AFRICANA STUDIES (Div II)
Chair: Associate Professor Neil Roberts

- Lynnée D Bonner, Sterling Brown ’22 Visiting Professor of Africana Studies
- Rashida K. Braggs, Associate Professor of Africana Studies and Faculty Affiliate in Comparative Literature, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion
- VaNatta S. Ford, Assistant Professor of Africana Studies
- Allison M Guess, Mellon Postdoctoral Fellow in Africana Studies
- Kelsey Jones, Distinguished Visiting Professor of Education
- James A. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion
- Rhon S. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Religion
- Keston K. Perry, Assistant Professor of Africana Studies
- Neil Roberts, Chair and Professor of Africana Studies and Faculty Affiliate in Political Science and Religion

GENERAL PROGRAM DESCRIPTION
The Africana Studies Program is an interdisciplinary concentration offering students an in-depth understanding of the history, politics, religion, and culture of peoples of African descent, especially in the Americas. We use music, dance, literature, the arts, and scholarly works to explore the origins of this field of study in the fulcrum of African American and Caribbean movements of resistance. A trans-national program, intellectually influenced by scholars from W. E. B. Du Bois to the present, Africana Studies encourages students to study abroad, and offers travel Winter Study courses designed to expose students to experiential learning settings outside of the classroom.

CONCENTRATION IN AFRICANA STUDIES
Candidates for a concentration in Africana Studies must complete at least five courses listed as Africana courses [note: many Africana courses are cross-listed with departmental offerings; all these are considered Africana Studies courses and can be used to count both for the concentration and for the departmental major of which they are a part]. Two of these five courses are required courses that every concentrator takes. They are the introductory course, AFR 200, normally taken in the sophomore and junior years, but open to all students; and an Africana capstone Senior seminar, normally taken in the senior year, but also open to others at the Professor's discretion. Additional courses may be taken either with our core Africana faculty or with faculty and visiting professors affiliated with the program. However, at least one of these three additional courses must be listed as "Core Electives" which are each designated in the descriptions below as a “Primary Crosslisting.” We also encourage students to take at least one course in a program/department other than Africana Studies and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana core faculty member to plan their concentration.

AFRICANA STUDIES AND OTHER PROGRAMS
Students concentrating in Africana Studies are encouraged to pursue concentrations in American Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women’s, Gender and Sexuality Studies. Many of the courses counted for these concentrations may also earn credit toward the Africana Studies concentration.

REQUIREMENTS
Africana Studies courses required for the concentration:
AFR 200 Introduction to Africana Studies

and one of the following two AFR 400-level Senior Seminar capstone courses (not all 400-level courses meet the requirement for the concentration):
AFR 405(S) CAPSTONE: Africana Studies and the Disciplines
AFR 440 CAPSTONE: Performing Blackness

One core elective:
AFR 128 T / COMP 129 / MUS 179(F) James Baldwin's Song
Taught by: Rashida Braggs
Catalog details
AFR 132 / AMST 132 / PSCI 132 Contemporary Africana Social and Political Philosophy
Two additional electives (a total of three required for the concentration):

Most electives are included below. However, students should check with the program chair to see if other courses not listed here might count as electives toward the concentration.

HONORS PROGRAM IN AFRICANA STUDIES

A student wishing to earn honors must complete an “Honors Dossier” during the Winter Study term and Spring semester of their Senior Year. This Dossier is comprised of three linked essays. Students may begin the project with two essays written for Africana Studies courses and, under their advisor’s guidance complete additional research, incorporate instructor feedback, and substantially re-write and expand these two papers. The third essay must be a new work, written specifically for the Honors project. Students must also write a substantive introduction that explains the theme (theoretical, geographic, chronological etc.) that connects the three essays. The introduction should address the significance of the theme to the interdisciplinary study of the peoples and cultures of the African diaspora. It should also explain the logic of the three papers and how they work together. Dossiers will be due in mid-April (after Spring Break). Under some circumstances, a student may want to include a record of a performance or piece of visual art in the Dossier. In this case, a written analysis and explanation should accompany that piece. The total Honors Dossier should consist of no less than 45 pages of written work.

Students should submit a proposal for an Honors Dossier in the fall semester of their Senior year, no later than mid-October. They may draw on papers written in Africana courses during any semester including the fall semester of their Senior Year. Students may petition to include a paper written for a course outside of the Africana curriculum. Africana faculty will meet late in the fall semester to approve or decline Honors Dossier.
proposals. Students whose proposals are approved will be assigned an advisor and should register for W31-AFR 494 in the winter study/spring of the Senior Year.

At the Honors presentation night in the spring, each Honors student will prepare and give an oral defense of their dossier. During the defense, students will present the key points their overarching project and field questions from select faculty and student critics, all of whom will have read the dossier.

AFR 104  (S)  Race and a Global War: Africa during World War II  (DPE) (WS)

Cross-listings: AFR 104  HIST 104

Secondary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation:  active participation in discussion, map quiz, 2 short papers (3-5 pages), presentation, and one research paper (8-12 pages)

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit:  15

Expected Class Size:  15

Grading:  no pass/fail option,  no fifth course option

Distributions: (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 104 (D2) HIST 104 (D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

SEM Section: 01    TR 9:55 am - 11:10 am    Benjamin Twagira

AFR 105  (F)  Materials, Meanings, and Messages in the Arts of Africa  (DPE)

Cross-listings: ARTH 104  AFR 105

Secondary Cross-listing
This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions.

Requirements/Evaluation:  
weekly WCMA object lab reports, weekly reading discussion GLOW posts, bi-monthly quizzes (7 total), two reading response papers (3 pages each)

Prerequisites:  none

Enrollment Limit: 40

Enrollment Preferences:  Art History and African Studies majors

Expected Class Size: 40

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 104 (D1) AFR 105 (D2)

Difference, Power, and Equity Notes:  This course fulfills DPE requirements through its exploration of the differences between concepts of art in African and Western traditions, and how this difference has formed the foundation for hierarchies of power within the art world that have long disenfranchised and disempowered artists from the continent. This course highlights this historical platform in order to renovate established biases and assumptions about these objects that position them as 'primitive' or 'exotic' constructs.

Attributes:  GBST African Studies Electives

Not offered current academic year

AFR 113 (S) Musics of Africa

Cross-listings:  AFR 113 MUS 120

Secondary Cross-listing

This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chants, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: discussion

Requirements/Evaluation:  grade based on a listening journal, bi-weekly short assignments, a final paper, and class participation

Prerequisites:  no prerequisites: prior musical background is not essential for this class

Enrollment Limit: 20

Enrollment Preferences:  current or prospective Music majors and Africana Studies concentrators

Expected Class Size: 12

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year
AFR 115 (F) The Literature of Sports (DPE) (WS)

Cross-listings: AFR 115 ENGL 115

Secondary Cross-listing

The ubiquity of the sporting event, the athlete as hero, the athlete as failure, the crowd, the fan, the stadium, and all of the complex conflicts therein have long been the subjects of some of the finest writing in America and throughout the world. Writers have used sport as a context through which to explore and examine ideas such as beauty, the sublime, tragedy, politics, race, class, sexuality, and gender. This course will focus on poetry, fiction, and non-fiction invested in the public spectacles and private revelations of sport ranging from the poetics of praise to issues of urbanism, colonialism, globalization with readings by Pindar, Rankine, CLR James, Baldwin, Hemingway, Oates, DeLillo, and many others. This course will be taught online in a synchronous format.

Requirements/Evaluation: Students will be expected to complete a number of short (5 pages or less) papers during the semester and one longer paper (8-10 pages) at the end of the semester.

Prerequisites: None.

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 115 (D2) ENGL 115 (D1)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will focus on literature about sports that addresses, among other topics, civil rights activism, gentrification, race dynamics and race relations both inside and outside of the USA, American exceptionalism, sociocultural construction of emotional displays, mental health, religious conflict, and anti-blackness.

Not offered current academic year

AFR 128 (F) James Baldwin's Song

Cross-listings: AFR 128 COMP 129 MUS 179

Primary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in A Lover's Question set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

Requirements/Evaluation: Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.

Expected Class Size: 10
AFR 129 (F) Twentieth-Century Black Poets
Cross-listings: AFR 129 ENGL 129

Secondary Cross-listing
From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Requirements/Evaluation: several short papers, a 15-page final paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 14
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AMST Arts in Context Electives

AFR 132 (F) Contemporary Africana Social and Political Philosophy
Cross-listings: AMST 132 AFR 132 PSCI 132

Primary Cross-listing
This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzegwu, Lucius Outlaw, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: first- and second-year students
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
AFR 133 (S)Plantation Economy and the Poetics of Caribbean Economic Thought  
Cross-listings: ECON 133 GBST 133 AFR 133  
Primary Cross-listing  
This introductory course to Caribbean Economic Thought contextualizes the poetics of economic ideas and knowledge alongside literary works connected to Caribbean Economic Development. Using Plantation Economy Tradition as a starting point and an important contribution to postcolonial development thinking, we will explore the interdisciplinary basis of this tradition rooted in the Caribbean cultural and historical experience. By examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy and society is framed, conceptualized and traversed as transplanted spaces, agrarian-resort-offshore spaces integral to merchant and industrial capitalism, exploitation and extraction and New World social formations. We will examine texts of contributors to the New World Group from the 1960s, 70s, and contemporary works that centers the Caribbean within global economic transformations. In this way, we explore historical and contemporary events ranging from indigenous genocide, commercial slave trading and indenture, structural adjustment and postcolonial debt, technology to the current fragmenting of global neoliberalism. This course explores themes like colonialism, dependent underdevelopment, home/away, migration, developmentalism, epistemic sovereignty, economic transformation, land ownership, freedom, 'creoleness'/créolité, negritude and regional integration. This exploration will help students broaden their understanding of conventional perspectives of the economy to analyze how the material understandings of economic phenomena framed in the plantation economy affect and engage with cultural and literary works in pluralistic, productive, and powerful ways.  
Requirements/Evaluation: Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/multi-page poster); critical analysis of a Caribbean economic sector or major regional report--choice made after discussion with instructor (10 pages); final project: historical review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultures that must raise questions for class discussion)  
Prerequisites: None  
Enrollment Limit: 10  
Enrollment Preferences: Preference also for 1st and 2nd year students. If over-enrolled preference to AFR and Political Economy students.  
Expected Class Size: 10  
Grading: no pass/fail option, no fifth course option  
Distributions: (D2)  
This course is cross-listed and the prefixes carry the following divisional credit:  
ECON 133 (D2) GBST 133 (D2) AFR 133 (D2)  
Attributes: AFR Core Electives  

AFR 136 (S) Slavery and the Making of a Literary Tradition  
Cross-listings: AFR 136 ENGL 136  
Secondary Cross-listing  
How has the subject and iconography of slavery continued to preoccupy the American literary and cultural imagination? In this course, we will examine the transatlantic circulation of ideas regarding race, nation, citizenship, self-mastery, agency, and freedom in colonial and antebellum America and consider how these debates have continued to the present. We will read such authors as Phyllis Wheatley, Harriet Jacobs, Harriet Wilson, William Faulkner, Mark Twain, and Toni Morrison. Forms will include poetry, slave narratives, novels, advertisements, broadsides, pamphlets, and other ephemera. We will also view cinematic representations of slavery, such as WGN's Underground, the adaptation of Solomon Northrop's 12 Years a Slave, and Issa Rae's parody "Due North" in Insecure.
AFR 140 (S) Black Autobiography

Cross-listings: AFR 140 COMP 141

Primary Cross-listing

Autobiography—whether slave narrative, memoir, or semi-fictional life account—has served as a primary form of writing for people of African descent. Although primarily understood as a textual means for articulating selfhood, Black autobiographies also ask other questions like: How do Black reflections on the self necessitate critiques of society and culture? How have Black autobiographies been utilized for political mobilization? And, what might a collective analysis of Black autobiographies reveal about changes in conceptions of Black selfhood over time? We will explore these concerns by reading autobiographies across time and space by authors like Ottobah Cugoano, W. E. B. Du Bois, and Alice Walker.

Requirements/Evaluation: class participation, two to three short papers (5- to 7-pages), and a 15- to 20-page paper or multimedia final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 140 (D2) COMP 141 (D1)

Attributes: AFR Core Electives

Not offered current academic year

AFR 158 (S) North of Jim Crow, South of Freedom (DPE) (WS)

Cross-listings: HIST 158 AFR 158

Secondary Cross-listing

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs— all with an eye toward scrutinizing the freedom struggle in its northern variety.

Requirements/Evaluation: Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar
Expected Class Size: 19
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 158 (D2) AFR 158 (D2)

Writing Skills Notes: Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

Spring 2022
SEM Section: 01 MW 11:00 am - 12:15 pm Tyran K. Steward

AFR 159 (F) Crossing the Color Line: A History of Passing (DPE) (WS)

Cross-listings: AFR 159 HIST 159

Secondary Cross-listing
In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.
Prerequisites: None.
Enrollment Limit: 10

Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 159 (D2) HIST 159 (D2)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.
AFR 167  (S)  Let Freedom Ring? African Americans and Emancipation  (WS)

Cross-listings: AFR 167  HIST 167  AMST 167

Secondary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 167 (D2) HIST 167 (D2) AMST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement."

AFR 200  (F)(S)  Introduction to Africana Studies

This course introduces students to the content and contours of Africana Studies as a vibrant field of knowledge. Through exploration of the genealogy, disciplinary diversity, and evolution of the field, we will examine the depth and range of experiences of African-descended peoples throughout the Americas, the Caribbean, Europe, and Africa. We will also give some attention to how members of the Diaspora remember and encounter Africa, as well as their diverse responses to the history of enslavement, colonialism, apartheid, racism, and globalization. Through materials that embrace both historical and contemporary perspectives, we seek to help students develop critical frameworks for understanding African diasporic experience while simultaneously illuminating disjunctures and challenges for the field. This course features two pedagogical strategies: 1) a rotational, interdisciplinary approach that includes the expertise, methods, and specializations of Africana faculty; and 2) the incorporation of aesthetic materials--film, photography, music, dance, performance, and artwork--to enhance student ability to draw ongoing connections between visual and textual sources covered in the course. Close textual analysis, vibrant debate, and engaging discourse are expected.

Class Format: Remote format; This class will be taught synchronously primarily.

Requirements/Evaluation: This class will be taught synchronously primarily.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Africana Studies concentrators
AFR 201  (F)  African Dance and Percussion

Cross-listings: AFR 201  DANC 201  MUS 220

Secondary Cross-listing
We will examine two forms that embody continuity of tradition or the impact of societal, political or economic change. Lamban was created by the Djeli, popularly called Griots served many roles in the kingdoms of Ghana and Old Mali from the 12th century to current times. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it is practiced by the Mandinka people. Bira is an ancient and contemporary spiritual practice of Zimbabwe's Shona people. While these forms are enduring cultural practices, Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth and their aspirations for independence at the end of the 1950s. We will also consider the introduction of these forms outside of their origin. This course can be taken for academic and/or PE credit

Class Format: class hours will be used to learn and use the dance and music of at least two forms including historical context, a group and individual research project or paper. When possible, our process will include guest artists and field trips to see live performance as well as use of the archives at Jacob's Pillow Dance Festival.

Requirements/Evaluation: discussion of assignments, group response performances, and short research paper. Students enrolled for PE credit are responsible only for the performance-based projects

Prerequisites: none

Enrollment Limit: 12

Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has
faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn't protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, *The Origins of Others* (2017), Brit Bennett's, *The Vanishing Half* (2020), Tressie McMillian Cottom's, *Thick* (2019), Marita Golden's, *Don't Play in the Sun* (2004), Yaba Blay's, *One Drop: Shifting the Lens on Race* (2021), Nina Simone's, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

**Requirements/Evaluation:** Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

**Prerequisites:** N/A

**Enrollment Limit:** 10

**Enrollment Preferences:** This class is specifically designed for first year students. Sophomores can register only with advanced permission.

**Expected Class Size:** 8-10

**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** AFR 203  HIST 205

**Secondary Cross-listing**

This course traces the incorporation of Africa into an expanding global world from the middle of the 19th century to the present and examines the impact of this integration on the history of African cultures and modern nation states. It is designed to provide you with an introductory understanding of the economic, social, and political forces that have shaped Africa in recent times and continue to affect the lives of individual people across the continent. Over the course of the semester you will be introduced to major historical themes in African History from the past 150 years, including the abolition of the slave trade and its effects, African states in the 19th century, the growing integration of different regions into shifting global and economic systems, European colonization, and African resistance to imperial conquest. We will also explore the emergence of the nationalist and anti-colonial movements, and Africa’s post-colonial experiences of self-governance. Within these broad historical processes, the class will cover additional key themes such as religious change and the role of Western missionaries; changing gender roles; environmental exploitation and change; the emergence of the developmental state; urbanization; military dictatorships, and war and violence in the late 20th century. We will also cover some of the issues surrounding the study of African History as a discipline. This is a challenging task as no single course can cover more than a silver of the complexity and variety of the continent. This is why we approach the study of Modern African History through a comparative prism.

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, midterm and final exams, and a case study paper (7-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 30
Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

AFR 205 (F) She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings

Cross-listings: AFR 205 WGSS 207

Primary Cross-listing

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), Sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015), and some of her non-fiction writings. In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated new physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

Class Format: class hours will be divided among discussion of media and readings; rehearsal of dance and music techniques; field trips to view performances; research at the Jacob Pillow's archives; and interaction with visiting artists

Requirements/Evaluation: a series of discussion, research, and individual and group projects; all of which will inform collaboration on mid-term and final projects

AFR 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: ARTH 207 AFR 207

Secondary Cross-listing

This tutorial provides a focused study of the politics/poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film/cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Class Format: This tutorial will be predominantly remote, with student pairs meeting with the instructor on a weekly basis via google hangouts. There may be options for in-person events as the semester progresses, but this is to be determined.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none
Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 207 (D1) AFR 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 208 (F) Time and Blackness

Cross-listings: AFR 208 AMST 208 REL 262

Primary Cross-listing

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

AFR 209 (F)(S) Introduction to Racial Capitalism (DPE) (WS)

Cross-listings: AMST 202 AFR 209
The historical relationship between race and capitalism is one of the most enduring debates in U.S. historiography, shaping modes of inquiry and analysis across history, law, economics, sociology, anthropology, and other fields. This course seeks to introduce students to the concept of "racial capitalism"—which rejects treatments of race (and racism) as external to the so-called real workings of capitalism—as a way to understand this relationship and as an activist hermeneutic through which to identify and respond to the conditions that American Studies must reckon with. Students will gain familiarity with the global history of racial capitalism and the power of the concept itself through secondary sources and a wide range of primary sources, and through engaged discussion and short essays. Throughout the course, we will pay special attention to the cultural politics, political geographies, and historical development of racial capitalism, thus attending to how the social relations of racial capitalism have been known, lived, and resisted across time and space. The course is organized around three key themes: the land question; race, capitalism, and nation; and the banalities of racial capitalism. Across these themes, the course will address such issues and topics as North American settler colonialism, circum-Caribbean plantation slave and “Coolie” labor, mass incarceration, the subprime mortgage crisis, and the War on Terror. The course will do so through and against a history of racial capitalism that privileges the U.S. nation-state in particular. By the end of this course, students should be able to: detail and analyze the historical development of and resistance to racial capitalism, doing so in relation to the global itineraries of racial slavery, settler colonialism, imperialism, and white supremacy; trace the history of the concept of racial capitalism itself; and identify how the concept continues to shape the field of American Studies.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

AFR 211 (S) Race, Environment, and the Body

Cross-listings: AMST 211  ENVI 211  AFR 211  SOC 211

Primary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crisis lend to
imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

AFR 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction

Cross-listings: STS 213  WGSS 213  AFR 213

Primary Cross-listing

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on--and often disrupt--modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

AFR 216  (S)  Moving While Black

Cross-listings: COMP 212  AMST 212  AFR 216  DANC 217

Primary Cross-listing
Opening your apartment door, driving down the highway, taking a knee, raising a fist, sitting at the lunch counter then or sitting in a café now, these movements have historically and presently prompted fear at a minimum and in the most grave cases death for black people. Whether in the U.S. or globally, moving in the world as a black person often means being perceived as different, foreign and threatening. Crawling, dancing, running and boxing, these movements have countered fear and articulated the beauty, pride, creativity and political resistance of black people. In both cases, black movement matters and means much. While many consider movement to be just organized dance moves, this course expands students' definitions of black movement and teaches them to analyze multiple perceptions, uses, and reactions to it. "Moving while Black" offers examples of physical movement in improvised and practiced performance, quotidian movement, geographical movement across national borders and symbolic, politicized gestures. Students will investigate black movement via interdisciplinary sources that reflect various time periods and locations. Students may analyze such texts as Jacob Lawrence's visual art in *The Migration Series*, the movement of the rumba dance form between Cuba and the Democratic Republic of Congo, the Alvin Ailey American Dance Theater's "Revelations," William Pope.L's choreographed crawls, the 1995 World Rugby Cup in South Africa, and the 2018 case of a Kansas resident arrested while moving into his own home. Additionally, this course features an important practice element, in which students experiment with in-class movement exercises and workshops, engage with dance archives at Jacob's Pillow, interview participants of Kusika, and create and perform their own choreographies. While no previous experience in performance is required, curiosity and openness to learning through one's own body movement is expected.

Class Format: classes will rotate throughout the semester between seminar discussions in the classroom and performance exercises in the studio

Requirements/Evaluation: multiple reading/viewing responses in a movement journal, an essay closely analyzing movement; a presentation, and multiple movement-based performances including a final project with outside research and a proposal

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Africana Studies concentrators

AFR 221 (S) Giving God a Backbeat: Rap Music, Religion & Spirituality

Cross-listings: AFR 221 REL 263

Primary Cross-listing
On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Requirements/Evaluation: students will be evaluated on their class participation, Twitter threads, response papers, quizzes, and a final class group project

Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: First year, sophomore, and juniors
Expected Class Size: 15

Cross-listings: MUS 222 AFR 223

Secondary Cross-listing
Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQIA community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres-among them Afrobeat, kwaito, soukous, rāi, mbalax, Chimurenga music, and a variety of rap and hip-hop styles-are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: this class places a strong emphasis on discussion
Requirements/Evaluation: in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project
Prerequisites: some familiarity with music terminology encouraged
Enrollment Limit: 15
Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Students receive regular feedback on multiple short assignments throughout the semester. Particular focus is dedicated to crafting and substantiating written arguments.

Difference, Power, and Equity Notes: Throughout the course, students engage with case studies concerning specific socio-political contexts within Africa, with an emphasis placed on music's role as a social agent. Topics include representational politics, music as a tool for the powerful as well as the politically disempowered, and music's role in conflict resolution.

AFR 224 (S) Cold War Intellectuals: Civil Rights, Writers and the CIA (DPE)

Cross-listings: AFR 224 PSCI 221 AMST 201 LEAD 220 INTR 220

Secondary Cross-listing
This tutorial focuses on US-based views of the Cold War. It examines how intelligence agencies and intellectuals, as well as government officials, viewed civil rights, human rights, and US hegemony. Readings include: Williams J. Maxwell (F. B. Eyes: How J. Edgar Hoover's Ghostreaders Framed
African American Literature; James Baldwin (The Fire Next Time); Ralph Ellison (The Collected Essays of Ralph Ellison); Report to the President by the Commission on CIA Activities Within the United States (1975, VP Nelson Rockefeller, chair); Hugh Wilford (The Mighty Wurlitzer: How the CIA Played America); Hannah Arendt (The Origins of Totalitarianism; On Violence; "Reflections on Little Rock"); Frances Stonor Saunders (Who Paid the Piper? The CIA and the Cultural Cold War). Students alternate weekly between 5-page primary and 2-page secondary papers on assigned readings.

Requirements/Evaluation: Attend all classes; submit completed papers 24 hours before seminar meets.
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 224 (D2) PSCI 221 (D2) AMST 201 (D2) LEAD 220 (D2) INTR 220 (D2)

Difference, Power, and Equity Notes: This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

AFR 226 (S) Black France/France Noire (DPE)

Cross-listings: AFR 226 RLFR 226

Secondary Cross-listing
On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembe, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French and Africana Studies concentrators
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 226 (D2) RLFR 226 (D1)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it focuses on "the shaping of social differences, dynamics of unequal power, and processes of change" through the lenses of historical colonial legacies, race, gender, citizenship among other questions.

AFR 228 (F) Revolt and Revelation in 20th-Century Americas

Cross-listings: AFR 228 AMST 228 REL 223 LATS 228
Secondary Cross-listing

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?" Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

AFR 229 Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

AFR 230 (F) Gender, Sexuality, and Global HIV/AIDS

Cross-listings: AFR 230 WGSS 230
Secondary Cross-listing

The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic’s social, economic and political causes, impact, and conundrums—the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa.

Requirements/Evaluation: two short papers and a research paper; class participation will form part of the grade

AFR 233 (F) Colonialism, Capitalism and Climate Crisis

Cross-listings: GBST 233 AFR 233 ENVI 204

Primary Cross-listing

Evolutions are part of human existence. Our collective understandings of the world, the economic realm and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy.

Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. By the end of the course, students will be able to describe various perspectives from structural economics and other traditions including dependency theory, uneven ecological exchange, ecowomanist and black ecological thought, and critical environmental justice to explain the social, ecological, historical and economic conjunctures underpinning climate crisis.

Arranged to develop more in-depth analytical, communication and writing skills, the course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis. Finally, we will considering demands for climate debt / reparations from social and environmental movements and decolonial perspectives that advance climate justice. Students will also be able evaluate the political economic responses to the climate crisis.

Requirements/Evaluation: Blog post entries; research report on an emerging green technology (10 pages); recorded video / interview of an environmental justice movement/activist in the global South; reflections paper (8 pages); community case study on an environmental project tracing its histories (7 pages); participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

Prerequisites: None

AFR 234 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Primary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance.

You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.
Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

Cross-listings: AFR 235  AMST 235  GBST 235  HIST 275  ENVI 253

Primary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)repossession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). Cross-listings:  REL 237  AFR 237  AMST 237

**Secondary Cross-listing**

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, comics, documentaries, films, historical primary-source documents, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

**Requirements/Evaluation:** regular reading responses, midterm essay, final exam/essay

AFR 239  (F)  Music Migration, Blues People, and Wayward Women: Case Studies in DJ Scholarship
Cross-listings:  AFR 239  MUS 215

**Primary Cross-listing**

Music Migration explores migration patterns vis-à-vis the movement of music, people, and ideas. Students will explore DJ culture as an interdisciplinary practice, both performative and subversive in its ability to shape and define social experiences. Students will employ creative research skills to examine the social context of DJ culture related to the music of the Black diaspora and its makers' interior lives and genius, enacting what the instructor calls "DJ Scholarship." The course will follow flows of music migrations between various regions within the United States. Instead of providing a linear history, this course connects and tunes into fundamental political-cultural movements and musical interventions across geographies. Specific attention will be paid to how sound travels within the context of the blues and what this tells us about the relationship between the sonic, race, gender, and sexuality. Using Black feminist thought as a guide to understand Blues, funk and soul women, we will draw from Saidiya Hartman's
conceptual framework “wayward women” to understand a working-class feminist practice. In turn, we will examine what kind of worlds are produced by sound cultures during significant political and social change.

Requirements/Evaluation: Class participation, ten 2 to 3-page responses to reading/film/music, Final project: presentation of a mock syllabus

Secondary Cross-listing

One durable legacy of white settler colonialism has been to its divide-and-conquer management of minority populations—an amazingly effective strategy still widely practiced in a variety of forms today. While Asian Americans have been deemed “model minorities” in contrast to “unmodel” minorities—namely, African Americans—and racial minorities have been pitted against one another in the oppression Olympics and on the issue of affirmative action, there has, in fact, been a long history of political, literary, and cultural thought that have joined blacks and Asian/Asian Americans, from W.E.B. Du Bois to current ideas about digital possibilities (and constraints). In this course we will examine the theory, political writings, art, music and literature that sprang from and attended the early Marxist-Communist fight for universal brotherhood; movements against colonialism, capitalism, and the Vietnam War; Yellow Power and Black Power; and topics such as black and Asian diasporas, Afro-futurism, multiculturalism,
"Afro-pessimism", racial melancholia, and digital futurities.

AFR 246  (S) African American History, 1619-1865

Cross-listings: AFR 246  HIST 281

Secondary Cross-listing

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and
discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

**Requirements/Evaluation:** class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first- and second-year students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

AFR 248 (S) The Caribbean: From Slavery to Independence

**Cross-listings:** HIST 248  AFR 248

**Primary Cross-listing**

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley `Revolt' in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

**Requirements/Evaluation:** class participation, a mid-term and final paper, and a 10-12 page research paper

**Prerequisites:** none; open to all

**Enrollment Limit:** 20

**Enrollment Preferences:** Africana Studies concentrators; History majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

AFR 250 (S) Translating Black Resistance: Historical and Contemporary Challenges

"My ebony skin...is my naked soul; my skin is language, and the reading is all yours." The lyrics' excerpt authored by Afro-Brazilian artists Matumbi and Portugal eloquently convey/denounce how Black skin and the Black body may function as a canvas upon which multiple meanings are imposed or assigned/prescribed: as embattled territories constantly subjected to multiple (mis)interpretations. Conversely, Black skin/bodies become sites of
resistance, expressing/becoming potent languages through which oppressive systems are challenged, and powerful anti-racist struggles/movements crafted/expressed or performed/reinvented. How have verbal and non-verbal communications functioned as core aspect of Afro-Diasporic confrontational praxis to intersecting racialized/gendered oppressions and annihilation? How may we challenge Eurocentric bodies of knowledge as a key component in political projects of Black erasures? The course will explore such issues by placing the politics of language, translation/interpretation, ideology, and identity at the center of historical and contemporary movements of resistance against deadly manifestations of anti-black racism and gendered/homophobic violence(s). We will engage with such collective Black resistance responses by analyzing music, film, poetry and other Black art forms in Latin America, and particularly Brazil, and we shall examine authors including Conceição Evaristo, Angela Y. Davis, Patricia Hill Collins, Joeltito Araújo, Paul Bandia, Brent Edwards, Lazzo Matumbi, and Randal Johnson.

Requirements/Evaluation: class participation; three two-page response papers; midterm exam; and a 10 to 12-page final paper.

Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

AFR 251 (S) Afro-Diasporic Crossroads: Translating and (Re)Imagining Black Experiences

AFR 253 (S) Black British Music and Visual Culture 1970s-1990s
Cross-listings: AFR 253 MUS 249

Primary Cross-listing

Taking the original 1988 Black Film, British Cinema conference as a starting point, this class will draw on independent film, music, and literature to ask more important questions about the Black British cultural landscape and media politics. We will specifically engage this conference to ask what 'Black Britishness' means in Britain as an imperial nation and to examine the aesthetics strategies used by Black filmmakers and cultural producers. In honing radical and Leftist filmmaking, Thatcherism (in conversation with Reaganomics), and the race riots in London, Birmingham, Leeds, and Liverpool throughout the 1980s, this course explores how Black audiovisual cultures disrupted the British landscape and affectively engaged the spectator by showing diasporic conditions. We will look at the impact of Reggae Sound Systems and the role of sound as a mode of knowledge production. By looking at collectives such as Black Audio Film Collective, Sankofa Film and Video Collective, and Ceddo Film and Video Workshop,
we delve into broader questions of identity formation, documentary realism, and the mixture of conventional and avant-garde styles in cinema and music. John Akomfrah, DJ Norman Jaye, Jazzy B, Isaac Julien, Joan Armatrading, Horace Ové, Martina Attille, and Ngozi Onwerah will be used to show how Black British cultural production makes a more considerable contribution to global perspectives on Black music, film, and cinema.

Requirements/Evaluation: Class participation, ten 2 to 3-page responses to reading/film/music. Final project: presentation of a mock syllabus.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is overenrolled, preference given to Africana studies concentrators.

AFR 254 (F) Bebop: The (R)evolution of Modern Jazz

Cross-listings: AFR 254 MUS 254

Secondary Cross-listing

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as “frozen faced introverts, dedicated to chaos.” This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study and guided listening assignments, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and it's evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Requirements/Evaluation: weekly reading, listening, short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Music majors, Jazz Ensemble members, Africana Studies concentrators

AFR 257 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AFR 257 AMST 256 HIST 256

Secondary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on
the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Secondary Cross-listing

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: students who have declared a major in Art History or Africana Studies

AFR 270  (F)  Sport and the Global Color Line  (DPE)

Cross-listings: HIST 270 LEAD 270 AFR 270
Secondary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas—like movie theaters, railroads, schools, and other public sites—shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercation that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format: Lecture and discussion.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites: None.

Enrollment Limit: 40

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 275 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: ENGL 275 AFR 275 AMST 276

Secondary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 276 (S) Black Europeans

Cross-listings: COMP 276  AFR 276  GERM 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none

AFR 280 (S) Emancipation to BlackLivesMatter

Cross-listings: AFR 280  HIST 280  LEAD 280

Secondary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass
incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: students with demonstrated interest in material
Expected Class Size: 30

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing
In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AFR 299 (F) Rastafari: Dread, Politics, Agency

Cross-listings: REL 261 AFR 299 PSCI 233

Primary Cross-listing
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica,
AFR 301  Experimental African American Poetry

Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Requirements/Evaluation: two papers (6-8 pages and 8-10 pages), short response papers, oral presentation, and class participation

AFR 302  (S) Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life

Often viewed as the "dirty laundry" of the Black American past, colorism, or skin color bias, is a pervasive force within modern global society. Although it is not a new issue, its impact is far reaching and continues to have damaging effects on people of color-especially members within the African Diaspora. From skin bleaching creams like "Whitenicious" to rap music's fetishization of light-skinned women, colorism is a very real and present issue affecting Black life. From the literary works of Wallace Thurman and Toni Morrison, to the lyrics of blues crooner Big Bill Broonzy and rapper Lil Wayne, we will analyze the many ways that the politics of color influence standards of beauty and attractiveness, perceptions of behavior and criminality, and economic attainment and stability.

Class Format: Remote

AFR 304 (S) A History of Health and Healing in Africa (DPE)

Cross-listings: HIST 305 AFR 304 GBST 305

Secondary Cross-listing
This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

AFR 305  (S)  Race and the Zombie Apocalypse

Cross-listings: ENGL 308  AFR 305

Secondary Cross-listing

This course takes a critical approach to our contemporary understanding of the figure of the zombie and its inextricable link to discourses on race and blackness in the Americas. An introductory grounding in theories of social death allows an opportunity to explore the racial anxiety that gave birth to the genre and trace its development throughout the hemisphere. The course considers the novels, films, and critical texts that frame the genre in order to pose the following questions: What can the figure of the zombie teach us about our evolving relationship to race? What roles do gender and sexuality play in the construction of the genre? And, finally, how does the recent proliferation of zombie-related television shows, movies, books, and video games reflect our present-day concerns?

Class Format: remote

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

AFR 307  (F)  Contemporary Short Stories from North Africa

Cross-listings: AFR 307  RLFR 309

Secondary Cross-listing

Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. Conducted in French.

Class Format: discussion

Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper

Prerequisites: RLFR 201, 202 or 203 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and those with compelling justification for admission
AFR 308  Four Poets: Gwendolyn Brooks, Frank O'Hara, Sylvia Plath, and Amiri Baraka

The study of literature often relies on seemingly "objective" labels to sort and group writers. These four major American poets from the last century were often segregated into different categories: Gwendolyn Brooks (1917-2000) and Amiri Baraka (1934-2014) clumped together as black poets; Sylvia Plath (1932-1963) labelled a "Confessional Poet" and/or taught as a female poet but not a "white poet"; Frank O'Hara (1926-1966), designated a "New York School" poet but not a "white poet" or "male poet." In looking closely at the poetry of these four writers, whose work is usually not taught side by side, we will ask questions about the assumptions implicit in the concepts and categories of American (and English-language) poetics and how literary history usually gets written. For example, who is the presumed "universal" poetic speaker? Who is the assumed reader? Do our attitudes about raced and gendered bodies influence how we read raced and gendered poets? Is a queer poet read with the same particularity as a black poet?

Requirements/Evaluation: Two short papers (4-5 pp.) = 25%; One final paper (8-10 pp.) = 50%; Two short response papers = 15%; Participation = 10%

Prerequisites: None

Enrollment Limit: 15

AFR 309 (S) Scriptures and Race

Cross-listings: REL 309 AFR 309 LATS 309

Secondary Cross-listing

This course focuses on the relationships between constructions of race in the post-1492 American world and "Christian scriptures." The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage "scriptures"? In what ways have "scriptures" informed how people imagine themselves, their communities, and their relationship to religious and racial "others"? How did "scriptures" and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Requirements/Evaluation: participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay

Prerequisites: none

Enrollment Limit: 10
AFR 310  (F)  Womanist/Black Feminist Thought

Cross-listings:  WGSS 310  AFR 309 AMST 309 REL 310

Primary Cross-listing

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

Class Format:  discussion

Requirements/Evaluation:  class participation, three short response papers, and the completion of an original research paper or project

Prerequisites:  none

Enrollment Limit:  25

Enrollment Preferences:  Africana Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors

Expected Class Size:  20

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D2)

AFR 311  Women Warriors, Colonial Soldiers, and Slave Armies: Soldiering and Warfare in African History  (DPE)

Soldiering is one of the oldest professions in African history. Throughout the continent's long history, ordinary soldiers have risen to become kings, queens, presidents, and held other positions of significance. Soldiers in African history have hailed from diverse backgrounds, ranging from the enslaved to those from the nobility. Notable soldiers in African history have been both men and women. Certainly, in Africa as in other world regions there is a tendency to associate the military profession with men. Yet, there have been famous female military warriors in African history, some of the most famous ones being Queen Nzinga in the seventeenth century; the all-female military units in the kingdom of Dahomey, known for their rigor and being effective fighters; and, more recently, Alice Lakwena who commanded a rebellion that nearly brought down the Ugandan government in the late twentieth century. Some of the other themes which we will explore include how warfare was organized from the precolonial era to more recent times; the impact of changing technologies on warfare and the everyday life of armed soldiers; colonial conquest and the soldiers who fought for Europeans and those who resisted; recruitment criteria during the colonial period, and colonial military identities; service in the military as labor and rebellions and mutinies over pay and work conditions; the army and nationalism. Throughout the course we will challenge the enduring Western image and stereotype of Africa as a violent place by focusing on a) the changing conditions that have pushed individuals and communities to go to war, and b) by examining how Africans have initiated and resolved conflict. Students will analyze a variety of resources including soldiers' biographies, films, oral traditions, and archival sources that will help them to come up with their own arguments about the role of the soldiers and the military in Africa.

Requirements/Evaluation:  active participation in discussion, map quiz, response papers, a short analytic paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites:  none

Enrollment Limit:  25

Enrollment Preferences:  if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size:  20

Grading:
Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: This course examines the critical questions of how and why Africans have waged military campaigns, and how they have inspired others to join them. From the pre-colonial era to the present, all forms of military action in Africa were in many respects expressions of societal imbalances based on ethnicity, race, gender, generation, and class.

AFR 313  (S)  Tropical Ecologies: Francophone Caribbean Literature and the Environment  (DPE)

Cross-listings:  AFR 313  RLFR 313  ENVI 311

Secondary Cross-listing
The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau—the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical texts of Caribbean of literary and political movements such as *Indigenisme, Négritude*, and *Créolité*. Conducted in French.

Class Format: This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

Prerequisites: Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option,  no fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 313 (D1)  RLFR 313 (D1)  ENVI 311 (D1)

Difference, Power, and Equity Notes: As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

AFR 315  (S)  Blackness 2.0: Race, Film and New Technologies

Cross-listings:  AFR 315  STS 315  SCST 315  AMST 315

Primary Cross-listing
Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital
technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of ‘new’ technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the ‘real’ vs ‘virtual’ world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Requirements/Evaluation: participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

AFR 317  (F)  Black Migrations: African American Performance at Home and Abroad

Cross-listings: AFR 317  COMP 319  AMST 317  DANC 317  ENGL 317  THEA 317

Primary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Prerequisites: none; open to all

AFR 318  (F)  Defining and Disrupting the School-to-Prison Pipeline

Cross-listings: PSYC 334  AFR 318

Primary Cross-listing

The school-to-prison pipeline describes a system of processes that pushes children out of school into jails and prisons. This course will explore the
pipeline and the relationships between school, prison, and society. We will begin with the history and creation of the modern-day school-to-prison pipeline, focusing on the educational and public policies that encourage the criminalization of "others", with particular emphasis on folks of color and under-resourced communities. We will also look to firsthand accounts from those pushed into the pipeline to humanize the topic and engage in thoughtful and compassionate discussion. Together, we will define "school" and "prison", identifying how these definitions are aligned with the most current iteration of the pipeline, and how they can help us as we work to dismantle it.

Requirements/Evaluation: Assignments for the course include ongoing journal assignments, two 3-5 page papers, and a final project.

AFR 321 (F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently TikTok, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

Class Format: Remote

Requirements/Evaluation: class participation, response papers, and a final research project

AFR 322 (S) Race, Culture, Incarceration

Cross-listings: AMST 322 INTR 322 AFR 322 PSCI 313

Secondary Cross-listing

This course explores racially-fashioned policing and incarceration from the Reconstruction era convict prison lease system to contemporary mass incarceration and "stop and frisk" policies of urban areas in the United States. Also explored will be political imprisonment in the United States.

Requirements/Evaluation: brief analytical papers and group presentations.

Prerequisites: none
AFR 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322  ENGL 356  AFR 323  AMST 323  ARTH 223

Primary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis’ *March* and Ebony Flowers’ *Hot Comb*, this course illustrates and critiques multiple ways the graphic novel comingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one’s visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art’s Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. Although it is a remote course this year, this class may still feature Object Lab participation, film screenings, and collaborations with guest speakers.

Class Format: This is a remote class that will primarily feature synchronous sessions with some asynchronous sessions.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department’s introductory course.

AFR 324 (S) Critical Perspectives in Special Education

Cross-listings: AFR 324  PSYC 337

Primary Cross-listing

What makes special education "special"? This course will explore the role, purpose, and function of special education in the United States. Given special education’s assumption of dis/ability (Baglieri, 2012), we will also create collective and individual frameworks for discussing and deconstructing dis/ability. This course will examine history, policy, and pedagogy related to special education; we will also discuss how law and school practices have systemically and systematically excluded students of color from general education classrooms, leading to the overrepresentation of Black, Indigenous,
and Latinx children in special education. We will listen to narratives shared by people with dis/abilities and our educational histories to understand how personal connections to special education influence our current beliefs and future practice.

Requirements/Evaluation: Assignments for the course include ongoing journal assignments, two 3-5 page papers, and a final project.

Prerequisites: None

AFR 325  (F) Television, Social Media, and Black Women 'Unscripted'

Cross-listings: AFR 325  WGSS 325

Primary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

AFR 326  (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: WGSS 313  AFR 326  AMST 313  LATS 313

Secondary Cross-listing

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among
women of color? Is it feasible to assert that an easily identifiable "African American," "Latina/x," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

**Class Format:** This remotely taught, synchronous course follows a discussion format.

**Requirements/Evaluation:** participation, one student-led discussion period, two written essays of 5-7 pages, final oral exam.

**Prerequisites:** LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**AFR 327 (S) Sounds and Pressures: Music in the 1970s Caribbean**

**Cross-listings:** AFR 327 HIST 342 MUS 327

**Primary Cross-listing**

For the Caribbean the 1970s was a decade of cultural excitement and political tragedy. 1960s radical consciousness contributed to rapidly changing music styles that formed by the early seventies and blossomed on the world stage as the decade progressed. This was the period when Jamaican Reggae, Haitian Konpa, and Spanish Caribbean Salsa, asserted their presence in the mainstream. But the countries that birthed these popular music forms were locked in political crisis. In Jamaica, political violence escalated, Haiti faced a brutal dictatorship and Cuba was caught in the midst of Cold War strain. A common response to these challenges was massive emigration from the Caribbean to the United States. This course will examine the music produced in the 1970s Caribbean and its relationship to the forces of migration, national politics, and inter-regional contact. After a background on Cuban and Haitian music, the course will give greatest focus to Jamaican politics its relationship with Reggae, which reached further than any other Caribbean music form in the 1970s. It will explore the journeys of the music as it accompanied and oftentimes preceded the arrival of large numbers of Caribbean immigrants. In the process, the US imaginary of the Caribbean was reshaped by the popularization of Caribbean commercial music.

**Requirements/Evaluation:** class participation, 3-4 short papers (5-7 pages)

**AFR 328 (F) Feminist and Queer Performance at the Limit of Action** (DPE)

**Cross-listings:** THEA 322 AMST 326 WGSS 321 AFR 328

**Secondary Cross-listing**

What counts as feminist and queer activism? This course challenges what we dominantly understand as activism—key to the emergence of ethnic studies and feminist and queer theory. Moving away from political actions centered in these fields, such as strikes, protests, and boycotts, this course
will turn to visual and performance art works by artists of color, who consider other forms of action that are not overtly visible, resistant, oppositional, agentive, militant, loud, liberatory, and documentable. Each week, we will examine a performance at the limit of action, including silence, sexual abjection, concealment, melancholia, and waiting, alongside issues related to race, gender, sexuality, labor, and migration among others. How might we approach and reconcile with performances that once again reify notions of racialized and gendered bodies as apolitical, passive, submissive, and compliant? Drawing on scholarship within black and women of color feminist criticism, queer of color critique, critical ethnic studies, and performance studies, this course will attune students to the role of aesthetics to interrogate and expand what we typically conceive of as activism, resistance, power, and survival from racialized, feminized, and queer positions.

**Requirements/Evaluation:** In-class discussion, short weekly reading posts, class presentation, final paper/project

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** WGSS majors and students with experience in American Studies or performance studies coursework

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**AFR 329 (F) Marxist Feminisms: Race, Performance, and Labor (DPE)**

**Cross-listings:** THEA 323 WGSS 323 AFR 329 AMST 329

**Secondary Cross-listing**

Who is considered the dominant subject of labor? This course offers an overview of queer, women of color feminist, decolonial, and black and critical ethnic studies critiques of orthodox Marxism. Starting with core texts from the Marxist tradition, we will explore a range of social positions and forms of labor that complicate Marx's emphasis on the white male industrial worker. Each unit, we will study key scholarship that centers reproduction, slavery, care and domestic work, indentured servitude, sex work, and low wage flexible labor, to name a few, alongside queer and feminist modes of performance that respond to and/or provide strategies to live and survive under racial capitalism. We will discuss seminal works by theorists, including Karl Marx, Luce Irigaray, Cedric Robinson, Jennifer Morgan, Hortense Spillers, Lisa Lowe, Gayatri Chakravorty Spivak, Dorothy Roberts, Angela Davis, José Esteban Muñoz, and Leo Bersani, in tandem with performances, such as paintings, performance art, poetry, protests, photography, prints, music, and sculptures. This course will equip students with a critical understanding of the ways racial capitalism has centrally relied upon the mass capture and recruitment of racialized and gendered labor in and beyond the U.S. and how, through performance, life under these conditions have been reimagined.

**Requirements/Evaluation:** In-class discussion, short weekly reading posts, class presentation, final paper

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** WGSS majors and students with experience in American Studies or performance studies coursework

**Expected Class Size:** 12

**Difference, Power, and Equity Notes:** This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor is valued over other forms.
AFR 330 (S) Modern Folklore: Postcolonial Dance and Music in Africa

Cross-listings: AFR 330 MUS 330 DANC 330

Secondary Cross-listing

"Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old." --Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950's-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final projects

Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors

Enrollment Limit: 14

Enrollment Preferences: students who have taken DANC 201, 202 or any of the courses listed in the prerequisites

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: occasional fees to attend concerts; fee range free-$35

AFR 331 (F) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 AFR 331 WGSS 318

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men¿s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Difference, Power, and Equity Notes: This course engages content and materials that explore various forms of difference, power, and equity, along with facilitating the development of skills that will help students address the implications of said forms. This course considers current examples and historical examples of Black masculinity. This course fosters difficult conversations about how difference works and has worked, how identities and power relationships have been grounded in lived experience.

AFR 332  (Anti-)Imperialism, Race, and the Archive  (DPE) (WS)

What is U.S. imperialism? How are the social relations of racial capitalism important to U.S. imperialism? How have anti-imperial, anti-racist, and anti-capitalist struggles taken shape within, against, and beyond the U.S. nation-state, and how have these struggles shaped the U.S. nation-state itself? Finally, what kind of anti-imperial activist hermeneutics does American Studies offer and how can they be strengthened to reckon with the specific conditions of the U.S. imperial present? Anchored in these questions, this course seeks to introduce students to the history of U.S. imperialism. It does so beyond the traditional understanding of empire as a one-way agglomerating imposition of power in distant areas, and instead accounts for the co-constitution of reigning state-capitalist orders and global processes of spatial and social differentiation. Following such an approach to the history of U.S. imperialism, this course is organized around four time periods: 1770s to 1890s; 1890s to 1930s; 1930s to 1980s; and 1980s to the present. Across each period, we will attend to processes of U.S. imperial expansion, capital accumulation, and racial domination, and resistance to these processes. We will do so using secondary sources and a wide range of primary sources, including published fiction, legal documents, newspaper articles, speeches, films, and photos. By the end of this course, students should be able to detail a genealogy of the U.S. imperial present that accounts for: the significance of imperial and inter-imperial relations in the formation of U.S. national culture, institutions, and public areas such as law and public policy; how U.S. territorial colonialization has underpinned the development of U.S. imperial infrastructure, the imperial state form, and imperial culture; and how U.S. territorial and extraterritorial sovereignty exist in perpetual reaction to the primary claims of Indigenous peoples and other threats to reigning state-capitalist orders.

Requirements/Evaluation: Evaluation will be based on the following assessments: Class Participation: 25%; Weekly Response (350-500 words): 25%; Essay 1--First submission (5 pgs.): 10%; Essay 1--Revision (5 pgs.): 10%; Essay 2 (5 pgs.): 15%; Essay 3 (5 pgs.): 15%

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors,

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

Secondary Cross-listing
The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it be divorced from history and politics, even, or especially, a radical politics.

AFR 335 (F) Sacred Custodians: Environmental Conservation in Africa
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

AFR 339 (S) The Banlieue in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 COMP 336 AFR 339

Secondary Cross-listing

The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"–as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do "banlieue films" and "banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students , Africana and Comparative literature students

AFR 344 (F) Asian/African American Cultural and Political Theory

Cross-listings: PSCI 333 AFR 344 AMST 325

Secondary Cross-listing

Contrasted as "model minorities" or "incorrigible minorities" Asian Americans and African Americans have been pitted against one another in social standing and political objectives. However, throughout the twentieth century, African/Asian solidarity and alliances existed in political movements and literary and cultural productions. From Ho Chi Minh's anti-lynching writing, the founding conference of the WIDF (Women's International Democratic
Federation) in China in 1945, through the Bandung Conference, coalitions against U.S. wars in Southeast Asia, and alignments with Chinese anti-imperialist endeavors, black and Asian peoples have joined in international political formations. Contributions to theory include the writings and activism of Langston Hughes, W.E.B. Du Bois, Richard Wright, Robert Williams, Yuri Kochiyama, Grace Lee and Jimmy Boggs, Ishmael Reed, and Amiri Baraka; films of Bruce Lee; music of Fred Ho; revolutionary praxis of Mao Tse Tung's *Little Red Book* and his writings on art and society; the Marxism of the Black Panther Party; the Afro-futurism of Sun Ra and Samuel Delany; and contemporary "Afro-pessimism." Such cultural works depict futurities and possibilities for Black and Asian diasporas. This seminar examines theory, politics, literature, film, and music produced from and linked to twentieth-century movements against capitalism, racism, colonialism, and imperial wars to think through how Black and Yellow Power have shaped solidarity to challenge white supremacy and racial capitalism. **Requirements:** One midterm paper (5-6 pp.) = 30%; final paper/project (10-12 pp.) with a creative option = 50%; short response paper and GLOW posts = 10%; participation (attendance and class discussion) = 10% Course cap: 19 Priority given to AMST majors, Africana concentrators

**AFR 345 (S) Race and Feeling in Twentieth Century Literature**

**Cross-listings:** AFR 345 ENGL 342

**Secondary Cross-listing**

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings --- guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Siân Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

**Requirements/Evaluation:** active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Cross-listings: AFR 346 HIST 346

Secondary Cross-listing

Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity—for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

AFR 348 (S) The Black Radical Tradition

Cross-listings: PSCI 348 AFR 348 PSCI 377 LEAD 348

Primary Cross-listing

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Requirements/Evaluation: attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

Prerequisites: none; open to all

Enrollment Limit: 10

Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen?

Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another preceded, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 349 (D2) ENVI 349 (D2) AMST 342 (D2)

Writing Skills Notes: One thesis paper at 15 pages. The writing process is staggered, with each part graded, and with critical feedback from professor and peers. Specifically, one research proposal (including thesis outline and annotated bibliography of primary texts) with feedback from professor; one thesis paper draft with feedback from peers; one letter of revision explaining the student's revision process; one final draft with critical feedback from professor; and student presentation and discussion.

Difference, Power, and Equity Notes: The course addresses issues of difference, power, and equity, and offers theoretical tools and perspectives to understand these issues. Specifically, students learn how to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

AFR 351 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers (DPE)

Cross-listings: ENGL 357 AFR 351 AMST 359

Secondary Cross-listing

When Beyoncé unveiled the Lemonade visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's Daughters of the Dust (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film...
and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu Irene Davis, Haile Gerima, Alile Sharon Larkin, Billy Woodberry, among many, many others, and how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, Black feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned *Lemonade* and Barry Jenkins’ *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

**Requirements/Evaluation:** weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

**Prerequisites:** AMST 101 and/or 301, critical studies in race and ethnicity or cultural studies, or permission of the instructor

**Mystic Spirituality in Black Women’s Social Justice Activism: Brazil-USA**

**Cross-listings:** REL 352  AFR 352  WGSS 352

**Primary Cross-listing**

This course examines the meanings and manifestations of mystic spirituality in the lives and work of selected Black women artists/activists in the USA and Brazil. The writings of Lucille Clifton (poet), Rosemarie Freeney Harding (activist and counselor) and Makota Valdina Pinto (activist and Candomblé ritual elder) are key texts for our exploration of the uses of mystic sensibilities and Afro-Atlantic ritual traditions—such as dreams and visions, prayer, divination, sacred dance, healing rites and other forms of unmediated intimate encounter with the sacred—as resources for creativity, community organizing, self-care and as aspects of political and social critique in African American and Afro-Brazilian contexts. The methodology of the course blends historical, literary and womanist approaches in an investigation of the conjunctions of spiritual practice and activism in the experience of women in the Afro-Atlantic diaspora.

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages) and a final project

**AFR 356**  
**The Plantation and Its Afterlife**

This course is a meditation on the significance of the plantation in modern life. Rather than treating the plantation as solely a socio-economic formation that utilizes captive labor for the efficient production of goods, we will consider the plantation as a space that has defined, and continues to define,
social, economic, and spatial relations. In so doing, we will explore numerous literatures and cultural productions about the plantation in Africa and its diaspora, including historical and sociological studies, fiction, visual art, and music. We will not only interrogate how the plantation form is reproduced over time, but also how it appears in collective memory, and how it enables political mobilization.

Requirements/Evaluation: class participation; two to three short papers (6- to 8-pages); and a 15- to 20-page paper or multimedia final project

Prerequisites: none

Enrollment Limit: 15

AFR 357 (S) Racial and Religious Mixture (DPE)

Cross-listings: REL 314 LATS 327 AFR 357 AMST 327

Secondary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion

Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework

AFR 359 (S) Settler Colonialism, Care, Kinship and Social Reproduction (DPE) (WS)

Cross-listings: AFR 359 AMST 356

Secondary Cross-listing

AMST 356 Settler Colonialism, Care, Kinship and Social Reproduction Contemporary understandings of family, kinship and care were shaped through the invasion of the Indigenous Americas and Transatlantic slavery. Indigenous nations came to be understood by anthropologists and settler states as governed by a logic of kinship, and this understanding was weaponized by the US and Canada to target Indigenous governance for elimination. At the same time, dominant kinship narratives were defined by the property claims made upon Black lives under settler law and by the state-enforced
maternal inheritance of racialized bondage. This course will analyze kinship and care as both mechanisms of state control of Indigenous and Black lives and lands, and as sites of insurgency against colonial states. We will analyze how Canada and the U.S. have deployed Child Protective Services, reproductive regulation, Boarding Schools, plantation economies, land dispossession, and the prison industrial complex to target Indigenous, Black, Brown, working class and trans/queer support systems. Applying methodologies and theoretical interventions in Indigenous studies, Black studies and critical political economy to primary texts to US and Canadian law, autobiography, and anthropology, our focus will move from 17th and 18th century British colonial law to autobiographical accounts of slavery and emancipation, to Canada’s 19th century Indian Act, to mid-20th century social scientific debates on Black and Indigenous families. We will end by thinking about insurgent practices of organizing care and kinship outside and against the confines of whiteness, capital and the state. The pedagogical aims of the course are to illustrate how kinship narratives anchor settler colonial nationhood and property regimes, and to facilitate the development of skills in writing and independent research, primary source analysis, and critical analysis of law, anthropology, and policy.

**Requirements/Evaluation:** Class Participation and three critical response papers at three to five pages each (each receiving critical feedback from professor); one response paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process. One final paper (15-20 pages) and one roundtable presentation based on the final paper.

**Prerequisites:** Prerequisites: one or more of the following courses: AMST 146, Introduction to Indigenous Studies or AFR 200, Introduction to Africana Studies; HIST 254 / AMST 254(F), Sovereignty, Resistance, and Resilience: Native American Histories to 1865 or AMST 204:

**Enrollment Limit:** 19

**Enrollment Preferences:** AMST majors have first priority, AFRICANA majors have second priority.

Readings in American Slavery This course will delve into how and what historians have written about US slavery for the last century or so. Rather than marching through time, like we might in a survey course, we'll explore the nooks and crannies of slavery's history. We'll consider gender and sexuality, labor and capitalism, regional difference, maritime culture, and every day life. We'll compare histories produced well before the Civil Rights Movement to books written afterward. We'll consider the obstacles and challenges Black scholars faced in the academy and consider the significance of their work. Finally, we'll examine slavery's role in today's world, beginning with the institution's relationship with American universities and continuing on to the recent protests against monuments and statues.

Requirements/Evaluation: Four written essays/reviews, final paper. Students must also complete reading and contribute to class discussions.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Priority given to History, American Studies, and Africana Studies concentrators/ majors.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 366 (S) #OutofHaiti: Haiti, Black Sovereignty and the Global Political Economy

Cross-listings: GBST 366 AFR 366

Primary Cross-listing
In the Western hemisphere, Haiti (Ayiti kreyòl) is a symbol of many extremes related to impoverishment, governance and institutional sabotage, Black liberation, artistic and cultural achievement, and underdevelopment. This course places Haiti at the center of broad global political economic transformations. Starting from Black Atlantic enslavement to the present, this course will critically interrogate the superlatives and extreme depictions of Haiti. We will unpick these imageries and material realities and consider broader perspectives within historical and contemporary significance of struggles for Black sovereignty and liberation. We will make connections between anti-blackness, European hegemony/supremacy and economic and social structures to broader ideas of resistance and revolution. Taking economic and political history as data sources and starting points for discussion, students will be able to analyze and juxtapose media imagery, documentary films and contributions of civic movements and figures within Haiti and the Haitian diaspora. From the perspective of connected Blackness, students will explore how Black peoples’ links through global struggles for liberation and freedom and against imperialism emerge and are understood today. Students will undertake assignments that compare and contrast experiences across the African diaspora, utilize Haitian writings and political and economic developments to assess Haiti’s long relationship with major international economic institutions and the United States. Topics range from the Haitian ‘reparations’ to France, United States’ embargos, military occupation, political interventions, international energy crises, corporate trade deals, post-earthquake NGO humanitarianism, to United Nations military and economic operations, bilateral deals like Petrocaribe and longstanding popular demands against imperialism.

Requirements/Evaluation: Journal entries (250 words each); individual essay on documentary film or media (8 pages); research report on a major contemporary social/economic/environmental issue in Haiti (10 pages); “Haiti Liberation Space” group public education project on the contemporary importance of Haiti to global Black liberation/ racial justice and a summative reflection on a meaningful aspect of this project (5 pages); class participation (discussion and readings)

Prerequisites: None

AFR 367 (S) Black History is Labor History (DPE) (WS)
Cross-listings: AFR 367 HIST 367
Secondary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation: Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites: recommended for students with sophomore standing or above

Enrollment Limit: 25

Enrollment Preferences: HIST and AFR majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 367 (D2) HIST 367 (D2)

Writing Skills Notes: Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages.

Difference, Power, and Equity Notes: This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

AFR 368 (F) The Diasporic Impulse in African American Art

Cross-listings: COMP 367 AFR 368

Primary Cross-listing

Since the mid-20th century, growing numbers of African American artists have explored historical, symbolic, and ritual meanings shared by Blacks in the USA and people of African descent in other parts of the diaspora. Using specific visual, musical, literary, and kinetic themes, Black creatives--across genres--develop work that addresses explicit and implicit points of diasporic connection around issues of identity, indigenous/ancestral wisdom, cultural and political critique, and alternative religious orientations. Looking especially at the work of playwright August Wilson, painters John Biggers and Daniel Minter, dancer Katherine Dunham, and sculptor Elizabeth Catlett Mora, this course examines the symbolic and ritual vocabularies of African American art in diasporic perspective.

Requirements/Evaluation: class participation, two to three short papers (5-7 pages), and a final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option
AFR 369 (S) African Art and the Western Museum  (DPE) (WS)

Secondary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

Not offered current academic year

Cross-listings: AFR 370  HIST 370

Primary Cross-listing

The ending of the Second World War in 1945 coincided with the dawn of a new nationalism in the modern Caribbean. The British territories were beginning their shift away from colonialism and charting a path toward independence that would arrive in the early 1960s. Their independent neighbors contended with US imperialism which greatly shaped questions of race, nationalism, and sovereignty. By the 1960s much of the region faced crises that grew out of the tensions of the postwar period. This course examines closely these transformations in the Caribbean. It is divided into three parts. The course begins with an examination of the ideas about race, state development and empire that dominated Caribbean intellectual discourse of the 1940s. Key texts for this period include the works of Caribbean intellectuals such as Roger Mais, Una Marson, CLR James, and Jacques Roumain who considered the possibilities of racial equality and democracy in the postcolonial Caribbean. The course then looks more closely at 1950s attempts to forge greater Caribbean unity during the early Cold War years. West Indian Federation and the circuits of travel within the Caribbean are given special focus. Finally, the course will discuss challenges of the postcolonial Caribbean by looking at the circumstances and wider responses to regional radicalism in the 1960s. The key events that will be examined in this section include the Duvalier dictatorship, the Cuban Missile Crisis, and
black power in Jamaica in 1968.

AFR 378 (S) Uncontrollable: Deconstructing Stereotypes of Black Womanhood in the Americas

**Cross-listings:** AFR 378 WGGSS 378

**Primary Cross-listing**

In *Black Feminist Thought* Patricia Hill Collins powerfully illustrates how "portraying African-American women as stereotypical mammies, matriarchs, welfare recipients, and hot mommas has been essential to the political economy of domination fostering Black women's oppression." This course explores how similar social constructions of race and womanhood have evolved in Latin American countries affected by slavery and colonialism. We begin by revisiting Collins' seminal text, as well as the work of other feminist scholars, as a starting point from which to deconstruct controlling images of Black women in Latin American nations. We will then explore clips from films, television series, advertisements, and comic strips to analyze different iterations of stereotypes and their impact on Afro-Latin American women's life chances. The second component of this course will engage with Black women's resistance throughout Latin America. We will engage songs, poetry, and empirical data on Black women's resistance to examine they how have and continue to challenge stereotypes, educate the public, and construct their own narratives of black womanhood.

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages), and a final paper (12-15 pages)

Not offered current academic year

AFR 379 (S) Black Women in the United States (DPE)

**Cross-listings:** HIST 379 WGGSS 379 AFR 379

**Secondary Cross-listing**

As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

**Class Format:** discussion

**Requirements/Evaluation:** student participation, three papers, and a brief oral presentation

**Prerequisites:** none
Enrollment Limit: 15

Enrollment Preferences: History, WGSS, and American Studies Majors, and Africana Concentrators.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course meets the Difference, Power, and Equity requirement. The course focuses on empathetic understanding, power, and privilege, especially in relation to class, gender, and race within a U.S. context. We will study the ways in which the conflicts arose within the Black community and how Black women, usually without official positions as leaders, emerged as organizers and leaders in political and social movements.

Not offered current academic year

AFR 380 (S) Freedom Dreams, Afro-Futures & Visionary Fictions

Cross-listings: AFR 380 WGSS 380 AMST 380 ENGL 381 STS 380

Secondary Cross-listing

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

AFR 381 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: HIST 480 GBST 480 AFR 381

Secondary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as
well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** This course open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

**Writing Skills Notes:** Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques - both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

**TUT Section:** T1 TBA Benjamin Twagira

**AFR 382 (S) Contemporary Afro-Latin American Social Movements**

This seminar course will provide students with an introduction to diverse histories, political beliefs, and mobilization strategies of 20th and 21st century Afro-Latin American social movements, as well as their relationship with their respective governments. Primary documents, audiovisual texts and social science research will complement lectures and class discussions to prepare students to discuss the contributions and critiques of the movements within broader discussions of the politics of blackness in the African Diaspora. While the course focuses on contemporary experiences activism, each topic is introduced with a historical overview of African-descended peoples in Latin America. By the course's conclusion, students should be able to discuss a wide range of ideas, experiences, and strategies of black politics in the Latin America as well as the similarities in themes and characteristics that have shaped much of the experiences. Furthermore, students should be able to assess the ways in which black movements in Latin America have: challenged hegemonic narratives, approached politics of culture and multiculturalism, contested invisibility, utilized transnational diasporic politics, and (re)defined conceptualizations of citizenship and belonging.

**Requirements/Evaluation:** in-class participation, weekly reading responses, a book review, and a final paper and presentation

**Prerequisites:** none

**Enrollment Limit:** 13

**Enrollment Preferences:** Africana Studies concentrators

**Cross-listings:** AMST 456 HIST 456 AFR 385

**Secondary Cross-listing**

An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. The seminar begins with the build up of sectional antagonism culminating in the secession of the lower South in 1860-61 and the outbreak of civil war. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

**Class Format:** This seminar will be a discussion course. This era was the formative period for many of the issues we face as a society today, and the roots of these present-day problems must be discussed openly and thoroughly by all members of the seminar.

**Requirements/Evaluation:** class participation, two short essays during the semester, and a substantial research paper based at least in part on primary source materials due at the completion of the seminar.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference given to History majors needing a 400-level course to complete their major requirements.

**AFR 386 (S) Democratic Vistas**

**Cross-listings:** ENGL 391 AFR 386

**Primary Cross-listing**

This seminar will focus on the ways in which texts create nuanced representations of democratic ideals and practices as well as, of course,
representations of the failures of democratic ideals and practices. Our goal will be to explore how literature encourages readers to think about
democracy, and what impact that can have on our lives as readers and citizens. To this end, we will study work across five genres--poetry, fiction,
non-fiction, photography, and film--to arrange and enhance our sense of how plot, structure, figuration, and allusion occupy themselves with the
challenge of the Democratic Vista: which is to say with visions of what democracy is, has been, and has the potential be. Among the texts and authors
likely to be studied are Robert Hayden, Ralph Ellison, Toni Morrison, Don DeLillo, Jamaica Kincaid, Ishion Hutchinson, Natalie Diaz, Octavia Butler,
Colson Whitehead, Morgan Parker, Nana Kwame Adjei-Brenyahm Teju Cole, and contemporary films such as Ryan Coogler’s BLACK PANTHER and
Boots Riley’s SORRY TO BOTHER YOU.

Requirements/Evaluation: attendance and participation, two short essays, and a 12- to 15-page final paper; additional requirements will include film
screenings outside of class, interactive (e.g., Skype, etc.) author visits inside of class, and campus talks germane to the seminar

Prerequisites: none, open to all students

Cross-listings: ENVI 430  AFR 390  AMST 430

Secondary Cross-listing

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry,
race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and
accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course
investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations,
negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant
research paper and weekly written responses, this course ultimately aims to foster students’ critical writing, reading, analytical thinking, and
comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide
range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos,
paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes,
and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual
categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally,
students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation with regard to relations
with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of
governance and systems of dispossession and exploitation.

Class Format: This course is designated as remote. However, international students who want to take this course but need it to be designated as a
hybrid course in order to do so may instead register for an independent study with Prof. Ayazi. As a hybrid course, this independent study will have the
same requirements as the listed course, with the exception of a limited number of face-to-face meetings in Williamstown or Boston. Please contact
Prof. Ayazi at ha5@williams.edu to discuss such an arrangement.

Requirements/Evaluation: Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final
Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15
pgs): 20%. Class will meet twice per week. Tu. meetings will be synchronous and Th. meetings will be asynchronous. Asynchronous components of
the course include pre-recorded lectures, discussion boards, and other exercises that promote as much connection as possible within the constraints
of remote education. Toward this end, synchronous meetings will center engaged discussion.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American
and Indigenous Studies, as well as Africana and Environmental Studies majors.
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 430 (D2) AFR 390 (D2) AMST 430 (D2)

Writing Skills Notes: Emphasis on revision and writing process includes: One thesis paper at 15 pages (receiving critical feedback from professor and peers); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one research proposal (including thesis outline and annotated bibliography of primary texts) with critical feedback from professor; student presentations and roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: By the end of this course, students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation. In order to addresses such issues of difference, power, and equity, this course provides students with the necessary th

AFR 405 (F) CAPSTONE: Africana Studies and the Disciplines

Of the many things that distinguish Africana Studies from other fields of knowledge, most remarkable are its creative uses and critiques of disciplinary perspectives. In some instances, a scholar in the field might move between disciplines; in others, a scholar might integrate two or more disciplines into one point of view. Disciplinary creativity accommodates the array of information--written texts, music, visual art, film--that contributes to our understanding of the African Diaspora. This seminar will illuminate the disciplinary nuances and challenges of studying people of African descent. After outlining genealogies of Africana Studies and the field’s complicated relationships to social science disciplines, students will closely read classic texts by some of the pioneers in the field and explore their uses of disciplinary perspectives. In the latter half of the course, students will have the opportunity to design and conduct their own research projects with the aforementioned disciplinary concerns in mind.

Requirements/Evaluation: class participation, a couple of short papers and the completion of a final research paper or project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators

AFR 440 (S) CAPSTONE: Performing Blackness

In modern parlance and scholarship, blackness is understood not as a biological but rather a socially constructed phenomenon. This course extends common perceptions by working from the foundational concept that blackness is not only social construction but also performance and lived experience. Using the lens of performance on racial identity foregrounds the active and shifting nature of race in contrast to the potentially passive, static connotation of construction. But what is this term performance that is now so widely used as to be an anathema? In this course, we explore performance broadly as entertainment, representation, social function, and lived experience. By the end of the course, students will analyze multiple performance types from theatrical and dance performance to performance of race in everyday life. They will also study and practice at least four core black performance studies methodologies: oral interpretation of literature, ethnography, written performance analysis, and embodied performance (i.e. movement, music and/or theatre). In this way, students will begin to understand performance as both subject matter and method. The course will be structured around discussions, written responses, and performance exercises that help students analyze and practice each methodology. At the end of the semester, students will create final creative research projects that articulate key theories of black performance studies and draw on at least one of the featured performance methodologies. While preference is given to Africana Studies concentrators, students are not required to have prior
performance experience.

**Class Format:** This is a hybrid class that welcomes students' participation remotely and/or in the physical classroom. It will include a mix of online synchronous and asynchronous meetings alongside meetings in the classroom. This term the course will feature performance methodologies most receptive to social distancing, such as visual art, spoken word and music. There may also be field trips to important sites, which will follow university safety guidelines.

**Requirements/Evaluation:** class participation, performance exercises, response papers, and a final creative research project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Africana Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Primary Cross-listing**

How do we judge the value of life? What is the significance of death and arbitrary threats to our existence? Why probe modern notions of black and blackness? What defines optimism, pessimism, enslavement, freedom, creativity, and being human? Do black lives matter? This capstone seminar will explore these and related questions through an examination of the life and work of Jamaican novelist, playwright, cultural critic, and philosopher Sylvia Wynter. Methodologically interdisciplinary, the course shall examine written and audiovisual texts that explore Wynter's inquiries into the central seminar queries. We will study figures and movements for black lives whose geopolitics frame the milieu of Wynter's work. Our examination of intellectuals and activists, with their explicit and implicit engagements with Wynter, shall facilitate assessing the possibilities, challenges, and visions of black living. We will also explore the current implications of Wynter's thought for Africana political theory, Afro-futurism, social justice, human rights, and critiques of liberal humanism. In the latter half of the course, students will have the opportunity to design, conduct, and present their own final research projects.

**Class Format:** Remote format. This class will be taught synchronously primarily.

**Requirements/Evaluation:** attendance and participation; a 7-page midterm essay; class presentation; and a final research project

AMERICAN STUDIES (Div II)
Chair: Professor Dorothy Wang

- Hossein Ayazi, Visiting Assistant Professor of American Studies
- Anthony Y. Kim, Visiting Assistant Professor of American Studies
- Margaux L Kristjansson, Mellon Postdoctoral Fellow in Native American and Indigenous Studies in the American Studies Program
- Eli Nelson, Assistant Professor of American Studies
- Jan Padios, Associate Professor of American Studies
- Dorothy J. Wang, Professor and Chair of the American Studies Program

GENERAL PROGRAM DESCRIPTION
The American Studies Program, a ten-course major, uses interdisciplinary approaches to develop students' understanding of the complexity of the culture(s) usually labeled “American.” Examining history, literature, visual media, performance, and other forms of expression, we explore the processes of cultural definition as contested by diverse individuals and groups. We ask new questions about aspects of American life long taken for granted; we also use American culture as a laboratory for testing classic and contemporary theories about how cultures work.

NON-MAJORS, FIRST-YEAR STUDENTS, AND SOPHOMORES
America: the Nation and Its Discontents, our introductory course, is open to non-majors including first-year students, who are especially encouraged to take the class. All elective courses are open to students who meet the requirements or prerequisites specified in the course description. American Studies 301, the junior seminar required of majors, is open to non-majors with permission of the instructor.

COURSES AND COURSE NUMBERING
American Studies offers courses at all levels. Our 100-level electives, which give preference to first-year students, explore a substantive topic in-depth without seeking to introduce the field as a whole. Our introductory course, AMST 101, explores broad patterns of power and imagination, struggle and social change in American culture but also introduces the interdisciplinary approach and diverse cultural artifacts, genres, and media that distinguish American Studies as a form of inquiry. Both this course and our occasional 200-level electives are appropriate for students at all levels, including first-years. The intermediate electives at the 300-level are offered primarily for juniors and seniors, although, when space and instructor policy permits, they are open to sophomores. All majors are required to take AMST 301, the junior seminar, which teaches students how to employ theories and methods central to the field. The 400-level courses designated as senior seminars are designed for senior majors, though other students (majors and non-majors) with appropriate preparation are typically welcome in these courses as well.

THE MAJOR
Required Courses
- American Studies 101, America: the Nation and Its Discontents
- American Studies 301, Junior Seminar
- One 400-level course designated Senior Seminar

Elective Courses
Seven courses: four should be chosen from your primary specialization field; the remaining three electives must represent each of the remaining three fields, to ensure breadth of your study. At least one of your seven electives should cover pre-1900 American history or culture.

THE DEGREE WITH HONORS IN AMERICAN STUDIES
ELIGIBILITY AND APPLICATION FOR HONORS
Candidates for honors in American Studies will undertake a substantial, year-long, independent project during their senior year. Applicants should have a consistent record of high achievement in courses taken for the major, and normally will have done work in the field of study of their proposed thesis. Students who wish to write or produce an honors project should consult with both the chair and a prospective faculty adviser in the fall or winter of their junior year. Students who wish to pursue honors must submit a brief proposal describing their project to the Chair of the American Studies Program by the time of spring registration of their junior year. Final admission to the honors thesis program will depend on the AMST advisory committee’s assessment of the qualifications of the student and the merits and feasibility of the project (including the availability of relevant faculty advisers). If your thesis is approved, you will enroll in AMST 491/Winter Study/AMST 492. These courses, taken together, count as one of your
required electives.

**TIMELINE FOR AMERICAN STUDIES HONORS THESIS STUDENTS**

The fall and winter study deadlines vary widely, depending on your own rhythms, the timing of your meetings with your adviser, etc. The first part of the fall is typically devoted to refining the questions at the heart of your project, and the scope of your argument (including literature review, archival research, etc.) Most students begin this work over the summer. We encourage our students to start writing as soon as possible. Typically, we aim to have students write a draft of one substantive chapter and the introduction by the end of finals week in fall semester, though some have produced two substantive chapter drafts instead.

January is very important. Many pages of new writing and editing of previous work will can be done in this period. Occasionally, seniors will meet together in an informal thesis colloquium. The goal for Winter Study, generally speaking, is to know by the end of it what you will need to write in the last push as Spring semester begins. Your biggest push will come in February and March. All writing and revisions should be done by the end of spring break. Here are the approximate deadlines:

- Immediate after Spring Break: draft of entire thesis is due to your adviser and your two readers;
- Two – three weeks later: deadline for readers to respond to you with comments/suggestions;
- Wednesday of the last week of classes: final version of thesis due to readers.

Senior thesis writers will share their work with interested faculty and students in a public presentation in the last weeks of the spring semester. Designation of Honors or Highest Honors will be decided by the faculty at the end of the semester.

**ADVISING**

All majors will be assigned a faculty adviser. Majors must meet with their adviser during the first week of classes during the fall semester and at the time of the spring semester registration period in order to have their courses and plans for the American Studies major approved. Both majors and non-majors are encouraged to talk at any time with the program chair or other affiliated faculty about the major.

**AMERICAN STUDIES AND OTHER PROGRAMS**

Students majoring in American Studies are encouraged to consider pursuing concentrations in Africana Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women’s, Gender and Sexuality Studies. Many of the courses counted for those concentrations may also earn credit toward the American Studies major.

**STUDY AWAY FROM WILLIAMS**

We encourage students to pursue cross-cultural comparative studies. A major in American Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for College credit may also count toward the American Studies major. Many of the courses offered by Williams at Mystic Program also count toward the major. Please see the chair if you have questions about how your study abroad may enhance your American Studies experience.

Students planning to be away in the junior year should have taken American Studies 101 before they leave; those who can take the Junior Seminar before they go away are strongly encouraged to do so. Students should consult as early as possible with the chair or their adviser about their plans for fulfilling the requirements of the major.

**SPECIALIZATION FIELDS**

To provide focus for work in the major, each student will choose one of the specialization fields listed below and record this choice when registering for the major. (This commitment can be revised, in consultation with the chair.) At least four electives should be taken from this primary field.

**ARTS IN CONTEXT**

This specialization is for students interested in American arts, literature and media. Its approaches are interdisciplinary: it trains students to examine cultural artifacts with attention to aesthetic form and to the contexts—historical, social, political—that determine and situate those forms. Broadly, it asks how history has shaped the arts and media and how the arts and media have shaped how we think and who we are. Students in this specialization take courses across a range of genres and media: poetry, fiction, music, film and video, pop culture, visual culture, performance, experimental and activist art.

**Elective Courses**

Students may check with the program chair to see if other courses not listed here might count as electives.

**AFR 205 T / WGSS 207 She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings**

Taught by: VaNatta Ford

**AFR 208 T / AMST 208 / REL 262(F) Time and Blackness**
Taught by TBA

COMPARATIVE STUDIES IN RACE, ETHNICITY, AND DIASPORA

This interdisciplinary specialization examines the role of race, ethnicity, and diasporic movements in the construction of American identities. Students explore how experiences and concepts of race and ethnicity are transformed through the processes of diaspora and immigration. These courses may encompass a broad spectrum of fields such as history, literature, religion, politics, anthropology, gender studies, media and the performing arts, among others. NOTE: Concentrators in this area are required to take a combination of courses that will allow them to comparatively assess the experiences of at least two ethno-racial groups in the Americas.

Taught by: Steven Fein
**CRITICAL AND CULTURAL THEORY**

Critical and cultural theory is for students who want their American Studies work to combine philosophy, aesthetics, and social thought. Its approach is methodological, conceptual, and problem-driven. Students combine courses in feminist theory, anti-imperial and postcolonial theory, literary theory, critical race theory, queer theory, psychoanalysis, Marxism, and other counter-traditions in political theory and philosophy.

**Elective Courses**

**AFR 132 / AMST 132 / PSCI 132** Contemporary Africana Social and Political Philosophy

AMST 101 (F)(S)  America: The Nation and Its Discontents (DPE)

This course introduces students to the capacious and extraordinarily varied interdisciplinary field of American Studies. First institutionalized in the mid-twentieth century, American Studies once bridged literature and history in an attempt to discover a singular American identity. Over 80 years later, many American Studies scholars reject this exceptionalizing rhetoric, working instead to understand how genocide, enslavement, colonization, and militarism/war are foundational to the formation of the U.S. nation-state, and how marginalized and minoritized peoples have survived through, rebelled against, and created new visions for collectivity, relationality, and community. In this course, students will be introduced to the dynamic ways American Studies work links to ethnic studies; women, gender, and sexuality studies; literary studies, political science; critical geography; critical media studies; disability studies; history; anthropology; sociology; art; and more. We will anchor this array of approaches by examining beliefs, practices, places, and migrations that have shaped and been shaped by the U.S., and we will pay particular attention to the people who labor for, have been racialized by, and who think critically about "America." Through close reading; discussions; and analyses of music, art, and film, we will collectively reckon with the questions of who and what makes "America" -- hemispherically, transnationally, globally. In the process, students will be encouraged to co-create a learning experience rooted in praxis, political consciousness, intersectionality, and mutual support.

Requirements/Evaluation: Evaluation will be based on class participation, weekly reading questions or discussion posts, and series of written assignments (three 3-page papers; and one 5- to 7-page paper)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access to power, wealth, and citizenship in the U.S., and in its recognition and analysis of resistance to such inequities.

Fall 2021

AMST 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: AMST 105 WGSS 105 ENGL 105

Secondary Cross-listing
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of “manners and morals” does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 105 (D2) WGSS 105 (D2) ENGL 105 (D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

AMST 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Secondary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary
approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first years

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women’s Liberation Movement.

