section: 01    MWF 11:00 am - 11:50 am     Anand V. Swamy

**ECON 471 (S) Topics in Advanced Econometrics** (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and cointegration analysis, both in conventional time series and panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

**Requirements/Evaluation:** periodic homework assignments, term paper

**Prerequisites:** ECON 371

**Enrollment Limit:** 10

**Enrollment Preferences:** students with strong quantitative backgrounds, and to students intending to write an honors thesis

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

Not offered current academic year

**ECON 472 (F) Macroeconomic Instability and Financial Markets**

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.

**Requirements/Evaluation:** problem sets, exams, and potentially student presentations

**Prerequisites:** ECON 251 and ECON 252

**Enrollment Limit:** 15

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

Not offered current academic year
**ECON 474 (S) Advanced Methods for Causal Inference**

Cross-listings: ECON 524  ECON 474

**Primary Cross-listing**

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconometric techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

**Class Format:** Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

**Requirements/Evaluation:** Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

**Prerequisites:** Econ 251 and either Econ 255 or Stat 346

**Enrollment Limit:** 19

**Enrollment Preferences:** Junior and senior Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2022

SEM Section: 01  MR 1:10 pm - 2:25 pm  Owen Ozier

**ECON 475 Advanced Economic Theory (QFR)**

This course studies advanced topics in micro and macro economic theory. A major focus is on the mathematical underpinnings of advanced modern economics, with a particular emphasis on proofs. Topics may include existence of Nash equilibria, games of incomplete information, equilibrium refinement and selection, global games, Bayesian persuasion, Mirrless taxation, dynamic programming, existence of general equilibrium, recursive equilibria, stochastic models in continuous time, and others. The focus of this class is primarily on mathematical formalism, rigor, and proofs. These tools are essential components of any graduate program in economics. Students who wish to see pure math theorems applied to other fields may also be interested.

**Requirements/Evaluation:** May include problem sets, exams, participation, term paper

**Prerequisites:** MATH 150 or equivalent, ECON 251, or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Senior Economics Majors

**Expected Class Size:** 12

**Grading:**

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** Mathematical modeling and proofs

Not offered current academic year

**ECON 476 (S) Behavioral Economics: Theory and Methods**

Behavioral economics emphasizes that models in economics should account for the psychological plausibility of their assumptions and consequences. This course will cover how the field has incorporated insights from psychology into standard microeconomics models of decision-making. In the process, we will review the different methods that are used to empirically test the psychological foundations of these models, including laboratory experiments, field experiments, and quasi-experimental analysis. Assignments, lectures, and class discussions will focus on academic papers that use behavioral economics models to study a variety of topics, such as household finance, public policy, consumer marketing, and others. Throughout the
semester, students will also work towards formulating and completing their own original research project.

**Class Format:** Classes will be a mix of lectures and discussion sessions. The lectures will provide a broad overview of a specific topic or theory, and each discussion session will center on a single academic paper that students will have read beforehand.

**Requirements/Evaluation:** one 15-25 page research paper, ten 1-2 page responses to assigned readings, and class participation during discussion sessions

**Prerequisites:** ECON 251; ECON 255 or STAT 346

**Enrollment Limit:** 19

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** POEC Comparative POEC/Public Policy Courses

**ECON 491 (F) Honors Seminar: Economics**

This course is a research seminar for candidates for honors in economics. Each candidate prepares an honors thesis. Candidates will meet as a group to discuss problems common to all of them (such as empirical methods, data sources, and theoretical approaches) and each one will report on their work at various stages for criticism by the group as a whole. Some work is required during the preceding semester.

**Prerequisites:** admission by the department; required for honors in Economics unless a student writes a year-long thesis

**Grading:** yes pass/fail option, yes fifth course option
ECON 492 (S) Honors Seminar: Economics
This course is a research seminar for candidates for honors in economics. Each candidate prepares an honors thesis. Candidates will meet as a group to discuss problems common to all of them (such as empirical methods, data sources, and theoretical approaches) and each one will report on their work at various stages for criticism by the group as a whole. Some work is required during the preceding semester.
Prerequisites: admission by the department; required for honors in Economics unless a student writes a year-long thesis
Grading: yes pass/fail option, yes fifth course option

ECON 493 (F) Honors Thesis: Economics
A year-long research project for those honors candidates admitted to this route to honors; this is part of a full-year thesis (493-494).
Prerequisites: admission by the department in the spring of the junior year
Grading: yes pass/fail option, yes fifth course option

ECON 494 (S) Honors Thesis: Economics
A year-long research project for those honors candidates admitted to this route to honors; this is part of a full-year thesis (493-494).
Prerequisites: admission by the department in the spring of the junior year
Grading: yes pass/fail option, yes fifth course option

ECON 501 (F) Economic Growth and Development
This course focuses on the analysis of modern economic growth and comparative development across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy
and will discuss the reasons why so many questions about economic growth remain difficult to answer.

**Class Format:** discussion

**Requirements/Evaluation:** problem sets, one midterm exam, and a final exam

**Prerequisites:** ECON 251, ECON 252, and (either ECON 255 or STAT 346); undergraduate enrollment limited and requires instructor’s permission

**Enrollment Limit:** 32

**Enrollment Preferences:** junior and senior economics majors

**Expected Class Size:** 30-32

**Grading:** no pass/fail option, no fifth course option

---

**ECON 502 (F) Statistics/Econometrics**

This course focuses on basic methods of bringing economic theory and data together to provide empirical guidance for policy formulation, including use of computers in econometric analysis. This course covers techniques of econometric analysis using a moderate level of mathematical exposition.

**Requirements/Evaluation:** problem sets, group project, midterm exam, final exam.

**Prerequisites:** admission depends on previous background in statistics and mathematics

**Enrollment Limit:** 19

**Enrollment Preferences:** Limited to CDE students

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** COGS Related Courses

---

**ECON 503 (F) Statistics/Econometrics: Advanced Section**

The course introduces students to the statistical methods used by economists, including those studying policy questions. The focus is on applications. Students will also work with Stata, a software widely used by economists.

**Class Format:** discussion

**Requirements/Evaluation:** problem sets, midterm exam, small project, and a final

**Prerequisites:** admission depends on previous background in statistics and mathematics

**Enrollment Preferences:** limited to CDE students

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

---

**ECON 504 (F) Public Economics in Developing Countries**
This class is about microeconomic and empirical analysis of government expenditure programs in developing and transitional countries. It provides tools for understanding the effects of government policies, as well as a useful conceptual framework for analyzing normative questions such as “what role should government play in the economy” and “what is a good policy?” The course begins by considering the efficiency of market economies, and rationales for government intervention in the market, such as public goods, externalities, information-based market failures, imperfect competition, and equity. We also consider ways that human behavior might deviate from perfect rationality, and what that might imply for policy. Along the way, we apply these concepts to various examples of policy issues, including, among other things, the environment, education, health, infrastructure, security, social insurance, and aid to the poor. We then turn to the general question of how to make the government work better, addressing questions such as the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of “decentralization”? What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.

Class Format: discussion

Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam

Prerequisites: ECON 110; in addition, an empirical methods course (POEC 253, ECON 255, 502 or 503, or STAT 346) must be taken before or concurrently with this class; undergraduate enrollment limited and requires instructor's permission

ECON 505 (F) Developing Country Macroeconomics I: Theory

The macroeconomic structures of developing countries tend to be very different from those in high-income countries, and their macroeconomic policy environments also differ in important ways from those in rich countries. This course is intended to introduce students to a set of models that is particularly suitable for analyzing macroeconomic performance in developing countries, as well as to some analytical tools that help us understand why such countries have often experienced a variety of macroeconomic crises, including sovereign debt, currency, and banking crises.

Requirements/Evaluation: two hour tests and a comprehensive final exam

Prerequisites: ECON 251 and 252; undergraduate enrollment limited and requires instructor's permission

Expected Class Size: 25-30

Grading: yes pass/fail option, no fifth course option

ECON 506 (F) Fundamentals of Developing Country Macroeconomics

This is a practically oriented course in macroeconomic theory and policy. It begins with a review of core concepts and definitions. It then discusses the contributions of households and firms to aggregate production and spending. Next is an introduction to monetary and fiscal policy. It goes on to develop a complete macro model, which is then used to discuss some of the monetary, fiscal and exchange rate policy issues faced by developing and emerging market economies. The class is offered as an alternative to Econ 505 for those not intending to specialize in macroeconomics.
**ECON 510 (S) Financial Development and Regulation**

*Cross-listings:* ECON 352 ECON 510

*Primary Cross-listing*

This course focuses on the financial system in developing countries and its role in economic development. The first part explores the functions of finance, how it contributes to growth and poverty alleviation, as well as examining what can be done to increase financial inclusion. It will look at experiences with financial sector repression and subsequent liberalization, and investigate the causes and impact of financial crises. Then it will study how to make finance effective in dealing with a variety of risks facing societies, including aging and climate change. A key focus will be how to prevent or minimize crises, analyzing government's role as regulator, supervisor, standard setter, contract enforcer, and owner. In this final part, attention will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

*Class Format:* discussion

*Requirements/Evaluation:* Midterm, participation in class discussion and formal debates, and a final research paper.

*Prerequisites:* For undergraduates, POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

*Enrollment Limit:* 25

*Enrollment Preferences:* CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

*Expected Class Size:* 20-25

*Grading:* no pass/fail option, no fifth course option

*Distributions:* (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 352 (D2) ECON 510 (D2)

*Attributes:* GBST Economic Development Studies Electives POEC Comparative POEC/Public Policy Courses

---

**ECON 513 (S) Empirical Methods in Macroeconomics** (QFR)

*Cross-listings:* ECON 513 ECON 356

*Primary Cross-listing*

Macroeconomics and related fields in international finance and macro development have evolved specialized empirical techniques, known generally as macroeconometrics, which are designed to meet the practical challenges that the data and the empirical questions pose in these fields. The course will introduce the theory and application of these techniques, and students will learn how to implement these techniques using real world data to address practical questions drawn from the field of macro development. The course is also available to undergraduates with permission of the instructor. However, in lieu of Econ 356, undergraduates with good quantitative skills are encouraged to take Econ 371, which will cover a broader range of topics in greater depth.

*Requirements/Evaluation:* weekly homework assignments, term paper
Primary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, tax policy lessons are universal so we will learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01 TR 9:55 am - 11:10 am Will Olney

ECON 519 (S) Population Economics
Cross-listings: ECON 380 ECON 519
Secondary Cross-listing
This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected
topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

**Class Format:** Course will be remote and will include synchronous lecture/discussion, possibly combined with some asynchronous components.

**Requirements/Evaluation:** at least one exam, a research paper and a class presentation

**Prerequisites:** ECON 251; POEC 253 or ECON 255 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** If overenrolled, students will be asked to submit a brief statement of interest.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 380 (D2) ECON 519 (D2)

**Attributes:** PHLH Social Determinants of Health  POEC Comparative POEC/Public Policy Courses

Not offered current academic year

**ECON 521 (S) Incentives and Development Policy**

**Cross-listings:** ECON 521  ECON 372

**Primary Cross-listing**

Why isn't the whole world developed? This course (and instructor) is of the opinion that the difficulty of getting incentives right is the key source of inefficiency. The course therefore studies how limited enforcement and asymmetric information constrain development, and about innovative development designs that attempt to overcome these constraints. The course readings will be a mix of field studies, empirical evidence and theoretical tools from game theory. Incentive and corruption problems in health, education, the regulation of banks and natural monopolies, privatization, budgeting, debt forgiveness, foreign aid, microfinance, climate treaties and ethnic violence will be studied using a unified framework. Note: this course was developed to address issues that arise in the countries represented at the CDE.

**Requirements/Evaluation:** two hour-long tests and a final policy project

**Prerequisites:** undergraduate enrollment limited and requires instructor's permission

**Enrollment Limit:** 19

**Enrollment Preferences:** intended for CDE Fellows

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 521 (D2) ECON 372 (D2)

Not offered current academic year

**ECON 522 (F) Economics of Climate Change** (QFR)

**Cross-listings:** ECON 522  ENVI 387  ECON 387

**Secondary Cross-listing**

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

**Requirements/Evaluation:** problem sets, midterm, group presentation, final exam

**Prerequisites:** ECON 251, familiarity with statistics
Enrollment Limit: 30
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 30
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (QFR)

ECON 523  (S) Program Evaluation for International Development
Cross-listings: ECON 523 ECON 379
Primary Cross-listing
Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.
Requirements/Evaluation: Empirical exercises, exams, writing assignments, and collaborative projects
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)
Enrollment Limit: 20
Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option

ECON 524  (S) Advanced Methods for Causal Inference
Cross-listings: ECON 524 ECON 474
Secondary Cross-listing
How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconometric techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.
Class Format: Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either
Stata, R, Matlab, or other mathematical/statistical software is essential.

Requirements/Evaluation: Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

Prerequisites: Econ 251 and either Econ 255 or Stat 346

Enrollment Limit: 19

Enrollment Preferences: Junior and senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ECON 532 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings: ECON 532 ECON 375

Primary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10

Enrollment Preferences: Junior and senior Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ECON 534 (S) Long Term Fiscal Challenges
This tutorial will address the conceptual and theoretical issues that confront policy makers when they face policy challenges that are likely to emerge only over the medium- to long-term and that have important budgetary implications. It will explore the strategies and approaches that a number of countries have attempted to develop to bring the long-term into their current policy and budgetary planning processes. Students will be exposed to different long-term challenges that have important budgetary implications, including aging populations, health care, climate change, energy and infrastructure, artificial intelligence, and water. The course will consider the specific policy challenges that arise for each and the ways in which different countries are addressing them.

**Requirements/Evaluation:** students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

**Prerequisites:** permission of instructor for undergraduates

**Enrollment Limit:** 10

**Enrollment Preferences:** CDE students and undergraduates with permission of the instructor

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ECON 535 (S) International Financial Institutions**

This tutorial will explore the role of official international financial institutions in the global economic and financial system, their relations with members, proposals for how they might be reformed, and issues that they face. The focus will be principally on the International Monetary Fund, and to a lesser extent the World Bank, the Bank for International Settlements and Financial Stability Board. Topics and readings will focus on such issues as: the roles and governance reform of the IMF and World Bank; lessons from their performance in international crises; initiatives of the Fund and Bank; the global adjustment process; financial system stability; governance reform; lending programs; the management of international reserves; and provision of advice to members. Participants will meet in pairs with the faculty member. Each week, one student will prepare a policy paper and submit the paper to the professor and to the other student in advance of the meeting. During the meeting, the student who has written the paper will present an argument, evidence, and conclusions. The other student will provide a critique of the paper based on concepts and evidence from the readings and his own research and experience. The professor will participate in the discussion after each participant has presented and ask questions that highlight or illustrate critical points.

**Requirements/Evaluation:** each participant will write and present 5 or 6 policy papers and a like number of critiques

**Prerequisites:** intended for CDE Fellows; undergraduate enrollment limited, and only with permission of instructor

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

ECON 538 (S) Resilience and Macroeconomic Policy

Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world's population continue to live in fragile conditions, buffeted by conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers' distorted incentives and governments' internal conflicts, fragility also deteriorates policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.

ECON 540 (F)(S) Research Studies

In this course, each Fellow carries out an individual research study on a topic in which they have particular interest, usually related to one of the three seminars. The approach and results of the study are reported in a major paper. Research studies are analytical rather than descriptive and in nearly all cases include quantitative analyses. Often the topic is a specific policy problem in a Fellow's own country.

class format: research

grading: yes pass/fail option, yes fifth course option

distributions: (D2)
Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth diagnostic, and a team presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

ECON 570 Data Science for Economic Analysis
The goal of data science is to use empirical information from a broad range of sources to improve our understanding of the world around us. Economists increasingly rely on the tools of data science to access novel sources of data and information, characterize the economic environment, and conduct empirical analysis. This course provides hands-on introduction to data science tools most relevant for economic analysis including data visualization, exploratory data analysis, and statistical learning. The objective of the course is to help students: (i) formulate economic research questions that can be explored using data science tools, (ii) identify sources of data and prepare data for analysis, (iii) produce persuasive visualizations, and (iv) analyze data using both classical statistics and machine learning.
Class Format: The course includes traditional lectures, interactive activities in both Stata and R, and in-class presentations by students. Some prior knowledge of either Stata or R is helpful, but not required.
Requirements/Evaluation: Grades are based on in-class participation and performance on two take-home exams as well as problem sets and data visualization/analysis projects.
Prerequisites: ECON 255 or STAT 201, STAT 202, or STAT 346 or permission of instructor

Winter Study

ECON 21 (W) Fieldwork in International Development
This course involves an internship, volunteer work, or a research project in a developing economy and an academic analysis of the relevant development issues. The instructors will work with interested students to help arrange a placement and to help secure funding through Williams Financial Aid or other sources. Such arrangements must be made well in advance of Winter Study. Spanish speakers are especially encouraged to apply as there will likely be a few fieldwork possibilities in coffee-growing areas of Latin America. Students will read relevant background articles distributed at the end of fall term and must agree to keep a journal, maintain contact with the instructors, and write a final paper on development issues raised by their specific internship. A group meeting of all students will occur after Winter Study to reflect on individual experiences. Students are also encouraged to attend development talks at the Center for Development Economics throughout the academic year. Requirements: 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; 10-page final paper or equivalent; participation in final meeting. Interested students should send a resume and letter of interest to Paula Consolini by November 1. Each student’s internship provider should send a confirmation letter by December 1 verifying the placement and describing the nature of the work to be performed by the intern. Paula Consolini is Director of the Center for Learning in Action.
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: Resume and Letter of Interest will be used to select students if over-enrolled

Grading: pass/fail only

Materials/Lab Fee: variable--depends on project

Not offered current academic year

ECON 30 (W) Honors Project: Economics

The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. They should register for this WSP as their first choice.

Class Format: honors project

Grading: pass/fail only

Not offered current academic year

ECON 31 (W) Honors Thesis: Economics

To be taken by students participating in year-long thesis research Economics 493-494.

Class Format: thesis

Grading: pass/fail only

Not offered current academic year

ECON 99 (W) Independent Study: Economics

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

- Anita R. Sokolsky, Professor of English
- Christian Thorne, Professor of English
- Stephen J. Tifft, Professor of English
- Emily Vasiliauskas, Assistant Professor of English
- Ricardo A Wilson, Assistant Professor of English

The study of English allows students to explore the critical role language and literature play in the shaping of human culture and social experience. Department courses cover a variety of national, regional, and diasporic literary traditions; acquaint students with a range of genres and cultural practices, including poetry, prose, drama, film, and mixed or emerging media; and employ a range of critical and methodological approaches. All foster skills of critical analysis, interpretation, and written argument and expression. By cultivating a sophisticated awareness of linguistic and literary representation, and by encouraging the ability to read critically and write persuasively, the English major provides students with intellectual and analytical skills that they can draw upon to follow a wide range of paths.

COURSES AND COURSE-NUMBERING

100-level Courses
At the introductory level, the department offers a range of writing-intensive 100-level courses which focus on interpretive skills as well as skills in writing and argumentation. All 100-level courses are designed primarily for first-year students, although they are open to interested sophomores, juniors, and seniors. A 100-level course is required for admission to most upper-level English courses, except in the case of students who have placed out of the introductory courses by receiving a score of 5 on the Advanced Placement examination in English Literature or of 6 or 7 on the Higher Level International Baccalaureate English exam.

200-level Courses
Most 200-level courses are designed primarily for qualified first-year students, sophomores, and junior and senior non-majors, but they are open to junior and senior majors and count as major courses. Several 200-level courses have no prerequisites; see individual descriptions for details. 200-level Gateway courses are designed for first- and second-year students who are considering becoming English majors, or who are interested in pursuing upper-level course work in the department. All Gateway courses are writing-intensive. First-year students who have placed out of the 100-level courses are encouraged to take a Gateway course as their introduction to the department.

300-level Courses
The majority of English Department courses are designed primarily for students who have some experience with textual analysis, and are open to sophomores, juniors, and seniors. First-year students who wish to enroll in a 300-level course are advised to consult the instructor.

400-level Courses
400-level courses are intensive, discussion-oriented classes. Limited to 15 students, 400-level courses should be attractive to any student interested in a course that emphasizes student initiated independent work. Majors considering Honors work and who wish to prepare for it are urged to take a 400-level course before senior year.

ADVISING
All students who wish to discuss English Department offerings are invited to see any faculty member or the department chair. Prospective majors are particularly encouraged to discuss their interest with faculty as early as possible. In the spring of the sophomore year, newly declared majors must meet with a faculty member to discuss the Major Plan. Declared majors will be assigned a permanent advisor shortly after they declare the major.

MAJOR
Major Plan. Shortly after declaring the major, all English majors must complete a short written plan for how they intend to complete the major. In this plan, students should consider how they can most fruitfully explore the broad range of genres, historical periods, and national and cultural traditions that literature in English encompasses, and how they wish to focus upon a particular intellectual interest within English. Students are encouraged to begin discussing the Major Plan with a faculty member as soon as they become interested in the major; junior majors must meet with faculty advisors to revisit Major Plans as they register for courses. There will also be informational meetings and web resources available to assist new majors in developing the Major Plan.

Students majoring in English must take at least nine courses, including the following:
- Any 100-level English class. Students exempted by the department from 100-level courses will substitute an elective course.
- At least one 200-level Gateway course (grouped at the end of the 200-level course descriptions). Gateway courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical methods and historical approaches that will prove fruitful as they pursue the major. (Note: a Gateway course can fulfill a Literary Histories or Criticism requirement as well as the Gateway requirement.)
- At least one Criticism course (identified in parentheses at the end of the course description). A course fulfilling the criticism requirement entails a sustained and explicit reflection on problems of critical method, whether by engaging a range of critical approaches and their implications or by exploring a particular method, theorist, or critic in depth. (Please note that when a Criticism course is also listed as satisfying the Literary Histories requirement, the course may be used to satisfy either requirement, but not both.)
- At least three courses at the 300-level or above.
- At least three courses designated as Literary Histories. Literary Histories courses concern the emergence or development of a specific literary tradition or problem and/or its transformation across multiple historical periods. Literary Histories are identified by LH-A, LH-B, or LH-C in parentheses at the end of the course description.
  - LH-A: courses dealing primarily with literature written before 1800.
  - LH-B: courses dealing primarily with literature written before 1900 but not included in LH-A (courses on literature from 1800-1900 and some surveys).
  - LH-C: courses dealing primarily with literature written after 1900.
- Of the three Literary Histories courses required for the major, at least two must focus on literature before 1900 (LH-A or LH-B), with at least one of
Courses Outside the Department

The department will give one elective course credit toward the major for a course taken in literature of a foreign language, whether the course is taught in the original language or in translation. Such a course may not be used to satisfy the department’s Literary Histories, Criticism, or Gateway requirements.

STUDY AWAY

Majors who plan to study abroad should be proactive in understanding how this will affect their plans for completing major requirements. Such plans should be discussed in advance with the student’s advisor as well as the department’s academic assistant. Approval of departmental credit for courses taken off-campus must be obtained in advance from the department chair.

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments. In most cases we require syllabus, readings, and assignments. The one exception is the Oxford Program. We need only the title and description for that particular program.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes, for most programs we allow only two electives towards the major. Again, the exception is the Oxford Program where we allow four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes, students cannot receive credit for the Gateway requirement. It is difficult to receive credit for our criticism requirement as well.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. Students must be aware that if they do not take a Gateway before their study away they will have to do it when they come back. Likewise for our criticism requirement.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
This happens most often when the student does don’t come to see the Chair before they leave or if they change their plans once they are away at their program.

THE DEGREE WITH HONORS IN ENGLISH

The English Department offers three routes toward honors: a creative writing thesis, a critical thesis, and a critical specialization. Candidates for the program should have at least a 3.5 average in courses taken in English, but admission will not depend solely on course grades. Formal application to pursue honors must be made to the director of honors (Emily Vasiliauskas) by April of the junior year.

All routes require students to take a minimum of ten regular-semester courses (rather than the nine otherwise required for the major). Students doing a creative writing thesis must, by graduation, take at least nine regular semester courses, and, in addition, take English 497 (Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students writing a critical thesis must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students pursuing a critical specialization must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W30 (Senior Thesis: Specialization Route, winter study) during senior year.

Creative Writing Thesis

The creative writing thesis is a significant body of (usually) fiction or poetry completed during the fall semester and winter study of the senior year, and usually including revised writing done in earlier semesters. (With permission of the honors committee, the thesis may be undertaken during the
winter study period and the spring semester of the senior year.) Requirements for admission include outstanding work in an introductory and an advanced workshop (or, in exceptional cases, not including poetry or fiction, a substantial body of work in place of an advanced workshop), a recommendation from one of the creative writing teachers (who will then act as thesis advisor), and the approval of the departmental honors committee. A creative thesis begun in the fall is due on the last day of winter study; one begun in winter study is due the third Monday after spring break. The methods of evaluation are identical to those for critical projects (but their page limits do not apply).

Critical Thesis

The critical thesis is a substantial critical essay written during both semesters as well as the winter study period of the senior year. It must consider critical and/or theoretical as well as literary texts. The thesis is normally about 15,000 words (45 pages); in no case should it be longer than 25,000 words (75 pages). The proposal, a 3-page description of the thesis project, should indicate the subject to be investigated and the arguments to be considered, along with a bibliography. The finished thesis is due on the third Monday following spring break. After the critical thesis has been completed, students publicly present their work.

Critical Specialization

The critical specialization route is a series of forays into a broad area of interest related to work undertaken in at least two courses. At least one of these courses must be in the English Department, and both need to have been taken by the end of fall term in senior year. The specialization route entails: (1) a set of three 10-page essays which together advance a flexibly related set of arguments; (2) an annotated bibliography (5 pages) of secondary sources, explaining their importance to the area of specialization; (3) a meeting with the three faculty evaluators (one of whom is the advisor) during the last two weeks in February to discuss the trio of essays and the annotated bibliography; (4) a fourth essay of 12 pages, considering matters that arose during the faculty-student meeting and reflecting on the outcome of the specialization. The 3-page proposal for the specialization should specify the area and range of the study, the issues likely to be explored, and the methods to be used for their investigation. It should also describe the relation between previous course work and the specialization, and include a brief bibliography of secondary works. The first two papers are due by the end of fall semester; the third paper is due at the end of winter study; the bibliography is due mid-February; and the final paper is due the third Monday after spring break.

Applying to the Honors Program

All students who wish to apply to the honors program are required to consult with a prospective faculty advisor and the director of honors before April of the junior year. Prior to pre-registration in April, candidates for critical theses and specializations submit a 3-page proposal that includes an account of the proposed project and a bibliography. Students applying to creative writing honors submit a brief proposal describing the project they wish to pursue. Decisions regarding admission to the honors program will be made by the end of May. Admission to the honors program depends on the department’s assessment of the qualifications of the student, the feasibility of the project, and the availability of an appropriate advisor.

When pre-registering for Fall classes of their senior year, students who are applying to critical honors should register for the Honors Colloquium as one of their four courses.

Progress and Evaluation of Honors

While grades for the fall and winter study terms are deferred until both the honors project and review process are completed, students must do satisfactory work to continue in the program. Should the student’s work in the fall semester not meet this standard, the course will convert to a standard independent study (English 397), and the student will register for a regular winter study project. A student engaged in a year-long project must likewise perform satisfactorily in winter study (English W30 or W31) to enroll in English 494 in the spring semester. When such is not the case, the winter study course will be converted to an independent study “99.”

Students are required to submit one electronic copy to the department academic assistant at pmalanga@williams.edu. Students should also give a final hard copy to their thesis advisor. Both the electronic copy and the hard copy are due on the dates applicable to the type of project pursued (see the above descriptions of each type of project for the due dates). All honors projects are evaluated by the advisor and two other faculty members. The colloquium director, in consultation with the advisor, gives the first semester grade, and the advisor determines the student’s second semester grade in honors, while the two external readers recommend to the department that the project receive Highest Honors, Honors, or no Honors. Honors of any kind are contingent upon satisfactory completion of courses in the major during the senior year. Highest Honors are normally awarded only to students whose performance in both the honors program and regular courses in the major has been exceptional.

ENGL 104 (S) Creative Non-fiction (WS)

In this course we will read some of the most prominent practitioners of creative non-fiction--writers like John McPhee, Joan Didion, Malcolm Gladwell, Susan Orlean, Ta-Nehisi Coates, Michael Pollan, Zadie Smith and Oliver Sacks. Students will also write in a variety of non-fiction modes--explainers, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.
Class Format: workshop

Requirements/Evaluation: four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

ENGL 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: AMST 105 WGSS 105 ENGL 105

Primary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 105 (D2) WGSS 105 (D2) ENGL 105 (D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

ENGL 106 (S) "Make it New": The Modernist Experiment (WS)

Cross-listings: ENGL 106 COMP 105

Primary Cross-listing
In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S.Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation:  active class participation; three papers rising from 3-7 pages; three two-page reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Three papers rising from 3-7 pages; three 2-page reading responses. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 107 (F) Temptation (WS)

Cross-listings: COMP 106 ENGL 107

Primary Cross-listing

We want most those things we can't--or shouldn't--have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

Requirements/Evaluation: Four five-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 106 (D1) ENGL 107 (D1)

Writing Skills Notes: Students will write four five-page papers, each of which will receive timely and extensive written feedback from the instructor. Students will be invited to discuss their papers with the instructor at the draft stage.

Fall 2021

SEM Section: 01   TR 9:55 am - 11:10 am   Emily Vasiliauskas

ENGL 110 (F) Ruined America: New American Dystopian Novels (WS)
Dystopian novels have become commonplace. But why now? Why do we seem to be experiencing a heightened anxiety over apocalypse? We will consider two types of dystopian visions--those that present a post-apocalyptic world, and those that conjure up wrecked societies out of current evils. Both types present the world we know now as either lost or full of losers. As we visit a variety of recently imagined American dystopias, we will focus on the ethical dilemmas imposed by prospects of our diminished state: the inevitable issues of class, and the divisions of race and gender; the prospects of anarchy and political oppression; and the threat of technology to our identity and our environment. The class will also focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays.

Class Format: The course will be taught remotely.

Requirements/Evaluation: Two five-page essays, and one final 10-page essay, as well as several short writing assignments. Active seminar participation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: First-year students

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing intensive. I plan on assigning two five-page essays and one 8-10 page essay. The shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL Criticism Courses

Not offered current academic year

ENGL 111 (S) Poetry and Politics (WS)

"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury," in which she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats--himself a very politically involved poet--writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that poetry would suffer from too much involvement with the "quarrel with others" that is politics. And when W. H. Auden writes in 1939 that "poetry makes nothing happen" he appears to locate poetry's value precisely in its irrelevance to politics as such. This course will focus on the vexed relationship between poetry and political struggle, reading predominantly poetry and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers and appreciators of poetry, and better readers and writers of argumentative prose.

Class Format: discussion

Requirements/Evaluation: graded essays, final in-class team project

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write 5 essays total. After each essay, students meet individually with the professor to discuss their writing and plan specific improvements in their writig skills. Two of the essays will be revised after peer-review tutorials.

Not offered current academic year

ENGL 112 (F) Introduction to Literary Criticism (WS)

What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by literary and other conventions, and by the historical and personal circumstances of a work's composition, as well as deriving from the particular words
of a text and from the mutable life of language itself. So how to go about the task of reading literature well, and reading critically? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our readings—mainly short fiction and poetry, along with selected introductory work in critical theory—will invite increased self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will read longer texts, including at least one play and one novel.

Requirements/Evaluation: Three papers rising from 3-6 pages, discussion board postings, and contribution to class discussions.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Three papers, rising from 3 pages for the first, to 6 pages for the last. Postings on Glow discussion boards. Extensive written feedback on longer papers, plus the option of revision.

Fall 2021

SEM Section: 01 MWF 10:00 am - 10:50 am James L. Pethica

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.
Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 114  (F)  Literary Speakers  (WS)
The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how—and with what effects—poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on the twentieth century (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

Class Format: This course will be taught remotely.

Requirements/Evaluation: 4 or 5 papers, of varying lengths, spaced throughout the term (about 15-20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision. There will be no examinations in this course.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: first-year students and then sophomores who have not yet taken a 100-level course in English

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: There will be 4-5 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to about 5 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least two classes during the term will be specifically devoted to issues related to paper writing.

Not offered current academic year

ENGL 115  (F)  The Literature of Sports  (DPE)  (WS)

Cross-listings: AFR 115  ENGL 115

Primary Cross-listing

The ubiquity of the sporting event, the athlete as hero, the athlete as failure, the crowd, the fan, the stadium, and all of the complex conflicts therein have long been the subjects of some of the finest writing in America and throughout the world. Writers have used sport as a context through which to explore and examine ideas such as beauty, the sublime, tragedy, politics, race, class, sexuality, and gender. This course will focus on poetry, fiction, and non-fiction invested in the public spectacles and private revelations of sport ranging from the poetics of praise to issues of urbanism, colonialism, globalization with readings by Pindar, Rankine, CLR James, Baldwin, Hemingway, Oates, DeLillo, and many others. This course will be taught online in a synchronous format.

Requirements/Evaluation: Students will be expected to complete a number of short (5 pages or less) papers during the semester and one longer paper (8-10 pages) at the end of the semester.

Prerequisites: None.

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AFR 115 (D2) ENGL 115 (D1)

**Writing Skills Notes:** Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course will focus on literature about sports that addresses, among other topics, civil rights activism, gentrification, race dynamics and race relations both inside and outside of the USA, American exceptionalism, sociocultural construction of emotional displays, mental health, religious conflict, and anti-blackness.

Not offered current academic year

**ENGL 116 (S) The Remix: Adaptation and Revelation (WS)**

This course explores the ideas of remaking and adaptation. We examine twentieth and twenty-first-century fiction, poetry, film, and hybrid texts that interact with subject matter stretching from Greek mythology to New World castaway stories to global pandemics. What is the nature of the work they attempt? What is lost and gained in these re-visions? In response to these questions, emphasis is placed on critical reading and writing (and rewriting), as well as on research skills. Works considered throughout the term come from, among others, Jorge Luis Borges, Anne Carson, J.M. Coetzee, Alfonso Cuárón, and Natasha Trethewey.

**Class Format:** remote

**Requirements/Evaluation:** at least 20 pages of writing; GLOW posts; class participation

**Prerequisites:** none

**Enrollment Limit:** 14

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Not offered current academic year

**ENGL 117 (F) Introduction to Cultural Theory (WS)**

Cross-listings: ENGL 117 COMP 117

**Primary Cross-listing**

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

**Class Format:** discussion

**Requirements/Evaluation:** four formal writing assignments totaling 20 pages (three full essays + one lead-in assignment), informal writing twice weekly, class attendance and participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19
Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 117 (D1) COMP 117 (D1)

Writing Skills Notes: Students will write three five- to seven-page papers, on which I will provide extensive feedback. Before writing their first papers, students will submit theses and introductions, which I will help them refine. We will hold three extra writing sessions, to discuss how best to organize arguments. Students will write informally before every class.

Attributes: AMST Critical and Cultural Theory Electives

Fall 2021
SEM Section: 01 TF 1:10 pm - 2:25 pm Christian Thorne

ENGL 119 (S) Missed Encounters (DPE)

Although we all entertain the dream of reaching directly across boundaries of personal and cultural difference, such exchanges remain inseparable from fantasies of otherness. Those fantasies can be as reductive as a stereotype, but they can also be enormously nuanced and self-revealing--as rich as literature itself. We will study the missed encounter--the encounter in which the element of presupposition and fantasy is vividly apparent--in cultural contexts from the first English accounts of the inhabitants of Virginia to race relations in contemporary African fiction; we will consider such encounters in other contexts as well, including sexual relations, the relations between young and old, even the relation between past and present. But in every case, we will keep our gaze trained on what such events tell us about the nature of fantasy and the place of fiction. The course will consider novels, drama, film, opera, and non-fiction, works such as: Coetzee, Waiting for the Barbarians; Harriot, "Report of the New Found Land of Virginia"; Conrad, Heart of Darkness; Stephen Crane, "The Blue Hotel"; Nadine Gordimer, The Pick Up; Herzog, "Aguirre"; Shakespeare, Merchant of Venice; Puccini, Madame Butterfly; Huang, M. Butterfly; Austen, Pride and Prejudice; Gyasi, Homegoing; and theoretical writing, including texts by the psychoanalytic critic, Jacques Lacan.

Requirements/Evaluation: 20 pages of writing in the form of frequent short papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken or placed out of an English 100-level class

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course fulfills the spirit of the DPE requirement by engaging diverse cultural contexts in order to explore the ways in which political, racial, and sexual identities are staked on forcible assertions of difference which at once constitute power and erode it from within. Through discussion and critical writing, students will develop analytical tools and skills to interrogate these effects of social power.

Not offered current academic year

ENGL 120 (F)(S) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Secondary Cross-listing

Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic and/or The Tale of Genji), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Garcia-Marquez, Toni Morrison, and/or James Baldwin), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Asghar Farhadi). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.
**Requirements/Evaluation:** Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** Students considering a major in Comparative Literature

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 111 (D1) ENGL 120 (D1)

**Writing Skills Notes:** Multiple writing assignments that build upon each other, including drafts and revisions, with substantial individualized feedback on writing from the instructor.

**Attributes:** FMST Related Courses

---

**ENGL 123 (F)(S) The Short Story (WS)**

The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

**Class Format:** class meetings will be devoted almost entirely to discussion

**Requirements/Evaluation:** grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** There will be five formal writing assignments, totaling about twenty pages. My response to each paper will include extensive marginal comments on technical issues, and a typed page of comments on the ideas and structure of the paper as a whole. Final grades will be determined by both the student's intellectual engagement and his or her increasing mastery of the art of writing essays.

**Attributes:** ENGL Creative Writing Courses

---

**ENGL 125 (F) Theater and Politics (WS)**

**Cross-listings:** ENGL 125 THEA 125
When Plato designed his ideal republic, he excluded theater from it, arguing that indulging in the charms of theatrical representation would make men poor governors of themselves and thus threaten the integrity of fledgling Greek democracies. In the twentieth-century, however, the work of younger artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud provocatively suggested that theater itself could remedy the ills that Plato thought it aggravated by restoring to the people the productive power that the passively on-looking masses had ceded to the charisma of dictators. Today, as rapid changes in media daily transform the way in which we experience the world and understand our place within it, artists, critics, and philosophers continue to draw on the terms of historical debates about theater in attempts to understand the political significance of technologically enhanced forms of global spectatorship, asking what becomes of the traditional roles of viewers and directors on the new world-stage, in an age when revolutions are triggered by cell phone images, but advertising campaigns are also customized to consumers based on automated scans of private information like email. In this seminar, students take a historical approach to these urgent contemporary questions, analyzing the politics of theater in literature, criticism, film, and philosophy from antiquity to the present.

Requirements/Evaluation: three papers of increasing length and complexity, one of which you will revise, totaling 20 pages of finished writing, and a portfolio of interpretive questions

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 125 (D1) THEA 125 (D1)

Writing Skills Notes: The seminar includes extensive discussion of writing strategies throughout, frequent writing assignments, substantive feedback on writing assignments, and revision in response to that feedback.

Not offered current academic year
ENGL 129  (F)  Twentieth-Century Black Poets

Cross-listings:  AFR 129  ENGL 129

Primary Cross-listing

From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Requirements/Evaluation:  several short papers, a 15-page final paper

Prerequisites:  none

Enrollment Limit:  14

Enrollment Preferences:  first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size:  14

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D1)

ENGL 130  Writing for the Humanities  (WS)

Compelling academic prose is a rare beast. In this course we will investigate what makes for good academic writing and how we can produce it ourselves. We will begin with words, then progress to sentences, paragraphs, and essays. Our reading will be close, our writing closer. Topics include the following: Are adverbs incredibly important? When is less more, and when isn't it? Is your garden English, or is it Chinese? What is the "uneven U" and why does it work? How does your audience affect how you write? In addition to reading writing about writing by Orwell, Fish, Tufte, Hayot, and (inevitably) Strunk and White, we will look closely at academic prose out in the wild, both good and bad. This course is for anyone who is interested in exploring in more depth the craft of writing, whether you have always considered yourself a "good writer" or struggle to fill a single page (or both). Our focus will be on academic writing for the humanities, but the skills we will develop are relevant to many other contexts as well.

Requirements/Evaluation:  Regular attendance and active participation in class; writing assignments ranging in length from sentences to essays of varying length (500 words to 5-7 pages).

Prerequisites:  None

Enrollment Limit:  12

Enrollment Preferences:  First- and second-year students

Expected Class Size:  12

Grading:

Distributions:  (D1)  (WS)

Writing Skills Notes:  The course will center on explicit, in-depth discussion of writing. We will read and discuss both writing on writing, and examples of prose. Students will complete weekly writing assignments of varying lengths and degrees of formality on which they will receive feedback from the instructor with particular attention to the craft of writing; some assignments will also be shared with the rest of the class.

Not offered current academic year

ENGL 131  (F)  All About Sonnets  (WS)

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form
quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships—to God, Nature, art, a particular place, the State, oppressors—while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)—speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state—but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

**Class Format:** first week in regular class meetings, followed by weekly tutorial meetings in pairs

**Requirements/Evaluation:** five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or "prose sonnets;" thoughtful participation in tutorial meetings

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner's paper. Regular sonnet paraphrases and or "prose sonnets" that will be critiqued for linguistic precision and succinctness.

**ENGL 132 (F) Black Writing To/From/About Prison (DPE) (WS)**

**Cross-listings:** WGSS 132 ENGL 132

**Primary Cross-listing**

This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. The primary project in this course is the development of open letter writing skills. This epistolary form allows both for the intimate engagement of individual, familiar contact and the deft inclusion of targeted eavesdroppers in order to raise the consciousness of listeners and affirm the value of personal relationships. Course texts will include letters to and from prison; documentaries; selections from anthologies like If They Come in the Morning and Captive Genders: Trans Embodiment and the Prison Industrial Complex; autobiographies like that by Malcolm X, Walidah Imarisha, and Assata Shakur; poetry by Ericka Huggins, Huey Newton, and Terrance Hayes; and critical interventions by scholars like Nikki Jones, Victor Rios, Michelle Alexander, and Angela Davis. We will also look at contemporary groups organizing around abolition and prisoner support including Critical Resistance, Photos From Solitary, and TGIJP (Transgender Gender Variant Intersex Justice Project).

**Class Format:** discussion, engagement with guest speakers, engagement with Special Collections

**Requirements/Evaluation:** four open letters developed with critical feedback (4-5 pages), a twice weekly question diary, an organization report and presentation, a collectively decided project

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 132 (D1) ENGL 132 (D1)

**Writing Skills Notes:** Open letters are a mainstay of black literature allowing for intimate engagement of the individual and the deft inclusion of targeted eavesdroppers to raise the consciousness of listeners and affirm the value of personal relationships. Students will learn to write letters with
ENGL 133  (F)  Shakespeare's Uncertain Ends

We've come to expect that the heroes of Shakespeare's tragedies learn something. Othello, Lear, Hamlet, Macbeth, and all the others, are supposed to achieve some kind of clarifying self-knowledge as a reward for their terrible suffering. After all, the heroes' flaws are revealed and their delusions are exposed so that they can eventually understand what has happened to them and why. They are meant to learn from their suffering. Or so we'd like to think. But the plays don't always cooperate with our desire for some compensating enlightenment. We don't always come away with a clear sense that Shakespeare's tragic heroes have arrived at a true self-recognition; in other words, they don't always fully grasp how their fate is implicated in their character. Nor are we granted an obvious, edifying moral to compensate for the misery we witness. What, then, do we discover at the end of a Shakespeare tragedy?

Requirements/Evaluation:  three essays (two 5-page essays and one 10-page essay), short writing assignments, class participation
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  first-year students
Expected Class Size:  19
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D1)

ENGL 135  (F)  Vengeance

For almost three thousand years revenge has been a central preoccupation of European literature. Revenge is inviting to literary and dramatic treatment partly because of its impulse towards structure: it traces a simple arc of injury and retaliation. A injures B, and B retaliates against A. But retaliation is never easy or equivalent, and there is always a volatile emotive mixture of loss and grievance that stirs up ethical ambiguities that are seldom resolved. Vengeance also fascinates because it is so paradoxical. The avenger, though isolated and vulnerable, can nevertheless achieve heroic grandeur by coming to personify nemesis. And yet the hero is always contaminated by trying to make a right out of two wrongs--and he usually has to die for it. Driven by past events, cut off from the present, and wrapped up in stratagems for future reprisals, the avenger's actions are almost always compromised by impotence or excess. At best, revenge is "a kinde of Wilde Justice"--a justice that kills its heroes as well as its villains. We will look at as many stories of vengeance, across as wide a range of cultures and media, as possible. Readings will include Sophocles' Electra, Dante's Inferno, Shakespeare's Hamlet and The Tempest, Chalderon de Laclos' Dangerous Liaisons, and Vonnegut's Slaughterhouse Five, as well as several short stories and films.

Requirements/Evaluation:  two 5-page essays; one 10-page essay; several short response essays; 10% of grade is on participation
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  first-year students who have not taken or placed out of a 100-level English course
Expected Class Size:  19
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D1)

ENGL 136  (S)  Slavery and the Making of a Literary Tradition
How has the subject and iconography of slavery continued to preoccupy the American literary and cultural imagination? In this course, we will examine the transatlantic circulation of ideas regarding race, nation, citizenship, self-mastery, agency, and freedom in colonial and antebellum America and consider how these debates have continued to the present. We will read such authors as Phyllis Wheatley, Harriet Jacobs, Harriet Wilson, William Faulkner, Mark Twain, and Toni Morrison. Forms will include poetry, slave narratives, novels, advertisements, broadsides, pamphlets, and other ephemera. We will also view cinematic representations of slavery, such as WGN's Underground, the adaptation of Solomon Northrop's 12 Years a Slave, and Issa Rae's parody "Due North" in Insecure.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages
Prerequisites: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 136 (D2) ENGL 136 (D1)

Not offered current academic year

ENGL 138 (S) What is a Self? Investigations in Literature, Philosophy, and Psychology (WS)
The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what is a self? Is it the unchanging essence of who we are as individuals? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and scientists have argued in their own different ways more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it (even escape it!). Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we'll study include: Tim O'Brien's The Things They Carried, Toni Morrison's Beloved, and theoretical writings on the self by Plato, Thoreau, and Jean-Paul Sartre among others. We'll even try our hand at meditation, while learning about the Buddhist idea of "no self." Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four essays totaling 18-20 pages; active class participation; participation in other short writing assignments (there will be lots of free writing!)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Four essays (ranging in length from 4-6 pages long) in multiple drafts, adding up to 18-20 pages total. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

ENGL 139 (S) Living a Feminist Life (DPE) (WS)
Cross-listings: COMP 139 ENGL 139 WGSS 139
Primary Cross-listing
The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, Living a Feminist Life, while the second half of the course will examine a spectrum of women's life writing-poetry,
music, journalism, theory, and memoir—discover how text continues to shape feminist lives, and how femmes’ lived experience is a shaping force in feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students’ suggestions. Key texts will include Jamaica Kincaid’s A Small Place, Audre Lorde’s Sister Outsider, Djamilah Audre's memoir, Ana Lily Amirpour’s film A Girl Walks Home Alone at Night, Sara Ahmed’s Living a Feminist Life, Valerie Solanas’s SCUM Manifesto, and bell hooks’s Teaching to Transgress. In their writing for this course, students will consider how their own intimate relationships with parents, partners, children, neighbors, or friends can become sites of activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

Requirements/Evaluation: five short written assignments and one final research project

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 139 (D1) ENGL 139 (D1) WGSS 139 (D1)

Writing Skills Notes: This course will center writing and research skills with at least one session per week devoted to ladder development and revision. Five short papers (3-4 pages) with one revision (5-6 pages) as well as a bibliography and final research paper (12-15 pages).

Difference, Power, and Equity Notes: This course will examine the generative intersectional site of feminism, antiracism, and anticapitalism to provide an alternative introduction to feminist thought, writing, and practice. The syllabus centers women and femme writers of color.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 140  Introduction to Creative Writing: The Short Story

This course introduces students to the art of fiction writing through the crafting of short stories. Students sharpen their tastes and inclinations by reading and responding to short stories from significant contributors to the form. The writing exercises and overall course trajectory are designed to build a writing community in order to facilitate a better understanding of students’ own writing processes. Individual conferences with the instructor are a central part of the course.

Requirements/Evaluation: though students will be required to produce at least 30 mixed-genre pages, this is not a WS class, because of its emphasis on creative rather than critical writing

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken a creative writing course; students who received an AP 5 in Literature are eligible

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL Creative Writing Courses

Fall 2021

SEM Section: 01  TR 9:55 am - 11:10 am  Ricardo A Wilson

ENGL 146  Campus Life: The University and the Novel

What is college for? To a significant number of writers from roughly 1945 onward, one answer seemed to be: college is the perfect setting for a novel! The Campus Novel, as it is known, mines the rich, frequently zany dramatic terrain that emerges when large groups of young people try to live and learn together in a closed environment. Filled with the absurdities of academic and collegiate life, the scholarly and sexual intrigues of the college campus, Campus Novels also are microsociologies of college: not just reflections of, but reflections upon, the institutional contexts of the American university. This course will introduce students to the Campus Novel (and its cousin, the Campus Movie), as a way to explore the history and meaning
of liberal arts education in the American University from roughly the post-World War II emergence of mass higher education through co-education, multiculturalism, and the rise of the corporate university. Fictional lab reports upon experiments in living, works dedicated to figuring out what and whom a liberal arts education is for, these novels will be our own guides to an exploration of these questions. Likely texts: Amis, Lucky Jim, McCarthy, The Groves of Academe, Delillo, White Noise, Donna Tartt, The Secret History, Zadie Smith, On Beauty, Dave Eggers, The Circle, and films such as Breaking Away, School Daze, and The Social Network.

Requirements/Evaluation: four to five essays, totaling approximately 20 pages, regular and substantial contributions to our collective inquiry in the seminar room

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 147 (S) Buddhist Literature

Cross-listings: ENGL 147 ASIA 133 REL 133 ASST 133

Secondary Cross-listing

This course introduces students to the diverse literary culture of Buddhist Asia. Through close readings of particular influential Buddhist texts, we will analyze not only what the texts say and mean, but also learn about the "social life" of these texts--i.e., what is the socio-historical context of these texts, who are the intended audience, what is the relationship of these texts with their particular communities, how do these communities engage with their texts, including how texts have been translated, taught, worshipped and ritualized. We will also explore the materiality of these texts, which is as diverse as the languages in which these texts are written. Alongside an exploration of materiality requires that we reflect on what counts as "text". Moreover, by sampling different genres of Buddhist texts (e.g., philosophical, historical, narrative, grammatical, cosmological, astrological, magical), we will discuss what makes them Buddhist and what makes them literary. The Lotus Sutra, the Heart Sutra, the Dhammapada, and Vessantara Jataka are just some of the texts we will study in this course. No prior knowledge about Buddhism is required.

Requirements/Evaluation: Attendance and active participation 20%; Short writing assignments 25% (i.e., a one-page, single-space, critical response based on the class reading x 5 total); Mid-term exam (in-class: identification terms and short essay) 25%; Final project and presentation 30% (the final grade includes initial consultation with the instructor regarding topic selection, annotated bibliography, project outline, final presentation, and final written report).

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: REL, ASST, and ENG majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 147 (D2) ASIA 133 (D2) REL 133 (D2) ASST 133 (D2)

Not offered current academic year

ENGL 150 (F) Expository Writing

Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande’s bestselling book, The Checklist Manifesto. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The majority of the readings for this course will be literary essays, mostly contemporary, mostly American. (This course and English 152 focus more directly on basic expository writing skills than the other 100-level classes in the English department.)
ENGL 151  (S)  Reading and Writing Science Fiction  (WS)
This course will explore some of the themes and techniques of modern science fiction by examining a range of published stories, while at the same time making some new stories of our own. Writers of fiction and non-fiction often watch each other with suspicion, as if from opposing sides of an obvious frontier. Though the goals of both forms of writing--the disciplined articulation of brainy thoughts and mighty feelings--are similar, there is a tendency in both camps to think their methods different and exclusive. The conceit of this class is to imagine that constructing a plot and constructing an argument, say, are complementary skills, and that the tricks and techniques of one type of writing can profitably be applied to the other. With this in mind, the class is made of two strands twisted together--a creative writing workshop and a course in critical analysis. There will be short weekly assignments in both types of writing, as well as two larger projects: an original science fiction short story and an interpretive/analytical essay. The assigned readings will come from an anthology of very recent work by younger writers. One of the most exciting developments in modern science fiction is the assimilation into the mainstream of formerly marginalized voices--queer, trans, Black, Asian, Native American--and our reading will reflect that trend.

Class Format: discussion

Requirements/Evaluation: active participation in class and a lot of writing, both critical and creative; two 12- to 20-page writing assignments (short story and analytical/interpretive essay), with revisions; half-dozen shorter writing assignments, plus written responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: This course will require two long writing assignments, twelve to twenty pages, one critical and one creative, each of which will go through an extensive revision process. In addition, I will assign a half-dozen shorter assignments of both types (critical and creative) and single-page critical responses to all workshopped assignments, for a total of thirty or so pages of required writing. A crucial component of the course will be its attention to writing style, strategy, and organization.

Attributes: ENGL Criticism Courses

SEM Section: 01    MWF 12:00 pm - 12:50 pm     Paul C. Park

ENGL 152  (F)  Family Matters: Family in Recent American Fiction  (WS)
"Anyone who has survived childhood has enough material to write for the rest of his or her life" (Flannery O'Connor). A course designed to explore the representations of family in recent American literature. Family is our first community, and in the literature of family one commonly accepted convention emerges: family members are morally bound to one another. These bonds of blood, both liberating and limiting, have always been a literary convention. In this course, we will examine recent American fiction that explores such bonds. What do such narratives claim we want from our families? What do such narratives claim we're willing to do to get it? Have recent narratives developed particular and characteristic strategies for approaching this topic? And are there importantly particularizing aspects of the American family? The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of
the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature. Authors to be considered may include: Kali Fajardo-Anstine, Danielle Evans, Rick Moody, Junot Diaz, Amy Hempel, ZZ Packer, Lorrie Moore, Gish Jen, Cormac McCarthy, Edward Jones, among others.

