This course covers topics and approaches salient to contemporary Asian American Studies as an interdisciplinary field of scholarship and activism. Drawing on primary source documents, scholarship, visual media, and creative work, we will look at cross-racial solidarity and organizing, anti-Asian exclusion and xenophobia, war and refugee communities, public and mental health, and immigration histories and experiences. We will ground our inquiry in the social movements from which the field emerged in the late-1960s and 1970s, then move on to address foundational terms for Asian American and Pacific Islander scholars, such as *race*, *bodies*, *citizenship*, *empire*, *transnationalism*, and *indigeneity*. Throughout the course we will stay attentive to overlapping histories between Asian American and Native, Indigenous, Black, and Latinx people and communities. Students will also have a number of opportunities to practice analytic writing, do creative work, engage in personal reflection, and participate in community building.

Requirements/Evaluation: Weekly: an average of 75 pages of reading (or watch a film), participate in class discussions. 5x per semester: 2-page writing or creative assignments, including letter writing, conducting an interview, analyzing a passage from a historical document, or close read a scene from a film or story. Final: A 5-7-page final paper, small group project, or individual project.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: If over enrolled: first-year students, AMST majors, or students with demonstrated interest in Asian American studies

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course defines "Asian" and "Asian American" as categories of social difference created through historical conditions (e.g. migration, imperialism) that change over time. These terms also refer to forms of personhood with racial, national, and ethnic meaning determined by unequal distribution of power and resources. Students in the course are asked to understand, engage, and articulate these differences, historical, and social process.

AMST 166 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: REL 166 AMST 166 COMP 166 ENGL 268

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 166 (D2) AMST 166 (D2) COMP 166 (D1) ENGL 268 (D1)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

AMST 200 (S) Ethnographic Directions in American Studies (DPE)

This course introduces students to the practice and politics of ethnography, broadly defined as the study and representation of people, culture, and society. Our approach will be post-positive and interpretive, with attention to the social stakes of ethnographic research and methodology writ large. We begin the semester by looking at the history of ethnographic methodologies in anthropology and sociology, and then examine efforts to decolonize ethnography. We then read several examples of decolonial, feminist, or otherwise critical ethnographic research related to marginalized or minoritized groups in the U.S. -- such as undocumented migrants from Latin America, formerly unhoused Black girls, Diné fighting resource extraction on the reservation, and Cambodian refugees in the Bronx -- along with articles that illuminate issues of power, observation, consent, and representation in ethnographic research. Through readings, discussion, and engagement in ethnographic exercises, students will gain familiarity with the different phases or components of conducting ethnographic research, while also considering different styles of ethnographic production, including creative work. While this course is designed to look specifically at ethnographic directions that intersect with the interdisciplinary field of American Studies, it is open to any student interested in the study of pressing social issues (such as the prison-industrial complex, refugee resettlement, and drug addiction) and creating communities of mutual care and solidarity for surviving, fighting, and quite possibly, solving them.

Requirements/Evaluation: Weekly: Average 75 pages of reading; participation in class discussions. Every 3-4 weeks: research assignments. Once per semester: group presentation. End of semester: one 5-page paper.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Enrollment preferences if over enrolled: AMST majors, students seeking methods courses

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course covers ethnographic approaches to understanding social relations and cultural processes, with particular attention to scholarship in which power relations; structural analysis; and race and gender are central.

AMST 202 (F)(S) Introduction to Racial Capitalism (DPE) (WS)

Cross-listings: AMST 202 AFR 209

Primary Cross-listing

The historical relationship between race and capitalism is one of the most enduring debates in U.S. historiography, shaping modes of inquiry and analysis across history, law, economics, sociology, anthropology, and other fields. This course seeks to introduce students to the concept of "racial

capitalism"--which rejects treatments of race (and racism) as external to the so-called real workings of capitalism--as a way to understand this relationship and as an activist hermeneutic through which to identify and respond to the conditions that American Studies must reckon with. Students will gain familiarity with the global history of racial capitalism and the power of the concept itself through secondary sources and a wide range of primary sources, and through engaged discussion and short essays. Throughout the course, we will pay special attention to the cultural politics, political geographies, and historical development of racial capitalism, thus attending to how the social relations of racial capitalism have been known, lived, and resisted across time and space. The course is organized around three key themes: the land question; race, capitalism, and nation; and the banalities of racial capitalism. Across these themes, the course will address such issues and topics as North American settler colonialism, circum-Caribbean plantation slave and "Coolie" labor, mass incarceration, the subprime mortgage crisis, and the War on Terror. The course will do so through and against a history of racial capitalism that privileges the U.S. nation-state in particular. By the end of this course, students should be able to: detail and analyze the historical development of and resistance to racial capitalism, doing so in relation to the global itineraries of racial slavery, settler colonialism, imperialism, and white supremacy; trace the history of the concept of racial capitalism itself; and identify how the concept continues to shape the field of American Studies.

Requirements/Evaluation: Evaluation will be based on the following requirements: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Essay 1--First submission (5 pgs): 10%; Essay--Revision (5 pgs): 10%; Essay 2 (5 pgs): 15%; Essay 3 (5 pgs): 15%.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 202 (D2) AFR 209 (D2)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

AMST 206 (S) Designer Genes (DPE) (WS)

Cross-listings: WGSS 208 ENGL 208 STS 208 AMST 206

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with

hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages), short presentation, longer final researched paper/project (8-10 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies, American Studies, English majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 208 (D2) ENGL 208 (D1) STS 208 (D2) AMST 206 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts; two four-to-five-page graded papers; one descriptive digital assignment (the Story Map); and a final researched paper (8-10 pages)--written in stages. Students receive critical feedback on written assignments through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next.

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics' case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

SEM Section: 01 TR 9:55 am - 11:10 am Bethany Hicok

AMST 209 (F) Introduction to Black, Brown, and Queer Theory (DPE)

Have you ever tried to relate your experiences, rooted in your own complex identities, history, and social networks, to those of others you perceive as different and perhaps allied, but found you lacked some fundamental vocabulary? This is a common problem, even for critical theorists who take as their object of study political, affective, and epistemological structures of difference and power. Critical race, postcolonial, Indigenous, and queer theories have often centered the relationship between the normative and non-normative, between straight and queer, colonizer and colonized, and white and black. Connections between the differently non-normative can sometimes be pushed to the periphery. But what if we were to center that periphery? What views of complex power structures and new avenues of thought and solidarity would arise if we took as our starting point the social and theoretical interconnectedness and overlap of black, brown, and queer folks? This course will serve as an introduction to critical race, postcolonial, Indigenous, and queer theories as conceptually and phenomenologically interlocking and allied fields. By reading with theorists in all these traditions and at their intersections, we will explore how blackness, indigeneity, and brownness are constructed and function in the context of colonialism and settler colonialism, how differently racialized bodies are sexed and sexualized, and how queerness as method can speak across these issues. No background in critical theory is required for this course. We will focus on how to read and discuss theory, and how to think holistically about the structures that work to keep us divided.

Requirements/Evaluation: attendance and class participation, two 4-page reflection papers, and a final creative project (TBD with instructor) or take-home exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course introduces students to theories of difference and power, such as critical race, postcolonial, Indigenous, and queer theories. The aim of the course is to establish the skills and frameworks needed to think about how these categories and theories interact, overlap, and constitute one another.

AMST 233 (S) Memory and Forgetting (DPE)

Cross-listings: AMST 233 SOC 230

Secondary Cross-listing

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 233 (D2) SOC 230 (D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

AMST 237 (S) Islam in the United States: Race, Religion, Politics (DPE)

Cross-listings: REL 237 AFR 237 AMST 237

Secondary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, comics, documentaries, films, historical primary-source documents, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, midterm essay, final exam/essay

AMST 242 (S) Americans Abroad (DPE)**Cross-listings:** ENGL 250 COMP 242 AMST 242**Secondary Cross-listing**

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250 (D1) COMP 242 (D1) AMST 242 (D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

AMST 245 (F) Race, Power, & Food History (DPE)**Cross-listings:** HIST 265 ENVI 246 AMST 245**Secondary Cross-listing**

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

AMST 249 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: GBST 246 THEA 246 AMST 249

Secondary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists *do* politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 246 (D1) THEA 246 (D1) AMST 249 (D2)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

Fall 2021

AMST 260 (F) Indigenous Feminisms (DPE)

Cross-listings: AMST 260 WGSS 262

Primary Cross-listing

Indigenous women, Two Spirit and trans people have always stood on the frontlines of decolonization struggles in the Americas, from treaty negotiations to self defense against settler invasion, to the Standing Rock Sioux struggle against the Dakota Access Pipeline, to creating independent databases and mutual support networks amongst the loved ones of Missing and Murdered Indigenous Women, Girls, Trans and Two Spirit people. This course maps out some of the intellectual and political interventions of Indigenous feminists in analyzing and struggling against genocide, heteropatriarchy, conquest and racial capitalism in settler states like the US and Canada. This course will focus on how Indigenous women, Two Spirit and trans people have analyzed and struggled against the imposition of colonial constructs of gender and sexuality that mark Indigenous lives and lands as sites of extraction. It will examine how carceral regimes of control produced by the intertwined histories of conquest and Transatlantic slavery have been imposed upon Indigenous lives through the child protection system and the prison industrial complex. Students will be invited to consider how Indigenous feminist practices 'make a future' (Brant 1981) against and beyond the settler state. This course aims to familiarize students with historical and contemporary Indigenous feminist works, as well as provide an overview of Indigenous feminist political formations, poetry, fiction, and making practices. Pedagogically, this course will also facilitate the development and sharpening of skills in social analysis, writing and argumentation.

Class Format: Hybrid online/in-person

Requirements/Evaluation: Three one page reading responses, 30%; One two-page critical peer response 10%; One Final paper, 50%; Course participation and attendance 10%

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: American Studies majors or potential majors have first preference, WGSS majors have next priority.

AMST 308 (S) Angela Davis: Political Theory, Activism, and Alliances (DPE) (WS)

Cross-listings: LEAD 319 PSCI 376 INTR 320 AMST 308

Secondary Cross-listing

This seminar examines the political thought, activism, and iconography of abolitionist Angela Davis. The seminar involves a critical engagement with the philosopher, former political prisoner, and their relationship with other theorists, authors and activists. Readings include: *Angela Davis: An Autobiography*; *Soledad Brother: The Prison Letters of George Jackson*; *The Morning Breaks: The Trial of Angela Davis*; *Women, Race, and Class*; *If They Come in the Morning*.

Requirements/Evaluation: Requirements: students attend each seminar class and come prepared to discuss the readings. Papers are due by email 24hours before the seminar begins.

Prerequisites: Preferences: Juniors and Seniors who have taken courses in Africana Studies, American Studies, Political Science, Philosophy.

Enrollment Limit: 19

Enrollment Preferences: Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 319 (D2) PSCI 376 (D2) INTR 320 (D2) AMST 308 (D2)

Writing Skills Notes: Three thesis papers at five pages each will receive critical feedback from the professor; one of the three papers will be revised with critical feedback from professor and peers, accompanied by a one-page statement explaining student's revisions; one keyword glossary where students define their key terms used in the paper; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: This course examines political activism in the 1960s-1970s during the Cold War in which the civil rights, black power and student anti-war movements challenged traditional US domestic and foreign policies. Examining the differential powers of university Regents, governors, presidents, and police forces and prison administrations in relation to social justice movements led by people under the age of thirty, we examine the structures of institutional power and the agency of cadre theorists.

AMST 321 (F) Unsettled Futures: Time, Crisis, and Science Fiction from the Margins (DPE)

Cross-listings: STS 321 AMST 321

Primary Cross-listing

Societies around the globe are now confronting a triple crisis that threatens not only political orders but also the very existence of certain forms of life: (1) financial collapse(s) that have increased the awareness and severity of mass inequality, (2) climate change and mass extinctions, and (3) the rise of white supremacy and ethno-nationalisms that threaten BIPOC lives and representative democracies. These material and political challenges have depleted many of the cultural resources that enable imagining non-apocalyptic futures. Yet, these crises are not novel. Many groups in the periphery--geographic, economic, and cultural--were and are already living through the uneven distribution of the apocalypse. Science fiction (SF) has emerged as a privileged symbolic field for the expression of hopes and anxieties that drive both culture and tech industries. Whether seen as a form of productive pessimism or liberatory theory, SF from the margins is deployed as a political tool for enacting change in the present. In this course, we will survey the history of SF as a variable and theoretical orientation constituted through the unfolding of uneven global encounters. We will analyze SF in the Cold War, Anthropocene, decolonization movements, and postcolonial and Indigenous landscapes, reading major works in SF and science and technology studies (STS) that address the politics of crisis, apocalypse, and global futures. In addition to novels and short stories, this course will incorporate film, graphic novels, music videos, video games, and other science fiction subgenres.

Requirements/Evaluation: Class discussion, approximately 10 pages of creative writing, 5 page analysis paper of your classmate's creative writing, final paper or project (5-8 page paper or equivalent)

Enrollment Limit: 15

Enrollment Preferences: Students who have taken American Studies 101 and/or Science and Technology Studies 101

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

AMST 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: AFR 347 AMST 332 ENVI 332

Primary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%

AMST 342 (S) Race, Development, and Food Sovereignty (DPE) (WS)

Cross-listings: AFR 349 ENVI 349 AMST 342

Primary Cross-listing

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

AMST 345 (S) Capitalism and Racism in the American Context and Beyond: A Global Approach (DPE)

Cross-listings: AMST 345 AFR 353 GBST 344

Primary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the debate about the texts assigned and regular contribution to the seminar discussions. In-class short oral presentations, weekly short responses reacting to class discussion and texts, and a final research paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 25%; In-class short oral presentations 10%; Final Research Paper (12-15 pages) 40%

Prerequisites: None, open to all.

Enrollment Limit: 20

Enrollment Preferences: American Studies majors, sophomores, and higher

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 350 (F) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 AFR 331 WGSS 318

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

SEM Section: 01 Cancelled

AMST 351 (F) Queer Tongues & Lavender Linguistics (DPE)

Cross-listings: ANTH 350 AMST 351 WGSS 350

Secondary Cross-listing

This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

Requirements/Evaluation: IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures

Prerequisites: None; prior coursework in WGSS may be helpful, but is not required

Enrollment Limit: 15

Enrollment Preferences: WGSS majors; short statements of interest will be solicited in the event of overenrollment

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 350 (D2) AMST 351 (D2) WGSS 350 (D2)

Difference, Power, and Equity Notes: This course examines the centrality of power in communication as broken down along axes such as sex, gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

AMST 352 (S) Global Health in the Transpacific (DPE)

Cross-listings: AMST 352 STS 311 ASIA 352

Secondary Cross-listing

East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia's claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees' resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper

Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.

Enrollment Limit: 12

Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.

AMST 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)

Cross-listings: STS 353 AMST 353

Primary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 353 (D2) AMST 353 (D2)

Difference, Power, and Equity Notes: This course will explore how settler sciences have been used as a technology of difference making, dispossession, and genocide in United States history. It will also provide students a theoretical toolkit and historical perspective by which they can grapple with the fact that power structures like settler technoscience can be a source of both colonization and liberation.

AMST 401 (S) Policing Nations: Indigenous Nations and the Carceral State (DPE)

This course examines the birth of the prison on Indigenous lands - how the settler carceral state emerged from the legal and political architectures of conquest as well as from Transatlantic slavery. It examines the continuities between the prison, the reservation, the barracks, the plantation, Boarding Schools and foster homes as modes of incarcerating Indigenous life and movements for liberation. To do so, we will be engaging with Indigenous legal theory, movements, and writings on the carceral state, including writings from incarcerated Indigenous intellectuals, Boarding School and foster care survivors, and feminists. Our approach will be rooted in the interdisciplinary practices of Native American and Indigenous Studies, American Studies, legal studies and political theory. This course strives to provide a history of the present through examining the relations, structuring presuppositions, discourses and material edifices of conquest and genocide on Turtle Island and for Indigenous nations in settler states across the globe. We will end by thinking with Indigenous feminist mappings of abolition and futures beyond the prison house of the settler state. The pedagogical aims of this course will be to illustrate the role of conquest, anti-Indigeneity and settler law in producing the contemporary prison system, and to introduce students to the broad canon of Indigenous legal theory and Indigenous legal traditions that do not proceed from carceral premises. It will aim to facilitate skills in primary source analysis, in proficiency with legal theory, in independent research, and critical analysis of different forms of the carceral state.

Requirements/Evaluation: Final Paper: 40%; Weekly Reading Responses 30%; Participation 10%; Seminar Presentations: 20%

AMST 404 (F)(S) New Works in Asian American Studies (DPE)

In this seminar, we will consider recent and/or recently intensifying debates, conversations, and intellectual directions in Asian American Studies. Topics may include settler colonialism; indigeneity, the Pacific, and the transpacific; war and refugee experiences; media, including video games; political participation, conservatism, and religion; affirmative action; sexual violence; mental health; and comparative and relational racialization e.g. scholarship at the intersection of Asian American, Latinx, Native American/Indigenous, and African American/Africana studies. We may also consider some new works of Asian American film and literature, and the criticism it generates. Course material will focus on scholarship that critically engage race, gender, sexuality, indigeneity, and/or disability as key terms. Students may be asked to develop a final project or paper based on one of the topics or books covered in the course; review a new work independently; or conduct an interview with an author. Students will gain an understanding of the field's recent concerns but also become familiar with the broader political, social, and cultural contexts from which they emerge.

Requirements/Evaluation: In-class participation, weekly response papers, in-class presentation of the reading, final paper or project

Prerequisites: AMST125 (Introduction to Asian American Studies) or equivalent from another unit e.g. WGSS

Enrollment Limit: 12

Enrollment Preferences: Senior American Studies majors; juniors or seniors with demonstrated interest in Asian American Studies (especially previous coursework); seniors majoring in LATS, Africana, WGSS, or doing related independent/Honors coursework

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course centers Asian American scholarship that foregrounds modes of social difference, systems of power, and formations of identity, solidarity, and community. Students consider how Asian American experiences are shaped by uneven and often unjust social processes, and aspects of identity, such as race, indigeneity, gender/sexuality, class, and religion. Students will also consider Asian American intersections with Indigenous/Native American, Latinx, and African American experience.

AMST 468 (F) Race, Empire, and the Birth of the American Century (DPE)

Cross-listings: HIST 468 AMST 468

Secondary Cross-listing

This course examines the birth of the "American Century" by studying the extension of Manifest Destiny to the Pacific, especially the American occupation of Hawaii and the Philippines.

Requirements/Evaluation: a series of weekly papers and a final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: must be a History or American Studies major

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Unit Notes: History department senior seminar

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 468 (D2) AMST 468 (D2)

Difference, Power, and Equity Notes: The course will cover the unequal power relations between Anglo Americans and Native Americans, Hawaiians, and Filipinos, as evidenced in the American occupation of land within our shores and the colonization of two island nations in the Pacific. We will study how the American presence in these areas affected how the original inhabitants were perceived and represented by Americans as witnessed in their presence at the Worlds Fairs of 1893 and 1904.

ANTH 101 (F)(S) How To Be Human (DPE)

Is there such a thing as 'human nature'? This course is an introduction to cultural anthropology (also known as social or socio-cultural anthropology),

the study of human society in all its profound variety. Through deep, sustained, systematic participation in and observation of a particular social context, anthropologists seek to comprehend and illuminate the human condition. Anthropologists' insights into the ways in which human institutions-language, economy, religion, social stratification, law, sexuality, art, the state, and many more-are culturally constructed and reproduced have transformed the way the world is understood. Puncturing ethnocentrism, anthropology's attentiveness to the ideas and practices of cultures in every part of the globe vastly enriches the archive of human answers to human problems. The distinctive methods of the discipline enable anthropologists to discover patterns and phenomena not discernible in other modes of enquiry. With such findings anthropologists are able to make critical interventions in public discourse and to demonstrate how deeply we are all shaped by cultural forces.

Requirements/Evaluation: weekly posts in response to readings, two group presentations, several short writing exercises, final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course is an introduction to cultural anthropology and deals extensively with race, ethnicity, religion, gender, etc., as cultural constructs creating social difference, hierarchies of power, and the creation of inequities in communities and societies. Readings in ethnography, social theory, and sociology are designed to give students a deeper appreciation of all these issues.

ANTH 240 (S) Work as a Cultural System (DPE)

"You know my reputation," sang Billy Joe Shaver, "I am everything I do." In many ways we are *homo faber*, the species that *makes* its world and we are defined by what we make, by the work we do. This course will undertake a broad survey of work as cultural systems across time and space. How do societies define work, how do they organize it? Who controls the processes of work, who controls the product of work? When is work an act of pure creation and when is it stultifying labor? How is work enabled and how is it compensated? What defines the difference between work and leisure and how are they valued? How does control over access to work, the organization of work, and the appropriation of its products determine difference, power, and equity in a society? These questions will guide an examination of work drawing on works of philosophy, history, ethnography, literature, and film examining people at work ranging from hunter-gatherers to tin miners, from slaves to corporate managers, from merchant mariners in the age of sail to physicians struggling to adapt to computerized medical records.

Requirements/Evaluation: students will compose several response papers, a take-home midterm exam and a final research paper of 15-20 pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Access to work, control over the work process, control over the fruits of labor, and compensation for work, are a principal means for creating and maintaining social difference, power, and equity. It is impossible to seriously study the nature of work without discussing these topics. By placing the universal experience of work in a broad spatial and temporal context students will discover an enhanced analytical ability to critically understand their own experiences of work and those of others.

SEM Section: 01 MWF 11:00 am - 12:15 pm Peter Just

ANTH 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: REL 269 STS 269 ASIA 269 ANTH 269

Secondary Cross-listing

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269 (D2) STS 269 (D2) ASIA 269 (D2) ANTH 269 (D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

ANTH 305 (S) The Gay Menagerie: Gay Male Subcultures (DPE)

Cross-listings: ANTH 305 WGSS 305 AMST 305 THEA 304

Secondary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggoty," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 305 (D2) WGSS 305 (D2) AMST 305 (D2) THEA 304 (D1)

Difference, Power, and Equity Notes: This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference."

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Spring 2022

ANTH 337 (F) Race, Sex & Gender in Brazil (DPE)

Cross-listings: ANTH 337 WGSS 337

Secondary Cross-listing

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: Students must also commit to registering for a winter study travel course with a trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

Requirements/Evaluation: research paper and its various components, participation

Prerequisites: none

Enrollment Limit: 7

Enrollment Preferences: students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The cost of the winter study travel portion is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 337 (D2) WGSS 337 (D2)

Difference, Power, and Equity Notes: This is a class about social justice movements and racial/gender/sexual diversity. It includes experiential learning devoted to these issues and engages questions related to the origins of inequality and prejudice in Brazil.

ANTH 350 (F) Queer Tongues & Lavender Linguistics (DPE)

Cross-listings: ANTH 350 AMST 351 WGSS 350

Secondary Cross-listing

This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

Requirements/Evaluation: IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures

Prerequisites: None; prior coursework in WGSS may be helpful, but is not required

Enrollment Limit: 15

Enrollment Preferences: WGSS majors; short statements of interest will be solicited in the event of overenrollment

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 350 (D2) AMST 351 (D2) WGSS 350 (D2)

Difference, Power, and Equity Notes: This course examines the centrality of power in communication as broken down along axes such as sex, gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

ANTH 371 (F) Medicine and Campus Health in Disruptive Times (DPE) (WS)

Cross-listings: STS 370 WGSS 371 ANTH 371

Primary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20

Enrollment Preferences: Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

SEM Section: 01 W 1:10 pm - 3:50 pm Kim Gutschow

ARAB 201 (F) Intermediate Arabic I (DPE) (WS)

This course will build on the students' acquisitions in Arabic 102 to consolidate their learning of the Modern Standard Arabic and one variety of spoken Arabic. In addition to expanding students' vocabulary and enhancing their communication skills, the course will deepen their knowledge and use of grammar in both speaking and writing. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing cultural appreciation of Arabic-speaking countries.

Requirements/Evaluation: quizzes, tests, homework, and active class participation

Prerequisites: ARAB 102 or placement test

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled preference will be given to those who intend to major or do a certificate in Arabic.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: This course involves a great deal of writing, ranging from vocabulary and grammar-focused exercises to written assignments about a variety of topics. Students will receive extensive and timely feedback on this written work.

Difference, Power, and Equity Notes: Any language is the locus of issues of difference, power, and equity. Students will learn about gender and pronouns. They will wonder why Arabic does not have a gender neutral pronoun. Students will understand how Arabic acts as a dominant language in places minority languages in the Middle East and North Africa. Students will emerge from the course with a critical understanding of Arabic language's politics.

ARAB 242 (S) Women, Gender, and Sexuality in Islam (DPE)

Cross-listings: REL 242 WGSS 242 ARAB 242

Secondary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and

negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 242 (D2) WGSS 242 (D2) ARAB 242 (D2)

Difference, Power, and Equity Notes: This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

ARAB 252 (F) Arab Women Memoirs: Writing Feminist History (DPE) (WS)

Cross-listings: WGSS 251 COMP 252 ARAB 252

Primary Cross-listing

This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (*A Mountainous Journey: An Autobiography*), Fatima Mernissi (*Dreams of Trespass: Tales of a Harem Girlhood*), Radwa Ashour (*The Journey*), Fadia Faqir and Shirley Eber (*In the House of Silence: Autobiographical Essays by Arab Women Writers*), and Assia Djebar (*Fantasia*), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Requirements/Evaluation: students will write the following: three response papers (2-3 pages), at least 6 journal entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 251 (D2) COMP 252 (D1) ARAB 252 (D1)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue to depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

ARAB 302 (S) Advanced Arabic 2 (DPE) (WS)

A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students' listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with Arabic in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

Requirements/Evaluation: Reflections, discussions, essays, reading and writing project, quizzes, exams, and presentations.

Prerequisites: ARAB 301 or equivalent

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies, or students who completed ARAB 301

Expected Class Size: 6

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses (blogs, commentaries, etc.) to discussion prompts, movies, YouTube videos, and articles. The students will also work on a portfolio with entries that will involve a careful process of revisions as well as rigorous research in Arabic recourses, summaries and essays. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. The selected texts will also expose students to issues of power and inequality based on internal and external factors in Arab societies as well as the social struggles of immigrants and refugees.

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

ARAB 360 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 460 COMP 361 ARAB 360 RLFR 360 ARTH 560

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in English. All students have the option of reading selected texts in either French or English. Students taking the course for RLFR credit will read selected texts in French, participate in occasional French discussion sessions, and write the mid-term paper in French. Grad Art Students will occasionally meet as a group with the instructor and will write a longer final paper.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 12-page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 460 (D1) COMP 361 (D1) ARAB 360 (D1) RLFR 360 (D1) ARTH 560 (D1)

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Spring 2022

SEM Section: 01 Cancelled

ARAB 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation (DPE) (WS)

Cross-listings: ARAB 370 GBST 370 COMP 370

Primary Cross-listing

Departing from the Arabic notions of *takaful* and *taddamun* as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

Requirements/Evaluation: Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minute oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 370 (D1) GBST 370 (D2) COMP 370 (D1)

Writing Skills Notes: Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

Difference, Power, and Equity Notes: South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

Spring 2022

TUT Section: T1 TBA Amal Egeiq

ARAB 401 (F) Topics in Advanced Arabic: Contemporary Arab Cinema (DPE) (WS)

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: The course will be offered remotely (Final course format to be determined closer to the semester)

Requirements/Evaluation: class participation, daily writing and reflections, quizzes, blogs, leading a movie discussion, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: if the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 5-7

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, a minimum of one speech, and a 5-7 pp. final research paper. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in these societies as positioned in a region torn by political, social, and religious conflicts.

Attributes: FMST Core Courses

SEM Section: 01 TR 9:55 am - 11:10 am Lama Nassif

ARAB 404 (S) Topics in Contemporary Arab Cultures (DPE) (WS)

What issues do contemporary Arab societies and cultures face? Through an exploration of various current issues, this course will introduce you to

questions that engage Arab thought in modern times. What issues are central to women and young people today? How do the Arabic language and Arab identity intersect within increasingly multilingual and multicultural communities? What issues do minority communities in Arab countries face? How does globalization impact Arab societies? How do literature and art continue to reflect aspirations, challenges, and defiance? The course will explore these and other issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources. Taught in Arabic.

Class Format: The course involves two main sessions and a third to be organized as a group or broken into conversation sessions.

Requirements/Evaluation: Class participation, daily writing and reflections, quizzes, reading project, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: If the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 7-8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, commentaries, and a final research paper. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in Arab societies as positioned in a region torn by political, social, and religious turmoil.

ARTH 103 (S) East Asian Art (DPE)

Cross-listings: ASIA 103 ARTH 103

Primary Cross-listing

This course is an introduction to the history of East Asian art from prehistory to the present with particular emphasis on China, Korea, and Japan. Through thematic units, we look at artworks in their original contexts and consider how cross-cultural exchanges stimulated new interpretations across time and space. We examine a broad range of objects including ritual bronze vessels, Buddhist temples, landscape paintings, woodblock prints, and installations. We also discuss these artworks in relation to other forms of creative expression such as ritual practice, performance, and literature. How is East Asia defined geographically and culturally? How did the exchange of ideas, trade, and travel impact the formation of East Asian art? How do artworks and artifacts help us understand East Asia's past? These fundamental questions guide our discussion. Through this course, you will learn to think critically about shared and diverse human experiences across cultures and historical periods. We will also discuss the historiography of East Asian art and analyze why certain types of objects were historically underrepresented in museum spaces and academic scholarship. Artworks from the Williams College Museum of Art and Special Collections also form an integral part of the course.

Requirements/Evaluation: attendance, class participation, worksheets, visual analysis paper (2-3 pages in length), midterm and non-cumulative final exam, virtual exhibition project and presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Open to all students regardless of major

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 103 (D1) ARTH 103 (D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity requirement by investigating the ways that migration and

cross-cultural exchange shaped artistic developments in East Asia. Students will reflect on the cultural production of diverse peoples and traditions within this geographical region and confront the ways in which historical legacies of imperialism and colonialism continue to shape international relations.

ARTH 106 (F) An Invitation to World Architecture (DPE)

What is architecture? Built form? Object? Space? How do we think about architecture as we move around, within, and through it? What can architecture tell us not only about material, design, and engineering, but also about the individuals, groups, and communities who make it? These inquiries provide the starting points for thinking about what architecture means as concept, space, and practice, and how it affects the ways in which human beings experience the world. As the primary mode through which we organize our lived reality, architecture not only channels human behavior into specific repertoires of action and reaction but also symbolizes beliefs, value systems, and ideas about the self, gender, nation, race/ethnicity, community, life, death, and the transcendent. Such themes, thus, constitute the critical lenses that students will use over the course of the semester to unpack how structural form has and continues to define the human condition in the broadest sense. Drawing from a variety of texts and examples that emphasize the diversity and complexity of architectonic traditions around the world, this course will analyze how individuals have employed architectural strategies to solve the problems of living within diverse contexts and how such spaces not only provide meaning in everyday life but also actively and dynamically order the world as space, object, environment, text, process, and symbol.

Class Format: This course has 2 components: lectures and conferences / discussion sections. Students will be expected to attend two lectures and one conference / discussion section weekly. Students will sign up separately for the lecture component and the conference / discussion section component.

Requirements/Evaluation: Written evaluative measures: 8 object lab assignments, 6 written responses to class prompts, 6 in-class quizzes, and a virtual student exhibition. Other evaluative measures: conference / discussion section participation, attendance.

Prerequisites: none

Enrollment Limit: 90

Enrollment Preferences: First preference: senior art majors who need a 100-level course to fulfill their major requirements. Second preference: first- and second- year undeclared students.

Expected Class Size: 90

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements in two ways. First, it unsettles established presuppositions, biases, and predispositions that have positioned the "West" as "best" in canons of architectural history. Secondly, it explores how architecture - past and present - communicates, supports, and/or resists hierarchies of power and socio-political influence in society by acting as modes of propaganda, tools of imperialism, sites of resistance, and/or spaces of affirmation.

ARTH 210 (F) Intro to Latin American and Latinx Art: Contradictions & Continuities, Postcolonial to the Present (DPE)

This course introduces students to the breadth and richness of the visual arts in Latin American and U.S. Latinx art. The course begins in the late 19th

and early 20th centuries, when artists and writers first began formulating the notion of an art "native" to Latin America, and continues through the ever-expanding cultural expressions developed throughout the 20th and 21st centuries. Through a contextual approach, we will pay particular attention to Latin American artists' shifting relationships to race, class, and gender issues, their affiliations with political and revolutionary ideals, and their critical stance vis-à-vis the European avant-gardes. Similarly, we will analyze the emergence and development of Latinx artistic practices in the postwar U.S., tracing these artists' own exploration of race, class, and gender dynamics. This class introduces Latin American and Latinx artistic practices and scholarship to enable students to develop a critical understanding of the historical specificity of diverse movements, their relation to canonical definitions of modern and contemporary art, and their relevance to issues of colonialism, nationalism, revolutionary politics, and globalization. We will consider a vast array of genres--from painting and sculpture to printmaking, photography, conceptual, installation, and performance art--and will draw from artist statements, manifestos, and secondary interpretive texts to consider both the impetus behind these dynamic artworks and their lasting legacies.

Requirements/Evaluation: midterm exam and non-cumulative final exam, weekly short reading responses, attendance, and active participation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if overenrolled, waitlisted students will be selected on a lottery

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical, visual, and thematic analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Latin American and Latinx art in the canon of Western art history. The course also centers on contextualizing Latin American and Latinx artistic practices and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, revolutionary politics, and globalization.

Fall 2021

LEC Section: 01 TR 11:20 am - 12:35 pm Mari Rodriguez Binnie

ARTH 246 (F) Museum Culture: Do you see what I see?! (DPE)

We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on so many variables--who we are, where we are, and what we choose to look at. A critical question is how "art" figures and what agency it wields in millennial settings. This class is an opportunity to explore these issues with particular reference to museums and the objects enshrined therein. Digitized collections enable us to wander freely in space and time, following ideas/images through history even as we might also engage the 'real thing' in person. Our approach will be comparative and interrogative; case studies might range from an oil painting to a wooden sculpture, a coin to an illuminated manuscript, a photograph to a video. Along the way, we will consider what "art" really is and how different visual cultures might be presented or distorted in museum exhibitions and public spaces. Particular attention will be given to traditions or people that have been erased or misunderstood over time as art history has evolved as a discipline. Students will look, sketch, photograph and write throughout the semester, thereby exploring the entire spectrum of visuality from production to reception.

Requirements/Evaluation: Mandatory class attendance and substantive participation, weekly Glow Posts, curatorial term project.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Sophomores and majors.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will cover museums in diverse cultures and explore the porous boundaries between the "Orient", Europe and America. How art manifests inequalities of power and how museums privilege or erase particular groups of people will be addressed. Because collecting art entails money and privilege, understanding art history entails exploring social and cultural hierarchies.

Fall 2021

SEM Section: 01 TF 2:35 pm - 3:50 pm Holly Edwards

ARTH 247 (S) Art and Representation in the Wake of Empire, Europe After 1945 (DPE)

Foregrounding the exhibition as a critical form of aesthetic and political contestation, this course examines the transformation of colonial projects of early modernity to the post-World War II period. It will situate European visual culture within systems of transnational exchange and the art and cultures of other continents, while reflecting upon its economic and political impacts within its own newly reconfigured borders. National identity will be set in relief against a burgeoning cosmopolitanism, migration shifts, and increased tourism worldwide. Work in a variety of media will illustrate the multifaceted nature of these interactions and their engagement with materials, persons, and things in the commodification and use of natural resources. Of the themes addressed in this course--postcolony, anticapitalism, imperialism, neocolonialism, and existentialism--particular attention will be focused upon the history of independence movements in the former European colonies and their reflection in works of art in Europe and abroad. We will consider the role major international and perennial art exhibitions--such as Documenta in Germany and the Venice Biennale in Italy--have played in the reconceptualization of the field of contemporary art, as well as other institutions of art confronting new waves of fascism in Europe. With a transhistorical approach, we will assess the work of international curators and cultural theorists who have remapped the relationship between art and politics, and the Global North and South.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one 12-15 page paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Students planning to major in Art History, Art History and Studio Art majors, then any interested student

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course examines difference, power, and equity in artistic practice as a means of rethinking European identity within a globalized world. Migration, diaspora, and citizenship--and their differentials of power and movement--are central to course assignments and discussions. It focuses on the lasting impacts of colonialism beyond European borders as a way of understanding the logic of cultural hegemony.

ARTH 311 (S) Women and Art in East Asia (DPE)

Cross-listings: ARTH 311 ASIA 311

Primary Cross-listing

For over a thousand years, women in East Asia profoundly influenced the development of the visual arts, yet their formidable presence remains largely hidden. This seminar explores the critical roles women played as patrons, artists, and collectors of the arts in China, Korea, and Japan. We cover historical periods from the 10th century to the present day and discuss both traditional and nontraditional media including painting, sculpture, photography, and embroidery. Topics include didactic paintings for women in the Song court, calligraphy and painting as gendered modes of expression in Heian period Japan, the revival of Buddhist arts in Korea under the patronage of aristocratic women, and artworks by modern and contemporary artists that contest dominant representations of gender and sexuality. The course does not simply focus on artistic production, but also contextualizes these topics in light of emergent theorizations and readings on femininity, feminism, and the sexual politics of representation. Along with a final research paper, students will generate a substantial Wikipedia entry on a certain aspect of the course to promote the coverage of women and the arts online. No prior knowledge of Asian art history is required or assumed

Requirements/Evaluation: attendance, class participation and discussion, 5 object or reading response papers (2-3 pages), Wikipedia page editing project and presentation (5-7 minutes long), and 8-10-page final research paper (written in stages over the semester including a 10-15-minute presentation)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History, Asian Studies, Chinese, or Japanese majors, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 311 (D1) ASIA 311 (D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by exploring the construction of gender in relation to power. We discuss how Daoist, Confucian, Shinto, and Buddhist ideas historically shaped attitudes toward women and address the ways in which colonialism and Orientalism shaped understandings of gender differences and roles in East Asia. Students will be introduced to theoretical texts of feminism and postcolonialism and learn to identify key issues to the feminist art historical project

Spring 2022

ARTH 315 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 WGSS 344 ARTH 315

Primary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape--from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 314 (D1) WGSS 344 (D2) ARTH 315 (D1)

Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

ARTH 561 (F) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts (DPE)

Cross-listings: ARTH 561 HIST 454

Primary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty, as well as of decolonizing museums; the complex dynamics of collaboration; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Class members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

Class Format: The course will feature seminar discussions as well as local field trips to museums, libraries, and archives with pertinent collections.

Requirements/Evaluation: Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project;

final original research and interpretive project

Prerequisites: For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats will be reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 561 (D1) HIST 454 (D1)

Difference, Power, and Equity Notes: The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

ASIA 103 (S) East Asian Art (DPE)

Cross-listings: ASIA 103 ARTH 103

Secondary Cross-listing

This course is an introduction to the history of East Asian art from prehistory to the present with particular emphasis on China, Korea, and Japan. Through thematic units, we look at artworks in their original contexts and consider how cross-cultural exchanges stimulated new interpretations across time and space. We examine a broad range of objects including ritual bronze vessels, Buddhist temples, landscape paintings, woodblock prints, and installations. We also discuss these artworks in relation to other forms of creative expression such as ritual practice, performance, and literature. How is East Asia defined geographically and culturally? How did the exchange of ideas, trade, and travel impact the formation of East Asian art? How do artworks and artifacts help us understand East Asia's past? These fundamental questions guide our discussion. Through this course, you will learn to think critically about shared and diverse human experiences across cultures and historical periods. We will also discuss the historiography of East Asian art and analyze why certain types of objects were historically underrepresented in museum spaces and academic scholarship. Artworks from the Williams College Museum of Art and Special Collections also form an integral part of the course.

Requirements/Evaluation: attendance, class participation, worksheets, visual analysis paper (2-3 pages in length), midterm and non-cumulative final exam, virtual exhibition project and presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Open to all students regardless of major

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 103 (D1) ARTH 103 (D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity requirement by investigating the ways that migration and cross-cultural exchange shaped artistic developments in East Asia. Students will reflect on the cultural production of diverse peoples and traditions within this geographical region and confront the ways in which historical legacies of imperialism and colonialism continue to shape international relations.

ASIA 228 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films (DPE) (WS)

Cross-listings: ASIA 228 COMP 297 CHIN 428

Secondary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228 (D1) COMP 297 (D1) CHIN 428 (D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and past; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

ASIA 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)

Cross-listings: ASIA 240 JAPN 240

Secondary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 240 (D1) JAPN 240 (D1)

Difference, Power, and Equity Notes: This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Eun Young Seong

ASIA 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: REL 269 STS 269 ASIA 269 ANTH 269

Secondary Cross-listing

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269 (D2) STS 269 (D2) ASIA 269 (D2) ANTH 269 (D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

Fall 2021

ASIA 311 (S) Women and Art in East Asia (DPE)

Cross-listings: ARTH 311 ASIA 311

Secondary Cross-listing

For over a thousand years, women in East Asia profoundly influenced the development of the visual arts, yet their formidable presence remains largely hidden. This seminar explores the critical roles women played as patrons, artists, and collectors of the arts in China, Korea, and Japan. We cover historical periods from the 10th century to the present day and discuss both traditional and nontraditional media including painting, sculpture, photography, and embroidery. Topics include didactic paintings for women in the Song court, calligraphy and painting as gendered modes of expression in Heian period Japan, the revival of Buddhist arts in Korea under the patronage of aristocratic women, and artworks by modern and contemporary artists that contest dominant representations of gender and sexuality. The course does not simply focus on artistic production, but also contextualizes these topics in light of emergent theorizations and readings on femininity, feminism, and the sexual politics of representation. Along with a final research paper, students will generate a substantial Wikipedia entry on a certain aspect of the course to promote the coverage of women and the arts online. No prior knowledge of Asian art history is required or assumed

Requirements/Evaluation: attendance, class participation and discussion, 5 object or reading response papers (2-3 pages), Wikipedia page editing project and presentation (5-7 minutes long), and 8-10-page final research paper (written in stages over the semester including a 10-15-minute presentation)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History, Asian Studies, Chinese, or Japanese majors, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 311 (D1) ASIA 311 (D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by exploring the construction of gender in relation to power. We discuss how Daoist, Confucian, Shinto, and Buddhist ideas historically shaped attitudes toward women and address the ways in which colonialism and Orientalism shaped understandings of gender differences and roles in East Asia. Students will be introduced to theoretical texts of feminism and postcolonialism and learn to identify key issues to the feminist art historical project

ASIA 316 (S) Feeling Queer and Asian (DPE)

Cross-listings: COMP 313 ASIA 316 AMST 354 WGSS 316

Secondary Cross-listing

This advanced undergraduate seminar focuses on concepts, queries, and methodologies at the intersections of Asian Americanist critique, queer theory, and affect theory. How might we come to understand Asian gender, sexuality, and racialization less through a language of being or meaning, as through feeling? How do Asian/American discourses rely upon languages of gender and sexuality, and how might queerness depend upon Asianness? How might these theories identify, complicate, and call forth more expansive or alternative practices of belonging? The class will read theories including national abjection, racial melancholia, disaffection, queer diaspora, and homonationalism, as well as engage Asian American literatures.

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses (350 words max), short analytical essay (4-5 pages), and creative final project (e.g. poem, epistolary letter, syllabus soundtrack) (5-8 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 313 (D2) ASIA 316 (D2) AMST 354 (D2) WGSS 316 (D2)

Difference, Power, and Equity Notes: This interdisciplinary seminar centers the interconnected constructions of race, ethnicity, gender, sexuality, and nation as they give shape to Asian American and Asian diasporic sexuality studies.

ASIA 352 (S) Global Health in the Transpacific (DPE)

Cross-listings: AMST 352 STS 311 ASIA 352

Secondary Cross-listing

East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia's claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees' resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper

Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.

Enrollment Limit: 12

Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Primary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

CHIN 253 (S) "Illness" in Modern and Contemporary Chinese Literature and Culture (DPE)

Cross-listings: COMP 254 CHIN 253 WGSS 255

Primary Cross-listing

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "illnesses" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual illnesses, from tuberculosis to AIDS to the Novel Coronavirus, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "illness"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "illness"; the relationship between illness on the one hand, and the politics of body, gender, and class on the other; we ask how infectious disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "illness" such as infectious cannibalism and fin-de-siècle "viruses," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan). Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

Class Format: All regular course meetings will be conducted in person.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Publishing GLOW Discussion posts based on reading (Graded as Complete or Incomplete); 3) three short papers (3-5 pages); 4) the final project (including an abstract, a presentation, and a paper or other form of project).

Prerequisites: None; no knowledge of Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Comp majors; Asian Studies Concentration; WSGG majors; and then to first-year students

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 254 (D1) CHIN 253 (D1) WGSS 255 (D2)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social stigma as well as the dynamics of unequal power by means of closely reading "illness" in 20th and 21st century China. We will exam how "illness" is sometimes gendered and politicized; how "illness", in other times, empowers individuals and bonds underrepresented minorities. Illness, as a seemingly universal human experience, tells diverse stories of (in)difference, (dis)power, and (un)equity.

COMP 107 (S) Advanced French: Danger and Desire in French Film and Fiction (DPE)

Cross-listings: RLFR 106 COMP 107

Secondary Cross-listing

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2020, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

Requirements/Evaluation: active class participation, grammar exercises, two short papers, midterm, and final paper

Prerequisites: Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with

compelling justification for admission.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 106 (D1) COMP 107 (D1)

Difference, Power, and Equity Notes: This course centers on a critical examination of difference, power, and equity in French film & fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich & poor, soldiers & civilians, nations & colonies, men & women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

COMP 166 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: REL 166 AMST 166 COMP 166 ENGL 268

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 166 (D2) AMST 166 (D2) COMP 166 (D1) ENGL 268 (D1)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

COMP 230 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: ENGL 228 COMP 230

Secondary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy,

literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: First- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 228 (D1) COMP 230 (D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

COMP 242 (S) Americans Abroad (DPE)

Cross-listings: ENGL 250 COMP 242 AMST 242

Primary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250 (D1) COMP 242 (D1) AMST 242 (D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

COMP 252 (F) Arab Women Memoirs: Writing Feminist History (DPE) (WS)

Cross-listings: WGSS 251 COMP 252 ARAB 252

Secondary Cross-listing

This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (*A Mountainous Journey: An Autobiography*), Fatima Mernissi (*Dreams of Trespass: Tales of a Harem Girlhood*), Radwa Ashour (*The Journey*), Fadia Faqir and Shirley Eber (*In the House of Silence: Autobiographical Essays by Arab Women Writers*), and Assia Djebar (*Fantasia*), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Requirements/Evaluation: students will write the following: three response papers (2-3 pages), at least 6 journal entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 251 (D2) COMP 252 (D1) ARAB 252 (D1)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue to depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

COMP 254 (S) "Illness" in Modern and Contemporary Chinese Literature and Culture (DPE)

Cross-listings: COMP 254 CHIN 253 WGSS 255

Secondary Cross-listing

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "illnesses" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual illnesses, from tuberculosis to AIDS to the Novel Coronavirus, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "illness"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "illness"; the relationship between illness on the one hand, and the politics of body, gender, and class on the other; we ask how infectious disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "illness" such as infectious cannibalism and fin-de-siècle "viruses," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan). Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

Class Format: All regular course meetings will be conducted in person.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Publishing GLOW Discussion posts based on reading (Graded as Complete or Incomplete); 3) three short papers (3-5 pages); 4) the final project (including an abstract, a presentation, and a paper or other form of project).

Prerequisites: None; no knowledge of Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Comp majors; Asian Studies Concentration; WSGG majors; and then to first-year students

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 254 (D1) CHIN 253 (D1) WGSS 255 (D2)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social stigma as well as the dynamics of unequal power by means of closely reading "illness" in 20th and 21st century China. We will exam how "illness" is sometimes gendered and politicized; how "illness", in other times, empowers individuals and bonds underrepresented minorities. Illness, as a seemingly universal human experience, tells diverse stories of (in)difference, (dis)power, and (un)equity.

COMP 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: COMP 273 ENGL 273 GBST 273

Primary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

COMP 292 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)

Cross-listings: RLFR 202 COMP 292 WGSS 201

Secondary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers (of 3-5 pages each)

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 202 (D1) COMP 292 (D1) WGSS 201 (D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

COMP 297 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films (DPE) (WS)

Cross-listings: ASIA 228 COMP 297 CHIN 428

Secondary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228 (D1) COMP 297 (D1) CHIN 428 (D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and past; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic

narratives invoke (and erase) differences, and challenge (and consolidate) borders.

TUT Section: T1 TBA Man He

COMP 303 (F) Embodied Archives: Global Theatre & Performance Histories (DPE)

Cross-listings: THEA 301 COMP 303

Secondary Cross-listing

What is the past good for? Why study theatre history now? What do the archival performance traditions, practices, and sources of yesterday have, if anything, to offer the theatre artists of today and tomorrow? Digging into these questions, this combined studio/seminar course will introduce students to major global theatre and performance histories by considering how they've been taken up--adapted, appropriated, recycled, critiqued, and re-appropriated--by artists working in the field now. Why does dramatist Luis Alfaro return to Sophocles' *Electra* to tell a story about the experiences of Chicana communities in L.A.? What does the playwright Branden Jacobs-Jenkins find compelling about the allegorical performances of English Medieval theatre? What role does traditional Korean dance ritual play in the experimental theatre of artist Young Jean Lee? How have collaborators at New York's Public Theater sought to re-vitalize Shakespeare's works through community-driven practices? Through comparative pairings such as these, we will study and draw inspiration from the ways contemporary dramatists, makers, directors, and performers have approached the theatrical forms and performance practices of the past in the effort to create new perspectives on the present. While attending to theatre's formal and aesthetic aspects, we will at the same time focus on the relationship of performance to the enduring legacies of empire, state power, colonialism, and private capital in which they are historically embedded and by which they are shaped. If and when possible, we will encounter archival sources housed in College Archives and WCMA. As a final creative project, students will adapt, critique, or re-appropriate a source material of their own choosing. This course is required for Theatre majors and is a prerequisite for THEA 401.