AMST 114 (S) Of Caravans and Narcos: U.S. Media Narratives about Central and South America  (DPE)

**Cross-listings:** AMST 114 LATS 114

**Secondary Cross-listing**

What do contemporary U.S. media discourses about Central and South America reveal about relationships of power in the Americas? How does the systematic analysis of visual, textual, and sonic media discourse enhance our comprehension of broader social dynamics? How do South and Central Americans in the diaspora actively counter dominant media narratives about their communities? And what does it mean to center the unique histories, cultures, and political contexts of diasporic Central and South Americans within Latina/o/x Studies? Drawing from a wide range of scholarly materials and media platforms, this interdisciplinary course assumes a transnational approach to these issues, with an emphasis on how to conduct effective discourse analysis of everyday media texts. Above all, we will highlight the ways in which ethno-racial identity, gender, sexuality, class, and nation intersect to inform mainstream U.S. media narratives and our understandings of past and present modes of representation.

**Class Format:** discussion

**Requirements/Evaluation:** two short (5- to 7-page) essays; one class presentation; final take-home examination (5-7 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** LATS concentrators by seniority; AMST majors by seniority
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 114 (D2) LATS 114 (D2)
Difference, Power, and Equity Notes: This course encourages students to develop critical thinking skills regarding the intersection of categories of difference (including ethno-racial identity, gender, sexuality, class, and nation) employing a variety of scholarly materials and every day media texts. Students will be encouraged to consider past and current relationships of power across the Americas with an eye towards how attitudes towards Central and South Americans shape representations of these communities in the Global North.

AMST 125 (S) Introduction to Asian American Studies (DPE)
This course covers topics and approaches salient to contemporary Asian American Studies as an interdisciplinary field of scholarship and activism. Drawing on primary source documents, scholarship, visual media, and creative work, we will look at cross-racial solidarity and organizing, anti-Asian exclusion and xenophobia, war and refugee communities, public and mental health, and immigration histories and experiences. We will ground our inquiry in the social movements from which the field emerged in the late-1960s and 1970s, then move on to address foundational terms for Asian American and Pacific Islander scholars, such as race, bodies, citizenship, empire, transnationalism, and Indigeneity. Throughout the course we will stay attentive to overlapping histories between Asian American and Native, Indigenous, Black, and Latinx people and communities. Students will also have a number of opportunities to practice analytic writing, do creative work, engage in personal reflection, and participate in community building.
Requirements/Evaluation: Weekly: an average of 75 pages of reading (or watch a film), participate in class discussions. 5x per semester: 2-page writing or creative assignments, including letter writing, conduct an interview, analyzing a passage from a historical document, or close read a scene from a film or story. Final: A 5-7-page final paper, small group project, or individual project.
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: If over enrolled: first-year students, AMST majors, or graduating students without prior experience with the topic
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course defines "Asian" and "Asian American" as categories of social difference created through historical conditions (e.g. migration, imperialism) that change over time. These terms also refer to forms of personhood with racial, national, and ethnic meaning determined by unequal distribution of power and resources. Students in the course are asked to understand, engage, and articulate these differences, historical, and social process.

AMST 128 (S) Reading Asian American Literature
Cross-listings: COMP 128 ENGL 128 AMST 128
Primary Cross-listing
Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetries. This course closely reads a sampling of texts in a variety of genres and styles-produced by writers from various Asian American ethnic groups-from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"--its contradictions, heterogeneous nature, and our
assumptions—and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as 'foreign' or 'alien' to the American body politic and the English-language literary tradition?" "How might Asian American writing be linked to other English-language texts in the Asian diaspora?"

Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: prospective AMST or ENGL majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AMST 132  (F)  Contemporary Africana Social and Political Philosophy

Cross-listings: AMST 132  AFR 132  PSCI 132

Secondary Cross-listing

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzegwu, Lucius Outlaw, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: first- and second-year students

Expected Class Size: 12

AMST 142  (F)  AlterNatives: Indigenous Futurism and Science Fiction  (DPE)

Cross-listings: AMST 142  STS 142

Primary Cross-listing

Indigenous people occupy a paradoxical position in time. On one hand, as survivors of genocide and occupation, they are already post-apocalyptic, occupying what many Indigenous thinkers argue is "our ancestor's dystopia." On the other hand, Indigenous people are relegated to the past in settler and colonial discourses, which, in relying heavily on notions of contact, authenticity, and vanishing, preclude Indigenous peoples from not only futurity, but from modernity and associated visions of science and technology too. This tutorial explores how Native science fiction imagines and enacts futurity from this paradoxical Indigenous temporality. Looking across numerous national and transnational Indigenous contexts, in addition to different kinds of media, including short stories, novels, visual art, video games, films, and online platforms like second life, this tutorial foregrounds the ways in which
science fiction functions as a mode of Indigenous theory, knowledge production, and claiming of not only the future but of the past and present, as well. Pairing media readings with works in science fiction and Indigenous studies, we will explore the role of indigeneity in the founding and tropes of European and settler science fiction, Native "slipstream" and eco SF, post-post-apocalyptic thinking, space travel and frontiers, Native pessimism, and Indigenous technologies and epistemologies cast into the future. We will pay careful attention to the political stakes of these narratives and expression for Indigenous sovereignty and self-determination.

Requirements/Evaluation: attendance and participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and your partner's writing

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 142 (D2) STS 142 (D2)

Difference, Power, and Equity Notes: This course will underscore the ways in which structures like race, gender, sexuality, and colonialism are deeply imbedded in every form of cultural production, and will highlight how imagining the future otherwise has real impact and import in the lives and political existence colonized people.

AMST 146 (F) Introduction to Native American and Indigenous Studies (DPE)

What does it mean to be a citizen of an Indigenous nation? Why are there laws against selling inauthentic Native American art? Who is two spirit and what obligations and politics does that position and identity entail? Where do we locate tradition and Indigenous peoples in time? In this course, we will address these questions and more, surveying indigeneity as it is constructed and expressed in historical narratives, activism and education, governance and identity, art and literature, science and religion, and gender and sexuality. Knowledge of the Indigenous is a foundational element of the United States. From missionaries documenting Indigenous languages, to sports mascots, DNA testing, and even to New Age spirit quests and sweat lodges, the coherence and legitimacy of this settler colonial empire has demanded expertise in and the appropriation of Indigenous bodies, knowledge, and cultures as a means of continually displacing and erasing them. And yet, that is not the only way to produce knowledge of, by, and with Indigenous people. Indigenous Studies provides a variant way of thinking and learning about indigeneity. The imperative of Indigenous Studies is to understand Indigenous peoples on their own terms and the world on those same terms. In this course we will explore not only questions related to Native America today, but also the various reasons and implications for why we study it.

Class Format: This course will be taught remotely. Class sessions will include asynchronous lectures and Zoom-based discussion sections. Additionally, we will interact through online message boards and group film screenings.

Requirements/Evaluation: attendance and class participation, three 3- to 5-page essays, and one in-class presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: American Studies majors or first- and second-year students

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course addresses the dynamics of power inherent in studying Indigenous people in the academy, and will provide students the vocabulary and framework necessary to interrogate how settler colonialism and Indigenous survivance intersects with questions of race, gender, sexuality, and the construction of difference.

AMST 166 (F) Being Muslim, Being American: American Muslim Literature in the 21st century

Cross-listings: REL 166 COMP 166 AMST 166 ENGL 268

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims’ own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims’ own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 166 (D2) COMP 166 (D1) AMST 166 (D2) ENGL 268 (D1)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.
AMST 167  (S)  Let Freedom Ring? African Americans and Emancipation  (WS)

Cross-listings:  AFR 167  HIST 167  AMST 167

Secondary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation:  research paper, short writing assignments, class participation

Prerequisites:  first-years and sophomores

Enrollment Limit:  19

Enrollment Preferences:  first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 167 (D2)  HIST 167 (D2)  AMST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

AMST 200  (S)  Ethnographic Directions in American Studies  (DPE)

This course introduces students to the practice and politics of ethnography, broadly defined as the study and representation of people, culture, and society. Our approach will be post-positive and interpretive, with attention to the social stakes of ethnographic research and methodology writ large. We begin the semester by looking at the history of ethnographic methodologies in anthropology and sociology, and then examine efforts to decolonize ethnography. We then read several examples of decolonial, feminist, or otherwise critical ethnographic research related to marginalized or minoritized groups in the U.S. -- such as undocumented migrants from Latin America, formerly unhoused Black girls, Diné fighting resource extraction on the reservation, and Cambodian refugees in the Bronx -- along with articles that illuminate issues of power, observation, consent, and representation in ethnographic research. Through readings, discussion, and engagement in ethnographic exercises, students will gain familiarity with the different phases or components of conducting ethnographic research, while also considering different styles of ethnographic production, including creative work. While this course is designed to look specifically at ethnographic directions that intersect with the interdisciplinary field of American Studies, it is open to any student interested in the study of pressing social issues (such as the prison-industrial complex, refugee resettlement, and drug addiction) and creating communities of mutual care and solidarity for surviving, fighting, and quite possibly, solving them.

Requirements/Evaluation:  Weekly: Average 75 pages of reading; participation in class discussions. Every 3-4 weeks: research assignments. Once per semester: group presentation. End of semester: one 5-page paper.

Prerequisites:  None

Enrollment Limit:  12

Enrollment Preferences:  Enrollment preferences if over enrolled: AMST majors, students seeking methods courses
Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

**Difference, Power, and Equity Notes:** This course covers ethnographic approaches to understanding social relations and cultural processes, with particular attention to scholarship in which power relations; structural analysis; and race and gender are central.

**Difference, Power, and Equity Notes:** This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

**AMST 202 (F)(S) Introduction to Racial Capitalism** (DPE) (WS)

**Cross-listings:** AMST 202  AFR 209

**Primary Cross-listing**

The historical relationship between race and capitalism is one of the most enduring debates in U.S. historiography, shaping modes of inquiry and analysis across history, law, economics, sociology, anthropology, and other fields. This course seeks to introduce students to the concept of "racial capitalism"--which rejects treatments of race (and racism) as external to the so-called real workings of capitalism--as a way to understand this relationship and as an activist hermeneutic through which to identify and respond to the conditions that American Studies must reckon with. Students will gain familiarity with the global history of racial capitalism and the power of the concept itself through secondary sources and a wide range of primary sources, and through engaged discussion and short essays. Throughout the course, we will pay special attention to the cultural politics, political geographies, and historical development of racial capitalism, thus attending to how the social relations of racial capitalism have been known, lived, and resisted across time and space. The course is organized around three key themes: the land question; race, capitalism, and nation; and the banalities of racial capitalism. Across these themes, the course will address such issues and topics as North American settler colonialism,
circum-Caribbean plantation slave and "Coolie" labor, mass incarceration, the subprime mortgage crisis, and the War on Terror. The course will do so through and against a history of racial capitalism that privileges the U.S. nation-state in particular. By the end of this course, students should be able to: detail and analyze the historical development of and resistance to racial capitalism, doing so in relation to the global itineraries of racial slavery, settler colonialism, imperialism, and white supremacy; trace the history of the concept of racial capitalism itself; and identify how the concept continues to shape the field of American Studies.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 202 (D2) AFR 209 (D2)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

AMST 205  (S)  Chicana/o/x Film and Video

Cross-listings: AMST 205  WGSS 203  LATS 203  ARTH 203

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors; LATS concentrators

Expected Class Size: 14
AMST 206  (S) Designer Genes (DPE) (WS)

Cross-listings:  ENGL 208  AMST 206  STS 208  WGSS 208

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with—or exploit—the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book The Mutant Project. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary In the Family, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel Dawn explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film Gattaca shows us a fully realized dystopian society where genetically modified humans are the norm—a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation:  Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages), short presentation, longer final researched paper/project (8-10 pages).

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  Women's, Gender, and Sexuality Studies, American Studies, English majors

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 208 (D1) AMST 206 (D2) STS 208 (D2) WGSS 208 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts; two four-to-five-page graded papers; one descriptive digital assignment (the Story Map); and a final researched paper (8-10 pages)—written in stages. Students receive critical feedback on written assignments through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next.

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics’ case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

AMST 208 (F) Time and Blackness

Cross-listings: AFR 208 AMST 208 REL 262

Secondary Cross-listing

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory--which involves thinking about time--time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres--spiritual autobiography, fiction, memoir, literary criticism, and cultural theory--understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Fall 2021

TUT Section: T1 Cancelled

AMST 209 (F) Introduction to Black, Brown, and Queer Theory (DPE)

Have you ever tried to relate your experiences, rooted in your own complex identities, history, and social networks, to those of others you perceive as different and perhaps allied, but found you lacked some fundamental vocabulary? This is a common problem, even for critical theorists who take as their object of study political, affective, and epistemological structures of difference and power. Critical race, postcolonial, Indigenous, and queer theories have often centered the relationship between the normative and non-normative, between straight and queer, colonizer and colonized, and white and black. Connections between the differently non-normative can sometimes be pushed to the periphery. But what if we were to center that periphery? What views of complex power structures and new avenues of thought and solidarity would arise if we took as our starting point the social and theoretical interconnectedness and overlap of black, brown, and queer folks? This course will serve as an introduction to critical race, postcolonial, Indigenous, and queer theories as conceptually and phenomenologically interlocking and allied fields. By reading with theorists in all these traditions and at their intersections, we will explore how blackness, indigeneity, and brownness are constructed and function in the context of colonialism and settler colonialism, how differently racialized bodies are sexed and sexualized, and how queerness as method can speak across these issues. No background in critical theory is required for this course. We will focus on how to read and discuss theory, and how to think holistically about the structures that work to keep us divided.

Requirements/Evaluation: attendance and class participation, two 4-page reflection papers, and a final creative project (TBD with instructor) or take-home exam

Prerequisites: none

**Fall 2021**

**SEM Section:** 01  TR 11:20 am - 12:35 pm  Eli Nelson

**AMST 211 (S) Race, Environment, and the Body**

**Cross-listings:** AMST 211  ENVI 211  AFR 211  SOC 211

**Secondary Cross-listing**

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**AMST 212 (S) Moving While Black**

**Cross-listings:** COMP 212  AMST 212  AFR 216  DANC 217

**Secondary Cross-listing**

Opening your apartment door, driving down the highway, taking a knee, raising a fist, sitting at the lunch counter then or sitting in a café now, these movements have historically and presently prompted fear at a minimum and in the most grave cases death for black people. Whether in the U.S. or globally, moving in the world as a black person often means being perceived as different, foreign and threatening. Crawling, dancing, running and boxing, these movements have countered fear and articulated the beauty, pride, creativity and political resistance of black people. In both cases, black movement matters and means much. While many consider movement to be just organized dance moves, this course expands students' definitions of black movement and teaches them to analyze multiple perceptions, uses, and reactions to it. “Moving while Black” offers examples of physical movement in improvised and practiced performance, quotidian movement, geographical movement across national borders and symbolic, politicized gestures. Students will investigate black movement via interdisciplinary sources that reflect various time periods and locations. Students may analyze such texts as Jacob Lawrence's visual art in *The Migration Series*, the movement of the rumba dance form between Cuba and the Democratic Republic of Congo, the Alvin Ailey American Dance Theater's "Revelations," William Pope.L's choreographed crawls, the 1995 World Rugby Cup in...
South Africa, and the 2018 case of a Kansas resident arrested while moving into his own home. Additionally, this course features an important practice element, in which students experiment with in-class movement exercises and workshops, engage with dance archives at Jacob's Pillow, interview participants of Kusika, and create and perform their own choreographies. While no previous experience in performance is required, curiosity and openness to learning through one's own body movement is expected.

**Class Format:** classes will rotate throughout the semester between seminar discussions in the classroom and performance exercises in the studio

**Requirements/Evaluation:** multiple reading/viewing responses in a movement journal, an essay closely analyzing movement; a presentation, and multiple movement-based performances including a final project with outside research and a proposal

**Prerequisites:** none

**Cross-listings:** GBST 214 ASST 214 THEA 216 AMST 213 ASIA 214 DANC 216

**Secondary Cross-listing**

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. It will orient students towards "reading" and analyzing live and mediated performances within historical, social, and political frameworks. Students will explore how socio-historical contexts influence the processes through which dance performances are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies, and will engage with issues such as nation formation, race and ethnicity, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include film screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

**Class Format:** This course will be taught in a virtual format and will be remote.

**Requirements/Evaluation:** reading responses, essays, in-class writing assignments, class participation, and group presentations.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first years and sophomores

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 214 (D2) ASST 214 (D1) THEA 216 (D1) AMST 213 (D1) ASIA 214 (D1) DANC 216 (D1)

**Difference, Power, and Equity Notes:** This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance performances and practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

Not offered current academic year
AMST 214 (F) Performance Ethnography (DPE)
Cross-listings: GBST 215 DANC 214 ANTH 215 AMST 214 THEA 215

Secondary Cross-listing
The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work
Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

Not offered current academic year

AMST 216 (F) Landscape, Place and Power
Cross-listings: AMST 216 ENVI 217

Secondary Cross-listing
How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19

TUT Section: T1  TBA  Joy A. James

AMST 219 (S) Extreme Persuasions: The Far Right in the United States and Russia (DPE) (WS)

Cross-listings: RUSS 218  AMST 219  WGSS 217

Primary Cross-listing

The purpose of this course is to explore the unexpected recent confluence of the American and Russian far-right movements, among advocates for authoritarianism in both countries who have traditionally understood the ‘other’ superpower to be an implacable enemy. How have nationalist movements in the United States come to see the Russian Federation as a vanguard for ‘whiteness’ and traditional masculinity in European identity, overturning the perception of Russia as a racial Other that was prevalent among American conservatives during the Cold War? What are the affinities between the imperial and openly patriarchal aspirations of Putinism and the goals of American religious Reconstructionism, with its interpretation of the Confederacy as a God-given model for racial separatism and gender complementarianism? We will discuss repressive historical legacies and homophobia in both countries, devoting particular attention to debates about protest art and the removal of monuments, and to movements that situate themselves in opposition to neoliberal forms of ethno-nationalism.

Requirements/Evaluation: On average, there will be 100 pages of reading per week. Over the course of the semester, students will be required to view three films, which will be discussed in class. Class participation counts for 25% of the course grade; each of the first three response papers, 15%; the term paper, 25%; the in-class presentation of the term paper, 5%.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Majors and concentrators in AMST, Russian, and Women's and Gender Studies.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 218 (D2) AMST 219 (D2) WGSS 217 (D2)

Writing Skills Notes: The written work is comprised of three response papers (5-7 pages each), a rough draft of the term paper (8-10 pages) that will be ungraded but extensively commented upon, and the term paper itself (10-15 pages). Each student to discuss their writing strategies prior to the deadlines for the essay assignments. For the essays, students may choose from among a range of prompts, or design a topic of their own.
Difference, Power, and Equity Notes: Students will use the assigned readings as points of departure for analyzing and responding to traditionalist configurations of gender and ethno-nationalism in the United States and the Russian Federation. Particular attention will be devoted to the proliferation of different conceptions of power and privilege in both countries, and to ways in which a parsing of them may facilitate an engagement with the arguments of far right movements while retaining the concept of social justice.

AMST 223 (F) Eating Empire: Asian/Pacific Islander/American Foodways and Culture (DPE)

"War is probably the single most powerful instrument of dietary change in human experience." --Sidney Mintz. Cans of spam, bars of chocolate, and bubbling pots of military stew. A motley mix of sucrose, sodium, monosodium glutamate, and spices; often overprocessed, constantly repackaged, sometimes illicitly exchanged, and daily consumed. In this course, we will take an interdisciplinary approach to exploring the historical processes, social practices, and cultural politics of food in the age of U.S. empire, mapping out reverse pathways from our palates, plates, counters, and kitchens towards the lands and seas that connect the Americas, the Pacific Islands, and Asia in the 20th and 21st centuries. We will examine food through a range of contexts and case studies, including but not limited to scholarship, (auto)ethnography, literature, film, television, advertising, social media, and blogs. We will ask: how is food entangled within histories and patterns of war, imperialism, settler colonialism, capitalism, diaspora, and migration? What does food tell us about our attachments, investments, and (dis)taste for narratives around democracy and multiculturalism, authenticity and appropriation, gentrification and privilege, "tradition" and change? Finally, how can food help us reimagine the social and political dimensions of the places we live in and nourish pathways to decolonial futures and possibilities? This will be primarily a discussion-based seminar although a minimal amount of cooking may also be required.

Requirements/Evaluation: participation (attendance, discussion, posts), reading responses, short video, fieldwork, final analytical paper/project

Prerequisites: AMST 101

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines
the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultures of these groups.

Fall 2021

SEM Section: 01  TR 2:35 pm - 3:50 pm

**AMST 225  Black Outside the U.S.**

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

**Class Format:** seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

**Requirements/Evaluation:** evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** students who have taken other AFR courses, Francophone speakers and students

**Grading:**
AMST 226 (S) Gender and the Dancing Body (DPE)

Cross-listings: WGSS 226 AMST 226 THEA 226 DANC 226

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and will also include film screenings, discussions with guest artists, and opportunities for creative projects. No previous dance experience required.

Class Format: This course will be taught in a virtual format and will be remote.

Requirements/Evaluation: class participation, reading responses, essays, in-class writing assignments, and group presentations

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10-15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 226 (D2) AMST 226 (D1) THEA 226 (D1) DANC 226 (D1)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body’s historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

Not offered current academic year
AMST 230  (S)  Contemporary American Fiction

Cross-listings:  AMST 230  ENGL 229

Secondary Cross-listing

In this course we will read and analyze a selection of fiction written between 1945 and the present, with an emphasis on proving (in the sense of testing) the three terms in the course title. Could John Cheever's "The Enormous Radio" really be contemporary? Is James Baldwin's Giovanni's Room American in the same way as Alice Munro's Dear Life? And is Michelle Tea's Black Wave fiction or something else? Along the way, we'll also ask: What forms and themes define contemporary American fiction? And why should we invest in defining the "contemporary" period at all? Other authors we will study may include: Raymond Carver, Thomas Pynchon, Toni Morrison, Renata Adler, Margaret Atwood, Lydia Davis, Chang Rae Lee, Jennifer Egan, and Colson Whitehead.

Requirements/Evaluation:  four papers totaling about 20 pages; participation in class discussions
Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit:  19
Enrollment Preferences:  first- and second-year students, and English majors who have yet to take a Gateway course

Not offered current academic year

AMST 232  Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing  (DPE)  (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one's way into Whitman's radical uncertainty. These articulations of knowing and unknowing, of telling and un-telling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

Requirements/Evaluation:  Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).
Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit:  19
Enrollment Preferences:  potential sophomore English majors have first choice, then prospective or current American Studies majors
Expected Class Size:  19
Grading:
Distributions:  (D1)  (DPE)  (WS)

Writing Skills Notes: Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will paid to drafts and revisions of essays.
Difference, Power, and Equity Notes: The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

AMST 234  (F)  Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, “Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies,” which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance.

You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

AMST 235  (S)  Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 AMST 235 GBST 235 HIST 275 ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of
(dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

AMST 236  (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Secondary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of “Black Muslim” movements represented by Malcolm X, to the current “War on Terror” era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, comics, documentaries, films, historical primary-source documents, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, midterm essay, final exam/essay

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Cross-listings: REL 228  ENGL 239  AMST 238

Secondary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn’t heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we’ll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We’ll read some Buddhist American literary texts, like Ruth Ozeki’s wondrous novel, A Tale for the Time Being. And we’ll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We’ll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we’ll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we’ll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary.
**Requirements/Evaluation:** Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 8- to 10-page essay.

**Prerequisites:** none

**Enrollment Limit:** 50

**Enrollment Preferences:** Students who preregister should fill out an expression of interest form at www.tinyurl.com/Engl239Fall2021 by May 20 (day after pre-reg closes). Preference will go to juniors and seniors, with a few seats saved for sophomores (10 max); no first years.

**AMST 239 (S) Asian/Pacific Islander/American Documentary Cinemas** (DPE)

In Asian America Through The Lens, film scholar Jun Xing contends, "documentaries have been, and remain, the predominant genre of Asian American cinema" (1998). In this course, we will launch an investigation into this statement and examine a selection of A/P/A documentaries ranging from independent and experimental film, public access television, and digital and social media, 1960s--present. We will ask: (1) how did A/P/A documentary develop as a tradition and practice in relation to mainstream media industries?, (2) how has documentary been mobilized to critique, demystify, and/or disrupt dominant scripts like Orientalism, the Yellow Peril, and the Model Minority Myth?, and (3) how do documentary makers formally negotiate the generic impulse for the "real" and "authentic" against the burden of A/P/A representation? While neither chronological nor all-encompassing in its capacity, we will do our best to situate the historical and material conditions that form and inform the works and contextualize their visual aesthetic practices and tactics of representation. We will also pay particular attention to untangling the intersectional and multidimensional categories of race/ethnicity, gender, sexuality, class, and ability that emerge from the sociohistorical processes of war, immigration, nationalism, colonialism and settler colonialism, state violence, and social movements. Finally, we will meet and engage with current artists, filmmakers, and organizers in order to gain insight into development, production, distribution, and reception.

**Requirements/Evaluation:** weekly reading responses, a midterm paper, final creative project and paper

**Prerequisites:** AMST 101/201 Intro to American Studies

**AMST 240 (F) Latina/o Language Politics: Hybrid Voices**

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x...
identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching, bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Requirements/Evaluation: participation, two essays, final take-home examination

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Cross-listings: COMP 242 ENGL 250 AMST 242

Secondary Cross-listing
This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of “home” into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 242 (D1) ENGL 250 (D1) AMST 242 (D2)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

AMST 243 (S) Asian/American and Black Literary and Cultural Thought

Cross-listings: AMST 243 AFR 243

Primary Cross-listing

One durable legacy of white settler colonialism has been to its divide-and-conquer management of minority populations--an amazingly effective strategy still widely practiced in a variety of forms today. While Asian Americans have been deemed “model minorities” in contrast to “unmodel” minorities--namely, African Americans--and racial minorities have been pitted against one another in the oppression Olympics and on the issue of affirmative action, there has, in fact, been a long history of political, literary, and cultural thought that have joined blacks and Asian/Asian Americans, from W.E.B. Du Bois to current ideas about digital possibilities (and constraints). In this course we will examine the theory, political writings, art, music and literature that sprang from and attended the early Marxist-Communist fight for universal brotherhood; movements against colonialism, capitalism, and the Vietnam War; Yellow Power and Black Power; and topics such as black and Asian diasporas, Afro-futurism, multiculturalism, "Afro-pessimism", racial melancholia, and digital futurities.

Requirements/Evaluation: one shorter paper (4-6 pages), midterm; final paper/project (10-12 pages), response papers and/or posts on GLOW; participation (class discussion and attendance)

Prerequisites: none

Enrollment Limit: 15

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging into the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

**Requirements/Evaluation:** two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

AMST 248 (F) Black Women in African American Literature and Culture

Cross-listings: AMST 248 ENGL 248 WGSS 258

Secondary Cross-listing
This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the “tragic mulatto,” in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins’s “Mammies, Matriarchs, and Other Controlling Images”), a choreopoem (Ntozake Shange’s For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf), and socio-political propaganda (the “Black is Beautiful” movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series Insecure.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages; final project on the hashtag #blackgirlmagic

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Cross-listings: THEA 246 GBST 246 AMST 249

Secondary Cross-listing
This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: sophomores, juniors, and seniors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 246 (D1) GBST 246 (D2) AMST 249 (D2)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

AMST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: HIST 254 AMST 254 LEAD 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus’s arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the “Columbian Exchange,” and contended with Euro-colonial projects of “discovery” and colonization. Indigenous nations’ multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors—intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others—and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

Class Format: Remote class. Class will blend short pre-recorded lectures with weekly Zoom discussion sections/seminar format, plus time for virtual one-on-one conversations with the instructor.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, (virtual) museum/archives exercise, final essay

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: History or American Studies majors, followed by first- and second-year students
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 254 (D2) AMST 254 (D2) LEAD 254 (D2)

Difference, Power, and Equity Notes: This course intensively explores Native American/Indigenous North American histories, experiences, and forms of critical and creative expression, as well as responses to and engagements with Euro-American settler colonialism. It guides students into methodologies central to Native American and Indigenous Studies (NAIS), and gives opportunities for oral and written reflections on NAIS approaches to historical themes and sources, as well as decolonizing methodologies more broadly.
AMST 256  (F) Social Justice Traditions: 1960s to #Black Lives Matter  (DPE)

Cross-listings:  AFR 257  AMST 256  HIST 256

Primary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 257 (D2) AMST 256 (D2) HIST 256 (D2)

Difference, Power, and Equity Notes:  The class focuses on struggles for rights, recognition, and redistribution of resources of people of color, women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. We discuss how movements borrow and adapt tactics, slogans, and ide of justice from other movements.

Cross-listings:  AMST 260  WGSS 262

Primary Cross-listing

Indigenous women, Two Spirit and trans people have always stood on the frontlines of decolonization struggles in the Americas, from treaty negotiations to self defense against settler invasion, to the Standing Rock Sioux struggle against the Dakota Access Pipeline, to creating independent databases and mutual support networks amongst the loved ones of Missing and Murdered Indigenous Women, Girls, Trans and Two Spirit people. This course maps out some of the intellectual and political interventions of Indigenous feminists in analyzing and struggling against genocide, heteropatriarchy, conquest and racial capitalism in settler states like the US and Canada. This course will focus on how Indigenous women, Two Spirit and trans people have analyzed and struggled against the imposition of colonial constructs of gender and sexuality that mark Indigenous lives and lands as sites of extraction. It will examine how carceral regimes of control produced by the intertwined histories of conquest and Transatlantic slavery have been imposed upon Indigenous lives through the child protection system and the prison industrial complex. Students will be invited to consider how Indigenous feminist practices 'make a future' (Brant 1981) against and beyond the settler state. This course aims to familiarize students with historical and contemporary Indigenous feminist works, as well as provide an overview of Indigenous feminist political formations, poetry, fiction, and making practices. Pedagogically, this course will also facilitate the development and sharpening of skills in social analysis, writing and argumentation.

Class Format: Hybrid online/in-person

Requirements/Evaluation: Three one page reading responses, 30%; One two-page critical peer response 10%; One Final paper, 50%; Course participation and attendance 10%

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: American Studies majors or potential majors have first preference, WGSS majors have next priority.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 260  (D2) WGSS 262  (D2)

Difference, Power, and Equity Notes: This course has as its core mission -- both in subject matter and in pedagogical approaches -- the exploration of difference, power and equity.

Attributes: AMST Critical and Cultural Theory Electives

AMST 264  (F)  American Art and Architecture, 1600 to Present
Cross-listings:  AMST 264  ARTH 264

Secondary Cross-listing

American art is often looked at as a provincial version of the real thing--i.e., European art--and found wanting. This course examines American architecture, painting, and sculpture on its own terms, in the light of the social, ideological and economic forces that shaped it. Special attention will be
paid to such themes as the Puritan legacy and attitudes toward art; the making of art in a commercial society; and the tension between the ideal and the real in American works of art.

Requirements/Evaluation: 15-page research paper (divided into an annotated bibliography, first draft and revised draft); weekly study questions on the readings; final 15-minute oral exam

Enrollment Limit: 60

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

AMST 265  (S) Pop Art  (WS)

Cross-listings: AMST 265 ARTH 265

Secondary Cross-listing

The use of commercial and mass media imagery in art became recognized as an international phenomenon in the early 1960s. Items such as comic strips, advertising, movie stills, television programs, soup cans, "superstars," and a variety of other accessible and commonplace objects inspired the subject matter, form, and technique. This course will critically examine the history and legacy of Pop Art by focusing on its social and aesthetic contexts. An important component of the course involves developing skills in analyzing visual images, comparing them with other forms, and relating them to their historical context.

Requirements/Evaluation: one final research paper (15 pages) written in stages over the semester including revisions; bibliographic research, writing exercises, and oral presentations

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

AMST 267  (F) The Roaring Twenties and the Rough Thirties

Cross-listings: AMST 267 HIST 266

Secondary Cross-listing

This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America's evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.
Class Format: This course will be taught remotely and will feature both asynchronous and synchronous instruction. Virtual course meetings will revolve around synchronous discussion and remote learners will be expected to attend class regularly and participate actively in each session held via Zoom (or a similar platform).

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

AMST 272 (S) American Postmodern Fiction

Cross-listings: AMST 272 ENGL 272

Secondary Cross-listing

American fiction took a turn at World War II; the simplest way to name the turn is from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness: postmodern books tend to be about themselves, even when they are most historical or realistic. Already a paradox emerges: why would World War II make narratives more self-reflexive? The first book in the course, and the best for approaching this paradox, is Heller's *Catch-22*. It also serves as a good introduction to the unlikely merging in American fiction of high European post-structuralist postmodernism and low American punk postmodernism. Subsequent books in the course will probably include Pynchon's *The Crying of Lot 49*, Morrison's *Beloved*, DeLillo's *White Noise*, Carver's *What We Talk About When We Talk About Love*, Diaz's *The Brief Wondrous Life Of Oscar Wao*, and Whitehead's *The Underground Railroad*.

Requirements/Evaluation: three papers of increasing length and weight, contributions to class discussion

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: first-year students who have placed out of 100-level English and sophomores considering the major; then Junior and Senior English majors

AMST 275 (S) American Drama: Hidden Knowledge

Cross-listings: THEA 275 AMST 275 ENGL 224

Secondary Cross-listing

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might
This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what we can learn in particular from American drama about a national relationship to honesty and its opposites. For Fall 2020, the tutorial will be conducted primarily online. Depending on enrollments, we may divide into groups with three students, instead of the traditional two-student tutorial format.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and English majors

AMST 276 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: ENGL 275 AFR 275 AMST 276

Secondary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Daley Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 275 (D1) AFR 275 (D1) AMST 276 (D2)

Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.
AMST 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing
In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AMST 284 (S) Introduction to Asian American History (DPE)

Cross-listings: ASIA 284 HIST 284 ASST 284 AMST 284

Secondary Cross-listing
This course covers the immigration of Asian to the U.S. from the 1850s to the present and the lives of both immigrants and their descendants. Possible topics are the Chinese Exclusion Act, the incarceration of Japanese Americans during WWII and the arrival of Vietnamese to the U.S. after the war in Viet Nam.

Class Format: discussion

Requirements/Evaluation: a series of short essays and a final oral history/family history

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 284 (D2) HIST 284 (D2) ASST 284 (D2) AMST 284 (D2)

Difference, Power, and Equity Notes: This course will focus on the legal barriers to Asian American immigration and citizenship that reveal the racial, class, gender, and religious biases against people from that part of the world. By examining these issues, we will see an unequal balance of power as well as the various ways Asian immigrants resisted American immigration laws and would eventually build communities in many parts of the US.
AMST 300  (F)  Re/Generations I: Memory Against Forgetting and the Global American Empire  (DPE)

Cross-listings: COMP 357  ENGL 300  AMST 300

Primary Cross-listing

This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. As such, the courses are remote and may be taken in sequence or autonomously. In this first part, we focus on authors charting the lives and afterlives of chattel slavery, settler colonialism, genocide, war, and the expansion of the global American empire, from the 19th through 20th centuries. How do these authors remediate the critical (il)legibility of personhood and place, community and nation? What myths must be dispelled and/or rewritten? What structural elements are deployed to tackle the obstacles of hegemonic power and historical amnesia, and how do these authors re/generate "what remains of lost histories and histories of loss" (Eng and Kazanjian)? Texts to be considered may include: Narrative of the Life of Frederick Douglass, an American Slave; Hawaii's Story by Hawaii's Queen (Lili'uokalani); Notes of a Native Son (James Baldwin); Borderlands/La Frontera (Gloria Anzaldúa); Dictee (Theresa Hak Kyung Cha).

Class Format: Remote

Requirements/Evaluation: weekly reading responses, midterm and final papers

Prerequisites: American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: American Studies majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 357 (D1) ENGL 300 (D2) AMST 300 (D2)

Difference, Power, and Equity Notes: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

Attributes: AMST Arts in Context Electives

AMST 301  (S)  Theories and Methods in American Studies (Junior Seminar)

This course aims to provide a "how to" of American Studies from an integrative, multiracial, and socio-cultural perspective. Taking American culture as a site for testing classic and contemporary theories about how cultures work, the Junior Seminar in American Studies serves as an introduction to resources and techniques for interdisciplinary research. Students will be exposed to and experiment with a wide range of current theoretical and methodological approaches employed in American Studies and contributing disciplinary fields, and in the process gain a working competence in all four tracks of the major (Space and Place; Comparative Studies in Race, Ethnicity and Diaspora; Arts in Context; and Critical and Cultural Theory).

The goal of the course is not only for students to develop knowledge of main currents in the field of American Studies but also to become practitioners through a series of assignments that will permit students to exercise their newfound skills. Students will thus, for instance, develop rhetorical analyses, gather ethnographic data, and "read" assorted spaces and buildings, as the class explores such problems or topics as national narratives, ethnoracial formations, the American prison system, and the circulation of commodities.

Class Format: discussion

Requirements/Evaluation: Class participation; short writing assignments (3 to 5 pages in length) and a final paper or multimedia project: total of 20 pp; one oral presentation.

Prerequisites: AMST 101/201 Intro to American Studies, junior or senior standing, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: juniors majoring in American Studies
AMST 302  (F)  Environmental Planning Workshop: Community-Based Experience

Cross-listings:  AMST 302  ENVI 302

Secondary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students’ academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation:  Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites:  ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit:  16
Enrollment Preferences:  Environmental Studies majors and concentrators

AMST 303  (S)  Feminist Disability Studies: Bodyminds in Place and Space  (DPE)

Cross-listings:  WGSS 309  AMST 303

Secondary Cross-listing

In this course we will engage anti-racist feminist theory, disability (or ‘crip’) theory, and human geography to think critically about disability. We will
draw on critical geographies of disability to understand the built environment and institutional design; geographic scales of the body and the bodymind; spaces of the home and institutions; and immobility and spatial access. We will also consider how disability is shaped by (and shapes) practices of care and mutual aid; experiences of embodiment and impairment; and structures of vulnerability and agency. The course will trace, historically, how ableism has been produced through slavery, colonization, surveillance, and incarceration as well as through movements like eugenics and white liberal feminism. The course will also analyze disability's construction through medicalized notions of wellness, illness, pathology, and cure. Throughout the course, we will consider disability as intersecting with gender, race and ethnicity, queerness, trans*ness, fatness, class, nationality, and citizenship. Most centrally, we will ask: What is the spatiality of dis/ability, and how can space be occupied and reappropriated for radically inclusive uses? How can we understand both normality and deviance as socially constructed concepts that nonetheless have real, and uneven, implications for people's lives?

Class Format: This class will be taught online only.

Requirements/Evaluation: Student participation; two short (2-pg) reflection papers; two longer (4-5-pg) papers; and a final (12-15 pg) research paper

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: WGSS and AMST majors; permission of instructor

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 309 (D2) AMST 303 (D2)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the political, social, and ideological constructions and theorizations of difference, power, and equity. The course explores the ways in which disability is mutually constructed with other axes of identity and difference, and how different groups of people have defined (and redefined) disability to meet various political aims.

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

AMST 305 (S) The Gay Menagerie: Gay Male Subcultures (DPE)

Cross-listings: WGSS 305 ANTH 305 AMST 305 THEA 304

Secondary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference."

AMST 307  (F) Experimental African American Poetry
Cross-listings: AMST 307 ENGL 327 AFR 301

Primary Cross-listing
Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Requirements/Evaluation: two papers (6-8 pages and 8-10 pages), short response papers, oral presentation, and class participation
Prerequisites: none, though at least one previous literature course preferred
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

AMST 309  (F)  Womanist/Black Feminist Thought

Cross-listings: WGSS 310  AFR 310  AMST 309  REL 310

Secondary Cross-listing

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

Class Format: discussion

Requirements/Evaluation: class participation, three short response papers, and the completion of an original research paper or project

Secondary Cross-listing

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American
We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Judith Butler, as we analyze the kinds of performances that brought together feminist poetry and political activism. We spend some time in the archives, analyzing documents from the period, including original publications of poetry chapbooks often published by the period’s many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to “hear,” not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Class Format: I anticipate that this class will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements.

Requirements/Evaluation: two short analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), short presentation, longer final researched paper (10-12 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 310 (D2) WGSS 330 (D2) ENGL 302 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, critical summaries of feminist criticism, two four-to-five-page graded papers, one creative assignment, a longer, final researched paper (10-12 pages), written in stages over a period of several weeks with feedback at each stage. Critical feedback on written assignments a week prior to due date through conferences and Google Docs and on graded assignments within one week.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

AMST 311 Four Poets: Gwendolyn Brooks, Frank O'Hara, Sylvia Plath, and Amiri Baraka

The study of literature often relies on seemingly “objective” labels to sort and group writers. These four major American poets from the last century were often segregated into different categories: Gwendolyn Brooks (1917-2000) and Amiri Baraka (1934-2014) clumped together as black poets; Sylvia Plath (1932-1963) labelled a “Confessional Poet” and/or taught as a female poet but not a “white poet”; Frank O’Hara (1926-1966), designated a “New York School” poet but not a “white poet” or “male poet.” In looking closely at the poetry of these four writers, whose work is usually not taught side by side, we will ask questions about the assumptions implicit in the concepts and categories of American (and English-language) poetics and how literary history usually gets written. For example, who is the presumed “universal” poetic speaker? Who is the assumed reader? Do our attitudes about raced and gendered bodies influence how we read raced and gendered poets? Is a queer poet read with the same particularity as a black poet?

Requirements/Evaluation: Two short papers (4-5 pp.) = 25%; One final paper (8-10 pp.) = 50%; Two short response papers = 15%; Participation = 10%

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors

Expected Class Size: 15
AMST 313  (S)  Gender, Race, and the Power of Personal Aesthetics

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina/x," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: This remotely taught, synchronous course follows a discussion format.

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final oral exam.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

AMST 315  (S)  Blackness 2.0: Race, Film and New Technologies

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of 'new' technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the 'real' vs 'virtual' world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Requirements/Evaluation: participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

AMST 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: AFR 317 COMP 319 AMST 317 DANC 317 ENGL 317 THEA 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Prerequisites: none; open to all

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

AMST 321 (F) Unsettled Futures: Time, Crisis, and Science Fiction from the Margins (DPE)

Cross-listings: AMST 321 STS 321

Primary Cross-listing

Societies around the globe are now confronting a triple crisis that threatens not only political orders but also the very existence of certain forms of life: (1) financial collapse(s) that have increased the awareness and severity of mass inequality, (2) climate change and mass extinctions, and (3) the rise of white supremacy and ethno-nationalisms that threaten BIPOC lives and representative democracies. These material and political challenges have depleted many of the cultural resources that enable imagining non-apocalyptic futures. Yet, these crises are not novel. Many groups in the periphery—geo-economic, cultural—were and are already living through the uneven distribution of the apocalypse. Science fiction (SF) has emerged as a privileged symbolic field for the expression of hopes and anxieties that drive both culture and tech industries. Whether seen as a form of productive pessimism or liberatory theory, SF from the margins is deployed as a political tool for enacting change in the present. In this course, we will survey the history of SF as a variable and theoretical orientation constituted through the unfolding of uneven global encounters. We will analyze SF in the Cold War, Anthropocene, decolonization movements, and postcolonial and Indigenous landscapes, reading major works in SF and science and technology studies (STS) that address the politics of crisis, apocalypsis, and global futures. In addition to novels and short stories, this course will incorporate film, graphic novels, music videos, video games, and other science fiction subgenres.

Requirements/Evaluation: Class discussion, approximately 10 pages of creative writing, 5 page analysis paper of your classmate's creative writing, final paper or project (5-8 page paper or equivalent)

Enrollment Limit: 15
Enrollment Preferences: Students who have taken American Studies 101 and/or Science and Technology Studies 101

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 321 (D2) STS 321 (D2)

Difference, Power, and Equity Notes: This course examines the racial, ethnic, gendered, and sexed dimensions of science fiction and traces how marginalized people have imagined the future amidst an atemporal and unfolding apocalypse. Students will work with postcolonial, Indigenous, queer, and critical race media concerning the future, and will gain the skills needed to read political orders and crises through the lens of the margin.

AMST 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322 ENGL 356 AFR 323 AMST 323 ARTH 223

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis' March and Ebony Flowers' Hot Comb, this course illustrates and critiques multiple ways the graphic novel comingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. Although it is a remote course this year, this class may still feature Object Lab participation, film screenings, and collaborations with guest speakers.

Class Format: This is a remote class that will primarily feature synchronous sessions with some asynchronous sessions.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a
final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

AMST 324 (S) Indigenous Women's History (DPE) (WS)

Cross-listings: WGSS 324 AMST 324 HIST 362

Primary Cross-listing

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women's lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and artists.

Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated bibliography, 15-page final paper and presentation)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies, History, and Women's Studies, Gender and Sexuality majors

AMST 325 (F) Asian/African American Cultural and Political Theory

Cross-listings: PSCI 333 AFR 344 AMST 325

Primary Cross-listing

Contrasted as "model minorities" or "incorrigible minorities" Asian Americans and African Americans have been pitted against one another in social
standing and political objectives. However, throughout the twentieth century, African/Asian solidarity and alliances existed in political movements and literary and cultural productions. From Ho Chi Minh's anti-lynching writing, the founding conference of the WIDF (Women's International Democratic Federation) in China in 1945, through the Bandung Conference, coalitions against U.S. wars in Southeast Asia, and alignments with Chinese anti-imperialist endeavors, black and Asian peoples have joined in international political formations. Contributions to theory include the writings and activism of Langston Hughes, W.E.B. Du Bois, Richard Wright, Robert Williams, Yuri Kochiyama, Grace Lee and Jimmy Boggs, Ishmael Reed, and Amiri Baraka; films of Bruce Lee; music of Fred Ho; revolutionary praxis of Mao Tse Tung's *Little Red Book* and his writings on art and society; the Marxism of the Black Panther Party; the Afro-futurism of Sun Ra and Samuel Delany; and contemporary "Afro-pessimism." Such cultural works depict futurities and possibilities for Black and Asian diasporas. This seminar examines theory, politics, literature, film, and music produced from and linked to twentieth-century movements against capitalism, racism, colonialism, and imperial wars to think through how Black and Yellow Power have shaped solidarity to challenge white supremacy and racial capitalism. **Requirements:** One midterm paper (5-6 pp.) = 30%; final paper/project (10-12 pp.) with a creative option = 50%; short response paper and GLOW posts = 10%; participation (attendance and class discussion) = 10% **Course cap:** 19 **Priority given to AMST majors, Africana concentrators**

**AMST 326 (F) Feminist and Queer Performance at the Limit of Action** (DPE)

**Cross-listings:** THEA 322 AMST 326 WGSS 321 AFR 328

**Secondary Cross-listing**

What counts as feminist and queer activism? This course challenges what we dominantly understand as activism—key to the emergence of ethnic studies and feminist and queer theory. Moving away from political actions centered in these fields, such as strikes, protests, and boycotts, this course will turn to visual and performance art works by artists of color, who consider other forms of action that are not overtly visible, resistant, oppositional, agentive, militant, loud, liberatory, and documentable. Each week, we will examine a performance at the limit of action, including silence, sexual abjection, concealment, melancholia, and waiting, alongside issues related to race, gender, sexuality, labor, and migration among others. How might we approach and reconcile with performances that once again reify notions of racialized and gendered bodies as apolitical, passive, submissive, and compliant? Drawing on scholarship within black and women of color feminist criticism, queer of color critique, critical ethnic studies, and performance studies, this course will attune students to the role of aesthetics to interrogate and expand what we typically conceive of as activism, resistance, power, and survival from racialized, feminized, and queer positions.

**Requirements/Evaluation:** In-class discussion, short weekly reading posts, class presentation, final paper/project

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion

Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper

Who is considered the dominant subject of labor? This course offers an overview of queer, women of color feminist, decolonial, and black and critical ethnic studies critiques of orthodox Marxism. Starting with core texts from the Marxist tradition, we will explore a range of social positions and forms of labor that complicate Marx's emphasis on the white male industrial worker. Each unit, we will study key scholarship that centers reproduction, slavery, care and domestic work, indentured servitude, sex work, and low wage flexible labor, to name a few, alongside queer and feminist modes of performance that respond to and/or provide strategies to live and survive under racial capitalism. We will discuss seminal works by theorists, including Karl Marx, Luce Irigaray, Cedric Robinson, Jennifer Morgan, Hortense Spillers, Lisa Lowe, Gayatri Chakravorty Spivak, Dorothy Roberts, Angela Davis, José Esteban Muñoz, and Leo Bersani, in tandem with performances, such as paintings, performance art, poetry, protests, photography, prints, music, and sculptures. This course will equip students with a critical understanding of the ways racial capitalism has centrally relied upon the mass capture and recruitment of racialized and gendered labor in and beyond the U.S. and how, through performance, life under these conditions have been reimagined.

Requirements/Evaluation: In-class discussion, short weekly reading posts, class presentation, final paper
Prerequisites: None

Enrollment Limit: 12

AMST 330 (Anti-)Imperialism, Race, and the Archive (DPE) (WS)

What is U.S. imperialism? How are the social relations of racial capitalism important to U.S. imperialism? How have anti-imperial, anti-racist, and anti-capitalist struggles taken shape within, against, and beyond the U.S. nation-state, and how have these struggles shaped the U.S. nation-state itself? Finally, what kind of anti-imperial activist hermeneutics does American Studies offer and how can they be strengthened to reckon with the specific conditions of the U.S. imperial present? Anchored in these questions, this course seeks to introduce students to the history of U.S. imperialism. It does so beyond the traditional understanding of empire as a one-way agglomerating imposition of power in distant areas, and instead accounts for the co-constitution of reigning state-capitalist orders and global processes of spatial and social differentiation. Following such an approach to the history of U.S. imperialism, this course is organized around four time periods: 1770s to 1890s; 1890s to 1930s; 1930s to 1980s; and 1980s to the present. Across each period, we will attend to processes of U.S. imperial expansion, capital accumulation, and racial domination, and resistance to these processes. We will do so using secondary sources and a wide range of primary sources, including published fiction, legal documents, newspaper articles, speeches, films, and photos. By the end of this course, students should be able to detail a genealogy of the U.S. imperial present that accounts for: the significance of imperial and inter-imperial relations in the formation of U.S. national culture, institutions, and public areas such as law and public policy; how U.S. territorial colonialization has underpinned the development of U.S. imperial infrastructure, the imperial state form, and imperial culture; and how U.S. territorial and extraterritorial sovereignty exist in perpetual reaction to the primary claims of Indigenous peoples and other threats to reigning state-capitalist orders.

Requirements/Evaluation: Evaluation will be based on the following assessments: Class Participation: 25%; Weekly Response (350-500 words): 25%; Essay 1--First submission (5 pgs.): 10%; Essay 1--Revision (5 pgs.): 10%; Essay 2 (5 pgs.): 15%; Essay 3 (5 pgs.): 15%

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors,

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

AMST 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: AFR 347 AMST 332 ENVI 332

Primary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

**AMST 333 (S) An American Family and "Reality" Television (WS)**

**Cross-listings:** ARTH 310  WGSS 312  AMST 333

**Secondary Cross-listing**

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Class Format:** Remote seminar. The course will feature synchronous online class meetings.

**Requirements/Evaluation:** class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper. Student presentations will be recorded offline and posted to GLOW.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** junior Art majors, followed by senior majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 310 (D1)  WGSS 312 (D1)  AMST 333 (D2)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**AMST 334 (S) Sexual Economies (DPE)**

**Cross-listings:** ANTH 301  WGSS 301  AMST 334

**Secondary Cross-listing**

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates
about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

Requirements/Evaluation: midterm essay exam, short quizzes, participation, Marco Polo video chat posts

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: based on statement of interest

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 301 (D2) WGSS 301 (D2) AMST 334 (D2)

Difference, Power, and Equity Notes: We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

AMST 335 (S) Uncovering Williams

Cross-listings: AMST 335 ARTH 335

Primary Cross-listing

Sparked by current controversies around visual representations at Williams, this course—a joint effort of the Williams College Museum of Art and the American Studies Program—interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college's relationship to slavery and Abolitionism.

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) and bibliography

Prerequisites: sophomore standing or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: AMST majors

AMST 337 (S) Queer in the City (DPE)
Secondary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both ‘Thin’ and ‘Thick’ descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

AMST 338 (S) Literature of the American Renaissance

Secondary Cross-listing

The decades leading up to the Civil War have often been described as the “American Renaissance” because of the breathtaking explosion of literary achievements in that period (including Walden; Moby-Dick; The Scarlet Letter; Narrative of the Life of Frederick Douglass; and the groundbreaking poetry of Walt Whitman and Emily Dickinson). For the first time, American writers were broadly the equal or more of their European counterparts. We will explore the distinctive character of this achievement, paying close attention to the transformational power of language, and the promises it offered to refugre personal and political identity in a time when the American experiment approached the brink of collapse.

Class Format: discussion

Requirements/Evaluation: in addition to actively participating in class, students will be required to submit very short reading entries on Glow, and to write two comparative essays (of 8 and 12 pages).

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors; American Studies majors; Comparative Literature majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

AMST 339 (S) Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality (WS)

Cross-listings: LATS 338 AMST 339 WGSS 338

Secondary Cross-listing
In this class we will investigate a wide variety of Latina/o/x popular musical forms, with particular attention to issues of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o/x popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are hybrid Latina/o/x identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 340 (S) Elizabeth Bishop in the Americas (DPE)

Cross-listings: ENGL 340 AMST 340 WGSS 340 COMP 342

Secondary Cross-listing
Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home*"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: three hours per week, in addition to small group discussion and archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English, Comparative Literature, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 340 (D1) AMST 340 (D2) WGSS 340 (D2) COMP 342 (D1)

Difference, Power, and Equity Notes: This course employs critical tools (case studies, translation theory, archival research, poetics, close reading, comparative approaches, postcolonial theory) to help students question and articulate the way that social injustice, such as racial inequality, poverty, and colonial conquest, shapes national and individual identities. Students will learn how to articulate how our aesthetic and cultural products also serve to shape these identities but also can challenge the dominant power structures.

AMST 342  (S)  Race, Development, and Food Sovereignty  (DPE)  (WS)

Cross-listings: AFR 349  ENVI 349  AMST 342

Primary Cross-listing

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

AMST 344  (F)  Pacific-New England Material Histories  (DPE)

Cross-listings: AMST 344  ARTH 344

Secondary Cross-listing
This course looks at the indigenous, colonial, maritime, and missionary histories that connect New England to island nations in the Pacific in the eighteenth and nineteenth centuries. Rather than thinking of Hawai‘i and Massachusetts merely as opposite ends of United States colonial expansion, we will focus on the heterogenous cast of historical actors—from queens to whalers—who interacted in these places and generated new forms in architecture, painting, printmaking, the decorative arts, textiles, and publishing. Particular attention will be paid to the politics of Hawaiian visual culture and the histories of Williams alumni in Hawai‘i, but the readings, discussions, and student papers will not be limited exclusively to those subjects. Our time together will be split between lecture and class discussion, with some meetings devoted to archival research and object-based case studies in collections on campus. As a group, we will establish a corpus of objects and conceptual frameworks for analyzing what "Pacific-New England" means and how that might challenge our existing assumptions about regional art histories. Finally, we will experiment as a class with the best ways to convey what we’ve learned through our collective inquiry—whether in different forms of writing or by workingshop more creative approaches.

Requirements/Evaluation: participation in discussion, two short papers, final research project, and presentation; note: one required field trip, scheduled in consultation with the students

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

**AMST 347 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience**

**Cross-listings:** AMST 347 ENVI 348

**Secondary Cross-listing**

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

**Requirements/Evaluation:** one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

**Prerequisites:** ENVI 101 or instructor permission

**Enrollment Limit:** none

**Enrollment Preferences:** ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

*This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

AMST 349  (F)  The Politics of Algorithms

Cross-listings: STS 349  AMST 349  PSCI 331

Secondary Cross-listing

Every day, you interact with or through computer algorithms. In ways often obscure to users, they structure communication or conduct in social media, education, healthcare, shopping, entertainment, dating, urban planning, policing, criminal sentencing, political campaigns, government regulation, and war. Moving from the emergence of cybernetics during World War II through such contemporary examples as facial recognition software, this seminar approaches algorithms as complex technological artifacts that have social histories and political effects. Asking how algorithms are political and what that tells us about politics today (particularly in the U.S.), we will consider how their design expresses forms of power and their deployment shapes ways of living. What behaviors do different algorithms solicit, reward, discourage, or stigmatize? What kinds of selfhood and relationships do they promote or thwart? How do various algorithms influence political partisanship and beliefs and intersect with existing hierarchies of race, class, gender, and sexuality? When inequities are built into a design, can that be addressed by rooting out "bias," or do such efforts miss something more inherent in the kinds of artifacts algorithms are or what they can be in a capitalist economy? Might developments in artificial intelligence transform our sense of the human or even threaten the species? Many of the seminar’s themes, including democracy, power, inequality, judgment, deliberation, publicity, subjectivity, and agency, are central to political theory, but readings and course materials will also be drawn from such fields as media theory, surveillance studies, sociology, American studies, critical data science, film, and contemporary art. The course neither requires nor teaches any computer science skills.

Requirements/Evaluation: Class attendance and participation, regular short posts or exercises, and either three eight-page essays or one 8-page essay and one longer final paper.
**Prerequisites:** At least one course in political, cultural, or social theory or the critical study of science and technology, or permission of the instructor. Not open to first-year students.

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science and American Studies majors and STS concentrators; then qualified students from all other majors welcome, space permitting.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**AMST 350  (F)  Black Masculinities  (DPE)**

**Cross-listings:** AMST 350  ENGL 375  AFR 331  WGSS 318

**Secondary Cross-listing**

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men’s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

**Requirements/Evaluation:** students will be responsible for 2 short papers and a final project

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** WGSS Majors will get preference, then Juniors and Seniors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

Cross-listings: ANTH 350  AMST 351  WGSS 350
Secondary Cross-listing
This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

Requirements/Evaluation: IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures
Prerequisites: None; prior coursework in WGSS may be helpful, but is not required
Enrollment Limit: 15
Enrollment Preferences: WGSS majors; short statements of interest will be solicited in the event of overenrollment
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 350 (D2) AMST 351 (D2) WGSS 350 (D2)

Difference, Power, and Equity Notes: This course examines the centrality of power in communication as broken down along axes such as sex, gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

AMST 352 (S) Global Health in the Transpacific (DPE)
Cross-listings: AMST 352  STS 311  ASIA 352
Secondary Cross-listing
East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia's claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees' resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper
Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.
Enrollment Limit: 12
Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 352 (D2) STS 311 (D2) ASIA 352 (D2)

Difference, Power, and Equity Notes: This course examines the inequalities that shape global health interventions.

AMST 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America  (DPE)

Cross-listings: STS 353 AMST 353

Primary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 353 (D2) AMST 353 (D2)

Difference, Power, and Equity Notes: This course will explore how settler sciences have been used as a technology of difference making, dispossession, and genocide in United States history. It will also provide students a theoretical toolkit and historical perspective by which they can grapple with the fact that power structures like settler technoscience can be a source of both colonization and liberation.

AMST 355 (F) Creating Whiteness: Racial Taxonomies in ‘American’ Art, 1650-1900

Cross-listings: AMST 355 ARTH 515

Secondary Cross-listing
“What is race?” “How is a race created?” “What are the racial histories and subsequent political implications of ‘American’ art?” These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family’s images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Requirements/Evaluation: research paper, presentations

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

AMST 356 (S) Settler Colonialism, Care, Kinship and Social Reproduction (DPE) (WS)

Cross-listings: AFR 359 AMST 356

Primary Cross-listing

AMST 356 Settler Colonialism, Care, Kinship and Social Reproduction Contemporary understandings of family, kinship and care were shaped through the invasion of the Indigenous Americas and Transatlantic slavery. Indigenous nations came to be understood by anthropologists and settler states as governed by a logic of kinship, and this understanding was weaponized by the US and Canada to target Indigenous governance for elimination. At the same time, dominant kinship narratives were defined by the property claims made upon Black lives under settler law and by the state-enforced maternal inheritance of racialized bondage. This course will analyze kinship and care as both mechanisms of state control of Indigenous and Black lives and lands, and as sites of insurgency against colonial states. We will analyze how Canada and the U.S. have deployed Child Protective Services, reproductive regulation, Boarding Schools, plantation economies, land dispossession, and the prison industrial complex to target Indigenous, Black, Brown, working class and trans/queer support systems. Applying methodologies and theoretical interventions in Indigenous studies, Black studies and critical political economy to primary texts to US and Canadian law, autobiography, and anthropology, our focus will move from 17th and 18th century British colonial law to autobiographical accounts of slavery and emancipation, to Canada’s 19th century Indian Act, to mid-20th century social scientific debates on Black and Indigenous families. We will end by thinking about insurgent practices of organizing care and kinship outside and against the confines of whiteness, capital and the state. The pedagogical aims of the course are to illustrate how kinship narratives anchor settler colonial nationhood and property regimes, and to facilitate the development of skills in writing and independent research, primary source analysis, and critical analysis of law, anthropology, and policy.

Requirements/Evaluation: Class Participation and three critical response papers at three to five pages each (each receiving critical feedback from professor); one response paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process. One final paper (15-20 pages) and one roundtable presentation based on the final paper.

Prerequisites: Prerequisites: one or more of the following courses: AMST 146,Introduction to Indigenous Studies or AFR 200, Introduction to Africana Studies; HIST 254 / AMST 254(F),Sovereignty, Resistance, and Resilience: Native American Histories to 1865 or AMST 204:

Enrollment Limit: 19

Enrollment Preferences: AMST majors have first priority, AFRICANA majors have second priority.

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option
This course satisfies EITHER the Space and Place elective OR the Comparative Studies in Race, Ethnicity and Diaspora elective.

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 357 (S) Re/Generations II: Contemporary Experiments in Memory, Trauma, and Self (DPE)

This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. As such, the courses are remote and may be taken in sequence or autonomously. In this second part, we convene on a selection from our historical present and explore how categories of identity and experience, memory and history are being constructed and deconstructed, reimagined and remade anew. We will ask: how do these authors narrate the overlapping cycles of loss, pain, grief, survival, resilience, and resistance in the face of historical violence? What possibilities for (individual and collective) healing can exist in and beyond the world as we know it? What does it even mean to have or to not have, to find, to lose, to have stolen, to dissolve, and/or to recover a self in a besieged American present-future tense? Texts to be considered may include: How to Write an Autobiographical Novel (Alexander Chee); When They Call You A Terrorist: A Black Lives Matter Memoir (Patrisse Khan-Cullors and asha bandele); Heart Berries (Terese Marie Mailhot); Know My Name (Chanel Miller); On Earth We're Briefly Gorgeous (Ocean Vuong).

Class Format: Remote

Requirements/Evaluation: weekly reading responses, midterm and final papers

Prerequisites: American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: American Studies Majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

AMST 359 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers (DPE)

Cross-listings: ENGL 357 AFR 351 AMST 359

Primary Cross-listing

When Beyoncé unveiled the Lemonade visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's Daughters of the Dust (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Alile Sharon Larkin, Billy Woodberry, among many, many others, and
how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, Black feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned Lemonade and Barry Jenkins’ Moonlight (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

Requirements/Evaluation: weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

Prerequisites: AMST 101 and/or 301, critical studies in race and ethnicity or cultural studies, or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: American Studies majors

AMST 360 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: HIST 361 AMST 360

Secondary Cross-listing

Early Americans inhabited an interconnected world through which people, beliefs, and objects circulated. This course explores the "Atlantic World" as both a place and a concept: an ocean surrounded by diverse communities and empires, and an imagined space of shared or competing affiliations. Moving from the tenth century to the nineteenth, it examines ecological, cultural, political, economic, intellectual, and religious exchanges among Native Americans, Europeans and colonizers, and Africans and African Americans. It introduces both conceptual dimensions of this Atlantic paradigm and case studies that investigate its human subtleties, with the goal of examining early American history through a transnational lens. The course will take up the stories of Wabanaki mariners and Norse/Viking expansionists; Pocahontas, a trio of Inuit people, and myriad other Indigenous travelers to Europe; West African survivors of the Middle Passage and their enslaved descendants who pushed for survival and recognition of their humanity overseas; New England religious dissidents, intellectuals, and profitiers from Caribbean slavery; Touissant L'Ouverture and the reverberations of the Haitian Revolution; and whaling ship crews who pursued cetaceans ever farther out at sea, among other topics. The course also delves into new methodologies for telling histories that have been unevenly presented or seemingly silenced in traditional documentary archives, probing ways that oral traditions, songs, archaeology, material culture, and other forms of expression and representation can help recast the nature and meanings of these connected spaces and histories. Additionally, it provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: will alternate with seminar-type discussion of readings

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: sophomore, junior, and senior History majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**AMST 368 (F) Framing American Slavery (DPE)**

**Cross-listings:** AFR 363  AMST 368  HIST 368

**Secondary Cross-listing**

Readings in American Slavery  
This course will delve into how and what historians have written about US slavery for the last century or so. Rather than marching through time, like we might in a survey course, we'll explore the nooks and crannies of slavery’s history. We'll consider gender and sexuality, labor and capitalism, regional difference, maritime culture, and every day life. We'll compare histories produced well before the Civil Rights Movement to books written afterward. We'll consider the obstacles and challenges Black scholars faced in the academy and consider the significance of their work. Finally, we'll examine slavery's role in today's world, beginning with the institution's relationship with American universities and continuing on to the recent protests against monuments and statues.

**Requirements/Evaluation:** Four written essays/reviews, final paper. Students must also complete reading and contribute to class discussions.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to History, American Studies, and Africana Studies concentrators/ majors.

**Expected Class Size:** 10

**Grading:**  yes pass/fail option,  yes fifth course option

**Distributions:**  (D2) (DPE)

Not offered current academic year

**AMST 376 (F) Landscapes in American Literature**

**Cross-listings:** ENGL 376  STS 377  AMST 376

**Secondary Cross-listing**

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, “frontiers,” suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

**Requirements/Evaluation:** discussion participation; five brief response papers (~2 pages); a mid-semester essay (~5 pages); a final essay (12- to 15-pages)

This course will explicitly examine how power worked and changed during the centuries of legal slavery in the United States. Since lawmakers joined power and violence to definitions of whiteness and blackness, we will study how these definitions emerged and changed over time. Students will address issues of violence, legal and extra legal means of continuing slavery through changing political and economic conditions. Additionally, the course will consider the racial barriers in the academy.

AMST 379 (S) American Pragmatism

Cross-listings: PHIL 379 AMST 379

Secondary Cross-listing
Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments
Prerequisites: at least two PHIL courses

AMST 380 (S) Freedom Dreams, Afro-Futures & Visionary Fictions

Cross-listings: AFR 380 WGSS 380 AMST 380 ENGL 381 STS 380

Secondary Cross-listing
In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper

AMST 382 (S) Transnational Asian/American Film and Video
Cross-listings: AMST 382 COMP 382
Primary Cross-listing
In this course, we will examine transnational Asian/American film and video through the frameworks of film and visual studies, cultural studies, and critical media literacy. We will traverse communal, national, and transnational lines with a heterogeneity of forms and genres, including narrative, documentary, experimental, short film, music video, public access television, and YouTube. We will attend to multiple modes of critical analysis: (1) the conditions of power and visibility being mediated by sites of representation, (2) the networks and platforms helping to make these sites possible, and (3) the materials, meanings, and acts being generated by them. We will also interrogate: How are Asian, American, and/or Asian American representation being produced, performed, embodied, circulated, and consumed? What are the social, political, economic, and cultural forces at play in a given historical context? What artistic and political strategies are at play in the complex nexus of producers, directors, actors, distributors, and viewers? And what are the possibilities, limits, and stakes for different strategies of invention and intervention, activism and resistance? We will consider films from the United States as well as the inter-Asian context. Students will produce a creative media project at the end of the semester.
**Requirements/Evaluation:** attendance and participation; weekly online journal entries (1-2 pages); midterm paper (5-7 pages); final creative project

AMST 401 (S) Policing Nations: Indigenous Nations and the Carceral State (DPE)

This course examines the birth of the prison on Indigenous lands - how the settler carceral state emerged from the legal and political architectures of conquest as well as from Transatlantic slavery. It examines the continuities between the prison, the reservation, the barracks, the plantation, Boarding Schools and foster homes as modes of incarcerating Indigenous life and movements for liberation. To do so, we will be engaging with Indigenous legal theory, movements, and writings on the carceral state, including writings from incarcerated Indigenous intellectuals, Boarding School and foster care survivors, and feminists. Our approach will be rooted in the interdisciplinary practices of Native American and Indigenous Studies, American Studies, legal studies and political theory. This course strives to provide a history of the present through examining the relations, structuring presuppositions, discourses and material edifices of conquest and genocide on Turtle Island and for Indigenous nations in settler states across the globe. We will end by thinking with Indigenous feminist mappings of abolition and futures beyond the prison house of the settler state. The pedagogical aims of this course will be to illustrate the role of conquest, anti-Indigeneity and settler law in producing the contemporary prison system, and to introduce students to the broad canon of Indigenous legal theory and Indigenous legal traditions that do not proceed from carceral premises. It will aim to facilitate skills in primary source analysis, in proficiency with legal theory, in independent research, and critical analysis of different forms of the carceral state.

Requirements/Evaluation: Final Paper: 40%; Weekly Reading Responses 30%; Participation 10%; Seminar Presentations: 20%

Prerequisites: At least one of the following: AFRI 234; AMST/AFR 209; AFRI 210; AFR 318; AMST 142; AMST 146; AMST 260; INTR 220/AMST 201; INTR 320/LEAD 319; AMST 356; PSCI 210; INTR/AFR 340

AMST 403 (S) New Asian American, African American, Native American, and Latina/o Writing

Cross-listings: AMST 403 LATS 403 AFR 333

Primary Cross-listing

The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it be divorced from history and politics, even, or especially, a radical politics.
**Requirements/Evaluation:** one shorter paper (7-8 pp.), one final paper or creative project (10-12 pp.), two short response papers, a presentation, and participation

**Prerequisites:** none but those with some previous experience with literature and/or literary analysis might be helpful

**Enrollment Limit:** 15

**Enrollment Preferences:** American Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 403 (D2) LATS 403 (D2) AFR 333 (D2)

**AMST 404 (F) New Works in Asian American Studies (DPE)**

In this seminar, we will consider recent and/or recently intensifying debates, conversations, and intellectual directions in Asian American Studies. Topics may include white settler colonialism; indigeneity, the Pacific, and the transpacific; refugee experiences; media, including video games; political participation, conservatism, and religion; affirmative action; sexual violence; mental health; and comparative and relational racialization. We will also consider some new works of Asian American film and literature, and the criticism it generates. Course material will focus on scholarship that critically engage race, gender, sexuality, indigeneity, and/or disability as key terms. Students will be asked to develop a final project or paper based on one of the topics or books covered in the course. Students will gain an understanding of the field's recent concerns but also become familiar with the broader political, social, and cultural contexts from which they emerge.

**Requirements/Evaluation:** In-class participation, weekly papers, one in-class presentation of the reading, final paper (10-12 pages of scholarly work or criticism) or final project (interview with an author or art work may be an option)

**Prerequisites:** AMST125 (Introduction to Asian American Studies) or equivalent from another unit e.g. WGSS

**Enrollment Limit:** 12

**Enrollment Preferences:** Senior American Studies majors; juniors or seniors with demonstrated interest in Asian American Studies (especially previous coursework)

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course is organized around Asian American scholarship that foregrounds systems of power and hierarchies of identity. Students will consider how Asian American experiences throughout the history of the U.S. are shaped by uneven and often unjust processes, such as war or economic liberalism, and aspects of identity, such as race, indigeneity, gender/sexuality, class, and religion.

**AMST 405 (F) Critical Indigenous Theory (DPE)**

Intellectual decolonization is not a bounded project. On one hand, it demands a vocabulary of difference and refusal that rejects colonial theories and epistemologies. On the other, it demands that we interrogate our own intellectual and cultural traditions and trauma. Critical Indigenous theory is a tool in those projects, as it offers a corrective and an opening up of both dominant critical theory traditions that violently erase Indigenous bodies and political realities and of Indigenous theory that can essentialize difference and replicate oppressive dynamics in our communities. Critical Indigenous theory seeks to understand the structures and relations of power in settler colonialism, nested sovereignty, and culturally specific Indigenous philosophical traditions, like Indigenous studies more broadly, but also questions the key concepts that define Indigenous studies: tradition, sovereignty, authenticity, identity, race, gender, and sexuality. In this course, we will read major works in critical Indigenous theory that address
indigeneity as it relates to race, postcolonial theory, feminist and two-spirit critique, alternative political engagement with the settler colonial state, and questions of "colonial unknowing." We will work on cultivating the reading practices needed to parse dense theoretical texts, and over the course of the semester you will develop a research project on a topic of your choosing that will allow you to take critical Indigenous theories and employ them as analytic tools and lenses.

Class Format: This course will be taught remotely. Class sessions will include Zoom based seminar meetings during the designated course times, as well as asynchronous peer-editing and collaboration on final papers.

Requirements/Evaluation: attendance and participation, one discussion prospectus, and a 20-page research paper

Prerequisites: junior or senior status and some background in American Studies, Native American Studies, or Critical Theory or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: American Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Students will be invited to think deeply about the intersections of race, gender, colonialism, sexuality, and epistemology, and develop skills necessary to identify the theoretical basis of decolonial activism.

AMST 411 (F) Transnationalism and Difference: Comparative Perspectives

Cross-listings: LATS 409 WGSS 409 AMST 411

Secondary Cross-listing

In the age of digital communications and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary seminar we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the intersections of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes Central American, Colombia, the Dominican Republic, Haiti, Indonesia, Jamaica, Mexico, the Middle East, and Peru.

Class Format: This course will follow a discussion format.

Requirements/Evaluation: student participation, an original 12-15 page semester-long research paper conducted in stages, and student presentation

Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority. If the course is overenrolled students may be asked to submit a brief writing sample.

AMST 418 (S) Modernisms and the Archive

Cross-listings: AMST 418 ENGL 418

Secondary Cross-listing

This course focuses on American Modernist writers who transformed American literature in the first half of the twentieth century. We explore how these writers—including W.E.B. DuBois, Sterling Brown, Gertrude Stein, José Garcia Villa, Marianne Moore, Nella Larsen, Zora Neale Hurston, Wallace Stevens, Langston Hughes, HD, and others—confronted the experience of modernity in new art that responded to dramatic, often cataclysmic change. We define key markers of the modernist aesthetic, including its formal experimentation and self-reflexivity; and study the sweeping political, social, and cultural events and issues that influenced these writers, including two world wars, rapid industrialization, mass migrations, women's suffrage, Jim Crow racism, and a pandemic. We also look specifically at how the archives of Modernist writers—collected in institutions across the world—have shaped the discourse and narrative arc of literary history. Central to this archive-based discussion, students will have the opportunity to take a deep dive into the Sterling Brown archive here on the Williams College campus. Recently acquired by Williams College Library Special Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century. Our class is timed for the opening of the Sterling Brown archive in 2022 and the events and speakers planned on campus for that year, exactly one hundred years after Brown graduated from Williams College in 1922. Because of Brown's close connection with Williams, we will look particularly at how a poet's college experience shapes a poetic career.

Requirements/Evaluation: Short papers, writer's notebook, archival presentations, final paper (12-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 430 (S) Race, Identity, Nature (DPE) (WS)

Cross-listings: ENVI 430 AFR 390 AMST 430

Primary Cross-listing

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Class Format: This course is designated as remote. However, international students who want to take this course but need it to be designated as a...
hybrid course in order to do so may instead register for an independent study with Prof. Ayazi. As a hybrid course, this independent study will have the same requirements as the listed course, with the exception of a limited number of face-to-face meetings in Williamstown or Boston. Please contact Prof. Ayazi at ha5@williams.edu to discuss such an arrangement.

Requirements/Evaluation: Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%. Class will meet twice per week. Tu. meetings will be synchronous and Th. meetings will be asynchronous. Asynchronous components of the course include pre-recorded lectures, discussion boards, and other exercises that promote as much connection as possible within the constraints of remote education. Toward this end, synchronous meetings will center engaged discussion.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

AMST 455 (S) The Afterlives of Objects: Telling American Histories through Material Culture and Museums (DPE)

Cross-listings: HIST 455 AMST 455

Secondary Cross-listing

Material culture studies examine relationships between people and objects. Tangible artifacts like furniture, clothing, ceramics, tools, and buildings give insight into communities' identities, aspirations, and struggles. This course approaches American histories through objects, and considers how interdisciplinary methodologies can reveal alternative understandings of the past. The course traces changing theories and practices of preservation, curation, and display; shifting conceptions of "heritage" among diverse peoples; and ethical challenges posed by Native American and African American items held in museums, particularly in relation to repatriation considerations. The course involves a staged set of class visits to work with collections at the Williams College Archives/Special Collections and Art Museum as well as local/regional repositories and historic sites. While the scope of the course is continental and at times transoceanic, it includes substantial focus on the Northeast/New England and the material assemblages and landscapes that shape western Massachusetts. Students will build familiarity with appropriate techniques for handling objects, cultivate skills for developing and carrying out an original research project, and explore diverse modes of analysis and expression for telling the stories of objects and their associated communities.

Requirements/Evaluation: active participation in class discussion and museum visits, in-class presentation about one week's readings, research project prospectus, research project

Prerequisites: none

AMST 456 (S) Civil War and Reconstruction

Cross-listings: AMST 456 HIST 456 AFR 385

Secondary Cross-listing

An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. The seminar begins with the build up of sectional antagonism culminating in the secession of the lower South in 1860-61 and the outbreak of civil war. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

Class Format: This seminar will be a discussion course. This era was the formative period for many of the issues we face as a society today, and the roots of these present-day problems must be discussed openly and thoroughly by all members of the seminar.

Requirements/Evaluation: class participation, two short essays during the semester, and a substantial research paper based at least in part on primary source materials due at the completion of the seminar.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Preference given to History majors needing a 400-level course to complete their major requirements.

AMST 462 (F) Art of California: Pacific Standard Time (DPE) (WS)

Cross-listings: ARTH 462 AMST 462 LATS 462 ARTH 562

Secondary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: Several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester. The course will feature synchronous online class meetings with some small discussion
Prerequisites: ARTH 102 - Grad Art exempt from ARTH 102 prerequisite

AMST 478 (S) Cold War Landscapes

Cross-listings: AMST 478 ENVI 478 HIST 478
Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

AMST 488 (F) Fictions of African American History (DPE) (WS)

Cross-listings: HIST 488 AMST 488

Secondary Cross-listing

This course examines African American fiction, largely from the late 19th and very early 20th century. These Black authors, none of them professional historians, try to bring African American History to light in an era before this history was taken seriously by the white academy. Many of the authors we examine were activists and journalists who set their novels and short stories during Slavery and Emancipation. We will consider inherently radical act of reading and writing in a society where black literacy was illegal until after the Civil War. Alongside the fiction we will read modern historiography of the era. We will also delve into some of slave narratives published after Emancipation. Readings will include works by Booker T. Washington, James Weldon Johnson, Charles Chesnutt, Paul Laurence Dunbar, and Sutton Griggs. This is a tutorial and will be taught online.

Requirements/Evaluation: Every week a student will write either an essay or a critique. For the final assignment students may either write a review of 2-3 works of historiography OR substantially revise an essay or critique they did during the semester.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History, Africana, and American Studies Majors will have preference. As well as students who have never taken a tutorial.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 488 (D2) AMST 488 (D2)
Writing Skills Notes: Students will write every week (essays and critiques) and receive feedback from their partners and from the professors. The final assignment of the semester is major revision of a one essay or critique. Students will receive feedback on their paper's organization and argument as well as points of style. Since we will be reading both fiction and historiography, we will discuss as a group the different challenges each form poses to essay writing.

Difference, Power, and Equity Notes: African Americans writing during this time lived under the laws and customs of Jim Crow and White Supremacy. Lacking political power, they turned to the power of the written word. We will evaluate the way writing and fiction helped ameliorate (or not) the racial power structures.

Not offered current academic year

AMST 490 (F) The Suburbs

Cross-listings: AMST 490  ENVI 491  HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I’ll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2021
HON Section: 01 TBA Dorothy J. Wang

AMST 492 (S) Senior Honors Project: American Studies
This seminar is the second half of a year-long seminar that is required of AMST seniors who have been approved to write an honors thesis (critical-analytical, research-focused, creative, performative, or hybrid). Students will share work, critique each other's proposals and drafts, and support each other in the process of producing a thesis project. Although each student's major work for the year will be focusing on a specific topic with an advisor, the instructor of the honors seminar will offer guidance on more general concerns such as conceptual approaches, research methodologies, creative exploration, the honing of arguments, writing issues, and other theoretical and practical questions. Guest speakers may also be invited to talk to the class.

Requirements/Evaluation: Attendance, participation, timely progress on the thesis project

Prerequisites: Senior AMST majors who have been approved to write an honors thesis

Enrollment Limit: 15

Enrollment Preferences: This course is limited to senior AMST majors who have been approved to write an honors thesis.

Expected Class Size: 5

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Spring 2022
SEM Section: 01 TBA Dorothy J. Wang

Winter Study ---------------------------------------------------------------

AMST 30 (W) Senior Honors: American Studies
To be taken by students registered for American Studies 491 or 492.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

AMST 99 (W) Independent Study: American Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
ANTHROPOLOGY AND SOCIOLOGY (Div II)

Chair: Professor James Nolan

- Nicholas Carr, Visiting Professor of Sociology
- David B. Edwards, James N. Lambert ’39 Professor of Anthropology
- Antonia E. Foias, Professor of Anthropology
- Peter Just, Professor of Anthropology
- Joel Lee, Assistant Professor of Anthropology
- James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Professor of Sociology
- Christina E. Simko, Assistant Professor of Sociology
- Ben Snyder, Assistant Professor of Sociology
- Phi H Su, Visiting Assistant Professor of Sociology

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

**Anthropology** critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. **Archaeology** extends this analysis to social formations of the historical and prehistoric past. **Sociology** studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

**MAJORS**

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

**Requirements**

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

**Core Courses**

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**

ANTH 101 How to Be Human

**Sociology**

SOC 101 Invitation to Sociology

**Joint Courses**

- ANTH 101 How to Be Human
- SOC 101 Invitation to Sociology
- ANTH 101 How to Be Human
- SOC 101 Invitation to Sociology
Elective Courses

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

- Can your department or program typically pre-approve courses for major/concentration credit?
  Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
  Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
  Yes. We credit two, and in special cases three courses.

- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
  Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

- Are there specific major requirements that cannot be fulfilled while on study away?
  Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

- Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
  Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

- Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
  In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY
Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANSO 205 (S) Ways of Knowing
An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? How do qualitative and quantitative approaches to social inquiry differ? How are they similar? What is the importance of history to sociological and anthropological research? How do social researchers use archival and other documentary materials to interpret society? What is the relationship between empirical data and the generation of social theory? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers’ personal biographies and values shape their work? We will approach these problems both abstractly and concretely, through readings in epistemology as well as a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from both inside and outside the academy. The course will also feature hands-on training in field methods, in which students design and undertake their own pilot field projects.

Requirements/Evaluation: full-participation in the seminar, an independent ethnographic project, several short written assignments, and a final research essay/proposal (roughly 30 pages of writing in total).
Prerequisites: ANTH 101 or SOC 101 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: EVST Methods Courses EXPE Experiential Education Courses

Spring 2022
SEM Section: 01 W 1:10 pm - 3:50 pm Olga Shevchenko

ANSO 305 (F) Social Theory
An introduction to social theory in anthropology and sociology, with strong emphasis on enduring themes that cut across disciplinary divides. What is modern about modern social theory? How do social thinkers construe "society" and "culture," and have these constructions withstood challenges over time? What role does human agency play in the unfolding of social life, and where does that sense of agency come from in the first place? What are the forces that animate social interaction on the level of individuals, social groups and complex units like nation-states? What are the possibilities and limits of systematic approaches to the study of human social experience? The course emphasizes major differences between interpretive frameworks as well as the common elements that contribute to a deeper understanding of the social world.

Requirements/Evaluation: full participation in the seminar, weekly contributions to annotating course readings, and three papers
Prerequisites: ANTH 101 or SOC 101 or ANSO 205 or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Unit Notes: AMST Critical and Cultural Theory Electives
Distributions: (D2)
ANSO 402 (S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none
Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

Distributions: (D2)
Attributes: EXPE Experiential Education Courses

Winter Study -----------------------------------------------

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANTH 101  (F)(S) How To Be Human  (DPE)

Is there such a thing as ‘human nature’? This course is an introduction to cultural anthropology (also known as social or socio-cultural anthropology), the study of human society in all its profound variety. Through deep, sustained, systematic participation in and observation of a particular social context, anthropologists seek to comprehend and illuminate the human condition. Anthropologists’ insights into the ways in which human institutions—language, economy, religion, social stratification, law, sexuality, art, the state, and many more—are culturally constructed and reproduced have transformed the way the world is understood. Puncturing ethnocentrism, anthropology’s attentiveness to the ideas and practices of cultures in every part of the globe vastly enriches the archive of human answers to human problems. The distinctive methods of the discipline enable anthropologists to discover patterns and phenomena not discernible in other modes of enquiry. With such findings anthropologists are able to make critical interventions in public discourse and to demonstrate how deeply we are all shaped by cultural forces.

Requirements/Evaluation: weekly posts in response to readings, two group presentations, several short writing exercises, final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: The course is an introduction to cultural anthropology and deals extensively with race, ethnicity, religion, gender, etc., as cultural constructs creating social difference, hierarchies of power, and the creation of inequities in communities and societies. Readings in ethnography, social theory, and sociology are designed to give students a deeper appreciation of all these issues.

Fall 2021

ANTH 103  (F) Pyramids, Bones, and Sherds: What is Archaeology?

Anthropology examines not only living societies, but also prehistoric cultures whose remains are found worldwide. This course will present how archaeology reconstructs the various aspects of human society from the physical record of prehistory. How do we study the subsistence and settlement patterns, the political and social organization, and the economy and ideology of prehistoric societies who have left behind mute material records? The objective of anthropological archaeology is to bring to life these prehistoric cultures through archaeological analysis. The different goals, approaches and methodologies of modern archaeology will be discussed theoretically and then applied to case studies.

Class Format: In the Fall 2020, the course will have a hybrid format. In person and remote students will attend lectures or class discussions during the regular twice-a-week schedule, with an additional synchronous session for remote students to address questions. If remote students cannot attend additional Q&A session, open office hours will also be available.

Requirements/Evaluation: class presentations, two 12-15pp analytical papers, midterm and final exams
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: First and second year students.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ANTH 134 (S) Leaving the World Behind: The Literature of Reclusion (DPE) (WS)

Cross-listings: ANTH 134 CHIN 134 COMP 134 REL 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 134 (D1) CHIN 134 (D1) COMP 134 (D1) REL 134 (D2)

Writing Skills Notes: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

Not offered current academic year

ANTH 138 (F) Spectacular Sex (DPE) (WS)

Cross-listings: WGSS 138 ANTH 138

Secondary Cross-listing

From Beyoncé’s Coachella performance to Donald Trump’s social media antics, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of
spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

**Requirements/Evaluation:** weekly response papers; students will also select past papers to develop and rewrite as more formal essays

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first- and second-year students; a statement of interest will be solicited from pre-registrants

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 138 (D2) ANTH 138 (D2)

**Writing Skills Notes:** This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers. Students will select past response papers for development and rewriting.

**Difference, Power, and Equity Notes:** This course deals substantively with questions about privilege and power as they interact along the intersections of race, gender, sexuality, class, ability, and other axes of difference.

Not offered current academic year

**ANTH 162  (S)  Languages of East Asia**

**Cross-listings:** CHIN 162  ANTH 162  ASIA 162  GBST 162

**Secondary Cross-listing**

An introduction to the three major languages of East Asia: Chinese, Japanese, and Korean. Working with various types of multimedia including audio, video, images, animation, and texts, we’ll take up the phonetics, phonology, morphology, and syntax of these three languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic analysis, we’ll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and aren’t they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages and dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

**Class Format:** combination of lecture, discussion, and language practice

**Requirements/Evaluation:** six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

**Prerequisites:** none (no prior background in linguistics or any Asian language required, open to all students)

**Enrollment Limit:** 20

**Enrollment Preferences:** open to all with preference to first-year students and sophomores

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 208  (S)  The U.S. and Afghanistan: A Post-Mortem  (DPE)

Cross-listings:  ASIA 208  GBST 208  PSCI 220  ANTH 208  ASST 208

Primary Cross-listing
The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short essays, and a 15-page research paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference
Expected Class Size: 15-20
Grading: no pass/fail option, no fifth course option

ANTH 212  (F)  Foundations of China

Cross-listings:  ANTH 212  GBST 212  REL 218  HIST 214  ASIA 211  CHIN 214

Secondary Cross-listing
This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

ANTH 214 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Primary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: Class discussion and debates will complement lecture with powerpoint presentation. In the Fall 2020, the course will have a hybrid format. In person and remote students will attend lectures or class discussions during the regular twice-a-week schedule, with an additional synchronous session for remote students to address questions. If remote students cannot attend additional Q&A session, open office hours will also be available.

Requirements/Evaluation: midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First and second years.

ANTH 215 (F) Performance Ethnography (DPE)

Cross-listings: GBST 215 DANC 214 ANTH 215 AMST 214 THEA 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work
**Requirements/Evaluation:** class participation, reading responses, fieldwork and field notes, short papers, and final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 215 (D2) DANC 214 (D1) ANTH 215 (D2) AMST 214 (D1) THEA 215 (D1)

**Difference, Power, and Equity Notes:** This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students’ critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

**ANTH 216 (S) Urbanism in the Ancient World**

**Cross-listings:** ANTH 216 GBST 216

**Primary Cross-listing**

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

**Requirements/Evaluation:** 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores; or majors in Anthropology or Sociology

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ANTH 219 (S) The Art and Archeology of Maya Civilization**

**Cross-listings:** ARTH 209 ANTH 219

**Primary Cross-listing**

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically
evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

Class Format: lecture/discussion

Requirements/Evaluation: midterm and final exams, hieroglyphic project, 15pp research paper

Prerequisites: none, but an introductory ARTH or ANTH course recommended

Enrollment Limit: none

Enrollment Preferences: Anthropology/Sociology and Art History majors

ANTH 223 (S) Ethnic Minorities in China: Past and Present (DPE)

Cross-listings: ANTH 223 CHIN 223

Secondary Cross-listing

According to the most recent census conducted in China in 2010, of the 1.3 billion population of China, more than 110 million (8.49%) were ethnic minorities (shaoshu minzu). Most of the minority groups reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will ask the central question of "what is minzu" and address various topics such as the minority-group identification project; the definition of minzu (translated as "ethnic group," "nationality," or "race" by different scholars); the intersections between language, religion, tourism, diaspora and ethnicity; historical sino-centric views about "foreigners" and "barbarians" as well as the roles that "barbarians" have played in China's long history. We will examine how social differences and hierarchy are constructed and discuss how power plays in the shaping of "ethnicity." A multidisciplinary approach will be adopted for the course, taking in sources from anthropology, history, literature, ethnic studies, and cultural studies. Throughout the course, the pedagogical techniques of "intercultural dialogue" will be adopted to encourage students to discuss their own ethnic experiences and compare ethnic minority issues in China with similar issues in the United States. Students are also encouraged to come up with real-world solutions and strategies to deal with issues of racism, bias, and discrimination.
Class Format: The course will be offered remotely and adopt a learner-centered, quasi-tutorial format. Every week students will view recorded lectures and participate in an online discussion forum asynchronously. In addition, students will be placed into smaller groups and meet with the instructor once a week for synchronous discussions.

Requirements/Evaluation: class attendance, weekly quizzes, active participation in both the online discussion forum and in-class meetings, two short (5-page) response papers, and one final research paper (10-12 pages).

Prerequisites: none, open to all students; no knowledge of Chinese language required

Enrollment Limit: 15

Enrollment Preferences: current and prospective majors in the Department of Asian Studies, then to first-years

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: books and reading packet

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 223 (D2) CHIN 223 (D2)

Difference, Power, and Equity Notes: We explore the interactions between "power" and "ethnicity," "center" and "periphery" in the Chinese context and compare them with students' own experiences. Students are required to write one short response paper on their personal encounter with the concept of "race" or "ethnicity." For the final research paper, students are required to identify one problem among all the ethnic minority issues in the Chinese context and write a policy recommendation to make real-world changes.

Attributes: ASAM Related Courses GBST East Asian Studies Electives

ANTH 225 (F) Ways of Seeing

This course examines the potential of images for revealing aspects of cultural normally obscured by the written word and for transmitting different, sometimes undervalued insights and knowledge of the social world. The central focus of this course is documentary film, and we will consider both the theory and practice of the documentary in the United States and abroad as it has evolved over time and as it is evident in contemporary filmmaking. In the course of the semester, we will examine some of the ways in which filmmakers, and ethnographic filmmakers in particular, have approached the task of documenting and understanding different aspects of social reality. Among the questions that we will consider are the following: What is the relationship between written texts and images? What is it that documentary films "document?" What is the relationship between images and stories, and should the techniques used in fiction films to construct voice, point of view, identification, narrative sequence, etc. apply as well in the creation of nonfiction films? What is the role of film in anthropology, and how does ethnographic filmmaking relate to anthropology and to the broader documentary film tradition? In the last part of the course, we will consider the proliferation of cell phone videos and platforms such as Youtube and Instagram and their significance for the documentary film genre more generally.

Class Format: The class will be taught remotely and will include pre-recorded lectures, conversations with filmmakers and producers, and weekly online discussions.

Requirements/Evaluation: Weekly response/critiques of assigned films, a longer written paper (10-12 pages) or video essay of comparable scope

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology/Sociology majors, open to first-year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ANTH 226 (F) Spiritual But Not Religious

Cross-listings: REL 226 ANTH 226

Secondary Cross-listing
Today, more than one in five people in the United States identify as “none” when asked about their religious affiliation. Yet that does not mean that religious sentiment or spirituality is on the decline. On the contrary, talk of “spirituality” is more pervasive than ever in popular discourse. Increasingly Americans claim that they are “spiritual but not religious” or that they prefer “individual religion” over “organized religion.” This course seeks to understand and investigate this phenomenon. What is the lived experience of being “spiritual but not religious”? What counts as spirituality? Is there a meaningful distinction between spirituality and religion? What does this distinction assume about the nature of organized religion? What is the history that led us to this ideology of individualized spirituality? And what are the social and political implications of this trend? We will explore these questions and study this phenomenon through an engagement with ethnography (the qualitative research method generally described as “participant-observation”). Over the course of the semester, students will be expected to conduct an ethnographic research project within local communities in Williams College and Williamstown. Alongside our central readings on spirituality, we will also be studying some background in the theory and practice of this methodology. Throughout the semester, students will work together on developing the practical skills necessary to conduct an ethnographic project, and will be gradually executing their own individual projects. This will include: designing a feasible project and research question, selecting research sites and interlocutors, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Requirements/Evaluation: regular reading responses; semester-long research project with frequent small assignments building up to the final product (15- to 20-page paper)

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

ANTH 227 (F) Language and Society: What Does Your Speech Say About You?

Cross-listings: ANTH 227 ARAB 227

Secondary Cross-listing

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics

ANTH 228 (F) Jihad
Most studies of the global jihad movement focus on ideology, operations, and strategy. Numerous studies have also focused on the individual psychology of those who join jihad groups. Often ignored are the cultural dimensions of Islamic jihad. This course examines both the "global" culture of jihad--those cultural elements of the movement that are common across national and linguistic borders--and the particular ways in which jihadi groups reflect and respond to the local cultures in which they operate. Among the topics to be considered are the ways in which jihad adherents use ritual, poetry, graphic imagery, dress and grooming codes, music, film, social media, dream interpretation, and mythology to fix their place in the world and advance their political and social agendas. The course will also examine the role of violence in creating a distinctive and exclusionary social milieu within jihadi groups and in defining the relationship between these groups and the societies that surround and, in some cases, support them. Of particular interest for the course will be the ways in which cultural elements of jihadi groups and the jihadi "lifestyle" are mobilized to attract new recruits to the jihadi movement.

Requirements/Evaluation: class participation, four short and informal blog posts (1-page each), two longer response papers (2- to 3-pages each), one research paper (12- to 15-pages)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors and students who have taken one or more Anthropology or Sociology courses

Expected Class Size: 12-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ANTH 232  (S)  Town and Gown: Investigating the Relationship of College and Community

Team-taught by an anthropologist and a journalist, this course investigates the relationship between Williams College and the surrounding communities of Northern Berkshire County via ethnographic/journalistic research conducted by students. The course will look at several case studies centered on "town-gown" relations in different eras and locations in order to contextualize and provide comparative material for understanding the relationship of Williams to its neighboring communities. Among the topics to be considered and possibly investigated will be the social and economic effects of colleges on local communities, the role of alcohol and athletics in town/gown relations, and how the increasing corporatization of academic institutions has changed the nature of town-gown interactions and the place and role of institutions of higher education in their communities. The focus of the course will be on student research, and a large percentage of class time will be devoted to learning the basic techniques of ethnographic and journalistic research, including interviewing, oral historical research, survey research, and participant-observation. Each student will conduct a major research project of their own devising, which will culminate in an investigative report and a public presentation.

Requirements/Evaluation: class participation, research exercises, major ethnographic research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ANTH 233  (S)  Spiritual Crossroads: Religious Life in Southeast Asia

Cross-listings: ANTH 233 ASST 233 REL 253 ASIA 233

Primary Cross-listing

No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

Requirements/Evaluation: midterm, short essays, term paper

**ANTH 235 (F) Refugees and Migrants**  
An overflow of refugees to the EU and alarmist electoral campaign rhetoric in the U.S. have intensified the issue of international migration around the world. Right- and left-wing politicians and their constituents, human rights activists and state officials, journalists and NGOs discuss, argue, and mull over causes and consequences of population change, strategies of migration management, and predicaments of social integration. In this course, we will examine the emerging conditions of international migration. Specifically, we will focus on how contemporary welfare and labor regimes, claims on citizenship rights, immigration rules, public deliberations, and interethnic and racial experience shape the movements of people and affect their lives by controlling their bodies, subjectivities, social networks, health, and labor. We will draw on domestic and international case studies as we examine a controversy surrounding the Arizona immigration law, DACA debates, challenges of a migration crisis in EU, rural-to-urban migration in India, and a complexity of refugee flows in the Caucasus and the Middle East. We will briefly engage with the subtleties of migration estimation, such as the politics of population censuses, and will analyze consequences of immigration on host populations.

**Requirements/Evaluation:** one midterm, two short policy memos, one research paper  
**Prerequisites:** none  
**Enrollment Limit:** none  
**Enrollment Preferences:** seniors and juniors  
**Expected Class Size:** 20

**ANTH 240 (S) Work as a Cultural System** (DPE)  
"You know my reputation," sang Billy Joe Shaver, "I am everything I do." In many ways we are *homo faber*, the species that makes its world and we are defined by what we make, by the work we do. This course will undertake a broad survey of work as cultural systems across time and space. How do societies define work, how do they organize it? Who controls the processes of work, who controls the product of work? When is work an act of pure creation and when is it stultifying labor? How is work enabled and how is it compensated? What defines the difference between work and leisure and how are they valued? How does control over access to work, the organization of work, and the appropriation of its products determine difference, power, and equity in a society? These questions will guide an examination of work drawing on works of philosophy, history, ethnography, literature, and film examining people at work ranging from hunter-gatherers to tin miners, from slaves to corporate managers, from merchant mariners in the age of sail to physicians struggling to adapt to computerized medical records.

**Requirements/Evaluation:** students will compose several response papers, a take-home midterm exam and a final research paper of 15-20 pages  
**Prerequisites:** none  
**Enrollment Limit:** 19  
**Enrollment Preferences:** Anthropology and Sociology majors  
**Expected Class Size:** 15  
**Grading:** no pass/fail option, yes fifth course option  
**Distributions:** (D2) (DPE)  
**Difference, Power, and Equity Notes:** Access to work, control over the work process, control over the fruits of labor, and compensation for work, are
a principal means for creating and maintaining social difference, power, and equity. It is impossible to seriously study the nature of work without discussing these topics. By placing the universal experience of work in a broad spatial and temporal context students will discover an enhanced analytical ability to critically understand their own experiences of work and those of others.

ANTH 242  (S)  The Country and the City in the Classical World

Cross-listings:  ANTH 242  ENVI 242  CLAS 242

Secondary Cross-listing
A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes?

What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation:  informed participation, two short papers (2-5 pages), final paper (8-10 pages)
Prerequisites:  none, although prior knowledge of the ancient world will be useful
Enrollment Limit:  19
Enrollment Preferences:  declared and intending majors in Classics and Environmental Studies

ANTH 243  (F)  Reimaging Rivers  (WS)

Cross-listings:  ENVI 243  ANTH 243

Secondary Cross-listing
In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format:  This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week. Sessions will be held in-person and remotely.
Requirements/Evaluation:  Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.
Prerequisites:  Environmental Studies 101
Enrollment Limit:  10
Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243 (D2) ANTH 243 (D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

ANTH 246 (S) India's Identities: Nation, Community, & Individual (DPE) (WS)

Cross-listings: ASST 246 ASIA 246 REL 246 ANTH 246 WGSS 246

Secondary Cross-listing

This tutorial considers India’s multiple and intersecting identities, in relation to climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. We examine the intersectional identities that produce solidarity and opposition within landscapes always already structured by power and inequity. How do communal and individual identities such as gender, class, caste, sexuality or religion shape social conflict and ongoing struggles for power in India today? We examine key moments in Indian history that that continue to produce social conflict and fluidity such as Partition, the riots in Gujarat, Hyderabad, and Delhi that have shaped the modern landscape of communal identity, as well as the contested border such as Ladakh as well as Jammu & Kashmir. Our readings will include ethnographic, sociological, historical fiction, and oral history. Students choose their own topics to delve into for final weeks of the semester.

Class Format: Meeting weekly in pairs with tutorial partner to discuss texts and student essays.

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Majors in Anthropology, Sociology, Religion, Women's, Gender & Sexuality Studies, concentrators in Asian Studies, STS

ANTH 249 (F)(S) The Sacred in South Asia

Cross-listings: ANTH 249 ASIA 242 REL 149
Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of 'syncretic' ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

Prerequisites: Interest in the topic!

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

ANTH 255  (F) Buddhism: Ideas and Practices

Cross-listings: ANTH 255 REL 255 ASIA 255

Secondary Cross-listing

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

ANTH 256  (F)  Buddhism, Sex, & Gender: #MeToo Then and Now  (DPE)

Cross-listings: ANTH 256 WGSS 256 REL 256 ASST 256 ASIA 256

Secondary Cross-listing

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality.

ANTH 262  (S)  Language and Power

"A language is a dialect with an army." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained or subverted by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to the partition of Hindi and Urdu in colonial South Asia. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in our local community.

Requirements/Evaluation: Regular postings of critical response papers and an ethnographic final project.
Prerequisites: None.
Enrollment Limit: 20
Enrollment Preferences: Students in all fields of study are most welcome. If overenrolled, priority will be given to Anthropology or Sociology majors or final-year students.

ANTH 269  (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience  (DPE) (WS)
Cross-listings: REL 269  STS 269  ASIA 269  ANTH 269
Secondary Cross-listing

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively—be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 helped us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.
Requirements/Evaluation: weekly tutorial papers and discussion
Prerequisites: A prior class or some experience with meditation is recommended
Enrollment Limit: 10
Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)  (DPE) (WS)

ANTH 277  (S) Sensing Society
Can you hear the difference between a retroflex and a dental 't,' or an aspirated and unaspirated 'g'? This depends on your linguistic upbringing, as language conditions our attunement to sound. How else does socialization shape our sensory perception? How do our cultural contexts train us to engage the sensory world—do we see and hear in particular ways, to love some smells but be repelled by others, to have a 'discriminating palate'? How are sensory stereotypes—that certain categories of person are less sensitive to pain than others, for example—mobilized in the defense of unequal social orders? What does it mean for an entire class of society to be defined—as is the 'untouchable' in caste society—by reference to a primary sense?
This course explores the social life of the senses, investigating how our very perception of the world is socially conditioned and how 'commonsense' about the senses--that 'seeing is believing' while 'hearing voices' is a problem, for instance--are by no means universal, and are historically and culturally produced. Readings include historical, ethnographic and literary accounts of sensory culture in various parts of the world. Toward discovering and critically examining our own sensory socialization, students will maintain a sense-journal, conduct interviews with family members on sensory experience, and generate a sense-map of our Williamstown environment. This is a class plunged in the sounds, flavors and odors that give our social worlds life.

Requirements/Evaluation: Weekly discussion posts, sensory journal, an 8-page interview-based paper, and a collective sense-mapping project.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Everyone is most welcome. If overenrolled, anthropology and sociology majors would be given preference.

ANTH 281 (S) The Seeds of Divinity: Exploring Pre Columbian Art & Civilization in a Museum Exhibit

Cross-listings: ARTH 281 ANTH 281 REL 280

Primary Cross-listing

For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in Pre Columbian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be presented in a museum exhibit.

Requirements/Evaluation: active class participation; three short papers; 15-page research paper and presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANTH, SOC and ARTH majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ANTH 287 (S) Propaganda

We live in the age of mass persuasion. From commercial ads to political campaigns, from mass media "news"—both fake and real—to large scale movements for social change, we are constantly bombarded by powerful messages that aim to capture, hold, and impact our attention and direct our actions. Drawing on symbolic socio-linguistic analysis, we will examine the institutional and technical apparatus of modern propaganda and will discuss the role of intellectuals, "attention merchants," and receptive audiences in creating the propaganda machine. We will pay special attention to campaigns that aim to overthrow social structures, or to ensure their maintenance and functioning. We will engage with explicit messages received via propagandistic media and implicit directives that aim to silence, obfuscate, and erase. Theoretical discussions will be complemented with intense, in-depth investigations of case studies of persuasive techniques in the Nazi Ministry of Propaganda, Cold war culture wars, Middle Eastern and Post-Soviet regimes, U.S. and Russian electoral and political campaigns. As we explore the overwhelming diversity of persuasive techniques of contemporary propaganda apparatus, we will turn our attention to various ways through which it impacts and molds our individual selves: from organizing dreams and desires to shaping autobiographies. We will conclude the course by creating our own examples of persuasive mass

**ANTH 297 (F) Theorizing Magic**

**Cross-listings:** REL 297 COMP 289 ANTH 297

**Secondary Cross-listing**

This is a course about magic. It is not about stage magic, sleight of hand, or the art of pulling rabbits out of hats. You will learn no card tricks. But instead we will learn about those people who believed in the reality of certain powers; from the ability to summon good or evil spirits, transform base metals into gold, predict the future, or manipulate matter by thought alone. The problem of how to theorize magic has long been a cause of concern for the natural and social sciences. Many a sociologist and anthropologist has imagined that belief in magic should have vanished with modernity (despite much evidence to the contrary). Meanwhile, philosophers of science have been long fascinated with the demarcation problem-figuring out grounds by which to distinguish legitimate sciences (like astronomy) from their magical or pseudoscientific cousins (like astrology). We will trace these discussions and problematize them by looking at the beliefs of self-defined witches and magicians. This should put us in a position to interrogate the construction of concepts of magic, science, and religion and show how the boundaries between these categories emerged historically. Topics to be discussed will include: the rationality of magic, the fine lines separating magic, science and religion, the persecution of witches, and the role notions of magic and superstition played in European modernization and colonization projects. The tutorial sessions will be customized to student interests, but texts will likely include selections from primary works in translation, such as Cornelius Agrippa's *Occult Philosophy*, Giordano Bruno's *On Magic*, Aleister Crowley's *Magick Liber Aba*, as well as selections from secondary literature, perhaps including Marcel Mauss, *A General Theory of Magic*, Max Weber, "Science as Vocation," Tanya Luhrmann, *Persuasions of the Witches' Craft*, Thomas Kuhn, *The Structure of Scientific Revolutions*, Larry Laudan, "The Demise of the Demarcation Problem," E.E. Evans-Pritchard, *Witchcraft and Oracles*, and/or Kelly Hayes, *Holy Harlots: Femininity, Sexuality and Black Magic in Brazil*.

**ANTH 299 (F) Ritual, Power and Transgression**

**Cross-listings:** REL 274 ANTH 299

**Primary Cross-listing**

The focus of this course is on the role of ritual in harnessing political power. In the first part of the semester, we examine some of the ways in which different cultures manufacture social order and political power through categories of inclusion and exclusion, clean and dirty, proper and improper, and licit and illicit. We will be particularly attuned to the ways in which these categories are performed through and maintained by rituals and how bodies are deployed in ritual spaces as instruments of persuasion and control. We will also look in depth at a variety of ritual forms, including scapegoating and sacrifice, and how they serve as engines of political control and protest, and we will examine the uses of dead bodies and memorials as vehicles...
for gaining and maintaining political power and the destruction and desecration of bodies and memorials as a form of political protest and dissent. Throughout the semester, we will be relating theoretical texts and historical cases to current political struggles in this country and abroad.

**Class Format:** The class will be taught remotely.

**Requirements/Evaluation:** class participation, biweekly responses to instructor prompts, three short (500 words) response papers, and one 10- to 12-page (2000-2400 words) research paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** ANSO and REL majors, open to first-years

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**ANTH 301 (S) Sexual Economies** (D2) (DPE)

**Cross-listings:** ANTH 301 WGSS 301 AMST 334

**Secondary Cross-listing**

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

**Requirements/Evaluation:** midterm essay exam, short quizzes, participation, Marco Polo video chat posts

**Prerequisites:** none, though WGSS 101 and/or 202 may be helpful, but not required

**Enrollment Limit:** 14

**Enrollment Preferences:** based on statement of interest

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

ANTH 311  (S) Islam and the Critical Study of Secularism  (DPE)

**Cross-listings:** ANTH 311  REL 311

**Secondary Cross-listing**

Since the Iranian Revolution of 1979, successive Islamist movements have sought to transform Muslim states along religious lines. In Euro-American discourses on political Islam, such blatant disregard for the separation of religion and state is often seen as a tragic failure of secularization. Islam, in other words, is understood as a religion out of place in the modern world. While the global resurgence of religion in the face of much scientific and material progress has tempered scholarly enthusiasm for the secularization thesis, contemporary Islamic religiosity is increasingly viewed as an aberration from the regular course of history. Moreover, as scholars rewrite the script of secularization by unearthing modern secularism's European-Christian heritage, they unwittingly bolster a narrative of civilizational difference between Islam and the secular West. Our understanding of Islam is thus inextricably tied to its oppositional framing as the other of secularism. In this course, we will critically assess Euro-centric representations of Islam as created through canonical and critical discourses on secularism. Rather than assuming a natural opposition between Islam and secularism, we will examine the various modalities of power, institutional formations, habits of thinking, normative presuppositions, and cultural and visceral sensibilities that configure their agonistic relationship. This examination amounts to deconstructing the very category of the secular in its cognitive and sensory dimensions. To accomplish this task, we will rely on the work of Talal Asad and his interlocutors in Religious Studies, Anthropology, Continental Philosophy, Postcolonial Studies, and Comparative Literature. The course content is divided into 2 modules. Module A: "Theorizations" will examine Euro-centric theories of secularism and problematize their portrayals of Islam as an intrinsically secular religion. In Module B: "Secularism Beyond Europe," we will read postcolonial critiques of secularization and examine its alternative trajectories in non-European contexts. Crucially, we will shift from a conventional emphasis on the state by comparing Islamic and secular disciplines of subject formation. By the end of the course, students will be able to appreciate how secular legal, political, and cultural institutions have re-defined religion in the modern world. Further, they will be able to discern the ways in which contemporary Islamic movements are both responses to and manifestations of a global secular condition.

**Class Format:** This course will be conducted online in its entirety and will rely on a combination of synchronous and asynchronous modes of learning. The synchronous component will consist of weekly class meetings via Zoom. A discussion leader will be assigned once a week to present on the
week's readings and lead class discussion. The asynchronous component will consist of weekly reading responses (500 words each), 2 essays (1,000 words each), and a final paper (2,500 words)

**Requirements/Evaluation:** Weekly Reading Responses (500 words each): 30%; 2 Essays (1,000 words each): 20%; Attendance and Class Participation: 10%; Term Paper (10 double-spaced pages/2,500 words): 40%. Note: Out of the 13 weekly reading responses, you can choose to skip a maximum of 3

**Prerequisites:** None.

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ANTH 311 (D2) REL 311 (D2)

**Difference, Power, and Equity Notes:** This course will sensitize students to the intractable difficulties of securing religious freedom, diversity, and tolerance under secular law. Students will gain a nuanced historical understanding of the role of Islam as a political force in postcolonial Muslim societies and its implications for religious minorities. Notably, they will understand how religiously motivated forms of violence and oppression are often deeply imbricated with secular power and institutions.

Not offered current academic year

ANTH 322 (F) Waste and Value

**Cross-listings:** GBST 322  ENVI 322  ANTH 322

**Primary Cross-listing**

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

**Requirements/Evaluation:** regular posting of critical response papers, field notes on waste streams, research-based final paper

**Prerequisites:** none

**Enrollment Limit:** 12

Fall 2021

SEM Section: 01   W 1:10 pm - 3:50 pm   Joel Lee

ANTH 323 (F) Democracy and Citizenship in the Age of Multiculturalism (DPE)
Democracy (and its particular implementation in the United States) is regularly taken as an unconditional ideal for the rest of the world. In this class, we will analyze democracy as a culturally and historically specific form of social relations and meanings. We will carefully examine a broad range of phenomena that pertain to democracy—for instance, cultural notions of participation in public life in Post-Socialist Germany or categorization of citizens in contemporary India, attachment to homeland among migrant workers in Russia or transnational rhetoric of Chinese bloggers. By so doing, we will study local meanings, circulating discourses, multiple contestations, and changing forms of power in regimes that are heralded as democratic. Our focus on citizenship (broadly defined)—i.e., a recognized right to be different while being accepted as a part of a national community—will bring to light complex issues in the relationship between the state and its subjects. We will discuss how men and women, the abled and the disabled, the migrants and the natives identify with their statuses and define their place in state structures. Anthropological studies of citizenship and diversity of forms of belonging and identification in democratic states will enable us to understand cleavages of power inequality and conceptual predicaments of social fairness in the contemporary world. Ethnographic studies from around the world will be used to provide specific examples of the ability and failure of democratic regimes to govern their varied populations.

Requirements/Evaluation: one long research paper, three book reports, and seminar discussions

Prerequisites: ANTH 101 or SOC 101 or by permission of the instructor

Enrollment Limit: none

Enrollment Preferences: juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Through an in-depth examination of case-studies of citizen exclusion and inclusion around the world, the course will foster students' critical engagement with a concept of democracy. Special attention will be paid to a differential access to power on a basis of gender, disability, migration status, and ideological constructions of difference.

Not offered current academic year

ANTH 324 (S) Empires of Antiquity

Cycles of rise and collapse of civilizations are common in our human past. Among the most fascinating cases are those of empires, conquest-based states that encompass a number of different ethnicities, polities and peoples. However, their rise and often rapid collapse begs an important question: how stable have empires been in human prehistory? Are they intrinsically unstable political forms? The course will address these questions by examining the major empires of the Old and New World in pre-modern history: Persian; Assyrian; Mongol; Roman; Qin Chinese; Ottoman; Aztec; and Inca empires. Using readings by political scientists, historians, epigraphers, archaeologists and political anthropologists, we will consider the causes of the expansion and collapse of these empires. We will also explore their sociopolitical and economic structures as mechanisms for their maintenance in order to provide a cross-cultural comparison of the differential success and final decline of all these empires.

Class Format: seminar

Requirements/Evaluation: research paper, class presentation and active participation

Prerequisites: none; open to first-year students

Enrollment Limit: 25

Enrollment Preferences: ANSO majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ANTH 328 (F) Emotions and the Self

Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology,
sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things—neuro-physiological states—or ideas—sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

Requirements/Evaluation: typical for that of a tutorial
Prerequisites: none; open to first-year students with instructor's consent
Enrollment Limit: 10
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

ANTH 330 (F) The Documentary Project: Ethnography and the Visual Narrative

The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people's lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or "engagement" between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about "truth" and "objectivity" in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

Requirements/Evaluation: develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual and audio content; participate in class critiques
Prerequisites: SOC 236 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: FMST Core Courses
Not offered current academic year

ANTH 334 (S) Imagining Joseph

Cross-listings: REL 334 JWST 334 COMP 334 ANTH 334

Primary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and
Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

**Requirements/Evaluation:** 3- to 5-page weekly response papers; 15-page final paper; class participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** based on responses to a questionnaire

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**ANTH 337 (F) Race, Sex & Gender in Brazil (DPE)**

**Cross-listings:** ANTH 337 WGSS 337

**Secondary Cross-listing**

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related to women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: Students must also commit to registering for a winter study travel course with a trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

**Requirements/Evaluation:** research paper and its various components, participation

**Prerequisites:** none

**Enrollment Limit:** 7

**Enrollment Preferences:** students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

**Expected Class Size:** 7

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The cost of the winter study travel portion is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student.

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 337 (D2) WGSS 337 (D2)

**Difference, Power, and Equity Notes:** This is a class about social justice movements and racial/gender/sexual diversity. It includes experiential learning devoted to these issues and engages questions related to the origins of inequality and prejudice in Brazil.
ANTH 350  (F)  Queer Tongues & Lavender Linguistics  (DPE)

Cross-listings: ANTH 350  AMST 351  WGSS 350

Secondary Cross-listing

This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairtales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

Requirements/Evaluation: IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures

Prerequisites: None; prior coursework in WGSS may be helpful, but is not required

Enrollment Limit: 15

Enrollment Preferences: WGSS majors; short statements of interest will be solicited in the event of overenrollment

Expected Class Size: 15

Grading: yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 350 (D2) AMST 351 (D2) WGSS 350 (D2)

Difference, Power, and Equity Notes: This course examines the centrality of power in communication as broken down along axes such as sex, gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

Attributes:  WGSS Racial Sexual + Cultural Diversity Courses

ANTH 371  (F)  Medicine and Campus Health in Disruptive Times  (DPE) (WS)

Cross-listings: STS 370  WGSS 371  ANTH 371

Primary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We
consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities already structured by power, privilege, and engaged practices.

**Requirements/Evaluation:** Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

**Prerequisites:** A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

**Enrollment Limit:** 20

**Enrollment Preferences:** Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

**Cross-listings:** ANTH 412  WGSS 412

**Secondary Cross-listing**

This seminar examines recent and canonical work in queer anthropology, exploring how different cultures construct sexual and gender identities and
subjectivities, and what happens when dominant paradigms such as the Euro-American LGBT model become enmeshed in globalization, late capitalism, and consumerism. We begin with a series of case studies highlighting alternative gender and sexual formations in various cultures around the world, emphasizing how these seemingly "authentic" local categories are themselves the products of historical shifts, colonial relations, and political economy. We also examine how these categories overlap, conflict with, subvert, or syncretize with the increasingly global category of "gay." In addition to reading queer ethnographies, we will also learn the methods required for doing ethnography ourselves, including interviewing techniques, participant observation, writing thick description, data analysis, and editing.

**Requirements/Evaluation:** ethnographic writing assignments (e.g., interviews, field notes, essays, etc.)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors and others with substantial background in Women's, Gender and Sexuality Studies or Anthropology and Sociology Studies; statements of interest will be solicited

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** WGSS junior/senior seminar

**Distributions:** (D2)

Not offered current academic year

**ANTH 99 (W) Independent Study: Anthropology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
ANTHROPOLOGY AND SOCIOLOGY (Div II)

SOCIOLOGY

Chair: Professor James Nolan

- Nicholas Carr, Visiting Professor of Sociology
- David B. Edwards, James N. Lambert ’39 Professor of Anthropology
- Antonia E. Foias, Professor of Anthropology
- Peter Just, Professor of Anthropology
- Joel Lee, Assistant Professor of Anthropology
- James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Professor of Sociology
- Christina E. Simko, Assistant Professor of Sociology
- Ben Snyder, Assistant Professor of Sociology
- Phi H Su, Visiting Assistant Professor of Sociology

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS
The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements
For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses
Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**
- ANTH 101 How to Be Human

**Sociology**
- SOC 101 Invitation to Sociology
Joint Courses
ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

Elective Courses
Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS
In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION
Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY
Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don’t have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.
THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

SOC 101 (F)(S) Invitation to Sociology

This course provides students with an introduction to sociological analysis and an overview of sociology as a discipline. We will focus on the relationship of individuals to the social world and become acquainted with systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict.

Requirements/Evaluation: several short papers, a group presentation, and a final
Prerequisites: none

SOC 210 (S) Networks of Power: Technology in Human Affairs

Cross-listings: STS 210 SOC 210
Primary Cross-listing

Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly the constructivist and determinist theories, by examining major technological systems that shaped modern society, such as the telegraph system, the electric grid, radio and television broadcasting, and the internet. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people’s lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

Class Format: hybrid
Requirements/Evaluation: attendance and participation, team assignments, two in-class exams, one 15-page seminar paper
Prerequisites: none
Enrollment Limit: 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 210 (D2) SOC 210 (D2)

Not offered current academic year

**SOC 211 (S) Race, Environment, and the Body**

**Cross-listings:** AMST 211  ENVI 211  AFR 211  SOC 211

**Secondary Cross-listing**

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Prerequisites:** none

**SOC 212 (S) Understanding Social Media**

**Cross-listings:** STS 214  SOC 212

**Primary Cross-listing**

Over just the last twenty years--beginning with Friendster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

**Class Format:** hybrid
**SOC 216  (F)  The City**
Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

**Requirements/Evaluation:** response papers, mid term exam and final research paper

*Not offered current academic year*

**SOC 217  (F)  Inequality in a Classless Society: The Soviet Experiment and its Aftermath  (DPE)**

**Cross-listings:** ECON 107  SOC 217

**Secondary Cross-listing**

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with, justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

**Requirements/Evaluation:** Class participation; small writing assignments and research exercises; and a final research project

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** 1st and 2nd-year students thinking about majoring in Anthropology, Sociology, or Economics
SOC 218  (S)  Law and Modern Society
This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as Japan, England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

Class Format: discussion
Requirements/Evaluation: a short paper and midterm and final exams
Prerequisites: none
Enrollment Limit:  30
Enrollment Preferences: Priority given to sociology majors.
Expected Class Size: 30
Grading:  no pass/fail option,     yes fifth course option
Distributions:  (D2)
Attributes:  JLST Interdepartmental Electives

SOC 219  (S)  Images and Society
"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images—and even vision itself—are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

Requirements/Evaluation: active class participation, several response papers, a midterm paper and a take-home final
Prerequisites:  none; open to all
**SOC 221 (F) Money and Intimacy (WS)**

Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies vis-à-vis the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed ‘emotional capitalism’. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

**Requirements/Evaluation:** Each student will be expected to submit five or six 5-6-page essays and five or six brief responses. In addition, each student will be expected to actively participate in tutorial discussions. There will be no final paper or exams.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will be required to submit a 4-5 page essay every other week. During the week when students are not submitting essays, they will submit a brief (1-2 page) response to their partner's essay.

---

**SOC 224 (F) Going Nuclear: American Culture in the Atomic Age**

**Cross-listings:** SOC 224 HIST 273

**Primary Cross-listing**

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, and the destructive effects of the bomb’s initial use in Hiroshima and Nagasaki and ongoing testing in the Marshall Islands. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

**Requirements/Evaluation:** a midterm, a final exam, and a 10- to 12-page research paper
**SOC 228 (F) The Panopticon: Surveillance, Power, and Inequality** (DPE)

**Cross-listings:** STS 229 SOC 228

**Primary Cross-listing**

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, the emerging total surveillance state in Baltimore City, and whether social media is turning us all into self-surveillance addicts.

**Class Format:** This class will be taught online only with both synchronous and asynchronous components. Students will be asked to attend one synchronous video meeting per week. The asynchronous portion will involve discussion of readings and video lectures.

**Requirements/Evaluation:** participation, reading responses, midterm essay, final paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 229 (D2) SOC 228 (D2)

**Difference, Power, and Equity Notes:** This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance in Baltimore City and the question of if and when surveillance is appropriate there, given the city's ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

**Not offered current academic year**

**SOC 230 (S) Memory and Forgetting** (DPE)

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable
counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Christina E. Simko

SOC 234 (S) How Emotions Work

What could be more personal and unique than one's own emotions? Over the last century, sociologists, anthropologists, historians, and social psychologists have challenged this taken for granted view of emotion, revealing just how much context, institutional structures, and history shape feeling. Emotion does not just emerge from an individual's brain and body; it is also a product of intersubjective dynamics outside the individual. In this deeply interdisciplinary course, students explore how societies shape emotion. Beginning with psychological research on the brain/body connection, we build a capacious model for how social context, norms, and institutions interact with individual psychology to produce both conscious and unconscious forms of feeling. As the course progresses, we zoom further out from the individual level and unpack emotional dynamics at the national, cross-cultural, and civilizations levels. Along the way, we take a deeper look at specific emotions, including love, shame, sympathy, sadness, and happiness. The course concludes by focusing on a pressing social problem--the seemingly global crisis of mental illness on college and university campuses. What is causing this crisis? What can we do to address this issue right here in our community?

Requirements/Evaluation: participation, two short essays, midterm essay, emotion map activity, open space meeting, final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year
number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

Prerequisites: none

SOC 240 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

SOC 241 (S) Meritocracy

Cross-listings: PSCI 241 SOC 241
Secondary Cross-listing

Although fewer than 1% of Americans have a degree from the country’s top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the New York Times, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy--rule by the intelligent--in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Class Format: Remote

Requirements/Evaluation: two short papers, one long paper, take-home final exam, discussion questions, class participation

Prerequisites: none

SOC 244 (S) What They Saw in America

Cross-listings: SOC 244  AMST 244  HIST 366

Primary Cross-listing

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

Requirements/Evaluation: A midterm examination, two short essays, and a final paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.

SOC 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE) (WS)
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, Latvia and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: The course will meet remotely for the most part, although in-person meetings with the appropriate precautions may be arranged at the tutorial partners’ and instructor's discretion.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 248 (D2) GBST 247 (D2) RUSS 248 (D1)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Attributes: GBST Russian + Eurasian Studies Electives

Not offered current academic year

SOC 252 (F) Im/mobilities

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic reveals, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality in the time of coronavirus. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, three reflection papers (4-5 pages), and two drafts of an op-ed (with class presentation/workshopping)

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Given to first-year students and sophomores

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
SOC 262  (S)  Paper Trails
Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold—when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume their own paper trails and imagine alternative ways to create, alter, and subvert them.

Requirements/Evaluation: thoughtful and consistent class participation, one works-in-progress presentation, regular fieldnotes, one 10- to 15-page research paper based on ethnographic methods (virtual or auto)
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

SOC 264  (S) Transnational Activism: Practice, Problems, Ethics  (DPE)
Cross-listings:  SOC 264  WGSS 263
Secondary Cross-listing
The world's got problems. These problems don't respect national boundaries. This class looks at how activists have engaged across borders and with transnational institutions in order to address transnational problems like class inequality, sexism, homophobia, climate change, and more. It asks: what are the different forms that transnational activism takes and how have transnational activists advanced their goals? Why and how have transnational activists' efforts failed? What are the practical and ethical difficulties associated with transnational activism? What does ethical transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.

Requirements/Evaluation: class attendance/participation; critical profile of transnational activist; essay or project proposal, final essay or project
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Women's, Gender, and Sexuality Studies majors and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
SOC 264 (D2) WGSS 263 (D2)
Difference, Power, and Equity Notes: This course centers activism organized around various axes of difference, enabling students to learn about
how various groups are defining and pursuing equity. It requires students to explicitly engage the question of ethical intervention in political movements, stressing attentiveness to the dynamics of privilege and marginalization internal to movements.

**SOC 291  (S) Religion and the American Environmental Imagination**

**Cross-listings:** SOC 291 REL 291 ENVI 291

**Secondary Cross-listing**

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

**Requirements/Evaluation:** a 15- to 18-page research paper and several shorter writing assignments

**Prerequisites:** ENVI 101 or permission of instructor

**Cross-listings:** COMP 315 WGSS 302 REL 301 SOC 301 STS 301 SCST 301

**Secondary Cross-listing**

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

**Requirements/Evaluation:** regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project

**Prerequisites:** none

**Enrollment Limit:** 15
Enrollment Preferences: Religion majors, then majors from cross-listed departments

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

SOC 303 (S) Cultures of Climate Change

Cross-listings: SOC 303 ENVI 303

Secondary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

SOC 308 (S) What is Power?

Cross-listings: REL 308 STS 308 SOC 308 PSCI 306

Secondary Cross-listing

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect. We will trace classic philosophical accounts of power and causation (in European and Chinese philosophy), as well as more recent developments in...
philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Hobbes, Hume, Locke, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, Sunzi, and Max Weber.

**Class Format:** Remote

**Requirements/Evaluation:** critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** Religion majors, STS concentrators,

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 308 (D2) STS 308 (D2) SOC 308 (D2) PSCI 306 (D2)

**Attributes:** PHIL Related Courses

Not offered current academic year

**SOC 314 (F) The Social Ecology of Racial and Gender Inequity** (DPE)

**Cross-listings:** SOC 314  WGSS 314

**Secondary Cross-listing**

Why the political furor over monuments? What would a feminist city look like? Does racial justice require integration? This course trains your focus on space and place, asking you to take a socioecological perspective on race, gender, and other axes of privilege and marginalization. In it, we examine how ideas about race, gender and more shape space as well as how the design of space reinforces social constructs and power relations. After examining specific regions (the city, the suburb, the country) and their relation to one another, we examine specific sites (public transport, public toilets, libraries, houses). The course enables students to better understand the tenacity of inequity by drawing attention to its spatial dimension while at the same time introducing students to -- and providing students tools to engage in -- spatial interventions designed to disrupt vicious social-spatial cycles.

**Requirements/Evaluation:** attendance, class facilitation, problem identification report, two presentations, reflection

**Prerequisites:** WGSS/SOC Majors

**Enrollment Limit:** none

**Enrollment Preferences:** Women's, Gender, and Sexuality Studies majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 314 (D2) WGSS 314 (D2)

**Difference, Power, and Equity Notes:** This course introduces students to a socioecological approach, giving them a lens which can help them understand how important axes of difference--race and gender--are socially constructed as well as the stubborn persistence of racial and gender power differentials. Students in this course will be required to apply this lens to their own experience, as well as to discuss difficult questions about different obstacles and potential paths to greater equity in social relations.

**Attributes:** WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

**SOC 315 (F) Culture, Consumption and Modernity**

How do lifestyles, fashions and trends appear and evolve? Are we authors of our own taste? What structures our choices of goods and activities?
What is it that gives meaning to objects and makes them desirable? Are there non-consumer societies in the modern world? How has globalization changed the ways people consume in different parts of the globe? This course will explore consumption and consumer practices as products of modernity and will analyze the political, cultural and social agendas that have transformed consumption over time. Politics of consumption (the way in which seemingly free and independent consumption choices aggregate into the existing system of global capitalism) will be treated alongside its symbolic element: the role of consumer practices in creating and articulating identities, building relationships and creating solidarities. We will look at fashion, advertising, arts and shopping in places as varied as nineteenth-century France, socialist Russia, and in contemporary United States, tracing both the mechanisms that structure patterns of consumption, and the consequences that these patterns have for the larger social order.

Requirements/Evaluation: full participation, ten journal entries and a 15-page term paper that will go through a draft and revision stage

Prerequisites: none; open to first year students

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

Attributes: ENVI Humanities, Arts + Social Science Electives GBST Urbanizing World Electives

Not offered current academic year

SOC 324 (S) Memory and Identity (DPE)

Our sense of self is inextricably tied to our understanding of our past, both as individuals and as members of society. This sense of origins, however, is far from natural; it itself has its origins in the debates and politics of the time, and evolves under an array of influences. This course analyzes discourses of collective and individual identity and the mechanisms involved in the formulation of the individuals’ sense of their place in the world. Topics include: media of memory, politics of commemoration, nostalgia and selective forgetting, narratives of trauma and of a “golden age,” the invention of tradition, and battles over remembrance and heritage, such as the struggles over the proper way to face the difficult past around the world, with a particular emphasis on the United States and on the memory wars in the post-Soviet space.

Requirements/Evaluation: extensive class participation, several short papers, and a final research project with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it explores the diversity of the ways in which communities imagine and engage with their past, and puts struggles over memory in the context of groups’ struggles for power and visibility.

Not offered current academic year

SOC 326 (S) Being Mortal

One of the defining features of the human condition is our awareness of our own mortality. How do we cope with this awareness? How does it influence our social institutions? We will begin by exploring how social theorists such as Emile Durkheim, Max Weber, Ernest Becker, and Peter Berger grappled with mortality and its significance for human social life. We will then turn to the social institutions that structure our confrontation with mortality today. How, why, and with what consequences has death been "sequestered" in modern Western societies and set aside from the social world of the living? What rites and rituals remain for coping with death and dying, and how do our cultural assumptions influence the experiences of grief, loss, and mourning? How does modern medicine—which is oriented toward cure but must ultimately confront the inescapable realities of aging and death--deal with mortality? How have hospice, palliative care, and debates over physician-assisted suicide changed the landscape in recent years? How do societies cope with collective losses in the aftermath of wars, disasters, and atrocities? Our focus will be on the United States, but we will also consider cross-cultural comparisons.

Requirements/Evaluation: three 6- to 7-page papers; an in-class presentation; thoughtful and consistent participation in class discussion

Prerequisites: none
SOC 329  (F) Work and Future of Capitalism
What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism’s past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into racialized social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism’s 19th century past. The course concludes by asking students to imagine what work might look like in the next century. Should we continue to work at all? What kinds of social activity should we value, and how would we go about taming, eroding, or even smashing capitalism to allow them to flourish?

Class Format: This class will be taught online only with both synchronous and asynchronous components. Students will be asked to attend one synchronous video meeting per week. The asynchronous portion will involve discussion of readings and video lectures.

Requirements/Evaluation: participation, reading responses, midterm paper, final paper
Prerequisites: none

SOC 335  (F) Nowheres
We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous communities across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

Requirements/Evaluation: Thoughtful and consistent class participation, one 15- to 20-page research paper, several shorter writing assignments and drafts building up to the research paper, and class project to create a speculative digital atlas
Prerequisites: None

Enrollment Limit: 16
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Not offered current academic year
SOC 338 (F) Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: HSCI 338  SOC 338  STS 338  REL 338

Primary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the transhumanist movement and its overriding aims: the augmentation, transformation, and eventual transcendence of human biological constitution; the realization, through speculative technoscientific means, of an enhanced or even "postbiological existence"--a "posthuman condition," "Humanity 2.0." Through close readings of primary historical documents, transhumanist texts, scholarship on transhumanism, works of science-fiction film, literature, and popular culture, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas and practices have emerged, circulated, and taken up residence. To that end, we will consider the ties of transhumanism to eugenics and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of beliefs, practices, and forms of association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about religion, technology, embodiment, and ways of being human.

Class Format: Remote

Requirements/Evaluation: informal weekly writing, two short review essays, and one 15-page seminar paper

Prerequisites: Prior coursework in sociology-anthropology, history, religion, or science and technology studies.

Enrollment Limit: 14

Enrollment Preferences: Anthropology and Sociology majors and Science and Technology Studies concentrators

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
HSCI 338 (D2)  SOC 338 (D2)  STS 338 (D2)  REL 338 (D2)

Not offered current academic year

SOC 362 (S) Stories We Tell

From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"--that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This course grapples with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? What role does storytelling play in politics and social movements? Specific topics will include confessional culture, podcasts, memoir, politics, and social change. Along the way, we will pay explicit attention to medium, and consider how sociologists might learn from journalists, documentarians, and memoirists to convey stories from their own research.

Requirements/Evaluation: thoughtful and consistent participation in class discussion; four response papers (2 pages each); a narrative analysis essay (5 pages); and a major final project (either a 10-page analytical paper or an equivalent writing project presented as a podcast)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
SOC 363 (F) Cold War Technocultures

Cross-listings: SCST 401 STS 402 SOC 363

Primary Cross-listing

In this seminar students will pursue sociohistorical analyses of Cold War American culture(s) by attending to key points of intersection between politics, aesthetics, and major technoscientific developments during this period. Part I will focus principally on the emergence of the computer and its role in shaping American infrastructure and styles of thought aimed at Soviet "containment." We will trace the historical threads connecting MIT's "Whirlwind" computer project and the SAGE continental air defense system; nuclear wargaming at the RAND Corporation and the aesthetics of "thinking the unthinkable"; the science of cybernetics and the prospect of automation; and ultimately the role of computation, intermedia, and systems logic in perpetrating the atrocities of the Vietnam War. Part II will take up the Cold War space race--from Luna 2, Sputnik I, and Yuri Gagarin to Projects Mercury, Gemini, and the Apollo moon landing. Within this context we will also consider the Club of Rome's Limits to Growth report; plans backed by NASA for the industrialization and colonization of outer space; and the place of science-fiction as a Cold War aesthetic (print, televisual, cinematic). Part III, finally, will explore key moments of conflict, resistance, appropriation, and unintended consequences of Cold War technoscientific developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural casualty of the U.S./CIA-backed Chilean coup of 1973; the New Left, the American counterculture, new social movements, and the countercultural roots of new media and neoliberalism.

Requirements/Evaluation: two 5-page book review essays, weekly 1-page papers, midterm essay exam, final essay exam

Prerequisites: STS 101 or instructor consent; prior coursework in Anthropology and Sociology and/or History

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors, Science and Technology Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

SCST 401 (D2) STS 402 (D2) SOC 363 (D2)

Attributes: STS Senior Seminars

Not offered current academic year

SOC 368 (F) Technology and Modern Society

Cross-listings: ENVI 368 SOC 368

Primary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option
SOC 372  (S)  Time and Temporality
Duration, rhythm, speed, pace, trajectory, sequence, articulation, busyness, boredom, flow--time is one of the most fundamental categories of our experience of reality. Since the founding of the discipline, sociologists have been interested in how time, while seemingly given and natural, is deeply influenced by history and society. This two-part course will introduce students to the sociological analysis of time and temporality. In part one, students will explore the emergence of the so-called "modern western temporal order"--the sense of time that many people take for granted as the way things are. We will excavate the historical roots of schedules, clocks, calendars, and time zones; examine how capitalism and colonial conquest disseminated particular notions of time around the globe; and discuss leading theories of how constructions of time change through history and vary among communities. In part two, we will focus on one of the most frequently lamented and celebrated qualities of modern temporality: acceleration. Is the world speeding up? Why do so many people feel always pressed for time? What are the promises and limits of speed, acceleration, and ceaseless change for building a robust democratic society?

Requirements/Evaluation: participation, time diary analysis (3-5 pages), final paper (10-12 pages)
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Winter Study ---------------------------------------------------------------

SOC 31 (W) Senior Thesis: Sociology
To be taken by students registered for Sociology 493-494.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

SOC 99 (W) Independent Study: Sociology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
ARABIC STUDIES
(Div I, with some exceptions as noted in course descriptions)

Chair: Professor Magnus Bernhardsson

- Brahim El Guabli, Assistant Professor of Arabic Studies
- Amal Eqeiq, Assistant Professor of Comparative Literature
- Nicholas R Mangialardi, Visiting Assistant Professor of Arabic Studies
- Lama Nassif, Assistant Professor of Arabic Studies

Middle Eastern and Maghrebi Studies is a vibrant, growing, and important field in the United States and around the world. Students wishing to enter this rich and varied discipline can begin with a major in Arabic Studies at Williams. The major is designed to give students a foundation in the Arabic language and to provide the opportunity for interdisciplinary and multidisciplinary study of Arab, Islamic, North African and Middle Eastern literatures, art, film, history, religion and politics.

THE MAJOR IN ARABIC STUDIES

Students wishing to major in Arabic Studies must complete ten courses, including the following six courses:

ARAB 101-102 Elementary Arabic
ARAB 201 Intermediate Arabic I
ARAB 202 Intermediate Arabic II
ARAB 301 Advanced Arabic I
ARAB 302 Advanced Arabic II

Students must also take at least one 400-level ARAB course, in addition to three other courses in Arabic and Middle Eastern Studies in Arabic Studies or affiliated units. At least one of these courses should be from the arenas of language and the arts (DIV I) and at least one from politics, religion, economics, history, etc. (DIV II). Students should consult with the Department to confirm that electives are authorized.

Students who place into more advanced language courses may substitute additional courses, adding up to a total of at least nine courses.

Up to four courses from approved study abroad programs may be counted toward the major.

THE CERTIFICATE IN ARABIC

The Certificate in Arabic demonstrates that a student has acquired a working foundation in the language. The sequence of eight language and culture courses is designed to supplement a student’s major at Williams by enabling the student to expand their knowledge in a related field.

Required Courses

ARAB 101
ARAB 102
ARAB 201
ARAB 202
ARAB 301
ARAB 302

At least one elective course, either in Arabic literature, arts, or culture, or in Arabic history, religion, politics, economics, etc.

Students must earn a cumulative grade average of B or higher in the sequence of seven courses.

Students who enter Williams with previous training in Arabic may be exempted from up to two of the required seven courses. Thus, in order to earn a certificate, a student must take no fewer than five courses (including three language courses) after enrolling at Williams.

THE DEGREE WITH HONORS IN ARABIC STUDIES

Prerequisites
Honors candidates in Arabic are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

Timing

Students wishing to pursue a thesis in Arabic are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a one- to two-page proposal and a preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (ARAB 493-W31-ARAB 494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (ARAB 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

Characteristics of the Thesis, Evaluation, and Major Credit

The topic of the thesis must have to do with some aspect of Arabic language, culture, history, politics, etc. and will be worked out between the thesis writer and her/his advisor. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign the grades for the thesis courses (ARAB 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major—including the thesis course (ARAB 493-W-494)—is 10, i.e., one of the thesis courses may substitute for one elective.

STUDY ABROAD

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. We may need specific information (assigned readings) to determine whether the course counts for Div I or II major credit.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No. Students can receive credit toward the major’s language requirements from for-credit summer language programs like Middlebury, etc. These count toward the 4-course maximum.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Make sure you have the needed number of Div I and Div II courses for the major. Know the difference.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
learned they wouldn’t:

It has happened, but we try to be as flexible as possible.

ARAB 101  (F)  Elementary Arabic

This is the first course in the year-long Beginning Arabic sequence. It will help you establish a foundation of communicative competence and understanding of the Arabic language and culture. The course adopts an integrated-skills approach with a focus on “formal Arabic” (or so-called Modern Standard Arabic), the language of formal writing and speech in Arab countries, while simultaneously familiarizing you with one variety of spoken Arabic. The course focuses on day-to-day situations and familiar topics.

Requirements/Evaluation:  tests, daily homework, active class participation, a skit, a culture portfolio, and engagement in a variety of co-curricular activities

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering a major in Arabic Studies

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the Winter Study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Distributions: (D1)

Fall 2021

SEM Section: 01   M-F 10:00 am - 10:50 am   Nicholas R Mangialardi

ARAB 102  (S)  Elementary Arabic

This is the second semester of the Beginning Arabic sequence. This course will continue building the listening, speaking, reading and writing skills students acquired in Arabic 101. Arabic 102 will also develop your competence in Modern Standard Arabic (MSA) primarily. The students will be equipped with the vocabulary, reading facility, grammatical skills as well as the cultural competence they need to navigate familiar topics and simple communication situation in MSA. Students will expand the range of topics, grammar, tenses, and pronouns they use to express themselves both orally and in writing in MSA. This second semester will allow students to listen (to), speak, read, and write about a variety of topics that are geared toward consolidating and enriching their prior acquisitions in Arabic.

Requirements/Evaluation: weekly quizzes, daily homework, in-class participation, skits, presentations, recordings, and assiduous participation in cultural events organized by the department in Arabic (Arabic table; movie nights etc)

Prerequisites: ARAB 101

Enrollment Limit: 12

Enrollment Preferences: In the event the course is over-enrolled, priority will be given to students majoring or intending to major in Arabic Studies.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken.

Distributions: (D1)

Spring 2022

LEC Section: 01   M-F 10:00 am - 10:50 am   Nicholas R Mangialardi

ARAB 109  (S)  The Iranian Revolution  (DPE) (WS)
The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini’s vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran’s geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

Class Format: Hybrid

Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

Prerequisites: No prerequisites.

Enrollment Limit: 10

Enrollment Preferences: First Years and Sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 109 (D2) HIST 109 (D2)

Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians

Attributes: HIST Group E Electives - Middle East

ARAB 201 (F) Intermediate Arabic I (DPE) (WS)

This course will build on the students' acquisitions in Arabic 102 to consolidate their learning of the Modern Standard Arabic and one variety of spoken Arabic. In addition to expanding students' vocabulary and enhancing their communication skills, the course will deepen their knowledge and use of grammar in both speaking and writing. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing cultural appreciation of Arabic-speaking countries.

Requirements/Evaluation: quizzes, tests, homework, and active class participation
Prerequisites: ARAB 102 or placement test
Enrollment Limit: 12
Enrollment Preferences: If the course is overenrolled preference will be given to those who intend to major or do a certificate in Arabic.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: This course involves a great deal of writing, ranging from vocabulary and grammar-focused exercises to written assignments about a variety of topics. Students will receive extensive and timely feedback on this written work.

Difference, Power, and Equity Notes: Any language is the locus of issues of difference, power, and equity. Students will learn about gender and pronouns. They will wonder why Arabic does not have a gender neutral pronoun. Students will understand how Arabic acts as a dominant language in places minority languages in the Middle East and North Africa. Students will emerge from the course with a critical understanding of Arabic language's politics.

ARAB 202 (S) Intermediate Arabic II

As a continuation of ARAB 201, this course will expose students to Modern Standard Arabic and one variety of spoken Arabic while increasing their cultural literacy in Arab civilization. Our main textbook will be Al-Kitaab fii Ta'allum al-'Arabiyya Part II but outside materials from diverse media such as television and newspapers will also be included. Class will be conducted in Arabic.

Class Format: class meets four hours a week in two 75-minute sessions and one 50-minute session. An additional conversation session is required.
Requirements/Evaluation: active participation, daily homework, writing portfolio, oral components, quizzes, midterm exam, and final exam
Prerequisites: ARAB 201 or placement test
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARAB 209 (S) Saharan Imaginations (DPE) (WS)

Cross-listings: ARAB 209 ENVI 208 COMP 234

Primary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Approached mainly through the prism of adventure and exploitation, the desert is portrayed as a dead space. However, literature and film furnish a unique opportunity to engage critically with
the ways Maghrebi and Middle Eastern culture production represents deserts and raises issues of fundamental importance to these societies. This course offers students the opportunity to engage in close readings of novels and film through the theme of the Sahara and Saharan space. Reading through the politics of human mobility and life in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Saharan sub-genre of African and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Deconstructing reductive Saharanisms, students will see the desert for what it is, rather than what it is portrayed to be or stand for.

Class Format: hybrid

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 211 (S) Understanding 9/11 and the War in Iraq (DPE)

Cross-listings: HIST 211 ARAB 211

Secondary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

Requirements/Evaluation: short online writings and papers and a final project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

ARAB 212 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: ARTH 212  ARAB 212  REL 210

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First- and second-year students, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 222 (S) Photography in/of the Middle East (DPE)

Cross-listings: ARTH 222 ARAB 222

Secondary Cross-listing
Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: discussion

Requirements/Evaluation: midterm, Glow posts, term project

Prerequisites: none

Enrollment Preferences: none

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 222 (D1) ARAB 222 (D1)

Difference, Power, and Equity Notes: Photographs are tricky. Whose experiences and values do they really represent--those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires multiple skills--from close-looking to interdisciplinary analysis--useful in contemporary visual culture.

ARAB 224 (F) Second Language Learning: The Learner, the Classroom, and the Social World

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers’ feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner’s identity evolve in the process of second language learning? These are some key
second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Requirements/Evaluation: active class participation, assignments, article presentation and leading a class discussion, language learner interview, a research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the course is overenrolled preference will be first given to majors, then seniors, then juniors

ARAB 227 (F) Language and Society: What Does Your Speech Say About You?

Cross-listings: ANTH 227 ARAB 227

Primary Cross-listing

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Prerequisites: none

ARAB 234 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 REL 234 GBST 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam
This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 234 (D2) REL 234 (D2) GBST 234 (D2) HIST 208 (D2)

**Difference, Power, and Equity Notes:** This course looks role of power, in particular imperial and colonial power in the construction of religion. To that end, the course will explore how the rise of Muslim empires shaped the construction of pre-modern Islam and subsequently the role of European colonialism in shaping the emergence of modern Islam. This course will teach students critical tools in postcolonial theory about the relationship between power and the production of knowledge and the agency of the colonized.

**ARAB 236 (S) Reading the Qur'an**

**Cross-listings:** ARAB 236 REL 236 COMP 213 GBST 236

**Secondary Cross-listing**

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

**Requirements/Evaluation:**
- class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

**Prerequisites:** none

---

**ARAB 242 (S) Women, Gender, and Sexuality in Islam** (DPE)

**Cross-listings:** REL 242 WGSS 242 ARAB 242

**Secondary Cross-listing**

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and
negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

**Requirements/Evaluation:** weekly discussion post, midterm essay, and final paper (6-8 pages)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion, Women's, Gender and Sexuality Studies and Arabic majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 242 (D2) WGSS 242 (D2) ARAB 242 (D2)

**Difference, Power, and Equity Notes:** This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

**ARAB 243 (F) Islamic Law: Past and Present**

**Cross-listings:** ARAB 243 WGSS 243 REL 243 HIST 302

**Secondary Cross-listing**

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with Draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

**Requirements/Evaluation:** weekly responses, four 2- to 3-page essays

ARAB 249 (F) Trauma and Memory in Maghrebi and Middle Eastern Literatures  (DPE) (WS)

Cross-listings: ARAB 249 COMP 249

Primary Cross-listing
Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs, films, and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels and films assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

Requirements/Evaluation: regular posts on Glow, two five-page papers, one ten-page final paper, one presentation, and participation in class

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 249 (D1) COMP 249 (D1)

Writing Skills Notes: Students in the course will write: 1) 400-word weekly, focused responses on Glow; 2) a book review (600 words); 3) two five-page papers as mid-terms; 4) one ten-page paper as a final paper for the course. Students are required to present an outline of their papers before submitting a draft paper. Students will receive detailed and consistent feedback on the writing. Students are required to incorporate the feedback to improve their drafts before they become final.

Difference, Power, and Equity Notes: Students in this course will learn how to identify and analyze gender, class, and power-related aspects of traumatic memory. The different readings assigned in this course will help students develop critical skills to examine how various forms of power and social inequality play out in memories of war, political detention, forcible disappearance, and social ostracism in the Maghreb and the Middle East.

ARAB 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World

Cross-listings: ARAB 259 AFR 259 ARTH 259

Secondary Cross-listing
From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25
Enrollment Preferences: students who have declared a major in Art History or Africana Studies

ARAB 302  (S)  Advanced Arabic 2  (DPE) (WS)

A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students’ listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials in Modern Standard Arabic. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with and in MSA in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

Class Format: course offered remotely

Requirements/Evaluation: quizzes, exams, presentations, papers, midterm examinations, and projects

Prerequisites: ARAB 301 or equivalent

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies, or students who completed ARAB 301

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In addition to the weekly writing assignments of 400-word essays, students will produce four portfolios that will involve a careful process of revisions. Each portfolio will include a series of critical reflections on graphic novels and visual storytelling in Arabic. The portfolio will be
Based on rigorous research in Arabic resources, summary and essays that can range to 800 words.

**Difference, Power, and Equity Notes:** As a content course, ARAB 302 will focus on graphic novels, graffiti and caricature in contemporary Arab visual culture. Most of the texts assigned will address the particularity of political language involved in this form and its popularity among Arab youth (and adults) as a cultural expression of dissent. The selected texts will also expose students to stories about class struggle, gender inequality, the social struggles of immigrants and refugees.

Spring 2022

SEM Section: 01  MWF 11:00 am - 12:15 pm  Amal Eqeiq

**ARAB 303** (S) **Food in the Middle East: A History**  (DPE)

**Cross-listings:** ARAB 303  HIST 303

**Secondary Cross-listing**

In this course we examine the rich culinary history of the Middle East first among the three major religions in the region (Judaism, Christianity, and Islam), then during the time of major Islamic Empires such as the Abbasids and Ottomans, and finally in the modern period. Using an array of primary and secondary sources, we explore the social, religious, literary, and economic place of food. We will study the consumption of an attitudes toward specific foodstuffs, gauging the medicinal and culinary value of spices, the historical taboos against drinking coffee and alcohol, and the dispute over various dishes within modern nationalist constructions. We will also investigate how Middle Eastern peoples from different ethnic, geographic, and religious backgrounds have historically used food to express their distinct cultural, national, and gendered identities.

**Requirements/Evaluation:** attendance, participation, map exercise, leading discussion, 3 short essays, final paper/research project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** History and Arabic Studies majors, seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 303 (D2)  HIST 303 (D2)

**Difference, Power, and Equity Notes:** This course explores a variety of themes within Middle Eastern food history and their implications to different religious communities, genders, and/or socio-economic groups, across a large swath of time. Students will be asked to explore these topics in class discussions and writing assignments, using multiple comparative perspectives.

**ARAB 307** (F) **To Die For? Nationalism in the Middle East**  (DPE)

**Cross-listings:** ARAB 307  HIST 307

**Secondary Cross-listing**

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie."

This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East. Some of the more prominent questions that this course will examine include: What is a nation? What are essential characteristics of a nation? Who are a people? Why are people ready to die for the nation? And who is included and excluded in the nationalist narrative? After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Egypt, Israel, Turkey, Iran, and Iraq. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How did traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and
Class Format: A hybrid course for students who are both on campus and remote. Depending on the number of students, the course will primarily be taught seminar style on campus following appropriate social distancing guidelines or in the tutorial format with a mix of on campus and remote groups. Some class meetings may be remote and asynchronous but this will mostly be a synchronous campus class.

Requirements/Evaluation: There will be several options to fulfill the requirements of this course including a weekly journal, oral exam or a final research paper (12-15 pages).

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors, seniors, and students with a demonstrated interest in the Middle East.

Expected Class Size: 8-10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 307 (D2) HIST 307 (D2)

Difference, Power, and Equity Notes: This course examines the power of the state to decide who is included and not included in the nationalist narrative. How does it seek to promote unity and how does it explain differences within and outside of society? Though nationalism can be a very powerful unifying factor, this course will also consider examples where nationalism has the opposite effect.

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

ARAB 308 (S) The Nile (DPE)

Cross-listings: HIST 308 ARAB 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 308 (D2) ARAB 308 (D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

ARAB 323 (F) Born to be Wild: Rethinking Animals in Pre-modern and Modern Texts (DPE)

Cross-listings: COMP 323 ARAB 323 ENVI 321

Primary Cross-listing

In the past few months, images of dolphins appearing in the Venetian canals, and wild animals roaming eerie looking post-apocalyptic deserted streets have gone viral. The majority of these images have proven to be fake, however their popularity was witness to people's hope that we can "reset" the environment and a yearning to reframe animals' positionality vis-à-vis their habitats and humans. Using critical lenses from ecocriticism and animal studies, we will be exploring texts from non-Western traditions in which animals figure strongly from pre-modern times to the age of the Anthropocene. The focus will be on Arabic, Persian and Turkish texts all in translation. The course will be traversing several genres and texts from Pre-Islamic poetry, the Quran, the 10th century Ikhwān as-Safā's epistle The Case of Animals versus Man Before the King of the Jinn, the fables of Kalīla and Dimnā, Farīd ed-Dīn Ḥattar's Conference of Birds, travelogues, paintings, contemporary film till we reach recent fiction with cyborgs and drones. Throughout the course, we will be examining themes such as diverse conceptualizations of what it means to be an "animal", what constitutes' animal agency and animal subjectivity irrespective of humans and their often utilitarian lens. We will do this by investigating how animals through these texts have been represented, imagined and reconfigured whether allegorically or otherwise as communities and in relation to humans and the environment and the implications of that. Finally, we will explore what a poetics of animal studies in these cultural and literary traditions could look like. The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Class Format: This class will be offered remotely synchronously twice a week (75 minutes each session), in addition to prerecorded asynchronous material at times.

Requirements/Evaluation: The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Arabic majors, Comparative Literature Majors, Environmental Studies Majors and Arabic certificate holders.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 323 (D1) ARAB 323 (D1) ENVI 321 (D1)

Difference, Power, and Equity Notes: This course deals with different literary traditions and their aesthetics. The approach is both synchronic and diachronic by looking at texts and their texts from different time periods and at different genres. The course will be examining what it means to be an "animal" vis-a-vis human beings and their environment and animal agency in these literary traditions as opposed to the often utilitarian lens that animals have often been viewed through.

Not offered current academic year

ARAB 329 (S) Against the Grain: The Counternarratives of Historical Fiction in the Arab World (DPE) (WS)

Cross-listings: ARAB 329 HIST 303

Primary Cross-listing

In 2011, a few months after the large scale protests in Egypt that led to Mubarak's forced abdication of power, a story circulated in social media that was then picked up by traditional media about the fabrication of a key image that goes back to the 1973 war. Every October on the annual anniversary of the war, pictures reappeared in the media, commemorating the event. A widespread one was one of Mubarak, then a major general in the army and commander of the air force, standing right next to al-Sadat looking lost in thought, while everyone else is focused on al-Sadat as he explains routes and war plans on the maps in front of them. The image had been photoshopped. Sa'd al-Shathl' who was chief of staff during the 1973 war was "airbrushed out of history" to be replaced by Mubarak in the photo, allowing for an altered historical narrative about each man's respective role and importance. Because of such incidents, the difficulty or impossibility of accessing "official" archives and the control of historical narratives by the state, historical fiction as a genre is of added significance in the Arab world. In this course, we will be examining eight works of Arabic historical fiction in translation, transregionally from the late nineteenth century to the present, with a focus more on the last few decades. Historical fiction will be examined both as epistêmē and as technē to explore its associated aesthetics and incorporation of different archives, documents and forms. We will be exploring the possibility of considering historical fiction as an alternative archive that opens up new definitions and forms of experiences, community and subjectivity instead of the traditional narrative of the nation-state. Alongside the novels that will vary from a whodunnit in contemporary Lebanon (
The Mehlis Report by Rabee Jaber) to a work that is about the fall of Granada in 15th century Spain (Granada by Radwa Ashour), we will be reading theoretical texts alongside the novels.

Requirements/Evaluation: participation and engagement with material in class: 30%; four 5 page papers: 20%; presentations/debates: 15%; midterm term project: 15%; end of term paper: 20%

Prerequisites: statement of interest

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 329 (D1) HIST 303 (D2)

Writing Skills Notes: Four 5-page papers long papers evenly spaced through the semester, a mid-term project and a research paper 10 pages long.

Difference, Power, and Equity Notes: The course aims to engage with how historical narratives have traditionally privileged those who have power, and thus see literary texts as an alternative archive that allows for counter narratives that show an array of experiences and redefinition of subjectivity and community outside of the traditional paradigm of the nation state and which allows the dismantling of the monolithic presentation of historical narratives in and of the Arab world.

ARAB 331  (F) Popular Culture in the Arab World: Youth, Populism, and Politics  (DPE)

Cross-listings: ARAB 331 COMP 332

Primary Cross-listing

Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

Requirements/Evaluation: active class participation, two shorter papers (3-4 pages), two film reviews and critical reflections (1-page), a performance, and a longer final paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students majoring in or considering a major in Arabic Studies

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 331 (D1) COMP 332 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course engages the concept of the popular through a critical examination of difference, power, and equality in the context of national revolt against colonialism, dictatorship, and socioeconomic injustice in the Arab world since the 1950s. The content will focus on addressing how voices from the margins, particularly the youth, the urban poor, and women, articulated a political language of popular resistance against the dual hegemony of state and colony.
ARAB 332 (F) Islam and Feminism

Cross-listings: WGSS 334  REL 332  ARAB 332

Secondary Cross-listing

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses so such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion, Arabic Studies, Women's, Gender and Sexuality Studies, History majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

ARAB 337 (S) Soundscape of Arabic Literature: Listening to Text and Society

In recent years, scholars of the Arab world have paid increasing attention to the ways in which sound and sonic sources can add new depth to our understanding of the region. While much research has drawn on audio recordings, this course explores sounds, songs, noises, and silence through literature to develop a multi-sensory examination of the modern Arab world. We will listen to sounds of the past and present through novels, short stories, poems, and other texts (in translation), discussing how a consideration of the aural environment can shift the way we read both literature and history. Interdisciplinary in scope, this course introduces students to scholarly approaches in literary studies, anthropology, ethnomusicology, and the emerging field of sound studies. Units in this course are organized thematically rather than by country. We begin with an introduction to sound studies, then move on to reading literary texts from the Arab world and secondary scholarly studies to consider topics ranging from the sounds of quotidian street life to those of conflict in war. Students will learn to use the soundscape as a methodological tool through classroom discussions and weekly reading and writing assignments. Knowledge of the Arabic language is not required.

Requirements/Evaluation: In-class participation, weekly short essays (2 pages), midterm project, and a final paper (12 pages).

Prerequisites: No prerequisites.

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature, Arabic Studies and Music majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ARAB 340 (F) Arab Women Memoirs: Writing Feminist History (DPE) (WS)
In this seminar we review selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? How did these women writers carve a literary space for feminist memory in modern Arabic literature? In addition to the memoirs, we will look at women’s blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere.

Requirements/Evaluation: Students will write the following: three response papers (2-3 pages), at least 6 journals entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue depict the history of women’s movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

ARAB 346 (S) Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean (DPE)

Cross-listings: ARAB 346 COMP 346

Secondary Cross-listing

This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Throughout we will read novels and watch films that focus on histories of social movements, post-independence revolutions, indigenous autonomies, dictatorship, and counter-revolutions with the aim to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. A comparative and critical reading of these texts will introduce you to the complex histories of national liberation, state terrorism and democratic imagination in two geographies in the Global South that share similar struggles against Euro-American imperialism. These texts will also familiarize you with an alternative, yet foundational, canon of Arabic, Latin American and Caribbean literatures and cinema, particularly from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Although this course is conceptualized as a South-South comparative reading of revolution and counter-revolution, it does not adhere to strict geographical parallels between the Arab World, Latin America and the Caribbean. It is mapped, however, according to major critical questions and thematic tropes that inform this topic. For example, how do contemporary Iraqi and Chilean writers and filmmakers write an aesthetic of evil in narratives that investigate the legacy of prolonged dictatorship? How do national novels in Mexico and Palestine depict parallel movements of indigenous resistance and anti-capitalist struggles? What motifs of dystopia are illustrated in narratives about post-revolution civil wars in Argentina and Syria? What histories of popular nationalism and socialism are revealed in feminist memoirs from Egypt and Cuba from the 1960s and 1970s?

Requirements/Evaluation: active class participation, two short papers (3-4 pages), two film reviews (1-page), two critical reflections (1-page), a performance, and a final paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 19
Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 346 (D1) COMP 346 (D1)

Difference, Power, and Equity Notes: This course will explore difference, power, and equality through a comparative reading of narratives of dissent and revolt. The novels examine the effects of class, ethnicity, gender and sexuality on social and economic inequalities that ultimately have mobilized revolutions in the Arab world, Latin America, and the Caribbean since the 1960s. Reading narratives of socialist revolutions from the Global South, students will hone skills to address global injustices and neoliberalism.

Not offered current academic year

ARAB 363 (F) Where are all the Jews? (DPE) (WS)

Cross-listings: REL 268 ARAB 363 COMP 363 JWST 268

Primary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Class Format: The course will be offered both in-person and remotely. Students enrolled remotely are required to watch the recorded videos of the in-person sessions in order to stay abreast of the discussions that take place in the classroom and enrich their engagement with the materials assigned in the course.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 268 (D2) ARAB 363 (D1) COMP 363 (D1) JWST 268 (D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students’ writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

In "The Lover of Blue Writing above the Sea," (1995) a poem written to console a lover after the death of his beloved, Syrian poet, Ghada al-Samman, pens: "If you are sad and burn the edge of my book/I shall come to you/like the genie in my grandmother's Damascene stories..." As these lines imply, the fantastic grandmother's Damascene stories have the power to equally amend broken hearts and restore memories of loss. In this course, we will adopt "the grandmother's Damascene stories" as a conceptual metaphor that guides our line inquiry into the intersection of Arab women's narrative and the city. We will read novels and short stories by Arab women writers about cities and capitals in the Arab world and the diaspora. The goal of this course is not only to familiarize students with prominent Arab women novelists, such as Hoda Barakat, Radwa Ashur, Liana Badr, Raja'a Alem, Alia Mamdouh, and Ahlam Mosteghanemi, among others, but also to introduce them to the literary and visual cartography of Beirut, Granada (via Cairo), Ramallah, Mecca, Baghdad, and Constantine, respectively. We will also read short stories about other cities in the world, such as New York, Paris, London, Buenos Aires and Tokyo among other world metropolis. Questions we will address include: How does the city appear as a protagonist? How do Arab women novelists represent nationhood, modernity, memory, love, war, sexuality and religion, among other themes, in their construction of urban narratives? How do these narratives map an Arab feminist metropolis? How do Arab women writers represent cities beyond the Arab world? To answer these questions, we will also look at Arab women's blogs and watch films that focus on the city as a site for spatial articulation of national histories, popular revolutions, and feminist public spheres.