**Requirements/Evaluation:** Active participation, written and verbal comments on published and peer work, the leading of one class discussion, five essays (2-7 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** First Year students

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Five essays ranging from 2-7 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they’d like. Students will also comment (verbal and written) on published work and their peers’ drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

Fall 2021

SEM Section: 01 TR 8:30 am - 9:45 am Karen L. Shepard

SEM Section: 02 TR 9:55 am - 11:10 am Karen L. Shepard

**ENGL 153** (S) Androids, Cyborgs, Selves (WS)

**Cross-listings:** STS 153 ENGL 153

**Primary Cross-listing**

In this expository writing course, we will analyze and argue about how near-human and partly human bodies appear in fiction and film. When do these bodies improve the spaces in which they appear? When do they threaten them? How are they gendered, how are they raced, and why? What do they desire? Authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in different ways. Together we will develop our ideas on these topics in clear, strong prose. We will also ask how artists have cast human identities into foreign materials and media, and study the distortions and revelations that result. During museum visits at WCMA, students will use examples of self-portraiture, electrified bodies, and aspirational bodies to explore the representation, imitation, and abstraction of selves. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

**Requirements/Evaluation:** five response papers (500 words); four essays (1200-1500 words, each in two drafts); class participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153 (D2) ENGL 153 (D1)

**Writing Skills Notes:** This expository writing course is dedicated to facilitating real improvement in students’ written work. Students write five response papers and four five-page essays (in two drafts) over the course of the semester, receiving substantial instructor feedback on all. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Not offered current academic year

**ENGL 154** (F) Imagination and Authority

A course on the subject of who gets to write about what when it comes to fiction. Among the questions we'll be taking up: What are the outer boundaries of those imaginative acts that should be attempted? The central goal of this course is to teach you how to write a well-argued and
interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, this is also a literature class, designed as well to prepare you for upper level courses in the English Department.

Requirements/Evaluation: four to five papers totaling at least 20 pages; revisions, student teaching, written and oral comments, final portfolio

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 155 (S) Contemporary Mexican Cinema and the World (WS)

Cross-listings: ENGL 155 COMP 155

Primary Cross-listing

This expository writing course is grounded in an exploration of contemporary Mexican cinema and develops students' ability to critically write about film. We will focus on feature-length films, documentaries, and short films that not only grapple with Mexican history and identity but also those that travel beyond the borders of Mexico. The list of directors whose work will be considered includes Natalia Beristáin, Alfonso Cuarón, Jonás Cuarón, Guillermo del Toro, Alejandro González Iñárritu, Alejandra Márquez Abella, Kenya Márquez, Jorge Pérez Solano, and Patricia Riggen.

Requirements/Evaluation: Active participation, written and verbal comments on peer work, five papers (including one revision)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 155 (D1) COMP 155 (D1)

Writing Skills Notes: Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Attributes: LATS Countries of Origin + Transnationalism Elect

Spring 2022

SEM Section: 01    TR 9:55 am - 11:10 am    Ricardo A Wilson

ENGL 156 (S) New American Fiction (WS)

The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American fiction, examining the very, very recent (last thirty years) developments in American fiction. We will read short stories and novels by writers such as Danielle Evans, George Saunders, Kali Fajardo-Anstine, Mary Robison, Karen Russell, ZZ Packer, among others.

Class Format: This course will be fully remote and structured as a seminar/tutorial hybrid. We'll mix whole-group meetings with small group sessions of 4 students.
ENGL 157  (F)  Reading the 'Inferno'  (WS)
This is an expository writing course, but also a journey through hell---more precisely, through Dante’s Inferno. Over the course of the semester, as we wind our way through the underworld, we will consider the circumstances of the damned, their guilt, their punishments, and the overall aims of Dante’s extraordinary vision. How and why are the condemned sentenced to an eternal afterlife in this underground kingdom of cruelty? What are we to make of the poem’s humor and malevolence, and how are we to understand its vast architecture? In writing about the fate of these sins and sinners we will focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Requirements/Evaluation: four short 3-page essays and one 6- to 8-page essay

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing course. I plan on assigning series of three-page essays, one every other week, as we work our way through Dante's Inferno at the rate of three or four cantos per week. These shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. This should provide sustained and structured feedback to the students. A final extended essay of six to eight pages will be required.

Not offered current academic year

ENGL 158  (S)  Expository Writing: Contemporary Linked Stories  (WS)
In this expository writing and writing intensive course, we will read and write about several collections of linked short stories about altered states of mind and body, immigrant experiences, and the magic of everyday life. We will examine linked stories as a form organizing narratives that can stand alone, but that resonate powerfully with one another, sharing themes, settings, and sometimes even characters. Texts may include Denis Johnson’s Jesus’ Son, Jumma Lahiri’s Interpreter of Maladies, Junot Diaz’s Drown, Helen Oyeyeme’s What Is Not Yours Is Not Yours, Carmen Machado’s Her Body and Other Parties, Amy Bonnafons’s The Wrong Heaven, and Ruth Joffre’s Night Beast. Class time will be split nearly equally between analysis of the assigned texts and active work with student writing including freewriting, rewriting, sentence and paragraph workshops, peer editing, and writing strategy sessions.

Class Format: This course will meet remotely in Spring 2021

Requirements/Evaluation: 4 or 5 two-page papers, two with required revisions; 4 five-page papers, all with required revisions; discussion participation; attendance.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: First preference goes to first-year students who have not received a 5 on AP LITERATURE or a 6 or 7 on the IB. Additional rules via English Department Website.
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: This course is dedicated to the teaching of college-level expository writing. Students will complete several assignment sequences that build from 2-page response papers to 5-page argumentative essays and that include required revisions at multiple stages. About half the class time will be spent discussing and practicing writing strategies and mechanics.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 161 (S) Metafiction (WS)
Cross-listings: ENGL 161 COMP 161
Primary Cross-listing
This course will examine ways in which literary works reflect on their status as texts. We'll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Kelly Link, Paul Park, and others. Ultimately, we will use the study of metafiction to focus our inquiry into the socializing force of self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in their assigned writing.

Requirements/Evaluation: several short exercises; four or five papers of increasingly complexity, totaling 22 pages; consistent attendance and participation; a love of reading, and a willingness to reread

Prerequisites: none

Enrollment Limit: 18
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; sophomores

Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 161 (D1) COMP 161 (D1)

Writing Skills Notes: Students write five essays with considerable feedback from the instructor.

Spring 2022
SEM Section: 01 TR 9:55 am - 11:10 am Shawn J. Rosenheim

ENGL 162 (F) Robots, Puppets, and Dolls (WS)
Is Pinocchio alive? How about the Terminator, or the operating system in Her? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automatons and cyborgs) and what they suggest about human identity, independence, and free will. We'll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects). Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for many real people?

Requirements/Evaluation: students write five essays over the course of the term, in addition to a number of ungraded but required exercises

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: The course requires frequent and serious written work: six exercises, and five essays of between 750 and 1500 words, over the
ENGL 165 (F) STAGING AMERICAN BLACKNESS (WS)
American blackness may be theatrical, or it may be the subject of theatrical productions. How performances of blackness may or should be perceived and how or whether they pertain to people defined as African American remain perpetually fraught questions. This course will examine various modes, works and performances that address American blackness, including minstrelsy, novels, plays, stand up comedy, and cinematic works. The authors will include Amiri Baraka, Toni Morrison, August Wilson, Ntozake Shange, Suzan-Lori Parks, Spike Lee, Jordan Peele, and Richard Pryor.

Requirements/Evaluation: The writing assignments will be two short papers of 5 to 7 pages and a final paper of 15 pages. Students will be expected to attend regularly and to participate in class discussions.
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: Four essays (ranging in length from 3-6 pages long) in multiple drafts, adding up to 16 pages total. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2021
SEM Section: 01 TR 11:20 am - 12:35 pm David L. Smith

ENGL 201 (F) Shakespeare
One of Shakespeare's most original recent readers has claimed, "Nothing without, perhaps nothing within, Shakespeare's words could discover the power to withstand the power Shakespeare's words release." To put it another way, this was a writer who created something so new, so unfathomable, that neither life nor language could easily contain it. In this course, we will become acquainted with Shakespeare's major works, but we will also remain alert to their capacity to confound. Serious attention will be given to genre, form, the historical conditions of the Renaissance theater and book trade, modes of literary transmission, and the shape of Shakespeare's career. Plays will include A Midsummer Night's Dream, Romeo and Juliet, Henry IV, Part I, Hamlet, King Lear, Antony and Cleopatra, and The Tempest. We will also read the Sonnets. The course is designed to offer a first encounter with Shakespeare, but more advanced students are welcome too.

Requirements/Evaluation: Three-page paper, seven-page paper, short analytical exercises, midterm exam, final exam, thoughtful participation in class discussion
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: English majors and prospective English majors
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

ENGL 202 (F) Modern Drama
Cross-listings: THEA 229 ENGL 202 COMP 202
Secondary Cross-listing
An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, Hedda Gabler; Wilde, The
ENGL 203  (F)  The Uses of Shakespeare
The plays of Shakespeare have a performance history that is exceptionally rich and strange. In this course we will read several of the plays and look at some of the ways they have been re-imagined and restaged. We will consider the origin of the plays as popular entertainment—competing for an audience against bear-baitings and public executions. We will consider their transformation into canonical texts and their de-canonization in parodies like Dogg's Hamlet and Drunk Shakespeare. Among the works we will read and watch are Twelfth Night, Shakespeare Behind Bars, Hamlet, Rosencrantz and Guildenstern are Dead, Rosencrantz and Guildenstern are Undead, The Merchant of Venice, To Be or Not to Be. Assignments will include analytical essays and creative adaptations in a variety of media.

Requirements/Evaluation:  three 6-8 page papers, in-class presentation
Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit:  19
Enrollment Preferences:  first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size:  19

ENGL 204  (S)  Hollywood Film
For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho, Casablanca, The Godfather, Schindler's List, Bridesmaids, Groundhog Day, 12 Years a Slave and Get Out.

Requirements/Evaluation:  Two 2-page essays, two editing exercises, a midterm, and a final exam
Prerequisites:  None
Enrollment Limit:  60
ENROLLMENT PREFERENCES: English majors

EXPECTED CLASS SIZE: 60

ENGL 205 (F) The Art of Poetry: The History and Theory of Lyric (WS)

"If I read a book and it makes my whole body so cold no fire can ever warm me I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only way I know it. Is there any other way?" This excerpt from a letter by Emily Dickinson indicates both the particular pleasures of reading poetry, and also the persistent difficulty of defining poetry as a genre. In this course, we will train our focus on lyric poetry in particular, tracing its long history as well as trends in the theory of lyric. We'll begin by uncovering the roots of lyric in antiquity before shifting our focus to the development of lyric in English. We'll read closely the work of such poets as Wyatt, Donne, Wordsworth, Keats, Hopkins, and Dickinson before turning to questions of lyric in the 20th and 21st centuries. Along the way, we'll examine the trends in criticism responsible for the conflation of lyric and poetry in our time, and will get a strong sense of the current state of lyric theory.

REQUIREMENTS/EVALUATION: frequent short writing assignments totaling 20+ pages, thoughtful participation in discussions

PREREQUISITES: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENROLLMENT LIMIT: 19

ENROLLMENT PREFERENCES: first- and second-year students, and English majors who have yet to take a Gateway course

EXPECTED CLASS SIZE: 19

GRADUATION: no pass/fail option, no fifth course option

DISTRIBUTIONS: (O1) (WS)

WRITING SKILLS NOTES: Frequent informal writing assignments and two formal papers: one (5-7 pages) due at the midterm, and one final paper (10-12 pages), in preparation for which students will submit a proposal and meet with the professor as their research develops. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

NOT OFFERED CURRENT ACADEMIC YEAR

ENGL 208 (S) Designer Genes (DPE) (WS)

CROSS-LISTINGS: ENGL 208 AMST 206 STS 208 WGSS 208

SECONDARY CROSS-LISTING

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book The Mutant Project. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary In the Family, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel Dawn explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film Gattaca shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

REQUIREMENTS/EVALUATION: Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages),
short presentation, longer final researched paper/project (8-10 pages).

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Women's, Gender, and Sexuality Studies, American Studies, English majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

ENGL 210 (F) American Modernism (WS)

Modernism in art lasts from about 1850 until about 1950; this course focuses on American fiction centering on the 1920s. Texts in the course run from the familiar (Cather, Fitzgerald, Hemingway) through the difficult (Faulkner), very difficult (Jean Toomer), and impossible (Gertrude Stein); but we'll learn how to read them all. Even the familiar texts turn out to be stylistically experimental, and experiments in style, in every case, are linked to novel conceptions of religion (especially Hemingway, Fitzgerald), race or ethnicity (Faulkner, Toomer), and gender (Cather, Hemingway, Stein); most of our texts interrelate all of these concerns. After the Great War, the urgency of questions of form, in relation to questions of identity, is whether the world can be redeemed by the reformation of linguistic and generic conventions.

Class Format: The course will be entirely remote by Zoom.

Requirements/Evaluation: Four papers totaling about 16 pages. Participation in class discussions will also be a factor in the final grade.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: First-year students and sophomores contemplating the English major; other English majors lacking a Gateway; American Studies majors.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be four papers, totaling about 16 pages. Papers will be read closely both for content and expression. There will be one course meeting devoted entirely to questions of style and composition.

Attributes: AMST Arts in Context Electives ENGL Literary Histories C

Not offered current academic year

ENGL 211 (S) English Literature from 1000 to 1600

One of the oldest surviving works in English, Beowulf tells the story of a monster and his mom. In this class we will read key texts from the medieval and early modern periods, starting with Beowulf and ending with Shakespeare’s equally bloody Titus Andronicus. Other readings will include selections from The Canterbury Tales, Sir Gawain and the Green Knight, sonnets by Sidney and Donne, and Marlowe's The Jew of Malta. We will discuss the conflicting, often self-contradictory claims that writers in these periods made for the importance of literature and the anxieties that these new types of fiction generate--about sex, about God, about money. We will ask what it meant to read--and misread--before books were commonplace.

Requirements/Evaluation: two papers (5-7 pages), midterm, final

ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build its contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We'll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of This American Life, RadioLab, Love and Radio, and Snap Judgment), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.
ENGL 214 (S) Writing for Stage and Screen

Cross-listings: THEA 214 ENGL 214

Secondary Cross-listing
This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

ENGL 216 (S) Introduction to the Novel

There was a time when novels as we understand them didn't exist; then there was a time—centuries—when novels were overwhelmingly the dominant storytelling and literary mode in English. This course, part lecture and part seminar, will stage encounters with 7 or 8 novels, each the product of a distinct configuration of subject position, history, form, and ambition. We will move from the English novel's beginnings through (at least) the late 20th century, when novels competed for cultural space with new storytelling modes. Along the way we will think about what stories are for, generally; why this kind of long-form storytelling was invented; and what cultural work English-language novels do, have done, and may yet do. Possible writers to be studied include Samuel Richardson, Jane Austen, Charlotte Brontë, Elizabeth Gaskell, Charles Dickens, Joseph Conrad, Virginia Woolf, James Joyce, Vladimir Nabokov, Toni Morrison, Salman Rushdie, and Zadie Smith.

Requirements/Evaluation: Midterm and final exams, one critical essay, and some short writing assignments. Quizzes possible.

Prerequisites: none
Enrollment Limit: 45

**Enrollment Preferences:** students who have pre-registered for the course; thereafter, seniors, then juniors, sophomores, and first-years

**ENGL 221 (F) A Science Fiction and Fantasy-Writing Seminar**

As you might have guessed, this is a creative-writing workshop, specializing in Fantasy and Science Fiction. We are going to write a lot, and not really read so much, though from time to time we might look at the odd piece of professional work, by way of example or inspiration, or as a source for stolen goods. Mostly, though, we will be discussing (anonymously, except for the final projects) our own stuff----original stories or sketches for stories, or various plot, character, or setting exercises. We'll write maybe five or six stories, which is a fair amount of work, although to save time I'm hoping we can keep any analysis or interpretation to a strict minimum.

**Requirements/Evaluation:** passing the course will require finishing and revising at least one 12- to 20-page story, as well as numerous shorter assignments and sketches

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ENGL Creative Writing Courses
ENGL 222  (S)  Lyric Poetry  (WS)

The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on lyrics--relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the mid-nineteenth century. Among the poets likely to be studied are: Jonson, Gray, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden, Frost, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

Requirements/Evaluation: active participation in seminar discussions, and four or five papers (about 20 pages total)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4-5 papers assigned, ranging in length from 4-6 pages, spaced evenly throughout the term. Total writing will be about 20 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences related to the papers.

ENGL 223  (S)  Apocalypse Now and Then: Poets Confronting Political Crisis  (DPE)  (WS)

In moments of great crisis, common wisdom says to turn to the poets; where, then, do the poets turn? Tracing the history of Poetry of Witness throughout the 20th and 21st Centuries, this course explore various strategies poets have used to write about the end of the world, however that may be defined. We will read contemporary poets (such as Danez Smith, Ilya Kaminsky, Aracelis Girmay, and Solmaz Sharif) alongside 20th Century writers who were responding to the catastrophes of their own times (Paul Celan, Pablo Neruda, Gwendolyn Brooks, Bei Dao, and others). Looking backward to other times when the world seemed to be ending, this course will examine some of the strategies that poets have used to navigate writing about war, genocide, forced migration, gendered violence, climate crisis, and other dystopias. The readings we encounter will span various schools and poetic forms, from documentary poetics, to surrealism and the avant garde, to the Black Arts Movement, to speculative writing, and so on. They will be supplemented with critical texts on the political stakes of writing and reading practices by thinkers like Eve Sedgwick, James Baldwin, and Audre Lorde. This is a course that views creative writing as a valid form of critical inquiry; therefore, students will have opportunities to engage creatively with texts throughout the semester. For the final, students will have the option of either writing an analytical paper or submitting a creative project with a critical introduction.

Requirements/Evaluation: Students will write short weekly response papers, a 3-5 page midterm essay and an 8-10 page final essay. Creative options will be available in place of some of these assignments.

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: Freshmen and sophomores intending to pursue more advanced work in English; non-English majors interested in creative writing. Application may be required.

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will produce and receive feedback on short writing assignments throughout the semester. These assignments will build skills for students to write either a final comparative analysis paper or a creative project accompanied by a critical introduction.

Difference, Power, and Equity Notes: This course focuses on the interactions between political engagements and poetic craft in the 20th and 21st centuries. As such, we will discuss the interplay between artists and the popular resistance movements of their times, the effects of power on literary
forms, and the shaping of minoritarian aesthetics. Readings will center writing by poets from marginalized backgrounds whose work engages race, class, ethnicity, gender, sexuality, religion, and disability.

ENGL 224 (S) American Drama: Hidden Knowledge

**Cross-listings:** THEA 275 AMST 275 ENGL 224

**Secondary Cross-listing**

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (*The Adventures of Pinocchio*, Machiavelli's *The Prince*, Thomas Carlson's *Lying and Deception: Theory and Practice*, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites. For Fall 2020, the tutorial will be conducted primarily online. Depending on enrollments, we may divide into groups with three students, instead of the traditional two-student tutorial format.

**Requirements/Evaluation:** weekly papers/response papers; weekly meeting with instructor and tutorial partner

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre and English majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

ENGL 225 Introduction to Asian American Literature: Fiction and Memoir (WS)

This Gateway is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. Likely readings include: Carlos Bulosan's *America in the Heart* (1946); John Okada's *No-No Boy* (1957); Maxine Hong Kingston's *Woman Warrior* (1976); Chang-rae Lee's *Native Speaker* (1995); Jhumpa Lahiri's *Interpreter of Maladies* (1999); lê thi diem thúy's *The Gangster We are All Looking For* (2003); Ruth Ozeki's *A Tale for the Time Being* (2013); and Celeste Ng's *Everything I Never Told You* (2014). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective.

**Requirements/Evaluation:** four papers totaling about 20 pages; engaged participation in class discussions

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Enrollment Preferences:** first- and second-year students, and English majors who have yet to take a Gateway course

**Expected Class Size:** 19
Grading:  
Distributions:  (D1)  (WS)

Writing Skills Notes: Four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 226  (S)  The Irish Literary Revival

This course will focus on the Irish Literary Revival of c.1885-1920, during which Irish literature in the English language became firmly established as a canon clearly separate from the English tradition, and writers such as W.B. Yeats and James Joyce achieved international renown. Readings will include drama, poetry, fiction and non-fiction prose by Yeats, J.M. Synge, Joyce, George Moore, George Bernard Shaw, Lady Gregory, Douglas Hyde, Sean O'Casey and others. We will foreground key fault-lines of the period: competing visions of what constituted "authentic" Irish identity; debate over the propriety of writing in English, drawing on British literary traditions, or seeking a non-Irish audience; the work of "self-exiles" such as Shaw and Joyce, versus that of writers who stayed in Ireland; and the long-entrenched political tensions between Catholics and Protestants, and Unionists and Nationalists. Throughout, we will consider the functions and efficacy of literature in promoting cultural or political change. The course will conclude by considering the extraordinary vitality of post-independence and contemporary Irish literary culture, with readings of work by Seamus Heaney, Colm Toibin, Anne Enright and Martin McDonagh, and discussion of recent Irish film. Key considerations here will be the ways traditional notions of Irish Nationalism and national identity have been revised or abandoned under the impact of independence, economic prosperity and globalization, contemporary sexual politics and other forms of change.

Requirements/Evaluation:  four 4+ page papers, and several shorter writings assignments; class participation

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit:  19

Enrollment Preferences:  English majors

ENGL 227  (F)  Elegies  (WS)

This tutorial explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900—including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists—Owen, Yeats, Auden, Lowell, and Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by Joyce ("The Dead") and Nabokov ("Spring in Fialta").

Class Format: This course will meet remotely. Tutorial pairs will meet for an hour each week with the instructor, using Zoom or Google Meet.

Requirements/Evaluation:  Active participation in tutorial meetings. Students will write a 4- to 5-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit:  10

Enrollment Preferences:  Sophomores, but juniors and seniors are also welcome.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option
ENGL 228  (S)  The Renaissance in England and the European Continent: Self and World  (DPE) (WS)

Cross-listings:  ENGL 228  COMP 230

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation:  Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites:  A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit:  19

Enrollment Preferences:  First- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size:  19

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 228 (D1) COMP 230 (D1)

Writing Skills Notes:  The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

ENGL 229  (S)  Contemporary American Fiction

Cross-listings:  AMST 230  ENGL 229

Primary Cross-listing

In this course we will read and analyze a selection of fiction written between 1945 and the present, with an emphasis on proving (in the sense of testing) the three terms in the course title. Could John Cheever's "The Enormous Radio" really be contemporary? Is James Baldwin's Giovanni's Room
American in the same way as Alice Munro’s *Dear Life*? And is Michelle Tea’s *Black Wave* fiction or something else? Along the way, we’ll also ask: What forms and themes define contemporary American fiction? And why should we invest in defining the “contemporary” period at all? Other authors we will study may include: Raymond Carver, Thomas Pynchon, Toni Morrison, Renata Adler, Margaret Atwood, Lydia Davis, Chang Rae Lee, Jennifer Egan, and Colson Whitehead.

**Requirements/Evaluation:** four papers totaling about 20 pages; participation in class discussions

**ENGL 230 (F) Introduction to Literary Theory**  (WS)

**Cross-listings:** COMP 240 ENGL 230

**Primary Cross-listing**

This course introduces students to some of the most significant and compelling trends in modern criticism—such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can *Othello*, for instance, be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.

**Class Format:** discussion

**Requirements/Evaluation:** frequent short papers totaling 20 pages

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Enrollment Preferences:** first- and second-year students, and English majors who have yet to take a Gateway course

**ENGL 231 (F)(S) Literature of the Sea**  (DPE)

**Cross-listings:** MAST 231 ENGL 231

**Secondary Cross-listing**

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years.
But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

ENGL 232 (S) We the People in the Stacks: Democracy and Literature of Archives

Cross-listings: LATS 232 ENGL 232

Secondary Cross-listing

"Archives have never been neutral; they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." --Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives—their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

Requirements/Evaluation: attendance and class participation, short writing exercises, midterm project, final creative project

ENGL 233 (S) Great Big Books (WS)

Cross-listings: ENGL 233 COMP 293

Primary Cross-listing

Some of the greatest novels are really, really long-so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: War and Peace (1869), Leo Tolstoy's epic of the Napoleonic Wars, and Parade's End (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

ENGL 234 (F) The Video Essay

While people today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think with the medium, exploiting the resources of film and video in their efforts to understand how these media work on viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in the use of Adobe Premiere Pro, students will spend the term alternately making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required. Note that the course meets entirely online.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner. All meetings will be online.
ENGL 235 (F) Theatre Masters: Become One of Them
Cross-listings: THEA 233 ENGL 235
Secondary Cross-listing
How well do you know Stanislavsky, Strasberg or Adler? This tutorial offers an exploration of the most notable theatre artists from the past and present. Students will select a specific master with a unique theatrical style, and will study that iconic artist's particular method or approach. Students will be encouraged to choose any master who had made a significant contribution to theatre -- such as Constantine Stanislavsky, Stella Adler, Sanford Meisner, Lee Strasberg, Bertolt Brecht, Michael Chekhov, Jerzy Grotowski, Tadeusz Kantor, Pina Bausch, Tadashi Suzuki, Anne Bogart, etc. Each student will conclude their exploration by writing a script and presenting the essence of their research in a brief performance (for the camera) -- portraying the legendary icon at work, in a social situation, or in solitude. You learn more about others when you become them, if only for a moment.
Requirements/Evaluation: Research, development, creativity, final performance.
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: none
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
THEA 233 (D1) ENGL 235 (D1)

ENGL 236 (F) Fields of Barley, Streets of Gold: Utopia in Fiction (WS)
Each of the gates was a single pearl: And the street of the city was pure gold, As it were transparent glass. Revelations 21:21 It makes us happy to imagine the future in apocalyptic terms, partly because we love to say I told you so. You didn't listen, and now look. Fort Lee is on fire, and zombies are smashing down your parents' door. Catastrophe satisfies us on many levels; by contrast, the utopian vision provides a more delicate thrill. For a writer, the task is to provide a fiction that will not feel like a moral lesson or the illustration of some theory about how we should behave. This course will consider different utopian stories in a vaguely chronological sequence: Classical Era, Renaissance, Enlightenment, and then moving through the 19th and 20th centuries, and then into modern science fiction. You'd be right if you think this sounds as if I haven't yet finalized the list, but it will include familiar and unfamiliar names--Plato, More, Bacon, Campanella, Fourier, Bellamy, Skinner, LeGuin, Bisson, Kim Stanley Robinson, and various Afro-Futurists. Mostly you will be reading (or else listening to the instructor describe) excerpts and summaries rather than full texts, as utopian visions are often quite long and we want to consider large numbers of them. The emphasis in this class will be on writing rather than reading. Most assignments will consist of either sketching out or actually writing a short story set in one of these imagined worlds, a story that would serve as a critique. In addition, as a final project, students will invent a personal utopia and present it to the class.
Requirements/Evaluation: You will be graded on the basis of class participation, plus ten short written assignments and two longer ones. The instructor will require revisions on the longer assignments in order for you to receive a grade.
Prerequisites: none
Enrollment Limit: 19

Enrollment Preferences: If the course is over-enrolled, I will give preference to seniors, then juniors, then sophomores.

Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: This course will involve weekly writing assignments of perhaps three pages each as well as two longer pieces of perhaps 15 pages each. In total, I hope, not more than sixty pages per student. The shorter assignments will consist of a page or so of commentary on a piece of utopian writing, and a scene-by-scene sketch for a story set in it that illustrates that commentary or critique. The larger projects are (1.) a full rendering of one of those sketches and (2.) your own utopian vision.

ENGL 237  (S)  Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236  AMST 236  ARTH 237  ENGL 237

Secondary Cross-listing
Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

Prerequisites: none
Enrollment Limit: 12

ENGL 239  (F)(S)  Zen and the Art of American Literature

Cross-listings: REL 228  ENGL 239  AMST 238

Primary Cross-listing
Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, A Tale for the Time Being. And we'll range far beyond the world of literature into
other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: Students who preregister should fill out an expression of interest form at www.tinyurl.com/Engl239Fall2021 by May 20 (day after pre-reg closes). Preference will go to juniors and seniors, with a few seats saved for sophomores (10 max); no first years.

ENGL 240 (F) What is a Novel?

Cross-listings: COMP 239 ENGL 240

Primary Cross-listing

What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory--too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. Novelists will come from the 19th and 20th centuries, likely Austen, Dickens, and Mieville. Theorists are likely to include Henry James, Benjamin, Lukacs, Barthes, Watt, McKeon, Jameson, Eve Sedgwick, Edward Said, Leo Bersani, and Franco Moretti.

Requirements/Evaluation: four to five papers totaling about 20 pages; regular, substantial, and intensive participation in class

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 241 (S) Introduction to Comparative Literature

Cross-listings: ENGL 241 COMP 110

Secondary Cross-listing

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Western and Eastern Europe, Asia, and Latin America; and media including prose fiction, graphic memoir, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lermontov, Zola, Borges, Wilde, Mamet, Bechdel, and others. All readings will be in English.

Requirements/Evaluation: attendance, participation, two 5-page papers, a few short responses, midterm exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students considering a major in Comparative Literature

Expected Class Size: 35

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 241 (D1) COMP 110 (D1)

Not offered current academic year

ENGL 242 Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing (DPE) (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one's way into Whitman's radical uncertainty. These articulations of knowing and unknowing, of telling and untelling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

Requirements/Evaluation: Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: potential sophomore English majors have first choice, then prospective or current American Studies majors

Expected Class Size: 19

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will paid to drafts and revisions of essays.

Difference, Power, and Equity Notes: The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

Attributes: ENGL 200-level Gateway Courses
ENGL 244 (F) Interpreting Film (WS)

From the earliest days of narrative film, it was clear that the new medium enjoyed an unparalleled capacity to absorb spectators in the sheer passive enjoyment of the cinematic spectacle, so for many viewers cinema has seemed naturally to be a form of entertainment rather than an art form or a medium for exploring ideas. But not only have entertaining "movies" and artistic "films" always co-existed amicably, but in many cases have coincided: some of the greatest works of cinematic art first billed themselves unassumingly as enjoyable diversions. In order to appreciate the aesthetic and intellectual richness of such films, one must learn to "read" their crucial scenes closely, analyzing their visual and auditory language as well as their dramatic content, and must learn to interpret their surprisingly complex larger patterns of thought. This tutorial offers concrete training in both of these skills. During the first four weeks, students will write and discuss short weekly papers analyzing key sequences of a film, learning to identify diverse cinematic effects in order to illuminate dramatic patterns. During the last six weeks of the semester each student in a tutorial pairing will write a longer interpretive paper in alternate weeks, learning to construct fuller arguments addressing the whole of a film. Most films will be drawn from classical Hollywood cinema of the 1930s and 1940s, but we will also study European, Indian, and Japanese films. Readings during the first part of the semester will concern technical features of cinema; later readings will address larger interpretive issues (e.g., patterns in film genres, such as the nature of the gangster as a tragic hero; or social issues reflected in films, such as the newly empowered roles of women during the early 1940s and their influence in shaping the dangerous heroines of film noir).

Requirements/Evaluation: six short (2- to 6-page) papers and three short responses to one's partner's paper, totalling 25 pages of writing; active, sustained participation in tutorial discussions

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 10

Enrollment Preferences: sophomores and first-year students who have satisfied or placed out of the English Department's 100-level prerequisite

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Tutorial--constant writing and critique. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

TUT Section: T1 TBA Stephen J. Tifft

ENGL 245 (S) Blackness and Visual Expression

This course will examine how blackness has been represented in visual media. Beginning with 19th century examples, we will examine representations associated with slavery and minstrelsy. In particular, we will consider paintings by artists such as Winslow Homer, Thomas Eakins, and Henry O. Tanner, alongside racial representations in popular media, such as newspaper editorial cartoons and book illustrations. Moving across the range of the 20th century, we will examine various visual media, including painting, photography, theater, costume design, fashion, advertising, and film. Films such as Cabin in the Sky, Stormy Weather, Bingo Long's All Stars, Shaft, and Harlem Nights, as well as recent movies, including The Black Panther and Get Out exemplify various imaginative revisions of racial conventions. Students will be expected to participate actively in the classroom and in group projects. Some of this material will be covered by student presentations, and all students will be expected to contribute to our discussions of the various examples we bring before us. Texts for the course will represent several disciplines and approaches to writing about race and culture. The writing for the course will be a journal and a 10-page final paper.

Requirements/Evaluation: participation in group projects, journal, and final 10-page paper

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 19

Enrollment Preferences: majors and prospective majors

Expected Class Size: 15
ENGL 247  Art of the Essay
The "essay" is one way of writing about the intersection of self and world. Writers from 16th century French Michel Montaigne to contemporary American physician Siddhartha Mukherjee and Canadian lyric essayist Anne Carson have experimented in this form, varying the proportion of self-scrutiny to outward focus. We will study the meandering history of this rich literary form, learning both how to analyze and interpret representative examples from multiple traditions, and how to try our hand at our own creative nonfiction. That is, you will do both critical writing and creative writing for this course. Throughout, we will track how this genre serves those writers and readers who gravitate toward its special arts. Works read include those by the writers named above, as well as a selection from the following list: Henry David Thoreau, William James, Gertrude Stein, James Baldwin, James Agee, John McPhee, Alice Walker, Gloria Anzaldúa, Claudia Rankine, Theresa Hak Kyung Cha, and Maggie Nelson.

Requirements/Evaluation: four papers (two critical and two creative), of varying lengths (from 2-10 pages), for a total of 20 pages
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first- and second-year students
Expected Class Size: 25
Grading: (D1)
Not offered current academic year

ENGL 248  Black Women in African American Literature and Culture
Cross-listings: AMST 248  ENGL 248  WGSS 258
Primary Cross-listing
This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange’s For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf), and socio-political propaganda (the "Black is Beautiful" movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series Insecure.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages; final project on the hashtag #blackgirlmagic
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250  Americans Abroad  (DPE)
Cross-listings: COMP 242  ENGL 250  AMST 242

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of “home” into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 242 (D1) ENGL 250 (D1) AMST 242 (D2)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

ENGL 252  (F)  Ficciones: A Course on Fiction  (DPE)

Cross-listings: ENGL 252  LATS 222

Secondary Cross-listing

This course is focused on the art and practice of writing fiction. We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers of the Global South, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students strengthen their own narrative skills.

Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 252 (D1) LATS 222 (D2)

**Difference, Power, and Equity Notes:** Student work will encourage personal and cultural expression, with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change.

ENGL 253  (S)  Feminist Theatres: A Global Perspective  (DPE) (WS)

**Cross-listings:** ENGL 253  WGSS 250  THEA 250

**Secondary Cross-listing**

What makes a work of theatre feminist? How do plays, social practices, and performances engage with different models of feminism: liberal, radical, materialist, intersectional, reluctant? Why has feminism mattered to theatre makers of the past? Should it still matter to us now? If so, what forms might future feminist theatres and performance practices take? In this tutorial, students will work in pairs to examine the political relation of models of feminism to plays and performances by theatre artists, companies, and collaborators from across the globe, from the late-twentieth century to today. Interrogating feminism's own legacies of exclusionary and biased tactics, we will focus on the racialized and class-based aspects of feminist performance practices and the history of radical and intersectional feminism in theatre. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, The WOW Café, Hélène Cixous, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Wendy Wasserstein, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Karen Finley, Suzan-Lori Parks, Young Jean Lee, Lisa Kron, Tori Sampson, Arethusa Speaks, Women's Project and Productions, Sarah DeLappe, and others. Close reading and analysis of source material will occur alongside engagement with critical essays and writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, Sue- Ellen Case, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students alternating the presentation and reading of a series of 5-page papers.

**Class Format:** For Spring 2021, the format for the course is to be determined. Ideally, we will meet weekly and in-person in groups of 3 (two students and professor). Should necessary social distancing measures be in place, we will conduct our tutorial meetings remotely in either Zoom or Google Meet.

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre majors; WGSS majors; ART majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 253 (D1) WGSS 250 (D1) THEA 250 (D1)

**Writing Skills Notes:** As a tutorial, this course will require extensive practice in writing, editing, and revising. Emphasis be directed towards building and developing a compelling argument, providing thorough evidence for one's interpretation, and fluidly integrating theory into one's argumentation.

**Difference, Power, and Equity Notes:** This tutorial examines intersections between gender, race, sexuality, class, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

*Not offered current academic year*

ENGL 256  (F)  Stop Making Sense: Absurd(ist) Theatre in Historical Context  (WS)
We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English, and Comparative Literature majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Fall 2021

TUT Section: T1 TBA Robert E. Baker-White

ENGL 257 (S) Personal Essay: Writing Workshop (WS)

The personal essay as a literary form includes a wide range of genres including literary journalism, creative nonfiction and the lyric essay. Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography. As we become more mindful of our particular points of view (and of ways to explore and exploit this subjectivity), we will turn the focus outside of ourselves. We will experiment with writing that is extro- rather than introspective. While this is primarily a course in creative writing, we will give much of our time to literary analysis and imitation of exemplary essayists (primarily from the 20th and 21st centuries, and primarily from the U.S.) including James Baldwin, James Agee, Annie Dillard, John McPhee, Joan Didion, Adrian NicholeLeBlanc, Jennifer S. Cheng, Anne Carson, Samuel Delaney, Maggie Nelson, Alexander Chee, Lydia Yuknavitch, Saidiya Hartman and Karen Green.

Requirements/Evaluation: Evaluation will be based on class participation, peer editing, writing and revision, with special attention given to the student's engagement in every aspect of the writing process.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: students who have not yet taken Creative Writing courses will be given priority

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course will demand weekly writing and critical responses, as well as regular opportunities for revision. Total number of pages written will amount to approximately 35.

Attributes: ENGL Creative Writing Courses

Spring 2022
**ENGL 258 (S) Poetry and the City (WS)**

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet’s role in the body politic emerges in representations of the city as both civilized values and struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bixi, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holiday and Vaughan; and films such as Man with a Movie Camera, Rear Window, and Breathless.

**Class Format:** discussion-based

**Requirements/Evaluation:** class participation; the course will require four 5-page essays in multiple drafts

**Prerequisites:** 100-level English course or a 5 on the literature component of the AP exam, or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year and sophomore students who are thinking of majoring in English

**Expected Class Size:** 19

Spring 2022

**ENGL 259 (S) Ethics of Jewish American Fiction**

**Cross-listings:** ENGL 259  REL 259  JWST 259

**Secondary Cross-listing**

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

**Requirements/Evaluation:** class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and English majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

ENGL 262 (F) European Cinema and Film Theory

This seminar explores the foundations of contemporary European cinema by studying a range of films from 1920-1985, and offers a grounding in film theory and aesthetics by pairing such films with theoretical essays by philosophers and aestheticians from the silent era through the 1970s. We will establish a kind of map of cinematic styles and movements, ranging from German expressionism and Soviet montage in silent films of the 1920s, through French realism of the prewar and Italian neorealism of the early postwar era, to the insurrectionary films of the French New Wave and the stylistic innovations of the German New Wave and of Swedish cinema in the 1960s and 1970s. We will study films by such directors as Wiene, Murnau, Lang, Eisenstein, Vertov, Dreyer, Renoir, Riefenstahl, Rossellini, Fellini, Truffaut, Godard, Varda, Herzog, Bergman, Tarkovsky, and Almodóvar.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 263 (S) Novel Worlds

Cross-listings: ENGL 263 COMP 268

Primary Cross-listing

Reading a novel can feel like falling into another world, an immersion in an encompassing fictional reality saturated with detail--each novel its own trip down the rabbit hole. From Jane Austen's "3 or 4 families in a country village" to Roberto Bolano's teeming modern day Mexico City of millions, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces, like a container? Or are they not a thing at all, but social systems--ways of belonging that are constantly being made and remade? This course is about the specific world--imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon the notion of world. We'll read a number of novels, ranging from 19th century authors like Austen and Dickens, to contemporary genre writing--science fiction and the detective novel--as well as from a range of national traditions to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts that are preoccupied by world-ness, with attention to current debates about the idea of World Literature. Novel texts likely to include: Jane Austen's *Emma*, Charles Dickens's *Bleak House*, Carroll's *Alice in Wonderland*, Italo Calvino's *Invisible Cities*, and Roberto Bolano's *Savage Detectives*.

Requirements/Evaluation: papers (approximately 20 pages), other forms of writing in-class and otherwise, participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students

ENGL 266 (F) Postmodernism (WS)

Cross-listings: COMP 231  ENGL 266

Secondary Cross-listing

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10
Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

Not offered current academic year

ENGL 267  Stop Making Sense: Absurd(ist) Theatre in Historical Context  (WS)

In most academic work the point of analysis is to make sense, to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? How and when have strategies of nonsense, circular reasoning, linguistic obfuscation, and intentional theatrical absence been employed to disguise, or deflect attention from, specific didactic (even political) agendas? What role specifically does theatre, theatricality, or performativity play in the presentation of art that refuses understanding? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek, Richard Foreman). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation:  Standard tutorial requirements; weekly paper or response paper from each member of the tutorial pair. Evaluation based on improvement in written expression and engaged contribution to weekly discussions.

Prerequisites:  None

Enrollment Limit:  10

Enrollment Preferences:  Theatre, English, and Comparative Literature majors and prospective majors.

Expected Class Size:  10

Grading:

Distributions:  (D1)  (WS)

Writing Skills Notes: This tutorial will demand writing from each student each week (either a primary paper or a shorter response paper), and each student will receive regular, extensive feedback including a focus on strategies for successful persuasive argumentation.

Not offered current academic year

ENGL 268  (F)  Being Muslim, Being American: American Muslim Literature in the 21st century  (DPE)

Cross-listings:  REL 166  COMP 166  AMST 166  ENGL 268

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation:  regular reading responses, short midterm essays, and final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: First-year students and sophomores
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 166 (D2) COMP 166 (D1) AMST 166 (D2) ENGL 268 (D1)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

SEM Section: 01 TR 9:55 am - 11:10 am Zaid Adhami

ENGL 272 (S) American Postmodern Fiction
Cross-listings: AMST 272 ENGL 272

Primary Cross-listing
American fiction took a turn at World War II; the simplest way to name the turn is from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness: postmodern books tend to be about themselves, even when they are most historical or realistic. Already a paradox emerges: why would World War II make narratives more self-reflexive? The first book in the course, and the best for approaching this paradox, is Heller's *Catch-22*. It also serves as a good introduction to the unlikely merging in American fiction of high European post-structuralist postmodernism and low American punk postmodernism. Subsequent books in the course will probably include Pynchon's *The Crying of Lot 49*, Morrison's *Beloved*, DeLillo's *White Noise*, Carver's *What We Talk About When We Talk About Love*, Diaz's *The Brief Wondrous Life Of Oscar Wao*, and Whitehead's *The Underground Railroad*.

Requirements/Evaluation: three papers of increasing length and weight, contributions to class discussion
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: first-year students who have placed out of 100-level English and sophomores considering the major; then Junior and Senior English majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 273 (S) Detectives Without Borders (DPE) (WS)
Cross-listings: COMP 273 ENGL 273 GBST 273

Secondary Cross-listing
Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the
evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female
detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international
journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa
Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will
look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we
read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students’
ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from
non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial
theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included
in the syllabus.

ENGL 275 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: ENGL 275 AFR 275 AMST 276

Primary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living
in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and
how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of
the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics
across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include
Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier
Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé
Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 275 (D1) AFR 275 (D1) AMST 276 (D2)
**Writing Skills Notes:** Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

**Difference, Power, and Equity Notes:** Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.

**Attributes:** ENGL 200-level Gateway Courses

**Not offered current academic year**

**ENGL 277 (F) Meditation and Modern American Life**

**Cross-listings:** REL 277 ENGL 277

**Primary Cross-listing**

The first English translation of a Buddhist text was published in the United States in 1844. At the time, few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices (meditation, in particular) can be found everywhere. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the increasingly mainstream role of meditation in modern American life. We'll study how traditional Buddhist meditation practices were transmitted to the West, and then track the way those practices changed over time, as they were adapted to the radically new context of American culture. And we'll study the way meditation is impacting a wide array of cultural domains, including: literature, psychology, education, environmentalism, Western attitudes towards death and dying, and the fight against racism. A key part of the course will be an introduction to the theory and practice of meditation: we'll learn a variety of meditation techniques, and we'll spend a significant amount of time each class practicing and reflecting upon those practices.

This course is a part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail, in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Classes will be held at the jail, with transportation provided by the college. *Please note the atypical class hours, Thursdays, 4:45-8:30 pm.*

**Requirements/Evaluation:** full attendance and participation; meditation 2-3 times a week outside of class; a meditation journal; and a final 10-page essay

**Enrollment Limit:** 18

**Enrollment Preferences:** final selection will be made on the basis of (a) statements of interest sent via email to brhie@williams.edu by June 26 and (b) brief interviews with the instructor.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 277 (D1) ENGL 277 (D1)

**Not offered current academic year**

---

**ENGL 278 (S) Buddhism and Contemporary American Literature**

The influence of Buddhism on American literature is long-standing and appears to be growing ever deeper with time. A very partial list of contemporary American writers who have been influenced by Buddhist practice and theory includes: Ruth Ozeki, George Saunders, Charles Johnson, Alice Walker, bell hooks, Maxine Hong Kingston, Ocean Vuong, Maggie Nelson, Jane Hirshfield, and Norman Fischer. This class, conceived as a follow-up to the introductory course "Zen and the Art of American Literature" (though it's not necessary that students have taken that course), will offer a deeper look into the role that Buddhism is playing in contemporary American literature. Our focus will fall squarely on literary texts (mostly novels and poems by the authors named above, including Ruth Ozeki's latest novel, *The Book of Form and Emptiness*), but we'll make occasional forays into Buddhist nonfiction, to supplement our understanding of how Buddhism is speaking to pressing contemporary problems like racism and the ecological crisis. Students who want to take this course should already be familiar with the practice of meditation (see pre-reqs below), which they will be asked to continue (for 15-20 minutes a day) alongside their study of texts by writers who have themselves engaged in similar contemplative practices (often as an integral part of their own writing practice). Ideally, practice and theory, reading and experience will mutually inform one another.

**Requirements/Evaluation:** Attendance will be strictly required (after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3). Other requirements: daily meditation practice (15-20 minutes a day), a weekly meditation journal, various informal in-class and
take-home writing assignments, and a final 10-12 page essay.

**Prerequisites:** Students must have successfully completed a course at Williams that includes a substantial introduction to the practice and theory of meditation. Examples include ENGL 239, ENGL 277, REL 269, REL 232, REL 254, REL/PHIL 288.

**Enrollment Limit:** 25

**Enrollment Preferences:** After you preregister, please email me at brhie@williams.edu with an explanation of what draws you to the course, as well as the name of the course you’ve taken that satisfies the meditation-related prerequisite.

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

**ENGL 279 (F) Introduction to Latinx Literature: From 'I Am Joaquin' to Borderless-Future Dreams**  (DPE) (WS)

This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement's significant aftermaths. This focus highlights the significant contributions Chicano voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyorican, Cuban, Central Americans, Afro-Latinxs, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries’ most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political equality? To what extent does the Latinx subject's political freedom rest upon practices and processes of identity-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture--from the city to the campo to the cultural in-between of the border.

**Requirements/Evaluation:** Active participation in in-class and online discussion, four 4-5 page essays, weekly reading responses, and an in-class presentation.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Sophomores considering the English major, but juniors and seniors are also welcome.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement. Reading-response prompts will be geared towards helping students practice writing and analysis skills. Students may also be asked to attend occasional 1-on-1 meetings with instructor to discuss writing.

**Difference, Power, and Equity Notes:** This course offers students the opportunity to learn and think critically about Latinx community struggles throughout U.S. social history while examining the forms of cultural expression that arise out of and in relation to those struggles. It also delves into the intersectional nature of Latinx community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

ENGL 280 (S) Writing for Performance

Cross-listings: ENGL 280 THEA 282

Secondary Cross-listing

This studio/seminar course is designed for students with some experience in creative writing and/or performance interested in a deep dive into the art of playwriting. What is a play? What distinguishes writing for performance from writing that is meant to be read? How do we craft a blueprint for a live event? In our rapidly evolving digital world, what sorts of stories and phenomena still ask to be experienced live? How are contemporary theater and performance makers pushing the boundaries of what "writing" means and what constitutes "liveness"? We will read works by Sharon Bridgforth, Sarah Ruhl, Tarrell Alvin McCraney, Tony Kushner, Branden Jacobs-Jenkins, Sarah DeLappe, Suzan-Lori Parks, Edward Albee, August Wilson, Chuck Mee, María Irene Fornés, Young Jean Lee, Stew, and Lightning Rod Special, who have deepened and widened the possibilities of the form. We will also write, beginning with exercises in character, dialogue, action, and world-building, and working toward a longer final project. Students will be expected to present their own work and respond to each other's work regularly. At the end of the term, we will present excerpts of our one-act length works as part of an open studio experience.

Requirements/Evaluation: in-class participation, critical/creative responses to readings, various writing exercises, final one-act performance piece, participation in final presentation

Prerequisites: students with some experience in creative writing and/or performance

Enrollment Limit: 14

Enrollment Preferences: students who have taken THEA 214/ENGL 214 or another creative writing course

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 280 (D1) THEA 282 (D1)

Not offered current academic year

ENGL 281 (F) Introductory Workshop in Poetry

This course serves an introductory creative writing workshop where we will generate an expansive definition of poetry and a facility with its many strategies. We'll read broadly in modern and contemporary poetry; engage in various exercises, improvisations, and collaborations; and write, revise, and discuss your original works of poetry.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students who have preregistered; all interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENGL 283 (F)(S) Introductory Workshop in Fiction

An introduction to the basics of writing short fiction. Exercises, short assignments, and discussion of published fiction will be combined with discussions of student stories, individual conferences with the instructor, and independent work.

Requirements/Evaluation: active participation, successful completion of assigned exercises and story drafts, and a final portfolio of revised fiction
ENGL 285 (F) Introductory Workshop in Prose

An introduction to the basics of writing creative prose, both fiction and memoir, with a focus on more self-consciously exploring the question of who gets to write about what. From what sources does a work's imaginative authority derive? What role should imagination play in the composition of fiction? What are the outer boundaries of those imaginative acts that should be attempted? Are there any limits on what authors should write about in memoir? Class sessions will be devoted to both published and student work. Students will receive written critiques from other students as well as the instructor. Individual meetings with the instructor will be available.

Class Format: creative writing workshop

Requirements/Evaluation: class participation, student teaching, student work, final portfolio

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students who have preregistered; all interested students should pre-register and will be emailed with instructions if the course is over-enrolled

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none
ENGL 288  (S)  Introductory Poetry Workshop: Writing as Experiment
Some writing gets categorized as "experimental" or "avant-garde." But a spirit of experimentation---of rigorous, playful curiosity---is crucial for writers of all levels and styles to cultivate. In this introductory poetry course, we will engage in games and exercises designed to help us explore the wide set of tools available to poets. We will read works by canonical and contemporary poets, from Shakespeare and Dickinson to Fatimah Asghar, Haryette Mullen, Douglas Kearney, and more. We will also discuss the ways race, gender, and power affect interpretations of the risks such poets take in their work, asking: What are the boundaries of what is considered to be poetry, and what possibilities for writing might we discover by pushing against those boundaries? How might a poem live, not just on the page, but also on a sidewalk, on a screen, in performance? This is a course that approaches writing as a laboratory to test out ideas and asks students to think critically about their own creative processes. Students will be expected to create new writing, submit reflection papers, give feedback on each others' poems, and revise work as part of a final portfolio.

Requirements/Evaluation:  Class participation, completion of writing exercises, feedback/reflection papers, and a final portfolio with revisions.
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences:  if course becomes over-enrolled, enrollment will be determined by application.
Expected Class Size:  12
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)

ENGL 300  (F)  Re/Generations I: Memory Against Forgetting and the Global American Empire  (DPE)
Cross-listings:  COMP 357  ENGL 300  AMST 300
Secondary Cross-listing
This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. As such, the courses are remote and may be taken in sequence or autonomously. In this first part, we focus on authors charting the lives and afterlives of chattel slavery, settler colonialism, genocide, war, and the expansion of the global American empire, from the 19th through 20th centuries. How do these authors remediate the critical (il)legibility of personhood and place, community and nation? What myths must be dispelled and/or rewritten? What structural elements are deployed to tackle the obstacles of hegemonic power and historical amnesia, and how do these authors re/generate "what remains of lost histories and histories of loss" (Eng and Kazanjian)? Texts to be considered may include: Narrative of the Life of Frederick Douglass, an American Slave; Hawaii's Story by Hawaii's Queen (Lili'oukalani); Notes of a Native Son (James Baldwin); Borderlands/La Frontera (Gloria Anzaldúa); Dictee (Theresa Hak Kyung Cha).

Class Format: Remote
Requirements/Evaluation:  weekly reading responses, midtern and final papers
Prerequisites:  American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor
**Difference, Power, and Equity Notes:** Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

**Attributes:** AMST Arts in Context Electives

Not offered current academic year

---

**ENGL 301 (S) Sublime Confusion: A Survey of Literary and Critical Theory**

**Cross-listings:** ENGL 301 COMP 301

Secondary Cross-listing

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining "beauty." But running alongside this is an edgier countercurrent that worships something else: an experience of excitement, fear, suspense, or thrilling confusion often described as "the sublime." The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxically by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature's exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralist criticism itself has a thrillingly confusing quality that we will not ignore.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to Xbox will enlighten, thrill, and confound you. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose, poetry, or drama from any time and place; film, visual art, or architecture; music, new media, or digital media, and beyond.

**Requirements/Evaluation:** attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

**Prerequisites:** 200- or 300-level course in literature, theory, or philosophy, or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** students majoring or considering a major in a related field

**Expected Class Size:** 9

**Grading:** no pass/fail option, yes fifth course option

**ENGL 302 (S) "A language to hear myself": Advanced Studies in Feminist Poetry and Poetics** (DPE) (WS)

**Cross-listings:** AMST 310 WGSS 330 ENGL 302

Primary Cross-listing

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde,
Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Judith Butler, as we analyze the kinds of performances that brought together feminist poetry and political activism. We spend some time in the archives, analyzing documents from the period, including original publications of poetry chapbooks often published by the period's many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Class Format: I anticipate that this class will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements.