Class Format: This class is a combined studio/seminar. Students will be required to present and share their creative responses to the material studied in the course.

Requirements/Evaluation: journal writing and active participation in class; a midterm creative adaptation project and accompanying "research casebook"; participation as discussion leader for one class; and a final creative adaptation or performance project and accompanying "research casebook."

Prerequisites: For Theatre majors: any 100 or 200-level theatre course.

Enrollment Limit: 16

Enrollment Preferences: Theatre majors; Comparative Literature majors

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 301 (D1) COMP 303 (D1)

Difference, Power, and Equity Notes: This course works to dismantle the ongoing bias in theatre studies that positions textual and literary forms of theatre in the globalized north as the dominant sites of knowledge transfer, status, and value in our field. Instead, theatre and performance are approached as diverse forms of repertoire and embodied knowledge that must be analyzed in relation to the structures of social inequity and power in which they historically arise.

Fall 2021

COMP 336 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 AFR 339 COMP 336

Secondary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the *banlieue*), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, *Banlieue in Lit, Music, Film* fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power

relationships are expressed in banlieue film, literature and French hip hop music.

COMP 361 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 460 COMP 361 ARAB 360 RLFR 360 ARTH 560

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in English. All students have the option of reading selected texts in either French or English. Students taking the course for RLFR credit will read selected texts in French, participate in occasional French discussion sessions, and write the mid-term paper in French. Grad Art Students will occasionally meet as a group with the instructor and will write a longer final paper.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 12-page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

COMP 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation (DPE) (WS)

Cross-listings: ARAB 370 GBST 370 COMP 370

Secondary Cross-listing

Departing from the Arabic notions of *takaful* and *taddamun* as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and

digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

Requirements/Evaluation: Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minute oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 370 (D1) GBST 370 (D2) COMP 370 (D1)

Writing Skills Notes: Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

Difference, Power, and Equity Notes: South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

TUT Section: T1 TBA Amal Ezeiq

ECON 107 (F) Inequality in a Classless Society: The Soviet Experiment and its Aftermath (DPE)

Cross-listings: ECON 107 SOC 217

Primary Cross-listing

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with, justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

Requirements/Evaluation: Class participation; small writing assignments and research exercises; and a final research project

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: 1st and 2nd-year students thinking about majoring in Anthropology, Sociology, or Economics

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major. It may be taken for the SOC major.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 107 (D2) SOC 217 (D2)

Difference, Power, and Equity Notes: The subject matter of this course is all about the origins, evolution, current structures, and implications of economic and social differentiation in a region quite apart from the United States. Moreover, by crossing disciplinary lines, we hope it will offer a particularly valuable perspective on such issues. Thus, we felt that it should naturally serve as a DPE course.

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Steven E. Nafziger, Olga Shevchenko

ECON 204 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Primary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ECON 218 (S) Capital and Coercion (DPE)

Cross-listings: GBST 218 ECON 218

Primary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice and distrust will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the transatlantic trade in

enslaved people and the Haitian Revolution, the Dutch "cultivation system" in Java, colonial control and independence in Kenya, and the U.S.-backed dictatorial regime and its overthrow in Nicaragua. Required readings for this class will be seventy or more pages per week, and will include historical case studies, excerpts from novels, and reportage.

Requirements/Evaluation: Students will be evaluated based on class participation, weekly assignments, a midterm, and a final.

Prerequisites: Econ 110

Enrollment Limit: 25

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 218 (D2) ECON 218 (D2)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

ENGL 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: AMST 105 ENGL 105 WGSS 105

Primary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 105 (D2) ENGL 105 (D1) WGSS 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: WGSS 113 ENGL 113 AMST 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 208 (S) Designer Genes (DPE) (WS)

Cross-listings: WGSS 208 ENGL 208 STS 208 AMST 206

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it

also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages), short presentation, longer final researched paper/project (8-10 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies, American Studies, English majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 208 (D2) ENGL 208 (D1) STS 208 (D2) AMST 206 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts; two four-to-five-page graded papers; one descriptive digital assignment (the Story Map); and a final researched paper (8-10 pages)--written in stages. Students receive critical feedback on written assignments through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next.

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics' case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

ENGL 228 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: ENGL 228 COMP 230

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: First- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 228 (D1) COMP 230 (D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

ENGL 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: MAST 231 ENGL 231

Secondary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

ENGL 250 (S) Americans Abroad (DPE)

Cross-listings: ENGL 250 COMP 242 AMST 242

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250 (D1) COMP 242 (D1) AMST 242 (D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

ENGL 268 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: REL 166 AMST 166 COMP 166 ENGL 268

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENGL 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: COMP 273 ENGL 273 GBST 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

ENGL 279 (F) Introduction to Latinx Literature: From 'I Am Joaquín' to Borderless-Future Dreams (DPE) (WS)

This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement's significant aftermaths. This focus highlights the significant contributions Chicano voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyoricans, Cubanos, Central Americans, Afro-Latinxs, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs

have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries' most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political equality? To what extent does the Latinx subject's political freedom rest upon practices and processes of identify-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture--from the city to the campo to the cultural in-between of the border.

Requirements/Evaluation: Active participation in in-class and online discussion, four 4-5 page essays, weekly reading responses, and an in-class presentation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: Sophomores considering the English major, but juniors and seniors are also welcome.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement. Reading-response prompts will be geared towards helping students practice writing and analysis skills. Students may also be asked to attend occasional 1-on-1 meetings with instructor to discuss writing.

Difference, Power, and Equity Notes: This course offers students the opportunity to learn and think critically about Latinx community struggles throughout U.S. social history while examining the forms of cultural expression that arise out of and in relation to those struggles. It also delves into the intersectional nature of Latinx community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

ENGL 375 (F) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 AFR 331 WGSS 318

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 350 (D2) ENGL 375 (D1) AFR 331 (D2) WGSS 318 (D2)

Difference, Power, and Equity Notes: This course engages content and materials that explore various forms of difference, power, and equity, along with facilitating the development of skills that will help students address the implications of said forms. This course considers current examples and historical examples of Black masculinity. This course fosters difficult conversations about how difference works and has worked, how identities and power relationships have been grounded in lived experience.

ENGL 392 (S) Acción Poética: Poetic Art's Critiques of an Americas of Conquest (DPE)

Can poems be thought of as social acts, or as a kind of "acción poética" (poetic action)? What would it mean, in other words, to resituate our understanding of poetry within the realms of speech act theory, performance studies, and the local and global histories of social conflict in the Americas? In this course, we will examine the long history of poetic form in the Americas to trace the emergence of separate, but related poetic experimentalisms, particularly in the literary traditions of modern Latin American and U.S.-Latinx poetry and performance art. Throughout the course, we'll ask what it means to write with and without the body in mind. We'll attend to the embodied forms of poetic expression that emerge prior to the twentieth century while investigating poetry's articulations of geo-social space in the Americas. Our course will then focus on the vanguard poetries of twentieth-century Latin America (Neruda, Mistral, Vallejo, Zurita, et al.) and on the transcultural modernities of U.S.-Latinx poetry and performance. Through our explorations of poetic form's encounters with a social history of the Americas, we'll receive a glimpse of what poetry looks like in a world of spiritual, political, ecological, and humanitarian crises. Readings will likely include works by: Gabriela Mistral, Pablo Neruda, Vicente Huidobro, César Vallejo, Raúl Zurita, Cecilia Vicuña, Miguel Algarín, Sandra María Esteves, Willie Perdomo, Julia de Burgos, Emmy Pérez, Gloria Anzaldúa, Lorna Dee Cervantes, Sandra Cisneros, Francisco X. Alarcón, Guillermo Gómez-Peña, Coco Fusco, Laura Aguilar, Asco, Sor Juana Inés de la Cruz, Phillis Wheatley, José Martí, Rubén Darío, Walt Whitman, Emily Dickinson, and more. Although useful, reading knowledge of Spanish is not expected or required; Spanish-language texts will be provided in English translation alongside the original.

Requirements/Evaluation: Active participation in in-class and online discussion, two close-reading papers (5 pages each), contributions to course blog, and a final 8-10 page research paper.

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 25

Enrollment Preferences: English majors, but non-majors with a strong interest in the subject are welcome.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout U.S. and Latin American history. The course emphasizes the experiences of colonization and U.S. imperialism in Latin America and those of social conflict in border regions throughout the U.S. Moreover, it invites students to ask what it means to write poetry from the standpoint of various subject positions (as determined by race, class, gender/sexuality, etc.).

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the

issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

ENVI 230 (S) Geographies of Food Justice (DPE)

Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, nutritious, & culturally appropriate food. Observers often call poor, segregated urban areas food *deserts*, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to these places as experiencing food *apartheid* to emphasize that the inequalities are the result of structural racism. Notably, *deserts* & *apartheid* are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does *where* people eat shape *what* they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with an exploration of the concepts of food security, sovereignty, and justice. Subsequent units include a critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term's usefulness. Next, we consider disruptions to indigenous hunting & fishing practices from settler colonialism-induced climate change & toxic contamination. Finally, we evaluate evidence about whether local food is the solution to the social and environmental problems with our food systems. We will read works by geographers, anthropologists, sociologists, planners, & journalists, among others. Several "lab" sessions throughout the semester introduce participants to data analysis tools used by policymakers and activists working on food security and justice.

Requirements/Evaluation: 2-3 short papers on assigned topics, several lab exercises focused on data analysis, final research paper, class discussion, occasional short oral presentations

Prerequisites: ENVI 101 or permission

Enrollment Limit: 19

Enrollment Preferences: Environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.

ENVI 234 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

ENVI 271 (S) Theatre & Environment: Site, Nature, Ecoperformance, Utopia (DPE)

Cross-listings: THEA 272 ENVI 271

Secondary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or ecology of a performance change its meaning and reception? What role can live performance play in grassroots campaigns for climate action or environmental justice? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this combined seminar/studio course, participants will work collaboratively to create a series of mini-performances based on four categories: site, nature/ecology, ecoperformance, and utopia.

Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute *all* human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Artchoke Dance, Talking Birds, Extinction Rebellion, Greenpeace, and others. As a special project in the class, we will collaborate with The Zilkha Center to create performances that engage directly with topics relevant to the campus and surrounding community. This is a seminar and maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio and seminar course that requires deep collaboration on the creation, development, and performing of original works of live performance.

Requirements/Evaluation: Creation and presentation of a series of four mini-performance pieces; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 272 (D1) ENVI 271 (D1)

Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

ENVI 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: AFR 347 AMST 332 ENVI 332

Secondary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%

ENVI 349 (S) Race, Development, and Food Sovereignty (DPE) (WS)

Cross-listings: AFR 349 ENVI 349 AMST 342

Secondary Cross-listing

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%

ENVI 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

GBST 101 (S) Religion, Politics, and Society: A Global Perspective (DPE)

Cross-listings: REL 126 GBST 101 PSCI 126

Primary Cross-listing

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and

society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Global Studies concentrators and intended concentrators; Religion majors and intended majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Unit Notes: Core course for GBST

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 126 (D2) GBST 101 (D2) PSCI 126 (D2)

Difference, Power, and Equity Notes: An engagement with religious difference in the world, with a spotlight on how religion and politics--that is, power--interact globally and in the USA.

GBST 218 (S) Capital and Coercion (DPE)

Cross-listings: GBST 218 ECON 218

Secondary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice and distrust will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the transatlantic trade in enslaved people and the Haitian Revolution, the Dutch "cultivation system" in Java, colonial control and independence in Kenya, and the U.S.-backed dictatorial regime and its overthrow in Nicaragua. Required readings for this class will be seventy or more pages per week, and will include historical case studies, excerpts from novels, and reportage.

Requirements/Evaluation: Students will be evaluated based on class participation, weekly assignments, a midterm, and a final.

Prerequisites: Econ 110

Enrollment Limit: 25

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 218 (D2) ECON 218 (D2)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequality. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

Attributes: POEC International Political Economy Courses

SEM Section: 01 Cancelled

GBST 243 (F) Anti-Muslim Racism: A Global Perspective (DPE)

Cross-listings: PSCI 244 GBST 243 REL 247

Primary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Also qualifies for the GBST Urbanizing World track

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 244 (D2) GBST 243 (D2) REL 247 (D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

GBST 246 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: GBST 246 THEA 246 AMST 249

Secondary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists *do* politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 246 (D1) THEA 246 (D1) AMST 249 (D2)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

GBST 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: COMP 273 ENGL 273 GBST 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

Spring 2022

GBST 281 (S) Contemporary African Politics (DPE)

Cross-listings: GBST 281 PSCI 281

Secondary Cross-listing

This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.

Class Format: A typical class session will be about 60% lecture and 40% discussion

Requirements/Evaluation: Class Participation, Map Quiz, 3 short papers (5 pages)

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 281 (D2) PSCI 281 (D2)

Difference, Power, and Equity Notes: This course takes the racial, ethnic, linguistic, and religious diversity of sub-Saharan Africa as a starting point for understanding the contemporary politics of the region. The course addresses the legacies of systemic inequality as well as strategies of resistance to oppression. We also examine how ethnic and religious diversity shape political institutions, competition, and conflict, comparing different countries and over time.

GBST 305 (S) A History of Health and Healing in Africa (DPE)

Cross-listings: HIST 305 AFR 304 GBST 305

Secondary Cross-listing

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages),

presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 305 (D2) AFR 304 (D2) GBST 305 (D2)

Difference, Power, and Equity Notes: This course explores transformations in how Africans in the recent past have experienced, practiced and conceptualized health and healing. These transformations have been triggered by the expansion of global biomedicine, new and lethal epidemics, old diseases in changing environments, and new political and economic decisions by policymakers. The history of health and healing in Africa provides a critical lens through which to examine societal imbalances and inequalities.

SEM Section: 01 MW 7:00 pm - 8:15 pm Benjamin Twagira

GBST 344 (S) Capitalism and Racism in the American Context and Beyond: A Global Approach (DPE)

Cross-listings: AMST 345 AFR 353 GBST 344

Secondary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the debate about the texts assigned and regular contribution to the seminar discussions. In-class short oral presentations, weekly short responses reacting to class discussion and texts, and a final research paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 25%; In-class short oral presentations 10%; Final Research Paper (12-15 pages) 40%

Prerequisites: None, open to all.

Enrollment Limit: 20

Enrollment Preferences: American Studies majors, sophomores, and higher

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 345 (D2) AFR 353 (D2) GBST 344 (D2)

Difference, Power, and Equity Notes: This course addresses questions of difference, power, and equity through its examination of domination, racialization, the economics of discrimination, geopolitical and epistemological inequalities at the world-system level. Students will learn how racism and capitalism produce social categories, such as race, ethnicity, and class; how they interact with issues of gender; and how they perpetuate difference, power dynamics, and inequalities across these categories.

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Souhail Chichah

GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE)

Cross-listings: PSCI 351 GBST 351

Secondary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

Class Format: discussion then seminar

Requirements/Evaluation: three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 351 (D2) GBST 351 (D2)

Difference, Power, and Equity Notes: The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

GBST 367 (S) Decolonizing International Relations (DPE)

Cross-listings: GBST 367 PSCI 367

Secondary Cross-listing

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states--the core foundation of international

relations--presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g. white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g. race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

Requirements/Evaluation: Participation, 3 response/reflection papers, annotated bibliography

Prerequisites: One prior course in International Relations or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Juniors and Seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 367 (D2) PSCI 367 (D2)

Difference, Power, and Equity Notes: This class encourages students to recognize the power dynamics inherent within, and reproduced by, the study of International Relations as structured by traditionally dominant paradigms. This class provides students with the tools to critically identify, decenter, and deconstruct dominant lenses as well as the opportunity to engage with, and apply, an inclusive approach centering a more expansive range of theoretical perspectives and knowledge production.

Spring 2022

SEM Section: 01 TF 1:10 pm - 2:25 pm Elizabeth Iams Wellman

GBST 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation (DPE) (WS)

Cross-listings: ARAB 370 GBST 370 COMP 370

Secondary Cross-listing

Departing from the Arabic notions of *takaful* and *taddamun* as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

Requirements/Evaluation: Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minute oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 370 (D1) GBST 370 (D2) COMP 370 (D1)

Writing Skills Notes: Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

Difference, Power, and Equity Notes: South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

Spring 2022

TUT Section: T1 TBA Amal Ezeiq

GBST 480 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: HIST 480 GBST 480 AFR 381

Secondary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

Cross-listings: GERM 314 WGSS 344 ARTH 315

Secondary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape--from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)

Cross-listings: AFR 104 HIST 104

Primary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: active participation in discussion, map quiz, 2 short papers (3-5 pages), presentation, and one research paper (8-12 pages)

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 15

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 104 (D2) HIST 104 (D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

HIST 158 (S) North of Jim Crow, South of Freedom (DPE) (WS)

Cross-listings: HIST 158 AFR 158

Primary Cross-listing

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs--all with an eye toward scrutinizing the freedom struggle in its northern variety.

Requirements/Evaluation: Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 158 (D2) AFR 158 (D2)

Writing Skills Notes: Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

HIST 159 (F) Crossing the Color Line: A History of Passing (DPE) (WS)

Cross-listings: AFR 159 HIST 159

Primary Cross-listing

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 159 (D2) HIST 159 (D2)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

HIST 205 (F) The Making of Modern Africa (DPE)

Cross-listings: AFR 203 HIST 205

Primary Cross-listing

This course traces the incorporation of Africa into an expanding global world from the middle of the 19th century to the present and examines the impact of this integration on the history of African cultures and modern nation states. It is designed to provide you with an introductory understanding of the economic, social, and political forces that have shaped Africa in recent times and continue to affect the lives of individual people across the continent. Over the course of the semester you will be introduced to major historical themes in African History from the past 150 years, including the abolition of the slave trade and its effects, African states in the 19th century, the growing integration of different regions into shifting global and economic systems, European colonization, and African resistance to imperial conquest. We will also explore the emergence of the nationalist and anti-colonial movements, and Africa's post-colonial experiences of self-governance. Within these broad historical processes, the class will cover

additional key themes such as religious change and the role of Western missionaries; changing gender roles; environmental exploitation and change; the emergence of the developmental state; urbanization; military dictatorships, and war and violence in the late 20th century. We will also cover some of the issues surrounding the study of African History as a discipline. This is a challenging task as no single course can cover more than a silver of the complexity and variety of the continent. This is why we approach the study of Modern African History through a comparative prism.

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and a case study paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 203 (D2) HIST 205 (D2)

Difference, Power, and Equity Notes: This course will introduce students to how modern Africans have contended with powerful forces that have deeply affected the continent. It will examine how different societies on the continent -- in different environments and circumstances -- devised solutions to the challenges of the day. All of the readings, discussions, and assignments will ask students to center and insert African voices into histories fraught with misrepresentations.

HIST 265 (F) Race, Power, & Food History (DPE)

Cross-listings: HIST 265 ENVI 246 AMST 245

Secondary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

HIST 270 (F) Sport and the Global Color Line (DPE)

Cross-listings: LEAD 270 HIST 270 AFR 270

Primary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format: Lecture and discussion.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites: None.

Enrollment Limit: 40

Enrollment Preferences: Open to all students with completion of course admission survey if overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 303 (S) Food in the Middle East: A History (DPE)

Cross-listings: ARAB 303 HIST 303

Primary Cross-listing

In this course we examine the rich culinary history of the Middle East first among the three major religions in the region (Judaism, Christianity, and Islam), then during the time of major Islamic Empires such as the Abbasids and Ottomans, and finally in the modern period. Using an array of primary and secondary sources, we explore the social, religious, literary, and economic place of food. We will study the consumption of an attitudes toward specific foodstuffs, gauging the medicinal and culinary value of spices, the historical taboos against drinking coffee and alcohol, and the dispute over various dishes within modern nationalist constructions. We will also investigate how Middle Eastern peoples from different ethnic, geographic, and religious backgrounds have historically used food to express their distinct cultural, national, and gendered identities.

Requirements/Evaluation: attendance, participation, map exercise, leading discussion, 3 short essays, final paper/research project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: History and Arabic Studies majors, seniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 305 (S) A History of Health and Healing in Africa (DPE)

Cross-listings: HIST 305 AFR 304 GBST 305

Primary Cross-listing

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

HIST 346 (F) Modern Brazil (DPE)

Cross-listings: AFR 346 HIST 346

Primary Cross-listing

Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity--for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History majors, Latino/a Studies concentrators

Expected Class Size: 20-25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Secondary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

HIST 367 (S) Black History is Labor History (DPE) (WS)

Cross-listings: AFR 367 HIST 367

Primary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation: Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites: recommended for students with sophomore standing or above

Enrollment Limit: 25

Enrollment Preferences: HIST and AFR majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 367 (D2) HIST 367 (D2)

Writing Skills Notes: Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages.

Difference, Power, and Equity Notes: This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

Cross-listings: ARTH 561 HIST 454

Secondary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty, as well as of decolonizing museums; the complex dynamics of collaboration; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Class members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

Class Format: The course will feature seminar discussions as well as local field trips to museums, libraries, and archives with pertinent collections.

Requirements/Evaluation: Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project

Prerequisites: For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats will be reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 561 (D1) HIST 454 (D1)

Difference, Power, and Equity Notes: The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

HIST 468 (F) Race, Empire, and the Birth of the American Century (DPE)

Cross-listings: HIST 468 AMST 468

Primary Cross-listing

This course examines the birth of the "American Century" by studying the extension of Manifest Destiny to the Pacific, especially the American

occupation of Hawaii and the Philippines.

Requirements/Evaluation: a series of weekly papers and a final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: must be a History or American Studies major

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Unit Notes: History department senior seminar

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 468 (D2) AMST 468 (D2)

Difference, Power, and Equity Notes: The course will cover the unequal power relations between Anglo Americans and Native Americans, Hawaiians, and Filipinos, as evidenced in the American occupation of land within our shores and the colonization of two island nations in the Pacific. We will study how the American presence in these areas affected how the original inhabitants were perceived and represented by Americans as witnessed in their presence at the Worlds Fairs of 1893 and 1904.

HIST 480 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: HIST 480 GBST 480 AFR 381

Primary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing

sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

INTR 320 (S) Angela Davis: Political Theory, Activism, and Alliances (DPE) (WS)

Cross-listings: LEAD 319 PSCI 376 INTR 320 AMST 308

Primary Cross-listing

This seminar examines the political thought, activism, and iconography of abolitionist Angela Davis. The seminar involves a critical engagement with the philosopher, former political prisoner, and their relationship with other theorists, authors and activists. Readings include: *Angela Davis: An Autobiography*; *Soledad Brother: The Prison Letters of George Jackson*; *The Morning Breaks: The Trial of Angela Davis*; *Women, Race, and Class*; *If They Come in the Morning*.

Requirements/Evaluation: Requirements: students attend each seminar class and come prepared to discuss the readings. Papers are due by email 24hours before the seminar begins.

Prerequisites: Preferences: Juniors and Seniors who have taken courses in Africana Studies, American Studies, Political Science, Philosophy.

Enrollment Limit: 19

Enrollment Preferences: Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 319 (D2) PSCI 376 (D2) INTR 320 (D2) AMST 308 (D2)

Writing Skills Notes: Three thesis papers at five pages each will receive critical feedback from the professor; one of the three papers will be revised

with critical feedback from professor and peers, accompanied by a one-page statement explaining student's revisions; one keyword glossary where students define their key terms used in the paper; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: This course examines political activism in the 1960s-1970s during the Cold War in which the civil rights, black power and student anti-war movements challenged traditional US domestic and foreign policies. Examining the differential powers of university Regents, governors, presidents, and police forces and prison administrations in relation to social justice movements led by people under the age of thirty, we examine the structures of institutional power and the agency of cadre theorists.

JAPN 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)

Cross-listings: ASIA 240 JAPN 240

Primary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 240 (D1) JAPN 240 (D1)

Difference, Power, and Equity Notes: This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

JWST 249 (S) Anti-Semitism (DPE)

Cross-listings: JWST 249 REL 249

Secondary Cross-listing

This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin,

and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Requirements/Evaluation: Three 5-7 page papers, class participation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Jewish Studies concentrators, Religion majors, and students who have taken JWST 203

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 249 (D2) REL 249 (D2)

Difference, Power, and Equity Notes: This course will introduce students to discursive, institutional, and social structures that have organized the stigmatization, domination, and persecution of Jews in various geographic locations for over two thousand years. An understanding of these structures is crucial to understanding contemporary dynamics of difference and power. Students will also learn how anti-Semitism intersects with constructions of race, gender, class, religion, ethnicity, and nation.

LEAD 270 (F) Sport and the Global Color Line (DPE)

Cross-listings: LEAD 270 HIST 270 AFR 270

Secondary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format: Lecture and discussion.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites: None.

Enrollment Limit: 40

Enrollment Preferences: Open to all students with completion of course admission survey if overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: MAST 231 ENGL 231

Primary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (D1) ENGL 231 (D1)

Difference, Power, and Equity Notes: This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

MAST 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Primary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MATH 308 (S) Mathematical and Computational Approaches to Social Justice (DPE) (QFR)

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this research-based tutorial, students will bring the vanguard of quantitative approaches to bear on issues of social justice. Each tutorial pair will carry out a substantial project in one of the following areas: criminal justice, education equity, environmental justice, health care equity, and inclusion in arts/media. All students should expect to invest substantial effort in reading social justice literature and in acquiring new skills in data science, mathematics, and computation.

Class Format: This is a research-based tutorial.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: Across each tutorial pair: multivariable calculus (e.g., Math 150/151), linear algebra (e.g., Math 250), statistics (e.g., Stat 161/201), computer programming (e.g., Comp 134), some working knowledge of or interest in social justice issues.

Enrollment Limit: 10

Enrollment Preferences: This is a tutorial and hence is capped at 10 students. Students interested in enrolling should contact the instructor as soon as possible. The instructor will ask for a brief statement of interest and selected other information.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (DPE) (QFR)

Difference, Power, and Equity Notes: Students study issues of equity, diversity, and inclusion in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantative/Formal Reasoning Notes: Students use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

MUS 111 (S) Music in Global Circulation (DPE)

(Formerly Music Cultures of the World.) This course introduces a variety of musical genres and practices from around the world, alongside a discussion of the processes and politics of their global circulation. Through learning about a combination of contemporary styles and longstanding musical traditions spanning a broad geographical range, students will develop a working knowledge of musical terms, concepts, and influential musicians. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. In particular, we will consider music's global circulation, and how its contents and meanings reflect those processes. Genres covered in the course vary intermittently but often include: "throat singing" genres in Tuva and Sardinia, Zimbabwean mbira and Chimurenga music, Argentine Tango, Ghanaian azonto and highlife, Balinese gamelan, and North Indian classical music. No prior musical training is required.

Requirements/Evaluation: class attendance and participation, three 5-7 page written assignments, and an 8-10 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Music, upperclassmen.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music's potential in situations of political unrest.

MUS 118 (S) Hearing Race in America, 1890-1955 (DPE)

The rise of Rock 'n' Roll in the mid-1950s has typically been viewed as a temporary confluence in American culture, suggesting possibilities for musical and racial integration even as various forms of appropriation and exclusion were perpetuated. This course will explore the earlier multiple musical streams that merged at this moment. We will start by engaging with contemporary and historical perspectives on race, adopting a radically interdisciplinary approach. Our focus will then be on several of the most prominent vernacular and commercial forms of American music during this period: ragtime, blues, early jazz, rhythm and blues, Tin Pan Alley, country and western, bluegrass, Tex-Mex/Tejano conjunto, "Latin jazz," and Cajun/zydeco. Prior to the 1950s, these musical styles were segregated, at least in terms of production and marketing. How did racial assumptions and histories shape the creation, dissemination, and reception of this music? Can we hear the multiple ways in which race played out in American music in the first half of the twentieth century?

Class Format: lecture/discussion

Requirements/Evaluation: Evaluation will be based on a 5-page paper, a midterm, a 7-page paper, a final exam, and on class participation.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Random selection.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will focus on how racial imagination and systemic racism shaped the creation, marketing, and reception of multiple genres and styles in American popular music from 1890 to 1955. Before embarking on this historical study, we will first become familiar with current theories of race and with dominant American perceptions of race c. 1900. Perceptions of difference (in multiple forms), realities of market power, and issues of artistic and financial equity directly impacted music in this period.

PHIL 320 (F) Topics in Critical Theory: Subjection, Power, Freedom (DPE) (WS)

Any critical theory presupposes an account how both individual and social subjects come into being. Some critical theorists within the Frankfurt School tradition draw from upon ideas about the constitution of the subject developed in the early 19th century German philosophy of Hegel. According to Hegel, subjects are both historically and socially constituted; they are formed through their relations with other subjects. Hence, being with others, being dependent on others, is regarded as a key structuring feature of human existence. By the early 20th century, in the works of Freud, we encounter the idea of the intra-psychic features of subjects and the importance of understanding and regulating psychic forces both within and between subjects in order to adapt to the demands of living at any given time, born as we are both dependent upon and vulnerable to others. This raises the question whether a more complete account of the emergence of subjects must address both psychic, historical and social dimensions of subjectivity, the ways in which they are intertwined, and their importance for not only psychological well-being, but also relatively well-regulated socio-political relations. In this course we take up questions such as the following: What sorts of subjects do we find in modern Western societies? What are the forces, and the dynamics between forces (i.e., economic, technological, modes of communication, techniques of social control, biological, psychological) that make certain types of subjects possible influencing both their self-understandings and their forms of life? What role do emotional, irrational or unconscious forces play? To what extent do these myriad force relations limit, enable, or deform our participation as political citizens, and our capacity to transform and improve them? In our attempts to make headway in answering such daunting questions, we investigate recent debates in critical theory concerning subjection and resistance, intersubjective recognition and redistribution, social pathologies and the idea of a political unconscious. Readings will be drawn from recent work in the Frankfurt School and poststructuralist traditions of critical theory as well as anti-racist, anti-colonial, feminist and queer theories that draw upon them.

Class Format: We will schedule at least one seminar meeting during the semester. I will consult with students about the best time for this meeting.

Requirements/Evaluation: Evaluation will be based on written work (five 6-7 page papers, and five 2-3 page commentaries on your partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

Prerequisites: Demonstrated background in history of modern philosophy (PHIL 202), modern political theory, or critical and social theories.

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to philosophy majors and prospective majors and students with demonstrated interest and background in critical or social theories.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will write five of 5-7 pages in length, one of which they will revise and submit at the end of the term. We will also meet in seminar once or twice during the semester. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own positions. Students will receive written and oral feedback on both the content and form of their papers and contributions in meetings.

Difference, Power, and Equity Notes: In this course we address power and domination, reflect on the difference between them, and treat power relations as not only an inevitable feature of any society, but as both enabling and constraining. In addition, the course will contain readings that address race, class, gender and the legacy of colonialism.

PHLH 201 (S) Dimensions of Public Health (DPE)

Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises, covering infectious disease epidemics and prevention, sexual health, and mental health.

Class Format: Course will be taught in person.

Requirements/Evaluation: two papers on a selected population or country and health issue, peer reviews and active contribution to class discussion, including on Glow

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: sophomores, potential Public Health concentrators

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: No divisional credit (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because of its central focus on the ways that difference and power shape health outcomes in the U.S. and internationally. It uses an interdisciplinary approach to explore issues including the historical relations between communities of color, healthcare providers, and public health practitioners; contestation over the role of markets and government in public health; and differing explanations for the patterns of race, class, etc., in health outcomes.

PHLH 351 (F) Racism in Public Health (DPE)

In the face of a global pandemic and increased police brutality, states and counties across the nation are declaring racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which racism functions in the disciplines of biostatistics, epidemiology, social & behavioral sciences, health policy & management and environmental health sciences while also examining the dynamics of power and history in research and community practice. We will also gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial will most likely elicit uncomfortable and hard conversations about race and requires an openness to self-reflection and the practice of articulation.

Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

Prerequisites: PHLH 201

Enrollment Limit: 10

Enrollment Preferences: Public Health concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

POEC 287 (F) The Firm (DPE)

Cross-listings: PSCI 287 POEC 287

Secondary Cross-listing

The rise of gigantic tech firms--Google, Apple, Facebook, Amazon--has sparked widespread worries about the role of business power in capitalist democracy. Are these firms monopolies? How can they be better regulated? Should they be? This course studies the politics of business by centering analysis on the firm. From the perspective of the workplace, we investigate the firm as an arena of power, where workers and managers meet each other in continuous contests for control. From the perspective of the public sphere, we investigate the firm as an actor whose power maps uneasily onto the channels of democratic representation. Approaching the firm as both arena and actor in a number of capitalist democracies, we will compare the politics of business across different sectors, but will focus especially on tech and finance.

Requirements/Evaluation: Class participation; two 5- to 7-page essays; one presentation; one final essay

Prerequisites: One introductory course in political science and/or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to sophomores or juniors majoring in a Division II field

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 126 (S) Religion, Politics, and Society: A Global Perspective (DPE)

Cross-listings: REL 126 GBST 101 PSCI 126

Secondary Cross-listing

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

Enrollment Limit: 35

PSCI 160 (S) Refugees in International Politics (DPE) (WS)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic. We investigate who refugees are, in international law and popular understanding; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations' roles in managing population displacement; look at the way that images convey stereotypes; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation: Ten essays: five lead, five response. The first two weeks' essay grades will be unrecorded.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, to be selected randomly from list of those enrolled.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In addition to writing every week, students will have a chance work on specific skills cumulatively.

Difference, Power, and Equity Notes: This course examines the way in which home states categorize people and oppress some, producing refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.

PSCI 244 (F) Anti-Muslim Racism: A Global Perspective (DPE)

Cross-listings: PSCI 244 GBST 243 REL 247

Secondary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Also qualifies for the GBST Urbanizing World track

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 244 (D2) GBST 243 (D2) REL 247 (D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

PSCI 260 (F) Power, Feminist-Style (DPE) (WS)

Cross-listings: WGSS 260 PSCI 260

Secondary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice; the concept of power; from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have

employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 260 (D2) PSCI 260 (D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

PSCI 266 (S) The United States and Latin America (DPE)

This course examines the most important political and diplomatic divide in the Western Hemisphere. The first half is a historical survey of U.S.-Latin American foreign relations from the early Spanish American independence movements through the end of the Cold War and recent developments. We consider how this history confirms or undermines influential views about U.S. foreign relations and about international relations generally. We also compare historical U.S. foreign policy toward the hemisphere to U.S. policy toward the entire world after the Cold War. The second half covers the most important current issues in hemispheric relations: the rise of leftist governments in Latin America; the war on drugs; immigration and border security; and competition with China for influence. At the end we briefly reconsider current U.S. policies in historical perspective.

Class Format: more lecture in the first half, more discussion and several in-class debates in the second

Requirements/Evaluation: a map quiz, a 2-page paper, two 3-page papers, and either another 3-page paper and a regular final exam, or a 12-page research paper and a short final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Political Science majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: In the paper that considers the first part of the course, the students weigh to what extent U.S. policy toward Latin America was affected by the largely derogatory attitudes of U.S. diplomats toward Latin Americans. A unit in the second part of the course critically analyzes current U.S. immigration policy in this context.

PSCI 281 (S) Contemporary African Politics (DPE)

Cross-listings: GBST 281 PSCI 281

Primary Cross-listing

This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.

Class Format: A typical class session will be about 60% lecture and 40% discussion

Requirements/Evaluation: Class Participation, Map Quiz, 3 short papers (5 pages)

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

PSCI 351 (S) The New Left and Neoliberalism in Latin America (DPE)

Cross-listings: PSCI 351 GBST 351

Primary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

Class Format: discussion then seminar

Requirements/Evaluation: three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 367 (S) Decolonizing International Relations (DPE)

Cross-listings: GBST 367 PSCI 367

Primary Cross-listing

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states--the core foundation of international relations--presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g. white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g. race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

Requirements/Evaluation: Participation, 3 response/reflection papers, annotated bibliography

Prerequisites: One prior course in International Relations or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Juniors and Seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 367 (D2) PSCI 367 (D2)

Difference, Power, and Equity Notes: This class encourages students to recognize the power dynamics inherent within, and reproduced by, the study of International Relations as structured by traditionally dominant paradigms. This class provides students with the tools to critically identify, decenter, and deconstruct dominant lenses as well as the opportunity to engage with, and apply, an inclusive approach centering a more expansive range of theoretical perspectives and knowledge production.

Spring 2022

SEM Section: 01 TF 1:10 pm - 2:25 pm Elizabeth Iams Wellman

PSCI 376 (S) Angela Davis: Political Theory, Activism, and Alliances (DPE) (WS)

Cross-listings: LEAD 319 PSCI 376 INTR 320 AMST 308

Secondary Cross-listing

This seminar examines the political thought, activism, and iconography of abolitionist Angela Davis. The seminar involves a critical engagement with the philosopher, former political prisoner, and their relationship with other theorists, authors and activists. Readings include: *Angela Davis: An Autobiography*; *Soledad Brother: The Prison Letters of George Jackson*; *The Morning Breaks: The Trial of Angela Davis*; *Women, Race, and Class*; *If They Come in the Morning*.

Requirements/Evaluation: Requirements: students attend each seminar class and come prepared to discuss the readings. Papers are due by email 24 hours before the seminar begins.

Prerequisites: Preferences: Juniors and Seniors who have taken courses in Africana Studies, American Studies, Political Science, Philosophy.

Enrollment Limit: 19

Enrollment Preferences: Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 319 (D2) PSCI 376 (D2) INTR 320 (D2) AMST 308 (D2)

Writing Skills Notes: Three thesis papers at five pages each will receive critical feedback from the professor; one of the three papers will be revised with critical feedback from professor and peers, accompanied by a one-page statement explaining student's revisions; one keyword glossary where students define their key terms used in the paper; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: This course examines political activism in the 1960s-1970s during the Cold War in which the civil rights, black power and student anti-war movements challenged traditional US domestic and foreign policies. Examining the differential powers of university Regents, governors, presidents, and police forces and prison administrations in relation to social justice movements led by people under the age of thirty, we examine the structures of institutional power and the agency of cadre theorists.

PSYC 349 (S) Psychology and Law (DPE)

This course focuses on applications of psychology to the administration of justice. Drawing from the areas of social, personality, cognitive, and developmental psychology, we will look critically at the processes of criminal justice. We will compare the law's informal theories of human behavior with what psychologists know on the basis of empirical studies. We will cover a number of contemporary topics including police-civilian interactions, custodial interrogations, false confessions and guilty pleas, forensic evidence, deception detection, eyewitness identifications, alibi generation and corroboration, repressed and recovered memories, and jury selection and decision-making. We will also discuss methodological issues associated with conducting research in psychology and law. In the laboratory component of the course, students will design and conduct their own empirical research projects based on course readings and topics. These semester-long projects will be conducted collaboratively in pairs or teams.

Class Format: empirical lab course

Requirements/Evaluation: attendance and active class participation, several brief (1-2 page) reading response papers, (2-3) class presentations, written/oral project proposal (4-5 pages), participation empirical project (experiment design, data collection, data visualization, data analysis, interpretation), final APA-style research paper (15-20 pages), oral presentation of the research project

Prerequisites: PSYC 201 and either PSYC 242 or PSYC 221

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

Difference, Power, and Equity Notes: We will explore the differing dynamics of power between legal actors and consider the psychological and structural factors that contribute to vulnerability, coercion, and inequality in the justice system. Through discussions of race, age, body, gender, disability, and stigmatized identities, this course will encourage students to challenge assumptions of objectivity and fairness in our legal system.

REL 126 (S) Religion, Politics, and Society: A Global Perspective (DPE)

Cross-listings: REL 126 GBST 101 PSCI 126

Secondary Cross-listing

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Global Studies concentrators and intended concentrators; Religion majors and intended majors

REL 166 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: REL 166 AMST 166 COMP 166 ENGL 268

Primary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 166 (D2) AMST 166 (D2) COMP 166 (D1) ENGL 268 (D1)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

REL 237 (S) Islam in the United States: Race, Religion, Politics (DPE)

Cross-listings: REL 237 AFR 237 AMST 237

Primary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States.

Throughout the course, we will be engaging with historical and anthropological material, autobiographies, comics, documentaries, films, historical primary-source documents, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, midterm essay, final exam/essay

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Zaid Adhami

REL 238 (F) Islam and Reason (DPE)

In an essay on the "reality of Islam," the popular New Atheist writer, Sam Harris, concludes: "All civilized nations must unite in condemnation of a theology that now threatens to destabilize much of the Earth... It is time we realized that the endgame for civilization is not political correctness. It is not respect for the abject religious certainties of the mob. It is reason." These words forcefully express the common sentiment that the fanatical blind faith demanded by "mainstream Islam" poses a major threat to the so-called civilized world. Islam is thus seen as exemplifying the irrational dogmatism of religion par excellence. This course will critically examine such assumptions, by exploring how Muslim philosophers and theologians throughout the history of Islam have addressed a variety of questions, such as: Is faith compatible with reason and rationality? What is the relation between reason and scripture? What modes of perception, reasoning, and knowledge are involved in religious belief? What room is there for doubt, skepticism, and critique in Islam? We will explore these questions through an array of primary and secondary readings in Islamic theology, philosophy, mysticism, and ethics, as well as anthropological engagements with lived Islam. Through these explorations, we will also critically reflect on our own cultural assumptions about religious belief, the nature of reason and knowledge, and the politics and power-dynamics of reason and rationality.

Requirements/Evaluation: Regular discussion posts; Midterm essay; Final essay

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Religion majors

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course requires students to engage deeply with a very different philosophical universe than that of the modern West. This is also meant to prompt a critical engagement with our own cultural and philosophical assumptions about reason, knowledge, and religious belief. Finally, we will also reflect on the politics and power-dynamics of reason and rationality, considering how dominant modes of thinking are designated as "reason" and others are relegated to being objects of critique.

REL 242 (S) Women, Gender, and Sexuality in Islam (DPE)**Cross-listings:** REL 242 WGSS 242 ARAB 242**Primary Cross-listing**

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)**Prerequisites:** none**Enrollment Limit:** 19**Enrollment Preferences:** Religion, Women's, Gender and Sexuality Studies and Arabic majors**Expected Class Size:** 14**Grading:** no pass/fail option, yes fifth course option**Distributions:** (D2) (DPE)**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 242 (D2) WGSS 242 (D2) ARAB 242 (D2)

Difference, Power, and Equity Notes: This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

REL 247 (F) Anti-Muslim Racism: A Global Perspective (DPE)**Cross-listings:** PSCI 244 GBST 243 REL 247**Secondary Cross-listing**

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.**Prerequisites:** none**Enrollment Limit:** 25**Enrollment Preferences:** Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

REL 249 (S) Anti-Semitism (DPE)

Cross-listings: JWST 249 REL 249

Primary Cross-listing

This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Requirements/Evaluation: Three 5-7 page papers, class participation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Jewish Studies concentrators, Religion majors, and students who have taken JWST 203

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 249 (D2) REL 249 (D2)

Difference, Power, and Equity Notes: This course will introduce students to discursive, institutional, and social structures that have organized the stigmatization, domination, and persecution of Jews in various geographic locations for over two thousand years. An understanding of these structures is crucial to understanding contemporary dynamics of difference and power. Students will also learn how anti-Semitism intersects with constructions of race, gender, class, religion, ethnicity, and nation.

REL 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: REL 269 STS 269 ASIA 269 ANTH 269

Primary Cross-listing

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 276 (S) Gnosis, Gnostics, Gnosticism (DPE)

Cross-listings: REL 276 COMP 258

Primary Cross-listing

Reality is not what it seems. Salvation by knowledge, arch-heresy, an eternal source of mystical insights and experiences, secret esoteric teachings available only to a few. All these and more have been claims made about gnosis, Gnostics, and Gnosticism. This course will introduce you to the key ancient texts and ideas associated with Gnostics in modern forms of esotericism and spiritualities. We shall explore how claims about gnosis offer modes of critiquing and seeking to transform unjust social and political systems.

Class Format: lecture/discussion

Requirements/Evaluation: weekly GLOW posts, 1 textual analysis paper, 1 historiographical analysis paper, and a final paper that entails a revision and expansion of earlier writing for the course.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students with prior coursework in biblical or other ancient literature or history

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 276 (D2) COMP 258 (D1)

Difference, Power, and Equity Notes: This course situates "gnosis" as a practical epistemological orientation used both to disrupt and challenge power arrangements deemed unjust and to empower those who are marginalized within dominant power structures. At the same time, the course interrogates "gnostic" epistemological claims as capable of being used to reinstall hierarchical power structures. Attention to power and equity and how difference is produced is at the center of the course.

Spring 2022

LEC Section: 01 MR 1:10 pm - 2:25 pm Denise K. Buell

RLFR 101 (F) Introduction to French Language and Francophone Cultures (DPE)

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

Requirements/Evaluation: active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

Prerequisites: none; for students who have never formally studied French; students who have previously studied French (in any formal course, at any level) must take the French Placement Test in late August or early September

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: RLFR 101-102 is a year-long course; credit granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

Fall 2021

RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction (DPE)

Cross-listings: RLFR 106 COMP 107

Primary Cross-listing

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2020, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. *Conducted in French.*

Requirements/Evaluation: active class participation, grammar exercises, two short papers, midterm, and final paper

Prerequisites: Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)

Cross-listings: RLFR 202 COMP 292 WGSS 201

Primary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers (of 3-5 pages each)

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 202 (D1) COMP 292 (D1) WGSS 201 (D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

Fall 2021

RLFR 260 (F) Francophone Graphic Novels (DPE)

Cross-listings: RLFR 260 COMP 260

Primary Cross-listing

In this class we will read contemporary graphic novels and *bandes dessinées* from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. *Conducted in French.*

Requirements/Evaluation: weekly 1-page response papers, two short 4-5-page papers, presentation and final 7-8-page research paper

Prerequisites: RLFR 105, 106, by placement or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students, Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 260 (D1) COMP 260 (D1)

Difference, Power, and Equity Notes: The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

Fall 2021

SEM Section: 01 TR 11:20 am - 12:35 pm Katarzyna M. Pieprzak

RLFR 300 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 AFR 339 COMP 336

Primary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

Attributes: FMST Core Courses

Spring 2022

SEM Section: 01 MW 11:00 am - 12:15 pm Sophie F. Saint-Just

RLFR 360 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 460 COMP 361 ARAB 360 RLFR 360 ARTH 560

Primary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in English. All students have the option of reading selected texts in either French or English. Students taking the course for RLFR credit will read selected texts in French, participate in occasional French discussion sessions, and write the mid-term paper in French. Grad Art Students will occasionally meet as a group with the instructor and will write a longer final paper.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 12-page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 460 (D1) COMP 361 (D1) ARAB 360 (D1) RLFR 360 (D1) ARTH 560 (D1)

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Spring 2022

SEM Section: 01 Cancelled

RLFR 410 (F) Senior Seminar: Movement and Migration (DPE)

How do movement and migration produce and disrupt constructions of identity, home, and the nation? In the context of movement and migration, how is place imagined, experienced and remembered? What are the relationships between movement and containment, flight and freedom? Over the course of the semester, we will examine literary texts, film and visual art from French-speaking communities that focus on: the immigration experience

in France, the construction of a Francophone Atlantic identity, internal migration between rural and urban spaces, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable or nomadic places of memory. Works by Chamoiseau, Glissant, Diome, Condé, Maffre, Pineau, and Binebine among others. *Conducted in French.*

Requirements/Evaluation: Weekly 1-page response papers, 5-page mid-term paper and a final 10-page research paper and presentation.

Prerequisites: Any 200-level RLFR course, or by permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Students will explore how literature, film and art narratives on migration and movement challenge (and also sometimes replicate) discourses of exclusion and structures of discrimination based on race and ethnic identity and gender. While the course focuses on French-speaking communities and people, we will think broadly about difference and power as they relate to movement, flight and freedom.

Fall 2021

SEM Section: 01 TF 1:10 pm - 2:25 pm Katarzyna M. Pieprzak

RLSP 264 (S) Outcasts of the Lettered City: Nation-Building and the Margins in 19th Century Latin America (DPE) (WS)

Bandits, vagabonds, runaway slaves, and unruly women. Defeated soldiers. Afro-Colombian rivermen. Indigenous Americans and their white captives. Latin American cultural production of the 19th century is conventionally studied in terms of the urban intellectuals' projects of nation-formation in the aftermath of the long struggle for independence from Spain. This course examines that process from the outside, considering instead a series of literary and other writings that represent the marginalized others of the desired nation-state, the women and men, many of them Afro-descended, Indigenous and mixed race, who found themselves excluded from the new national community--or who preferred a life on the pampas, deep in the jungle, or somewhere else outside the confines of bourgeois society. Primary readings will be selected from among the following: Simón Rodríguez, *American Societies in 1828*, Juan Francisco Manzano, *Autobiography of a Slave*; Domingo F. Sarmiento, *Facundo. Civilization and Barbarism in the Argentine Republic*; José Hernández, *Martín Fierro*; Flora Tristán, *Peregrinations of a Pariah*; Juan Crisóstomo Centurión, *Viaje nocturno*, Federico Gamboa, *Santa*; Candelario Obeso, *Popular Songs of My Land*; Cirilo Villaverde, *Cecilia Valdés*, Lucio V. Mansilla, *Excursion to the Ranquel Indians*. We will also read a number of critical essays by leading scholars in the field of 19th century Latin American literature.