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious or Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format:  Course will be offered remotely.

Requirements/Evaluation:  active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7-10 -pages)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 306 (D2) GBST 369 (D2) COMP 369 (D1) ARAB 369 (D1)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor’s feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

ARAB 370  (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation  (DPE) (WS)

Departing from the Arabic notions of takful and taddamun as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

Requirements/Evaluation: Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minutes oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

Difference, Power, and Equity Notes: South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

ARAB 401 (F) Topics in Advanced Arabic: Contemporary Arab Cinema (DPE) (WS)

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: The course will be offered remotely (Final course format to be determined closer to the semester)

Requirements/Evaluation: class participation, daily writing and reflections, quizzes, blogs, leading a movie discussion, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: if the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 5-7

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, a minimum of one speech, and a 5-7 pp. final research paper. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in these societies as positioned in a region torn by political, social, and religious conflicts.

ARAB 408 (F) Appropriating History. Who Owns the Past? (DPE) (WS)

Cross-listings: HIST 489 ARAB 408

Secondary Cross-listing

Who owns the past? How have modern states appropriated history? The political use of history is a critical ingredient in any nationalist discourse. In such narratives, the selective utilization of archaeology and ancient history often serves important functions in articulating a conscious and deliberate national history. Thus, in nationalist renderings, archaeological sites and artifacts are not merely relics of the past; they can also be potent and conspicuous symbols of national identity for the modern nation-state. In the Middle East, with its rich archaeological heritage, the relationship among politics, nationalism, and archeology has been particularly strong and interesting. This tutorial addresses the powerful nexus between history and nationalism with a special emphasis on the Middle East. It will explore the battle over who controls history and the "stuff" of history such as antiquities, land, heritage sites, and museum exhibitions and how that control has expressed itself in several Middle Eastern countries, including Iraq, Israel, Turkey, Egypt, Lebanon, and Iran. Furthermore, it will discuss how archaeology entered the political discourse, the ethics of repatriation and appropriation, and archaeology's role in contested terrains and political disputes.

Class Format: This tutorial can be taken entirely Remote. On campus students may request in-person tutorial sessions, pending the agreement of
other students and the availability of appropriate rooms.

**Requirements/Evaluation:** Format: tutorial. Requirements: 5-7 page essays or 2-3 response papers due each week

**Prerequisites:** None, though a demonstrated interest in the Middle East is important.

**Enrollment Limit:** 10

**Enrollment Preferences:** Seniors and to History and Arabic Studies majors.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 489 (D2) ARAB 408 (D2)

**Writing Skills Notes:** As a tutorial, students will receive extensive feedback on their writing each week both from the professor and their partner. Further, students will be given the opportunity to rewrite two of their papers in light of the criticism that they receive during the semester.

**Difference, Power, and Equity Notes:** This is a tutorial on a particular form of power, namely how the powerful seek to control the past. The ultimate question that this tutorial seeks to answer is: who owns the past? Which history is emphasized and which histories are overlooked? How do modern nation states in different Middle Eastern states cherry-pick the past in order to maintain and develop a national narrative that is suitable to the political and economic powers often at the expense of religious or linguistic minorities.

**ARAB 409 (F) Crescent, Cross, and Star. Religion and Politics in the Middle East**

**Cross-listings:** GBST 409 ARAB 409 HIST 409

**Secondary Cross-listing**

Is religion the most powerful force in the Middle East? Is religion becoming more prominent in the political sphere and what impact will that have on religious minorities and the status of women in the Middle East? Using a case study and historical approach, this course will consider the development of religiously inspired political ideologies in the Middle East in the 19th and 20th century. We will explore the experience of Iran, Turkey, Israel, Egypt, Saudi Arabia, Lebanon and Jordan and evaluate role of religious actors, institutions, and ideologies in constructing national identities, policymaking, state-building, regime change, conflict, and war.

**Requirements/Evaluation:** class participation and a 25-page research paper

**Prerequisites:** none; preference will be given to History, Jewish Studies and Arabic Studies Majors and to those who have taken History 207

**ARAB 411 (F) Happy Holidays! A Comparative History of Commemorations and Festivals**

**Cross-listings:** REL 321 HIST 411 ARAB 411

**Secondary Cross-listing**

What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world.
The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

**Requirements/Evaluation:** several short response papers and a 20- to 25-page final paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, especially History and Arabic Studies majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**ARAB 412  Advanced Readings in Contemporary Arabic Literature**

This course, taught in Arabic, aims at providing students with a deeper understanding of contemporary Arab literature. By navigating different literary moments, foci and genres, the course will offer a panoramic view of the contemporary literary map of the region. While the course will focus on some mainstream writers such as the Egyptian Naguib Mahfouz and the Sudanese Tayyib Salih, it will also feature stateless and non-canonical writers such as Alaa Al-Sarky and young poets using ‘amiyya’ or colloquial Arabic as their main tool of expression. We will read short stories, excerpts from novels, literary critiques, interviews with authors, examples of classical and lyrical poetry, as well as watch a number of movies based on literary adaptations. Through examining representative literary texts from various parts of the Arab region, students will not only broaden their awareness of the socio-political and cultural dynamics emanating from these works, but will also improve their linguistic and stylistic knowledge of Arabic at more sophisticated levels.

**Requirements/Evaluation:** active participation in class, reading responses, presentations, blogs, quizzes, final paper

**Prerequisites:** ARAB 302 or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Arabic Studies majors and certificate students

**Expected Class Size:** 10

**ARAB 415  (S)  Examining the Arab Cultural Landscape: What does Arabic Media Actually Say**  (DPE) (WS)

How does Arabic media represent the Arab landscape? This course will examine Arabic media as a window to the understanding of modern Arab though and culture. It will discuss how issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

**Class Format:** This course will involve two 75-minute sessions in addition to a weekly discussion session with the TA.

**Requirements/Evaluation:** active participation in class, daily assignments, blogs, quizzes, presentation, final project

**Prerequisites:** ARAB 302

**Enrollment Limit:** 12

**Enrollment Preferences:** Arabic majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)
Writing Skills Notes: The course involves extensive writing in which learners reflect on cultural topics applicable to Arabic-speaking countries such as political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization.

Difference, Power, and Equity Notes: The course explores how Arabic media reflects how Arabic societies deal with issues such as political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. We will analyze how these societies engage in discussions around these topics, common to the region, but with different local perspectives.

ARAB 416 (S) Arabic Short Stories: Societies, Cultural narratives & Literary aesthetics

In this course we will explore the literary languages of Arabic and as well as various political and socio-economic issues via a selection of short stories that hail from geographically diverse authors. Being attentive to detailed readings of the text, their context, and the environment within which the author composed the text in question, we will weave our way through these short stories, developing the four language skills in addition to cultural competency. Although the course will avoid the monolithic approach of reading these stories as a social document that is a reflection or mirror of their societies, and will be equally concerned with the aesthetics of the Arabic literary narratives, the socio-economic and political issues discussed in the stories will of relevance to the broader realms of Middle Eastern studies writ large. Tradition vs. modernity, the individual in opposition to the state, and gender issues are just some of the themes that will be discussed. In addition to the short stories provided, the class will engage in complimentary activities and material, like links to open source online videos and articles to expand on our knowledge of specific Arabic cultural and sociological phenomena. In addition to the short stories, there will be a short list of novels from which each member in the class will choose according to their interests. Reading the novel will be a term long project and will entail one-on-one meetings every two weeks with the instructor and will be tailored according to individual needs.

Requirements/Evaluation: preparation and active participation, response questions and vocabulary building homework, short 2-page essays, midterm video, and end of term paper (5-7 pages)

Prerequisites: ARAB 302 or by permission of the instructor

Enrollment Limit: 12

Expected Class Size: 4

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARAB 420 (F) Current Events from the Maghreb and the Middle East

Students in this course will engage with authentic materials from Arabic media, covering the Maghreb and the Middle East. Using original content from newspapers, magazines, websites, TV channels, podcasts, and specialized news outlets, the course will take students from intermediate high to advanced high level. Through their active engagement with the course materials, students will acquire a very diverse vocabulary, strengthen their mastery of Arabic grammar, and perform advanced linguistic skills in Modern Standard Arabic (MSA). Moreover, students in this course will be able to produce substantial narratives about complicated and abstract topics, argue for or against an idea, and discuss a variety of topics in MSA. In addition to enhancing students' listening, speaking, reading and writing skills, close, critical attention will be paid to deepening students' cultural competence. Students are expected to give three presentations through the course of the semester, write weekly response papers in Arabic, participate in a collective project, and produce a final paper about a topic of their choosing in consultation with the instructor.

Requirements/Evaluation: active participation, three presentations, collaborative project, final paper

Prerequisites: ARAB 302 or permission of the Instructor

Enrollment Limit: 15

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)
ARAB 427  Revolutions & Revolutionaries in the Arab World's Modern History  (DPE) (WS)

What is the difference between a [Thawrah] (revolution), an ['Inqil'b Sha'ab] (popular led-coup) and an ['Intif''ah] (uprising)? Was the 2011 "Arab Spring" the first time that people in the Arab world had revolted against their governments? Were the 1977 bread "riots" in Egypt an ['Intif''ah] or revolution that was quelled promptly? How does the 1958 coup in Iraq compare to the coup there five years later in 1963 or other coups across the Arab world? What were the role of the Amazigh in North Africa in rebelling against colonialism? In this course, we will be looking transnationally at the different revolutions, uprisings and coups that have taken place in the Arab world in its modern history. Through a variety of medium, the course will explore the socio-political and economic factors that resulted in these instances in history and the effects thereof. We will also be looking at the cultural production that flourished after revolutions, coups and uprisings from the blatantly propagandist to the nuanced and subversive! The course will be entirely in Arabic and aims to take participants from intermediate high to the advanced-mid/high level according to ACTFL standards. The course will be engaging with and developing, on a weekly basis all five language skills: reading, writing, listening, speaking and cultural proficiency and will focus on the language functions that are required at this level. This writing intensive course will consist of multiple forms of evaluation such as participation, debates, presentations, a mid-term video project and an end of year writing project.

Class Format: flipped classroom

Requirements/Evaluation: writing assignments, participation, debates, presentations, a mid-term video project, and an end of year writing project

Prerequisites: having done three years of Arabic language and preferably time abroad

Enrollment Limit: 10

Enrollment Preferences: seniors

Expected Class Size: 6

Grading:

Distributions: (D1)  (DPE) (WS)

Writing Skills Notes: Students will be expected to write 5-6 essays during the term, each of which consists of two drafts, in addition to a 5-page end of term paper. The focus in the essays in addition to knowledge of the subject matter, will be syntax, style, cohesion, development of arguments, and collocations. Prompt and detailed feedback will be given for both drafts to ensure improvement.

Difference, Power, and Equity Notes: The course will include material about multiple countries and their peoples in the Arab world while also being attentive to minorities and their status.

- Carolyn J. Wargula, Visiting Assistant Professor of Art
- Alena J Williams, Assistant Professor of Art

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Guy Hedreen
Art Studio Faculty Advisor: Amy Podmore (Fall), Mike Glier (Spring)
History and Studio Faculty Advisor: Ben Benedict (Fall), Mike Glier (Spring)
ART HISTORY

The history of art is different from other historical disciplines in that it is founded on direct visual confrontation with objects that are both concretely present and yet documents of the past. We emphasize analysis of images, objects, and built environments as the basis for critical thought and visual literacy. In addition to formal and iconographic analysis, we use the work of other disciplines to understand visual images, such as social history, perceptual psychology, engineering, psychoanalysis, cultural studies, and archaeology. Because of its concentration on visual experience, the Art History major increases one’s ability to observe and to use those observations as analytical tools for understanding history and culture.

Major Requirements

The Art History major requires a minimum of nine courses:

- Any three of the following six courses: ARTH 101, ARTH 102, ARTH 103, ARTH 104, ARTH 105 and ARTH 106
- Any ARTS (studio) course.
- Any two courses in Art History concerned with the following: one course in art history concerned with a period prior to 1800 and one course in art history concerned with post-1800.
- ARTH 301 Methods of Art History
- One 400-level Seminar or 500-level Graduate Seminar (in addition this course may be used to satisfy the pre-1800 or post-1800 requirement).
- One additional course, at any level.

The faculty encourages students to construct a major with historical depth and cultural breadth. The numbered sequence of courses is intended to develop knowledge and skills appropriate to students’ level of experience, ultimately supporting original, independent work at the 400-level.

100-LEVEL COURSES require no experience in the subject. They are introductions to the field that develop students’ skills in visual analysis, interpretation, and written expression and argumentation.

200-LEVEL COURSES are introductions to specific fields within art history, but normally open to students with no experience in art history. Often, there is a significant lecture component to the courses.

300-LEVEL COURSES focus more closely on specific art-historical problems, or present material in a tutorial format. The goal of these courses is to build skills needed for independent research and sustained analytical writing. Generally, there is a higher expectation of student participation or initiative, and longer and/or more frequent writing assignments. In the 300 level, students learn to work with and evaluate different types of sources, research tools, historical perspectives, and methodological approaches.

400-LEVEL COURSES are intensive discussion-oriented seminars that emphasize critical analysis and build toward student-initiated, independent work (oral presentations and sustained, analytical research papers). Advanced majors who have taken ARTH 301 are encouraged to work at the 400 or 500 level, and papers produced in these courses are normally the basis for the senior thesis.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose the Art History or the Studio Art route, to the major, while taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department’s administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ArtS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ArtH 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

Major Requirements

The History and Studio major requires a minimum of nine courses:

- Any TWO of the following six courses: ARTH 101, 102, 103, 104, 105 or 106
- ARTS 100-level course
- ARTS 200-level course
- ARTH 301 Methods OR ARTS 319 Junior Seminar
- ARTH 400-level OR 500-level course
- ARTS elective
- ARTH elective

OR ARTS 300-level course

or ARTS 418 (with permission), if pursuing a Studio track

The application for the History and Studio route must include both a written statement of purpose and a list of proposed courses. Both must be approved by two advisors—one from Art History and the other from Studio Art, and be submitted to the department’s administrative assistant before the student may register for the major.

History and Studio students whose ongoing projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Or, a student following the Studio Art track may propose a senior Independent Study project in order to pursue Honors. Those History and Studio majors with an Art History emphasis may apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Honors Seminar (ARTH 494).

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art History

To graduate with honors in art history, students are to enroll in the Senior Thesis Seminar (ARTH 494) during the Spring semester of their senior year, where they will develop an original research paper (completed in a prior course, a travel research project, or an independent study). To be admitted to the seminar, students must submit their original research paper to the Art Department’s Administrative Assistant in Lawrence no later than the end of the reading period of the Fall semester. The paper must be properly formatted and include both illustrations and bibliography. It must additionally include a thesis project proposal of 500-700 words.

Students must also secure an academic advisor for their project and complete the advising Agreement Form (available from the Art Department’s Administrative Assistant) by the end of the reading period of the Fall semester. This form serves to verify: a) your advisor’s support of your project, and b) your advisor’s approval of your plans for Winter Study. Students should plan to dedicate Winter Study to work on their thesis project and, to this end, they should enroll in ARTH 31 immediately after (but not before) notification of admission into ARTH 494. (To avoid problems should they not be admitted to ARTH 494, students should pre-register in another Winter Study course). Because faculty are not usually available during this period, it is very important for students to plan, together with their advisors, a work schedule for Winter Study with concrete goals. Admission to the Senior Thesis Seminar will be determined by the instructor of the seminar, in consultation with the Art Department faculty. The important criteria for admission are: 1) the quality, originality, and potential of the research paper on which the thesis project will be based; 2) the availability of a suitable advisor for the project, and the commitment of that advisor to supervise the work during the Spring term; 3) strong past performance in the art history route to the Major; 4) completion of ARTH 301 by the time of the application (exceptions to this rule must be granted beforehand by the chair of the Department).

In early January, the instructor will notify students of their admission to the Thesis Seminar. Since enrollment is by invitation only, students should pre-register for four classes in the Spring semester. If invited to join the seminar, students should then drop one of those courses and add the Thesis Seminar during drop-add period. The Thesis Seminar is to be taken in addition to the nine required courses for the art history route to the Major. Once in the seminar, students will revise, refine, and expand on previous research and produce a paper of approximately 25 pages. At the end of the semester, they will present a shortened version of the paper to the faculty and public at the Williams College Museum of Art.

Students who have identified a thesis topic and secured an advisor may apply early (in the Spring semester of their junior year) in order to pursue—in relation to their thesis project—summer research opportunities and/or a faculty-sponsored independent study in the following Fall semester. The procedure and criteria for students applying early are the same as those outlined above. (That is, students applying early would likewise take the Winter Study and Spring courses). Materials for early application (the same as outlined above) would be due by 5:00 pm on the Thursday preceding Spring Break.

History and Studio

History and Studio majors may follow either the Studio Art or Art History route to honors. Alternatively, a student may pursue honors through an Independent Study project, to be undertaken during Winter Study and the Spring semester under the guidance of their two advisors.

The review process for the honors candidates in the senior seminars (ARTS 418 or ARTH 494) will proceed according to the regular honors process for the respective wing of the Art Department, and will include both advisors. If the honors project is conducted via an Independent Study, the final project will be submitted to the two advisors who will determine whether or not it will receive honors. If the student chooses not to follow the Honors route, they may take either a 300-level ARTS course, or a 400-level ARTH seminar instead.
The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Studio makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors at the end of Winter Study; if the project is not well enough developed, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Seminar (ARTS 418, for which they will need permission of the instructor), if the project is primarily a matter of making art, or in an Honors Independent Study, if it is primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

**STUDY ABROAD**

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

**Art History**

Art History majors must take ARTH 301 in their junior year unless they are planning to study abroad for a full year or unless there is only one section of 301 offered; in that case, they may take the required class in their senior year (and should consider taking the course as a second-semester sophomore). The Department does not pre-approve courses for the art history major, but will offer provisional credit for courses that appear to satisfy requirements for the major. Art history majors may satisfy no more than 3 requirements abroad (the ARTS requirement may be satisfied abroad only if the student is away for the full academic year. Student may not receive credit for 400-level work while abroad). Art history students should be aware that in many programs course selection is limited and is not known before one commits to the program. It may happen that none of the art history courses offered during the semester abroad satisfy distribution requirements for the major.

**History and Studio**

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and Studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and Studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

**ARTH 101 (F) Introduction to European Art Before 1700**

**Cross-listings:** ARTH 101 REL 105

**Primary Cross-listing**

A team-taught introduction to the art and architecture of Europe from the ancient Mediterranean to Baroque Italy. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, worn, touched (even licked), held, exhibited, bought and sold, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To give students time with original works of art, our discussion-centered conferences use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, and the Williams College Museum of Art.

**Class Format:** This course has 2 components: lectures and conferences. The lectures will be twice or three times weekly, the conferences once per week. Both lectures and conferences will be held in person.

**Requirements/Evaluation:** Three shorter essays (one of which may be in the form of a take-home final exam), several quizzes, and engaged participation in conference sections

**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** Preference will be based on a short questionnaire, which students will be asked to complete if the course is over-enrolled.

**Expected Class Size:** 60
Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 102 (S) Art and Architecture from the Age of Enlightenment to the Present

A semester-long, team-taught introduction to European and American art & architecture from approximately 1600 to the present. Students will learn how to analyze art made for the widest variety of purposes, from inspiration and contemplation to commemoration and condemnation. We will look at some of this era’s most deeply moving art, including works by Rembrandt and Maya Lin, Bernini and Frank Lloyd Wright, Van Gogh and Kehinde Wiley. To the extent that we are able, we will also spend time with original works and familiarize ourselves with the wealth of resources in Williamstown: the Williams College Museum of Art, the Clark Art Institute, and the Chapin Rare Book Library.

Class Format: discussion

Requirements/Evaluation: quizzes, midterm, two papers and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: art history majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

ARTH 103 (S) East Asian Art (DPE)

Cross-listings: ASIA 103 ARTH 103

Primary Cross-listing

This course is an introduction to the history of East Asian art from prehistory to the present with particular emphasis on China, Korea, and Japan. Through thematic units, we look at artworks in their original contexts and consider how cross-cultural exchanges stimulated new interpretations across
time and space. We examine a broad range of objects including ritual bronze vessels, Buddhist temples, landscape paintings, woodblock prints, and installations. We also discuss these artworks in relation to other forms of creative expression such as ritual practice, performance, and literature. How is East Asia defined geographically and culturally? How did the exchange of ideas, trade, and travel impact the formation of East Asian art? How do artworks and artifacts help us understand East Asia's past? These fundamental questions guide our discussion. Through this course, you will learn to think critically about shared and diverse human experiences across cultures and historical periods. We will also discuss the historiography of East Asian art and analyze why certain types of objects were historically underrepresented in museum spaces and academic scholarship. Artworks from the Williams College Museum of Art and Special Collections also form an integral part of the course.

Requirements/Evaluation: attendance, class participation, worksheets, visual analysis paper (2-3 pages in length), midterm and non-cumulative final exam, virtual exhibition project and presentation

Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Open to all students regardless of major
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 103 (D1) ARTH 103 (D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity requirement by investigating the ways that migration and cross-cultural exchange shaped artistic developments in East Asia. Students will reflect on the cultural production of diverse peoples and traditions within this geographical region and confront the ways in which historical legacies of imperialism and colonialism continue to shape international relations.

ARTH 104 (F) Materials, Meanings, and Messages in the Arts of Africa (DPE)

Cross-listings: ARTH 104 AFR 105

Primary Cross-listing

This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions.

Requirements/Evaluation: weekly WCMA object lab reports, weekly reading discussion GLOW posts, bi-monthly quizzes (7 total), two reading response papers (3 pages each)

Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Art History and African Studies majors
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 104 (D1) AFR 105 (D2)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of the differences between concepts of art in
African and Western traditions, and how this difference has formed the foundation for hierarchies of power within the art world that have long
disenfranchised and disempowered artists from the continent. This course highlights this historical platform in order to renovate established biases and
assumptions about these objects that position them as 'primitive' or 'exotic' constructs.

Attributes: GBST African Studies Electives

Not offered current academic year

ARTH 105  (S)  Arts of South Asia  (DPE)

Cross-listings: ASST 107  ASIA 107  ARTH 105

Primary Cross-listing

South Asia, which includes the modern-day nations of Afghanistan, Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan and Maldives, is often
compared to the European continent. Regional societies in the Indian "subcontinent" are as distinct from each other as those of Italy, Germany and
France. Similarly, they also differ in their language, dress, diet, rituals and politics. However, parallel to the wealth of diversity, South Asia also
demonstrates a rich history of interconnectedness. This complex web of culture, language, religion and politics is best manifested in the arts of the
region. How does visual culture reflect regional variations? How does a survey of artistic style and iconography help uncover networks of exchange
across South Asia? What role did the arts play in the expression of religious traditions such as Buddhism, Hinduism, Jainism and Islam? With these
questions in mind, this course is designed as a survey of the arts of South Asia starting with the height of the Indus Valley Civilization in 2600 BCE and
ending in 1857 CE, a date that marks the cessation of independent rule in South Asia. Using the study of architecture, painting, sculpture and textiles,
students will learn how to make stylistic and iconographic analyses, while also improving their art historical writing and analytic skills.

Prerequisites: none, open to all students

Enrollment Limit: 25

Enrollment Preferences: First years, sophomores and juniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 107 (D1) ASIA 107 (D1) ARTH 105 (D1)

Difference, Power, and Equity Notes: In addition to a survey, the course also highlights the conceptual differences between the arts of South Asia
and Western constructs of art and culture. The survey will analyze how South Asian art was codified and examined during the colonial and
post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge
longstanding biases and assumptions when studying these artworks.

Attributes: GBST South + Southeast Asia Studies Electives

Not offered current academic year

ARTH 106  (F)  An Invitation to World Architecture  (DPE)

What is architecture? Built form? Object? Space? How do we think about architecture as we move around, within, and through it? What can
architecture tell us not only about material, design, and engineering, but also about the individuals, groups, and communities who make it? These
inquiries provide the starting points for thinking about what architecture means as concept, space, and practice, and how it affects the ways in which
human beings experience the world. As the primary mode through which we organize our lived reality, architecture not only channels human behavior
into specific repertoires of action and reaction but also symbolizes beliefs, value systems, and ideas about the self, gender, nation, race/ethnicity,
community, life, death, and the transcendent. Such themes, thus, constitute the critical lenses that students will use over the course of the semester to
unpack how structural form has and continues to define the human condition in the broadest sense. Drawing from a variety of texts and examples that
emphasize the diversity and complexity of architectonic traditions around the world, this course will analyze how individuals have employed
architectural strategies to solve the problems of living within diverse contexts and how such spaces not only provide meaning in everyday life but also
actively and dynamically order the world as space, object, environment, text, process, and symbol.

Class Format: This course has 2 components: lectures and conferences / discussion sections. Students will be expected to attend two lectures and
one conference / discussion section weekly. Students will sign up separately for the lecture component and the conference / discussion section
component.
Difference, Power, and Equity Notes: This course fulfills DPE requirements in two ways. First, it unsettles established presuppositions, biases, and predispositions that have positioned the "West" as "best" in canons of architectural history. Secondly, it explores how architecture - past and present - communicates, supports, and/or resists hierarchies of power and socio-political influence in society by acting as modes of propaganda, tools of imperialism, sites of resistance, and/or spaces of affirmation.

ARTH 203 (S) Chicana/o/x Film and Video

Cross-listings: AMST 205 WGSS 203 LATS 203 ARTH 203

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors; LATS concentrators

**ARTH 204  (F) Historical Research in Dance and Performance Studies**

**Cross-listings:** ARTH 204, DANC 103

**Secondary Cross-listing**

This course is an introduction to the historical context of dance forms prevalent in the US and analysis of movement-based performances. While readings and viewings will focus on the socio-historical background of dance genres practiced at Williams and beyond, an important element of the course will be the practice of documenting, interpreting, and writing about performances as historical and cultural mediums. The course will enable students interested in dance, theatrical and visual arts (including advertising and marketing) to hone their skills in the practice of analyzing still and moving images, while also offering students of history and art history the opportunity to develop competency in historical research. This is primarily a discussion-based seminar course. Learning objectives: to understand the social and political contexts for various performance genres; to explore interdisciplinary and embodied modes of engaging with movement; to develop the ability to document, analyze, and write about dance as a historical and cultural text.

**Class Format:** This class will be held remotely and will include a combination of tutorial-like small group meetings, periodic synchronous sessions, and asynchronous work such as Glow posts or recorded lectures.

**Requirements/Evaluation:** short weekly assignments, two 5-7 page essays, two group presentations.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**ARTH 205  (F) Patrons, Rituals, and Living Images in Japanese Buddhism**

**Cross-listings:** ASIA 205, REL 213, ARTH 205

**Primary Cross-listing**

This course introduces students to Buddhist art and architecture in Japan from its introduction in the sixth century through the present. We focus on the ways different communities--the imperial court, immigrant artists, monks, women, and commoners--employed and venerated Buddhist images for political legitimacy, personal salvation, and worldly benefit. This course also examines how Japanese Buddhist imagery became aestheticized in the early twentieth century and appropriated later in modern and contemporary visual cultures. Some of the topics to be discussed include the reception of continental styles of Buddhist sculpture, the relationship between mandalas and rituals, the role of women in developing Buddhist embroideries, and the Western reappraisal of Zen arts. Students will develop familiarity with the concepts and ideas underlying the production of Buddhist images and will gain foundational skills in analyzing the visual, material, and iconographic qualities of Japanese Buddhist art. For the final project, students will design a digital exhibition focused around one of the topics of the course.

**Requirements/Evaluation:** attendance, class participation, 4 reading and object response papers (2-3 pages), midterm, non-cumulative final exam, and digital exhibition project with an 8-10 minute presentation

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** First and second-year students, but open to all

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 205 (D1) REL 213 (D2) ARTH 205 (D1)
ARTH 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: ARTH 207 AFR 207

Primary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa’s 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Class Format: This tutorial will be predominantly remote, with student pairs meeting with the instructor on a weekly basis via google hangouts. There may be options for in-person events as the semester progresses, but this is to be determined.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 207 (D1) AFR 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

ARTH 209 (S) The Art and Archeology of Maya Civilization

Cross-listings: ARTH 209 ANTH 219

Secondary Cross-listing

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient
Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

Class Format: lecture/discussion

Requirements/Evaluation: midterm and final exams, hieroglyphic project, 15pp research paper

Prerequisites: none, but an introductory ARTH or ANTH course recommended

Enrollment Limit: none

Enrollment Preferences: Anthropology/Sociology and Art History majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

ARTH 210 (F) Intro to Latin American and Latinx Art: Contradictions & Continuities, Postcolonial to the Present (DPE)

This course introduces students to the breadth and richness of the visual arts in Latin American and U.S. Latinx art. The course begins in the late 19th and early 20th centuries, when artists and writers first began formulating the notion of an art "native" to Latin America, and continues through the ever-expanding cultural expressions developed throughout the 20th and 21st centuries. Through a contextual approach, we will pay particular attention to Latin American artists' shifting relationships to race, class, and gender issues, their affiliations with political and revolutionary ideals, and their critical stance vis-à-vis the European avant-gardes. Similarly, we will analyze the emergence and development of Latinx artistic practices in the postwar U.S., tracing these artists' own exploration of race, class, and gender dynamics. This class introduces Latin American and Latinx artistic practices and scholarship to enable students to develop a critical understanding of the historical specificity of diverse movements, their relation to canonical definitions of modern and contemporary art, and their relevance to issues of colonialism, nationalism, revolutionary politics, and globalization. We will consider a vast array of genres--from painting and sculpture to printmaking, photography, conceptual, installation, and performance art--and will draw from artist statements, manifestos, and secondary interpretive texts to consider both the impetus behind these dynamic artworks and their lasting legacies.

Requirements/Evaluation: midterm exam and non-cumulative final exam, weekly short reading responses, attendance, and active participation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if overenrolled, waitlisted students will be selected on a lottery

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical, visual, and thematic analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Latin American and Latinx art in the canon of Western art history. The course also centers on contextualizing Latin American and Latinx artistic practices and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, revolutionary politics, and globalization.

ARTH 211 (F) Art and Experience in Ancient Rome

Cross-listings: ARTH 211 CLAS 210
Secondary Cross-listing

To see and be seen--it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. All readings are in translation.

Requirements/Evaluation: attendance and preparation, a mid-term, a final, and a medium-length paper

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

ARTH 212  (S)  Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)

Cross-listings: ARTH 212  ARAB 212  REL 210

Primary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First- and second-year students, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit,
ARTh 213  (S)  The Human Figure in the Ancient Mediterranean

Cross-listings:  ARTH 213  CLAS 213

Primary Cross-listing

From the earliest representations in the third millennium BCE until the end of the Roman period in the fifth century CE the human body remained the foremost choice of subject for artists, patrons, critics, and the public in the ancient Mediterranean world. This course will consider cultural ideas about the body in antiquity, and trace their repercussions in the modern era. Over the course of the semester we will concentrate on 12 case studies, each representing a specific concept from an area of the Mediterranean. Topics include the "shining bodies" of bare-chested potentates in Egypt and the ancient Near East, statues that give the dead voice, the perfection and humanity of the bodies of the gods, ancient Greek science and the nude goddess, the pathos of Hellenistic athletes, and the interpretative challenge of the ambiguous and sensuous marble forms of the Barberini Faun or the Sleeping Hermaphrodite, both found in Roman contexts. We'll consider the cross-influences of ideas about gender, class, race and the body coded in public and private art. Reading material will include ancient literature in translation as well as contemporary critical essays. Evaluation will be based on participation in discussion and group presentations, in-class writing assignments, short response papers, and a final 8-page research paper. Engaged library research of original paper topics will be supported throughout the semester.

Requirements/Evaluation: participation in discussion and group presentations, in-class writing assignments, short response papers, a final 8-page research paper.

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  open to any student, majors and non-majors, with interests in the ancient world; no experience with art history required; first-years and sophomores are encouraged

Expected Class Size:  12

Grading:  no pass/fail option,  yes fifth course option

ARTh 214  (F)  Environmentalism in Contemporary Art and Politics, 1960s to Present

Cross-listings:  ENVI 210  ARTH 214

Primary Cross-listing

Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts--including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice. Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.

Requirements/Evaluation:  Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)

Prerequisites:  None

Enrollment Limit:  20

Enrollment Preferences:  Art Majors
**ARTH 218 (S) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe** (WS)

**Cross-listings:** REL 284  WGSS 284  ARTH 218

**Primary Cross-listing**

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

**Requirements/Evaluation:** Participation in discussion; five 5-7-page tutorial papers; five 1-2-page response papers.

**Prerequisites:** None

**ARTH 221 (F) History of Photography**

**Cross-listings:** STS 221 ARTH 221

**Primary Cross-listing**

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

**Requirements/Evaluation:** three to four short papers, quizzes, online presentations.

**Prerequisites:** none

**ARTH 222 (S) Photography in/of the Middle East**

**Cross-listings:** ARTH 222 ARAB 222

**Primary Cross-listing**

Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

**Class Format:** discussion

Difference, Power, and Equity Notes: Photographs are tricky. Whose experiences and values do they really represent—those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires multiple skills—from close-looking to interdisciplinary analysis—useful in contemporary visual culture.

ARTH 223 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322 ENGL 356 AFR 323 AMST 323 ARTH 223

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis’ March and Ebony Flowers’ Hot Comb, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. Although it is a remote course this year, this class may still feature Object Lab participation, film screenings, and collaborations with guest speakers.

Class Format: This is a remote class that will primarily feature synchronous sessions with some asynchronous sessions.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: this course is part of the Gaudino Danger Initiative

ARTH 228 (S) Velázquez, Goya, and Picasso

Cross-listings: ARTH 228 RLSP 228
Secondary Cross-listing

This course will provide an introduction to three major Spanish painters—Velázquez, Goya, and Picasso—who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists’ relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya’s dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez’s “Las Meninas” and other royal portraits, Goya’s “Maja Desnuda” and his series “The Disasters of War,” Picasso’s “Guernica,” and his own 20th century reinterpretation of “Las Meninas,” we will focus on the artists’ shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters’ lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Requirements/Evaluation: 3- to 5-page weekly assignment

ARTH 229 (F) The Art of Natural History (WS)

Cross-listings: ARTH 229 STS 226

Primary Cross-listing

The scientific revolutions of the eighteenth and nineteenth centuries fundamentally changed the way the natural world was seen and celebrated, classified and organized, displayed and manipulated. New discoveries in the natural sciences and competing theories of evolution intertwined with shifting conceptions of natural history, of nature, and of humankind's proper place within it. This course will investigate the links between art and natural science. It will seek to understand the crucial role of the visual arts and visual culture in the study and staging of natural history from the eighteenth century to the present. We will pursue the questions that preoccupied the artists themselves. How should an artist react to new ecological insights? What is the proper artistic response to newly discovered flora and fauna? What is the role of aesthetics in the communication of knowledge? How are those aesthetics connected to ethics? How might a drawing of a plant convey information that is different from that of a photograph or a glass model of a plant? How might a theatrical diorama frame a scientific idea in a way that is different from a bronze statue? Students will seek to understand the myriad connections between seeing, depicting, and knowing, to question long-held assumptions about the division between "objective" science and "subjective" art, and to recognize that art has the ability not only to interpret, disseminate, and display scientific knowledge, but to create it as well.

Class Format: There will be field trips if travel is allowed.

Requirements/Evaluation: Five 5 page essays, five 1-2 page responses to partner's essays, critical conversation.

Prerequisites: None.

Enrollment Limit: 8

Enrollment Preferences: Sophomores with an interest in art history, art studio, ecology, environmental studies, and science and technology studies, juniors with these same interests, then art history majors, and science and technology majors, in that order.

Expected Class Size: 8
Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 230 (F) From Alexander to Cleopatra: Remodeling the Mediterranean World

Cross-listings: CLAS 230 ARTH 230

Secondary Cross-listing

The period between Alexander the Great (323 B.C.) and Cleopatra (30 B.C.), like our own, was characterized by internationalism, migration, wide-ranging cultural values and religious practices, and ethnically diverse urban populations. Large numbers of non-Greeks came under the control of newly established Hellenistic kingdoms, while in the west Rome's emergence as a superpower offered both new opportunity and danger. The Hellenistic world was a place of vibrant change in the spheres of art, architecture, urban planning, and public spectacle. In this course, we will consider the art and archaeology of this period in their political, social, and religious contexts, focusing on the visual language of power and royalty; developments in painting, sculpture, mosaics, and monumental architecture; interactions between Greeks and non-Greeks; and the impact of Greek culture in Rome.

Requirements/Evaluation: class participation, quizzes, midterm, final exam, and one medium-length paper

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students with an interest in the ancient Mediterranean world and in the history of western art and architecture

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art

Cross-listings: ARTH 231 WGSS 231

Primary Cross-listing

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art-never created for its own sake-was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity. When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

Class Format: some tutorial meetings will be conducted at local museums
**Requirements/Evaluation:** engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner's tutorial papers

**Prerequisites:** first-year and sophomore students (this class is open to students with no experience in art history)

**Enrollment Limit:** 10

**Enrollment Preferences:** a statement of interest will be requested in the event the course is over-enrolled

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 231 (D1) WGSS 231 (D1)

**Writing Skills Notes:** This course's fundamental goal is to support opportunity and skills to construct compelling and original written arguments. Tutorial partners will share standards and guidelines for strong writing with instructor: common concepts and language for critique, discussion, and applause. We will consider the power of argument inextricable from the quality of writing, and thus address writing issues, strategies, and successes in a deep way, organically and consistently, in every tutorial meeting.

**Attributes:** ARTH pre-1800 Courses

**ARTH 232 (S) Renaissance Rome: Renovating the Eternal City**

George Eliot called Rome "the city of visible history," a place with the power to bring "the past of a whole hemisphere" right before our eyes. The magnetic visual power of Rome did not just occur naturally, however; it is a product of a bold urban project first envisioned by Renaissance popes and brought into being by the artists and architects they hired. During the fifteenth and sixteenth centuries, Rome was transformed from a shrinking and neglected medieval town into a thriving center of artistic energy and invention. Beginning with the papacy's return to the city in 1417, we will focus on the historical, ideological, and artistic forces behind this period of renovation and restoration that reshaped the urban and artistic fabric of the city. We will study the particularly Roman foundations for the period known as the High Renaissance, then, approaching art historical touchstones by Michelangelo, Raphael, and Bramante as works grounded in a uniquely Roman sense of time and historical destiny. We will conclude with a selective look at Baroque works by Caravaggio, Bernini and Borromini, exploring their powerful innovations and effects as a continuation of the Renaissance renewal of the eternal city.

**Class Format:** lecture

**Requirements/Evaluation:** 10-12 page research paper with multiple components (including prospectus, annotated bibliography, presentation); take-home midterm exam, 3 image-based quizzes; ungraded mapping assignments

**Prerequisites:** none; open to Art majors as well as non-majors

**Spring 2022**

**LEC Section:** 01 TF 1:10 pm - 2:25 pm Stefanie Solum

**ARTH 233 (S) Italian Renaissance Art**

A survey of Italian art from Giotto to Michelangelo. This course will follow a chronological framework, giving students a grounding in the development of Italian art over the course of the 14th-16th centuries, but will also take a thematic approach that will allow us to delve into important art historical issues. Some, such as historical consciousness and the relationship to the past, or the reinvention of the idea of the artist and of art itself, will be important as we construct a critical understanding of the idea of "renaissance," or "rebirth," long central to the identity of the period. Others, such as gender, patronage, power, naturalism, and the materiality of objects, will bring us deep into the worlds in which these dazzling and still powerful works...
of art were originally created and experienced.

Class Format: The format of this hybrid course will depend upon student enrollment, but the goal is to have a robust in-person component. Class time will be a combination of lecture segments and seminar discussions, with a mid-semester interlude of tutorial-style meetings.

Requirements/Evaluation: 2 Quizzes, 2 Essays, Final Take-Home Exam

Prerequisites: none

ARTH 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

ARTH 238 (S) Greek Art and the Gods

Cross-listings: ARTH 238 REL 216 CLAS 248

Primary Cross-listing

In the Iliad, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympos, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images of the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments,
literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: discussion

Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: preference will be given to pre-registered Art-History majors needing to fulfill the pre-1800 requirement; otherwise, the course is open to any interested student

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

ARTH 240 (F) Histories, Communities, and Collections

What can the College's collections of documents, artifacts, art objects, natural history specimens, and rare books--whether housed in the Special Collections of the Library, Archives, or at the Williams College Museum of Art (WCMA)--teach us about our institutional past? How do we put that past into dialogue with our present? Planned specifically to engage with the WCMA's The Field is the World, an exhibition that investigates two invisible histories contained within collections here on campus, this course will approach the questions of histories, communities, and collections in two ways. First, in lectures we will survey the history of collecting in Europe and the United States from the eighteenth century up to critical reinterpretations by contemporary artists and consider how collecting was often tied to other endeavors like establishing national institutions, researching human variety, representing colonial expansion, or documenting missionary efforts. Second, in interactive sessions we will meet with curators, librarians, and guest speakers to look at objects first hand and to discuss the relationship between collecting and scholarship. Over the course of the semester we will examine the historical models of knowledge production and audience engendered by collections and their display. Moreover, we will work together to formulate new models of interpretation that address overlooked histories and engage with the current interests of our campus community.

Class Format: two 75-minute meetings per week; one in lecture format, the other in discussion format

Requirements/Evaluation: participation in interactive sessions, weekly written responses, one 3- to 4-page essay, one 8- to 10-page final project (proposal for an exhibition or a recontextualization)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: for interactive sessions at WCMA and the Library space will be limited

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 241 (F) Impressionism, Post-Impressionism, and Modernity

In 1874, an art critic mockingly termed Claude Monet's painting of a sunrise over the sea "impressionist [...] more unfinished than wallpaper in an embryonic state." With this phrase, he gave a name to a new style of painting that profoundly shaped the late nineteenth and early twentieth-century avant-garde movements in Europe and beyond. Beginning with the invention of photography in the early nineteenth century and ending with the advent of cinema, abstraction, and mechanized warfare in the first decades of the twentieth, this course will trace the origins and afterlives of "Impressionism" in art and cultural history. Many of the artists who continue to draw the largest crowds in museums around the world today--among them Manet and Monet, Degas and Seurat, Van Gogh and Rodin, Klimt and Picasso--fall within our period of study and will be subjects of our
examination. Designed for students who have no prior experience studying art history, the course will prioritize methods of close looking and formal analysis. (If social distancing protocols allow, the course will include optional study visits to examine first-hand examples of paintings, sculptures, decorative arts, and printmaking at the Clark Art Institute and Manton Study Center for Works on Paper and Williams College Museum of Art). At the same time, the questions and methods at the core of our inquiry will be fundamentally interdisciplinary, and will engage students all across the humanities and sciences (major scientific figures such as the inventor Thomas Edison and the evolutionary biologist Charles Darwin will figure prominently in our narrative). Readings will emphasize close engagement with primary sources drawn from multiple disciplines: writings by artists and art critics from the period, as well as scientists, philosophers, psychologists, political theorists, and poets. We will approach "Impressionism" and "Post-Impressionism" as episodes in the cultural history of Europe that are uniquely revealing of a historical experience we still acutely feel today, which was called, for the first time in the nineteenth-century, "modernity."

Class Format: lectures posted to Glow, and discussion sections via ZOOM, with optional in-person study visits to local museum collections

Requirements/Evaluation: weekly discussion question, 1 visual analysis essay (4pp), take-home midterm, take-home final, research paper (8pp)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: Art-history majors, then art-studio and history and studio majors, then any interested student.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 244  (S)  City, Anti-City, and Utopia: Town Planning from 1500 to 1800

The Italian Renaissance gave us our modern conception of the ideal city, whose geometrically regular form was both symbol and instrument of a perfectly ordered society. This alluring notion has preoccupied artists and theorists from Michelangelo and Thomas More to Albrecht Dürer and Christopher Wren; it achieved tangible form in such new capitals as St. Petersburg and Washington, D.C. But the West has remained characteristically ambivalent about the city, especially in the United States, an ambivalence reflected in persistent attempts to decentralize the city (Frank Lloyd Wright), to beautify it (the City Beautiful Movement), reshape it (Urban Renewal) or abandon it (suburbanization). This course looks at the roots of those movements, and the development of urban and anti-urban thought from the Renaissance to the Industrial Revolution. Topics include Renaissance fortification design, the colonial cities of the New World, the picturesquely landscaped English garden, and the separatist societies that sought to create communal utopias in the wilderness.

Requirements/Evaluation: one paper (10-20 pages) and a simple design project, weekly study questions and a final exam (weighted respectively at 30, 20, 20, and 30% of the grade)

Prerequisites: none

Enrollment Limit: 45

Enrollment Preferences: Art majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 246  (F)  Museum Culture: Do you see what I see?!  (DPE)

We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on so many variables—who we are, where we are, and what we choose to look at. A critical question is how "art" figures and what agency it wields in millennial settings. This class is an opportunity to explore these issues with particular reference to museums and the objects enshrined therein. Digitized collections enable us to wander freely in space and time, following ideas/images through history even as we might also engage the 'real thing' in person. Our approach will be comparative and interrogative; case studies might range from an oil painting to a wooden sculpture, a coin to an illuminated manuscript, a photograph to a video. Along the way, we will consider what "art" really is and how different visual cultures might be presented or distorted in museum exhibitions and public spaces. Particular attention will be given to traditions or people that have
been erased or misunderstood over time as art history has evolved as a discipline. Students will look, sketch, photograph and write throughout the semester, thereby exploring the entire spectrum of visuality from production to reception.

Requirements/Evaluation: Mandatory class attendance and substantive participation, weekly Glow Posts, curatorial term project.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Sophomores and majors.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will cover museums in diverse cultures and explore the porous boundaries between the "Orient", Europe and America. How art manifests inequalities of power and how museums privilege or erase particular groups of people will be addressed. Because collecting art entails money and privilege, understanding art history entails exploring social and cultural hierarchies.

ARTH 247 (S) Art and Representation in the Wake of Empire, Europe After 1945 (DPE)

Foregrounding the exhibition as a critical form of aesthetic and political contestation, this course examines the transformation of colonial projects of early modernity to the post-World War II period. It will situate European visual culture within systems of transnational exchange and the art and cultures of other continents, while reflecting upon its economic and political impacts within its own newly reconfigured borders. National identity will be set in relief against a burgeoning cosmopolitanism, migration shifts, and increased tourism worldwide. Work in a variety of media will illustrate the multifaceted nature of these interactions and their engagement with materials, persons, and things in the commodification and use of natural resources. Of the themes addressed in this course--postcolony, anticapitalism, imperialism, neocolonialism, and existentialism--particular attention will be focused upon the history of independence movements in the former European colonies and their reflection in works of art in Europe and abroad. We will consider the role major international and perennial art exhibitions--such as Documenta in Germany and the Venice Biennale in Italy--have played in the reconceptualization of the field of contemporary art, as well as other institutions of art confronting new waves of fascism in Europe. With a transhistorical approach, we will assess the work of international curators and cultural theorists who have remapped the relationship between art and politics, and the Global North and South.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one 12-15 page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Students planning to major in Art History, Art History and Studio Art majors, then any interested student

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course examines difference, power, and equity in artistic practice as a means of rethinking European identity within a globalized world. Migration, diaspora, and citizenship--and their differentials of power and movement--are central to course assignments and discussions. It focuses on the lasting impacts of colonialism beyond European borders as a way of understanding the logic of cultural hegemony.

ARTH 248 (S) War, Revolt, and Revolution in Art 1750-1850

This lecture course will focus on the dynamics of art, culture, and experience in Europe from the later eighteenth century to the middle of the
nineteenth century. Spanning the global conflict of the Seven Years War, French Revolution of 1789, Haitian Revolution, Napoleonic occupations, and
the Revolutions of 1848, this period of dramatic artistic, social, and political change gave rise to new conceptions of subjectivity, freedom, as
expressed in the visual arts. How did art, new practices of art-making, and new modes of aesthetic experience convey and embody these crises, at
once at the intimate level of individual experience and across transformations wrought by war and empire? We will examine the work of major artists in
depth, particularly as that work helps constitute new accounts of the individual subject, the citizen, the migrations of populations, the spectacle of
punishment, and other great alterations in the public sphere. Additionally, we will discuss the ways in which these histories have been addressed in
art-historical writing and in museum practice.

Class Format: A third of our class time will be devoted to discussion. This course will also require students to visit WCMA, Special Collections, and
the Clark.

Requirements/Evaluation: Attendance, participation, two essays (4-5 pages double spaced), midterm examination, final examination.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: sophomores and juniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

Not offered current academic year

ARTH 249 (S) Introduction to Visual Cultures of Contact  (DPE)
This introductory lecture course will survey the visual and material products of European contact with Asia, Oceania, Africa, and the Americas between
1500 and 1900. This period witnessed the establishment and loss of Spanish, English, and French colonies, a proliferation of exploratory voyages, and
the abolition of the transatlantic slave trade. Some of our objects of study will be European in origin from well-known artists including Rubens,
Velasquez, Reynolds, and Gauguin. In many cases we will be asking questions about circulation—whether we are looking at Tupi featherwork from
Brazil brought to Europe, Flemish prints adapted by artists in Central and South America, or tattoos on the bodies of people traveling to and from
Tahiti. Against the backdrop of these context-specific case studies, students will be asked to consider contact, colonialism, exchange, and
appropriation more conceptually.

Requirements/Evaluation: midterm exam, final exam, five 1-page assignments, research paper (7-9 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Art majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement in its investigation of the constructions of difference precipitated by
intercultural contact and in its discussion of critical readings that will help students analyze the histories of difference and power. Students will not only
learn about the past, but also work together to come up with methodological approaches that speak to the continuing effects of these histories.

ARTH 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World

Cross-listings: ARAB 259  AFR 259  ARTH 259
Primary Cross-listing

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and
spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as
vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious
force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect
not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: students who have declared a major in Art History or Africana Studies

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ARTH 262 (S) Modern Architecture

A century ago, the Modern Movement promised the most sweeping cultural transformation since the Renaissance. Architecture was only one lobe of a comprehensive movement that embraced literature and painting, music and theater, all aspiring to the same radical emancipation from traditional form and structures of authority. What happened? How and why did modern architecture abandon its utopian vision. Students will explored the major developments in Western architecture from 1900 to the present, and become familiar with its major figures: Wright, Gropius, Mies van der Rohe, Le Corbusier, Aalto, Kahn, Venturi, Gehry, Koolhaas, and Hadid. Students will learn a variety of skills: design a 1000-square foot vacation house; present to the class an analysis of a building; and organize a small exhibition of architectural treatises in the Chapin Library.

Requirements/Evaluation: two hour tests and a design project including drawings and a written statement

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: juniors and sophomores

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

ARTH 265  (S)  Pop Art  (WS)

Cross-listings: AMST 265  ARTH 265

Primary Cross-listing

The use of commercial and mass media imagery in art became recognized as an international phenomenon in the early 1960s. Items such as comic strips, advertising, movie stills, television programs, soup cans, "superstars," and a variety of other accessible and commonplace objects inspired the subject matter, form, and technique. This course will critically examine the history and legacy of Pop Art by focusing on its social and aesthetic contexts. An important component of the course involves developing skills in analyzing visual images, comparing them with other forms, and relating them to their historical context.

Requirements/Evaluation: one final research paper (15 pages) written in stages over the semester including revisions; bibliographic research, writing exercises, and oral presentations

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art majors

ARTH 272  (F)  Art of the Noble Path: Buddhist Material Culture Across Asia

Cross-listings: REL 272  ARTH 272  ASIA 272  ASST 272

Primary Cross-listing

Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion's social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Requirements/Evaluation: 3 ten-minute quizzes, weekly Glow responses, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 15

ARTH 273  (S)  The Arts of the Book in Asia
Cross-listings:  ARTH 273 ASST 273 ASIA 273
Primary Cross-listing
From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This course will survey the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the survey is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Williams College Museum of Art where students will have the opportunity to study original artworks from the collection.
Requirements/Evaluation:  2 quizzes, 2 short response papers, a final project/paper based on museum objects, 1-hour in-class final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference will be given to Art Majors, and then to students of any major interested in art and culture of Asia

ARTH 281  (S)  The Seeds of Divinity: Exploring PreColumbian Art & Civilization in a Museum Exhibit
Cross-listings:  ARTH 281 ANTH 281 REL 280
Secondary Cross-listing
For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in PreColumbian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be presented in a museum exhibit.
Requirements/Evaluation:  active class participation; three short papers; 15-page research paper and presentation
Prerequisites: none

ARTH 284  (S)  The Postwar Avant-Gardes
Artistic discourse in the Western hemisphere dramatically changed course in the wake of the Second World War. The mass trauma inflicted by the war
prompted artists and critics throughout the region to reassess the role and potential of art in society. But the war’s mass displacement of communities also displaced the centers for artistic activity, and avant-garde practices soon expanded vigorously throughout the Americas. Through comparative studies, this course will analyze the artistic avant-gardes that emerged simultaneously in the United States and Latin America after 1945. We will place these myriad practices in dialogue, to elucidate the complexity, richness, and vitality of artistic practices in the postwar era.

**Requirements/Evaluation:** midterm exam, final exam, one short 2-page writing assignment, one 6- to 8-page research paper

**Prerequisites:** none

**Enrollment Limit:** 30

**Cross-listings:** COMP 186  ARTH 586  ASIA 186  ARTH 286

**Secondary Cross-listing**

The phrase “Japanese popular culture” often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

**Class Format:** discussion

**ARTH 290 (S) Enslavement and Colonialism in Dutch Painting, ca. 1500-1800**

This introductory lecture course to Dutch art from 1560-1795 will study how the rise of the trans-Atlantic slave trade and colonialism were central to the mythic construction of a Dutch Golden Age. From the iconic paintings of Rembrandt and Vermeer to the pictorial reproductions of the plantations in Indonesia and the Americas, we will ask how the visual record of this period has both written and erased the violent histories that are integral to the canon of Dutch painting. The course will begin with the iconoclastic riots in Antwerp in the 1560s and end with the slave revolt in the Dutch Colony of Curacao in 1795, and throughout we will ask how to tell this history of enslavement and colonialism over two centuries when the voices of the enslaved and colonized were excised from the historical record.
Requirements/Evaluation: 2 visual analysis essays (3-4 pages each); midterm exam; and take-home final exam with essays.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Art History and Art Studio majors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ARTH 301 (F) Methods of Art History (WS)

This course on the methods and historiography of art history offers art-history majors an overview of the discipline since the late 18th century. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; the materiality of art; race, gender, and sexuality; the global scope of art and art history.

Class Format: In the fall of 2021, this class will meet in person. We will meet altogether once per week for a lecture. We will meet a second time each week either altogether in a seminar or in small groups in tutorial format, depending on enrollment.

Requirements/Evaluation: six 1,000-word analytical essays plus one 2,000-word writing project. Participation in class discussion. Attendance.

Prerequisites: any prior ARTH course (one or more 100-level ARTH course[s] recommended). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

Enrollment Limit: 19

Enrollment Preferences: The course is limited to art-history and (with permission) art history/studio majors. If the course is over-enrolled, preference will be given to senior AH majors, then juniors. Second-year students intending to major in art may enroll with permission.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the ARTH 301 requirement for the art-history major. Will satisfy the methods/junior seminar requirement for the history/studio major, but students wishing to do so must have permission of instructor to enroll.

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. In addition, they submit a 2,000 writing project at the end of term. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

ARTH 303 (S) Museums: History and Practice

Cross-listings: ARTH 303 LEAD 301 ARTH 501

Secondary Cross-listing

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in today's arts institutions. Looking at museums past and present internationally, the seminar will envision the future of museums as we recognize the programmatic trends developing in our own moment of civic and social unrest. The class will consider this future while examining existing governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues in repatriation and restitution of cultural property. Surveying museums ranging in size and
type from the "encyclopedic" to newly established contemporary arts institutions and alternative spaces, we will investigate current trends in acquisition, exhibition, educational programming in light of the equity and social justice demands of our time. With our goal of imagining art museums in the future, class discussions will have a special focus on how museums might strive to balance their traditional scholarly and artistic responsibilities with their heightened civic and social roles, doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester
Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course
Enrollment Limit: 10
Enrollment Preferences: graduate students, then senior art history majors, then other undergraduates
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: satisfies the seminar requirement for the undergraduate Art History major

ARTH 305 (F) Queer Art, Queer Archives
Focusing on a number of recent museum exhibitions dedicated to queer art and artists in the U.S. and abroad, this course critically examines the emergence of queer art histories. How are queer art histories being written and presented? And how is queer art being collected and preserved? We will explore these questions (and others) through the lens of the archive and the research and collecting practices associated with archives. As a class, we will critically examine the role, limits, and possibilities of archives in art historical research, curatorial practice, and museum exhibitions. Course readings will consider various historical, theoretical, and methodological approaches to the archive and curatorial practice. We will also consider artists' archives and what has been described as an "archival impulse" in contemporary art. This course is being developed in conjunction with Williams College Museum of Art's presentation of the traveling exhibition Axis Mundo: Queer Networks in Chicano L.A., the first historical exhibition on queer Latinx art. Select assignments and student presentations will encourage first-hand experience with artworks in the exhibition.
Requirements/Evaluation: multiple short writing and bibliographic exercises; regular oral presentations; research paper (18-20 pages) written in stages and revised and expanded over the semester
Prerequisites: ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite
Enrollment Limit: none
Enrollment Preferences: senior majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Attributes: ARTH post-1800 Courses
Not offered current academic year

ARTH 308 (S) African Art and the Western Museum (DPE) (WS)
Cross-listings: AFR 369 ARTH 308
Primary Cross-listing
This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the
cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

**Requirements/Evaluation:** field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History and African Studies Majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369 (D2) ARTH 308 (D1)

**Writing Skills Notes:** Targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

Not offered current academic year

**ARTH 310  (S)  An American Family and "Reality" Television  (WS)**

**Cross-listings:** ARTH 310  WGSS 312  AMST 333

**Primary Cross-listing**

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called “Reality TV.” In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the “American dream.” Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Lounds’ marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Class Format:** Remote seminar. The course will feature synchronous online class meetings.

**Requirements/Evaluation:** class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper. Student presentations will be recorded offline and posted to GLOW.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** junior Art majors, followed by senior majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 310 (D1) WGSS 312 (D1) AMST 333 (D2)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
ARTH 311 (S) Women and Art in East Asia (DPE)

Cross-listings: ARTH 311 ASIA 311

Primary Cross-listing

For over a thousand years, women in East Asia profoundly influenced the development of the visual arts, yet their formidable presence remains largely hidden. This seminar explores the critical roles women played as patrons, artists, and collectors of the arts in China, Korea, and Japan. We cover historical periods from the 10th century to the present day and discuss both traditional and nontraditional media including painting, sculpture, photography, and embroidery. Topics include didactic paintings for women in the Song court, calligraphy and painting as gendered modes of expression in Heian period Japan, the revival of Buddhist arts in Korea under the patronage of aristocratic women, and artworks by modern and contemporary artists that contest dominant representations of gender and sexuality. The course does not simply focus on artistic production, but also contextualizes these topics in light of emergent theorizations and readings on femininity, feminism, and the sexual politics of representation. Along with a final research paper, students will generate a substantial Wikipedia entry on a certain aspect of the course to promote the coverage of women and the arts online. No prior knowledge of Asian art history is required or assumed

Requirements/Evaluation: attendance, class participation and discussion, 5 object or reading response papers (2-3 pages), Wikipedia page editing project and presentation (5-7 minutes long), and 8-10-page final research paper (written in stages over the semester including a 10-15-minute presentation)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History, Asian Studies, Chinese, or Japanese majors, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 311 (D1) ASIA 311 (D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by exploring the construction of gender in relation to power. We discuss how Daoist, Confucian, Shinto, and Buddhist ideas historically shaped attitudes toward women and address the ways in which colonialism and Orientalism shaped understandings of gender differences and roles in East Asia. Students will be introduced to theoretical texts of feminism and postcolonialism and learn to identify key issues to the feminist art historical project

ARTh 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings: HIST 314 ARTH 314 ASST 314 ASIA 314

Secondary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim
of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for ‘reading’ these.

Requirements/Evaluation: class participation and weekly responses to readings, 4-5 short papers and a final paper

Prerequisites: students who have previously taken HIST312 will not be permitted to take this course; no other prerequisites

Enrollment Limit: none

Enrollment Preferences: graduating seniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 315 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 WGSS 344 ARTH 315

Primary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape—from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 314 (D1) WGSS 344 (D2) ARTH 315 (D1)

Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

SEM Section: 01 W 1:10 pm - 3:50 pm Alena J Williams

ARTH 327 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA
Primary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 331 (S) Michelangelo: Self and Sexuality (WS)

Cross-listings: ARTH 331 WGSS 335

Primary Cross-listing

Who are artists? We each have different answers to this question, but our responses would probably share some common assumptions about human individuality and the centrality of the self to artistic creation. In this tutorial, we will take a critical lens to these ideas by studying the life, work, and passions of the Italian artist, Michelangelo Buonarroti (1475-1564). Michelangelo is a towering archetype of the autonomous artistic self: the distinctive personality who telegraphs individual beliefs, feelings, and desires through the creative act. His lifelong engagement with the physicality, beauty, and sensuality of the (male) human body has encouraged the connection between the man and his work on the most intimate levels of pleasure and desire. Ironically, Michelangelo would not have understood our modern conceptions of artistic selfhood or sexuality, but his own Renaissance moment was obsessed with questions surrounding the nature of human identity and subjectivity. His artistic practice--from painting to poetry--wrestles with them in countless, fascinating ways. Students' writing and critical conversation will venture into the spaces between man and myth, selfhood and self-fashioning, artist and patron, past and present.

Class Format: Tutorial meetings will take place primarily on Zoom, with the hopeful possibility of some in-person meetings for students in residence on campus.

Requirements/Evaluation: Five 5-7 page essays, five 1-2 page responses to partner's essays, critical conversation

Prerequisites: Any ARTH course

Enrollment Limit: 10

Enrollment Preferences: ARTH majors and WGSS concentrators (or sophomores intending to pursue the ARTH major or WGSS concentration)

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:

### ARTH 332 (F) Abstraction in Action: Global Modern and Contemporary Art (WS)

Abstraction, be it gestural or geometrical, was a protagonist in the story of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, cultural co-optation, revolutionary politics, as well as racial, feminist, and queer critique. This object-oriented course will delve deeply into non-representation in global modern and contemporary art; we will supplement our careful study of artworks with primary documents, as well as with canonical theoretical frameworks and the reassessments that have sought to complicate these. This seminar is organized into two weekly sessions—a lecture and a discussion—to introduce key concepts and issues and to allow for ample group dialogue on these. Ultimately, the course seeks to revise and expand the cartographies and ontologies of abstraction in the 20th and 21st centuries. As such, it welcomes students with an interest in modern and contemporary art, yet does not require previous coursework in either.

**Class Format:** biweekly seminar, with one lecture session and one discussion session

**Requirements/Evaluation:** participation, weekly assignments, final 12- to 15-page paper written in stages throughout the semester

**Prerequisites:** must have previously taken one Art History course in any area

**Enrollment Limit:** 19

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will complete short written assignments and will prepare a final paper in three stages throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** ARTH post-1800 Courses

Not offered current academic year

### ARTH 335 (S) Uncovering Williams

**Cross-listings:** AMST 335 ARTH 335

**Secondary Cross-listing**

Sparked by current controversies around visual representations at Williams, this course—a joint effort of the Williams College Museum of Art and the American Studies Program—interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college's relationship to slavery and Abolitionism.

**Requirements/Evaluation:** participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) and bibliography

**Prerequisites:** sophomore standing or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** AMST majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Attributes:** AMST Arts in Context Electives  AMST Space and Place Electives

**Not offered current academic year**

**ARTH 337 (S) Visual Politics**

**Cross-listings:** PSCI 337  ARTH 337

**Secondary Cross-listing**

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries.

Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, cognitive science, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Clark, Connolly, Crary, Deleuze, Fanon, Foucault, Freedberg, Garland-Thompson, Hobbes, Kittler, Machiavelli, Mercer, Mitchell, Mulvey, Plato, Rancière, Sartre, Virilio, Warburg, and Zeki.

**Requirements/Evaluation:** regular, engaged class participation, several Glow posts, and three 7- to 8-page papers

**Prerequisites:** at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**PSCI 337 (D2) ARTH 337 (D2)**

**Attributes:** PSCI Political Theory Courses

**Not offered current academic year**

**ARTH 338 (S) The Romantic Revolution: Art and Experience in 19th-Century Europe**

This course explores major moments in nineteenth-century European painting and sculpture in relation to sweeping transformations across multiple dimensions of human experience, including aesthetics, philosophy, psychology, politics, and beyond. Key artists include Friedrich, Delacroix, Blake, Turner, Courbet, and many others. In each case we will interrogate their work across multiple art historical and intellectual perspectives, at once with a view to unveiling larger developments, but also to make the case for works of art as powerful bearers of meaning, and shapers of experience, in and of themselves. Assignments keyed to introducing students to a range of art historical methods and modes of argument and interpretation.

**Class Format:** combination lecture and discussion

**Requirements/Evaluation:** two research papers approximately 10 pages each; final exam; additional short reports

**Prerequisites:** none

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800 Courses
Not offered current academic year

ARTH 342 (S) Monuments and Miniatures: Architecture and Painting in India (WS)

Cross-listings: ASST 342  ASIA 342  ARTH 342

Primary Cross-listing

This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

Prerequisites: none, open to all students

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

ARTH 344 (F) Pacific-New England Material Histories (DPE)

Cross-listings: AMST 344  ARTH 344

Primary Cross-listing

This course looks at the indigenous, colonial, maritime, and missionary histories that connect New England to island nations in the Pacific in the eighteenth and nineteenth centuries. Rather than thinking of Hawai‘i and Massachusetts merely as opposite ends of United States colonial expansion, we will focus on the heterogenous cast of historical actors—from queens to whalers—who interacted in these places and generated new forms in architecture, painting, printmaking, the decorative arts, textiles, and publishing. Particular attention will be paid to the politics of Hawaiian visual culture and the histories of Williams alumni in Hawai‘i, but the readings, discussions, and student papers will not be limited exclusively to those subjects. Our time together will be split between lecture and class discussion, with some meetings devoted to archival research and object-based case studies in collections on campus. As a group, we will establish a corpus of objects and conceptual frameworks for analyzing what "Pacific-New England" means and how that might challenge our existing assumptions about regional art histories. Finally, we will experiment as a class with the best ways to convey what we’ve learned through our collective inquiry—whether in different forms of writing or by workshopng more creative approaches.

Requirements/Evaluation: participation in discussion, two short papers, final research project, and presentation; note: one required field trip, scheduled in consultation with the students

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 344 (D2) ARTH 344 (D1)

Difference, Power, and Equity Notes: This course traces the ways that systemic biases regarding race, religion, gender, and class impacted and continue to affect relations of power, wealth, and ultimately sovereignty in the United States and in Hawai'i.

Not offered current academic year

ARTH 348 (S) Women, Men and Other Animals (DPE)

Cross-listings: ARTH 348 STS 348 SCST 348 WGSS 348 ENGL 348

Secondary Cross-listing

In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal--indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

Requirements/Evaluation: individual research project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Art History majors, English majors, Environmental Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 348 (D1) STS 348 (D2) SCST 348 (D2) WGSS 348 (D2) ENGL 348 (D1)

Not offered current academic year

ARTH 358 (S) Latinx Installation and Site-Specific Art

Cross-listings: LATS 358 ARTH 358

Secondary Cross-listing

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

Class Format: discussion

Requirements/Evaluation: two short papers, periodic research reports, final research paper, and presentation

Prerequisites: LATS 105 or ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators and Art majors
**ARTH 363  Space into Place: Composing Modernity through Maps and Landscape Paintings, 1500-1900**

Colonial expansion and growing trade networks created new needs for picturing the globe in early modern Europe. In other words, globalization required a world broken down into concrete units that could be known and recognized. The artistic and the cartographic were two fundamental modes of representing space. What we might learn by bringing landscape paintings and maps together in dialogue? What are the aesthetic expectations of each genre? How were subject, scale, perspective, and proportion determined and by whom? Moving beyond a binary opposition of science versus art, we will study conventions and changes in mapmaking and landscape painting from the sixteenth to nineteenth centuries to analyze shifting conceptions of national identity, modernity, and the relation of humans to nature. Course lectures and an interdisciplinary array of readings will provide historical and conceptual support for object-based discussions in the Williams College Museum of Art, the Chapin Rare Book Library, and at the Clark Art Institute.

**Class Format:** this course will meet twice per week, the first meeting will be in the format of a lecture, the second will be a seminar-style discussion

**Requirements/Evaluation:** two short papers (4-5 pages), one longer final paper (10-12 pages), presentations, and participation in discussion

**Prerequisites:** none

**ARTH 367  (F)  Documentary Fictions**

**Cross-listings:** ARTH 367  ENGL 367

**Secondary Cross-listing**

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean—whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA—still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

**Requirements/Evaluation:** four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors; Art and Comparative Literature majors; students with experience making video

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

ARTH 368 HIV + AIDS in Film and Video (DPE)

Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in reckoning with the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a 'plague' of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the 'plague' years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: the past decade has yielded a new wave of artworks dedicated to memorializing the crisis, while for many communities, the crisis never ended. Together, we will ask difficult and probing questions about this phenomenon called the 'AIDS epidemic,' examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings and intensive discussion.

Requirements/Evaluation: Discussion facilitation, attendance and participation, short response papers, long research paper

Prerequisites: ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: senior majors

Expected Class Size: 12

Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This is an intersectional course in LGBTQ+ art history, with an examination of the relationship between sexuality, gender, ethnicity and power within AIDS activism and the AIDS crisis.

Not offered current academic year

ARTH 379 (S) Writing Art

Cross-listings: ENGL 379 ARTH 379

Secondary Cross-listing

This course is conceived primarily as an experiential adventure in creative forms of art writing. We'll read several recent examples of such work (from writers including John Ashbery, Roland Barthes, John Berger, Teju Cole, Jorie Graham, Robin Coste Lewis, Eileen Myles, Ali Smith, Roberto Tejada, and John Yau) to get a sense of the range of approaches, from the ekphrastic poem to the essay to the novel, alive today; and we will spend considerable time in local museums, engaging intimately with works of art through various writing prompts, as you create your own creative responses to visual art. Along the way, we will work to historicize and theorize the relation between the verbal and visual arts, and to ask what looking at art brings to creative writing, as well as the ways creative writing might extend or alter the work of art history.

Class Format: This will be a hybrid course. We will divide our time between seminar meetings, where we will discuss published texts; museum visits, where you'll engage directly with visual art; and small group meetings, where you'll get feedback on your evolving work.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and quality of the work, as evidenced by a final portfolio of revised writing.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: Undergraduate majors in English or Art and graduate students in Art.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
**ARTH 400 (F) Clark Visiting Professor Seminar: Race and Visual Culture**

**Cross-listings:** ARTH 500, ARTH 400

**Secondary Cross-listing**

Race does not exist. On a biological level, the idea of race as a grounded scientific category has been disqualified for decades. If it had an end, it necessarily had a beginning. One can identify this beginning in the middle ages and follow it through Renaissance as an idea of lineage; the modern intersection of race with skin color began with the early modern colonization process in the Americas and in Africa. From that time forward, the history of race and the history of art intersect. This course will try to show how art history’s tools are fundamental to understanding race as a modern category and social agency. We will focus on the raw materials of the painter (pigments); visuality as a modality of human categorization, the construction of human hierarchies or racial orders, the social efficiency of color theories and racial matrix of caricature. Course readings will privilege the wealth of recent research and historiography addressing the links between art, visual culture and race.

**Requirements/Evaluation:** writing assignments, participation

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** graduate students get preference; places for 8 undergraduate and 8 graduate students assured

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 500 (D1), ARTH 400 (D1)

---

**ARTH 402 (S) Monuments and The Art of Memorial**

The urge to commemorate is a timeless human impulse. Individuals, heroic acts, and historic events have been marked by mounds, architecture, images, words, and ephemera for over 5000 years. The value of the subject or focus of a commemoration changes over time. Entropy, iconoclasm, and vandalism have been seen as either positive or negative modes of destruction. Recent events have brought into high relief monuments long taken for granted as markers of the American urban landscape. Calls for the removal of monuments that have elevated individuals implicated in colonialism and racism have led to a powerful surge in alternative monument-making, and brought commemorative images back into public consciousness. Over the course of the seminar students will document and explore the concepts behind monuments and memorials in the Western tradition from their origins in the ancient Mediterranean (Mesopotamia, Egypt, Greece, Imperial Rome), and chart their reception, interpretation, destruction, and/or influence in later periods. We will also analyze the abstraction and inversion of monumental form, seen in the counter monuments of the late twentieth century such as Maya Lin's *Vietnam Veterans Memorial* (1982) or Gunter Demnig's *Stumbling Stones* project (*Stolpersteine*, 1992-the present), the world's largest decentralized memorial for the victims of Nazi terror. Our consideration of historical monuments will be paired with ongoing contemporary discussions of action around the removal of memorials, and the call for creative alternatives. During the second half of the semester seminar participants will research a memorial trend or a specific monument, and investigate and parse its context and reception over time. A short presentation and a substantial paper, written in stages, will be the end result of the research project.

**Class Format:** Discussion oriented course. Each student will have the opportunity to coordinate the discussion.

**Requirements/Evaluation:** The requirements of the course include: attendance, weekly posts on reading, and participation in discussion; a short (15-minute max) report on a research project; a 15-18 page paper on the research project, written in stages.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors and grad students, then any interested student
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option

Unit Notes: This course will fulfill the seminar requirement for the major in Art History. It can also fulfill the ARTH pre-1800 Course requirement if a seminar project is in the pre-modern era.

Distributions: (D1)

ARTH 403 (S) Clark Visiting Professor Seminar: The Making of African Art
Cross-listings: ARTH 503 ARTH 403
Secondary Cross-listing
Where does African art come from? How do ritual objects from the African continent became works of art in western museums? What kind of discourses transformed artifacts (religious, magic, mundane or extraordinary) into fine arts masterpieces? How did European early modern and western contemporary texts qualify and impact the reception of African objects from the period of colonization and after? Discourse shapes materiality and visuality. Manipulations fashion things. The gaze acclimates to different volumes and forms. In this course, these different aesthetic regimes of the modern era will be explored regarding African art. From Olfert Dapper (Dutch polymath of the late 17th century) to Michel Leiris (French novelist and ethnographer of the 20th century) we will follow the diverse histories of African artifacts and creative processes as they developed in the West into the loose and pluridisciplinary domain of African Art History. The course will be an occasion to read different texts regarding African artifacts from 1680 to 1930 and discuss the perception of these objects in Europe as well as their transfiguration into the property and aesthetic objects of European museum.

Requirements/Evaluation: research paper, class presentations
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduate and 8 graduate students assured

Expected Class Size: 16

ARTH 404 (F) The Enemies of Impressionism, 1870-1900
This class explores European and international painting and sculpture of the last quarter of the nineteenth-century, particularly the work of artists once famous in their day but whose reputations collapsed with the rise of Impressionism and Modernism. Once dismissed as trivializing, sensationalizing, politically suspect, kitsch, and simply “bad”-- much of this art has attracted new attention and enthusiasm in recent years. Focus on aesthetic theory, narrative, cinema, and -- most of all -- viewer experience. Artists include Gérôme, Bouguereau, Alma-Tadema, and many others.

Requirements/Evaluation: readings and research paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: none
Expected Class Size: 12
**ARTH 405 (F) Seminar in Architectural Criticism**

How does one judge a building? According to its structural efficiency or its aesthetic qualities? Its social responsibility—or just its pizzazz? Depending on the building, and the critic, any of these questions might be pertinent, or impertinent. This seminar explores architectural criticism, that curious genre between literature and architecture, and looks at its history, nature and function. We will read and discuss classic reviews by historical and contemporary critics as John Ruskin, Mariana van Rensselaer, Lewis Mumford, Ada Louise Huxtable and Herbert Muschamp. Insights gained from these discussions will be applied by students to writing their own reviews, which will likewise be discussed in class. Early assignments will concentrate on mechanics: how to describe a building vividly and accurately, how to balance description and interpretation judiciously, how to compare. Subsequent ones will be more synthetic, encouraging students to write bold, lively and critical essays. The ultimate goal is to develop a distinctive and effective voice, and to gain a better understanding of the nature of criticism in general.

**Requirements/Evaluation:** students will write and revise six papers (5-7 pages) during the semester

**Prerequisites:** any 100 level ARTH course or permission of instructor

**Enrollment Limit:** 11

**Enrollment Preferences:** junior Art History majors

**Expected Class Size:** 11

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** AMST Space and Place Electives

**Not offered current academic year**

**ARTH 407 (F) Materials and Material Culture along the Eastern Silk Road**

The Silk Road, a network of land and sea trading routes stretching from the Mediterranean to East Asia, served as a conduit for dynamic interactions and cross-cultural exchanges in the era before globalization. As a great cultural highway, the Silk Road stimulated the movement of peoples, the trade of luxury goods, and the transmission of technologies, ideas, and artistic motifs. This seminar examines the materials and material things traveling along the Silk Road from the fall of the Han Dynasty in China to the rise of the Mongol Empire (ca. 300 to 1400 CE). We focus, in particular, on the movement and use of three key materials: silk, glass, and paper. Topics include the transmission of silk-weaving technologies between China and Central Asia, glass bead production on the Korean peninsula, and the role of Japan's Shosoin Treasury in the construction of kingship. The emphasis will be on the material culture and sites from China, Korea, and Japan, with forays to India, Afghanistan, Turkey, and beyond. You will learn to critically analyze issues related to cultural interactions and gain familiarity with critical approaches to materiality and material culture studies. As a class, we will also develop a collaborative timeline as a resource to remember historical developments as well as key dates, objects, materials, and individuals. No prior knowledge of Asian art history is required or assumed.

**Requirements/Evaluation:** attendance, class participation and discussion, 5 response papers (2-3 pages), Silk Road City presentation, 12-15 page final paper + presentation

**Prerequisites:** must have taken at least 1 art history course

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors or seniors, but open to all

**Expected Class Size:** 8

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH pre-1800 Courses

**Not offered current academic year**

**Fall 2021**

**SEM Section: 01 MR 2:35 pm - 3:50 pm Carolyn J. Wargula**
"Modernism" in art: when we think about it, we may not readily think of Brazil. But Brazil was in fact a vibrant battleground of ideas around what it was to be innovative, modern, and avant-garde. Between 1920 and 1945, artists, poets, and critics in the metropolises of São Paulo and Rio de Janeiro actively debated on the creation, and potential, of a uniquely Brazilian modernist aesthetic that would stand on par with the European avant-gardes. But what did "Brazilianness" mean to these intellectuals? What role did gender and race relations—indigeneity in particular—play in the construction of this aesthetic? How did the necessities and demands of the national context shape these modernist practices? This seminar will take a deep dive in this fascinatingly contradictory moment in Brazil, a chapter that would become a fundamental reference to Brazilian artists in the 1960s and even to this day. In addition to detailed analyses of artworks, we will read manifestos, novels, and criticism from this period, and the most up to date secondary interpretive texts.

Requirements/Evaluation: participation, short presentations, four 2-page writing assignments, final 12-page research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 408 (D1) COMP 408 (D1)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through textual, visual, and historical analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Brazilian modernism in Western art history. The course also centers on contextualizing the artistic practices of Brazilian modernism and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, and revolutionary politics.

Not offered current academic year

ARTh 412 (F) The Politics of Aesthetics: Collaboration and Participation in Contemporary Art

The social turn is a hallmark of contemporary art, as artists since the 1960s turned from the art object toward dynamic exchanges with the public, from sole author to collaborative engagement. This seminar provides a theoretical framework to historicize as well as to critically analyze the promise and pitfalls of collaborative works, of favoring active participants over passive spectators, and of the meteoric rise of what is now commonly known as "social practice" art. A wide range of case studies from around the world will also allow us to delve into the intersections and productive tensions between aesthetics and politics, or between art and life.

Requirements/Evaluation: discussion questions, weekly presentations on either a text or an artist, three response papers, final 12- to 15-page paper

Prerequisites: must have previously taken an Art History course

Enrollment Limit: 10

Enrollment Preferences: If overenrolled, preference will be given to Art History seniors.

Expected Class Size: 7

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH post-1800 Courses

ARTh 414 (F) Modernist Architecture: The Rise and Fall of the Modern Movement (WS)

Modern architecture was once a radical movement—as radical as modern art, music, and literature—but though its forms survive today, they have lost their revolutionary charge. It has dwindled, in the words of Nathan Glazer, "from a cause to a style." This seminar will examine the modern movement
in architecture as a historical artifact, from its emergence in early 20th-century Europe to its worldwide dominance in the 1950s, and to its collapse into an ideology-free modern vernacular since the 1960s. We will look at the principal theorists of the movement, including Le Corbusier, Mies van der Rohe, and Adolf Loos, as well as the critics who undermined it, particularly Robert Venturi and Jane Jacobs. Potential research topics include the failure of urban renewal, the patronage of modernism by corporate America, postmodernist criticism, and the historiography of the modern movement--in short, any topic that falls between Mies's "less is more" to Venturi's "less is a bore."

Requirements/Evaluation: Several short classroom presentations. A 20-page research paper and a one-hour presentation & discussion in the seminar.

Prerequisites: At least two previous courses in art history.

Enrollment Limit: 11

Enrollment Preferences: Juniors, seniors and graduate students.