Requirements/Evaluation: two short analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), short presentation, longer final researched paper (10-12 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 310 (D2) WGSS 330 (D2) ENGL 302 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, critical summaries of feminist criticism, two four-to-five-page graded papers, one creative assignment, a longer, final researched paper (10-12 pages), written in stages over a period of several weeks with feedback at each stage. Critical feedback on written assignments a week prior to due date through conferences and Google Docs and on graded assignments within one week.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

ENGL 303 (S) The New Television

TV has changed a lot, and it seems like a good time to figure out how. We will watch full seasons of landmark shows (Game of Thrones, Girls, Breaking Bad, The Sopranos) in order to answer a series of questions: How does the new television differ from older network shows? What are its distinctive storytelling techniques? What, in particular, is the appeal of complex and long-form narrative? Is modern television, as often claimed, a reinvention of the nineteenth-century novel? Which features does it take over from the novel and do they work the same way on the screen as they do on the page? But then what is television's relationship to the film genres that it also inherits? What happens to a gangster movie when you extend it out to eighty-six hours? What's the difference between a zombie movie and a really long zombie movie? And how is it that the new television has reclaimed the word binge, which used to be associated with broken diets and heavy drinking?

Requirements/Evaluation: informal weekly writing; class participation; midterm and final essays, 30 pages total

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam. Do contact Prof. Thorne if you would like to take the class without the prereq.

Enrollment Limit: 25

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option
ENGL 304 (F) Dante

Cross-listings: COMP 317 ENGL 304

Primary Cross-listing

In the spring of 1300, Dante Alighieri entered Hell. The Divine Comedy is the record of the journey that followed. It is organized around a series of encounters with figures from the poet's past—for example, a former teacher damned for violating nature—as well as historical and literary characters: Ulysses, Thomas Aquinas, Plato, Virgil, Adam. Though the Comedy is probably now best known for its savagery—the bodies split open, the Popes turned upside down and lit on fire—it is also, as Dante claims, a love story and a work of high imaginative daring. Among its final images is a vision of paradise rendered through the precise if also mind-bending language of non-Euclidean geometry. In this course we will read the three books of the Comedy (Inferno, Purgatorio, Paradiso), the Vita Nuova, and a few brief selections from Dante's other works. All readings will be in translation. The course will be taught remotely.

Requirements/Evaluation: five written exercises and a 10-page final paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 14

Enrollment Preferences: English majors

ENGL 305 (F) The Canterbury Tales

Composed in the last decades of the fourteenth century, The Canterbury Tales is a brilliant pastiche of competing forms. Saints' lives, dirty stories, tales of revenge, sermons, fart jokes--they are all in the mix. We will read the Tales in the original Middle English, which is easier (and more fun) than it looks; no prior exposure to Middle English is necessary. We will also read sections of the Decameron and the 1001 Nights.

Requirements/Evaluation: frequent quizzes on vocabulary and comprehension, practice reading Middle English aloud, two 5- to 7-page papers, a midterm, and a final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 306 (F) Beckett, Pinter and Stoppard
Cross-listings: ENGL 306  THEA 365  COMP 365  ENGL 365

Secondary Cross-listing

Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: Endgame, The Caretaker, Rosenkranz and Guildenstern are Dead, Krapp's Last Tape, The Homecoming, No Man's Land, Betrayal, Waiting for Godot, Dogg's Hamlet, The Invention of Love, Arcadia, Rock 'n' Roll, Not I, Rockaby, A Kind of Alaska, Catastrophe, The Real Thing, Indian Ink, Artist Descending a Staircase and One for the Road. Throughout, we will give consideration to these works as both literary and theatrical texts.

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

Prerequisites: none

ENGL 307 (F) The 19th Century and Its Shadow

Cross-listings: AFR 303  ENGL 307

Primary Cross-listing

This course explores canonical American literature from the nineteenth century alongside a selection of contemporary literary and cinematic texts that call on and intervene with this body of work. Following Toni Morrison's charge that the contemplation of a black presence "is central to any understanding of our national literature and should not be permitted to hover at the margins of the literary imagination," this course focuses on how ideas of race are explored throughout the canon and how they have been carried forward. Works considered throughout the term come from, among others, Julie Dash, Frederick Douglass, Saidiya Hartman, Harriet Jacobs, Mat Johnson, Herman Melville, Toni Morrison, Nate Parker, Edgar Allen Poe, Quentin Tarantino, Mark Twain, and Colson Whitehead.

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 308 (S) Race and the Zombie Apocalypse

Cross-listings: ENGL 308  AFR 305

Primary Cross-listing
This course takes a critical approach to our contemporary understanding of the figure of the zombie and its inextricable link to discourses on race and blackness in the Americas. An introductory grounding in theories of social death allows an opportunity to explore the racial anxiety that gave birth to the genre and trace its development throughout the hemisphere. The course considers the novels, films, and critical texts that frame the genre in order to pose the following questions: What can the figure of the zombie teach us about our evolving relationship to race? What roles do gender and sexuality play in the construction of the genre? And, finally, how does the recent proliferation of zombie-related television shows, movies, books, and video games reflect our present-day concerns?

Class Format: remote

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

ENGL 309 (S) Ibsen, Chekhov and the emergence of Modern drama

Cross-listings: COMP 387 THEA 387 ENGL 309

Secondary Cross-listing

This course will center on the plays of Henrik Ibsen and Anton Chekhov, key figures in the development of Modern European drama. Prospective readings will include Ibsen's A Doll's House (1879), The Wild Duck (1884), Rosmersholm (1886) and Hedda Gabler (1890); Chekhov's The Seagull (1896), Uncle Vanya (1900), Three Sisters (1901) and The Cherry Orchard (1904); along with August Strindberg's Creditors (1889) and Oscar Wilde's An Ideal Husband (1894). We will chart the development of dramatic realism and naturalism, and situate these plays in the context of the late-nineteenth century "ache of modernism", with supplemental readings that highlight changing conceptions of identity and subjectivity, emerging strains and contestations over gender and sexuality, and the wider sociological, political and technological changes of the period. The course will also be centrally concerned with these playwrights' innovative explorations of the investigations of theatre's capacities and limitations in representing social reality and the 'performance' of selfhood.

Requirements/Evaluation: Five papers, alternating weeks with your tutorial partner; critical responses to your partner's essays; evaluation of participation.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English and Comparative Literature majors.

ENGL 310 (F) Rebels, Revelers, and Reactionaries: The Poets of the Seventeenth Century
The decades following the death of Elizabeth I were period of scandal, schism, dissent and decadence, culminating in a bloody civil war and the beheading of a king. It was, in other words, a 'world turned upside down' by every kind of upheaval: in civics, philosophy, politics, religion, and science. It also produced writers of some of England's finest lyric and satiric poetry, and its greatest epic poet. How the century's poets successfully dramatized the critical events and feelings in this time of turmoil will be the focus of the course. While primarily a course in close reading, we will nevertheless try to reconstruct the lives and contexts of the writers, and examine some of the critical and theoretical issues involved in contextualizing the poems. Authors will include Donne, Jonson, Lanyer, Herbert, Herrick, the Cavalier Poets, Milton, Marvell, Cavendish, Dryden, and Rochester.

Requirements/Evaluation: two 8- to 10-page essays and several short writing assignments

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 311 (S) Theorizing Shakespeare

Cross-listings: COMP 310 WGSS 311 THEA 311 ENGL 311

Primary Cross-listing

For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: The Merchant of Venice, Hamlet and Antony and Cleopatra. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

Requirements/Evaluation: 20 pages of writing in the form of two short and one longer paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 312 (S) Ecocriticism

Cross-listings: ENVI 315 ENGL 312

Primary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We will read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.
ENGL 313  (F)  George Eliot and Henry James

George Eliot (aka Mary Ann Evans) and Henry James trace dramas of consciousness that ramify in the context of 19th century social transformations. Eliot records the frictions of provincial and cosmopolitan lives; James writes about what it meant for American and European societies around the turn of the 20th century to be mutually exposed to and by one another. Their work explores gender and class fluidity, and the relations of ethical, economic, and aesthetic value. Both evoke fraught political contexts—for Eliot, the failed mid-century European revolutions and pressures of British imperialism, and for James, post-Civil War American consciousness and the struggle between American and European imperialisms. By placing texts in relation to one another—for instance, James’ Portrait of a Lady with Eliot’s Daniel Deronda, What Maisie Knew with The Mill on the Floss, The Turn of the Screw and The Beast in the Jungle with The Lifted Veil—we’ll consider how and to what ends these writers link such issues as law, sacrifice, gambling, gender, and the supernatural. In tracing the relation of their work to one another, we will mark the shift from crucial preoccupations of the 19th century to the modern novel, and the innovations of prose style that accompany them.

ENGL 315  (S)  Milton’s Paradise Lost

If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It’s hard to shake the feeling that Milton is the fustiest of English poets—dull, pious, brilliant and all, and not someone you would read if you didn’t have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents—the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read Paradise Lost, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school—about God and Adam and Eve and the
serpent—really have been writing about rebellion all along?

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam. If you are interested in taking the course without the prereq, do contact Prof. Thorne.

ENGL 317  (F)  Black Migrations: African American Performance at Home and Abroad

Cross-listings: AFR 317  COMP 319  AMST 317  DANC 317  ENGL 317  THEA 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

ENGL 318  (F)  Literary Taste and After Taste

Why are some literary works acclaimed or neglected when they first appear, and why do their critical assessments change—sometimes drastically—over time? What does it mean to think of a work as 'before its time'? What is the relation between critical trends and their affinity for particular literary styles? In thinking about these issues, we will consider a few crucial instances: modernist poets and New Critics' celebration of
Donne and Marvell over Milton in the early 20th century; 18th and 19th century writers' fascination with medievalism and the Gothic; deconstructionist critics' absorption with Romantic poetry; Marxist and neo-Marxist critics' qualified embrace of realism and critique of postmodernism; and recent and contemporary debates about the relation of aesthetic forms to representations of race, ethnicity, and gender.

Requirements/Evaluation: class participation and two essays, approximately 20 pages of writing

ENGL 319  (F)  The Literary Afterlife

Cross-listings: COMP 354  ENGL 319

Primary Cross-listing

What do writers mean when they say that they will live on after death through their books? In this course, we will explore the long history of thinking about literature as a way to compensate for mortality, and we will compare the literary afterlife to religious and philosophical versions of eternity. Many of the writers on our syllabus were anxious about the compatibility of the pursuit of worldly fame with the desire for Christian salvation. We will study how their sense of a conflict between the two afterlives changed over time: from the recovery of pagan antiquity during the Renaissance, across the theological transformations of the Reformation, to the consequences of print. The course deals with some of literature's greatest ambitions--to cheat death, to make a lasting contribution to human culture--but we will often find ourselves caught in an undertow of skepticism. Is writing any less susceptible to decay than human bodies are? If so, is literary accomplishment worth the risk of one's soul? Authors and texts will include Sappho, Ovid, Lucretius, Ecclesiastes, Augustine, Petrarch, Julian of Norwich, Montaigne, Shakespeare's Hamlet and Richard II, Jonson, Donne, and Milton.

Requirements/Evaluation: one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions

ENGL 320  (S)  Marlowe and Shakespeare  (WS)

Cross-listings: ENGL 320  THEA 320

Primary Cross-listing

In 1586, at the age of twenty-three, Christopher Marlowe wrote Tamburlaine the Great. Over the next six years-probably while moonlighting as a government spy-he went on to produce some of the strangest and also most influential works of English drama. Then in 1593, Marlowe was murdered, stabbed through the eye in a tavern brawl. It is often said that Marlowe's early death, no less than his early success, made the work of Shakespeare possible. In this class we will read Marlowe's Edward II, the first popular history play in English, and Shakespeare's Richard II; The Jew of Malta and The Merchant of Venice; Doctor Faustus and Macbeth. We will look at ways in which Marlovian preoccupations-with lurid violence, with debasement, with self-invention-resurface in Shakespeare, in new forms. In the process we will also take up more general questions of literary influence: What do writers borrow from each other? And how does the knowledge of indebtedness-shared to varying degrees with an audience-affect the meaning and
impact of their work? Critical readings will include essays by Harry Levin, Julia Lupton and Stephen Greenblatt.

Requirements/Evaluation: two 5- to 7-page papers; a ten page final paper

Prerequisites: 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 321 (S) Samuel Johnson and the Literary Tradition

Samuel Johnson (1709-1784) has been exceptionally influential not only because he was a distinguished writer of poems, essays, criticism, and biographies, but also because he was the first true historian of English literature, the first who sought to define its "tradition." We will read Johnson's own works and Boswell's Life of Johnson to discover Johnson's talents, tastes, and standards as an artist, as a moral and literary critic, and as a man. We next will use Johnson's Preface to Shakespeare and Lives of the Poets to examine how this great intelligence assessed writers from the Renaissance through the eighteenth century. While reading his commentary on Shakespeare and his critical biographies of Milton, Dryden, Pope, Swift, and Gray, we will analyze selected works by these writers so as to evaluate Johnson's views and sharpen our understanding of the relationship between his standards and values, and the ones we hold today—both individually and collectively.

Requirements/Evaluation: midterm and final papers (15-20 pages total), and a take-home final exam

Prerequisites: a 100-level English course, or a 5 on the AP literature exam, or a 6 or 7 on the advanced English IB exam

ENGL 322 (S) Borges, Nabokov, Beckett

Jorge Luis Borges, Vladimir Nabokov, and Samuel Beckett were the three most influential writers in western fiction during the 1960s and 1970s; they helped to turn literary history from modernism to post-modernism. What they share is extreme self-consciousness of two kinds: the self is a labyrinth; the text is a labyrinth. Though born around the turn of the twentieth century, each came to international prominence only after the catastrophe of World War II. Unable to follow their modernist teachers in conceiving of art as the last best hope for the redemption of history, Borges, Nabokov, and Beckett each offered a unique, complex, and witty intelligence as compensation.

Requirements/Evaluation: There will be three formal writing exercises of increasing length and weight; participation in class discussions will also be a factor in the final grade.

Prerequisites: A 100-level English course, or a 5 on the AP literature exam, or a 6 or 7 on the advanced English IB exam.

Enrollment Limit: 25

Enrollment Preferences: English majors, then prospective English majors.
ENGL 323 (S) A Novel Education (WS)
All novels are conscious of their readers; eighteenth-century novels are obsessed with them. In the century when the genre first flourished, readers are the ultimate objects of novelists' plots. We are addressed, teased, pleaded with, embarrassed, flattered, made fun of, praised, chided, solicited, warned, reminded, rebuked, asked for sympathy, and--always--closely watched. Eighteenth-century novelists--and their narrators--aggressively educate their readers, not only teaching us how to interpret the novel itself, but also demanding that we self-consciously question the powers of mind and habits of heart we bring to the process of interpreting a book, ourselves, and our world. In this tutorial course, we will explore the narrative and rhetorical strategies two of the century's greatest novelists use in creating, shaping, and finally educating their readers. We will focus principally on Henry Fielding's *Tom Jones* (1749) and Laurence Sterne's *Tristram Shandy* (1760-67)--long, brilliantly intricate novels that go about their work in very different ways, but that are equally committed to the project of giving their readers a novel education. We will consider--much more briefly--Fielding's *Joseph Andrews* and Bunyan's *Pilgrim's Progress*. We will also read criticism by such "reader response" theorists as Stanley Fish and Wolfgang Iser, and--in the individualized setting of a tutorial--students will be asked to develop and articulate their own theories of reading by examining critically the ways in which texts affect and educate them. Emphasis will be placed on developing skills not only in reading and interpretation, but also in constructing critical arguments and responding to them in written and oral critiques.

Class Format: Remote course. Students will meet with the instructor in pairs for one hour each week

Requirements/Evaluation: Students will write and present a 4- to 5-page paper every other week, and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

ENGL 324 (F) World’s End: Literary Ecologies of the Limit

Cross-listings: ENVI 323 ENGL 324

Primary Cross-listing

Consciousness of the world's finiteness in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It* and *King Lear*; Marvell; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Wordsworth; McCarthy, *The Road*; Atwood; Alice Oswald; photography (Struth, Hütte); painting (Titian), and video installations (Pipilotti Rist). Theoretical texts include: Smith, *Against Ecological Sovereignty*; Wood, *Reoccupy Earth*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am and Beast and the
Sovereign.

Class Format: This course will be taught virtually, but we will make absolutely every effort to ensure that it takes the form of a genuine discussion class, including breaking periodically into smaller online groups. Requirements: two papers totaling 20 pages.

Requirements/Evaluation: two papers over the course of the semester totaling approximately 20 pages.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors

ENGL 325 (F) Joyce, Woolf, and Proust

Cross-listings: ENGL 325 COMP 366

Primary Cross-listing

This seminar focuses on novels by three of the most important writers of modernist fiction: Marcel Proust (Swann's Way, the first novel of his sequence In Search of Lost Time); Virginia Woolf (To the Lighthouse); and James Joyce (Ulysses, read in slightly abridged form). By juxtaposing these path-breaking texts, we will examine the distinctive yet related ways in which they explore crucial preoccupations of modernism: the threat and the exhilaration of cultural loss in face of social and political transformations in the early twentieth century; the turn to memory, to art, and to objects as stays against de-stabilized subjectivity and as means of re-thinking value; the emergence of new forms of political and sexual identity; the heightening of consciousness to the verge of transport or disintegration; and the roots and perversities of desire. Students who have studied Ulysses in a previous course are welcome.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam; students who have taken ENGL 360 are welcome

ENGL 328 (F) Austen and Eliot

Cross-listings: ENGL 328 WGSS 328

Primary Cross-listing

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context—in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism—we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's Pride and Prejudice, Emma, Mansfield Park, and Persuasion; Eliot's The Mill on the Floss,
At roughly fifty-year intervals, Britain produced three brilliant female novelists -- Jane Austen, George Eliot, and Virginia Woolf -- who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction-- with an emphasis on Austen and Eliot -- with special attention to the nature and implications of their narrative methods for representing the consciousnesses of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is our understanding of novelistic characters and consciousness shaped by our real-life experience in interpreting the thoughts and character of others, and vice versa? Do "omniscient" narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? How do these authors' preoccupations with interior thought relate to their focus on women's experience? Possible texts include Austen's *Emma* and *Persuasion*, Eliot's *Middlemarch*, *Daniel Deronda*, and *The Lifted Veil*, and Woolf's *The Waves*.

---

The Renaissance is usually seen as a decidedly Western "rebirth": the moment in which the emerging nations of modern Europe define themselves by both their connection to and their distance from the classical heritage of Greece and Rome. What might it mean, then, to understand the Renaissance also as shaped by a global network of interactions among Western and non-Western societies, economies, and cultures? In this course our focus will...
be on literature in the broadest sense, including lyric poetry, epic, and drama, but also travel reports, royal memoirs, and philosophical histories as means of imagining the shape of the world, familiar and unfamiliar. We'll begin by considering Europe's eccentric place within the larger Afro-Eurasian cultural system of the late Middle Ages, and how what we call the Renaissance emerges from a sense of linkage to as well as separation from the traditions of the Islamic world and beyond. We'll then examine the intense and troubling interrelation between Renaissance writing's intellectual dynamism and the often catastrophic effects of Europeans' encounter with what was for them a New World in the Americas. Finally, we'll think about whether or not it makes sense to see the European Renaissance as one facet of a broader global process, similar to concurrent movements of cultural expansion and hybridization such as in Mughal India. Authors to be studied may include Petrarch, Boccaccio, Chaucer, Ibn Khaldun, Thomas More, Babur, Mira Bai, Marguerite de Navarre, the Inca Garcilaso, Marlowe, and Camoes. (All readings in English.)

Requirements/Evaluation: two papers (15-20 pages total); regular short responses
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: graduating seniors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

ENGL 331  (F)  Romantic Culture
The Romantic period--1780 to 1830, roughly--is one of the great watershed moments in western culture. Romantic writers obsessed over the same things we do: the profit and power resident in human interactions with the natural world, for instance, or the spiritual significance of our inner lives, or the terrors and exhilaration of political and social activism. Romantic writing is durably relevant and, frequently, durably and interestingly weird. We will read a lot of poetry, and paintings and other examples of Romantic expressive culture will comprise a significant part of the course materials.

Requirements/Evaluation: class participation and three papers, the last being longer than the first two
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors

ENGL 332  (S)  Aesthetic Outrage  (WS)
Cross-listings: COMP 307  ENGL 332
Primary Cross-listing
In this tutorial course we will explore interdisciplinary ways of theorizing the outraged reception of provocative works of film, theater, and fiction. When riots, censorship, and vilification greet such works in moments of political and social upheaval, the public outrage is often strangely out of proportion to either the work's aesthetic nature or its overt commentary on the political crisis. Something powerfully symptomatic is at work, then: a set of threatened investments, unacknowledged values, and repressed ideas which surface explosively, but indirectly, in the aesthetic outrage. In an attempt to understand the strange logic of public outrage against works of art, we will explore the respective works' historical contexts, and use theoretical models--aesthetic, political, psychological, social--as a means of illuminating the dynamics of outrage and exposing understated linkages between a work's figurative logic and the political passions of its historical moment. We will study instances of outrage in the context of French Revolution (Beaumarchais' The Marriage of Figaro), the wave of anarchist terrorism in turn-of-the-century Paris (Jarry's Ubu the King), the sodomy trials of Oscar Wilde (The Importance of Being Earnest), the Irish Revolution (Synge's The Playboy of the Western World and O'Casey's The Plough and the Stars), and Stalinist collectivization (Eisenstein's suppressed film Bezhin Meadow). After two weeks in which we will meet as a group, students will meet with the instructor in pairs for one hour each week during the rest of the semester. They will write a 5- to 6-page paper every other week (five in all), and a short written analyses of their partners' papers in alternate weeks. Emphasis will be placed on developing skills not only in reading and interpretation (of historical events and of theoretical texts as well as of literature and film), but also in constructing critical arguments and responding to them in
written and oral critiques.

Class Format: tutorial

Requirements/Evaluation: active participation in tutorial discussions, five 5- to 6-page papers, five 1- to 2-page critiques

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors, Comparative Literature majors, highly qualified sophomores

ENGL 333 (F) The Nineteenth-Century British Novel

Cross-listings: ENGL 333 WGSS 333

Primary Cross-listing

In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic and social ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in--and sometimes out of--love. Since so many of these stories remain highly accessible works of popular culture, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers' understanding of themselves as subjects and agents of an ongoing social history. Likely authors include Jane Austen, Walter Scott, Charlotte Bronte, Charles Dickens, Anthony Trollope, and George Eliot.

Class Format: This class will be remote only, with two synchronous discussions of 50 min each per week and a mix of mini-lectures, brainstorming documents, etc. for the remaining 50 min/week.

Requirements/Evaluation: Heavy (but entertaining!) reading load. Flexible writing requirement includes options for short essays, weekly journal, creative work, and research paper. Students must complete 4 units of writing, with the research paper, if chosen, counting for two. There will be additional bits of informal writing, evaluated as part of the class contribution grade, such as participating in the production of a "brainstorming" doc on Google.

ENGL 335 (F) Moving Words, Wording Dance (DPE) (WS)

Cross-listings: DANC 302 ENGL 335

Secondary Cross-listing

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this course, we will explore different modes of writing about performance such as fiction, ethnography, and performative writing. The course material will primarily focus on books by artist-scholars of color with the aim of engaging with both the politics of identity in performance and also the politics of texts and archives. Each of the texts we encounter will be paired with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. Besides engaging deeply with the selected monographs, we will practice skills related to writing creatively and analytically about movement-based performance. This class will be held remotely and will include a combination of tutorial-like small group meetings, periodic synchronous sessions, and asynchronous work such as Glow posts or recorded lectures. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) participate in discussions about course materials, (iii) produce creative and critical writing (at least 5-6 pages every two weeks and a final cumulative assignment), and (iv) engage in the revision process of their own work and that of their peers based on feedback from the professor and from writing partners.

Requirements/Evaluation: Each student will write three 5- to 6- page papers on which professor and peers will provide critical feedback on content, style, and grammar. Students will also revise the papers and meet with the professor to discuss the revision process. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Junior and Seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

DANC 302 (D1) ENGL 335 (D1)

Writing Skills Notes: Each student will write three 5- to 6-page papers on which the professor and peers will provide critical feedback on content, style, and grammar. After each cycle of feedback, students will submit a revision, and will have an individual meeting with the professor to discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs which anchor the course engage with the politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So, our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

Not offered current academic year

ENGL 336  (F)  Escape, Escapism, Escapology, and the Contemporary American Novel

One prestigious set of contemporary American novels seems to confuse escape (evasion of real danger, such as Nazism or slavery), escapology (evasion of invented dangers, e.g. Houdini's art), and escapism (failure to confront real dangers). Some of these books have hyperbolic titles (The Amazing Adventures of Kavalier and Clay, The Brief Wondrous Life of Oscar Wao, A Heartbreaking Work of Staggering Genius), as if to suggest escapist or escapological fantasies about political or existential dangers that require real escaping. What's going on? We'll discuss the conceptual difficulties of escaping in a globalized world; and in particular, we'll discuss the resistance of contemporary American novelists to contemporary forms of messianism (or a place of return) and utopianism (or a place of departure). Besides the hyperbolically named texts, we will probably read Emma Donoghue's Room and Colson Whitehead's The Underground Railroad. Film paradigms will probably include The Sound of Music and Life is Beautiful.

Requirements/Evaluation: three formal papers and contribution to class discussions

ENGL 338  (S)  Literature of the American Renaissance

Cross-listings: COMP 337  ENGL 338  AMST 338

Primary Cross-listing

The decades leading up to the Civil War have often been described as the "American Renaissance" because of the breathtaking explosion of literary achievements in that period (including Walden; Moby-Dick; The Scarlet Letter; Narrative of the Life of Frederick Douglass; and the groundbreaking poetry of Walt Whitman and Emily Dickinson). For the first time, American writers were broadly the equal or more of their European counterparts. We will explore the distinctive character of this achievement, paying close attention to the transformational power of language, and the promises it offered to refigure personal and political identity in a time when the American experiment approached the brink of collapse.

Class Format: discussion

Requirements/Evaluation: in addition to actively participating in class, students will be required to submit very short reading entries on Glow, and to write two comparative essays (of 8 and 12 pages).

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors; American Studies majors; Comparative Literature majors

Expected Class Size: 20
ENGL 339  (F)  William Faulkner

William Faulkner was an experimental modernist; he was also deeply mired in the whole history of racism in the South and in the U.S. generally. What is the relation of these two facts? What is revealed, and what is hidden, in the brilliant obscurity of his prose? Faulkner seems to have known, consciously or unconsciously, as much as any white person in the twentieth century about race; for that reason, his African American contemporaries and ours have often sought him out in particular for a dialogue on the topic. Thus, we'll read Jesmyn Ward's "Sing Unburied, Sing" alongside Faulkner's five great novels from 1929-1940.

Requirements/Evaluation: Three papers of increasing length, a total of about 15 pages. Participation in class discussions will also be a factor in the final grade.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: English majors, or potential English majors.

ENGL 340  (S)  Elizabeth Bishop in the Americas  (DPE)

Cross-listings: ENGL 340  AMST 340  WGSS 340  COMP 342

Primary Cross-listing

Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: three hours per week, in addition to small group discussion and archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 342 (S) Race and Feeling in Twentieth Century Literature

Cross-listings: AFR 345 ENGL 342

Primary Cross-listing

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings --- guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Sianne Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

Requirements/Evaluation: active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 343 (F) Whitman and Dickinson in Context (WS)

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings—in Whitman's case, his essays, in Dickinson's, her letters—we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page
papers and commentaries on their partner's papers.

**Requirements/Evaluation:** five 5- to 7-page papers, final paper, oral presentation and critique

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 10

**Enrollment Preferences:** English majors

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will write at least five 5-7 page papers, five responses to their partner's writing, and on-going commentary from the instructor on their writing skills.

**Attributes:** AMST Arts in Context Electives ENGL Literary Histories B

---

**ENGL 344 (S) Aestheticism & Decadence**

**Cross-listings:** COMP 364 ENGL 344

**Primary Cross-listing**

"Fin de Siècle": Despair over a seemingly perilous decline in moral standards, scandalous forms of art and writing, anxieties brought on by Britain's uneasy relation to its colonies, and the emergence of new dissident sexual and social identities, led some to fear (and others to celebrate) that the ways of Victorian Britain were not long for this world at end of the 19th Century. This course will consider two loosely affiliated artistic movements, aestheticism and decadence, as responses both scandalized and scandalizing to this exhilarating period. The terms themselves are elusive; so, much of our work will entail tracing out the multiple and often contradictory uses of them. Do they designate a distinct cultural and historical moment, a loose set of writers and artists, a set of thematic preoccupations? Or, might we better understand aestheticism and decadence as a style of writing, or even of the self--one we are as likely to find in 21st-century New York as 19th-century London? We'll read writers such as Oscar Wilde, who reveled in amoral manifestos like "art for art's sake" by elevating artifice and shallowness to first principles of life; as well as Sherlock Holmes, who pursued something like "detection for detection's sake". Our reading will range across novels, plays, poetry, essays, and works that seem to exceed or fall short of those genres, all in the period that gave us both science fiction and the detective story. We'll be especially interested in attempts to rethink traditional social bonds in works that value solitude over sociality, the transient encounter over the enduring relationship, new forms of affective communities, and to think about how literary form might relate to those efforts. Along with fiction, essays, and drama, we'll explore their interrelation with the broad and compelling range of visual art produced in this period. Likely authors include: Huysmans, Wilde, H.G. Wells, Darwin, Conan Doyle, RL Stevenson, Kipling, Edith Wharton.

**Requirements/Evaluation:** two papers (one shorter, one longer), a series of shorter response papers, regular and substantial contributions to class discussions

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**ENGL 345 (S) Shakespeare on Page, Stage and Screen: Text to Performance (WS)**

**Cross-listings:** THEA 340 ENGL 345 COMP 343
Secondary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era’s concerns—with matters of gender, sexuality, race, class, or materiality, for instance—against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges—and opportunities—multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: Romeo and Juliet, Henry V, Twelfth Night, Hamlet, Antony and Cleopatra, and A Midsummer Night's Dream. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of both interpretation and performance, and assess a range of recent film and stage productions.

Class Format: This course will be remote, with occasional smaller tutorial-style sections. If pandemic conditions change significantly, I will move to in-person and/or hybrid meetings as warranted.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; several short reading responses and regular discussion board postings; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 14

Enrollment Preferences: Theatre and English majors or prospective majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 340 (D1) ENGL 345 (D1) COMP 343 (D1)

Writing Skills Notes: Three papers rising from 4 to 6+ pages; regular discussion board postings and several short response papers. Students will receive timely comments from the instructor on their writing skills, with suggestions for improvement, and there will be opportunities for revision of submitted papers.

ENGL 346 (S) Literary History: Shakespeare, Dickinson, Celan, Knausgaard

This course will consider literature as a distinctive kind of historical object, one that emerges within a specific linguistic, cultural, and political context and that, nevertheless, travels far beyond its point of origin into unknown and, indeed, unknowable futures. The four figures who will concern us this semester are interested in one another - the later writers are careful readers of the earlier ones - but our thinking will go beyond reception history and the dynamics of literary influence. Instead, we will focus on the way in which literature's own temporality structures its history and, indeed, the way in which history itself might be conceived in literary terms. We will read a lot of lyric poems, but we will end the semester with perhaps the most important contemporary European novel. We will also read a significant body of theory and criticism, including works by Theodor Adorno, Giorgio Agamben, Maurice Blanchot, Martin Buber, Sharon Cameron, Anne Carson, Jonathan Culler, Joel Fineman, Virginia Jackson, Boris Maslov, and Sianne Ngai.

Requirements/Evaluation: Midterm paper of 6-8 pages, final research paper of 10-12 pages, thoughtful participation in class discussions

Prerequisites: either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and those intending to major in English. Reading knowledge of German welcome but not expected.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

**ENGL 347 (F) Love and Revolution**

**Cross-listings:** ENGL 347  COMP 344

**Primary Cross-listing**

"Love" is here a kind of shorthand for questions of sexuality and gender: why do novels, plays, and films about contemporaneous political revolutions so often get caught up in seemingly superfluous and unrelated disturbances in the field of sexuality and gender relations? In this course we will study such works, which are especially responsive to social currents whose logic they cannot fully articulate. In these texts a state of political revolution almost irresistibly touches off sexual subversiveness as well, inviting the reader or spectator to interpret just what sexual upheaval has to do with political revolution. We will take up this problem in the setting of several historical revolutions and some literary and cinematic works that represent them: for example, the French Revolution (Beaumarchais' *The Marriage of Figaro* and the Marquis de Sade's *Philosophy in the Bedroom*); the Irish Revolution (plays by Synge, O'Casey, and Yeats); the Russian Revolutions of 1905 and 1917 (Bely's *Petersburg*, Babel's *Red Cavalry*); the revolution constituted by Nazism (Hitler's *Mein Kampf*, the films *Triumph of the Will* and *The Damned*); the Prague Spring (Kundera's *The Unbearable Lightness of Being*); and the Algerian Revolution (Pontecorvo's film *The Battle of Algiers*). We will confront such questions as why an author might suggest that revolution can only be sustained through incest and libertinism; why passionate nationalist revolutionaries should be scandalized by the idea of oedipal violence and take refuge in myths of female purity; how to interpret revolution and gender relations in the context of disparate cultures. We will examine historical and social texts as well as artistic ones, learning how literature and history might be read together and inversely: that is, learning to read literature or film as a kind of political event, and to read history literarily, with an eye to its rhetoric and figuration.

**Requirements/Evaluation:** active participation in class discussions, several short written exercises, two 8-page papers

**Prerequisites:** a 100-level English course, or a score of 5 on the Advanced Placement examination in English literature or a 6 or 7 on the International Baccalaureate

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors, Comparative Literature majors

**Expected Class Size:** 18

**ENGL 349 (S) Contemporary Theatre and Performance**

**Cross-listings:** COMP 355  ENGL 349  THEA 345

**Secondary Cross-listing**

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in the world of theatre and performance today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirgis, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling through performance right now?" Students may be required to attend theatre, dance, and other performances at the '62 Center and beyond.

**Requirements/Evaluation:** written and dramaturgical-based assignments, an oral presentation, a mid-term paper, in-class discussions, and a final paper or performance

ENGL 350 (S) Modern Poetry
A study of British and American poetry between 1890 and 1945, centering on the radical aesthetic, formal and political shifts which took place during the Modernist era. We will consider the changing authorial and public perceptions of the place and function of poetry during the period, the cross-pollinations and strains between the British and American literary traditions, and the writers' individual relationships with the culture of their times. Readings will focus primarily on the poetry of W.B. Yeats, Robert Frost, T.S. Eliot, William Carlos Williams, Ezra Pound, Marianne Moore, Wallace Stevens and W.H. Auden.
Class Format: This course will be remote, with occasional smaller tutorial-style sections. If pandemic conditions change significantly, I will move to in-person and/or hybrid meetings for these smaller sections if possible.
Requirements/Evaluation: Two 6+ page papers; several written reading responses plus regular discussion board postings; and class participation.

ENGL 352  (F) Global Migration: Humanities Perspectives

This course concerns one of the most profound political, social, and cultural issues of our times, the phenomenon of mass migration, the movement of masses of people out of their countries and places of origin and sometimes across continents and oceans. It is a fundamentally contradictory reality: on the one hand, the political, economic, and now even climactic realities of countries and regions across the world objectively produce pressures for the movement of populations; on the other, these very same conditions block the possibility of safe and regularized movement. Migrants and refugees can be routinely denied the most basic rights--to safety, shelter, food and healthcare, let alone access to the law or political representation. The research on this phenomenon has taken place mostly in the social sciences. The purpose of this course is to introduce a different perspective on, and therefore different types of questions about, the phenomenon of global mass migration and the forms of displacement contained within it. It is based in the methods of the literary humanities and will look at some key works from across disciplines and media--literature, anthropology, philosophy, theory, film--to help us understand the history and forms of migrancy in the modern world. We will look at a variety of migrant experience, from "economic" migrant to stateless refugee, and consider how these figures relate to the canonical figure of modern liberal politics, the native-born citizen. We will also look at the institution of the international border and the way it is represented in different cultural genres and experienced by different populations. Our discussions will focus on works by, among others, Conrad, Manto, Arendt, Said, Kanafani, Rushdie, and Sebald.

Requirements/Evaluation: 5-6 Page midterm essay and 10-12 page final essay.

Prerequisites: a 100 level English course or permission of instructor.

ENGL 353  (S) The Brontës

Cross-listings: ENGL 353 WGSS 353

Primary Cross-listing

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel--two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, Jane Eyre, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall, to Emily's singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 Life of Charlotte Bronte, the first full-length biography of a woman novelist by a woman novelist, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Anne's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

Requirements/Evaluation: discussion, two critical essays and two short creative pieces

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 353 (D1) WGSS 353 (D2)

Attributes: ENGL Literary Histories B
ENGL 354 (F) Contemporary American Fiction
This course centers on American fiction from a late phase of postmodernism: we take for granted that history is a form of literature, and that race, gender, and self are constructions. Now what? The premise of the authors of this course is that we can return from these assumptions to write about history, race, gender, and the self in self-conscious but not debilitatingly self-conscious ways. Novels likely to be in the course that move from self or autobiography outwards: Dave Eggers, *A Heartbreaking Work of Staggering Genius*; Junot Diaz, *The Brief Wondrous Life of Oscar Wao*; Ben Lerner, *10:04*; Emma Donoghue, *Room*. Novels likely to be included that work from history inward: Colson Whitehead, *The Underground Railroad*; George Saunders, *Lincoln in the Bardo*. A novel likely to be included that is poised between self and history: Jesmyn Ward, *Sing, Unburied, Sing*.

Class Format: The course will be entirely remote by Zoom.

Requirements/Evaluation: Three papers, totaling about 15 pages. Participation in class discussions will be reflected in the final grade.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English majors; American Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ENGL Literary Histories C

ENGL 355 (F) Motherhood and Horror: The Movie (WS)
Horror might be the most durable of film genres as well as the genre that's done the most work in terms of transforming the medium as a whole, and its transgressive nature has insured it attention, giving its most famous texts enormous cultural reach when it comes to ongoing conversations as to what defines evil, what constitutes normality, or what comprises the taboo. A look at the particular anxieties the genre has--especially recently--mobilized through its portraits of mothers and motherhood. The course will also touch on other genres that suggest an unspeakable invisible beneath the maternal quotidian. Films to be studied will include Henry Selick's *Coraline*, Alfred Hitchcock's *Psycho*, Jee-Woo Kim's *A Tale of Two Sisters*, Juan Antonio Bayona's *The Orphanage*, Jordan Peele's *Get Out*, Bong Joon Ho's *Mother*, Jennifer Kent's *The Babadook*, Juan Carlos Fresnadillo's *28 Weeks Later*, and Veronika Franz's and Severin Fiala's *Goodnight Mommy*.

Requirements/Evaluation: bi-weekly papers and responses for each student in the tutorial pairings

Prerequisites: English 203 or 204 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: All interested students should preregister. In the event of over enrollment, entry will be based upon writing samples, with some preference given to English majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will be required to 5-6 page papers every other week, and 2-3 page written response papers in between.

ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
Cross-listings: COMP 322 ENGL 356 AFR 323 AMST 323 ARTH 223

Secondary Cross-listing
This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories.
Drawing on graphic novels such as the late Congressman John Lewis' *March* and Ebony Flowers' *Hot Comb*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one’s visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art’s Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. Although it is a remote course this year, this class may still feature Object Lab participation, film screenings, and collaborations with guest speakers.

**Class Format:** This is a remote class that will primarily feature synchronous sessions with some asynchronous sessions.

**Requirements/Evaluation:** class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

**Prerequisites:** none

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**ENGL 358 (S) The Myth of Venice and its Modern Aftermath**

**Cross-listings:** COMP 356 ENGL 358 GBST 356

**Secondary Cross-listing**

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron’s *Childe Harold’s Pilgrimage*, John Ruskin’s *Stones of Venice*, as well as full readings of Thomas Mann’s *Death in Venice*, Marinetti’s Futurist manifestos, Italo Calvino’s *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti’s *Senso* and *Death in Venice* and Nicholas Roeg’s *Don’t Look Now*. This course is offered in English; all texts are provided in translation.

**Requirements/Evaluation:** mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

**Prerequisites:** familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

**Enrollment Limit:** 20

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** COMP core course

**Distributions:** (D1)
ENGL 359 (S) Writing Animals

Animals surround us, inhabit us. We rely on them for food, for clothing, for friendship, and for ideas. We could say that the whole human enterprise rests on the shoulders of animals, except that we ourselves are, of course, animals, too. In this course, we will explore the rich and rapidly growing body of work that centers on the creatures we live among. Among the questions we will consider are: How do we imagine minds unlike our own? Can we speak for creatures that lack language (or at least our form of it)? How do we explain our love of animals -- and our crimes against them? Readings will include fiction (Kafka’s "A Report to an Academy"), non-fiction (Sy Montgomery’s The Soul of an Octopus), natural history (Helen Macdonald’s H is for Hawk) and philosophy (Peter Singer’s Animal Liberation). This course will emphasize student writing, and participants will be invited to experiment with different genres.

Requirements/Evaluation: Students will produce roughly twenty pages of writing in a variety of modes

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

SEM Section: 01  TF 1:10 pm - 2:25 pm  John E. Kleiner

ENGL 360 (S) James Joyce’s “Ulysses”

This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century, James Joyce’s Ulysses, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing Ulysses as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative perspective. In addition to Joyce’s novel, readings will include its epic precursor, Homer’s Odyssey, as well as critical essays. Students unfamiliar with Joyce’s short novel A Portrait of the Artist as a Young Man, which introduces characters later followed in Ulysses, are urged to read it in advance of the course.

Requirements/Evaluation: active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

ENGL 363  (S)  Literature and Psychoanalysis

**Cross-listings:** COMP 340  ENGL 363

**Secondary Cross-listing**

The British psychoanalyst D. W. Winnicott once wrote: "It is a joy to be hidden, and a disaster not to be found." This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first three-fourths of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. *All readings in English.*

**Class Format:** discussion

**Requirements/Evaluation:** active engagement with the material and with each other, plus two 5-7-page papers, one 8-10-page paper, and a symposium presentation

**Prerequisites:** one previous course in either COMP or ENGL, or permission of instructor

ENGL 365  (F) Wonderland(s): Alice in Translation

Cross-listings: ENGL 365  COMP 345  GBST 345

Secondary Cross-listing

"What do you mean by that?" said the Caterpillar, sternly. "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Requirements/Evaluation: active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

SEM Section: 01  MWF 8:30 am - 9:45 am  Janneke van de Stadt

ENGL 366 (F) Modern British Fiction

This course focuses on British novels from the early decades of the twentieth century. We will study the emergence of innovative stylistic and narrative forms characteristic of modernism, and consider the ways in which such innovations shape the works' exploration of questions of psychology and sexuality, moral integrity and betrayal, epistemology and aesthetics, race and empire. Readings will include such works as Ford's The Good Soldier, James's The Ambassadors, Conrad's Heart of Darkness, Forster's A Passage to India, and Woolf's To the Lighthouse.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level English course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

Expected Class Size: 18
ENGL 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's The Act of Killing (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers--as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: Man of Aran, The Informer, The Quiet Man, Eat the Peach, In the Name of the Father, Butcher Boy, Intermission, Into the West, The Field, The Crying Game, December Bride, The Commitments, Michael Collins, Ondine, Six Shooter, In Bruges and The Guard; and we will also assess one or more short independent films such as Budawanny and Adam and Paul. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Requirements/Evaluation: Two long papers, regular short responses and discussion board postings, class participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

Enrollment Limit: 15

Enrollment Preferences: English majors

ENGL 369  (S)  American Poetry
This course is devoted to studying the work of key figures in American poetry, from Whitman and Dickinson to writers of our own moment, attentive to the social, historical, and aesthetic pressures that shape their work. We will read widely in the major poetic traditions, from Modernism, Objectivism, and the Harlem Renaissance through the mid-century work of the New York School, Beats, Black Arts, Confessional, and Language poets. We'll also keep a close eye on the contemporary scene, in part through interactions with visiting poets. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form in the long "American century."

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor
Enrollment Limit: 25
Enrollment Preferences: English Majors using the course to fulfill a requirement

ENGL 370  (S)  Literary and Critical Theory in the Twentieth Century
Cross-listings: COMP 380  ENGL 370
Secondary Cross-listing
From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, and a welter of post- prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? And given the entanglement between criticism and teaching, which are the theories that seem to define the work we do (and want to do) here at Williams? This course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, Butler, and Said. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Class Format: This class will have a hybrid format: on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.
Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper
Prerequisites: at least one previous literature or theory course
Enrollment Limit: 12
Enrollment Preferences: Comparative Literature majors
ENGL 371  (S)  The Brothers Karamazov
Cross-listings:  COMP 331  ENGL 371  RUSS 331
Secondary Cross-listing

Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

Requirements/Evaluation:  completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Prerequisites:  at least one 200-level literature class
Enrollment Limit:  10
Enrollment Preferences:  students majoring or considering a major in Russian, Comparative Literature, or English
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option

Attributes:  AMST Critical and Cultural Theory Electives  ENGL Criticism Courses
Not offered current academic year

ENGL 372  (F)  Documentary Poetry

One of the most vibrant trends in contemporary writing, documentary poetry draws on various kinds of source materials in the creation of innovative forms. This course will be a joint adventure in the reception and production of such projects, and is designed for anyone interested in the intersections of archival research and creative writing. Part of our work will be to historicize and theorize this mode of literary making, which emerges out of Modernist experiments in polyvocality, collage, and what Ezra Pound termed the "poem including history." We will begin the semester by looking at Muriel Rukeyser's 1938 poetic sequence, "The Book of the Dead," which exposes the complicity of Union Carbide in the silicosis contracted by the miners who dug the Hawk's Nest Tunnel in Gauley Bridge, West Virginia. Rukeyser wrote of her desire for a "poetry [that] can extend the document"; our subsequent readings in this course will look to a number of contemporary book-length projects that do just that. Our documentary models--by such writers as Heimrad Bäcker, Anne Carson, Layli Long Soldier, Don Mee Choi, M. NourBe Philip, Mark Nowak, and Claudia Rankine--treat a wide range of subjects, yet all share both an investigative approach and a commitment to thinking about the way individual lives are shaped by larger social and historical structures. Generically, these works make use of the strategies of poetry, but also frequently incorporate essay, narrative, and image to create distinctly mixed forms. Students likewise will choose topics to investigate over the term, conducting original archival research and thinking inductively through the material toward a final project that will be shared with the public on our course website.

Class Format:  While this class will be taught remotely, it promises to be a space of intimate engagement and creative growth. We will prioritize synchronous learning, whether online or perhaps in person, outside, while the weather is warm. Each week, we will read and discuss one of the assigned texts; throughout the semester, you'll also be working on your evolving projects, which we will workshop in small groups and in individual conferences.
Requirements/Evaluation: This class asks students to engage deeply with the assigned books, to do significant original research on a topic of their choosing, and to work creatively to bring that research to life. Frequent short writing assignments will assure students' understanding of the readings, as well as help them to pace themselves in the making of their own documentary projects. The semester will culminate with the workshopping, revision, and publishing of students' final projects.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

ENGL 373 (F) Troubled Spirits

"Trouble" and "spirit" are both words with various and contrasting meanings and surprising overlaps. To be troubled is one thing, to be in trouble can mean several quite different things. Spirit began as breath, yet it transcended breathing. Hoping to soothe and grasp the troubled spirits of their own moment, writers and shamans often seek to conjure up spirits from the past. Some wish to exorcise those spirits, others to be haunted by them. This course will examine the manifestations of troubled spirits in works by American writers, especially African and Native Americans and white Southerners. The authors will include Edgar Allan Poe, William Faulkner, Toni Morrison, Leslie Marmon Silko, N. Scott Momaday, H. P. Lovecraft, Joy Harjo, Alice Walker, Toni Cade Bambara, and Randall Keenan.

Requirements/Evaluation: two or three short papers and a longer final paper of about fifteen pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 374 (S) Mysticism: Vision, Writing, History (WS)

Cross-listings: REL 374  COMP 352  ENGL 374

Primary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 375  (F)  Black Masculinities  (DPE)  

Cross-listings:  AMST 350  ENGL 375  AFR 331  WGSS 318  

Secondary Cross-listing  

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men’s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.  

Requirements/Evaluation:  students will be responsible for 2 short papers and a final project  

Prerequisites:  none

ENGL 376  (F)  Landscapes in American Literature  

Cross-listings:  ENGL 376  STS 377  AMST 376  

Primary Cross-listing  

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements,
cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

**Requirements/Evaluation:** discussion participation; five brief response papers (~2 pages); a mid-semester essay (~5 pages); a final essay (12- to 15-pages)

**Prerequisites:** none

**ENGL 377 (F) Legacies of the Gothic Novel: Feminism and Horror in the Transatlantic World** (DPE)

**Cross-listings:** WGSS 377 ENGL 377 COMP 377

**Primary Cross-listing**

Much maligned as a popular or "low" genre at its inception in the late eighteenth century, the gothic form has persisted in its popularity as well as crossed into "higher" forms of modernism, postmodernism, and postcolonialism. In this course, we will read key texts in the gothic mode-Frankenstein, Jane Eyre, and Wuthering Heights among others-and follow the ways in which they are revisited and rewritten by contemporary American and Caribbean writers, filmmakers, and artists. Particularly, we will examine how these texts subvert the realist leanings of Anglo-American narrative fiction and its assumptions of enlightenment rationalism by way of two main processes: narrative hypertrophy and feminist revisions of horror. The class will take up select contemporary criticism on the gothic and horror in literature, film, and art. This course will be of interest to students curious about feminism, postcolonialism, cultural criticism, horror, and comparative literature.

**Requirements/Evaluation:** presentation, paper plus revision, final research project

**Prerequisites:** one literature or related course

**Enrollment Limit:** 25

**Enrollment Preferences:** any student with relevant coursework in ENGL, COMP, or WGSS

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 379 (S) Writing Art

Cross-listings: ENGL 379 ARTH 379

Primary Cross-listing

This course is conceived primarily as an experiential adventure in creative forms of art writing. We'll read several recent examples of such work (from writers including John Ashbery, Roland Barthes, John Berger, Teju Cole, Jorie Graham, Robin Coste Lewis, Eileen Myles, Ali Smith, Roberto Tejada, and John Yau) to get a sense of the range of approaches, from the ekphrastic poem to the essay to the novel, alive today; and we will spend considerable time in local museums, engaging intimately with works of art through various writing prompts, as you create your own creative responses to visual art. Along the way, we will work to historicize and theorize the relation between the verbal and visual arts, and to ask what looking at art brings to creative writing, as well as the ways creative writing might extend or alter the work of art history.

Class Format: This will be a hybrid course. We will divide our time between seminar meetings, where we will discuss published texts; museum visits, where you'll engage directly with visual art; and small group meetings, where you'll get feedback on your evolving work.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and quality of the work, as evidenced by a final portfolio of revised writing.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: Undergraduate majors in English or Art and graduate students in Art.

ENGL 380 (S) The Art of Modern Crisis

The first half of the twentieth century was marked by extraordinary social and political upheaval. The same era witnessed a feverishly creative revolution in the nature and the strategies of artistic representation. In this course we will examine what these two kinds of crisis have to do with one another: how a wide range of startling innovations in literary and cinematic art may be seen as responses to the particular pressures of the historical
crises they represent. Focusing on instances from Britain, Europe, America, India, and/or Africa, we will study such diverse historical crises as the wave of anarchist terrorism around the turn of the century; the Bolshevik revolution; the woman's suffrage movement; World Wars I and II; the Indian independence movement led by Gandhi; and the Cold War. Novels and films will be studied for their distinctive, often dazzling aesthetic strategies for representing such crises, and will be chosen from works by such authors as Joseph Conrad, Andrei Bely, Sergei Eisenstein, Ford Madox Ford, Virginia Woolf, Jaroslav Hasek, Mulk Raj Anand, Elizabeth Bowen, Joseph Heller, and Stanley Kubrick.

Requirements/Evaluation: active participation in class discussions, two 7-page papers, and a final exam

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 20

ENGL 382 (F) Advanced Workshop in Poetry

As an advanced poetry workshop and reading seminar, this class assumes that its members are already practicing poets with a grounding in the foundational techniques of poetry-writing. We will work in a spirit of shared experiment, pushing our inquiries into this art form further and developing a community of writers engaged in collaborations on and off the page. Readings and assignments will investigate different impulses--formal, textural, tonal, thematic—in poetry across time. I will ask you to inhabit, query, stretch, and even resist these impulses as you develop your own poems. My hope is that through sustained interaction and collaboration with each other, your writing will undergo a variety of productive evolutions.