Requirements/Evaluation: Students will write and revise approximately 20 double-spaced pages, in Spanish, over the course of the semester. Students will also prepare 10-15 minutes responses to their classmates' work. We will read 100-150 pages of Spanish prose each week and well as critical essays, which will often be in English.

Prerequisites: Any 200-level course with an RLSP prefix or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Spanish majors and potential Spanish majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: This course is conducted as a tutorial. The number of students in each unit (pairs or triplets) depends on how many students enroll, but whatever our structure turns out to be, each student can anticipate multiple opportunities to write and revise their individual essays in response to feedback from their classmate and professor, as well as to serve as the respondent offering feedback other students' work. Thus we emphasize editing and revision as essential parts of the writing process.

Difference, Power, and Equity Notes: This course examines structures of exclusion in 19th century Latin America -- the reproduction and perpetuation of socio-economic and institutional structures based on racial, gendered and class-based hierarchies established during the colonial era -- and the spaces that historical individuals have been able to occupy within and around them.

Spring 2022

TUT Section: T1 TBA Jennifer L. French

RLSP 319 (S) Dictatorship and the Latin-American Novel (DPE)

Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martínez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive and profound.

Class Format: In-person.

Requirements/Evaluation: three 8-page papers, response journals, an oral report, a final 3-page paper, and class participation

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Spanish majors, Latina/o Studies concentrators

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course focuses on the ultimate sort of power--namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence--Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

Attributes: GBST Latin American Studies Electives

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Gene H. Bell-Villada

RLSP 405 (F) Alternative American Literatures: From the Indigenous Chronicle to the Latin American & Chic. Novel (DPE) (WS)

Do the Americas have a common literature? If so, is it possible to trace their roots and continuity from the colonial era to the present? Literary critic Martin Lienhard suggests that it is indeed possible to trace the origin of a literature common to Latin America from the colonial era and into present by focusing on what he calls "alternative literatures"--literatures that relativize the importance of Europeanized and Creole literatures and valorize the richness of oral traditions in the Americas. Such literatures, he asserts, are closely tied to marginalized sectors of society. In this course, we will take Lienhard's concept of "alternative literatures" as a point of departure to pursue our own examinations of how these "alternative literatures" are constituted. While the primary aim of this course is to focus on the writings of Latin American authors, we will end by exploring the relationship between "alternative" Latin American literatures and Chicana/o/x literatures. Readings will include narrative texts such as Cartas de relación, chronicles of conquest, religious texts, indigenous annals, poetry, and drama, as well as contemporary Latin American and Chicana/o/x novels.

Requirements/Evaluation: Four essays, class presentations, active participation, and regular attendance required

Prerequisites: any 300-level RLSP course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Spanish Majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write four 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will highlight intellectual production of indigenous peoples of the Americas under Spanish colonial rule as well as the writings of more contemporary minority authors of Latin America. It will explore the new identities and textualities that emerge as a result of the encounter and subsequent conquest of the Americas. As such, students will gain critical skills to analyze a diversity of Spanish-American colonial texts from the 16th century as well as more contemporary narrative texts.

Fall 2021

RUSS 401 (F) Senior Seminar: Queer Russia (DPE)

This seminar explores queerness as both a cultural concept and social reality in Russia and the Soviet Union from the nineteenth century to the present. We will begin with the history of LGBTQ+ Russians, as well as an overview of texts produced by queer writers, in the Russian Empire and Soviet Union. We will then investigate queerness in post-Soviet Russia, where non-normative sexuality has become a hotly contested political concept over the past three decades. In addition to reading texts and viewing films by and about LGBTQ+ Russians, we will examine the genesis, implementation, and impact of the 2013 ban on "homosexual propaganda," which has placed homophobia at the center of national identity in the Russian Federation. We will also read theoretical works to help us understand not only the unique formations and expressions of queerness in Russia, but also how local Russian queerness plays out on the global stage.

Requirements/Evaluation: completion of all reading and viewing assignments, preparation for and active participation in class discussions, two 4-5 page papers, and a final 20-minute presentation based on students' independent research

Prerequisites: RUSS 252 or the permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: those majoring in Russian or pursuing a Certificate in Russian

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This seminar explores how gender and sexuality have been conceptualized and experienced in Russia with a particular emphasis on how non-normative gender and sexuality have become tools in the struggle for social and political power in post-Soviet Russia. Our exploration of queerness in Russia over the past two centuries will help students to develop critical skills for assessing how gender and sexuality are currently conceptualized in the United States.

Fall 2021

SEM Section: 01 TF 2:35 pm - 3:50 pm Julie A. Cassidy

SOC 217 (F) Inequality in a Classless Society: The Soviet Experiment and its Aftermath (DPE)

Cross-listings: ECON 107 SOC 217

Secondary Cross-listing

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with, justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

Requirements/Evaluation: Class participation; small writing assignments and research exercises; and a final research project

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: 1st and 2nd-year students thinking about majoring in Anthropology, Sociology, or Economics

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major. It may be taken for the SOC major.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 107 (D2) SOC 217 (D2)

Difference, Power, and Equity Notes: The subject matter of this course is all about the origins, evolution, current structures, and implications of economic and social differentiation in a region quite apart from the United States. Moreover, by crossing disciplinary lines, we hope it will offer a particularly valuable perspective on such issues. Thus, we felt that it should naturally serve as a DPE course.

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Steven E. Nafziger, Olga Shevchenko

SOC 230 (S) Memory and Forgetting (DPE)

Cross-listings: AMST 233 SOC 230

Primary Cross-listing

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 233 (D2) SOC 230 (D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Christina E. Simko

STS 101 (S) STEM's Empire: A Critical Introduction to Science and Technology Studies (DPE)

Who follows the science? The COVID-19 pandemic has upended many's beliefs in the rationality of scientific enterprise, exposing the institutions, power dynamics, and inequalities that shape its constitution. Meanwhile, the "tech fix" approach to ending the pandemic solely through vaccination has produced staggering death tolls compared to non-pharmaceutical interventions like masking, social distancing, and contact tracing implemented in places such as Liberia, Rwanda, and the Asia-Pacific, which have contained COVID-19 with relative success. As feminist and postcolonial scholars have long told us, the power of science often operates through division, producing dichotomies such as West/non-West, modern/traditional, global/local, developed/underdeveloped, and science/non-science. It is inextricably linked to the colonial conquest of territories, bodies, and minds. In this course, we will explore scientific practice and the production of scientific knowledge through the metaphor of empire: How might we understand scientific claims to truth, knowing that colonial relations of power are still embedded in our identities and institutions, and in the hegemonies that shape our world? We will explore this question by engaging with feminist and postcolonial critiques of science, studying controversies over the environment,

medicine, indigenous knowledge, diversity in STEM, and other topics. We will pay particular attention to the situated processes out of which claims to the universal or global are made, asking who is left out of making such claims as well. An introductory course, students will be exposed to key debates in STS and learn critical tools for analyzing science and technology in an unequal but interconnected world.

Requirements/Evaluation: Several short response papers, mid-term paper, final project

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-years and sophomores

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course will demonstrate how issues of power shapes the practices of empiricism.

Spring 2022

SEM Section: 01 TR 11:20 am - 12:35 pm Shoan Yin Cheung

STS 102 (F) Breeding Controversy: Technologies and Ideologies of Population Control (DPE)

Cross-listings: WGSS 103 STS 102

Primary Cross-listing

What is "good breeding?" For whom is birth control "liberating?" This course traces the surprising ways that concepts of population growth and decline from the natural sciences come to inform social discourses on "overpopulation" in the twentieth and twenty-first centuries. Science and politics mix to decide: who should be able to reproduce--and, consequently, who might not be born--so that some may live more prosperously? By studying the history of eugenics movements, contraceptive technologies in the context of development, and the racialized cultures of reproductive medicine, we will analyze how scientific ways of thinking about human lives reflect and reproduce social inequities. We will use the tools of feminist technoscience studies to understand how science, culture, power, and politics intersect to create new technologies of "selection" that are far from natural. New literatures in critical race STS, black feminist thought, and critical theory will inform our discussions.

Requirements/Evaluation: Weekly paper or response and in-class debate.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: Freshmen. If over-enrolled, students will submit a short paragraph stating their interest in the course.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 103 (D2) STS 102 (D2)

Difference, Power, and Equity Notes: This course will demonstrate how scientific knowledges also reflect biases organized along lines of social difference, including race, gender, class and nation. Readings in critical race theory will give students a deeper appreciation of these issues.

Attributes: PHLH Reproductive, Maternal and Child Health

TUT Section: T1 TBA Shoan Yin Cheung

STS 208 (S) Designer Genes (DPE) (WS)

Cross-listings: WGSS 208 ENGL 208 STS 208 AMST 206

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it

also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages), short presentation, longer final researched paper/project (8-10 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies, American Studies, English majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 208 (D2) ENGL 208 (D1) STS 208 (D2) AMST 206 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts; two four-to-five-page graded papers; one descriptive digital assignment (the Story Map); and a final researched paper (8-10 pages)--written in stages. Students receive critical feedback on written assignments through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next.

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics' case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

STS 250 (F) Environmental Justice (DPE)

Cross-listings: STS 250 ENVI 250

Secondary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: juniors, seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 250 (D2) ENVI 250 (D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

STS 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: REL 269 STS 269 ASIA 269 ANTH 269

Secondary Cross-listing

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism,

and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269 (D2) STS 269 (D2) ASIA 269 (D2) ANTH 269 (D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

TUT Section: T1 TBA Kim Gutschow

STS 311 (S) Global Health in the Transpacific (DPE)

Cross-listings: AMST 352 STS 311 ASIA 352

Primary Cross-listing

East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia's claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees' resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper

Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.

Enrollment Limit: 12

Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 352 (D2) STS 311 (D2) ASIA 352 (D2)

STS 321 (F) Unsettled Futures: Time, Crisis, and Science Fiction from the Margins (DPE)

Cross-listings: STS 321 AMST 321

Secondary Cross-listing

Societies around the globe are now confronting a triple crisis that threatens not only political orders but also the very existence of certain forms of life: (1) financial collapse(s) that have increased the awareness and severity of mass inequality, (2) climate change and mass extinctions, and (3) the rise of white supremacy and ethno-nationalisms that threaten BIPOC lives and representative democracies. These material and political challenges have depleted many of the cultural resources that enable imagining non-apocalyptic futures. Yet, these crises are not novel. Many groups in the periphery--geographic, economic, and cultural--were and are already living through the uneven distribution of the apocalypse. Science fiction (SF) has emerged as a privileged symbolic field for the expression of hopes and anxieties that drive both culture and tech industries. Whether seen as a form of productive pessimism or liberatory theory, SF from the margins is deployed as a political tool for enacting change in the present. In this course, we will survey the history of SF as a variable and theoretical orientation constituted through the unfolding of uneven global encounters. We will analyze SF in the Cold War, Anthropocene, decolonization movements, and postcolonial and Indigenous landscapes, reading major works in SF and science and technology studies (STS) that address the politics of crisis, apocalypse, and global futures. In addition to novels and short stories, this course will incorporate film, graphic novels, music videos, video games, and other science fiction subgenres.

Requirements/Evaluation: Class discussion, approximately 10 pages of creative writing, 5 page analysis paper of your classmate's creative writing, final paper or project (5-8 page paper or equivalent)

Enrollment Limit: 15

Enrollment Preferences: Students who have taken American Studies 101 and/or Science and Technology Studies 101

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 321 (D2) AMST 321 (D2)

Difference, Power, and Equity Notes: This course examines the racial, ethnic, gendered, and sexed dimensions of science fiction and traces how marginalized people have imagined the future amidst an atemporal and unfolding apocalypse. Students will work with postcolonial, Indigenous, queer, and critical race media concerning the future, and will gain the skills needed to read political orders and crises through the lens of the margin.

STS 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)

Cross-listings: STS 353 AMST 353

Secondary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting

settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 353 (D2) AMST 353 (D2)

Difference, Power, and Equity Notes: This course will explore how settler sciences have been used as a technology of difference making, dispossession, and genocide in United States history. It will also provide students a theoretical toolkit and historical perspective by which they can grapple with the fact that power structures like settler technoscience can be a source of both colonization and liberation.

STS 370 (F) Medicine and Campus Health in Disruptive Times (DPE) (WS)

Cross-listings: STS 370 WGSS 371 ANTH 371

Secondary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20

Enrollment Preferences: Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

STS 413 (S) Feminist and Critical Technoscience (DPE)

Cross-listings: WGSS 413 STS 413

Primary Cross-listing

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway's "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch's "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation: discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final essay (12-15 pages + in-class presentation)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Science and Technology Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 413 (D2) STS 413 (D2)

Difference, Power, and Equity Notes: Central to "Feminist and Critical Technoscience" is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

THEA 246 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: GBST 246 THEA 246 AMST 249

Primary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists *do* politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 246 (D1) THEA 246 (D1) AMST 249 (D2)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

Fall 2021

SEM Section: 01 W 1:10 pm - 3:50 pm Shanti Pillai

THEA 272 (S) Theatre & Environment: Site, Nature, Eco-performance, Utopia (DPE)

Cross-listings: THEA 272 ENVI 271

Primary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or ecology of a performance change its meaning and reception? What role can live performance play in grassroots campaigns for climate action or environmental justice? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this combined seminar/studio course, participants will work collaboratively to create a series of mini-performances based on four categories: site, nature/ecology, eco-performance, and utopia.

Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute *all* human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Artichoke Dance, Talking Birds, Extinction Rebellion, Greenpeace, and others. As a special project in the class, we will collaborate with The Zilkha Center to create performances that engage directly with topics relevant to the campus and surrounding community. This is a seminar and maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio and seminar course that requires deep collaboration on the creation, development, and performing of original works of live performance.

Requirements/Evaluation: Creation and presentation of a series of four mini-performance pieces; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 272 (D1) ENVI 271 (D1)

Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

Attributes: ENVI Humanities, Arts + Social Science Electives

Spring 2022

STU Section: 01 TF 1:10 pm - 2:25 pm Amy S. Holzapfel

THEA 301 (F) Embodied Archives: Global Theatre & Performance Histories (DPE)

Cross-listings: THEA 301 COMP 303

Primary Cross-listing

What is the past good for? Why study theatre history now? What do the archival performance traditions, practices, and sources of yesterday have, if anything, to offer the theatre artists of today and tomorrow? Digging into these questions, this combined studio/seminar course will introduce students to major global theatre and performance histories by considering how they've been taken up--adapted, appropriated, recycled, critiqued, and re-appropriated--by artists working in the field now. Why does dramatist Luis Alfaro return to Sophocles' *Electra* to tell a story about the experiences of Chicana communities in L.A.? What does the playwright Branden Jacobs-Jenkins find compelling about the allegorical performances of English Medieval theatre? What role does traditional Korean dance ritual play in the experimental theatre of artist Young Jean Lee? How have collaborators at New York's Public Theater sought to re-vitalize Shakespeare's works through community-driven practices? Through comparative pairings such as these, we will study and draw inspiration from the ways contemporary dramatists, makers, directors, and performers have approached the theatrical forms and performance practices of the past in the effort to create new perspectives on the present. While attending to theatre's formal and aesthetic aspects, we will at the same time focus on the relationship of performance to the enduring legacies of empire, state power, colonialism, and private capital in which they are historically embedded and by which they are shaped. If and when possible, we will encounter archival sources housed in College Archives and WCMA. As a final creative project, students will adapt, critique, or re-appropriate a source material of their own choosing. This course is required for Theatre majors and is a prerequisite for THEA 401.

Class Format: This class is a combined studio/seminar. Students will be required to present and share their creative responses to the material studied in the course.

Requirements/Evaluation: journal writing and active participation in class; a midterm creative adaptation project and accompanying "research casebook"; participation as discussion leader for one class; and a final creative adaptation or performance project and accompanying "research casebook."

Prerequisites: For Theatre majors: any 100 or 200-level theatre course.

Enrollment Limit: 16

Enrollment Preferences: Theatre majors; Comparative Literature majors

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 301 (D1) COMP 303 (D1)

Difference, Power, and Equity Notes: This course works to dismantle the ongoing bias in theatre studies that positions textual and literary forms of theatre in the globalized north as the dominant sites of knowledge transfer, status, and value in our field. Instead, theatre and performance are approached as diverse forms of repertoire and embodied knowledge that must be analyzed in relation to the structures of social inequity and power in which they historically arise.

Fall 2021

STU Section: 01 TR 11:20 am - 12:35 pm Amy S. Holzapfel

THEA 304 (S) The Gay Menagerie: Gay Male Subcultures (DPE)

Cross-listings: ANTH 305 WGSS 305 AMST 305 THEA 304

Secondary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 305 (D2) WGSS 305 (D2) AMST 305 (D2) THEA 304 (D1)

Difference, Power, and Equity Notes: This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference."

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Spring 2022

SEM Section: 01 Cancelled

WGSS 101 (F)(S) Introduction to Women's, Gender & Sexuality Studies (DPE) (WS)

This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues--historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

Class Format: Mix of lectures and seminars

Requirements/Evaluation: Participation during class and in online forums, weekly reading responses, two short essays with revisions, and a final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS majors and potential WGSS majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for the Women's, Gender and Sexuality Studies major

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers.

Difference, Power, and Equity Notes: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies' history, activism, and theory.

WGSS 103 (F) Breeding Controversy: Technologies and Ideologies of Population Control (DPE)

Cross-listings: WGSS 103 STS 102

Secondary Cross-listing

What is "good breeding?" For whom is birth control "liberating?" This course traces the surprising ways that concepts of population growth and decline from the natural sciences come to inform social discourses on "overpopulation" in the twentieth and twenty-first centuries. Science and politics mix to decide: who should be able to reproduce--and, consequently, who might not be born--so that some may live more prosperously? By studying the history of eugenics movements, contraceptive technologies in the context of development, and the racialized cultures of reproductive medicine, we will analyze how scientific ways of thinking about human lives reflect and reproduce social inequities. We will use the tools of feminist technoscience studies to understand how science, culture, power, and politics intersect to create new technologies of "selection" that are far from natural. New literatures in critical race STS, black feminist thought, and critical theory will inform our discussions.

Requirements/Evaluation: Weekly paper or response and in-class debate.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: Freshmen. If over-enrolled, students will submit a short paragraph stating their interest in the course.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 103 (D2) STS 102 (D2)

Difference, Power, and Equity Notes: This course will demonstrate how scientific knowledges also reflect biases organized along lines of social difference, including race, gender, class and nation. Readings in critical race theory will give students a deeper appreciation of these issues.

WGSS 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: AMST 105 ENGL 105 WGSS 105

Secondary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 105 (D2) ENGL 105 (D1) WGSS 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Cross-listings: WGSS 113 ENGL 113 AMST 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

WGSS 201 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)

Cross-listings: RLFR 202 COMP 292 WGSS 201

Secondary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers (of 3-5 pages each)

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 202 (D1) COMP 292 (D1) WGSS 201 (D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

SEM Section: 01 MW 11:00 am - 12:15 pm Brian Martin

WGSS 202 (F)(S) Foundations in Sexuality Studies (DPE)

This course will offer an introduction to the burgeoning interdisciplinary field of sexuality studies in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. It explores the role of race, class, religion, science, region, and nation in the construction of modern gender and sexual identities and in the lived experiences of dissident genders and sexualities. We will examine a range of issues, including histories and strategies of resistance; transgender and intersex theory and activism; critiques of the white racial hegemony of lesbian and gay studies; the consequences of gay marriage; the politics of AIDS and its theoretical implications; globalization and sexuality; the rise of queer visibility and its relation to commodity culture; and recent conceptualizations of homonormativity. The goal of the course is not to achieve any kind of political or intellectual consensus, but to have rigorous debate over some of the key issues in queer studies.

Class Format: discussion

Requirements/Evaluation: Class participation, on-line discussion forum, two papers of around 5-7 pages.

Prerequisites: None. WGSS 101 may be helpful as background knowledge, but is not required.

Enrollment Limit: 19

Enrollment Preferences: Women's Gender & Sexuality Studies majors, short statement of interest in case of over-enrollment

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines sexual diversity in various forms and asks students to interrogate questions of privilege and positionality, including the intersectional contemplation of sexuality's relationship to race, ethnicity, ability, class, religion, and other axes of identity. It investigates not only sexual difference, but the history of sexual identity and progressive narratives of "gay rights" that have developed over time.

WGSS 208 (S) Designer Genes (DPE) (WS)

Cross-listings: WGSS 208 ENGL 208 STS 208 AMST 206

Primary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages), short presentation, longer final researched paper/project (8-10 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies, American Studies, English majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 208 (D2) ENGL 208 (D1) STS 208 (D2) AMST 206 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts; two four-to-five-page graded papers; one descriptive digital assignment (the Story Map); and a final researched paper (8-10 pages)--written in stages. Students receive critical feedback on written assignments through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next.

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics' case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

WGSS 242 (S) Women, Gender, and Sexuality in Islam (DPE)**Cross-listings:** REL 242 WGSS 242 ARAB 242**Secondary Cross-listing**

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)**Prerequisites:** none**Enrollment Limit:** 19**Enrollment Preferences:** Religion, Women's, Gender and Sexuality Studies and Arabic majors**Expected Class Size:** 14**Grading:** no pass/fail option, yes fifth course option**Distributions:** (D2) (DPE)**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 242 (D2) WGSS 242 (D2) ARAB 242 (D2)

Difference, Power, and Equity Notes: This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

WGSS 251 (F) Arab Women Memoirs: Writing Feminist History (DPE) (WS)**Cross-listings:** WGSS 251 COMP 252 ARAB 252**Secondary Cross-listing**

This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (*A Mountainous Journey: An Autobiography*), Fatima Mernissi (*Dreams of Trespass: Tales of a Harem Girlhood*), Radwa Ashour (*The Journey*), Fadia Faqir and Shirley Eber (*In the House of Silence: Autobiographical Essays by Arab Women Writers*), and Assia Djebar (*Fantasia*), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Requirements/Evaluation: students will write the following: three response papers (2-3 pages), at least 6 journal entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.**Prerequisites:** none**Enrollment Limit:** 19

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 251 (D2) COMP 252 (D1) ARAB 252 (D1)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue to depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

WGSS 255 (S) "Illness" in Modern and Contemporary Chinese Literature and Culture (DPE)

Cross-listings: COMP 254 CHIN 253 WGSS 255

Secondary Cross-listing

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "illnesses" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual illnesses, from tuberculosis to AIDS to the Novel Coronavirus, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "illness"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "illness"; the relationship between illness on the one hand, and the politics of body, gender, and class on the other; we ask how infectious disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "illness" such as infectious cannibalism and fin-de-siècle "viruses," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan). Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

Class Format: All regular course meetings will be conducted in person.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Publishing GLOW Discussion posts based on reading (Graded as Complete or Incomplete); 3) three short papers (3-5 pages); 4) the final project (including an abstract, a presentation, and a paper or other form of project).

Prerequisites: None; no knowledge of Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Comp majors; Asian Studies Concentration; WSGG majors; and then to first-year students

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 254 (D1) CHIN 253 (D1) WGSS 255 (D2)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social stigma as well as the dynamics of unequal power by means of closely reading "illness" in 20th and 21st century China. We will exam how "illness" is sometimes gendered and politicized; how "illness", in other times, empowers individuals and bonds underrepresented minorities. Illness, as a seemingly universal human experience, tells diverse stories of (in)difference, (dis)power, and (un)equity.

Spring 2022

SEM Section: 01 MR 1:10 pm - 2:25 pm Man He

WGSS 260 (F) Power, Feminist-Style (DPE) (WS)

Cross-listings: WGSS 260 PSCI 260

Primary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice; the concept of power; from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 260 (D2) PSCI 260 (D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

WGSS 262 (F) Indigenous Feminisms (DPE)

Cross-listings: AMST 260 WGSS 262

Secondary Cross-listing

Indigenous women, Two Spirit and trans people have always stood on the frontlines of decolonization struggles in the Americas, from treaty negotiations to self defense against settler invasion, to the Standing Rock Sioux struggle against the Dakota Access Pipeline, to creating independent

databases and mutual support networks amongst the loved ones of Missing and Murdered Indigenous Women, Girls, Trans and Two Spirit people. This course maps out some of the intellectual and political interventions of Indigenous feminists in analyzing and struggling against genocide, heteropatriarchy, conquest and racial capitalism in settler states like the US and Canada. This course will focus on how Indigenous women, Two Spirit and trans people have analyzed and struggled against the imposition of colonial constructs of gender and sexuality that mark Indigenous lives and lands as sites of extraction. It will examine how carceral regimes of control produced by the intertwined histories of conquest and Transatlantic slavery have been imposed upon Indigenous lives through the child protection system and the prison industrial complex. Students will be invited to consider how Indigenous feminist practices 'make a future' (Brant 1981) against and beyond the settler state. This course aims to familiarize students with historical and contemporary Indigenous feminist works, as well as provide an overview of Indigenous feminist political formations, poetry, fiction, and making practices. Pedagogically, this course will also facilitate the development and sharpening of skills in social analysis, writing and argumentation.

Class Format: Hybrid online/in-person

Requirements/Evaluation: Three one page reading responses, 30%; One two-page critical peer response 10%; One Final paper, 50%; Course participation and attendance 10%

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: American Studies majors or potential majors have first preference, WGSS majors have next priority.

Expected Class Size: 19

WGSS 305 (S) The Gay Menagerie: Gay Male Subcultures (DPE)

Cross-listings: ANTH 305 WGSS 305 AMST 305 THEA 304

Primary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

WGSS 316 (S) Feeling Queer and Asian (DPE)

Cross-listings: COMP 313 ASIA 316 AMST 354 WGSS 316

Primary Cross-listing

This advanced undergraduate seminar focuses on concepts, queries, and methodologies at the intersections of Asian Americanist critique, queer theory, and affect theory. How might we come to understand Asian gender, sexuality, and racialization less through a language of being or meaning, as through feeling? How do Asian/American discourses rely upon languages of gender and sexuality, and how might queerness depend upon Asianness? How might these theories identify, complicate, and call forth more expansive or alternative practices of belonging? The class will read theories including national abjection, racial melancholia, disaffection, queer diaspora, and homonationalism, as well as engage Asian American literatures.

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses (350 words max), short analytical essay (4-5 pages), and creative final project (e.g. poem, epistolary letter, syllabus soundtrack) (5-8 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 313 (D2) ASIA 316 (D2) AMST 354 (D2) WGSS 316 (D2)

Difference, Power, and Equity Notes: This interdisciplinary seminar centers the interconnected constructions of race, ethnicity, gender, sexuality, and nation as they give shape to Asian American and Asian diasporic sexuality studies.

WGSS 318 (F) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 AFR 331 WGSS 318

Primary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which

masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 350 (D2) ENGL 375 (D1) AFR 331 (D2) WGSS 318 (D2)

Difference, Power, and Equity Notes: This course engages content and materials that explore various forms of difference, power, and equity, along with facilitating the development of skills that will help students address the implications of said forms. This course considers current examples and historical examples of Black masculinity. This course fosters difficult conversations about how difference works and has worked, how identities and power relationships have been grounded in lived experience.

WGSS 337 (F) Race, Sex & Gender in Brazil (DPE)

Cross-listings: ANTH 337 WGSS 337

Primary Cross-listing

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: Students must also commit to registering for a winter study travel course with a trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

Requirements/Evaluation: research paper and its various components, participation

Prerequisites: none

Enrollment Limit: 7

Enrollment Preferences: students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The cost of the winter study travel portion is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 337 (D2) WGSS 337 (D2)

Difference, Power, and Equity Notes: This is a class about social justice movements and racial/gender/sexual diversity. It includes experiential learning devoted to these issues and engages questions related to the origins of inequality and prejudice in Brazil.

WGSS 344 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 WGSS 344 ARTH 315

Secondary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape--from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 314 (D1) WGSS 344 (D2) ARTH 315 (D1)

Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

Spring 2022

SEM Section: 01 W 1:10 pm - 3:50 pm Alena Williams

WGSS 345 (S) The Pedagogy of Liberation (DPE)

Education is inherently political, and politics necessarily involves pedagogy. *Who* should teach, *what* is taught, *how* it is taught, and *why* it is taught are questions hotly debated at all levels and in all sites of education because the answers have implications for societal reproduction or transformation. Politicians, activists, even family members at the dinner table all seek to educate in ways that incline us toward particular political positions. At the heart of this class stands the question: if different pedagogies point us in different political directions, then what kind of pedagogy or pedagogies serve the end of liberation from oppression and why? Are there certain pedagogical "goods" that reliably serve the goal of liberation across sites? Or do different sites require different approaches? To begin to answer these questions, we will engage a variety of thinker-teachers and groups known for their commitment to a "pedagogy of liberation." While feminist thinkers will be foregrounded, we may also look to thinker-teachers who and groups that do not claim this label. In addition to engaging texts which reflect on different aspects of radical pedagogy (content, form, method, etc.) and radical pedagogy in different settings (the college classroom, the social movement headquarters, the home), we will witness radical pedagogy in practice. Moreover, we will enact various radical pedagogical strategies in our own classroom and beyond.

Requirements/Evaluation: Perusal, aspirational learning statement, syllabus co-construction and reflection, class facilitation, interview project and reflection, one-on-one discussions

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to WGSS majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This class is concerned with the relationship between pedagogy and equity - how can pedagogy be leveraged to combat oppression and encourage equity? In it, students will gain not just insight on, but practice in enacting radical democratic pedagogies that flatten power differentials and encourage effective engagement across difference.

WGSS 350 (F) Queer Tongues & Lavender Linguistics (DPE)

Cross-listings: ANTH 350 AMST 351 WGSS 350

Primary Cross-listing

This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

Requirements/Evaluation: IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures

Prerequisites: None; prior coursework in WGSS may be helpful, but is not required

Enrollment Limit: 15

Enrollment Preferences: WGSS majors; short statements of interest will be solicited in the event of overenrollment

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 350 (D2) AMST 351 (D2) WGSS 350 (D2)

Difference, Power, and Equity Notes: This course examines the centrality of power in communication as broken down along axes such as sex, gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

WGSS 371 (F) Medicine and Campus Health in Disruptive Times (DPE) (WS)

Cross-listings: STS 370 WGSS 371 ANTH 371

Secondary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20

Enrollment Preferences: Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

WGSS 413 (S) Feminist and Critical Technoscience (DPE)

Cross-listings: WGSS 413 STS 413

Secondary Cross-listing

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway's "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch's "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation: discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final essay (12-15 pages + in-class presentation)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Science and Technology Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 413 (D2) STS 413 (D2)

Difference, Power, and Equity Notes: Central to "Feminist and Critical Technoscience" is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES
CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES

(Div I & II, see explanation below)

Chair: Professor Li Yu

- Cecilia Chang, Frederick Latimer Wells Professor of Chinese; on leave 2021-22
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese
- Cornelius C. Kubler, Stanfield Professor of Asian Studies
- Christopher M. B. Nugent, Professor of Chinese
- Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; on leave 2021-22
- Li Yu, Professor of Chinese

Visitors:

- Eun Young Seong, Visiting Assistant Professor of Japanese

Language Fellows:

Yi-Zhi Chen

Tianwen Han

Teaching Associate:

Xian Fung

Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China's diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take approved electives related to Chinese language and culture (including additional CHIN core electives, additional Asian language courses, or Chinese studies courses offered in art, comparative literature, history, music, political science, religion, etc.) to replace the language course requirement. Potential electives can be found under the course listings for the [program in Asian Studies](#).

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for [the program in Asian Studies](#).

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for [the program in Asian Studies](#).

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

PLACEMENT TEST

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their studies of these languages at the college should take a placement test before they pre-register for a language course. Students who wish to take the Chinese placement test can self-enroll in a GLOW course at <https://glow.williams.edu/enroll/JTHENA>. Students who wish to take the Japanese placement test should contact the Japanese Coordinator.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student's grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

COVID-19 CHANGES

Due to the pandemic, the department has reduced the number of courses required for its majors for the graduating classes of '21, '22, and '23. For these years, the minimum requirements are nine courses as follows:

Chinese major: CHIN 101, 102, 201, 202, 301, 302, 401, 402, 312.

Japanese major: JAPN 101, 102, 202, 202, 301, 302, 401, 402, one approved elective.

East Asian Languages and Cultures major: at least six CHIN/JAPN language courses (or a minimum proficiency equivalent to the completion of 302), two CHIN/JAPN core electives, and one approved elective.

Students with higher language proficiency who are placed out of any of the core language courses (101 through 402) can take an equal number of faculty-approved electives taught either in Chinese/Japanese or in English on literature, linguistics, culture studies or related Chinese or Japanese studies disciplines (e.g., art history, history, political science) to fulfill the core language requirement.

Students who plan to study abroad either during the summer or during their junior year MUST consult with department faculty for advice.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Grants for Summer Study in Asia which fund selected students' summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar's office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

- "DALLC Majors and Faculty" (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):

- Tara E. Watson, Professor of Economics
- David J. Zimmerman, Professor of Economics and Orrin Sage Professor of Political Economy

GENERAL INFORMATION

The primary objectives of the economics major are to develop an understanding of how individuals, organizations and societies meet their material needs. The introductory courses present the fundamental principles of economics at a level that is useful for understanding a wide range of social and policy issues. The core theory courses provide a more rigorous grounding in the tools used in analyzing individual choice, the functioning of markets, and the behavior of output, employment, and inflation. The econometrics course familiarizes students with the methods used to analyze economic data, and equips them with the tools necessary to critique and conduct empirical research. The electives draw on the skills developed in the introductory and core courses to gain a richer understanding of specific aspects of economic behavior and public policy.

The economics major and business careers. The analytical and critical thinking skills taught in economics classes are useful for many careers, including business. The major is not designed to provide pre-professional training in business or management, however. Students from a wide variety of majors, including the sciences and humanities, have gone on to successful business careers. We therefore advise those interested in business to acquire a broad exposure to the arts, social science, and natural sciences, and to major in a subject that engages their interest even if that subject is something other than economics.

Planning for a possible economics major. Given the hierarchical structure of the economics major, students considering the economics major should try to start with ECON 110 during their first year. Since ECON 255 requires a prior statistics course (STAT 161, 201 or 202), prospective economics majors should complete the statistics requirement relatively early in their college careers. Since the 400-level electives typically require at least two of the intermediate core courses (ECON 251, 252, or 255), students are strongly encouraged to complete the core courses by the end of junior year. We prefer that the three intermediate core classes be taken at Williams, so students planning on studying abroad as juniors should aim to complete these courses before departure if possible.

Preparation for graduate school. Graduate study in economics requires considerably more mathematical training than that necessary for the economics major. We advise students who are considering pursuing a Ph.D. to take at a minimum MATH 150 or 151, MATH 209 or 309, MATH 250, and MATH 350. We also advise students to consider electives such as ECON 451, 471, 472, 474, or 475 that present advanced perspectives on contemporary economic theory or econometrics. As graduate schools look for evidence of research aptitude, we also encourage those interested in graduate school to pursue the Honors program.

MAJOR REQUIREMENTS

Nine courses are required for the economics major. These are:

Introductory Courses

Economics 110 Principles of Microeconomics

Economics 120 Principles of Macroeconomics. Prerequisite: ECON 110

Passing the quantitative studies exam or the equivalent is a prerequisite for both classes. Both are suitable for non-majors. Courses numbered 200-299 will require one or both as prerequisites.

Core Courses

Economics 251 Price and Allocation Theory. Prerequisites: differential calculus (MATH 130 or equivalent) and ECON 110

Economics 252 Macroeconomics. Prerequisites: differential calculus (MATH 130 or equivalent), ECON 110 and ECON 120

Economics 255 Econometrics. Prerequisites: differential calculus (MATH 130 or equivalent) plus either STAT 161, 201 or 202. STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018. STAT 346 can be used to satisfy the ECON 255 major requirement, although not all upper-level electives and seminars accept STAT 346 as a prerequisite in lieu of ECON 255. Students with a double major in Statistics and Economics who choose to use STAT 346 to satisfy the ECON 255 requirement must take an additional ECON elective at any level. POEC 253 may not substitute for ECON 255 in fulfilling the major requirements, although some electives may accept POEC 253 as a prerequisite in lieu of ECON 255.

The three core classes may be taken in any order. All of the 300- and 400-level electives will require at least one of the core classes, and many of the 400-level seminars require ECON 255.

Elective Courses

Students must complete at least four economics electives at the 200-level or higher in addition to the introductory and core classes listed above. At least two must be advanced electives numbered 300 to 398. At least one must be a seminar numbered 400-490. A second seminar may be taken in lieu of a 300-level elective. Enrollment preference for 400-level classes is given to seniors who have not already taken a seminar. Note that some of the advanced electives may have specific requirements beyond the core economics courses and MATH 130. With the permission of the instructor,

undergraduates may enroll in 500-level graduate courses given by the Center for Development Economics. These courses can substitute for advanced electives numbered 300-398, unless otherwise noted in the course description.

AP, IB and A-level Exams

The ECON 110 requirement may be waived for students who earned a 5 on the microeconomics AP exam, and the ECON 120 requirement may be waived for those who received a 5 on the macroeconomics AP exam. Both the ECON 110 and 120 requirements may be waived for students who received an A on the A-level exam in economics or earned a 6 or 7 in the higher economics IB exam. A requirement may be waived for students who earned below a 5 on the microeconomics or macroeconomics AP exams or below a 6 on the higher economics IB exam after consultation with the department. In all cases, results from the department placement exam are taken into account in making the determination of whether a requirement will be waived.

Students who started at Williams prior to Fall 2020 will receive major credit for each course requirement that is waived and may complete the major with either eight or seven additional courses, depending on whether they place out of one or both introductory courses. These would include the introductory course for which no advanced placement was granted (if applicable), the three core classes, and four electives.

Students who start at Williams in Fall 2020 and following will receive advanced placement, but no reduction in the number of courses required for the major. Completion of a major in Economics requires nine semester courses. These would include the introductory course for which no advanced placement was granted (if applicable) and one additional elective at the 200-level or higher, or two additional electives at the 200-level or higher if both ECON 110 and 120 requirements are waived, the three core theory classes, and the four electives.

A score of 5 on the statistics AP exam, a 6 or a 7 on the statistics IB exam, or an A on the A-level statistics exam will satisfy the statistics prerequisites for ECON 255.

STUDY ABROAD AND TRANSFER CREDIT

Students may receive credit for college courses taken at other institutions, including those taken as part of a study abroad program. Most economics courses taken elsewhere that have an introductory economics prerequisite will qualify for 200-level elective credit. Some may be able to count towards a specific departmental requirement, including the introductory or core courses, or qualify as a 300-level elective. In order to receive the appropriate credit, courses must be approved ahead of time by the Department's Coordinator for Transfer/Study Abroad Credit. (The Department's web site will indicate which faculty member is serving as the Coordinator.) General study away guidelines for Economics are posted at econ.williams.edu/major/study-abroad.

THE DEGREE WITH HONORS IN ECONOMICS

Graduating with honors requires the completion of a substantial piece of independent research. Those with an economics GPA of at least 3.5 are encouraged to apply. In addition, because theses typically make use of empirical methods, those considering writing a thesis are strongly advised to complete Econ 255 before the end of junior year.

The honors program involves working closely with a faculty adviser on a subject related to the faculty member's area of expertise. The first step in pursuing honors is therefore to develop a thesis proposal in consultation with a faculty adviser. The proposal is then submitted to the Department for approval.

The Department offers both a half-year and a full-year honors program:

The half-year program entails enrolling in a one-semester seminar plus a WSP class. Students may either enroll in ECON 491 in the fall semester and ECON 30 during winter study, or they may take ECON 30 during winter study and ECON 492 in the spring. Proposals for a fall semester thesis are due in May of the junior year, while those doing a spring thesis will submit their proposals in December of the senior year. Those choosing the half-year option often base their projects on research that had been initiated in an advanced elective or a seminar, although this is not a requirement.

The full-year program involves taking ECON 493 in the fall, ECON 31 during winter study, and ECON 494 in the spring. Proposals are due in May of the junior year.

Both programs require students to remain on campus during winter study.

Prospective honors students considering studying abroad during their junior year should plan to complete the core courses and at least one 300-level elective by the end of their sophomore year. They are also urged to begin their collaboration with their intended adviser prior to departure, and to consult with the Director of Research on the options for pursuing honors. (The Department's web site will indicate which faculty member is serving as the Director of Research.)

Further details on the two routes, the application procedure and deadlines are contained in memos sent to economics majors in the spring and fall semesters. The information is also available on the Department's web site.

In addition to completing the research project, the College Bulletin states that in order to graduate with honors, students must take at least one course in addition to the minimum number required for the major. Students in the full-year program may substitute ECON 493 for an upper-level elective (excluding those numbered 400-490). Students enrolled in the half-year program may not substitute ECON 491 or 492 for one of their

electives.

GRADUATE COURSES IN DEVELOPMENT ECONOMICS

Graduate courses given by the Center for Development Economics are open to undergraduates who have taken the prerequisites, although in most cases, permission of instructor is also required. Unless otherwise specified in the course description, these courses can substitute for electives numbered 300-398 in the major.

ECON 105 (F) Gender in the Global Economy

Cross-listings: WGSS 211 ECON 105

Secondary Cross-listing

This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in poor countries. The course will start by developing theoretical resources: these will include feminist critiques of economic theory, work on care labor and the shifting boundaries between markets, governments and households, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and global value chains; the economics of sex work and global sex trafficking; and migration. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for North/South alliances.

Class Format: lecture/discussion

Requirements/Evaluation: reaction papers, research paper; participation in class discussion will count for part of the grade

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Women's, Gender and Sexuality Studies majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major.

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 211 (D2) ECON 105 (D2)

Attributes: GBST Economic Development Studies Electives POEC International Political Economy Courses WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

ECON 107 (F) Inequality in a Classless Society: The Soviet Experiment and its Aftermath (DPE)

Cross-listings: ECON 107 SOC 217

Primary Cross-listing

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with, justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

Requirements/Evaluation: Class participation; small writing assignments and research exercises; and a final research project

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: 1st and 2nd-year students thinking about majoring in Anthropology, Sociology, or Economics

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major. It may be taken for the SOC major.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 107 (D2) SOC 217 (D2)

Difference, Power, and Equity Notes: The subject matter of this course is all about the origins, evolution, current structures, and implications of economic and social differentiation in a region quite apart from the United States. Moreover, by crossing disciplinary lines, we hope it will offer a particularly valuable perspective on such issues. Thus, we felt that it should naturally serve as a DPE course.

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Steven E. Nafziger, Olga Shevchenko

ECON 110 (F)(S) Principles of Microeconomics (QFR)

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms, final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

ECON 120 (F)(S) Principles of Macroeconomics (QFR)

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Requirements/Evaluation: Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.

Prerequisites: ECON 110

Enrollment Limit: 40

Enrollment Preferences: First-year students and sophomores.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

ECON 133 (S) Plantation and the Plot: the Poetics of Caribbean Economic Thought and Struggle

Cross-listings: ECON 133 GBST 133 AFR 133

Secondary Cross-listing

This introductory course to Caribbean Economic Thought contextualizes the poetics of economic ideas, struggle and knowledge alongside popular literary works connected to Caribbean Economic Development. Using the 'plantation' and the 'plot' as a site of struggle and continuing exploitation and extraction, this course delves into Caribbean postcolonial development thinking to explore its cultural and historical roots. By examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy and society are framed, conceptualized and traversed as transplanted spaces, economic zones, and transformative perspectives to economic thinking integral to merchant and industrial capitalism and New World social formations. We will examine historical and contemporary texts of contributors to the New World Group that centers the Caribbean within global economic transformations. Some events this course covers are indigenous genocide, commercial slave trading and indenture, structural adjustment and postcolonial debt, technology to the current fragmenting of global neoliberalism. These events will help shape an appreciation for the material and socio-cultural understandings of economic phenomena from the plantation to the sea within cultural and literary works in pluralistic, productive, and powerful ways.

Requirements/Evaluation: Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/multi-page poster); critical analysis of a Caribbean economic sector or major regional report--choice made after discussion with instructor (10 pages); final project: review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultures that must raise questions for class discussion)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Preference also for 1st and 2nd year students. If over-enrolled preference to AFR and Political Economy students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Attributes: AFR Core Electives

Spring 2022

SEM Section: 01 Cancelled

ECON 203 (S) Gender and Economics

Cross-listings: WGSS 205 ECON 203

Primary Cross-listing

This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women's employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How successful are government policies that primarily affect women (e.g., AFDC/TANF, parental leave, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.

Class Format: Course will be remote and will include synchronous lecture/discussion, possibly combined with some asynchronous components.

Requirements/Evaluation: weekly discussion papers, two midterms, and a final paper and presentation

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: If overenrolled, students will be asked to submit short statement of interest.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: POEC U.S. Political Economy + Public Policy Course

Not offered current academic year

ECON 204 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Primary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

Spring 2022

LEC Section: 01 M 7:00 pm - 9:40 pm Michael Samson

ECON 205 (S) Public Economics

This course examines the role of the government in the economy. We consider three broad issues: When should governments intervene in the economy? What is the most effective form of intervention? What effects do government policies have on incentives and behavior? In addition to a theoretical perspective, we will discuss particular government spending programs in the United States, including Social Security, various types of publicly-provided insurance, spending on education, and public assistance for the poor. Finally, we will study how the government raises revenue through taxation. We will discuss the principles that guide tax design and consider the effects of the tax code on behavior.

Class Format: Lecture / discussion format.

Requirements/Evaluation: problem sets, short writing assignments, participation in discussion and activities, midterm exam, and final exam

ECON 209 (S) Labor Economics and Policy

Employment--finding it (or looking for but not finding it), its compensation, and the conditions under which it occurs--is a key concern for most residents of advanced economies throughout their adult lives. Work is the main source of income for the vast majority of working-age adults in these economies, and work-related issues and policies reliably top national policy agendas. Labor economics is the study of these issues--how the level and distribution of skills, wages, employment, and income are determined in the market for labor and how various policies affect this market and its outcomes. In this course we will apply the tools of microeconomics to analyze labor force participation, the allocation of time to market work, migration, labor demand, investment in human capital (education and on-the-job training), discrimination, unions and unemployment. We will also examine the impact of government programs and mandates such as employment-based tax credits, unemployment insurance, antipoverty programs, and minimum wages on the labor market. We will devote particular attention to topics of current U.S. policy interest, including immigration, income inequality, and education.

Class Format: discussion

Requirements/Evaluation: problem sets, short writing assignments, midterm and final exam

Prerequisites: ECON 110

ECON 212 (F) Markets And Morals

What are the moral foundations necessary to support a free market economy? Does capitalism need a moral base--and if so, does the operation of a market economy erode the moral and ethical foundations on which it rests? We read Adam Smith, Mill, Keynes, Galbraith and other neoclassical philosophers writing about the social fabric that holds an atomistic free market political economy together, with particular emphasis on Smith's "other book"--Theory of Moral Sentiments--as an argument for limits to self-interested behavior inherent in human nature. (What is the sound of one Invisible Hand clapping?) We test our own articulated moral and political values against the existing political economy of Western democracies with help from more contemporary authors like Amartya Sen, Kenneth Boulding and Robert Kuttner. We will examine in depth the market for carbon offsets as a case study for the evaluation of the ethical validity of market-based solutions to climate problems. Students will write final papers on how well selected aspects of free market economies (organization of production, distribution of resources, mechanisms of inheritance, taxation) measure up to their own stated sense of justice--and how we might reform or perfect markets to align better with our morals.

Requirements/Evaluation: 3- to 5-page opinion paper (15%), 5-page comparative paper (20%), final paper applying learning to a specific context (40%), class participation and discussion posts (25%)

Prerequisites: ECON 110

Enrollment Limit: 19

Enrollment Preferences: letters written to instructor

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ECON 213 (F) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 ENVI 213

Primary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade. Consideration of justice and equity will be woven through the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include poster, presentation, brief writing assignment

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

ECON 214 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ENVI 212 ECON 214

Primary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: This tutorial will be taught remotely via Zoom meetings. Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week. Individual "office hour meetings" will also occur via Zoom meetings.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ECON 217 (F) The Economics of National Defense

Cross-listings: ECON 217 LEAD 214

Primary Cross-listing

National defense is one of the largest components of the US Federal Budget (~15%) and remains a significant part of the nation's GDP (~3%). The study of defense economics in this course will apply principles of microeconomics and macroeconomics to analyze, within the context of national security strategy and policy, issues concerning resource allocation in wartime and peacetime, labor supply and demand, industrial organization and defense acquisition, and the formation and maintenance of alliances. While the focus of the course will be on economics, to provide context on what makes defense economics a special topic, we will also consider questions unique to the military such as how to deter conflict, how to fight wars, how to provide humanitarian assistance and protection to civilians in conflict or disaster areas, and how the national defense may adapt to issues like climate change. We will also consider historical examples from America's wars--e.g., the Civil War, World War 2, Vietnam, and the more recent conflicts in Iraq and Afghanistan. The plan is to use a variety of sources--academic materials, popular media such as news footage and films, and guest speakers--to provide a full-range of perspective on the course topics.

Class Format: Mix of lecture and discussion

Requirements/Evaluation: Individual Papers, Group Paper and Presentation, Midterm and Final Exam

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: Juniors and seniors

Expected Class Size: 20

ECON 218 (S) Capital and Coercion (DPE)

Cross-listings: GBST 218 ECON 218

Primary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice and distrust will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the transatlantic trade in enslaved people and the Haitian Revolution, the Dutch "cultivation system" in Java, colonial control and independence in Kenya, and the U.S.-backed dictatorial regime and its overthrow in Nicaragua. Required readings for this class will be seventy or more pages per week, and will include historical case studies, excerpts from novels, and reportage.

Requirements/Evaluation: Students will be evaluated based on class participation, weekly assignments, a midterm, and a final.