Expected Class Size: 11

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will prepare a seminar research paper of at least 20 pages that will be revised in multiple draft, responding to comprehensive feedback on content, style, logic, tone, grammar, word use, and so forth.

Fall 2021

ARTH 416 (S) Senior Seminar: The Art of Minor Resistance: Advanced Readings in Race, Gender, Performance

Cross-listings: COMP 404 ARTH 416 THEA 416 WGSS 416

Secondary Cross-listing

This seminar will study stagings and aesthetic theories of dissent in feminist, queer, anti-colonial, and anti-racist performance. An attunement to performance and to the minor is also a turn toward minoritarian knowledges and lifeworlds. Of interest will be modes of sensing and relating that are not often legible as political--including aesthetics of opacity, quiet, disaffection, aloofness, and inscrutability--but could be understood as critiques of political recognition. Performance is a capacious rubric in this class that will include performance art, social media, photography, music videos, poetry, street protest, and everyday life. Students will learn to describe, interpret, and theorize performance through discussion, writing, and creative form.

Requirements/Evaluation: in-class discussion, partner presentation, weekly reading responses, final project

Prerequisites: WGSS 101

Enrollment Limit: 15

Enrollment Preferences: WGSS majors, students with previous performance studies coursework

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 418 Gothic Wonder: Exploring the Medieval Cathedral Then and Now

Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals were built to amaze visitors--the medieval equivalent of the blockbuster movie, and then some. The goal was to activate and overwhelm all of the senses and thereby both to produce an experience of transcendence for the people entering and using the cathedral, and to capture their hearts. The widespread social media reaction of shock and dismay to the fire at Notre Dame in Paris last year suggests that this power of the medieval cathedral to captivate remains very much alive. But these cathedrals have also, over the centuries, embodied and perpetuated hierarchies of authority and privilege, and have consumed vast economic resources. As a result, they have often been centers of conflict--and this too remains true today, as the heated debate in France over the rebuilding of Notre Dame testifies. This seminar will investigate the multiplicity of realities that make up the Gothic cathedral, from the Middle Ages to the present day. Together, we will look at a number of Europe’s most renowned
cathedrals, through time—in France (including Notre Dame in Paris), England, Italy, Germany, Spain, and elsewhere—and consider both how each building has changed over the centuries and how it has been differently interpreted. As this collective conversation is unfolding, students will also pursue individual research projects on a cathedral of their own choosing, the aim being similarly to examine one of these remarkable monuments over time and in its shifting contexts.

**Requirements/Evaluation:** Participation in class discussion; oral presentation; 15-20-page research paper.

**Prerequisites:** Permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Art majors, but open to all

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1)

**Attributes:** ARTH pre-1800 Courses

Not offered current academic year

**ARTH 420 (F) Architecture and Sustainability in a Global World**  
**Cross-listings:** ARTH 420  GBST 420  ENVI 420

**Primary Cross-listing**

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

**Class Format:** This course will be taught in a hybrid mode, with both online (lecture) and in-person (discussion) elements.

**Requirements/Evaluation:** weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

**Prerequisites:** none, although a course in art/architectural history or environmental studies would be advantageous

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors, Environmental Studies majors, History and Studio majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 420 (D1)  GBST 420 (D2)  ENVI 420 (D1)

**Writing Skills Notes:** This course develops writing proficiency using a series of sequenced assignments that culminate with the formation of a well-articulated, compelling final project. Students will receive extensive feedback on these assignments via a progression-oriented evaluative system that involves both instructor and peer feedback, and will take part in a writing seminar towards gaining the necessary tools for drafting work, formulating ideas, organizing sections, and crafting an abstract.

Not offered current academic year

**ARTH 421 (S) Picturing God in the Middle Ages**

**Cross-listings:** REL 421  ARTH 421

**Primary Cross-listing**
How did medieval Europeans imagine their God and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? Paying particular attention to the function and experience of medieval works of art, this seminar will examine the evolution of images of God, in both the Eastern and Western halves of Europe, and the problems these images often generated. Through readings and class discussion, the course will investigate, among other specific topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of the Roman cult of the emperor and of images of the dead on the earliest portraits of Christ; the cult of the icon, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics, the Eucharist, and other aspects of Christian ritual; and the pictorial exploration of both the torture and sexuality of Christ. Students will also pursue an individual research project, in which they will examine in greater depth a specific depiction of divinity of their choosing, in light of what we have considered together in the seminar.

**Class Format:** Class will meet online at first but may shift to in-person if circumstances allow

**Requirements/Evaluation:** class participation, oral presentation, one short paper (2-3 pages), final research paper (15-20 pages)

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference given to Art majors and seniors.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**ARTH 422 (S) Art, Architecture, and Poetry: Islamic Devotional Culture in South Asia**

**Cross-listings:** COMP 422 ARTH 422 REL 422

**Primary Cross-listing**

How have scholars interpreted and classified terms such as "Islamic art" and "Muslim culture," and how have these classifications affected the interpretation of the arts in South Asia? There are different points of view regarding what constitutes as "Islamic" art and culture. Is an imperial wine cup with "God is Great" inscribed on it an "Islamic" object? How is an erotic epic narrating the romance of a Hindu prince understood as embodying the principles of Muslim devotion? This interdisciplinary seminar, focusing on South Asian Muslim devotional culture as articulated through the material culture, the arts of the book, architecture, and poetry, will navigate these questions from two perspectives. The first is to understand how Muslim devotional cultural expression in South Asia circumscribes and interprets itself. The second viewpoint is that of scholarship and the various interpretive voices that have framed the field over the last century.

**Requirements/Evaluation:** class participation, 2-page response papers on class readings, leading class discussion, final 15-20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Art Majors, and then to students of any major interested in art and culture of Islam

---

**ARTH 424 (S) Heaven's Gate: The Romanesque Sculpted Portal and the Creation of Sacred Space Through Art**

**Cross-listings:** ARTH 523 ARTH 424

**Primary Cross-listing**
During the course of the eleventh century, the designers of European churches fashioned a new architectural language that we now label "Romanesque." One of the most innovative and dramatic aspects of this new language was its assimilation of monumental sculpture, absent in Europe since the fifth century. The focus of attention in this regard was the portal, which marked the threshold between the profane realm of the outside world and the sacred space of the church. Often characterized as the "marquee of the Middle Ages," the Romanesque sculpted portal, with its startling juxtaposition of the spiritual and the physical, of ecstatic visions of the heavenly realm and writhing, biting monsters, constitutes one of the true high-points of creativity in medieval art. Through the lens of modern scholarship, this seminar will investigate the antecedents and origins of the Romanesque sculpted portal and examine in detail its most renowned manifestations. Emphasis will be placed on understanding these often complex sculptural schemes within their original functional and material contexts, especially in terms of how they helped to create the sacred space of the church behind. Students will then have the opportunity to develop their own research projects, informed by what we have learned in the seminar, but focused on an example of sacred threshold art of their own choosing.

**Requirements/Evaluation:** class discussion/participation, oral presentation, and a 15- to 20-page research paper

**Prerequisites:** permission of instructor

**ARTH 430  (F)  Aesthetics and Human Variety: European Representations of Oceania**

Using European representations of the inhabitants of Oceania as the primary materials of our investigation, this seminar will explore the connections to be made among theories of beauty, practices of art making, and the construction of race as a scientific concept in the second half of the eighteenth century and the beginning of the nineteenth century. In Europe, this was a period that gave rise to aesthetics as a branch of philosophy, to several theories of the origins of human difference, to debates over the abolition of slavery, and to no fewer than fifteen expeditions to the Pacific Ocean. This course will investigate the crucial role that pictures played in all of these developments. Though students will not be required to write their research papers on pictures of Oceania, they should consider the central questions of the course: What purposes do the various conceptions of race serve? What are the aesthetic assumptions made by theorists of race? How do models of making art influence European ideas about foreigners? How do the pictures of foreign peoples impact the construction of race?

**Requirements/Evaluation:** class discussion, weekly reading responses, an oral presentation, and a 15- to 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ARTH 434  (S)  Renaissance Time**

Time defines the Renaissance, whether framed as the "rebirth" of the past or the foundation of the present. Either way, past historians molded this period with time as their medium, fixing the Renaissance at the dynamic center of history. Flowing from historiographic foundations, this course will follow diverse art historical streams of Renaissance time to the present. How do Renaissance images play along by pointing to times outside of their frames? What are the implications for the historical worlds-the contexts-we build around objects in order to understand them? How do we navigate the role our own perspectives, interests, and desires play in the form we give to the past? How has time shaped the historic hegemonies of geographic place, and how might we re-deploy temporal strategies to dislodge them? This is a Renaissance course that explores topics fundamental to the
broader history of art, and one that ranges widely in focus from the theoretical to the concrete. We will base our discussions both on class readings and on object-based assignments in local museums designed to explore the living relationships we forge with the art of cultures long since gone. Accordingly, students will spend (lots of) time with Renaissance works at the Clark Art Institute, and work with/at WCMA to shape new narratives that bridge past and present while honoring them both.

Class Format: component of museum-based coursework

Requirements/Evaluation: class discussions and written preparation (students have a range of choices); two brief essays based on museum assignments (one with wall label); and a 10- to 15-page research paper

Prerequisites: one 100-level Art History course and any other Art History course, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Art History and History majors and graduate students in the History of Art

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

Not offered current academic year

ARTH 435  (F)  The Medieval Object

Cross-listings: ARTH 535  ARTH 435

Primary Cross-listing

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 436  (S)  Demigods: Nature, social theory, and visual imagination in art and literature, ancient to modern

Cross-listings: ENVI 436  ARTH 436  CLAS 436

Primary Cross-listing

Horse-men, cat-women, goat-men, tree-women, man-bulls, fish-girls, snake-people--cross-species compound creatures are everywhere in ancient Greek and Roman art, poetry, and culture. The conceptual or cognitive value of those "demigods" has changed over time. In art, demigods have frequently been reduced to the status of decoration, and in literature, they have become generic markers of fantasy. But they are hardly without
meaning. Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of nature, the origin of species, and the environment; and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. We will consider in detail ancient theories of the origins of species as well as the relationship between nature and human culture. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian, and the rediscovery of ancient materialist theories of nature and culture. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg's cultural-historical texts, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

**Class Format:** Lecture and discussion. When possible, we will meet outdoors in person; when that is not possible, we will meet online.

**Requirements/Evaluation:** The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

**Prerequisites:** none

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** This course will satisfy the seminar requirement in art history.

**ARTH 438 (S) Ambrotypes to Instagram: Photography and the Human Portrait**

"A portrait! What could be more simple and more complex, more obvious and more profound?" exclaimed the nineteenth-century poet and critic Charles Baudelaire. With the invention of photography in the first half of the nineteenth century and with the digital revolution of the twentieth, portraiture arguably became more simple and more complex, more obvious and more profound. In this seminar, we will explore this complicated and fascinating history. Photographic portraits are fine art and vernacular culture. They serve private and public functions. They help to fashion the self and construct group identity. They disguise and disclose the truth. In the classroom, galleries, and archives, we will investigate the problems of likeness and semblance, veracity and credibility. We will delve into the conflict between representations of individuals and representations of types, and we will attend to the complicated, sometimes fraught, relationship between photographer and subject, even when they are one and the same.

**Requirements/Evaluation:** class participation, short essays, individual presentations, and a final research paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Attributes:** ARTH post-1800 Courses

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

Prerequisites: ARTH 102 (graduate students are exempt from the prerequisite)

Enrollment Limit: 15

Enrollment Preferences: senior Art majors and senior Latina/o Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

ARTH 442 (F) Richardson, Sullivan, Wright: The Roots of American Modernism

Should a building express the facts of its program and materials--directly and without sentimentality? Or should a building be a physical manifestation of the personality and ego of its creator? These demands--one of radical objectivity, and one of radical subjectivity--seem to be mutually exclusive, yet together they form the basis for modern architecture at the start of the 20th century. The architectural lineage of Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright is distinguished by the high degree of tension between the competing demands of factuality and selfhood. This seminar explores the theoretical roots of their architecture, its philosophical sources in transcendentalism, Unitarianism, German romanticism; and treating such aspects as decorative arts, architectural education and theory, and architectural autobiography.

Requirements/Evaluation: one hour presentation, 20-page paper

Prerequisites: any 100-level ARTH course or consent of instructor

Enrollment Limit: 11

Enrollment Preferences: senior Art majors and graduate students

Cross-listings: ARTH 462 AMST 462 LATS 462 ARTH 562

Primary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: Several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester. The course will feature synchronous online class meetings with some small discussion groups. Student presentations will be recorded offline and posted to GLOW.

Prerequisites: ARTH 102 - Grad Art exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 466 (S) Hellenistic Art and the Beginning of Art History

Cross-listings: ARTH 466 CLAS 466

Primary Cross-listing

The Hellenistic Period (323-31 BCE) saw the small city-states of the Greek peninsula replaced by far flung kingdoms as important centers of power and culture. In the wake of Alexander the Great's extension of the borders of the classical world all the way to the banks of the Indus River, increased trade, and the movement of individuals between Greece, Egypt, and the Near and Middle East encouraged innovations in philosophy, medicine, religion, literature and art. In fact, a revolution in artistic ideas and forms centered on the social and ethnic diversity of human experience. Royal patrons, and wealthy private citizens including an increasing number of women, commissioned artworks for cities, sanctuaries, tombs, palaces, and estates on a scale rarely seen before. And with the rise of Rome, plundered artworks of earlier periods soon became the desired objects of wealthy collectors, contributing to a mashup of stylistic influence. In this course we'll look closely at influential works of art in bronze, marble, fresco, and mosaic, where artists push the limits of their media in order to express emotional states ranging from pathos to ecstasy, from the mental exhaustion of a defeated athlete, to the cool restraint of a powerful ruler. We'll attempt to understand the conceptual and cultural forces that encouraged artistic innovations of the fourth century BCE through first century CE. We'll also look for the influences of Hellenistic art on artists and writers from the Renaissance to the present day. Reading material includes ancient literature in translation, recent surveys of Hellenistic art, and recent critical essays.

Requirements/Evaluation: Students are responsible, in groups of 2 or 3, for leading discussions based on selected readings. A 5-page midterm paper, and two oral reports –one 6 minutes in length, the other 15-20 minutes in length-- will help form the basis for a 15-18 page research paper on a specific artwork or concept in Hellenistic art, or the adaptation of Hellenistic artworks or themes in later periods, that will be due at the end of the
semester. A museum visit may be possible, depending on circumstances.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Art majors, and then to students of any major interested in art and thought in the ancient Mediterranean world, with permission of instructor

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Unit Notes: ARTH Seminar Requirement

ARTH 468 (S) Practicum in Curating: Visual Art for a Garden

Cross-listings: WGSS 468 ARTH 468

Primary Cross-listing

This course aims to develop the wide range of skills needed to realize an art exhibition in a botanical garden (specifically Marie Selby Botanical Gardens in Sarasota where the instructor is Curator at Large. The course responds to her charge to exhibit artists with 100% name recognition for the first five years of Selby's new "Living Museum" initiative which puts works of art in dialogue with botanicals. In the wake of shows devoted to Marc Chagall (2017), Andy Warhol (2018) and Paul Gauguin (forthcoming, 2019), each student will research and choose a non-male and/or non-white artist of some renown and construct an exhibition of works that might be possible to borrow. Course work includes 1) research on the artist and the concept, the focal works of art, auxiliary objects that do not require climate control (e.g. photographs and other works on paper), social history and other methodological frameworks 2) writing requests e.g., loans, rights; and 3) preparations for several of the following: press release, wall texts, wall labels, audio guide, and programming for the exhibition. The final project includes a 10-page synthetic research paper, written for a general audience, about the artist and their use of flowers as well as the projected installation of the climate-controlled gallery. Students may have the opportunity to participate in a WSP in situ in which they will experience all sectors of the museum, glass house, and gardens.

Class Format: this is a practicum so while it meets 3 hours/week as a seminar does, it is hands on in a different way (e.g., co-peer and one-on-one reviewing by me in class)

Requirements/Evaluation: in-class presentations of research (weekly or bi-weekly), a substantive annotated bibliography, several short writing assignments (e.g. letters, queries, reviews), reading and critiques of others' work, in-class presentation of two drafts of the final paper and installation

Prerequisites: at least one 100-level course in ARTH

Enrollment Limit: 10

Enrollment Preferences: junior and senior art majors, especially those who have had either methods or a senior seminar and/or those with strong research, writing, and design skills

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: field trip expenses that may not be funded by the department (not to exceed $100)

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 472 (S) Timelines

Art is really time-consuming--to make, to view, to use, to understand. We enshrine it, excavate it, curate it, deploy it and sometimes we deliberately destroy it. We are always telling stories about the stuff. We seem to think that we control these many fabled things, though they meddle endlessly in the spaces between self and other, human and divine. Great art can be inspiring, enabling people to transcend time, or it can be traumatizing, making
time stop altogether. Or both! To explore such powers, we will begin in the 19th century, when commonplace notions of past and present wobbled seriously with the invention of photography and the avid pursuit of archaeology. Thereafter, we will operate across time and space, with particular reference to the Middle East, where art has figured in many religions and also many conflicts. There will be no single story-line, but rather a series of case studies and hands-on projects; we will consider materials ranging from iconic paintings and sacred spaces to calendar art and photojournalism. Along the way, creativity and iconoclasm will be recurring themes. Choose this class if you are curious about the agency and power that art wields in our lives.

**Class Format:** will include making, breaking, and writing as well as discussion of assigned readings

**Requirements/Evaluation:** regular attendance and active class participation, Glow Posts, term project

**Prerequisites:** one studio or art history class

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**ARTH 474 (S) Brazilian Art in the 20th Century: Aesthetics, Internationalism, Utopia**

In 1924 the modernist poet Oswald de Andrade radically called for Brazilians to engage in cultural "anthropophagy"—to cannibalize from European modernist ideas and synthesize these with local aesthetic and cultural values. Toward the mid-20th century, the narrative of Brazilian art was marked by the desire on part of artists and intellectuals to problematize its place in Latin America, and vis-à-vis the European avant-gardes. They did so with a strong utopian perspective, developing aesthetic strategies to confront and transcend Brazil's underdevelopment. Yet ideas around nationalism, internationalism, and utopia shifted dramatically when a military dictatorship came to power between 1964 and 1985. How did artists and intellectuals rethink the role of aesthetics in such critical sociopolitical conditions? How did these terms shift again after Brazil returned to democracy, and soon aggressively entered an increasingly globalized economic system? Our seminar will delve into these complex relationships for a comprehensive understanding of the development of modern and contemporary Brazilian art. This is a Writing Intensive course, and there are no prerequisites to enroll.

**Requirements/Evaluation:** weekly presentations, two review exercises, four 5-page papers

**ARTH 494 (S) Thesis Seminar**

To graduate with honors in art history, students are to enroll in the Senior Honors Seminar during the Spring semester of their senior year, where they will develop an original research paper based on prior research. Under the guidance of the instructor, students will present and defend their own work in both written and oral form, as well as respond to, and critique, the work of their peers. As students work toward transforming their existing paper into an honors' thesis, they will also be trained in skills necessary to analyze an argument effectively, and strategies of constructive critique.

**Requirements/Evaluation:** once in the seminar, students will revise, refine and expand on previous research and produce a paper of approximately 25 pages and present a shortened version of the paper to the faculty and public at the Williams College Museum of Art

**Prerequisites:** for requirements of entry into the course, please see "The Degree with Honors in Art, Art History"

**Enrollment Limit:** 8

**Enrollment Preferences:** permission of instructor required
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option

ARHT 500  (F)  Clark Visiting Professor Seminar: Race and Visual Culture
Cross-listings: ARHT 500  ARHT 400
Primary Cross-listing
Race does not exist. On a biological level, the idea of race as a grounded scientific category has been disqualified for decades. If it had an end, it
necessarily had a beginning. One can identify this beginning in the middle ages and follow it through Renaissance as an idea of lineage; the modern
intersection of race with skin color began with the early modern colonization process in the Americas and in Africa. From that time forward, the history
of race and the history of art intersect. This course will try to show how art history’s tools are fundamental to understanding race as a modern category
and social agency. We will focus on the raw materials of the painter (pigments); visuality as a modality of human categorization, the construction of
human hierarchies or racial orders, the social efficiency of color theories and racial matrix of caricature. Course readings will privilege the wealth of
recent research and historiography addressing the links between art, visual culture and race.

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in today's arts institutions. Looking at museums past and present internationally, the seminar will envision the future of museums as we recognize the programmatic trends developing in our own moment of civic and social unrest. The class will consider this future while examining existing governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues in repatriation and restitution of cultural property. Surveying museums ranging in size and type from the "encyclopedic" to newly established contemporary arts institutions and alternative spaces, we will investigate current trends in acquisition, exhibition, educational programming in light of the equity and social justice demands of our time. With our goal of imagining art museums in the future, class discussions will have a special focus on how museums might strive to balance their traditional scholarly and artistic responsibilities with their heightened civic and social roles, doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

ARTH 503 (S) Clark Visiting Professor Seminar: The Making of African Art

Cross-listings: ARTH 503 ARTH 403

Primary Cross-listing

Where does African art come from? How do ritual objects from the African continent became works of art in western museums? What kind of discourses transformed artefacts (religious, magic, mundane or extraordinary) into fine arts masterpieces? How did European early modern and western contemporary texts qualify and impact the reception of African objects from the period of colonization and after? Discourse shapes materiality and visuality. Manipulations fashion things. The gaze acclimates to different volumes and forms. In this course, these different aesthetic regimes of the modern era will be explored regarding African art. From Olfert Dapper (Dutch polymath of the late 17th century) to Michel Leiris (French novelist and ethnographer of the 20th century) we will follow the diverse histories of African artefacts and creative processes as they developed in the West into the loose and pluridisciplinary domain of African Art History. The course will be an occasion to read different texts regarding African artefacts from 1680 to 1930 and discuss the perception of these objects in Europe as well as their transfiguration into the property and aesthetic objects of European museum.

Requirements/Evaluation: research paper, class presentations

**ARTH 504 (S) Proseminar in Research and Method**  
In this graduate Proseminar on Research and Method, we will read a number of texts that form the foundation of art history as a discipline, including the writings of Plato, Panofsky, Lessing, Heidegger, Wölfflin, and Barthes (among others). We will study these works against the grain, considering how art history is currently transforming under the fields of ecology, disability studies, queer theory, and radical black feminism. Students will work closely with the collections of the Clark to theorize how absences are integral to institutional histories, and we will think about how we can, as historians, responsibly address voices that have been removed from the canons of art history. This course considers not only central writings of art historical methodology but also the limits for decolonizing art history and the museum, as we will examine how the formation of the discipline depended upon absencing critical perspectives and voices.  

**Class Format:** in-person seminar with option to attend remotely, remote learning after Thanksgiving  
**Requirements/Evaluation:** class participation, writing assignments  
**Prerequisites:** none

**ARTH 506 (F) Expository Writing Workshop**  
This writing seminar for graduate students in Art History will afford intensive full group discussions of writing skills and substantial one-on-one writing consultations (to be held on Google Meet). Group discussions will center on three kinds of texts: Writing about writing, published writing in the discipline of Art History, and student writing in progress. In six such discussions we will improve our vocabulary and method for discussing writing; we will learn to build better and more sophisticated sentences, paragraphs, and arguments; and we will practice anticipatory reading and writing in order to strengthen our control of both voice and structure. Each discussion will be supported with both exempla and exercises, and our watchword in all cases will be "revision." In one-on-one consultations (3-4 per person), I will offer tailored critique of each student's work, setting aside time as needed to troubleshoot sentences, paragraphs, or arguments together.  

**Requirements/Evaluation:** class participation, participation in consultation meetings, writing assignments,  
**Prerequisites:** none  

**Enrollment Limit:** 14  
**Enrollment Preferences:** limited to and required of first-year students in the Graduate Program in the History of Art  
**Expected Class Size:** 14  
**Grading:** no pass/fail option, no fifth course option

ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials
This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects.

Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given.

Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

**ARTH 510** (F) **Approaches to Drawing from Connoisseurship to Conceptualism**

This course will consider the art of drawing as a pedagogical tool and cultural practice from the sixteenth to the twentieth century. Creative and commercial forces over four centuries have fostered different types of and reasons for production: presentation drawings in sixteenth century Italy, an increased market for drawings in seventeenth century Holland, a fashion for powdery pastels in eighteenth century France, and the critical promotion of drawing as a form of autographic thinking in the nineteenth century. Drawing has enjoyed a resurgence in the last fifty years as Minimalism and Conceptualism have pushed the medium's boundaries. Equal consideration will be given to the history of collecting and to materials from the invention of the Conté crayon to the deteriorating effects of acidic paper. The seminar will coincide with a major loan exhibition at the Clark of over one hundred drawings from the Renaissance through contemporary: Drawing in Depth: Master Drawings from the Thaw Collection. The class will be held in the Manton Study Center for Works on Paper and the Clark galleries with visits to the Williams College Museum of Art.

**Requirements/Evaluation:** involved class participation, several short presentations, one short paper, and a final paper approximately 20 pages

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students and then to senior Art History majors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

**ARTH 512** (F) **Why Look at Animals? Some Contemporary Positions**

This seminar, named for a 1977 essay by the art critic John Berger, considers a recent tendency in contemporary art to see nonhuman animals less as objects for human delectation-to be owned, eaten, or symbolized with-than as subjects, endowed with specific forms of intelligence, agency, and/or cross-species kinship. We will take as case studies the work of artists such as Francis Alÿs, Xu Bing, Sue Coe, Coco Fusco, Pierre Huyghe, Jochen Lempert, Chris Marker, and Lin May Saeed, among others. Readings will come in part from the rapidly growing, multidisciplinary field of animal studies. In the process, we will consider concepts such as animacy; animal ethics; animalization; the anthropocene; biopolitics; and posthumanism. This seminar anticipates two exhibitions concerning animals at the Clark in Summer 2020.

**Requirements/Evaluation:** active class participation, presentations, writing assignments

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** MA students, then advanced Art History undergraduates

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

**ARTH 513** (S) **Contours of Abstraction in Modern and Contemporary Art**

Abstraction, be it gestural or geometrical, was a protagonist of global modernisms and continues to be a powerful visual language in contemporary art. The term “abstraction” may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled
formalist rupture, revolutionary politics, appropriation, as well as racial, feminist, and queer critique. We will delve deeply into non-representation in global modern and contemporary art through myriad primary documents and theoretical frameworks so as to revise and expand its canonical contours and cartographies.

Requirements/Evaluation: Weekly presentations, response papers, final 20-page research paper
Prerequisites: Students at the undergraduate level must be seniors and Art History majors
Enrollment Limit: 12
Enrollment Preferences: Art History MA students and undergraduate Art History seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 515 (F) Creating Whiteness: Racial Taxonomies in 'American' Art, 1650-1900
Cross-listings: AMST 355 ARTH 515
Primary Cross-listing
“What is race?” “How is a race created?” “What are the racial histories and subsequent political implications of 'American' art?” These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family's images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Requirements/Evaluation: research paper, presentations
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 519 (S) Architectural Theory and Modernity, 1750-1968
Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but no longer. Why is that? We will investigate. Students will give short presentations on key theorists, such as
Vitruvius, Alberti, Palladio, Laugier, Boulée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 15- to 20-page seminar paper, based on comments and discussion following a classroom presentation.

Requirements/Evaluation: class participation, writing assignments
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: MA students, then advanced undergraduates
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 521 (S) Islam and the Image in Indian Painting, c.1450-c.1750
This seminar will explore Indian painting made for Muslim patrons from the medieval period to the early modern era. The course considers how paintings produced for an elite Indo-Muslim audience can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar will also address some of the major problems that continue to haunt Indian art scholarship. For most of its history, the academic study of Indian painting has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts-a curious oversight in light of the fact that miniature painting is primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted miniature paintings. Western museums continue to place paintings made for books and albums in their "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences-even at times bound in the same albums-are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? In order to understand the various intended functions of miniature painting and its possible role as an "Islamic" art, the seminar will explore ways to conceptually reintegrate images and texts belonging to key manuscripts and albums that were dispersed during the colonial and post-colonial periods. To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

ARTH 523 (S) Heaven’s Gate: The Romanesque Sculpted Portal and the Creation of Sacred Space Through Art
Cross-listings: ARTH 523 ARTH 424

Secondary Cross-listing
During the course of the eleventh century, the designers of European churches fashioned a new architectural language that we now label "Romanesque." One of the most innovative and dramatic aspects of this new language was its assimilation of monumental sculpture, absent in Europe since the fifth century. The focus of attention in this regard was the portal, which marked the threshold between the profane realm of the outside world and the sacred space of the church. Often characterized as the "marquee of the Middle Ages," the Romanesque sculpted portal, with its startling juxtaposition of the spiritual and the physical, of ecstatic visions of the heavenly realm and writhing, biting monsters, constitutes one of the true high-points of creativity in medieval art. Through the lens of modern scholarship, this seminar will investigate the antecedents and origins of the Romanesque sculpted portal and examine in detail its most renowned manifestations. Emphasis will be placed on understanding these often complex sculptural schemes within their original functional and material contexts, especially in terms of how they helped to create the sacred space of the church behind. Students will then have the opportunity to develop their own research projects, informed by what we have learned in the seminar, but focused on an example of sacred threshold art of their own choosing.

Requirements/Evaluation: class discussion/participation, oral presentation, and a 15- to 20-page research paper

**ARTH 524 (F) The Watchful Object**

What is implied by an object that "watches"? Is it sentient? Animate? Through what apparatus does it gain the power to perceive and in turn generate some type of action? Watchful objects--sometimes known problematically as 'fetishes,' 'idols,' and 'totems'--have existed in numerous material cultures in Africa over time and have often been saddled with titles and labels that largely reflect colonial-era notions of primitivism linked with non-Western objects, spaces, and peoples. Even today, many of these objects are still inappropriately connected to systems of the occult rather than being recognized as crucial cogs in the socio-political, cultural, and spiritual mechanics of lived experience on the continent both past and in some cases present. The purpose of this seminar, thus, is to unpack the multiple identities that these objects have experienced as a way of understanding 1.) the circumstances and situations that catalyzed their production; and 2.) how their various material and metaphorical components function as power-producing elements that enable these forms to become 'watchful' presences in society that operate in accordance with their 'observations' of the human condition. This course will also address how the psychological agency of many of these material traditions has prompted their inclusion and absorption within contemporary artistic practices as well, often in the form of productions and performances that provoke unsettling and often transformative experiences in viewers.

**Requirements/Evaluation:**
in-class presentations, class discussion, and a final research project

**Prerequisites:** none

**ARTH 527 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA**

**Cross-listings:** ARTH 527 ECON 227 ARTH 327

**Secondary Cross-listing**

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

**Requirements/Evaluation:** three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy
ARTh 530  (S)  Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Cross-listings:  ARTH 530  CLAS 236

Primary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid’s Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the “rediscovery” of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, “Naive and sentimental poetry,” Nietzsche, Birth of Tragedy, Mallermé, “L’Apres midi d’une faun,” Aby Warburg, and Stoppard’s Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Requirements/Evaluation:  attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Prerequisites:  none

Enrollment Limit:  16

ARTh 532  (F)  Creative Life: The Visual Economy of Work

This course is a seminar on life and work focusing on methodologies of production—art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the “facts” of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968,
and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective
relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research
one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect
upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an
emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political
history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines,
advertisements, archives, world exhibitions, and product showrooms.

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25
pages)

ARTH 535 (F) The Medieval Object

Cross-listings: ARTH 535 ARTH 435

Secondary Cross-listing

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous,
such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from
precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but
also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured,
medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of
medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will
also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term
paper taking into account any comments and criticisms.

Class Format: three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

ARTH 536 (S) Charles and Maurice Prendergrast in WCMA Collections

This seminar will investigate the careers of Maurice and Charles Prendergast, who occupy curious positions in American art. Students will work closely
with the art and archival collections of the Prendergasts at WCMA, which is the largest repository of their work in the world. Maurice's
Post-Impressionism placed him at the forefront of American modernism in the first decades of the twentieth century, culminating with his inclusion in
the infamous Armory Show of 1913. Charles, a leading frame maker before adapting techniques of his craft to create incised panels, intersects with the Arts & Crafts Movement, Symbolism, and vernacular material culture. While the brothers are firmly canonical, they are often regarded as isolated from major formal and iconographic concerns of their peers. Scholarship, much of it produced at WCMA, has often focused on their subject matter. Participants in this class will consider new material and theoretical approaches to the brothers’ work that may (or may not) prove productive in resituating their place in American art.

Requirements/Evaluation: class participation and writing assignments

ARTh 537  (F)  HIV + AIDS in Film and Video  (DPE) (WS)

Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a ‘plague’ of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the plague years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: while the past decade has provoked a new wave of AIDS historiography, the COVID-19 pandemic has caused AIDS to reverberate with even greater force. Together, we will ask difficult and probing questions about this phenomenon called the ‘AIDS epidemic,’ examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings, short writing assignments, student-led discussion, and a final research project of the student’s design. In order to facilitate robust discussions and maximize student and faculty safety, the majority of this course will occur online. It will contain some in-person experiences when possible.

Class Format: This course will be largely conducted online, in order to facilitate robust discussions and maximize student and faculty safety. It will contain some in-person experiences when possible.

Requirements/Evaluation: Students will be evaluated according to the following criteria: weekly attendance, readings and participation in seminar discussion; leading class discussion once during the semester; 3 short response papers; one paper of 20+ pages of original student research.
Prerequisites: MA student, Art History or Studio Art major, or instructor permission
Enrollment Limit: 10
Enrollment Preferences: MA students first, followed by Art History and Studio Art majors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be required to conduct regular writing assignments which will culminate in a graduate-level research paper.

Difference, Power, and Equity Notes: This course explores an epidemic that had devastating effects on LGBTQ+ people, and has disproportionately affected communities of color. Questions of difference, power, and equity are absolutely central to the course.

Attributes: ARTH post-1800 Courses

Not offered current academic year

ARTh 538  (F)  Realms of Earth and Sky: Indian Painting, ca. 600-1857  (WS)

On the basis of technique, Indian painting forms a continuum from the beginning of the first millennium down to the mid-nineteenth century: an outline in ink filled with flat, opaque colors which are burnished between each layer to give them opacity. In its media, its subject matter, regional variation, range of patronage, and artistic virtuosity, it displays startling diversity. From the northern Himalayan hills to Mysore in the south, artists, often working in family workshops for royalty, priests and wealthy merchants, have adorned caves and temples, illustrated books, and created lavish albums with themes ranging from the sacred to the secular. The study of Indian painting itself is a vast, evolving body of literature that continues to oscillate between discussions of artistic style and a concentration on content and context. The aim of this seminar is twofold: to outline the development of
Indian painting historically; and to understand the political, social and religious circumstances that produced some of the greatest masterworks in Indian art. How was Indian painting used? Who were the patrons? How does the art form reflect the particular cultural values of its time? As an analytic framework, the seminar will consider Indian miniature painting both in light of primary literary sources as well as through current scholarship.

Requirements/Evaluation: Class participation. Short weekly responses. Final 15- to 20-page paper to be developed with the instructor throughout the semester.

Prerequisites: none, open to all students

Enrollment Limit: 19

Enrollment Preferences: graduate students, undergraduate art majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will submit short written assignments weekly. They will also be required to submit a final paper which they will develop throughout the semester. Students will receive comments and suggestions from the instructor on their writing skills.

Not offered current academic year

ARTH 540 (F) In Vinculus Invictus: Portraits in Prison

Among all the portraits produced during the modern period, some have been painted or, more recently, photographed in prison. Portraits in prison exist at a crossroad of politics, law, and identity; they offer a great opportunity to think about art and society. Artists themselves have made self-portraits during their own imprisonments, or sometimes a portrait of one of their fellow prisoners. More often it was the prisoners or their relatives who commissioned an artistic record of their detention. The idea of commemorating such a moment, or to evoke it as a claim to fame, seems surprising at best, outrageous and provocative at worst. But there has been, since the 16th century, an enduring tradition of portraiture in prison with its masterpieces and its pantheon, a tradition that fits into the wider pictorial attention to the prison itself. With the French Revolution, the nature of prison changed. It became a tragic symbol of political "debates." Within a few years, a terrifying series of portraits appeared that would nurture Western political thought and visual culture until now. Since the 18th century, these portraits have become more concerned with ideas that stretch beyond the individual and into the realm of social justice, mass incarceration, and the prison-industrialization complex.

ARTH 541 (F) Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud

This interdisciplinary seminar examines the rise of evolutionary biology, a new explanatory paradigm that solidified in Europe in the middle of the nineteenth century, and its ramifications in art and aesthetic theory in the late nineteenth and early twentieth centuries. We will consider how natural histories of creation, and corresponding reclassifications of the human as a species category, went hand in hand with a reconceptualization of the aesthetic faculties, and the processes of art's production and reception. A core component of this seminar will be the close study of key texts by Charles Darwin, and two thinkers who were among the most radical in extending his key insights into the domain of aesthetic theory--the psychoanalyst Sigmund Freud, and the philosopher Friedrich Nietzsche. These primary texts will provide points of departure for studying the work of a number of innovative practitioners working across a range of media, among them the composer Richard Wagner, the Neo-Impressionist painter Georges Seurat, the architect Adolf Loos, the choreographer Vaslav Nijinsky, and the art historian Aby Warburg. Methodologically a major aim of this seminar is to think together critically about the nature of art's relations to other domains of cultural production such as science or philosophy, and to interrogate what it means, both practically and epistemologically, to pursue "interdisciplinarity" as a strategy for art history.

ARTh 542 (F) Insubordinate Bodies: The Body in Conceptual Art in Latin America, 1960-1980

The use of the body—be it the artist's or those of willing and unwilling participants—is among art's most significant developments internationally since the 1960s. In Latin America between the 1960s and 1980s, activating the body not only was a strong conceptual strategy to escape object-based practices; it was also a potent way for artists to disobey and confront forms of violence and control exerted by repressive regimes. But the body too was a forceful medium by which artists could subvert heteronormative frameworks, through the visualization and performance of feminist critiques and queer identities. This seminar will explore the role of the body in Latin American conceptual art through localized case studies, elucidating the body's particular strength as a vehicle for political and institutional critique, as well as its potential to unlock alternate narratives of conceptual practices in the region.

ARTh 543 (F) Color, High and Low

Why should color in prints be controversial? For most of the nineteenth century—even as technical advances encouraged a flowering of color in woodcut, intaglio, and especially lithographic production—entrenched voices in the art establishment continued to insist on printmaking as an art of black and white. Drawing upon a wide variety of examples from the Clark's collection, this course will explore the range of associations that attached to color prints, along a broad spectrum from highbrow preciousness and subtlety to lowbrow commercialism and bad taste. Color lithography was a particular lightning rod for controversy: although chromatic experiments in this medium enabled striking aesthetic innovations, the extreme complexity of the process also meant that the designer of a print became farther and farther removed from its actual production. This was just as true for the delicate and exquisite suites produced in limited editions by Pierre Bonnard, Edouard Vuillard, and Maurice Denis as it was for the large-scale, brightly-colored lithographic posters of Jules Chéret and Henri de Toulouse-Lautrec, used to advertise popular urban entertainments. Alongside the close examination of original works of art, a set of critical and theoretical readings will help us navigate the paradoxes of printed color. Apart from the standard requirements, including a research paper and class presentation, students will have an option to participate in a summer 2020 exhibition based on the course findings. This course will take place in the Manton Study Center for Works on Paper at the Clark.

Requirements/Evaluation: class participation and writing assignments

ARTh 544 (S) Women Artists in Paris, 1850-1900

In this seminar, we will examine the historically undervalued contributions of women in the art of the later nineteenth century. During this period, leading artists from around the world, including many women, were drawn to the academies, museums, salons, and studios of Paris. While women
were largely excluded from formal training, many nonetheless navigated the complex systems of artistic production. We will focus on this multinational group of talented women (including Marie Bashkirtseff, Rosa Bonheur, Anna Ancher, Mary Cassatt), and we will assess their work against contemporary sociopolitical thought and aesthetic theories. Readings will draw upon early critical reviews of public exhibitions, biographical materials, studies of pedagogical and institutional practices, and social histories of art. In and through these materials, we will explore the marginalizing narrative that was created for women artists in Paris, and, most importantly, we will reconstruct an alternative history through our discussions and class presentations.

Requirements/Evaluation:  seminar presentations and research paper
Prerequisites:  none
Enrollment Limit:  14
Enrollment Preferences:  preference given to graduate students and then to senior Art History majors

ARTH 545  Architectural Theory in Crisis

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

Class Format:  presentations
Requirements/Evaluation:  several short presentations and a final 30-minute presentation, to be followed by a 20-page paper
Prerequisites:  permission of instructor
Enrollment Limit:  11
Enrollment Preferences:  Graduate students
Expected Class Size:  10

ARTH 546  (F)  Texere: The Material Philosophy of Print and Textile, ca. 1500-1900

It is a commonplace in the literature on textiles that the words for both text and textile derive from the Latin texere: to weave. As this etymological root indicates, the action of making cloth provides the metaphorical structure by which we conceive of language from the threading of thought to the weaving of prose and poetry. In the recent theoretical writings of Tim Ingold, among others, the processes of weaving-textility-offer a model against which to conceive of the dominant hylomorphic conception of matter and form as a process of imprint. Instead, textiles illustrate a world that is created through forces in motion, never imprinting, but moving against and within one another. This seminar will use these questions as the starting point to examine the interaction between printed matter (embodying a hylomorphic process) and textile (a material challenge to hylomorphism). The Clark Art Library contains a preeminent collection of textile material, and this seminar will dive into the Mary Ann Beinecke collection to examine histories of gender and labor, figuration and ornament, mobility and place, and finally, form and matter. The case studies will range from sixteenth-century needlepoint model books to twentieth-century kimono design.

Requirements/Evaluation:  class participation, writing assignments

**ARTH 547 (F) The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century&Beyond**

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?—What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured "sites": the artist's studio, the artist's desire, and the artist's death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

**Class Format:** in person class with remote learning option, switch to all remote learning after thanksgiving

**Requirements/Evaluation:** presentations, research paper

**Prerequisites:** none

**Enrollment Limit:** 16

Enrollment Preferences: graduate students, then advanced Art History major undergrads

Expected Class Size: 12

**ARTH 548 (S) Landscape, Theory, Ideology**

To use the term "landscape" is to imply and assume a subject position. Unlike the categories of "nature," "wilderness," "vista," or "ecology," a landscape is something invented and experienced (or observed, or represented, or cultivated) solely by human agents. The term "landscape" is variously deployed in the service of a range of political and philosophical positions. This seminar explores "landscape" as a fruitful agitation in critical theory and aesthetic discourse over the past thirty years. The course will interact with the artists and photographic works on view in the exhibition, Landmarks, a 150-year survey of landscape photography in WCMA's collection. We will examine i) how landscape as medium and as genre moves from literature to painting to photography; ii) how to read and employ contemporary theory in the service of artwork from bygone eras; and iii) we will ask who exercises the agency and privilege to name, to invent, to denote a space or a view as worthy of sight.

**Requirements/Evaluation:** class participation, writing assignments

**ARTH 549 (F) Art, Biology, Beauty**

This interdisciplinary seminar is offered in conjunction with the upcoming RAP Colloquium scheduled for March 2020, "Beauty, Sexuality, Selection: Darwinian Revolutions in Aesthetics." (Seminar participants will be expected to attend.) Our theme will be Charles Darwin's controversial theory of "sexual selection" as both a historical idea of aesthetic response and beauty, and as a theoretical concept that is back in play in current evolutionary thinking. Readings will be drawn from ancient philosophy, current science, art history, the history of science, and other fields, to engage the following questions: how did the existence of difference in the organic world—gender difference broadly but also more specifically racial difference in the human species—motivate Darwin's theory of an "aesthetic evolution" driven by animal and human perception of visual beauty? How did philosophical
aesthetics contribute to Darwin's biological theory of beauty, and how did Darwin's biological theory of beauty unsettle the discipline of philosophical aesthetics? In which ways did the arts and visual cultures of Europe and elsewhere shape Darwin's aesthetic assumptions? How did, and how does, the concept of sexual selection destabilize the concept of "art" as a human cultural activity? How might "sexual selection" complicate historical and current delineations drawn between nature and culture, between the innate and the arbitrary?

**Requirements/Evaluation:** seminar participation, presentations, research paper

**ARTH 550 (S) The History, Theory, and Problem of Connoisseurship**

The museum and market have long relied upon the "talent" of a chosen few "connoisseurs," whose abilities (i.e. "the expert eye")-shrouded in mythology and vaguery-have profoundly influenced the interpretation of objects. This seminar will interrogate the problematic construct of connoisseurship in the market (Duveen), in the museum (Pope-Hennessy), and in the academy (Berenson). Through readings about the history and theory of the practice from the sixteenth century to the modern day, we will reassess the meaning, and validity, of connoisseurship in visual culture. And, through conversations about authorship, working methods, and artistic intent, we will question what we learn from close looking. This seminar will include case studies using objects in the Clark's permanent collection, focusing on in-depth discussions of materials, techniques, attribution, quality, and the burgeoning field of conservation science. Students will be asked to conduct their own rigorous object-based research.

**Requirements/Evaluation:** class participation, writing assignments

---

**ARTH 561 (F) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts** (DPE)

**Cross-listings:** ARTH 561  HIST 454

**Primary Cross-listing**

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty, as well as of decolonizing museums; the complex dynamics of collaboration; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Class members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

**Class Format:** The course will feature seminar discussions as well as local field trips to museums, libraries, and archives with pertinent collections.

**Requirements/Evaluation:** Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project
Prerequisites: For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats will be reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 561 (D1) HIST 454 (D2)

Difference, Power, and Equity Notes: The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

ARTH 562  (F)  Art of California: Pacific Standard Time  (DPE) (WS)

Cross-listings: ARTH 462 AMST 462 LATS 462 ARTH 562

Secondary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: Several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester. The course will feature synchronous online class meetings with some small discussion groups. Student presentations will be recorded offline and posted to GLOW.

Prerequisites: ARTH 102 - Grad Art exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 462 (D1) AMST 462 (D2) LATS 462 (D1) ARTH 562 (D1)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Course themes of art and activism, borders and diaspora, globalism and modernism in the visual arts and how they intersect with the exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Through discussion, presentations, and writing assignments students will develop skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice.
**ARTh 563 (F)(S) Contemporary Curatorial Workshop**

Bi-weekly workshop for graduate students working on contemporary art and curatorial projects. Under the direction of the chair, students will present on-going curatorial projects, undertake studio and site visits, host local and visiting curators for presentations, and explore key topics in modern and contemporary art and curatorial practice.

**Class Format:** workshop, meets all year

**Requirements/Evaluation:** no requirements except participation and attendance

**Prerequisites:** graduate art students

**Enrollment Limit:** 25

**Enrollment Preferences:** only open to graduate students

**Expected Class Size:** 25

**Grading:** pass/fail option only

**Distributions:** (D1)

**Attributes:** ARTH post-1800 Courses

---

**ARTh 569 (F) Gérôme**

This course explores work and career of Jean-Léon Gérôme (1824-1904), perhaps the most renowned, popular, and influential artist of the later nineteenth century. With commercial and artistic relationships that spread his influence across the globe, Gérôme has come to seem very much like a highly successful contemporary artist, specifically with regard to his place in an international art world that married elite institutional practices to new technologies of reproduction, marketing techniques, and other instruments of modern mass culture. Gérôme's fame was short lived, however. In the wake of the Modernist revolution on the one hand, and Post-Colonial critique on the other, no discussion of the artist can avoid wrestling with complaints that have left him thoroughly diminished—though less forgotten than scorned. Not only did his art, as it seemed, help perpetrate a gigantic aesthetic error, it blundered onto ethically compromising terrain. Today Gérôme stands as Exhibit A in wide-ranging critique of Orientalism's ideological work. The course will interrogate the Modernist and Post-Colonial complaints against Gérôme in detail, even as it also explores his art from a range of other perspectives, many developed very recently. Topics include Gérôme's relationship to photography, to Orientalism and animal studies, to the cinema, to polychrome sculpture, his approach to historical narrative, and well as his voyeurism and other other manipulations of viewer experience so critical to his art. The seminar will engage the Clark's important collection of Gérôme paintings, and also travel to the Walters Art Gallery in Baltimore, conditions permitting. Students may prepare papers on any aspect of global late-nineteenth-century "academic" or "official" art that was informed by Gérôme's example.

**Requirements/Evaluation:** class participation, presentations in seminar, research paper (approximately 20 pp)

**ARTH 570 (S) Image-making, Orientalism and Visual Culture**

Images enjoy extraordinary power in the spaces between self and other, human and divine. They play myriad roles—witness, surrogate, instigator, supplicant—and travel freely across political, religious and cultural boundaries. They are also subject to reproduction, alteration and destruction as disparate visual cultures interact and globalizing processes ensue. This course will focus on various regions—e.g. United States, France, Turkey, and the Perso-Islamic sphere—and the images that factor in the intervening spaces, from 1800 to the present. We will begin with the theme of self-fashioning and the peculiar nature of portraiture. Thereafter, the entanglement of religious beliefs and visual traditions will broaden our inquiry, leading us to contested dynamics like iconoclasm and aniconism, and reductionist types like veiled women and pious men. Along the way, proliferating and palimpsestic forms of Orientalism will oblige us to consider the very concept of global visual culture. Students will submit weekly GLOW posts to foster class discussion and undertake a major research project over the course of the semester.

**Class Format:** Remote synchronous

**Requirements/Evaluation:** Class participation, weekly oral presentations, 15-20 page term research project.

**Prerequisites:** None

**ARTH 575 (F) Regression as Modern Fantasy: Archaism, Primitivism, Prehistory**

This course analyzes the implications of European modernity's engagement with cultural artifacts it wanted to classify beneath the prefix "pre." We take as our object an aesthetic strategy employed with increasing frequency by modern artists in Europe after 1800: the self-conscious mobilization of visual forms thought to telegraph priority to later advancements, whether historically or developmentally. Our inquiry, beginning with the German Nazarenes and extending into the early twentieth century around the moment of WW1, foregrounds such strategies as key to grasping new notions of temporality and geography that emerged in European modernity. We will inquire into the historical and intellectual contexts that sustained chronological and cultural primitivisms, including the history of colonialism, discoveries of Paleolithic cave art, and the emergence of the modern disciplines of archeology, anthropology, ethnography, child psychology, and psychoanalysis. Alongside close visual scrutiny of some of modernism's most canonical and problematic objects, including key works by Picasso and Gauguin, we will examine the literature that proliferated in this period devoted to the art of peoples deemed "primitive," including the Greeks in the pre-classical period, non-Western peoples, and children.

**Requirements/Evaluation:** seminar presentations, research paper

**ARTH 576 (F) Paper, Process, Practice**

Works on paper, particularly multiples, confound many of the received ideas around artistic invention and originality. This course will address the varied functions of printmaking in Europe over four centuries (1500-1900), giving special attention to the following questions: What is the relationship between prints and other artistic media? How do the material constraints involved in printmaking lead to a particular set of practices, and how in turn do those marry with technological advances to produce new aesthetic possibilities? To what extent did Old Masters such as Dürer and Rembrandt define the terms for later printmakers, and how did their example enable and/or discourage innovation in printed subject matter and style? What was the role of prints in creating both new forums for public discourse and new collecting publics? Arranged thematically rather than chronologically, this
course will cover a wide array of printmakers and types of printed media.

**Requirements/Evaluation:** class participation, class presentation, research paper

**ARTH 577 Questions for Global Art History: A Workshop**

Art history's so-called "global turn" has been underway for over twenty years, but it would be difficult to say that it has yielded a consistent set of methodological approaches. When we consider a project global in scope does that mean simply thinking beyond national or regional designations? Are we looking for expansive networks of materials and makers? Evidence of intercultural exchange? In this seminar, we will begin by looking at several recent approaches to defining global art history and consider terms like contact, exchange, appropriation, transculturation, and cosmopolitanism. We will discuss the spatial vocabulary of oceans and borderlands and the dynamics of power engendered by colonialism, imperialism, and racialization. Thereafter, our weekly case studies will come from the students' research projects. Though students are not expected to begin the seminar with an argument for their final paper, they should arrive with a topic in mind that pertains to a "global" art history subject in the period between 1500 and 1900 CE. In consultation with the professor, each student will then select readings to discuss with the group so we can work together to come up with questions and approaches that are commensurate to the topic. Our course may end in affirming the heterogeneity of global methods, deciding that this is a benefit rather than deficit. The collective aim is to understand, problematize, and reformulate the approaches available to us so that we can better address the topics that interest us as a group.

**Requirements/Evaluation:** Students are required to participate in discussion every week, lead one week of discussion, give a brief paper presentation, and submit a 20-page final essay.

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Graduate students, then advanced undergraduate students with permission of the professor.

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1)

**ARTH 580 (S) Picturing God in the Middle Ages**

**ARTH 5— Spring 2022 Peter Low**

How did medieval Europeans imagine their God and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? Paying particular attention as well to the materiality, experience, and manifold audiences of medieval works of art, this seminar will examine the evolution of images of God, in both the Eastern and Western halves of Europe, and the problems these images often generated. Through readings and class discussion, the course will investigate, among other specific topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the tensions manifest in or evoked by this art, including picture vs. text, symbolism vs. mimesis, asceticism vs. splendor; the impact of the Roman cult of the emperor and of images of the pagan deities on the earliest portraits of Christ; the cult of the icon, concerns over idolatry, and the destruction of images; ideas about the relationship between spiritual and physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to the Eucharist and other aspects of Christian ritual; the role of the senses beyond vision in engaging with sacred art especially in the later Middle Ages; and the pictorial exploration of both the torture and sexuality of Christ. Students will also pursue an individual research project, in which they will examine in greater depth a specific depiction of God of their choosing, from any place and any time, in light of what we have considered together in the seminar.

**Requirements/Evaluation:** Evaluation will be based on class participation, oral presentations, and a final research paper (15-25 pages).
Prerequisites: none

ARTh 581 Creative Life: The Visual Economy of Work
This course is a seminar on life and work focusing on methodologies of production--art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the "facts" of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968, and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines, advertisements, archives, world exhibitions, and product showrooms.
Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: MA students, then art history majors
Expected Class Size: 12
Grading:

ARTh 582 (F) On Race, Art, and Property
In her seminal article "Whiteness as Property," critical race theorist and professor Cheryl Harris contends that the legal system in the United States "has come to embody and legitimize benefits that accrue to citizens who are white." The legacy of our legal system, which has dehumanized people by rendering them as property and legalized the theft of land by colonizers from Native Americans, is not confined to the past, but has shaped our world and thrives within our present moment. How has this legacy and Harris' theory been explored in contemporary art? How might it allow us to revisit artworks and practices by canonical artists from alternative perspectives? This course aims to study aspects of this complicated history through a broad range of texts from legal and literary theory to art history to Black and Native American studies to more immediately authored texts published on social media platforms. Students are encouraged to think dexterously as we study works by Gordon Matta-Clark, Michael Heizer, Sondra Perry, Cameron Rowland, and Cauleen Smith--among others.
Requirements/Evaluation: presentations, writing assignments
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: If over-enrolled, by application
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
ARTh 583  (F)  Graphic Content: Typography and the Book between Art and Design
This seminar considers the entangled histories of fine art and graphic design by focusing on creative practices surrounding the letterform and the book form from 1900 to the present. We will study historical avant-garde movements active in publishing and making-public; the development of the graphic design discipline, in print and on screen; and logocentric artistic tendencies from concrete poetry and pop art to conceptualism and artists' books. We will also consider diverse literary practices, graphic visualization, and political agitation. The seminar will make use of the Clark library's outstanding collection of artists' books and the holdings of the Chapin library at Williams. We will welcome several guests, including art historians, artist-designers, designer-artists, editors, publishers, and bookmakers.

Class Format: in person seminar with remote option, remote learning after thanksgiving

Requirements/Evaluation: class participation, class presentation, research paper/project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History MA students, then advanced undergraduates. Course will be by application if overenrolled.

ARTh 586  (F)  Japanese Popular Visual Culture

Cross-listings: COMP 186  ARTH 586  ASIA 186  ARTH 286

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

Class Format: discussion

Requirements/Evaluation: attendance, participation, two 5-page papers, final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: students majoring or considering a major in a related discipline

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

ARTh 587  (S)  Crash! The Car Accident as Myth and Metaphor in American Art and Visual Culture

A year after MoMA elevated machinery to high art in 1934, Grant Wood painted Death on The Ridge Road (Williams College Museum of Art), a
depiction of the deadly side of the streamlined modern machines that Alfred Barr might have presented at MoMA. A generation later, Andy Warhol's Death and Disasters series multiplied gruesome images of crushed cars and bodies to numbing effect. During the ensuing years, both Jackson Pollock and David Smith (among others) became traffic fatalities. Roughly bookended by the Great Depression and the 1960s, but also considering works of art and visual materials before and after those parameters, this seminar will explore the stakes of car crash imagery for American artists and culture. Readings may include topics in trauma studies, automotive technology, physics, posthumanism, law, and object oriented ontology as well as grounding participants in American art and history of the middle third of the twentieth century. Participants in the course will also have the opportunity to help shape the content, themes, and narrative of an exhibition on car accidents in American art being organized by WCMA.

Requirements/Evaluation: oral presentations and written assignments
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then advanced undergraduate Art History majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

ARTH 590  (S)  Guillaume Lethière (1760-1832) and Caribbean Networks in France during the 18th and 19th centuries
Born in the colony of Guadeloupe to a French father and a formerly enslaved woman, Guillaume Lethière (1760-1832) would become a key figure in the Neoclassical movement, a well-respected pedagogue with a sizeable workshop populated by notable students, an ambitious collector, director of the Académie de France in Rome from 1807 to 1816, a favorite artist of Lucien Bonaparte, and a member of the Institut de France. Despite his many accomplishments and sizeable corpus of paintings and drawings, Lethière has notably disappeared from the "canon" of art history. Such a lacunae begs many questions about the circles of sociability in which he traveled, the reception of Caribbean artists in France in the eighteenth and early nineteenth centuries, and the lack of widespread knowledge on these topics today. This seminar will be timed with the planning of a major monographic exhibition to take place at the Clark Art Institute in the summer of 2024, and students will work alongside the curators on various aspects of the exhibition's organization. The course will also provide an opportunity for close examination of objects in the Clark's permanent collection, including Lethière masterpiece Brutus condemning his sons to death(1788), as well an album of approximately one hundred drawings by the artist.

Requirements/Evaluation: class participation, presentations, research paper (approximately 20 pages)
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: MA students, then art history major undergrads
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Attributes: ARTH pre-1800 Courses

ARTH 592  (F)  Chance and Design: Ideas and Iconographies of Causality in Europe before 1900
The idea of the work of art has a long history in Western philosophy and religious thought as the model for the idea of intentionality at the broadest scale; the relation of the artist to their artifact mirrored, in microcosm, the relation of an "intelligent designer" to a designed universe. The collapse of such models for thinking about both art and the natural and social world are characterized, typically, as intrinsic to the epoch of modernity. Within art history of the past half century, a significant amount of attention has been devoted to theorizing how many now-canonical artists (eg. the proto-conceptual artist Marcel Duchamp, the composer John Cage and choreographer Merce Cunningham) harnessed chance procedures with the aim of vacating their agency from the process of creation and with the "purpose to remove purposes." This course attempts to look before and beyond these well-trodden histories. Probing the visual dimension inherent in the concept of design and its absence (a visuality epitomized by blindfolded allegorical figure of Fortuna), we will seek to trace a more capacious genealogy for the efflorescence of chance, accident, and randomness as aestheticized objects of fascination in the twentieth century. We will trace the prehistory of these concepts in relation to both the abstraction of...
numbers and the concreteness of organisms, situating ideas of chance in relation to both the rise of a globalization and racial capitalism grounded in risk, financial speculation, and probability, as well as the eventual emergence in the nineteenth century, of an evolutionary theory capable of producing statements such as, "what a chance it has been... that has made a man," and recognizing "blind chance" as the originary driver of change in the organic world. The class will include presentations by invited guest scholars and focus on a number of case studies spanning the early modern period through the late nineteenth century, including topics such as: the concept of disegno and art as a model of intentionality, the iconography of fortune, gambling, and accidents, the association of chance and seafaring, the iconography of falling and gravity, the incorporation of chance into the material processes of image-making (for instance, in the invention of photography), and the visual culture and visual metaphors of Darwin's evolution. In association with our historical inquiries, the course will also meditate methodologically upon models of causality in art-historical explanation, as well on broader questions of how chance and ideas of chance and causality mediated modern Europe's relation to other parts of the world.

Requirements/Evaluation: class presentation, research paper of approximately 20 pages

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: grad students, then art history major undergrads

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

SEM Section: 01    M 10:00 am - 12:50 pm     Caitlin Woolsey

ARTH 593 (S) Sound/Image: Theories and Practices in Art History

This seminar serves as an introduction and deep dive into issues of sound in the visual arts. While we will examine modern and contemporary examples of sound art and multimedia work, this course considers sound, the aural imagination, and practices of listening much more expansively to probe the theoretical, conceptual, as well as technological, aesthetic, and reception issues surrounding sound in visual art. Course readings will combine art historical accounts with texts from philosophy and sound studies. We will read Michael Gaudio on representations of "the New World" in colonial America, consider recent attention paid to sound and the infiltration of sound recording media in nineteenth- and early-twentieth century America (by Rachel DeLue, Leo Mazow, and Asma Naeem), delve into the politics and poetics of European avant-garde performance, the cross-pollination of musical and artistic experimentation in 1960s New York and elsewhere (John Cage and Pauline Oliveros in connection with the worlds of dance, performance, and Black Mountain College), and consider more contemporary practices, particularly by artists working in Asia, Brazil, and artists engaging in Deaf studies and critiques of ableist hearing ideologies (such as Christine Sun Kim). We will also draw heavily on writings on sound, sensation, art (and film) by twentieth-century continental philosophy (Roland Barthes, Jean-Luc Nancy, Gilles Deleuze) as well as recent work by contemporary theorists probing the intersections of the sonic with race, gender, and politics (among them Salomé Voegelin and Robin James), as well as other topics from sound studies such as the mediation of technology, social and historical frameworks (such as Alain Corbin's study of the culture of the senses in the 19th-century French countryside), and the "ontological" turn and focus on materiality (Christoph Cox, Steve Goodman).

Requirements/Evaluation: Students will each be responsible for introducing key themes or questions from the readings in one class session. They will also complete a short paper focused on experimenting with sound/image ekphrasis (how do we write histories of sound?). The final project will be a research paper (approximately 20 pages), on which they will give a presentation in class near the end of term while the project is in its development stage.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: MA students, then art history major undergrads

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ARTH 594 (S) Traveling Seminar: Slavery and the Dutch Golden Age

This course takes as its starting point the exhibition at the Rijksmuseum opening in September 2019: Slavery, an exhibition. With this installation, the curators of the Rijksmuseum seek to correct dominant narratives of seventeenth and eighteenth-century Dutch history, which have absented the role of slavery in determining the economic, social, and visual history of the Netherlands. With a Travel Grant awarded by the College Art Association, the students in this seminar will travel to the Netherlands to visit this exhibition and other relevant cultural institutions in order to examine the possibilities and limits for 'decolonizing' the museum. This course will study how slavery is imbricated within the mythic construction of a 'Dutch Golden Age' while also examining what happens when the history of enslaved peoples becomes translated into the space of a museum and exhibition. We will consider a revisionist history of Dutch artistic production, accounting for slavery in determining the Dutch economy and visual production while also asking what happens when slavery becomes narrated in the space of one of the nation's history museums. We will read contemporary black feminist theory such as Sylvia Wynter, Saidiya Hartman, Hortense Spillers, and Christina Sharpe as a means to struggle with how the space of the exhibition chooses to activate and write those missing histories, and we will examine if it is even possible to responsibly tell the story of slavery over two centuries when the majority of the subjects have been completely defaced, removed, and excised from the historical record, and their voices are often the ones still absent. In the words of Saidiya Hartman, we will ask: "Is it possible to construct a story from the 'locus of impossible speech' or resurrect lives from the ruins?"

Requirements/Evaluation: participation in class travel, class participation and presentation, research paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: MA art history students, by application if overenrolled

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

Winter Study

ARTH 31  (W)  Senior Thesis: Art History
To be taken by students registered for ArtH 494. For requirements of entry into the course, please see "The Degree with Honors in Art, Art History" in the catalogue or on the Art Department's webpage.

Class Format: independent study
Enrollment Limit: 8
Enrollment Preferences: students need permission of the department to register for this course
Grading: pass/fail only

ARTH 33  (W)  Honors Independent Study: Art History
To be taken by candidates for honors by the independent study route.

Class Format: independent study
Grading: pass/fail only

ARTH 99  (W)  Independent Study: Art History
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: Independent study
Grading: pass/fail only

Not offered current academic year
ART (Div I)  
ART STUDIO  
Co-Chairs: Professors Elizabeth McGowan and Guy Hedreen

- Cecilia Aldarondo, Assistant Professor of Art
- Laylah Ali, Francis Christopher Oakley Third Century Professor of Art
- Michelle M. Apotsos, Associate Professor of Art
- Ben Benedict, Senior Lecturer
- Mari Rodriguez Binnie, Assistant Professor of Art
- William B. Binnie, Visiting Lecturer in Art
- Johanna Breiding, Assistant Professor of Art
- Mariel Capanna, Mellon Postdoctoral Fellow in Art
- C. Ondine Chavoya, Professor of Art
- Holly Edwards, Senior Lecturer in Art
- Michael A. Glier, Alexander Falck Class of 1899 Professor of Art
- Guy M. Hedreen, Amos Lawrence Professor of Art
- Catherine N. Howe, Lecturer in Art
- Frank Jackson, Visiting Assistant Professor of Art
- Michael J. Lewis, Faison-Pierson-Stoddard Professor of Art History
- Peter D. Low, Professor of Art
- Elizabeth P. McGowan, Art Dept Co-Chair & Chair of Art History, Robert Sterling Clark Professor of Art
- Murad K. Mumtaz, Assistant Professor of Art
- Amy D. Podmore, Art Dept Co-Chair & Chair of Studio Art, J. Kirk T. Varnedoe 1967 Professor of Art
- Kailani Polzak, Assistant Professor of Art
- Sarah Rara, Assistant Professor of Art
- Pallavi Sen, Assistant Professor of Art
- Stefanie Solum, Professor of Art
- Carolyn J. Wargula, Visiting Assistant Professor of Art
- Alena J Williams, Assistant Professor of Art

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Guy Hedreen
Art Studio Faculty Advisor: Amy Podmore (Fall), Mike Glier (Spring)
History and Studio Faculty Advisor: Ben Benedict (Fall), Mike Glier (Spring)
ART STUDIO

The Studio division of the art major has been structured to develop students’ perceptions and imaginations as they investigate a variety of visual media and to foster the development of a critical understanding of making art to support creative interests.

Major Requirements

The Studio Art major requires a minimum of nine courses:

- ARTS 100 Drawing I
- One art history course (preferably taken by the end of the junior year)
- A combination of at least three 100 and 200-level courses in three different media (ARTS 100 and tutorials do not satisfy this requirement)
- ARTS 319 Junior Seminar
- One 300-level ARTS course
- One elected ARTS course
- ARTS 418 Senior Seminar

The numbered sequence of courses in the Studio Art major is intended to develop knowledge and skills appropriate to students’ levels of experience, ultimately supporting original, independent work at the 400-level. ARTS 100 is an introduction to the principles of drawing and design, which are the foundation of visual expression. An art history course not only increases visual knowledge of other periods and cultures, but also provides exposure to the methods of visual analysis. 100 and 200-level ARTS courses introduce the relation between form and content and serve as introductions to a variety of media including architecture, painting, performance, photography, printmaking, sculpture, and video. 300-level courses place greater emphasis on the application of visual skills to thematic concerns, and to the development of the student’s individual vision. The capstone to the major, ARTS 418, provides a comprehensive, professional exhibition experience. Students not only define, research, and create an original body of work, but are also engaged in all aspects of producing an exhibition at the Williams College Museum of Art.

The faculty encourages students to begin exploring studio art in the first year so that they can fully explore a variety of media in preparation for independent work in the junior and senior year. A successful route through the major might look like this:

First year: two classes at the 100 and/or 200 level in different media and an art history class. We encourage students to explore media with which they are unfamiliar, as doing so provides a good base and allows for more flexibility later on. While there is only one art history class required for the major, we encourage students to take advantage of the rich art history offerings throughout their four years of study.

Second year: at least two 100 and/or 200 level courses.

Third year: Junior seminar, a 200- or 300-level course and a possible second art history class.

Fourth year: one 300-level course, ARTS 418, and other courses chosen to support your individual interests.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose the Art History or the Studio Art route, to the major, while taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department’s administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ArtS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ArtH 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

Major Requirements

The History and Studio major requires a minimum of nine courses:

- Any TWO of the following six courses: ARTH 101, 102, 103, 104, 105 or 106
- ARTS 100-level course
- ARTS 200-level course
- ARTH 301 Methods OR ARTS 319 Junior Seminar
- ARTH 400-level OR 500-level course
- ARTS elective
- ARTH elective
- ARTS 300-level course
- or ARTS 418 (with permission), if pursuing a Studio track

The application for the History and Studio route must include both a written statement of purpose and a list of proposed courses. Both must be approved by two advisors, one from Art History and the other from Studio Art, and be submitted to the department’s administrative assistant before the student may register for the major.

History and Studio students whose ongoing projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Or, a student following the Studio Art track may propose a senior Independent Study project in order to pursue Honors. Those History and Studio majors with an Art History emphasis may apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Honors Seminar (ARTH 494).

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art Studio

Studio art concentrators who wish to be candidates for honors are required to take an extra studio course, of their choosing, for a total of ten courses. One of the ten courses must be the 400-level Senior Seminar (ARTS 418). Students must also take the Honors Independent Study course (ARTS 31) during Winter Study of their senior year. Studio faculty will provide feedback on the progress of the honors project at the beginning of the Spring semester.

Honors candidates enrolled in the Senior Seminar must demonstrate prior experience in the media chosen for the honors work. This proof may consist of one or more 200-level courses in the medium, course work at the 300 level, and/or a portfolio demonstrating the student’s proficiency in the media chosen for the honors project. This work must be presented to the instructor of the Senior Tutorial at the start of the Spring semester. At the end of the Spring semester of senior year, honors candidates will orally defend their work in the senior exhibition at WCMA. The entire studio faculty will attend each defense. Based on the work and the oral defense, the studio faculty (as a whole) will designate honors, high honors or no honors.

History and Studio

History and Studio majors may follow either the Studio Art or Art History route to honors. Alternatively, a student may pursue honors through an Independent Study project, to be undertaken during Winter Study and the Spring semester under the guidance of their two advisors.

The review process for the honors candidates in the senior seminars (ARTS 418 or ARTH 494) will proceed according to the regular honors process for the respective wing of the Art Department, and will include both advisors. If the honors project is conducted via an Independent Study, the final project will be submitted to the two advisors who will determine whether or not it will receive honors. If the student chooses not to follow the Honors route, they may take either a 300-level ARTS course, or a 400-level ARTH seminar instead.

STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art Studio

Studio Art Majors must take the required Junior Seminar (ARTS 319) in the fall semester of their junior year, unless they are planning to study abroad for a full year, or unless they have permission of the chair of the department (in these cases, they may take the required class in their sophomore or senior year). The Department does not grant pre-approval or provisional credit for study abroad courses; studio majors must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 1 requirement for the major can be taken per semester abroad (2 if one of the courses is in art history). Courses must be in fine arts fields to qualify for major credit. ARTS 319 and ARTS 418 cannot be fulfilled abroad.

History and Studio
History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTS 100  (S)  Drawing I

In childhood everyone draws. Like language drawing is a basic human tool to observe and interpret the world as well as to make comment about it and find agency within it. As an introduction to art making, this course will provide basic design and conceptual skills to engage feeling, develop content and communicate with others. Divided into sections on line, composition, proportion, value and space, the course is designed for those with no previous experience in drawing, but it is flexible enough to challenge experienced students. New concepts are introduced each week in slide talks and developed in workshops and through homework assignments.

Requirements/Evaluation: successful application of new skills, development of concept, participation in class, effort, timeliness and attendance
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: art majors, first years, sophomores, juniors, seniors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $200 - $300
Distributions: (D1)

Spring 2022
STU Section: 03    M 1:10 pm - 3:50 pm     Michael A. Glier

ARTS 100  (F)  Drawing I

Drawing can provide a vehicle for encountering and interpreting your experiences. This course will heighten your awareness of the visual world, teach basic drawing skills, and demonstrate how drawing operates as a form of visual exchange. A variety of materials will be covered as you explore the 2-dimensional concepts of line, form, proportion, gesture, spatial depth, and value. Towards the latter part of the semester, more emphasis will be placed on the use of drawing as idea, and you will have the opportunity to express yourself through the visual language of drawing.

Requirements/Evaluation: This is an intensive studio course, requiring working in the drawing studio outside of scheduled class hours. Grading takes into account the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance.
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
Expected Class Size: 18
Grading: no pass/fail option, yes fifth course option
Materials/Lab Fee: $200 lab fee charged to term bill
Distributions: (D1)

Fall 2021
STU Section: 01    T 1:10 pm - 3:50 pm     Amy D. Podmore
ARTS 100 (S) Drawing I
This course is designed to introduce the fundamentals of drawing. A significant portion of class time will be devoted to learning some of the basics of drawing, such as line, gesture, composition, and value. Acquiring technical skill is an important goal of this class, and intensive weekly assignments are a significant part of that process.

Requirements/Evaluation: quality of work produced as well as successful completion of all assignments and attendance

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Spring 2022
STU Section: 01 T 9:00 am - 11:40 am Laylah Ali
STU Section: 02 T 1:10 pm - 3:50 pm Laylah Ali

ARTS 100 (F) Drawing I
This course is designed to introduce students to perceptual, experiential and analytical moments associated with the language of drawing, and to do so in ways that offer the opportunity to see the world with greater clarity, and with a broader understanding of art and the visual language. This course provides technical skills associated with observational drawing, experiential moments with a variety of materials, and the opportunity for self-expression and the communication of ideas. Each studio class blends drawing practices and exercises designed to further one’s understanding of the language of drawing, and more broadly, offers a foundation for further study in the visual arts.

Requirements/Evaluation: individual critiques, a mid-term critique, a final portfolio submission, attendance, effort and participation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students

Expected Class Size: 18

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: $200-$300 lab fee charged to term bill

Distributions: (D1)

Fall 2021
STU Section: 02 MW 7:00 pm - 8:15 pm

ARTS 100 (S) Drawing I
This course is designed to introduce students to the basic elements of drawing. The first half of the course will expose students to formal and fundamental aspects of the visual language through observational drawing exercises. Working from the still life, landscape, and human form, concepts and skills related to line, space, form, and perspective will be introduced. Students will work with a wide variety of materials and will gain facility in media such as charcoal, graphite, collage, watercolor and ink. As the term progresses, assignments and exercises will become more complex and students will explore more conceptual ideas in drawing related to material specificity, research, experimentation, and working from the imagination. The class will conclude with a publication of a zine. The theme or topic of the publication will be determined by the dynamic of the class and the students’ curiosities and concerns. Through lectures, assigned readings, screenings, and visits to the WCMA, this course hopes to expand what it means to draw and to become aware of how drawing appears in the practices of other artists as well the world outside of art contexts.

Class Format: The class will meet in-person twice weekly. Depending on the class size we may break into smaller independent lab groups / discussion groups.

Requirements/Evaluation: quality of work produced, depth and quality of investigative process, participation in critique and discussion, class
ARTS 105 (S) Video Essay

This introductory studio course engages the genre of video essay. Situated at the intersection of video art and documentary film practices, video essay explores the interval between politics and aesthetics, fiction and non-fiction, in an attempt to create a personal language with which to describe the tension between social, political, and personal realities. Students gain hands-on video production experience with editing, cinematography, and sound design grounded in the editorial and rhetorical strategies of video essay which articulate a language of relationships: between sound and image, artist and subject, fact and feeling, memory and language. Self-referential and reflexive, video essay operates in a space of inquiry between poetry, philosophy, autobiography, politics, and cultural studies. The course examines how video essay moves across disciplines, reflecting ethical and aesthetic strategies developed within documentary film, journalism, auto-ethnography, auto-fiction, media theory, performance, and the history of video art itself, in pursuit of a renewed relationship to processes of observation, memory, and recognition. Assignments emphasize the creation and presentation of an original body of video work for critique, alongside research, writing, and discussion of theoretical texts and artworks, including the work of Chris Marker, Hito Steyerl, Trinh T. Minh-ha, Harun Farocki, Agnès Varda, among others.

Class Format: hybrid format: a mix of in person and remote meetings with additional asynchronous lectures, technical lessons, and screenings to supplement our course work. We will aim to keep class meetings small, and depending on the class size we may break into smaller independent lab groups / discussion groups.

Requirements/Evaluation: Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

Prerequisites: none

ARTS 110 Digital Photography, Identity and Place

This remote introductory level course offers an in-depth exploration of digital photography. Emphasis is placed on the camera's relationship to the body and constructions of identity. Students will develop a fundamental control of photographic techniques through various exercises, experimentation, field, at home and/or studio experience. Students will learn how to use DSLR cameras and introductory level Photoshop editing techniques to create a personal body of work that examines the medium's role in representing various identities. Additionally, visiting artist lecture presentations and thorough critique will foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity.

Class Format: This class will take place over Zoom

Requirements/Evaluation: Students must budget roughly ten hours per week outside of class for photographing and editing; Students must complete all projects on time. Students will create a photographic body of work with accompanying artist statement. Students must be active
ARTS 111  (F)  Introduction to Video Art
This introductory-level course offers an expansive definition of video art, exploring the overlap between video and other disciplines within contemporary art. Video art's inherent heterogeneity is examined as a vital part of the medium's identity and as a radical mechanism for cultural discourse. Coursework includes lectures, readings, discussions, hands-on tutorials, production assignments, and active participation in dialog/critique. Camera, sound, lighting, and editing techniques are taught alongside key theoretical, historical, and aesthetic approaches to video art. Experimentation and interdisciplinary approaches are encouraged in considering how video art hybridizes with other media, ingests emerging technologies, and develops new distribution models.

Requirements/Evaluation: quality of original video work produced, participation in critique and discussion, two writing assignments, class citizenship, attendance

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Preference will be given to art majors, sophomores, juniors, and seniors in that order. In case of overenrollment, there will be a waitlist.

Expected Class Size: 12
Grading:   yes pass/fail option,   no fifth course option
Materials/Lab Fee: $150
Distributions: (D1)

Fall 2021
STU Section: 01    M 12:00 pm - 2:25 pm     Sarah Rara

ARTS 112  (S)  Introduction to Documentary Filmmaking  (DPE)
In a 2010 article, *New York Times* film critic A. O. Scott described the field of contemporary documentary film as 'heterogeneous to the point of anarchy.' This course takes this heterogeneity to heart, acquainting students with a wide array of creative approaches and key debates in documentary film. In addition to a historical, ethical and critical foundation in the field of documentary, students will acquire a basic grounding in the fundamentals of video production, including cinematography, sound and editing. Course requirements include class attendance and regular critiques, weekly film screenings and readings outside class, 2-3 minor filmmaking exercises, and major assignments in the form of 3-4 short nonfiction video projects.

Requirements/Evaluation: timely and committed completion of assignments, attendance and participation

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: majors have priority

Expected Class Size: 10
Grading:   no pass/fail option,   no fifth course option
Materials/Lab Fee: $150
Distributions: (D1)  (DPE)

Difference, Power, and Equity Notes: The practice of documentary film is centrally bound to ethics--who and how we represent onscreen.
Historically, documentary has tended to gaze on marginalized communities in problematic ways; this course will make issues of power, race, class and representation central to the production of documentary media.

Not offered current academic year

ARTS 114  (F)  Art into Activism
This introductory studio art class will examine how art has been and can be engaged with activist and political causes. Can art be created from social or political ideas? Is all political art merely propaganda? What makes a work “political”? What does artistic work that is topical, informed, and critical look like? In addition to looking at various works by contemporary artists and used in political movements, we will be working on weekly assignments that will introduce students to 2-D image making, video, and performance. This class is a hands-on studio class which will require hours outside the class working on projects.

Requirements/Evaluation: projects, assignments, class participation, attendance
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: first-years and sophomores
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Not offered current academic year

ARTS 115  (F)  Sculpture: Poetry with Objects
Sculpture employs the body and has the power to communicate via the physical world in powerful ways. ARTS 115 will offer instruction in how form and meaning can be created through the use of objects. Similar to poetry, where a particular word carries a specific history, meaning, and power, objects also contain complex associations. Through the process of alteration, transformation, and manipulation, sculpture reveals the narrative power of form and materials. This course will provide a historical framework for how sculpture—particularly contemporary works—have expressed ideas, while also providing instruction on techniques and methods used to build, dismantle, rearrange, combine and create art with objects as the inspiration. The ultimate goal will be to develop your individual voice and imagination, become familiar with processes and techniques, and to become fluent in generating meaning that is important to you. We will be integrating the study of a variety of artists whose work utilizes objects in their sculpture such as the work of: Jean Shin, Marcel Broodthaers, Dario Robløtto, Doris Salcedo, Robert Gober, among others. This class is designed to be hybrid, with a combination of in-person and remote components. Approximately two-thirds of the term will consist of weekly meetings between myself and a pair of students, however, periodically throughout the term, we will meet with the entire class for PowerPoint presentations, demonstrations, visiting artist talks and group critiques.

Class Format: Hybrid model with a portion of the class taught in person and a portion taught remotely. The aim is to have 50 percent of the class in person and 50 percent taught remotely, however this will depend upon how the semester and COVID evolves.

Requirements/Evaluation: Art is a visual language, which speaks to us through our sense of sight and implied touch; you will be evaluated first and foremost on your ability to speak powerfully in this language. Grading also takes into account: effort, attitude, creativity, studio responsibility and participation. Attendance and punctuality is expected for both in-person and remote portions of the course. If you miss more than one unexcused class your grade will automatically drop a letter grade. All work must be completed by the final critique.
Prerequisites: None.
Enrollment Limit: 10
Enrollment Preferences: Declared and perspective art majors have preference.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: There will be a lab fee to cover a material cost for the class. TBA
Distributions: (D1)

Not offered current academic year

ARTS 116  (F)  Monotypes
Spontaneous and delightfully unpredictable, the monotype is a style of printmaking that creates exactly one image by applying ink onto a flat surface, and transferring it to paper using pressure - by hand or through a printing press. It is neither drawing nor painting, it is both! In this class students will use the monotype to heighten their sensitivity to line, colour, tone, texture, transparency, pressure, ink viscosity, and overall composition. They will also explore techniques like tracing, stencilling, chine-collé, reductive + additive mark making, and hand rubbing, while acquainting themselves with the history of the medium – its practitioners, and its scope. No prior experience in drawing or painting required, though it is quite welcome.