Class Format: This workshop will include weekly readings and writing assignments, frequent improvisations and collaborations, and the attendance of several arts events.
Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

Prerequisites: ENGL 281 or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Students who have preregistered; all interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

ENGL 385 (S) Advanced Fiction Workshop: Form and Technique

A course for students with experience writing fiction and an understanding of the basics of plot, character, setting, and scene. Through close study of stories in both traditional and unusual forms, we'll examine how a story's significant elements are chosen, ordered, and arranged; how the story is shaped; how, by whom, and to what purpose it's told. Students will write new stories, employing the forms and techniques studied, and discuss them in
ENGL 386  (S)  Fiction of Beckett and Sebald

Cross-listings:  ENGL 386  COMP 386

Primary Cross-listing

This seminar explores the work of two of the most original and influential fiction-writers of the last half of the 20th century, Samuel Beckett and W. G. Sebald. The work of both writers was profoundly influenced by World War II and the Holocaust, and their fiction centers on issues of loss and memory, of decay (of bodies, things, cultures, traditions), of reason and imagination as fragile means of enduring privation. Yet material so sobering and often bleak has rarely been rendered so absorbingly, or with such unorthodox forms of beauty. Their methods for reinventing fiction differ. Beckett increasingly strips his fiction of details of time, place, and even event, and ultimately struggles to free his speaking voice from the burdens of narration itself, the better to focus attention on the simple but logically rigorous, brilliant, often comic effects of his spare language. Sebald, who sometimes called his novels "documentary fiction," fashions a blend of recollection, fiction, geo-cultural history, and dream-like meditation, focused on the decline of European civilizations; his more chromatic prose, marked by obliquity, melancholy, and dry wit, is filled with curious facts and haunting anecdotes. We will read some of Beckett's short fiction and his great trilogy, Molloy, Malone Dies, and The Unnamable; Sebald's major works of fiction, Vertigo, The Emigrants, The Rings of Saturn, and Austerlitz; and a few short stories and novellas by precursors or successors such as Kafka, Borges, and Thomas Bernhard.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

ENGL 387  (F)  Catastrophe/Apocalypse: The Movie

The film industry has always appreciated the visual and dramatic possibilities of catastrophe, and over the last few decades the apocalyptic and post-apocalyptic sensibility appears everywhere in our mass culture, such that being plugged into the zeitgeist might necessarily entail a familiarity with the emerging tropes and assumptions of this subgenre. This course will consider the ways in which such films model for us those moments when our expectations and/or actions collide with the devastating and unforeseeable realities of our physical world and political situation. How do we measure loss when loss occurs at the upper end of the human scale? How do we consider collectively, in either secular or metaphysical terms, the issue of our own complicity in--if not responsibility for--disaster? Films to be studied will likely include W.S. Van Dyke's San Francisco, Steven Spielberg's Schindler's List, Roman Polanski's The Pianist, George Romero's Night of the Living Dead, Ridley Scott's Blade Runner, Edgar Wright's Shaun of the Dead, Michael Heneke's Time of the Wolf, Danny Boyle's 28 Days Later, Alfonso Cuarón's Children of Men, Bruce McDonald's Pontypool.
ENGL 389  (F)  Fiction of Virginia Woolf

Cross-listings: ENGL 389  WGSS 389

Primary Cross-listing

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: none
Enrollment Preferences: English majors, WGSS majors, seniors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option

ENGL 390  (S)  Robert Frost and Seamus Heaney

This seminar closely examines the achievement of two of the most influential poets of the last hundred years: America's Robert Frost (1874-1963), and Seamus Heaney (1939-2013)--the Nobel laureate widely acknowledged as the greatest Irish poet since Yeats. They have garnered high praise from elite literary critics, and also captured the imaginations of a broad reading public. They write in an idiom that is deeply rooted in the ordinary vernacular speech of their respective countries, but rises above it into a universal language that transcends place and time. Their images first focus our gaze on the natural world we can see all around us, but then subtly shift our attention to what can't be readily observed or reliably known. Their poems can initially appear simple or self-evident in their meanings, but then quietly double-back on us with unexpected forms of mystery and complexity. To get a comprehensive sense of the arc of their careers, we will read most all of their poems, with each class discussion focusing on a few particularly important texts. We will also read some of their essays and lectures on the art and purpose of poetry. Where appropriate, we will attend to the biographical, cultural, and (especially with Heaney) political circumstances that shaped their opportunities as artists.

Class Format: Remotely-taught course
Requirements/Evaluation: Midterm and final papers (15-20 pages in total)
Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam,
or permission of the instructor.

Enrollment Limit: 14

Enrollment Preferences: English majors, but non-majors with a strong interest in poetry are also most welcome.

**ENGL 391 (S) Democratic Vistas**

Cross-listings: ENGL 391 AFR 386

Secondary Cross-listing

This seminar will focus on the ways in which texts create nuanced representations of democratic ideals and practices as well as, of course, representations of the failures of democratic ideals and practices. Our goal will be to explore how literature encourages readers to think about democracy, and what impact that can have on our lives as readers and citizens. To this end, we will study work across five genres—poetry, fiction, non-fiction, photography, and film—to arrange and enhance our sense of how plot, structure, figuration, and allusion occupy themselves with the challenge of the Democratic Vista: which is to say with visions of what democracy is, has been, and has the potential be. Among the texts and authors likely to be studied are Robert Hayden, Ralph Ellison, Toni Morrison, Don DeLillo, Jamaica Kincaid, Ishion Hutchinson, Natalie Diaz, Octavia Butler, Colson Whitehead, Morgan Parker, Nana Kwame Adjei-Brenyahm Teju Cole, and contemporary films such as Ryan Coogler’s BLACK PANTHER and Boots Riley’s SORRY TO BOTHER YOU.

Requirements/Evaluation: attendance and participation, two short essays, and a 12- to 15-page final paper; additional requirements will include film screenings outside of class, interactive (e.g., Skype, etc.) author visits inside of class, and campus talks germane to the seminar

Prerequisites: none, open to all students

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators and English majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

**ENGL 392 (S) Acción Poética: Poetic Art’s Critiques of an Americas of Conquest (DPE)**

Can poems be thought of as social acts, or as a kind of “acción poética” (poetic action)? What would it mean, in other words, to resituate our understanding of poetry within the realms of speech act theory, performance studies, and the local and global histories of social conflict in the Americas? In this course, we will examine the long history of poetic form in the Americas to trace the emergence of separate, but related poetic experimentalisms, particularly in the literary traditions of modern Latin American and U.S.-Latinx poetry and performance art. Throughout the course, we’ll ask what it means to write with and without the body in mind. We’ll attend to the embodied forms of poetic expression that emerge prior to the twentieth century while investigating poetry’s articulations of geo-social space in the Americas. Our course will then focus on the vanguard poetries of twentieth-century Latin America (Neruda, Mistral, Vallejo, Zurita, et al.) and on the transcultural modernities of U.S.-Latinx poetry and performance. Through our explorations of poetic form’s encounters with a social history of the Americas, we’ll receive a glimpse of what poetry looks like in a world of spiritual, political, ecological, and humanitarian crises. Readings will likely include works by: Gabriela Mistral, Pablo Neruda, Vicente Huidobro, César Vallejo, Raúl Zurita, Cecilia Vicuña, Miguel Algarín, Sandra María Esteves, Willie Perdomo, Julia de Burgos, Emmy Pérez, Gloria Anzaldúa, Lorna Dee Cervantes, Sandra Cisneros, Francisco X. Alarcón, Guillermo Gómez-Peña, Coco Fusco, Laura Aguilar, Asco, Sor Juana Inés de la Cruz, Phillis Wheatley, José Martí, Rubén Darío, Walt Whitman, Emily Dickinson, and more. Although useful, reading knowledge of Spanish is not expected or required; Spanish-language texts will be provided in English translation alongside the original.

Requirements/Evaluation: Active participation in in-class and online discussion, two close-reading papers (5 pages each), contributions to course blog, and a final 8-10 page research paper.
Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 25

Enrollment Preferences: English majors, but non-majors with a strong interest in the subject are welcome.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout U.S. and Latin American history. The course emphasizes the experiences of colonization and U.S. imperialism in Latin America and those of social conflict in border regions throughout the U.S. Moreover, it invites students to ask what it means to write poetry from the standpoint of various subject positions (as determined by race, class, gender/sexuality, etc.).

ENGL 393  (F)  Staging Identities

Cross-listings: THEA 393 ENGL 393

Secondary Cross-listing

The construction of selfhood is always to some extent a performative act--as Shakespeare's Jacques says, "All the world's a stage / And all the men and women merely players,["] That performance is inherently dual, since constituted both for the audience of the wider social world, and for the self who seeks to act. Drama as a genre, with its constant negotiation of the competing claims of illusion and the operations of reality, is invariably interested in the exploration of social identity, in the tensions between public and private selfhood, and in the functions of 'performance'. In this course we will examine theatre's response to the challenge of self-fashioning in the modern era, and consider the wider ontological status of performance as a category within the context of twentieth century drama and theatrical staging. Readings will include Shakespeare's Hamlet and plays by Chekhov, Pirandello, Churchill, Shepard, Lori-Parks, Beckett, Walcott, Pinter and others, along with selected criticism, theory, and psychoanalytical writings.

Class Format: Our class meetings will be conducted remotely, but with the seminar group regularly broken into small discussion sections. I will consider moving to in-person teaching for the discussion sections, depending on conditions on campus as the semester progresses.

Requirements/Evaluation: Two papers totaling about 12 pages, regular posting on discussion boards, and active participation in discussion.

Prerequisites: A THEA course, a 100-level ENGL course, or a score of 5 on the AP English Literature exam.

Enrollment Limit: 14

Enrollment Preferences: Theatre and English majors or prospective majors.

ENGL 394  (S)  The Nature of Nature

Cross-listings: ENVI 390 ENGL 394

Primary Cross-listing

"Nature" is one of the commonest words in English. And yet what does it signify? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying attention to the difficulty of narrating processes that are often too big, too small, too quick or too slow for direct human apprehension. We'll also explore the ways popular nature
writing mingles scientific reporting with implicit judgments about human identity, morality, and social organization. Writers studied will include Elizabeth Kolbert, N. Scott Momaday and Charles Darwin. We'll also consider the technological mediations of nature in documentaries by David Attenborough and Lynette Wallworth, among others.

**Requirements/Evaluation:** Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page online essay incorporating audiovisual materials. Active participation in class. Note that this course will be offered exclusively online.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 16

**ENGL 395 (F) Signs of History**

**Cross-listings:** HIST 395 ENGL 395 COMP 395

**Primary Cross-listing**

What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

**Requirements/Evaluation:** two papers, one 6 and one 10-12 pages in length, and general participation

**ENGL 396 Theater and Voyeurism**

Seventeenth-century philosophy was ambivalent about the senses. Around the same time as Descartes was wondering whether everything he had ever seen, heard, and felt might have been an illusion produced by an evil deceiver, Francis Bacon was placing the close observation of nature at the center of a new scientific practice. Do the senses shore up the subject by distancing her from objects and from others and by providing her with insight about them? Or do the senses make her vulnerable to a world that is endlessly and often violently imposing itself on her? We will consider this problem in cultural and intellectual history through the case of the theater, with a special focus on tragedy. Ancient Greek tragedy made the mere fact of seeing the basis of an epistemological difference between the audience (whose looking is a privileged form of knowing) and the protagonist (who is paradigmatically blind), and this difference can be understood as a way of reflecting on the conditions of the theatrical medium itself: the audience sees the character, but the character does not see the audience. Early modern tragedy drew on the Greek tradition of dramatic irony, but wondered
whether looking was as straightforward as it looked, making voyeurism a two-way street: one form of seeing what others don't involves being forced to see something unbearable, and early modern theater took a special interest in obscenity, which Greek theater tended to avoid or marginalize. We will consider works by Homer, Sophocles, Euripides, Aristotle, Ovid, Seneca, Marlowe, Spenser, Shakespeare, Vermeer, Jonas Barish, Laura Mulvey, Jacques Rancière, and Michael Fried.

Requirements/Evaluation: One 7-page midterm paper, one 12-page final paper, thoughtful participation in class discussions

ENGL 399 (F) Poetry & Performance

Though poetry was an oral art form before it was anything else, its contemporary relationship to performance is varied and complex. This course explores poetry writing for/as performance, including works that might be categorized as "spoken word poetry" as well as those that sit far outside of that designation. Course readings will include contemporary and canonical writers, from Walt Whitman, to Sonia Sanchez, to Sarah Kay. We will also study works that blur the genres of poetry, performance art, and theater. Students will engage in writing and performance activities in class, create collaboratively, and exchange feedback on each other's work. The semester will culminate in a final performance open to the campus community. Students must have taken at least one course on the practice of creative writing, acting, or another performance discipline.

Class Format: Combined seminar/studio

Requirements/Evaluation: In addition to in-class participation, students will be graded based on thorough completion of readings, creative exercises,
Prerequisites: ENGL 140, 281, or 288. Other courses on the practice of creative writing and/or performance (e.g., THEA 101) will also be considered.

Enrollment Limit: 12

Enrollment Preferences: Pre-registered students. Should the course over-enroll, selection will be made based on a short application including work samples.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

ENGL 402  (S)  The Historical Novel

Cross-listings: ENGL 402  COMP 406

Primary Cross-listing

Setting a novel in a prior time period risks estranging a reader, yet the genre has roused deep-rooted interest, intense critical debate, and aesthetic daring. In this course, we will explore the complex and layered uses of a historical past in literary works of the seventeenth through twenty-first centuries, by way of novels by Madame de Lafayette, Scott, M. Shelley, Dickens, Eliot, Ford, Woolf, Morrison, Sebald, and Roy. Exploring the uses of gothic and sensational effects, dystopian and utopian possibilities, and fractured time, we will consider the aesthetic and political experiments historical novels have spawned. We will do so in context of the sustained critical engagement with the genre by such thinkers as Lukacs, Benjamin, Adorno, Jameson, McKeon and Moretti.

Requirements/Evaluation: class discussion and a 20-page final paper

Prerequisites: a 100-level English course and a 300-level English course or permission of the instructor

ENGL 407  (F)  Literature, Justice and Community  (DPE)

Cross-listings: ENGL 407  COMP 407

Primary Cross-listing

Can we imagine possibilities of justice not dictated by already determined norms? What would a community founded on such a conception of justice look like? Can we imagine a version of community not founded on exclusion? What would the members of such a community look like—what version of subjectivity would that community imply? And might literature in particular have something to say about the possibilities for such versions of community, selfhood, and justice? This course will look at recent, theoretically-oriented writing on justice and community, with an emphasis on the work of Hannah Arendt, Jacques Derrida, Jean-Luc Nancy and Giorgio Agamben. We will place this challenging and exciting philosophical work in relation to fiction from Euripides to Kafka, Farah and Kushner, films (Almodovar, Farhadi), photography (Silva, Badlands) and worldly examples of competing claims to justice. The course pursues the aims of the DPE initiative by engaging works in which cultural difference and power differentials reveal the limits of universalizing accounts of law and justice, works such as Euripides’ Bacchae, Nuruddin Farah’s Maps, Louise Erdrich’s poetry,
and Farhadi’s *A Separation*. But the course will equally suggest that such contingency is inherent in the concept of justice as such, insofar as the problem of justice is bound up with forms of constituting indebtedness that define humans as communal beings. In that sense, contingency, and differentials of power mark justice even in its most familiar instances—intimately and close to home, as it were.

**Class Format:** discussion

**Requirements/Evaluation:** one 5-page paper, and a final 15-page paper

**ENGL 415 (S) Theorizing Aesthetic Outrage**

Outrage has become an increasingly charged and prominent feature of public life in our current political climate. Yet it is surprisingly difficult to analyze and understand, particularly when we confront public forms of outrage, in which collective behavior may shape, complicate, and change its nature. Why are accounts of the reasons for one’s outrage so often inadequate to its vehemence? How are we to understand the strange, unconscious mimicry into which the antagonists in public outrage are so often drawn? What are the sources of the pleasure that shadows outrage? In this seminar we will attempt to theorize public outrage, drawing on a range of theoretical models from several disciplines: aesthetics, cultural and political theory, psychoanalysis, gender and sexuality studies, anthropology and sociology. We will be particularly concerned with aesthetic outrage—riots, censorship, and trials in response to literary and cinematic works, particularly where such outrage has been well documented—and will explore the possibility that such outrage is discernibly different from more straightforward instances of political outrage, such as bread riots or Black Lives Matter activism. We will also analyze the basic nature of outrage in the context of affect studies. Theoretical work by such writers as Sedgwick, Berlant, Foucault, Freud, Weber, Lévi-Strauss, Girard, Arendt, Bakhtin, Butler, Douglas, and Zizek; literary and cinematic works by such authors as Sade, Synge, O’Casey, Jarry, and Eisenstein.

**Class Format:** tutorial format once or twice during the semester to discuss writing

**Requirements/Evaluation:** active, regular class participation, a final paper of about 20 pages, written in stages (some discussed in tutorial format)

**Prerequisites:** a 300-level ENGL course or permission of the instructor

**ENGL 416 (S) Postcolonial Theory and the World Literature Debates**

Cross-listings: ENGL 416 COMP 416

Primary Cross-listing
When publishers, scholars, reviewers, and critics talk about the massive, beautiful, prismatic literary and cultural traditions outside of Western culture, they sometimes refer to them by their geographical provenance—African literature, say, or Sumerian art—or perhaps by their historical moment—Ottoman architecture, or postcolonial Indonesian poetry—but more and more, the catch-all category of World Literature has begun to hold sway in influential places, and is changing the shape of how we think, learn, and write about non-Western aesthetics, as well as how we participate in our "own" cultures in all their complexity. If we can imagine a kind of literature that truly goes under the headings of "World Literature," or "Global Literature," what can we possibly exclude? Doesn't all literature belong to the world? What might we gain by using this term, and what might we lose? What histories are attached to the various names and classifications we assign to culture and how does cultural "othering" uphold or resist forms of economic, political, and military dominance? In this advanced seminar, we will work carefully through the history and influential writings of postcolonialism as a particular challenge to hegemonic forms of representation, cultural production, and naming, starting with a close consideration of the writings of the movement's founders and key commentators, including Aimé Césaire, Frantz Fanon, Edward Said, Gayatri Spivak, Robert J.C. Young, Gauri Viswanathan, Partha Chatterjee, and Homi Bhabha, and consider their influence on later postcolonial writers and critics around the world. In the second half of the semester, we will turn our attention to the historical underpinnings and current firestorm of debates about World Literature, beginning with Goethe, Marx, Adorno, Frederic Jameson, Franco Moretti, and Pascale Casanova and shifting finally to critics of the ideas of World and Global Literature.

Requirements/Evaluation: two to three papers

Prerequisites: none

Difference, Power, and Equity Notes: This course will consider literary canonicity and postcolonial theory's challenges through an examination of genre, criticism, institutional power, material conditions of publication, and postcolonial culture's relationship to the legacies of colonialism. We will interrogate power and the writing of history, material and cultural resource extraction, and narrative theory against developmental discourse.

Not offered current academic year

ENGL 418 (S) Modernisms and the Archive

Cross-listings: AMST 418 ENGL 418

Primary Cross-listing

This course focuses on American Modernist writers who transformed American literature in the first half of the twentieth century. We explore how these writers—including W.E.B. DuBois, Sterling Brown, Gertrude Stein, José Garcia Villa, Marianne Moore, Nella Larsen, Zora Neale Hurston, Wallace Stevens, Langston Hughes, HD, and others—confronted the experience of modernity in new art that responded to dramatic, often cataclysmic change. We define key markers of the modernist aesthetic, including its formal experimentation and self-reflexivity; and study the sweeping political, social, and cultural events and issues that influenced these writers, including two world wars, rapid industrialization, mass migrations, women's suffrage, Jim Crow racism, and a pandemic. We also look specifically at how the archives of Modernist writers—collected in institutions across the world—have shaped the discourse and narrative arc of literary history. Central to this archive-based discussion, students will have the opportunity to take a deep dive into the Sterling Brown archive here on the Williams College campus. Recently acquired by Williams College Library Special Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century. Our class is timed for the opening of the Sterling Brown archive in 2022 and the events and speakers planned on campus for that year, exactly one hundred years after Brown graduated from Williams College in 1922. Because of Brown's close connection with Williams, we will look particularly at how a poet's college experience shapes a poetic career.

Requirements/Evaluation: Short papers, writer's notebook, archival presentations, final paper (12-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

engl 450 (f) melville, mark twain, & ellison

as an epigraph to his novel, invisible man, ralph ellison selects a quotation from herman melville's story, "benito cereno." in the prelogue to invisible man, ellison invokes a sermon that appears briefly in the opening chapter of moby-dick. in his essays on comedy and american culture, ellison comments trenchantly on adventures of huckleberry finn. melville and mark twain were, in many obvious ways, as different as two writers can be. nonetheless, they also have many surprising similarities, and it is not difficult to understand why both are so important to ellison. this course will examine the novels, stories, and essays of these three writers, with particular attention to the themes that they have in common and to the traits that make each of them distinctive. race, slavery, epistemology, and the nature of american democracy are among those themes.

prerequisites:
a 100-level engl course, or a score of 5 on the ap english literature exam, or a score of 6 or 7 on the higher level ib english exam

enrollment limit: 15

enrollment preferences: english majors
ENGL 456 (F) Topics in Critical Theory: Hegel and the Dialectic
Cross-listings: COMP 456 ENGL 456
Primary Cross-listing
This course is for students of any major who wish to continue studying critical, cultural, or literary theory. Students will give close attention to a single theorist or philosophical school or perhaps to a single question as taken up by several theorists. Prior coursework in critical theory or continental philosophy, no matter the department, is strongly recommended. The subject of this semester's seminar is the dialectic. "Dialectical" is one of those collegiate words, the kind of word that some people use a lot without knowing for sure what it means. That said, there are a couple of different ways of making sense of dialectics. The word's nearest synonym is "dialogue." Broadly, then, "dialectics" is a name for any philosophy that incorporates itself the back-and-forth of conversation. Modern dialectics, meanwhile, sets out from two ideas: first, that it is impossible to think about anything in isolation, that we understand all things via relation and contradistinction, that we couldn't call any person "female" if we weren't also compelled to call some people "male"; and second, that all such conceptual pairs (male/female, black/white, east/west) are less settled than they look. You can't not divide the world into oppositions, and all such oppositions will collapse. This is an idea that, systematically pursued, can change the way we think about language, ethics, politics, literature, and art. We will read key texts from major dialectical thinkers: Hegel, Marx, Adorno, but mostly Hegel.

Requirements/Evaluation: seminar paper of 25 pages; informal weekly writing; class participation
Prerequisites: prior coursework in critical theory or continental philosophy is recommended but not necessary, no prior coursework in English is required
Enrollment Limit: 15
Enrollment Preferences: seniors with background in critical theory
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 456 (D1) ENGL 456 (D1)
Attributes: ENGL Criticism Courses PHIL Related Courses
Not offered current academic year

ENGL 483 (S) Representing History
Cross-listings: COMP 483 ENGL 483
Primary Cross-listing
Moments of political turmoil expose the highly charged ways in which a culture structures itself around a narrative past. In this course, we will read literary and cinematic works that invoke such moments of upheaval—the French and Russian Revolutions as well as those of 1848, the rise of fascism and the Great Depression of the 1930s, the battle for Algerian independence, the AIDS crisis, among others—in order to explore those fraught narratives of the past. We will consider such issues as the rise of the historical novel, the aesthetics of fascism and of democracy under pressure, fantasies of decolonization, representational clashes of culture, forms of affective and sexual disorientation, and the uses of melancholy in representing historical loss. Readings will be drawn from literary works by Gay, Edgeworth, Scott, Shelley, Balzac, Eliot, Conrad, Kafka, Babel, Mann, Borges, Stoppard, Kushner, Morrison, Pamuk, Bolano, and Philip, and theoretical essays by Kant, Burke, Carlyle, Marx, Benjamin, Adorno, Foucault, de Certeau, Jameson, Lefort and Ahmed. Films will include such works as Eisenstein's October, Reifenstahl's The Blue Light, Wellman's Nothing Sacred and Pontecorvo's The Battle of Algiers.

Class Format: discussion
Requirements/Evaluation: two shorter or one longer paper/s, approximately 20 pages
Prerequisites: a 300-level English course or permission of the instructor
ENGL 493  (F)  Honors Colloquium: English  (WS)
A colloquium for students pursuing critical theses and critical specializations. Students will present and critique their work in progress, and discuss issues particular to researching and structuring a long analytical thesis. We will also discuss the work of a variety of recent critics representing a range of methods of literary study. Satisfactory completion of the course will be required for students to continue on in the honors program. The course will meet sometimes as a full seminar and other times in tutorial-style small groups.

Requirements/Evaluation: participation and individual progress on the thesis project, which will be determined in consultation with each student's honors advisor

Prerequisites: admission to the department Honors program

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: Students will write a 20 page thesis chapter in stages and over multiple drafts. Students will receive from the instructor timely comments on their writing, with suggestions for improvement.

Fall 2021
HON Section: 01  W 1:10 pm - 3:50 pm  Emily  Vasiliauskas

ENGL 494  (S)  Honors Thesis: English
English honors thesis. Required of all senior English majors pursuing critical theses and critical specialization.

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 495  (F)  Fiction Thesis Seminar
A hybrid colloquium /workshop/ seminar for those seniors undertaking an Honors Thesis in fiction writing, with the aim of enabling both the extensive independent work and individual feedback at the heart of the project as well as a greater sense of community and shared learning. Half the week will be devoted to group sessions involving workshopped student work and the close reading of published work and meetings with outside visitors, and the other half devoted to individual tutorial sessions.

Requirements/Evaluation: Students will produce theses of at least 50 pages in length.

Prerequisites: English 283, 384, 385, or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Senior English majors, followed by seniors from other departments.
Expected Class Size: 6-8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Attributes: ENGL Creative Writing Courses

Fall 2021
SEM Section: 01  TF 1:10 pm - 2:25 pm  James R. Shepard

ENGL 497 (S) Honors Independent Study: English
English honors thesis. Required of all senior English majors pursuing departmental honors in creative writing.
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Spring 2022
HON Section: 01  TBA  Bernard J. Rhie

Winter Study

ENGL 30 (W) Honors Project: English
Required during Winter Study of all seniors admitted to candidacy for honors via the specialization route.
Class Format: honors project
Grading: pass/fail only
Not offered current academic year

ENGL 31 (W) Senior Thesis: English
Required during Winter Study of all seniors admitted to candidacy for honors via the thesis route.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

ENGL 42 (W) Designer Genes Intensive
In his book *High Noon: 20 Global Problems, 20 Years to Solve Them*, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.' " Collins and his associates couldn’t have picked a more resonant text from which to quote than Shakespeare’s play, *The Tempest*, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with—or exploit—the revolution in contemporary genetics. These texts—many of which also provide a model of exceptional writing—will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.
Class Format: This all on-line class will feature guest speakers, regular time for writing with plenty of feedback during the drafting process, and assignments that take advantage of our digital environment.
Requirements/Evaluation: Several short, analytical papers; discussion posts
Prerequisites: permission of a dean
Enrollment Limit: 12
Enrollment Preferences: students who need to make up a deficiency
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: This course is designed to count for both full semester, Winter Study, and WS credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.

ENGL 99  (W) Independent Study: English
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
MEMBERS OF THE CENTER FOR ENVIRONMENTAL STUDIES (2020-21)

Alex Apotsos, Visiting Lecturer in Geosciences

Henry W. Art, Professor of Biology and Environmental Studies, Emeritus

Sonya Auer, Visiting Assistant Professor of Biology

Lois M. Banta, Professor of Biology

Ron D. Bassar, Assistant Professor of Biology

Ben Benedict, Lecturer in Art

Julie C. Blackwood, Assistant Professor of Mathematics

Roger E. Bolton, Professor of Economics, Emeritus

Ralph Bradburd, David A. Wells Professor of Political Economy

Alice C. Bradley, Assistant Professor of Geosciences

Nicole G. Brown, Assistant Professor of Classics

Cory E. Campbell, instructional Technology Specialist

Anthony Carrasquillo, Assistant Professor of Chemistry

Gregory Casey, Assistant Professor of Economics

David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Phoebe A. Cohen, Associate Professor of Geosciences

Jose E.A. Constantine, Assistant Professor of Geosciences

Mea S. Cook, Associate Professor of Geosciences

David P. Dether, Professor of Geosciences, Emeritus

Joan Edwards, Samuel Fessenden Professor of Biology

Laura Ephraim, Associate Professor of Political Science

Michael Evans, Assistant Director of The Zilkha Center

Jessica M. Fisher, Assistant Professor of English

Antonia Foias, Professor of Anthropology and Sociology

Jennifer L. French, Professor of Spanish
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The major and concentration in Environmental Studies are designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Have an appreciation for the ambiguity and uncertainty inherent in many environmental issues;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, the CES is considered to be the first environmental studies center at a liberal arts college. In addition to the academic program described below, the CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. The CES offers extensive resources including databases, funding for student-organizations and student-initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area only 1.5 miles from campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. The CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other members of CES for advice. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

Advisors for 2020-2021: Ralph Bradburd, Jennifer French, Sarah Gardner, Nick Howe, and Luana Maroja.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major, but must have advance approval in writing from the Chair of Environmental Studies.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven-course major. The major has a core of seven courses, with varying amounts of choice for the various core course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 302, and one 400-level Senior Seminar. ENVI 101 – Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year under special circumstances), ENVI 302 – Environmental Planning Workshop: Community-Based Experience (offered every fall), one 400-level senior seminar. The remaining core requirements are comprised of three foundational 200-level courses, one from each of three lists of courses (see below). These lists represent the three main branches of the environmental curriculum: Environmental humanities, environmental social science/policy, and environmental science. Students choose, in consultation with their major advisor, the course they will take from each of the three lists. Building on this seven-course foundation, Environmental Studies majors devise an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, the built environment, environmental chemistry, sustainable food and agriculture, environmental ethics, etc. Students are responsible for designing their own major cluster in consultation with a faculty advisor in the spring semester of their sophomore year. One of these four electives in the cluster must be among those
listed by the Program as a research methods course, although students may petition to count another course toward this requirement. The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

Submitting your Proposed Course Cluster and Plan of Study to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The individual proposals will be reviewed by the CES Advisory Committee.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of ECON 251 (Price and Allocation Theory), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/BIOL 203 (Ecology) or ENVI/BIOL 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Chair or Associate Director.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Introductory Required Courses (2 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies
ENVI 102 Introduction to Environmental Science

Foundational Required Courses for all Environmental Studies Majors (3 courses, 1 from each category)

Culture/Humanities Foundational (1 course)

ENVI 217 / AMST 216Landscape, Place and Power
Taught by: Nicolas Howe
Catalog details
ENVI 229 / HIST 264Environmental History
Taught by: Laura Martin
Catalog details
ENVI 244 T / PHIL 244(S)Environmental Ethics
Taught by: Julie Pedroni

Taught by: Brittany Meché
Catalog details

ENVI 307 / PSCI 317(F)Environmental Law
Taught by: David Cassuto
Catalog details

Specialization Cluster (4 courses, including a Living Systems course and a Methods course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental justice, environmental planning and design, environmental literature, environmental chemistry, environmental biology, environmental geosciences, sustainable design, water and energy, sustainable food and agriculture, urban studies, and environmental economics.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Committee, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

Living Systems (1 course)

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed below. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

BIOL 134 / ENVI 134(F)The Tropics: Biology and Social Issues
Taught by: Joan Edwards
Catalog details

BIOL 203 / ENVI 203(F)Ecology
Taught by: Allison Gill
Catalog details

BIOL 220 / ENVI 220(S)Field Botany and Plant Natural History
Taught by: Joan Edwards
Catalog details
Methods (1 course)
This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.

ANSO 205(S)Ways of Knowing
Taught by: Olga Shevchenko
Catalog details

CHEM 364 / ENVI 364(S)Instrumental Methods of Analysis
Taught by: Christopher Goh
Catalog details

ECON 255(F, S)Econometrics
Taught by: David Zimmerman, Owen Ozier, Matthew Gibson
Catalog details

GEOS 214 / ENVI 214(S)Mastering GIS
Taught by: José Constantine
Catalog details

GEOS 255 / ENVI 255(F)Environmental Observation
Taught by: Alice Bradley

GEOS 309 / ENVI 209Modern Climate
Taught by: Alice Bradley
Catalog details

POEC 253(F)Empirical Methods in Political Economy
Taught by: Anand Swamy
Catalog details

STAT 201(F, S)Statistics and Data Analysis
Taught by: Stewart Johnson
Catalog details

STAT 202(F, S)Introduction to Statistical Modeling
Taught by: Shaoyang Ning, Daniel Turek
Catalog details

STAT 346(F, S)Regression Theory and Applications
Taught by: Elizabeth Upton
Catalog details

Experiential Required Course (1 course)
In the junior year, or under special circumstances in the senior year, students will take ENVI 302 Environmental Planning Workshop: Community-Based Experience. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshire region involving urban or rural land use planning and environmental design.

Senior Seminar Required Course (1 course)
In the junior or senior year, students will take one 400-level seminar in Environmental Studies. These seminars will focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY
In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

ENVI 397, 398 Independent Study of Environmental Problems

ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.
HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student summer research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Other departments may also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the first Friday in March. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified before spring break whether or not their proposal has been approved.

Students doing a full-year thesis give a presentation in October to their thesis advisor, second reader, and environmental studies community. Further details on the honors program are available through the Environmental Studies website: https://ces.williams.edu/academic-program/honors/

ENVI 100  (S)  Introduction to Weather and Climate

Cross-listings: GEOS 100  ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 100 (D3) ENVI 100 (D3)

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses  GEOS Group A Electives - Climate + Oceans

Not offered current academic year

ENVI 101  (F)(S)  Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, and more -- as well as their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course,
we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

**Class Format:** Fall 2020: The two sections of the course will be taught entirely online (Howe) or in a hybrid format accommodating both students on campus & those learning remotely (Merleaux). Both sections will be divided into small discussion groups meeting once per week. Some meetings may be scheduled outside of the allotted time block. Course includes a mix of synchronous & asynchronous online work, including video lectures, writing workshops, virtual field trips, reading annotation, and discussion forums.

**Requirements/Evaluation:** participation, in-class exercises, several short writing assignments (varying from 2-5 pages)

**Prerequisites:** none

**Enrollment Limit:** 20/section

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 20/section

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** required course for the Environmental Studies major and concentration

**Distributions:** (D2)

**Attributes:** AMST Space and Place Electives  ENVI Core Courses  EVST Core Courses  GBST Urbanizing World Electives

---

**ENVI 102  (S) Introduction to Environmental Science**

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

**Class Format:** Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

**Requirements/Evaluation:** Weekly short quizzes, three exams, lab assignments, participation

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first- and second-year students, Environmental Studies majors and concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Required course for Environmental Studies major and concentration

**Distributions:** (D3)

**Attributes:** ENVI Core Courses  EVST Core Courses  EXPE Experiential Education Courses

---

**Spring 2022**

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103, ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 103 (D3) ENVI 103 (D3)

Attributes: ENVI Natural World Electives, EXPE Experiential Education Courses, GEOS Group B Electives - Sediments + Life

Not offered current academic year

ENVI 104 (F) Oceanography

Cross-listings: MAST 104, GEOS 104, ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time). All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 104 (D3) GEOS 104 (D3) ENVI 104 (D3)

Attributes: ENVI Natural World Electives, EXPE Experiential Education Courses, GEOS Group A Electives - Climate + Oceans
ENVI 105  (F)  The Co-Evolution of Earth and Life

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 108  (F)  Energy Science and Technology  (QFR)

Cross-listings: ENVI 108  PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20
ENV 110  (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How we have arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENV 134  (F) The Tropics: Biology and Social Issues  (DPE)

Cross-listings: BIOL 134  ENVI 134

Secondary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam
**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Does not count for credit in the Biology major.

**Distributions:** (D3) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIOL 134 (D3) ENVI 134 (D3)

**Difference, Power, and Equity Notes:** This course highlights differences between the tropics and higher latitudes. For each section we focus on difference—different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

**ENVI 201  (S)  The Geoscience of Epidemiology and Public Health  (DPE)**

**Cross-listings:** ENVI 201 GEOS 207

**Secondary Cross-listing**

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials and influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

**Requirements/Evaluation:** Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

**Prerequisites:** No prerequisites

**Enrollment Limit:** 34

**Enrollment Preferences:** Preference to first-years, sophomores, and prospective Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 201 (D3) GEOS 207 (D3)

**Difference, Power, and Equity Notes:** Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

This course combines lectures & discussion with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to help students build skills in data analysis and scientific writing.

Class Format: Six hours per week. Students will view pre-class lecture videos; class meetings will focus on discussion, synthesis, and application of course content.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203 (D3) BIOL 203 (D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

ENVI 204 (F) Colonialism, Capitalism and Climate Crisis

Cross-listings: GBST 233 AFR 233 ENVI 204

Secondary Cross-listing
Evolutionary processes are part of human existence. Our collective understandings of the world, the economic realm and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy. Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. By the end of the course, students will be able to describe various perspectives from structural economics and other traditions including dependency theory, uneven ecological exchange, ecowomanist and black ecological thought, and critical environmental justice to explain the social, ecological, historical and economic conjunctures underpinning climate crisis. Arranged to develop more in-depth analytical, communication and writing skills, the course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis. Finally, we will considering demands for climate debt / reparations from social and environmental movements and decolonial perspectives that advance climate justice. Students will also be able evaluate the political economic responses to the climate crisis.
ENVI 205  (F)  Geomorphology

**Cross-listings:** GEOS 301  ENVI 205

**Secondary Cross-listing**

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

ENVI 206  (S)  Global Environmental Politics

---
This course examines the history and current status of international environmental cooperation and conflict. We will consider the interactions of nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of transnational environmental policy and treaties. We will also examine non-state approaches to global environmental challenges. After reviewing competing explanations for the causes of global environmental problems and diverse disciplinary approaches to studying those issues, we will read case studies covering a range of topics. These include fresh water conflict, fisheries and oceans, climate change, waste and pollution, agriculture, pesticides, population and development, wildlife, forestry, and consumerism. The reading assignments are drawn from the fields of environmental and foreign policy history, political science, international relations, geography, and anthropology in order to develop an interdisciplinary approach to international policy analysis. The written assignments are a series of policy briefs. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: Depending on enrollment, some discussion may be scheduled outside of the class hours, as would be the case in a tutorial.

Requirements/Evaluation: 2-3 short writing assignments based on assigned readings (3 pages each), 2 oral presentations, discussion participation, 2 policy briefing papers based on library research (5 pages each)

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 208  (S)  Saharan Imaginations  (DPE) (WS)

Cross-listings:  ARAB 209  ENVI 208  COMP 234

Secondary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Approached mainly through the prism of adventure and exploitation, the desert is portrayed as a dead space. However, literature and film furnish a unique opportunity to engage critically with the ways Maghrebi and Middle Eastern culture production represents deserts and raises issues of fundamental importance to these societies. This course offers students the opportunity to engage in close readings of novels and film through the theme of the Sahara and Saharan space. Reading through the politics of human mobility and life in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Saharan sub-genre of African and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Deconstructing reductive Saharanisms, students will see the desert for what it is, rather than what it is portrayed to be or stand for.

Class Format: hybrid

Requirements/Evaluation:  active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit:  14

Enrollment Preferences:  Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

Expected Class Size:  14

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 209 (D1)  ENVI 208 (D1)  COMP 234 (D1)

Writing Skills Notes:  Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes:  Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 209  (F)  Modern Climate  (QFR)

Cross-listings:  GEOS 309  ENVI 209

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation:  4 multi-week lab projects and several short quizzes

Prerequisites:  Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit:  30

Enrollment Preferences:  GEOS and ENVI majors

Expected Class Size:  20
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

ENVI 210 (F) Environmentalism in Contemporary Art and Politics, 1960s to Present

Cross-listings: ENVI 210 ARTH 214

Secondary Cross-listing

Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts—including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice. Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.

Requirements/Evaluation: Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)

Prerequisites: None

ENVI 211 (S) Race, Environment, and the Body

Cross-listings: AMST 211 ENVI 211 AFR 211 SOC 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crisis tend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)
Cross-listings: POEC 214 ENVI 212 ECON 214

Secondary Cross-listing
Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: This tutorial will be taught remotely via Zoom meetings. Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week. Individual "office hour meetings" will also occur via Zoom meetings.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper
Prerequisites: ECON 110 or the equivalent, permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
POEC 214 (D2) ENVI 212 (D2) ECON 214 (D2)
Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ENVI 214 (S) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

ENVI 215 (F) Climate Changes

Cross-listings: GEOS 215  ENVI 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 216 (S) Philosophy of Animals

Cross-listings: ENVI 216  PHIL 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: This course is wholly remote and can only be taken synchronously (i.e., students will be expected to attend seminar on zoom during the scheduled time and no recording will be made).

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.

Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

ENVI 217 (F) Landscape, Place and Power

Cross-listings: AMST 216 ENVI 217

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors
**ENVI 219  (F)  Evolution of and on Volcanic Islands  (WS)**

**Cross-listings:** GEOS 220  ENVI 219

**Secondary Cross-listing**
Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** One-hour weekly meetings with tutorial partner and instructor

**Requirements/Evaluation:** five 5-page papers and critiques of partner’s papers

**Prerequisites:** 100-level GEOS course or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors and students with a demonstrated interest in geosciences

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)  (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 222  (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics  (WS)  
Cross-listings: GEOS 221  ENVI 222  LEAD 221  
Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation:  weekly papers (2 - 5 pages in length) and a final oral presentation  
Prerequisites:  none  
Enrollment Limit:  10  
Enrollment Preferences:  sophomores, Geosciences and Environmental Studies juniors and seniors

Writing Skills Notes: You will learn to write in a variety of policy-focused formats
ENVI 224  (F)  The Rise and Fall of Civilizations

Cross-listings:  ANTH 214  ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: Class discussion and debates will complement lecture with powerpoint presentation. In the Fall 2020, the course will have a hybrid format. In person and remote students will attend lectures or class discussions during the regular twice-a-week schedule, with an additional synchronous session for remote students to address questions. If remote students cannot attend additional Q&A session, open office hours will also be available.

Requirements/Evaluation:  midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 19

Grading:  no pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 225  (F)  Sustainable Food & Agriculture

Cross-listings:  BIOL 225  ENVI 225

Secondary Cross-listing

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Requirements/Evaluation:  writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

Prerequisites:  BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences:  open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors

Expected Class Size: 8

Grading:  no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions:  (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 226 (S) Climate Data Analysis

**Cross-listings:** GEOS 227 ENVI 226

**Secondary Cross-listing**

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

**Class Format:** Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

**Requirements/Evaluation:** Five 3-4 page papers including figures made from analyzing data.

**Prerequisites:** At least one GEOS or ENVI course

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with a strong interest in Geosciences and Geoscience majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

ENVI 228 (F) Water as a Scarce Resource

**Cross-listings:** ECON 228 ENVI 228

**Secondary Cross-listing**

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

**Class Format:** meeting with the instructor in pairs for an hour each week

**Requirements/Evaluation:** a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues
**Prerequisites:** ECON 110 or equivalent

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ENVI 229 (S) Environmental History**

**Cross-listings:** ENVI 229 HIST 264

**Primary Cross-listing**

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

**Class Format:** with field trips

**Requirements/Evaluation:** several short essays; final research project

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Environmental Studies majors and concentrators; History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

**ENVI 230 (S) Geographies of Food Justice (DPE)**

Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, healthy, & culturally appropriate food. Observers often call poor, segregated urban areas food *deserts*, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to this as food *apartheid* to emphasize that inequalities in food access are the result of racism and are inseparable from other injustices. Notably, *deserts & apartheid* are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does *where* people eat shape *what* they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with a critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term's usefulness. Next, we consider indigenous hunting & fishing practices. From the Arctic to the Saint Lawrence River, ancestral practices are undergoing fundamental disruptions from settler
colonialism & its effects, which include climate change & toxic contamination. Additional topics include farmworkers, pesticide exposure, migration, free trade, & diet-related disease. We will read works by geographers, anthropologists, sociologists, & journalists, among others. Throughout, we ask how people are enacting food justice & sovereignty on the ground. We listen to those on the frontlines & imagine a world in which their visions are reality.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion, occasional short oral presentations

Prerequisites: ENVI 101 or permission

Enrollment Limit: 19

Enrollment Preferences: Environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.

ENVI 231  (S)  Africa and the Anthropocene  (DPE)

Cross-listings: STS 231  ENVI 231  AFR 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) ENVI 231 (D2) AFR 231 (D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

ENVI 232  (S)  The Garden in the Ancient World

Cross-listings:  COMP 235  REL 235  CLAS 235  ENVI 232
Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

**Requirements/Evaluation:** class participation, short written assignments, and a final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

ENVI 233  (S) Latin American Environmental Literature and Cultural Production  (DPE)

**Cross-listings:** RLP 216  ENVI 233

**Secondary Cross-listing**

This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the *Popol Vuh*), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

**Class Format:** This class will be fully remote. Students are expected to be active participants at all scheduled class meetings; there may be some additional asynchronous activities.

**Requirements/Evaluation:** Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.

**Prerequisites:** None.

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference given to students majoring in Spanish or Environmental Studies.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)  (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLSP 216 (D1) ENVI 233 (D1)

**Difference, Power, and Equity Notes:** This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.
ENVI 234  (S)  Economics of Developing Countries  (DPE)

Cross-listings:  ENVI 234  ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation:  short essays/assignments; two individual take-home exams; final group project

Prerequisites:  one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit:  25

Enrollment Preferences:  first-year and sophomore students

Expected Class Size:  25

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 234 (D2)  ECON 204 (D2)

Difference, Power, and Equity Notes:  This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

Spring 2022

LEC Section: 01    M 7:00 pm - 9:40 pm     Michael Samson

ENVI 235  (S)  Survival and Resistance: Environmental Political Theory

Cross-listings:  ENVI 235  PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  formal and informal writing assignments and class participation
Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation
responding to climate change? To what extent can local environmental management alter global trends?

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit (WS)

Writing Skills Notes: Weekly tutorial paper or response paper for which the instructor will provide feedback on writing skills as well as content. Opportunities to revise.

ENVI 241 (S) The Politics of Waste

Cross-listings: ENVI 241 PSCI 242 PSCI 270

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science—perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

Enrollment Limit: 9

Enrollment Preferences: final selection will be made on the basis of statements of interest solicited after pre-registration and interviews with the instructor

Expected Class Size: 9

Grading: no pass/fail option, no fifth course option

ENVI 242 (S) The Country and the City in the Classical World

Cross-listings: ANTH 242 ENVI 242 CLAS 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not
new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals—as well as artistic, literary, and architectural forms—associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside—not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 19

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

ENVI 243 (F) Reimagining Rivers (WS)

Cross-listings: ENVI 243 ANTH 243

Primary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format: This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week. Sessions will be held in-person and remotely.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: Environmental Studies 101

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243 (D2) ANTH 243 (D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

Attributes: ENVI Humanities, Arts + Social Science Electives
ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: ENVI 244 PHIL 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

ENVI 247 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, “Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies,” which tracks both the “historical breaks” and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one another through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.

Requirements/Evaluation: 2 short concept papers (3-4 pages); 1 research paper (10 pages); several short policy exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 250 (F) Environmental Justice (DPE)

Cross-listings: STS 250 ENVI 250

Primary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: juniors, seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 250 (D2) ENVI 250 (D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 251 Science and Militarism in the Modern World (WS)

In 1961, United States President Dwight D. Eisenhower warned of the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. This tutorial takes up a number of environmental themes, including the role of environmental science within military campaigns, conservation and environmental racism, nuclear waste and ecological contamination. Surveying conflicts from World War II through the present-day War on Terror, this course will investigate how environmental scientists, politicians, soldiers, activists, and artists have grappled with the intertwined legacies of science and militarism. Students will engage a range of textual materials including books, films, photographs, and news reports.

Requirements/Evaluation: Course requirements include bi-weekly response papers (5-7 pages) and tutorial discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: ENVI and STS majors and concentrators

Expected Class Size: 10

Grading:

Distributions: (D2) (WS)

Writing Skills Notes: Over the course of the semester, students will write 5 papers (5-7 pages each). They will receive bi-weekly detailed feedback on their writing from the professor and their tutorial partner. This feedback will include advice on strengthening their argumentation and use of textual evidence, as well as grammar and usage suggestions/corrections. Students will be graded on the portfolio of papers, with specific attention to how they have incorporated feedback in each subsequent paper.

ENVI 253 (S) Race, Land, Dis/Re-possesion: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 AMST 235 GBST 235 HIST 275 ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). **ENVI 255 (F) Environmental Observation**

**Cross-listings:** ENVI 255 GEOS 255

**Secondary Cross-listing**

To study the environment, we need to observe and measure it. We collect data—numbers that represent system states—and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** Weekly labs, four quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**ENVI 263 (S) The Global Ocean: An Interdisciplinary Introduction**

**Cross-listings:** MAST 263  ENVI 263
Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

**Class Format:** Remote, including Zoom seminar meetings twice a week

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**ENVI 265 (F) Coral Reefs: Ecology, Threats, & Conservation**

**Cross-listings:** ENVI 265 BIOL 165 MAST 265

**Secondary Cross-listing**

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

**Class Format:** Remote, including Zoom seminar meetings twice a week

**Requirements/Evaluation:** Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. First-Year, 2. Sophomores

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

ENVI 266 (S) Reading Water (WS)

Cross-listings: ENVI 266 MAST 266

Secondary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis."

Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

Class Format: This class will be remote, meeting synchronously. The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

Requirements/Evaluation: 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference to majors, and then to sophomores and juniors, respectively.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 266 (D1) MAST 266 (D1)

Writing Skills Notes: Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

ENVI 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

Cross-listings: ENVI 268 MAST 268

Secondary Cross-listing

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence
to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

Grading:  yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 271 (S) Theatre and Environment: Site, Ecology, Utopia (DPE)

Cross-listings: THEA 272 ENVI 271

Secondary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or context of a performance change its meaning? What role does theatre play within grassroots campaigns for climate action, environmental justice, or Indigenous land rights? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this studio course, participants will collaborate in small groups to create and share short performances based on a series of prompts, such as: site, nature, immersion, ecology, biomimicry, and utopia. Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute all human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Talking Birds, Rimini Protokoll, Extinction Rebellion, Greenpeace, and others. Critics and theorists considered may include: Allan Kaprow, Augusto Boal, Miwon Kwon, Nick Kaye, Claire Doherty, Donna Haraway, Grant Kester, Nato Thompson, and adrienne maree brown. As a special project in the class, we will collaborate with The Zilkha Center to create a series of performances that engage with topics relevant to the campus community, including climate action and environmental justice. Note: this is a maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio course that requires deep collaboration on the creation, development, and performing of original works of theatre and live art.

Requirements/Evaluation: Creation and presentation of a series of four short performance pieces; leading a 10-minute class discussion; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 272 (D1) ENVI 271 (D1)

Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.
ENVI 273  (F) Politics without Humans?

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants; shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students

Enrollment Limit: 25

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

ENVI 291  (S) Religion and the American Environmental Imagination

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENVI 297  (S)  Global Sustainable Development

Cross-listings: GBST 287  ENVI 297

Primary Cross-listing
In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation:  Class discussions; Policy Analysis Paper (5-7 pages); Mid-term exam; Final case study/class presentation (8-10 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Envi majors and concentrators
Expected Class Size: 19
Grading:  no pass/fail option, yes fifth course option

ENVI 301  (F)  Climate Changes (Latin America): Aesthetics, Politics, Science

Cross-listings: RLS 401  ENVI 301

Secondary Cross-listing
In her 2007 book, In Catastrophic Times: Resisting the Coming Barbarism, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming—the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: La vorágine (José Eustasio Rivera, Colombia, 1924); Distancia de rescate (Samanta Schweblin, Argentina, 2014); Lo que soñó Sebastián (Rodrigo Rey Rosa, Guatemala, 1995); Serras da desordem (Andrea Tonacci, Brazil, 2006); Boi Neón (Gabriel Mascarò, Brazil, 2015); American Fork (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers,
one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: this is the senior seminar required for all Spanish majors

Not offered current academic year

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: AMST 302 ENVI 302

Primary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development.

Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students’ academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation: Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 303 (S) Cultures of Climate Change

Cross-listings: SOC 303 ENVI 303

Primary Cross-listing
This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

ENVI 304 (F) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: AFR 335 ENVI 304 GBST 304 HIST 304

Secondary Cross-listing
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**Difference, Power, and Equity Notes:** This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

**ENVI 307  (F) Environmental Law**

**Cross-listings:** PSCI 317  ENVI 307

**Primary Cross-listing**

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and “green product” certification, to confront globalization, climate change and other emerging threats.

**Requirements/Evaluation:** several short writing assignments, a term research project, and active participation in class

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 14

**Expected Class Size:** 14

Fall 2021

LEC Section: 01  M 7:00 pm - 9:40 pm  David N. Cassuto

**ENVI 308  (S) Science and Politics in Environmental Decision Making**

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

**Requirements/Evaluation:** participation, several smaller assignments, and a final project

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators, Public Health concentrators, and Political Science majors

**Expected Class Size:** 15
**ENV 311 (S) Tropical Ecologies: Francophone Caribbean Literature and the Environment** (DPE)

**Cross-listings:** AFR 313  RLFR 313  ENVI 311

**Secondary Cross-listing**

The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau--the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical texts of Caribbean of literary and political movements such as *Indigenisme*, *Négritude*, and *Créolité*. Conducted in French.

**Class Format:** This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

**Requirements/Evaluation:** Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

**Prerequisites:** Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 313 (D1)  RLFR 313 (D1)  ENVI 311 (D1)

**Difference, Power, and Equity Notes:** As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

---

**ENV 312 (F) Communities and Ecosystems** (QFR)

**Cross-listings:** ENVI 312  BIOL 302

**Secondary Cross-listing**

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invisibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of...
communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as “big-data” analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week
Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper
Prerequisites: BIOL/ENVI 203 or 220
Enrollment Limit: 28
Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators
Expected Class Size: 24
Grading: yes pass/fail option, yes fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 314 (F) Nature in Crisis: The Classification Craze and The Rise of Museums
Cross-listings: RLFR 315 ENVI 314
Secondary Cross-listing
This course examines how understandings of nature evolved dramatically (and at times unsettlingly) from the 17th through the early 20th centuries and how this instability prompted a desire to classify and control natural phenomena. To analyze these issues, we will likewise consider the rise of modern museums, as well as the accompanying acts of classification and curation. We will consider how literary and philosophical texts from the aforementioned time periods depict nature, how real-world interactions with nature led to the creation of (illustrated) taxonomies, how colonization inflected notions of the natural world and also museum exhibits, and finally, how the cabinet of curiosities and later, the museum, provided a space in which to display and analyze nature’s more unusual treasures. As part of our explorations, we will build a virtual exhibit of our own to reflect our understanding of nature today and our engagement with concepts of nature from previous eras. Conducted in French. Counts as an Envi Humanities Elective for the Envi Concentration.
Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.
Requirements/Evaluation: participation, online homework, essays, mid-semester presentation, final class project (virtual exhibit)
Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course; or by placement test; or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

ENVI 315 (S) Ecocriticism
Cross-listings: ENVI 315 ENGL 312
Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: majors in English or Environmental Studies

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

ENVI 321 (F) Born to be Wild: Rethinking Animals in Pre-modern and Modern Texts (DPE)

Cross-listings: COMP 323 ARAB 323 ENVI 321

Secondary Cross-listing

In the past few months, images of dolphins appearing in the Venetian canals, and wild animals roaming eerie looking post-apocalyptic deserted streets have gone viral. The majority of these images have proven to be fake, however their popularity was witness to people's hope that we can "reset" the environment and a yearning to reframe animals' positionality vis-à-vis their habitats and humans. Using critical lenses from ecocriticism and animal studies, we will be exploring texts from non-Western traditions in which animals figure strongly from pre-modern times to the age of the Anthropocene. The focus will be on Arabic, Persian and Turkish texts all in translation. The course will be traversing several genres and texts from Pre-Islamic poetry, the Quran, the 10th century Ikhwan as-Safa's epistle *The Case of Animals versus Man Before the King of the Jinn*, the fables of *Kalila and Dimna*, Farid ed-Din 'Attar's *Conference of Birds*, travelogues, paintings, contemporary film till we reach recent fiction with cyborgs and drones. Throughout the course, we will be examining themes such as diverse conceptualizations of what it means to be an "animal", what constitutes' animal agency and animal subjectivity irrespective of humans and their often utilitarian lens. We will do this by investigating how animals through these texts have been represented, imagined and reconfigured whether allegorically or otherwise as communities and in relation to humans and the environment and the implications of that. Finally, we will explore what a poetics of animal studies in these cultural and literary traditions could look like. The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Class Format: This class will be offered remotely synchronously twice a week (75 minutes each session), in addition to prerecorded asynchronous material at times.