Prerequisites: Econ 110

Enrollment Limit: 25

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 218 (D2) ECON 218 (D2)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

Attributes: POEC International Political Economy Courses

Spring 2022

SEM Section: 01 Cancelled

ECON 227 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ARTH 527 ECON 227 ARTH 327

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 228 (F) Water as a Scarce Resource

Cross-listings: ECON 228 ENVI 228

Primary Cross-listing

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: meeting with the instructor in pairs for an hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 229 (S) Law and Economics (QFR)

This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes. The course will also consider potential reforms of the legal system.

Class Format: discussion

Requirements/Evaluation: class participation, problem sets, short papers based on actual court cases and possible legal reforms, a midterm exam, and a final exam

Prerequisites: ECON 110

Enrollment Limit: 35

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Attributes: POEC U.S. Political Economy + Public Policy Course

ECON 230 (S) The Economics of Health and Health Care

Health, health care, and economics intersect in important ways. Health is an essential component of individual well-being and a fundamental input to a productive economy, making its production a societal priority as well as an individual one. Health care expenditures make up substantial fractions of

economic activity in developed countries; in the United States health care expenditures are nearly one-fifth of the national economy, raising questions of why health care spending is so high and whether the spending effectively produces better health. At the same time, health is about more than just health care; it is driven by many other factors, from individual behavior, to market forces, to government policy. In this course we will examine the economics of health by applying microeconomic analysis to the problems of health and health care provision. The course focuses on three broad areas: the inputs to health and the demand for health care; the structure and functioning of health care markets and the roles of key institutions; and the role of public policy in furthering individual and population health. Special attention will be devoted to topics of current policy interest, including health disparities, problems of health care costs and cost containment, health insurance reform and the Affordable Care Act, the role of public health interventions, and drug development and regulation. The COVID-19 pandemic has brought many of the challenges of health and health care into sharp focus, and we will examine the pandemic as a particularly instructive case study.

Class Format: The class is a mixture of lecture and discussion.

Requirements/Evaluation: Several short papers, participation in class discussion, and a final research project and presentation.

Prerequisites: ECON 110 and a class in statistics

Enrollment Limit: 25

Enrollment Preferences: Economics majors who need a 200-level elective, Political Economy majors, and Public Health concentrators

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ECON 231 (S) The Economics of Inequality

There are many outcomes in the United States that show profound levels of inequality: education, earnings, wealth, housing, environmental health, and life expectancy, just to name a few. This course examines the economic forces that drive and/or explain these inequalities in the U.S. The beginning of the course covers definitions and economic techniques used to measure income and wealth inequality, as well as differences between perceived and actual inequalities. We then move on to the theoretical underpinnings of the rise of domestic economic inequality, as well as models and theories of discrimination. Finally, we will explore how economic inequalities carry over into health, housing, and environmental quality through policies or social mechanisms. We will discuss and investigate the following questions and more: How are skill and education related to income? How do income and health interact, and which causes the other? How is the level of economic inequality in the country perceived? Which historic policies have led to specific inequalities, and was the inequality an intentional or inadvertent outcome? What have other countries done differently, and how does what the U.S. has done compare in terms of disparities? What exactly is discrimination, and what are the cumulative effects of it in the labor market and health outcomes?

Class Format: Lecture and small discussion groups

Requirements/Evaluation: Several short papers (peer- and instructor-reviewed), article review, and final project and presentation

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

LEC Section: 01 MWF 10:00 am - 10:50 am Katie Gutierrez

ECON 232 (F) Financial Markets, Institutions and Policies (QFR)

The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course

include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the Federal Reserve in the US), monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?

Class Format: There will be a mix of lecture and discussion.

Requirements/Evaluation: 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: Sophomore and Junior Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: We will use mathematical models, graphs, and data analysis to understand financial decisions at the firm and economy-wide levels.

Attributes: POEC Comparative POEC/Public Policy Courses

Fall 2021

LEC Section: 01 TR 8:30 am - 9:45 am Neal J. Rappaport

ECON 233 (S) Behavioral Economics and Public Policy

In many ways, the fields of psychology and economics both study the same phenomena: the motives that guide our decision-making across different contexts. This course provides a survey of the ways in which these two fields intersect, i.e., behavioral economics. Topics include how individual responses to economic incentives can be influenced by heuristics, framing, social norms, and other psychological motives; we will also study how these concepts are incorporated into microeconomics models. Concurrently, the course will review applications of these ideas to public policy and firm strategy. For instance, we will examine how behavioral economics has informed efforts to reduce poverty, increase environmental conservation, encourage long-term financial planning, and improve health and diet outcomes, among many other topics. The course will also discuss whether and how we ought to judge which behaviors are socially desirable and worth encouraging through policy.

Requirements/Evaluation: One midterm, one final exam, 4-6 problem sets, and 1-2 writing assignments

Prerequisites: ECON 110

Enrollment Limit: 30

Enrollment Preferences: If over-enrolled, I will aim to accept a mix of years and majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

LEC Section: 01 MR 2:35 pm - 3:50 pm Matthew Chao

ECON 238 (F) Sustainable Economic Growth

Cross-listings: ENVI 238 ECON 238

Primary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing

prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: potential or declared social science majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

ECON 240 (F) Colonialism and Underdevelopment in South Asia (DPE) (QFR)

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated

Prerequisites: one course in ECON

Enrollment Limit: 10

Enrollment Preferences: Economics major, prior course on South Asia

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

Difference, Power, and Equity Notes: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation.

Quantative/Formal Reasoning Notes: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies the QFR requirement.

Attributes: GBST South + Southeast Asia Studies Electives POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 242 (F) Evaluating the Costs and Benefits of Public Policies

How do we determine whether introducing a new vaccine is cost-effective and worth the investment costs or whether a policy to protect a wetland is worth the sacrifice? Is it possible to assess the economic consequences in terms of benefits and costs of new healthcare regulations? Economists typically use the tools of applied cost-benefit (CBA) and cost-effectiveness analysis (CEA) in order to address such policy questions. The goal of applied economic evaluations is to identify, measure, and value all relevant costs and benefits of new public policy investments and regulations. This

course covers both theory and practice of economic appraisal of a public policy (an investment project, regulation, a specific treatment etc.), with an emphasis on health care and public health applications. The CBA and CEA methods covered in the class are widely used in many other policy areas as well, including public transportation, infrastructure investment and environmental policy.

Requirements/Evaluation: computer lab assignments, active class participation, midterm exam, and final exam

Prerequisites: ECON 110 or equivalent, MATH 130 or equivalent

Enrollment Limit: 30

Enrollment Preferences: Econ Majors and Public Health Concentrators

ECON 251 (F)(S) Price and Allocation Theory (QFR)

A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.

Prerequisites: ECON 110 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

ECON 255 (F)(S) Econometrics (QFR)

An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

ECON 257 (F) The Economics of Race (DPE)

This course will examine the causes and consequences of racial disparities in economic outcomes. Specific topics will include the economic history of slavery, Reconstruction and the Civil Rights Movement; racial gaps in earnings, wealth, educational attainment, standardized test scores, and health outcomes; formal models of taste-based and statistical discrimination; and the structure and efficacy of government anti-discrimination policies. Much of the course will focus on racial discrimination faced by African Americans specifically, but there will also be coverage of other racial and ethnic

minority groups. The course will additionally focus almost exclusively on the US, although many of the theories and techniques we will develop are applicable to other contexts as well. The course will utilize basic microeconomic tools, such as straightforward extensions of the supply and demand model, and ECON 110 is a prerequisite. We will also make extensive use of descriptive statistics, and an introductory statistics course such as STAT 101 will be useful, but is not required.

Class Format: I anticipate conducting the "hybrid" version of the course broadly similarly to the in-person version, but with students participating remotely attending synchronous discussions/lectures via Zoom. A teaching assistant will monitor the Zoom feed so I can respond to questions and comments from students participating online.

Requirements/Evaluation: exams, short written responses, problem sets, participation

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: First- and second-year students.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course is well suited for the DPE distribution requirement as it will develop in detail not only the existence of race-based differences in a wide variety of key socioeconomic outcomes, but also explore the historical and contemporary processes that lead to those differences.

ECON 299 (F) Economic Liberalism and Its Critics

Cross-listings: ECON 299 PSCI 238 POEC 250

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This class uses a flipped classroom approach, where before each class meeting, students watch a lecture video, and sometimes write an essay or solve some problems on relating to the assigned reading and video, and then in-person class is devoted primarily to discussion.

Requirements/Evaluation: six short essays, several short homework assignments, and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 30

Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

ECON 345 (S) Growth Diagnostics (QFR)

Cross-listings: ECON 545 ECON 345

Primary Cross-listing

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous--i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of

economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth diagnostic, and a team presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: CDE fellows and senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 545 (D2) ECON 345 (D2)

Quantative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and macroeconomic development, and students will be required to routinely develop mathematical models and/or conduct econometric analysis in their assignments.

ECON 348 (S) Human Capital and Development

Cross-listings: ECON 548 ECON 348

Primary Cross-listing

Children around the world face unequal opportunities to attend school, and to learn. This course will introduce students to economic studies of education, focusing on pre-school through high school. The course will mainly cover research in low-income and middle-income countries, but will also discuss connections to policy debates in the United States and elsewhere. Topics will include the importance of early-life conditions and investments; the connections between health and education; the roles of information, incentives, inputs, and technology; research methods; and decisions between policy options. Students in this course will analyze data themselves, and will critically read published research.

Requirements/Evaluation: Grades are principally based on problem sets, two in-class exams, and short presentations by students.

Prerequisites: ECON 255, POEC 253, STAT 346, or permission of the instructor. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 20

Enrollment Preferences: Economics majors and CDE Fellows

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 548 (D2) ECON 348 (D2)

Spring 2022

LEC Section: 01 MR 2:35 pm - 3:50 pm Owen Ozier

ECON 352 (S) Financial Development and Regulation

Cross-listings: ECON 352 ECON 510

Secondary Cross-listing

This course focuses on the financial system in developing countries and its role in economic development. The first part explores the functions of

finance, how it contributes to growth and poverty alleviation, as well as examining what can be done to increase financial inclusion. What are the key parts of the infrastructure that are needed to improve access to financial services, including via 'fintech,' which is taking off in many developing countries? We will look at experiences with financial sector repression and subsequent liberalization and investigate the causes and impact of financial crises. Then we will study how to make finance effective in dealing with a variety of risks facing societies, including aging and climate change. A key focus will be how to prevent or minimize crises, analyzing government's role as regulator, supervisor, standard setter, contract enforcer, and owner. In this final part, attention will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

Class Format: discussion

Requirements/Evaluation: Midterm, participation in class discussion and formal in-class debates, and a final research paper.

Prerequisites: For undergraduates, Econ 110, 120, and POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 25

Enrollment Preferences: CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

Expected Class Size: 20-25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 353 (F) Mathematical Economics (QFR)

This course integrates economics at the intermediate level with the tools of mathematics. Topics such as univariate and multivariate calculus will be reviewed or introduced in the context of how these mathematical concepts enhance economic analysis. The combination of economic and mathematical analysis will provide a strong foundation for thesis writing and advanced study of economic theory.

Requirements/Evaluation: quizzes, midterm and a final

Prerequisites: ECON 251 and MATH 130

Enrollment Limit: 25

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Not offered current academic year

ECON 356 (S) Empirical Methods in Macroeconomics (QFR)

Cross-listings: ECON 513 ECON 356

Secondary Cross-listing

Macroeconomics and related fields in international finance and macro development have evolved specialized empirical techniques, known generally as macroeconometrics, which are designed to meet the practical challenges that the data and the empirical questions pose in these fields. The course will introduce the theory and application of these techniques, and students will learn how to implement these techniques using real world data to address practical questions drawn from the field of macro development. The course is also available to undergraduates with permission of the instructor. However, in lieu of Econ 356, undergraduates with good quantitative skills are encouraged to take Econ 371, which will cover a broader range of topics in greater depth.

Requirements/Evaluation: weekly homework assignments, term paper

Prerequisites: ECON 252, ECON 255 or equivalent. Students may not earn credit for both Econ 356 and Econ 371

Enrollment Limit: 19

Enrollment Preferences: Economics majors and CDE fellows

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 513 (D2) ECON 356 (D2)

ECON 357 (F)(S) The Economics of Higher Education

This tutorial will utilize economic theory and econometric methods to understand a variety of issues pertaining to the economics of colleges and universities. In particular, we'll discuss the logic of non-profit enterprises, the financial structure of a college or university, competition in the market for higher education, policies impacting tuition and financial aid, the individual and societal returns from investments in higher education, and the distinctive features of academic labor markets. Particular attention will be paid to selective liberal arts colleges.

Class Format: will meet weekly in groups of two

Requirements/Evaluation: six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: ECON 251 and 255 or STAT 346 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ECON 359 (S) Developing Country Macroeconomics II: Institutions and Policy Regimes

Cross-listings: ECON 515 ECON 359

Secondary Cross-listing

Developing countries must confront a number of macroeconomic challenges that industrialized countries do not have to contend with: exchange rate volatility, large capital flows and commodity price fluctuations, for example. Building on ECON 505, this course examines these issues from both theoretical and empirical standpoints. The focus will be on the design of monetary, fiscal and exchange rate policies and institutions to enhance macroeconomic stability, and create an environment conducive to growth.

Requirements/Evaluation: two midterms and a final project

Prerequisites: ECON 505 or 506; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 25-30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

SEM Section: 01 MR 1:10 pm - 2:25 pm Kenneth N. Kuttner

ECON 360 (S) Monetary Economics (QFR)

This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be covered include: the causes of inflation, how central banks manage interest rates, the channels through which monetary policy affects the economy, and the costs and benefits of imposing rules on the conduct of policy. The class will also touch on a number of current issues facing central banks, such as unconventional monetary policy and cryptocurrencies.

Requirements/Evaluation: Two exams, a research paper and/or class presentation

Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

Enrollment Limit: 20

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.

Spring 2022

LEC Section: 01 MWF 8:30 am - 9:45 am Kenneth N. Kuttner

ECON 362 (S) Global Competitive Strategies

Econ 362 acknowledges both the importance of large, diversified multinational firms in global economic activity, and the forms of strategic thinking that often displace, in practice, the optimization models of traditional economic analysis. In this course, we seek to describe competition in global markets by developing competence in decoding and critiquing (and even formulating) varieties of business and corporate strategies employed during the past forty years. While we treat a variety of theoretical models that seek or have sought to explain patterns of international economic activity, our priority is to ascertain their descriptive integrity and usefulness today. Our historical interest begins with mercantilism and covers Smith, comparative advantage, varieties of factor endowment theories, and much more, proceeding to strategic management perspectives and contributions of the 20th and early 21st century. We complete these efforts with a few original attempts to reconcile modern growth theory (e.g., Romer) with modern strategic practice (e.g., Porter). Further, substantial recent shifts in the nature of globalized economic activity, including the changing relative mobility and power of capital and labor, are examined. While the course is largely descriptive, it cannot fail to treat a few normative issues. We treat the efficacy of various government policies in promoting the competitiveness of home-based industries in regional and global markets. Finally, welfare propositions and policy ideas for addressing welfare impacts in a descriptively accurate context are advanced.

Class Format: mix of lecture, discussion, and case analyses

Requirements/Evaluation: written cases (in teams), class participation, a mid-term exam, and a final paper (can be co-authored) or exam are expected

Prerequisites: ECON 251

Enrollment Limit: 25

Enrollment Preferences: senior Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

LEC Section: 01 W 7:00 pm - 9:40 pm Michael Fortunato

ECON 364 (F) Theory of Asset Pricing

What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

Requirements/Evaluation: problem sets and exams

Prerequisites: ECON 251 or ECON 252; and ECON 255 or STAT 201

Enrollment Limit: 20

Enrollment Preferences: Economics majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 366 (S) International Trade and Development

Cross-listings: ECON 516 ECON 366

Secondary Cross-listing

This course will examine the causes and consequences of globalization and its implications for less-developed countries. We will study the classic models of international trade and discuss the empirical relevance of these theories. In addition, we will focus on other dimensions of globalization that are of particular importance to developing countries such as trade and education, emigration, brain drain, remittances, foreign direct investment, trade policies, infant industry protection, trade and growth, the resource curse, and trade agreements.

Class Format: discussion

Requirements/Evaluation: problem sets, midterm, presentation, and final

Prerequisites: ECON 251 and ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 19

ECON 370 Data Science for Economic Analysis

The goal of data science is to use empirical information from a broad range of sources to improve our understanding of the world around us. Economists increasingly rely on the tools of data science to access novel sources of data and information, characterize the economic environment, and conduct empirical analysis. This course provides hands-on introduction to data science tools most relevant for economic analysis including data visualization, exploratory data analysis, and statistical learning. The objective of the course is to help students: (i) formulate economic research questions that can be explored using data science tools, (ii) identify sources of data and prepare data for analysis, (iii) produce persuasive visualizations, and (iv) analyze data using both classical statistics and machine learning.

Class Format: The course includes traditional lectures, interactive activities in both Stata and R, and in-class presentations by students. Some prior knowledge of either Stata or R is helpful, but not required.

Requirements/Evaluation: Grades are based on in-class participation and performance on two take-home exams as well as problem sets and data visualization/analysis projects.

Prerequisites: ECON 255 or STAT 201, STAT 202, or STAT 346 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading:

Distributions: (D2)

ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro (QFR)

Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for analysis of short dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

Requirements/Evaluation: term paper and regular homework assignments

Prerequisites: ECON 252 and either ECON 255 or STATS 346

Enrollment Limit: 19

Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Not offered current academic year

ECON 373 (F) The Economics of Immigration (QFR)

This course will explore migration across national borders from an economic perspective, with a focus on migration to the United States. Who migrates, and why? What are the impacts on the economies of the origin country and the destination country, and on migrants themselves? What policies shape immigration and enforcement of immigration law, and what are their impacts? What is the role of immigrants in the broader society? We will emphasize empirical analysis as a data-driven way of understanding the economics of immigration.

Class Format: Class will periodically meet in a small-group seminar format.

Requirements/Evaluation: Requirements: active participation, 3 empirical assignments, 2 short papers, 2 presentations, and a final 12-15 page paper.

Prerequisites: Econ 251 and Econ 255, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: This course will use quantitative tools of economics.

Fall 2021

LEC Section: 01 W 7:00 pm - 9:40 pm Tara E. Watson

ECON 374 (F) Poverty and Public Policy (WS)

Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in this country. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and functioning of these programs, focusing on questions economists typically ask when evaluating public policy such as: What are the goals of the policy and does the policy achieve them? Does the design of the policy lead to unintended effects (either good or bad)? What are the trade-offs inherent in the policy's design? Could the policy be redesigned to achieve its goals more effectively? Through in-depth study of these programs, students will learn how economists bring theoretical models and empirical evidence to bear on important questions of public policy.

Requirements/Evaluation: evaluation will be based on six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: POEC 253 or ECON 255 or STAT 346 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Economics majors, Political Economy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 5- to 7-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 2- to 3-page critiques of their partners' papers. Midway through the semester, each student will revise one of their first three papers.

Fall 2021

TUT Section: T1 TBA Lara D. Shore-Sheppard

ECON 375 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings: ECON 532 ECON 375

Secondary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by

other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10

Enrollment Preferences: Junior and senior Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: POEC Comparative POEC/Public Policy Courses

Spring 2022

TUT Section: T1 TBA Michael Samson

ECON 376 (F) The Economics of Global Inequality (QFR)

This course focuses on the proximate and ultimate causes of global economic inequality across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about global economic inequality remain difficult to answer.

Class Format: This course will be taught in hybrid format in Fall 2020. All classroom lectures will be recorded and made available for remote learners unable to attend lectures virtually. Problem set assignments and exams may be submitted electronically as needed, and all exams will be "take home." Additional office hours will be offered to accommodate the needs of remote learners.

Requirements/Evaluation: Problem sets, one midterm exam, final exam.

Prerequisites: ECON 252 and either ECON 255 or STAT 346. ECON 251 recommended but not required.

Enrollment Limit: 20

Enrollment Preferences: Junior and senior economics majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and cross-country comparative development. Students will routinely work on sophisticated mathematical models of economic growth, involving the application of solution concepts from dynamic optimization and differential equations. Students will also be required to perform some econometric analyses in their assignments.

Attributes: GBST Economic Development Studies Electives

Not offered current academic year

ECON 377 (F) Inspiration/Perspiration: The Economics of Innovation

From the iron plow, to the steam engine, to modern biotechnology, innovation drives economic growth and raises living standards. Whether we are talking about great inventions or small tweaks, the tools of economics can help us understand how new ideas and technologies emerge, spread, and become obsolete. In this course, we will examine the creation of new knowledge, the translation of ideas and scientific advances into practical

applications, and the adoption of new technologies by producers and consumers. We will study the incentives that potential innovators face, how these are affected by patents and other forms of intellectual property rights, how entrepreneurs finance and market their innovations and how different market structures can influence the resulting trajectory of innovation and adoption. We will also discuss how government policies can foster the financing and development of innovation. Throughout the course, we will explore historical and contemporary case studies of the creation, exploitation, and consequences of innovation.

Requirements/Evaluation: reading responses and short writing assignments; empirical exercises; constructive contributions to class discussions; a group project; and an 8- to 10-page research paper

Prerequisites: ECON 251 and (ECON 255 or POEC 253)

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 378 (F) Long-Run Comparative Development (QFR)

The world today is marred by vast disparities in the standard of living, with about a 30-fold difference in real GDP per capita between the poorest and most affluent of nations. What are the causes of such differences in prosperity across countries? Are the origins of global inequality to be found in underlying differences among societies over the past few decades, the past few centuries, or the past few millennia? If contemporary differences in living standards have such "deep" historical roots, what scope exists for policies to reduce global inequality today? Can we expect inequality to be reduced through some natural process of macroeconomic development, or is it likely to persist unless acted upon by policy? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficacy for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in the course of industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the enduring effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the composition of traits in populations across the globe.

Class Format: discussion

Requirements/Evaluation: problem sets, at least one exam, a research paper, and a class presentation

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and macroeconomic development. Students will be required to routinely develop and solve sophisticated mathematical models of economic growth, involving the rigorous application of solution concepts from constrained optimization and from optimal control theory. Students will also be required to perform some econometric analyses in their assignments.

ECON 379 (S) Program Evaluation for International Development

Cross-listings: ECON 523 ECON 379

Secondary Cross-listing

Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

Requirements/Evaluation: Empirical exercises, exams, writing assignments, and collaborative projects

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

Enrollment Limit: 20

Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome

ECON 380 (S) Population Economics

Cross-listings: ECON 380 ECON 519

Primary Cross-listing

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Class Format: Course will be remote and will include synchronous lecture/discussion, possibly combined with some asynchronous components.

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Prerequisites: ECON 251; POEC 253 or ECON 255 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: If overenrolled, students will be asked to submit a brief statement of interest.

ECON 382 (S) Gentrification and Neighborhood Change (DPE)

While the phenomenon we call "gentrification" was first noted in the 1960s, these changes in urban neighborhoods have recently drawn increasing scrutiny and concern. Coming at a time of growing income inequality, the movement of higher income households into neighborhoods previously occupied by lower-income households has raised concerns about displacement, housing affordability, access to employment and other problems that may be associated with a gentrifying city. These problems may be further exacerbated by residential segregation and reduced support for public housing and transportation. This course will provide an opportunity to study these issues in depth. What, exactly, is gentrification? What do we know about the economic causes and consequences of gentrification and neighborhood change? How are these causes and consequences affected by growing income inequality and continued segregation in housing? What policy options might be pursued that could improve the well-being of existing and potential residents of the neighborhoods in US cities?

Class Format: The initial meeting of the class and all meetings of tutorial pairs will be held remotely via Zoom teleconference. Students will need a computer and reliable internet connection to participate.

Requirements/Evaluation: Students will meet in pairs once per week. On alternate weeks students will write a 10-12 page primary paper on an assigned topic, and on the next week write a 4-5 page comment and discussion on the primary paper. At least one of the primary papers written by each student during the course must incorporate some analysis of data on gentrification using data introduced in discussion.

Prerequisites: Economics 251 (Price and Allocation Theory), Statistics 161 or Economics 255 (Econometrics) or POEC 253 (Empirical Methods in Political Economy) or instructor permission.

Enrollment Limit: 10

Enrollment Preferences: Economics and Political Economy majors, Juniors and Seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Gentrification has been identified in the survey of DPE suggestions as a worthwhile and important topic for a course satisfying the DPE requirement. Gentrification, with its consequent displacement of low-income and frequently minority households in cities is widely viewed as a problem and there have been increasing demands for local policies to limit the rate or extent of gentrification. We will address the causes, measurement of gentrification and extent to which it burdens poor households.

Not offered current academic year

ECON 383 (S) Cities, Regions and the Economy

Cities and urbanization can have significant impacts on the economy. In many developed economies, a process of regional decline is associated with older, industrial cities. In developing countries, the process of economic growth is generally associated with increasing urbanization. Urbanization, with its increasing concentration of population and production, puts particular pressure on markets to allocate resources for provision of land, housing, transportation, labor and public goods. Urbanization can alter the productivity of land, labor, and capital in ways that can improve the welfare of residents and the performance of the broader economy. In this course we will examine these conflicting economic forces and examine some recent research that contributes to our understanding of the difference between regional growth and decline, and the role that the urban structure plays in

these processes. We will examine the function of land, housing, transportation, and labor markets in the urban context, and the scope for public policies to improve the performance of the regional economy.

Class Format: This class will be conducted remotely, with lecture/discussions recorded as videos available on Glow, and class discussions held during the assigned meeting time of the class via Zoom teleconference. Students will need a computer and reliable internet connection to participate.

Requirements/Evaluation: Two midterms and a research paper on an approved topic that is at least 5000 words in length.

Prerequisites: ECON 251 or instructor's permission

Enrollment Limit: 20

Enrollment Preferences: Seniors and Juniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: AMST Space and Place Electives GBST Urbanizing World Electives POEC U.S. Political Economy + Public Policy Course

ECON 384 (F) Corporate Finance (QFR)

This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions. In the fall of 2020, special consideration will be given to how both financial and real economic shocks interact with firms' financial decisions.

Class Format: Lecture / discussion; in the fall of 2020, some weeks we will meet for one 75-minute section (in person when possible) and break into smaller groups for one hour section groups (most likely remote). The timing of the sections will be arranged at the beginning of the semester.

Requirements/Evaluation: class participation, problem sets, short quizzes, short projects such as case write ups, a midterm exam, a final exercise and a research paper (possibly written with a partner)

Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

Enrollment Limit: 20

Enrollment Preferences: Senior Economics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.

Not offered current academic year

ECON 385 (S) Games and Information

This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games and enforcement, and information asymmetries and signaling, will be introduced. Applications will be drawn from economics and politics around the globe.

Requirements/Evaluation: Two exam, regular problem sets and assignments in which students create game-theoretic models.

Prerequisites: ECON 251

Enrollment Limit: 25

Enrollment Preferences: juniors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: students who have taken MATH 335 or CSCI 357 cannot receive credit for this class

Distributions: (D2)

Spring 2022

LEC Section: 01 Cancelled

ECON 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Primary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 30

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 389 (S) Tax Policy in Global Perspective (QFR)

Cross-listings: ECON 389 ECON 514

Secondary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity--the ability for the government to raise revenue--depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, tax policy lessons are universal so we will learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 390 (S) Financial Crises: Causes and Cures

Cross-listings: ECON 390 ECON 536

Primary Cross-listing

Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students

Prerequisites: ECON 252 and 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ECON 394 (F) European Economic History

Economic history directly informs our understanding of the process of economic development. With this in mind, this course will explore a series of questions related to the economic development of Europe from the early modern period until today. Why did modern economic growth first occur in Europe, and not in China or the Middle East? Why did the Industrial Revolution occur in Britain and not France? What was the role of colonialism in the acceleration of European growth? What explains the rise and fall of the Soviet economy? What are the causes and consequences of European economic integration since World War II? To answer these and other questions, we will investigate how institutional changes, the evolution of technology, aspects of globalization, and various forms of government intervention have impacted economic growth and living standards in European history, and how those developments have affected the rest of the world. Drawing on a wide variety of empirical and theoretical readings, the course will focus on how economic historians marshal evidence and construct arguments in ways that borrow from and contribute to other fields of economics.

Class Format: discussion

Requirements/Evaluation: class participation, reading responses, short assignments, and a final research paper

Prerequisites: ECON 251 or ECON 252 AND (ECON 255 or POEC 253 or STAT 346)

Enrollment Limit: 25

ECON 451 (F) Topics in Economic Growth

In this seminar, we will discuss some of the 'big questions' in macroeconomics, with a particular focus on economic growth. For example: Why are some countries richer than others? How does government intervention affect economic growth? Is it possible to have continued economic growth while avoiding dangerous levels of climatic change? Does inequality help or harm growth? How will automation and artificial intelligence affect growth, inequality, and unemployment? In addition to class discussions, students will complete an independent research project on a topic related to economic growth.

Class Format: About half of the class sessions will be lecture-based. The other half will be devoted to class discussion.

Requirements/Evaluation: class presentations, problem sets, short-writing assignments, research paper

Prerequisites: ECON 251, ECON 252, and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2021

SEM Section: 01 MWF 8:30 am - 9:45 am Gregory P. Casey

ECON 453 (F) Research in Labor Economics and Policy

The labor market plays a crucial role in people's lives worldwide. In industrialized countries, most households contain at least one wage earner, and income from working represents the largest component of total income. Thus analyses of the labor market are fundamentally relevant to both public policy and private decision-making. This seminar will explore the structure and functioning of the labor market using theoretical and empirical tools. Topics to be covered include labor supply and demand, minimum wages, labor market effects of social insurance and welfare programs, the collective bargaining relationship, discrimination, human capital, immigration, wage distribution, and unemployment. As labor economics is an intensely empirical subfield, students will be expected to analyze data as well as study the empirical work of others.

Class Format: I anticipate conducting the "hybrid" version of the course broadly similarly to the in-person version, but with students who are participating remotely attending synchronous class sessions via Zoom. Some use of written discussion boards to supplement in-person discussion and Socratic dialogues is also likely. That is my plan for now, but I will of course flexibly adapt the format as needed, both over the remainder of the summer and once the class begins.

Requirements/Evaluation: a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper (written in stages)

Prerequisites: ECON 251 and ECON 255 or POEC 253

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 455 (F) Research in Economic History

Historical approaches towards understanding economic development and current economic issues are increasingly in vogue. This course will explore new developments in the field of economics history, focusing on how economic historians are using old and new, qualitative and quantitative, data and methods to address questions of historical and current relevance. Along the way, we will consider works from both sides of the history - economics boundary, focusing on the ways that the two disciplines can and should borrow from one another. We will range widely across space and time, but some possible topics to be investigated include technological innovation, labor coercion, migration, trade and capital flows, colonialism, corporate governance, and political economy. Students are expected to not only read and analyze recent scholarship in economic history, but to also produce and present their own original research over the semester.

Requirements/Evaluation: short writing assignments and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original research paper (written in stages)

Prerequisites: ECON 251 and ECON 255 or consent of instructor; a previous economic history course is recommended but not required

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 456 (F) Income Distribution

This course examines the distribution of income in the United States. Questions to be addressed may include the following: How have wage inequality and the skill premium evolved over time? What factors explain a rising skill premium? How does income differ with race and gender? How is poverty measured, and what are the factors associated with living in poverty? How do government programs change the distribution of income? How much income mobility is there across generations? Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Requirements/Evaluation: short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 20

Enrollment Preferences: senior Economics majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: POEC U.S. Political Economy + Public Policy Course

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Sara LaLumia

ECON 458 (S) Economics of Risk

Risk and uncertainty are pervasive features of economic decisions and outcomes. Individuals face risk about health status and future job prospects. For a firm, developing new products is risky; furthermore, once a product has been developed, the firm faces product liability risk if it turns out to be unsafe. Investment decisions--from managing a portfolio to starting a business--are also fraught with uncertainty. Some risks are environmental--both manmade problems and natural disasters; other risks include the possibility of terrorist attack and, more locally, issues of campus safety. This tutorial explores both the private market responses to risk (e.g., financial markets, insurance markets, private contracting, and precautionary investments and saving) and government policies towards risk (e.g., regulation, taxation, and the legal system). From a theoretical standpoint, the course will build on expected utility theory, diversification, options valuation, principal-agent models, contract theory, and cost-benefit analysis. We will apply these tools to a wide variety of economic issues such as the ones listed above. One goal of the course is to discover common themes across the disparate topics. Students will be expected to read and synthesize a variety of approaches to risk and uncertainty and apply them to various issues.

Class Format: tutorial; students will meet with the instructor in pairs in each week

Requirements/Evaluation: For the first ten weeks, each student will write a 5 - 7 page paper every other week, and comment (of 2 - 3 pages) on their partner's work in the other weeks; the final two weeks will be reserved for papers on a topic of each student's interest (again, 5 - 7 pages but without needing to write a comment on their partner's work); one of the papers during the term will be revised to reflect feedback from the instructor and the student's partner

Prerequisites: ECON 251, 252, and 255

Enrollment Limit: 10

Enrollment Preferences: senior Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ECON 459 (S) Institutions and Development

Why are some societies rich and others poor? While typical answers emphasize proximate causes like factor accumulation (i.e., growth in physical and human capital), technological progress, and demographic change, the institutional approach highlights the role of social, political, and cultural factors, broadly defined, as fundamental determinants of economic prosperity. The central idea is that the value-added of economic activities to society is primarily conditioned by the social arrangements within which these activities occur -- namely, arrangements that generate a structure of private incentives, which can either promote behavior that is conducive to economic development or lead to the pursuit of private gain at the expense of the common good. Thus, the key to economic development in this approach is the emergence of complementary institutions and structures of governance in society. This course will survey the recent literature on the topic of institutions and economic development, with an emphasis on empirical evidence in the context of both historical and contemporary societies. The purpose of the course will be to expose students to the core ideas and empirical tools employed at the frontier of research in this area. The readings will primarily comprise published journal articles and unpublished working papers, and students should expect to apply concepts from across all the core courses in economics.

Requirements/Evaluation: extensive class participation, two 5-page review papers, two class presentations, and one 15- to 20-page empirical research paper (written in stages)

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Quamrul H. Ashraf

ECON 463 (S) Financial History

What can we learn from financial history to understand the successes and failures of finance today and in coming years? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of credit and more generally finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the US; the evolution of money, from stones or cigarettes to Bitcoin; the relationship between finance and government, and the extent to which it has changed over time; lessons from early asset bubbles and more recent crises (including that of 2008-09) for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today. The course also examines the tools that were developed in earlier eras to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation, including how financial systems can be prepared, if possible, for the risks that are already unfolding -- such as technology changes and climate risk.

Class Format: As of October 2020, the spring 2021 class will be remote. While many sessions will include the entire class, if we are at the cap (15 students), for some topics I will break the class up into smaller groups. For those in town, when the weather warms up, I hope to include distanced meetings outside, doing separate meetings for any students who are remote only. Liberal use of discussion boards will be made.

Requirements/Evaluation: Either 6 short papers or 3 short papers and one longer research paper (student choice), at least two oral presentations, and contributions to class discussions.

Prerequisites: ECON 251, ECON 252, and ECON 255 (or STAT 346 or Poli Ec 253) are required.

Enrollment Limit: 15

Enrollment Preferences: Senior Economics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 465 (F) Pollution and Labor Markets

If your home town has polluted air, does that reduce your wage? Do you work less? Are you less likely to finish high school? These are specific instances of an important general question: how does pollution affect labor market outcomes? The answer matters for individual decisions (where to live) and government policies (air pollution regulations). This seminar begins from theories of optimizing worker behavior in the presence of pollution. Building on this foundation, we will critically evaluate new empirical research into the impacts of pollution on human capital, labor supply, and productivity. We will also study the impact of pollution regulations on wages and employment. Included papers will cover both developed and developing countries.

Requirements/Evaluation: class discussion, presentation of reading, paper replication, 15- to 20-page empirical paper (written in stages) and accompanying short presentation

Prerequisites: ECON 251 and ECON 255; STAT 201/346 acceptable in place of ECON 255 prerequisite with instructor permission

Enrollment Limit: 19

Enrollment Preferences: Economics majors, seniority

ECON 468 (F) Your Money or Your Life: Health Disparities in the United States

A 25-year-old man living in a high-income household can expect to live 10 years longer than his low-income counterpart. There are also stark differences in mortality and health by race, education, employment status, region, and gender. This course will explore many of the potential explanations for health disparities, including access to insurance and health care, health behaviors, stress, environmental exposure, trust in institutions, and intergenerational transmission of health. We will emphasize causal inference and focus on assessing the quality of evidence. We will also investigate how government policies contribute to or ameliorate health disparities in the U.S.

Class Format: including frequent small group meetings that may occur outside regularly scheduled class times

Requirements/Evaluation: Class discussion, oral presentations, six short response papers, two 5-page critiques of published articles, three Stata exercises, and one 15-page original empirical research paper. Please note that the course can be taken P/F only by those who do not intend to use it to satisfy the requirements for the Economics major.

ECON 470 (S) The Indian Economy: Development and Social Justice

The Indian economy has (usually) grown rapidly in the last three decades, but poverty has declined relatively slowly, malnutrition remains high, and the sex ratio remains heavily biased against women. Is this the persistence of long-standing historical disadvantages such as those faced by Scheduled Castes and Tribes? Does this reflect failures in policy, in areas such as trade, credit, or labor law? Or is the quality of governance primarily to blame? We will use the theoretical and quantitative methods of an economist to consider these questions.

Requirements/Evaluation: Short response papers to assigned readings; classroom presentations/commentary on assigned readings; empirical research project; classroom presentation of empirical research project; participation in classroom discussion.

Prerequisites: ECON 251 and 255, or equivalent, or permission of instructor

Enrollment Limit: 19

SEM Section: 01 MWF 11:00 am - 11:50 am Anand V. Swamy

ECON 471 (S) Topics in Advanced Econometrics (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and cointegration analysis, both in conventional time series and panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

Requirements/Evaluation: periodic homework assignments, term paper

Prerequisites: ECON 371

Enrollment Limit: 10

Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

ECON 472 (F) Macroeconomic Instability and Financial Markets

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.

Requirements/Evaluation: problem sets, exams, and potentially student presentations

Prerequisites: ECON 251 and ECON 252

Enrollment Limit: 15

Enrollment Preferences: Economics majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ECON 474 (S) Advanced Methods for Causal Inference

Cross-listings: ECON 524 ECON 474

Primary Cross-listing

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconomic techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

Class Format: Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

Requirements/Evaluation: Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

Prerequisites: Econ 251 and either Econ 255 or Stat 346. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 19

Enrollment Preferences: Junior and senior Economics majors. CDE Fellows require the instructor's permission.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ECON 475 Advanced Economic Theory (QFR)

This course studies advanced topics in micro and macro economic theory. A major focus is on the mathematical underpinnings of advanced modern economics, with a particular emphasis on proofs. Topics may include existence of Nash equilibria, games of incomplete information, equilibrium refinement and selection, global games, Bayesian persuasion, Mirrless taxation, dynamic programming, existence of general equilibrium, recursive equilibria, stochastic models in continuous time, and others. The focus of this class is primarily on mathematical formalism, rigor, and proofs. These tools are essential components of any graduate program in economics. Students who wish to see pure math theorems applied to other fields may also be interested.

Requirements/Evaluation: May include problem sets, exams, participation, term paper

Prerequisites: MATH 150 or equivalent, ECON 251, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Senior Economics Majors

Quantative/Formal Reasoning Notes: Mathematical modeling and proofs

Not offered current academic year

ECON 476 (S) Behavioral Economics: Theory and Methods

Behavioral economics emphasizes that models in economics should account for the psychological plausibility of their assumptions and consequences.

This course will cover how the field has incorporated insights from psychology into standard microeconomics models of decision-making. In the process, we will review the different methods that are used to empirically test the psychological foundations of these models, including laboratory experiments, field experiments, and quasi-experimental analysis. Assignments, lectures, and class discussions will focus on academic papers that use behavioral economics models to study a variety of topics, such as household finance, public policy, consumer marketing, and others. Throughout the semester, students will also work towards formulating and completing their own original research project.

Class Format: Classes will be a mix of lectures and discussion sessions. The lectures will provide a broad overview of a specific topic or theory. Discussion sessions will center on a single academic paper (related to a topic covered in a previous lecture) that students will have read before class.

Requirements/Evaluation: one 15-25 page research paper, approximately eight 1-2 page responses to assigned readings, and class participation during discussion sessions

Prerequisites: ECON 251; ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ECON 477 (F) Economics of Environmental Behavior (QFR)

Cross-listings: ECON 477 ENVI 376

Primary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation: regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 477 (D2) ENVI 376 (D2)

Quantative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

ECON 501 (F) Economic Growth and Development

This course focuses on the analysis of modern economic growth and comparative development across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across

nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about economic growth remain difficult to answer.

Class Format: discussion

Requirements/Evaluation: problem sets, one midterm exam, and a final exam

Prerequisites: ECON 251, ECON 252, and (either ECON 255 or STAT 346); undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 32

Enrollment Preferences: junior and senior economics majors

The course introduces students to the statistical methods used by economists, including those studying policy questions. The focus is on applications. Students will also work with Stata, a software widely used by economists.

Class Format: discussion

Requirements/Evaluation: problem sets, midterm exam, small project, and a final

Prerequisites: admission depends on previous background in statistics and mathematics

Enrollment Preferences: limited to CDE students

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2021

ECON 504 (F) Public Economics in Developing Countries

This class is about microeconomic and empirical analysis of government expenditure programs in developing and transitional countries. It provides tools for understanding the effects of government policies, as well as a useful conceptual framework for analyzing normative questions such as "what role should government play in the economy" and "what is a good policy?" The course begins by considering the efficiency of market economies, and rationales for government intervention in the market, such as public goods, externalities, information-based market failures, imperfect competition, and equity. We also consider ways that human behavior might deviate from perfect rationality, and what that might imply for policy. Along the way, we apply these concepts to various examples of policy issues, including, among other things, the environment, education, health, infrastructure, security, social insurance, and aid to the poor. We then turn to the general question of how to make the government work better, addressing questions such as the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of "decentralization?" What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.

Class Format: discussion

Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam

Prerequisites: ECON 110; in addition, an empirical methods course (POEC 253, ECON 255, 502 or 503, or STAT 346) must be taken before or concurrently with this class; undergraduate enrollment limited and requires instructor's permission

ECON 505 (F) Developing Country Macroeconomics I: Theory

The macroeconomic structures of developing countries tend to be very different from those in high-income countries, and their macroeconomic policy environments also differ in important ways from those in rich countries. This course is intended to introduce students to a set of models that is particularly suitable for analyzing macroeconomic performance in developing countries, as well as to some analytical tools that help us understand why such countries have often experienced a variety of macroeconomic crises, including sovereign debt, currency, and banking crises.

Requirements/Evaluation: two hour tests and a comprehensive final exam

Prerequisites: ECON 251 and 252; undergraduate enrollment limited and requires instructor's permission

Expected Class Size: 25-30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

ECON 506 (F) Fundamentals of Developing Country Macroeconomics

This is a practically oriented course in macroeconomic theory and policy. It begins with a review of core concepts and definitions. It then discusses the

contributions of households and firms to aggregate production and spending. Next is an introduction to monetary and fiscal policy. It goes on to develop a complete macro model, which is then used to discuss some of the monetary, fiscal and exchange rate policy issues faced by developing and emerging market economies. The class is offered as an alternative to Econ 505 for those not intending to specialize in macroeconomics.

Requirements/Evaluation: two hour tests and a comprehensive final exam

Prerequisites: none; enrollment limited to CDE students

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ECON 510 (S) Financial Development and Regulation

Cross-listings: ECON 352 ECON 510

Primary Cross-listing

This course focuses on the financial system in developing countries and its role in economic development. The first part explores the functions of finance, how it contributes to growth and poverty alleviation, as well as examining what can be done to increase financial inclusion. What are the key parts of the infrastructure that are needed to improve access to financial services, including via 'fintech,' which is taking off in many developing countries? We will look at experiences with financial sector repression and subsequent liberalization and investigate the causes and impact of financial crises. Then we will study how to make finance effective in dealing with a variety of risks facing societies, including aging and climate change. A key focus will be how to prevent or minimize crises, analyzing government's role as regulator, supervisor, standard setter, contract enforcer, and owner. In this final part, attention will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

Class Format: discussion

Requirements/Evaluation: Midterm, participation in class discussion and formal in-class debates, and a final research paper.

Prerequisites: For undergraduates, Econ 110, 120, and POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 25

Enrollment Preferences: CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

Expected Class Size: 20-25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 513 (S) Empirical Methods in Macroeconomics (QFR)

Cross-listings: ECON 513 ECON 356

Primary Cross-listing

Macroeconomics and related fields in international finance and macro development have evolved specialized empirical techniques, known generally as macroeconometrics, which are designed to meet the practical challenges that the data and the empirical questions pose in these fields. The course will introduce the theory and application of these techniques, and students will learn how to implement these techniques using real world data to

address practical questions drawn from the field of macro development. The course is also available to undergraduates with permission of the instructor. However, in lieu of Econ 356, undergraduates with good quantitative skills are encouraged to take Econ 371, which will cover a broader range of topics in greater depth.

Requirements/Evaluation: weekly homework assignments, term paper

Prerequisites: ECON 252, ECON 255 or equivalent. Students may not earn credit for both Econ 356 and Econ 371.

Enrollment Limit: 19

Enrollment Preferences: Economics majors and CDE fellows

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 513 (D2) ECON 356 (D2)

Not offered current academic year

ECON 514 (S) Tax Policy in Global Perspective (QFR)

Cross-listings: ECON 389 ECON 514

Primary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity--the ability for the government to raise revenue--depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, tax policy lessons are universal so we will learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

ECON 519 (S) Population Economics

Cross-listings: ECON 380 ECON 519

Secondary Cross-listing

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Class Format: Course will be remote and will include synchronous lecture/discussion, possibly combined with some asynchronous components.

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Prerequisites: ECON 251; POEC 253 or ECON 255 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: If overenrolled, students will be asked to submit a brief statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PHLH Social Determinants of Health POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 521 (S) Incentives and Development Policy

Cross-listings: ECON 521 ECON 372

Primary Cross-listing

Why isn't the whole world developed? This course (and instructor) is of the opinion that the difficulty of getting incentives right is the key source of inefficiency. The course therefore studies how limited enforcement and asymmetric information constrain development, and about innovative development designs that attempt to overcome these constraints. The course readings will be a mix of field studies, empirical evidence and theoretical tools from game theory. Incentive and corruption problems in health, education, the regulation of banks and natural monopolies, privatization, budgeting, debt forgiveness, foreign aid, microfinance, climate treaties and ethnic violence will be studied using a unified framework. Note: this course was developed to address issues that arise in the countries represented at the CDE.

Requirements/Evaluation: two hour-long tests and a final policy project

Prerequisites: undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 19

Enrollment Preferences: intended for CDE Fellows

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ECON 522 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and

transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 30

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

ECON 524 (S) Advanced Methods for Causal Inference

Cross-listings: ECON 524 ECON 474

Secondary Cross-listing

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology

course will take students through several applied microeconomic techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

Class Format: Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

Requirements/Evaluation: Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

Prerequisites: Econ 251 and either Econ 255 or Stat 346. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 19

Enrollment Preferences: Junior and senior Economics majors. CDE Fellows require the instructor's permission.

ECON 532 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings: ECON 532 ECON 375

Primary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10

Enrollment Preferences: Junior and senior Economics majors

Spring 2022

TUT Section: T1 TBA Peter S. Heller

ECON 535 (S) International Financial Institutions

This tutorial will explore the role of official international financial institutions in the global economic and financial system, their relations with members, proposals for how they might be reformed, and issues that they face. The focus will be principally on the International Monetary Fund, and to a lesser extent the World Bank, the Bank for International Settlements and Financial Stability Board. Topics and readings will focus on such issues as: the roles and governance reform of the IMF and World Bank; lessons from their performance in international crises; initiatives of the Fund and Bank; the global adjustment process; financial system stability; governance reform; lending programs; the management of international reserves; and provision of advice to members. Participants will meet in pairs with the faculty member. Each week, one student will prepare a policy paper and submit the paper to the professor and to the other student in advance of the meeting. During the meeting, the student who has written the paper will present an argument, evidence, and conclusions. The other student will provide a critique of the paper based on concepts and evidence from the readings and his own research and experience. The professor will participate in the discussion after each participant has presented and ask questions that highlight or illustrate critical points.

Requirements/Evaluation: each participant will write and present 5 or 6 policy papers and a like number of critiques

Prerequisites: intended for CDE Fellows; undergraduate enrollment limited, and only with permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Not offered current academic year

ECON 536 (S) Financial Crises: Causes and Cures

Cross-listings: ECON 390 ECON 536

Secondary Cross-listing

Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to

prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students

Prerequisites: ECON 252 and 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ECON 538 (S) Resilience and Macroeconomic Policy

Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world's population continue to live in fragile conditions, buffeted by conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers' distorted incentives and governments' internal conflicts, fragility also deteriorates policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.

Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students

Prerequisites: ECON 252 and ECON 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

ECON 545 (S) Growth Diagnostics (QFR)

Cross-listings: ECON 545 ECON 345

Secondary Cross-listing

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous--i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth diagnostic, and a team presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: CDE fellows and senior Economics majors

Cross-listings: ECON 548 ECON 348

Secondary Cross-listing

Children around the world face unequal opportunities to attend school, and to learn. This course will introduce students to economic studies of education, focusing on pre-school through high school. The course will mainly cover research in low-income and middle-income countries, but will also discuss connections to policy debates in the United States and elsewhere. Topics will include the importance of early-life conditions and investments; the connections between health and education; the roles of information, incentives, inputs, and technology; research methods; and decisions between

policy options. Students in this course will analyze data themselves, and will critically read published research.