Requirements/Evaluation: quality of work, investment towards studio time, active presence in discussions and critique, attendance

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Arts majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

ARTS 119 (S) Miniature Stories
What is the American experience? What does an American look like? This course uses miniature set and puppet building techniques, using easily manipulated materials in order to tell stories about the American experience. Greer Lankton’s queer puppets and Charles Ledray’s intricate thrift store men’s suits use miniaturized scale as a vehicle to expand our understanding of the American experience through highly focused visuals. Students will explore how scale and point of view can be used to explore power dynamics, identity, and mythology. Students develop their own research methods based on short writing assignments, image and object collection, and material exploration.

Requirements/Evaluation: Students’ production methods will incorporate scaled building techniques, introductory lighting, and staging processes towards the completion of a singular narrative work built in miniature. Students will also design and complete a shortlist, a collection of point-of-view stills that explore their chosen narrative in sequence. The course with culminate at an end of semester online exhibition of their work.

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Art majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $75.00 lab fee
Distributions: (D1)
Not offered current academic year

ARTS 122 (S) Photography, Identity and the Absence of Representation
This introductory level course offers an in-depth exploration of the DSLR camera and image by utilizing photographic digital technology. Emphasis is placed on the camera’s relationship to the body, domestic space and constructions of identity. Students will develop a fundamental control of photographic processes through technical exercises and at-home/on-campus and online experimentations. Students will learn how to use DSLR cameras, editing techniques and photographic curation to create a portfolio and exhibition reflecting on a personal body of work that examines the medium's role in representing (or not representing) identities. There will be weekly readings and in-depth critiques to foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity?

Requirements/Evaluation: Students midterm and final critique of their body of work and accompanying artist statement

Prerequisites: Art majors who are interested in and are doing work in identity politics.
Enrollment Limit: 12
Enrollment Preferences: Art majors who have not yet taken an introductory photography class
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $250 standard lab fee charged to term bill
ARTS 123 (F) Drawing Dreaming

Sometimes a drawing is a recreation of what is right in front of us, accepted and understood by us both. And sometimes a drawing is what we have never seen before/what doesn't yet exist, but want very much to be real: a house, a garden, a truth, accountability for an injustice, a declaration, a dream, a scream, a monument (or its absence), a sculpture, an institution, a circumstance, a love, futures. In this class, we will use mark making as a tool for making such imaginings a little more solid, and clear. Each week we will look at artworks (or what could be perceived as that) that embody dreaming, envisioning, manifestation, and transformation, including but not limited to the spectacular public drawings now part of Richmond's confederate monuments, Shaker gift drawings, house and garden plans, protest signs, commemorative murals and memorials, flags, emblems, dream entries and tarot decks. Every other week, our class will host visitors whose art+work+life has inspired this course, including artists, educators, and organisers. Though this isn't a traditional drawing class, it will include introductions to various foundational techniques and tools, along with intensive drawing exercises before delving into self driven assignments.

Class Format: Classes will meet remotely, and if it is deemed safe, the drawing studio may be open for staggered drawing sessions in small groups. All students will be adequately trained in documenting their work for weekly reviews with the instructor.

Requirements/Evaluation: weekly assignments, mid-term project, final projects, attendance and participation, generous presence

Prerequisites: Previous drawing experience preferred and/or completion of Drawing 100.

Enrollment Limit: 17

Enrollment Preferences: Art/Art History majors

Expected Class Size: 17

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $100

Distributions: (D1)

Not offered current academic year

ARTS 128 (S) Introductory Video

In this course we explore how the proliferation of video has transformed the way we relate our own image, and that of others. Video has become a platform for hypervisibility. In an era of selfies, live-streaming, state sanctioned violence (and its digital record), how might we use video as a tool of empathy and accountability? We will pursue answers to these questions through the act of making. In this introductory level course students will gain facility in Adobe Premiere and other post-production tools in the Adobe Creative Suite. Students will explore camera technique, lighting, and how to work with appropriated footage. We will look at early and contemporary video works in order to situate the work being made in class. Video Art will also be contextualized within vernacular applications of video. Through regular technical exercises, readings, and group critiques, students will learn how to use video as critical tool in their practice.

Requirements/Evaluation: evaluation will be based on discussion participation and the technical and conceptual strength of the projects, with consideration given to individual development

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students majoring in Studio Arts

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $150.00 fee charged to term bill

Distributions: (D1)

Not offered current academic year

ARTS 129 (S) Institutional Critique (DPE)
This introductory course will investigate the performance potential of the radical art making methodology known as Institutional Critique. Influenced by Situationalism, and the Fluxus movement, Institutional Critique emerged as a way for artists to respond to the art worlds elitism, monopoly on culture, and dependency on Capitalism. Through collaborative performance based projects and readings students will explore the possibility of art to critically intervene in the hegemonic order and insight change within power relationships. We will also explore related movements such as Socially Engaged Practice, a term that describes art that is participatory and focuses as people as the medium. Artists covered will include: Thomas Hirshhorn, Tim Rollins, and Andrea Fraser. You do not need any prior experience just a willingness to use the power of voice and body.

Requirements/Evaluation: three collaborative projects, final independent project, readings, active participation, museum gallery visits, quality of work

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $125 lab fee

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 129 (D1) ARTS 129 (D1)

Difference, Power, and Equity Notes: Through a diverse selection of essays, visual art, and contact with prominent voices operating at the intersection of theory and practice students will examine how the concentration of power in the United States and Europe has contributed to inequities within educational, legislative and artistic institutions. Students will then transfer what they've learned to a research based visual practice that priorities social discourse.

Not offered current academic year

ARTS 130  (S) Material Issues

What kind of maker should one be, after reading the latest climate report? The tendency to build, design, love, and collect objects - in our shelves and in our museums and in our landfills - is central to the human story. We have (serious) material issues! This class looks at individuals that hold ecology and what the environment asks of us close to their heart and their making, moving beyond ‘green’ as metaphor. We will study creative practices that work in partnership with land, with forests, agriculture, radically sustainable materials, food and food cultures. Through the semester, we will alter how we consume and what we consume, we will learn to repair, learn to divest, and learn how to make our own: Food! Clothes! Quilts! Containers! Pigments! _________! Our projects will be cross cultural, interdisciplinary, slow, working at the pace of seasons, working with what is already present in our homes, in our neighbourhoods. Through guided assignments and discussions, students will draft a personal and collective manifesto detailing their relationship to material and climate change, and develop a final project, in any format, that engages with it. We will work with our hands often, and well.

Requirements/Evaluation: active and thoughtful participation in class, sensitive and dedicated approach towards assignments

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTS 132  (F) Sculpture: The Human Form in Contemporary Art

The figure has an intrinsic relationship to us and our lives and has provided artists with creative challenges throughout time. This course uses the human form as the subject to introduce students to the three-dimensional world of sculpture. It combines the traditional study of figure modeling in clay, with a more contemporary approach to how the figure is used in art today. The first part of the semester has you working from observation while learning how to realistically construct the human figure in the third dimension. You will work in clay, gaining skills in modeling, anatomy, the study of
proportion, gesture, texture, negative and positive space and balance and gravity. We begin aiming for realism and move towards abstraction. The second part of the term will provide the opportunity to explore a more open and contemporary approach to how sculpture utilizes the figure to express meaning, explore materials and employ form. You will be introduced to a variety of skills, materials and concepts as you learn to work in the round making a form interesting from all views. Ultimately you will begin to explore and develop the ability to communicate your ideas in a visual manner as well as comment on the human condition.

**Requirements/Evaluation:** This is an intensive hands-on studio course, requiring working in the sculpture studio outside of scheduled class hours. Grading takes into account the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance.

**Prerequisites:** none

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $200 to be charged to term bill

**Distributions:** (D1)

---

**ARTS 136 (F) Multiples! An Introduction to Printmaking**

Printmaking is the process of creating an image by pressing an inked surface onto paper. In this introductory class, we will work our way through a wide variety of printmaking techniques to create a range of original works. These techniques may include linocut, woodcut, collograph, intaglio, monotype, and book structures. With the help of demonstrations, lectures, museum visits, and artist talks, we will explore the history and contemporary practice of each technique. You will gain familiarity with the printshop's tools and equipment; develop a sensitivity to different kinds of papers and inks; practice the proper usage of materials; and learn how to work in a shared and cooperative environment, collectively. Though introductory, this is a process based class with rigorous assignments. Absolute beginners can expect to refine their hand, expand their vocabulary of studio skills, gain deeper appreciation of materials, and learn how to plan and discuss their creative vision. For students with prior art experience, the course can help prepare for advanced print classes, and work towards creating a more interdisciplinary print portfolio.

**Requirements/Evaluation:** Students will complete 4 - 5 main assignments leading up to a final project. Students can expect to put in at least 6 - 10 hours of work every week.

**Prerequisites:** Letter of interest. If you have prior printmaking / general art experience, please submit 5-10 images of your best work.

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $250

**Distributions:** (D1)

---

**ARTS 200 (S) Project: Costume-Design, Performance, and Beyond**

**Cross-listings:** ARTS 200 THEA 305

**Secondary Cross-listing**

This course is an intensive study of costume design. Costume designers are always aware of the world around them. They look, listen, reflect, and record. They use inspiration, research, imagination, and innovation for their creations. They simultaneously observe the smallest detail while also
picturing the larger world surrounding the pieces they develop. The course focuses on the designer's process, which entails in part: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills, and presentation of designs.

**Requirements/Evaluation:** multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance; students are required to attend two to three Theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work

**Prerequisites:** successful completion of any 200-level course in any of the fine or performing arts or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Theater and Art Studio, sophomores and juniors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy any requirements for the Art major

**Materials/Lab Fee:** $100 lab fee charged to term bill

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 200 (D1) THEA 305 (D1)

Spring 2022

STU Section: 01 R 1:10 pm - 3:50 pm Deborah A. Brothers

ARTS 201 (S) Worldbuilding: Design for the Theater

**Cross-listings:** ARTS 201 THEA 201

**Secondary Cross-listing**

This course examines designers' creative processes as they investigate a theatrical text and then dream-into-being the fictional worlds of a hypothetical production. Class will consist of several practical projects in multiple areas of design. We will practice a two-pronged technique in response to a text: developing a personal, intuitive creative response while simultaneously supporting all logistical requirements, resulting in an inventive yet dramaturgically sound design. Emphasis will be on folding this individual work process into a larger group collaboration by refining methods of communication, presentation, and group critique.

**Requirements/Evaluation:** Coursework is group class discussion and critiques, paired with several hands-on projects throughout the term.

**Prerequisites:** THEA 101 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre majors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this course is a prerequisite for all upper-level design and directing courses; this course does not count toward the Art major

**Materials/Lab Fee:** $125 for materials and copying charged to term bill

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2022

STU Section: 01 MW 11:00 am - 12:15 pm Carolyn Mraz

LAB Section: 02 W 1:10 pm - 3:50 pm Carolyn Mraz

ARTS 215 (F) Sustainabuilding (verb)
Sustainability considerations figure prominently (and always have) in good building design. This architectural design studio will include instruction, research, and reading about current design and energy strategies. These lessons will be applied in two or more design problems. Drawings and models will be critiqued in class reviews with outside critics.

**Requirements/Evaluation:** quality of design and presentation

**Prerequisites:** none but ARTS 220 and/or ENVI 108 are recommended; permission of instructor is required; preregistration does not guarantee admission to the course

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** TBD lab fee charged to term bill

**Distributions:** (D1)

---

**ARTS 220 (S) Architectural Design I**

Instruction in design with an introduction to architectural theory. Five simple design problems will explore form and meaning in architecture. Each problem will require drawings/model and will be critiqued in a class review with outside critics.

**Requirements/Evaluation:** quality of design, with improvement taken into account

**Prerequisites:** ARTS 100; ARTH 101-102 strongly suggested; permission of instructor is required; registration does not guarantee admission to the course

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** TBD lab fee charged to term bill

**Distributions:** (D1)

---

**ARTS 225 (S) Video Ecologies**

This studio course in video art investigates human connection with fraught landscapes and multi-species worlds, developing strategies by which our environment is witnessed, created, and negotiated through videographic acts. Video ecologies consider our environment as relational and invested with notions of identity. What can passionate immersion in our environment as apprehended through the senses (including and beyond vision) reveal about historical and lived experience, and the embodied effects of global capitalism? How might video serve to open up new understandings, relationships, entanglements, accountabilities? This course will critically examine socio-political and personal dimensions of ecology through readings and discussion engaging with environmentalism, intersectional feminism, queer theory, and postcolonialism. With in-depth instruction on technical and conceptual strategies used in video art, the emphasis of the course will be on the creation of an original body of work that includes several short video assignments and a substantial final video grounded in research on a specific ecological subject chosen by the student. In-class tutorials provide hands-on experience with lens-based production strategies in the context of historical and contemporary examples of video art that explore the land as a site for multiple temporalities, inter-species relationships, contamination, precarity, survival, and ruin.

**Class Format:** hybrid format: a mix of in person and remote meetings with additional asynchronous lectures, technical lessons, and screenings to supplement our course work. We will aim to keep class meetings small, and depending on the class size we may break into smaller independent lab groups / discussion groups.

**Requirements/Evaluation:** quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

**Prerequisites:** 100 level video course or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Art, Film & Media Studies concentrators and students interested in film and media studies.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option
ARTS 226  (S) Hyperobjects and the Mundane
This class will use hyperphotography, the archive, the environment and the latest Do-It-Yourself trends to explore object-oriented ontology and the notion of "Hyperobjects," or objects that transcend the local by massively spanning time and space. This class will use DIY techniques and mundane objects and materials as a tool to build models, sculptures and installations that will later on be photographed in the "studio" and outdoors. Using science-fiction references and mythology we will attempt to document and/or create a space that is invisible or has not yet been experienced by the world. What does ecological philosophy/eco-feminism currently look like, and (how) will it translate after the end of the world through the remaining photographic image and media? This class will search for, invent, and document Hyperobjects - entities of vast temporal/spatial dimensions that defeat traditional ideas of what a thing, object or photograph is.

Requirements/Evaluation: Students must budget roughly ten hours per week outside of class for photographing, editing and printing. Students must complete all projects on time. Students must think outside of the box and be ready to work collaboratively. Students must be active participants during class discussion and critiques.

Prerequisites: Intro to Photography and/or Sculpture/Video
Enrollment Limit: 12
Enrollment Preferences: Art majors who have taken Intro to Photography
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $250 standard lab fee charged to term bill
Distributions: (D1)

Spring 2022
STU Section: 01    R 1:10 pm - 3:50 pm     Johanna  Breiding

ARTS 228  (F) The Art of Almost Nothing
In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

Class Format: studio class, 3 hours per week
Requirements/Evaluation: projects, assignments, class participation, attendance
Prerequisites: one previous studio art class at Williams
Enrollment Limit: 14
Enrollment Preferences: first and second-year students
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: TBD
Distributions: (D1)

Not offered current academic year

ARTS 230  (S) Drawing II
This intermediate drawing course focuses on technique, style and content. Class sessions will focus on representing the human figure in
representational and abstract styles, including cubism and abstract expressionism. Homework projects will focus on developing individual concepts and personal expression. Exercises will include traditional materials on paper as well as non-traditional methods and exercises. The course culminates with an independent project of work in series. Critique sessions will be held every other week in small, breakout meetings, which will be scheduled when class begins.

Requirements/Evaluation: the quality of work produced, participation in class discussions and critiques, successful completion of all assignments and attendance

Prerequisites: ARTS 100. Students with significant drawing or painting experience who have not taken Arts 100 may submit a portfolio for review. Contact the professor for portfolio requirements.

Enrollment Limit: 15

Enrollment Preferences: Art majors, Seniors, Juniors, Sophomores, First Year students

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250 - $300 lab fee charged to term bill

Distributions: (D1)

Spring 2022
STU Section: 01    W 1:10 pm - 3:50 pm     Michael A. Glier

ARTS 236  (F)(S) LINOCUT!
A subset of relief printmaking, linocuts are images made by carving the surface of soft linoleum blocks. Relying almost completely on our hands, we will learn to work with a variety of cutting tools, controlling their speed and pressure to create bold, clear imagery. The course will include introductions to various methods in lino printing including stencilling, collaging, reduction printing, while also familiarising students with the fundamentals of printmaking inks and papers—how to use them, choose them, modify them. Lectures will consider the traditions of relief printmaking, its present day interdisciplinary potential, and virtual visits with contemporary practitioners. Over the course of 5 major assignments, students will gain fluency in various printmaking techniques, using them individually or in combination. The semester will be capped by a final project where cross disciplinary and self-guided approaches will be welcome.

Requirements/Evaluation: quality of work, investment of time and focus, active presence in discussions and critique, attendance, inventiveness.

Prerequisites: Drawing 100

Enrollment Limit: 10

Enrollment Preferences: based on portfolio of previous work + enthusiasm.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2021
STU Section: 01    TR 8:30 am - 9:45 am     Pallavi Sen

Spring 2022
STU Section: 01    W 10:00 am - 12:50 pm     Pallavi Sen

ARTS 241  (S) Introduction to Acrylic Painting: Five Modern Painters
To learn the fundamentals of 2D design, as well as some of the concepts that inform modern painting, this class will engage the work of Jean-Michel Basquiat, Henri Matisse, Amy Sherald, Alma Thomas, and Stanley Whitney. All distinctly modern, the styles of these artists range from figurative to fully abstract. The class will spend two weeks on each artist, analyzing and copying a work in the first week and producing a visual response in the second. Students will meet twice a week online, once as a class for technical demonstration and slide presentations and again in small groups of 3 or 4 for reading discussion and critique. Some demonstrations and supporting materials will be available asynchronously. The goals of the class are to introduce students to basic painting skills like color mixing, brushwork, composition, and palette management, as well as concepts like color theory, modernism and self-expression in a cultural context. So that students may work in a domestic setting, the size of the assignments are modest and the
materials like water-based acrylics, crayons, and paper are manageable. In order to post homework, students will need access to a digital camera.

Class Format: This is a remote class taught twice weekly, once as a class and again in small tutorial groups. Some technical demonstrations and research materials will be available asynchronously.

Requirements/Evaluation: Students will be evaluated on technical improvement, conceptual development, expressiveness and inventiveness. Class participation, timeliness and attendance will also be considered.

Prerequisites: ARTS 100. Students with significant experience with drawing or painting, but have not completed Arts 100, require permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: art majors, sophomores, juniors, seniors, first years

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: $350 - $500. Materials will be shipped directly to students.

Distributions: (D1)

Not offered current academic year

ARTS 241 (F)(S) Introduction to Oil Painting

This course is designed to introduce the fundamentals of oil painting. A significant portion of class time will be devoted to learning some of the basics of painting, such as the manipulation of color, value, surface, and texture, as well as to exploring the properties of several mediums (what the paint is mixed with to allow for application and drying). This course is focused on giving students access to a range of techniques that they can explore during the semester. We will also spend time looking at each other's work and giving feedback and suggestions as well as studying the work of established artists. Evaluation will be based on evidence of each student's progress, as shown by assignments and long-term projects; attendance and participation in class discussions.

Requirements/Evaluation: based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions

Prerequisites: ARTS 100

Enrollment Limit: 14

Enrollment Preferences: Art majors, sophomores

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

ARTS 250 (S) Devised Performance: The Art of Embodied Inquiry

Cross-listings: THEA 350 ARTS 250

Secondary Cross-listing

This studio course offers students hands-on experience in devising new performance work as an ensemble. Looking to the work of practitioners and collectives like Jerzy Grotowski, El Teatro Campesino, Tectonic Theater Project, Pina Bausch, Belarus Free Theatre, Nrityagram, and SITI Company, we will challenge ourselves to really probe what live performance is capable of. How might we think of performance as a research methodology? As a lifestyle? As a form of political action? This class will function as a laboratory, forming its own unique structure for developing and realizing a live performance. The course provides an opportunity to navigate the complex dynamics present in collaborative creation. Guest classes with practitioners will offer a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will allow the ensemble to receive feedback from small, invited audiences, as well as the opportunity to apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.
ARTS 250 (D1) ARTS 250 (D1)

ARTS 251  (F)  The Personal Documentary  (DPE)

In this course, we will survey the terrain of personal documentary in all its complexity--its marginal roots, and its current mainstream appeal. Examining a wide array of formal approaches from diary films, to archival excavations, to first-person odysseys, we will ask: what does it mean to tell a story that is personal, vulnerable, ethical? How is the current watershed moment of COVID provoking us to re-imagine our ideas of self and community, private and public? How to avoid predictability and narcissism, and instead use self-reflection productively? How do race, sexuality, class and gender inflect personal filmmaking? Major assignments will include 3-4 short videos; supplementary assignments include a daily diary, weekly film screenings, and 1-2 readings per week. In order to comply with social distancing mandates, the majority of this course will occur online and production assignments will be designed to ensure maximum student safety. While students will have access to campus equipment and lab space, assignments will embrace the possibilities of at-home, DIY approaches to filmmaking.

Class Format: In order to comply with social distancing mandates, the majority of this course will occur online and production assignments will be designed to ensure maximum student safety. While students will have access to campus equipment and lab space, assignments will embrace the possibilities of at-home, DIY approaches to filmmaking.

Requirements/Evaluation: preparation and participation; 3-4 short videos; daily diary; weekly film screenings, 1-2 readings per week

Prerequisites: 100 level video course or permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $230

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course will consider the role of race, gender and sexuality in representing personal experience onscreen.

Not offered current academic year

ARTS 260  (S)  Objects in Video, Video as Object

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

Prerequisites: 100 level video course
Enrollment Limit: 12
Enrollment Preferences: current and prospective Art majors
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Materials/Lab Fee: $125
Distributions: (D1)
Attributes: FMST Core Courses

Not offered current academic year

ARTS 271 (F) Sonic Art
Cross-listings: ARTS 271 MUS 271
Secondary Cross-listing
The course explores sound art through research and hands-on creative projects. Students will create original sound works, working collaboratively with partners from complementary disciplines. Precedents for sound installation, sonic pavilions, sound performance and artist-made instruments will be reviewed. Example works include texts on an ancient Greek Chythonic cult, instruments created by contemporary Brazilian transdisciplinary artists, the collaborative group Experiments in Art and Technology (E.A.T.) as well as works by artists showing at Mass MoCa and Documenta 14.
Requirements/Evaluation: presentation of students mini projects (20%), four artistic projects (20%)
Prerequisites: none

Enrollment Limit: 8
Enrollment Preferences: students with either Studio Art or Music experience
Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 271 (D1) MUS 271 (D1)
Not offered current academic year

ARTS 273 (F) Sound Art, Public Music
Cross-listings: MUS 175 ARTS 273
Secondary Cross-listing
Western music performance traditionally occurs within contained spaces in which performer and audience adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and expectations of performance and reception have loosened, often moving into public spaces: from sound art installations toambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course examines the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Hildegard Westerkamp, Brian Eno and John Luther Adams, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of sound art works inspired by ideas and creators we are studying.
Requirements/Evaluation: class participation, three short (2- to 4-page) essays, a response journal and the creation of four sound art works
Prerequisites: none

Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Unit Notes: ARTS elective
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 275  (S)  Sculpture
This course is an exploration of the media and processes of sculpture, with the ultimate goal being visual fluency and the successful expression of your ideas. The focus will be on the development of technical and analytical skills as they relate to the interplay of form, content, and materials. You will be introduced to a variety of techniques and processes associated with the making of sculpture, including, but not limited to, woodworking, welding and building forms out of cardboard. The field of sculpture has expanded to encompass wide-ranging approaches towards manipulating form and space, thus a wide variety of media exploration is encouraged.

Requirements/Evaluation: the quality of the work produced as well as participation in critiques, and attendance
Prerequisites: any ARTS 100-level course or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Art Majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $185 lab fee charged to term bill
Distributions: (D1)

Not offered current academic year

ARTS 287  Design for Film & Television
The production designer is responsible for creating, controlling, and managing 'the look' of films and narrative television from page to screen. This hands-on course explores the processes of production design, art direction, and lighting direction processes as related to design for film and television. From initial Production Design sketches and 'Feel-Boards' to accommodating desired cinematographic angles when designing a studio set, design for film requires a designer to shape an entire visual world while keeping in mind the story as a whole. The goal of this course is to provide an initial understanding of the Production Design process in practice through studio work and instruction.

Class Format: This class will be a combination of instruction and in class studio work.

Requirements/Evaluation: committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales, focusing on scenic and lighting design, considered both individually and when working in tandem
Prerequisites: THEA 201, THEA 285, ARTS 100, or permission from instructor with equivalent experience
Enrollment Limit: 12
Enrollment Preferences: In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Majors & Art Majors
Expected Class Size: 8
Grading:
Materials/Lab Fee: up to $125 for materials and copying charged to term bill
Distributions: (D1)

Not offered current academic year

ARTS 303  (F)  Public Address System: Art, Language, Action
This interdisciplinary tutorial engages the role of language in art, as students examine the role of text, speech, and gesture within their own work. The course engages the material and transformative effects of language in and alongside artworks, exploring the link between words and actions, the convergence of personal and political through speech and writing, and the role of the reader/viewer/receiver. Students engage a wide range of tactics for working with language within and alongside creative studio practices, through coursework that combines intensive studio work, writing, reading, and discussion. The tutorial format allows for a wide variety of media and approaches. Students will meet weekly with a peer and the professor to review work, as well as several sessions where the entire class will meet for presentation, critique, and discussion. The course demands significant
outside studio time as well as maintaining a regular writing practice for the duration of the course. Emphasis is on the creation of an original body of artwork. Assignments include several independent studio projects (8 short assignments and 1 major final assignment) independent studio projects that engage language (text, speech, gesture) and weekly writing meditations (1-3 pages in length). Weekly writing meditations engage the text score, hybrid essay, film essay, memoir, and auto-fiction, auto-theory, paying close attention to repetition, difference, codes, systems of signification.

**Class Format:** Students will meet weekly with a peer and the professor to review work, as well as several sessions where the entire class will meet for presentation, critique, and discussion.

**Requirements/Evaluation:** Quality of work produced, engagement with investigative process in studio assignments and writing meditations, participation in critique and discussion, class citizenship, attendance.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to art majors, seniors, and juniors in that order. If overenrolled there will be a waiting list.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $150

**Distributions:** (D1)

---

**ARTS 307 (S) The Body Reorganized**

This tutorial course asks students to abstract and re-contextualize the body as a topic of conversation in order to expand our discussions about identity. We will discuss the work of artists in which the body remains conceptually central; such as Nick Cave, Saya Woolfalk, Sarah Lucas, Annette Messager. Students will look to their own lived experiences and supporting communities, research historical precedence for contemporary perspectives on identity, and find, through written and collected research, additional cultural work centered within multi-layered and non-normative experiences. Students will react to readings, Christian Enzensberger's "Smut: An Anatomy of Dirt", Mary Douglas' "Purity and Danger", etc. Students will design their own methods of making with foundational introductions to flexible plane paired with movement-based workshops including stop motion animation shot with cell phones. Students will construct a structural and/or wearable work that references the body, it's topographies, and potential for performance/pose. Research will culminate in an online exhibition documenting student projects through photographic stills and video.

**Requirements/Evaluation:** Students will construct a structural and/or wearable work that references the body, it's topographies, and potential for performance/pose. Research will culminate in an online exhibition documenting student projects through photographic stills and video.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Open to all media but constructed around the theme of the body reorganized.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $100.00 lab fee

**Distributions:** (D1)

---

**ARTS 315 (F) Humor**

In this tutorial, students will explore how humor has been used by artists to communicate ideas powerfully, while working to develop their own voice, ideas, and strengths, visually. Students will explore the nuances of humor as a way to effectively communicate ideas through a visual format. Humor will be used as a way to unpack themes around intimacy and estrangement, history and memory, activism and protest, storytelling, play and silliness. Students will explore how one's vulnerability in their work can become empowering. Being funny is not a prerequisite, nor the goal for this course, though it is absolutely welcome! The class will require good communication and will start with establishing a safe and trusting group dynamic that can encourage experimentation and risk taking. Through assigned readings, screenings, and visits to the WCMA students will explore themes of humor in painting, drawing, sculpture, installation, design, film, comedy performance and literature. This course is interdisciplinary and open to all media.
Assignments in this course will be conceptually driven with formal restrictions depending on the students chosen medium. Students are expected to have a working knowledge of their medium prior to taking this course.

**Class Format:** The class will meet twice a week with one meeting in-person and the second meeting remote. Depending on the class size we may break into smaller independent lab groups / discussion groups.

**Requirements/Evaluation:** Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

**Prerequisites:** A previous course in the medium in which you plan to work. Students are expected to have a working knowledge of their medium prior to taking this course.

**Enrollment Limit:** 10

**Enrollment Preferences:** art majors or permission of instructor

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** Students will be responsible for purchasing their own materials.

**Distributions:** (D1)

---

**ARTS 317 (F) Water as Leitmotif: Queer Kinship and Collaborative Acts of Performance for the Camera**

This interdisciplinary tutorial course focuses on water as a poetic and political space of exploration. Through the discussion of critical and creative texts, visual and cinematic analysis, and a direct engagement with water, we will examine water as making material, a healing practice, a site of ecological consciousness, and a form of physical and psychic reorientation. The course content is informed by queer and feminist making practices, as well as contemporary environmental thought and aesthetics. Together we will speculate on new practices of intimacy, kinship and care-based relations through the lens of water and fluidity. Throughout the semester, students will make individual works at the intersection of performance, photographic and moving-image works, and will collaborate with their tutorial partners on a large-scale installation to be documented via still and moving image.

**Requirements/Evaluation:** Students need to know how to use a DSLR camera and/or a video camera. Students will be evaluated on their participation, reading discussions, presentations and final collaborative project.

**Prerequisites:** Art Majors who have taken ARTS 122, ARTS 226, ARTS 225, ARTS 303, ARTS 319 or ARTS 251

**Enrollment Limit:** 10

**Enrollment Preferences:** Art Majors who have taken Photography and/or Video classes

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

---

**ARTS 319 (F) Junior Seminar**

This Junior Seminar is an intensive class designed to provide art majors the opportunity to strengthen their ability to communicate clearly through the visual language by offering an overview of current themes and issues within the art world and beyond. The class is structured around critique and studio practice engaging in everyday tangible spaces, including the home, backyard, the studio, and street, as well as imaginative and virtual experiments that are designed to help further each student's skillset, broaden their knowledge of contemporary art, and to offer critical and analytic experiences that deepen the student's understanding of the role of art in society. What is at stake and how does one create deeply personal/political work? Your voices are now more important than ever and this class is an integral stepping stone in accessing these voices through visual, written, and spoken language. Through various texts, screenings, in-depth critique, and visiting artist lectures, the Junior Seminar finds a balance between self-exploration and group dynamics, between solo and collaborative art practices, between reflection and expression, and between resistance and care.

**Requirements/Evaluation:** quality of work produced, participation in class discussions and critiques, successful completion of all assignments, and attendance
**Prerequisites:** three studio courses required for the major

**Enrollment Limit:** 12

**Enrollment Preferences:** enrollment is limited to Studio Art majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Studio Art and Art History and Practice majors are required to take this course in the junior year unless studying abroad during the fall semester

**Materials/Lab Fee:** $150 lab fee charged to term bill

**Distributions:** (D1)

---

**ARCS 323 (F) Colour Function**

This tutorial places colour as a central consideration in our object making. Experiments and discussions will include development of dyes and inks, foraging for colours, understanding palettes and their relationship to 'the tasteful' and 'the garish', 'beautiful' and 'the unpleasant', colour blocking, monochromes, culture and colour, and the relationship between a variety of pigments, their medium of suspension, and the material they stain or sit directly on top of, unstable. In this way, we will work with a large selection of media and the assignments will be both foundational and highly experimental; you are creating a hundred new colours within a strict grid--you are mixing two new colours through light and projection alone, with no guides. The course is open to anyone who has taken advanced classes in printmaking + drawing, sculpture, and photography.

**Class Format:** the class will meet in tutorial pairs once a week and collectively whenever there is a skill workshop

**Requirements/Evaluation:** weekly assignments and final project; participation, generosity towards studio and studio members; attendance

**Prerequisites:** any 200-level art studio class or submit a portfolio for consideration

**Enrollment Limit:** 10

**Enrollment Preferences:** Art Studio majors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Not offered current academic year**

---

**ARTS 329 (F) Architectural Design II**

A continuation and expansion of ideas and skills learned in Architectural Design I. There will be four to six design projects requiring drawings and models, each of which will emphasize particular aspects of architectural theory and design. **One project will be built full-scale by the students in the class.**

**Class Format:** design studio, site visits, lectures, readings

**Requirements/Evaluation:** quality of designs during the term

**Prerequisites:** ARTS 220 or ARTS 215

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** TBD lab fee charged to term bill

**Distributions:** (D1)

**Attributes:** ENVI Humanities, Arts + Social Science Electives

**Fall 2021**
ARTS 332 (S) Living Things: Bodies and Objects in Sculpture and Performance

Cross-listings: THEA 333 ARTS 332

Secondary Cross-listing

This studio course seeks to promote art making that transgresses the boundaries between the visual and performing arts to see a life that animates both bodies and objects. Cultivating various approaches to the experience of embodiment and kinesthetic responses to objects, props, and clothing, students will perform sculptures and sculpt performances indoors and outdoors. Exploring relationships between time and space will support creating works that suggest and invite movement, encourage interaction, and investigate the physical potency inherent in objects, people, and performance. Emphasis will be made on collaborative process and developing dialogue between actors, dancers, and visual artists.

Requirements/Evaluation: Evaluation will be based on participation in studio exercises, bi-weekly collaborative group projects, a final solo work to be performed at the end of the semester, and five 2-page reflection essays.

Prerequisites: Students must have completed at least one course either in Theatre or in Studio Art.

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $150 for supplies such as fabrics, papers, paints, markers, props, etc. as needed.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 337 (S) This Is An Experiment!

Keeping printmaking as our source and primary method, this class will use the possibilities within the discipline to create layered, expansive, and highly experimental surfaces. Students will work with a variety of printmaking techniques, and build on their existing knowledge of etching, relief, lithography, and screen printing. They will take risks with inks and their viscosity, the scale of their printing blocks, the temperamental nature of their material, the variety of methods on a single print, and consider outcomes that go beyond images on paper. Prior printmaking experience is strongly recommended. Students will be evaluated on their progress towards building a print based body of work.

Requirements/Evaluation: active and thoughtful participation, time and thought dedicated to their studio practice/project, completion of assignments

Prerequisites: any printmaking class

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTS 344 (S) Taswirkhana: Technique and Practice of Indian Drawing and Painting (DPE)

Cross-listings: ASST 344 ASIA 344 ARTS 344

Primary Cross-listing

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional
Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

Requirements/Evaluation: Class participation, discussions and critiques, successful completion of all assignments and attendance

Prerequisites: none, open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to studio and art history majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 344 (D1) ASIA 344 (D1) ARTS 344 (D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

Not offered current academic year

ARTS 345  (S)  Art in Times of Crisis  (DPE)

In an era of ever-increasing emergency, what is the role of art? Can poems save us? What media and forms of exhibition are best suited to respond to urgent crises? What creative methodologies might we develop in collaboration with one another, in the interest of building community as well as making great art? This course is an interdisciplinary, experimental intervention into our present era. In addition to producing multiple original artworks, we will do deep dives into 3 art activist case studies: Puerto Rico's current societal collapse, the HIV + AIDS movement, and global climate justice. Readings and artists will include Octavia Butler, Adrienne Marie-Brown, Rebecca Solnit, Raquel Salas-Rivera, Yarimar Bonilla, David Wojnarowicz, Douglas Crimp, and many others.

Requirements/Evaluation: readings, screenings, attendance, participation, and committed completion of assignments

Prerequisites: any 200-level art studio class or submit a portfolio for consideration

Enrollment Limit: 10

Enrollment Preferences: majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $150

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course examines crises which disproportionately impact communities of color and marginalized people. Race and class will be central areas of inquiry.

ARTS 369  (S)  QUILTY!

A quilt is a glorious formation to be asleep under, and in this class we will spend the entire semester making a single wonderful one. A dynamic composition for the home! Students will learn how to collect and choose fabrics, cut them into bold lively shapes, and practice efficient ways of using a needle and thread to sew them together. By looking at quilting traditions internationally, both improvisational and hyper precise methods of construction will be adopted - the quilt is for everyone! Students will also learn basic embroidery and applique techniques to embellish the quilt top, and draw with thread as they bind and stuff the layers of their quilt with (local) wool.

Requirements/Evaluation: a single quilted and bound queen sized quilt.

Prerequisites: 200 level studio art classes completed, and/or letter stating enthusiasm and investment in handwork and textiles, and/or previous
STU Section: 01  T 9:55 am - 12:35 pm  Pallavi Sen

ARTS 385 (S)  The Sculptural Costume and It's Performance Potential

Cross-listings:  THEA 385  ARTS 385

Primary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation:  the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites:  successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit:  14

Enrollment Preferences:  Art and Theater majors

Expected Class Size:  12

Grading:  no pass/fail option,  no fifth course option

ARTS 396  WONDERFUL THINGS!

A spinning top! A clock! A toy! A sundial, a deck of cards, a lantern, pompoms, building blocks that rise and topple, puppets, paper kites, paper planes, toy boats that float --play objects are born into the world over and over, transforming in colour and shape, yet holding onto an essential structure that give them their name and purpose. In this class, students will construct their own versions of (some of) these classic objects using humble and lovely materials: paper, glue, bamboo, cloth, light, wood, perhaps wind, string. Our guides will be existing histories of making, the wonderful image of disparate objects on a well made shelf, all the handmade objects we have loved, childhood toys, a desire to play still, and delight.

Requirements/Evaluation:  weekly assignments, final project

Prerequisites:  Drawing 100 and/or sculpture classes and/or portfolio of studio work

Enrollment Limit:  10

Enrollment Preferences:  Studio art majors

ARTS 418 (S) Senior Seminar

In this capstone class for studio art majors, students define, research, create and present an original body of work which will be exhibited. The emphasis will be on producing a strong and coherent body of artwork for their senior exhibition at the Williams College Museum of Art, (in person or virtual). Students will focus on strengthening ideas, developing formal skills and practicing critical analysis. They may work in any medium in which they have developed a high degree of proficiency. To prepare to partake in an exhibition on this level, students must learn to schedule and pace themselves, communicate, deal with spatial considerations beyond their studio, document their work effectively and work within firm deadlines. The nature of this course will have you working closely as a team, as well as individually, towards creating a strong and exciting student show this May at the Williams College Museum of Art (or via a virtual platform). The class will meet in large and small groups throughout the semester for critique and discussion and also have assigned readings, films, and/or lectures.

Class Format: intensive studio art class

Requirements/Evaluation: Art is a visual language, which speaks to us through our sense of sight and implied touch; you will be evaluated first and foremost on your ability to speak powerfully in this language. Evaluation also takes into account: effort, attitude, creativity, studio responsibility and participation. Attendance and punctuality is expected for both remote and in-person portions of the course. If you miss more than one unexcused class your grade will automatically drop a letter grade. All work must be completed by the final critique.

Prerequisites: You must be a senior Art Studio major with all requirements fulfilled by the end of this term

Enrollment Limit: none

Enrollment Preferences: Studio Art major; permission of instructor is required for History and Practice majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: no lab fee, students are responsible for purchasing supplies

Distributions: (D1)

MASTER OF ARTS IN ART HISTORY

Requirements

To qualify for the Master of Arts degree in art history, candidates complete a minimum of twelve courses for graduate credit plus two winter study periods, the latter comprising an international Study Trip in the first year (normally in January) (ARTH 51) and preparation of a Draft Qualifying Paper in the second (ARTH 52). Students must also demonstrate reading proficiency in two foreign languages, one of them German (for more specific information on the language requirements, see below, after the listing for ARTH 597/598). At the end of the second year, all students present a shortened version of the Qualifying Paper in the annual Graduate Symposium.

At least eight of the twelve courses must be graduate seminars. Included among them are four required of all students: ARTH 504, “Methods of Art History,” to be taken during the first semester; ARTH 506, “Graduate Art History Writing Workshop” and ARTH 507, “Object Workshop,” to be taken in the second; and ARTH 509, “Graduate Student Symposium,” to be taken in the fourth.

Students must also fulfill a distribution requirement by undertaking coursework in three of six areas:

- East Asian, Indian, Islamic art
- Ancient Near Eastern, Egyptian, Greek, and Roman art
- Early Christian, Byzantine, and Western Medieval art to 1400
- Western art, 1400 to 1780
- Western art, 1780 to present
- Arts of Africa, Oceania, and the Americas (Pre-Hispanic or Native American cultures)

Students may petition the Director to apply a thematic or non-period specific course toward the distribution requirement by demonstrating substantial work in an appropriate area.

Undergraduate Courses and Private Tutorials

With permission from the Director and the individual instructors, students may take up to four undergraduate courses for graduate credit, with the understanding that research papers submitted in such courses meet a standard commensurate with those prepared for graduate seminars.

In addition to regularly offered seminars and classes, students may arrange up to two private tutorials (ARTH 595/596) by submitting petitions to the Director describing the substance of their projects, including bibliography, and the nature of the work they will submit for evaluation. The petitions must be co-signed in advance by both the students and their faculty supervisors.

Of the minimum requirement of twelve courses, the combined number of private tutorials and undergraduate courses applied to the degree may not exceed four.

The Qualifying Paper

The Qualifying Paper is normally a revision of a seminar or private tutorial paper produced in one of the previous three semesters, expanded and refined over the second Winter Study term and a portion of the fourth semester. Students submit the topic of the Qualifying Paper in writing to the Director by the final day of exams of their third semester. Before this, students must obtain their original faculty supervisor’s agreement to be engaged in the Qualifying Paper process.
On the first Friday of their fourth semester, students submit drafts of their Qualifying Paper, including illustrations, to three faculty readers (generally the original faculty supervisor, the Director, and the Post-Doctoral Teaching Fellow). Although a draft, this version of the paper should be brought to a high level of completion.

Early in the fourth semester, students and their readers meet together to discuss the drafts. Within six weeks of these discussions (at a date determined by the Director), students submit their Qualifying Papers. Qualifying Papers should not exceed 8,000 words, including footnotes and bibliography.

The Graduate Symposium

All second-year students speak in the Symposium, presenting 20-minute talks developed from their Qualifying Papers. Each student has an ad hoc committee to give advice in preparing these presentations (ad hoc committees comprise, but are not limited to, the Director, one additional faculty mentor, one first-year graduate student, and one second-year graduate student). Preparations include at least three practice sessions for each student. Speakers present the first and third of these run-throughs to the ad hoc committee, the second to the other second-year students in a workshop scheduled by the Director.

Grades and Academic Standing

The Program uses the following grading system:

- A+ = truly exceptional (4.33)
- A = outstanding (4.00)
- A- = excellent (3.67)
- B+ = good (3.33)
- B = satisfactory (3.00)
- B- = barely adequate (2.67)
- C = inadequate (0)
- E = failing (0)

Courses in which students receive a grade below B- do not receive graduate credit.

Letter grades are used in all seminars except ARTH 507, 509, and 563. These and the Winter Study courses (ARTH 51 and 52) are Pass/Fail. Grades in language courses are converted to Pass/Fail on the Williams transcript and are not calculated in the GPA. The Director reviews students’ records at the end of the first year; those with GPAs of 3.00 or lower may be asked to resign from the Program.

Course instructors set the deadlines for coursework. If students seek and receive extensions that result in semester grades of Incomplete, they must hand in their work by the instructor’s revised deadline, which will be no later than the second Monday of the next semester’s classes. Extensions beyond this date will be solely at the discretion of the Director (in consultation with the instructor).

Students who resign from the Program may, after a period of at least one year, petition to the Director for re-admission. Such a petition must include evidence that deficiencies have been remedied and that the student is capable of completing the course of study without further interruption.

The M.A. requirements are designed for completion in two consecutive academic years in residence. There is no credit for coursework done prior to matriculation in the Program. The Program is full-time, requires students to live in Williamstown or its vicinity, and does not normally admit students on a part-time basis.

Language Courses

The Graduate Program’s degree requirements include reading competence in two languages (other than English) of scholarly and academic relevance to the history of art. One of the two languages must be German. Many students select French as the second although, with permission of the Director, other languages may serve. The Program offers dedicated courses in reading French and German for art history. Other language classes at Williams are listed in the course catalog, although the coordination of undergraduate and graduate schedules can be challenging.

Incoming students’ language preparation is assessed through exams administered at the outset of the semester. In French and German, scores attained on SAT II reading examinations determine placement within the two-semester language course sequence.

French: If students attain a minimum score of 700 on the French placement exam, they are exempted from further coursework in that language. With a score between 500 and 700, they are placed into the graduate course of readings in art history, French 512. With a score below 500, they enroll in the introductory course, French 511. In the case of a second language other than French, arrangements will be made on an individual basis.

German: With a score below 450, students enroll in the introductory course, German 515. Students who score between 450 and 500 are placed into German 516. With scores between 500 and 700, students enroll in the advanced reading course, German 513. Students attaining a minimum
score of 700 on the German placement exam are exempted from further coursework in that language.

**ARTH 500  (F)  Clark Visiting Professor Seminar: Race and Visual Culture**

**Cross-listings:** ARTH 500  ARTH 400  

**Primary Cross-listing**

Race does not exist. On a biological level, the idea of race as a grounded scientific category has been disqualified for decades. If it had an end, it necessarily had a beginning. One can identify this beginning in the middle ages and follow it through Renaissance as an idea of lineage; the modern intersection of race with skin color began with the early modern colonization process in the Americas and in Africa. From that time forward, the history of race and the history of art intersect. This course will try to show how art history’s tools are fundamental to understanding race as a modern category and social agency. We will focus on the raw materials of the painter (pigments); visuality as a modality of human categorization, the construction of human hierarchies or racial orders, the social efficiency of color theories and racial matrix of caricature. Course readings will privilege the wealth of recent research and historiography addressing the links between art, visual culture and race.

**Requirements/Evaluation:** writing assignments, participation

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** graduate students get preference; places for 8 undergraduate and 8 graduate students assured

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**ARTH 501  (S)  Museums: History and Practice**

**Cross-listings:** ARTH 303  LEAD 301  ARTH 501

**Primary Cross-listing**

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in today’s arts institutions. Looking at museums past and present internationally, the seminar will envision the future of museums as we recognize the programmatic trends developing in our own moment of civic and social unrest. The class will consider this future while examining existing governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues in repatriation and restitution of cultural property. Surveying museums ranging in size and type from the “encyclopedic” to newly established contemporary arts institutions and alternative spaces, we will investigate current trends in acquisition, exhibition, educational programming in light of the equity and social justice demands of our time. With our goal of imagining art museums in the future, class discussions will have a special focus on how museums might strive to balance their traditional scholarly and artistic responsibilities with their heightened civic and social roles, doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

**Requirements/Evaluation:** oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

**Prerequisites:** undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

**Enrollment Limit:** 10

**Enrollment Preferences:** graduate students, then senior art history majors, then other undergraduates

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the seminar requirement for the undergraduate Art History major

**ARTH 503 (S) Clark Visiting Professor Seminar: The Making of African Art**

**Cross-listings:** ARTH 503 ARTH 403

**Primary Cross-listing**

Where does African art come from? How do ritual objects from the African continent became works of art in western museums? What kind of discourses transformed artefacts (religious, magic, mundane or extraordinary) into fine arts masterpieces? How did European early modern and western contemporary texts qualify and impact the reception of African objects from the period of colonization and after? Discourse shapes materiality and visuality. Manipulations fashion things. The gaze acclimates to different volumes and forms. In this course, these different aesthetic regimes of the modern era will be explored regarding African art. From Olfert Dapper (Dutch polymath of the late 17th century) to Michel Leiris (French novelist and ethnographer of the 20th century) we will follow the diverse histories of African artefacts and creative processes as they developed in the West into the loose and pluridisciplinary domain of African Art History. The course will be an occasion to read different texts regarding African artefacts from 1680 to 1930 and discuss the perception of these objects in Europe as well as their transfiguration into the property and aesthetic objects of European museum.

**Requirements/Evaluation:** research paper, class presentations

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduate and 8 graduate students assured

SEM Section: 01   R 1:00 pm - 3:50 pm   Anne Lafont

**ARTH 504 (S) Proseminar in Research and Method**

In this graduate Proseminar on Research and Method, we will read a number of texts that form the foundation of art history as a discipline, including the writings of Plato, Panofsky, Lessing, Heidegger, Wölfflin, and Barthes (among others). We will study these works against the grain, considering how art history is currently transforming under the fields of ecology, disability studies, queer theory, and radical black feminism. Students will work closely with the collections of the Clark to theorize how absences are integral to institutional histories, and we will think about how we can, as historians, responsibly address voices that have been removed from the canons of art history. This course considers not only central writings of art historical methodology but also the limits for decolonizing art history and the museum, as we will examine how the formation of the discipline depended upon absenting critical perspectives and voices.

**Class Format:** in-person seminar with option to attend remotely, remote learning after Thanksgiving

**Requirements/Evaluation:** class participation, writing assignments

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** limited to and required of first-year students in the Graduate Program in the History of Art
**ARTH 506 (F) Expository Writing Workshop**

This writing seminar for graduate students in Art History will afford intensive full group discussions of writing skills and substantial one-on-one writing consultations (to be held on Google Meet). Group discussions will center on three kinds of texts: Writing about writing, published writing in the discipline of Art History, and student writing in progress. In six such discussions we will improve our vocabulary and method for discussing writing; we will learn to build better and more sophisticated sentences, paragraphs, and arguments; and we will practice anticipatory reading and writing in order to strengthen our control of both voice and structure. Each discussion will be supported with both exempla and exercises, and our watchword in all cases will be "revision." In one-on-one consultations (3-4 per person), I will offer tailored critique of each student's work, setting aside time as needed to troubleshoot sentences, paragraphs, or arguments together.

**Requirements/Evaluation:** class participation, participation in consultation meetings, writing assignments,

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** limited to and required of first-year students in the Graduate Program in the History of Art

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials**

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give
them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

**Expected Class Size:** 14

SEM Section: 01  TBA  Emmelyn Butterfield-Rosen

**ARTH 510 (F) Approaches to Drawing from Connoisseurship to Conceptualism**

This course will consider the art of drawing as a pedagogical tool and cultural practice from the sixteenth to the twentieth century. Creative and commercial forces over four centuries have fostered different types of and reasons for production: presentation drawings in sixteenth century Italy, an increased market for drawings in seventeenth century Holland, a fashion for powdery pastels in eighteenth century France, and the critical promotion of drawing as a form of autographic thinking in the nineteenth century. Drawing has enjoyed a resurgence in the last fifty years as Minimalism and Conceptualism have pushed the medium's boundaries. Equal consideration will be given to the history of collecting and to materials from the invention of the Conté crayon to the deteriorating effects of acidic paper. The seminar will coincide with a major loan exhibition at the Clark of over one hundred drawings from the Renaissance through contemporary: Drawing in Depth: Master Drawings from the Thaw Collection. The class will be held in the Manton Study Center for Works on Paper and the Clark galleries with visits to the Williams College Museum of Art.

**Requirements/Evaluation:** involved class participation, several short presentations, one short paper, and a final paper approximately 20 pages

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students and then to senior Art History majors
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Not offered current academic year

ARTH 512  (F)  Why Look at Animals? Some Contemporary Positions
This seminar, named for a 1977 essay by the art critic John Berger, considers a recent tendency in contemporary art to see nonhuman animals less as objects for human delectation—to be owned, eaten, or symbolized with-than as subjects, endowed with specific forms of intelligence, agency, and/or cross-species kinship. We will take as case studies the work of artists such as Francis Alÿs, Xu Bing, Sue Coe, Coco Fusco, Pierre Huyghe, Jochen Lempert, Chris Marker, and Lin May Saeed, among others. Readings will come in part from the rapidly growing, multidisciplinary field of animal studies. In the process, we will consider concepts such as animacy; animal ethics; animalization; the anthropocene; biopolitics; and posthumanism. This seminar anticipates two exhibitions concerning animals at the Clark in Summer 2020.

Requirements/Evaluation: active class participation, presentations, writing assignments

ARTH 513  (S)  Contours of Abstraction in Modern and Contemporary Art
Abstraction, be it gestural or geometrical, was a protagonist of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, revolutionary politics, appropriation, as well as racial, feminist, and queer critique. We will delve deeply into non-representation in global modern and contemporary art through myriad primary documents and theoretical frameworks so as to revise and expand its canonical contours and cartographies.

Requirements/Evaluation: Weekly presentations, response papers, final 20-page research paper
Prerequisites: Students at the undergraduate level must be seniors and Art History majors
Enrollment Limit: 12
Enrollment Preferences: Art History MA students and undergraduate Art History seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ARTH 515  (F)  Creating Whiteness: Racial Taxonomies in 'American' Art, 1650-1900
Cross-listings: AMST 355  ARTH 515

Primary Cross-listing
"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of 'American' art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—and this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an
American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family’s images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Requirements/Evaluation: research paper, presentations
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students

ARTH 519 (S) Architectural Theory and Modernity, 1750-1968
Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but no longer. Why is that? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boulée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 15- to 20-page seminar paper, based on comments and discussion following a classroom presentation.

Requirements/Evaluation: class participation, writing assignments
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: MA students, then advanced undergraduates
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 521 (S) Islam and the Image in Indian Painting, c.1450-c.1750
This seminar will explore Indian painting made for Muslim patrons from the medieval period to the early modern era. The course considers how paintings produced for an elite Indo-Muslim audience can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar will also address some of the major problems that continue to haunt Indian art scholarship. For most of its history, the academic study of Indian painting has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts—a curious oversight in light of the fact that miniature painting is primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted miniature paintings. Western museums continue to place paintings made for books and albums in their "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences—even at times bound in the same albums—are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? In order to understand the various intended functions of miniature painting and its possible role as an "Islamic" art, the seminar will explore ways to conceptually reintegrate images and texts belonging to key manuscripts and albums that were dispersed during the colonial and post-colonial periods. To better understand the
cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

**Requirements/Evaluation:** class participation, writing assignments

**ARTH 523 (S) Heaven’s Gate: The Romanesque Sculpted Portal and the Creation of Sacred Space Through Art**

**Cross-listings:** ARTH 523 ARTH 424

**Secondary Cross-listing**

During the course of the eleventh century, the designers of European churches fashioned a new architectural language that we now label "Romanesque." One of the most innovative and dramatic aspects of this new language was its assimilation of monumental sculpture, absent in Europe since the fifth century. The focus of attention in this regard was the portal, which marked the threshold between the profane realm of the outside world and the sacred space of the church. Often characterized as the "marquee of the Middle Ages," the Romanesque sculpted portal, with its startling juxtaposition of the spiritual and the physical, of ecstatic visions of the heavenly realm and writhing, biting monsters, constitutes one of the true high-points of creativity in medieval art. Through the lens of modern scholarship, this seminar will investigate the antecedents and origins of the Romanesque sculpted portal and examine in detail its most renowned manifestations. Emphasis will be placed on understanding these often complex sculptural schemes within their original functional and material contexts, especially in terms of how they helped to create the sacred space of the church behind. Students will then have the opportunity to develop their own research projects, informed by what we have learned in the seminar, but focused on an example of sacred threshold art of their own choosing.

**Requirements/Evaluation:** class discussion/participation, oral presentation, and a 15- to 20-page research paper

**ARTH 524 (F) The Watchful Object**

What is implied by an object that "watches"? Is it sentient? Animate? Through what apparatus does it gain the power to perceive and in turn generate some type of action? Watchful objects--sometimes known problematically as 'fetishes,' 'idols,' and 'totems'--have existed in numerous material cultures in Africa over time and have often been saddled with titles and labels that largely reflect colonial-era notions of primitivism linked with non-Western objects, spaces, and peoples. Even today, many of these objects are still inappropriately connected to systems of the occult rather than being recognized as crucial cogs in the socio-political, cultural, and spiritual mechanics of lived experience on the continent both past and in some cases present. The purpose of this seminar, thus, is to unpack the multiple identities that these objects have experienced as a way of understanding 1.) the circumstances and situations that catalyzed their production; and 2.) how their various material and metaphorical components function as power-producing elements that enable these forms to become 'watchful' presences in society that operate in accordance with their 'observations' of the human condition. This course will also address how the psychological agency of many of these material traditions has prompted their inclusion and absorption within contemporary artistic practices as well, often in the form of productions and performances that provoke unsettling and often
transformative experiences in viewers.

Requirements/Evaluation: in-class presentations, class discussion, and a final research project

ARTH 527 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ARTH 527 ECON 227 ARTH 327

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ARTH 530 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Cross-listings: ARTH 530 CLAS 236

Primary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's
Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallermé, "L'Apres midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

**Requirements/Evaluation:** attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** first year graduate students, then second year graduate students; undergraduates by permission only

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**ARTH 532 (F) Creative Life: The Visual Economy of Work**

This course is a seminar on life and work focusing on methodologies of production--art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the "facts" of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968, and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines, advertisements, archives, world exhibitions, and product showrooms.

**Requirements/Evaluation:** Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** MA students, then undergraduate art history majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**ARTH 535 (F) The Medieval Object**

**Cross-listings:** ARTH 535 ARTH 435

**Secondary Cross-listing**
After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 536 (S) Charles and Maurice Prendergast in WCMA Collections

This seminar will investigate the careers of Maurice and Charles Prendergast, who occupy curious positions in American art. Students will work closely with the art and archival collections of the Prendergasts at WCMA, which is the largest repository of their work in the world. Maurice's Post-Impressionism placed him at the forefront of American modernism in the first decades of the twentieth century, culminating with his inclusion in the infamous Armory Show of 1913. Charles, a leading frame maker before adapting techniques of his craft to create incised panels, intersects with the Arts & Crafts Movement, Symbolism, and vernacular material culture. While the brothers are firmly canonical, they are often regarded as isolated from major formal and iconographic concerns of their peers. Scholarship, much of it produced at WCMA, has often focused on their subject matter. Participants in this class will consider new material and theoretical approaches to the brothers' work that may (or may not) prove productive in resituating their place in American art.

Requirements/Evaluation: class participation and writing assignments

ARTH 537 (F) HIV + AIDS in Film and Video (DPE) (WS)

Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a 'plague' of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the plague years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: while the past decade has provoked a new wave of AIDS historiography, the COVID-19 pandemic has caused AIDS to reverberate with even greater force. Together, we will ask difficult and probing questions about this phenomenon called the 'AIDS epidemic,' examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings, short writing assignments, student-led discussion, and a final research project of the student's design. In
order to facilitate robust discussions and maximize student and faculty safety, the majority of this course will occur online. It will contain some in-person experiences when possible.

Class Format: This course will be largely conducted online, in order to facilitate robust discussions and maximize student and faculty safety. It will contain some in-person experiences when possible.

Requirements/Evaluation: Students will be evaluated according to the following criteria: weekly attendance, readings and participation in seminar discussion; leading class discussion once during the semester; 3 short response papers; one paper of 20+ pages of original student research.

Prerequisites: MA student, Art History or Studio Art major, or instructor permission

Enrollment Limit: 10

Enrollment Preferences: MA students first, followed by Art History and Studio Art majors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be required to conduct regular writing assignments which will culminate in a graduate-level research paper.

Difference, Power, and Equity Notes: This course explores an epidemic that had devastating effects on LGBTQ+ people, and has disproportionately affected communities of color. Questions of difference, power, and equity are absolutely central to the course.

Attributes: ARTH post-1800 Courses

Not offered current academic year

ARTH 538 (F) Realms of Earth and Sky: Indian Painting, ca. 600-1857 (WS)

On the basis of technique, Indian painting forms a continuum from the beginning of the first millennium down to the mid-nineteenth century: an outline in ink filled with flat, opaque colors which are burnished between each layer to give them opacity. In its media, its subject matter, regional variation, range of patronage, and artistic virtuosity, it displays startling diversity. From the northern Himalayan hills to Mysore in the south, artists, often working in family workshops for royalty, priests and wealthy merchants, have adorned caves and temples, illustrated books, and created lavish albums with themes ranging from the sacred to the secular. The study of Indian painting itself is a vast, evolving body of literature that continues to oscillate between discussions of artistic style and a concentration on content and context. The aim of this seminar is twofold: to outline the development of Indian painting historically; and to understand the political, social and religious circumstances that produced some of the greatest masterworks in Indian art. How was Indian painting used? Who were the patrons? How does the art form reflect the particular cultural values of its time? As an analytic framework, the seminar will consider Indian miniature painting both in light of primary literary sources as well as through current scholarship.

Requirements/Evaluation: Class participation. Short weekly responses. Final 15- to 20-page paper to be developed with the instructor throughout the semester.

Prerequisites: none, open to all students

Enrollment Limit: 19

Enrollment Preferences: graduate students, undergraduate art majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will submit short written assignments weekly. They will also be required to submit a final paper which they will develop throughout the semester. Students will receive comments and suggestions from the instructor on their writing skills.

Not offered current academic year

ARTH 540 (F) In Vinculus Invictus: Portraits in Prison

Among all the portraits produced during the modern period, some have been painted or, more recently, photographed in prison. Portraits in prison exist at a crossroad of politics, law, and identity; they offer a great opportunity to think about art and society. Artists themselves have made self-portraits during their own imprisonments, or sometimes a portrait of one of their fellow prisoners. More often it was the prisoners or their relatives who commissioned an artistic record of their detention. The idea of commemorating such a moment, or to evoke it as a claim to fame, seems surprising at best, outrageous and provocative at worst. But there has been, since the 16th century, an enduring tradition of portraiture in prison with its masterpieces and its pantheon, a tradition that fits into the wider pictorial attention to the prison itself. With the French Revolution, the nature of
prison changed. It became a tragic symbol of political "debates." Within a few years, a terrifying series of portraits appeared that would nurture Western political thought and visual culture until now. Since the 18th century, these portraits have become more concerned with ideas that stretch beyond the individual and into the realm of social justice, mass incarceration, and the prison-industrialization complex.

Requirements/Evaluation: oral and written assignments

ARTH 541  (F)  Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud

This interdisciplinary seminar examines the rise of evolutionary biology, a new explanatory paradigm that solidified in Europe in the middle of the nineteenth century, and its ramifications in art and aesthetic theory in the late nineteenth and early twentieth centuries. We will consider how natural histories of creation, and corresponding reclassifications of the human as a species category, went hand in hand with a reconceptualization of the aesthetic faculties, and the processes of art's production and reception. A core component of this seminar will be the close study of key texts by Charles Darwin, and two thinkers who were among the most radical in extending his key insights into the domain of aesthetic theory—the psychoanalyst Sigmund Freud, and the philosopher Friedrich Nietzsche. These primary texts will provide points of departure for studying the work of a number of innovative practitioners working across a range of media, among them the composer Richard Wagner, the Neo-Impressionist painter Georges Seurat, the architect Adolf Loos, the choreographer Vaslav Nijinsky, and the art historian Aby Warburg. Methodologically a major aim of this seminar is to think together critically about the nature of art's relations to other domains of cultural production such as science or philosophy, and to interrogate what it means, both practically and epistemologically, to pursue "interdisciplinarity" as a strategy for art history.

Requirements/Evaluation: seminar presentations, research paper

ARTH 542  (F)  Insubordinate Bodies: The Body in Conceptual Art in Latin America, 1960-1980

The use of the body-be it the artist's or those of willing and unwilling participants-is among art's most significant developments internationally since the 1960s. In Latin America between the 1960s and 1980s, activating the body not only was a strong conceptual strategy to escape object-based practices; it was also a potent way for artists to disobey and confront forms of violence and control exerted by repressive regimes. But the body too was a forceful medium by which artists could subvert heteronormative frameworks, through the visualization and performance of feminist critiques and queer identities. This seminar will explore the role of the body in Latin American conceptual art through localized case studies, elucidating the body's particular strength as a vehicle for political and institutional critique, as well as its potential to unlock alternate narratives of conceptual practices in the region.

Requirements/Evaluation: active participation and weekly assignments, leading class discussion, three short responses, and final research paper
Prerequisites: none
Enrollment Limit: 12
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
ARTH 543  (F)  Color, High and Low

Why should color in prints be controversial? For most of the nineteenth century—even as technical advances encouraged a flowering of color in woodcut, intaglio, and especially lithographic production—entrenched voices in the art establishment continued to insist on printmaking as an art of black and white. Drawing upon a wide variety of examples from the Clark's collection, this course will explore the range of associations that attached to color prints, along a broad spectrum from highbrow preciousness and subtlety to lowbrow commercialism and bad taste. Color lithography was a particular lightning rod for controversy: although chromatic experiments in this medium enabled striking aesthetic innovations, the extreme complexity of the process also meant that the designer of a print became farther and farther removed from its actual production. This was just as true for the delicate and exquisite suites produced in limited editions by Pierre Bonnard, Edouard Vuillard, and Maurice Denis as it was for the large-scale, brightly-colored lithographic posters of Jules Chéret and Henri de Toulouse-Lautrec, used to advertise popular urban entertainments. Alongside the close examination of original works of art, a set of critical and theoretical readings will help us navigate the paradoxes of printed color. Apart from the standard requirements, including a research paper and class presentation, students will have an option to participate in a summer 2020 exhibition based on the course findings. This course will take place in the Manton Study Center for Works on Paper at the Clark.

Requirements/Evaluation: class participation and writing assignments

ARTH 544  (S)  Women Artists in Paris, 1850-1900

In this seminar, we will examine the historically undervalued contributions of women in the art of the later nineteenth century. During this period, leading artists from around the world, including many women, were drawn to the academies, museums, salons, and studios of Paris. While women were largely excluded from formal training, many nonetheless navigated the complex systems of artistic production. We will focus on this multinational group of talented women (including Marie Bashkirtseff, Rosa Bonheur, Anna Ancher, Mary Cassatt), and we will assess their work against contemporary sociopolitical thought and aesthetic theories. Readings will draw upon early critical reviews of public exhibitions, biographical materials, studies of pedagogical and institutional practices, and social histories of art. In and through these materials, we will explore the marginalizing narrative that was created for women artists in Paris, and, most importantly, we will reconstruct an alternative history through our discussions and class presentations.

Requirements/Evaluation: seminar presentations and research paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: preference given to graduate students and then to senior Art History majors
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 545  Architectural Theory in Crisis

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as
Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

Class Format: presentations

Requirements/Evaluation: several short presentations and a final 30-minute presentation, to be followed by a 20-page paper

Prerequisites: permission of instructor

Enrollment Limit: 11

Enrollment Preferences: Graduate students

Expected Class Size: 10

ARTH 546  (F)  Texere: The Material Philosophy of Print and Textile, ca. 1500-1900

It is a commonplace in the literature on textiles that the words for both text and textile derive from the Latin texere: to weave. As this etymological root indicates, the action of making cloth provides the metaphoric structure by which we conceive of language from the threading of thought to the weaving of prose and poetry. In the recent theoretical writings of Tim Ingold, among others, the processes of weaving-textility-offer a model against which to conceive of the dominant hylomorphic conception of matter and form as a process of imprint. Instead, textiles illustrate a world that is created through forces in motion, never imprinting, but moving against and within one another. This seminar will use these questions as the starting point to examine the interaction between printed matter (embodying a hylomorphic process) and textile (a material challenge to hylomorphism). The Clark Art Library contains a preeminent collection of textile material, and this seminar will dive into the Mary Ann Beinecke collection to examine histories of gender and labor, figuration and ornament, mobility and place, and finally, form and matter. The case studies will range from sixteenth-century needlepoint model books to twentieth-century kimono design.

ARTH 547  (F)  The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century&Beyond

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?—What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured “sites”: the artist’s studio, the artist’s desire, and the artist’s death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

Class Format: in person class with remote learning option, switch to all remote learning after thanksgiving

Requirements/Evaluation: presentations, research paper

ARTh 548 (S)  Landscape, Theory, Ideology

To use the term "landscape" is to imply and assume a subject position. Unlike the categories of *nature,* "wilderness," "vista," or "ecology," a landscape is something invented and experienced (or observed, or represented, or cultivated) solely by human agents. The term "landscape" is variously deployed in the service of a range of political and philosophical positions. This seminar explores "landscape" as a fruitful agitation in critical theory and aesthetic discourse over the past thirty years. The course will interact with the artists and photographic works on view in the exhibition, Landmarks, a 150-year survey of landscape photography in WCMA's collection. We will examine i) how landscape as medium and as genre moves from literature to painting to photography; ii) how to read and employ contemporary theory in the service of artwork from bygone eras; and iii) we will ask who exercises the agency and privilege to name, to invent, to denote a space or a view as worthy of sight.

Requirements/Evaluation: class participation, writing assignments

ARTh 549 (F)  Art, Biology, Beauty

This interdisciplinary seminar is offered in conjunction with the upcoming RAP Colloquium scheduled for March 2020, "Beauty, Sexuality, Selection: Darwinian Revolutions in Aesthetics." (Seminar participants will be expected to attend.) Our theme will be Charles Darwin's controversial theory of "sexual selection" as both a historical idea of aesthetic response and beauty, and as a theoretical concept that is back in play in current evolutionary thinking. Readings will be drawn from ancient philosophy, current science, art history, the history of science, and other fields, to engage the following questions: how did the existence of difference in the organic world—gender difference broadly but also more specifically racial difference in the human species—motivate Darwin's theory of an "aesthetic evolution" driven by animal and human perception of visual beauty? How did philosophical aesthetics contribute to Darwin's biological theory of beauty, and how did Darwin's biological theory of beauty unsettle the discipline of philosophical aesthetics? In which ways did the arts and visual cultures of Europe and elsewhere shape Darwin's aesthetic assumptions? How did, and how does, the concept of sexual selection destabilize the concept of "art" as a human cultural activity? How might "sexual selection" complicate historical and current delineations drawn between nature and culture, between the innate and the arbitrary?

Requirements/Evaluation: seminar participation, presentations, research paper

ARTh 550 (S)  The History, Theory, and Problem of Connoisseurship

The museum and market have long relied upon the "talent" of a chosen few "connoisseurs," whose abilities (i.e. "the expert eye")-shrouded in mythology and vogue-have profoundly influenced the interpretation of objects. This seminar will interrogate the problematic construct of connoisseurship in the market (Duveen), in the museum (Pope-Hennessy), and in the academy (Berenson). Through readings about the history and theory of the practice from the sixteenth century to the modern day, we will reassess the meaning, and validity, of connoisseurship in visual culture. And, through conversations about authorship, working methods, and artistic intent, we will question what we learn from close looking. This seminar will include case studies using objects in the Clark's permanent collection, focusing on in-depth discussions of materials, techniques, attribution, quality, and the burgeoning field of conservation science. Students will be asked to conduct their own rigorous object-based research.

Requirements/Evaluation: class participation, writing assignments

ARTH 561 (F) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts (DPE)

Cross-listings: ARTH 561 HIST 454

Primary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty, as well as of decolonizing museums; the complex dynamics of collaboration; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Class members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

Class Format: The course will feature seminar discussions as well as local field trips to museums, libraries, and archives with pertinent collections.

Requirements/Evaluation: Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project

Prerequisites: For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats will be reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

Expected Class Size: 16

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 561 (D1) HIST 454 (D2)

Difference, Power, and Equity Notes: The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

ARTH 562 (F) Art of California: Pacific Standard Time (DPE) (WS)

Cross-listings: ARTH 462 AMST 462 LATS 462 ARTH 562
Secondary Cross-listing
In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: Several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester. The course will feature synchronous online class meetings with some small discussion groups. Student presentations will be recorded offline and posted to GLOW.

Prerequisites: ARTH 102 - Grad Art exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Course themes of art and activism, borders and diaspora, globalism and modernism in the visual arts and how they intersect with the exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Through discussion, presentations, and writing assignments students will develop skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice.

Spring 2022
ARTH 569 (F) Gérôme

This course explores work and career of Jean-Léon Gérôme (1824-1904), perhaps the most renowned, popular, and influential artist of the later nineteenth century. With commercial and artistic relationships that spread his influence across the globe, Gérôme has come to seem very much like a highly successful contemporary artist, specifically with regard to his place in an international art world that married elite institutional practices to new technologies of reproduction, marketing techniques, and other instruments of modern mass culture. Gérôme’s fame was short lived, however. In the wake of the Modernist revolution on the one hand, and Post-Colonial critique on the other, no discussion of the artist can avoid wrestling with complaints that have left him thoroughly diminished—though less forgotten than scorned. Not only did his art, as it seemed, help perpetrate a gigantic aesthetic error, it blundered onto ethically compromising terrain. Today Gérôme stands as Exhibit A in wide-ranging critique of Orientalism’s ideological work. The course will interrogate the Modernist and Post-Colonial complaints against Gérôme in detail, even as it also explores his art from a range of other perspectives, many developed very recently. Topics include Gérôme’s relationship to photography, to Orientalism and animal studies, to the cinema, to polychrome sculpture, his approach to historical narrative, and well as his voyeurism and other other manipulations of viewer experience so critical to his art. The seminar will engage the Clark’s important collection of Gérôme paintings, and also travel to the Walters Art Gallery in Baltimore, conditions permitting. Students may prepare papers on any aspect of global late-nineteenth-century “academic” or “official” art that was informed by Gérôme’s example.

Requirements/Evaluation: class participation, presentations in seminar, research paper (approximately 20 pp)

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: MA students, then art history majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 570 (S) Image-making, Orientalism and Visual Culture

Images enjoy extraordinary power in the spaces between self and other, human and divine. They play myriad roles—witness, surrogate, instigator, supplicant—and travel freely across political, religious and cultural boundaries. They are also subject to reproduction, alteration and destruction as disparate visual cultures interact and globalizing processes ensue. This course will focus on various regions—e.g. United States, France, Turkey, and the Perso-Islamic sphere—and the images that factor in the intervening spaces, from 1800 to the present. We will begin with the theme of self-fashioning and the peculiar nature of portraiture. Therefter, the entanglement of religious beliefs and visual traditions will broaden our inquiry, leading us to contested dynamics like iconoclasm and aniconism, and reductionist types like veiled women and pious men. Along the way, proliferating and palimpsestic forms of Orientalism will oblige us to consider the very concept of global visual culture. Students will submit weekly GLOW posts to foster class discussion and undertake a major research project over the course of the semester.

Class Format: Remote synchronous

Requirements/Evaluation: Class participation, weekly oral presentations, 15-20 page term research project.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Graduate students

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year
ARTH 575  (F)  Regression as Modern Fantasy: Archaism, Primitivism, Prehistory

This course analyzes the implications of European modernity's engagement with cultural artifacts it wanted to classify beneath the prefix "pre." We take as our object an aesthetic strategy employed with increasing frequency by modern artists in Europe after 1800: the self-conscious mobilization of visual forms thought to telegraph priority to later advancements, whether historically or developmentally. Our inquiry, beginning with the German Nazarenes and extending into the early twentieth century around the moment of WW1, foregrounds such strategies as key to grasping new notions of temporality and geography that emerged in European modernity. We will inquire into the historical and intellectual contexts that sustained chronological and cultural primitivisms, including the history of colonialism, discoveries of Paleolithic cave art, and the emergence of the modern disciplines of archeology, anthropology, ethnography, child psychology, and psychoanalysis. Alongside close visual scrutiny of some of modernism's most canonical and problematic objects, including key works by Picasso and Gauguin, we will examine the literature that proliferated in this period devoted to the art of peoples deemed "primitive," including the Greeks in the pre-classical period, non-Western peoples, and children.

Requirements/Evaluation:  seminar presentations, research paper
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then advanced undergraduate students
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 576  (F)  Paper, Process, Practice

Works on paper, particularly multiples, confound many of the received ideas around artistic invention and originality. This course will address the varied functions of printmaking in Europe over four centuries (1500-1900), giving special attention to the following questions: What is the relationship between prints and other artistic media? How do the material constraints involved in printmaking lead to a particular set of practices, and how in turn do those marry with technological advances to produce new aesthetic possibilities? To what extent did Old Masters such as Dürer and Rembrandt define the terms for later printmakers, and how did their example enable and/or discourage innovation in printed subject matter and style? What was the role of prints in creating both new forums for public discourse and new collecting publics? Arranged thematically rather than chronologically, this course will cover a wide array of printmakers and types of printed media.

Requirements/Evaluation: class participation, class presentation, research paper
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Art history MA students, then advanced undergraduates

ARTH 577  Questions for Global Art History: A Workshop

Art history's so-called "global turn" has been underway for over twenty years, but it would be difficult to say that it has yielded a consistent set of methodological approaches. When we consider a project global in scope does that mean simply thinking beyond national or regional designations? Are we looking for expansive networks of materials and makers? Evidence of intercultural exchange? In this seminar, we will begin by looking at several recent approaches to defining global art history and consider terms like contact, exchange, appropriation, transculturation, and cosmopolitanism. We will discuss the spatial vocabulary of oceans and borderlands and the dynamics of power engendered by colonialism, imperialism, and racialization. Thereafter, our weekly case studies will come from the students' research projects. Though students are not expected to begin the seminar with an argument for their final paper, they should arrive with a topic in mind that pertains to a "global" art history subject in the period between 1500 and 1900 CE. In consultation with the professor, each student will then select readings to discuss with the group so we can work
together to come up with questions and approaches that are commensurate to the topic. Our course may end in affirming the heterogeneity of global methods, deciding that this is a benefit rather than deficit. The collective aim is to understand, problematize, and reformulate the approaches available to us so that we can better address the topics that interest us as a group.

Requirements/Evaluation: Students are required to participate in discussion every week, lead one week of discussion, give a brief paper presentation, and submit a 20-page final essay.

Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Graduate students, then advanced undergraduate students with permission of the professor.
Expected Class Size: 10

ARTH 580  (S)  Picturing God in the Middle Ages

ARTH 5-- Spring 2022 Peter Low
How did medieval Europeans imagine their God and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? Paying particular attention as well to the materiality, experience, and manifold audiences of medieval works of art, this seminar will examine the evolution of images of God, in both the Eastern and Western halves of Europe, and the problems these images often generated. Through readings and class discussion, the course will investigate, among other specific topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the tensions manifest in or evoked by this art, including picture vs. text, symbolism vs. mimesis, and asceticism vs. splendor; the impact of the Roman cult of the emperor and of images of the pagan deities on the earliest portraits of Christ; the cult of the icon, concerns over idolatry, and the destruction of images; ideas about the relationship between spiritual and physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to the Eucharist and other aspects of Christian ritual; the role of the senses beyond vision in engaging with sacred art especially in the later Middle Ages; and the pictorial exploration of both the torture and sexuality of Christ. Students will also pursue an individual research project, in which they will examine in greater depth a specific depiction of God of their choosing, from any place and any time, in light of what we have considered together in the seminar.

Requirements/Evaluation: Evaluation will be based on class participation, oral presentations, and a final research paper (15-25 pages).
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: MA students, then senior art history majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option

ARTH 581  Creative Life: The Visual Economy of Work

This course is a seminar on life and work focusing on methodologies of production--art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the "facts" of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968, and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines,
advertisements, archives, world exhibitions, and product showrooms.

ARTh 582  (F)  On Race, Art, and Property
In her seminal article "Whiteness as Property," critical race theorist and professor Cheryl Harris contends that the legal system in the United States "has come to embody and legitimize benefits that accrue to citizens who are white." The legacy of our legal system, which has dehumanized people by rendering them as property and legalized the theft of land by colonizers from Native Americans, is not confined to the past, but has shaped our world and thrives within our present moment. How has this legacy and Harris' theory been explored in contemporary art? How might it allow us to revisit artworks and practices by canonical artists from alternative perspectives? This course aims to study aspects of this complicated history through a broad range of texts from legal and literary theory to art history to Black and Native American studies to more immediately authored texts published on social media platforms. Students are encouraged to think dexterously as we study works by Gordon Matta-Clark, Michael Heizer, Sondra Perry, Cameron Rowland, and Cauleen Smith--among others.

Requirements/Evaluation:  presentations, writing assignments

ARTh 583  (F)  Graphic Content: Typography and the Book between Art and Design
This seminar considers the entangled histories of fine art and graphic design by focusing on creative practices surrounding the letterform and the book form from 1900 to the present. We will study historical avant-garde movements active in publishing and making-public; the development of the graphic design discipline, in print and on screen; and logocentric artistic tendencies from concrete poetry and pop art to conceptualism and artists' books. We will also consider diverse literary practices, graphic visualization, and political agitation. The seminar will make use of the Clark library's outstanding collection of artists' books and the holdings of the Chapin library at Williams. We will welcome several guests, including art historians, artist-designers, designer-artists, editors, publishers, and bookmakers.

Class Format:  in person seminar with remote option, remote learning after thanksgiving
Requirements/Evaluation:  class participation, class presentation, research paper/project
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  Art History MA students, then advanced undergraduates. Course will be by application if overenrolled.

Japanese Popular Visual Culture

Cross-listings: COMP 186 ARTH 586 ASIA 186 ARTH 286

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

Class Format: discussion

Requirements/Evaluation: attendance, participation, two 5-page papers, final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: students majoring or considering a major in a related discipline

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Crash! The Car Accident as Myth and Metaphor in American Art and Visual Culture

A year after MoMA elevated machinery to high art in 1934, Grant Wood painted Death on The Ridge Road (Williams College Museum of Art), a depiction of the deadly side of the streamlined modern machines that Alfred Barr might have presented at MoMA. A generation later, Andy Warhol's Death and Disasters series multiplied gruesome images of crushed cars and bodies to numbing effect. During the ensuing years, both Jackson Pollock and David Smith (among others) became traffic fatalities. Roughly bookended by the Great Depression and the 1960s, but also considering works of art and visual materials before and after those parameters, this seminar will explore the stakes of car crash imagery for American artists and culture. Readings may include topics in trauma studies, automotive technology, physics, posthumanism, law, and object oriented ontology as well as grounding participants in American art and history of the middle third of the twentieth century. Participants in the course will also have the opportunity to help shape the content, themes, and narrative of an exhibition on car accidents in American art being organized by WCMA.