Requirements/Evaluation: The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Arabic majors, Comparative Literature Majors, Environmental Studies Majors and Arabic certificate holders.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course deals with different literary traditions and their aesthetics. The approach is both synchronic and diachronic by looking at texts and their texts from different time periods and at different genres. The course will be examining what it means to be an "animal" vis-a-vis human beings and their environment and animal agency in these literary traditions as opposed to the often utilitarian lens that animals have often been viewed through.

ENVI 322 (F) Waste and Value

Cross-listings: GBST 322  ENVI 322  ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: majors in ANSO, ENVI, ASST

ENVI 323 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 323 ENGL 324

Secondary Cross-listing

Consciousness of the world's finiteness in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's Animal's People. Primary works will include: Shakespeare, As You Like It and King Lear; Marvell; Ovid, Metamorphosis; Browne, Urn Burial; Wordsworth; McCarthy, The Road; Atwood; Alice Oswald; photography (Struth, Hutte); painting (Titian), and video installations (Pipilotti Rist). Theoretical texts include: Smith, Against Ecological Sovereignty; Wood, Reoccupy Earth; Agamben, The Time that Remains; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, After Fukushima; Derrida, The animal that therefore I am and Beast and the Sovereign.
Class Format: This course will be taught virtually, but we will make absolutely every effort to ensure that it takes the form of a genuine discussion class, including breaking periodically into smaller online groups. Requirements: two papers totaling 20 pages.

Requirements/Evaluation: two papers over the course of the semester totaling approximately 20 pages.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors

ENVI 324  (S)  Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 332  (F)  (De)colonial Ecologies  (DPE) (WS)

Cross-listings: AFR 347 AMST 332 ENVI 332

Secondary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of
U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Secondary Cross-listing

This course examines the application of population genetics, population ecology, community ecology, and systematics to the conservation of biological diversity. The overarching theme of the course is on the role of stochastic processes for small populations. Lecture/discussion topics will include extinction, the genetics of small populations, metapopulations, and importantly, conservation strategies. Labs will include a mixture of computer and lab projects.

Class Format: lecture and discussion, 3 hours per week; lab, 1.25 hours per week. students will be assigned to a lab section (block AA - either W or F from 1:30-2:45) during the first week of class.

Requirements/Evaluation: Evaluation will be based on lab assignments, two exams, discussion participation, and an independent project

Prerequisites: BIOL 203/ENVI 203, or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Biology majors, seniors, and juniors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

ENVI 341 (S) Toxicology and Cancer
Cross-listings: ENVI 341 CHEM 341
Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelcus commented in 1537: “What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison.” Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week
Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam
Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry
Enrollment Limit: 30
Expected Class Size: 24

ENVI 346 (S) Environmental Psychology
Cross-listings: PSYC 346 ENVI 346
Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: empirical lab course
Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.
Enrollment Limit: 16
Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

ENVI 348 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience  (DPE)
Cross-listings: AMST 347 ENVI 348

Primary Cross-listing
This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)
Prerequisites: ENVI 101 or instructor permission
Enrollment Limit: none
Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 347 (D2) ENVI 348 (D2)

Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

ENVI 349 (S) Race, Development, and Food Sovereignty  (DPE) (WS)
Cross-listings: AFR 349 ENVI 349 AMST 342

Secondary Cross-listing
What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in
relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwinings of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful “agribusiness” corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of “food sovereignty” movements—efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

ENVI 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available
Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 354 (F) Drugs, Empire, & Environment in Historical Perspective

This course considers the political economy & environmental impacts of licit & illicit drugs. We begin with the premise that drugs are commodities that gained global significance in the context of liberalism & empire. Imperial nations--notably Britain--consolidated political & economic power in the 19th century by promoting the opium trade against the wishes of Chinese & Indian officials. Most illicit drugs originated as plants--cannabis, poppies, & coca. The production of these internationally traded agricultural commodities helped transform rural livelihoods & landscapes in the 19th century;
attempts at suppressing drug crops in the 20th century have also had environmental impacts. After the turn of the 20th century, the United States led an international movement to end the opium trade. Since then, the War on Drugs has expanded as a means for the United States to exercise domestic & global power. Our focus is primarily illicit drugs, but historical shifts in the categories of licit/illicit are a key theme. Other themes include race & racism in drug policy, imperialism, agriculture, & debates over toxicity. The course is divided into four units, stretching from the 19th century through the present. First, we discuss British colonialism in India & China through the lens of the opium trade. Next, we study the emerging drug control regime, focusing on coca, cocaine, & Indigenous producers in the Andes in the 1940s & 1950s. The third unit looks at environmental justice activists who oppose pharmaceutical companies' waste disposal in Puerto Rico. Finally, we evaluate the environmental impacts of the recent cannabis boom. We ask whether the legal architecture on which the industry is built can overcome the colonial & racist legacies of drug control. Readings include works by historians, novelists, anthropologists, & public policy experts.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion and participation

ENVI 364  (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

Requirements/Evaluation: Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Chemistry and Environmental Studies majors

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 373 (F) Environmental Organic Chemistry

Cross-listings: ENVI 373  CHEM 373

Secondary Cross-listing

This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: Lecture/discussion; lecture, three hours per week and discussion, 75 minutes per week.

Requirements/Evaluation: weekly problem sets, two midterm exams, a final exam, participation in discussion, an independent research proposal

Prerequisites: CHEM 251 and either CHEM 155 or CHEM 256. ENVI 102 is strongly recommended.

Enrollment Limit: 15

Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 376 (F) Economics of Environmental Behavior (QFR)

Cross-listings: ECON 477 ENVI 376

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions.

Requirements/Evaluation: regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory.

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 477 (D2) ENVI 376 (D2)

Quantitative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

ENVI 378 (S) Nature/Writing

Cross-listings: ENGL 378 ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam.

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Cross-listings:  ECON 522  ENVI 387  ECON 387

Secondary Cross-listing
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 30
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 30
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 522 (D2) ENVI 387 (D2) ECON 387 (D2)

ENVI 390  (S)  The Nature of Nature

Cross-listings:  ENVI 390  ENGL 394

Secondary Cross-listing
"Nature" is one of the commonest words in English. And yet what does it signify? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying attention to the difficulty of narrating processes that are often too big, too small, too quick or too slow for direct human apprehension. We'll also explore the ways popular nature writing mingles scientific reporting with implicit judgments about human identity, morality, and social organization. Writers studied will include Elizabeth Kolbert, N. Scott Momaday and Charles Darwin. We'll also consider the technological mediations of nature in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page online essay incorporating audiovisual materials. Active participation in class. Note that this course will be offered exclusively online.
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 16
Enrollment Preferences: English majors; Environmental Studies majors and concentrators.

ENVI 404  (F)  Coastal Processes and Geomorphology  (QFR)
Cross-listings: ENVI 404  MAST 404  GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by
Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Cross-listings: ENVI 405  GEOS 405

Secondary Cross-listing
Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth’s landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, two 10-page lab reports, lab activities, and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 410  (S)  The Cryosphere

Cross-listings:  ENVI 410  GEOS 410

Secondary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

ENVI 412  (S)  Senior Seminar: Perspectives on Environmental Studies  (WS)

Cross-listings:  MAST 402  ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit  (WS)
ENVI 420  (F) Architecture and Sustainability in a Global World  (WS)

Cross-listings:  ARTH 420  GBST 420  ENVI 420

Secondary Cross-listing
What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as “minimizing the negative impact of built form on the surrounding landscape,” and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: This course will be taught in a hybrid mode, with both online (lecture) and in-person (discussion) elements.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords’ garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena Maria Viramontes’ Their Dogs Came With Them and Ecuadoran-U.S. ecofeminist Jeanette Rodriguez's theological texts. Evaluation will be based on class participation, presentations,
ENVI 423 (F) Global Change Ecology
Cross-listings: ENVI 423 BIOL 413

Secondary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week
Requirements/Evaluation: class participation and several short papers
Prerequisites: BIOL 203 or BIOL 305, or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

ENVI 430 (S) Race, Identity, Nature (DPE) (WS)
Cross-listings: ENVI 430 AFR 390 AMST 430

Secondary Cross-listing

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant
research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Class Format: This course is designated as remote. However, international students who want to take this course but need it to be designated as a hybrid course in order to do so may instead register for an independent study with Prof. Ayazi. As a hybrid course, this independent study will have the same requirements as the listed course, with the exception of a limited number of face-to-face meetings in Williamstown or Boston. Please contact Prof. Ayazi at ha5@williams.edu to discuss such an arrangement.

Requirements/Evaluation: Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%. Class will meet twice per week. Tu. meetings will be synchronous and Th. meetings will be asynchronous. Asynchronous components of the course include pre-recorded lectures, discussion boards, and other exercises that promote as much connection as possible within the constraints of remote education. Toward this end, synchronous meetings will center engaged discussion.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ENVI 436  (S)  Demigods: Nature, social theory, and visual imagination in art and literature, ancient to modern

Cross-listings: ENVI 436 ARTH 436 CLAS 436

Secondary Cross-listing

Horse-men, cat-women, goat-men, tree-women, man-bulls, fish-girls, snake-people--cross-species compound creatures are everywhere in ancient Greek and Roman art, poetry, and culture. The conceptual or cognitive value of those "demigods" has changed over time. In art, demigods have frequently been reduced to the status of decoration, and in literature, they have become generic markers of fantasy. But they are hardly without meaning. Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of nature, the origin of species, and the environment; and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course
examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. We will consider in detail ancient theories of the origins of species as well as the relationship between nature and human culture. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian, and the rediscovery of ancient materialist theories of nature and culture. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Aprés midi d'une faun," Aby Warburg's cultural-historical texts, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: Lecture and discussion. When possible, we will meet outdoors in person; when that is not possible, we will meet online.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: art history majors, graduate students in art history, classics majors, then any interested student

ENVI 450  (F) Senior Seminar: Environmental Ethnography

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term Coded fieldwork notes and summary statements (8-10 pages); Final ethnographic snapshot/presentation (13-15 pages)

Prerequisites: ENVI 101; ENVI 102

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 454  (F) Climate Change Physiology

Cross-listings: BIOL 454  ENVI 454

Secondary Cross-listing
Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

Class Format: Synchronous discussions with in-person and remote option. Satisfies the distribution requirement for the Biology major.

Requirements/Evaluation: Evaluation will be based on class participation and several short papers.

Prerequisites: BIOL 203 or BIOL 205, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Biology seniors who have not yet taken a 400 level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives

Not offered current academic year

ENVI 460 (S) Communicating Climate Change

This course is about environmental communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who either don't care about them or who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And finally, they are thoroughly entangled with almost every other problem we face, from pandemics to racism. How do we communicate clearly, persuasively, and responsibly about something so complex? This seminar brings together students who have specialized in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. We will focus on perhaps the greatest communication challenge of them all: climate change. Over the course of the seminar, we will explore research on climate change communication in a diverse array of fields while seeking to put our findings into practice locally. To help us learn new ways to communicate, we will meet with some successful, innovative environmental professionals in diverse fields. We will work together as a team to solve concrete communication problems here in our community.

Requirements/Evaluation: One 5-7-page paper; final collaborative project; participation.

Prerequisites: Environmental Studies 101.

Enrollment Limit: 19

Enrollment Preferences: Environmental/Maritime Studies majors and concentrators.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENVI 478 (S) Cold War Landscapes

Cross-listings: AMST 478  ENVI 478  HIST 478
Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, ENVI, and AMST majors if over-enrolled

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

ENVI 491 (F) The Suburbs

Cross-listings: AMST 490 ENVI 491 HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I'll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10
**Enrollment Preferences:** History majors and students with previous coursework in History

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**
AMST 490 (D2) ENVI 491 (D2) HIST 491 (D2)

Alice C. Bradley, Assistant Professor of Geosciences
Nicole G. Brown, Assistant Professor of Classics
Cory E. Campbell, Instructional Technology Specialist
Anthony Carrasquillo, Assistant Professor of Chemistry
Gregory Casey, Assistant Professor of Economics
David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies
Phoebe A. Cohen, Associate Professor of Geosciences
Jose E.A. Constantine, Assistant Professor of Geosciences
Mea S. Cook, Associate Professor of Geosciences
David P. Dethier, Professor of Geosciences, Emeritus
Joan Edwards, Samuel Fessenden Professor of Biology
Laura Ephraim, Associate Professor of Political Science
Michael Evans, Assistant Director of The Zilkha Center
Jessica M. Fisher, Assistant Professor of English
Antonia Foias, Professor of Anthropology and Sociology
Jennifer L. French, Professor of Spanish
Sarah S. Gardner, Lecturer in Environmental Studies
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;

- Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;
• Understand the political and economic factors that inform, enable, and constrain environmental policy;
• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Have an appreciation for the ambiguity and uncertainty inherent in many environmental issues;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, the CES is considered to be the first environmental studies center at a liberal arts college. In addition to the academic program described below, the CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. The CES offers extensive resources including databases, funding for student-organizations and student-initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area 1.5 miles from campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. The CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING
Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other members of CES for advice. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

Advisors for 2020-2021: Ralph Bradburd, Jennifer French, Sarah Gardner, Nick Howe, and Luana Maroja.

STUDY AWAY
Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major but must have advance approval in writing from the Chair of Environmental Studies.

CONCENTRATION IN ENVIRONMENTAL STUDIES
The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The Environmental Studies concentration is a seven-course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 302, and ENVI 412, students pursuing the concentration will take one elective from each group that represents a broad category of inquiry: Environmental Policy; Humanities, Arts and Social Sciences; and the Natural World.

THE MAJOR IN ENVIRONMENTAL STUDIES
The Environmental Studies major is an eleven-course major. The major has a core of seven courses, with varying amounts of choice for the various core course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 302, and one 400-level Senior Seminar. ENVI 101 – Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the junior year (or senior year under special circumstances), ENVI 302 – Environmental Planning Workshop: Community-Based Experience (offered every fall), one 400-level senior seminar. The remaining core requirements are comprised of three foundational 200-level courses, one from each of three lists of courses (see below)... These lists represent the three main branches of the environmental curriculum: Environmental humanities, environmental social science/policy, and environmental science. Students choose, in consultation with their major advisor, the course they will take...
from each of the three lists. Building on this seven-course foundation, Environmental Studies majors devise an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, the built environment, environmental chemistry, sustainable food and agriculture, environmental ethics, etc. Students are responsible for designing their own major cluster in consultation with a faculty advisor in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement. The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

**Submitting your Proposed Course Cluster and Plan of Study to the Major**

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The individual proposals will be reviewed by the CES Advisory Committee.

**Planning for Prerequisites on your Path through the Major**

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (*Intro to Environmental and Natural Resource Economics*) has a prerequisite of ECON 110 (*Principles of Microeconomics*). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (*Economics of Climate Change*) has a prerequisite of ECON 251 (*Price and Allocation Theory*), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (*Communities and Ecosystems*) has a prerequisite of ENVI/BIOL 203 (*Ecology*) or ENVI/BIOL 220 (*Field Botany and Plant Natural History*). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Chair or Associate Director.

**Credit for AP, IB, A-levels and other pre-Williams Courses**

Students are not allowed to place out of ENVI 101 or ENVI 102.

**Introductory Required Courses (2 courses)**

- ENVI 101 Nature and Society: An Introduction to Environmental Studies
- ENVI 102 Introduction to Environmental Science

**Foundational Required Courses for all Environmental Studies Majors (3 courses, 1 from each category)**

**Culture/Humanities Foundational (1 course)**

Specialization Cluster (4 courses, including a Living Systems course and a Methods course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental justice, environmental planning and design, environmental literature, environmental chemistry, environmental biology, environmental geosciences, sustainable design, water and energy, sustainable food and agriculture, urban studies, and environmental economics.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Committee, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

Living Systems (1 course)

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed below. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Catalog details

Experiential Required Course (1 course)
In the junior year, or under special circumstances in the senior year, students will take ENVI 302 Environmental Planning Workshop: Community-Based Experience. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshire region involving urban or rural land use planning and environmental design.

Senior Seminar Required Course (1 course)
In the junior or senior year, students will take ENVI 412, Senior Seminar, one 400-level seminar in Environmental Studies. These seminars will focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY
In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:
Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student summer research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Other departments may also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the first Friday in March. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified before spring break whether or not their proposal has been approved.

Students doing a full-year thesis give a presentation in October to their thesis advisor, second reader, and environmental studies community.

Further details on the honors program are available through the Environmental Studies website: https://ces.williams.edu/academic-program/honors/

ENVI 100  (S)  Introduction to Weather and Climate

Cross-listings: GEOS 100  ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 100 (D3) ENVI 100 (D3)

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses  GEOS Group A Electives - Climate + Oceans

Not offered current academic year
ENVI 101  (F)(S)  Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, and more -- as well as their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Class Format: Fall 2020: The two sections of the course will be taught entirely online (Howe) or in a hybrid format accommodating both students on campus & those learning remotely (Merleaux). Both sections will be divided into small discussion groups meeting once per week. Some meetings may be scheduled outside of the allotted time block. Course includes a mix of synchronous & asynchronous online work, including video lectures, writing workshops, virtual field trips, reading annotation, and discussion forums.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages)

Prerequisites: none

Enrollment Limit: 20/section

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 20/section

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for the Environmental Studies major and concentration

Distributions: (D2)

Attributes: AMST Space and Place Electives  ENVI Core Courses  EVST Core Courses  GBST Urbanizing World Electives

ENVI 102  (S)  Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly short quizzes, three exams, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

Distributions: (D3)

Attributes: ENVI Core Courses  EVST Core Courses  EXPE Experiential Education Courses
ENVI 103  (F)  Global Warming and Environmental Change

Cross-listings:  GEOS 103  ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation:  written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites:  none

Enrollment Limit:  40

Enrollment Preferences:  first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size:  40

Grading:  yes pass/fail option,  no fifth course option

ENVI 104  (F)  Oceanography

Cross-listings:  MAST 104  GEOS 104  ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format:  3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time). All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation:  6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites:  none

Enrollment Limit:  60

Enrollment Preferences:  first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size:  60

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D3)

ENVI 105 (F) The Co-Evolution of Earth and Life
Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis?

Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip
Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 30

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours
Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page
Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How we have arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures,
debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

ENVI 201  (S)  The Geoscience of Epidemiology and Public Health  (DPE)

Cross-listings: ENVI 201 GEOS 207

Secondary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 201 (D3) GEOS 207 (D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to
knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

This course combines lectures & discussion with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to help students build skills in data analysis and scientific writing.

Class Format: Six hours per week. Students will view pre-class lecture videos; class meetings will focus on discussion, synthesis, and application of course content.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203 (D3) BIOL 203 (D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

ENVI 204 (F) Colonialism, Capitalism and Climate Crisis

Cross-listings: GBST 233 AFR 233 ENVI 204

Secondary Cross-listing

Evolutions are part of human existence. Our collective understandings of the world, the economic realm and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy. Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. By the end of the course, students will be able to describe various perspectives from structural economics and other traditions including dependency theory, uneven ecological exchange, ecowomanist and black ecological thought, and critical environmental justice to explain the social, ecological, historical and economic conjunctures underpinning climate crisis.
Arranged to develop more in-depth analytical, communication and writing skills, the course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis. Finally, we will considering demands for climate debt / reparations from social and environmental movements and decolonial perspectives that advance climate justice. Students will also be able evaluate the political economic responses to the climate crisis.

**Requirements/Evaluation:** Blog post entries; research report on an emerging green technology (10 pages); recorded video / interview of an environmental justice movement/activist in the global South; reflections paper (8 pages); community case study on an environmental project tracing its histories (7 pages); participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

**Prerequisites:** None

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

Fall 2021
ENVI 206 (S) Global Environmental Politics

This course examines the history and current status of international environmental cooperation and conflict. We will consider the interactions of nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of transnational environmental policy and treaties. We will also examine non-state approaches to global environmental challenges. After reviewing competing explanations for the causes of global environmental problems and diverse disciplinary approaches to studying those issues, we will read case studies covering a range of topics. These include fresh water conflict, fisheries and oceans, climate change, waste and pollution, agriculture, pesticides, population and development, wildlife, forestry, and consumerism. The reading assignments are drawn from the fields of environmental and foreign policy history, political science, international relations, geography, and anthropology in order to develop an interdisciplinary approach to international policy analysis. The written assignments are a series of policy briefs. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: Depending on enrollment, some discussion may be scheduled outside of the class hours, as would be the case in a tutorial.

Requirements/Evaluation: 2-3 short writing assignments based on assigned readings (3 pages each), 2 oral presentations, discussion participation, 2 policy briefing papers based on library research (5 pages each)

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 207 (F) Economic Geology and Earth Resources

Cross-listings: GEOS 205 ENVI 207

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging-all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 208  (S) Saharan Imaginations  (DPE) (WS)

Cross-listings: ARAB 209  ENVI 208  COMP 234

Secondary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Approached mainly through the prism of adventure and exploitation, the desert is portrayed as a dead space. However, literature and film furnish a unique opportunity to engage critically with the ways Maghrebi and Middle Eastern culture production represents deserts and raises issues of fundamental importance to these societies. This course offers students the opportunity to engage in close readings of novels and film through the theme of the Sahara and Saharan space. Reading through the politics of human mobility and life in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Saharan sub-genre of African and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Deconstructing reductive Saharanisms, students will see the desert for what it is, rather than what it is portrayed to be or stand for.

Class Format: hybrid

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 209 (D1) ENVI 208 (D1) COMP 234 (D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Cross-listings: GEOS 309  ENVI 209

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor
Enrollment Limit: 30

Cross-listings: ENVI 210 ARTH 214
Secondary Cross-listing
Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts--including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice. Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.
Requirements/Evaluation: Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)
Prerequisites: None
Enrollment Limit: 20
Enrollment Preferences: Art Majors

ENVI 211  (S) Race, Environment, and the Body
Cross-listings: AMST 211 ENVI 211 AFR 211 SOC 211
Secondary Cross-listing
This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to
imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ENVI 212 ECON 214

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: This tutorial will be taught remotely via Zoom meetings. Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week. Individual "office hour meetings" will also occur via Zoom meetings.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

ENVI 213 (F) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 ENVI 213
Secondary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade. Consideration of justice and equity will be woven through the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include poster, presentation, brief writing assignment

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2)  (QFR)

ENVI 214  (S)  Mastering GIS

Cross-listings: GEOS 214  ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

Expected Class Size: 18

Spring 2022
ENVI 215  (F)  Climate Changes

Cross-listings:  GEOS 215  ENVI 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

ENVI 216  (S)  Philosophy of Animals

Cross-listings:  ENVI 216  PHIL 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: This course is wholly remote and can only be taken synchronously (i.e., students will be expected to attend seminar on zoom during the scheduled time and no recording will be made).

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.
Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

ENVI 217 (F) Landscape, Place and Power

Cross-listings: AMST 216 ENVI 217

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor
Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 214 (D1) ENVI 218 (D1)

Difference, Power, and Equity Notes: This course is inspired by and organized around Arturo Escobar’s notion of “the political ecology of difference.” Our work throughout the semester aims to understand the myriad ways in which “difference”—economic, ecological, and cultural— informs Latin American responses to environmental degradation.

ENVI 219  (F)  Evolution of and on Volcanic Islands  (WS)

Cross-listings: GEOS 220  ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor

Requirements/Evaluation: five 5-page papers and critiques of partner’s papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
**Writing Skills Notes:** You will learn to write in a variety of policy-focused formats

**Not offered current academic year**

**ENVI 224 (F) The Rise and Fall of Civilizations**

**Cross-listings:** ANTH 214  ENVI 224

**Secondary Cross-listing**

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

**Class Format:** Class discussion and debates will complement lecture with powerpoint presentation. In the Fall 2020, the course will have a hybrid format. In person and remote students will attend lectures or class discussions during the regular twice-a-week schedule, with an additional synchronous session for remote students to address questions. If remote students cannot attend additional Q&A session, open office hours will also be available.

**Requirements/Evaluation:** midterm, final exam, 15pp analytical paper, two quizzes

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** First and second years.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**ENVI 225 (F) Sustainable Food & Agriculture**

**Cross-listings:** BIOL 225  ENVI 225

**Secondary Cross-listing**

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

**Requirements/Evaluation:** writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

**Prerequisites:** BIOL 102 or ENVI 102

**Enrollment Limit:** 10

**Enrollment Preferences:** open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major
**ENVI 226 (S) Climate Data Analysis**

**Cross-listings:** GEOS 227  ENVI 226

**Secondary Cross-listing**

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system.

Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

**Class Format:** Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

**Requirements/Evaluation:** Five 3-4 page papers including figures made from analyzing data.

**Prerequisites:** At least one GEOS or ENVI course

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

---

**ENVI 228 (F) Water as a Scarce Resource**

**Cross-listings:** ECON 228  ENVI 228

**Secondary Cross-listing**

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

**Class Format:** meeting with the instructor in pairs for an hour each week

**Requirements/Evaluation:** a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in
Alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues.

Prerequisites: ECON 110 or equivalent

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

ENVI 230 (S) Geographies of Food Justice (DPE)

Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, healthy, & culturally appropriate food. Observers often call poor, segregated urban areas food deserts, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to this as food apartheid to emphasize that inequalities in food access are the result of racism and are inseparable from other injustices. Notably, deserts & apartheid are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does where people eat shape what they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with a
critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term’s usefulness. Next, we consider indigenous hunting & fishing practices. From the Arctic to the Saint Lawrence River, ancestral practices are undergoing fundamental disruptions from settler colonialism & its effects, which include climate change & toxic contamination. Additional topics include farmworkers, pesticide exposure, migration, free trade, & diet-related disease. We will read works by geographers, anthropologists, sociologists, & journalists, among others. Throughout, we ask how people are enacting food justice & sovereignty on the ground. We listen to those on the frontlines & imagine a world in which their visions are reality.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion, occasional short oral presentations

Prerequisites: ENVI 101 or permission

Enrollment Limit: 19

Enrollment Preferences: Environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.

ENVI 231 (S) Africa and the Anthropocene (DPE)

Cross-listings: STS 231 ENVI 231 AFR 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) ENVI 231 (D2) AFR 231 (D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

ENVI 232  (S)  The Garden in the Ancient World
Cross-listings:  COMP 235  REL 235  CLAS 235  ENVI 232

Secondary Cross-listing
Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation:  class participation, short written assignments, and a final project
Prerequisites:  none
Enrollment Limit:  20
Enrollment Preferences:  Classics majors
Expected Class Size:  15
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 233  (S)  Latin American Environmental Literature and Cultural Production  (DPE)
Cross-listings:  RLP 216  ENVI 233

Secondary Cross-listing
This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the Popol vuh), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

Class Format:  This class will be fully remote.  Students are expected to be active participants at all scheduled class meetings; there may be some additional asynchronous activities.
Requirements/Evaluation:  Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.
Prerequisites:  None.
Enrollment Limit:  15
Enrollment Preferences:  Preference given to students majoring in Spanish or Environmental Studies.
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLSP 216 (D1) ENVI 233 (D1)
Attributes:  DPE

Difference, Power, and Equity Notes:  This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis
through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

ENVI 234  (S)  Economics of Developing Countries  (DPE)

Cross-listings: ENVI 234  ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2)  ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ENVI 235  (S)  Survival and Resistance: Environmental Political Theory

Cross-listings: ENVI 235  PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted
prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

ENVI 238 (F) Sustainable Economic Growth

Cross-listings: ENVI 238 ECON 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: potential or declared social science majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how
climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

**Requirements/Evaluation:** one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

**Prerequisites:** ENVI101 or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** No divisional credit (WS)

**Writing Skills Notes:** Weekly tutorial paper or response paper for which the instructor will provide feedback on writing skills as well as content. Opportunities to revise.

**ENVI 241 (S) The Politics of Waste**

**Cross-listings:** ENVI 241  PSCI 242  PSCI 270

**Secondary Cross-listing**

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science--perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

**Requirements/Evaluation:** class attendance and participation, short essays, and a final paper

**Prerequisites:** not open to first-year students

**Enrollment Limit:** 9

**Enrollment Preferences:** final selection will be made on the basis of statements of interest solicited after pre-registration and interviews with the instructor

**Expected Class Size:** 9

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**ENVI 242 (S) The Country and the City in the Classical World**
A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 19

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

ENVI 243 (F) Reimagining Rivers (WS)

Primary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format: This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week. Sessions will be held in-person and remotely.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: Environmental Studies 101

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 243 (D2) ANTH 243 (D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the
semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

**ENVI 244 (S) Environmental Ethics (WS)**

**Cross-listings:** ENVI 244 PHIL 244

**Primary Cross-listing**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244 (D2) PHIL 244 (D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**Primary Cross-listing**

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging into the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are
interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 247 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.

**ENVI 251**  Science and Militarism in the Modern World  (WS)

In 1961, United States President Dwight D. Eisenhower warned of the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. This tutorial takes up a number of environmental themes, including the role of environmental science within military campaigns, conservation and environmental racism, nuclear waste and ecological contamination. Surveying conflicts from World War II through the present-day War on Terror, this course will investigate how environmental scientists, politicians, soldiers, activists, and artists have grappled with the intertwined legacies of science and militarism. Students will engage a range of textual materials including books, films, photographs, and news reports.

**Requirements/Evaluation**: Course requirements include bi-weekly response papers (5-7 pages) and tutorial discussions.

**Prerequisites**: None

**Enrollment Limit**: 10

**Enrollment Preferences**: ENVI and STS majors and concentrators

**Expected Class Size**: 10

**Grading**:

**Distributions**: (D2)  (WS)

**Writing Skills Notes**: Over the course of the semester, students will write 5 papers (5-7 pages each). They will receive bi-weekly detailed feedback on their writing from the professor and their tutorial partner. This feedback will include advice on strengthening their argumentation and use of textual evidence, as well as grammar and usage suggestions/corrections. Students will be graded on the portfolio of papers, with specific attention to how they have incorporated feedback in each subsequent paper.

**ENVI 253**  (S)  Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

**Cross-listings**: AFR 235  AMST 235  GBST 235  HIST 275  ENVI 253

**Secondary Cross-listing**

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

**Requirements/Evaluation**: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). Cross-listings: ENVI 255  GEOS 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 259 (S) New England Environmental History (WS)

Cross-listings: AMST 259  HIST 259  ENVI 259
Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option

ENVI 261  (F)  Science and Militarism in the Modern World

Cross-listings: STS 261 ENVI 261

Primary Cross-listing
In 1961, United States President Dwight D. Eisenhower warned about the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. Surveying conflicts from World War II through to the present-day War on Terror, this course will consider how empire, networks of expert knowledge, resource extraction, environmental contamination, and land degradation have shaped the modern world. Students will engage a range of textual materials including books, films, photographs, and news reports. Course requirements include weekly writing assignments and participation in small group discussions.

Class Format: This course adopts a tutorial model. Students will be divided into 5 groups of 2. Each week the groups will meet with me. Each pair will include one "presenter," who shares a 4-6 page paper responding to the week's theme, and one "respondent," who will offer a 2-3 page response to the presenter's paper. The roles of presenter and respondent will alternate each week. Each student will produce 5 papers as "presenter" and 5 papers as "respondent."

Requirements/Evaluation: Each student will produce five (4-6 page) papers as "presenter" and five (2-3 page) papers as "respondent." Grades will be issued based on the portfolio of papers and active participation in discussions.
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: ENVI and STS majors and concentrators
Expected Class Size: 10

ENVI 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Secondary Cross-listing

Though it covers most of the planet, the ocean’s importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENVI 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: ENVI 265 BIOL 165 MAST 265

Secondary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Does not count for Biology major credit.
Secondary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis."

Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Course Format:** This class will be remote, meeting synchronously. The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 266 (D1) MAST 266 (D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

**Not offered current academic year**

ENVI 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

**Cross-listings:** ENVI 268 MAST 268

**Secondary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to
stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week
Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper
Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

ENV 271 (S) Theatre and Environment: Site, Ecology, Utopia (DPE)
Cross-listings: THEA 272 ENVI 271
Secondary Cross-listing
What is theatre's relation to the environment, whether natural or social? How does the site, place, or context of a performance change its meaning? What role does theatre play within grassroots campaigns for climate action, environmental justice, or Indigenous land rights? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this studio course, participants will collaborate in small groups to create and share short performances based on a series of prompts, such as: site, nature, immersion, ecology, biomimicry, and utopia. Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute all human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Talking Birds, Rimini Protokoll, Extinction Rebellion, Greenpeace, and others. Critics and theorists considered may include: Allan Kaprow, Augusto Boal, Miwon Kwon, Nick Kaye, Claire Doherty, Donna Haraway, Grant Kester, Nato Thompson, and adrienne maree brown. As a special project in the class, we will collaborate with The Zilkha Center to create a series of performances that engage with topics relevant to the campus community, including climate action and environmental justice. Note: this is a maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio course that requires deep collaboration on the creation, development, and performing of original works of theatre and live art.
Requirements/Evaluation: Creation and presentation of a series of four short performance pieces; leading a 10-minute class discussion; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors
Expected Class Size: 10-12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

ENVI 273 (F) Politics without Humans?
Cross-listings: ENVI 273 PSCI 273 STS 273

Secondary Cross-listing
Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation
Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students
Enrollment Limit: 25
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

ENVI 291 (S) Religion and the American Environmental Imagination
Cross-listings: SOC 291 REL 291 ENVI 291

Primary Cross-listing
This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
EN 297  (S)  Global Sustainable Development
Cross-listings:  GBST 287  ENVI 297

Primary Cross-listing
In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation:  Class discussions; Policy Analysis Paper (5-7 pages); Mid-term exam; Final case study/class presentation (8-10 pages)
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  Envi majors and concentrators

ENVI 301  (F)  Climate Changes (Latin America): Aesthetics, Politics, Science
Cross-listings:  RLSP 401  ENVI 301

Secondary Cross-listing
In her 2007 book, In Catastrophic Times: Resisting the Coming Barbarism, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming—the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: La vorágine
(José Eustasio Rivera, Colombia, 1924); Distancia de rescate (Samanta Schweblin, Argentina, 2014); Lo que soño Sebastián (Rodrigo Rey Rosa, Guatemala, 1995); Serras da desordem (Andrea Tonacci, Brazil, 2006); Boi Neón (Gabriel Mascaro, Brazil, 2015); American Fork (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19
Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

Unit Notes: this is the senior seminar required for all Spanish majors

Not offered current academic year

ENVI 302  (F)  Environmental Planning Workshop: Community-Based Experience

Cross-listings: AMST 302  ENVI 302

Primary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation: Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16
Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16
Grading: no pass/fail option, no fifth course option

ENVI 303  (S) Cultures of Climate Change

Cross-listings:  SOC 303  ENVI 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a “problem” in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation:  a 15- to 18-page research paper and several shorter writing assignments

Prerequisites:  ENVI 101 or permission of instructor

Enrollment Limit:  19

Expected Class Size:  19

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 304  (F) Sacred Custodians: Environmental Conservation in Africa  (DPE)

Cross-listings:  AFR 335  ENVI 304  GBST 304  HIST 304

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format:  If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation:  Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites:  None

Enrollment Limit:  15

Expected Class Size:  10-12
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 307 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators, Public Health concentrators, and Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

ENVI 311 (S) Tropical Ecologies: Francophone Caribbean Literature and the Environment (DPE)

Cross-listings: AFR 313  RLFR 313  ENVI 311

Secondary Cross-listing

The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau--the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical texts of Caribbean of literary and political movements such as Indigenisme, Négritude, and Créolité. Conducted in French.

Class Format: This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

Prerequisites: Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 313 (D1) RLFR 313 (D1) ENVI 311 (D1)

Difference, Power, and Equity Notes: As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

Not offered current academic year

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312  BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This
course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week
Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper
Prerequisites: BIOL/ENVI 203 or 220
Enrollment Limit: 28
Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators
Expected Class Size: 24
Grading: yes pass/fail option, yes fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 314 (F) Nature in Crisis: The Classification Craze and The Rise of Museums
Cross-listings: RLFR 315 ENVI 314
Secondary Cross-listing
This course examines how understandings of nature evolved dramatically (and at times unsettlingly) from the 17th through the early 20th centuries and how this instability prompted a desire to classify and control natural phenomena. To analyze these issues, we will likewise consider the rise of modern museums, as well as the accompanying acts of classification and curation. We will consider how literary and philosophical texts from the aforementioned time periods depict nature, how real-world interactions with nature led to the creation of (illustrated) taxonomies, how colonization inflected notions of the natural world and also museum exhibits, and finally, how the cabinet of curiosities and later, the museum, provided a space in which to display and analyze nature's more unusual treasures. As part of our explorations, we will build a virtual exhibit of our own to reflect our understanding of nature today and our engagement with concepts of nature from previous eras. Conducted in French. Counts as an Envi Humanities Elective for the Envi Concentration.
Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.
Requirements/Evaluation: participation, online homework, essays, mid-semester presentation, final class project (virtual exhibit)
Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course; or by placement test; or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

ENVI 315 (S) Ecocriticism

Cross-listings: ENVI 315 ENGL 312

Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: majors in English or Environmental Studies

ENVI 321 (F) Born to be Wild: Rethinking Animals in Pre-modern and Modern Texts (DPE)

Cross-listings: COMP 323 ARAB 323 ENVI 321

Secondary Cross-listing

In the past few months, images of dolphins appearing in the Venetian canals, and wild animals roaming eerie looking post-apocalyptic deserted streets have gone viral. The majority of these images have proven to be fake, however their popularity was witness to people's hope that we can "reset" the environment and a yearning to reframe animals' positionality vis-à-vis their habitats and humans. Using critical lenses from ecocriticism and animal studies, we will be exploring texts from non-Western traditions in which animals figure strongly from pre-modern times to the age of the Anthropocene. The focus will be on Arabic, Persian and Turkish texts all in translation. The course will be traversing several genres and texts from Pre-Islamic poetry, the Quran, the 10th century Ikhwan as-Safa's epistle The Case of Animals versus Man Before the King of the Jinn, the fables of Kalila and Dimna, Farid ed-Din 'Attar's Conference of Birds, travelogues, paintings, contemporary film till we reach recent fiction with cyborgs and drones. Throughout the course, we will be examining themes such as diverse conceptualizations of what it means to be an "animal", what constitutes' animal agency and animal subjectivity irrespective of humans and their often utilitarian lens. We will do this by investigating how animals through these texts have been represented, imagined and reconfigured whether allegorically or otherwise as communities and in relation to humans and the environment and the implications of that. Finally, we will explore what a poetics of animal studies in these cultural and literary traditions could look like. The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Class Format: This class will be offered remotely synchronously twice a week (75 minutes each session), in addition to prerecorded asynchronous material at times.

Requirements/Evaluation: The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Arabic majors, Comparative Literature Majors, Environmental Studies Majors and Arabic certificate holders.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 323 (D1) ARAB 323 (D1) ENVI 321 (D1)

Difference, Power, and Equity Notes: This course deals with different literary traditions and their aesthetics. The approach is both synchronic and diachronic by looking at texts and their texts from different time periods and at different genres. The course will be examining what it means to be an "animal" vis-a-vis human beings and their environment and animal agency in these literary traditions as opposed to the often utilitarian lens that animals have often been viewed through.

Attributes: ENVI Humanities, Arts + Social Science Electives

ENVI 322 (F) Waste and Value

Cross-listings: GBST 322 ENVI 322 ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites: none

Enrollment Limit: 12

ENVI 323 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 323 ENGL 324

Secondary Cross-listing

Consciousness of the world's finiteness in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's Animal's People. Primary works will include: Shakespeare, As You Like It and King Lear; Marvell; Ovid, Metamorphosis; Browne, Urn Burial; Wordsworth; McCarthy, The Road; Atwood; Alice Oswald; photography (Struth, Hutte); painting (Titian), and video installations (Pipilotti Rist). Theoretical texts

**Class Format:** This course will be taught virtually, but we will make absolutely every effort to ensure that it takes the form of a genuine discussion class, including breaking periodically into smaller online groups. Requirements: two papers totaling 20 pages.

**Requirements/Evaluation:** two papers over the course of the semester totaling approximately 20 pages.

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** English majors using the course to fulfill a requirement; Environmental Studies majors

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Cross-listings:** GEOS 324 MAST 324 ENVI 324

**Secondary Cross-listing**

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** short papers, labs, participation in discussion, and a research project

**Prerequisites:** GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geoscience majors, students who commit to the Spring Break trip

**ENVI 332 (F) (D) colonial Ecologies** (DPE) (WS)

**Cross-listings:** AFR 347 AMST 332 ENVI 332

**Secondary Cross-listing**

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of
“nature” and “the human” come to structure race, colonialism, and capitalism? From the “discovery” and plunder of the “New World,” to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 341 (S) Toxicology and Cancer

Cross-listings: ENVI 341 CHEM 341

Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelcus commented in 1537: “What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison.” Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 346 (S) Environmental Psychology

Cross-listings: PSYC 346 ENVI 346

Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: empirical lab course

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

Expected Class Size: 16

ENVI 348  (S)  Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience  (DPE)

Cross-listings: AMST 347  ENVI 348

Primary Cross-listing

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: none

Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 347 (D2) ENVI 348 (D2)

Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

ENVI 349  (S)  Race, Development, and Food Sovereignty  (DPE) (WS)

Cross-listings: AFR 349  ENVI 349  AMST 342

Secondary Cross-listing
What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars,
Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 352 (S) After Nature: Writing About Science and The Environment

Cross-listings: ENGL 351  ENVI 352

Primary Cross-listing

Over the last few decades, the nature of nature has changed and so, by necessity, has nature writing. In this course we will read some of the classic works of nature writing as well as essays and articles by contemporary authors. The emphasis will be on producing our own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

Prerequisites: ENVI 101 or 102 suggested

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 351 (D1) ENVI 352 (D1)

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 354 (F) Drugs, Empire, & Environment in Historical Perspective

This course considers the political economy & environmental impacts of licit & illicit drugs. We begin with the premise that drugs are commodities that
gained global significance in the context of liberalism & empire. Imperial nations--notably Britain--consolidated political & economic power in the 19th century by promoting the opium trade against the wishes of Chinese & Indian officials. Most illicit drugs originated as plants--cannabis, poppies, & coca. The production of these internationally traded agricultural commodities helped transform rural livelihoods & landscapes in the 19th century; attempts at suppressing drug crops in the 20th century have also had environmental impacts. After the turn of the 20th century, the United States led an international movement to end the opium trade. Since then, the War on Drugs has expanded as a means for the United States to exercise domestic & global power. Our focus is primarily illicit drugs, but historical shifts in the categories of licit/illicit are a key theme. Other themes include race & racism in drug policy, imperialism, agriculture, & debates over toxicity. The course is divided into four units, stretching from the 19th century through the present. First, we discuss British colonialism in India & China through the lens of the opium trade. Next, we study the emerging drug control regime, focusing on coca, cocaine, & Indigenous producers in the Andes in the 1940s & 1950s. The third unit looks at environmental justice activists who oppose pharmaceutical companies' waste disposal in Puerto Rico. Finally, we evaluate the environmental impacts of the recent cannabis boom. We ask whether the legal architecture on which the industry is built can overcome the colonial & racist legacies of drug control. Readings include works by historians, novelists, anthropologists, & public policy experts.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion and participation

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators; juniors and seniors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

Requirements/Evaluation: Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Chemistry and Environmental Studies majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 364 (D3) CHEM 364 (D3)
ENVI 368 (F) Technology and Modern Society

Cross-listings: ENVI 368 SOC 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 373 (F) Environmental Organic Chemistry

Cross-listings: ENVI 373 CHEM 373

Secondary Cross-listing

This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: Lecture/discussion; lecture, three hours per week and discussion, 75 minutes per week.

Requirements/Evaluation: weekly problem sets, two midterm exams, a final exam, participation in discussion, an independent research proposal

Prerequisites: CHEM 251 and either CHEM 155 or CHEM 256. ENVI 102 is strongly recommended.

Enrollment Limit: 15

Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option
ENVI 376  (F)  Economics of Environmental Behavior  (QFR)

Cross-listings: ECON 477  ENVI 376

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation: regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 477 (D2) ENVI 376 (D2)

Quantative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

Not offered current academic year

ENVI 378  (S)  Nature/Writing

Cross-listings: ENGL 378  ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of “nature” in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522  ENVI 387  ECON 387

Secondary Cross-listing
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 30
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 30
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 522 (D2) ENVI 387 (D2) ECON 387 (D2)
Quantative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.
Attributes: ENVI Environmental Policy  MAST Interdepartmental Electives  POEC Comparative POEC/Public Policy Courses

ENVI 390 (S) The Nature of Nature

Cross-listings: ENVI 390  ENGL 394

Secondary Cross-listing
"Nature" is one of the commonest words in English. And yet what does it signify? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying attention to the difficulty of narrating processes that are often too big, too small, too quick or too slow for direct human apprehension. We'll also explore the ways popular nature writing mingles scientific reporting with implicit judgments about human identity, morality, and social organization. Writers studied will include Elizabeth Kolbert, N. Scott Momaday and Charles Darwin. We'll also consider the technological mediations of nature in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page online essay incorporating audiovisual materials. Active participation in class. Note that this course will be offered exclusively online.
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 16
Enrollment Preferences: English majors; Environmental Studies majors and concentrators.
Expected Class Size: 16
ENVI 397  (F) Independent Study of Environmental Problems
Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Prerequisites: approval by the Chair of Environmental Studies
Grading: yes pass/fail option, yes fifth course option
Distributions: No divisional credit

ENVI 404  (F) Coastal Processes and Geomorphology  (QFR)
Cross-listings: ENVI 404  MAST 404  GEOS 404
Secondary Cross-listing
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and
coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: ENVI 405 GEOS 405

Secondary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth’s landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, two 10-page lab reports, lab activities, and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 410 (S) The Cryosphere

Cross-listings: ENVI 410 GEOS 410

Secondary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

ENVI 412 (S) Senior Seminar: Perspectives on Environmental Studies (WS)

Cross-listings: MAST 402 ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14
Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 402 No divisional credit ENVI 412 No divisional credit

Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. There will be a multi-step capstone project that emphasizes writing, and there will be opportunities to revise and resubmit work.

Not offered current academic year

ENVI 420 (F) Architecture and Sustainability in a Global World (WS)

Cross-listings: ARTH 420 GBST 420 ENVI 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: This course will be taught in a hybrid mode, with both online (lecture) and in-person (discussion) elements.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 423 (F) Global Change Ecology

Cross-listings: ENVI 423 BIOL 413

Secondary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

ENVI 430 (S) Race, Identity, Nature (DPE) (WS)

Cross-listings: ENVI 430 AFR 390 AMST 430
From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

**Class Format:** This course is designated as remote. However, international students who want to take this course but need it to be designated as a hybrid course in order to do so may instead register for an independent study with Prof. Ayazi. As a hybrid course, this independent study will have the same requirements as the listed course, with the exception of a limited number of face-to-face meetings in Williamstown or Boston. Please contact Prof. Ayazi at ha5@williams.edu to discuss such an arrangement.

**Requirements/Evaluation:** Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%. Class will meet twice per week. Tu. meetings will be synchronous and Th. meetings will be asynchronous. Asynchronous components of the course include pre-recorded lectures, discussion boards, and other exercises that promote as much connection as possible within the constraints of remote education. Toward this end, synchronous meetings will center engaged discussion.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 430 (D2) AFR 390 (D2) AMST 430 (D2)

**Writing Skills Notes:** Emphasis on revision and writing process includes: One thesis paper at 15 pages (receiving critical feedback from professor and peers); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one research proposal (including thesis outline and annotated bibliography of primary texts) with critical feedback from professor; student presentations and roundtable discussion based on the final paper.

**Difference, Power, and Equity Notes:** By the end of this course, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation. In order to address such issues of difference, power, and equity, this course provides students with the necessary th

**ENVI 436 (S) Demigods: Nature, social theory, and visual imagination in art and literature, ancient to modern**

**Cross-listings:** ENVI 436 ARTH 436 CLAS 436

**Secondary Cross-listing**

Horse-men, cat-women, goat-men, tree-women, man-bulls, fish-girls, snake-people--cross-species compound creatures are everywhere in ancient Greek and Roman art, poetry, and culture. The conceptual or cognitive value of those "demigods" has changed over time. In art, demigods have
frequently been reduced to the status of decoration, and in literature, they have become generic markers of fantasy. But they are hardly without meaning. Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of nature, the origin of species, and the environment; and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides' Bacchai, Plato's Phaidros, and Lucretius' De rerum natura. We will consider in detail ancient theories of the origins of species as well as the relationship between nature and human culture. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian, and the rediscovery of ancient materialist theories of nature and culture. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Apres midi d'une faun," Aby Warburg's cultural-historical texts, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: Lecture and discussion. When possible, we will meet outdoors in person; when that is not possible, we will meet online.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: art history majors, graduate students in art history, classics majors, then any interested student

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Unit Notes: This course will satisfy the seminar requirement in art history.

Distributions: (D1)

ENVI 450 (F) Senior Seminar: Environmental Ethnography

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term Coded fieldwork notes and summary statements (8-10 pages); Final ethnographic snapshot/presentation (13-15 pages)

Prerequisites: ENVI 101; ENVI 102

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

Fall 2021
ENVI 454 (F) Climate Change Physiology

Cross-listings: BIOL 454  ENVI 454

Secondary Cross-listing
Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

Class Format: Synchronous discussions with in-person and remote option. Satisfies the distribution requirement for the Biology major.

Requirements/Evaluation: Evaluation will be based on class participation and several short papers.

Prerequisites: BIOL 203 or BIOL 205, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Biology seniors who have not yet taken a 400 level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 460 (S) Communicating Climate Change

This course is about environmental communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who either don't care about them or who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And finally, they are thoroughly entangled with almost every other problem we face, from pandemics to racism. How do we communicate clearly, persuasively, and responsibly about something so complex? This seminar brings together students who have specialized in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. We will focus on perhaps the greatest communication challenge of them all: climate change. Over the course of the seminar, we will explore research on climate change communication in a diverse array of fields while seeking to put our findings into practice locally. To help us learn new ways to communicate, we will meet with some successful, innovative environmental professionals in diverse fields. We will work together as a team to solve concrete communication problems here in our community.

Requirements/Evaluation: One 5-7-page paper; final collaborative project; participation.

Prerequisites: Environmental Studies 101.

Enrollment Limit: 19

Enrollment Preferences: Environmental/Maritime Studies majors and concentrators.

ENVI 478 (S) Cold War Landscapes

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, ENVI, and AMST majors if over-enrolled

Expected Class Size: 10

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives HIST Group C Electives - Europe and Russia HIST Group F Electives - U.S. + Canada

ENVI 491 (F) The Suburbs

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I’ll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.
Requirements/Evaluation:  typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Winter Study  ---------------------------------------------

ENVI 31 (W)  Senior Research and Thesis: Environmental Studies
To be taken by students registered for Environmental Studies 493-494.

Class Format: thesis

Grading: pass/fail only

Not offered current academic year

ENVI 99 (W)  Independent Study: Environmental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
MEMBERS OF THE CENTER FOR ENVIRONMENTAL STUDIES

Alex Apotsos, Visiting Lecturer in Geosciences
Henry W. Art, Professor of Biology and Environmental Studies
Sonya Auer, Visiting Assistant Professor of Biology
Lois M. Banta, Professor of Biology
Ron D. Bassar, Assistant Professor of Biology
Ben Benedict, Lecturer in Art
Mary K. Bercaw-Edwards, Associate Professor for Literature of The Sea, Williams-Mystic Maritime Studies Program
Julie C. Blackwood, Assistant Professor of Mathematics
Roger E. Bolton, Professor of Economics, Emeritus
Cory E. Campbell, instructional Technology Specialist
Phoebe A. Cohen, Associate Professor of Geosciences
Anthony J. Carrasquillo, Assistant Professor of Chemistry
David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies
Jose E.A. Constantine, Assistant Professor of Geosciences
Mea S. Cook, Associate Professor of Geosciences
David P. Dethier, Professor of Geosciences*
Joan Edwards, Professor of Biology
Laura Ephraim, Associate Professor of Political Science
Michael Evans, Assistant Director of The Zilkha Center for Environmental initiatives
Jessica M. Fisher, Assistant Professor of English
Antonia Foias, Professor of Anthropology and Sociology
Jennifer L. French, Professor of Spanish
Sarah S. Gardner, Lecturer in Environmental Studies
Matthew Gibson, Assistant Professor of Economics
Lisa Gilbert, Associate Professor of Geosciences and Marine Sciences
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;
• Understand the political and economic factors that inform, enable, and constrain environmental policy;
• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.
AFR 248 / HIST 248 The Caribbean: From Slavery to Independence
Taught by: Shanti Singham

INDEPENDENT STUDY AND WINTER STUDY
In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

MAST 397, 398 Independent Study: Maritime Studies

MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN MARITIME STUDIES
Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 104 (F) Oceanography

Cross-listings: MAST 104 GEOS 104 ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time). All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 211 (F)(S) Oceanographic Processes

Cross-listings: MAST 211 GEOS 210

Primary Cross-listing

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none
The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AMST Arts in Context Electives ENVI Humanities, Arts + Social Science Electives
MAST 263  (S)  The Global Ocean: An Interdisciplinary Introduction

Cross-listings:  MAST 263  ENVI 263

Primary Cross-listing

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation:  Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites:  none, open to all students

Enrollment Limit:  20

Not offered current academic year

MAST 265  (F)  Coral Reefs: Ecology, Threats, & Conservation

Cross-listings:  ENVI 265  BIOL 165  MAST 265

Primary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation:  Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites:  none, open to all students
Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don’t know where their clean water is piped in from. It covers the earth’s surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"—reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance—to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis.” Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya” Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"
MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

Cross-listings: ENVI 268  MAST 268

Primary Cross-listing

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

MAST 311 (F)(S) Marine Ecology

Cross-listings: MAST 311 BIOL 231

Primary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

MAST 324  (S)  Corals and Sea Level

Cross-listings: GEOS 324  MAST 324  ENVI 324

Secondary Cross-listing
In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Primary Cross-listing
Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars,
and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2)  ENVI 351 (D2)  PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**MAST 352 (F)(S) American Maritime History** (DPE) (WS)

**Cross-listings:** HIST 352  MAST 352

**Primary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MAST 402 (S)  Senior Seminar: Perspectives on Environmental Studies  (WS)
Cross-listings: MAST 402  ENVI 412
Secondary Cross-listing
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.
Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project
Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams
Enrollment Limit: 14
Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: required course for students wishing to complete the Maritime Studies concentration
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: senior Geosciences majors, then juniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action website.