Requirements/Evaluation: Grades are principally based on problem sets, two in-class exams, and short presentations by students.

Prerequisites: ECON 255, POEC 253, STAT 346, or permission of the instructor. CDE Fellows should have taken ECON 502 or 503.

ECON 570 Data Science for Economic Analysis

The goal of data science is to use empirical information from a broad range of sources to improve our understanding of the world around us.

Economists increasingly rely on the tools of data science to access novel sources of data and information, characterize the economic environment, and conduct empirical analysis. This course provides hands-on introduction to data science tools most relevant for economic analysis including data visualization, exploratory data analysis, and statistical learning. The objective of the course is to help students: (i) formulate economic research questions that can be explored using data science tools, (ii) identify sources of data and prepare data for analysis, (iii) produce persuasive visualizations, and (iv) analyze data using both classical statistics and machine learning.

Class Format: The course includes traditional lectures, interactive activities in both Stata and R, and in-class presentations by students. Some prior knowledge of either Stata or R is helpful, but not required.

Requirements/Evaluation: Grades are based on in-class participation and performance on two take-home exams as well as problem sets and data visualization/analysis projects.

Prerequisites: ECON 255 or STAT 201, STAT 202, or STAT 346 or permission of instructor

Winter Study -----

ECON 10 (W) Securities Markets and Investment Banking

An overview of the Equities and Fixed Income Markets and the role of Investment Banks. Topics will include: Securities Sales and Trading, Bonds and Bond Math, Public Equities, Private Equity and Leveraged Buy-outs, Mergers and Acquisitions and Risk Management. The class emphasizes real-life practices and will include several expert guest speakers and case studies. The class begins with the basics of financial instruments, time value of money, and asset valuation. We then move on to fundamentals of corporate finance and conclude with financial markets. Course Goals: (1) to provide an understanding of how modern capital markets operate from a practical, real-life perspective (2) to help the student think critically about issues affecting the stock and bond markets, and (3) to have fun and instill a passion for future study and/or work in the Securities Industry. Required Readings: (1) Understanding Wall Street (Fifth Edition) by Jeffrey Little and Lucien Rhodes (2) Packet of Case Studies and Industry Notes (3) Wall Street Journal (Business & Finance section) and the Money Stuff blog on each day that class meets. Group Assignment (Case study): At the end of the first class, students will be divided into Groups. Each group will be assigned a case study to be orally presented to the class for further discussion (slides or other visual aids should be used to help organize the discussion). Each member of the team will be required to have a speaking role.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: statement of interest

Grading: pass/fail only

Unit Notes: Tim Bock '88 worked at Credit Suisse for 28 years where he ran Global Capital Markets, leading a unit of 250 Investment Bankers responsible for Credit Suisse's global financing businesses, including equity capital markets, debt capital markets, leveraged finance origination and corporate derivatives. Tim held several other leadership roles at CS, including Global Co-head of the Product platform in the Private Bank and Head of Derivatives Origination in the Equity and Fixed Income Departments.

ECON 14 (W) Owning and Operating a Minor League Sports Franchise and the Use of Sports Analytics

Although the nationally prominent sport teams and their top tier leagues garner most of the attention in the over \$70 billion North American sports industry, minor league franchises often help define a community with their cultural and economic reach that goes far beyond their own modest financial profile and employment ranks. Minor league franchises in small to medium sized markets across the country are small businesses that are uniquely positioned at the intersection of family entertainment, local economics and community engagement. The course will encompass elements of economics, math and statistics, data analytics, marketing, law and communications. It also is likely to address leadership, organizational design, ethics, strategic planning, diversity and culture. With regard to the pedagogical approach, the course will involve (i) reading non-fiction and text books, case studies and sports business journals, (ii) listening to podcasts, (iii) engaging with guest speakers, (iv) participating in class discussions and debate with the instructor regarding his own real-world experience as a minor league sports team owner, (v) some engagement of the Socratic method as case studies are discussed and debated, and (vi) writing of a short paper and the presentation of a relevant project. Six hours of in-class discussion per week and at least 20 hours per week of reading, analysis and projects is expected. Specifically, this course will explore the following areas: I. The Fundamentals of the Business of Professional Minor League Sports Franchises. II. The Application of Data Analytics and Business Intelligence in Sports. III. Understanding the Customer (the Fan). IV. The Social and Economic Impact of a Minor League Sports Franchise.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: some level of math, statistics and/or economics

Enrollment Limit: 20

Enrollment Preferences: upper classes

Grading: pass/fail only

Unit Notes: Todd W. Halloran (P'21 & '24) is a Senior Advisory Partner at Freeman Spogli & Co., a growth-oriented middle market private equity firm focused largely on consumer related businesses. He is also the principal owner and Executive Chairman of a minor league hockey franchise, The South Carolina Stingrays (North Charleston, SC), and a minority owner of the AA minor league baseball team, New Hampshire FisherCats. Todd earned a BA in Economics from Colby College and an MBA from Harvard University.

ECON 15 (W) Introduction to Management Consulting

This course provides a broad overview of the management consulting industry from the perspective of an experienced practitioner. The objectives of the class are to provide a real world view as to what consultants do and to help prepare students who are considering joining a management consulting firm post-Williams. The class will begin with a broad discussion of the differences in the types of business consulting and how management consulting firms are utilized by corporations and private equity firms. The next section will introduce the complexities in developing successful business strategies and review common frameworks for structuring strategic analysis. Students will be provided instruction on (and practice with) the tools utilized by strategy consultants to analyze markets, evaluate competitive environments, synthesize customer information, and perform financial analysis in order to develop growth strategies. Additionally, one class session will be devoted to tips for getting a job in management consulting including how to ace case interviews. The final small group project will entail the development and delivery of a consulting presentation for a business with a strategic need.

Requirements/Evaluation: final project or presentation, class participation, homework.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: email expression of interest

Grading: pass/fail only

Unit Notes: Peter McKelvey '86 was with L.E.K. Consulting for 29 years including leading the Boston office and Private Equity practice and serving 6

years as President of the Americas Region. He has extensive experience in corporate and business unit strategy development and mergers and acquisitions advisory services. In addition to a BA in economics from Williams, Peter holds an MBA from The Wharton School of the University of Pennsylvania.

Materials/Lab Fee: \$50

Winter 2022

LEC Section: 01 TWR 10:00 am - 12:50 pm Peter McKelvey

ECON 16 (W) Venture Capital

The course will examine the venture capital industry from both a theoretical and practical perspective and will focus on the interplay of the legal, business, economic and financial issues that need to be dealt with in the formation, organization, governance and financing of new enterprises. The course is designed to provide students with a fundamental knowledge of the corporate and other laws applicable to venture capital, as well as with an appreciation of the concerns of entrepreneurs, venture capitalists and early employees. Class sessions will be devoted primarily to a discussion of business cases taken from the entrepreneurial curriculum of the Harvard Business School. In addition, students will be required to participate in small groups prior to class to prepare advice for entrepreneurs or key employees in three scenarios--an early stage company negotiating with a key executive the company is seeking to hire, a company considering two competing term sheets for venture financing and a company faced with the need for additional financing in a distressed situation. As a capstone to the class, students will participate in an in-class business simulation game developed at Wharton that will require students to interact in assigned roles as founders, investors or key employees. In addition to reading and analyzing the assigned business cases prior to class, students will be asked to review various background materials. Classes will meet for at least six hours per week, with additional sessions scheduled for meetings with outside industry experts that accept invitations to address the class.

Requirements/Evaluation: participation in class & in business simulation game, prep of discussion outlines (each equivalent to 3- to 4-page paper) in connection with the small group assignments.

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: preference for seniors

Grading: pass/fail only

Unit Notes: Mr. Schwed retired from the law firm of WilmerHale in December 2015 after a 40-year career focused on private equity and venture capital. For nine years, he was an adjunct professor at George Washington University Law School teaching a course on venture capital law. He has taught this course during Winter Study for four years. Mr. Schwed graduated from Williams with a degree in Economics in 1971 and from Harvard Law School in 1974.

Materials/Lab Fee: \$150

Winter 2022

LEC Section: 01 MWRF 10:00 am - 11:50 am Robert A. Schwed

ECON 17 (W) The Fun of Fundraising

According to the National Center for Charitable Statistics, there are 1.5 million non-profit organizations registered in the U.S., and each of those organizations needs to actively fundraise in order to sustain their operations. Each year, hundreds of billions of dollars are contributed to charities from donors across the U.S. What is it that makes people want to give? What do donors consider when choosing what organizations to support? What type of an impact do individuals want to make through their philanthropy? This class will examine these questions and more through case studies, conversations with non-profit leaders and board members, and philanthropists. Students will gain a basic understanding of a non-profit financial model and how non-profits can demonstrate impact to existing and potential donors, as well as the different ways in which fundraising can actually be fun and can inform a potential career in the non-profit sector. Much of the course reading will involve actual fundraising materials and collateral, including appeals, brochures, grant applications, and stewardship reports. Final projects will give students the opportunity to try their own hand at creation of stewardship or solicitation pieces, potentially in partnership with/for the benefit of a local non-profit. In addition to regular course meetings, occasional meetings with non-profit leaders or donors may be required; whenever possible (based on the schedule of the guest speaker), these will be scheduled during the day, and any evening events would be optional. Laura Day '04 is director of annual giving in the Williams Development Office. She holds an MBA in management with degree designation in global sustainability from Fordham University. Prior to working for Williams, Laura worked for eight years in the non-profit performing arts in New York City. Laura also serves as board chair for Berkshire Nursing Families. Mark Robertson '02 is

director of milestone reunion programs in the Williams Development Office. He holds an Ed.M. in higher education from the Harvard Graduate School of Education, where he previously worked for seven years. Mark also serves as board president for Williamstown Community Preschool.

Requirements/Evaluation: final project or presentation

ECON 18 (W) Financial Accounting: Concepts, Methods, and Uses

Businesses engage in tens of thousands of transactions with their suppliers, employees, and customers, and, in doing so, generate millions of numbers. Managers of those businesses prepare financial reports for those interested in the businesses: owners, regulators, labor unions, employees, bankers, and others. The reports summarize the millions of numbers with a few hundred numbers, maybe a thousand. How do you summarize all that data so that readers of the numbers can use them to make the decisions they want to make? The challenge of accounting: how to aggregate data in consistent ways useful for those who make decisions based on the numbers. You study economics and know that owners, regulators, and employees define "profits" differently. Accounting reports to them all. This class will use four intense weeks to give you a framework to understand accounting's language and structure so that you can teach yourself what you need to know as you go forward on Wall Street or consulting or professional school or as an intelligent layperson reading the newspaper. You will learn to distinguish receipt from revenue, expense from expenditure, funds from reserves, retained earnings from cash, capital from capital [most professors of economics and finance cannot crisply define capital], cost from price, and so on. Given the nature and depth of material we cover, you should plan on committing 24 hours spread over 4-5 days per week between in-class sessions and assignments. I expect that formal classes will be Mon, Tues, Wed, Thurs late mornings for two hours each. We will grapple with the real world of financial economics with at least one practical case each week, including accounting. A final examination will help us both gauge how much of the language and concepts of financial accounting you have successfully mastered.

Requirements/Evaluation: daily assignments including case preparation, final exam

Prerequisites: ECON 110

Enrollment Limit: 30

Enrollment Preferences: If the course is over-enrolled, students will submit written statements of interest

Grading: pass/fail only

Unit Notes: Roman L. Weil has a PhD in Economics and is a CPA. He has taught at the University of Chicago since 1965, becoming emeritus in 2008 and teaching since then at Harvard, Princeton, Stanford, among others. He has written several textbooks, professional reference books, and refereed articles. He invites your questions; write roman.weil@chicagobooth.edu.

Materials/Lab Fee: \$35

LEC Section: 01 Cancelled

ECON 19 (W) From Rockefeller to Renewables: 150 Years of US Energy Disruption

In just the last two decades, the United States has gone from being the world's largest energy importer to being a net energy exporter. What accounts for this remarkable and globally disruptive transformation, and what are its long-term implications for the US and global transition to cleaner energy. To be sure, oil shale production technology, aka "fracking," has been a critical driver. However, renewable energy (wind, solar, storage) and conservation have also played important parts. This course starts with a historical perspective, examining the roots of the modern energy industry via John D Rockefeller's autobiography. We then study the evolution of global supply and demand for oil, natural gas, renewables, and electricity including the important roles of marginal cost curves and market price signals. Which disruptions and their disruptors--from among fracking, wind, solar, and battery storage--have been the most important? What will the next chapter of the US energy transition look like? In addition, we will examine the ebb and flow of geopolitics due to geology. Course includes: 1) team debate where students pair-up, select a topic from current energy issues, and then be

randomly assigned to defend one side of the issue; 2) 5 page paper.

Requirements/Evaluation: short paper and final project or presentation; 5 page paper and final project is a team debate

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, Economics majors

Grading: pass/fail only

ECON 21 (W) Fieldwork in International Development

This course involves an internship, volunteer work, or a research project in a developing economy and an academic analysis of the relevant development issues. The instructors will work with interested students to help arrange a placement and to help secure funding through Williams Financial Aid or other sources. Such arrangements must be made well in advance of Winter Study. Spanish speakers are especially encouraged to apply as there will likely be a few fieldwork possibilities in coffee-growing areas of Latin America. Students will read relevant background articles distributed at the end of fall term and must agree to keep a journal, maintain contact with the instructors, and write a final paper on development issues raised by their specific internship. A group meeting of all students will occur after Winter Study to reflect on individual experiences. Students are also encouraged to attend development talks at the Center for Development Economics throughout the academic year. Requirements: 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; 10-page final paper or equivalent; participation in final meeting. Interested students should send a resume and letter of interest to Paula Consolini by November 1. Each student's internship provider should send a confirmation letter by December 1 verifying the placement and describing the nature of the work to be performed by the intern. Paula Consolini is Director of the Center for Learning in Action.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: Resume and Letter of Interest will be used to select students if over-enrolled

ECON 22 (W) Volunteer Income Tax Assistance

Cross-listings: POEC 22 ECON 22

Primary Cross-listing

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low-income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10-page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and Q&A sessions featuring guests from local social service organizations and the community will help orient students to the issues facing low-income families in the northern Berkshires. Note: This course satisfies the Political Economy Major Experiential Learning requirement.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: statement of interest

Grading: pass/fail only

ECON 23 (W) Investing with Purpose: The Planning and Practice of Endowment Investing

Are you eager to learn about investing? Or perhaps you are interested in non-profits and want to understand how endowments support their mission? Maybe you've thought about a potential career in finance, but want to know the difference between asset management and investment banking? ECON 23 is open to students of all majors and backgrounds; students with no prior experience are welcome and encouraged to apply. ECON 23 is designed to introduce students to investing and equip students with key industry knowledge and skills. The course is taught by members of the Williams College Investment Office which oversee the College's \$3.2 billion endowment. We'll start with an introduction to the role that the endowment plays in supporting the College's mission. Next, the course will cover different investment assets including equity, hedge funds, venture capital, private equity, fixed income, and impact investing. Students will receive a brief overview of accounting and will have the opportunity to learn about different career paths in finance. Through discussions, readings, and a group case study, students will apply skills learned. Students will learn from practicing investment professionals through guest speakers and will gain practical skills in excel through training and project work. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, weekly journal entries, an introductory excel course, and a group case study exercise. Students are required to attend a day-long field trip to Boston to meet the Investment Office team and other guest speakers. The course is open to first-years, sophomores, and juniors. Email investmentoffice@williamsedu with a resume (if available) and short statement discussing why you are interested and what you hope to gain from this course by 11:59 PM ET October 24, 2021 If no resume, write a short paragraph about yourself.

Requirements/Evaluation: class attendance, participation, and completion of assignments, which include a group case study, weekly journal entries, and an excel workbook

ECON 27 (W) Quilting Inspired by Gee's Bend

Quilting as an art form is present in many communities, but residents of Gee's Bend, Alabama are recognized for their very distinctive quilting style. In

this hands-on class students will learn the basics of quilt-making, inspired by the designs and techniques used in Gee's Bend. The course will involve field trips to a local quilt store, instruction in techniques such as improvisational piecing, and creation of an original art quilt. Students should expect to spend a significant amount of time designing and sewing outside of class hours. The course will culminate with a public exhibition of students' quilts. No previous sewing experience required.

Requirements/Evaluation: final project or presentation; presentation of finished quilts

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: statement of interest

Grading: pass/fail only

Unit Notes: Chris LaLumia is a life-long quilter and retired teacher. She taught one of her daughters to be an award-winning art quilter. Her other daughter is an economics professor at Williams College.

Materials/Lab Fee: \$150

ECON 28 (W) Product Management and Solution Design

Cross-listings: ECON 28 CSCI 28

Primary Cross-listing

In this course, students will work in small teams to design a software product that solves a problem of their choosing. To support this endeavor, we will examine, critique, and apply methodologies intended to solve these problems, including those developed by Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Students will learn to act as effective product managers, achieving alignment between business, technology, and UI/UX design. Such alignment is crucial given that technology projects often fail not because of the quality of technical engineering but due to misalignment in these three areas. Google Glass failed to account for its price tag, fashion, and the privacy panic. The initial Obamacare website failed to address management issues and predict the volume of website visitors. Flexcube failed to update and incorporate users into the design of their product, resulting in a \$500 M UX mistake for Citi bank. These organizations did not identify the right problem, or did not build the right solution. The underlying conflict is IT teams like to be told what to build, but users often do not know what they want or how to express it. We will learn how product managers and their interdisciplinary teams can bridge that gap.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students will be asked to submit a letter describing why they are interested in the course and what they hope to get out of it

Grading: pass/fail only

Unit Notes: Allan joined DataArt in 2014 through the acquisition of AW Systems, where he was a founding partner, and instrumental in developing the Solution Design Framework Methodology, a process designed to guide large-scale/complex technology projects to success. Allan now heads DataArt's Solution Design consulting group as well as their product management competency.

Materials/Lab Fee: \$6

ECON 29 (W) Infrastructure in Developing Countries--Considerations for Policy Makers

Cross-listings: ECON 29 ECON 51

Secondary Cross-listing

This is a CDE winter term course, open to undergraduates as well. Students will be introduced to policy-making challenges of infrastructure, particularly in Emerging Markets. Students will read reports, articles and view presentations on how the world of infrastructure is changing, notably with respect to energy (including wind, solar and storage) and transport infrastructure (both urban and national). Case examples will be drawn from a number of countries, including among others Indonesia, Colombia, and Nigeria. New technologies are having widespread impacts on countries' options for addressing their infrastructure needs, as is climate change. In this context, policy-making holds many complexities and uncertainties. The course will introduce students to key considerations in the framing and implementation of policies to address these infrastructure challenges. Given the breadth and complexity of the topic, the course will not aim to provide "answers" as to how policy-makers can best "solve" infrastructure challenges. Class discussions will instead illustrate pros and cons of different potential policy approaches, and discuss why consensus on infrastructure policy can be hard to achieve. Students will write a paper and deliver a team presentation on ways in which infrastructure challenges can be approached in a specific Emerging Market country.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: preference to CDE students

Grading: no pass/fail option, no fifth course option

Unit Notes: Bernie Sheahan is the former Director of Infrastructure at the World Bank's International Finance Corporation, as well as former Director of Public-Private Partnerships. He has decades of experience in infrastructure design, financing and policy advice. Bernie has lectured on infrastructure at Williams, Georgetown, George Washington, John Hopkins, and the National Defense University.

ECON 30 (W) Honors Project: Economics

The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. They should register for this WSP as their first choice.

ECON 52 (W) Micro-Simulation Modeling for Ex Ante Policy Analysis

Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions. During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis.

Requirements/Evaluation: two 10-page papers and final project and presentation

- Stephen J. Tifft, Professor of English
- Emily Vasiliauskas, Associate Professor of English
- Ricardo A Wilson, Assistant Professor of English

The study of English allows students to explore the critical role language and literature play in the shaping of human culture and social experience. Department courses cover a variety of national, regional, and diasporic literary traditions; acquaint students with a range of genres and cultural practices, including poetry, prose, drama, film, and mixed or emerging media; and employ a range of critical and methodological approaches. All foster skills of critical analysis, interpretation, and written argument and expression. By cultivating a sophisticated awareness of linguistic and literary representation, and by encouraging the ability to read critically and write persuasively, the English major provides students with intellectual and analytical skills that they can draw upon to follow a wide range of paths.

COURSES AND COURSE-NUMBERING

100-level Courses

At the introductory level, the department offers a range of writing-intensive 100-level courses which focus on interpretive skills as well as skills in writing and argumentation. All 100-level courses are designed primarily for first-year students, although they are open to interested sophomores, juniors, and seniors. A 100-level course is required for admission to most upper-level English courses, except in the case of students who have placed out of the introductory courses by receiving a score of 5 on the Advanced Placement examination in English Literature or of 6 or 7 on the Higher Level International Baccalaureate English exam.

200-level Courses

Most 200-level courses are designed primarily for qualified first-year students, sophomores, and junior and senior non-majors, but they are open to junior and senior majors and count as major courses. Several 200-level courses have no prerequisites; see individual descriptions for details. 200-level Gateway courses are designed for first- and second-year students who are considering becoming English majors, or who are interested in pursuing upper-level course work in the department. All Gateway courses are writing-intensive. First-year students who have placed out of the 100-level courses are encouraged to take a Gateway course as their introduction to the department.

300-level Courses

The majority of English Department courses are designed primarily for students who have some experience with textual analysis, and are open to sophomores, juniors, and seniors. First-year students who wish to enroll in a 300-level course are advised to consult the instructor.

400-level Courses

400-level courses are intensive, discussion-oriented classes. Limited to 15 students, 400-level courses should be attractive to any student interested in a course that emphasizes student initiated independent work. Majors considering Honors work and who wish to prepare for it are urged to take a 400-level course before senior year.

ADVISING

All students who wish to discuss English Department offerings are invited to see any faculty member or the department chair.

Prospective majors are particularly encouraged to discuss their interest with faculty as early as possible. In the spring of the sophomore year, newly declared majors must meet with a faculty member to discuss the Major Plan. Declared majors will be assigned a permanent advisor shortly after they declare the major.

MAJOR

Major Plan. Shortly after declaring the major, all English majors must complete a short written plan for how they intend to complete the major. In this plan, students should consider how they can most fruitfully explore the broad range of genres, historical periods, and national and cultural traditions that literature in English encompasses, and how they wish to focus upon a particular intellectual interest within English. Students are encouraged to begin discussing the Major Plan with a faculty member as soon as they become interested in the major; junior majors must meet with faculty advisors to revisit Major Plans as they register for courses. There will also be informational meetings and web resources available to assist new majors in developing the Major Plan.

Students majoring in English must take at least nine courses, including the following:

Any 100-level English class. Students exempted by the department from 100-level courses will substitute an elective course.

At least one 200-level Gateway course (grouped at the end of the 200-level course descriptions). Gateway courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical methods and historical approaches that will prove fruitful as they pursue the major. (Note: a Gateway course can fulfill a Literary Histories or Criticism requirement as well as the Gateway requirement.)

At least one Criticism course (identified in parentheses at the end of the course description). A course fulfilling the criticism requirement entails a sustained and explicit reflection on problems of critical method, whether by engaging a range of critical approaches and their implications or by exploring a particular method, theorist, or critic in depth. (Please note that when a Criticism course is also listed as satisfying the Literary Histories requirement, the course may be used to satisfy either requirement, but not both.)

At least three courses at the 300-level or above.

At least three courses designated as Literary Histories. Literary Histories courses concern the emergence or development of a specific literary tradition or problem and/or its transformation across multiple historical periods. Literary Histories are identified by LH-A, LH-B, or LH-C in parentheses at the end of the course description.

LH-A: courses dealing primarily with literature written before 1800.

LH-B: courses dealing primarily with literature written before 1900 but not included in LH-A (courses on literature from 1800-1900 and some surveys).

LH-C: courses dealing primarily with literature written after 1900.

Of the three Literary Histories courses required for the major, at least two must focus on literature before 1900 (LH-A or LH-B), with at least one of these focusing primarily on literature before 1800 (LH-A).

For further clarification, please see the English Department website at english.williams.edu.

Courses Outside the Department

The department will give one elective course credit toward the major for a course taken in literature of a foreign language, whether the course is

taught in the original language or in translation. Such a course may not be used to satisfy the department's Literary Histories, Criticism, or Gateway requirements.

STUDY AWAY

Majors who plan to study abroad should be proactive in understanding how this will affect their plans for completing major requirements. Such plans should be discussed in advance with the student's advisor as well as the department's academic assistant. Approval of departmental credit for courses taken off-campus must be obtained in advance from the department chair.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. In most cases we require syllabus, readings, and assignments. The one exception is the Oxford Program. We need only the title and description for that particular program.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, for most programs we allow only two electives towards the major. Again, the exception is the Oxford Program where we allow four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes, students cannot receive credit for the Gateway requirement. It is difficult to receive credit for our criticism requirement as well.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students must be aware that if they do not take a Gateway before their study away they will have to do it when they come back. Likewise for our criticism requirement.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

This happens most often when the student does not come to see the Chair before they leave or if they change their plans once they are away at their program.

THE DEGREE WITH HONORS IN ENGLISH

The English Department offers three routes toward honors: a creative writing thesis, a critical thesis, and a critical specialization. Candidates for the program should have at least a 3.5 average in courses taken in English, but admission will not depend solely on course grades. Formal application to pursue honors must be made to the director of honors (Emily Vasiliauskas) by April of the junior year.

All routes require students to take a minimum of ten regular-semester courses (rather than the nine otherwise required for the major). Students doing a creative writing thesis must, by graduation, take at least nine regular semester courses, and, in addition, take English 497 (Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students writing a critical thesis must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students pursuing a critical specialization must, by graduation, take at least eight regular-semester courses, and in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W30 (Senior Thesis: Specialization Route, winter study) during senior year.

Creative Writing Thesis

The creative writing thesis is a significant body of (usually) fiction or poetry completed during the fall semester and winter study of the senior year, and usually including revised writing done in earlier semesters. (With permission of the honors committee, the thesis may be undertaken during the winter study period and the spring semester of the senior year.) Requirements for admission include outstanding work in an introductory and an advanced workshop (or, in exceptional cases, not including poetry or fiction, a substantial body of work in place of an advanced workshop), a recommendation from one of the creative writing teachers (who will then act as thesis advisor), and the approval of the departmental honors committee. A creative thesis begun in the fall is due on the last day of winter study; one begun in winter study is due the third Monday after spring

break. The methods of evaluation are identical to those for critical projects (but their page limits do not apply).

Critical Thesis

The critical thesis is a substantial critical essay written during both semesters as well as the winter study period of the senior year. It must consider critical and/or theoretical as well as literary texts. The thesis is normally about 15,000 words (45 pages); in no case should it be longer than 25,000 words (75 pages). The proposal, a 3-page description of the thesis project, should indicate the subject to be investigated and the arguments to be considered, along with a bibliography. The finished thesis is due on the third Monday following spring break. After the critical thesis has been completed, students publicly presents their work.

Critical Specialization

The critical specialization route is a series of forays into a broad area of interest related to work undertaken in at least two courses. At least one of these courses must be in the English Department, and both need to have been taken by the end of fall term in senior year. The specialization route entails: (1) a set of three 10-page essays which together advance a flexibly related set of arguments; (2) an annotated bibliography (5 pages) of secondary sources, explaining their importance to the area of specialization; (3) a meeting with the three faculty evaluators (one of whom is the advisor) during the last two weeks in February to discuss the trio of essays and the annotated bibliography; (4) a fourth essay of 12 pages, considering matters that arose during the faculty-student meeting and reflecting on the outcome of the specialization. The 3-page proposal for the specialization should specify the area and range of the study, the issues likely to be explored, and the methods to be used for their investigation. It should also describe the relation between previous course work and the specialization, and include a brief bibliography of secondary works. The first two papers are due by the end of fall semester; the third paper is due at the end of winter study; the bibliography is due mid-February; and the final paper is due the third Monday after spring break.

Applying to the Honors Program

All students who wish to apply to the honors program are required to consult with a prospective faculty advisor and the director of honors before April of the junior year. Prior to pre-registration in April, candidates for critical theses and specializations submit a 3-page proposal that includes an account of the proposed project and a bibliography. Students applying to creative writing honors submit a brief proposal describing the project they wish to pursue. Decisions regarding admission to the honors program will be made by the end of May. Admission to the honors program depends on the department's assessment of the qualifications of the student, the feasibility of the project, and the availability of an appropriate advisor.

When pre-registering for Fall classes of their senior year, students who are applying to critical honors should register for the Honors Colloquium as one of their four courses.

Progress and Evaluation of Honors

While grades for the fall and winter study terms are deferred until both the honors project and review process are completed, students must do satisfactory work to continue in the program. Should the student's work in the fall semester not meet this standard, the course will convert to a standard independent study (English 397), and the student will register for a regular winter study project. A student engaged in a year-long project must likewise perform satisfactorily in winter study (English W30 or W31) to enroll in English 494 in the spring semester. When such is not the case, the winter study course will be converted to an independent study "99."

Students are required to submit one electronic copy to the department academic assistant at pmalanga@williams.edu. Students should also give a final hard copy to their thesis advisor. Both the electronic copy and the hard copy are due on the dates applicable to the type of project pursued (see the above descriptions of each type of project for the due dates). All honors projects are evaluated by the advisor and two other faculty members. The colloquium director, in consultation with the advisor, gives the first semester grade, and the advisor determines the student's second semester grade in honors, while the two external readers recommend to the department that the project receive Highest Honors, Honors, or no Honors. Honors of any kind are contingent upon satisfactory completion of courses in the major during the senior year. Highest Honors are normally awarded only to students whose performance in both the honors program and regular courses in the major has been exceptional.

ENGL 104 (S) Creative Non-fiction (WS)

In this course we will read some of the most prominent practitioners of creative non-fiction--writers like John McPhee, Joan Didion, Malcolm Gladwell, Susan Orlean, Ta-Nehisi Coates, Michael Pollan, Zadie Smith and Oliver Sacks. Students will also write in a variety of non-fiction modes--explainers, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.

Class Format: workshop

Requirements/Evaluation: four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

ENGL 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: AMST 105 ENGL 105 WGSS 105

Primary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 105 (D2) ENGL 105 (D1) WGSS 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

ENGL 106 (S) "Make it New": The Modernist Experiment (WS)

Cross-listings: ENGL 106 COMP 105

Primary Cross-listing

In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This

course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S.Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation: active class participation; three papers rising from 3-7 pages; three two-page reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 107 (F) Temptation (WS)

Cross-listings: COMP 106 ENGL 107

Primary Cross-listing

We want most those things we can't--or shouldn't--have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

Requirements/Evaluation: Four five-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 106 (D1) ENGL 107 (D1)

Writing Skills Notes: Students will write four five-page papers, each of which will receive timely and extensive written feedback from the instructor. Students will be invited to discuss their papers with the instructor at the draft stage.

Fall 2021

SEM Section: 01 TR 9:55 am - 11:10 am Emily Vasiliauskas

ENGL 110 (F) Ruined America: New American Dystopian Novels (WS)

Dystopian novels have become commonplace. But why now? Why do we seem to be experiencing a heightened anxiety over apocalypse? We will consider two types of dystopian visions--those that present a post-apocalyptic world, and those that conjure up wrecked societies out of current evils. Both types present the world we know now as either lost or full of losers. As we visit a variety of recently imagined American dystopias, we will focus

on the ethical dilemmas imposed by prospects of our diminished state: the inevitable issues of class, and the divisions of race and gender; the prospects of anarchy and political oppression; and the threat of technology to our identity and our environment. The class will also focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays.

Class Format: The course will be taught remotely.

Requirements/Evaluation: Two five-page essays, and one final 10-page essay, as well as several short writing assignments. Active seminar participation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: First-year students

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing intensive. I plan on assigning two five-page essays and one 8-10 page essay. The shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 111 (S) Poetry and Politics (WS)

"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury," in which she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats--himself a very politically involved poet--writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that poetry would suffer from too much involvement with the "quarrel with others" that is politics. And when W. H. Auden writes in 1939 that "poetry makes nothing happen" he appears to locate poetry's value precisely in its irrelevance to politics as such. This course will focus on the vexed relationship between poetry and political struggle, reading predominantly poetry and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers and appreciators of poetry, and better readers and writers of argumentative prose.

Class Format: discussion

Requirements/Evaluation: graded essays, final in-class team project

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write 5 essays total. After each essay, students meet individually with the professor to discuss their writing and plan specific improvements in their writing skills. Two of the essays will be revised after peer-review tutorials.

Not offered current academic year

ENGL 112 (F) Introduction to Literary Criticism (WS)

What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by literary and other conventions, and by the historical and personal circumstances of a work's composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well, and reading critically? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our readings--mainly short fiction and poetry, along with selected introductory work in critical theory--will invite increased

self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will read longer texts, including at least one play and one novel.

Requirements/Evaluation: Three papers rising from 3-6 pages, discussion board postings, and contribution to class discussions.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Three papers, rising from 3 pages for the first, to 6 pages for the last. Postings on Glow discussion boards. Extensive written feedback on longer papers, plus the option of revision.

Fall 2021

SEM Section: 01 MWF 10:00 am - 10:50 am James L. Pethica

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: WGSS 113 ENGL 113 AMST 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the

social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Fall 2021

SEM Section: 01 TF 1:10 pm - 2:25 pm Bethany Hicok

ENGL 114 (F) Literary Speakers (WS)

The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how--and with what effects--poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on the twentieth century (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

Class Format: This course will be taught remotely.

Requirements/Evaluation: 4 or 5 papers, of varying lengths, spaced throughout the term (about 15-20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision. There will be no examinations in this course.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: first-year students and then sophomores who have not yet taken a 100-level course in English

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4-5 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to about 5 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least two classes during the term will be specifically devoted to issues related to paper writing.

Not offered current academic year

ENGL 115 (F) The Literature of Sports (DPE) (WS)

Cross-listings: AFR 115 ENGL 115

Primary Cross-listing

The ubiquity of the sporting event, the athlete as hero, the athlete as failure, the crowd, the fan, the stadium, and all of the complex conflicts therein have long been the subjects of some of the finest writing in America and throughout the world. Writers have used sport as a context through which to explore and examine ideas such as beauty, the sublime, tragedy, politics, race, class, sexuality, and gender. This course will focus on poetry, fiction, and non-fiction invested in the public spectacles and private revelations of sport ranging from the poetics of praise to issues of urbanism, colonialism, globalization with readings by Pindar, Rankine, CLR James, Baldwin, Hemingway, Oates, DeLillo, and many others. This course will be taught online in a synchronous format.

Requirements/Evaluation: Students will be expected to complete a number of short (5 pages or less) papers during the semester and one longer paper (8-10 pages) at the end of the semester.

Prerequisites: None.

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 115 (D2) ENGL 115 (D1)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will focus on literature about sports that addresses, among other topics, civil rights activism, gentrification, race dynamics and race relations both inside and outside of the USA, American exceptionalism, sociocultural construction of emotional displays, mental health, religious conflict, and anti-blackness.

Not offered current academic year

ENGL 116 (S) The Remix: Adaptation and Revelation (WS)

This course explores the ideas of remaking and adaptation. We examine twentieth and twenty-first-century fiction, poetry, film, and hybrid texts that interact with subject matter stretching from Greek mythology to New World castaway stories to global pandemics. What is the nature of the work they attempt? What is lost and gained in these re-visions? In response to these questions, emphasis is placed on critical reading and writing (and rewriting), as well as on research skills. Works considered throughout the term come from, among others, Jorge Luis Borges, Anne Carson, J.M. Coetzee, Alfonso Cuarón, and Natasha Trethewey.

Class Format: remote

Requirements/Evaluation: at least 20 pages of writing; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Not offered current academic year

ENGL 117 (F) Introduction to Cultural Theory (WS)

Cross-listings: ENGL 117 COMP 117

Primary Cross-listing

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion

Requirements/Evaluation: four formal writing assignments totaling 20 pages (three full essays + one lead-in assignment), informal writing twice weekly, class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 117 (D1) COMP 117 (D1)

Writing Skills Notes: Students will write three five- to seven-page papers, on which I will provide extensive feedback. Before writing their first papers, students will submit theses and introductions, which I will help them refine. We will hold three extra writing sessions, to discuss how best to organize arguments. Students will write informally before every class.

Attributes: AMST Critical and Cultural Theory Electives

Fall 2021

SEM Section: 01 TF 1:10 pm - 2:25 pm Christian Thorne

ENGL 119 (S) Missed Encounters (DPE)

Although we all entertain the dream of reaching directly across boundaries of personal and cultural difference, such exchanges remain inseparable from fantasies of otherness. Those fantasies can be as reductive as a stereotype, but they can also be enormously nuanced and self-revealing--as rich as literature itself. We will study the missed encounter--the encounter in which the element of presupposition and fantasy is vividly apparent--in cultural contexts from the first English accounts of the inhabitants of Virginia to race relations in contemporary African fiction; we will consider such encounters in other contexts as well, including sexual relations, the relations between young and old, even the relation between past and present. But in every case, we will keep our gaze trained on what such events tell us about the nature of fantasy and the place of fiction. The course will consider novels, drama, film, opera, and non-fiction, works such as: Coetzee, *Waiting for the Barbarians*; Harriot, "Report of the New Found Land of Virginia"; Conrad, *Heart of Darkness*; Stephen Crane, "The Blue Hotel"; Nadine Gordimer, *The Pick Up*; Herzog, "Aguirre"; Shakespeare, *Merchant of Venice*; Puccini, *Madame Butterfly*; Huang, *M. Butterfly*; Austen, *Pride and Prejudice*; Gyasi, *Homegoing*; and theoretical writing, including texts by the psychoanalytic critic, Jacques Lacan.

Requirements/Evaluation: 20 pages of writing in the form of frequent short papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken or placed out of an English 100-level class

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course fulfills the spirit of the DPE requirement by engaging diverse cultural contexts in order to explore the ways in which political, racial, and sexual identities are staked on forcible assertions of difference which at once constitute power and erode it from within. Through discussion and critical writing, students will develop analytical tools and skills to interrogate these effects of social power.

Not offered current academic year

ENGL 120 (F)(S) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Secondary Cross-listing

Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic and/or *The Tale of Genji*), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Garcia-Marquez, Toni Morrison, and/or James Baldwin), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Asghar Farhadi). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Students considering a major in Comparative Literature

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 111 (D1) ENGL 120 (D1)

Writing Skills Notes: Multiple writing assignments that build upon each other, including drafts and revisions, with substantial individualized feedback on writing from the instructor.

ENGL 123 (F)(S) The Short Story (WS)

The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

Class Format: class meetings will be devoted almost entirely to discussion

Requirements/Evaluation: grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be five formal writing assignments, totaling about twenty pages. My response to each paper will include extensive marginal comments on technical issues, and a typed page of comments on the ideas and structure of the paper as a whole. Final grades will be determined by both the student's intellectual engagement and his or her increasing mastery of the art of writing essays.

ENGL 125 (F) Theater and Politics (WS)

Cross-listings: ENGL 125 THEA 125

Primary Cross-listing

When Plato designed his ideal republic, he excluded theater from it, arguing that indulging in the charms of theatrical representation would make men poor governors of themselves and thus threaten the integrity of fledgling Greek democracies. In the twentieth-century, however, the work of younger

artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud provocatively suggested that theater itself could remedy the ills that Plato thought it aggravated by restoring to the people the productive power that the passively on-looking masses had ceded to the charisma of dictators. Today, as rapid changes in media daily transform the way in which we experience the world and understand our place within it, artists, critics, and philosophers continue to draw on the terms of historical debates about theater in attempts to understand the political significance of technologically enhanced forms of global spectatorship, asking what becomes of the traditional roles of viewers and directors on the new world-stage, in an age when revolutions are triggered by cell phone images, but advertising campaigns are also customized to consumers based on automated scans of private information like email. In this seminar, students take a historical approach to these urgent contemporary questions, analyzing the politics of theater in literature, criticism, film, and philosophy from antiquity to the present.

Requirements/Evaluation: three papers of increasing length and complexity, one of which you will revise, totaling 20 pages of finished writing, and a portfolio of interpretive questions

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 125 (D1) THEA 125 (D1)

Writing Skills Notes: The seminar includes extensive discussion of writing strategies throughout, frequent writing assignments, substantive feedback on writing assignments, and revision in response to that feedback.

Not offered current academic year

ENGL 128 (S) Reading Asian American Literature

Cross-listings: COMP 128 ENGL 128 AMST 128

Secondary Cross-listing

Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetics. This course closely reads a sampling of texts in a variety of genres and styles-produced by writers from various Asian American ethnic groups-from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"--its contradictions, heterogeneous nature, and our assumptions--and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as 'foreign' or 'alien' to the American body politic and the English-language literary tradition?" "How might Asian American writing be linked to other English-language texts in the Asian diaspora?"

Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: prospective AMST or ENGL majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENGL 130 Writing for the Humanities (WS)

Compelling academic prose is a rare beast. In this course we will investigate what makes for good academic writing and how we can produce it ourselves. We will begin with words, then progress to sentences, paragraphs, and essays. Our reading will be close, our writing closer. Topics include the following: Are adverbs incredibly important? When is less more, and when isn't it? Is your garden English, or is it Chinese? What is the "uneven U" and why does it work? How does your audience affect how you write? In addition to reading writing about writing by Orwell, Fish, Tufte, Hayot, and (inevitably) Strunk and White, we will look closely at academic prose out in the wild, both good and bad. This course is for anyone who is interested in exploring in more depth the craft of writing, whether you have always considered yourself a "good writer" or struggle to fill a single page (or both). Our focus will be on academic writing for the humanities, but the skills we will develop are relevant to many other contexts as well.

Requirements/Evaluation: Regular attendance and active participation in class; writing assignments ranging in length from sentences to essays of varying length (500 words to 5-7 pages).

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: First- and second-year students

Expected Class Size: 12

Grading:

Distributions: (D1) (WS)

Writing Skills Notes: The course will center on explicit, in-depth discussion of writing. We will read and discuss both writing on writing, and examples of prose. Students will complete weekly writing assignments of varying lengths and degrees of formality on which they will receive feedback from the instructor with particular attention to the craft of writing; some assignments will also be shared with the rest of the class.

Not offered current academic year

ENGL 131 (F) All About Sonnets (WS)

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships--to God, Nature, art, a particular place, the State, oppressors--while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G.

Rossetti (in, of course, a sonnet)--speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state--but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

Class Format: first week in regular class meetings, followed by weekly tutorial meetings in pairs

Requirements/Evaluation: five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or "prose sonnets;" thoughtful participation in tutorial meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner's paper. Regular sonnet paraphrases and or "prose sonnets" that will be critiqued for linguistic precision and succinctness.

Not offered current academic year

ENGL 132 (F) Black Writing To/From/About Prison (DPE) (WS)

Cross-listings: WGSS 132 ENGL 132

Primary Cross-listing

This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. The primary project in this course is the development of open letter writing skills. This epistolary form allows both for the intimate engagement of individual, familiar contact and the deft inclusion of targeted eavesdroppers in order to raise the consciousness of listeners and affirm the value of personal relationships. Course texts will include letters to and from prison; documentaries; selections from anthologies like *If They Come in the Morning* and *Captive Genders: Trans Embodiment and the Prison Industrial Complex*; autobiographies like that by Malcolm X, Walidah Imarisha, and Assata Shakur; poetry by Ericka Huggins, Huey Newton, and Terrance Hayes; and critical interventions by scholars like Nikki Jones, Victor Rios, Michelle Alexander, and Angela Davis. We will also look at contemporary groups organizing around abolition and prisoner support including Critical Resistance, Photos From Solitary, and TGIJP (Transgender Gender Variant Intersex Justice Project).

Class Format: discussion, engagement with guest speakers, engagement with Special Collections

Requirements/Evaluation: four open letters developed with critical feedback (4-5 pages), a twice weekly question diary, an organization report and presentation, a collectively decided project

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 132 (D1) ENGL 132 (D1)

Writing Skills Notes: Open letters are a mainstay of black literature allowing for intimate engagement of the individual and the deft inclusion of targeted eavesdroppers to raise the consciousness of listeners and affirm the value of personal relationships. Students will learn to write letters with purpose to facilitate a felt relationship to the topic; enhance writing skills including achieving clarity and aesthetic value; practice curation of references. Four 5-page letters with rigorous feedback to sharpen form.

Difference, Power, and Equity Notes: This class studies the historical development of mass incarceration of black folk from its roots in American slavery and white supremacist policy. This class also studies the impact of the prison industrial complex on transgender and queer folk in reproducing

gender binaries and sexual abuse in and outside prison walls. The politics of prison abolition and gender self determination present critical interventions into the hegemonic structures of normalized racial dominance and gender oppression.

Not offered current academic year

ENGL 133 (F) Shakespeare's Uncertain Ends

We've come to expect that the heroes of Shakespeare's tragedies learn something. *Othello*, *Lear*, *Hamlet*, *Macbeth*, and all the others, are supposed to achieve some kind of clarifying self-knowledge as a reward for their terrible suffering. After all, the heroes' flaws are revealed and their delusions are exposed so that they can eventually understand what has happened to them and why. They are meant to learn from their suffering. Or so we'd like to think. But the plays don't always cooperate with our desire for some compensating enlightenment. We don't always come away with a clear sense that Shakespeare's tragic heroes have arrived at a true self-recognition; in other words, they don't always fully grasp how their fate is implicated in their character. Nor are we granted an obvious, edifying moral to compensate for the misery we witness. What, then, do we discover at the end of a Shakespeare tragedy?

Requirements/Evaluation: three essays (two 5-page essays and one 10-page essay), short writing assignments, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 135 (F) Vengeance

For almost three thousand years revenge has been a central preoccupation of European literature. Revenge is inviting to literary and dramatic treatment partly because of its impulse towards structure: it traces a simple arc of injury and retaliation. A injures B, and B retaliates against A. But retaliation is never easy or equivalent, and there is always a volatile emotive mixture of loss and grievance that stirs up ethical ambiguities that are seldom resolved. Vengeance also fascinates because it is so paradoxical. The avenger, though isolated and vulnerable, can nevertheless achieve heroic grandeur by coming to personify nemesis. And yet the hero is always contaminated by trying to make a right out of two wrongs--and he usually has to die for it. Driven by past events, cut off from the present, and wrapped up in stratagems for future reprisals, the avenger's actions are almost always compromised by impotence or excess. At best, revenge is "a kinde of Wilde Justice"--a justice that kills its heroes as well as its villains. We will look at as many stories of vengeance, across as wide a range of cultures and media, as possible. Readings will include Sophocles' *Electra*, Dante's *Inferno*, Shakespeare's *Hamlet* and *The Tempest*, Chaldeon de Laclous' *Dangerous Liaisons*, and Vonnegut's *Slaughterhouse Five*, as well as several short stories and films.

Requirements/Evaluation: two 5-page essays; one 10-page essay; several short response essays; 10% of grade is on participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 136 (S) Slavery and the Making of a Literary Tradition

Cross-listings: AFR 136 ENGL 136

Primary Cross-listing

How has the subject and iconography of slavery continued to preoccupy the American literary and cultural imagination? In this course, we will examine the transatlantic circulation of ideas regarding race, nation, citizenship, self-mastery, agency, and freedom in colonial and antebellum America and

consider how these debates have continued to the present. We will read such authors as Phyllis Wheatley, Harriet Jacobs, Harriet Wilson, William Faulkner, Mark Twain, and Toni Morrison. Forms will include poetry, slave narratives, novels, advertisements, broadsides, pamphlets, and other ephemera. We will also view cinematic representations of slavery, such as WGN's *Underground*, the adaptation of Solomon Northrop's *12 Years a Slave*, and Issa Rae's parody "Due North" in *Insecure*.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages

Prerequisites: first-year students who have not taken or placed out of a 100-level ENGL course

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 136 (D2) ENGL 136 (D1)

Not offered current academic year

ENGL 138 (S) What is a Self? Investigations in Literature, Philosophy, and Psychology (WS)

The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what is a self? Is it the unchanging essence of who we are as individuals? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and scientists have argued in their own different ways more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it (even escape it!). Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we'll study include: Tim O'Brien's *The Things They Carried*, Toni Morrison's *Beloved*, and theoretical writings on the self by Plato, Thoreau, and Jean-Paul Sartre among others. We'll even try our hand at meditation, while learning about the Buddhist idea of "no self." Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four essays totaling 18-20 pages; active class participation; participation in other short writing assignments (there will be lots of free writing!)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four essays (ranging in length from 4-6 pages long) in multiple drafts, adding up to 18-20 pages total. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

ENGL 139 (S) Living a Feminist Life (DPE) (WS)

Cross-listings: COMP 139 ENGL 139 WGSS 139

Primary Cross-listing

The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, *Living a Feminist Life*, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmes' lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's *A Small Place*, Audre Lorde's *Sister Outsider*, Djamilia Boupacha's memoir, Ana Lily Amirpour's film *A Girl Walks Home Alone at Night*, Sara Ahmed's *Living a Feminist Life*, Valerie Solanas's *SCUM Manifesto*, and bell hooks's *Teaching to Transgress*. In their

writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

Requirements/Evaluation: five short written assignments and one final research project

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 139 (D1) ENGL 139 (D1) WGSS 139 (D1)

Writing Skills Notes: This course will center writing and research skills with at least one session per week devoted to ladder development and revision. Five short papers (3-4 pages) with one revision (5-6 pages) as well as a bibliography and final research paper (12-15 pages).

Difference, Power, and Equity Notes: This course will examine the generative intersectional site of feminism, antiracism, and anticapitalism to provide an alternative introduction to feminist thought, writing, and practice. The syllabus centers women and femme writers of color.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 140 (F) Introduction to Creative Writing: The Short Story

This course introduces students to the art of fiction writing through the crafting of short stories. Students sharpen their tastes and inclinations by reading and responding to short stories from significant contributors to the form. The writing exercises and overall course trajectory are designed to build a writing community in order to facilitate a better understanding of students' own writing processes. Individual conferences with the instructor are a central part of the course.