Requirements/Evaluation: oral presentations and written assignments

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: graduate students, then advanced undergraduate Art History majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Guillaume Lethière (1760-1832) and Caribbean Networks in France during the 18th and 19th centuries

Born in the colony of Guadeloupe to a French father and a formerly enslaved woman, Guillaume Lethière (1760-1832) would become a key figure in the Neoclassical movement, a well-respected pedagogue with a sizeable workshop populated by notable students, an ambitious collector, director of the Académie de France in Rome from 1807 to 1816, a favorite artist of Lucien Bonaparte, and a member of the Institut de France. Despite his many accomplishments and sizeable corpus of paintings and drawings, Lethière has notably disappeared from the "canon" of art history. Such a lacunae begs many questions about the circles of sociability in which he traveled, the reception of Caribbean artists in France in the eighteenth and early
nineteenth centuries, and the lack of widespread knowledge on these topics today. This seminar will be timed with the planning of a major monographic exhibition to take place at the Clark Art Institute in the summer of 2024, and students will work alongside the curators on various aspects of the exhibition’s organization. The course will also provide an opportunity for close examination of objects in the Clark’s permanent collection, including Lethière masterpiece *Brutus condemning his sons to death* (1788), as well as an album of approximately one hundred drawings by the artist.

SEM Section: 01  M 1:00 pm - 3:50 pm  Olivier Meslay, Esther Bell

**ARTH 592 (F) Chance and Design: Ideas and Iconographies of Causality in Europe before 1900**

The idea of the work of art has a long history in Western philosophy and religious thought as the model for the idea of intentionality at the broadest scale: the relation of the artist to their artifact mirrored, in microcosm, the relation of an “intelligent designer” to a designed universe. The collapse of such models for thinking about both art and the natural and social world are characterized, typically, as intrinsic to the epoch of modernity. Within art history of the past half century, a significant amount of attention has been devoted to theorizing how many now-canonical artists (eg. the proto-conceptual artist Marcel Duchamp, the composer John Cage and choreographer Merce Cunningham) harnessed chance procedures with the aim of vacating their agency from the process of creation and with the “purpose to remove purposes.” This course attempts to look before and beyond these well-trodden histories. Probing the visual dimension inherent in the concept of design and its absence (a visuality epitomized by blindfolded allegorical figure of *Fortuna*), we will seek to trace a more capacious genealogy for the efflorescence of chance, accident, and randomness as aestheticized objects of fascination in the twentieth century. We will trace the prehistory of these concepts in relation to both the abstraction of numbers and the concreteness of organisms, situating ideas of chance in relation to both the rise of a globalization and racial capitalism grounded in risk, financial speculation, and probability, as well as the eventual emergence in the nineteenth century, of an evolutionary theory capable of producing statements such as, “what a chance it has been... that has made a man,” and recognizing “blind chance” as the originary driver of change in the organic world. The class will include presentations by invited guest scholars and focus on a number of case studies spanning the early modern period through the late nineteenth century, including topics such as: the concept of disegno and art as a model of intentionality, the iconography of fortune, gambling, and accidents, the association of chance and seafaring, the iconography of falling and gravity, the incorporation of chance into the material processes of image-making (for instance, in the invention of photography), and the visual culture and visual metaphors of Darwin’s evolution. In association with our historical inquiries, the course will also meditate methodologically upon models of causality in art-historical explanation, as well on broader questions of how chance and ideas of chance and causality mediated modern Europe’s relation to other parts of the world.

**Requirements/Evaluation:** class presentation, research paper of approximately 20 pages

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** grad students, then art history major undergrads

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

Fall 2021

SEM Section: 01  T 10:00 am - 12:50 pm  Emmelyn Butterfield-Rosen

**ARTH 593 (S) Sound/Image: Theories and Practices in Art History**
This seminar serves as an introduction and deep dive into issues of sound in the visual arts. While we will examine modern and contemporary examples of sound art and multimedia work, this course considers sound, the aural imagination, and practices of listening much more expansively to probe the theoretical, conceptual, as well as technological, aesthetic, and reception issues surrounding sound in visual art. Course readings will combine art historical accounts with texts from philosophy and sound studies. We will read Michael Gaudio on representations of "the New World" in colonial America, consider recent attention paid to sound and the infiltration of sound recording media in nineteenth- and early-twentieth century America (by Rachel DeLue, Leo Mazow, and Asma Naeem), delve into the politics and poetics of European avant-garde performance, the cross-pollination of musical and artistic experimentation in 1960s New York and elsewhere (John Cage and Pauline Oliveros in connection with the worlds of dance, performance, and Black Mountain College), and consider more contemporary practices, particularly by artists working in Asia, Brazil, and artists engaging in Deaf studies and critiques of ableist hearing ideologies (such as Christine Sun Kim). We will also draw heavily on writings on sound, sensation, art (and film) by twentieth-century continental philosophy (Roland Barthes, Jean-Luc Nancy, Gilles Deleuze) as well as recent work by contemporary theorists probing the intersections of the sonic with race, gender, and politics (among them Salomé Voegelin and Robin James), as well as other topics from sound studies such as the mediation of technology, social and historical frameworks (such as Alain Corbin’s study of the culture of the senses in the 19th-century French countryside), and the “ontological” turn and focus on materiality (Christoph Cox, Steve Goodman).

Requirements/Evaluation: Students will each be responsible for introducing key themes or questions from the readings in one class session. They will also complete a short paper focused on experimenting with sound/image ekphrasis (how do we write histories of sound?). The final project will be a research paper (approximately 20 pages), on which they will give a presentation in class near the end of term while the project is in its development stage.

Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: MA students, then art history major undergrads
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Spring 2022
SEM Section: 01 M 10:00 am - 12:50 pm Caitlin Woolsey

ARTH 594 (S) Traveling Seminar: Slavery and the Dutch Golden Age

This course takes as its starting point the exhibition at the Rijksmuseum opening in September 2019: Slavery, an exhibition. With this installation, the curators of the Rijksmuseum seek to correct dominant narratives of seventeenth and eighteenth-century Dutch history, which have absented the role of slavery in determining the economic, social, and visual history of the Netherlands. With a Travel Grant awarded by the College Art Association, the students in this seminar will travel to the Netherlands to visit this exhibition and other relevant cultural institutions in order to examine the possibilities and limits for ‘decolonizing’ the museum. This course will study how slavery is imbricated within the mythic construction of a ‘Dutch Golden Age’ while also examining what happens when the history of enslaved peoples becomes translated into the space of a museum and exhibition. We will consider a revisionist history of Dutch artistic production, accounting for slavery in determining the Dutch economy and visual production while also asking what happens when slavery becomes narrated in the space of one of the nation’s history museums. We will read contemporary black feminist theory such as Sylvia Wynter, Saidiya Hartman, Hortense Spillers, and Christina Sharpe as a means to struggle with how the space of the exhibition chooses to activate and write those missing histories, and we will examine if it is even possible to responsibly tell the story of slavery over two centuries when the majority of the subjects have been completely defaced, removed, and excised from the historical record, and their voices are often the ones still absent. In the words of Saidiya Hartman, we will ask: “Is it possible to construct a story from the ‘locus of impossible speech’ or resurrect lives from the ruins?”

Requirements/Evaluation: participation in class travel, class participation and presentation, research paper
Prerequisites: none

DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES
CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES

(Div I & II, see explanation below)

Chair: TBD

• Cecilia Chang, Frederick Latimer Wells Professor of Chinese; on leave 2021-22
• Man He, Assistant Professor of Chinese
• Shinko Kagaya, Professor of Japanese
• Cornelius C. Kubler, Stanfield Professor of Asian Studies
• Christopher M. B. Nugent, Professor of Chinese
• Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; on leave 2021-22
• Li Yu, Professor of Chinese

Visitors:
• Eun Young Seong, Visiting Assistant Professor of Japanese

Language Fellows:
Yi-Zhi Chen
Tianwen Han

Teaching Associate:
Xian Fung

Department Mission Statement and Curricular Goal
The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major
Students who complete the requirements for a major in Chinese will be able to:

• Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
• Read and analyze basic texts written in Classical Chinese.
• Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
• Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
• Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
• Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take approved electives related to Chinese language and culture (including additional CHIN core electives, additional Asian language courses, or Chinese studies courses offered in art, comparative literature, history, music, political science, religion, etc.) to replace the language course requirement. Potential electives can be found under the course listings for the [program in Asian Studies](#).

### Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for [the program in Asian Studies](#).

### Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).
Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for the program in Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

PLACEMENT TEST

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their studies of these languages at the college should take a placement test before they pre-register for a language course. Students who wish to take the Chinese placement test can self-enroll in a GLOW course at https://glow.williams.edu/enroll/JTHENA. Students who wish to take the Japanese placement test should contact the Japanese Coordinator.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one-to-one and a half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

COVID-19 CHANGES

Due to the pandemic, the department has reduced the number of courses required for its majors for the graduating classes of ’21, ’22, and ’23. For these years, the minimum requirements are nine courses as follows:

Chinese major: CHIN 101, 102, 201, 202, 301, 302, 401, 402, 312.
Japanese major: JAPN 101, 102, 202, 301, 302, 401, 402, one approved elective.

East Asian Languages and Cultures major: at least six CHIN/JAPN language courses (or a minimum proficiency equivalent to the completion of 302), two CHIN/JAPN core electives, and one approved elective.

Students with higher language proficiency who are placed out of any of the core language courses (101 through 402) can take an equal number of faculty-approved electives taught either in Chinese/Japanese or in English on literature, linguistics, culture studies or related Chinese or Japanese studies disciplines (e.g., art history, history, political science) to fulfill the core language requirement.

Students who plan to study abroad either during the summer or during their junior year MUST consult with department faculty for advice.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Grants for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

CHIN 101 (F) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

Class Format: (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English.

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: If the course is overenrolled, first priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; and second priority will be given to first-year students and sophomores.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option
Unit Notes: Course credit granted only if both semesters (CHIN 101 and 102) are taken

Distributions: (D1)

Fall 2021
LEC Section: 01  MWF 9:00 am - 9:50 am  TR 8:55 am - 9:45 am  Cornelius C. Kubler
LEC Section: 02  M-F 10:00 am - 10:50 am  Cornelius C. Kubler

CHIN 102  (S) Basic Chinese
An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing in both the simplified and the traditional script at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

Class Format: (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 101 or equivalent

Enrollment Limit: 15

Enrollment Preferences: Students who have taken CHIN 101 or equivalent.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

Distributions: (D1)

Spring 2022
LEC Section: 01  MWF 9:00 am - 9:50 am  TR 8:55 am - 9:45 am  Christopher M. B. Nugent
LEC Section: 02  M-F 10:00 am - 10:50 am  Christopher M. B. Nugent

CHIN 131  (S) Basic Cantonese
An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within China has been rising steadily over the past few decades. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese and which have become more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions and discussion

Requirements/Evaluation: evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Chinese and Asian Studies majors who have no prior background in Cantonese

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)
Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion-living a life of seclusion from society-in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state-to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 134 (D1) CHIN 134 (D1) COMP 134 (D1) REL 134 (D2)

Writing Skills Notes: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

CHIN 140  (F) Introduction to Traditional Chinese Literature

Cross-listings: COMP 140  CHIN 140

Primary Cross-listing

With a written record stretching over 3000 years, China's literary cultures are some of the richest and most varied in human history. Their influence continues to be felt not only in modern China, but also throughout much of the world. This course examines the origins and development of the different literatures of China from their earliest stages up until the end of the imperial system in 1911. We will read texts ranging from the Analects of Confucius to the medieval poetry of the Tang dynasty, from Buddhist sutras to plays about prostitutes and singing girls. An invulnerable monkey god may make an appearance to sow chaos as well. He's difficult to pin down. Some important themes will include: the role of the individual versus that of the community, responses to catastrophe and disorder, the fantastic, the articulation of the self through literature, and ways of dealing with historical and literary legacies. All readings are in English translation.

Requirements/Evaluation: five short writing assignments (2 pages each), one paper (6-7-pages), and a final exam

Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 152 (S) Introduction to Taiwanese/Southern Min Language and Culture

This course, which includes a required, fully-funded two-week field trip to Taipei, Quemoy (Jinmen), and Xiamen over Spring Break, constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the major Chinese "dialects," this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese. Required Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, a journal and term paper based on the field trip, and an oral and written final exam; Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund

Prerequisites: CHIN 301 or permission of the instructor

Enrollment Limit: 8
Enrollment Preferences: if course is over-enrolled, students will be selected based on a statement of rationale and goals for wishing to participate, with CHIN and ASST majors receiving priority
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CHIN 162 (S) Languages of East Asia

Cross-listings: CHIN 162 ANTH 162 ASIA 162 GBST 162

Primary Cross-listing

An introduction to the three major languages of East Asia: Chinese, Japanese, and Korean. Working with various types of multimedia including audio, video, images, animation, and texts, we'll take up the phonetics, phonology, morphology, and syntax of these three languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic analysis, we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages and dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper
Prerequisites: none (no prior background in linguistics or any Asian language required, open to all students)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

CHIN 201 (F) Intermediate Chinese

These two courses are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, and writing. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Class Format: Students will do dialog performance and communicative exercises in the speaking/listening classes. We will do read-aloud, questions and answers in the reading/writing classes.

Requirements/Evaluation: classroom performance, homework, daily quizzes, regular written and oral unit tests, and a final exam (including both oral and written portions)

Prerequisites: CHIN 102 or permission of instructor. Students who have never taken a Chinese language course at Williams should take the Chinese Placement Test in GLOW before pre-registering in this course.

Enrollment Limit: 15

Enrollment Preferences: priorities will be given to first-year students and sophomores, then to juniors and seniors.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

CHIN 214  (F) Foundations of China

Cross-listings:  ANTH 212  GBST 212  REL 218  HIST 214  ASIA 211  CHIN 214

Primary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

CHIN 223  (S) Ethnic Minorities in China: Past and Present  (DPE)

Cross-listings:  ANTH 223  CHIN 223

Primary Cross-listing

According to the most recent census conducted in China in 2010, of the 1.3 billion population of China, more than 110 million (8.49%) were ethnic minorities (shaoshu minzu). Most of the minority groups reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will ask the central question of "what is minzu" and address various topics such as the minority-group identification project; the definition of minzu (translated as "ethnic group," "nationality," or "race" by different scholars); the intersections between language, religion, tourism, diaspora and ethnicity; historical sino-centric views about "foreigners" and "barbarians" as well as the roles that "barbarians" have played in China's long history. We will examine how social differences and hierarchy are constructed and discuss how power plays in the shaping of "ethnicity." A multidisciplinary approach will be adopted for the course, taking in sources from anthropology, history, literature, ethnic studies, and cultural studies. Throughout the course, the pedagogical techniques of "intercultural dialogue" will be adopted to encourage students to discuss their own ethnic experiences and compare ethnic minority issues in China with similar issues in the United States. Students are also encouraged to come up with real-world solutions and strategies to deal with issues of racism, bias, and discrimination.

Class Format: The course will be offered remotely and adopt a learner-centered, quasi-tutorial format. Every week students will view recorded
lectures and participate in an online discussion forum asynchronously. In addition, students will be placed into smaller groups and meet with the instructor once a week for synchronous discussions.

Requirements/Evaluation: class attendance, weekly quizzes, active participation in both the online discussion forum and in-class meetings, two short (5-page) response papers, and one final research paper (10-12 pages).

Prerequisites: none, open to all students; no knowledge of Chinese language required

Enrollment Limit: 15

Enrollment Preferences: current and prospective majors in the Department of Asian Studies, then to first-years

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

CHIN 224  (F) Enlightenment, Revolution, and Modernity: Literature and Intellectual Culture of Modern China

Cross-listings:  CHIN 224  COMP 219

Primary Cross-listing

This course introduces modern China through literature, culture, and critical thought, covering the last decade of the 19th century, the first half of the 20th century, and a few years after the founding of the People’s Republic of China. We will read important examples of fictions, essays, and poems by modern Chinese thinkers and writers. We will engage with film, theatrical performances, and other forms of popular culture from the late Qing Dynasty to the years before the Cultural Revolution. We will also read works that were created at the peripheries of history such as cross-cultural diasporic Chinese writings beyond the geographical limits of China. Delving into issues of revolution, war, enlightenment, and modernization, we will gain insights through close readings of these works about the fundamental questions that were faced by modern China and Chinese people. The first three decades of the 20th century witnessed the great achievements of canonical modern writers as well as eruption of multiple historical movements. They also saw the emergence of a modernized popular culture, new social classes, and awakening gender activists in the urban spaces. The next twenty years underwent a revolutionary turn to be more concerned with nationalist issues under the impact of war. While a singular revolutionary literature ensued in mainland China after 1949, literary and cultural modernism as a form of resistance in the context of Cold War started to develop in the sinophone regions other than mainland China such as Taiwan and Hong Kong. In this class, all readings are in English. Complementary readings in original Chinese texts are not required but welcomed.

Class Format: discussion

Requirements/Evaluation: mid-term exam; final exam; final writing project

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Chinese majors; Asian Studies majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

CHIN 224 (D1) COMP 219 (D1)

Attributes: GBST East Asian Studies Electives

Not offered current academic year
From the famous human/butterfly metamorphosis in the Daoist text Zhuangzi to contemporary writer Liu Cixin's award-winning "Three Bodies Problem," the "fantastic" has always been part of Chinese literature that pushes the boundary of human imagination. Readers and writers create fantastic beasts (though not always know where to find them), pass down incredible tales, assign meanings to unexplainable phenomena, and reject--sometimes embrace--stories that could potentially subvert their established framework of knowledge. Meanwhile, the "fantastic" is also historically and culturally contingent. What one considers "fantastic" reveals as much about the things gazed upon as about the perceiving subject--his or her values, judgment, anxiety, identity, and cultural burden. Using "fantastic" literature as a critical lens, this course takes a thematic approach to the masterpieces of Chinese literature from the first millennium BCE up until twenty-first century China. We will read texts ranging from Buddhist miracle tales to the avant-garde novel about cannibalism, from medieval ghost stories to the creation of communist superheroes during the Cultural Revolution. The topics that we will explore include shifting human/non-human boundaries, representations of the foreign land (also the "underworld"), the aestheticization of female ghosts, utopia and dystopia, and the fantastic as social criticism and national allegory. All materials and discussions are in English.

CHIN 227 (S) Made in China or Making “China”? Twentieth-Century Chinese Performative Culture

Cross-listings: CHIN 227 THEA 227 COMP 227

Primary Cross-listing
This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of “China.” Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of “Inventing Tradition on the World Stage,” “Acting the Right Part,” and “Performing the Nation.” Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion

Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies

CHIN 228 (F) Global Chinese Literature

Cross-listings: COMP 209 CHIN 228

Primary Cross-listing
This course centers upon a critical question in China studies: how to identify and theorize about Chinese literature (cultural productions in other media forms included) created outside the boundaries of Mainland China. "What is Chinese?" "What is Chinese culture?" "What is Chinese literature and culture like beyond China?" "How is China/Chinese perceived in different Sinophone communities?" are some of the major questions we engage in this course. Taking a comparative approach, we will read and analyze Chinese literature produced in various regions and cultures (Hong Kong, Taiwan, Singapore, Malaysia, etc.) at critical historical moments during the second half of the twentieth century and early years of the twenty-first century. We will also read critical essays in studies of Shijie huawen wenxue (Global Chinese-language literature) to gain a theoretical understanding of the scholarship. The purpose of the course is two-fold: First, it is expected that we expand our purview in studying Chinese-language literature and
culture; second, we will learn to think critically the ways in which such concepts as Chinese and Chineseness travel and translate among peoples, regions, nations, and cultures. The course is conducted online, with a mostly synchronous mode of instruction. No prior knowledge in Chinese is required.

Requirements/Evaluation: 5-to-10-minute pop quizzes; 2 term exams; one final paper (5-6 pages)
Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: Priority will be given to Chinese majors, Asian Studies majors, and Comparative Literature majors.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option

CHIN 252  (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language
This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. All readings in English with some examples in Chinese.
Class Format: discussion
Requirements/Evaluation: class participation, several oral presentations and short papers, and a final research project

CHIN 253  (S) "Illness" in Modern and Contemporary Chinese Literature and Culture   (DPE)
Cross-listings: COMP 254  CHIN 253  WGSS 255
Primary Cross-listing
From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "illnesses" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual illnesses, from tuberculosis to AIDS to the Novel Coronavirus, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "illness"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "illness": the relationship between illness on the one hand, and the politics of body, gender, and class on the other; we ask how infectious disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "illness" such as infectious cannibalism and fin-de-siècle "viruses," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan). Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.
Class Format: All regular course meetings will be conducted in person.

Requirements/Evaluation: Evaluation will be based on 1) ACTiVE in-class discussion; 2) Publishing GLOW Discussion posts based on reading (Graded as Complete or Incomplete); 3) three short papers (3-5 pages); 4) the final project (including an abstract, a presentation, and a paper or other form of project).

Prerequisites: None; no knowledge of Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Comp majors; Asian Studies Concentration; WSGG majors; and then to first-year students

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 254 (D1) CHIN 253 (D1) WGSS 255 (D2)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social stigma as well as the dynamics of unequal power by means of closely reading "illness" in 20th and 21st century China. We will exam how "illness" is sometimes gendered and politicized; how "illness", in other times, empowers individuals and bonds underrepresented minorities. Illness, as a seemingly universal human experience, tells diverse stories of (in)difference, (dis)power, and (un)equity.

CHIN 272 (S) The History and Mythology of Chinese Scripts

Cross-listings: STS 272 CHIN 272 COMP 272

Primary Cross-listing

Written scripts using what are most often called “Chinese characters” have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

CHIN 312  (F) Introduction to Classical Chinese
This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and
aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages

Enrollment Limit: 40

Enrollment Preferences: Students who have completed CHIN 202 or have extensive reading knowledge of Chinese characters through other languages

CHIN 413 (S) Intermediate Classical Chinese: Ideas of Authority in Classical Chinese Literature
This course builds on the foundation established in Introduction to Classical Chinese (CHIN 412) by examining longer and more complicated texts from the Warring States (403-221 BCE) and Han (206 BCE-220 CE) periods. While our focus will be on careful linguistic analysis and translation, we will also discuss these texts in terms of their philosophical ideas, rhetorical methods, and cultural and historical contexts. The works we will read include some of the foundational texts of Chinese philosophical and political thought, including the Confucian Analects, the Mencius, and the Zhuangzi. While this course is a continuation of Chinese 312, students with prior work in Classical Chinese (through study abroad, attending high school in a Chinese speaking region, etc.) are welcome as well.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 312 or prior coursework in Classical Chinese

Enrollment Limit: none

Enrollment Preferences: none

CHIN 420 (S) Masterpieces in Modern Chinese Literature
"To modernize the Chinese people, it has to start from the modernization of the genre 'novel.'" Liang Qichao, the famous Chinese intellectual in the early twentieth century, envisioned a collapsing China to be salvaged by, first, its modernized literature. Indeed, throughout China's long century of struggle, exploration, and transformation, literature has been playing a crucial role in negotiating (the consequence of) modernity, fueling revolution, investigating human interiority, constructing national identity, and coping with trauma and diaspora. This course introduces students to the masterpieces in modern Chinese literature and their representations of critical events in twentieth-century Chinese history. In this course, we will focus on the genre "novel" and pay close attention to the language and literary devices that the authors use for storytelling, characterization, and self-representation. The class is organized by themes, such as, for example, modernity, revolution, diaspora, root-seeking, trauma, science fiction and so on. Through class discussions, writing assignments, and oral presentation on the final project, this course will further develop students' language proficiency, especially reading ability and effective communication in a formal setting. This course also trains students to be a critical reader who will be able to not only analyze the key moments and literary masterworks of modern China but also reflect on the complexity of Chinese culture vis-à-vis its tradition and the global context. The course is conducted in Mandarin.

Class Format: discussion

Requirements/Evaluation: participation, presentations, quizzes, discussion questions posting, 3 writing assignments, final project

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option
Once nicknamed as "Paris of the East," Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China's modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a "paradise of ghetto" that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are "modernity" and "regional identity." We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). The course is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST 122 and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students' schedules.

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Prerequisites: none for students taking ASST 122; CHIN 402 or permission of the instructor for students taking CHIN 422

Enrollment Limit: 10

Enrollment Preferences: current or prospective Asian Studies, Chinese, or Japanese majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

CHIN 423 (F) A Century of Romance: Emotional Life in Modern Chinese Literature and Visual Culture
The modernization of the Chinese nation is accompanied by revolutionary changes in Chinese people's understanding of their domestic world. Through readings of literary and visual productions, this course introduces students to the modern Chinese conceptualizations of sexuality, love, and family life at varying historical stages. With emotional feelings and experiences at its thematic center, the course is mainly organized by genre and form, the purpose of which is twofold: one, to help students understand comprehensively how the private life of modern Chinese has been intertwined with the grand history of a nation-state; two, to develop students' language proficiency through the study of different literary genres and visual forms. We will read literary and visual representations of, for instance, the transforming family structures in the revolutionary years, romantic experiences during the socialist construction, and gender relations in the reform era. We will, through exercises of translation, interpretation, and creative imitation, get ourselves more familiar with genres including but not limited to poems, short stories, correspondence, diaries, critical essays, song lyrics, play scripts, etc. The course is conducted in Mandarin, but some bilingual materials are also involved for translation and interpretation purposes.
CHIN 424  (S) Navigating across Cities: Space, Materials, and (Wo)Men in the Sinophone World
This course focuses on the theme of urban modernity in Sinophone world, namely, Chinese-speaking districts and regions including but not limited to PRC China. Through the lens of literary and multi-media productions such as fictional writings, films, TV programs, newspaper reports and columns, stage performance, and art exhibitions that are created among various Chinese-speaking communities in and about the urban settings---Beijing, Shanghai, Chengdu, Hong Kong, Taipei, cities in other Asian countries as well as those in the United States---this course expects to discuss the representations of space, materials, and people that are connected to and by such a language called "Chinese" in its broadest, most complicated, and, in some cases, controversial sense. What is Chinese(s)? What is Chinese culture(s)? What roles does Chinese language play in urban productions? How is space and material experienced through a particular language and language culture? These are some of the questions we will explore in the course. The classes are conducted with a combination of seminars, semi-tutorial writing workshops, oral presentations, and field trips (contingent upon available events). All materials for discussion are in Chinese.

Class Format: all materials for discussion are in Chinese

Requirements/Evaluation: several papers; oral presentation
Prerequisites: none

CHIN 425  (F) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan
A small island in East Asia and home to 23 million people, Taiwan is the largest economy that is not a member of the United Nations. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. In this course, we will examine some of the signal examples of these experiences that define the Taiwan society that it is today through literary works and films, as well as journalistic and academic articles. By way of group discussions and individual projects, students will acquire domain-specific vocabulary and develop abilities to analyze and discuss in Mandarin complex ideas related to the aforementioned issues. Using a semi-tutorial format and collaborating with a graduate program in Chinese pedagogy in Taiwan, this course is designed to provide opportunities for Williams students to engage in direct conversation with a language partner on course assignments and for the MA students in Taiwan to gain practical training in helping non-native speakers of Mandarin Chinese develop linguistic proficiency at the levels of Advanced Low to the Advanced Mid based on the ACTFL proficiency guidelines.

Class Format: semi-tutorial format, students will meet as a large group periodically for linguistic development and two to three people groups regularly for discussions

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3 pages) and one final paper (5 pages)
Prerequisites: CHIN 402 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: seniors and Chinese majors; email the instructor
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

CHIN 427 (S) Spring Grass: A Peek into Inequality in China (DPE) (WS)
Cross-listings: ASIA 127 WGSS 127 CHIN 427 ASST 127
Primary Cross-listing

Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, films, and short stories depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Class Format: remote instruction
Requirements/Evaluation: active participation in tutorial meetings, five 4-5 page tutorial papers, five 2-page critiques, online writing portfolio as the final project.
Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.
Enrollment Limit: 10
Enrollment Preferences: Enrollment priorities will be given to freshmen and sophomores who register under ASST or WGSS, and to Chinese language learners who register under CHIN.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: books and course packet.
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 127 (D1) WGSS 127 (D2) CHIN 427 (D1) ASST 127 (D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students' first drafts and students are required to turn in a revised version. At the end of the semester, students will compile an online writing portfolio to include their best works.
Difference, Power, and Equity Notes: The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.
CHIN 428 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films  (DPE) (WS)

Cross-listings: ASIA 228 COMP 297 CHIN 428

Primary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228 (D1) COMP 297 (D1) CHIN 428 (D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

**CHIN 497 (F) Independent Study: Chinese**

For students who have completed Chinese 402 and Chinese 412 or equivalent. Interested students must contact the Coordinator of the Chinese Program one semester in advance and present a proposal to the Coordinator or the professor with whom they wish to study during pre-registration week.

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

Fall 2021

IND Section: 01  TBA  Li Yu

**CHIN 498 (S) Independent Study: Chinese**

For students who have completed Chinese 402 and Chinese 412 or equivalent. Interested students must contact the Coordinator of the Chinese Program one semester in advance and present a proposal to the Coordinator or the professor with whom they wish to study during pre-registration week.

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

Spring 2022

IND Section: 01  TBA  Li Yu

---

**Winter Study**

**CHIN 31 (W) Senior Thesis: Chinese**

To be taken by all students who are candidates for honors in Chinese.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*

---

**CHIN 88 (W) Chinese Sustaining Program**

Students registered for CHIN 101-102 are required to attend and pass the Chinese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

**Requirements/Evaluation:** regular attendance and active participation

**Prerequisites:** Chinese 101

**Grading:** pass/fail option only

**Materials/Lab Fee:** one Xerox packet

*Not offered current academic year*
CHIN 99 (W) Independent Study: Chinese

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

• Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.

• Read and analyze basic texts written in Classical Chinese.

• Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.

• Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.

• Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.

• Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take approved electives related to Chinese language and culture (including additional CHIN core electives, additional Asian language courses, or Chinese studies courses offered in art, comparative literature, history, music, political science, religion, etc.) to replace the language course requirement. Potential electives can be found under the course listings for the program in Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for the program in Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).
Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for the program in Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

PLACEMENT TEST

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their studies of these languages at the college should take a placement test before they pre-register for a language course. Students who wish to take the Chinese placement test can self-enroll in a GLOW course at https://glow.williams.edu/enroll/JTHENA. Students who wish to take the Japanese placement test should contact the Japanese Coordinator.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

COVID-19 CHANGES

Due to the pandemic, the department has reduced the number of courses required for its majors for the graduating classes of ’21, ’22, and ’23. For these years, the minimum requirements are nine courses as follows:

Chinese major: CHIN 101, 102, 201, 202, 301, 302, 401, 402, 312.
Japanese major: JAPN 101, 102, 202, 301, 302, 401, 402, one approved elective.

East Asian Languages and Cultures major: at least six CHIN/JAPN language courses (or a minimum proficiency equivalent to the completion of 302), two CHIN/JAPN core electives, and one approved elective.

Students with higher language proficiency who are placed out of any of the core language courses (101 through 402) can take an equal number of faculty-approved electives taught either in Chinese/Japanese or in English on literature, linguistics, culture studies or related Chinese or Japanese studies disciplines (e.g., art history, history, political science) to fulfill the core language requirement.

Students who plan to study abroad either during the summer or during their junior year MUST consult with department faculty for advice.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—either for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Grants for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

- “DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):

JAPN 101  (F)  Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer–assisted learning materials will be used extensively. Classes consist of a combination of “act” classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and “fact” classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily classroom performance, homework, quizzes, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

Distributions: (D1)

Fall 2021

LEC Section: 01    TR 11:20 am - 12:35 pm
CON Section: 02    MWF 11:50 am - 11:50 am
CON Section: 03    MWF 12:00 pm - 12:50 pm
JAPN 102 (S) Elementary Japanese
An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used to facilitate learning. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: daily classroom performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 101
Enrollment Limit: 20
Enrollment Preferences: none
Expected Class Size: 18
Grading: yes pass/fail option, no fifth course option
Unit Notes: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (JAPN 101 and 102) are taken
Distributions: (D1)

Spring 2022
LEC Section: 01 TR 11:20 am - 12:35 pm
CON Section: 02 MWF 9:00 am - 9:50 am
CON Section: 03 MWF 10:00 am - 10:50 am

JAPN 131 (F) Introduction to Japanese Linguistics
This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam
Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: Linguistics
Not offered current academic year

JAPN 201 (F) Intermediate Japanese
This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.
Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 101-102 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Fall 2021

LEC Section: 01    TR 9:55 am - 11:10 am    Eun Young  Seong
CON Section: 02    MWF 9:00 am - 9:50 am    Eun Young  Seong
CON Section: 03    MWF 10:00 am - 10:50 am    Eun Young  Seong

JAPN 202  (S)  Intermediate Japanese
This course is a continuation of Japanese 201, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 201 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: none

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

JAPN 220  (S)  Being Korean in Japan  (DPE)
Cross-listings: JAPN 220 ASST 220 ASIA 220

Primary Cross-listing
Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

Requirements/Evaluation: attendance/participation; short written responses; midterm essay; group presentation; final essay

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to Asian Studies and Japanese majors

Expected Class Size: 16
JAPN 223  (S)  Japanese Food Culture in a Global Context

Cross-listings: JAPN 223 COMP 223

Primary Cross-listing

The burgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

Requirements/Evaluation: active class participation, three response papers, two small projects (including descriptions and class presentations), and one research paper and presentation

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 223 (D1) COMP 223 (D1)

Not offered current academic year

JAPN 240  (S)  Toward Healing Trauma in Japanese and Korean Cinema

Cross-listings: JAPN 240 ASIA 240

Primary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of national trauma. We will explore cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition—from imperial/colonial to post-imperial/post-colonial periods. Japanese and Korean films follow a similar yet different trajectory in dealing with contentious issues that have left deep scars in society. We will analyze how Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma in both countries. In doing so, we will discover the meaning of cultural confrontation in the process of healing and reconciliation among the members of society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
JAPN 258 (S) Language and Literacy Development

Cross-listings: PSYC 258 JAPN 258

Primary Cross-listing
Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

JAPN 260 (F) Japanese Theatre and its Contemporary Context

Cross-listings: THEA 262 COMP 262 JAPN 260

Primary Cross-listing
Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (noh, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: discussion

Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper

JAPN 406 (F) Advanced Japanese: JLPT 1, 2 or 3
This course is for advanced students, especially for those who would aim to pass Level 1, 2, or 3 of the Japanese Language Proficiency Test (JLPT) offered by the Japan Foundation and Japan Educational Exchanges and Services. JLPT not only measures examinees' skill level, but has been used
as a form of qualification, and also often for employment screening and evaluation. Students will work on all five areas of chôkai (listening comprehension), dokkai (reading comprehension), bunpô (grammar), goi (vocabulary) and kanji, based on their skill level.

**Requirements/Evaluation:** daily preparation and in-class performance, a weekly journal, and taking the JLPT exam suited to your level in December

**Prerequisites:** any one of Japanese 300- or 400-level courses or permission of instructor

**Enrollment Limit:** 5

**Expected Class Size:** 4

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

JAPN 407 (F) An Exploration of Japanese Language and Culture

**Cross-listings:** JAPN 407 ASIA 207 ASST 207

**Primary Cross-listing**

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

**Requirements/Evaluation:** attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

**Prerequisites:** none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective Japanese, Chinese, and Asian Studies majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

**Distributions:** (D1)

Winter Study ---------------------------------------------------------------

JAPN 31 (W) Senior Thesis: Japanese
To be taken by all students who are candidates for honors in Japanese.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year

JAPN 88 (W) Japanese Sustaining Program
Students registered for JAPN 101-102 are required to attend and pass the Japanese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.
Requirements/Evaluation: regular attendance and active participation
Prerequisites: Japanese 101
Grading: pass/fail option only
Materials/Lab Fee: one Xerox packet
Not offered current academic year
JAPN 99 (W) Independent Study: Japanese

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Program in Asian Studies
(Div I & II)

**Chair:** Eiko Maruko Siniawer, Class of 1955 Memorial Professor of History

**Advisory Committee:**
- Sarah Allen, Chair and Associate Professor of Comparative Literature
- George Crane Edward S. Greenbaum 1910 Professor of Political Science; on leave Fall 2021
- Kim Gutschow, Lecturer in Religion and Anthropology/Sociology
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese
- Aparna Kapadia, Associate Professor of History; on leave 2021-22
- Cornelius C. Kubler, Stanfield Professor of Asian Studies
- Christopher Nugent, Professor of Chinese
- Annie Reinhardt, Professor of History; on leave Fall 2021
- Eiko Maruko Siniawer, Class of 1955 Memorial Professor of History
- Li Yu, Professor of Chinese

The interdisciplinary Program in Asian Studies invites students to explore the vast and diverse area that is Asia through individually designed concentrations that can include coursework in anthropology, art, history, language, performance, political science, religion, and literature.

Students will have the opportunity to:
- Gain knowledge about the societies and cultures of Asia.
- Appreciate the diversity in, connections among, and interactions between, different regions of Asia.
- Develop in-depth knowledge of a particular aspect of Asia—thematically, disciplinarily, or geographically.
- Understand how "Asia" and "Asian Studies" have been constituted.
- Hone skills in research or creative endeavor.

**CONCENTRATION REQUIREMENTS**

The concentration is composed of six courses:
- one (1) required course: ASIA 210. This course draws upon interdisciplinary work from the humanities and social sciences that critically investigates how "Asia" and "Asian Studies" have been conceived and, in the case of "Asian Studies," practiced as a field of inquiry. Ideally this course would be taken in the sophomore or junior year, after students have taken at least one Asian Studies related course.
- a three (3) course curricular focus, which could center either on a region or country interdisciplinarily (e.g. South Asia via history, anthropology, and art) or on a theme inter-regionally (e.g. Imperialism/Colonialism in Asia; Art and Performance in Asia). Each student would specify a curricular focus in consultation with a faculty advisor.
- two (2) additional courses relating to Asia. These courses may be used to further develop the chosen curricular focus, or to bring greater disciplinary or geographic breadth to the concentration. One or both of these courses may be Asian language courses.
- a research or creative project capstone and symposium. A research paper or performance/exhibit done within one of the courses included in the concentration. (This is not an extra course, but a requirement for a research or performance project as a part of the concentration). Senior concentrators will present their work to a gathering of fellow concentrators and faculty at the Senior Asian Studies Symposium, to be held in the Spring semester of each year. They will be asked to reflect upon how their projects fit into their Asian Studies concentrations, which will give them the opportunity to tie that work into their goals within the concentration and what they have gained from the concentration more broadly.

In order to maximize breadth, among the five classes that comprise the curricular focus and electives at least two (and not necessarily more) different disciplines and at least two regions or countries of Asia (China, Japan, Korea, Taiwan, East Asia, Southeast Asia, South Asia) must be covered.

**STUDY ABROAD**
With permission of the faculty advisor, as many as two courses from a study abroad program may be counted toward the concentration.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your program typically pre-approve courses for concentration credit?
Yes.

What criteria will typically be used/required to determine whether a student may receive concentration credit for a course taken while on study away?
Course title and description, complete syllabus including readings/assignments.

Does your program place restrictions on the number of concentration credits that a student might earn through study away?
Yes, two courses.

Does your program place restrictions on the types of courses that can be awarded credit towards your concentration?
Approved courses only.

Are there specific concentration requirements that cannot be fulfilled while on study away?
Yes. ASIA 210 must be taken at Williams.

Are there specific concentration requirements in your program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take upon return.

HONORS
For students interested in graduating with honors in Asian Studies, a thesis completed over one semester and a Winter is required, above and beyond the six-course concentration. Application for honors would take place in the Spring of a student's Junior year when a proposal would be submitted to the Advisory Committee for approval.

ASIA 103  (S)  East Asian Art  (DPE)

Cross-listings: ASIA 103  ARTH 103

Secondary Cross-listing

This course is an introduction to the history of East Asian art from prehistory to the present with particular emphasis on China, Korea, and Japan. Through thematic units, we look at artworks in their original contexts and consider how cross-cultural exchanges stimulated new interpretations across time and space. We examine a broad range of objects including ritual bronze vessels, Buddhist temples, landscape paintings, woodblock prints, and installations. We also discuss these artworks in relation to other forms of creative expression such as ritual practice, performance, and literature. How is East Asia defined geographically and culturally? How did the exchange of ideas, trade, and travel impact the formation of East Asian art? How do artworks and artifacts help us understand East Asia's past? These fundamental questions guide our discussion. Through this course, you will learn to think critically about shared and diverse human experiences across cultures and historical periods. We will also discuss the historiography of East Asian art and analyze why certain types of objects were historically underrepresented in museum spaces and academic scholarship. Artworks from the Williams College Museum of Art and Special Collections also form an integral part of the course.

Requirements/Evaluation: attendance, class participation, worksheets, visual analysis paper (2-3 pages in length), midterm and non-cumulative final exam, virtual exhibition project and presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Open to all students regardless of major

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 103 (D1) ARTH 103 (D1)
Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity requirement by investigating the ways that migration and cross-cultural exchange shaped artistic developments in East Asia. Students will reflect on the cultural production of diverse peoples and traditions within this geographical region and confront the ways in which historical legacies of imperialism and colonialism continue to shape international relations.

ASIA 107 (S) Arts of South Asia (DPE)
Cross-listings: ASST 107 ASIA 107 ARTH 105

Secondary Cross-listing
South Asia, which includes the modern-day nations of Afghanistan, Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan and Maldives, is often compared to the European continent. Regional societies in the Indian "subcontinent" are as distinct from each other as those of Italy, Germany and France. Similarly, they also differ in their language, dress, diet, rituals and politics. However, parallel to the wealth of diversity, South Asia also demonstrates a rich history of interconnectedness. This complex web of culture, language, religion and politics is best manifested in the arts of the region. How does visual culture reflect regional variations? How does a survey of artistic style and iconography help uncover networks of exchange across South Asia? What role did the arts play in the expression of religious traditions such as Buddhism, Hinduism, Jainism and Islam? With these questions in mind, this course is designed as a survey of the arts of South Asia starting with the height of the Indus Valley Civilization in 2600 BCE and ending in 1857 CE, a date that marks the cessation of independent rule in South Asia. Using the study of architecture, painting, sculpture and textiles, students will learn how to make stylistic and iconographic analyses, while also improving their art historical writing and analytic skills.

Prerequisites: none, open to all students
Enrollment Limit: 25
Enrollment Preferences: First years, sophomores and juniors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ASST 107 (D1) ASIA 107 (D1) ARTH 105 (D1)

Difference, Power, and Equity Notes: In addition to a survey, the course also highlights the conceptual differences between the arts of South Asia and Western constructs of art and culture. The survey will analyze how South Asian art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

ASIA 115 (F) The World of the Mongol Empire (WS)
Cross-listings: HIST 115 ASIA 115 ASST 115

Secondary Cross-listing
By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler's accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

Requirements/Evaluation: active participation in discussion, several short papers, and a final research paper
**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**ASIA 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)**

**Cross-listings:** GBST 117 HIST 117 ASIA 117

**Secondary Cross-listing**

Bombay or Mumbai is India’s foremost urban center and is well known today as a truly global city. It is the heart of India’s commercial life comparable in vibrancy and multiculturalism with the world’s emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India’s most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**ASIA 121 (F) The Two Koreas (WS)**

**Cross-listings:** HIST 121 ASST 121 ASIA 121
Secondary Cross-listing

The two Koreas—North and South—were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War’s last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 121 (D2) ASST 121 (D2) ASIA 121 (D2)

Writing Skills Notes: In this tutorial, students receive substantial feedback from the professor (and from their partner) both in the sessions and in written comments about all aspects of their writing—argumentation, structure, mechanics. Such feedback is offered on five papers (of 5-7 pages in length) that they write over the course of the semester; they can also elect to receive comments on their final, synthetic paper (12-15 pages in length). Significant guidance is also given on the paper-writing process.

ASIA 122 (S) Old Shanghai, New Shanghai

Cross-listings: CHIN 422 ASIA 122 ASST 122

Secondary Cross-listing

Once nicknamed as “Paris of the East,” Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China’s modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a “paradise of ghetto” that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are “modernity” and “regional identity.” We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). The course is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students' schedules.

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Prerequisites: none for students taking ASST 122; CHIN 402 or permission of the instructor for students taking CHIN 422

Enrollment Limit: 10

Enrollment Preferences: current or prospective Asian Studies, Chinese, or Japanese majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 122 and students wishing to take the course in Chinese should register under CHIN 422

ASIA 127 (S) Spring Grass: A Peek into Inequality in China (DPE) (WS)

Cross-listings: ASIA 127 WGSS 127 CHIN 427 ASST 127

Secondary Cross-listing

Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, films, and short stories depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Class Format: remote instruction

Requirements/Evaluation: active participation in tutorial meetings, five 4-5 page tutorial papers, five 2-page critiques, online writing portfolio as the final project.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

Enrollment Limit: 10

Enrollment Preferences: Enrollment priorities will be given to freshmen and sophomores who register under ASST or WGSS, and to Chinese language learners who register under CHIN.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: books and course packet.

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 127 (D1) WGSS 127 (D2) CHIN 427 (D1) ASST 127 (D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed
feedback to students’ first drafts and students are required to turn in a revised version. At the end of the semester, students will compile an online writing portfolio to include their best works.

**Difference, Power, and Equity Notes:** The issue of “inequality,” including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

Not offered current academic year

**ASIA 133 (S) Buddhist Literature**

**Cross-listings:** ENGL 147 ASIA 133 REL 133 ASST 133

**Secondary Cross-listing**

This course introduces students to the diverse literary culture of Buddhist Asia. Through close readings of particular influential Buddhist texts, we will analyze not only what the texts say and mean, but also learn about the "social life" of these texts--i.e., what is the socio-historical context of these texts, who are the intended audience, what is the relationship of these texts with their particular communities, how do these communities engage with their texts, including how texts have been translated, taught, worshipped and ritualized. We will also explore the materiality of these texts, which is as diverse as the languages in which these texts are written. Alongside an exploration of materiality requires that we reflect on what counts as "text". Moreover, by sampling different genres of Buddhist texts (e.g., philosophical, historical, narrative, grammatical, cosmological, astrological, magical), we will discuss what makes them Buddhist and what makes them literary. The Lotus Sutra, the Heart Sutra, the Dhammapada, and Vessantara Jataka are just some of the texts we will study in this course. No prior knowledge about Buddhism is required.

**Requirements/Evaluation:**
- Attendance and active participation 20%
- Short writing assignments 25% (i.e., a one-page, single-space, critical response based on the class reading x 5 total)
- Mid-term exam (in-class: identification terms and short essay) 25%
- Final project and presentation 30% (the final grade includes initial consultation with the instructor regarding topic selection, annotated bibliography, project outline, final presentation, and final written report).

**ASIA 153 (S) Japanese Film**

**Cross-listings:** ASIA 153 ASST 153 COMP 153

**Secondary Cross-listing**

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we'll focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

**Class Format:** This class will have a hybrid format: on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.

**Requirements/Evaluation:** attendance & participation, a few short response assignments, two 5-page papers, in-class test

ASIA 162  (S) Languages of East Asia
Cross-listings: CHIN 162 ANTH 162 ASIA 162 GBST 162

Secondary Cross-listing
An introduction to the three major languages of East Asia: Chinese, Japanese, and Korean. Working with various types of multimedia including audio, video, images, animation, and texts, we'll take up the phonetics, phonology, morphology, and syntax of these three languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic analysis, we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages and dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice
Requirements/Evaluation: six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper
Prerequisites: none (no prior background in linguistics or any Asian language required, open to all students)
Enrollment Limit: 20
Enrollment Preferences: open to all with preference to first-year students and sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Cross-listings: COMP 186 ARTH 586 ASIA 186 ARTH 286

Secondary Cross-listing
The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading
skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

**ASIA 205 (F) Patrons, Rituals, and Living Images in Japanese Buddhism**

**Cross-listings:** ASIA 205  REL 213  ARTH 205

**Secondary Cross-listing**

This course introduces students to Buddhist art and architecture in Japan from its introduction in the sixth century through the present. We focus on the ways different communities—the imperial court, immigrant artists, monks, women, and commoners—employed and venerated Buddhist images for political legitimacy, personal salvation, and worldly benefit. This course also examines how Japanese Buddhist imagery became aestheticized in the early twentieth century and appropriated later in modern and contemporary visual cultures. Some of the topics to be discussed include the reception of continental styles of Buddhist sculpture, the relationship between mandalas and rituals, the role of women in developing Buddhist embroideries, and the Western reappraisal of Zen arts. Students will develop familiarity with the concepts and ideas underlying the production of Buddhist images and will gain foundational skills in analyzing the visual, material, and iconographic qualities of Japanese Buddhist art. For the final project, students will design a digital exhibition focused around one of the topics of the course.

**Requirements/Evaluation:** attendance, class participation, 4 reading and object response papers (2-3 pages), midterm, non-cumulative final exam, and digital exhibition project with an 8-10 minute presentation

**Prerequisites:** none

**Enrollment Limit:** 25

**ASIA 207 (F) An Exploration of Japanese Language and Culture**

**Cross-listings:** JAPN 407  ASIA 207  ASST 207

**Secondary Cross-listing**

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners...
will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

Prerequisites: none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

ASIA 208 (S) The U.S. and Afghanistan: A Post-Mortem (DPE)

Cross-listings: ASIA 208 GBST 208 PSCI 220 ANTH 208 ASST 208

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 25

ASIA 210 (S) Approaches to Asian Studies

Cross-listings: ASIA 210 PSCI 207
Primary Cross-listing

Home to over half of the world's population and to more than twenty of the world's largest cities, Asia has gained global prominence in recent years; the twenty-first century in fact has widely been deemed the 'Asian Century'. But what is Asia? And what does it mean to study this richly diverse region? This seminar will address these questions with the aim of introducing students to important theoretical topics and key concepts that are relevant to the comparative and critical study of Asia. One central concern will be to consider the different ways of understanding "Asia", both in terms of how the term and the region have been historically constituted; another will be to facilitate an understanding some of the salient factors (geography, belief systems, economy and polity)--past and present--that make for Asia's coherence and divergences; a third concern will be to unpack the troubled notions of "East" and "West" and re-center Asia within the newly emerging narratives of global interconnectedness. Beginning with the evolution of the field, this course will equip students with the methodological tools to critically navigate their own specific regional, inter-regional, or interdisciplinary tracks in the Asian Studies concentration.

Requirements/Evaluation: Two short papers (5-6); one longer final paper (10-15); discussion participation.

Prerequisites: At least one prior course related to Asia

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

Requirements/Evaluation: class participation, two short papers, two essays, a midterm and a self-scheduled final exam

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: open to all; preference to History or Asian Studies majors only if overenrolled

ASIA 214 (S) Asian/American Identities in Motion (DPE)

Cross-listings: GBST 214 ASST 214 THEA 216 AMST 213 ASIA 214 DANC 216

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. It will orient students towards "reading" and analyzing live and mediated performances within historical, social, and political frameworks. Students will explore how socio-historical contexts influence the processes through which dance performances are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies, and will engage with issues such as nation formation, race and ethnicity, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include film screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Class Format: This course will be taught in a virtual format and will be remote.

Requirements/Evaluation: reading responses, essays, in-class writing assignments, class participation, and group presentations.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
**Difference, Power, and Equity Notes:** This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance performances and practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

**ASIA 217  (F) Early Modern Japan**

**Cross-listings:** ASIA 217  HIST 217  ASST 217

**Secondary Cross-listing**

Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, response papers, two short papers (5 pages), and a final paper (10 pages) or self-scheduled final exam

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese people from factory workers and farmers to politicians and intellectuals have understood, shaped, and lived the upheavals from the 1850s through the present day. And it will examine how the country of Japan as well as individual Japanese people have defined the identities and meanings of "modern Japan." We will ask why a modernizing revolution emerged out of the ashes of the early modern order; what democracy and its failures wrought; how world war was experienced and what legacies it left in its wake; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual treatises, fiction, films, and oral histories.

**Class Format:** lecture and discussion

**Requirements/Evaluation:** class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** History majors/prospective majors or Asian Studies concentrators/prospective concentrators

ASIA 220  (S) Being Korean in Japan  (DPE)
Cross-listings:  JAPN 220  ASST 220  ASIA 220
Secondary Cross-listing

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

Requirements/Evaluation:  attendance/participation; short written responses; midterm essay; group presentation; final essay
Prerequisites:  none
Enrollment Limit:  16
Enrollment Preferences:  Open to all students, but if over-enrolled, priority will be given to Asian Studies and Japanese majors
Expected Class Size:  16
Grading:  yes pass/fail option,     yes fifth course option
Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 220 (D1) ASST 220 (D1) ASIA 220 (D1)

Difference, Power, and Equity Notes:  This course looks at the dynamics of unequal power in the social marginality of Korean immigrants in Japan. Exploring historical contexts, students will analyze how the ethnic particularity of the Korean minority has engaged with and against Japanese society. Students will also examine how we might associate the minority culture and history with extensive global issues, including the relationships between environmental problems and minorities, wars and women, and imperialism and migration.

ASIA 221  (F) The Making of Modern South Asia: 1750-1950 CE
Cross-listings:  ASST 221  HIST 221  GBST 221  ASIA 221
Secondary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format:  discussion
Requirements/Evaluation:  class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams
ASIA 222  (S) History and Society in India and South Asia: c. 2000 to 1700s CE

Cross-listings:  HIST 220  ASIA 222

Secondary Cross-listing
This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the urban Indus Valley civilization to the end of the Mughal Empire and will address topics such as the origins and development of the caste system and 'Hinduism', society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Requirements/Evaluation:  class participation, response papers and presentation, 2 essays, take-home a mid-term and a final exam

Prerequisites: none; open to all

Enrollment Limit:  40

Enrollment Preferences:  History Majors, and those with demonstrable interest in South Asian history

Expected Class Size:  20-25

ASIA 228  (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films  (DPE) (WS)

Cross-listings:  ASIA 228  COMP 297  CHIN 428

Secondary Cross-listing
What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.
Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228 (D1) COMP 297 (D1) CHIN 428 (D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner’s paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

ASIA 230 Performance Practices of India (DPE)

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors

Expected Class Size: 12

Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism

ASIA 232 (S) Buddhist Economics
Cross-listings: REL 232 ASIA 232 ASST 232

Secondary Cross-listing

Or, "From 'Shark Tank' to 'Monk Cave': Business and Socially Engaged Buddhism". Television shows like Shark Tank, featuring a panel of potential investors who consider propositions from aspiring entrepreneurs, evinces that popular culture values only the making of profit. In such a capitalistic world, who are the "winners" and "losers"? What impact does a business/product have beyond its intended consumer benefits? What is the Buddhist response to business and commerce and its overall effects on individuals, society, and ecology? This course will challenge students to research, analyze, and devise resolutions for real world issues, by having students employ Buddhist solutions informed by concepts such as compassion, interconnectedness, and Socially Engaged Buddhism. Students will scrutinize the related concept of "structural violence". We will look at examples from Bhutan's "Gross Domestic Happiness", Thailand's "Efficiency Economy", China's state-led religious charities under the name of "Humanistic Buddhism", as well as the ordination of trees. This course hopes to prepare students to be critical, rather than merely passive, world citizens, especially in the realm of business, and to be more conscious and aware of their everyday life choices and its impact on every aspect of society.

Requirements/Evaluation: attendance and active participation 20%; experiential exercises 25% (i.e., critical reflection that incorporates class readings with personal experience of the various experiential exercises conducted throughout the term: mainly, a 30-day social-media cleanse, and meditation sessions); Mid-term exam (in-class: identification terms and short essay) 25%; Final project and presentation 30% (the final grade includes initial consultation with the instructor regarding topic selection, annotated bibliography, project outline, final presentation, and final written report)

ASIA 240 (S) Toward Healing Trauma in Japanese and Korean Cinema
Cross-listings: JAPN 240 ASIA 240

Secondary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of national trauma. We will explore cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition--from imperial/colonial to post-imperial/post-colonial periods. Japanese and Korean films follow a similar yet different trajectory in dealing with contentious issues that have left deep scars in society. We will analyze how Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma in both countries. In doing so, we will discover the meaning of cultural confrontation in the process of healing and reconciliation among the members of society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

ASIA 242 (F)(S) The Sacred in South Asia

Cross-listings: ANTH 249 ASIA 242 REL 149

Secondary Cross-listing

Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of 'syncretic' ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

Prerequisites: Interest in the topic!

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 244  (F)  Mind and Persons in Indian Thought

Cross-listings: ASIA 244  PHIL 245  REL 244

Secondary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

Secondary Cross-listing

This tutorial considers India's multiple and intersecting identities, in relation to climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. We examine the intersectional identities that produce solidarity and opposition within landscapes always already structured by power and inequity. How do communal and individual identities such as gender, class, caste, sexuality or religion shape social conflict and ongoing struggles for power in India today? We examine key moments in Indian history that that continue to produce social conflict and fluidity such as Partition, the riots in Gujarat, Hyderabad, and Delhi that have shaped the modern landscape of communal identity, as well as the contested border such as Ladakh as well as Jammu & Kashmir. Our readings will include ethnographic, sociological, historical fiction, and oral history. Students choose their own topics to delve into for final weeks of the semester.

Class Format: Meeting weekly in pairs with tutorial partner to discuss texts and student essays.

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**ASIA 250 (F) Scholars, Saints and Immortals: Virtue Ethics in East Asia**

**Cross-listings:** ASIA 250 REL 250  
**Secondary Cross-listing**

In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from moral paragons--stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others. The fall 2021 iteration of the course will have a special focus with a few additional readings on idealized communities and political "utopias."

**ASIA 253 (F) Love and Death in Modern Japanese Literature and Visual Culture**

**Cross-listings:** ASST 253 ASIA 253 COMP 255  
**Secondary Cross-listing**

Modern Japanese fiction is similar to Western fiction in many ways, but there are intriguing differences concealed within that sameness. This course investigates Japanese culture and compares it with our own, by examining Japanese literature about two universal human experiences--love and death--and asking how Japanese writers inflect these ideas in their work. The course begins with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and that still feature prominently in Japanese popular culture today. From there we move on to a range
of other relationships between love and death, including parental love and sacrifice, martyrdom and love of country, sex and the occult, and romance at an advanced age. We will focus on novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima, as well as contemporary popular fiction by writers like Murakami Haruki and Murakami Ryu. We will also give significant attention to popular visual culture, including puppet theater, comics, animation, and film. The class and the readings are in English.

Class Format: For this hybrid class, on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.

Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project

Prerequisites: none; no familiarity with Japanese language or culture is required

Enrollment Limit: 12

Enrollment Preferences: Students majoring or considering a major in Comparative Literature

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ASIA 254 (S) The End of the World in Japanese Literature and Visual Culture

Cross-listings: COMP 264 ASIA 254 ASST 254

Secondary Cross-listing

From the endemic warfare of the medieval era to the atomic bombing and the violent explosion of technology in the last century, the end of the world is an idea which has occupied a central place in almost every generation of Japanese literature. Paradoxically, the spectacle of destruction has given birth to some of the most beautiful, most moving, and most powerfully thrilling literature in the Japanese tradition. Texts may be drawn from medieval war narratives like The Tale of the Heike; World War II fiction and films by Ibuse Masui, Imamura Shôhei, and Ichikawa Kon; fantasy and science fiction novels by Abe Kôbô, Murakami Haruki and Murakami Ryû; and apocalyptic comics and animation by Oshii Mamoru, Otomo Katsuhiro, and others. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Class Format: discussion

Requirements/Evaluation: in-class exam, ungraded creative project, and a few short response assignments, plus two 5- to 7-page papers emphasizing original, creative readings of the literary texts

Prerequisites: none; open to all

Enrollment Limit: 25

Enrollment Preferences: students majoring or considering a major in a related field

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ASIA 255 (F) Buddhism: Ideas and Practices

Cross-listings: ANTH 255 REL 255 ASIA 255

Secondary Cross-listing
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a wide range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movements, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

Requirements/Evaluation: full attendance and active participation; two essays

ASIA 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE)

Cross-listings: ANTH 256 WGSS 256 REL 256 ASST 256 ASIA 256

Secondary Cross-listing

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and ‘she devils’ alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life--his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

**Cross-listings:** ASIA 266  ASST 266  COMP 266

**Secondary Cross-listing**

Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth-and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; along the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijô, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Kôbô, to documentary and subculture films like The New God and Kamikaze Girls. The class and the readings are in English; no familiarity with Japanese language or culture is required.

**Requirements/Evaluation:** attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project

**Secondary Cross-listing**

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively—be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** A prior class or some experience with meditation is recommended

**Enrollment Limit:** 10

**Enrollment Preferences:** ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

**Expected Class Size:** 10
This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 272 (F) Art of the Noble Path: Buddhist Material Culture Across Asia
Cross-listings: REL 272 ARTH 272 ASIA 272 ASST 272

Secondary Cross-listing
Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion’s social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Requirements/Evaluation: 3 ten-minute quizzes, weekly Glow responses, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 15

Cross-listings: ARTH 273 ASST 273 ASIA 273

Secondary Cross-listing
From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This course will survey the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the survey is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Williams College Museum of Art where students will have the opportunity to study original artworks from the collection.

Requirements/Evaluation: 2 quizzes, 2 short response papers, a final project/paper based on museum objects, 1-hour in-class final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference will be given to Art Majors, and then to students of any major interested in art and culture of Asia

ASIA 278 (F) Buddhist Material Culture: Objects of Practice and Merit

Cross-listings: REL 278 ASIA 278 ASST 278
Secondary Cross-listing
You've heard of the "material girl" (or boy), but what about the material Buddhist? This course encourages students to look beyond modernist ideals of Buddhism as a rational tradition of monks, monasteries and manuscripts, merely advocating mindfulness. In this course, we take Buddhist "stuff" (material culture) seriously. We explore what exactly is material culture, and what makes it Buddhist? If Buddhism is supposed to be a tradition that encourages non-attachment, then what is meant by "Buddhist material culture"? Shouldn't Buddhists be free of material things? Or, rather, who says they have to be? This course offers: (1) an introduction to the core concepts of Buddhism; (2) a brief overview of Material Religion, or the "material turn" in the study of religion; and (3) a preliminary exploration into the vast material- and spiritual worlds of Buddhist Asia, particularly China, Japan, Myanmar, Tibet, and Thailand. We begin by decolonializing Buddhism (think mandala, not only meditation; or ghosts and spirits, not just sutra). Next, we trace religious studies trends that privilege material investigations that acknowledge the agency of not only humans but also the agency of objects/things/stuff, and that emphasizes the dynamics among people, things, and spirits. We learn about these dynamics by looking closely at Buddhist stuff. Things act upon us, and we (re)act upon them. They shape identity, create meaning, and maintain relationships. We will learn that things are never just things. They help us better understand what people do in Buddhism, not just what people believe. This course includes brief experiential components on Buddhist meditation and ritual. No prior experience in meditation or Buddhism is required. This course does not assume any previous background in Buddhism, Religion, Asian Studies, or Art History.

Class Format: This class is remote with a mix of synchronous and asynchronous requirements. Synchronous meetings are limited to once a week for roughly one hour (between 60-75 minutes). Many of our synchronous requirements will feature breakout sessions into small groups for intimate, peer exchanges, followed by discussions with the entire class. A few asynchronous sessions will require community-building with your peers through some form of work exchange or reflection related to the weekly topic.

Requirements/Evaluation: Attendance and active participation 25%; Short writing assignments 25% (one-page, single-space, critical response based on class reading x 4 total); Mid-term exam 25% (identification terms, short essay); Final project and presentation 25% (initial consultation with the instructor regarding topic selection, annotated bibliography and project outline, formal written report (4-5 single-space pages) , presentation, and final reflection)

Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Religion and Asian Studies majors

ASIA 291 (F) Red Chamber Dreams: Reading China's Greatest Novel (WS)

Cross-listings: ASIA 291 COMP 291

Secondary Cross-listing

Since it first began to circulate in manuscript in the mid-eighteenth century, Cao Xueqin's novel Story of the Stone (Shitou ji), also called Dream of the Red Chamber (Honglou meng), has captured the imaginations of readers young and old with its sprawling story of the coming-of-age of members of a wealthy family on the cusp of ruin. As critically acclaimed as it is beloved, Story of the Stone is widely regarded as China's greatest novel due to the intricacy of its narrative, the complexity of its characters, and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. The focus of this tutorial will be reading the 120-chapter novel. Students will have the option to read either in Chinese or English (though papers and class discussion will be in English). We will also read scholarly literature to learn about some of the major critical approaches to the novel, and about its enduring importance in the Chinese literary tradition.

Requirements/Evaluation: Tutorial papers (including revision of selected papers for a final portfolio) and responses.

Prerequisites: None.

ASIA 311 (S) Women and Art in East Asia (DPE)

Cross-listings: ARTH 311 ASIA 311

Secondary Cross-listing

For over a thousand years, women in East Asia profoundly influenced the development of the visual arts, yet their formidable presence remains largely hidden. This seminar explores the critical roles women played as patrons, artists, and collectors of the arts in China, Korea, and Japan. We cover historical periods from the 10th century to the present day and discuss both traditional and nontraditional media including painting, sculpture, photography, and embroidery. Topics include didactic paintings for women in the Song court, calligraphy and painting as gendered modes of expression in Heian period Japan, the revival of Buddhist arts in Korea under the patronage of aristocratic women, and artworks by modern and contemporary artists that contest dominant representations of gender and sexuality. The course does not simply focus on artistic production, but also contextualizes these topics in light of emergent theorizations and readings on femininity, feminism, and the sexual politics of representation. Along with a final research paper, students will generate a substantial Wikipedia entry on a certain aspect of the course to promote the coverage of women and the arts online. No prior knowledge of Asian art history is required or assumed.
Requirements/Evaluation: attendance, class participation and discussion, 5 object or reading response papers (2-3 pages), Wikipedia page editing project and presentation (5-7 minutes long), and 8-10-page final research paper (written in stages over the semester including a 10-15-minute presentation)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History, Asian Studies, Chinese, or Japanese majors, but open to all

ASIA 312  (F)  The Mughal Empire: Power, Art, and Religion in India

Cross-listings:  GBST 312  REL 312  ASIA 312  ASST 312  HIST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

ASIA 314 (F)  Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings:  HIST 314  ARTH 314  ASST 314  ASIA 314

Secondary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

Requirements/Evaluation:  class participation and weekly responses to readings, 4-5 short papers and a final paper

ASIA 317  (F)  The Many Lives of Tokyo  (WS)
Cross-listings:  ASIA 317  HIST 416

Secondary Cross-listing
The city of Tokyo has had many lives from its early modern founding as the shogun’s capital of Edo to its contemporary incarnation as a global megacity. This seminar explores how and why the city has changed--how an unassuming fishing village was transformed over four centuries into a vibrant early modern city of over a million people, the heart of a modern nation and metropole of an expansive empire, an emblem of urban cosmopolitanism, and a sprawling metropolis. Our focus will be on how people have lived, conceived, and shaped Edo/Tokyo. We will consider how different and various people have moved through the city; where and how they have lived, worked, and enjoyed themselves; how they have interacted with the natural and built environments; and how they have expressed their discontents with, and aspirations for, the city. Topics to be examined include: physical expansion, urbanization, and suburbanization; destruction and reconstruction from fires, earthquakes, and war; cultivation of opportunities to consume; and creation of urban popular cultures. The centerpiece of the seminar is the research and writing of a substantial and original paper that delves into a question of interest to you about the history of Tokyo.

Requirements/Evaluation:  class participation, discussion posts, response papers, and a research paper (20-25 pages)
Prerequisites:  none
Enrollment Limit:  15
Enrollment Preferences:  History majors and Asian Studies concentrators
Expected Class Size:  10
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D2)  (WS)

ASIA 319  (F) Gender and the Family in Chinese History  (DPE)

Cross-listings:  WGSS 319  ASST 319  HIST 319  ASIA 319

Secondary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Class Format: Remote in Fall 2020. Emphasis will be on synchronous discussions and small group work via Zoom (or similar).

Requirements/Evaluation: active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper.

Prerequisites: none; open to first year-students with instructors permission

Enrollment Limit: 15

Enrollment Preferences: History, Asian Studies, and WGSS majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 320  (S) Emotions in Modern Japanese History

Cross-listings:  ASIA 320  ASST 320  HIST 320

Secondary Cross-listing

Emotions have been integral to the human experience--to relationships between people, political decision making, economic behavior, individual and communal identities, international affairs, and national projects. This course will consider a full range of emotions including fear, insecurity, pride, anxiety, desire, anger, and happiness. And it will examine these emotions as both actors in history and subjects of historical inquiry. We will ask how emotions have reflected and shaped the making of modern Japan. What role have emotions played in steering the course of Japanese history, from the modernizing revolutions of the late 1800s, imperialism, colonialism, and war, to the navigation of both affluence and economic insecurity in the postwar era? How have emotions been talked about and represented in modern Japan? We will also discuss different ways of researching and writing a history of emotions.

Class Format: remote with synchronous, seminar-style discussion

Requirements/Evaluation: class discussion; response papers; research paper (12-15 pages)
Prerequisites: none; open to first-year students with instructor's permission
Enrollment Limit: 15
Enrollment Preferences: History or Asian Studies majors; prospective majors

ASIA 321 (S) History of U.S.-Japan Relations, 1853-Present (DPE)
Cross-listings: LEAD 321 ASST 321 HIST 321 ASIA 321
Secondary Cross-listing
An unabating tension between conflict and compromise has been an undercurrent of U.S.-Japan relations since the 1850s, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the Difference, Power, and Equity requirement by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other.
Class Format: remote with synchronous, seminar-style discussion
Requirements/Evaluation: class participation, response papers (500 words), one short paper (5 pages), and a research paper (12-15 pages)
Prerequisites: none; open to first-year students with instructors permission
Enrollment Limit: 15
Enrollment Preferences: History or Asian Studies majors/prospective majors
Expected Class Size: 10-15
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
LEAD 321 (D2) ASST 321 (D2) HIST 321 (D2) ASIA 321 (D2)

Difference, Power, and Equity Notes: The course focuses on differences in power (economic, cultural, political, and military) between Japan and the U.S., from the 1850s through the present. It considers the ways in which Japan has been subordinate to the U.S. for much of this history, and the conflicts that have resulted when Japan has attempted to overturn this dynamic of power. Students will acquire the skills of history and international relations to examine how race, culture, and politics have shaped this relationship.

ASIA 342 (S) Monuments and Miniatures: Architecture and Painting in India (WS)
Cross-listings: ASST 342 ASIA 342 ARTH 342
Secondary Cross-listing
This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked
through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

Prerequisites: none, open to all students

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

ASIA 344 (S) Taswirkhana: Technique and Practice of Indian Drawing and Painting (DPE)

Cross-listings: ASST 344 ASIA 344 ARTS 344

Secondary Cross-listing

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

Requirements/Evaluation: Class participation, discussions and critiques, successful completion of all assignments and attendance

Prerequisites: none, open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to studio and art history majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 344 (D1) ASIA 344 (D1) ARTS 344 (D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

ASIA 345 (S) The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings: ASIA 345 PSCI 345 ASST 345
Secondary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yiying, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.

Class Format: The class will be hybrid with both online and in-person sessions.

Requirements/Evaluation: two 5-page papers and one 15-page paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to seniors but all are welcome.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Secondary Cross-listing

East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia's claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees' resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper

Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.

Enrollment Limit: 12

Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.

ASIA 389 (S) The Vietnam Wars (DPE)

Cross-listings: LEAD 389  HIST 389  ASIA 389  ASST 389

Secondary Cross-listing

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Class Format: This course will be fully remote. The course format will prioritize synchronous discussions and small group work via Zoom.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: History and Asian Studies majors

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

**Cross-listings:** GBST 391 ASST 391 ASIA 391 HIST 391

**Secondary Cross-listing**

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Requirements/Evaluation:** class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** history majors and students with demonstrable interest in maritime/Indian Ocean history

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 391 (D2) ASST 391 (D2) ASIA 391 (D2) HIST 391 (D2)

**Writing Skills Notes:** Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

**Difference, Power, and Equity Notes:** This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

**Cross-listings:** LEAD 412 REL 412 ASIA 412 GBST 412 ASST 412 HIST 496 LEAD 322

**Secondary Cross-listing**

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but
also for his deep engagement with aspects of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.

Requirements/Evaluation: 5-7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST 488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST 221. Students who have previously taken HIST 488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 413 (S) History of Taiwan (WS)

Cross-listings: ASIA 413 HIST 481

Secondary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Winter Study

ASIA 99 (W) Independent Study: Asian Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is
approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major (administered jointly with the Physics Department) are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.
THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:

Astronomy 211 Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

STUDY ABROAD

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.
ASTR 101  (F)  Stars: From Suns to Black Holes
For the new era of "multimessenger astronomy" (not only light and its like but also particles from space and gravitational waves): What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? How and what have we found out about the recently gravitational radiation resulting from two giant black holes merging and, with additional signals in the spectrum, from the merger of two neutron stars? What do we learn about the Sun from total solar eclipses? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We pay special attention to recent exciting discoveries, including regular briefings and current emails plus bonus coverage of NASA's Mars2020 to Mars with the participation of Williams alumni/ae. Topics include discoveries with the Hubble Space Telescope, missions to discover planets around other stars, the latest huge telescopes and some results; how astronomers interpret the light received from distant celestial objects; and the Sun as a typical star. We discuss how pulsars and black holes result from the evolution of massive stars and how supermassive black holes lurk in galaxies/quasars. We discuss the discovery of thousands of "exoplanets" around stars other than the Sun, validating our choice of topics. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of and on the same level as Astr 102 (solar system)/104 (galaxies/cosmology); students who have taken those courses are welcome. Observing sessions will include remote use of the telescopes for nighttime observations and daytime observations of the Sun, mainly remotely but with on-campus possibilities. There will be five laboratories, available both in afternoon sessions on campus or remotely.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration, available both in place and remotely. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously.

Requirements/Evaluation:  two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first enrolled

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions:  (D3)

ASTR 102  (S)  Our Solar System and Others
What makes Earth different from all the other planets? What has NASA's Curiosity on Mars found about Mars's past running water and suitability for life? We will follow the February 2021 landing of NASA's Mars2020 with its alumni/ae participation! How has knowledge about Pluto been transformed by NASA's 2015 flyby and the associated ground-based studies with which Williams College faculty and students participate? Will asteroids or comets collide with the Earth again? What is a solar eclipse like? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system, will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless "island universes" in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered "chirp" from gravitational radiation (reported in 2016) resulting from two giant black holes merging, and the "chirp" from two neutron stars merging, also producing light, radio and x-ray radiation, has opened a whole different way of observing the Universe from the traditional use of light and other forms of electromagnetic radiation. We are now therefore in the new era of multimessenger astronomy. Further, the Hubble Space Telescope and the Chandra X-ray Observatory bring exceptionally clear images over a wider range of the spectrum; their images are aiding astronomers to better understand the past and future of the Universe, and new infrared images are expected with the launch of the James Webb Space Telescope. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the Planck spacecraft) and large-scale mapping programs such as the Sloan Digital Sky Survey, the European Space Agency's Gaia, and the Dark Energy Survey. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, explores the answers to questions like: What is the Milky Way? Why are quasars so luminous? Is the Universe made largely of "dark matter" and "dark energy"? What determines the ultimate fate of the Universe? How have studies of Cepheid variables and distant supernovae with the Hubble Space Telescope determine that the Universe is 13.8 billion years old and indicated that the Universe's expansion is accelerating? How significant is the current discrepancy between the age and expansion rate of the Universe as measured from supernova observations as opposed to measurements from the cosmic background radiation? We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration, available both in place and remotely. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, lab reports, and an observing portfolio
Prerequisites: none; not open to students who have taken or are taking ASTR 330
Enrollment Limit: 25
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course
Distributions: (D3)
ASTR 107  (F)  Astrobiology

Cross-listings:  GEOS 107  ASTR 107

Secondary Cross-listing

Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 107 (D3) ASTR 107 (D3)

Attributes: GEOS Group B Electives - Sediments + Life

ASTR 111  (F)  Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes remotely to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio
**Prerequisites:** a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28

**Enrollment Preferences:** potential Astronomy majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

---

**ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)**

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24” telescope and from data archives.

**Class Format:** discussion, computer lab work, and observing

**Requirements/Evaluation:** weekly problem sets, lab work, and observing projects

**Prerequisites:** MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

**Enrollment Limit:** 14

**Enrollment Preferences:** Astronomy or Astrophysics majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

LAB Section: 03  R 1:00 pm - 4:00 pm  Kevin Flaherty

---

**ASTR 217 (S) Planets and Moons**

**Cross-listings:** ASTR 217  GEOS 217

**Secondary Cross-listing**

This course examines the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises. This course is in the Solid Earth group for the Geosciences major.

**Requirements/Evaluation:** Periodic short quizzes, reading journal, lab exercises, class participation
**Prerequisites:** any 100-level GEOS or any 100-level ASTR course, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Geosciences majors, Astronomy/Astrophysics majors, and sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 217 (D3) GEOS 217 (D3)

**Attributes:** GEOS Group C Electives - Solid Earth

*Not offered current academic year*

**ASTR 240 (F) Great Astronomers and Their Original Publications (WS)**

**Cross-listings:** ASTR 240 STS 240 HSCI 240 LEAD 240

**Primary Cross-listing**

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams's Chapin Library of rare books, and facsimiles or digital copies will be provided for remote learning. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the *Gutenberg Bible* (c. 1450) and a Shakespeare *First Folio* (1623, with a discussion of astronomical references in Shakespeare's plays). We evaluate a trove of books and papers about historic transits of Venus. We discuss matters of fraud and authenticity, especially the case of a purported *Sidereus Nuncius*, shown to be a modern construction. The course will be taught in collaboration between an astronomer and a rare books librarian, with remote lectures by experts from around the world.

**Class Format:** Meeting on campus in the Chapin Library classroom (Sawyer 452) or remotely; students who are not on campus can visit the original books at a later time/year.

**Requirements/Evaluation:** class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** if overenrolled, preference by written paragraph of explanation of why student wants to take the course

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 240 (D3) STS 240 (D2) HSCI 240 (D3) LEAD 240 (D3)

**Writing Skills Notes:** Comments on submitted papers will aid in writing skills

**Attributes:** LEAD Facets or Domains of Leadership

*Not offered current academic year*

**ASTR 317 (S) Current topics in Planetary Geology (WS)**

**Cross-listings:** GEOS 317 ASTR 317
Secondary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth’s moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.

Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences and Astronomy majors and prospective majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 317 (D3) ASTR 317 (D3)

Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

Attributes: GEOS Group C Electives - Solid Earth

Not offered current academic year

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.

Class Format: This is a remote course. Synchronous lectures and break-out discussions will take place during the scheduled class time. These lectures may be recorded for the benefit of students in substantially different time zones; these students will then schedule a separate small-group discussion time in consultation with the professor. Remote observing sessions will occur throughout the semester.

Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

Not offered current academic year

ASTR 336 (S) Science, Pseudoscience, and the Two Cultures

Cross-listings: LEAD 336 ASTR 336 HSCI 336
Primary Cross-listing

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Requirements/Evaluation:  biweekly 5-page papers, participation in discussions, and a 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: non-major course; does not count toward ASPH, ASTR or PHYS major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 336 (D3) ASTR 336 (D3) HSCI 336 (D2)

Not offered current academic year

ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)

The matter between the stars--the interstellar medium--tells the story of the past and future evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using remote observations and archival data.

Class Format: Tutorial meetings will be scheduled with the professor. Meetings may be held in-person, subject to classroom availability, or remotely. Students will also complete observing projects by controlling telescopes remotely and analyzing observations in astronomical databases.

Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Not offered current academic year

ASTR 404 (S) Unsolved Problems in Galaxy Evolution
In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets
Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Spring 2022
TUT Section: T1 TBA Anne Jaskot

ASTR 412 (F) Heliophysics
Cross-listings: ASTR 412 PHYS 412
Primary Cross-listing

We study all aspects of the Sun, our nearest star. In addition to discussing our observations of recent eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun WATCHer (SWAP), and Hinode (Sunrise), and the newer GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from spacecraft. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent “chirp” of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We also discuss transits of Mercury across the face of the Sun, most recently on November 11, 2019. We highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble Space Telescope. We discuss plans for observing future total solar eclipses, including those of December 4, 2021, near or over Antarctica; October 23, 2023, in northwestern Australia; and April 8, 2024, over Mexico and a U.S. path from Texas to northern New England.

Requirements/Evaluation: biweekly tutorial presentations; biweekly response to colleagues' presentations
Prerequisites: ASTR 111 or a 200-level Physics course; or permission of the instructor
Enrollment Limit: 10
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
**ASTR 493 (F) Senior Research: Astronomy**

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).

**Prerequisites:** permission of department

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

---

**ASTR 494 (S) Senior Research: Astronomy**

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).

**Prerequisites:** permission of department

**Grading:** no pass/fail option, no fifth course option

Winter Study  -------------------------------------------------------------

ASTR 31 (W) Senior Research: Astronomy
To be taken by students registered for Astronomy 493, 494.
Grading: pass/fail only
Not offered current academic year

ASTR 32 (W) Senior Research: Astrophysics
Cross-listings: ASTR 32 PHYS 32
Primary Cross-listing
To be taken by students registered for Astrophysics 495, 496.
Class Format: independent study
Grading: pass/fail only
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 32 PHYS 32
Not offered current academic year

ASTR 99 (W) Independent Study: Astronomy or Astrophysics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Grading: pass/fail only
Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major (administered jointly with the Physics Department) are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.
THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics/Mathematics 210 Mathematical Methods for Scientists
- Physics 301 Introductory Quantum Physics
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus
- Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:
  - Astronomy 211 Astronomical Observing and Data Analysis
  - Physics 302 Statistical Physics
  - Physics 402T Applications of Quantum Mechanics
  - Physics 405T Electromagnetic Theory
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

**THE DEGREE WITH HONORS IN ASTROPHYSICS**

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

**STUDY ABROAD**

**FAQ**

- **Can your department or program typically pre-approve courses for major/concentration credit?**
  
  Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

- **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**
  
  Course title and description, and complete syllabus including readings/assignments.

- **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**
  
  No.

- **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**
  
  No.

- **Are there specific major requirements that cannot be fulfilled while on study away?**
  
  No.