EXPERIENTIAL EDUCATION
Coordinator: Paula Consolini

Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. EXPERIENTIAL EDUCATION Courses

AFR 212 (S) Jazz Theory and Improvisation I
Cross-listings: MUS 104 AFR 212

Secondary Cross-listing
The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

AMST 113  (F)  The Feminist Poetry Movement  (DPE) (WS)

Cross-listings:  ENGL 113  AMST 113  WGSS 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit:  19

Enrollment Preferences:  first years

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

AMST 236  (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236  AMST 236  ARTH 237  ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

AMST 238  (F)(S) Zen and the Art of American Literature

Cross-listings: REL 228  ENGL 239  AMST 238

Secondary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, A Tale for the Time Being. And we'll range far beyond the world of literature into
other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student’s final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 8- to 10-page essay.

Prerequisites: none
Enrollment Limit: 50
Enrollment Preferences: Students who preregister should fill out an expression of interest form at www.tinyurl.com/Engl239Fall2021 by May 20 (day after pre-reg closes). Preference will go to juniors and seniors, with a few seats saved for sophomores (10 max); no first years.

Expected Class Size: 50
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)

AMST 241 (S) Performing Masculinity in Global Popular Culture (DPE)
Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241
Secondary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of “males” at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: a short statement of interest will be solicited
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
THEA 241 (D2) WGSS 240 (D2) SOC 240 (D2) AMST 241 (D2) LATS 241 (D2)
Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

**AMST 259 (S) New England Environmental History  (WS)**

**Cross-listings:** AMST 259  HIST 259  ENVI 259

**Secondary Cross-listing**

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

**Requirements/Evaluation:** several short essays, final project

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**AMST 302 (F) Environmental Planning Workshop: Community-Based Experience**

**Cross-listings:** AMST 302  ENVI 302

**Secondary Cross-listing**

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

**Requirements/Evaluation:** Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

**Prerequisites:** ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

**Enrollment Limit:** 16

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 16

ANSO 205 (S) Ways of Knowing
An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? How do qualitative and quantitative approaches to social inquiry differ? How are they similar? What is the importance of history to sociological and anthropological research? How do social researchers use archival and other documentary materials to interpret society? What is the relationship between empirical data and the generation of social theory? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? We will approach these problems both abstractly and concretely, through readings in epistemology as well as a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from both inside and outside the academy. The course will also feature hands-on training in field methods, in which students design and undertake their own pilot field projects.

**Requirements/Evaluation:** full-participation in the seminar, an independent ethnographic project, several short written assignments, and a final research essay/proposal (roughly 30 pages of writing in total).
Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Spring 2022

SEM Section: 01  W 1:10 pm - 3:50 pm  Olga Shevchenko

ANSO 402  (S)  Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ANTH 371  (F)  Medicine and Campus Health in Disruptive Times  (DPE)  (WS)

Cross-listings: STS 370  WGSS 371  ANTH 371

Primary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20
**Enrollment Preferences:** Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

**ARTH 237 (S) Making Things Visible: Adventures in Documentary Work**

**Cross-listings:** SOC 236  AMST 236  ARTH 237  ENGL 237

**Secondary Cross-listing**

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

**Requirements/Evaluation:** full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 236 (D2) AMST 236 (D2) ARTH 237 (D1) ENGL 237 (D2)

**Attributes:** EXPE Experiential Education Courses  FMST Related Courses

**ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials**

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects.
Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Attributes:** EXPE Experiential Education Courses

**ARTS 385 (S) The Sculptural Costume and It’s Performance Potential**

**Cross-listings:** THEA 385 ARTS 385

**Primary Cross-listing**

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

**Requirements/Evaluation:** the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

**Prerequisites:** successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Art and Theater majors

**BIOL 211 (S) Paleobiology**

**Cross-listings:** GEOS 212 BIOL 211

**Secondary Cross-listing**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of
topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

BIOL 231 (F)(S) Marine Ecology

Cross-listings: MAST 311 BIOL 231

Secondary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

BIOL 302 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Primary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of
communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

CHIN 252  (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese.

All readings in English with some examples in Chinese.

Class Format: discussion

Requirements/Evaluation: class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 19

**Cross-listings:** ENGL 113 AMST 113 WGSS 113

**Primary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery
Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENGL 239  (F)(S)  Zen and the Art of American Literature

Cross-listings: REL 228  ENGL 239  AMST 238

Primary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn’t heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we’ll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We’ll read some Buddhist American literary texts, like Ruth Ozeki’s wondrous novel, A Tale for the Time Being. And we’ll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We’ll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we’ll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we’ll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student’s final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: Students who preregister should fill out an expression of interest form at www.tinyurl.com/Engl239Fall2021 by May 20 (day after pre-reg closes). Preference will go to juniors and seniors, with a few seats saved for sophomores (10 max); no first years.

Expected Class Size: 50

Grading: yes pass/fail option, no fifth course option

ENVI 100  (S)  Introduction to Weather and Climate

Cross-listings: GEOS 100  ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop a basic understanding of earth’s climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40
**ENVI 102 (S) Introduction to Environmental Science**

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

**Class Format:** Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

**Requirements/Evaluation:** Weekly short quizzes, three exams, lab assignments, participation

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first- and second-year students, Environmental Studies majors and concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Required course for Environmental Studies major and concentration

---

**ENVI 103 (F) Global Warming and Environmental Change**

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.
ENVI 104 (F) Oceanography

Cross-listings: MAST 104 GEOS 104 ENVI 104

Secondary Cross-listing
In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time). All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the
radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors
ENVI 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220, BIOL 220

Secondary Cross-listing
This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221, ENVI 222, LEAD 221

Secondary Cross-listing
Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific
complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

ENVI 250 (F) Environmental Justice (DPE)

Cross-listings: STS 250 ENVI 250
How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: juniors, seniors

ENVI 255 (F) Environmental Observation

Cross-listings: ENVI 255 GEOS 255

Secondary Cross-listing
To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project
Prerequisites: at least one prior course in GEOS or ENVI
Enrollment Limit: 20
Enrollment Preferences: sophomores, then GEOS majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

**Cross-listings:** AMST 302 ENVI 302

**Primary Cross-listing**
In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

**Requirements/Evaluation:** Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total
about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2021

SEM Section: 01  TR 11:20 am - 12:35 pm  Sarah Gardner
LAB Section: 02  T 1:00 pm - 4:00 pm  Sarah Gardner
LAB Section: 03  R 1:00 pm - 4:00 pm  Sarah Gardner

ENVI 312  (F)  Communities and Ecosystems  (QFR)

Cross-listings: ENVI 312  BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The laboratory component of the course will ensure hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives  EVST Living Systems Courses  EXPE Experiential Education Courses

Not offered current academic year

ENVI 324  (S)  Corals and Sea Level

Cross-listings: GEOS 324  MAST 324  ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level
How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 351  (F)(S)  Marine Policy  (DPE) (WS)

Cross-listings:  MAST 351  ENVI 351  PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization,
analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**GEOS 100 (S) Introduction to Weather and Climate**

**Cross-listings:** GEOS 100  ENVI 100

**Primary Cross-listing**

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** lab assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 40

**Grading:** no pass/fail option, no fifth course option

**GEOS 101 (F) The Co-Evolution of Earth and Life**

**Cross-listings:** GEOS 101  ENVI 105

**Primary Cross-listing**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive
overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

GEOS 102 (S) An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts.
People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate
change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately,
we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific
topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope
processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical
exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the
Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators
Expected Class Size: 40

GEOS 202  (F) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in
the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

**Requirements/Evaluation:** one hour test, lab work, and a final exam

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

GEOS 212 (S) Paleobiology

Cross-listings: GEOS 212 BIOL 211

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth’s climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams’ fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

GEOS 214 (S) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies
In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion.

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data.

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor.

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

GEOS 255  (F)  Environmental Observation

Cross-listings: ENVI 255  GEOS 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

GEOS 301  (F)  Geomorphology

Cross-listings:  GEOS 301  ENVI 205

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week
Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam
Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: GEOS and ENVI majors
Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option

GEOS 302  (S)  Sedimentology  (WS)

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of oceans and continents and how life evolved. Studying sedimentology links the solid Earth, ocean, atmosphere and biosphere, because sand, silt and mud preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the organisms that lived in and on them. We will investigate sediment composition, fluid mechanics, bedform analysis, and depositional environments. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day
Requirements/Evaluation: lab work, writing assignments, participation in discussions, and final exam.
Prerequisites: at least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor
Enrollment Limit: 15
**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

**GEOS 324 (S) Corals and Sea Level**

**Cross-listings:** GEOS 324 MAST 324 ENVI 324

**Primary Cross-listing**

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** short papers, labs, participation in discussion, and a research project

**Prerequisites:** GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geoscience majors, students who commit to the Spring Break trip

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**GEOS 411 (F) Geobiology**

Geobiology—the study of interactions between earth and life over geologic timescales—is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and
presenting the idea to the class.

**Requirements/Evaluation:** labs, short papers, final grant proposal and presentation

**Prerequisites:** GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

**HIST 259 (S) New England Environmental History (WS)**

**Cross-listings:** AMST 259 HIST 259 ENVI 259

**Secondary Cross-listing**

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

**Requirements/Evaluation:** several short essays, final project

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies concentrators

**Expected Class Size:** 15

Not offered current academic year

**HIST 264 (S) Environmental History**

**Cross-listings:** ENVI 229 HIST 264

**Secondary Cross-listing**

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.
This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people’s complex interactions with the oceans and seas.

LATS 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10
Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

MAST 311 (F)(S) Marine Ecology
Cross-listings: MAST 311 BIOL 231

Primary Cross-listing
We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project
Requirements/Evaluation: two tests, a research project, and a presentation
Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: none
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

MAST 351 (F)(S) Marine Policy (DPE) (WS)

**Cross-listings:** MAST 351 ENVI 351 PSCI 319

**Primary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut
Expected Class Size: 22
Grading: no pass/fail option, no fifth course option
Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)
Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.
Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**MUS 104  (S)  Jazz Theory and Improvisation I**

**Cross-listings:** MUS 104  AFR 212

**Primary Cross-listing**

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

**Class Format:** alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

**Requirements/Evaluation:** weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

**Prerequisites:** MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

**Enrollment Limit:** 15

**Enrollment Preferences:** prospective Music majors, then Jazz Ensemble members, then Music majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

**Distributions:** (D1)

**MUS 174  (S)  The Singing Voice: Structure, Styles and Meaning**

What makes an opera singer sound different than a pop singer? How does the sound of each contribute to musical meaning for listeners? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, importantly, through singing. We examine histories of styles, cultural contexts as well as basic physiology, acoustics and techniques. We will explore the basics of yodeling, Tuvan throat singing, and belting, among other styles. Familiarity with musical notation recommended.

**Class Format:** studio/brief lectures
Requirements/Evaluation: Two quizzes, regular journaling, a final paper (6-8 page) and a presentation.
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

MUS 205  (F)(S)  Composition I
Beginning courses in musical composition. Size and number of required projects will vary from 4 to 5. A group meeting per week will deal with the presentation, performance, and critique of the student's work in progress, analysis of models for composition, and discussion of topics in composition. There will be a weekly individual meeting with the instructor to discuss each student's progress. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is performed.
Requirements/Evaluation: completion of assignments, quality and timeliness of composition projects, attendance, and class participation
Prerequisites: MUS 201 (may be taken concurrently) or permission of instructor
Enrollment Limit: 6
Enrollment Preferences: Music majors; consideration of non-majors based on qualifications and experience
Expected Class Size: 4
Grading: no pass/fail option, no fifth course option
MUS 206  (F)(S)  Composition II

Beginning courses in musical composition. Size and number of required assignments will vary from 3 to 6 in addition to a possible full semester composition project. One to two group meetings per week will deal with the presentation of new assignments, analysis of models for composition, and performance and critique of work. Individual meetings may be added to deal with individual needs. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is actually performed.

Class Format: Remote in the fall semester.

Requirements/Evaluation: completion of assignments, quality and timeliness of composition projects, attendance, and class participation

Prerequisites: MUS 202 (may be taken concurrently) and permission of instructor

Enrollment Limit: 6

Enrollment Preferences: Music majors; consideration of non-majors based on qualifications and experience

Expected Class Size: 4

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

MUS 309  (S)  Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/range theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104B and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

PHLH 402  (S)  Senior Seminar in Public Health
The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into small research teams to interact with local organizations and investigate a contemporary real-life issue in public health. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Requirements/Evaluation:  active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper
Prerequisites:  completion of at least four courses counting towards the PHLH concentration
Enrollment Limit:  12

Enrollment Preferences:  senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

Expected Class Size:  10

Grading:  no pass/fail option, no fifth course option

Distributions:  No divisional credit

PSCI 118  (F)  Power to the People?
Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. The current pandemic, related economic distress, and social protests have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of
democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty—the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. This class is extensively hybrid by design; it is largely remote with some in-person sessions. Remote sessions include substantial collaboration with a similarly structured first-year course being taught by a sociologist at the University of North Carolina. Williams and UNC students will work together in small groups and will present their project findings to both classes.

Requirements/Evaluation: active class participation, three 4-page essays, group assignments, and class presentation

Prerequisites: first-year students

Enrollment Limit: 15

Enrollment Preferences: first-year students

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

Grading: pass/fail only

Materials/Lab Fee: cost of books

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

PSYC 21 (W) Psychology Internships

Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or another setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.
PSYC 352 (F) Clinical and Community Psychology
This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.

Requirements/Evaluation: field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper
Prerequisites: PSYC 252
Enrollment Limit: 15
Enrollment Preferences: senior, then junior, Psychology majors; you MUST have permission of instructor to register for this course
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: EXPE Experiential Education Courses, PHLH Reproductive, Maternal and Child Health, PSYC Area 5 - Clinical Psychology
Not offered current academic year

PSYC 372 (F) Advanced Seminar in Teaching and Learning
This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students’ learning? What does it take to be an educated person?

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal
Prerequisites: PSYC 232 or PSYC 272 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and those who plan to become teachers
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: EXPE Experiential Education Courses, PSYC Area 7 - Educational Psychology, TEAC Teaching Sequence Courses
Not offered current academic year

REL 110 (S) Religion in Everyday Life (WS)
When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people’s lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as “participant-observation”). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: Semester-long community-based field research. Regular in-class peer-review exercises.

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first-year students and sophomores; students interested in Religious Studies

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will learn a specific mode of qualitative/ethnographic writing through a semester-long field-based project. This involves many scaffolded assignments of field-based research and writing, for which they receive very regular feedback from the instructor, as well as extensive peer-review exercises. There will be a number of readings on writing style and technique, as well as class discussion and workshopping activities. The final essay will itself be developed in multiple steps.

REL 228 (F)(S) Zen and the Art of American Literature

Cross-listings: REL 228 ENGL 239 AMST 238

Secondary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn’t heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we’ll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We’ll read some Buddhist American literary texts, like Ruth Ozeki’s wondrous novel, *A Tale for the Time Being*. And we’ll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We’ll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we’ll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we’ll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student’s final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: Students who preregister should fill out an expression of interest form at www.tinyurl.com/Engl239Fall2021 by May 20 (day after pre-reg closes). Preference will go to juniors and seniors, with a few seats saved for sophomores (10 max); no first years.

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

SOC 240 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: a short statement of interest will be solicited
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

**SPEC 19 (W) Healthcare Internships**
Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which health care is delivered. Students will be introduced to fundamental concepts related to patient interviewing and history taking, diagnosis and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus- from the perspective of the individual provider-patient relationship and within a systems-level context. Didactic sessions for (on-campus students) will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally. Students will be introduced to concepts of health and wellness, epigenetics, and environmental influences that have a demonstrable, sustained impact on individuals before and after clinical symptoms of illness emerge. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and factors affecting the health of individuals and communities.

**Requirements/Evaluation:** 10-page paper
**Prerequisites:** not open to first-years
**Enrollment Preferences:** grade level and potential as applicant to professional programs
**Grading:** pass/fail only
**Attributes:** EXPE Experiential Education Courses
Not offered current academic year

**SPEC 21 (W) Experience in the Workplace; an Internship with Williams Alumni/Parents**
Field experience is a critical component of the decision to enter a profession. Through these field placements, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. In order to participate in this course, students must apply to the winter study internships listed in this syllabus. The expectation is that each student will observe and participate in some aspect of the profession for at least 30 hours per week, 6 hours per day for 5 days each week. It is also expected that the instructor will assign a specific project to be completed within the 3-4 week duration of the course depending upon appropriateness.

Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization, and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience.

**Teaching Associates:** Williams College Alumni/Parents will be recruited to become teaching associates for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course instructor in person or via telephone conference. Students will be required to read one of two books selected for this course. Bibliography: a bibliography of readings would be selected from such works as: What Should I do with My Life? by Po Bronson, 2003; Working by Studs Terkel, 2004.

**Requirements/Evaluation:** it is expected that students will complete assigned readings (read one of two books assigned to this course), write a daily
Journal, and write a 5- to 7-page expository review; evaluation will become public record as a resource for other students.

**Prerequisites:** interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific WS internships listed in the SPEC 21 syllabus; application are submitted via Handshake.

**Enrollment Preferences:** 1st priority--students applying for winter study internships listed in the SPEC 21 syllabus; 2nd priority--students developing independent Internships with Williams alumni/parents; first-years limited to applying for local internships.

**Grading:** pass/fail only

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

**SPEC 24 (W) Class of 1959 Teach NYC Urban Education Program**

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

**Class Format:** wsp internship

**Requirements/Evaluation:** Evaluation will be based on a journal and a 5-page paper

**Prerequisites:** prerequisites: Sophomore, Junior or Senior standing; not open to first-year students

**Enrollment Limit:** 12

**Enrollment Preferences:** statement of interest

**Grading:** pass/fail only

**Materials/Lab Fee:** $400

**STS 250 (F) Environmental Justice (DPE)**

**Cross-listings:** STS 250 ENVI 250

**Secondary Cross-listing**

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

**Requirements/Evaluation:** several short essays, final essay

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** juniors, seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

STS 370  (F)  Medicine and Campus Health in Disruptive Times  (DPE) (WS)

Cross-listings: STS 370  WGSS 371  ANTH 371

Secondary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observer participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20

Enrollment Preferences: Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2)  WGSS 371 (D2)  ANTH 371 (D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

THEA 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 THEA 330 COMP 330

Primary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film, and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

THEA 335  (F)  The Culture of Carnival

Cross-listings: COMP 338  THEA 335

Primary Cross-listing

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Requirements/Evaluation: regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: sophomores and first-year students

THEA 385  (S)  The Sculptural Costume and It’s Performance Potential

Cross-listings: THEA 385  ARTS 385

Secondary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation: the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

Expected Class Size: 12

Grading:  no pass/fail option,  no fifth course option

WGSS 113  (F)  The Feminist Poetry Movement  (DPE) (WS)

Not offered current academic year
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first years

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both about and with moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, professors Morgan McGuire (Computer Science), Bojana Mladenovic (Philosophy), and Shawn Rosenheim (English) have volunteered to serve as advisors to students interested in this field.

**AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film**

**Cross-listings:** WGSS 283 AMST 283 ENGL 286 AFR 283

**Secondary Cross-listing**

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AFR 321  (F)  Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently TikTok, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

AFR 325  (F)  Television, Social Media, and Black Women 'Unscripted'

Cross-listings: AFR 325  WGSS 325

Primary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household
names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

**Requirements/Evaluation:** class participation, response papers, one 10 page paper, and a formal class presentation

**Secondary Cross-listing**

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

**Requirements/Evaluation:** facilitated class discussion; weekly critical response papers; creative projects

**Prerequisites:** none

**AFR 339 (S) The Banlieue in Literature, Music, and Film (DPE) (WS)**

**Cross-listings:** RLFR 300 COMP 336 AFR 339

**Secondary Cross-listing**
The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"—as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do "banlieue films" and "banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

Prerequisites: RLFR 105 and above
Enrollment Limit: 14
Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Cross-listings: AMST 205  WGSS 203  LATS 203  ARTH 203

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 283 (D2) AMST 283 (D2) ENGL 286 (D2) AFR 283 (D2)

AMST 315 (S) Blackness 2.0: Race, Film and New Technologies

Cross-listings: AFR 315 STS 315 SCST 315 AMST 315

Secondary Cross-listing

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of 'new' technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the 'real' vs 'virtual' world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Requirements/Evaluation: participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option
Distributions: (D2)

AMST 333 (S) An American Family and "Reality" Television (WS)

Cross-listings: ARTH 310 WGSS 312 AMST 333

Secondary Cross-listing

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: Remote seminar. The course will feature synchronous online class meetings.

Requirements/Evaluation: class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper. Student presentations will be recorded offline and posted to GLOW.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: junior Art majors, followed by senior majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 310 (D1) WGSS 312 (D1) AMST 333 (D2)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

AMST 337 (S) Queer in the City (DPE)

Cross-listings: AFR 337 AMST 337 WGSS 346

Secondary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both ‘Thin’ and ‘Thick’ descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none
Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

AMST 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: LATS 346 AMST 346

Secondary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ANTH 225 (F) Ways of Seeing

This course examines the potential of images for revealing aspects of cultural normally obscured by the written word and for transmitting different, sometimes undervalued insights and knowledge of the social world. The central focus of this course is documentary film, and we will consider both the theory and practice of the documentary in the United States and abroad as it has evolved over time and as it is evident in contemporary filmmaking. In the course of the semester, we will examine some of the ways in which filmmakers, and ethnographic filmmakers in particular, have approached the task of documenting and understanding different aspects of social reality. Among the questions that we will consider are the following: What is the relationship between written texts and images? What is it that documentary films "document?" What is the relationship between images and stories, and should the techniques used in fiction films to construct voice, point of view, identification, narrative sequence, etc. apply as well in the creation of nonfiction films? What is the role of film in anthropology, and how does ethnographic filmmaking relate to anthropology and to the broader documentary film tradition? In the last part of the course, we will consider the proliferation of cell phone videos and platforms such as Youtube and Instagram and their significance for the documentary film genre more generally.

Class Format: The class will be taught remotely and will include pre-recorded lectures, conversations with filmmakers and producers, and weekly online discussions
ANTH 330  (F)  The Documentary Project: Ethnography and the Visual Narrative
The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people's lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or "engagement" between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about "truth" and "objectivity" in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

Requirements/Evaluation: develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual and audio content; participate in class critiques
Prerequisites:  SOC 236 or permission of instructor
Enrollment Limit:  10
Enrollment Preferences:  Anthropology and Sociology majors
Expected Class Size:  8
Grading:     no pass/fail option,     no fifth course option
Distributions: (D2)
Attributes:  FMST Core Courses

ARAB 401  (F)  Topics in Advanced Arabic: Contemporary Arab Cinema  (DPE) (WS)
The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: The course will be offered remotely (Final course format to be determined closer to the semester)
Requirements/Evaluation: class participation, daily writing and reflections, quizzes, blogs, leading a movie discussion, and a final project.
Prerequisites:  ARAB 302 or equivalent.
Enrollment Limit:  19
Enrollment Preferences:  if the course is overenrolled, preference will be given to Arabic majors.
Expected Class Size:  5-7
Grading:     no pass/fail option,     no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, a minimum of one speech, and a 5-7 pp. final research paper. The instructor will give daily feedback on students’ writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in these societies as positioned in a region torn by political, social, and religious conflicts.

ARAB 415  (S) Examine the Arab Cultural Landscape: What does Arabic Media Actually Say  (DPE) (WS)
How does Arabic media represent the Arab landscape? This course will examine Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss how issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

Class Format: This course will involve two 75-minute sessions in addition to a weekly discussion session with the TA.

Requirements/Evaluation: active participation in class, daily assignments, blogs, quizzes, presentation, final project

Prerequisites: ARAB 302

Enrollment Limit: 12

Enrollment Preferences: Arabic majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The course involves extensive writing in which learners reflect on cultural topics applicable to Arabic-speaking countries such as political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization.

Difference, Power, and Equity Notes: The course explores how Arabic media reflects how Arabic societies deal with issues such as political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. We will analyze how these societies engage in discussions around these topics, common to the region, but with different local perspectives.

ARTH 203  (S) Chicana/o/x Film and Video
Cross-listings: AMST 205  WGSS 203  LATS 203  ARTH 203

Secondary Cross-listing
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicans in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings
and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

**Secondary Cross-listing**

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer’s billowing skirts, the sight of Niagara Falls, the arrival of
a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's The Act of Killing (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

**ASIA 228 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films (DPE) (WS)**

**Cross-listings:** ASIA 228 COMP 297 CHIN 428

**Secondary Cross-listing**

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

**Prerequisites:** None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

**Enrollment Limit:** 10

CHIN 226 (S) Chinese Film and Its Significant Others (DPE)
Cross-listings: CHIN 226  COMP 296
Primary Cross-listing

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2019, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: All regular course meetings will be conducted ONLINE with mostly a synchronous mode of instruction. Students are also expected to complete asynchronous preparations (view the films and Panopto lecture clips, read scholarship, and contribute to the discussion board) before the regular class hour. All materials are posted on GLOW. For full information, please contact the instructor.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading and recorded lectures (Graded as Complete or Incomplete); 3) two short papers (3-5 pages); 4) two peer review papers (1-2 pages); and 5) the final project (including a presentation, and a paper or other form of project).

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we’ll focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Class Format: This class will have a hybrid format: on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.

Requirements/Evaluation: attendance & participation, a few short response assignments, two 5-page papers, in-class test

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students majoring or considering a major in comparative literature

Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 296 (S) Chinese Film and Its Significant Others  (DPE)

Cross-listings: CHIN 226  COMP 296

Secondary Cross-listing

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2019, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: All regular course meetings will be conducted ONLINE with mostly a synchronous mode of instruction. Students are also expected to complete asynchronous preparations (view the films and Panopto lecture clips, read scholarship, and contribute to the discussion board) before the regular class hour. All materials are posted on GLOW. For full information, please contact the instructor.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading and recorded lectures (Graded as Complete or Incomplete); 3) two short papers (3-5 pages); 4) two peer review papers (1-2 pages); and 5) the final project (including a presentation, and a paper or other form of project).

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 226 (D1) COMP 296 (D1)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the clashes and negotiations between Western media technological modernities and Chinese indigenous understanding of shadows, visuality, and sound. By discussing various films produced from mainland China, Hong Kong, Taiwan, and other diaspora areas from 1920 to now, this course asks students to explore how cinema invokes (and erases) differences, and consolidates (and challenges) hegemonic notions of nation, gender, and class.

COMP 297 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films  (DPE) (WS)

Cross-listings: ASIA 228  COMP 297  CHIN 428

Secondary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories,
we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

**Prerequisites:** None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428.

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 228 (D1) COMP 297 (D1) CHIN 428 (D1)

**Writing Skills Notes:** Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

**COMP 298 (S) Introduction to French and Francophone Film**

**Cross-listings:** RLFR 228 COMP 298

**Secondary Cross-listing**

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

**Requirements/Evaluation:** response papers, midterm paper, TV show, colloquium

**Prerequisites:** RLFR 201, 202, or 203, or by permission of instructor

**Enrollment Limit:** 15

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

COMP 336 (S) The Banlieue in Literature, Music, and Film  (DPE) (WS)

Cross-listings: RLFR 300  COMP 336  AFR 339

Secondary Cross-listing

The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"—as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do "banlieue films" and "banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) COMP 336 (D1) AFR 339 (D2)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

COMP 341 (F) Cinematic Representations of Work and Migration after the Wall

Cross-listings: WGSS 341  COMP 341

Primary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore's Glory, Le Havre and Time Out.

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper
ENGL 204  (S)  Hollywood Film

For almost a century, Hollywood films have been the world’s most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We’ll examine both the characteristic pleasures provided by Hollywood’s dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, *12 Years a Slave* and *Get Out*.

**Requirements/Evaluation:** Two 2-page essays, two editing exercises, a midterm, and a final exam

---

ENGL 213  (S)  Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build its contract with listeners? What’s the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We’ll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of *This American Life*, *RadioLab*, *Love and Radio*, and *Snap Judgment*), but most of our time—and this is a time-consuming course—will be spent making and critiquing each other’s pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

**Requirements/Evaluation:** Five short audio pieces; attendance and active participation.

ENGL 234  (F)  The Video Essay

While people today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think with the medium, exploiting the resources of film and video in their efforts to understand how these media work on viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in the use of Adobe Premiere Pro, students will spend the term alternately making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required. Note that the course meets entirely online.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner. All meetings will be online.

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays.

Prerequisites: permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: sophomores; first-year students; English majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ENGL 286  (F)  Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283  AMST 283  ENGL 286  AFR 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

ENGL 367  (F)  Documentary Fictions

Cross-listings: ARTH 367  ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

LATS 203  (S)  Chicana/o/x Film and Video

Cross-listings: AMST 205  WGSS 203  LATS 203  ARTH 203

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

LATS 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: LATS 346 AMST 346

Primary Cross-listing
This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

MUS 149 (S) The Language of Film Music

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Class Format: This is a remote course that includes synchronous class meetings.

Requirements/Evaluation: Course evaluations include: several short writing and creative assignments, two quizzes, a midterm essay, and a final creative project. Off-campus students should consult the professor about computer hardware requirements for the completion of creative projects.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: given to juniors and seniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: FMST Core Courses
MUS 276  (F)  Music and the Internet
Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: discussion
Requirements/Evaluation:  4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects
Prerequisites: none
Enrollment Limit:  19
Expected Class Size:  14
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)
Attributes:  FMST Core Courses

RLFR 206  (F)  The Outsider in French & Francophone Film Adaptations of Literary Texts  (DPE)
In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Requirements/Evaluation:  three response papers, one short essay on film adaption, one video essay with a student partner
Prerequisites:  students should have taken RLFR 105 or above, or placement test, or by permission of instructor
Enrollment Limit:  16
Enrollment Preferences:  Comparative Literature majors, Africana Studies concentrators, French majors and certificates
Expected Class Size:  12
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D1)  (DPE)
Difference, Power, and Equity Notes:  This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.
Attributes:  FMST Core Courses

SOC 212  (S)  Understanding Social Media

Cross-listings: STS 214  SOC 212
Over just the last twenty years—beginning with Friendster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram—the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media’s effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students’ own experiences with social media, the course will illuminate social media’s benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

**Class Format:** hybrid

**Requirements/Evaluation:** attendance and participation, team assignments, two 5-page writing assignments, final exam

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**STS 276 (F) Music and the Internet**

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

**Class Format:** discussion

**Requirements/Evaluation:** 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 14

**Grading:**

**Distributions:** (D1)

**STS 315 (S) Blackness 2.0: Race, Film and New Technologies**

Cross-listings: AFR 315  STS 315  SCST 315  AMST 315

**Secondary Cross-listing**

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of ‘new’ technologies upon the
broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the 'real' vs 'virtual' world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

**Requirements/Evaluation:** participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Africana Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**WGSS 203 (S) Chicana/o/x Film and Video**

**Cross-listings:** AMST 205 WGSS 203 LATS 203 ARTH 203

**Secondary Cross-listing**

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

**Class Format:** Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

**Requirements/Evaluation:** one short paper, mid-term exam, final exam and take home essays

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Art majors; LATS concentrators

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film**

**Cross-listings:** WGSS 283 AMST 283 ENGL 286 AFR 283

**Primary Cross-listing**

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as
Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

**WGSS 312  (S)  An American Family and "Reality" Television  (WS)**

**Cross-listings:** ARTH 310  WGSS 312  AMST 333

**Secondary Cross-listing**

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Class Format:** Remote seminar. The course will feature synchronous online class meetings.

**Requirements/Evaluation:** class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper. Student presentations will be recorded offline and posted to GLOW.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** junior Art majors, followed by senior majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 310 (D1) WGSS 312 (D1) AMST 333 (D2)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**WGSS 325  (F)  Television, Social Media, and Black Women 'Unscripted'**
Cross-listings: AFR 325  WGSS 325

Secondary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Cross-listings: WGSS 341  COMP 341

Secondary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Meitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore's Glory, Le Havre and Time Out.

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: a 200-level ENGL or COMP course, or permission of instructor

WGSS 346  (S)  Queer in the City  (DPE)
In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both ‘Thin’ and ‘Thick’ descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

**AMST 236 (S) Making Things Visible: Adventures in Documentary Work**

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian’s role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether “objective representation” is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

AMST 241 (S) Performing Masculinity in Global Popular Culture  (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: a short statement of interest will be solicited
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option

AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 THEA 330 COMP 330

Secondary Cross-listing
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

COMP 111  (F)(S) The Nature of Narrative  (WS)

Cross-listings:  COMP 111  ENGL 120

Primary Cross-listing

Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic and/or The Tale of Genji), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Garcia-Marquez, Toni Morrison, and/or James Baldwin), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Asghar Farhadi). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation:  Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences:  Students considering a major in Comparative Literature

Expected Class Size: 18

Grading:  yes pass/fail option,     no fifth course option
COMP 232 (S) Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (DPE)

Cross-listings: WGSS 200 COMP 232

Primary Cross-listing

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first-century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Hoeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. All readings and discussions in English.

Class Format: This will be a remote course for all students, whether they are on campus or not. We will convene synchronously via web-conferencing, with an emphasis on group discussion. There will also be opportunities for students to engage with online activities both during and between our synchronous sessions. Remote office hours will provide even more opportunities for follow-up, questions, and further discussion.

Requirements/Evaluation: active participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Comparative Literature and Women's, Gender & Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 200 (D2) COMP 232 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in modern Scandinavia. The content examines the effects of class, race, ethnicity, gender, and sexuality on social (in)equalities among citizens, institutions, communities, and identities. The course also employs critical tools to teach students how to interrogate Scandinavian diversity and modernity, through reading, film analysis, discussion, and writing.

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. Conducted in English.

Class Format: This seminar will be taught online.

Requirements/Evaluation: active class participation, oral presentations on the reading materials, three 5- to 8-page papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors, or those considering a major in Comparative Literature

Expected Class Size: 12

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an oral presentation; a final paper (6 pages)

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 THEA 330 COMP 330

Secondary Cross-listing
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafrcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none
Enrollment Limit: 12
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option

ENGL 120 (F)(S) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Secondary Cross-listing
Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic and/or The Tale of Genji), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Garcia-Marquez, Toni Morrison, and/or James Baldwin), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Asghar Farhadi). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Students considering a major in Comparative Literature
Expected Class Size: 18
Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**ENGL 214 (S) Writing for Stage and Screen**

**Cross-listings:** THEA 214  ENGL 214

Secondary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

**ENGL 237 (S) Making Things Visible: Adventures in Documentary Work**

**Cross-listings:** SOC 236  AMST 236  ARTH 237  ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.
ENGL 368  (S)  Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers—as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ordinary*, *Six Shooter*, *In Bruges* and *The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Requirements/Evaluation: Two long papers, regular short responses and discussion board postings, class participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

Enrollment Limit: 15

Enrollment Preferences: English majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ENVI 368  (F)  Technology and Modern Society

Cross-listings: ENVI 368  SOC 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity,
technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

GERM 251 (F) Dolls, Puppets and Automatons (WS)

Cross-listings: GERM 251 COMP 251

Secondary Cross-listing

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. Conducted in English.

Class Format: This seminar will be taught online.

Requirements/Evaluation: active class participation, oral presentations on the reading materials, three 5- to 8-page papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors, or those considering a major in Comparative Literature

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products -- ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: a short statement of interest will be solicited
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film
This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through
the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery—especially in the context of immigration and coming of age—as they are represented in texts from France, Québec, and the Caribbean.

**Requirements/Evaluation:** class participation, grammar exercises, group discussion leading, two short papers, and final project

**Prerequisites:** exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French Majors and certificate students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)**

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals’ skin tone. The study showed that “Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts” (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

**Requirements/Evaluation:** essays, oral presentation, participation

**Prerequisites:** RLSP 105, placement exam results, permission from the instructor or the Department Chair

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish major

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

**Attributes:** FMST Related Courses GBST Latin American Studies Electives

SOC 219  (S)  Images and Society

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images--and even vision itself--are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

Requirements/Evaluation: active class participation, several response papers, a midterm paper and a take-home final

Prerequisites: none; open to all

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 214 (D1) ENGL 214 (D1)

Attributes: FMST Related Courses

Not offered current academic year

THEA 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 241 (D2) WGSS 240 (D2) SOC 240 (D2) AMST 241 (D2) LATS 241 (D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 THEA 330 COMP 330

Primary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film, and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafrcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

WGSS 200 (S) Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (DPE)

Cross-listings: WGSS 200 COMP 232

Secondary Cross-listing

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), design (IKEA to H&M), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jónsson, and Peter Heeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. All readings and discussions in English.

Class Format: This will be a remote course for all students, whether they are on campus or not. We will convene synchronously via web-conferencing, with an emphasis on group discussion. There will also be opportunities for students to engage with online activities both during and between our synchronous sessions. Remote office hours will provide even more opportunities for follow-up, questions, and further discussion.

Requirements/Evaluation: active participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Comparative Literature and Women's, Gender & Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 200 (D2) COMP 232 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in modern Scandinavia. The content examines the effects of class, race, ethnicity, gender, and sexuality on social (in)equalities among citizens, institutions, communities, and identities. The course also employs critical tools to teach students how to interrogate Scandinavian diversity and modernity, through reading, film analysis, discussion, and writing.

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

- AFR 360 Political Thought Frantz Fanon
- ARTH 254 Manet to Matisse
- HIST 390 Haitian and French Revolutions
- RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the
major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 101 (F) Introduction to French Language and Francophone Cultures (DPE)

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and
increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Requirements/Evaluation:  active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

Prerequisites: none; for students who have never formally studied French; students who have previously studied French (in any formal course, at any level) must take the French Placement Test in late August or early September

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: RLFR 101-102 is a year-long course; credit granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

Fall 2021

SEM Section: 01  M-F 9:00 am - 9:50 am  Brian Martin

RLFR 102  (S) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Class Format: This class meets 5 times a week from M-F. Students are required to attend class from Monday to Friday.

Requirements/Evaluation: participation, online homework, mid-semester and final projects, short writing assignments

Prerequisites: RLFR 101, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2022

LEC Section: 01  M-F 9:00 am - 9:50 am  Sophie F. Saint-Just

RLFR 103  (F) Intermediate Studies in French Language and Francophone Cultures

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures
around the world.

**Class Format:** Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on speaking practice in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

**Requirements/Evaluation:** participation, online homework, mid-semester and final projects, short writing assignments

**Prerequisites:** RLFR 101-102, or by Placement Test, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference will go to first and second year students. Statement of interest solicited if overenrolled.

**Expected Class Size:** 12

**Grading:**  yes pass/fail option,  no fifth course option

**Unit Notes:** students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200-level and above, or if they anticipate studying in France or a Francophone country during their junior year

**Distributions:** (D1)

**RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French**

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

**Class Format:** Both sections of 104 will convene three times per week: two sessions with the instructor, and one session with the TA with an emphasis on speaking practice in small groups. Small group TA meetings for both sections will be scheduled at agreed-upon times once enrollment is established.

**Requirements/Evaluation:** short weekly readings, participation, online homework, three quizzes, three writing assignments and one final project.

**Prerequisites:** RLFR 103, or by placement test, or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference will go to students who have taken 103 in Fall 2020. Statement of interest solicited if overenrolled.

**Expected Class Size:** 19

**Grading:**  yes pass/fail option,  no fifth course option

**Distributions:** (D1)

**RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture**

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write a short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. The three themes love, fear, and France's colonial past will be the course's organizing principles. A small section of our course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Conducted in French

**Requirements/Evaluation:** class participation, grammar exercises, 2 five-page papers, 1 presentation
**Prerequisites:** RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction** (DPE)

**Cross-listings:** RLFR 106 COMP 107

**Primary Cross-listing**

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2020, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Emaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

**Requirements/Evaluation:** active class participation, grammar exercises, two short papers, midterm, and final paper

**Prerequisites:** Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**RLFR 106 (D1) COMP 107 (D1)**

**Difference, Power, and Equity Notes:** This course centers on a critical examination of difference, power, and equity in French film & fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich & poor, soldiers & civilians, nations & colonies, men & women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

**Spring 2022**

**SEM Section:** 01 TR 9:55 am - 11:10 am Brian Martin

**RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film**

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you
will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery—especially in the context of immigration and coming-of-age—as they are represented in texts from France, Québec, and the Caribbean.

**Requirements/Evaluation:** class participation, grammar exercises, group discussion leading, two short papers, and final project

**Prerequisites:** exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French Majors and certificate students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)**

**Cross-listings:** RLFR 202, COMP 292, WGSS 201

**Primary Cross-listing**

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malia, Angelo, Pontecorvo, and Duras. Conducted in French.

**Requirements/Evaluation:** active class participation, midterm exam, and two to three papers (of 3-5 pages each)

**Prerequisites:** exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 202 (D1) COMP 292 (D1) WGSS 201 (D2)

**Difference, Power, and Equity Notes:** This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

---

**RLFR 205 (S) On Strike: Workers and Revolutions in the French Republic**

The recent "yellow vests" (gilets jaunes) protests in France have attracted international attention to the experiences of French workers. Yet these
protests are only the latest example in a series of workers’ movements that have shaped French identity. From the revolutions of 1830 and 1848, to the Popular Front of the 1930s, to the general strike that fueled the events of May 1968, workers have played a significant role in determining France’s sociocultural values and political orientation. In this course, we will study representations of workers in literary and filmic texts dating from the late nineteenth century to the present. We will consider how depictions of the worker have evolved amid changing sociocultural conditions in France: for instance, the arrival of immigrants from such countries as Spain, Italy, and Portugal, and later from the Maghreb; the entry of women into the workforce; the disappearance of the rural farm worker, or paysan; the creation of a nuclear power grid; and deindustrialization. Finally, we will examine how the memory of workers is preserved in twenty-first-century France. Conducted in French.

Requirements/Evaluation: class participation, reaction papers, group discussion leading, and a final project

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Requirements/Evaluation: three response papers, one short essay on film adaption, one video essay with a student partner

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

Attributes: FMST Core Courses

Not offered current academic year

RLFR 207 (F) Urban Ecologies of the French-Speaking World: Sustainability and the City in the 21st Century

In the twenty-first century, urban populations around the world have continued to grow, all while the climate crisis has become ever more urgent. The fact that more than 55% of Earth’s inhabitants live in urban settings today means that cities will be important actors in the fight against climate change moving forward. In this course, we will examine how cities from the French-speaking world (including in North America, Europe, and Africa, as well as along the Pacific Rim) are enacting solutions for sustainable living in their midst. Taking a cultural studies approach, we will examine a variety of sources—including literature, videos and films, press articles, government documents, academic analyses, websites, and artistic productions, among others—to understand the challenges each of these cities faces and the solutions each has introduced. In so doing, we will study how site-specific realities, such as (eco)tourism, the legacy of colonialism and imperialism, relations with indigenous populations, and inequalities (such as those of race, sex, gender expression, class, age, and ability), are interwoven with questions of sustainable development and ecological living. Conducted in French.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: participation, 3 reactions papers, 1 group presentation, final project
RLFR 208 (S) Queens, Crusaders and Cannibals: Gender, Race and Religion in Medieval and Renaissance France

The intersection of gender, race, and religion is at the heart of contemporary political and social debates. How to build a nation and how to live together were also key questions for Medieval and Renaissance writers. In this introductory course in Early Modern Literature, we will study how literary works from the 11th to the 16th centuries represented conflicting debates on gender, race, and religion, from the Crusades opposing Christians and Muslims, to the Wars of Religion opposing Catholics and Protestants. We will explore how these concepts were intertwined in courtly love poems and chivalric novels in Europe, and how they were redefined in "humanist" writings and travel narratives during the European colonization of the Americas. Through an investigation of epic poems, allegories, tales, sonnets, novels, travel narratives, and essays by Marie de France, Christine de Pisan, Pierre de Ronsard, Louise Labé, François Rabelais, Michel de Montaigne and Marguerite de Valois, students will compare cultural, political, and ideological debates in Early Modern France with 21st-century questions on racism, sexism and discrimination.

Requirements/Evaluation: Active participation, weekly written responses (1 page), 2 oral presentations (5 min), and final project.

Prerequisites: Exceptional performance in RLFR 105, strong performance in RLFR 106, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

RLFR 210 (F) Scientific Selves: Medicine, Technology, and Identity in Early Modern France

Cross-listings: STS 211 RLFR 210

Primary Cross-listing

The early modern period has long been associated with scientific discovery and shifting ideology in France. From Copernicus on, thinkers such as René Descartes, Blaise Pascal, and Antoine Lavoisier helped advance the Scientific Revolution, which led to medical and technological breakthroughs, as well as important advances in our understanding of the world and our solar system. This course examines the role that France played in pursuing such discoveries, as well as the ways newfound knowledge impacted notions of belonging and alterity. How did the Scientific Revolution and French colonization lead to the creation of social, cultural, and medical "others"? How did scientific discourse permeate verbal and visual expression and depict those who did not fit into normative paradigms of gender, sexuality, ability, ethnicity, belief, and culture? What avenues for self-expression and definition were available to those whom society excluded? What parallels can we see with twenty-first-century questions of political activism, social justice, sciences, and technology? To explore these questions, we will analyze literary texts, visual representations, and historical documents, such as medical treatises, scientific diagrams, and texts on new technologies. Conducted in French.

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
RLFR 211 (F) Explorers, Missionaries, Colonizers: French Travel Narratives in the Age of Discovery (DPE)

Often referred to in European history as the "Age of Discovery" or the "Age of Exploration," the 15th and 16th centuries saw the rise of overseas exploration from Europe to the Americas, Asia and Africa. These travels both contributed to the expansion of the known world for Europeans and also laid the foundations for commercial routes and colonisation. French travelers played a key role in this process and documented their journeys in detailed narratives. After reading short excerpts of earlier works that built the travel narrative genre, such as Ibn Battuta's Travels and Marco Polo's Book of Marvels, we will read longer excerpts from Jacques Cartier's Brief narration of the Navigation to the Islands of Canada, Jean de Léry's History of a Voyage to the Land of Brazil, Pierre Belon's Voyage to the Levant, and study the maps that were created during this time period. We will analyze the representation of the journey itself, the descriptions of the lands traveled to and their inhabitants, and also the enunciation of the goals of such travels. We will see how a rhetoric of fascination, wonder and curiosity is intertwined with economical, political and religious agendas. There is no "official" travel narrative written by a woman in this time period: we will wonder why and study the representation of women in these texts. Conducted in French.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on speaking practice in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Participation, weekly readings, online homework, one-page written responses or audio-recorded responses every two weeks, presentation of a visual document, final project.

Prerequisites: Exceptional performance in RLFR 105, strong performance in RLFR 106, or by Placement Test, or Permission of the Instructor.

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference given to French Majors & French Certificate Students, and those with compelling justification for admission (statement of interest required).

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course qualifies for a DPE requirement because it addresses the early history of French colonization. The 15th and 16th century travel narratives we will focus on will allow students to critically engage with the first interactions of French people with indigenous populations and inhabitants of the Americas, Africa and India, with the religious and commercial projects undertaken by France vis-à-vis these territories, and with the racial and power dynamics that structure these narratives.

Not offered current academic year

RLFR 212 (S) Scandalous News: Media and Transgression in Pre-Revolutionary France

Today's twenty-four-hour news cycle bombards us with scandalous stories. On our smartphones, tablets, and screens, personal transgressions and their political consequences loom large. In this constant state of media immersion, scandal and its communication have come to define our time. Yet centuries ago in Pre-Revolutionary France, scandalous news played an even more crucial role, in a society centered on obedience to monarchy and monolithic institutions. In this course, we will consider how institutionalized codes of gender, social class, and religion shaped individual identity, how those who broke from these codes created individual autonomy, and how the scandals they caused were communicated to others. To pursue these questions, we will analyze literature, journalism, and legal texts that document scandalous figures and compare these early modern scandals with those of the twenty-first century.

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20
RLFR 215 (F) The French Adventure: Word, Sound, and Image in the Digital Age

The French Adventure examines celebrated French literary texts (from the Middle Ages to Modernity) that draw on the theme of adventure, putting them into dialogue with their graphic novel and filmic adaptations (from the twentieth and twenty-first centuries). This course seeks to explore the phenomena of word (written or spoken), image (still or moving), and sound, as well as their interactions in today's environment of multimedia and digital immersion. Why have we seen an explosion of graphic novels and films depicting French literary classics in recent decades? How can these visual and audiovisual renderings enhance our appreciation for and understanding of written texts, and what aspects of the written word remain untranslatable to the world of the image? To address these questions, we will study a series of literary texts that depict historical moments from the late Middle Ages, to Absolute Monarchy, to the Belle Époque. From our visual vantage point of the twenty-first century, we will gain familiarity with the defining figures and events that these texts represent, from the fifteenth to the twentieth centuries. At the same time, we will interrogate the French-language graphic novel adaptations of each text, as well as portions of American-made filmic representations to consider questions of patrimoine, visual culture, and (trans)national identity.

Conducted in French.

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, discussion leading, and final paper

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 220 (S) Fairy Tales: Love and Politics at the Sun King’s Court

This course explores the literary and historical development of love and politics in 17th-century France. These two motifs dominated courtly life at Versailles during the reign of Louis XIV, the Sun King. Since cultural and artistic creations tend to dialogue with social circumstances, the literature of this time period—which critics have sometimes called the “Grand Siècle”—develops different schools of thought on the interactions between politics and love. Some authors approached these interactions from an idealistic or innocent perspective, while others had a more pessimistic or realistic outlook. Together, we will examine why and how each trajectory formed while also investigating the roles of literary genre and authorial gender. As part of our explorations, students will compose their own, original fairy tales and will also adapt a written tale into an in-class theatrical performance.

Conducted in French.

Requirements/Evaluation: active class participation, quizzes, a midterm paper, an original fairy tale, an in-class performance of the fairy tale in groups

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 222 (S) Sexuality and Seduction in Nineteenth and Twentieth-Century France (DPE)
In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert.

**Requirements/Evaluation:** active class participation, two shorter papers, a midterm, and a longer final paper

**Prerequisites:** exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** French majors and certificate students, Women's, Gender, and Sexuality Studies majors, and those with compelling justification for admission; if the course is overenrolled, students will submit an online form

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 224 (D1) WGSS 224 (D1)

**Writing Skills Notes:** As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

**Difference, Power, and Equity Notes:** As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

**RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film**  (DPE)

**Cross-listings:** RLFR 225 COMP 224

**Secondary Cross-listing**

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. *Readings and Discussions in English.*

**Requirements/Evaluation:** active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)
Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 225 (D1)  COMP 224 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

Not offered current academic year

RLFR 226  (S)  Black France/France Noire  (DPE)

Cross-listings: AFR 226  RLFR 226

Primary Cross-listing

On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French and Africana Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 226 (D2)  RLFR 226 (D1)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it focuses on "the shaping of social differences, dynamics of unequal power, and processes of change" through the lenses of historical colonial legacies, race, gender, citizenship among other questions.

Not offered current academic year

RLFR 228  (S) Introduction to French and Francophone Film

Cross-listings: RLFR 228  COMP 298

Primary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of
rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembène, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 15

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 229 Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like “Black,” “noir” and “race” have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

Attributes: AFR Core Electives GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

RLFR 238 (S) Le Moyen Âge en images: Decoding the Middle Ages

This seminar investigates questions of visual culture and textual analysis in the Middle Ages. Although different from today's multimedia and digital environment, the Middle Ages boasted its own form of visual culture that will enable us to draw meaningful connections between medieval literature and history and modern-day debates on gender and sexuality. To explore these connections, we will study literary texts from the 12th-16th centuries in modern French translation, making comparisons to bandes dessinées that seek to visualize each text from a twenty-first-century perspective. We will investigate the points of overlap and divergence between the original texts and accompanying comics to ask why and how today's artists are returning to the literature and culture of the Middle Ages, especially in a time of globalization and technological immersion. For example: How might our findings inform our outlook on international politics, as well as gender-based forms of activism, such as the #MeToo movement, among other forms of social and political engagement? Conducted in French

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely.
We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

**Requirements/Evaluation:** active class participation, essays, online homework assignments, mid-semester presentation: une bande dessinée, and final paper

**Prerequisites:** successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**RLFR 260 (F) Francophone Graphic Novels (DPE)**

**Cross-listings:** RLFR 260 COMP 260

**Primary Cross-listing**

In this class we will read contemporary graphic novels and bandes dessinées from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. Conducted in French.

**Requirements/Evaluation:** weekly 1-page response papers, two short 4-5-page papers, presentation and final 7-8-page research paper

**Prerequisites:** RLFR 105, 106, by placement or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students, Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 260 (D1) COMP 260 (D1)

**Difference, Power, and Equity Notes:** The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

**RLFR 300 (S) The Banlieue in Literature, Music, and Film (DPE) (WS)**

**Cross-listings:** RLFR 300 COMP 336 AFR 339

**Primary Cross-listing**

The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, “urban culture”--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do “banlieue films” and
"banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

**Requirements/Evaluation:** 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 14

**Enrollment Preferences:** French majors and certificate students, Africana and Comparative literature students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) COMP 336 (D1) AFR 339 (D2)

**Writing Skills Notes:** To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

**Difference, Power, and Equity Notes:** This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

**Attributes:** FMST Core Courses

---

**RLFR 302 (S) Monsters of the Renaissance**

Where did monsters appear before comics and blockbusters? Before cinematic ghosts, vampires, and zombies, the French Renaissance popularized the Scythian Lamb, the Monk Fish, the Monopod, the Wind-Eaters from the Island of Ruach, and the mythic giants Gargantua and Pantagruel. The Latin word monstrum referred to a prodigy that did not fit the laws of nature. Thus, the monster not only generated wonder, curiosity, and fear, but both challenged and disrupted normative social values. In this course, students will analyze novels, travel narratives, medical treatises, essays, and epic poems from 16th-century France, when writers, doctors, and travelers developed a critical reflection on monstrosity in order to deal with otherness. This encompassed fantastic creatures, non-human beings, and natural phenomena, as well as people whose gender, race, religion, and bodies deviated from established norms. In this course, students will think critically about race, gender, and disability, and study the complexities of fear, disgust, wonder, and fascination. Readings to include classical texts by Homer and Ovid, medieval texts like the Legend of Saint George and the Dragon, and Renaissance texts by Francois Rabelais, Jean de Léry, Marguerite de Navarre, Ambroise Paré, Michel de Montaigne, and Agrippa d'Aubigné.