Requirements/Evaluation: though students will be required to produce at least 30 mixed-genre pages, this is not a WS class, because of its emphasis on creative rather than critical writing

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken a creative writing course; students who received an AP 5 in Literature are eligible

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL Creative Writing Courses

Fall 2021

SEM Section: 01 TR 9:55 am - 11:10 am Ricardo A Wilson

ENGL 146 (S) Campus Life: The University and the Novel

What is college for? To a significant number of writers from roughly 1945 onward, one answer seemed to be: college is the perfect setting for a novel! The Campus Novel, as it is known, mines the rich, frequently zany dramatic terrain that emerges when large groups of young people try to live and learn together in a closed environment. Filled with the absurdities of academic and collegiate life, the scholarly and sexual intrigues of the college campus, Campus Novels also are microsociologies of college: not just reflections *of*, but reflections *upon*, the institutional contexts of the American university. This course will introduce students to the Campus Novel (and its cousin, the Campus Movie), as a way to explore the history and meaning of liberal arts education in the American University from roughly the post-World War II emergence of mass higher education through co-education, multiculturalism, and the rise of the corporate university. Fictional lab reports upon experiments in living, works dedicated to figuring out what and whom a liberal arts education is for, these novels will be our own guides to an exploration of these questions. Likely texts: Amis, *Lucky Jim*, McCarthy, *The Groves of Academe*, Delillo, *White Noise*, Donna Tartt, *The Secret History*, Zadie Smith, *On Beauty*, Dave Eggers, *The Circle*, and films such as

Breaking Away, School Daze, and The Social Network.

Requirements/Evaluation: four to five essays, totaling approximately 20 pages, regular and substantial contributions to our collective inquiry in the seminar room

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 147 (S) Buddhist Literature

Cross-listings: ENGL 147 ASIA 133 REL 133 ASST 133

Secondary Cross-listing

This course introduces students to the diverse literary culture of Buddhist Asia. Through close readings of particular influential Buddhist texts, we will analyze not only what the texts say and mean, but also learn about the "social life" of these texts--i.e., what is the socio-historical context of these texts, who are the intended audience, what is the relationship of these texts with their particular communities, how do these communities engage with their texts, including how texts have been translated, taught, worshipped and ritualized. We will also explore the materiality of these texts, which is as diverse as the languages in which these texts are written. Alongside an exploration of materiality requires that we reflect on what counts as "text". Moreover, by sampling different genres of Buddhist texts (e.g., philosophical, historical, narrative, grammatical, cosmological, astrological, magical), we will discuss what makes them Buddhist and what makes them literary. The Lotus Sutra, the Heart Sutra, the *Dhammapada*, and Vessantara Jataka are just some of the texts we will study in this course. No prior knowledge about Buddhism is required.

Requirements/Evaluation: Attendance and active participation 20%; Short writing assignments 25% (i.e., a one-page, single-space, critical response based on the class reading x 5 total); Mid-term exam (in-class: identification terms and short essay) 25%; Final project and presentation 30% (the final grade includes initial consultation with the instructor regarding topic selection, annotated bibliography, project outline, final presentation, and final written report).

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: REL, ASST, and ENG majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 147 (D2) ASIA 133 (D2) REL 133 (D2) ASST 133 (D2)

Not offered current academic year

ENGL 150 (S) Expository Writing (WS)

Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande's bestselling book, *The Checklist Manifesto*. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The majority of the readings for this course will be literary essays, mostly contemporary, mostly American.

Requirements/Evaluation: required work includes: five papers totaling at least 20 pages; timely participation in drafts, revisions and peer-editing; evaluation partly based on improvement and effort

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course is devoted to the study of writing, focusing especially on expository essays. Five papers are assigned, totaling at least 20 pages. Special attention will be paid to drafts, revision and building peer editing skills.

Spring 2022

SEM Section: 01 MWF 8:30 am - 9:45 am Cassandra J. Cleghorn

ENGL 151 (S) Reading and Writing Science Fiction (WS)

This course will explore some of the themes and techniques of modern science fiction by examining a range of published stories, while at the same time making some new stories of our own. Writers of fiction and non-fiction often watch each other with suspicion, as if from opposing sides of an obvious frontier. Though the goals of both forms of writing--the disciplined articulation of brainy thoughts and mighty feelings--are similar, there is a tendency in both camps to think their methods different and exclusive. The conceit of this class is to imagine that constructing a plot and constructing an argument, say, are complementary skills, and that the tricks and techniques of one type of writing can profitably be applied to the other. With this in mind, the class is made of two strands twisted together--a creative writing workshop and a course in critical analysis. There will be short weekly assignments in both types of writing, as well as two larger projects: an original science fiction short story and an interpretive/analytical essay. The assigned readings will come from an anthology of very recent work by younger writers. One of the most exciting developments in modern science fiction is the assimilation into the mainstream of formerly marginalized voices--queer, trans, Black, Asian, Native American--and our reading will reflect that trend.

Class Format: discussion

Requirements/Evaluation: active participation in class and a lot of writing, both critical and creative; two 12- to 20-page writing assignments (short story and analytical/interpretive essay), with revisions; half-dozen shorter writing assignments, plus written responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course will require two long writing assignments, twelve to twenty pages, one critical and one creative, each of which will go through an extensive revision process. In addition, I will assign a half-dozen shorter assignments of both types (critical and creative) and single-page critical responses to all workshoped assignments, for a total of thirty or so pages of required writing. A crucial component of the course will be its attention to writing style, strategy, and organization.

Attributes: ENGL Criticism Courses

Spring 2022

SEM Section: 01 MWF 12:00 pm - 12:50 pm Paul C. Park

ENGL 152 (F) Family Matters: Family in Recent American Fiction (WS)

"Anyone who has survived childhood has enough material to write for the rest of his or her life" (Flannery O'Connor). A course designed to explore the representations of family in recent American literature. Family is our first community, and in the literature of family one commonly accepted convention emerges: family members are morally bound to one another. These bonds of blood, both liberating and limiting, have always been a literary convention. In this course, we will examine recent American fiction that explores such bonds. What do such narratives claim we want from our families? What do such narratives claim we're willing to do to get it? Have recent narratives developed particular and characteristic strategies for approaching this topic? And are there importantly particularizing aspects of the American family? The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of

the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature. Authors to be considered may include: Kali Fajardo-Anstine, Danielle Evans, Rick Moody, Junot Diaz, Amy Hempel, ZZ Packer, Lorrie Moore, Gish Jen, Cormac McCarthy, Edward Jones, among others.

Requirements/Evaluation: Active participation, written and verbal comments on published and peer work, the leading of one class discussion, five essays (2-7 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: First Year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Five essays ranging from 2-7 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they'd like. Students will also comment (verbal and written) on published work and their peers' drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

Fall 2021

SEM Section: 01 TR 8:30 am - 9:45 am Karen L. Shepard

SEM Section: 02 TR 9:55 am - 11:10 am Karen L. Shepard

ENGL 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: STS 153 ENGL 153

Primary Cross-listing

In this expository writing course, we will analyze and argue about how near-human and partly human bodies appear in fiction and film. When do these bodies improve the spaces in which they appear? When do they threaten them? How are they gendered, how are they raced, and why? What do they desire? Authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in different ways. Together we will develop our ideas on these topics in clear, strong prose. We will also ask how artists have cast human identities into foreign materials and media, and study the distortions and revelations that result. During museum visits at WCMA, students will use examples of self-portraiture, electrified bodies, and aspirational bodies to explore the representation, imitation, and abstraction of selves. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: five response papers (500 words); four essays (1200-1500 words, each in two drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153 (D2) ENGL 153 (D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written work. Students write five response papers and four five-page essays (in two drafts) over the course of the semester, receiving substantial instructor feedback on all. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Not offered current academic year

ENGL 154 (F) Imagination and Authority

A course on the subject of who gets to write about what when it comes to fiction. Among the questions we'll be taking up: What are the outer boundaries of those imaginative acts that should be attempted? The central goal of this course is to teach you how to write a well-argued and

interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, this is also a literature class, designed as well to prepare you for upper level courses in the English Department.

Requirements/Evaluation: four to five papers totaling at least 20 pages; revisions, student teaching, written and oral comments, final portfolio

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 155 (S) Contemporary Mexican Cinema and the World (WS)

Cross-listings: ENGL 155 COMP 155

Primary Cross-listing

This expository writing course is grounded in an exploration of contemporary Mexican cinema and develops students' ability to critically write about film. We will focus on feature-length films, documentaries, and short films that not only grapple with Mexican history and identity but also those that travel beyond the borders of Mexico. The list of directors whose work will be considered includes Natalia Beristáin, Alfonso Cuarón, Jonás Cuarón, Guillermo del Toro, Alejandro González Iñárritu, Alejandra Márquez Abella, Kenya Márquez, Jorge Pérez Solano, and Patricia Riggen.

Requirements/Evaluation: Active participation, written and verbal comments on peer work, five papers (including one revision)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 155 (D1) COMP 155 (D1)

Writing Skills Notes: Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Attributes: LATS Countries of Origin + Transnationalism Elect

Spring 2022

SEM Section: 01 TR 9:55 am - 11:10 am Ricardo A Wilson

ENGL 156 (S) New American Fiction (WS)

The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American fiction, examining the very, very recent (last thirty years) developments in American fiction. We will read short stories and novels by writers such as Danielle Evans, George Saunders, Kali Fajardo-Anstine, Mary Robison, Karen Russell, ZZ Packer, among others.

Class Format: This course will be fully remote and structured as a seminar/tutorial hybrid. We'll mix whole-group meetings with small group sessions of 4 students.

Requirements/Evaluation: Active participation, written and verbal comments on published and peer work, five essays (2-5 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: First-Year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Five essays ranging from 2-5 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they'd like. Students will also comment (verbal and written) on published work and their peers' drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

Not offered current academic year

ENGL 157 (F) Reading the 'Inferno' (WS)

This is an expository writing course, but also a journey through hell---more precisely, through Dante's Inferno. Over the course of the semester, as we wind our way through the underworld, we will consider the circumstances of the damned, their guilt, their punishments, and the overall aims of Dante's extraordinary vision. How and why are the condemned sentenced to an eternal afterlife in this underground kingdom of cruelty? What are we to make of the poem's humor and malevolence, and how are we to understand its vast architecture? In writing about the fate of these sins and sinners we will focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Requirements/Evaluation: four short 3-page essays and one 6- to 8-page essay

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing course. I plan on assigning series of three-page essays, one every other week, as we work our way through Dante's Inferno at the rate of three or four cantos per week. These shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. This should provide sustained and structured feedback to the students. A final extended essay of six to eight pages will be required.

Not offered current academic year

ENGL 158 (S) Expository Writing: Contemporary Linked Stories (WS)

In this expository writing and writing intensive course, we will read and write about several collections of linked short stories about altered states of mind and body, immigrant experiences, and the magic of everyday life. We will examine linked stories as a form organizing narratives that *can* stand alone, but that resonate powerfully with one another, sharing themes, settings, and sometimes even characters. Texts may include Denis Johnson's *Jesus' Son*, Jumpa Lahiri's *Interpreter of Maladies*, Junot Díaz's *Drown*, Helen Oyeyeme's *What Is Not Yours Is Not Yours*, Carmen Machado's *Her Body and Other Parties*, Amy Bonnaffons's *The Wrong Heaven*, and Ruth Joffe's *Night Beast*. Class time will be split nearly equally between analysis of the assigned texts and active work with student writing including freewriting, rewriting, sentence and paragraph workshops, peer editing, and writing strategy sessions.

Class Format: This course will meet remotely in Spring 2021

Requirements/Evaluation: 4 or 5 two-page papers, two with required revisions; 4 five-page papers, all with required revisions; discussion participation; attendance.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: First preference goes to first-year students who have not received a 5 on AP LITERATURE or a 6 or 7 on the IB. Additional rules via English Department Website.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course is dedicated to the teaching of college-level expository writing. Students will complete several assignment sequences that build from 2-page response papers to 5-page argumentative essays and that include required revisions at multiple stages. About half the class time will be spent discussing and practicing writing strategies and mechanics.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 161 (S) Metafiction (WS)

Cross-listings: ENGL 161 COMP 161

Primary Cross-listing

This course will examine ways in which literary works reflect on their status as texts. We'll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Kelly Link, Paul Park, and others. Ultimately, we will use the study of metafiction to focus our inquiry into the socializing force of self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in their assigned writing.

Requirements/Evaluation: several short exercises; four or five papers of increasingly complexity, totaling 22 pages; consistent attendance and participation; a love of reading, and a willingness to reread

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; sophomores

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 161 (D1) COMP 161 (D1)

Writing Skills Notes: Students write five essays with considerable feedback from the instructor.

Spring 2022

SEM Section: 01 TR 9:55 am - 11:10 am Shawn J. Rosenheim

ENGL 162 (F) Robots, Puppets, and Dolls (WS)

Is Pinocchio alive? How about the Terminator, or the operating system in *Her*? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automata and cyborgs) and what they suggest about human identity, independence, and free will. We'll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects). Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for many real people?

Requirements/Evaluation: students write five essays over the course of the term, in addition to a number of ungraded but required exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The course requires frequent and serious written work: six exercises, and five essays of between 750 and 1500 words, over the

course of the semester. All the essays receive letter grades. All of the essays receive written comments addressed to their design and execution.

Not offered current academic year

ENGL 165 (F) STAGING AMERICAN BLACKNESS (WS)

American blackness may be theatrical, or it may be the subject of theatrical productions. How performances of blackness may or should be perceived and how or whether they pertain to people defined as African American remain perpetually fraught questions. This course will examine various modes, works and performances that address American blackness, including minstrelsy, novels, plays, stand up comedy, and cinematic works. The authors will include Amiri Baraka, Toni Morrison, August Wilson, Ntozake Shange, Suzan-Lori Parks, Spike Lee, Jordan Peele, and Richard Pryor.

Requirements/Evaluation: The writing assignments will be two short papers of 5 to 7 pages and a final paper of 15 pages. Students will be expected to attend regularly and to participate in class discussions.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four essays (ranging in length from 3-6 pages long) in multiple drafts, adding up to 16 pages total. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2021

SEM Section: 01 TR 11:20 am - 12:35 pm David L. Smith

ENGL 201 (F) Shakespeare

One of Shakespeare's most original recent readers has claimed, "Nothing without, perhaps nothing within, Shakespeare's words could discover the power to withstand the power Shakespeare's words release." To put it another way, this was a writer who created something so new, so unfathomable, that neither life nor language could easily contain it. In this course, we will become acquainted with Shakespeare's major works, but we will also remain alert to their capacity to confound. Serious attention will be given to genre, form, the historical conditions of the Renaissance theater and book trade, modes of literary transmission, and the shape of Shakespeare's career. Plays will include *A Midsummer Night's Dream*, *Romeo and Juliet*, *Henry IV, Part I*, *Hamlet*, *King Lear*, *Antony and Cleopatra*, and *The Tempest*. We will also read the *Sonnets*. The course is designed to offer a first encounter with Shakespeare, but more advanced students are welcome too.

Requirements/Evaluation: Three-page paper, seven-page paper, short analytical exercises, midterm exam, final exam, thoughtful participation in class discussion

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: English majors and prospective English majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL Literary Histories A

Not offered current academic year

ENGL 202 (F) Modern Drama

Cross-listings: THEA 229 ENGL 202 COMP 202

Secondary Cross-listing

An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, *Hedda Gabler*; Wilde, *The*

Importance of Being Earnest, Chekhov, *The Cherry Orchard*; Pirandello, *Six Characters in Search of an Author*; Brecht, *Mother Courage*; Miller, *Death of a Salesman*; Beckett, *Waiting for Godot*; Hansberry, *A Raisin in the Sun*; Pinter, *Betrayal*; Churchill, *Cloud Nine*; Stoppard, *Arcadia*.

Requirements/Evaluation: Two 5-page papers; regular short responses and discussion board postings; and active participation in class discussions.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Theatre, English, and Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is strongly recommended for any students majoring in Theatre.

Distributions: (D1)

ENGL 203 (F) The Uses of Shakespeare

The plays of Shakespeare have a performance history that is exceptionally rich and strange. In this course we will read several of the plays and look at some of the ways they have been re-imagined and restaged. We will consider the origin of the plays as popular entertainment--competing for an audience against bear-baitings and public executions. We will consider their transformation into canonical texts and their de-canonization in parodies like Dogg's Hamlet and Drunk Shakespeare. Among the works we will read and watch are Twelfth Night, Shakespeare Behind Bars, Hamlet, Rosencrantz and Guildenstern are Dead, Rosencrantz and Guildenstern are Undead, The Merchant of Venice, To Be or Not to Be. Assignments will include analytical essays and creative adaptations in a variety of media.

Requirements/Evaluation: three 6-8 page papers, in-class presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 204 (S) Hollywood Film

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, *12 Years a Slave* and *Get Out*.

Requirements/Evaluation: Two 2-page essays, two editing exercises, a midterm, and a final exam

Prerequisites: None

Enrollment Limit: 60

Enrollment Preferences: English majors

Expected Class Size: 60

LEC Section: 01 MWF 11:00 am - 12:15 pm James R. Shepard, John E. Kleiner

ENGL 205 (F) The Art of Poetry: The History and Theory of Lyric (WS)

"If I read a book and it makes my whole body so cold no fire can ever warm me I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only way I know it. Is there any other way?" This excerpt from a letter by Emily Dickinson indicates both the particular pleasures of reading poetry, and also the persistent difficulty of defining poetry as a genre. In this course, we will train our focus on lyric poetry in particular, tracing its long history as well as trends in the theory of lyric. We'll begin by uncovering the roots of lyric in antiquity before shifting our focus to the development of lyric in English. We'll read closely the work of such poets as Wyatt, Donne, Wordsworth, Keats, Hopkins, and Dickinson before turning to questions of lyric in the 20th and 21st centuries. Along the way, we'll examine the trends in criticism responsible for the conflation of lyric and poetry in our time, and will get a strong sense of the current state of lyric theory.

Requirements/Evaluation: frequent short writing assignments totaling 20+ pages, thoughtful participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Frequent informal writing assignments and two formal papers: one (5-7 pages) due at the midterm, and one final paper (10-12 pages), in preparation for which students will submit a proposal and meet with the professor as their research develops. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 208 (S) Designer Genes (DPE) (WS)

Cross-listings: WGSS 208 ENGL 208 STS 208 AMST 206

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Two short analysis papers (4-5 pages), digital humanities Story Map assignment/art analysis, discussion posts (5 pages),

short presentation, longer final researched paper/project (8-10 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's, Gender, and Sexuality Studies, American Studies, English majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

WGSS 208 (D2) ENGL 208 (D1) STS 208 (D2) AMST 206 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts; two four-to-five-page graded papers; one descriptive digital assignment (the Story Map); and a final researched paper (8-10 pages)--written in stages. Students receive critical feedback on written assignments through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next.

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics' case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

ENGL 210 (F) American Modernism (WS)

Modernism in art lasts from about 1850 until about 1950; this course focuses on American fiction centering on the 1920s. Texts in the course run from the familiar (Cather, Fitzgerald, Hemingway) through the difficult (Faulkner), very difficult (Jean Toomer), and impossible (Gertrude Stein); but we'll learn how to read them all. Even the familiar texts turn out to be stylistically experimental, and experiments in style, in every case, are linked to novel conceptions of religion (especially Hemingway, Fitzgerald), race or ethnicity (Faulkner, Toomer), and gender (Cather, Hemingway, Stein); most of our texts interrelate all of these concerns. After the Great War, the urgency of questions of form, in relation to questions of identity, is whether the world can be redeemed by the reformation of linguistic and generic conventions.

Class Format: The course will be entirely remote by Zoom.

Requirements/Evaluation: Four papers totaling about 16 pages. Participation in class discussions will also be a factor in the final grade.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: First-year students and sophomores contemplating the English major; other English majors lacking a Gateway; American Studies majors.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be four papers, totaling about 16 pages. Papers will be read closely both for content and expression. There will be one course meeting devoted entirely to questions of style and composition.

Attributes: AMST Arts in Context Electives ENGL Literary Histories C

Not offered current academic year

ENGL 211 (S) English Literature from 1000 to1600

One of the oldest surviving works in English, *Beowulf* tells the story of a monster and his mom. In this class we will read key texts from the medieval and early modern periods, starting with *Beowulf* and ending with Shakespeare's equally bloody *Titus Andronicus*. Other readings will include selections from *The Canterbury Tales*, *Sir Gawain and the Green Knight*, sonnets by Sidney and Donne, and Marlowe's *The Jew of Malta*. We will discuss the conflicting, often self-contradictory claims that writers in these periods made for the importance of literature and the anxieties that these new types of fiction generate--about sex, about God, about money. We will ask what it meant to read--and misread--before books were commonplace.

Requirements/Evaluation: two papers (5-7 pages), midterm, final

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 15

ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build its contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We'll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of *This American Life*, *RadioLab*, *Love and Radio*, and *Snap Judgment*), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Requirements/Evaluation: Five short audio pieces; attendance and active participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The student version of Hindenburg audio software (\$95); students on financial aid will have this expense covered by the college.

ENGL 214 (S) Writing for Stage and Screen

Cross-listings: THEA 214 ENGL 214

Secondary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

ENGL 216 (S) Introduction to the Novel

There was a time when novels as we understand them didn't exist; then there was a time--centuries--when novels were overwhelmingly the dominant storytelling and literary mode in English. This course, part lecture and part seminar, will stage encounters with 7 or 8 novels, each the product of a distinct configuration of subject position, history, form, and ambition. We will move from the English novel's beginnings through (at least) the late 20th century, when novels competed for cultural space with new storytelling modes. Along the way we will think about what stories are for, generally; why this kind of long-form storytelling was invented; and what cultural work English-language novels do, have done, and may yet do. Possible writers to be studied include Samuel Richardson, Jane Austen, Charlotte Brontë, Elizabeth Gaskell, Charles Dickens, Joseph Conrad, Virginia Woolf, James Joyce, Vladimir Nabokov, Toni Morrison, Salman Rushdie, and Zadie Smith.

Requirements/Evaluation: Midterm and final exams, one critical essay, and some short writing assignments. Quizzes possible.

Prerequisites: none

Enrollment Limit: 45

Enrollment Preferences: students who have pre-registered for the course; thereafter, seniors, then juniors, sophomores, and first-years

ENGL 221 (F) A Science Fiction and Fantasy-Writing Seminar

As you might have guessed, this is a creative-writing workshop, specializing in Fantasy and Science Fiction. We are going to write a lot, and not really read so much, though from time to time we might look at the odd piece of professional work, by way of example or inspiration, or as a source for stolen goods. Mostly, though, we will be discussing (anonymously, except for the final projects) our own stuff---- original stories or sketches for stories, or various plot, character, or setting exercises. We'll write maybe five or six stories, which is a fair amount of work, although to save time I'm hoping we can keep any analysis or interpretation to a strict minimum.

Requirements/Evaluation: passing the course will require finishing and revising at least one 12- to 20-page story, as well as numerous shorter assignments and sketches

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: discretion of the instructor

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ENGL Creative Writing Courses

Not offered current academic year

ENGL 222 (S) Lyric Poetry (WS)

The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on lyrics--relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the mid-nineteenth century. Among the poets likely to be studied are: Jonson, Gray, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden, Frost, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

Requirements/Evaluation: active participation in seminar discussions, and four or five papers (about 20 pages total)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4-5 papers assigned, ranging in length from 4-6 pages, spaced evenly throughout the term. Total writing will be about 20 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences related to the papers.

ENGL 223 (S) Apocalypse Now and Then: Poets Confronting Political Crisis (DPE) (WS)

In moments of great crisis, common wisdom says to turn to the poets; where, then, do the poets turn? Tracing the history of Poetry of Witness throughout the 20th and 21st Centuries, this course explore various strategies poets have used to write about the end of the world, however that may be defined. We will read contemporary poets (such as Danez Smith, Ilya Kaminsky, Aracelis Girmay, and Solmaz Sharif) alongside 20th Century writers who were responding to the catastrophes of their own times (Paul Celan, Pablo Neruda, Gwendolyn Brooks, Bei Dao, and others). Looking backward to other times when the world seemed to be ending, this course will examine some of the strategies that poets have used to navigate writing about war, genocide, forced migration, gendered violence, climate crisis, and other dystopias. The readings we encounter will span various schools and poetic forms, from documentary poetics, to surrealism and the avant garde, to the Black Arts Movement, to speculative writing, and so on. They will be supplemented with critical texts on the political stakes of writing and reading practices by thinkers like Eve Sedgwick, James Baldwin, and Audre Lorde. This is a course that views creative writing as a valid form of critical inquiry; therefore, students will have opportunities to engage creatively with texts throughout the semester. For the final, students will have the option of either writing an analytical paper or submitting a creative project with a critical introduction.

Requirements/Evaluation: Students will write short weekly response papers, a 3-5 page midterm essay and an 8-10 page final essay. Creative options will be available in place of some of these assignments.

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: Freshmen and sophomores intending to pursue more advanced work in English; non-English majors interested in creative writing. Application may be required.

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will produce and receive feedback on short writing assignments throughout the semester. These assignments will build skills for students to write either a final comparative analysis paper or a creative project accompanied by a critical introduction.

Difference, Power, and Equity Notes: This course focuses on the interactions between political engagements and poetic craft in the 20th and 21st centuries. As such, we will discuss the interplay between artists and the popular resistance movements of their times, the effects of power on literary

forms, and the shaping of minoritarian aesthetics. Readings will center writing by poets from marginalized backgrounds whose work engages race, class, ethnicity, gender, sexuality, religion, and disability.

Attributes: ENGL 200-level Gateway Courses

Not offered current academic year

ENGL 224 (S) American Drama: Hidden Knowledge (WS)

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (*The Adventures of Pinocchio*, Machiavelli's *The Prince*, Thomas Carlson's *Lying and Deception: Theory and Practice*, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from *American* drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly papers will prompt extensive commentary. The amount of writing in the course will be substantial and well spaced, followed by timely evaluation and suggestions for improvement. The course requires multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Student will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester.

ENGL 225 Introduction to Asian American Literature: Fiction and Memoir (WS)

This Gateway is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. Likely readings include: Carlos Bulosan's *America is in the Heart* (1946); John Okada's *No-No Boy* (1957); Maxine Hong Kingston's *Woman Warrior* (1976); Chang-rae Lee's *Native Speaker* (1995); Jhumpa Lahiri's *Interpreter of Maladies* (1999); lê thi diem thúy's *The Gangster We are All Looking For* (2003); Ruth Ozeki's *A Tale for the Time Being* (2013); and Celeste Ng's *Everything I Never Told You* (2014). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective.

Requirements/Evaluation: four papers totaling about 20 pages; engaged participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading:

Distributions: (D1) (WS)

Writing Skills Notes: Four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 226 (S) The Irish Literary Revival

This course will focus on the Irish Literary Revival of c.1885-1920, during which Irish literature in the English language became firmly established as a canon clearly separate from the English tradition, and writers such as W.B. Yeats and James Joyce achieved international renown. Readings will include drama, poetry, fiction and non-fiction prose by Yeats, J.M. Synge, Joyce, George Moore, George Bernard Shaw, Lady Gregory, Douglas Hyde, Sean O'Casey and others. We will foreground key fault-lines of the period: competing visions of what constituted "authentic" Irish identity; debate over the propriety of writing in English, drawing on British literary traditions, or seeking a non-Irish audience; the work of "self-exiles" such as Shaw and Joyce, versus that of writers who stayed in Ireland; and the long-entrenched political tensions between Catholics and Protestants, and Unionists and Nationalists. Throughout, we will consider the functions and efficacy of literature in promoting cultural or political change. The course will conclude by considering the extraordinary vitality of post-independence and contemporary Irish literary culture, with readings of work by Seamus Heaney, Colm Toibín, Anne Enright and Martin McDonagh, and discussion of recent Irish film. Key considerations here will be the ways traditional notions of Irish Nationalism and national identity have been revised or abandoned under the impact of independence, economic prosperity and globalization, contemporary sexual politics and other forms of change.

Requirements/Evaluation: four 4+ page papers, and several shorter writings assignments; class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: English majors

Expected Class Size: 19

ENGL 227 (F) Elegies (WS)

This tutorial explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900--including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists--Owen, Yeats, Auden, Lowell, and Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by Joyce ("The Dead") and Nabokov ("Spring in Fialta").

Class Format: This course will meet remotely. Tutorial pairs will meet for an hour each week with the instructor, using Zoom or Google Meet.

Requirements/Evaluation: Active participation in tutorial meetings. Students will write a 4- to 5-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 10

Enrollment Preferences: Sophomores, but juniors and seniors are also welcome.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: All tutorials (at least in English) are by definition Writing Skills courses. Students will write either the main paper or a response critique in alternate weeks. Students will also have the opportunity to revise.

ENGL 228 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: ENGL 228 COMP 230

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: First- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 228 (D1) COMP 230 (D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

ENGL 229 (S) Contemporary American Fiction

Cross-listings: ENGL 229 AMST 230

Primary Cross-listing

In this course we will read and analyze a selection of fiction written between 1945 and the present, with an emphasis on proving (in the sense of testing) the three terms in the course title. Could John Cheever's "The Enormous Radio" really be contemporary? Is James Baldwin's *Giovanni's Room* American in the same way as Alice Munro's *Dear Life*? And is Michelle Tea's *Black Wave* fiction or something else? Along the way, we'll also ask: What forms and themes define contemporary American fiction? And why should we invest in defining the "contemporary" period at all? Other authors we will study may include: Raymond Carver, Thomas Pynchon, Toni Morrison, Renata Adler, Margaret Atwood, Lydia Davis, Chang Rae Lee, Jennifer

Egan, and Colson Whitehead.

Requirements/Evaluation: four papers totaling about 20 pages; participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 230 (F) Introduction to Literary Theory (WS)

Cross-listings: COMP 240 ENGL 230

Primary Cross-listing

This course introduces students to some of the most significant and compelling trends in modern criticism—such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can *Othello*, for instance, be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.

Class Format: discussion

Requirements/Evaluation: frequent short papers totaling 20 pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: MAST 231 ENGL 231

Secondary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and

time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

ENGL 232 (S) We the People in the Stacks: Democracy and Literatures of Archives

Cross-listings: LATS 232 ENGL 232

Secondary Cross-listing

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." --Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives--their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

Requirements/Evaluation: attendance and class participation, short writing exercises, midterm project, final creative project

ENGL 233 (S) Great Big Books (WS)

Cross-listings: COMP 293 ENGL 233

Primary Cross-listing

Some of the greatest novels are really, really long—so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: *War and Peace* (1869), Leo Tolstoy's epic of the Napoleonic Wars, and *Parade's End* (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

ENGL 234 (F) The Video Essay

While people today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think *with* the medium, exploiting the resources of film and video in their efforts to understand how these media work on viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in the use of Adobe Premiere Pro, students will spend the term alternately making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required. Note that the course meets entirely online.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner. All meetings will be online.

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays.

Prerequisites: permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: sophomores; first-year students; English majors

ENGL 236 (F) Fields of Barley, Streets of Gold: Utopia in Fiction (WS)

Each of the gates was a single pearl: And the street of the city was pure gold, As it were transparent glass. Revelations 21:21 It makes us happy to imagine the future in apocalyptic terms, partly because we love to say I told you so. You didn't listen, and now look. Fort Lee is on fire, and zombies are smashing down your parents' door. Catastrophe satisfies us on many levels; by contrast, the utopian vision provides a more delicate thrill. For a writer, the task is to provide a fiction that will not feel like a moral lesson or the illustration of some theory about how we should behave. This course will consider different utopian stories in a vaguely chronological sequence: Classical Era, Renaissance, Enlightenment, and then moving through the 19th and 20th centuries, and then into modern science fiction. You'd be right if you think this sounds as if I haven't yet finalized the list, but it will include familiar and unfamiliar names--Plato, More, Bacon, Campanella, Fourier, Bellamy, Skinner, LeGuin, Bisson, Kim Stanley Robinson, and various Afro-Futurists. Mostly you will be reading (or else listening to the instructor describe) excerpts and summaries rather than full texts, as utopian visions are often quite long and we want to consider large numbers of them. The emphasis in this class will be on writing rather than reading. Most assignments will consist of either sketching out or actually writing a short story set in one of these imagined worlds, a story that would serve as a critique. In addition, as a final project, students will invent a personal utopia and present it to the class.

Requirements/Evaluation: You will be graded on the basis of class participation, plus ten short written assignments and two longer ones. The instructor will require revisions on the longer assignments in order for you to receive a grade.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: If the course is over-enrolled, I will give preference to seniors, then juniors, then sophomores.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course will involve weekly writing assignments of perhaps three pages each as well as two longer pieces of perhaps 15 pages each. In total, I hope, not more than sixty pages per student. The shorter assignments will consist of a page or so of commentary on a piece of utopian writing, and a scene-by-scene sketch for a story set in it that illustrates that commentary or critique. The larger projects are (1.) a full rendering of one of those sketches and (2.) your own utopian vision.

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

ENGL 239 (F)(S) Zen and the Art of American Literature

Cross-listings: REL 228 ENGL 239 AMST 238

Primary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, *A Tale for the Time Being*. And we'll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the

course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week). No prior experience with meditation is necessary. Just an open mind.

Class Format: This will be a lecture class, with little to no time in-class for discussion. To create opportunities for conversation and discussion, I will offer a substantial number of office hours each week as well as small discussion group meetings (of 15 students each) every other Sunday (the discussion group meetings will be optional).

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: short reading responses and free-writing exercises for each class meeting, a 3-4 page midterm essay and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 85

Enrollment Preferences: Students who preregister should fill out an expression of interest form at <https://tinyurl.com/ZenAmLitSpring2022> by Nov. 9. Preference will first go to students dropped from the Fall 2021 section of ENGL 239 and then by class year (seniors first).

ENGL 240 (F) What is a Novel?

Cross-listings: COMP 239 ENGL 240

Primary Cross-listing

What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory--too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. Novelists will come from the 19th and 20th centuries, likely Austen, Dickens, and Mieville. Theorists are likely to include Henry James, Benjamin, Lukacs, Barthes, Watt, McKeon, Jameson, Eve Sedgwick, Edward Said, Leo Bersani, and Franco Moretti.

Requirements/Evaluation: four to five papers totaling about 20 pages; regular, substantial, and intensive participation in class

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 241 (S) Introduction to Comparative Literature

Cross-listings: ENGL 241 COMP 110

Secondary Cross-listing

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Western and Eastern Europe, Asia, and Latin America; and media including prose fiction, graphic memoir, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lermontov, Zola, Borges, Wilde, Mamet, Bechdel, and others. *All readings will be in English.*

Requirements/Evaluation: attendance, participation, two 5-page papers, a few short responses, midterm exam

ENGL 242 Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing (DPE) (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one's way into Whitman's radical uncertainty. These articulations of knowing and unknowing, of telling and untelling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

Requirements/Evaluation: Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: potential sophomore English majors have first choice, then prospective or current American Studies majors

Expected Class Size: 19

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will be paid to drafts and revisions of essays.

Difference, Power, and Equity Notes: The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

Not offered current academic year

ENGL 244 (F) Interpreting Film (WS)

From the earliest days of narrative film, it was clear that the new medium enjoyed an unparalleled capacity to absorb spectators in the sheer passive enjoyment of the cinematic spectacle, so for many viewers cinema has seemed naturally to be a form of entertainment rather than an art form or a medium for exploring ideas. But not only have entertaining "movies" and artistic "films" always co-existed amicably, but in many cases have coincided: some of the greatest works of cinematic art first billed themselves unassumingly as enjoyable diversions. In order to appreciate the aesthetic and intellectual richness of such films, one must learn to "read" their crucial scenes closely, analyzing their visual and auditory language as well as their dramatic content, and must learn to interpret their surprisingly complex larger patterns of thought. This tutorial offers concrete training in both of these skills. During the first four weeks, students will write and discuss short weekly papers analyzing key sequences of a film, learning to identify diverse cinematic effects in order to illuminate dramatic patterns. During the last six weeks of the semester each student in a tutorial pairing will write a longer interpretive paper in alternate weeks, learning to construct fuller arguments addressing the whole of a film. Most films will be drawn from classical Hollywood cinema of the 1930s and 1940s, but we will also study European, Indian, and Japanese films. Readings during the first part of the semester will concern technical features of cinema; later readings will address larger interpretive issues (e.g., patterns in film genres, such as the nature of the gangster as a tragic hero; or social issues reflected in films, such as the newly empowered roles of women during the early 1940s and their influence in shaping the dangerous heroines of film noir).

Requirements/Evaluation: six short (2- to 6-page) papers and three short responses to one's partner's paper, totalling 25 pages of writing; active, sustained participation in tutorial discussions

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 10

Enrollment Preferences: sophomores and first-year students who have satisfied or placed out of the English Department's 100-level prerequisite

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Tutorial--constant writing and critique. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 245 (S) Blackness and Visual Expression

This course will examine how blackness has been represented in visual media. Beginning with 19th century examples, we will examine representations associated with slavery and minstrelsy. In particular, we will consider paintings by artists such as Winslow Homer, Thomas Eakins, and Henry O. Tanner, alongside racial representations in popular media, such as newspaper editorial cartoons and book illustrations. Moving across the range of the 20th century, we will examine various visual media, including painting, photography, theater, costume design, fashion, advertising, and film. Films such as *Cabin in the Sky*, *Stormy Weather*, *Bingo Long's All Stars*, *Shaft*, and *Harlem Nights*, as well as recent movies, including *The Black Panther* and *Get Out* exemplify various imaginative revisions of racial conventions. Students will be expected to participate actively in the classroom and in group projects. Some of this material will be covered by student presentations, and all students will be expected to contribute to our discussions of the various examples we bring before us. Texts for the course will represent several disciplines and approaches to writing about race and culture. The writing for the course will be a journal and a 10-page final paper.

Requirements/Evaluation: participation in group projects, journal, and final 10-page paper

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 19

Enrollment Preferences: majors and prospective majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ENGL 200-level Gateway Courses

ENGL 247 Art of the Essay

The "essay" is one way of writing about the intersection of self and world. Writers from 16th century French Michel Montaigne to contemporary American physician Siddhartha Mukherjee and Canadian lyric essayist Anne Carson have experimented in this form, varying the proportion of self-scrutiny to outward focus. We will study the meandering history of this rich literary form, learning both how to analyze and interpret representative examples from multiple traditions, and how to try our hand at our own creative nonfiction. That is, you will do both critical writing and creative writing for this course. Throughout, we will track how this genre serves those writers and readers who gravitate toward its special arts. Works read include those by the writers named above, as well as a selection from the following list: Henry David Thoreau, William James, Gertrude Stein, James Baldwin, James Agee, John McPhee, Alice Walker, Gloria Anzaldua, Claudia Rankine, Theresa Hak Kyung Cha, and Maggie Nelson.

Requirements/Evaluation: four papers (two critical and two creative), of varying lengths (from 2-10 pages), for a total of 20 pages

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first- and second-year students

Expected Class Size: 25

Grading:

Distributions: (D1)

Not offered current academic year

ENGL 248 (F) Black Women in African American Literature and Culture

Cross-listings: AMST 248 ENGL 248 WGSS 258

Primary Cross-listing

This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange's *For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf*), and socio-political propaganda (the "Black is Beautiful" movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series *Insecure*.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages; final project on the hashtag #blackgirlmagic

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250 (S) Americans Abroad (DPE)

Cross-listings: ENGL 250 COMP 242 AMST 242

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250 (D1) COMP 242 (D1) AMST 242 (D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

ENGL 252 (F) Ficciones: A Course on Fiction (DPE)

Cross-listings: ENGL 252 LATS 222

Secondary Cross-listing

This course is focused on the art and practice of writing fiction. We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers of the Global South, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students strengthen their own narrative skills.

Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 252 (D1) LATS 222 (D2)

Difference, Power, and Equity Notes: Student work will encourage personal and cultural expression, with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change.

ENGL 253 (S) Feminist Theatres: A Global Perspective (DPE) (WS)

Cross-listings: ENGL 253 WGSS 250 THEA 250

Secondary Cross-listing

What makes a work of theatre feminist? How do plays, social practices, and performances engage with different models of feminism: liberal, radical, materialist, intersectional, reluctant? Why has feminism mattered to theatre makers of the past? Should it still matter to us now? If so, what forms might future feminist theatres and performance practices take? In this tutorial, students will work in pairs to examine the political relation of models of feminism to plays and performances by theatre artists, companies, and collaboratives from across the globe, from the late-twentieth century to today. Interrogating feminism's own legacies of exclusionary and biased tactics, we will focus on the racialized and class-based aspects of feminist performance practices and the history of radical and intersectional feminism in theatre. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, The WOW Café, Hélène Cixous, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Wendy Wasserstein, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherríe Moraga, Karen Finley, Suzan-Lori Parks, Young Jean Lee, Lisa Kron, Tori Sampson, Arethusia Speaks, Women's Project and Productions, Sarah DeLappe, and others. Close reading and analysis of source material will occur alongside engagement with critical essays and writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, Sue-Ellen Case, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students alternating the presentation and reading of a series of 5-page papers.

Class Format: For Spring 2021, the format for the course is to be determined. Ideally, we will meet weekly and in-person in groups of 3 (two students and professor). Should necessary social distancing measures be in place, we will conduct our tutorial meetings remotely in either Zoom or Google Meet.

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre majors; WGSS majors; ART majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 253 (D1) WGSS 250 (D1) THEA 250 (D1)

Writing Skills Notes: As a tutorial, this course will require extensive practice in writing, editing, and revising. Emphasis be directed towards building and developing a compelling argument, providing thorough evidence for one's interpretation, and fluidly integrating theory into one's argumentation.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Not offered current academic year

ENGL 256 (F) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)

Cross-listings: COMP 256 THEA 252 ENGL 256

Secondary Cross-listing

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English, and Comparative Literature majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENGL 257 (S) Personal Essay: Writing Workshop (WS)

The personal essay as a literary form includes a wide range of genres including literary journalism, creative nonfiction and the lyric essay. Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography. As we become more mindful of our particular points of view (and of ways to explore and exploit this subjectivity), we will turn the focus outside of ourselves. We will experiment with writing that is extro- rather than introspective. While this is primarily a course in creative writing, we will give much of our time to literary analysis and imitation of exemplary essayists (primarily from the 20th and 21st centuries, and primarily from the U.S.) including James Baldwin, James Agee, Annie Dillard, John McPhee, Joan Didion, Adrian NicholeLeBlanc, Jennifer S. Cheng, Anne Carson, Samuel Delaney, Maggie Nelson, Alexander Chee, Lydia Yuknavitch, Saidiya Hartman and Karen Green.

Requirements/Evaluation: Evaluation will be based on class participation, peer editing, writing and revision, with special attention given to the student's engagement in every aspect of the writing process.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: students who have not yet taken Creative Writing courses will be given priority

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course will demand weekly writing and critical responses, as well as regular opportunities for revision. Total number of pages written will amount to approximately 35.

Attributes: ENGL Creative Writing Courses

Spring 2022

ENGL 258 (S) Poetry and the City (WS)

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as *Man with a Movie Camera*, *Rear Window*, and *Breathless*.

Class Format: discussion-based

Requirements/Evaluation: class participation; the course will require four 5-page essays in multiple drafts

Prerequisites: 100-level English course or a 5 on the literature component of the AP exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: first-year and sophomore students who are thinking of majoring in English

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENGL 259 (S) Ethics of Jewish American Fiction

Cross-listings: ENGL 259 JWST 259 REL 259

Secondary Cross-listing

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and English majors

ENGL 262 (F) European Cinema and Film Theory

This seminar explores the foundations of contemporary European cinema by studying a range of films from 1920-1985, and offers a grounding in film theory and aesthetics by pairing such films with theoretical essays by philosophers and aestheticians from the silent era through the 1970s. We will establish a kind of map of cinematic styles and movements, ranging from German expressionism and Soviet montage in silent films of the 1920s, through French realism of the prewar and Italian neorealism of the early postwar era, to the insurrectionary films of the French New Wave and the stylistic innovations of the German New Wave and of Swedish cinema in the 1960s and 1970s. We will study films by such directors as Wiene, Murnau, Lang, Eisenstein, Vertov, Dreyer, Renoir, Riefenstahl, Rossellini, Fellini, Truffaut, Godard, Varda, Herzog, Bergman, Tarkovsky, and Almodóvar.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 263 (S) Novel Worlds

Cross-listings: ENGL 263 COMP 268

Primary Cross-listing

Reading a novel can feel like falling into another world, an immersion in an encompassing fictional reality saturated with detail--each novel its own trip down the rabbit hole. From Jane Austen's "3 or 4 families in a country village" to Roberto Bolano's teeming modern day Mexico City of millions, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces, like a container? Or are they not a thing at all, but social systems--ways of belonging that are constantly being made and remade? This course is about the specific world--imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon the notion of world. We'll read a number of novels, ranging from 19th century authors like Austen and Dickens, to contemporary genre writing--science fiction and the detective novel--as well as from a range of national traditions to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts that are preoccupied by world-ness, with attention to current debates about the idea of World Literature. Novel texts likely to include: Jane Austen's *Emma*, Charles Dickens's *Bleak House*, Carroll's *Alice in Wonderland*, Italo Calvino's *Invisible Cities*, and Roberto Bolano's *Savage Detectives*.

Requirements/Evaluation: papers (approximately 20 pages), other forms of writing in-class and otherwise, participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

SEM Section: 01 TF 2:35 pm - 3:50 pm Ricardo A Wilson

ENGL 266 (F) Postmodernism (WS)

Cross-listings: COMP 231 ENGL 266

Secondary Cross-listing

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

ENGL 267 Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)

In most academic work the point of analysis is to make sense, to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? How and when have strategies of nonsense, circular reasoning, linguistic obfuscation, and intentional theatrical absence been employed to disguise, or deflect attention from, specific didactic (even political) agendas? What role specifically does theatre, theatricality, or performativity play in the presentation of art that refuses understanding? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek, Richard Foreman). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Standard tutorial requirements; weekly paper or response paper from each member of the tutorial pair. Evaluation based on improvement in written expression and engaged contribution to weekly discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English, and Comparative Literature majors and prospective majors.

Expected Class Size: 10

Grading:

Distributions: (D1) (WS)

Writing Skills Notes: This tutorial will demand writing from each student each week (either a primary paper or a shorter response paper), and each student will receive regular, extensive feedback including a focus on strategies for successful persuasive argumentation.

ENGL 268 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: REL 166 AMST 166 COMP 166 ENGL 268

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 166 (D2) AMST 166 (D2) COMP 166 (D1) ENGL 268 (D1)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

SEM Section: 01 TR 9:55 am - 11:10 am Zaid Adhami

ENGL 272 (S) American Postmodern Fiction

Cross-listings: AMST 272 ENGL 272

Primary Cross-listing

American fiction took a turn at World War II; the simplest way to name the turn is from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness: postmodern books tend to be about themselves, even when they are most historical or realistic. Already a paradox emerges: why would World War II make narratives more self-reflexive? The first book in the course, and the best for approaching this paradox, is Heller's *Catch-22*. It also serves as a good introduction to the unlikely merging in American fiction of high European post-structuralist postmodernism and low American punk postmodernism. Subsequent books in the course will probably include Pynchon's *The Crying of Lot 49*, Morrison's *Beloved*, DeLillo's *White Noise*, Carver's *What We Talk About When We Talk About Love*, Diaz's *The Brief Wondrous Life Of Oscar Wao*, and Whitehead's *The Underground Railroad*.

Requirements/Evaluation: three papers of increasing length and weight, contributions to class discussion

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: first-year students who have placed out of 100-level English and sophomores considering the major; then Junior and Senior English majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ENGL 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: COMP 273 ENGL 273 GBST 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the

evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

ENGL 275 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: ENGL 275 AFR 275 AMST 276

Primary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 275 (D1) AFR 275 (D1) AMST 276 (D2)

Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.

Not offered current academic year

ENGL 277 (F) Meditation and Modern American Life

Cross-listings: REL 277 ENGL 277

Primary Cross-listing

The first English translation of a Buddhist text was published in the United States in 1844. At the time, few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices (meditation, in particular) can be found everywhere. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the increasingly mainstream role of meditation in modern American life. We'll study how traditional Buddhist meditation practices were transmitted to the West, and then track the way those practices changed over time, as they were adapted to the radically new context of American culture. And we'll study the way meditation is impacting a wide array of cultural domains, including: literature, psychology, education, environmentalism, Western attitudes towards death and dying, and the fight against racism. A key part of the course will be an introduction to the theory and practice of meditation: we'll learn a variety of meditation techniques, and we'll spend a significant amount of time each class practicing and reflecting upon those practices. This course is a part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail, in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Classes will be held at the jail, with transportation provided by the college. *Please note the atypical class hours, Thursdays, 4:45-8:30 pm.*

Requirements/Evaluation: full attendance and participation; meditation 2-3 times a week outside of class; a meditation journal; and a final 10-page essay

Enrollment Limit: 18

Enrollment Preferences: final selection will be made on the basis of (a) statements of interest sent via email to brhie@williams.edu by June 26 and (b) brief interviews with the instructor.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 277 (D1) ENGL 277 (D1)

Not offered current academic year

ENGL 278 (S) Buddhism and Contemporary American Literature

The influence of Buddhism on American literature is long-standing and appears to be growing ever deeper with time. A very partial list of contemporary American writers who have been influenced by Buddhist practice and theory includes: Ruth Ozeki, George Saunders, Charles Johnson, Alice Walker, bell hooks, Maxine Hong Kingston, Ocean Vuong, Maggie Nelson, Jane Hirshfield, and Norman Fischer. This class, conceived as a follow-up to the introductory course "Zen and the Art of American Literature" (though it's not necessary that students have taken that course), will offer a deeper look into the role that Buddhism is playing in contemporary American literature. Our focus will fall squarely on literary texts (mostly novels and poems by the authors named above, including Ruth Ozeki's latest novel, *The Book of Form and Emptiness*), but we'll make occasional forays into Buddhist nonfiction, to supplement our understanding of how Buddhism is speaking to pressing contemporary problems like racism and the ecological crisis. Students who want to take this course should already be familiar with the practice of meditation (see pre-reqs below), which they will be asked to continue (for 15-20 minutes a day) alongside their study of texts by writers who have themselves engaged in similar contemplative practices (often as an integral part of their own writing practice). Ideally, practice and theory, reading and experience will mutually inform one another.