- **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**
  
  Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

- **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**
  
  None to date.
ASTR 101 (F) Stars: From Suns to Black Holes
For the new era of "multimessenger astronomy" (not only light and its like but also particles from space and gravitational waves): What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? How and what have we found out about the recently gravitational radiation resulting from two giant black holes merging and, with additional signals in the spectrum, from the merger of two neutron stars? What do we learn about the Sun from total solar eclipses? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We pay special attention to recent exciting discoveries, including regular briefings and current emails plus bonus coverage of NASA's Mars2020 to Mars with the participation of Williams alumni/ae. Topics include discoveries with the Hubble Space Telescope, missions to discover planets around other stars, the latest huge telescopes and some results; how astronomers interpret the light received from distant celestial objects; and the Sun as a typical star. We discuss how pulsars and black holes result from the evolution of massive stars and how supermassive black holes lurk in galaxies/quasars. We discuss the discovery of thousands of "exoplanets" around stars other than the Sun, validating our choice of topics. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of and on the same level as Astr 102 (solar system)/104 (galaxies/cosmology); students who have taken those courses are welcome. Observing sessions will include remote use of the telescopes for nighttime observations and daytime observations of the Sun, mainly remotely but with on-campus possibilities. There will be five laboratories, available both in afternoon sessions on campus or remotely.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration, available both in place and remotely. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first enrolled

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

Fall 2021
LEC Section: 01 TR 9:55 am - 11:10 am Jay M. Pasachoff, Kevin Flaherty
LAB Section: 02 T 1:00 pm - 2:30 pm Kevin Flaherty
LAB Section: 03 T 2:30 pm - 4:00 pm Kevin Flaherty
LAB Section: 04 W 1:00 pm - 2:30 pm Kevin Flaherty
LAB Section: 05 W 2:30 pm - 4:00 pm Kevin Flaherty

ASTR 102 (S) Our Solar System and Others
What makes Earth different from all the other planets? What has NASA's Curiosity on Mars found about Mars's past running water and suitability for life? We will follow the February 2021 landing of NASA's Mars2020 with its alumni/ae participation! How has knowledge about Pluto been transformed by NASA's 2015 flyby and the associated ground-based studies with which Williams College faculty and students participate? Will asteroids or comets collide with the Earth again? What is a solar eclipse like? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system, will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and...
a planetarium demonstration. A planetarium demonstration will also take place, available both in place and remotely. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first enrolled

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

ASTR 104 (S) The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless "island universes" in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered "chirp" from gravitational radiation (reported in 2016) resulting from two giant black holes merging, and the "chirp" from two neutron stars merging, also producing light, radio and x-ray radiation, has opened a whole different way of observing the Universe from the traditional use of light and other forms of electromagnetic radiation. We are now therefore in the new era of multimessenger astronomy. Further, the Hubble Space Telescope and the Chandra X-ray Observatory bring exceptionally clear images over a wider range of the spectrum; their images are aiding astronomers to better understand the past and future of the Universe, and new infrared images are expected with the launch of the James Webb Space Telescope. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the Planck spacecraft) and large-scale mapping programs such as the Sloan Digital Sky Survey, the European Space Agency's Gaia, and the Dark Energy Survey. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, explores the answers to questions like: What is the Milky Way?; Why are quasars so luminous?; Is the Universe made largely of "dark matter" and "dark energy"?; What determines the ultimate fate of the Universe? How have studies of Cepheid variables and distant supernovae with the Hubble Space Telescope determine that the Universe is 13.8 billion years old and indicated that the Universe's expansion is accelerating? How significant is the current discrepancy between the age and expansion rate of the Universe as measured from supernova observations as opposed to measurements from the cosmic background radiation? We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration, available both in place and remotely. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. This course is also available asynchronously. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: none; not open to students who have taken or are taking ASTR 330

Enrollment Limit: 25

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)
ASTR 107  (F)  Astrobiology

Cross-listings: GEOS 107  ASTR 107

Secondary Cross-listing

Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

ASTR 111  (F)  Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes remotely to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio
Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2021

LEC Section: 01 TR 11:20 am - 12:35 pm Marek Demianski, Kevin Flaherty
LAB Section: 02 M 1:00 pm - 4:00 pm Kevin Flaherty
LAB Section: 03 R 1:00 pm - 4:00 pm Kevin Flaherty

ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)
How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2022

LEC Section: 01 MR 1:10 pm - 2:25 pm Anne Jaskot, Kevin Flaherty
LAB Section: 02 W 1:10 pm - 3:50 pm Kevin Flaherty

ASTR 217 (S) Planets and Moons

Cross-listings: ASTR 217 GEOS 217

Secondary Cross-listing
This course examines the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: Periodic short quizzes, reading journal, lab exercises, class participation
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 217 (D3) GEOS 217 (D3)

Attributes: GEOS Group C Electives - Solid Earth
Not offered current academic year

ASTR 240 (F) Great Astronomers and Their Original Publications (WS)

Cross-listings: ASTR 240 STS 240 HSCI 240 LEAD 240

Primary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams's Chapin Library of rare books, and facsimiles or digital copies will be provided for remote learning. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1450) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). We evaluate a trove of books and papers about historic transits of Venus. We discuss matters of fraud and authenticity, especially the case of a purported Sidereus Nuncius, shown to be a modern construction. The course will be taught in collaboration between an astronomer and a rare books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452) or remotely; students who are not on campus can visit the original books at a later time/year.

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 240 (D3) STS 240 (D2) HSCI 240 (D3) LEAD 240 (D3)

Writing Skills Notes: Comments on submitted papers will aid in writing skills

Attributes: LEAD Facets or Domains of Leadership

Not offered current academic year

ASTR 317 (S) Current topics in Planetary Geology (WS)

Cross-listings: GEOS 317 ASTR 317
Secondary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth’s moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.

Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences and Astronomy majors and prospective majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 317 (D3) ASTR 317 (D3)

Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

Attributes: GEOS Group C Electives - Solid Earth

Not offered current academic year

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.

Class Format: This is a remote course. Synchronous lectures and break-out discussions will take place during the scheduled class time. These lectures may be recorded for the benefit of students in substantially different time zones; these students will then schedule a separate small-group discussion time in consultation with the professor. Remote observing sessions will occur throughout the semester.

Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

Not offered current academic year

ASTR 336 (S) Science, Pseudoscience, and the Two Cultures

Cross-listings: LEAD 336  ASTR 336  HSCI 336

Cross-listing
A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

**Requirements/Evaluation:** biweekly 5-page papers, participation in discussions, and a 15-page final paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** juniors and seniors and to those with backgrounds in science, history of science, or philosophy

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** non-major course; does not count toward ASPH, ASTR or PHYS major

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 336 (D3) ASTR 336 (D3) HSCI 336 (D2)

Not offered current academic year

**ASTR 402 (S) Between the Stars: The Interstellar Medium** (QFR)

The matter between the stars--the interstellar medium--tells the story of the past and future evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using remote observations and archival data.

**Class Format:** Tutorial meetings will be scheduled with the professor. Meetings may be held in-person, subject to classroom availability, or remotely. Students will also complete observing projects by controlling telescopes remotely and analyzing observations in astronomical databases.

**Requirements/Evaluation:** weekly problem sets, 10-page final paper, and observing projects

**Prerequisites:** ASTR 111 and PHYS 201 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** 6
**Grading:**  no pass/fail option,     no fifth course option  
**Distributions:**  (D3)  (QFR)  

**Quantitative/Formal Reasoning Notes:** In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.  

Not offered current academic year  

**ASTR 404  (S) Unsolved Problems in Galaxy Evolution**

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.  

**Requirements/Evaluation:** student's papers, responses to the partner's papers, and problem sets  

**Prerequisites:** ASTR 111 and PHYS 142 or 151 or permission of instructor  

**Enrollment Limit:** 10  

**Enrollment Preferences:** Juniors and Seniors  

**Expected Class Size:** 6  

**Grading:**  no pass/fail option,     no fifth course option  
**Distributions:**  (D3)  

Spring 2022  
TUT Section: T1    TBA     Anne Jaskot  

**ASTR 412  (F) Heliophysics**

**Cross-listings:** ASTR 412  PHYS 412  

**Primary Cross-listing**

We study all aspects of the Sun, our nearest star. In addition to discussing our observations of recent eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the newer GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from spacecraft. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent “chirp” of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We also discuss transits of Mercury across the face of the Sun, most recently on November 11, 2019. We highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble Space Telescope. We discuss plans for observing future total solar eclipses, including those of December 4, 2021, near or over Antarctica; October 23, 2023, in northwestern Australia; and April 8, 2024, over Mexico and a U.S. path from Texas to northern New England.  

**Requirements/Evaluation:** biweekly tutorial presentations; biweekly response to colleagues’ presentations  

**Prerequisites:** ASTR 111 or a 200-level Physics course; or permission of the instructor  

**Enrollment Limit:** 10  

**Expected Class Size:** 10  

**Grading:**  no pass/fail option,     no fifth course option  
**Distributions:**  (D3)  

This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 493  (F)  Senior Research: Astronomy
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).

ASTR 499 (F)(S) Physics and Astronomy Colloquium
Cross-listings: PHYS 499 ASTR 499

Secondary Cross-listing
Physicists and Astronomers from around the country come to explain their research. Students of Physics and Astronomy at any level are welcome. Registration is not necessary to attend. A non-credit course.

Class Format: colloquium
Requirements/Evaluation: not a for-credit course
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Grading: non-graded

Unit Notes: registration not necessary to attend
Distributions: No divisional credit

This course is cross-listed and the prefixes carry the following divisional credit:
Winter Study -----------------------------------------------------------------------------------------------

ASTR 31 (W) Senior Research: Astronomy
To be taken by students registered for Astronomy 493, 494.
Grading: pass/fail only
Not offered current academic year

ASTR 32 (W) Senior Research: Astrophysics
Cross-listings: ASTR 32 PHYS 32
Primary Cross-listing
To be taken by students registered for Astrophysics 495, 496.
Class Format: independent study
Grading: pass/fail only
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 32 PHYS 32
Not offered current academic year

ASTR 99 (W) Independent Study: Astronomy or Astrophysics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Grading: pass/fail only
Not offered current academic year
Biochemistry and molecular biology are dynamic fields that lie at the forefront of science. Through elucidation of the structure and function of biologically important molecules (such as nucleic acids, lipids, proteins, and carbohydrates) these disciplines have provided important insights and advances in the fields of molecular engineering (recombinant DNA technology, "intelligent" drug design, "in vitro evolution"), genomics and proteomics, signal transduction, immunology, developmental biology, and evolution.

The Biochemistry and Molecular Biology Program is designed to provide students with an opportunity to explore living systems in molecular terms. Biochemistry and molecular biology are at the interface between the chemical and biological methods of looking at nature; therefore, the program draws heavily from these disciplines. While chemistry is concerned with the relationship between molecular structure and reactions, and biology focuses on cells and organisms, biochemistry and molecular biology probe the details of the structures and interactions of molecules in living systems in order to provide the foundation for a better understanding of biological molecules both individually and as members of more complex structures.

PROGRAM

While aspects of biochemistry and molecular biology can be very diverse, a common set of chemical and biological principles underlie the more advanced topics. With this in mind, the program has been structured to provide the necessary background in chemistry and biology and the opportunity to study the many facets of the modern areas of the biochemical sciences. Students interested in the Biochemistry and Molecular Biology Program should plan their course selection carefully. Since it is expected that Biochemistry 321 and 322 would be taken in the junior year, students are advised to take the prerequisites for those courses in both chemistry and biology during their first two years at Williams. While the program is open to all students, it is expected that it will appeal primarily to majors in biology and chemistry because of the number of courses required in those fields. In addition to taking the required courses, students planning to complete the Biochemistry and Molecular Biology Program are strongly encouraged to elect courses in mathematics and physics.

The following interdepartmental courses serve as the core of the Biochemistry and Molecular Biology Program. BIMO 321 and 322 provide a comprehensive introduction to biochemistry. BIMO 401, the capstone course for the concentration, provides students the opportunity to examine the current scientific literature in a wide variety of BIMO-related research areas.

To complete the concentration in Biochemistry and Molecular Biology, a student must complete all of the required courses listed below, take at least one elective in biology and one elective in chemistry from the list below, and attend at least eight Biology and/or Chemistry Department colloquia. Since the Chemistry Department counts two biology courses and the Biology Department counts two chemistry courses toward the majors (each of which can be completed with only eight other courses), a student majoring in either chemistry or biology would have to take only two or three additional courses to complete the program.

Required Courses
Elective Courses

Students can check with the program chair to see if other courses not listed here might count as electives.

**BIOL 305(S) Evolution**
Taught by: Luana Maroja

**BIOL 308(S) Integrative Plant Biology: Fundamentals and New Frontiers**
Taught by: Claire Ting

**BIOL 312 / NSCI 312(F) Sensory Biology**
Taught by: Heather Williams

**BIOL 313 Immunology**
Taught by: Damian Turner

**BIOL 315(S) Microbiology: Diversity, Cellular Physiology, and Interactions**
Taught by: Lois Banta

**BIOL 319 / CHEM 319 / CSCI 319 / MATH 319 / PHYS 319 Integrative Bioinformatics, Genomics, and Proteomics Lab**
Taught by: Lois Banta

**BIOL 326(F) Cellular Assembly and Movement**
Taught by: Pei-Wen Chen

**BIOL 330(S) Genomes: Structure, Function, Evolution**
Taught by: David Loehlin

**BIOL 407 / NSCI 347(S) Neurobiology of Emotion**
Colloquium Requirement

Concentrators must attend at least eight Biology and/or Chemistry Department colloquia. The Biology and Chemistry Departments hold colloquia on Friday afternoons during the fall and spring semesters. Scientists from other academic or research institutions are invited to present their research to students and faculty. There are approximately a dozen colloquia offered each semester among which BIMO concentrators may choose. Attendance at the honors student research presentations and the Biology/BIMO Alumni Reunion poster session also count toward the colloquium requirement. Concentrators may receive credit for colloquia attended during any of their semesters at Williams College.

BIMO 321 (F)  Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Cross-listings:  BIMO 321  BIOL 321  CHEM 321
This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** quizzes, two midterm exams, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites:** BIOL 101 and CHEM 251/255 and CHEM 155/256

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIMO 321 (D3) BIOL 321 (D3) CHEM 321 (D3)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

**Attributes:** BIGP Courses BIMO Required Courses

BIMO 401 (S) Topics in Biochemistry and Molecular Biology (WS)
This seminar course involves critical reading, analysis, and discussion of papers from the current biochemistry and molecular biology literature. Specific topics vary from year to year but are chosen to illustrate the importance of a wide range of both biological and chemical approaches to addressing important questions in the biochemical and molecular biological fields. To facilitate discussion, students will prepare written critiques analyzing the data and conclusions of the chosen literature.

Class Format: three hours per week

Requirements/Evaluation: class presentations and discussion, frequent short papers, and a final paper

Prerequisites: BIOL 202 and BIMO 321

Enrollment Limit: 12

Enrollment Preferences: those completing the BIMO concentration; open to others with permission of instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: The critical analysis of published papers in the biochem literature, as expressed in clear and succinct writing, is a key learning goal for the course. The students write seven literature critiques (typically 5-6 pages long) throughout the semester. While the specific topic each week differs, the parameters of the assignment are the same each time, allowing students to progressively improve their writing. I provide extensive written feedback on each critique, returned before the next due date.

Attributes: BIMO Required Courses

Spring 2022

SEM Section: 01 W 1:10 pm - 3:50 pm Amy Gehring

Winter Study --------------

BIMO 99 (W) Independent Study: Biochemistry and Molecular Biology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
Bioinformatics, genomics, and proteomics are rapidly advancing fields that integrate the tools and knowledge from biology, chemistry, computer science, mathematics, physics, and statistics in research at the intersection of the biological and informational sciences. Inspired by the enormous amount of biological data that are being generated from the sequencing of genomes, these new fields will help us pose and answer biological questions that have long been considered too complex to address. Research in genomics, proteomics, and bioinformatics will also significantly impact society affecting medicine, culture, economics, and politics.

The Bioinformatics, Genomics, and Proteomics curriculum involves faculty from the Biology, Chemistry, Computer Science, Mathematics/Statistics, and Physics departments and was designed to provide students with an understanding of these revolutionary new areas of investigation. Students interested in graduate work in bioinformatics, genomics, and proteomics should take the BiGP courses and their prerequisites. Interested students are also encouraged to participate in independent research with members of the advisory faculty as they explore the development of these new fields.

**BIGP Courses**

**BIMO 321 (F)** Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321
This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** quizzes, two midterm exams, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites:** BIOL 101 and CHEM 251/255 and CHEM 155/256

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIMO 321 (D3) BIOL 321 (D3) CHEM 321 (D3)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

**Attributes:** BIGP Courses  BIMO Required Courses

**BIMO 322 (S) Biochemistry II: Metabolism** (QFR)

**Cross-listings:** BIOL 322 CHEM 322 BIMO 322

**Primary Cross-listing**

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

**Class Format:** Lecture three hours per week and laboratory two hours per week.

**Requirements/Evaluation:** several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

**Prerequisites:** BIOL 101 and CHEM 251/255 or permission of instructor

**Enrollment Limit:** 60

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option
**BIOL 202 (F) Genetics (QFR)**

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, integrating multiple streams of evidence to map a mutation to the genome, determining the structure of a DNA plasmid using molecular tools.

**Class Format:** Lecture: three hours per week, Lab: three hours per week.

**Requirements/Evaluation:** bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

**Prerequisites:** BIOL 101 and 102

**Enrollment Limit:** 120

**Enrollment Preferences:** students interested in the Biology major

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

**Attributes:** BIGP Courses  BIMO Required Courses

---

**BIOL 305 (S) Evolution (QFR)**

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g.,
selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.

**Requirements/Evaluation:** independent research project, problem sets, participation in discussions and exams

**Prerequisites:** BIOL 202

**Enrollment Limit:** 22

**Enrollment Preferences:** Seniors and biology majors

**Expected Class Size:** 22

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** We will use mathematical models to study population genetics.

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** two afternoons of lab, with one hour of lecture, per week. In most weeks, we will meet one day for lecture discussions.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

**Quantitative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in
programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**BIOL 430 (S) Genome Sciences: At the Cutting Edge (WS)**

Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in “metagenomics” (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and “metatranscriptomics” (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

**Requirements/Evaluation**: five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic

**Prerequisites**: BIOL 202

**Enrollment Limit**: 10

**Enrollment Preferences**: open to juniors and seniors; senior Biology majors who have not taken a 400-level course

**Expected Class Size**: 10

**Grading**: no pass/fail option, no fifth course option

**Unit Notes**: BIMO, BIGP; does not satisfy the distribution requirement for the Biology major

**Distributions**: (D3) (WS)

**Writing Skills Notes**: Weekly written assignments consisting of four-page critique papers (five total during a semester) and two-page response papers (five total during a semester). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes**: BIGP Courses BIMO Interdepartmental Electives

CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)

This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Requirements/Evaluation:  programming and written assignments, quizzes, examinations

Prerequisites:  CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

Enrollment Limit:  60(12/lab)

Enrollment Preferences:  if the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size:  60

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes:  BIGP Courses

Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** two afternoons of lab, with one hour of lecture, per week. In most weeks, we will meet one day for lecture discussions.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

**Quantitative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**Attributes:** BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year
**NSCI 322 (S) From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology**

**Cross-listings:** NSCI 322  PSYC 312

**Secondary Cross-listing**

This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience in using animal models to study complex behavior and their associated neural mechanisms.

**Requirements/Evaluation:** class presentations, participation in discussions, project proposal (5 pages), empirical project paper (5-7 pages), poster and poster presentation, participation in all phases of the empirical project research experience (experiment design, data collection, data graphing, data analysis) including oral and written presentation of key findings.

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201)

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

**PHYS 315 (F) Computational Biology**

**Cross-listings:** CSCI 315  PHYS 315

**Primary Cross-listing**

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and expectation-maximization.

**Requirements/Evaluation:** weekly Python programming assignments, code reviews, problem sets, a few quizzes and a final project

**Prerequisites:** programming experience (e.g., CSCI 136), mathematics (PHYS/MATH 210 or MATH 150), and physical science (PHYS 142 or 151, or CHEM 151 or 153 or 155), or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** based on seniority

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings: MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week. In most weeks, we will meet one day for lecture discussions.

STAT 410 (F) Statistical Genetics (QFR)

Genetic studies explore patterns of genetic variation in populations and the effect of genes on diseases or traits. This course provides an introduction to statistical and computational methods for genetic studies. Topics will include Mendelian traits (such as single nucleotide polymorphisms), genome-wide association studies, pathway-based analysis, and methods for population genetics. Students will be introduced to some of the major computational tools for genetic analysis, including PLINK and R/Bioconductor. The necessary background in genetics and biology will be provided alongside the statistical and computational methods.

Requirements/Evaluation: project work, homework, exams, and contribution to discussion

Prerequisites: STAT 346 and STAT 360, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Statistics majors, juniors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods.

BIOLOGY (Div III)

Chair: Professor Lois Banta

- Sonya K. Auer, Visiting Assistant Professor of Biology
- Lois M. Banta, Chair and Professor of Biology
- Ron D. Bassar, Assistant Professor of Biology
- Janis Bravo, Instructor in Biology
- Deborah L. Carlisle, Instructor in Biology
- Matt E. Carter, Associate Professor of Biology
- Pei-Wen Chen, Assistant Professor of Biology
- Derek Dean, Lecturer in Biology
- Joan Edwards, Samuel Fessenden Clarke Professor of Biology
- Allison L. Gill, Assistant Professor of Biology
- Cynthia K. Holland, Assistant Professor of Biology
- Tim J. Lebestky, Associate Professor of Biology, Chair of Neuroscience Program
- David W. Loehlin, Assistant Professor of Biology
- Daniel V. Lynch, Philip and Dorothy Schein Professor of Biology
- Luana S. Maroja, Associate Professor of Biology
- Manuel A. Morales, Professor of Biology
- Robert M. Savage, Professor of Biology
- Steven J. Swoap, Howard B. Schow ’50 and Nan W. Schow Professor of Biology and Director of the Williams-Exeter Programme at Oxford University
- Claire S. Ting, Professor of Biology
- Damian Turner, Assistant Professor of Biology
- Vincent van der Vinne, Visiting Assistant Professor of Biology
- Heather Williams, William Dwight Whitney Professor of Biology

The Biology curriculum has been designed to provide students with a broad base for understanding principles governing life processes at all levels, from biochemistry and cell biology to physiology to ecology and behavior. Courses emphasize fundamentals common to all sub-disciplines including the coupling of structure to function, the transfer of energy in living systems, communication, and the molding of diversity by the evolutionary process. In upper-level courses and in independent and honors research, students have the opportunity to investigate areas at the frontiers of modern biology.

Although the Biology major is specifically designed to provide a balanced curriculum in the broader context of the liberal arts, it is also excellent preparation for graduate studies in the life sciences and in the health professions.

MAJOR REQUIREMENTS

In order to make the major accessible to students with diverse interests, required courses are kept to a minimum. The Biology major is satisfied by nine courses, as follows:

- Biology 101 The Cell
- Biology 102 The Organism
- Biology 202 Genetics

Any two 300-level courses, each of which must have a laboratory associated with it

Any one 400-level course other than 493-494
Any other three courses or any other two courses and two semesters of Organic Chemistry

Note: Independent study courses and AMS 311 (Same as Biology 231) do not fulfill the 300-level or 400-level course requirements. WIOX 316 Biology: Evolution, in the Williams Oxford Program qualifies for major credit at the 200-level.

Distribution Requirement

In order to ensure that majors broaden their knowledge of biology, one of the elective courses for the major must include an upper-level course covering biological processes at levels of organization above the cell. Courses that satisfy this distribution requirement are indicated in the individual course description.

COURSE SELECTION AND PLACEMENT

It is preferable for students who plan to major in biology, or think they may be interested in doing so, to take Biology 101, 102 during their first year at Williams. It is also possible to begin the Biology major during the sophomore year, although students should understand that it may require taking two or more biology courses during several semesters.

Students interested in biology, whether or not they intend to major in it, are encouraged to take Biology 101, 102. It is also possible, with permission of the instructor, to take Biology 203 Ecology, Biology 204 Animal Behavior and Biology 220 Field Botany without prerequisite. Other 100-level biology courses are designed specifically for students who do not intend to take additional upper-level courses in biology. All of these courses satisfy the Division III distribution requirement.

Beginning students should normally enroll in Biology 101 and 102. Students with unusually strong backgrounds in biology, such as those with outstanding performance on the College Board Biology Advanced Placement Test, may be permitted to elect a sophomore-level course in lieu of Biology 101 and/or Biology 102 upon successful completion of a departmental qualifying exam, administered during First Days.

The Biology Department encourages majors to have breadth in their course selections. Biology encompasses a wide spectrum of disciplines and uses different methodologies to approach research questions. Yet advances in each discipline of biology increasingly inform thinking throughout the field. We encourage biology majors to gain exposure to diverse conceptual frameworks and methodologies through their choice of courses.

COURSES RELATED TO THE BIOLOGY MAJOR

Students planning to pursue their interest in biology and related fields after completing their undergraduate degrees are strongly encouraged to take one year of chemistry, at least one semester of mathematics (a course in statistics is recommended), and one semester of physics. Students may wish to check the requirements for graduate admission at relevant universities, and are also encouraged to consult with the Biology Department’s graduate school advisor about prerequisites for admission to graduate programs.

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Students interested in Biochemistry and Molecular Biology (BIMO) should consult the general statement under Biochemistry and Molecular Biology.

BIOINFORMATICS, GENOMICS AND PROTEOMICS

Students interested in Bioinformatics, Genomics and Proteomics (BiGP) should consult the general statement under Bioinformatics, Genomics and Proteomics. Biology majors interested in this field are strongly encouraged to enroll in Integrative Bioinformatics, Genomics, and Proteomics (Biology 319).

NEUROSCIENCE

Students interested in Neuroscience (NSCI) should consult the general statement under Neuroscience.

PUBLIC HEALTH

Students interested in Public Health (PH) should consult the general statement under Public Health.

ENVIRONMENTAL STUDIES

Students interested in Environmental Studies (ENVI) should consult with Biology faculty members associated with the program and the general statement under Environmental Studies.

THE DEGREE WITH HONORS IN BIOLOGY

In order to be recommended for the degree with honors, a Biology major is normally expected to have completed the equivalent of two semesters and a winter study (031) of independent research culminating in a thesis which demonstrates outstanding achievement of an original and innovative nature. Although the presentation of a thesis and associated oral presentation in the fall and poster defense in the spring are required for consideration for a degree with honors, their completion should not be interpreted as a guarantee of a degree with honors. The principal considerations in admitting a student to the program of independent honors research will be mastery of fundamental material and skills, ability to pursue independent study successfully, and demonstrated interest and motivation. Students interested in participating in the honors program should consult with the department.
early in the spring semester of the junior year; approval must be received before spring registration in the junior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

The minimum course requirements for a degree with honors in Biology are Biology 101, Biology 102, Biology 202, two 300-level biology courses (each of which must have a laboratory associated with it), one 400-level biology course, Biology 493, Biology 494, WSP 031, and any other two courses in biology (or any other one course and two semesters of Organic Chemistry). Note: A student who has a double major cannot count any course twice. For example, if a student is a Biology and Chemistry major, Organic Chemistry can only be counted in one of the two majors.

In addition to the normal honors route, which includes two semesters (Biology 493-494) and a winter study of research (WSP 031) during senior year, students have the option, subject to the approval of their thesis advisor, to begin the honors research during winter study junior year or during the second semester junior year. In general, thesis students who start during WSP or spring semester of their junior year are working on a project that requires winter or spring field work. Students beginning honors in winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year; students beginning honors during the second semester of junior year would take Biology 494 that semester, followed by Biology 493 in the fall of senior year and winter study research in the winter of the senior year.

STUDY ABROAD

Students planning on majoring in Biology are strongly advised to take Biology 202 before going abroad, since Biology 202 is required for the major and is a prerequisite for many upper-level courses; a Genetics course taken while studying away cannot substitute for Biology 202. Biology majors studying abroad may receive credit toward the major for at most two 200-level electives; the departmental distribution requirement can be satisfied through an appropriate course taken during study abroad. Students should meet with the Department's study abroad advisor to discuss study abroad options.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We usually want to see a syllabus.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, ideally complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Only two of the nine major course credits can be taken somewhere other than Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Courses taken for major credit anywhere other than Williams will only count as 200-level credit, regardless of the level or format of the course.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. BIOL 202 Genetics, 300-level lab courses, and 400-level senior seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Genetics is only offered in the fall. Those late to the major need to be aware of this as Genetics is a prerequisite for most upper division courses.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Courses that are focused on clinical areas of study, and courses in environmental studies that focus on policy or sociology rather than biology, would not be granted credit in biology.

CREDIT FOR COURSES AT OTHER INSTITUTIONS

Students who enroll in study away programs may receive credit for up to two 200-level electives towards the biology major. Courses must be pre-approved by the Biology Department Study Away Advisor.

Students wishing to satisfy prerequisites for courses offered by the Biology Department with courses taken at other institutions should consult, in
RESEARCH AND THESIS COURSES

Individual research projects must be approved by the department. Application should be made to the department prior to spring registration.

Note: Senior thesis and independent study courses do not count as 300-level or 400-level course requirements for the major. Only one research course (i.e., BIOL 297, BIOL 298, BIOL 493, or BIOL 494) may be counted towards the major requirements.

BIOL 101  (F)  The Cell

This course investigates cell structure and function as a consequence of evolutionary processes, and it stresses the dynamic properties of living systems. Topics include an introduction to biological molecules and enzyme action, membrane structure and function, energy exchange and design of metabolic systems, expression of genetic information, cell signaling, cell trafficking, the cell cycle, and cancer. Student-designed laboratory experiments and discussions based on primary biology literature will highlight how biological knowledge is created and understood.

Class Format: 3 hours of lecture per week and one laboratory/discussion per week (3 hours).

Requirements/Evaluation: hour tests, a final exam, lab reports, discussion assignments, and discussion participation

Prerequisites: none

Enrollment Limit: 45/lecture

Expected Class Size: 180

Grading: no pass/fail option, no fifth course option

BIOL 102  (S)  The Organism

This course focuses upon the developmental and evolutionary processes that have given rise to a wide diversity of multicellular organisms. We consider many levels of biological organization, from molecular and cellular to individuals and populations in our examination of evolutionary concepts. Topics include meiosis and sexual reproduction, developmental and evolutionary mechanisms, and speciation with representative examples from a diversity of plants and animals. Readings are drawn from a variety of sources, including the recent primary literature.

**BIOL 120 (F) Biology Through The Media**

This course explores the foundational concepts examined in Williams's Introduction to Biology series through their expression in mass media: news outlets, television and feature films. Each topic will be presented through the lens of a "media story," either based in fact or fictional. The first half of the course investigates cell structure and function, paying special attention to how information is conveyed in a cell. The focus then shifts to the developmental and evolutionary processes that have given rise to the diversity of life. This is a qualitative-focused, non-majors course and, as such, the students are not expected to have much, if any, background in biology.

**Requirements/Evaluation:** midterm, two short papers, film screenings as a group outside of class and a final exam  
**Prerequisites:** no prerequisites and may not be taken as credit towards the Biology major  
**Enrollment Limit:** 80  
**Enrollment Preferences:** Senior, juniors, sophomores and first-year students in that order  
**Expected Class Size:** 40-60  
**Grading:** yes pass/fail option, yes fifth course option

**BIOL 133 (F) Biology of Exercise and Nutrition**

This class, intended for the non-scientist, focuses on the impact of exercise and nutrition on the human body. We will discuss topics such as how different types of training influence exercise performance; the changes that occur in the cardiovascular system during an exercise routine; the inherent limits of the body to perform aerobic and anaerobic tasks; and the long-term health consequences of a lifetime of activity of inactivity. We will also examine how nutrition and metabolism affect body composition. For example, we will rigorously and scientifically scrutinize the use of "fad" diets as a means to lose weight.

**Class Format:** three hours per week  
**Requirements/Evaluation:** exams and bi-weekly laboratory exercises and laboratory report  
**Prerequisites:** none  
**Enrollment Limit:** 90  
**Enrollment Preferences:** seniors, juniors, sophomores, then first-year students  
**Expected Class Size:** 90  
**Grading:** yes pass/fail option, yes fifth course option
BIOL 134 (F) The Tropics: Biology and Social Issues  (DPE)

Cross-listings:  BIOL 134  ENVI 134

Primary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

**Expected Class Size:** 60
**Grading:** yes pass/fail option, yes fifth course option
**Unit Notes:** may not be taken as credit towards the Biology major; not open to students who took BIOL 305
**Distributions:** (D3)

Not offered current academic year

**BIOL 165 (F) Coral Reefs: Ecology, Threats, & Conservation**

**Cross-listings:** ENVI 265  BIOL 165  MAST 265

**Secondary Cross-listing**
Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

**Class Format:** Remote, including Zoom seminar meetings twice a week

**Requirements/Evaluation:** Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences: 1. First-Year, 2. Sophomores**

**Expected Class Size:** 16
**Grading:** yes pass/fail option, yes fifth course option
**Unit Notes:** Does not count for Biology major credit.
**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 265 (D3) BIOL 165 (D3) MAST 265 (D2)

**Attributes:** ENVI Natural World Electives

Not offered current academic year

**BIOL 202 (F) Genetics (QFR)**

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, integrating multiple streams of evidence to map a mutation to the genome, determining the structure of a DNA plasmid using molecular tools.

**Class Format:** Lecture: three hours per week, Lab: three hours per week.

**Requirements/Evaluation:** bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

**Prerequisites:** BIOL 101 and 102

**Enrollment Limit:** 120

**Enrollment Preferences:** students interested in the Biology major
Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

BIOL 203 (F) Ecology (QFR)

Cross-listings: ENVI 203 BIOL 203

Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to help students build skills in data analysis and scientific writing.

Class Format: Six hours per week. Students will view pre-class lecture videos; class meetings will focus on discussion, synthesis, and application of course content.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203 (D3) BIOL 203 (D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

BIOL 204 (S) Animal Behavior

Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

Class Format: six hours per week

Requirements/Evaluation: examinations, lab reports, and a research paper

Prerequisites: BIOL 102, or PSYC 101, or permission of instructor

Enrollment Limit: 32

Enrollment Preferences: Biology majors and Neuroscience concentrators

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

BIOL 205 (S) Physiology

This lecture-based course examines principles, patterns, and mechanisms of biological function from the level of cells and tissues to the whole organism. The themes of the course include structure and function, mechanisms of regulation, control and integration, and adaptation to the environment. Examples of these themes are taken from a wide variety of organisms with a focus on vertebrates. Laboratories provide practical experience in measurement and experimental elucidation of physiological phenomena and functional analysis of gross structure.

Class Format: This year’s offering will feature in-person lectures and labs.

Requirements/Evaluation: Daily practice problems, midterm exams, laboratory exercises, and a final exam

Prerequisites: BIOL 101 and 102; open to first-year students with permission of the Biology department

Enrollment Limit: 60

Enrollment Preferences: Seniors, then juniors, then sophomores.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

BIOL 210 (F) Mathematical Biology (QFR)

Cross-listings: BIOL 210 MATH 310

Secondary Cross-listing

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper

Prerequisites: MATH 250 and MATH 309, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PHLH Methods in Public Health

Not offered current academic year

BIOL 211 (S) Paleobiology

Cross-listings: GEOS 212 BIOL 211

Secondary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 20
**BIOL 212 (F) Neuroscience**  
**Cross-listings:** BIOL 212, NSCI 201, PSYC 212  
**Secondary Cross-listing**
This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.  
**Requirements/Evaluation:** Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, two midterm exams, and a final exam.  
**Prerequisites:** PSYC 101 or BIOL 101; open to first-year students only with permission of instructor  
**Enrollment Limit:** 72  
**Enrollment Preferences:** sophomores and Biology and Psychology majors  
**Expected Class Size:** 72  
**Grading:** yes pass/fail option, no fifth course option  
**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**BIOL 219 (F) Dangerous Exposures: Environment, Immunity, and Infectious Disease** (WS)  
Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have...
proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week’s readings will have implications for public health and/or conservation biology.

Requirements/Evaluation: six 4- to 5-page papers; tutorial presentations, and the student's progress towards intellectual independence and creativity as a presenter and a respondent

Prerequisites: BIOL 101 and 102

Enrollment Limit: 10

Enrollment Preferences: sophomores who have taken BIOL 202, students interested in public health

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (WS)

Writing Skills Notes: We work deliberately throughout the semester on writing skills including construction of a written argument and logical flow as well as mechanics. Students write six 4-5-page papers, alternating weekly between papers and written critiques of their partner's writing. Based on substantive feedback from the instructor as well as their partner, students revise and resubmit two of their six papers.

Attributes: PHLH Biomedical Determinants of Health

BIOL 220  (S)  Field Botany and Plant Natural History

Cross-listings: ENVI 220  BIOL 220

Primary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

BIOL 222 (S) Essentials of Biochemistry (QFR)
This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

Class Format: in-person lecture and lab

Requirements/Evaluation: regular quizzes, final exam, writing assignments (including problem sets), and lab assignments

Prerequisites: BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322

Enrollment Limit: 18

Enrollment Preferences: seniors who need to fulfill the biochemistry requirement for premedical school

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the biology major in addition to either BIOL 321 or BIOL 322; cannot be counted towards the BIMO concentration

Distributions: (D3) (QFR)

BIOL 225 (F) Sustainable Food & Agriculture

Cross-listings: BIOL 225 ENVI 225

Primary Cross-listing

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Requirements/Evaluation: writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

BIOL 231 (F)(S)  Marine Ecology

Cross-listings: MAST 311  BIOL 231

Secondary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit:  16

Expected Class Size:  12

Grading:  yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

Distributions:  (D3)

BIOL 234 (S)  Biology of our Sexes: The Genetic and Epigenetic Regulation of Sex Determination

Many physical and behavioral characteristics that are associated with male and female anatomy, physiology, and behavior are initially the products of molecular choices arising from the action of our chromosomes in early development. The embryonic assignment of sex can also lead to intersex or hermaphroditic outcomes in many different organisms with extraordinary and illuminating biological effects. We will explore the molecular mechanisms and evolutionary basis of sex determination in both plants and animals, as well as the physical and behavioral expression of sex by the organism discussed, and experiments that create and characterize traits and behavior of mosaic/intersex organisms. Additionally, the epigenetic regulation of the X chromosome in mammals has a canonical role in our understanding of sex determination, but whole genome studies and investigations of autosomes and the Y chromosome have raised new layers of complexity for understanding the molecular basis of human sex and sexuality.

Requirements/Evaluation: six 5-page papers; six 1-page response papers; tutorial presentations; discussion skills/investment

Prerequisites: BIOL 202 (Genetics), or permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  sophomores and juniors, with preference to Biology majors

BIOL 302  (F)  Communities and Ecosystems  (QFR)

Cross-listings:  ENVI 312  BIOL 302

Primary Cross-listing
An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as “big-data” analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format:  six hours per week
Requirements/Evaluation:  lab reports, a midterm exam, a term project presentation, and a final project paper
Prerequisites:  BIOL/ENVI 203 or 220
Enrollment Limit:  28
Enrollment Preferences:  Biology majors and Environmental Studies majors and concentrators
Expected Class Size:  24
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  satisfies the distribution requirement for the Biology major

BIOL 308 (S) Integrative Plant Biology: Fundamentals and New Frontiers
Plants are one of the most successful groups of organisms on Earth and have a profound impact on all life. Successful use of plants in addressing global problems and understanding their role in natural ecosystems depends on fundamental knowledge of the molecular mechanisms by which they grow, develop, and respond to their environment. This course will examine the molecular physiology of plants using an integrative approach that considers plants as dynamic, functional units in their environment. Major emphasis will be on understanding fundamental plant processes, such as photosynthesis, growth and development, water transport, hormone physiology, and flowering, from the molecular to the organismal level. Environmental effects on these processes will be addressed in topics including photomorphogenesis, stress physiology, mineral nutrition, and plant-microbe interactions. Discussions of original research papers will examine the mechanisms plants use to perform these processes and explore advances in the genetic engineering of plants for agricultural, environmental, and medical purposes. Laboratory activities stress modern approaches and techniques used in investigating plant physiological processes.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a term paper, and exams

BIOL 311  (F)  Neural Systems and Circuits
Cross-listings: BIOL 311  NSCI 311

Primary Cross-listing
This course will examine the functional organization of the mammalian brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections encode sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the nervous system regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Journal article discussions will complement course topics, providing experience in reading, understanding, and critiquing primary research papers. Writing an original literature review article will provide experience in expository writing and anonymous peer review. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

Class Format: In Fall 2020, this course will be offered in a hybrid format, with in-person experiences for students on campus, as well as the ability to complete discussions/labs remotely. Exact details to be announced prior to the first day of the course.

Requirements/Evaluation: Class participation, completion of labs, literature review assignment, hour exams, a final exam
Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205
Enrollment Limit: 12
Enrollment Preferences: Biology majors and Neuroscience concentrators
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major

Attributes: NSCI Group A Electives
Not offered current academic year

BIOL 312  (F)  Sensory Biology
Cross-listings: BIOL 312  NSCI 312

Primary Cross-listing
How do animals sense properties of the physical world? How do they convert physical or chemical energy to a signal within a cell that carries information? How is that information represented? What are the limits on what can be sensed? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction and how these mechanisms constrain the types of information that the nervous system encodes and processes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world, and what adaptations allow some species to have "special" senses. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrine cells in the mammalian retina), the constant reshaping of the olfactory system (chemical mapping of odors), what makes a touch stimulus noxious, and enhanced color vision (in birds, bees, and shrimp). Laboratory exercises will focus on the nematode C. elegans, an important model system, to explore and extend how we understand touch, temperature sensation, chemosensation, and light sensation.

Requirements/Evaluation: Four take-home exams, an independent research project (proposal, followed by results/discussion), presentation about a non-standard sensory system, short quizzes, and lab + class participation.
Prerequisites: BIOL 101 and either BIOL 212/NSCI 201 or BIOL 205
Enrollment Limit: 24
Enrollment Preferences: Preference to senior Biology majors who need a 300-level course; then to senior Neuroscience concentrators who need a Group A elective; then to Biology majors. Not open to students who have taken Biology 213.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Unit Notes: Does not satisfy the distribution requirement for the Biology major.
BIOL 312 (D3) NSCI 312 (D3)

Attributes: BIMO Interdepartmental Electives NSCI Group A Electives

Fall 2021
LEC Section: 01 TR 8:30 am - 9:45 am Heather Williams
LAB Section: 02 T 1:00 pm - 4:00 pm Heather Williams
LAB Section: 03 R 1:00 pm - 3:40 pm Heather Williams

BIOL 313 (S) Immunology
The rapidly evolving field of immunology examines the complex network of interacting molecules and cells that function to recognize and respond to agents foreign to the individual. In this course, we will focus on the biochemical mechanisms that act to regulate the development and function of the immune system and how alterations in different system components can cause disease. Textbook readings will be supplemented with current literature.

Class Format: Video lectures with in class discussions. Laboratory two hours a week
Requirements/Evaluation: exams, laboratory reports, and a research paper
Prerequisites: BIOL 202
Enrollment Limit: 12
Enrollment Preferences: senior and then junior Biology majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives PHLH Biomedical Determinants of Health
Not offered current academic year

BIOL 315 (S) Microbiology: Diversity, Cellular Physiology, and Interactions
Bioterrorism and the alarming spread of antibiotic resistant bacteria are but two of the reasons for the resurgence of interest in the biology of microorganisms. This course will examine microbes from the perspectives of cell structure and function, genomics, and evolution. A central theme will be the adaptation of bacteria as they evolve to fill specific ecological niches, with an emphasis on microbes: host interactions that lead to pathogenesis. We will consider communication among bacteria as well as between bacteria and their environment. Topics include: microbial development, population dynamics, metagenomics, bioremediation, plant and animal defenses against infection, and bacterial strategies to subvert the immune system. In the lab, major projects will focus on the mammalian gut microbiome and the isolation and characterization of bacteria from natural environments. The lab experience will culminate in multi-week independent investigations. Readings will be comprised primarily of articles from the primary literature.

Class Format: lectures three hours a week and laboratory three hours a week
Requirements/Evaluation: three exams/writing assignments, responses to thought questions on readings, a lab report/notebook, and an oral presentation
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: senior and then junior Biology majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives PHLH Biomedical Determinants of Health
BIOL 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Primary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week. In most weeks, we will meet one day for lecture discussions.

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

Attributes: BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year

BIOL 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321

Secondary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The in-person laboratory provides further
opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays. A laboratory section will also be provided for remote students, which will examine similar topics and techniques through literature and data analysis.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** quizzes, two midterm exams, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites:** BIOL 101 and CHEM 251/255 and CHEM 155/256

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIMO 321 (D3) BIOL 321 (D3) CHEM 321 (D3)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

**Attributes:** BIGP Courses  BIMO Required Courses

**BIOL 322 (S) Biochemistry II: Metabolism** (QFR)

**Cross-listings:** BIOL 322 CHEM 322 BIMO 322

**Secondary Cross-listing**

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

**Class Format:** Lecture three hours per week and laboratory two hours per week.

**Requirements/Evaluation:** several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

**Prerequisites:** BIOL 101 and CHEM 251/255 or permission of instructor

**Enrollment Limit:** 60

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major; cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIMO 322 (D3) CHEM 322 (D3) BIMO 322 (D3)

**Quantitative/Formal Reasoning Notes:** The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.
Spring 2022

BIOL 326  (F)  Cellular Assembly and Movement

This course will focus on how multi-protein complexes are assembled to control key cellular processes in eukaryotic systems: 1) protein sorting and trafficking, 2) establishment and maintenance of cell architecture, and 3) mitosis, cell migration and tissue morphogenesis that require coordination of the membrane transport and cytoskeleton. The course will highlight involvement of these processes in pathological conditions. Laboratories will use mammalian tissue culture as a model system to study cellular functions. Important techniques in cell biology will be introduced in the first half of the semester; in the second half of the term, students will conduct a multi-week independent project. Textbook readings will be supplemented with primary literature.

Class Format: lectures, three hours a week; laboratory, three hours a week. The laboratory projects will require additional time outside of class hours.

Requirements/Evaluation: three exams, in-class discussion of papers, lab reports, an oral presentation and research paper based on an independent lab research project

Prerequisites: BIOL 202

Enrollment Limit: 12

Enrollment Preferences: senior and junior Biology majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

Fall 2021

LEC Section: 01    MWF 9:00 am - 9:50 am     Pei-Wen Chen

BIOL 329  (F)  Conservation Biology  (QFR)

Cross-listings: ENVI 339  BIOL 329

Primary Cross-listing

This course examines the application of population genetics, population ecology, community ecology, and systematics to the conservation of biological diversity. The overarching theme of the course is on the role of stochastic processes for small populations. Lecture/discussion topics will include extinction, the genetics of small populations, metapopulations, and importantly, conservation strategies. Labs will include a mixture of computer and lab projects.

Class Format: lecture and discussion, 3 hours per week; lab, 1.25 hours per week. students will be assigned to a lab section (block AA - either W or F from 1:30-2:45) during the first week of class.

Requirements/Evaluation: Evaluation will be based on lab assignments, two exams, discussion participation, and an independent project

Prerequisites: BIOL 203/ENVI 203, or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Biology majors, seniors, and juniors
**BIOL 330 (S) Genomes: Structure, Function, Evolution**

Genome sequencing technologies have opened the "book of life" to biologists. But making sense of genomes is still a work in progress. This course will examine central features of genomes, their evolution, and their contribution to human diseases such as cancer. Genome biology is a new field, and this presents the opportunity to learn science as it is being done. Biologists working today started out knowing nothing about core features of genomes, such as why most of the DNA is repetitive, or why segments of genes get removed in the RNA, or why silenced genes wake up in cancer cells. They began to find meaning by adopting dual perspectives of function and neutral evolution. Students will learn to walk these same paths and learn to evaluate for themselves what genome complexity means. In lab, students will develop hands-on and computational skills for investigating genome structural variation, then apply them in the second half of the semester in independent lab investigations.

**Class Format:** lectures, three hours a week; laboratory, three hours a week.

**Requirements/Evaluation:** Written responses to readings in primary literature; three take-home written exams; two laboratory reports; oral presentation of an independent laboratory project.

**Prerequisites:** BIOL 202

**Enrollment Limit:** 12

**Enrollment Preferences:** Biology majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the biology major.

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives

---

**BIOL 335 (F) Chronobiology**

Internal clocks control nearly all aspects of physiology and behavior and allow organisms to anticipate the dramatic environmental changes between day and night. In this course we will focus on the organization of internal clocks at the molecular, organ and physiological levels. We will explore fundamental properties of biological clocks, how internal rhythms are synchronized with the environment and the means by which clocks drive physiological rhythms. Subsequently, we will investigate how endogenous clocks help organisms cope with rhythmic changes in our environment, and how disruption of our internal rhythms compromises health and wellbeing. Lectures will alternate with discussions of primary literature. During laboratory sessions we will explore the characteristics of the circadian system in a group of mice, followed by the design and execution of a research project in a small group of students. Working with mice will require time outside of regular scheduled class times, including the weekends. Grading will be based on 2 reports and 2 presentations of the lab components as well as 2 intermediate and 1 final exam.

**Requirements/Evaluation:** Evaluation will be based on three exams, two or three oral presentations, and two lab reports.

**Prerequisites:** BIOL 205 or BIOL 212/NSCI201
Enrollment Limit: 18
Enrollment Preferences: Senior, then junior biology majors and NSCI concentrators
Expected Class Size: 18
Grading: no pass/fail option, yes fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3)
Attributes: NSCI Group C Electives

Fall 2021

LAB Section: 03  T 1:00 pm - 4:00 pm  Vincent van der Vinne

BIOL 337  (F)  Evolutionary Ecology  (QFR)
Evolutionary ecology is an interdisciplinary field that integrates concepts in genetics, adaptation, and ecology to understand how evolution operates in the context of ecological communities. This course provides an overview of the discipline including foundational concepts in evolutionary demography, phenotypic plasticity, and population genetics. It also explores how breakthroughs in these topics provide a framework for advances in our understanding of the evolution of reproductive timing and ageing, interspecific interactions (e.g. competition, predation), cooperation, and altruism. The course combines lectures, readings, in-class discussion, and a lab section that includes a mixture of field, computer, and lab projects. Laboratories will give students practical, hands-on experience in how to develop, plan, and carry out evolutionary ecology research from start to finish.

Class Format: lecture, 3 hours per week; laboratory and discussion, 3 hours per week
Requirements/Evaluation: Evaluation will be based on lab assignments, two exams and discussion participation.
Prerequisites: BIOL 102, BIOL 203 or equivalent
Enrollment Limit: 24
Enrollment Preferences: preference given to biology majors, seniors, and juniors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Unit Notes: Satisfies the distribution requirement for the Biology major
Distributions: (D3)  (QFR)
Quantative/Formal Reasoning Notes: Evolutionary ecology uses concepts in genetics and ecology to understand how the frequency of alleles in a population changes over time. These changes are formalized in equations that describe these processes. Students will gain experience in utilizing these equations to describe, analyze, and predict the evolutionary outcome of ecological interactions for both theoretical and experimental purposes. Thus, the students will gain experience in solving systems of equations using algebra and in stat

Fall 2021
LEC Section: 01  TR 11:20 am - 12:35 pm  Ron D. Bassar
LAB Section: 02  W 1:00 pm - 4:00 pm  Ron D. Bassar
LAB Section: 03  R 1:00 pm - 4:00 pm  Ron D. Bassar

BIOL 402  (S)  Rapid Evolution in Ecology
Darwin believed that evolution was a slow process. Until recently, the impact of evolutionary changes on short-term ecological studies was considered to be minimal. However, empirical documentation of rapid, directly observed evolution has changed this view and has led to an increased focus on the joint dynamics of evolution and ecology including community genetics, niche construction, and evolutionary rescue. In this course, we first focus on the literature presenting the evidence for rapid evolutionary change in natural and experimental populations. Then, we explore the consequences of rapid evolutionary change for our understanding of population, community, and ecosystem ecology including the impacts that evolutionary changes have for conservation efforts and predicting the response of organisms to global environmental and climate change.
Biological Emotion

Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by experience, memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout mouse studies, as well as new optogenetic methods for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing and mood disorders.

Class Format: three hours per week
Requirements/Evaluation: class participation and several short papers
Prerequisites: BIOL 202 and 212; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option

**BIOL 411 (F) Developmental Biology: From Patterning to Pathogenesis**

A small number of developmental regulators coordinate the interplay between cell proliferation and specification of cell fates during animal development. The genetic basis of many of the cancer and degenerative diseases are, in fact, due to these same developmental regulators whose expression is misregulated in the adult. Through the reading of primary literature, this course in developmental biology will examine the mechanisms of gene expression of key regulators, the biological processes they mediate in the embryo, and how they become misregulated in proliferative and degenerative diseases.

**Requirements/Evaluation:** bi-weekly tutorial papers, oral commentaries, and tutorial discussion

**Prerequisites:** BIOL 202

**Enrollment Limit:** 14

**Enrollment Preferences:** Senior Biology majors who have not taken a 400-level course followed by seniors then juniors in the major

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives

Not offered current academic year

**BIOL 412 (S) Neural and Hormonal Basis of Hunger**

**Cross-listings:** BIOL 412 NSCI 342

**Primary Cross-listing**

Hunger and satiety are highly regulated behavioral states that maintain energy homeostasis in animals. This course will focus on readings from the primary literature to track numerous recent advances in how the brain and endocrine systems regulate appetite. Topics include how organ systems communicate with the brain to regulate appetite, how different populations of neurons in the brain interact to regulate appetite, how brain systems that regulate appetite affect other behaviors, and how the neural and hormonal basis of hunger compare with brain systems that regulate other homeostatic systems such as thirst. By tracing the advances in appetite regulation within the past decade, we will also trace the advent of cutting-edge molecular, genetic, and optical-based tools that are transforming multiple fields within physiology and neuroscience. Students in this class will have the opportunity to improve skills in written and oral scientific presentation.

**Requirements/Evaluation:** written assignments, oral presentations, and participation

**Prerequisites:** BIOL 205 or BIOL/PSYC 212, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors who have not taken a 400-level course

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIOL 412 (D3) NSCI 342 (D3)
BIOL 413 (F) Global Change Ecology

Cross-listings: ENVI 423  BIOL 413

Primary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 423 (D3) BIOL 413 (D3)

Attributes: ENVI Natural World Electives

BIOL 414 (F) Life at Extremes: Molecular Mechanisms

All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

Class Format: discussion three hours per week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 202; open to juniors and seniors

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level course; then juniors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)
BIOL 417  (S)  Translational Immunology: From Bench to Bedside
Recent advances in the field of immunology have led to the development of new approaches to prevent and treat diseases that affect millions of people worldwide. Drugs that modulate the body's natural immune response have become powerful tools in treating major diseases—infection, autoimmunity and cancer. This course will use readings from the primary literature to explore central themes involved in translating basic research to new clinical and therapeutic approaches. Topics will include vaccine development, autoimmunity and cancer immunotherapy.

Requirements/Evaluation:  Class participation and 4 essays
Prerequisites:  BIOL 202; open to juniors and seniors
Enrollment Limit:  12
Enrollment Preferences:  senior biology majors who have not taken a 400-level course; then juniors
Expected Class Size:  12
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  does not satisfy the distribution requirement for the Biology major
Distributions:  (D3)
Attributes:  PHLH Biomedical Determinants of Health

BIOL 418  (S)  Signal Transduction to Cancer
Division of normal cells is a highly regulated process based on input from both intrinsic and extrinsic signals. The cell's response to its environment affects all aspects of cell behavior: proliferation, death, differentiation and migration. The goal of the course is to understand the molecular mechanisms of signal transduction that guide normal cell behavior and how disruptions in this process can lead to cancer. We will focus on the Hedgehog-Gli signaling pathway that is activated in 30% of all known cancers. Genetic studies will serve as an introduction to the components of the pathway, followed by an examination of the molecular mechanisms of signal reception, transduction of intracellular information, scaffolding and transcriptional targets. The final section of the course will investigate how high throughput screens, medicinal chemistry studies and mouse models are used to identify small molecular inhibitors of pathway components. We will consider the effectiveness of these inhibitors in pharmacological studies, clinical trials and potential cancer treatments.

Requirements/Evaluation:  four papers
Prerequisites:  BIOL 202 or permission of instructor
Enrollment Limit:  12
Enrollment Preferences:  senior and then junior Biology majors
Expected Class Size:  12
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  does not satisfy the distribution requirement for the Biology major
Distributions:  (D3)
Attributes:  BIMO Interdepartmental Electives

BIOL 419  (S)  Secrets of Enzymes: Fidelity, Promiscuity, and Disease

Not offered current academic year

Attributes:  BIMO Interdepartmental Electives  MAST Interdepartmental Electives
Living organisms have spent the past 4 billion years evolving proteins and enzymes that perform basic cellular functions to support life. Over time, duplications and mutations of these enzymes have led to novel reactions, pathways, and chemistries. To gain an appreciation for these molecular catalysts, we will start by considering how enzymes are synthesized, how errors are introduced and corrected, and how proteins are degraded. We will then analyze the effects of beneficial errors on the evolution of new function and the effects of undesirable errors in human disease. The final section of this course will focus on how enzymes such as CRISPR/Cas9 act as 'molecular scissors' to cut DNA and how these enzymes can be used to correct errors. We will explore the implications of this field in active areas of biomedical research, including antibiotic resistance and personalized medicine. Discussions and writing assignments will focus on reading and critiquing the scientific literature.

Class Format: discussion three hours per week

Requirements/Evaluation: four 4- to 5-page papers and participation in discussions

Prerequisites: BIOL 202 required; recommended BIOL 222 or BIOL 321

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level course, then juniors

Expected Class Size: 12

Garding: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

Not offered current academic year

BIOL 421 (F) Thermoregulation: From Molecules to Organisms

Thermal physiology involves the study of molecular events, organ systems, and organism-environmental interactions that are involved with heat production and temperature maintenance. The area of thermal physiology has been around for over 100 years. However, only in the last 5-7 years has the science progressed to understanding basic fundamental mechanisms for generating and regulating heat production. This tutorial will focus on four questions: 1) how do organisms generate heat? 2) how do organisms sense the temperature in the environment? 3) how do organisms integrate information about the environment (temperature, humidity, time of day, etc.) with internal information (deep body temperature, energy stores, etc.) to regulate their metabolic production of heat? 4) how do animals make "the decision" to enter a state of torpor?

Requirements/Evaluation: five 4- to 5-page papers; five 1- to 2-page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites: BIOL 205 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Biology majors that have not had a 400-level course, followed by senior Biology majors, followed by junior Biology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: NSCI Group C Electives

Not offered current academic year

BIOL 425 (F) Coevolution (WS)

Coevolution, defined as reciprocal adaptation between species, is central to understanding biological phenomena ranging from global patterns of biodiversity to the molecular mechanisms of evolution. The focus of this tutorial will be on coevolution as a paradigm for understanding species diversification.

Requirements/Evaluation: Evaluation will be based on 5 (4-5-page) papers, tutorial presentations, and the student's effectiveness as a critic.

Prerequisites: BIOL 203 or 305

Enrollment Limit: 10

Enrollment Preferences: Senior biology majors
BIOL 428  (S)  Forests of the Future--Understanding Global Change through 'Big Science' Experiments

Increases in atmospheric CO2 and warming temperatures associated with global climate change affect the growth and physiology of plants and microorganisms and the cycling and storage of carbon and nutrients within terrestrial ecosystems. These changes cross scale and encompass complex feedbacks that are challenging to predict and understand. Over the past several decades, scientists have used large-scale global change experiments to depict the future of organisms and ecosystems in a CO2-enriched, warmer world. In this course, we will trace the progress of these experiments and evaluate our understanding of the effect of global changes on plant growth and physiology, microbial community composition and activity, and ecosystem nutrient cycling processes. We will then consider the interactive effects of multi-factor global changes and assess the promises and challenges of interpreting biological responses at the ecosystem level. Finally, we will investigate how experimental results can be integrated within models that describe and predict ecosystem function at a global scale. Throughout the course, we will consider how understanding gained from manipulative experiments can be used to inform and prioritize climate change mitigation strategies. Discussions and writing assignments will focus on reading and critiquing the scientific literature. Writing assignments will include two short writing assignments (3 pages each) and a final research proposal (6 pages), as well as formal written peer review. Students will gain experience revising scientific writing.

Requirements/Evaluation:  Writing assignments will include two short writing assignments (3 pages each) and a final experimental/grant proposal (6 pages), as well as formal written peer review. Students will gain experience revising scientific writing.

Prerequisites:  BIOL203 (Ecology) or BIOL302 (Communities and Ecosystems) or BIOL329 (Conservation Biology)

Enrollment Limit: 12

Enrollment Preferences:  Senior Biology majors

Expected Class Size: 12

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D3)

Not offered current academic year

BIOL 430  (S) Genome Sciences: At the Cutting Edge  (WS)

Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in "metagenomics" (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and "metatranscriptomics" (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Requirements/Evaluation:  five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic

Prerequisites:  BIOL 202

Enrollment Limit: 10

Enrollment Preferences:  open to juniors and seniors; senior Biology majors who have not taken a 400-level course

Expected Class Size: 10
BIOL 432 (F) Evolutionary Genetics
The synthesis of evolutionary processes with the mechanistic understanding of genetics has lent insight into many mysteries of life. The goal of this course is to explore the interface between evolution and genetics to make sense of fundamental biological processes. For example, why do we expect that male and female offspring occur in 50:50 ratios? How and why do unusual sex-ratios occur? Other topics include: conflict among genes, evolution of allelic dominance, adaptation at the molecular level, and genetics of speciation. Class discussion and written assignments will emphasize critical evaluation and synthesis of the scientific literature.

Requirements/Evaluation: class participation and several short papers
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: seniors who have not taken a 400 level course, then juniors and Biology majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3)
Not offered current academic year

BIOL 435 Causes of the obesity epidemic
The prevalence of a host of metabolic diseases has increased dramatically in recent decades. The causes underlying these increases remain hotly contested. During this course we will discuss primary literature to better understand the mechanisms by which our body regulates energy metabolism and how this is shaped by genetics and evolution. Subsequently, we will explore how our metabolic environment has been altered in modern society and try to figure out what mechanisms should be targeted to reverse the obesity epidemic.

Requirements/Evaluation: Evaluation will be based on four 4-5 page papers and class participation.
Prerequisites: BIOL 205 or Permission of Instructor.
Enrollment Limit: 12
Enrollment Preferences: Senior Biology majors who have not taken a 400-level course, then junior Biology majors.
Expected Class Size: 12
Grading:
Distributions: (D3)
Not offered current academic year

BIOL 454 (F) Climate Change Physiology
Cross-listings: BIOL 454 ENVI 454
Primary Cross-listing
Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with
rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

**Class Format:** Synchronous discussions with in-person and remote option. Satisfies the distribution requirement for the Biology major.

**Requirements/Evaluation:** Evaluation will be based on class participation and several short papers.

**Prerequisites:** BIOL 203 or BIOL 205, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Biology seniors who have not yet taken a 400 level course

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 454 (D3) ENVI 454 (D3)

**Attributes:** ENVI Natural World Electives

Not offered current academic year

---

**BIOL 455 (S) Neural Regeneration**

**Cross-listings:** NSCI 455 BIOL 455

**Primary Cross-listing**

Injury to the human nervous system can cause lasting impairment, but non-mammalian animals have prodigious capacity to regenerate neurons, regrow axons, and repair scars. What accounts for these differences? Regeneration can occur in multiple modes: replacement of injured neurons, repairs such as axonal regrowth to reconnect to a target structure, or repurposing existing neurons for new tasks through neural plasticity. We will explore the molecular foundations that underlie neuronal proliferation, neural plasticity, and inflammatory responses. We will consider the potential for translating these findings to inform treatments for humans who suffer from neural injury or neurodegenerative disease. Class discussions will focus on readings from the primary literature.

**Class Format:** Discussion, 3 hours per week

**Requirements/Evaluation:** Evaluation will be based on class participation, brief weekly responses, and four short research proposals.

**Prerequisites:** BIOL 212/NSCI 201 or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Biology seniors who have not yet taken a 400 level course and Neuroscience senior concentrators who need a Group A elective.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 455 (D3) BIOL 455 (D3)

**Attributes:** NSCI Group A Electives

Not offered current academic year

---

**BIOL 493 (F) Senior Thesis Research: Biology**

Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in their lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory. This is part of a full-year thesis (493-494).

**Grading:** yes pass/fail option, yes fifth course option
Unit Notes: senior majors and concentrators are required to participate in Biology Colloquium, which is scheduled for most Fridays at 1:10 pm

Distributions: (D3)

Fall 2021

HON Section: 01  F 1:10 pm - 2:25 pm  Lois M. Banta

**BIOL 494 (S) Senior Thesis Research: Biology**

Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory. This is part of a full-year thesis (493-494).

**Grading:** no pass/fail option,  yes fifth course option

Distributions: (D3)

Spring 2022

HON Section: 01  F 1:10 pm - 2:25 pm  Lois M. Banta

**BIOL 499 (S) Biology Colloquium**

Scientists from around the country who are on the cutting edge of biological research come to talk about their work. Students of Biology at any level are welcome.

**Grading:** non-graded

Unit Notes: this is not a for-credit course; registration is not necessary to attend

Distributions: No divisional credit

Not offered current academic year

Winter Study -----------------------------------------------

**BIOL 21 (W) Science Beyond Williams**

Science Beyond Williams allows upperclassman to pursue scientific research off-campus at a non-profit organization, government agency, medical school, or research university. In consultation with faculty, the student will find a mentor in whose lab s/he will work in WSP and a Williams faculty member who will offer guidance before and during WSP.

**Class Format:** WSP Project

**Requirements/Evaluation:** 10-page paper and post-WSP public presentation to a relevant department or program on the goals and accomplishments of the project

**Prerequisites:** two semesters of relevant course work in science and/or mathematics

**Enrollment Limit:** 10

**Grading:**  pass/fail only

Not offered current academic year

**BIOL 22 (W) Introduction to Biological Research**

An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

**Class Format:** Independent study

**Prerequisites:** none
Enrollment Limit: POI
Grading: pass/fail only
Not offered current academic year

BIOL 31 (W) Senior Thesis: Biology
To be taken by students registered for Biology 493, 494.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year

BIOL 99 (W) Independent Study: Biology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
CHEMISTRY (Div III)
Chair: Professor Sarah Goh

- Anthony J. Carrasquillo, Assistant Professor of Chemistry
- Amy Gehring, Professor of Chemistry, Chair of Biochemistry Program
- Christopher Goh, Professor of Chemistry, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion
- Sarah L. Goh, Chair and Professor of Chemistry
- Kerry-Ann Green, Assistant Professor of Chemistry
- Katie M. Hart, Assistant Professor of Chemistry
- Jenna MacIntire, Lecturer in Chemistry
- Amnon G Ortoll-Bloch, Postdoctoral Fellow in Chemistry
- Lee Y. Park, William R. Kenan, Jr. Professor of Chemistry
- Enrique Peacock-López, Halford R Clark Professor of Natural Sciences
- Bob Rawle, Assistant Professor of Chemistry
- Jennifer K. Rosenthal, Instructor in Chemistry
- Thomas E. Smith, Professor of Chemistry
- Laura R. Strauch, Lecturer in Chemistry
- John W. Thoman, J. Hodge Markgraf Professor of Chemistry
- Ben W. Thuronyi, Assistant Professor of Chemistry
- Amanda K. Turek, Assistant Professor of Chemistry

MAJOR

Through a variety of individual courses and sequential programs, the department provides an opportunity for students to explore the nature and significance of chemistry, an area of important achievement in our quest for knowledge about ourselves and the world around us. The student of chemistry is able to become aware of the special viewpoint of chemists, the general nature of chemical investigation, some of its important results, how these results are expressed, and something of their significance within the fields of science and in the area of human endeavor as a whole. The Chemistry major provides excellent preparation for graduate study in chemistry, biochemistry, chemical engineering, environmental science, materials science, medicine, and the medical sciences.

A major in chemistry can be achieved in several ways, preferably beginning in the student’s first year at Williams, but also beginning in the sophomore year. Building on a foundation in general chemistry, organic chemistry, and physical chemistry, a student elects additional advanced courses to complete a major that is consistent with their background in other sciences, interests, and goals. A student’s program might emphasize biochemistry, organic chemistry, physical chemistry, or inorganic chemistry, with additional courses available in analytical chemistry, environmental science, and materials science. Students considering a major in chemistry should consult with a member of the department as early as possible in order to plan a program which best suits their interests and abilities and which makes full use of their previous preparation.

All students begin their study in the department with either Chemistry 151, 153, or 155. Placement at the introductory level is based upon performance on the departmental placement test results and consultation with the chair; results of the College Board Advanced Placement Test or the International Baccalaureate Exam are also taken into account.

The first year is completed with Chemistry 156. In the second year at the introductory level, students take Chemistry 251 (or 255) and Chemistry 256 (those students who complete 155 are exempted from 256). Completion of a Chemistry major requires either nine semester chemistry courses or eight semester chemistry courses plus two approved courses from among the following: Biology 101; Computer Science 134; Mathematics 130, 140, 150, 151; Physics 131, 141; or any courses in these departments for which the approved courses are prerequisites. CHEM 155 counts for two courses toward the major, but a single course toward graduation credit. For the Class of 2022: starting at the 300 level, at least TWO of the courses taken must have a laboratory component. For the Class of 2023, Class of 2024, and Class of 2025: starting at the 300 level, at least THREE of the courses taken must have a laboratory component. For all majors, at least one must be selected from Chemistry 361, 364, 366, or 367. (The specific course elected,
in consultation with the chair or major advisor, will depend on the student’s future plans.) In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

**Foundational Courses**

**First Year**
- **Fall**: 151, 153 or 155 Gateway courses
- **Spring**: 156 Organic Chemistry: Introductory Level

**Second Year**
- **Fall**: 251 (or 255) Organic Chemistry: Intermediate Level
- **Spring**: 256 Advanced Chemical Concepts (or 300-level if completed 155)

**Elective Courses**
- 319 Integrative Bioinformatics, Genomics, and Proteomics Lab
- 321 Biochemistry I-Structure and Function of Biological Molecules
- 322 Biochemistry II-Metabolism
- 324 Enzyme Kinetics and Reaction Mechanisms
- 326 Chemical and Synthetic Biology
- 335 Inorganic/Organometallic Chemistry
- 336 Materials Chemistry
- 338 Bioinorganic Chemistry: Metals in Living Systems
- 341 Toxicology and Cancer
- 342 Synthetic Organic Chemistry
- 343 Medicinal Chemistry
- 344 Physical Organic Chemistry
- 348 Polymer Chemistry
- 361 Quantum Chemistry and Chemical Dynamics
- 364 Instrumental Methods of Analysis
- 366 Thermodynamics and Statistical Mechanics
- 367 Biophysical Chemistry
- 368T Computational Chemistry and Molecular Spectroscopy
- 373 Environmental Organic Chemistry

**Independent Research Courses**
- 393-W31-394 Junior Research and Thesis
- 397, 398 Independent Study, for Juniors
- 493-W31-494 Senior Research and Thesis
- 497, 498 Independent Study, for Seniors

For the purpose of assisting students in selecting a program consistent with their interests and possible continuation of their studies at the graduate level, the following groupings of electives and faculty advisors are suggested. However, a case can be made for selecting courses from the different groups.

**Biochemistry**: Chemistry 321, Chemistry 322, Chemistry 324, Chemistry 326, Chemistry 341, Chemistry 364, Chemistry 367. Students interested
in biochemistry should consult with Professors Gehring, Hart, Rawle, or Thuronyi.

**Organic Chemistry:** Chemistry 341, Chemistry 342, Chemistry 343, Chemistry 344, Chemistry 348, Chemistry 364, Chemistry 361, Chemistry 366, Chemistry 373. Students interested in organic chemistry should consult with Professors S. Goh, Green, Smith, Thuronyi, or Turek.

**Physical and Inorganic Chemistry:** Chemistry 335, Chemistry 336, Chemistry 338, Chemistry 361, Chemistry 364, Chemistry 366, Chemistry 368T. Students interested in physical chemistry should consult with Professors Carrasquillo, Peacock-López, or Thoman. Students interested in inorganic chemistry should consult with Professors C. Goh, Green, or Park. Students interested in materials science should consult with Professors S. Goh or Park. Students interested in environmental chemistry should consult with Professor Carrasquillo.

While any accepted route through the major would permit a student to proceed to graduate study in chemistry, four electives should be considered a minimum, and at least a semester of research is strongly recommended.

The department’s curriculum is approved by the American Chemical Society (A.C.S.), a professional body of academic, industrial, and research chemists. The A.C.S. suggests the following courses for someone considering graduate study or work in chemistry or a related area: 151 (153 or 155), 156, 251 (255), 256, 321, 335, 364, and 2 physical chemistry courses from 361, 366, or 367, and at least 4 courses (two of which must have a laboratory component) from our remaining upper level electives: 319, 322, 324, 326, 336, 338, 341, 342, 343, 344, 348, 361, 366, 367, 368T, 493, 494, 497, 498, BIMO 401. In addition, students are strongly encouraged (though not required) to pursue independent research in some form. Students completing these requirements can be designated Certified A.C.S. Majors.

**BIOCHEMISTRY AND MOLECULAR BIOLOGY (BIMO)**

Students interested in Biochemistry and Molecular Biology should consult with the general statement under the Biochemistry and Molecular Biology Program (BIMO) in the Courses of Instruction. Students interested in completing the BIMO program are also encouraged to complete the biochemistry courses within the chemistry major by taking 321, 322, 324, and 367 in addition to the first and second year required courses.

**BIOINFORMATICS, GENOMICS, AND PROTEOMICS (BIGP)**

Students interested in Bioinformatics, Genomics, and Proteomics should consult the general statement under Bioinformatics, Genomics, and Proteomics in the Courses of Instruction. Students interested in these areas are also encouraged to complete the biochemistry courses within the chemistry major by taking 319, 321, 322, 324 and 367 in addition to the first and second year required courses.

**THE DEGREE WITH HONORS IN CHEMISTRY**

The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

Chemistry majors who are candidates for the degree with honors take the following in addition to a major outlined above:

Chemistry 493-W31-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are mastery of fundamental materials and skills, ability to pursue independent study successfully, and demonstrated student interest and motivation. In addition, to enroll in these courses leading to a degree with honors, a student must have at least a B- average in all chemistry courses or the permission of the chair. At the end of the first semester of the senior year, the department reviews the student’s progress and determines whether the student is a candidate for a degree with honors. The designation of a degree with honors in Chemistry or a degree with highest honors in Chemistry is based primarily on a departmental evaluation of the accomplishments in these courses and on the quality of the thesis. Completion of the research project in a satisfactory manner and preparation of a well-written thesis usually results in a degree with honors. In cases where a student has demonstrated unusual commitment and initiative resulting in an outstanding thesis based on original results, combined with a strong record in all of their chemistry courses, the department may elect to award a degree with highest honors in Chemistry.

**EXCHANGE AND TRANSFER STUDENTS**

Students from other institutions wishing to register for courses in chemistry involving college-level prerequisites should do so in person with a member of the Chemistry Department. Registration should take place by appointment during the spring semester prior to the academic year in which courses are to be taken. Students are requested to have with them transcripts of the relevant previous college work.

**COURSES FOR NON-MAJORS WITH NO PREREQUISITES**

Students with principal interests outside of the sciences may extend a secondary school foundation in chemistry by electing a basic two-semester introductory course of a general nature or they may elect semester courses designed for non-majors. All courses in chemistry satisfy the divisional distribution requirement.

**STUDY ABROAD**

Students who wish to complete a chemistry major (or chemistry requirements for pre-medical study) as well as to study abroad during their junior year are encouraged to begin taking chemistry in their first semester at Williams, and should consult with members of the department as early as possible.
FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We can give provisional approval in some cases if enough detail is available, but we always ask to see the details after the course is completed before signing off on the major credit.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and complete description of laboratory program. The biggest question is whether or not there is a lab component of the course and whether it is sufficient to fulfill the equivalent lab experience of Williams courses.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No official restrictions, but we advise our students to take the majority of their chemistry courses at Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. We have several special requirements. Only one non-lab class can be used toward the upper-level major requirements. This is usually the restriction that causes difficulty with study abroad—where appropriate lab courses may not be available. One of the lab courses must also meet our departmental “quantitative requirement.” In principle, this could be met by a course taken abroad, but we would likely be more conservative in authorizing this equivalency.

Are there specific major requirements that cannot be fulfilled while on study away?

No. In principle, all major requirements could be filled abroad, but laboratory programs abroad are not always sufficiently rigorous to meet our standards. We look for at least 40 hours of wet-lab time for the lab component. Importantly, this cannot be work in a professor’s research lab, but must be “exercises” giving our students practice with standard techniques and methods of analysis.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The lab requirements that I’ve mentioned above are the main complicating factors. Also our first two years of (“introductory”) chemistry courses are taught in an unconventional way. If a student had not yet completed all four of those courses before studying abroad, they would need to be aware of special timing that might complicate things. For our first two years of instruction, we teach one semester of introductory chemistry followed by two semesters of organic chemistry, and top things off with a final semester of a course that is somewhat specific to Williams. There are ways to take “equivalent” courses elsewhere, but we would need to work very closely with the student to ensure that all of the pieces fit together appropriately.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date, but there may have been times when the lab component of a course was not sufficient and we were only able to assign major credit for a non-lab course instead of a course-with-a-lab.

CHEM 113 (F) Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science

In this course, designed for students who do not plan to major in the natural sciences, we use a case-oriented approach to explore selected topics of forensic science. These include: (1) the scientific and technological foundation for the examination of physical, chemical, and biological items of evidence, and (2) the scope of expert qualifications and testimony, the legal status of scientific techniques, and the admissibility of the results in evidence. The analysis of trace evidence, including glass, soil, gunpowder residues and bullet fragments, and inorganic and heavy metal poisons are discussed through an understanding of the basic concepts of chemistry and analytical chemistry. Forensic toxicology and pharmacology are applied to the analysis of alcohol, poisons, and drugs based upon the principles of organic chemistry and biochemistry. The characterization of blood and other body fluids necessitate an understanding of serology and molecular genetics. The cases which stimulate the exploration of these areas include: the John and Robert Kennedy assassinations, the Jeffrey MacDonald case (Fatal Vision), the Wayne Williams case, the deaths of celebrities Marilyn Monroe, John Belushi, and Janis Joplin, the authenticity of the Shroud of Turin, the Casey Anthony case, the Tylenol poisonings, and the identity of Anastasia. Interactive demonstration sessions provide an appreciation of scientific experimentation in general and the work of a crime lab in particular. It includes an analysis of evidence and provides an opportunity to learn forensic techniques such as chromatography (for ink, drug, and fire accelerant...
analysis), spectroscopy (for alcohol and drug analysis), and electrophoresis (for DNA fingerprinting).

Class Format: three times per week

Requirements/Evaluation: problem sets and/or quizzes, hour tests, a final exam, and papers

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences; not open to students who have taken CHEM 151, 153, 155, 156/251, or 256

Enrollment Limit: 30

Enrollment Preferences: seniors and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Not offered current academic year

CHEM 114 (S) The Science Behind Materials: Shaping the Past and Future of Society  (QFR)
We are surrounded by materials. They have fulfilled human needs since ancient times. From Phoenician glass to flexible OLED displays, materials have impacted society and changed the way humans lead their lives. What makes materials the way they are? Why are some brittle while others are ductile? How can we design materials with specific properties that will solve tomorrow's problems? To answer these questions, we have to think about materials at the atomic scale, looking at how their smallest building blocks organize into specific structures. In this course, we will explore the relationships between structure, processing, and properties for a range of materials including metals, ceramics, polymers, and composites. We will talk about some of the cutting-edge research that materials scientists are working on today, concluding with an outlook to potential applications of emerging technologies.

Requirements/Evaluation: Weekly quizzes and problem sets, two exams, and a final paper

Prerequisites: not appropriate for CHEM, BIOL, PHYS majors, or for those who have taken CHEM 151, 153, or 155

Enrollment Limit: 20

Enrollment Preferences: juniors and seniors; not appropriate for CHEM, BIOL, PHYS majors, or for those who have taken CHEM 151, 153, or 155

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2022
LEC Section: 01 MR 1:10 pm - 2:25 pm Amnon G Ortoll-Bloch

CHEM 115 (F) AIDS: The Disease and Search for a Cure
Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus than any other known pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine has now waned and HIV strains that are resistant to drug therapies are common. We are now three decades into the AIDS pandemic and the World Health Organization estimates that there are more than 34 million HIV-infected persons worldwide. After an introduction to chemical structure, we examine the molecular biology of the HIV virus, the molecular targets of anti-HIV drugs, and the prospects for a cure. We look at how HIV-1 interacts with the human immune system and discuss prospects for developing an effective HIV vaccine.

Class Format: three hours per week

Requirements/Evaluation: problem sets, a midterm, quizzes, a final exam, and a presentation/discussion

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences

Enrollment Limit: 45

Expected Class Size: 45
CHEM 117  (S)  Roses are Red, Violets are Blue: The Origins, Perception, and Impact of Color  (QFR)

Have you ever been tickled pink? Felt blue? Seen red?, Been green with envy? The course will consider color, starting with the physical and chemical origins of color (the electromagnetic spectrum, the absorption and emission of electromagnetic radiation, refraction, diffraction, incandescence, fluorescence, phosphorescence, iridescence). We will develop an understanding of chemical bonding and how that influences color. We will cover how we measure and describe color from a scientific perspective as well as how we can generate materials and devices with different color properties (liquid crystal displays, light emitting diodes for instance). From there we will discuss pigments used in works of art and textiles over time, the characteristics that make certain pigments suitable for particular applications. If we have time, we will touch on the historical and cultural impacts and meanings of different pigments and hues, the biological perception of color, and some color theory.

Class Format: There may be some brief laboratory exercises, we won't use the scheduled lab blocks every week, but we will use some.

Requirements/Evaluation: exams, problem sets, quizzes, a paper, brief laboratory exercises, and a final exam

Prerequisites: non-science students; students who have taken any introductory chemistry or physics courses are ineligible

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This course will require students to become comfortable with some quantitative descriptions of light and its interaction with matter.

Not offered current academic year

CHEM 151  (F)  Introductory Chemistry  (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibria, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: electronic and written weekly problem set assignments, laboratory work and analysis, quizzes, two tests, and a final exam

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement); incoming first-year students are required to speak with a faculty member during First Days.

Enrollment Limit: 16/lab

Enrollment Preferences: first-year students; students who have studied chemistry for one or more years are directed to CHEM 153 or 155

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 151 may be taken concurrently with MATH 102—see under Mathematics; CHEM 151 or its equivalent is a prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

Distributions: (D3)  (QFR)