**Requirements/Evaluation:** active participation, weekly written responses, midterm exam and final project

**Prerequisites:** exceptional performance in RLFR 106, or an RLFR 200-level course, or by Placement Test, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and French certificate students, and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**RLFR 305 (F) Where We Are & Where We Go: Spaces & Places of Contemporary France**

How do people in France give meaning to the spaces they inhabit or move through? What does it mean to be from "here" or "there"? Through contemporary French literature and cultural analysis, we will explore these questions in the urban landscapes of major French cities, including Lyon, Marseilles, Nantes, and Angoulême. We will focus on literary representations of the home, the street, the park, the grocery store, and the train, and discuss the ways videos, press articles, photographs, and websites depict neighborhoods, festivals, and street theater. We will also examine a variety
of theories that will help us conceptualize urban space and interpret these literary and cultural texts on city life in contemporary France. Readings to include texts by Annie Ernaux, Patrick Modiano, Leïla Sebbar, Didier van Cauwelaert, Yasmina Reza, Jean Rolin, Marie Darrieussecq, and Xavier Houssin. Conducted in French.

Requirements/Evaluation: class participation, several short essays (1-2 pages), midterm essay (5 pages), digital mapping project, and final oral presentation (based on midterm)

Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors & certificate students; those with compelling justification for admission; seniors returning from study abroad (Francophone countries) particularly welcome

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 309 (F) Contemporary Short Stories from North Africa

Cross-listings: AFR 307 RLFR 309

Primary Cross-listing

Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. Conducted in French.

Class Format: discussion

Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper

Prerequisites: RLFR 201, 202 or 203 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 307 (D1) RLFR 309 (D1)

Attributes: GBST African Studies Electives

Not offered current academic year

RLFR 313 (S) Tropical Ecologies: Francophone Caribbean Literature and the Environment (DPE)

Cross-listings: AFR 313 RLFR 313 ENVI 311

Primary Cross-listing

The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau— the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical
texts of Caribbean of literary and political movements such as *Indigenisme*, *Négritude*, and *Créolité*. Conducted in French.

**Class Format:** This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

**Requirements/Evaluation:** Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

**Prerequisites:** Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 313 (D1) RLFR 313 (D1) ENVI 311 (D1)

**Difference, Power, and Equity Notes:** As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

Not offered current academic year

**RLFR 315 (F) Nature in Crisis: The Classification Craze and The Rise of Museums**

**Cross-listings:** RLFR 315 ENVI 314

**Primary Cross-listing**

This course examines how understandings of nature evolved dramatically (and at times unsettlingly) from the 17th through the early 20th centuries and how this instability prompted a desire to classify and control natural phenomena. To analyze these issues, we will likewise consider the rise of modern museums, as well as the accompanying acts of classification and curation. We will consider how literary and philosophical texts from the aforementioned time periods depict nature, how real-world interactions with nature led to the creation of (illustrated) taxonomies, how colonization inflected notions of the natural world and also museum exhibits, and finally, how the cabinet of curiosities and later, the museum, provided a space in which to display and analyze nature’s more unusual treasures. As part of our explorations, we will build a virtual exhibit of our own to reflect our understanding of nature today and our engagement with concepts of nature from previous eras. Conducted in French. Counts as an Envi Humanities Elective for the Envi Concentration.

**Class Format:** Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

**Requirements/Evaluation:** participation, online homework, essays, mid-semester presentation, final class project (virtual exhibit)

**Prerequisites:** exceptional performance in RLFR 106, or an RLFR 200-level course; or by placement test; or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 316 (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)

Cross-listings: WGSS 315 RLFR 316

Primary Cross-listing

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been feted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler’s ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Pcrc, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Requirements/Evaluation: active class participation, midterm exam, and two to three papers
Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate students; Women's, Gender, and Sexuality Studies majors; and those with compelling justification for admission
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 315 (D1) RLFR 316 (D1)

Attributes: GBST Urbanizing World Electives

Not offered current academic year

RLFR 410 (F) Senior Seminar: Movement and Migration (DPE)

How do movement and migration produce and disrupt constructions of identity, home, and the nation? In the context of movement and migration, how is place imagined, experienced and remembered? What are the relationships between movement and containment, flight and freedom? Over the course of the semester, we will examine literary texts, film and visual art from French-speaking communities that focus on: the immigration experience in France, the construction of a Francophone Atlantic identity, internal migration between rural and urban spaces, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable or nomadic places of memory. Works by Chamoiseau, Glissant, Diome, Condé, Maffre, Pineau, and Binebine among others. Conducted in French.

Requirements/Evaluation: Weekly 1-page response papers, 5-page mid-term paper and a final 10-page research paper and presentation.
Prerequisites: Any 200-level RLFR course, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Students will explore how literature, film and art narratives on migration and movement challenge (and also sometimes replicate) discourses of exclusion and structures of discrimination based on race and ethnic identity and gender. While the course focuses on French-speaking communities and people, we will think broadly about difference and power as they relate to movement, flight and freedom.

Fall 2021

SEM Section: 01    TF 1:10 pm - 2:25 pm     Katarzyna M. Pieprzak

RLFR 412 (F) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers

Cross-listings:  WGSS 408  RLFR 412

Primary Cross-listing

In 1834, Balzac wrote that “Paris is a veritable ocean. Sound it: you will never know its depth.” The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France’s turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  

This course is cross-listed and the prefixes carry the following divisional credit: 

WGSS 408 (D2) RLFR 412 (D1)  

Not offered current academic year

RLFR 414 (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film  (DPE)

Cross-listings:  RLFR 414  COMP 414

Primary Cross-listing

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

Requirements/Evaluation: three, three-page response papers; thesis statement, methodology, and works cited list on one page; one script of a video essay

Prerequisites: 200-level RLFR courses

Enrollment Limit: 19

Enrollment Preferences: French and Comparative Literature majors and certificate students
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 414 (D1) COMP 414 (D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

Not offered current academic year

RLFR 416 (S) Liberté, Égalité, Fraternité? Questioning Inclusion in French Literature and Culture (DPE)
"Liberté, Égalité, Fraternité" is the national motto of France and of the Republic of Haiti. It finds its origin in the French Revolution but was institutionalized as the official symbol of the Republic in 1880. In this course, we will study literary texts and historical documents to explore these three terms, their cultural and philosophical meaning, their institutional definitions and their application in French society. Who gets to be free throughout French history? If equality is a Republican principle, what about equity? Could fraternity be replaced by a more inclusive term referring to more than one gender? Readings will include texts of multiple genres from the 16th to the 21st century addressing class, race and gender (Michel de Montaigne, Marie de Gournay, Voltaire, Montesquieu, Victor Hugo, Aimé Césaire, Léonora Miano, Paul B. Preciado), one short film, as well as other historical documents such as the "Code Noir," the "Déclaration des droits de la Femme et de la Citoyenne," the "Décret d'Abolition de l'Esclavage" and the "Constitution" of the Fifth Republic.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Active participation, weekly readings, weekly posts on GLOW, weekly audio recordings, one presentation of a visual document (narrated PowerPoint), multiple steps towards final project: recording a podcast in French [this project, as well as the rest of the course, will take into account accessibility needs and can be modified accordingly].

Prerequisites: Any 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

Enrollment Limit: 14
Enrollment Preferences: French majors and certificate students in their senior year; if overenrolled: statement of interest required.

Expected Class Size: 14
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course addresses the discrepancy between the values promoted by the national French motto and their actual application in French society throughout history. Students will investigate how inclusion within the French nation varies according to race, class, gender, sexuality and ability. They will explore the history of French Republican concepts of inclusion such as universalism and "laïcité" as well as their divisive and excluding potential.

Not offered current academic year

RLFR 493 (F) Senior Thesis: French
French senior thesis; this is part of a full-year thesis (493-494).
Grading: yes pass/fail option, yes fifth course option

RLFR 511 (F) Intensive French Grammar and Translation
This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.

Class Format: classes meet twice weekly and are conducted in English
Requirements/Evaluation: class participation, papers, a midterm, and a final examination
Prerequisites: a strong interest and need to learn French
Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor
Grading: pass/fail option only
Distributions: (D1)
Not offered current academic year

RLFR 512 (S) Readings in French Art History and Criticism
This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.

Requirements/Evaluation: evaluation is based on class participation, papers, a midterm, and a final examination
Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor
Grading: pass/fail option only
Winter Study

**RLFR 30 (W) Honors Essay: French**
To be taken by candidates for honors other than by thesis route.

**Class Format:** honors essay  
**Grading:** pass/fail only

**RLFR 31 (W) Senior Thesis: French**
To be taken by students registered for French 493-494.

**Class Format:** thesis  
**Grading:** pass/fail only

**RLFR 88 (W) French Sustaining Program**
Students registered for RLFR 101-102 are required to attend and pass the French Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

**Grading:** pass/fail option only

**RLFR 99 (W) Independent Study: French**
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study  
**Grading:** pass/fail only

Not offered current academic year
MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, gemology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The requirements for the Geosciences major were revised. The new requirements are immediately below, and the old requirements follow. Students who entered Williams in fall 2019 or after are under the new requirements. Students who entered Williams before fall 2019 are under the old requirements but may opt into the new requirements. Please talk to the Geosciences chair if you have questions about the major requirements.

Geosciences major requirements for students who entered Williams in fall 2019 or after:

At least one and at most two 100-level courses:
- GEOS 100 Introduction to Weather and Climate
- GEOS 101 Co-Evolution of Earth and Life
- GEOS 102 An Unfinished Planet
- GEOS 103 Global Warming and Environmental Change
- GEOS 104 Oceanography
- GEOS 107 Astrobiology

At least two 200-level courses selected from this group:
- GEOS 201 Geomorphology
- GEOS 202 Mineralogy
- GEOS 203 Field Methods and Structural Geology
- GEOS 205 Economic Geology and Earth Resources
- GEOS 210 Oceanographic Processes
- GEOS 212 Paleobiology
- GEOS 214 Mastering GIS
- GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:
GEOS 301 Structural Geology
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
GEOS 314 Analytical Historical Geology
GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:
GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 410 The Cryosphere
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

In addition, courses taken for the major must include at least two courses from each of the following three groups:

Climate and Oceans:
GEOS 100 Introduction to Weather and Climate
GEOS 104 Oceanography
GEOS 210 Oceanographic Processes
GEOS 215 Climate Changes
GEOS 221T Climate Science and Politics
GEOS 255 Environmental Observation
GEOS 309 Modern Climate
GEOS 324 Corals and Sea Level

Sediments and Life:
GEOS 101 Co-Evolution of Earth and Life
GEOS 103 Global Warming and Environmental Change
GEOS 107 Astrobiology
GEOS 201 Geomorphology
GEOS 212 Paleobiology
GEOS 302 Sedimentology
GEOS 312T Mass Extinctions
GEOS 314 Analytical Historical Geology

Solid Earth:
GEOS 102 Unfinished Planet
GEOS 202 Mineralogy
GEOS 203 Field Methods and Structural Geology
GEOS 205 Economic Geology and Earth Resources
GEOS 217 Planets and Moons
GEOS 220T Evolution of and on Volcanic Islands
GEOS 250T Tectonic Geomorphology and Landscape Evolution
GEOS 301 Structural Geology
GEOS 303 Igneous and Metamorphic Petrology

Geosciences major requirements for students who entered Williams before fall 2019:

At least one and at most two 100-level courses:
GEOS 100 Introduction to Weather and Climate
GEOS 101 The Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103 Global Warming and Environmental Change the Reshaping of Landscapes
GEOS 104 Oceanography
GEOS 107 Astrobiology

At least two 200-level courses selected from this group:
GEOS 201 Geomorphology
GEOS 202 Mineralogy
GEOS 203 Field Methods and Structural Geology
GEOS 205 Earth Resources
GEOS 210 Oceanographic Processes
GEOS 212 Paleobiology
GEOS 214 Mastering GIS
GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
GEOS 314 Analytical Historical Geology
GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:
GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 410 The Cryosphere
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

PREPARATION FOR GRADUATE SCHOOL

Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HONORS IN GEOSCIENCES

The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of
The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

GEOS 100  (S) Introduction to Weather and Climate

Cross-listings: GEOS 100  ENVI 100

Primary Cross-listing
How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop a basic understanding of earth’s climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions.

Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 40
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 100 (D3) ENVI 100 (D3)
Attributes: ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans
Not offered current academic year

GEOS 101 (F) The Co-Evolution of Earth and Life
Cross-listings: GEOS 101 ENVI 105
Primary Cross-listing
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis?

Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip
Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)

GEOS 102  (S)  An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

GEOS 103  (F)  Global Warming and Environmental Change

Cross-listings: GEOS 103  ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 106 (F) Being Human in STEM (DPE)

Cross-listings: PHYS 106 GEOS 106 STS 106

Secondary Cross-listing

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability, sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students' abilities to participate in STEM fields. Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

Class Format: class discussions, group project work (out of class time required)

Requirements/Evaluation: short response papers, class discussion participation, leading class discussions, group work, and final project

Enrollment Limit: 15

Enrollment Preferences: DIV III majors; statement of interest may be requested

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not count towards GEOS or PHYS major credit
Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 106 (D3) GEOS 106 (D3) STS 106 (D2)

Difference, Power, and Equity Notes: This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

Not offered current academic year

GEOS 107 (F) Astrobiology

Cross-listings: GEOS 107 ASTR 107

Primary Cross-listing

Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

GEOS 111 (F) Radical Science- How Geology Changed the Way We See the World (WS)

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they
proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprang to life. During the 20th century, the permanence of Earth’s geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: five 5-page papers and five oral critiques of partner’s papers
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: First year students then second year students
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (WS)

Writing Skills Notes: Students will write five 5-page papers and will receive peer and instructor feedback on how to improve their writing skills and formulate sound arguments.
Attributes: GEOS Group C Electives - Solid Earth

Fall 2021
TUT Section: T1 TBA Paul M. Karabinos

GEOS 201 (F) Field Methods and Structural Geology (WS)
Geologic history is preserved in rocks and it can be deciphered using fundamental principles such as superposition and cross-cutting relationships. Field observations are essential to understanding the rock record, and data and interpretations are encoded in geologic maps. This course introduces students to topographic and geologic maps, best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, and structures such as folds, and faults. Students will develop skills for presenting field data in papers, figures, and oral presentations. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture and discussion, three hours per week and laboratory, three hours per week
Requirements/Evaluation: short weekly writing assignments will form the basis for two 10-page papers based on field trips and a final independent project
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $15 for field supplies
Distributions: (D3) (WS)

Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip. The shorter assignments will be incorporated in two papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 202 (F) Mineralogy
This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

Class Format: Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

GEOS 205  (F)  Economic Geology and Earth Resources

Cross-listings: GEOS 205  ENVI 207

Primary Cross-listing

“If it can't be grown, it must be mined.” We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

GEOS 207  (S)  The Geoscience of Epidemiology and Public Health  (DPE)

Cross-listings: ENVI 201  GEOS 207

Primary Cross-listing
The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials and influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

**Requirements/Evaluation:** Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

**Prerequisites:** No prerequisites

**Enrollment Limit:** 34

**Enrollment Preferences:** Preference to first-years, sophomores, and prospective Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings: GEOS 212 BIOL 211

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

GEOS 214 (S) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate
environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, weekly quizzes, and a research project

**Prerequisites:** at least one course in Geosciences or Environmental Studies

**Enrollment Limit:** 18

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators.

**GEOS 215 (F) Climate Changes**

**Cross-listings:** GEOS 215 ENVI 215

**Primary Cross-listing**

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth’s climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

**Requirements/Evaluation:** lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Geosciences and Environmental Studies majors

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

GEOS 217  (S)  Planets and Moons
Cross-listings: ASTR 217  GEOS 217

Primary Cross-listing
This course examines the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: Periodic short quizzes, reading journal, lab exercises, class participation
Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option

GEOS 220  (F)  Evolution of and on Volcanic Islands  (WS)
Cross-listings: GEOS 220  ENVI 219

Primary Cross-listing
Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor
Requirements/Evaluation: five 5-page papers and critiques of partner's papers
Prerequisites: 100-level GEOS course or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

GEOS 221  (F)  Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics  (WS)

Cross-listings:  GEOS 221  ENVI 222  LEAD 221

Primary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation:  weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  sophomores, Geosciences and Environmental Studies juniors and seniors

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

GEOS 227  (S)  Climate Data Analysis

Cross-listings:  GEOS 227  ENVI 226

Primary Cross-listing

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

Class Format:  Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

Requirements/Evaluation:  Five 3-4 page papers including figures made from analyzing data.
**Prerequisites:** At least one GEOS or ENVI course

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with a strong interest in Geosciences and Geoscience majors.

**Expected Class Size:** 10

**GEOS 234 (S) Introduction to Materials Science** (QFR)

**Cross-listings:** GEOS 234   PHYS 234

**Secondary Cross-listing**

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

**Class Format:** lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

**Requirements/Evaluation:** weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

**Prerequisites:** high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** based on students' scientific background and seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course does not count toward the Geosciences major.

**GEOS 250 (S) Climate, Tectonics, and Erosion** (WS)

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. This course explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate. This course is in the Solid Earth group for the Geosciences major.
Class Format: After an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session.

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 103, 202, 203, 215, 302, 303, 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a strong interest in Geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: GEOS Group C Electives - Solid Earth

GEOS 255 (F) Environmental Observation

Cross-listings: ENVI 255 GEOS 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information.

We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

GEOS 301 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Primary Cross-listing
Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

GEOS 302 (S) Sedimentology (WS)

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of oceans and continents and how life evolved. Studying sedimentology links the solid Earth, ocean, atmosphere and biosphere, because sand, silt and mud preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the organisms that lived in and on them. We will investigate sediment composition, fluid mechanics, bedform analysis, and depositional environments. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

Requirements/Evaluation: lab work, writing assignments, participation in discussions, and final exam.

Prerequisites: at least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

GEOS 309 (F) Modern Climate (QFR)

Cross-listings: GEOS 309 ENVI 209

Primary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects—like the albedo feedback associated with sea ice and glacier loss—and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: GEOS and ENVI majors

GEOS 312 (S) Mass Extinctions: Patterns and Processes

Over the last 542 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct and groups like the dinosaurs vanished from the planet after over 100 million years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in
human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day. This course is in the Sediments and Life group for the Geosciences major.

**Requirements/Evaluation:** four 4-5-page papers, one revision, tutorial presentations, the student’s effectiveness as a critic, and 1 problem set

**Prerequisites:** GEOS 101 or GEOS 212; or permission of instructor + any 200 level GEOS course

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

---

**GEOS 314 (S) Analytical Historical Geology** (QFR)

In this course you will learn to collect, interpret, and analyze deep time paleontological, stratigraphic, and sedimentological records through readings, labs, and projects all coordinated around a week long spring break trip to explore the House Range of Utah. The Cambrian and Ordovician successions of Utah’s West Desert offers an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology and stratigraphy. Labs will focus on skill building including learning basic coding in R, and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including geological mapping, measuring stratigraphic section, finding and identifying fossils, and correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will determine what data we will collect in the field. Examples might be trilobite taxonomy and phylogenetic analyses, quantitative biostratigraphic correlation using conodont fossils, reconstructing paleoenvironment based on sedimentological analyses of thin sections, or building a sequence stratigraphic framework for a subset of the field locality. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** weekly lectures, paper discussions, and hands-on labs

**Requirements/Evaluation:** short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project

**Prerequisites:** GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 324, GEOS 401, GEOS 302, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** junior and senior Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

**Attributes:** GEOS Group B Electives - Sediments + Life

GEOS 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Primary Cross-listing
In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

**GEOS 404  (F)  Coastal Processes and Geomorphology  (QFR)**

**Cross-listings:**  ENVI 404  MAST 404  GEOS 404

**Primary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, tests, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor

Primary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, two 10-page lab reports, lab activities, and final project
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors, then juniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 405 (D3) GEOS 405 (D3)

Attributes: ENVI Natural World Electives

Not offered current academic year

GEOS 410 (S) The Cryosphere

Cross-listings: ENVI 410 GEOS 410

Primary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.
Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project
Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 410 (D3) GEOS 410 (D3)

Attributes: ENVI Natural World Electives

LAB Section: 02  M 8:30 am - 9:45 am  Alice C. Bradley

GEOS 411  (F)  Geobiology

Geobiology—the study of interactions between earth and life over geologic timescales—is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms—from bacteria to trees—have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth’s atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Requirements/Evaluation: labs, short papers, final grant proposal and presentation

Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Winter Study ---------------------------------------------------------------

GEOS 22 (W) Geosciences Research
Students will spend part of Winter Study doing fieldwork collecting data. Back at Williams, they will analyze the data. Each student will have responsibility for a subset of the data, and the individual sub-projects will contribute to the overall research.
Class Format: to be arranged with instructor
Requirements/Evaluation: final project
Prerequisites: two Geosciences courses; permission of the instructor required before registering for the course
Enrollment Limit: 3
Expected Class Size: 3
Grading: pass/fail only
Not offered current academic year

GEOS 31 (W) Senior Thesis: Geosciences
To be taken by students registered for Geosciences 493-494.
Class Format: thesis
Grading: pass/fail only
Distributions: (D3)
Not offered current academic year
GEOS 99 (W) Independent Study: Geosciences
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Not offered current academic year
STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is an intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202-209 combines advanced language study with the examination of topics in German-speaking cultures. The 202 and up course level may be taken twice with different content for major credit. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, plus conversations with the student if necessary.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case. It is not sufficient for the language of instruction in a given course to be German; the content must also have to do with the culture, history, politics, economics, etc. of Germany, Austria, or Switzerland.

THE CERTIFICATE IN GERMAN

To enhance a student’s educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.
The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

**Required Courses**
- German 101
- German 102
- German 103
- German 104
- German 201

**Elective Courses**
- at least one course (in German or English) on German cultural history (literature, art, drama, music)
- at least one course (in German or English) on German intellectual, political, or social history

**THE MAJOR**

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

**Examples of appropriate courses in other departments are:**
- Art History 267 Art in Germany: 1960 to the Present
- History 239 Modern German History
- History 338 The History of the Holocaust
- Music 108 The Symphony
- Music 117 Mozart
- Music 118 Bach
- Music 120 Beethoven
- Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

**THE DEGREE WITH HONORS IN GERMAN**

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**GERM 101 (F) Elementary German**

German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all five language skills: listening comprehension, speaking, reading, writing, and culture. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.
GERM 102 (S) Elementary German

German 102 is a continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. This language course is conducted in German.

Prerequisites: GERM 101 or equivalent

Requirements/Evaluation: active class participation, midterm & final exams, essays, quizzes, homework

Enrollment Limit: 18

Enrollment Preferences: freshmen and sophomores

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

Distributions: (D1)

Spring 2022

SEM Section: 01 M-F 10:00 am - 10:50 am Christophe A. Koné

GERM 103 (F) Intermediate German I

In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts and aims to develop and consolidate students' speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The use of easy readers in the target language will also help to enhance reading comprehension. The course is taught in German. Active and dedicated participation including homework is expected.

Prerequisites: GERM 102 or equivalent

Requirements/Evaluation: active class participation, midterm and final exams, quizzes, essays, homework

Enrollment Limit: 18

Enrollment Preferences: sophomores
**GERM 104 (S) Intermediate German II**

The prerequisite to all advanced courses in German. Practice in speaking and writing; short film clips and other videos; reading in a variety of contemporary texts ranging from interviews to social documentary to short stories. Conducted in German.

**Class Format:** HYBRID, in person class on campus, with off-campus students remote; discussion, small group work

**Requirements/Evaluation:** daily short writing assignments, small group work, take-home midterm, and take-home final exam

**Prerequisites:** GERM 103 or equivalent

**Enrollment Limit:** 12

**Spring 2022**

SEM Section: 01  MWF 9:00 am - 9:50 am  Helga Druxes

**GERM 110 (F) Spies Like Us: Espionage, Surveillance, and Protest in German Cinema and Literature**  (WS)

**Cross-listings:** GERM 110  COMP 109

**Primary Cross-listing**

This First Year tutorial, available in English, investigates the mutual mistrust between the two Germanies in the Cold War period up until the peaceful popular protests that brought down the Berlin Wall. The political tensions between communist East Germany, the German Democratic Republic (GDR) and its capitalist Western counterpart, the Federal Republic (FRG), created a fascinating culture of governmental spying, but also led to aggravated periods of state surveillance of its own citizens. How were families affected across generations by these divisive politics, including the two states’ differing treatment of the Nazi legacy? What was the involvement of the KGB and the CIA? How did East German intelligence try to destabilize the West from inside? Which locations in Berlin served as centers for spying, given that the city's terrain is quite flat and exposed? High-profile cases of conflicting loyalties include the Guillaume spy affair that brought down Willy Brandt as Chancellor of the FRG in 1974, and the Brasch family in the GDR, where the father, a communist true believer, turned his three sons over to the Stasi for their dissident activism and engaged art. We will debate filmic treatments of the recruitment of spies as double agents (Coded Message for the Boss, 1979), the chilling effects of police surveillance during the Baader-Meinhof radical left terrorist attacks (The Lost Honor of Katharina Blum, 1975; Knife in the Head, 1978) the afterlives of former terrorists who were offered new identities as ‘ordinary’ East Germans (The legend of Rita, 2000), to the effects of the Stasi files becoming accessible to their victims after the fall of the wall (Es ist nicht vorbei, Anderson). We will also discuss popular film representations of spying in Lives of Others (2007) and Bridge of Spies (2015), and selected episodes from the popular TV-series Germany 83 and 86 (2018). Literature will likely include: Thomas Brasch, The Sons Die Before the Fathers (1977), Christa Wolf, What Remains (1993), Monika Maron, Flight of Ashes (1981), Heinrich Böll, The Lost Honour of Katharina Blum (1974). All texts in English, films have English subtitles.

**Class Format:** Students in this course will be separated into small tutorial groups of 3 students, in order to promote intensive exchange of ideas. In a typical week, the students in each group will: (1) study a substantial "text" or film; (2) watch mini-lectures or power points by the instructor to supplement the assigned primary texts.

**Requirements/Evaluation:** 5 5-page tutorial papers and 2-page responses (in English)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** First Years, in groups of 3 students.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GERM 110 (D1) COMP 109 (D1)

Writing Skills Notes: This tutorial will teach students to analyze visual media and fiction in German Studies in combination with secondary sources from a variety of related disciplines (History, Political Science, journalism). The toggling between these different types of sources promotes critical thinking skills.

Fall 2021
TUT Section: T1 TBA Helga Druxes

GERM 118 (F) Animal Subjects (DPE)
Cross-listings: COMP 118 GERM 118

Secondary Cross-listing
Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 118 (D1) GERM 118 (D1)

Difference, Power, and Equity Notes: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight.

Not offered current academic year

GERM 120 (S) Turbodeutsch: Accelerated Elementary German
An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

Requirements/Evaluation: active participation, tests, quizzes, final exam
Prerequisites: students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German
Enrollment Limit: 12
Expected Class Size: 10
GERM 201 (F) Reisefieber: Germans On the Road for Adventure, Wealth, Escape
We will investigate potent myths of North America and Africa that fuelled German emigration, colonial projects, and adventurism. We will also look at inner-German travel stories, and, in a final segment, the contemporary refugee experience. Our travelers hail from diverse backgrounds and historical time periods: ranging from Glikl, a Jewish businesswoman in the seventeenth century, to fur trade and real estate tycoon Johann Jakob Astor, to contemporary emigrants and thrill-seekers. We will also analyze films and tales about the potent myth of the "Wild West" and noble Indians, promoted by nineteenth-century bestselling author Karl May, and their afterlife in contemporary movies.

Requirements/Evaluation: three short oral presentations, 4-5 pp. take-home midterm essay, regular written worksheet questions, and role play oral final project
Prerequisites: GERM 104 or contact instructor
Enrollment Limit: 15
Enrollment Preferences: German majors and German certificate students
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: GBST Borders, Exiles + Diaspora Studies Electives

GERM 202 (S) German Comics
The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Nora Krug, Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz and Reinhardt Kleist. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. This course is conducted entirely in German.

Requirements/Evaluation: three 3- to 5-page paper and one final project
Prerequisites: GERM 104 and GERM 201
Enrollment Limit: 19
Enrollment Preferences: German majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

GERM 203 (S) Hansestadt Hamburg
"Wenn Du in Hamborger Hopn platt snacken kannst, dann geht immer eine Dör mer auf". Hamburg, the second largest city in Germany (with 1.8 million inhabitants), always had a particular significance within German cultural consciousness. Part of the Hanseatic League since the Middle Ages, the Free City of Hamburg quickly became an important commercial center in Northern Europe and a prosperous city of traders and merchants. Located on the river Elbe and in close proximity to the North Sea, the city-state Hamburg is still a major port city which has long benefited trading activities and fostered an exposure to other cultures. Called the gateway to the world (because the port was for a long time the gateway to the Americas) and the Venice of the North (the city is surrounded by water and features more canals, streams, and bridges than Amsterdam), later on
completely destroyed by the World War II bombing raids, Hamburg is a city of contrasts: infamous for its dialect (Plattdeutsch) as well as its red light district (St Pauli), renowned for its journalism (Der Spiegel, Die Zeit) and culture scene, famous for its culinary specialties, (the burger might have been invented there) and its sports culture (soccer, handball, basketball), Hamburg has a rich past and a multicultural present that this course will examine.

In order to gain a deeper insight into the geography, history, and culture of this fascinating city, we will read the autobiography by Hans-Jürgen Massaquoi, novels by Uwe Timm, short stories by Yoko Tawada and Siegfried Lenz, listen to songs by Hans Albers, Wolf Biermann, Udo Lindenberg, the Hip Hop band Fettes Brot, and watch movies by Fatih Akin, Sandra Nettelbeck, Christian Alvar, Özgür Yıldırım, and Leander Haußmann. Taught in German.

**Requirements/Evaluation:** oral presentations, four 3- to 5-page papers in German, midterm and final exams

**Prerequisites:** GERM 201 or equivalent

**Enrollment Limit:** 12

**Enrollment Preferences:** German majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** GBST Urbanizing World Electives

---

**GERM 204 (S) Stranger Things: The German Novella**

Goethe's famous description of the novella as an "unheard of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. As we trace the development of the novella over the course of two hundred years of German literary history, we will explore how the eerie phenomena at the genre's core reflect specific historic moments only to transcend them. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? Taught in German.

**Requirements/Evaluation:** three 2-page critical responses, oral presentation, 6-page final paper

**Prerequisites:** GERM 201 or equivalent

**Enrollment Limit:** 20

**Enrollment Preferences:** German majors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**GERM 205 (S) Berlin--Multicultural Metropolis Between East and West**

We will examine texts and films about Berlin as a center of cultural and social transformations in the late nineteenth and twentieth centuries, with special emphasis on the post-wall period. We will move from the turn of the century (when the city's population had recently tripled in size) to the establishing of Berlin as a world capital in the 1920s, then through Nazi-era transformations, wartime destruction and the cold war division of the city. We will conclude with the reshaping of the city after the fall of the Berlin wall. Texts and films may include: Walter Benjamin, *Berliner Kindheit um 1900*, excerpts from Ulrich van der Heyden und Joachim Zeller's *Kolonialmetropole Berlin*, Walter Ruttman, *Sinfonie einer Großstadt*, Irmgard Keun's *Das kunstseidene Mädchen*, Nazi architect Albert Speer's plans for Berlin as the fascist capital "Germania," the 1956 East German youth protest film *Ecke Schönhauser*, short fiction by Reiner Kunze, Aras Ören, Peter Schneider, Bodo Morshäuser, Irina Liebmann. Recent films to be included are: *Sonnenallee, Goodbye, Lenin!, Berlin is in Germany, Berlin Calling*.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** frequent short writing assignments; oral presentations with partner, one 5-6pp. essay

**Prerequisites:** GERM 201 or equivalent

**Enrollment Limit:** 15

**Enrollment Preferences:** Sophomores and Juniors
Expected Class Size: 6
Grading: yes pass/fail option, yes fifth course option

Spring 2022
SEM Section: 01    MWF 12:00 pm - 12:50 pm     Helga Druxes

GERM 209 (S) Green Germany: Literature, Film, and the Environment
Today, Germany is known as a world-wide leader in environmental policies, sustainable energy, and conservation efforts. This “green” culture, however, is not a new phenomenon, but has long constituted an essential part of German identity. In this course, we will trace Germany's relationship with the environment over the course of 200 years of cultural production. Among other things, we will consider the Romantic fascination with the sublime powers of an uncontrollable wild nature, discuss the ecological underpinnings of Nazi ideology, analyze the effects of the nuclear disaster in Chernobyl on German society, and read about the role recycling currently plays as a practice of integration for refugees. Including texts and films by Alina Bronsky, Ilija Trojanow, Ludwig Tieck, Christa Wolf, Rainer Maria Rilke, Baran bo Odar and Jantje Friese, and Doris Dörrie. Taught in German.
Requirements/Evaluation: oral presentation, bi-weekly 1-page response papers, final project
Prerequisites: GERM 201 or equivalent
Enrollment Limit: none
Enrollment Preferences: German majors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

GERM 210 (S) The Holocaust in the German Imagination
How do we think about an event that unsettles the very notion of representation? An indelible part of German history and culture, the Holocaust continues to challenge the artistic imagination by simultaneously calling for and resisting interpretation. This course examines the various ways in which German-speaking writers, artists, and directors have responded to this call since the 1930s. We will explore questions of memory and postmemory, the entanglements of trauma, guilt, and testimony, as well as the tensions and continuities between Germany’s rich cultural heritage and portrayals of the Holocaust. Taking into consideration different forms of artistic expression, such as literature, film, and visual art, including sites of commemoration, this class will trace the relationship between past and present. What might it mean to write and think in the language of the perpetrators? How do texts by Holocaust survivors and first-hand witnesses relate to those created by later generations? What are the differences between West and East German representations of the Shoah, and how do they differ from how immigrants in Germany or Austrian artists engage with the event? Among others, we will read texts by Paul Celan, Nelly Sachs, Anna Seghers, Ruth Klüger, Ingeborg Bachmann, Elfriede Jelinek, Peter Weiss, W. G. Sebald, and Zafer Senocak, as well as watch films by Michael Haneke, Max Färberböck, Frank Beyer, Volker Schlöndorff, Stefan Ruzowitzky, and Caroline Link. Conducted in German.
Requirements/Evaluation: short critical papers, oral presentation
Prerequisites: GERM 202 or the equivalent
Enrollment Limit: none
Enrollment Preferences: prospective German majors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

GERM 251 (F) Dolls, Puppets and Automatons (WS)
Cross-listings: GERM 251  COMP 251
Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. Conducted in English.

Class Format: This seminar will be taught online.

Requirements/Evaluation: active class participation, oral presentations on the reading materials, three 5- to 8-page papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors, or those considering a major in Comparative Literature

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GERM 251 (D1) COMP 251 (D1)

Writing Skills Notes: Each student will write three 5- to 8-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write two 3-4 page papers on which I will provide written feedback regarding grammar, style, and textual analysis.

GERM 276 (S) Black Europeans

Cross-listings: COMP 276 AFR 276 GERM 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-years, sophomores, and juniors

Expected Class Size: 8
GERM 280  (F)  Art at its Limits: Representing the Holocaust  (DPE) (WS)

Cross-listings:  COMP 280  JWST 280  GERM 280

Primary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman’s graphic novel Maus really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró’ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.

Requirements/Evaluation:  three 2-page critical responses, oral presentation, final project

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  German and Comparative Literature majors

Expected Class Size:  14

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

Writing Skills Notes:  Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Not offered current academic year

GERM 300  (F)  Mannweiber: Masculine Women in German Culture

The German word “Mannweib” is a literal translation of the Greek “androgynous” and is a derogatory term for a woman who acts in a masculine way. This survey course examines the recurrence of “masculine femininity” in German culture with a particular focus on literary texts, operas, paintings, and films, all crafted at turning points in German history. Why does the Mannweib emerge at times of major political and historical upheavals? How does this atypical masculine woman contribute to the construction of a German national identity? These are some of the key questions this course seeks to address. We will read the Nibelungenlied epic, poems by Freiligrath, plays by Lessing, Schiller, Goethe, Kleist, and Dürenmatt, as well as short stories by Stifter, watch operas by Wagner, and films by Sternberg and Tykwer. In all these materials featuring a Mannweib as main protagonist, we will look at the way masculine femininity is construed as unnatural and literally constructed to serve either a patriarchal or a patriotic purpose. We will also examine the misogyny underlying the artistic creation of these masculine women, either enshrined as allegories of virtue or perceived as dangerous agents of socio-political change, and ultimately doomed to rejection from the moment these misfits step out of their assigned role. Conducted in

GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall

Cross-listings: WGSS 304 GERM 304

Primary Cross-listing

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country’s international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, Die Ermittlung, Heinrich Böll, Und sagte kein einziges Wort, Gisela Eilsner, Riesenzwerge, Emine Sevgi Özdamar, Das Leben ist eine Karawanserei, Volker Braun, Unvollendete Geschichte, Alice Schwarzer, Der kleine Unterschied und seine großen Folgen, Christian Kracht, Faserland, Thomas Brussig, Wasserfarben. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader-Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

Class Format: remote

Requirements/Evaluation: alternating 4-page tutorial papers in German, and 2-page critiques

Prerequisites: GERM 202 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: German majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

GERM 314 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 WGSS 344 ARTH 315

Secondary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a
world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape—from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 314 (D1) WGSS 344 (D2) ARTH 315 (D1)

Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

Spring 2022

SEM Section: 01 W 1:10 pm - 3:50 pm Alena J Williams

GERM 315 (F) Kafka and His/Our World (WS)

Cross-listings: COMP 316 GERM 315

Primary Cross-listing

"It's so Kafkaesque!" We love to use the most famous Austro-Hungarian-Czech-Jewish writer of all time to characterize puzzling and dispiriting situations. But close examination of Franz Kafka's work and life reveals a multi-dimensional world that goes far beyond the cliché. Jewish in an increasingly anti-Semitic environment, German-speaking surrounded by Czech-speakers, deeply alone in a family that didn't understand him, Kafka produced texts that simultaneously demand and refuse to be interpreted. In this tutorial we will begin with intensive readings of selected short stories and parables, then move on to an exploration of the Kafka's own words from diaries and letters, as well as secondary sources. The course will conclude with discussions of how Kafka's texts and their contexts might relate to contemporary conditions and/or to students' own lives and thoughts. This will be a modified tutorial, with five groups of three students apiece. Students may take the tutorial in either German or English; groups will be formed accordingly.

Class Format: The class will be divided into groups of 3. At each weekly meeting, one of the 3 will present a 5-page paper, another will present a formal response, and the third will participate actively in discussion. Students will incorporate at least one of their papers into a final project that links their discussions of Kafka to their own interests and/or to contemporary issues. Students can take the course in German or English (or a combination of the two), and groups will be formed accordingly.

Requirements/Evaluation: Three 5-page papers, three 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

Prerequisites: For German speakers: GERM 202 or the equivalent preferred, though students with less experience should contact the instructor. For students taking the course in English: one college literature course.

Enrollment Limit: 15

Enrollment Preferences: German students, majors or potential majors in Comp Lit or German

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 316 (D1) GERM 315 (D1)

**Writing Skills Notes:** The course has a modified tutorial format, with groups of three meeting weekly instead of pairs. Each student will write three 5-page papers plus three 1-2-page responses during the semester, and will prepare a final project. Each paper will receive extensive feedback from the instructor.

Not offered current academic year

**GERM 316 (S) “Wer ist wir?”: Recent Debates over Multiculture in Germany**

German chancellor Angela Merkel controversially claimed in 2010: “Multikulti ist gescheitert.” (Multiculturalism has failed in Germany). We will investigate different perspectives on Germany’s integration of minorities. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the “economic miracle.” How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidids, Rita Süssmuth and others.

**Requirements/Evaluation:** four 5-page papers in German

**Prerequisites:** GERM 202 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** German majors, but open to all with appropriate language skills

**Expected Class Size:** 8

Not offered current academic year

**GERM 317 (F) The New Woman in Weimar Culture** (WS)

**Cross-listings:** GERM 317  WGSS 317

**Primary Cross-listing**

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman’s various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

**Class Format:** taught seminar style in German for the German students and as a tutorial in English for non German speaking students

**Requirements/Evaluation:** papers and oral presentations

**Prerequisites:** for students taking the course in German: GERM 202 or the equivalent; for students taking the course in English: one college-level literature course

**Enrollment Limit:** 19

**Enrollment Preferences:** juniors and seniors, students with strong analytical skills and a vivid interest in literature, art, music, and films

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 317 (D1) WGSS 317 (D2)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2021

SEM Section: 01    MW 7:00 pm - 8:15 pm    Christophe A. Koné

GERM 320 (S) German Romanticism (WS)

German Romanticism is a multifaceted, even contradictory phenomenon. Its earliest practitioners Novalis (Friedrich von Hardenberg) and Friedrich Schlegel could be seen as enacting a culmination of Enlightenment optimism about the emancipatory potential of the human mind, with their advocacy of an "aesthetic revolution," equality for women and Jews, and a holistic relationship to nature. Later, some of the first feminists (Caroline Schlegel-Schelling, Bettina Brentano von Arnim) worked side-by-side with authors who essentialized women into primal lures and primal threats (Ludwig Tieck, Joseph von Eichendorff). One of the most famous Romantics of all, E. T. A. Hoffmann, combined high irony and a penchant for the irrational in his fascinating works. This course will explore the paradoxes of German Romanticism through close readings of aphorisms, stories, fairy tales, poetry, essays, and music.

Requirements/Evaluation: intensive participation, frequent written responses, two shorter papers to be written in stages, and a longer final project

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: German students

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The course will involve intensive work with writing analytical papers, including short responses to most texts, two papers that will be written in stages, and a longer final project that will include work shopping drafts in tutorial format

Not offered current academic year

GERM 321 (S) Lust, Liebe und Gewalt (WS)

In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include—if not provoke—it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Haneke and Muskala. Conducted in German.

Requirements/Evaluation: papers and oral presentations

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: 10

Enrollment Preferences: German majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2022
GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE)

Cross-listings: GERM 331 COMP 347

Primary Cross-listing

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is a tiny fragment of its former self. Since that signal loss, Austria’s identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We’ll begin with the tremendous intellectual ferment surrounding Sigmund Freud’s elaboration of the unconscious at the turn of the century, from Hofmannsthal’s paralysis of language through Schnitzler’s streams of consciousness to Kafka’s carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers. Psychoanalytic theory, especially recent discussions of the transgenerational transmission of trauma and perpetrator guilt, will provide a conceptual framework for the literary works. Austria will serve as a case study of the psychology of right-wing populism and the resistance against it in the early 21st century; at the end of the course, we will compare the situation there with the United States.

Requirements/Evaluation: Active participation, frequent written responses, two shorter papers and a longer final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: German or Comparative Literature majors
Expected Class Size: 16
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GERM 331 (D1) COMP 347 (D1)

Difference, Power, and Equity Notes: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria’s curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one’s own group for the moral and political health of the society.

Not offered current academic year

GERM 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)

Cross-listings: WGSS 401 COMP 401 GERM 401

Secondary Cross-listing

Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate ‘entrepreneurs of self.’ This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

Class Format: three hours per week
Requirements/Evaluation: three 3-page papers, a short oral presentation, a 15-page final paper
Prerequisites: 300-level course
Enrollment Limit: 25
Enrollment Preferences: Comparative Literature majors and advanced students in other fields with permission of instructor
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Materials/Lab Fee: course books and reader packet
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 401 (D2) COMP 401 (D1) GERM 401 (D1)

Difference, Power, and Equity Notes: This course addresses the costs to exploited groups within the neoliberal marketplace. We will discuss theoretical sources from a variety of fields (sociology, economics, philosophy, gender studies) every week that render these forms of expulsion or dispossession explicit. Far from benefiting all, the privileging of self-interest and market relations leads to increased inequality and in turn provokes violent reactions: the birth of new forms of fascism, racism and religious fundamentalism.

GERM 515 (F) Reading German for Beginners

German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for art history and criticism. Students will learn the key elements of grammar and acquire a core vocabulary. They will also practice reading and translating a variety of short texts.

Class Format: Remote
Requirements/Evaluation: regular participation, homework
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor
Expected Class Size: 12
Grading: pass/fail option only
Distributions: (D1)
Not offered current academic year

GERM 516 (S) Readings in German Art History and Criticism

In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. Texts are selected from classical works of art history and criticism as well as from contemporary publications. By the end of the course the students will have a solid foundation for building proficiency in German, whether through self-study or further course work.

Class Format: Remote
Requirements/Evaluation: regular participation, homework
Prerequisites: GERM 515 or equivalent preparation (placement test)
Enrollment Limit: 20
Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor
Expected Class Size: 9
Grading: pass/fail option only
Distributions: (D1)

GERM 88  (W)  German Sustaining Program
Students registered for GERM 101-102 are required to attend and pass the German Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program. Check your class schedule to confirm enrollment.

Requirements/Evaluation: requirements active participation, regular attendance, and earn a "Pass" grade
Grading: pass/fail option only
Materials/Lab Fee: cost to student approximately $5 for photocopied materials
Not offered current academic year

GERM 99  (W)  Independent Study: German
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Distributions: (D1)
Not offered current academic year
An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

**Requirements**

To complete the concentration, students must take a section of Global Studies 101; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in the track.

**Global Studies 101**

All students wishing to pursue the concentration should take a section of Global Studies 101 early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

**TRACKS**

After taking Global Studies 101, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

**Area Tracks**

- African Studies
- East Asian Studies
- Latin American Studies
- Middle Eastern Studies
- Russian and Eurasian Studies
- South and Southeast Asian Studies

**Thematic Tracks**

- Borders, Exile and Diaspora Studies
- Economic Development Studies
- Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

**Senior Exercise**

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators’ disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class or in a Global Studies colloquium, or in both.

Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student’s engagement through comparative inquiry.
Honors
A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

Study Away, Research, and Internships
Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

FAQ
Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No, but students should not expect to get more than 3 study abroad courses counted towards the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

Note: as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

Catalog details
This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains
traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, class participation, and final exercise

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 101 (F) Democracy and the State: A Comparative Study

Cross-listings: PSCI 150 GBST 101

Primary Cross-listing

This introductory course examines major western political theories and ideologies, such as Liberalism and Marxism, and then examines their application in selected regional case studies. The social contract theories of Hobbes, Locke and Rousseau form the basis of the course.
GBST 101  Religion, Politics, and Society: A Global Perspective  (DPE)

In spite of predictions that religion would wither away with the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to make sense of the relation between religion, politics, and society, discussing especially the concept of the ‘secular.’ The second part discusses religion in the US society. Here, we will discuss if the American society can be called secular, the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their mobilization, religious minorities in the United States and many other aspects of religion in the US society. The third part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi’a) and Judaism. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the moral questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 20% participation; 25% first paper (7 pages); 30% second paper (8-10 pages); and 25% third paper (7 pages). No final exam.

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Global Studies concentrators and intended concentrators; Religion majors and intended majors

Expected Class Size: 25

Grading:

Not offered current academic year

GBST 116  (F)  The Art of Playing: An Introduction to Theatre and Performance

This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Requirements/Evaluation: two 5-page critical essays, journal reflections, studio exercises, and active participation in all activities
GBST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: GBST 117 HIST 117 ASIA 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites: First years and sophomores only

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar.

Expected Class Size: 12-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 117 (D2) HIST 117 (D2) ASIA 117 (D2)

Writing Skills Notes: Weekly reading response (2 pages), several short papers leading to a final research paper. Peer reviews and instructor feedback of all written work to improve writing skills and opportunities to write several drafts.

Attributes: GBST South + Southeast Asia Studies Electives GBST Urbanizing World Electives HIST Group B Electives - Asia
connected to Caribbean Economic Development. Using Plantation Economy Tradition as a starting point and an important contribution to postcolonial
development thinking, we will explore the interdisciplinary basis of this tradition rooted in the Caribbean cultural and historical experience. By
examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how
the Caribbean economy and society is framed, conceptualized and traversed as transplanted spaces, agrarian-resort-offshore spaces integral to
merchant and industrial capitalism, exploitation and extraction and New World social formations. We will examine texts of contributors to the New
World Group from the 1960s, 70s, and contemporary works that centers the Caribbean within global economic transformations. In this way, we explore
historical and contemporary events ranging from indigenous genocide, commercial slave trading and indenture, structural adjustment and postcolonial
debt, technology to the current fragmenting of global neoliberalism. This course explores themes like colonialism, dependent underdevelopment,
home/away, migration, developmentalism, epistemic sovereignty, economic transformation, land ownership, freedom, ‘creoleness’/créolité, negritude
and regional integration. This exploration will help students broaden their understanding of conventional perspectives of the economy to analyze how
the material understandings of economic phenomena framed in the plantation economy affect and engage with cultural and literary works in pluralistic,
productive, and powerful ways.

Requirements/Evaluation: Oral or poster presentation analyzing a literary and Caribbean economist’s work side-by-side (15 minutes or full-length/
multi-page poster); critical analysis of a Caribbean economic sector or major regional report—choice made after discussion with instructor (10 pages);
final project: historical review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered
axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultures that must raise questions for class
discussion)

Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Preference also for 1st and 2nd year students. If over-enrolled preference to AFR and Political Economy students.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

GBST 162 (S) Languages of East Asia

Cross-listings: CHIN 162 ANTH 162 ASIA 162 GBST 162

Secondary Cross-listing

An introduction to the three major languages of East Asia: Chinese, Japanese, and Korean. Working with various types of multimedia including audio,
video, images, animation, and texts, we’ll take up the phonetics, phonology, morphology, and syntax of these three languages, including also their
history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic
analysis, we’ll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and
differences among these three languages? How are and aren’t they related? How did the modern standard form of each develop and what is its
relationship to any non-standard languages and dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and
politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence
of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other
languages? And what are the prospects for their future development, including the influence of computers and digital communications? While this
course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper
Prerequisites: none (no prior background in linguistics or any Asian language required, open to all students)
Enrollment Limit: 20
Enrollment Preferences: open to all with preference to first-year students and sophomores
GBST 204 (S) To See the Past: Russian and Soviet Cinema on History

Cross-listings: RUSS 204 GBST 204 COMP 204

Secondary Cross-listing

This course surveys Soviet and Russian cultural history of the 20th- and 21st-centuries through the history of the cinematic medium. We will watch and analyze key films of this period--films by Eisenstein, Vertov, Tarkovsky, Muratova, Balabanov, Zviagintsev, and Fedorchenko among others--from a double perspective. On the one hand, we will study the cultural and historical contexts of the Soviet Union and Russia; on the other hand, we will learn the formal and stylistic aspects of the cinematic medium as it developed historically (from silent, to sound, to color, to digital etc.). From this double perspective, we will try to answer a larger question that underlies this course: What kind of historical thinking can we learn through cinema as a medium? In other words, we will take cinema neither simply as a direct reflection of state ideology nor as pure aesthetic form or entertainment for the masses. Rather, we will approach the films of this period as audio-visual texts that are rich in historical content and require our informed and attentive interpretation.

Class Format: The class meets synchronously on campus twice a week. Remote students will be able to join each synchronous session via zoom. Synchronous sessions will consist of discussion and visual analysis of short clips. All films and reading materials will be available online.

Requirements/Evaluation: For each class you’ll watch 1 or 2 film(s) and read typically 1 article under 20 pages. You will submit short viewing response before each class. Additionally, there will be short viewing or creative assignments to familiarize students with formal aspects of film. Evaluation will be based on participation, one presentation, short sequence analysis, and final paper or video essay

Prerequisites: none, open to all students

Enrollment Limit: 15

Enrollment Preferences: declared or prospective Russian or Comparative Literature majors, Russian Certificate seekers, Global Studies concentrators

GBST 208 (S) The U.S. and Afghanistan: A Post-Mortem (DPE)

Cross-listings: ASIA 208 GBST 208 PSCI 220 ANTH 208 ASST 208

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the
Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

**Requirements/Evaluation:** grading will be determined by class participation, two short essays, and a 15-page research paper

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

**Expected Class Size:** 15-20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 208 (D2) GBST 208 (D2) PSCI 220 (D2) ANTH 208 (D2) ASST 208 (D2)

**Difference, Power, and Equity Notes:** Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

**GBST 212 (F) Foundations of China**

**Cross-listings:** ANTH 212 GBST 212 REL 218 HIST 214 ASIA 211 CHIN 214

**Secondary Cross-listing**

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Requirements/Evaluation:** short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** none
Enrollment Limit: 40
Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 213 (F) Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin's Russia (DPE)
Cross-listings: COMP 257 GBST 213 WGSS 214 RUSS 213

Secondary Cross-listing
Since Vladimir Putin's rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting "homosexual" propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. All readings will be in English, and all films with have English subtitles.

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Those majoring in Russian and/or WGSS, as well as Global Studies concentrators.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: The course engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet Russia than in the West, and critically theorizes contemporary Russian culture and discourse.
Attributes: GBST Russian + Eurasian Studies Electives
Not offered current academic year

GBST 214 (S) Asian/American Identities in Motion (DPE)
Cross-listings: GBST 214 ASST 214 THEA 216 AMST 213 ASIA 214 DANC 216

Secondary Cross-listing
The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. It will orient students towards "reading" and analyzing live and mediated performances within historical, social, and political frameworks. Students will explore how socio-historical contexts influence the processes through which dance performances are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies, and will engage with issues such as nation formation, race and ethnicity, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course,
and might also include film screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Class Format: This course will be taught in a virtual format and will be remote.

Requirements/Evaluation: reading responses, essays, in-class writing assignments, class participation, and group presentations.

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 214 (D2) ASST 214 (D1) THEA 216 (D1) AMST 213 (D1) ASIA 214 (D1) DANC 216 (D1)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance performances and practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

Not offered current academic year

GBST 215  (F)  Performance Ethnography  (DPE)

Cross-listings: GBST 215 DANC 214 ANTH 215 AMST 214 THEA 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 215 (D2) DANC 214 (D1) ANTH 215 (D2) AMST 214 (D1) THEA 215 (D1)

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students’ critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

Not offered current academic year

GBST 216  (S)  Urbanism in the Ancient World

Cross-listings: ANTH 216 GBST 216

Secondary Cross-listing
This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urbanized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

**Requirements/Evaluation:** 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores; or majors in Anthropology or Sociology

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**GBST 217 (F) Viral Inequality: Power and Difference in Pandemics** (DPE)

**Cross-listings:** GBST 217 STS 215

**Secondary Cross-listing**

From contested data to controversial containment strategies, the shape and course of pandemics are influenced at every level by the question: Who matters? Whose lives are prioritized and protected? Whose expertise is made actionable, and why? Focusing on the uneven distribution of risk and care during pandemics, this course explores how global health emergencies are not states of exception, but rather events that lay bare the priorities and interests of their host societies. Our investigation into pandemics--including Black Death, cholera, "Spanish" flu, HIV/AIDS, Ebola and novel coronaviruses--will provide a critical entry point into understanding the social, political, and economic processes that shape health interventions and outcomes, and their divergences along lines of social difference. We will ground our discussion and analysis using key concepts in Science & Technology Studies, while drawing from critical medical anthropology, disability studies, theories of capitalism and disaster studies to enrich our conversation.