Requirements/Evaluation: Attendance will be strictly required (after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3). Other requirements: daily meditation practice (15-20 minutes a day), a weekly meditation journal, various informal in-class and

take-home writing assignments, and a final 10-12 page essay.

Prerequisites: Students must have successfully completed a course at Williams that includes a substantial introduction to the practice and theory of meditation. Examples include ENGL 239, ENGL 277, REL 269, REL 232, REL 254, REL/PHIL 288.

Enrollment Limit: 25

Enrollment Preferences: After you preregister, please email me at brhie@williams.edu with an explanation of what draws you to the course, as well as the name of the course you've taken that satisfies the meditation-related prerequisite.

ENGL 279 (F) Introduction to Latinx Literature: From 'I Am Joaquin' to Borderless-Future Dreams (DPE) (WS)

This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement's significant aftermaths. This focus highlights the significant contributions Chicano voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyoricans, Cubanos, Central Americans, Afro-Latinxs, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries' most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political equality? To what extent does the Latinx subject's political freedom rest upon practices and processes of identity-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture--from the city to the campo to the cultural in-between of the border.

Requirements/Evaluation: Active participation in in-class and online discussion, four 4-5 page essays, weekly reading responses, and an in-class presentation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: Sophomores considering the English major, but juniors and seniors are also welcome.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement. Reading-response prompts will be geared towards helping students practice writing and analysis skills. Students may also be asked to attend occasional 1-on-1 meetings with instructor to discuss writing.

Difference, Power, and Equity Notes: This course offers students the opportunity to learn and think critically about Latinx community struggles throughout U.S. social history while examining the forms of cultural expression that arise out of and in relation to those struggles. It also delves into the intersectional nature of Latinx community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

ENGL 280 (S) Writing for Performance

Cross-listings: ENGL 280 THEA 282

Secondary Cross-listing

This studio/seminar course is designed for students with some experience in creative writing and/or performance interested in a deep dive into the art of playwriting. What is a play? What distinguishes writing for performance from writing that is meant to be read? How do we craft a blueprint for a live event? In our rapidly evolving digital world, what sorts of stories and phenomena still ask to be experienced live? How are contemporary theater and performance makers pushing the boundaries of what "writing" means and what constitutes "liveness"? We will read works by Sharon Bridgforth, Sarah Ruhl, Tarrell Alvin McCraney, Tony Kushner, Branden Jacobs-Jenkins, Sarah DeLappe, Suzan-Lori Parks, Edward Albee, August Wilson, Chuck Mee, María Irene Fornés, Young Jean Lee, Stew, and Lightning Rod Special, who have deepened and widened the possibilities of the form. We will also write, beginning with exercises in character, dialogue, action, and world-building, and working toward a longer final project. Students will be expected to present their own work and respond to each other's work regularly. At the end of the term, we will present excerpts of our one-act length works as part of an open studio experience.

Requirements/Evaluation: in-class participation, critical/creative responses to readings, various writing exercises, final one-act performance piece, participation in final presentation

Prerequisites: students with some experience in creative writing and/or performance

Enrollment Limit: 14

Enrollment Preferences: students who have taken THEA 214/ENGL 214 or another creative writing course

ENGL 285 (F) Introductory Workshop in Prose

An introduction to the basics of writing creative prose, both fiction and memoir, with a focus on more self-consciously exploring the question of who gets to write about what. From what sources does a work's imaginative authority derive? What role should imagination play in the composition of fiction? What are the outer boundaries of those imaginative acts that should be attempted? Are there any limits on what authors should write about in memoir? Class sessions will be devoted to both published and student work. Students will receive written critiques from other students as well as the instructor. Individual meetings with the instructor will be available.

Class Format: creative writing workshop

Requirements/Evaluation: class participation, student teaching, student work, final portfolio

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: selection based on writing samples, interested students should pre-register for the class and will be emailed with instructions for a writing sample if the class is over-enrolled.

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

ENGL 288 (S) Introductory Poetry Workshop: Writing as Experiment

Some writing gets categorized as "experimental" or "avant-garde." But a spirit of experimentation---of rigorous, playful curiosity---is crucial for writers of all levels and styles to cultivate. In this introductory poetry course, we will engage in games and exercises designed to help us explore the wide set of tools available to poets. We will read works by canonical and contemporary poets, from Shakespeare and Dickinson to Fatimah Asghar, Haryette Mullen, Douglas Kearney, and more. We will also discuss the ways race, gender, and power affect interpretations of the risks such poets take in their work, asking: What are the boundaries of what is considered to be poetry, and what possibilities for writing might we discover by pushing against those boundaries? How might a poem live, not just on the page, but also on a sidewalk, on a screen, in performance? This is a course that approaches writing as a laboratory to test out ideas and asks students to think critically about their own creative processes. Students will be expected to create new writing, submit reflection papers, give feedback on each others' poems, and revise work as part of a final portfolio.

Requirements/Evaluation: Class participation, completion of writing exercises, feedback/reflection papers, and a final portfolio with revisions.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if course becomes over-enrolled, enrollment will be determined by application.

ENGL 300 (F) Re/Generations I: Memory Against Forgetting and the Global American Empire (DPE)

Cross-listings: COMP 357 ENGL 300 AMST 300

Secondary Cross-listing

This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. As such, the courses are remote and may be taken in sequence or autonomously. In this first part, we focus on authors charting the lives and afterlives of chattel slavery, settler colonialism, genocide, war, and the expansion of the global American empire, from the 19th through 20th centuries. How do these authors remediate the critical (il)legibility of personhood and place, community and nation? What myths must be dispelled and/or rewritten? What structural elements are deployed to tackle the obstacles of hegemonic power and historical amnesia, and how do these authors re/generate "what remains of lost histories and histories of loss" (Eng and Kazanjian)? Texts to be considered may include: *Narrative of the Life of Frederick Douglass, an American Slave*; *Hawaii's Story by Hawaii's Queen* (Lili'oukalani); *Notes of a Native Son* (James Baldwin); *Borderlands/La Frontera* (Gloria Anzaldúa); *Dictee* (Theresa Hak Kyung Cha).

Class Format: Remote

Requirements/Evaluation: weekly reading responses, midterm and final papers

Prerequisites: American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: American Studies majors

ENGL 301 (S) Sublime Confusion: A Survey of Literary and Critical Theory

Cross-listings: ENGL 301 COMP 301

Secondary Cross-listing

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining "beauty." But running alongside this is an edgier countercurrent that worships something else: an experience of excitement, fear, suspense, or thrilling confusion often described as "the sublime." The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxically by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature's exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralist criticism itself has a thrillingly confusing quality that we will not ignore.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to Xbox will enlighten, thrill, and confound you. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose, poetry, or drama from any time and place; film, visual art, or architecture; music, new media, or digital media, and beyond.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: 200- or 300-level course in literature, theory, or philosophy, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: students majoring or considering a major in a related field

Expected Class Size: 9

ENGL 302 (S) "A language to hear myself": Advanced Studies in Feminist Poetry and Poetics (DPE) (WS)

Cross-listings: ENGL 302 AMST 310 WGSS 330

Primary Cross-listing

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde,

Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Judith Butler, as we analyze the kinds of performances that brought together feminist poetry and political activism. We spend some time in the archives, analyzing documents from the period, including original publications of poetry chapbooks often published by the period's many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Class Format: I anticipate that this class will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements.

Requirements/Evaluation: two short analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), short presentation, longer final researched paper (10-12 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 302 (D1) AMST 310 (D2) WGSS 330 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, critical summaries of feminist criticism, two four-to-five-page graded papers, one creative assignment, a longer, final researched paper (10-12 pages), written in stages over a period of several weeks with feedback at each stage. Critical feedback on written assignments a week prior to due date through conferences and Google Docs and on graded assignments within one week.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

ENGL 303 (S) The New Television

TV has changed a lot, and it seems like a good time to figure out how. We will watch full seasons of landmark shows (*Game of Thrones*, *Girls*, *Breaking Bad*, *The Sopranos*) in order to answer a series of questions: How does the new television differ from older network shows? What are its distinctive storytelling techniques? What, in particular, is the appeal of complex and long-form narrative? Is modern television, as often claimed, a reinvention of the nineteenth-century novel? Which features does it take over from the novel and do they work the same way on the screen as they do on the page? But then what is television's relationship to the film genres that it also inherits? What happens to a gangster movie when you extend it out to eighty-six hours? What's the difference between a zombie movie and a really long zombie movie? And how is it that the new television has reclaimed the word *binge*, which used to be associated with broken diets and heavy drinking?

Requirements/Evaluation: informal weekly writing; class participation; midterm and final essays, 30 pages total

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam. Do contact Prof. Thorne if you would like to take the class without the prereq.

ENGL 304 (F) Dante

Cross-listings: COMP 317 ENGL 304

Primary Cross-listing

In the spring of 1300, Dante Alighieri entered Hell. The *Divine Comedy* is the record of the journey that followed. It is organized around a series of encounters with figures from the poet's past--for example, a former teacher damned for violating nature--as well as historical and literary characters: Ulysses, Thomas Aquinas, Plato, Virgil, Adam. Though the *Comedy* is probably now best known for its savagery--the bodies split open, the Popes turned upside down and lit on fire--it is also, as Dante claims, a love story and a work of high imaginative daring. Among its final images is a vision of paradise rendered through the precise if also mind-bending language of non-Euclidean geometry. In this course we will read the three books of the *Comedy* (*Inferno*, *Purgatorio*, *Paradiso*), the *Vita Nuova*, and a few brief selections from Dante's other works. All readings will be in translation. The course will be taught remotely.

Requirements/Evaluation: five written exercises and a 10-page final paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 305 (F) The Canterbury Tales

Composed in the last decades of the fourteenth century, *The Canterbury Tales* is a brilliant pastiche of competing forms. Saints' lives, dirty stories, tales of revenge, sermons, fart jokes--they are all in the mix. We will read the *Tales* in the original Middle English, which is easier (and more fun) than it looks; no prior exposure to Middle English is necessary. We will also read sections of the *Decameron* and the *1001 Nights*.

Requirements/Evaluation: frequent quizzes on vocabulary and comprehension, practice reading Middle English aloud, two 5- to 7-page papers, a midterm, and a final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 306 (F) Beckett, Pinter and Stoppard

Cross-listings: ENGL 306 THEA 365 COMP 365 ENGL 365

Secondary Cross-listing

Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: *Endgame*, *The Caretaker*, *Rosenkrantz and Guildenstern are Dead*, *Krapp's Last Tape*, *The Homecoming*, *No Man's Land*, *Betrayal*, *Waiting for Godot*, *Dogg's Hamlet*, *The Invention of Love*, *Arcadia*, *Rock 'n' Roll*, *Not I*, *Rockaby*, *A Kind of Alaska*, *Catastrophe*, *The Real Thing*, *Indian Ink*, *Artist Descending a Staircase* and *One for the Road*. Throughout, we will give consideration to these works as both literary and theatrical texts.

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

Prerequisites: none

ENGL 307 (F) The 19th Century and Its Shadow

Cross-listings: AFR 303 ENGL 307

Primary Cross-listing

This course explores canonical American literature from the nineteenth century alongside a selection of contemporary literary and cinematic texts that call on and intervene with this body of work. Following Toni Morrison's charge that the contemplation of a black presence "is central to any understanding of our national literature and should not be permitted to hover at the margins of the literary imagination," this course focuses on how ideas of race are explored throughout the canon and how they have been carried forward. Works considered throughout the term come from, among others, Julie Dash, Frederick Douglass, Saidiya Hartman, Harriet Jacobs, Mat Johnson, Herman Melville, Toni Morrison, Nate Parker, Edgar Allan Poe, Quentin Tarantino, Mark Twain, and Colson Whitehead.

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 308 (S) Race and the Zombie Apocalypse

Cross-listings: ENGL 308 AFR 305

Primary Cross-listing

This course takes a critical approach to our contemporary understanding of the figure of the zombie and its inextricable link to discourses on race and blackness in the Americas. An introductory grounding in theories of social death allows an opportunity to explore the racial anxiety that gave birth to the genre and trace its development throughout the hemisphere. The course considers the novels, films, and critical texts that frame the genre in order to pose the following questions: What can the figure of the zombie teach us about our evolving relationship to race? What roles do gender and sexuality play in the construction of the genre? And, finally, how does the recent proliferation of zombie-related television shows, movies, books, and video games reflect our present-day concerns?

Class Format: remote

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

ENGL 309 (S) Ibsen, Chekhov and the emergence of Modern drama

Cross-listings: COMP 387 THEA 387 ENGL 309

Secondary Cross-listing

This course will center on the plays of Henrik Ibsen and Anton Chekhov, key figures in the development of Modern European drama. Prospective readings will include Ibsen's *A Doll's House* (1879), *The Wild Duck* (1884), *Rosmersholm* (1886) and *Hedda Gabler* (1890); Chekhov's *The Seagull* (1896), *Uncle Vanya* (1900), *Three Sisters* (1901) and *The Cherry Orchard* (1904); along with August Strindberg's *Creditors* (1889) and Oscar Wilde's *An Ideal Husband* (1894). We will chart the development of dramatic realism and naturalism, and situate these plays in the context of the late-nineteenth century "ache of modernism", with supplemental readings that highlight changing conceptions of identity and subjectivity, emerging strains and contestations over gender and sexuality, and the wider sociological, political and technological changes of the period. The course will also be centrally concerned with these playwrights' innovative explorations of the investigations of theatre's capacities and limitations in representing social reality and the 'performance' of selfhood.

Requirements/Evaluation: Five papers, alternating weeks with your tutorial partner; critical responses to your partner's essays; evaluation of participation.

ENGL 310 (F) Rebels, Revelers, and Reactionaries: The Poets of the Seventeenth Century

The decades following the death of Elizabeth I were period of scandal, schism, dissent and decadence, culminating in a bloody civil war and the beheading of a king. It was, in other words, a 'world turned upside down' by every kind of upheaval: in civics, philosophy, politics, religion, and science. It also produced writers of some of England's finest lyric and satiric poetry, and its greatest epic poet. How the century's poets successfully dramatized the critical events and feelings in this time of turmoil will be the focus of the course. While primarily a course in close reading, we will nevertheless try to reconstruct the lives and contexts of the writers, and examine some of the critical and theoretical issues involved in contextualizing the poems. Authors will include Donne, Jonson, Lanyer, Herbert, Herrick, the Cavalier Poets, Milton, Marvell, Cavendish, Dryden, and Rochester.

Requirements/Evaluation: two 8- to 10-page essays and several short writing assignments

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 311 (S) Theorizing Shakespeare

Cross-listings: COMP 310 WGSS 311 THEA 311 ENGL 311

Primary Cross-listing

For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: *The Merchant of Venice*, *Hamlet* and *Antony and Cleopatra*. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

Requirements/Evaluation: 20 pages of writing in the form of two short and one longer paper

Cross-listings: ENVI 315 ENGL 312

Primary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

ENGL 313 (F) George Eliot and Henry James

George Eliot (aka Mary Ann Evans) and Henry James trace dramas of consciousness that ramify in the context of 19th century social transformations. Eliot records the frictions of provincial and cosmopolitan lives; James writes about what it meant for American and European societies around the turn of the 20th century to be mutually exposed to and by one another. Their work explores gender and class fluidity, and the relations of ethical, economic, and aesthetic value. Both evoke fraught political contexts--for Eliot, the failed mid-century European revolutions and pressures of British imperialism, and for James, post-Civil War American consciousness and the struggle between American and European imperialisms. By placing texts in relation to one another--for instance, James' *Portrait of a Lady* with Eliot's *Daniel Deronda*, *What Maisie Knew* with *The Mill on the Floss*, *The Turn of the Screw* and *The Beast in the Jungle* with *The Lifted Veil*--we'll consider how and to what ends these writers link such issues as law, sacrifice, gambling, gender, and the supernatural. In tracing the relation of their work to one another, we will mark the shift from crucial preoccupations of the 19th century to the modern novel, and the innovations of prose style that accompany them.

Requirements/Evaluation: class participation and two papers, approximately 20 pages altogether

ENGL 315 (S) Milton's Paradise Lost

Cross-listings: REL 319 ENGL 315

Primary Cross-listing

If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It's hard to shake the feeling that Milton is the fustiest of English poets--dull, pious, brilliant and all, and not someone you would read if you didn't have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents--the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read *Paradise Lost*, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school--about God and Adam and Eve and the

serpent--really have been writing about rebellion all along?

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam.

ENGL 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: AFR 317 COMP 319 AMST 317 DANC 317 ENGL 317 THEA 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

ENGL 318 (F) Literary Taste and After Taste

Why are some literary works acclaimed or neglected when they first appear, and why do their critical assessments change--sometimes drastically--over time? What does it mean to think of a work as 'before its time'? What is the relation between critical trends and their affinity for particular literary styles? In thinking about these issues, we will consider a few crucial instances: modernist poets and New Critics' celebration of

Donne and Marvell over Milton in the early 20th century; 18th and 19th century writers' fascination with medievalism and the Gothic; deconstructionist critics' absorption with Romantic poetry; Marxist and neo-Marxist critics' qualified embrace of realism and critique of postmodernism; and recent and contemporary debates about the relation of aesthetic forms to representations of race, ethnicity, and gender.

Requirements/Evaluation: class participation and two essays, approximately 20 pages of writing

ENGL 319 (F) The Literary Afterlife

Cross-listings: COMP 354 ENGL 319

Primary Cross-listing

What do writers mean when they say that they will live on after death through their books? In this course, we will explore the long history of thinking about literature as a way to compensate for mortality, and we will compare the literary afterlife to religious and philosophical versions of eternity. Many of the writers on our syllabus were anxious about the compatibility of the pursuit of worldly fame with the desire for Christian salvation. We will study how their sense of a conflict between the two afterlives changed over time: from the recovery of pagan antiquity during the Renaissance, across the theological transformations of the Reformation, to the consequences of print. The course deals with some of literature's greatest ambitions--to cheat death, to make a lasting contribution to human culture--but we will often find ourselves caught in an undertow of skepticism. Is writing any less susceptible to decay than human bodies are? If so, is literary accomplishment worth the risk of one's soul? Authors and texts will include Sappho, Ovid, Lucretius, Ecclesiastes, Augustine, Petrarch, Julian of Norwich, Montaigne, Shakespeare's Hamlet and Richard II, Jonson, Donne, and Milton.

Requirements/Evaluation: one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions

ENGL 320 (S) Marlowe and Shakespeare (WS)

Cross-listings: ENGL 320 THEA 320

Primary Cross-listing

In 1586, at the age of twenty-three, Christopher Marlowe wrote *Tamburlaine the Great*. Over the next six years--probably while moonlighting as a government spy--he went on to produce some of the strangest and also most influential works of English drama. Then in 1593, Marlowe was murdered, stabbed through the eye in a tavern brawl. It is often said that Marlowe's early death, no less than his early success, made the work of Shakespeare possible. In this class we will read Marlowe's *Edward II*, the first popular history play in English, and Shakespeare's *Richard II*; *The Jew of Malta* and *The Merchant of Venice*; *Doctor Faustus* and *Macbeth*. We will look at ways in which Marlovian preoccupations--with lurid violence, with debasement, with self-invention--resurface in Shakespeare, in new forms. In the process we will also take up more general questions of literary influence: What do writers borrow from each other? And how does the knowledge of indebtedness--shared to varying degrees with an audience--affect the meaning and

impact of their work? Critical readings will include essays by Harry Levin, Julia Lupton and Stephen Greenblatt.

Requirements/Evaluation: two 5- to 7-page papers; a ten page final paper

ENGL 321 (S) Samuel Johnson and the Literary Tradition

Samuel Johnson (1709-1784) has been exceptionally influential not only because he was a distinguished writer of poems, essays, criticism, and biographies, but also because he was the first true historian of English literature, the first who sought to define its "tradition." We will read Johnson's own works and Boswell's *Life of Johnson* to discover Johnson's talents, tastes, and standards as an artist, as a moral and literary critic, and as a man. We next will use Johnson's *Preface to Shakespeare* and *Lives of the Poets* to examine how this great intelligence assessed writers from the Renaissance through the eighteenth century. While reading his commentary on Shakespeare and his critical biographies of Milton, Dryden, Pope, Swift, and Gray, we will analyze selected works by these writers so as to evaluate Johnson's views and sharpen our understanding of the relationship between his standards and values, and the ones we hold today--both individually and collectively.

Requirements/Evaluation: midterm and final papers (15-20 pages total), and a take-home final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors, but all interested students are welcome.

ENGL 322 (S) Borges, Nabokov, Beckett

Jorge Luis Borges, Vladimir Nabokov, and Samuel Beckett were the three most influential writers in western fiction during the 1960s and 1970s; they helped to turn literary history from modernism to post-modernism. What they share is extreme self-consciousness of two kinds: the self is a labyrinth; the text is a labyrinth. Though born around the turn of the twentieth century, each came to international prominence only after the catastrophe of World War II. Unable to follow their modernist teachers in conceiving of art as the last best hope for the redemption of history, Borges, Nabokov, and Beckett each offered a unique, complex, and witty intelligence as compensation.

Requirements/Evaluation: There will be three formal writing exercises of increasing length and weight; participation in class discussions will also be a factor in the final grade.

Prerequisites: A 100-level English course, or a 5 on the AP literature exam, or a 6 or 7 on the advanced English IB exam.

Enrollment Limit: 25

Enrollment Preferences: English majors, then prospective English majors.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

ENGL 323 (S) A Novel Education (WS)

All novels are conscious of their readers; eighteenth-century novels are obsessed with them. In the century when the genre first flourished, readers are the ultimate objects of novelists' plots. We are addressed, teased, pleaded with, embarrassed, flattered, made fun of, praised, chided, solicited, warned, reminded, rebuked, asked for sympathy, and--always--closely watched. Eighteenth-century novelists--and their narrators--aggressively educate their readers, not only teaching us how to interpret the novel itself, but also demanding that we self-consciously question the powers of mind and habits of heart we bring to the process of interpreting a book, ourselves, and our world. In this tutorial course, we will explore the narrative and rhetorical strategies two of the century's greatest novelists use in creating, shaping, and finally educating their readers. We will focus principally on Henry Fielding's *Tom Jones* (1749) and Laurence Sterne's *Tristram Shandy* (1760-67)--long, brilliantly intricate novels that go about their work in very different ways, but that are equally committed to the project of giving their readers a novel education. We will consider--much more briefly--Fielding's *Joseph Andrews* and Bunyan's *Pilgrim's Progress*. We will also read criticism by such "reader response" theorists as Stanley Fish and Wolfgang Iser, and--in the individualized setting of a tutorial--students will be asked to develop and articulate their own theories of reading by examining critically the ways in which texts affect and educate them. Emphasis will be placed on developing skills not only in reading and interpretation, but also in constructing critical arguments and responding to them in written and oral critiques.

Class Format: Remote course. Students will meet with the instructor in pairs for one hour each week

Requirements/Evaluation: Students will write and present a 4-to 5-page paper every other week, and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: English majors, not open to first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: All tutorials (at least in English) are by definition Writing Skills courses. Students will write either the main paper or a response critique in alternate weeks. Students will also have the opportunity to revise.

ENGL 324 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 323 ENGL 324

Primary Cross-listing

Consciousness of the world's finiteness in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It* and *King Lear*; Marvell; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Wordsworth; McCarthy, *The Road*; Atwood; Alice Oswald; photography (Struth, Hutte); painting (Titian), and video installations (Pipilotti Rist). Theoretical texts include: Smith, *Against Ecological Sovereignty*; Wood, *Reoccupy Earth*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am and Beast and the*

Sovereign.

Class Format: This course will be taught virtually, but we will make absolutely every effort to ensure that it takes the form of a genuine discussion class, including breaking periodically into smaller online groups. Requirements: two papers totaling 20 pages.

Requirements/Evaluation: two papers over the course of the semester totaling approximately 20 pages.

Prerequisites: none

Enrollment Limit: 16

ENGL 325 (F) Joyce, Woolf, and Proust

Cross-listings: ENGL 325 COMP 366

Primary Cross-listing

This seminar focuses on novels by three of the most important writers of modernist fiction: Marcel Proust (*Swann's Way*, the first novel of his sequence *In Search of Lost Time*); Virginia Woolf (*To the Lighthouse*); and James Joyce (*Ulysses*, read in slightly abridged form). By juxtaposing these path breaking texts, we will examine the distinctive yet related ways in which they explore crucial preoccupations of modernism: the threat and the exhilaration of cultural loss in face of social and political transformations in the early twentieth century; the turn to memory, to art, and to objects as stays against de-stabilized subjectivity and as means of re-thinking value; the emergence of new forms of political and sexual identity; the heightening of consciousness to the verge of transport or disintegration; and the roots and perversities of desire. Students who have studied *Ulysses* in a previous course are welcome.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam; students who have taken ENGL 360 are welcome

ENGL 328 (F) Austen and Eliot

Cross-listings: WGSS 328 ENGL 328

Primary Cross-listing

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context-in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism-we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*; Eliot's *The Mill on the Floss*,

The Lifted Veil; and Daniel Deronda; selected letters and prose; and critical essays.

Class Format: discussion

ENGL 329 (S) Austen, Eliot, Woolf

Cross-listings: ENGL 329 WGSS 329

Primary Cross-listing

At roughly fifty-year intervals, Britain produced three brilliant female novelists -- Jane Austen, George Eliot, and Virginia Woolf -- who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction-- with an emphasis on Austen and Eliot -- with special attention to the nature and implications of their narrative methods for representing the consciousnesses of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is our understanding of novelistic characters and consciousness shaped by our real-life experience in interpreting the thoughts and character of others, and vice versa? Do "omniscient" narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? How do these authors' preoccupations with interior thought relate to their focus on women's experience? Possible texts include Austen's *Emma and Persuasion*, Eliot's *Middlemarch*, *Daniel Deronda*, and *The Lifted Veil*, and Woolf's *The Waves*.

Class Format: seminar

ENGL 330 (S) Renaissance Literature in Global Perspective

The Renaissance is usually seen as a decidedly Western "rebirth": the moment in which the emerging nations of modern Europe define themselves by both their connection to and their distance from the classical heritage of Greece and Rome. What might it mean, then, to understand the Renaissance also as shaped by a global network of interactions among Western and non-Western societies, economies, and cultures? In this course our focus will

be on literature in the broadest sense, including lyric poetry, epic, and drama, but also travel reports, royal memoirs, and philosophical histories as means of imagining the shape of the world, familiar and unfamiliar. We'll begin by considering Europe's eccentric place within the larger Afro-Eurasian cultural system of the late Middle Ages, and how what we call the Renaissance emerges from a sense of linkage to as well as separation from the traditions of the Islamic world and beyond. We'll then examine the intense and troubling interrelation between Renaissance writing's intellectual dynamism and the often catastrophic effects of Europeans' encounter with what was for them a New World in the Americas. Finally, we'll think about whether or not it makes sense to see the European Renaissance as one facet of a broader global process, similar to concurrent movements of cultural expansion and hybridization such as in Mughal India. Authors to be studied may include Petrarch, Boccaccio, Chaucer, Ibn Khaldun, Thomas More, Babur, Mira Bai, Marguerite de Navarre, the Inca Garcilaso, Marlowe, and Camoes. (All readings in English.)

Requirements/Evaluation: two papers (15-20 pages total); regular short responses

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 331 (F) Romantic Culture

The Romantic period--1780 to 1830, roughly--is one of the great watershed moments in western culture. Romantic writers obsessed over the same things we do: the profit and power resident in human interactions with the natural world, for instance, or the spiritual significance of our inner lives, or the terrors and exhilaration of political and social activism. Romantic writing is durably relevant and, frequently, durably and interestingly weird. We will read a lot of poetry, and paintings and other examples of Romantic expressive culture will comprise a significant part of the course materials.

Requirements/Evaluation: class participation and three papers, the last being longer than the first two

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 332 (S) Aesthetic Outrage (WS)

Cross-listings: COMP 307 ENGL 332

Primary Cross-listing

In this tutorial course we will explore interdisciplinary ways of theorizing the outraged reception of provocative works of film, theater, and fiction. When riots, censorship, and vilification greet such works in moments of political and social upheaval, the public outrage is often strangely out of proportion to either the work's aesthetic nature or its overt commentary on the political crisis. Something powerfully symptomatic is at work, then: a set of threatened investments, unacknowledged values, and repressed ideas which surface explosively, but indirectly, in the aesthetic outrage. In an attempt to understand the strange logic of public outrage against works of art, we will explore the respective works' historical contexts, and use theoretical models--aesthetic, political, psychological, social--as a means of illuminating the dynamics of outrage and exposing understated linkages between a work's figurative logic and the political passions of its historical moment. We will study instances of outrage in the context of French Revolution (Beaumarchais' *The Marriage of Figaro*), the wave of anarchist terrorism in turn-of-the-century Paris (Jarry's *Ubu the King*), the sodomy trials of Oscar Wilde (*The Importance of Being Earnest*), the Irish Revolution (Synge's *The Playboy of the Western World* and O'Casey's *The Plough and the Stars*), and Stalinist collectivization (Eisenstein's suppressed film *Bezhin Meadow*). After two weeks in which we will meet as a group, students will meet with the instructor in pairs for one hour each week during the rest of the semester. They will write a 5- to 6-page paper every other week (five in all), and a short written analyses of their partners' papers in alternate weeks. Emphasis will be placed on developing skills not only in reading and interpretation (of historical events and of theoretical texts as well as of literature and film), but also in constructing critical arguments and responding to them in

written and oral critiques.

Class Format: tutorial

Requirements/Evaluation: active participation in tutorial discussions, five 5- to 6-page papers, five 1- to 2-page critiques

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 333 (F) The Nineteenth-Century British Novel

Cross-listings: ENGL 333 WGSS 333

Primary Cross-listing

In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic and social ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in--and sometimes out of--love. Since so many of these stories remain highly accessible works of popular culture, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers' understanding of themselves as subjects and agents of an ongoing social history. Likely authors include Jane Austen, Walter Scott, Charlotte Bronte, Charles Dickens, Anthony Trollope, and George Eliot.

Class Format: This class will be remote only, with two synchronous discussions of 50 min each per week and a mix of mini-lectures, brainstorming documents, etc. for the remaining 50 min/week.

Requirements/Evaluation: Heavy (but entertaining!) reading load. Flexible writing requirement includes options for short essays, weekly journal, creative work, and research paper. Students must complete 4 units of writing, with the research paper, if chosen, counting for two. There will be additional bits of informal writing, evaluated as part of the class contribution grade, such as participating in the production of a "brainstorming" doc on Google.

ENGL 335 (F) Moving Words, Wording Dance (DPE) (WS)**Cross-listings:** DANC 302 ENGL 335**Secondary Cross-listing**

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this course, we will explore different modes of writing about performance such as fiction, ethnography, and performative writing. The course material will primarily focus on books by artist-scholars of color with the aim of engaging with both the politics of identity in performance and also the politics of texts and archives. Each of the texts we encounter will be paired with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. Besides engaging deeply with the selected monographs, we will practice skills related to writing creatively and analytically about movement-based performance. This class will be held remotely and will include a combination of tutorial-like small group meetings, periodic synchronous sessions, and asynchronous work such as Glow posts or recorded lectures. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) participate in discussions about course materials, (iii) produce creative and critical writing (at least 5-6 pages every two weeks and a final cumulative assignment), and (iv) engage in the revision process of their own work and that of their peers based on feedback from the professor and from writing partners.

Requirements/Evaluation: Each student will write three 5- to 6- page papers on which professor and peers will provide critical feedback on content, style, and grammar. Students will also revise the papers and meet with the professor to discuss the revision process. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.**Prerequisites:** none**Enrollment Limit:** 15**Enrollment Preferences:** Junior and Seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.**Expected Class Size:** 10**Grading:** yes pass/fail option, no fifth course option**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 302 (D1) ENGL 335 (D1)

Writing Skills Notes: Each student will write three 5- to 6- page papers on which the professor and peers will provide critical feedback on content, style, and grammar. After each cycle of feedback, students will submit a revision, and will have an individual meeting with the professor to discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs which anchor the course engage with the politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So, our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

ENGL 336 (F) Escape, Escapism, Escapology, and the Contemporary American Novel

One prestigious set of contemporary American novels seems to confuse escape (evasion of real danger, such as Nazism or slavery), escapology (evasion of invented dangers, e.g. Houdini's art), and escapism (failure to confront real dangers). Some of these books have hyperbolic titles (*The Amazing Adventures of Kavalier and Clay*, *The Brief Wondrous Life of Oscar Wao*, *A Heartbreaking Work of Staggering Genius*), as if to suggest escapist or escapological fantasies about political or existential dangers that require real escaping. What's going on? We'll discuss the conceptual difficulties of escaping in a globalized world; and in particular, we'll discuss the resistance of contemporary American novelists to contemporary forms of messianism (or a place of return) and utopianism (or a place of departure). Besides the hyperbolically named texts, we will probably read Emma Donoghue's *Room* and Colson Whitehead's *The Underground Railroad*. Film paradigms will probably include *The Sound of Music* and *Life is Beautiful*.

Requirements/Evaluation: three formal papers and contribution to class discussions

ENGL 339 (F) William Faulkner

William Faulkner was an experimental modernist; he was also deeply mired in the whole history of racism in the South and in the U.S. generally. What is the relation of these two facts? What is revealed, and what is hidden, in the brilliant obscurity of his prose? Faulkner seems to have known, consciously or unconsciously, as much as any white person in the twentieth century about race; for that reason, his African American contemporaries and ours have often sought him out in particular for a dialogue on the topic. Thus, we'll read Jesmyn Ward's "Sing Unburied, Sing" alongside Faulkner's five great novels from 1929-1940.

Requirements/Evaluation: Three papers of increasing length, a total of about 15 pages. Participation in class discussions will also be a factor in the final grade.

ENGL 340 (S) Elizabeth Bishop in the Americas (DPE)

Cross-listings: ENGL 340 AMST 340 WGSS 340 COMP 342

Primary Cross-listing

Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: three hours per week, in addition to small group discussion and archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 342 (S) Race and Feeling in Twentieth Century Literature

Cross-listings: AFR 345 ENGL 342

Primary Cross-listing

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings --- guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Sianne Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

Requirements/Evaluation: active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 343 (F) Whitman and Dickinson in Context (WS)

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page

papers and commentaries on their partner's papers.

Requirements/Evaluation: five 5- to 7-page papers, final paper, oral presentation and critique

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write at least five 5-7 page papers, five responses to their partner's writing, and on-going commentary from the instructor on their writing skills.

ENGL 344 (S) Aestheticism & Decadence

Cross-listings: COMP 364 ENGL 344

Primary Cross-listing

"Fin de Siècle": Despair over a seemingly perilous decline in moral standards, scandalous forms of art and writing, anxieties brought on by Britain's uneasy relation to its colonies, and the emergence of new dissident sexual and social identities, led some to fear (and others to celebrate) that the ways of Victorian Britain were not long for this world at end of the 19th century. This course will consider two loosely affiliated artistic movements, aestheticism and decadence, as responses both scandalized and scandalizing to this exhilarating period. The terms themselves are elusive; so, much of our work will entail tracing out the multiple and often contradictory uses of them. Do they designate a distinct cultural and historical moment, a loose set of writers and artists, a set of thematic preoccupations? Or, might we better understand aestheticism and decadence as a style of writing, or even of the self--one we are as likely to find in 21st-century New York as 19th-century London? We'll read writers such as Oscar Wilde, who reveled in amoral manifestos like "art for art's sake" by elevating artifice and shallowness to first principles of life; as well as Sherlock Holmes, who pursued something like "detection for detection's sake". Our reading will range across novels, plays, poetry, essays, and works that seem to exceed or fall short of those genres, all in the period that gave us both science fiction and the detective story. We'll be especially interested in attempts to rethink traditional social bonds in works that value solitude over sociality, the transient encounter over the enduring relationship, new forms of affective communities, and to think about how literary form might relate to those efforts. Along with fiction, essays, and drama, we'll explore their interrelation with the broad and compelling range of visual art produced in this period. Likely authors include: Huysmans, Wilde, H.G. Wells, Darwin, Conan Doyle, RL Stevenson, Kipling, Edith Wharton.

Requirements/Evaluation: two papers (one shorter, one longer), a series of shorter response papers, regular and substantial contributions to class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

ENGL 345 (S) Shakespeare on Page, Stage and Screen: Text to Performance (WS)

Cross-listings: THEA 340 ENGL 345 COMP 343

Secondary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: *Romeo and Juliet*, *Henry V*, *Twelfth Night*, *Hamlet*, *Antony and Cleopatra*, and *A Midsummer Night's Dream*. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of both interpretation and performance, and assess a range of recent film and stage productions.

Class Format: This course will be remote, with occasional smaller tutorial-style sections. If pandemic conditions change significantly, I will move to in-person and/or hybrid meetings as warranted.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; several short reading responses and regular discussion board postings; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 14

Enrollment Preferences: Theatre and English majors or prospective majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Not offered current academic year

ENGL 346 (S) Literary History: Shakespeare, Dickinson, Celan, Knausgaard

This course will consider literature as a distinctive kind of historical object, one that emerges within a specific linguistic, cultural, and political context and that, nevertheless, travels far beyond its point of origin into unknown and, indeed, unknowable futures. The four figures who will concern us this semester are interested in one another - the later writers are careful readers of the earlier ones - but our thinking will go beyond reception history and the dynamics of literary influence. Instead, we will focus on the way in which literature's own temporality structures its history and, indeed, the way in which history itself might be conceived in literary terms. We will read a lot of lyric poems, but we will end the semester with perhaps the most important contemporary European novel. We will also read a significant body of theory and criticism, including works by Theodor Adorno, Giorgio Agamben, Maurice Blanchot, Martin Buber, Sharon Cameron, Anne Carson, Jonathan Culler, Joel Fineman, Virginia Jackson, Boris Maslov, and Sianne Ngai.

Requirements/Evaluation: Midterm paper of 6-8 pages, final research paper of 10-12 pages, thoughtful participation in class discussions

Prerequisites: either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and those intending to major in English. Reading knowledge of German welcome but not expected.

ENGL 347 (F) Love and Revolution

Cross-listings: COMP 344 ENGL 347

Primary Cross-listing

"Love" is here a kind of shorthand for questions of sexuality and gender: why do novels, plays, and films about contemporaneous political revolutions so often get caught up in seemingly superfluous and unrelated disturbances in the field of sexuality and gender relations? In this course we will study such works, which are especially responsive to social currents whose logic they cannot fully articulate. In these texts a state of political revolution almost irresistibly touches off sexual subversiveness as well, inviting the reader or spectator to interpret just what sexual upheaval has to do with political revolution. We will take up this problem in the setting of several historical revolutions and some literary and cinematic works that represent them: for example, the French Revolution (Beaumarchais' *The Marriage of Figaro* and the Marquis de Sade's *Philosophy in the Bedroom*); the Irish Revolution (plays by Synge, O'Casey, and Yeats); the Russian Revolutions of 1905 and 1917 (Bely's *Petersburg*, Babel's *Red Cavalry*); the revolution constituted by Nazism (Hitler's *Mein Kampf*, the films *Triumph of the Will* and *The Damned*); the Prague Spring (Kundera's *The Unbearable Lightness of Being*); and the Algerian Revolution (Pontecorvo's film *The Battle of Algiers*). We will confront such questions as why an author might suggest that revolution can only be sustained through incest and libertinism; why passionate nationalist revolutionaries should be scandalized by the idea of oedipal violence and take refuge in myths of female purity; how to interpret revolution and gender relations in the context of disparate cultures. We will examine historical and social texts as well as artistic ones, learning how literature and history might be read together and inversely: that is, learning to read literature or film as a kind of political event, and to read history literarily, with an eye to its rhetoric and figuration.

Requirements/Evaluation: active participation in class discussions, several short written exercises, two 8-page papers

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 25

ENGL 349 (S) Contemporary Theatre and Performance

Cross-listings: THEA 345 ENGL 349 COMP 355

Secondary Cross-listing

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in the world of theatre and performance today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirgis, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling through performance right now?" Students may be required to attend theatre, dance, and other performances at the '62 Center and beyond.

Requirements/Evaluation: written and dramaturgical-based assignments, an oral presentation, a mid-term paper, in-class discussions, and a final paper or performance

Prerequisites: none

ENGL 350 (S) Modern Poetry

A study of British and American poetry between 1890 and 1945, centering on the radical aesthetic, formal and political shifts which took place during the Modernist era. We will consider the changing authorial and public perceptions of the place and function of poetry during the period, the cross-pollinations and strains between the British and American literary traditions, and the writers' individual relationships with the culture of their times. Readings will focus primarily on the poetry of W.B. Yeats, Robert Frost, T.S. Eliot, William Carlos Williams, Ezra Pound, Marianne Moore, Wallace Stevens and W.H. Auden.

Class Format: This course will be remote, with occasional smaller tutorial-style sections. If pandemic conditions change significantly, I will move to in-person and/or hybrid meetings for these smaller sections if possible.

Requirements/Evaluation: Two 6+ page papers; several written reading responses plus regular discussion board postings; and class participation.

Prerequisites: a 100-level ENGL course; or a score of 5 on the AP English Literature exam; or a score of 6 or 7 on the Higher Level IB English exam; or permission of instructor

ENGL 352 (F) Global Migration: Humanities Perspectives

This course concerns one of the most profound political, social, and cultural issues of our times, the phenomenon of mass migration, the movement of masses of people out of their countries and places of origin and sometimes across continents and oceans. It is a fundamentally contradictory reality: on the one hand, the political, economic, and now even climactic realities of countries and regions across the world objectively produce pressures for the movement of populations; on the other, these very same conditions block the possibility of safe and regularized movement. Migrants and refugees can be routinely denied the most basic rights--to safety, shelter, food and healthcare, let alone access to the law or political representation. The research on this phenomenon has taken place mostly in the social sciences. The purpose of this course is to introduce a different perspective on, and therefore different types of questions about, the phenomenon of global mass migration and the forms of displacement contained within it. It is based in the methods of the literary humanities and will look at some key works from across disciplines and media--literature, anthropology, philosophy, theory, film--to help us understand the history and forms of migrancy in the modern world. We will look at a variety of migrant experience, from "economic" migrant to stateless refugee, and consider how these figures relate to the canonical figure of modern liberal politics, the native-born citizen. We will also look at the institution of the international border and the way it is represented in different cultural genres and experienced by different populations. Our discussions will focus on works by, among others, Conrad, Manto, Arendt, Said, Kanafani, Rushdie, and Sebald.

Requirements/Evaluation: 5-6 Page midterm essay and 10-12 page final essay.

Prerequisites: a 100 level English course or permission of instructor.

ENGL 353 (S) The Brontës

Cross-listings: ENGL 353 WGSS 353

Primary Cross-listing

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel--two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, *Jane Eyre*, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, *The Tenant of Wildfell Hall*, to Emily's singular masterpiece *Wuthering Heights*, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 *Life of Charlotte Bronte*, the first full-length biography of a woman novelist by a woman novelist, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Anne's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

Requirements/Evaluation: discussion, two critical essays and two short creative pieces

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 354 (F) Contemporary American Fiction

This course centers on American fiction from a late phase of postmodernism: we take for granted that history is a form of literature, and that race, gender, and self are constructions. Now what? The premise of the authors of this course is that we can return from these assumptions to write about history, race, gender, and the self in self-conscious but not debilitatingly self-conscious ways. Novels likely to be in the course that move from self or autobiography outwards: Dave Eggers, *A Heartbreaking Work of Staggering Genius*; Junot Diaz, *The Brief Wondrous Life of Oscar Wao*; Ben Lerner, *10:04*; Emma Donoghue, *Room*. Novels likely to be included that work from history inward: Colson Whitehead, *The Underground Railroad*; George Saunders, *Lincoln in the Bardo*. A novel likely to be included that is poised between self and history: Jesmyn Ward, *Sing, Unburied, Sing*.

Class Format: The course will be entirely remote by Zoom.

Requirements/Evaluation: Three papers, totaling about 15 pages. Participation in class discussions will be reflected in the final grade.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English majors; American Studies majors

ENGL 355 (F) Motherhood and Horror: The Movie (WS)

Horror might be the most durable of film genres as well as the genre that's done the most work in terms of transforming the medium as a whole, and its transgressive nature has insured it attention, giving its most famous texts enormous cultural reach when it comes to ongoing conversations as to what defines evil, what constitutes normality, or what comprises the taboo. A look at the particular anxieties the genre has--especially recently--mobilized through its portraits of mothers and motherhood. The course will also touch on other genres that suggest an unspeakable invisible beneath the maternal quotidian. Films to be studied will include Henry Selick's *Coraline*, Alfred Hitchcock's *Psycho*, Jee-Woo Kim's *A Tale of Two Sisters*, Juan Antonio Bayona's *The Orphanage*, Jordan Peele's *Get Out*, Bong Joon Ho's *Mother*, Jennifer Kent's *The Babadook*, Juan Carlos Fresnadillo's *28 Weeks Later*, and Veronika Franz's and Severin Fiala's *Goodnight Mommy*.

Requirements/Evaluation: bi-weekly papers and responses for each student in the tutorial pairings

Prerequisites: English 203 or 204 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: All interested students should preregister. In the event of over enrollment, entry will be based upon writing samples, with some preference given to English majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will be required to 5-6 page papers every other week, and 2-3 page written response papers in between.

Fall 2021

ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322 ENGL 356 AFR 323 AMST 323 ARTH 223

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis' *March* and Ebony Flowers' *Hot Comb*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. Although it is a remote course this year, this class may still feature Object Lab participation, film screenings, and collaborations with guest speakers.

Class Format: This is a remote class that will primarily feature synchronous sessions with some asynchronous sessions.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENGL 358 (S) The Myth of Venice and its Modern Aftermath

Cross-listings: COMP 356 ENGL 358 GBST 356

Secondary Cross-listing

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron's *Childe Harold's Pilgrimage*, John Ruskin's *Stones of Venice*, as well as full readings of Thomas Mann's *Death in Venice*, Marinetti's Futurist manifestos, Italo Calvino's *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti's *Senso* and *Death in Venice* and Nicholas Roeg's *Don't Look Now*. This course is offered in English; all texts are provided in translation.

Requirements/Evaluation: mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

Prerequisites: familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

Enrollment Limit: 20

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ENGL 359 (S) Writing Animals

Cross-listings: ENGL 359 ENVI 359

Primary Cross-listing

Animals surround us, inhabit us. We rely on them for food, for clothing, for friendship, and for ideas. We could say that the whole human enterprise rests on the shoulders of animals, except that we ourselves are, of course, animals, too. In this course, we will explore the rich and rapidly growing body of work that centers on the creatures we live among. Among the questions we will consider are: How do we imagine minds unlike our own? Can we speak for creatures that lack language (or at least our form of it)? How do we explain our love of animals -- and our crimes against them? Readings will include fiction (Kafka's "A Report to an Academy"), non-fiction (Sy Montgomery's *The Soul of an Octopus*), natural history (Helen Macdonald's *Vesper Flights*) and philosophy (Peter Singer's *Animal Liberation*). This course will emphasize student writing, and participants will be invited to experiment with different genres.

Requirements/Evaluation: Students will produce roughly twenty pages of writing in a variety of modes

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

SEM Section: 01 TF 1:10 pm - 2:25 pm John E. Kleiner

ENGL 360 (S) James Joyce's "Ulysses"

This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century, James Joyce's *Ulysses*, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing *Ulysses* as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative perspective. In addition to Joyce's novel, readings will include its epic precursor, Homer's *Odyssey*, as well as critical essays. Students unfamiliar with Joyce's short novel *A Portrait of the Artist as a Young Man*, which introduces characters later followed in *Ulysses*, are urged to read it in advance of the course.

Requirements/Evaluation: active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 363 (S) Literature and Psychoanalysis

Cross-listings: COMP 340 ENGL 363

Secondary Cross-listing

The British psychoanalyst D. W. Winnicott once wrote: "It is a joy to be hidden, and a disaster not to be found." This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first three-fourths of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. *All readings in English.*

Class Format: discussion

Requirements/Evaluation: active engagement with the material and with each other, plus two 5-7-page papers, one 8-10-page paper, and a symposium presentation

Prerequisites: one previous course in either COMP or ENGL, or permission of instructor

ENGL 365 (F) Wonderland(s): *Alice* in Translation

Cross-listings: ENGL 365 COMP 345 GBST 345

Secondary Cross-listing

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to *Alice*, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, *Alice* continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's *Alice* as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Requirements/Evaluation: active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

Prerequisites: students must have at least three years of college-level second-language instruction or the equivalent (advanced proficiency), or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: COMP majors; language majors; language students

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ENGL 366 (F) Modern British Fiction

This course focuses on British novels from the early decades of the twentieth century. We will study the emergence of innovative stylistic and narrative forms characteristic of modernism, and consider the ways in which such innovations shape the works' exploration of questions of psychology and sexuality, moral integrity and betrayal, epistemology and aesthetics, race and empire. Readings will include such works as Ford's *The Good Soldier*,

James's *The Ambassadors*, Conrad's *Heart of Darkness*, Forster's *A Passage to India*, and Woolf's *To the Lighthouse*.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level English course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

ENGL 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers--as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The*

Field, The Crying Game, December Bride, The Commitments, Michael Collins, Ondine, Six Shooter, In Bruges and The Guard; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Requirements/Evaluation: Two long papers, regular short responses and discussion board postings, class participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

Enrollment Limit: 15

Enrollment Preferences: English majors

ENGL 369 (S) American Poetry

This course is devoted to studying the work of key figures in American poetry, from Whitman and Dickinson to writers of our own moment, attentive to the social, historical, and aesthetic pressures that shape their work. We will read widely in the major poetic traditions, from Modernism, Objectivism, and the Harlem Renaissance through the mid-century work of the New York School, Beats, Black Arts, Confessional, and Language poets. We'll also keep a close eye on the contemporary scene, in part through interactions with visiting poets. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form in the long "American century."