**Class Format:** Online seminar

**Requirements/Evaluation:** Several short essays and reflection papers

**Prerequisites:** None, open to all students

**Enrollment Limit:** 12

**Enrollment Preferences:** If overenrolled, preference will be given to first-years and sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 217 (D2) STS 215 (D2)

**Difference, Power, and Equity Notes:** This course takes an intersectional approach to understanding how global pandemics unfold. It will emphasize how power dynamics and social differences shape responses to, and outcomes of, health emergencies. Readings in social and critical race theory are designed to give students a deeper appreciation of these issues.

**Attributes:** PHLH Social Determinants of Health

Not offered current academic year
GBST 218 (S) Markets, Distrust, and History (DPE)

Cross-listings: GBST 218 ECON 218

Secondary Cross-listing

Global markets connect strangers: people of different races, religions, and classes. There are huge profits from such economic contact, but there are also risks: of being cheated, deceived, or coerced. This course examines how global markets have evolved over the past five hundred years using insights from the economics of incentives (principal-agent models, contracts, mechanism design). Case studies will cover: the spice trade and conflict in the Indian Ocean (early 16th century), capital markets and fraud in Amsterdam and London (17th and 18th century), the coffee trade and deception in Mocha and Java (18th and 19th), slavery and its abolition in Brazil (20th), colonial control and resistance in Kenya (21st), and the constraints on "fair trade" in Nicaragua and US (present). Required readings for this class will be sixty or more pages per week, and will include historical case studies, excerpts from novels, and reportage.

Requirements/Evaluation: Students will be evaluated based on class participation, weekly assignments, a midterm, and a final.

Prerequisites: Econ 110

Enrollment Limit: 25

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 218 (D2) ECON 218 (D2)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

GBST 221 (F) The Making of Modern South Asia: 1750-1950 CE

Cross-listings: ASST 221 HIST 221 GBST 221 ASIA 221

Secondary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: discussion

Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

Prerequisites: none; open to all

Enrollment Limit: 40

Expected Class Size: 20-25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

GBST 228  (S) Performance Practices of Global Youth Cultures

Cross-listings: GBST 228 THEA 228

Secondary Cross-listing

This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined "youth" by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

Class Format: reading and discussion

Requirements/Evaluation: includes class discussions, self-reflexive presentations and papers, journal reflections, one 10-page paper based on original research with in-class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: seniors and juniors

GBST 229 Performance Practices of India (DPE)

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors

Expected Class Size: 12

Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has
promoted narrow visions of "femininity" and how artists contest religious nationalism

Not offered current academic year

GBST 233 (F) Colonialism, Capitalism and Climate Crisis

Cross-listings: GBST 233 AFR 233 ENVI 204

Secondary Cross-listing

Evolutions are part of human existence. Our collective understandings of the world, the economic realm and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy.

Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. By the end of the course, students will be able to describe various perspectives from structural economics and other traditions including dependency theory, uneven ecological exchange, ecowomanist and black ecological thought, and critical environmental justice to explain the social, ecological, historical and economic conjunctures underpinning climate crisis.

Arranged to develop more in-depth analytical, communication and writing skills, the course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis. Finally, we will considering demands for climate debt / reparations from social and environmental movements and decolonial perspectives that advance climate justice. Students will also be able evaluate the political economic responses to the climate crisis.

Requirements/Evaluation: Blog post entries; research report on an emerging green technology (10 pages); recorded video / interview of an environmental justice movement/activist in the global South; reflections paper (8 pages); community case study on an environmental project tracing its histories (7 pages); participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

Prerequisites: None

GBST 234 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 REL 234 GBST 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).
Requirements/Evaluation: reading responses, two essays, final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 235 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies
Cross-listings: AFR 235 AMST 235 GBST 235 HIST 275 ENVI 253
Secondary Cross-listing
This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of ‘the environment,’ and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%
Prerequisites: None

GBST 236 (S) Reading the Qur'an

Cross-listings: ARAB 236 REL 236 COMP 213 GBST 236

Secondary Cross-listing

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion and Arabic Studies majors

GBST 241 (F) History of Sexuality

Cross-listings: REL 241 HIST 292 GBST 241 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation: reading responses, two essays, and final research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion, History, and Women's, Gender and Sexuality Studies majors

**GBST 243  Anti-Muslim Racism: A Global Perspective**  (DPE)

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

**Requirements/Evaluation:**  Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

**Prerequisites:**  none

**Enrollment Limit:**  25

**Enrollment Preferences:**  Global Studies concentrators and Religion majors

**Expected Class Size:**  20

**Grading:**

**Unit Notes:**  Also qualifies for the GBST Urbanizing World track

**Distributions:**  (D2)  (DPE)

**Difference, Power, and Equity Notes:**  The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

**GBST 244  (S)  Black Mediterranean**  (DPE) (WS)

**Cross-listings:**  GBST 244  COMP 244

**Secondary Cross-listing**

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of migrant intellectuals and artists from North Africa and the Middle East, who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Today the Mediterranean has become a graveyard where black and brown bodies transit a hostile and deadly passage. Therefore, a centerpiece of this course will be an examination of the racist discourse in Europe in the light of the Black Lives Matter's quest for decolonizing knowledge. In this interdisciplinary course, we read both literary works (Ali Farah, Khatibi, Lakhous, Scëgo), and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films, documentaries, podcasts, exhibits and museums of colonialism in Europe.

**Class Format:**  This will be an hybrid course. Students will meet twice a week with me.
Requirements/Evaluation: weekly writing assignments, midterm and final exams, final paper, oral presentation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option

Writing Skills Notes: This course is designed to be writing-intensive, as it requires weekly response papers, midterm, and final papers, and blog discussions.
Difference, Power, and Equity Notes: Within the theoretical framework of postcolonial studies, this course examines themes such as: race; Europe and its postcolonial legacy; power imbalances in the current European policies of migration; the urban space of Rome as site of conflictual representations of center/periphery.
Not offered current academic year

GBST 246 (F) Asian American Performance: Activism and Aesthetics (DPE)
Cross-listings: THEA 246 GBST 246 AMST 249
Secondary Cross-listing
This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.
Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: sophomores, juniors, and seniors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
THEA 246 (D1) GBST 246 (D2) AMST 249 (D2)
Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

GBST 247 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)
Cross-listings: SOC 248 GBST 247 RUSS 248
Secondary Cross-listing
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very
reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, Latvia and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: The course will meet remotely for the most part, although in-person meetings with the appropriate precautions may be arranged at the tutorial partners' and instructor's discretion.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 248 (D2) GBST 247 (D2) RUSS 248 (D1)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

GBST 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: COMP 273 ENGL 273 GBST 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

GBST 305  (S)  A History of Health and Healing in Africa  (DPE)

Cross-listings:  HIST 305  AFR 304  GBST 305

Secondary Cross-listing
This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation:  active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 305 (D2)  AFR 304 (D2)  GBST 305 (D2)

Difference, Power, and Equity Notes:  This course explores transformations in how Africans in the recent past have experienced, practiced and conceptualized health and healing. These transformations have been triggered by the expansion of global biomedicine, new and lethal epidemics, old diseases in changing environments, and new political and economic decisions by policymakers. The history of health and healing in Africa provides a critical lens through which to examine societal imbalances and and inequalities.

GBST 312  (F)  The Mughal Empire: Power, Art, and Religion in India

Cross-listings:  GBST 312  REL 312  ASIA 312  ASST 312  HIST 312

Secondary Cross-listing
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

**GBST 322 (F) Waste and Value**

**Cross-listings:** GBST 322 ENVI 322 ANTH 322

**Secondary Cross-listing**

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

**Requirements/Evaluation:** regular posting of critical response papers, field notes on waste streams, research-based final paper

**Prerequisites:** none
GBST 330 (S) American Political Thought in Hemispheric Context

Cross-listings: PSCI 330 GBST 330

Secondary Cross-listing

Actors living during the Age of Revolutions witnessed an astounding number of social, political, and cultural changes. In the short period between 1775 and 1830 more than thirty popular insurgency movements took control of the American hemisphere, most of them by organizing around the principles of republican politics. In this course, we study the peoples, demands, and visions that comprised the popular movements of the Age of Revolutions to reconstruct the canon American Political Thought in hemispheric context. This course emphasizes the comparative features of post-colonial movements in the Americas and centers the contributions of indigenous, raced, gendered, and ethnicized communities. The course schedule is divided into two sections. The first half of the class situates the political and theoretical problems of American Political Thought by engaging with scholarship on post-colonial movements, decolonial thought, democratic theory, and theories of popular rule. The second half of the course contextualizes these frameworks by putting them in conversation with studies of revolutionary change, popular imagination, and case studies on revolutionary movements throughout the Americas. Students are expected to engage in archival research, as well as work with both primary and secondary sources on the Age of Revolutions. The class will meet remotely and hold synchronous discussions.

Class Format: The class will meet remotely for synchronous lecture and discussions. Recorded class sessions will be uploaded for any students who cannot meet synchronously.

Requirements/Evaluation: Regular attendance, consistent class participation, three Glow posts, three two-page reflection papers, and a final research paper of 10-12 pages

Prerequisites: At least one prior course in political theory, social theory, history of the Americas (either the United States or Latin America), or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Concentrators in political theory in Political Science, then majors or concentrators in Political Science, American Studies, Global Studies, and Latino/a Studies

GBST 342 (F) Democratic Erosion

Cross-listings: GBST 342 PSCI 343

Secondary Cross-listing
A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is not intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage, critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

**Class Format:** As a hybrid course, the class will feature both in-person and online components. I will post 1-2 short lectures on GLOW to accompany assigned readings/media for the week. Our scheduled course time will be a mix of discussions, interactive learning exercises, and presentations. At least one class per week will be held in-person; whether the other class will be online or in-person will depend on a number of factors, including the distribution of students taking the course on campus or remotely.

**Requirements/Evaluation:** Active Class Participation, 3 Short Response Papers, Country Case Study (15-20 pages, written incrementally throughout semester) and Presentation.

**Prerequisites:** Prior coursework in political science or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Political Science Majors, Global Studies Concentrators

**Secondary Cross-listing**

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Ahi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papamiento, Braille, and Emoji, Alice continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

**Requirements/Evaluation:** active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

**Prerequisites:** students must have at least three years of college-level second-language instruction or the equivalent (advanced proficiency), or permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** COMP majors; language majors; language students

**Expected Class Size:** 10
GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE)

Cross-listings: GBST 351 PSCI 351

Secondary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

Class Format: discussion then seminar

Requirements/Evaluation: three short essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 351 (D2) PSCI 351 (D2)

Difference, Power, and Equity Notes: The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

GBST 352 (F) Politics in Mexico (DPE)

Cross-listings: GBST 352 PSCI 352

Secondary Cross-listing

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.
Class Format: lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

Requirements/Evaluation: map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

Prerequisites: some knowledge of Mexican history

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and seniors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 352 (D2) PSCI 352 (D2)

Difference, Power, and Equity Notes: One unit of the course directly engages the tension between racial and cultural diversity, on one side, and national identity in 20th century Mexico. Another critically analyzes the reception in Mexican national discourse of the experiences of discrimination suffered by migrants in the USA.

GBST 356 (S) The Myth of Venice and its Modern Aftermath

Cross-listings: COMP 356 ENGL 358 GBST 356

Secondary Cross-listing

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron’s Childe Harold’s Pilgrimage, John Ruskin’s Stones of Venice, as well as full readings of Thomas Mann’s Death in Venice, Marinetti’s Futurist manifestos, Italo Calvino’s Invisible Cities, and more. We will also examine movies, such as Luchino Visconti’s Senso and Death in Venice and Nicholas Roeg’s Don’t Look Now. This course is offered in English; all texts are provided in translation.

Requirements/Evaluation: mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

Prerequisites: familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

Enrollment Limit: 20

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

GBST 358 (S) Religion and Law (DPE)

Cross-listings: GBST 358 REL 358
This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

Requirements/Evaluation: reading response, two essays, final research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 358 (D2) REL 358 (D2)

Difference, Power, and Equity Notes: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

Not offered current academic year

GBST 366 (S) #OutofHaiti: Haiti, Black Sovereignty and the Global Political Economy

Cross-listings: GBST 366 AFR 366

Secondary Cross-listing

In the Western hemisphere, Haiti (Ayiti kreyòl) is a symbol of many extremes related to impoverishment, governance and institutional sabotage, Black liberation, artistic and cultural achievement, and underdevelopment. This course places Haiti at the center of broad global political economic transformations. Starting from Black Atlantic enslavement to the present, this course will critically interrogate the superlatives and extreme depictions of Haiti. We will unpick these imageries and material realities and consider broader perspectives within historical and contemporary significance of struggles for Black sovereignty and liberation. We will make connections between anti-blackness, European hegemony/supremacy and economic and social structures to broader ideas of resistance and revolution. Taking economic and political history as data sources and starting points for discussion, students will be able to analyze and juxtapose media imagery, documentary films and contributions of civic movements and figures within Haiti and the Haitian diaspora. From the perspective of connected Blackness, students will explore how Black peoples' links through global struggles for liberation and freedom and against imperialism emerge and are understood today. Students will undertake assignments that compare and contrast experiences across the African diaspora, utilize Haitian writings and political and economic developments to assess Haiti's long relationship with major international economic institutions and the United States. Topics range from the Haitian 'reparations' to France, United States' embargos, military occupation, political interventions, international energy crises, corporate trade deals, post-earthquake NGO humanitarianism, to United Nations military and economic operations, bilateral deals like Petrocaribe and longstanding popular demands against imperialism.

Requirements/Evaluation: Journal entries (250 words each); individual essay on documentary film or media (8 pages); research report on a major contemporary social/economic/environmental issue in Haiti (10 pages); "Haiti Liberation Space" group public education project on the contemporary importance of Haiti to global Black liberation/ racial justice and a summative reflection on a meaningful aspect of this project (5 pages); class participation (discussion and readings)

Prerequisites: None

Enrollment Preferences: If over-enrolled, preference to AFR and Global Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Forma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: Course will be offered remotely.
Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10 -pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 306 (D2) GBST 369 (D2) COMP 369 (D1) ARAB 369 (D1)
Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.
Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Requirements/Evaluation:** class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** history majors and students with demonstrable interest in maritime/Indian Ocean history

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 391 (D2) ASST 391 (D2) ASIA 391 (D2) HIST 391 (D2)

**Writing Skills Notes:** Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

**Difference, Power, and Equity Notes:** This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.
Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.
Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.
Enrollment Limit: 10
Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

CLASSICS (Div I)
GREEK
Chair: Professor Edan Dekel

- Nicole G. Brown, Assistant Professor of Classics
- Kerry A. Christensen, Garfield Professor of Ancient Languages
- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program
- Morgan V. King, Visiting Assistant Professor of Classics
- Sarah E. Olsen, Assistant Professor of Classics
- Amanda R. Wilcox, Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:**
1. Six courses in Greek and/or Latin, with at least two 400-level courses in one language.
2. Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:**
1. One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223).
2. Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302.
3. Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY
We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

CLGR 101 (F) Introduction to Greek
This full-year, intensive course presents the fundamentals of ancient Greek grammar, syntax, and vocabulary. While finishing the formal study of the language in the second semester, students begin reading prose and poetry of the classical period, usually works by Xenophon and Euripides.

Requirements/Evaluation: frequent quizzes, tests, and a final exam
Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)
Enrollment Limit: 15
Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores
Expected Class Size: 8-10
Grading: no pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Fall 2021

LEC Section: 01  MWF 11:00 am - 12:15 pm  Kerry A. Christensen

CLGR 102 (S) Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: Greek 101-102 is being offered as a hybrid course. It is designed so that any student may enroll and thrive regardless of their location or mode of participation--on-campus and taking the class in person or studying remotely from any location. Students who will be taking the class remotely are encouraged to consult with the instructor about their circumstances.

Requirements/Evaluation: frequent quizzes, tests, and a final exam

Prerequisites: CLGR 101 or permission of department

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: no pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Spring 2022

LEC Section: 01  MWF 11:00 am - 12:15 pm  Kerry A. Christensen

CLGR 201 (F) Intermediate Greek

We will be reading selections from Hesiod's *Theogony* and Plato's *Republic*, combined with grammar review. While the primary goal of this course is to develop fluency in reading Greek, we will also consider the literary and cultural significance of our texts, exploring issues such as archaic conceptions of the gods and cosmos, Greek poetic forms of expression, the transition from archaic to classical thought, and literature in the life of the polis.

Requirements/Evaluation: Evaluation will be based on classroom participation, quizzes, tests, and a final exam.

Prerequisites: CLGR 101-102 or two years of Greek in secondary school

Enrollment Limit: 12

Enrollment Preferences: Classics majors and intended Classics majors

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

SEM Section: 01  MR 1:10 pm - 2:25 pm  Kerry A. Christensen

CLGR 401 (S) Homer: The Iliad

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Iliad* in Greek and the entire epic in translation.
CLGR 402  (S)  Homer: The Odyssey
From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Odyssey* in Greek and the entire epic in translation.

**Requirements/Evaluation:** class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** majors in Classics, Comparative Literature, English and other literatures

**Expected Class Size:** 5-6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Spring 2022
SEM Section: 01  MR 1:10 pm - 2:25 pm  Amanda R. Wilcox

CLGR 404  (S)  Tragedy
Tragedy was a hybrid genre invented in sixth-fifth century Athens, where tragic performances in the city's festival of the Greater Dionysia played a vital role in the democratic polis. This course will focus on reading in Greek a complete tragedy of Sophokles or Euripides; we will also read in translation several other tragedies, a satyr-play, and a comedy of Aristophanes. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

**Class Format:** This is a hybrid course that will likely involve both Zoom and in-person sections; precise format (including potential alternate meeting times) TBD in consultation with enrolled students.

**Requirements/Evaluation:** contributions to class, midterm and final exams (take-home), and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors, students continuing the Greek sequence

**Expected Class Size:** 13

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Not offered current academic year**

CLGR 405  (F)  Greek Lyric Poetry
This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and
Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

CLGR 409 (F) Plato

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (Symposium, Phaedo, Republic, Phaedrus), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: For the fall of 2020, this course will taught online. The seminar will meet at the regularly scheduled time twice a week or at a mutually agreed on time that does not conflict with other course work.

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year
CLGR 414 (F) Thucydides
This course will focus on Thucydides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

Requirements/Evaluation: class preparation and participation, a midterm exam, a final paper, and a final translation exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 6

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

Winter Study ---------------------------------------------------------------

CLGR 99 (W) Independent Study: Greek
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
HISTORY (Div II)
Chair: Professor Anne Reinhardt

- Febe Armanios, Bennett Boskey Distinguished Visiting Professor of History
- Magnús T. Bernhardsson, Chair of Arabic Studies, Brown Professor of History and Faculty Affiliate in Leadership Studies and Religion
- Alexander Bevilacqua, Assistant Professor of History
- Casey D. Bohlen, Visiting Assistant Professor of History and Religion
- Jessica Chapman, Professor of History
- Christine DeLucia, Assistant Professor of History
- Alexandra Garbarini, Professor of History
- Aparna Kapadia, Associate Professor of History
- Roger A. Kittleson, Professor of History
- Thomas A. Kohut, Sue and Edgar Wachenheim III Professor of History
- Gretchen Long, Professor of History
- Karen R. Merrill, Frederick Rudolph '42 - Class of 1965 Professor of American Culture
- Anne Reinhardt, Chair and Professor of History
- Eiko Maruko Siniawer, Class of 1955 Memorial Professor of History
- Yana Skorobogatov, Assistant Professor of History
- Tyran K. Steward, Assistant Professor of History
- Benjamin Twagira, Assistant Professor of History
- Chris Waters, Hans W. Gatzke '38 Professor of Modern European History
- Carmen T. Whalen, Carl W. Vogt '58 Professor of History, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion
- Scott Wong, Charles R. Keller Professor of History

GENERAL STATEMENT OF GOALS
The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students’ intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students’ ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

COURSE NUMBERS
The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.

First-Year Seminars and Tutorials (102-199): These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence)
and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student’s work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

First-year seminars and tutorials can be counted toward the History major and used to meet the department’s group and concentration requirements.

Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history.

Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.

Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

Advanced Tutorials (480-492, 495): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student’s essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

- **Africa and the Middle East:** 102-111, 202-211, 302-311, 402-411
- **Asia:** 112-121, 212-221, 312-321, 412-421
- **Europe and Russia:** 122-141, 222-241, 322-341, 422-441
- **Latin America and the Caribbean:** 142-151, 242-251, 342-351, 442-451
- **United States:** 152-191, 252-291, 352-387, 452-471
- **Transnational/Comparative:** 192-199, 292-299, 388-396, 472-479

**ADVISING**

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department’s administrative assistant.

**THE MAJOR**

The major consists of at least nine semester courses as follows:
Required Courses in the Major

One Major Seminar (History 301)

At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

Elective Courses

Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:

- Group A: The History of Africa
- Group B: The History of Asia
- Group C: The History of Europe and Russia
- Group D: The History of Latin America and the Caribbean
- Group E: The History of the Middle East
- Group F: The History of the United States and Canada
- Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.

Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member's agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department's assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department’s Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students’ continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the
department’s thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on “Historiography: Tacitus to Weber” that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department’s administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. I'm not quite sure that I understand what “type” means here—the courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None recently.

HIST 104  (S)  Race and a Global War: Africa during World War II  (DPE) (WS)

Cross-listings:  AFR 104  HIST 104
This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: active participation in discussion, map quiz, 2 short papers (3-5 pages), presentation, and one research paper (8-12 pages)

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 15

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 104 (D2) HIST 104 (D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

Spring 2022

SEM Section: 01 TR 9:55 am - 11:10 am Benjamin Twagira

HIST 109 (S) The Iranian Revolution (DPE) (WS)

Cross-listings: ARAB 109 HIST 109

Primary Cross-listing

The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Mohammad Reza Pahlavi Shah, and how Khomeini’s vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran’s geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

Class Format: Hybrid

Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

Prerequisites: No prerequisites.
Enrollment Limit: 10

Enrollment Preferences: First Years and Sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 109 (D2) HIST 109 (D2)

Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives of ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians?

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

HIST 110 (S) The Veil: History and Interpretations (DPE) (WS)

Cross-listings: HIST 110 WGSS 110 ARAB 215

Primary Cross-listing

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 110 (D2) WGSS 110 (D2) ARAB 215 (D2)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

HIST 111 (F) Movers and Shakers in the Middle East

Cross-listings: ARAB 111 HIST 111 LEAD 150

Primary Cross-listing

This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace,
relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

Requirements/Evaluation: class participation, short essays, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 115  (F)  The World of the Mongol Empire  (WS)

Cross-listings:  HIST 115  ASIA 115  ASST 115

Primary Cross-listing

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis’s descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the “world order” of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler’s accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

Requirements/Evaluation: active participation in discussion, several short papers, and a final research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 115 (D2) ASIA 115 (D2) ASST 115 (D2)

Writing Skills Notes: Three 5- to 7-page papers written in two drafts each with instructor feedback, one 10- to 12-page final research paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 117  (S)  Bombay/Mumbai: Making of a Modern Metropolis  (WS)

Cross-listings:  GBST 117  HIST 117  ASIA 117

Primary Cross-listing

Bombay or Mumbai is India’s foremost urban center and is well known today as a truly global city. It is the heart of India’s commercial life comparable in vibrancy and multiculturalism with the world’s emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India’s most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark
underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well as a wide range of multimedia sources including cinema, photography, and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health, and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites: First years and sophomores only

Enrollment Limit: 19

Expected Class Size: 12-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 121 (F) The Two Koreas (WS)

Cross-listings: HIST 121 ASST 121 ASIA 121

Primary Cross-listing
The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 121 (D2) ASST 121 (D2) ASIA 121 (D2)

Writing Skills Notes: In this tutorial, students receive substantial feedback from the professor (and from their partner) both in the sessions and in written comments about all aspects of their writing--argumentation, structure, mechanics. Such feedback is offered on five papers (of 5-7 pages in length) that they write over the course of the semester; they can also elect to receive comments on their final, synthetic paper (12-15 pages in length).
HIST 130  (S)  Rioting in British History  (WS)
Since scholars in the twentieth century turned from the bird's to the worm's-eye view of the past, scholarship on rioting and crowd actions has grown. Exploring rioting in the history of modern Britain allowed researchers a chance to learn about the values, priorities, and tactics of people not previously centered in the historical record. It also created space to raise questions about what makes something a riot and how visions of public order shape military or police responses to those riots. In this course, we will examine the causes, strategies, and consequences of riots from the 1780s to the 1980s, from bread riots to the Brixton riots. We will also develop our own definitions of what qualifies as a riot, interrogating why our present definitions may differ from those in the past. While this course is rooted in the "classic" studies of British riots, to give students a strong sense of disciplinary practices and traditions, it also allows space to see how cutting-edge scholarship has expanded the discipline. "Rioting in British History" is a remote, synchronous online history seminar designed for first- and second-year students, particularly those interested in the discipline of history. In addition to exploring the theme of rioting in great depth, this course will also provide students the chance to grow as researchers and writers. By the end of this course, students will have developed the ability to analyze and evaluate works of history, identify the kinds of primary sources necessary to answer their historical questions, and write history papers that show their ability to identify and analyze relevant scholarly works and primary source materials. Since this is a writing-intensive course, students should expect to conduct peer evaluations of their writing assignments and will get consistent feedback on their writing assignments from the instructor.

Class Format: This is a remote class with synchronous meetings held over Zoom.

Requirements/Evaluation: Students will have regular reading assignments, averaging around 50 pages per week. Students will complete four unit response papers and one 10-12 page research paper.

Prerequisites: First-year or sophomore standing--juniors and seniors with permission of instructor.

Enrollment Limit: 12

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (WS)

Writing Skills Notes: Students will complete four unit response papers, two of which will receive peer evaluation and feedback in class before being revised and submitted. All papers will receive feedback from the professor. Students will also complete a 10-12 page final research paper which they will develop over the course of the semester, including a rough draft workshop.

HIST 134  (F)  The Great War  (WS)
In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for Eastern Europe and the Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; one revised paper.

Prerequisites: permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)
Writing Skills Notes: Bi-weekly 5- to 7-page papers; one formal paper revision. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 135  (F)  The Coffeehouse from Arabia to the Enlightenment

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

Requirements/Evaluation: attendance and participation; three short analytical papers; a final research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 137  (F)  Victorian Britain and the Anglo-Afghan Wars  (WS)

Long before the US and its allies fought the recent war in Afghanistan (2001-2021), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the Second (1878-1881) generated considerable domestic discord, and the Third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of the wars Britain fought in Afghanistan, and the reasons for them, but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

Requirements/Evaluation: Evaluation will be based on regular and continuous participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and various shorter exercises leading up to a final research paper (10-12 pages) due at the end of class

Prerequisites: None. First-year or sophomore standing required.

Enrollment Limit: 19

Enrollment Preferences: First-year students, and then sophomores who have not taken a 100-level seminar or tutorial in History.

Expected Class Size: 12-16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

Writing Skills Notes: Students will write two document analyses (750 words each) and two guided research essays (5 pages each), all letter-graded and returned with comments. Also, students will write a final research paper (10-12 pages) in consultation with the instructor; a working bibliography and prospectus, and a rough draft, will be required in advance of submission of the final paper. Students will learn about research and writing skills and will receive timely suggestions for improving their work.

Attributes: HIST Group C Electives - Europe and Russia
HIST 140 (S) Crime and Punishment in Russian History (WS)

Cross-listings: RUSS 140  HIST 140

Primary Cross-listing

For centuries, people have used crime in Russia and the Russian state’s response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn’s Gulag Archipelago in 1962 and beyond. By semester’s end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner’s work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 140 (D2) HIST 140 (D2)

Writing Skills Notes: Each student will write five 5-to-7-page papers on which the instructor will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partners’ papers. As the final assignment, each student will revise one of their five papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 143 (S) Soccer and History in Latin America: Making the Beautiful Game (WS)

This course examines the rise of soccer (fútbol/futebol) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about racial, gender, regional, and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

Requirements/Evaluation: Class participation, a series of short papers, response papers, and a research paper

Prerequisites: First-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: First year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an application process may be developed to determine admission to the course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)
Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 155  (F) School Wars  (WS)
Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs.
Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than
500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Prerequisites: first-years or sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 156  (F)  The Manifesto in U.S. Politics  (WS)

Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many radical American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across three different historical junctures in the U.S. -- the Revolutionary era, the 1830s and 1840s, and the 1960s and early 1970s -- focusing in particular on struggles over racial equality and women's rights.

Requirements/Evaluation: participation; three graded essays (3-5 pages each), handed in as drafts, given comments, and with time for revision; 3-5 very short, ungraded assignments on course content and about library research; one manifesto (any length) and a final reflection paper (3-5 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate between doing short graded and ungraded assignments in the first 8-10 weeks of the class: the 3 graded assignments (varying length, but no more than 7 pages maximum) each will involve a draft, and then a revision based on instructor comments; the ungraded assignments will be either informal, analytical responses to the reading; short, creative responses; or discussion questions. Students will also each write a manifesto and a short, final reflection paper.

HIST 157  (S)  1960s and U.S. History  (WS)

Cross-listings: HIST 157 AMST 157

Primary Cross-listing

This 100-level seminar will introduce students to the craft of history through the study of the 1960s, an important decade in American history (indeed, the world). In the U.S., this decade was marked by the on-going war in Vietnam, the struggle against racial inequality and racist oppression, changes in attitudes toward sex and sexuality, music, the role of youth culture, advances in technology, the rise of new expressions of American conservatism, and other tumultuous transformations in politics, culture, and the economy.

Requirements/Evaluation: two 3-- to 5--page papers based on readings; a 5-- to 7-page oral history project; research precis, annotated bibliography;
final 10-page research paper; class participation

**Prerequisites:** first-years

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 157 (D2) AMST 157 (D2)

**Writing Skills Notes:** Precis and annotated bibliography will receive critical feedback from professor and peers, and dedicated time in class to discuss assignments and traits of effective history writing. On all papers students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

**HIST 158 (S) North of Jim Crow, South of Freedom** (DPE) (WS)

**Cross-listings:** HIST 158 AFR 158

**Primary Cross-listing**

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs—all with an eye toward scrutinizing the freedom struggle in its northern variety.

**Requirements/Evaluation:** Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 158 (D2) AFR 158 (D2)

**Writing Skills Notes:** Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

Spring 2022

SEM Section: 01 MW 11:00 am - 12:15 pm Tyran K. Steward
In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

**Expected Class Size:** 10

**Grading:** No pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 159 (D2) HIST 159 (D2)

**Writing Skills Notes:** Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of sentient intelligibility.

**HIST 162 (S) Unfamous Women, USA (DPE)**

How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters? We will read social and cultural U.S. women’s history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Tutorial pairs will spend at least one week investigating sources in the Chapin Library and perhaps looking at visual art at Williams College Museum of Art.

**Requirements/Evaluation:** Students will write papers (4-6 pages) roughly every other week, students will also write one page critiques, students will make a formal oral presentation one week

**Prerequisites:** First-years and sophomores

**Enrollment Limit:** 10

**Enrollment Preferences:** First-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 10
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course investigates women whose lack of political, economic and cultural power has persisted into the historical record. We will consciously think and write about the role of historians in recovering lives and stories. How much of someone’s story can we really tell? How far should historians go in deploying peoples scanty records to make an intellectual argument?

HIST 166  (F)  Cold War Films  (WS)

This history tutorial utilizes popular film as a vehicle to explore American Cold War culture. The Cold War was an intense period of political, ideological, cultural, and military struggle between the United States and the Soviet Union that took place after the Second World War. For every nuclear test, arms sale, or military operation, there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life—communism and capitalism; totalitarianism and democracy—an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. Given the vast cultural influence of movies, film during this era served as a vital ideological battleground. Moreover, cinema offers us a window into the cultural landscape of Cold War America, for film reflects, interprets, and shapes national identity in complex ways. The films examined in this course (for the most part, Hollywood productions from the mid-1940s to the mid-1960s) serve as unique historical documents and as cultural texts illuminating the ways filmmakers and audiences negotiated the challenges presented by the Cold War struggle. The films assigned for this course focus on a range of topics, including anticommunism, competing visions of Americanism, religion, the Hollywood Ten, J. Edgar Hoover and the FBI, the nuclear arms race, brainwashing, gender, race relations, and the eventual unravelling of the Cold War consensus. The historical analysis of film requires not only a close reading of the movies themselves, but also a clear understanding of the historical context in which they appeared. The readings paired with each film will help to clarify this context and offer interpretations of the films with which we will engage.

Requirements/Evaluation:  Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers’ work. These writing assignments will be evaluated alongside preparedness for and performance in tutorial discussions.

Prerequisites:  None, open to all students.

Enrollment Limit:  10

Enrollment Preferences:  First and second year students will be given priority. If the course is overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size:  10

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)  (WS)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers’ work. They will receive feedback on each of these papers—in writing and in person—from both the professor and their tutorial partners. Throughout the semester these writing assignments will total 25-30 pages.

HIST 167  (S)  Let Freedom Ring? African Americans and Emancipation  (WS)

Cross-listings:  AFR 167  HIST 167  AMST 167

Primary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 167 (D2)  HIST 167 (D2)  AMST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement."

HIST 205  (F)  The Making of Modern Africa  (DPE)

Cross-listings:  AFR 203  HIST 205

Primary Cross-listing

This course traces the incorporation of Africa into an expanding global world from the middle of the 19th century to the present and examines the impact of this integration on the history of African cultures and modern nation states. It is designed to provide you with an introductory understanding of the economic, social, and political forces that have shaped Africa in recent times and continue to affect the lives of individual people across the continent. Over the course of the semester you will be introduced to major historical themes in African History from the past 150 years, including the abolition of the slave trade and its effects, African states in the 19th century, the growing integration of different regions into shifting global and economic systems, European colonization, and African resistance to imperial conquest. We will also explore the emergence of the nationalist and anti-colonial movements, and Africa's post-colonial experiences of self-governance. Within these broad historical processes, the class will cover additional key themes such as religious change and the role of Western missionaries; changing gender roles; environmental exploitation and change; the emergence of the developmental state; urbanization; military dictatorships, and war and violence in the late 20th century. We will also cover some of the issues surrounding the study of African History as a discipline. This is a challenging task as no single course can cover more than a silver of the complexity and variety of the continent. This is why we approach the study of Modern African History through a comparative prism.

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and a case study paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading:  no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 203 (D2) HIST 205 (D2)

Difference, Power, and Equity Notes: This course will introduce students to how modern Africans have contended with powerful forces that have deeply affected the continent. It will examine how different societies on the continent -- in different environments and circumstances -- devised solutions to the challenges of the day. All of the readings, discussions, and assignments will ask students to center and insert African voices into histories fraught with misrepresentations.

HIST 206  (F)  History of Islam and the Middle East since 1453

Cross-listings:  HIST 206  REL 220  ARAB 206

Primary Cross-listing
This course offers an introduction to the major political and societal institutions that evolved under the aegis of what we might call "Islamic civilization" since the Ottoman conquest of Byzantine Constantinople in 1453. The principal geographic areas covered are the Middle East, North Africa, and to some extent the Balkans. Major topics include the rise of the Ottoman sultanate and their consolidation of rule, the Persian Safavid Empire, the rise of Western intervention and colonialism, nationalism, and state formation, and the challenges of and responses to modernization.

Requirements/Evaluation: attendance, participation, map exercise, 2 papers, midterm and take-home final

HIST 208  (F) What is Islam?  (DPE)

Cross-listings: ARAB 234  REL 234  GBST 234  HIST 208

Secondary Cross-listing
This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 211  (S) Understanding 9/11 and the War in Iraq  (DPE)

Cross-listings: HIST 211  ARAB 211

Primary Cross-listing
What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the
eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

Requirements/Evaluation: short online writings and papers and a final project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 211 (D2) ARAB 211 (D2)

Difference, Power, and Equity Notes: This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

HIST 213 (S) Modern China, 1600-Present

Cross-listings: HIST 213 ASIA 213

Primary Cross-listing

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

Requirements/Evaluation: class participation, two short papers, two essays, a midterm and a self-scheduled final exam

Prerequisites: none; open to all

HIST 214 (F) Foundations of China

Cross-listings: ANTH 212 GBST 212 REL 218 HIST 214 ASIA 211 CHIN 214

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now
call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation:  short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

HIST 217  (F) Early Modern Japan
Cross-listings:  ASIA 217  HIST 217  ASST 217
Primary Cross-listing
Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

HIST 218  (F) From Crises to Cool: Modern Japan, 1850s-Present
Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese people from factory workers and farmers to politicians and intellectuals have understood, shaped, and lived the upheavals from the 1850s through the present day. And it will examine how the country of Japan as well as individual Japanese people have defined the identities and meanings of "modern Japan." We will ask why a modernizing revolution emerged out of the ashes of the early modern order; what democracy and its failures wrought; how world war was experienced and what legacies it left in its wake; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual treatises, fiction, films, and oral histories.

HIST 220  (S) History and Society in India and South Asia: c. 2000 to 1700s CE

Cross-listings: HIST 220 ASIA 222

Primary Cross-listing

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the urban Indus Valley civilization to the end of the Mughal Empire and will address topics such as the origins and development of the caste system and 'Hinduism', society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Requirements/Evaluation: class participation, response papers and presentation, 2 essays, take-home a mid-term and a final exam

Prerequisites: none; open to all

Enrollment Limit: 40

Enrollment Preferences: History Majors, and those with demonstrable interest in South Asian history

HIST 222 (S) Greek History

Cross-listings: HIST 222 CLAS 222

Secondary Cross-listing

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek influence into Asia through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, a midterm, a final exam, and a medium-length paper

HIST 222 (D2) CLAS 222 (D1)
HIST 223 (S) Roman History

Cross-listings: CLAS 223 HIST 223 LEAD 223

Secondary Cross-listing
The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to libertas understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

Class Format: This course will be taught in hybrid mode. Assignments will consist of readings, case studies, short writing assignments and student-led discussions both in-class and via GLOW. Some elements will be offered asynchronously and/or optionally depending on the needs of students studying remotely. Please email the instructor with any questions you have about the structure or nature of the class or about what to expect if you are studying remotely.

Requirements/Evaluation: Class preparation and participation, several short response papers, one longer 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better at the end of the semester may substitute a 10 to 15-page research paper for the final exam.

Prerequisites: None; open to all

Enrollment Limit: 20

Enrollment Preferences: Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

HIST 226 (F) Early Modern Europe

The three hundred years from the late Middle Ages to the French Revolution were Europe's formative centuries: they saw the emergence of the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and intensification of trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Readings will emphasize primary sources and include such authors as Machiavelli, Montaigne, Hobbes, Aphra Behn, Voltaire, and Mary Wollstonecraft.
HIST 228  (S)  Europe in the Twentieth Century

This course will offer a survey of some of the important themes of twentieth-century European history, from the eve of World War One to the beginning of the twenty-first century. Organized topically and thematically, the course will consider European society in the fin-de-siècle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the "economic miracle" of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; the break-up of Yugoslavia; and the recent debates about Islam in Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

Class Format: the class will be taught primarily by discussion with several lectures operating to frame those discussions
Requirements/Evaluation: regular attendance and class participation, six or seven in-class quizzes, two 6-8 page interpretive essays, and a take-home final examination
Prerequisites: none; open to all
Enrollment Limit: 40
Enrollment Preferences: if overenrolled, preference given to History majors and students interested in becoming a major
Expected Class Size: 25-35
Grading: no pass/fail option, yes fifth course option

HIST 230  (F)  Modern European Jewish History, 1789-1948

Cross-listings: HIST 230  JWST 230

Primary Cross-listing
What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and fiction.

Class Format: discussion
**HIST 239 (F) Germany in the Twentieth Century**

This course is designed to introduce students to the history of the twentieth-century Germany as experienced and made by ordinary human beings through written documents, literature, film, and the writings of historians and other scholars. Topics to be considered include: the bourgeoisie and the working classes in the Kaisersreich; Germany at the outbreak of World War I; the experience of war and its aftermath; the hyper-inflation of 1923; the commitment of Germans to democracy during the Weimar Republic; the mood in Germany at the beginning of the 1930's; the coming to power of the National Socialists; the ideology of National Socialism; the "Volksgemeinschaft"; the Nazi image of the Jew; the "Final Solution"; World War II on the battlefront and on the home front; the West German "Economic Miracle"; divided Germany in the 1970s and 1980s; life in the German Democratic Republic; the "Historians' Debate"; and Germany after the Wall.

**Class Format:** discussion

**HIST 240 (S) The Soviet Experiment**

Cross-listings: RUSS 240  HIST 240

*Primary Cross-listing*

In 1917, the former Russian Empire became the site of the world's first socialist revolutionary government and the twentieth century's largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history's most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects' and leaders' policies left both at home and abroad, and the impact it had on the people who lived and didn't live to tell the tale.

**Class Format:** Format: seminar; Each week, students will watch a pre-recorded asynchronous lecture that will provide context for the readings due
that week. Students will be assigned to a small group of no more than 8 students which will "meet" with the instructor for a weekly, tutorial-style discussion on Zoom.

Requirements/Evaluation: active class participation, two short essays (3-5 pages), one in-class midterm, and one take-home final exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History Majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

HIST 241  (F) Imperial Russia: State and Society between Europe and Asia

Cross-listings: HIST 241 RUSS 241

Primary Cross-listing

Russia. The name alone evokes wonder, fear, romance, and history itself. Over the past ten centuries, the territory that we now call the Russian Federation has witnessed dramatic transformations that underwrote its transition from feudal backwater to global superpower. Its journey from tribalism to imperialism, feudalism to autocracy, agrarianism to industrialization, monarchism to parliamentarianism, Orthodox Christianity to revolutionary atheism, left a mark not just on the collective Russian conscious, but on a world that has grown accustomed to viewing Russia as a site for ideas, projects, and processes both exemplary and tragic. How did Russian state power borrow and depart from west European norms? How did foreign and domestic norms contribute to the creation of a "Russian" identity? How did Russian elites and ordinary people resist, collaborate with, or develop an apathy towards the Russian state, and to what success? This course will seek to answer these questions through a survey of Russian Imperial history from its founding in Kievan Rus’ in the 10th century to the October Revolution of 1917.

Class Format: Each week, students will watch a pre-recorded asynchronous lecture that will provide context for the readings due that week. Students will be assigned to a small group of no more than 5 students which will "meet" with the instructor for a weekly, tutorial-style discussion on Zoom.

Requirements/Evaluation: class attendance and participation, two short papers (3-5 pages), ~80 pages of reading a week, one take-home midterm exam essay and one take-home final exam essay

Prerequisites: none, open to all students

Enrollment Limit: 15

Enrollment Preferences: History majors.

HIST 242  (F) Latin America From Conquest to Independence

This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groupings to huge imperial polities-, before 1492, to the invasion of Europeans from that date forward, we will take up the question of the Iberian "conquest," looking at the often violent encounters that made up that event and analyzing its success, limits, and results. We will then study the imposition of Iberian rule from the point of view of would-be colonizers and the peoples they treated as objects of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural,
political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in--and perhaps consisted of--the most normal elements of daily life in northern Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the semester.

Class Format: discussion

HIST 248 (S) The Caribbean: From Slavery to Independence

Cross-listings: HIST 248  AFR 248

Secondary Cross-listing

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley 'Revolt' in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communsim, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

Requirements/Evaluation: class participation, a mid-term and final paper, and a 10-12 page research paper

Prerequisites: none; open to all

HIST 253 (S) Modern U.S. History

This course surveys themes and issues that inform the historical landscape of the United States after the Civil War and Reconstruction, from the late 1800s to the present. With special attention to freedom and fragmentation, the course examines the dilemmas inherent to American democracy, including: westward expansion and Indian affairs; immigration and nationalism; progressivism and domestic policy; the expanding role of the United States in the world; race, gender, and rights; and the shifting terrains of liberalism and conservatism. The course also tunes into the connections
between current affairs and the American past. Course materials include a range of primary sources (letters, political speeches, autobiography, film, oral histories, fiction, and photography) and historical interpretations.

**Requirements/Evaluation:** a combination of quizzes, short papers, and a final exam or final paper

**HIST 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)**

**Cross-listings:** HIST 254  AMST 254  LEAD 254

**Primary Cross-listing**

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

**Class Format:** Remote class. Class will blend short pre-recorded lectures with weekly Zoom discussion sections/seminar format, plus time for virtual one-on-one conversations with the instructor.

**Requirements/Evaluation:** active participation in class discussion, several short essays based on readings and discussion topics, (virtual) museum/archives exercise, final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History or American Studies majors, followed by first- and second-year students

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

---

**HIST 255  (S)  From Sand Creek to Standing Rock: Recent Native American Histories  (DPE)**

This course surveys Native American/Indigenous histories from the era of the U.S. Civil War to the present as well as future. Beginning with the
violences experienced by Native communities at Sand Creek in 1864, it traces how diverse Native nations navigated the tumultuous times that followed, up to the recent actions at Standing Rock and Mauna Kea in the 21st century. Topics include Indigenous perspectives on “modernities”; creation and contestation of reservation systems; connections with African-American families and communities; residential school experiences of Native youth and families; Indigenous visual and performative artistic traditions and transformations, both in North America and abroad; “urban Indians” and the relocation era; Red Power activism and Indigenous internationalism; treaty rights, American Indian Law, and federal recognition debates; environmental interventions and food sovereignty movements; and critiques of settler colonialism. The course stresses the resilience of sovereign Indigenous nations into the present, and introduces students to a wide range of methodological approaches from Native American and Indigenous Studies and history. It blends big-picture vantages on these topics with microhistorical accounts of particular individuals, communities, and events, and offers a continental view of historical changes coupled with attention to the specific area of the Native Northeast in which Williams College is situated.

Class Format: Remote course. Class will meet synchronously on Zoom once per week for group conversation, with additional time devoted to Glow discussion posts and other activities. Students are encouraged to virtually meet with the instructor one-on-one to work on writing and projects.

Requirements/Evaluation: class discussion, reading responses, short analytic essays, archival/object analysis, final essay

Prerequisites: Hist/AmSt 254: Native American Histories to 1865 is good preparation for this course, but is not required.

Enrollment Limit: 15

Enrollment Preferences: History and American Studies majors; then first- and second-year students from any major

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on Native American/Indigenous experiences in North American and transnationally, and offers immersion in critical perspectives on settler colonialism and U.S. law and practice, and well as introduction to methodologies in Native American and Indigenous Studies.

HIST 256 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AFR 257 AMST 256 HIST 256

Secondary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: The class focuses on struggles for rights, recognition, and redistribution of resources of people of color,
women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. We discuss how movements borrow and adapt tactics, slogans, and ideas of justice from other movements.

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora HIST Group F Electives - U.S. + Canada

HIST 257 (F) Religion and American Politics
Cross-listings: REL 217 HIST 257
Secondary Cross-listing

In this course, students will explore the history of religion and American politics, from the colonial era to the present. In the process, they will tackle such questions as: Were Anglo-American colonies 'cities on a hill' or bastions of intolerance? Was the First Amendment designed to protect the state from religion, or religion from the state? Has American religion primarily served to justify the status quo or inspire revolutionary change? How have religious ethics shaped responses to racial, gender, and class inequality? How has religious conflict impacted civic unity and political polarization? What role should religion play in American political life? The course will cover such topics as: Anglo-colonial treatment of heretics and blasphemers; the meaning of the First Amendment; religious conflict over slavery; state regulation of sexuality and polygamy; state treatment of religious minorities; the Scopes Trial and scientific modernity; Christian responses to industrial capitalism; theologies of civil disobedience and nonviolence; and 20th-century religious battles over school prayer, civil rights, the military draft, abortion, and democracy itself.

Requirements/Evaluation: Class participation; five informal response papers (350-450 words); two unit papers (4-6 pages); final paper (8-10 pages).
Prerequisites: None; open to all students.
Enrollment Limit: 20
Enrollment Preferences: Religion and History majors, in order of descending seniority.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option

HIST 258 (S) The Petroleum Age: A Global History

We live in a world transformed by petroleum. All around us today--in global carbon emissions, transportation, the clothes we wear, everyday objects we touch, microplastics in our water--oil is there, even if we can't always see it. At the same time, the industry fuels massive flows of global capital, and provokes critical political shifts, conflicts, and resistance movements around the world. How did oil's ubiquity happen in just over 150 years? This course will chart a global, modern history by keeping this energy source always in our sight, paying particular attention to its role in the political economy, its ecological impacts, the cultural changes it has set in motion, and its place in people's material lives. Throughout the semester, we will also foreground some of the foundational skills needed to create an historical account, which will culminate in students' completing a 5-minute video or podcast on a relevant topic of their choice.

Class Format: While this class will include brief lectures, it will largely revolve around discussion. Students do not need any experience in making videos or podcasts to enroll in the class.

Requirements/Evaluation: participation; two short graded essays (3-5 pages); two short ungraded essays (2-3 pages); short research assignments (1 page each, ungraded); final video or podcast project (graded); 24-hour take-home exam.
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: sophomores and first-years
Expected Class Size: 20

**HIST 260 (S) U.S. History Since the 1940s**

This course surveys the history of the United States since the 1940s. It will acquaint students with the key developments that defined the postwar order, focusing especially on the history of inequality, politics and public policy, social movements, and intellectual life. As students make their way through the course, they will learn to think historically in the broadest sense—situating texts within their social context, engaging with diverse and unfamiliar perspectives, and gaining an appreciation for the complexity of human experience. In the process, students will tackle historical questions with contemporary relevance. What forces have made American society more or less equal, and how should equality be measured in the first place? How have race, class, and gender affected opportunities and outcomes for different Americans over time? To what extent have everyday people shaped the broader history of American capitalism, democracy, and social thought? To what extent have these broader developments shaped the lives of everyday people? Are we now living in an age of fracture or an age of liberation? The course will cover such topics as Cold War culture; the mass consumer economy; racial inequality, both Southern and Northern; the changing role of women at home and in the workplace; the global dimensions of the 1960s; the origins of the New Right; and the roots of modern polarization in conflicts over such issues as—busing, abortion, and privatization.

**Requirements/Evaluation:** attendance and participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (10 pages max)

**Prerequisites:** none, open to all students

**Enrollment Limit:** 40

**Enrollment Preferences:** History majors or students with a demonstrated interest in U.S. History

**HIST 261 (F)(S) America and the Cold War**

**Cross-listings:** HIST 261 PSCI 262 LEAD 262

**Secondary Cross-listing**

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** one medium length paper, an in-class midterm and final exam, and a series of short assignments

**HIST 263 (F) The United States and the World, 1898 to the Present**

**Cross-listings:** LEAD 261 HIST 263

**Primary Cross-listing**

This survey course examines the United States and the World since 1898. Students will be introduced to key diplomatic developments since the Spanish-American War, when the country began its ascendancy to hegemonic power from which it is now in retreat. American power reached its apex during the Cold War, but that conflict and its offshoots like the Vietnam War brought about crises over national identity and values that remain unresolved. Readings and discussions will focus on issues of ideology, empire and neo-imperialism, domestic politics and foreign policy, and the relationship between culture and foreign relations.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, pop quizzes, short papers, a midterm exam, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first- and second-year students, then History majors
HIST 264  (S)  Environmental History
Cross-listings:  ENVI 229  HIST 264

Secondary Cross-listing
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips
Requirements/Evaluation: several short essays; final research project
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging into the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 265 (D2) ENVI 246 (D2) AMST 245 (D2)

Difference, Power, and Equity Notes: This course considers the production and consumption of food as a locus of power over the last 300 years, and contextualizes current movements for food justice and sovereignty in light of those histories. Students will have opportunities to reflect on questions of power, privilege, and racism in contemporary food movements. Our final unit focuses on challenges to critical food studies from fat liberation and body positivity

HIST 266  (F)  The Roaring Twenties and the Rough Thirties

Cross-listings: AMST 267  HIST 266

Primary Cross-listing

This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America’s evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.

Class Format: This course will be taught remotely and will feature both asynchronous and synchronous instruction. Virtual course meetings will revolve around synchronous discussion and remote learners will be expected to attend class regularly and participate actively in each session held via Zoom (or a similar platform).

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: HIST and AMST majors as well as students with demonstrated interest in the material

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 270  (F)  Sport and the Global Color Line  (DPE)

Cross-listings: HIST 270  LEAD 270  AFR 270

Primary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed
within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas—like movie theaters, railroads, schools, and other public sites—shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

**Class Format:** Lecture and discussion.

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home midterm essay examinations (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

**Prerequisites:** None.

**Enrollment Limit:** 40

**Enrollment Preferences:** Open to all students with completion of course admission survey if overenrolled.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 270 (D2) LEAD 270 (D2) AFR 270 (D2)

**Difference, Power, and Equity Notes:** This course will prompt students to evaluate the commercialization and commodification, perceptions and portrayals of minority athletes in popular media forms. Students will trace the emerging ideas, shifts, and trends in the depiction of race and in the process of racialization.

---

**HIST 273 (F) Going Nuclear: American Culture in the Atomic Age**

**Cross-listings:** SOC 224  HIST 273

**Secondary Cross-listing**

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, and the destructive effects of the bomb's initial use in Hiroshima and Nagasaki and ongoing testing in the Marshall Islands. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

**Requirements/Evaluation:** a midterm, a final exam, and a 10- to 12-page research paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to sociology and history majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 274  (F)  Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings:  AMST 234  ENVI 247  AFR 234  HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation:  The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

Prerequisites:  None

Enrollment Limit:  10

Enrollment Preferences:  If the course is overenrolled, preference will be given to Africana studies concentrators.

HIST 275  (S)  Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings:  AFR 235  AMST 235  GBST 235  HIST 275  ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of the "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to
participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). HIST 280  (S)  Emancipation to BlackLivesMatter

Cross-listings: AFR 280  HIST 280  LEAD 280

Primary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none

HIST 281  (S)  African American History, 1619-1865

Cross-listings: AFR 246  HIST 281
This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery—and the development of racial classifications—that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Requirements/Evaluation: class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first- and second-year students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)