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: English Majors using the course to fulfill a requirement

ENGL 370 (S) Literary and Critical Theory in the Twentieth Century

Cross-listings: COMP 380 ENGL 370

Secondary Cross-listing

From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, and a welter of post- prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? And given the entanglement between criticism and teaching, which are the theories that seem to define the work we do (and want to do) here at Williams? This course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, Butler, and Said. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Class Format: This class will have a hybrid format: on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: at least one previous literature or theory course

Enrollment Limit: 12

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENGL 371 (S) The Brothers Karamazov

Cross-listings: COMP 331 ENGL 371 RUSS 331

Secondary Cross-listing

Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

Requirements/Evaluation: completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites: at least one 200-level literature class

Enrollment Limit: 10

Enrollment Preferences: students majoring or considering a major in Russian, Comparative Literature, or English

ENGL 372 (F) Documentary Poetry

One of the most vibrant trends in contemporary writing, documentary poetry draws on various kinds of source materials in the creation of innovative forms. This course will be a joint adventure in the reception and production of such projects, and is designed for anyone interested in the intersections of archival research and creative writing. Part of our work will be to historicize and theorize this mode of literary making, which emerges out of Modernist experiments in polyvocality, collage, and what Ezra Pound termed the "poem including history." We will begin the semester by looking at Muriel Rukeyser's 1938 poetic sequence, "The Book of the Dead," which exposes the complicity of Union Carbide in the silicosis contracted by the miners who dug the Hawk's Nest Tunnel in Gauley Bridge, West Virginia. Rukeyser wrote of her desire for a "poetry [that] can extend the document"; our subsequent readings in this course will look to a number of contemporary book-length projects that do just that. Our documentary models--by such writers as Heimrad Bäcker, Anne Carson, Layli Long Soldier, Don Mee Choi, M. NourbSe Philip, Mark Nowak, and Claudia Rankine--treat a wide

range of subjects, yet all share both an investigative approach and a commitment to thinking about the way individual lives are shaped by larger social and historical structures. Generically, these works make use of the strategies of poetry, but also frequently incorporate essay, narrative, and image to create distinctly mixed forms. Students likewise will choose topics to investigate over the term, conducting original archival research and thinking inductively through the material toward a final project that will be shared with the public on our course website.

Class Format: While this class will be taught remotely, it promises to be a space of intimate engagement and creative growth. We will prioritize synchronous learning, whether online or perhaps in person, outside, while the weather is warm. Each week, we will read and discuss one of the assigned texts; throughout the semester, you'll also be working on your evolving projects, which we will workshop in small groups and in individual conferences.

Requirements/Evaluation: This class asks students to engage deeply with the assigned books, to do significant original research on a topic of their choosing, and to work creatively to bring that research to life. Frequent short writing assignments will assure students' understanding of the readings, as well as help them to pace themselves in the making of their own documentary projects. The semester will culminate with the workshopping, revision, and publishing of students' final projects.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: Preregistered students; if overenrolled, preference will be given to English majors.

ENGL 373 (F) Troubled Spirits

"Trouble" and "spirit" are both words with various and contrasting meanings and surprising overlaps. To be troubled is one thing, to be in trouble can mean several quite different things. Spirit began as breath, yet it transcended breathing. Hoping to soothe and grasp the troubled spirits of their own moment, writers and shamans often seek to conjure up spirits from the past. Some wish to exorcise those spirits, others to be haunted by them. This course will examine the manifestations of troubled spirits in works by American writers, especially African and Native Americans and white Southerners. The authors will include Edgar Allan Poe, William Faulkner, Toni Morrison, Leslie Marmon Silko, N. Scott Momaday, H. P. Lovecraft, Joy Harjo, Alice Walker, Toni Cade Bambara, and Randall Keenan.

Requirements/Evaluation: two or three short papers and a longer final paper of about fifteen pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 374 (S) Mysticism: Vision, Writing, History (WS)

Cross-listings: REL 374 COMP 352 ENGL 374

Primary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally,

and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 375 (F) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 AFR 331 WGSS 318

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

ENGL 376 (F) Landscapes in American Literature

Cross-listings: ENGL 376 STS 377 AMST 376

Primary Cross-listing

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

Requirements/Evaluation: discussion participation; five brief response papers (~2 pages); a mid-semester essay (~5 pages); a final essay (12- to 15-pages)

ENGL 377 (F) Legacies of the Gothic Novel: Feminism and Horror in the Transatlantic World (DPE)

Cross-listings: WGSS 377 ENGL 377 COMP 377

Primary Cross-listing

Much maligned as a popular or "low" genre at its inception in the late eighteenth century, the gothic form has persisted in its popularity as well as crossed into "higher" forms of modernism, postmodernism, and postcolonialism. In this course, we will read key texts in the gothic mode—Frankenstein, Jane Eyre, and Wuthering Heights among others—and follow the ways in which they are revisited and rewritten by contemporary American and Caribbean writers, filmmakers, and artists. Particularly, we will examine how these texts subvert the realist leanings of Anglo-American narrative fiction and its assumptions of enlightenment rationalism by way of two main processes: narrative hypertrophy and feminist revisions of horror. The class will take up select contemporary criticism on the gothic and horror in literature, film, and art. This course will be of interest to students curious about feminism, postcolonialism, cultural criticism, horror, and comparative literature.

Requirements/Evaluation: presentation, paper plus revision, final research project

Prerequisites: one literature or related course

Enrollment Limit: 25

ENGL 379 (S) Writing Art

Cross-listings: ENGL 379 ARTH 379

Primary Cross-listing

This course is conceived primarily as an experiential adventure in creative forms of art writing. We'll read several recent examples of such work (from writers including John Ashbery, Roland Barthes, John Berger, Teju Cole, Jorie Graham, Robin Coste Lewis, Eileen Myles, Ali Smith, Roberto Tejada, and John Yau) to get a sense of the range of approaches, from the ekphrastic poem to the essay to the novel, alive today; and we will spend considerable time in local museums, engaging intimately with works of art through various writing prompts, as you create your own creative responses to visual art. Along the way, we will work to historicize and theorize the relation between the verbal and visual arts, and to ask what looking at art brings to creative writing, as well as the ways creative writing might extend or alter the work of art history.

Class Format: This will be a hybrid course. We will divide our time between seminar meetings, where we will discuss published texts; museum visits, where you'll engage directly with visual art; and small group meetings, where you'll get feedback on your evolving work.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and quality of the work, as evidenced by a final portfolio of revised writing.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: Undergraduate majors in English or Art and graduate students in Art.

ENGL 380 (S) The Art of Modern Crisis

The first half of the twentieth century was marked by extraordinary social and political upheaval. The same era witnessed a feverishly creative revolution in the nature and the strategies of artistic representation. In this course we will examine what these two kinds of crisis have to do with one another: how a wide range of startling innovations in literary and cinematic art may be seen as responses to the particular pressures of the historical crises they represent. Focusing on instances from Britain, Europe, America, India, and/or Africa, we will study such diverse historical crises as the wave of anarchist terrorism around the turn of the century; the Bolshevik revolution; the woman's suffrage movement; World Wars I and II; the Indian independence movement led by Gandhi; and the Cold War. Novels and films will be studied for their distinctive, often dazzling aesthetic strategies for representing such crises, and will be chosen from works by such authors as Joseph Conrad, Andrei Bely, Sergei Eisenstein, Ford Madox Ford, Virginia Woolf, Jaroslav Hasek, Mulk Raj Anand, Elizabeth Bowen, Joseph Heller, and Stanley Kubrick.

Requirements/Evaluation: active participation in class discussions, two 7-page papers, and a final exam

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

ENGL 382 (F) Advanced Workshop in Poetry

As an advanced poetry workshop and reading seminar, this class assumes that its members are already practicing poets with a grounding in the foundational techniques of poetry-writing. We will work in a spirit of shared experiment, pushing our inquiries into this art form further and developing a community of writers engaged in collaborations on and off the page. Readings and assignments will investigate different impulses--formal, textural, tonal, thematic--in poetry across time. I will ask you to inhabit, query, stretch, and even resist these impulses as you develop your own poems. My hope is that through sustained interaction and collaboration with each other, your writing will undergo a variety of productive evolutions.

Class Format: This workshop will include weekly readings and writing assignments, frequent improvisations and collaborations, and the attendance of several arts events.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

Prerequisites: ENGL 281 or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Students who have preregistered; all interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENGL 385 (S) Advanced Fiction Workshop: Form and Technique

A course for students with experience writing fiction and an understanding of the basics of plot, character, setting, and scene. Through close study of stories in both traditional and unusual forms, we'll examine how a story's significant elements are chosen, ordered, and arranged; how the story is shaped; how, by whom, and to what purpose it's told. Students will write new stories, employing the forms and techniques studied, and discuss them in workshop.

Requirements/Evaluation: regular attendance, active participation in workshop, weekly 1- to 2-page brief imitations, two 8- to 18-page story drafts for workshop, and a final portfolio of at least two stories

Prerequisites: ENGL 283 or 384, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: preregistered students; selection is based on writing samples, if course is overenrolled

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ENGL 386 (S) Fiction of Beckett and Sebald

Cross-listings: ENGL 386 COMP 386

Primary Cross-listing

This seminar explores the work of two of the most original and influential fiction-writers of the last half of the 20th century, Samuel Beckett and W. G. Sebald. The work of both writers was profoundly influenced by World War II and the Holocaust, and their fiction centers on issues of loss and memory, of decay (of bodies, things, cultures, traditions), of reason and imagination as fragile means of enduring privation. Yet material so sobering and often bleak has rarely been rendered so absorbingly, or with such unorthodox forms of beauty. Their methods for reinventing fiction differ. Beckett increasingly strips his fiction of details of time, place, and even event, and ultimately struggles to free his speaking voice from the burdens of narration itself, the better to focus attention on the simple but logically rigorous, brilliant, often comic effects of his spare language. Sebald, who sometimes called his novels "documentary fiction," fashions a blend of recollection, fiction, geo-cultural history, and dream-like meditation, focused on the decline of European civilizations; his more chromatic prose, marked by obliquity, melancholy, and dry wit, is filled with curious facts and haunting anecdotes. We will read some of Beckett's short fiction and his great trilogy, *Molloy*, *Malone Dies*, and *The Unnamable*; Sebald's major works of fiction, *Vertigo*, *The Emigrants*, *The Rings of Saturn*, and *Austerlitz*; and a few short stories and novellas by precursors or successors such as Kafka, Borges, and Thomas Bernhard.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors, Comparative Literature majors

ENGL 387 (F) Catastrophe/Apocalypse: The Movie

The film industry has always appreciated the visual and dramatic possibilities of catastrophe, and over the last few decades the apocalyptic and post-apocalyptic sensibility appears everywhere in our mass culture, such that being plugged into the zeitgeist might necessarily entail a familiarity with the emerging tropes and assumptions of this subgenre. This course will consider the ways in which such films model for us those moments when our expectations and/or actions collide with the devastating and unforeseeable realities of our physical world and political situation. How do we measure loss when loss occurs at the upper end of the human scale? How do we consider collectively, in either secular or metaphysical terms, the issue of our own complicity in--if not responsibility for--disaster? Films to be studied will likely include W.S. Van Dyke's *San Francisco*, Steven Spielberg's *Schindler's List*, Roman Polanski's *The Pianist*, George Romero's *Night of the Living Dead*, Ridley Scott's *Blade Runner*, Edgar Wright's *Shaun of the Dead*, Michael Heneke's *Time of the Wolf*, Danny Boyle's *28 Days Later*, Alfonso Cuarón's *Children of Men*, Bruce McDonald's *Pontypool*, Yoshiro Nakamura's *Fish Story*, Jordan Peele's *Get Out*, and Joshua Oppenheimer's *The Act of Killing*.

Requirements/Evaluation: four short papers and in-class presentations

Prerequisites: ENGL 203, or 204, or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in English or Comparative Literature; then junior majors in either; then newly declared majors in either

ENGL 389 (F) Fiction of Virginia Woolf

Cross-listings: ENGL 389 WGSS 389

Primary Cross-listing

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including *The Voyage Out*, *Jacob's Room*, *Mrs. Dalloway*, *To the Lighthouse*, *Orlando*, *The Waves*, and *Between the Acts*, together with selected short fiction and critical essays.

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: none

Enrollment Preferences: English majors, WGSS majors, seniors

ENGL 390 (S) Robert Frost and Seamus Heaney

This seminar closely examines the achievement of two of the most influential poets of the last hundred years: America's Robert Frost (1874-1963), and Seamus Heaney (1939-2013)--the Nobel laureate widely acknowledged as the greatest Irish poet since Yeats. They have garnered high praise from elite literary critics, and also captured the imaginations of a broad reading public. They write in an idiom that is deeply rooted in the ordinary vernacular

speech of their respective countries, but rises above it into a universal language that transcends place and time. Their images first focus our gaze on the natural world we can see all around us, but then subtly shift our attention to what can't be readily observed or reliably known. Their poems can initially appear simple or self-evident in their meanings, but then quietly double-back on us with unexpected forms of mystery and complexity. To get a comprehensive sense of the arc of their careers, we will read most all of their poems, with each class discussion focusing on a few particularly important texts. We will also read some of their essays and lectures on the art and purpose of poetry. Where appropriate, we will attend to the biographical, cultural, and (especially with Heaney) political circumstances that shaped their opportunities as artists.

Class Format: Remotely-taught course

Requirements/Evaluation: Midterm and final papers (15-20 pages in total)

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 14

Enrollment Preferences: English majors, but non-majors with a strong interest in poetry are also most welcome.

Distributions: (D1)

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 391 (S) Democratic Vistas

Cross-listings: ENGL 391 AFR 386

Secondary Cross-listing

This seminar will focus on the ways in which texts create nuanced representations of democratic ideals and practices as well as, of course, representations of the failures of democratic ideals and practices. Our goal will be to explore how literature encourages readers to think about democracy, and what impact that can have on our lives as readers and citizens. To this end, we will study work across five genres--poetry, fiction, non-fiction, photography, and film--to arrange and enhance our sense of how plot, structure, figuration, and allusion occupy themselves with the challenge of the Democratic Vista: which is to say with visions of what democracy is, has been, and has the potential be. Among the texts and authors likely to be studied are Robert Hayden, Ralph Ellison, Toni Morrison, Don DeLillo, Jamaica Kincaid, Ishion Hutchinson, Natalie Diaz, Octavia Butler, Colson Whitehead, Morgan Parker, Nana Kwame Adjei-Brenyahm Teju Cole, and contemporary films such as Ryan Coogler's BLACK PANTHER and Boots Riley's SORRY TO BOTHER YOU.

Requirements/Evaluation: attendance and participation, two short essays, and a 12- to 15-page final paper; additional requirements will include film screenings outside of class, interactive (e.g., Skype, etc.) author visits inside of class, and campus talks germane to the seminar

Prerequisites: none, open to all students

ENGL 392 (S) Acción Poética: Poetic Art's Critiques of an Americas of Conquest (DPE)

Can poems be thought of as social acts, or as a kind of "acción poética" (poetic action)? What would it mean, in other words, to resituate our understanding of poetry within the realms of speech act theory, performance studies, and the local and global histories of social conflict in the Americas? In this course, we will examine the long history of poetic form in the Americas to trace the emergence of separate, but related poetic experimentalisms, particularly in the literary traditions of modern Latin American and U.S.-Latinx poetry and performance art. Throughout the course, we'll ask what it means to write with and without the body in mind. We'll attend to the embodied forms of poetic expression that emerge prior to the

twentieth century while investigating poetry's articulations of geo-social space in the Americas. Our course will then focus on the vanguard poetries of twentieth-century Latin America (Neruda, Mistral, Vallejo, Zurita, et al.) and on the transcultural modernities of U.S.-Latinx poetry and performance. Through our explorations of poetic form's encounters with a social history of the Americas, we'll receive a glimpse of what poetry looks like in a world of spiritual, political, ecological, and humanitarian crises. Readings will likely include works by: Gabriela Mistral, Pablo Neruda, Vicente Huidobro, César Vallejo, Raúl Zurita, Cecilia Vicuña, Miguel Algarín, Sandra María Esteves, Willie Perdomo, Julia de Burgos, Emmy Pérez, Gloria Anzaldúa, Lorna Dee Cervantes, Sandra Cisneros, Francisco X. Alarcón, Guillermo Gómez-Peña, Coco Fusco, Laura Aguilar, Asco, Sor Juana Inés de la Cruz, Phillis Wheatley, José Martí, Rubén Darío, Walt Whitman, Emily Dickinson, and more. Although useful, reading knowledge of Spanish is not expected or required; Spanish-language texts will be provided in English translation alongside the original.

Requirements/Evaluation: Active participation in in-class and online discussion, two close-reading papers (5 pages each), contributions to course blog, and a final 8-10 page research paper.

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 25

Enrollment Preferences: English majors, but non-majors with a strong interest in the subject are welcome.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout U.S. and Latin American history. The course emphasizes the experiences of colonization and U.S. imperialism in Latin America and those of social conflict in border regions throughout the U.S. Moreover, it invites students to ask what it means to write poetry from the standpoint of various subject positions (as determined by race, class, gender/sexuality, etc.).

ENGL 393 (F) Staging Identities

Cross-listings: THEA 393 ENGL 393

Secondary Cross-listing

The construction of selfhood is always to some extent a performative act--as Shakespeare's Jacques says, "All the world's a stage / And all the men and women merely players[.]" That performance is inherently dual, since constituted both for the audience of the wider social world, and for the self who seeks to act. Drama as a genre, with its constant negotiation of the competing claims of illusion and the operations of reality, is invariably interested in the exploration of social identity, in the tensions between public and private selfhood, and in the functions of 'performance'. In this course we will examine theatre's response to the challenge of self-fashioning in the modern era, and consider the wider ontological status of performance as a category within the context of twentieth century drama and theatrical staging. Readings will include Shakespeare's *Hamlet* and plays by Chekhov, Pirandello, Churchill, Shepard, Lori-Parks, Beckett, Walcott, Pinter and others, along with selected criticism, theory, and psychoanalytical writings.

Class Format: Our class meetings will be conducted remotely, but with the seminar group regularly broken into small discussion sections. I will consider moving to in-person teaching for the discussion sections, depending on conditions on campus as the semester progresses.

Requirements/Evaluation: Two papers totaling about 12 pages, regular posting on discussion boards, and active participation in discussion.

Prerequisites: A THEA course, a 100-level ENGL course, or a score of 5 on the AP English Literature exam.

Enrollment Limit: 14

Enrollment Preferences: Theatre and English majors or prospective majors.

ENGL 394 (S) The Nature of Nature

Cross-listings: ENVI 390 ENGL 394

Primary Cross-listing

"Nature" is one of the commonest words in English. And yet what does it signify? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying attention to the difficulty of narrating processes that are often too big, too small, too quick or too slow for direct human apprehension. We'll also explore the ways popular nature writing mingles scientific reporting with implicit judgments about human identity, morality, and social organization. Writers studied will include Elizabeth Kolbert, N. Scott Momaday and Charles Darwin. We'll also consider the technological mediations of nature in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page online essay incorporating audiovisual materials. Active participation in class. Note that this course will be offered exclusively online.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 395 (F) Signs of History

Cross-listings: HIST 395 ENGL 395 COMP 395

Primary Cross-listing

What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Requirements/Evaluation: two papers, one 6 and one 10-12 pages in length, and general participation

ENGL 396 Theater and Voyeurism

Seventeenth-century philosophy was ambivalent about the senses. Around the same time as Descartes was wondering whether everything he had ever seen, heard, and felt might have been an illusion produced by an evil deceiver, Francis Bacon was placing the close observation of nature at the center of a new scientific practice. Do the senses shore up the subject by distancing her from objects and from others and by providing her with insight about them? Or do the senses make her vulnerable to a world that is endlessly and often violently imposing itself on her? We will consider this problem in cultural and intellectual history through the case of the theater, with a special focus on tragedy. Ancient Greek tragedy made the mere fact of seeing the basis of an epistemological difference between the audience (whose looking is a privileged form of knowing) and the protagonist (who is paradigmatically blind), and this difference can be understood as a way of reflecting on the conditions of the theatrical medium itself: the audience sees the character, but the character does not see the audience. Early modern tragedy drew on the Greek tradition of dramatic irony, but wondered whether looking was as straightforward as it looked, making voyeurism a two-way street: one form of seeing what others don't involves being forced to see something unbearable, and early modern theater took a special interest in obscenity, which Greek theater tended to avoid or marginalize. We will consider works by Homer, Sophocles, Euripides, Aristotle, Ovid, Seneca, Marlowe, Spenser, Shakespeare, Vermeer, Jonas Barish, Laura Mulvey, Jacques Rancière, and Michael Fried.

Requirements/Evaluation: One 7-page midterm paper, one 12-page final paper, thoughtful participation in class discussions

ENGL 399 (F) Poetry & Performance

Though poetry was an oral art form before it was anything else, its contemporary relationship to performance is varied and complex. This course explores poetry writing for/as performance, including works that might be categorized as "spoken word poetry" as well as those that sit far outside of that designation. Course readings will include contemporary and canonical writers, from Walt Whitman, to Sonia Sanchez, to Sarah Kay. We will also study works that blur the genres of poetry, performance art, and theater. Students will engage in writing and performance activities in class, create collaboratively, and exchange feedback on each other's work. The semester will culminate in a final performance open to the campus community. Students must have taken at least one course on the practice of creative writing, acting, or another performance discipline.

Class Format: Combined seminar/studio

Requirements/Evaluation: In addition to in-class participation, students will be graded based on thorough completion of readings, creative exercises, reflection/response papers, feedback letters, revisions, and the final performance.

Prerequisites: ENGL 140, 281, or 288. Other courses on the practice of creative writing and/or performance (e.g., THEA 101) will also be considered.

Enrollment Limit: 12

Enrollment Preferences: Pre-registered students. Should the course over-enroll, selection will be made based on a short application including work samples.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

ENGL 402 (S) The Historical Novel

Cross-listings: ENGL 402 COMP 406

Primary Cross-listing

Setting a novel in a prior time period risks estranging a reader, yet the genre has roused deep-rooted interest, intense critical debate, and aesthetic daring. In this course, we will explore the complex and layered uses of a historical past in literary works of the seventeenth through twenty-first centuries, by way of novels by Madame de Lafayette, Scott, M. Shelley, Dickens, Eliot, Ford, Woolf, Morrison, Sebald, and Roy. Exploring the uses of gothic and sensational effects, dystopian and utopian possibilities, and fractured time, we will consider the aesthetic and political experiments historical novels have spawned. We will do so in context of the sustained critical engagement with the genre by such thinkers as Lukacs, Benjamin, Adorno, Jameson, McKeon and Moretti.

Requirements/Evaluation: class discussion and a 20-page final paper

Prerequisites: a 100-level English course and a 300-level English course or permission of the instructor

ENGL 407 (F) Literature, Justice and Community (DPE)

Cross-listings: ENGL 407 COMP 407

Primary Cross-listing

Can we imagine possibilities of justice not dictated by already determined norms? What would a community founded on such a conception of justice look like? Can we imagine a version of community not founded on exclusion? What would the members of such a community look like-what version of subjectivity would that community imply? And might literature in particular have something to say about the possibilities for such versions of community, selfhood, and justice? This course will look at recent, theoretically-oriented writing on justice and community, with an emphasis on the work of Hannah Arendt, Jacques Derrida, Jean-Luc Nancy and Giorgio Agamben. We will place this challenging and exciting philosophical work in relation to fiction from Euripides to Kafka, Farah and Kushner, films (Almodovar, Farhadi), photography (Silva, *Badlands* and worldly examples of competing claims to justice. The course pursues the aims of the DPE initiative by engaging works in which cultural difference and power differentials reveal the limits of universalizing accounts of law and justice, works such as Euripides' *Bacchae*, Nuruddin Farah's *Maps*, Louise Erdrich's poetry, and Farhadi's *A Separation*. But the course will equally suggest that such contingency is inherent in the concept of justice as such, insofar as the problem of justice is bound up with forms of constituting indebtedness that define humans as communal beings. In that sense, contingency, and differentials of power mark justice even in its most familiar instances-intimately and close to home, as it were.

Class Format: discussion

ENGL 415 (S) Theorizing Aesthetic Outrage

Outrage has become an increasingly charged and prominent feature of public life in our current political climate. Yet it is surprisingly difficult to analyze and understand, particularly when we confront public forms of outrage, in which collective behavior may shape, complicate, and change its nature. Why are accounts of the reasons for one's outrage so often inadequate to its vehemence? How are we to understand the strange, unconscious mimicry into which the antagonists in public outrage are so often drawn? What are the sources of the pleasure that shadows outrage? In this seminar we will attempt to theorize public outrage, drawing on a range of theoretical models from several disciplines: aesthetics, cultural and political theory, psychoanalysis, gender and sexuality studies, anthropology and sociology. We will be particularly concerned with aesthetic outrage--riots, censorship, and trials in response to literary and cinematic works, particularly where such outrage has been well documented--and will explore the possibility that such outrage is discernibly different from more straightforward instances of political outrage, such as bread riots or Black Lives Matter activism. We will also analyze the basic nature of outrage in the context of affect studies. Theoretical work by such writers as Sedgwick, Berlant, Foucault, Freud, Weber, Lévi-Strauss, Girard, Arendt, Bakhtin, Butler, Douglas, and Žižek; literary and cinematic works by such authors as Sade, Synge, O'Casey, Jarry, and Eisenstein.

Class Format: tutorial format once or twice during the semester to discuss writing

Requirements/Evaluation: active, regular class participation, a final paper of about 20 pages, written in stages (some discussed in tutorial format)

ENGL 416 (S) Postcolonial Theory and the World Literature Debates (DPE)

Cross-listings: ENGL 416 COMP 416

Primary Cross-listing

When publishers, scholars, reviewers, and critics talk about the massive, beautiful, prismatic literary and cultural traditions outside of Western culture, they sometimes refer to them by their geographical provenance--African literature, say, or Sumerian art--or perhaps by their historical moment--Ottoman architecture, or postcolonial Indonesian poetry--but more and more, the catch-all category of World Literature has begun to hold sway in influential places, and is changing the shape of how we think, learn, and write about non-Western aesthetics, as well as how we participate in our "own" cultures in all their complexity. If we can imagine a kind of literature that truly goes under the headings of "World Literature," or "Global Literature," what can we possibly exclude? Doesn't all literature belong to the world? What might we gain by using this term, and what might we lose? What histories are attached to the various names and classifications we assign to culture and how does cultural "othering" uphold or resist forms of economic, political, and military dominance? In this advanced seminar, we will work carefully through the history and influential writings of postcolonialism as a particular challenge to hegemonic forms of representation, cultural production, and naming, starting with a close consideration of the writings of the movement's founders and key commentators, including Aimé Césaire, Frantz Fanon, Edward Said, Gayatri Spivak, Robert J.C. Young, Gauri Viswanathan, Partha Chatterjee, and Homi Bhabha, and consider their influence on later postcolonial writers and critics around the world. In the second half of the semester, we will turn our attention to the historical underpinnings and current firestorm of debates about World Literature, beginning with Goethe, Marx, Adorno, Frederic Jameson, Franco Moretti, and Pascale Casanova and shifting finally to critics of the ideas of World and Global Literature.

Requirements/Evaluation: two to three papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: students who have done relevant coursework in Division I or II

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Unit Notes: Theory course

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 416 (D1) COMP 416 (D1)

Difference, Power, and Equity Notes: This course will consider literary canonicity and postcolonial theory's challenges through an examination of genre, criticism, institutional power, material conditions of publication, and postcolonial culture's relationship to the legacies of colonialism. We will interrogate power and the writing of history, material and cultural resource extraction, and narrative theory against developmental discourse.

Not offered current academic year

ENGL 418 (S) Modernisms and the Archive

Cross-listings: AMST 418 ENGL 418

Primary Cross-listing

This course focuses on American Modernist writers who transformed American literature in the first half of the twentieth century. We explore how these writers--including W.E.B. DuBois, Sterling Brown, Gertrude Stein, José Garcia Villa, Marianne Moore, Nella Larsen, Zora Neale Hurston, Wallace Stevens, Langston Hughes, HD, and others--confronted the experience of modernity in new art that responded to dramatic, often cataclysmic change. We define key markers of the modernist aesthetic, including its formal experimentation and self-reflexivity; and study the sweeping political, social, and cultural events and issues that influenced these writers, including two world wars, rapid industrialization, mass migrations, women's suffrage, Jim Crow racism, and a pandemic. We also look specifically at how the archives of Modernist writers--collected in institutions across the world--have shaped the discourse and narrative arc of literary history. Central to this archive-based discussion, students will have the opportunity to take a deep dive into the Sterling Brown archive here on the Williams College campus. Recently acquired by Williams College Library Special

Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century. Our class is timed for the opening of the Sterling Brown archive in 2022 and the events and speakers planned on campus for that year, exactly one hundred years after Brown graduated from Williams College in 1922.

Requirements/Evaluation: Short papers, writer's notebook, archival presentations, final paper (12-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

Enrollment Preferences: English Majors, American Studies Majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENGL 421 (F) Fanaticism

Cross-listings: COMP 421 ENGL 421

Primary Cross-listing

Eighteenth and nineteenth-century writers of literature and political philosophy repudiate fanaticism, whether as a religious, political or amorous posture. But what is fanaticism, and why should it be considered such a threat, particularly during a period that embraced an enlightened secular rationalism? In this course, we will examine these questions by considering literary texts that dramatize fanaticism in light of accounts by philosophers and historians. Readings will include novels by M. Shelley, Hogg, Dickens, Eliot, Conrad, among others, and political philosophy and historical writings by Voltaire, Kant, Diderot, Burke, Hume, Carlyle, Adorno, and a range of recent critics. We will also watch films by Riefenstahl, Hitchcock and Pontecorvo, and look at paintings, drawings and sculpture by Fragonard, Goya, and Shibonare. Since fanaticism has recently had considerable political currency, we will also examine contemporary accounts that reanimate the debates and concerns of the course.

Requirements/Evaluation: two shorter or one long paper(s), approximately 20 pages

Prerequisites: a 300-level English course or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: junior and senior English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: cost of books

Fall 2021

SEM Section: 01 M 7:00 pm - 9:40 pm Anita R. Sokolsky

ENGL 450 (F) Melville, Mark Twain, & Ellison

As an epigraph to his novel, *Invisible Man*, Ralph Ellison selects a quotation from Herman Melville's story, "Benito Cereno." In the prologue to *Invisible Man*, Ellison invokes a sermon that appears briefly in the opening chapter of *Moby-Dick*. In his essays on comedy and American culture, Ellison comments trenchantly on *Adventures of Huckleberry Finn*. Melville and Mark Twain were, in many obvious ways, as different as two writers can be.

Nonetheless, they also have many surprising similarities, and it is not difficult to understand why both are so important to Ellison. This course will examine the novels, stories, and essays of these three writers, with particular attention to the themes that they have in common and to the traits that make each of them distinctive. Race, slavery, epistemology, and the nature of American democracy are among those themes.

Requirements/Evaluation: journal, a final 15-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

Enrollment Preferences: English majors

ENGL 456 (F) Topics in Critical Theory: Hegel and the Dialectic

Cross-listings: COMP 456 ENGL 456

Primary Cross-listing

This course is for students of any major who wish to continue studying critical, cultural, or literary theory. Students will give close attention to a single theorist or philosophical school or perhaps to a single question as taken up by several theorists. Prior coursework in critical theory or continental philosophy, no matter the department, is strongly recommended. The subject of this semester's seminar is the dialectic. "Dialectical" is one of those collegiate words, the kind of word that some people use a lot without knowing for sure what it means. That said, there are a couple of different ways of making sense of dialectics. The word's nearest synonym is "dialogue." Broadly, then, "dialectics" is a name for any philosophy that incorporates into itself the back-and-forth of conversation. Modern dialectics, meanwhile, sets out from two ideas: first, that it is impossible to think about anything in isolation, that we understand all things via relation and contradistinction, that we couldn't call any person "female" if we weren't also compelled to call some people "male"; and second, that all such conceptual pairs (male/female, black/white, east/west) are less settled than they look. You can't not divide the world into oppositions, and all such oppositions will collapse. This is an idea that, systematically pursued, can change the way we think about language, ethics, politics, literature, and art. We will read key texts from major dialectical thinkers: Hegel, Marx, Adorno, but mostly Hegel.

Requirements/Evaluation: seminar paper of 25 pages; informal weekly writing; class participation

Prerequisites: prior coursework in critical theory or continental philosophy is recommended but not necessary, no prior coursework in English is required

Enrollment Limit: 15

Enrollment Preferences: seniors with background in critical theory

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENGL 483 (S) Representing History

Cross-listings: COMP 483 ENGL 483

Primary Cross-listing

Moments of political turmoil expose the highly charged ways in which a culture structures itself around a narrative past. In this course, we will read literary and cinematic works that invoke such moments of upheaval—the French and Russian Revolutions as well as those of 1848, the rise of fascism and the Great Depression of the 1930s, the battle for Algerian independence, the AIDS crisis, among others—in order to explore those fraught narratives of the past. We will consider such issues as the rise of the historical novel, the aesthetics of fascism and of democracy under pressure, fantasies of decolonization, representational clashes of culture, forms of affective and sexual disorientation, and the uses of melancholy in

representing historical loss. Readings will be drawn from literary works by Gay, Edgeworth, Scott, Shelley, Balzac, Eliot, Conrad, Kafka, Babel, Mann, Borges, Stoppard, Kushner, Morrison, Pamuk, Bolano, and Philip, and theoretical essays by Kant, Burke, Carlyle, Marx, Benjamin, Adorno, Foucault, de Certeau, Jameson, Lefort and Ahmed. Films will include such works as Eisenstein's October, Reifentahl's The Blue Light, Wellman's Nothing Sacred and Pontecorvo's The Battle of Algiers.

Class Format: discussion

Requirements/Evaluation: two shorter or one longer paper/s, approximately 20 pages

Prerequisites: a 300-level English course or permission of the instructor

Winter Study -----**ENGL 11 (W) Poetry and the Visual Art Journal**

Academic courses from all disciplines at Williams often require the use of a journal to help students focus on their work. This course will push that concept to its limit as we explore poems of all kinds and our visual responses to them. Our goal will be to find real and tangible ways that visual art journaling can enhance our learning and writing. Using collage, watercolor, ink and other mediums, we will create and record visual insights as we read, and we will explore how this practice can help us conceive what we are reading. We will include both our own poems as well as the work of other poets in our finished journals. There will also be readings from various authors and artists on the subject of journaling as a tool for learning.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference to first- and second-year students

Grading: pass/fail only

Unit Notes: Patricia Malanga received her BA in English Literature from the University of Massachusetts in 1990. While working as the Academic Assistant in the English Department here at Williams for the last 20 years, she has explored her love of literature and her love of the visual arts. This course will be the culmination of those interests.

Materials/Lab Fee: \$40

Winter 2022

ENGL 12 (W) D.I.Y. Publications: Paper, Print, and Power

Like most western institutions, the field of traditional publishing has been, and continues to be deeply shaped by power dynamics that more often than not leave out the voices of the most marginalized members of society. Zines, chapbooks, artist books, blogs, and other "do-it-yourself" (D.I.Y.) forms of publication have served as mechanisms of communication, expression, and community building that give voice to marginalized creators. Through engagement with readings, discussion, local field trips, and items in the libraries' collection, this course will explore the historical and social dynamics that have shaped the current landscape of D.I.Y. publishing. At the same time, this course will provide space and resources for students of all skill levels and backgrounds to develop their own practical publishing skills, from content generation to production and distribution. As a culminating project, students will complete one or more D.I.Y. publications of their own design, submitted with a short reflection paper. Class time (two 3-hour sessions per week) will be split between discussion of weekly themes presented in the reading, and hands-on time exploring different methods that can be utilized in the creation of their own publication. Enrolled students will be expected to complete reading and additional studio/lab time outside of class, not expected to exceed 15 hours per week.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to first-year students and English majors

Grading: pass/fail only

Unit Notes: Hale Polebaum-Freeman (they/them) is a Reference and First-Year Outreach Librarian who can often be found reading or making zines in Sawyer library. Trevor Murphy is an Instructional Technology Specialist who often has ink stained fingers from working on making comics late at night.

Materials/Lab Fee: \$35

Winter 2022

ENGL 13 (W) Photography in Fiction: Study and Practice

Since its invention in the early 19th century, photography has found countless documentary and artistic applications. As an art form, it is not only a medium of its own, but one which has entered into dialogue with other media. Perhaps nowhere has photography been put to such intriguing use as in fiction. Since the early 20th century, authors as diverse as Virginia Woolf, German novelist W.G. Sebald, and the contemporary Nigerian-American writer and photographer Teju Cole have deployed photographs throughout their texts. In this course, we will look at this literary tradition, exploring the way that text and image enter into a complex dance, at times enhancing narrative, at times troubling it. What can we make of these strange and wonderful hybrids? What place do images have in traditional narratives? This class, too, takes a hybrid form: examining exemplary texts, writing our own fiction, and incorporating our own photography. It will be run as both a fiction workshop as well as an English literature class: as we read, write, and look, we will find ourselves not only drawn into the narratives themselves, but sent beyond them, into questions of history, gender, landscape, memory, and more. Evaluation will be based on workshop participation and classroom discussion, brief weekly written responses to our literary texts, critique of peers' work, and a ten-page creative piece that incorporates fiction and photography. We will typically meet twice a week for three hours of discussion/workshop/writing exercises. The class's other mandatory requirements consist of two movie screenings and three field trips to the WCMA, Mass MoCA, and The Clark.

Requirements/Evaluation: 10-page final paper, short weekly reading responses, and weekly critiques of peers' work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by application

Grading: pass/fail only

Unit Notes: Sara Houghteling is the author of {Pictures at an Exhibition}. She is currently a lecturer in the English Department at Stanford University, where she teaches classes on the intersection of art and literature.

Materials/Lab Fee: \$120

Winter 2022

ENGL 14 (W) Create a TV Series

Cross-listings: ENGL 14 THEA 14

Primary Cross-listing

Every TV show starts with an idea. That idea becomes a Pilot--the first episode of a series. This course will help you learn what constitutes an effective idea for a TV show, and how to convert said idea into a pilot en route to a series. Our focus will include: What goes into a pilot that might suggest that there are many more stories to tell over multiple seasons? What makes the lead character complicated enough to support a whole world? Who are the other important characters, and how do they interact with that main character? How does the action in the pilot support the premise and promise of the series? In addition to developing our own stories, we will also analyze existing pilots to help us consider such issues as how concept and character are launched, and how to identify your "A", "B", and "C" stories. Along the way we will also learn about the realities of the business and the career paths of television writers, and guest speakers will include producers, studio executives and currently working writers. The goal will be a simulation of a collaborative and supportive "Writers' Room" where students can test and shape their premises, stories and characters. By the end of Winter Study each student will have written a 5- to 7-page treatment that conveys the show's world, people, and fundamental arcs, 5-7 sample pages of the pilot itself, and a verbal "Pitch" to be presented on the last day of class to a studio head. Class will meet three times a week for two hours, with individual one hour follow-ups.

Requirements/Evaluation: 5- to 7-page series treatment, 5- to 7-pages of pilot, and an oral fifteen minute pitch

Prerequisites: love stories and storytelling

Enrollment Limit: 12

Enrollment Preferences: seniors and English and Theater majors given preference

Grading: pass/fail only

Unit Notes: An Emmy-nominated writer and executive producer, Michael Sardo has worked on hundreds of episodes of television and developed and written series pilots for HBO Max, Showtime, Starz, TNT, ABC, NBC, Lifetime and USA networks, HBO Independent Productions, eOne, Witt/Thomas, NBC Productions, Universal Cable Productions, Slingshot Global Media, Circle of Confusion TV, Storyworld Entertainment, MGM Television and Radical Media. Michael teaches writing at Columbia University School of the Arts.

ENGL 18 (W) Getting to the Big Ideas

Cross-listings: MUS 20 ENGL 18 AFR 20 THEA 20 SPEC 20

Secondary Cross-listing

What is the central idea behind any creative enterprise and how does one discover it? What is the artistic inspiration that fuels the creative journey? In this course, we will attend to these questions through an unearthing of the collaborative process of creative discernment. Led by the Emmy-Award Producer and Williams Alumnus Frank Doelger '75 (*Rome*, *John Adams* and *Game of Thrones*), and in conversation with award-winning documentary filmmaker and Professor of Africana Studies Rhon Manigault-Bryant, students will consider multiple narrative forms as they take a deep dive into the big ideas that generate stories. The course is informed by the work of African American science fiction writer Octavia E. Butler (1947-2006). With her collection *Blood Child and Other Stories* as a springboard, and a dynamic scaffolding process, we will explore the manifold creative decisions that inform the transformation of stories from one medium to the other. Each week, student groups will tackle the logistics that drive the creative process, including character formation, animation, music, and storyline. They will develop stories as writers and designers (week one); directors and composers (week two) and producers (week three), and at the end of the course present a culminating project of their collaborative storytelling journey. That final project--the creation of a lookbook--visually tells the stories creatives in a format that is used throughout the television and film industries. Informed by the tutorial style 15 students will be placed into groups of 3, and together will design the lookbook. The entire class will meet twice per week from 11am to 1pm, and each trio will have their own individual meeting times with the instructor(s) for 1.5 hours between 11am and 3pm. Groups will also

meet a minimum of 2 hours outside of organized class time. Experts throughout the film and television industries will be "zoomed" in at no additional cost to students.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students will be selected to ensure the broadest sense of diversity and inclusion (race, gender, identity, etc) as well as diversity of major and field

Grading: pass/fail only

Materials/Lab Fee: \$250

Winter 2022

LEC Section: 01 M-F 10:00 am - 11:50 am Frank G. Doelger

ENGL 19 (W) The Personal is Political: A Nonfiction Writing Workshop

Since St. Augustine's Confessions, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual... reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a nonfiction project-memoir, personal essay, or a hybrid form-the final draft of which will determine half of your grade. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy significantly more time outside of the classroom-roughly twenty hours a week-during which you'll be engaged in the writing process and reading for class.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: priority to seniors who won't have the chance to take the course again

Grading: pass/fail only

Unit Notes: Julia McKenzie Munemo went to Bard College before earning a master's in education at Harvard. After building a career as a freelance writer, she earned an MFA in creative nonfiction from the Stonecoast Program at the University of Southern Maine. Her personal, political first book, *The Book Keeper: A Memoir of Race, Love, and Legacy*, was published in 2020.

Materials/Lab Fee: none

Winter 2022

ENGL 20 (W) Winter Naturalist's Journal

Cross-listings: ENVI 20 ENGL 20

Secondary Cross-listing

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out-of-doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose) as well as observational drawing. Everyone will be required to keep a nature journal, which will be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. The instructor will meet with the students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be

provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten-page paper, and to read one or more of them at the final celebration.

Requirements/Evaluation: final project or presentation, daily journal and several 2 to 3 page papers

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: random selection

Grading: pass/fail only

Unit Notes: Christian McEwen is author of "World Enough & Time: On Creativity and Slowing Down" and the editor of "Jo's Girls; Tomboy Tales of High Adventure; The Alphabet of the Tress: A Guide to Nature Writing" as well as several other books. She is currently working on a book called "In Praise of Listening". Guest lecturer Barbara Bash is an artist and calligrapher who has published several books, including True Nature: An Illustrated Journal of Four Seasons in Solitude.

ENGL 25 (W) Journalism Today

This course will give students an in-depth view of the inner workings of journalism today, featuring the perspectives of several Williams alumni who work in print, broadcast, and new media. Our guests -- who will visit in person and online -- will discuss how to report and write the news, as well as their own experience in the profession. In addition to reading and watching the work of our guests, there will be required texts about issues in journalism and students will complete several small reporting and writing exercises in addition to one feature-length news story on a topic chosen at the beginning of the course. In previous years, guests have included journalists from CNN, the New York Times, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: priority will be given to seniors and juniors, preference for students with a demonstrated interest in journalism (as expressed in a statement of interest, if needed)

Grading: pass/fail only

Unit Notes: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. He graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Materials/Lab Fee: \$300

ENGL 42 (W) Designer Genes Intensive

In his book *High Noon: 20 Global Problems, 20 Years to Solve Them*, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.'" Collins and his associates couldn't have picked a more resonant text from which to quote than Shakespeare's play, *The Tempest*, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics. These texts--many of which also provide a model of exceptional writing--will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.

Class Format: This all on-line class will feature guest speakers, regular time for writing with plenty of feedback during the drafting process, and assignments that take advantage of our digital environment.

Requirements/Evaluation: Several short, analytical papers; discussion posts

Prerequisites: permission of a dean

Enrollment Limit: 12

Enrollment Preferences: students who need to make up a deficiency

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester, Winter Study, and WS credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.

Not offered current academic year

ENGL 99 (W) Independent Study: English

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2022

CENTER FOR ENVIRONMENTAL STUDIES

ENVIRONMENTAL STUDIES MAJOR

Chair: Associate Professor Nicolas Howe

Associate Director: Lecturer Sarah Gardner

Associate Professor: N. Howe. Assistant Professor: L. Martin. Assistant Professor: Brittany Meché. Class of 1946 Visiting Distinguished Professor of Environmental Studies: D. Cassuto. Visiting Assistant Professors: S. Auer, A. Merleaux. Lecturers: S. Gardner, J. Racela, Visiting Lecturer: A. Apotsos. Research Associates: H. Art, R. Bolton, D. Dethier, L. Venolia.

Environmental Studies Advisory Committee (2020-21): Professors: R. Bradburd, J. French. Associate Professors: N. Howe, L. Maroja. Assistant Professors: A. Carrasquillo, J. Constantine, L. Martin. Lecturers: S. Gardner, J. Racela.

Maritime Studies Advisory Committee (2020-21): Professors: R. Cox, L. Gilbert, C. Ting. Assistant Professor: J. Constantine. Associate Dean: J. Gerry.

Mystic Executive Director: T. Van Winkle.

MEMBERS OF THE CENTER FOR ENVIRONMENTAL STUDIES (2020-21)

Alex Apotsos, Visiting Lecturer in Geosciences

Henry W. Art, Professor of Biology and Environmental Studies, Emeritus

Sonya Auer, Visiting Assistant Professor of Biology

Lois M. Banta, Professor of Biology

Ron D. Bassar, Assistant Professor of Biology

Ben Benedict, Lecturer in Art

Julie C. Blackwood, Assistant Professor of Mathematics

Roger E. Bolton, Professor of Economics, Emeritus

Ralph Bradburd, David A. Wells Professor of Political Economy

Alice C. Bradley, Assistant Professor of Geosciences

Nicole G. Brown, Assistant Professor of Classics

Cory E. Campbell, instructional Technology Specialist

Anthony Carrasquillo, Assistant Professor of Chemistry

Gregory Casey, Assistant Professor of Economics

David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Phoebe A. Cohen, Associate Professor of Geosciences

Jose E.A. Constantine, Assistant Professor of Geosciences

Mea S. Cook, Associate Professor of Geosciences

David P. Dethier, Professor of Geosciences, Emeritus

Joan Edwards, Samuel Fessenden Professor of Biology

Laura Ephraim, Associate Professor of Political Science

Michael Evans, Assistant Director of The Zilkha Center

Jessica M. Fisher, Assistant Professor of English

Antonia Foias, Professor of Anthropology and Sociology

Jennifer L. French, Professor of Spanish

Sarah S. Gardner, Lecturer in Environmental Studies

Matthew Gibson, Assistant Professor of Economics

Lisa Gilbert, Professor of Geosciences and Marine Sciences

Allison Gill, Assistant Professor of Biology

Catherine Robinson Hall, Associate Professor, Williams-Mystic Maritime Studies Program

Nicolas Howe, Associate Professor of Environmental Studies

Sarah Jacobson, Associate Professor of Economics

Andrew Jones, Manager, Hopkins Memorial Forest

Paul Karabinos, Professor of Geosciences

Elizabeth Kolbert, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Joel Lee, Assistant Professor of Anthropology

Scott Lewis, Assistant Professor of Physical Education and Director of Outing Club

James Manigault-Bryant, Associate Professor of Africana Studies

Luana Maroja, Associate Professor of Biology

Laura Martin, Assistant Professor of Environmental Studies

Brittany Meché, Bolin Fellow in Environmental Studies

April Merleaux, Visiting Assistant Professor of Environmental Studies

Karen R. Merrill, Professor of History

Manuel Morales, Professor of Biology and Director of Research Hopkins Forest

James Nolan, Chair of Anthropology and Sociology and Washington Gladden 1859 Professor of Sociology

Julie Pedroni, Lecturer in Philosophy

Timothy Pusack, Assistant Professor, Williams-Mystic Maritime Studies Program

Jay Racela, Lecturer in Environmental Studies and Supervisor, Environmental Analysis Lab

David P. Richardson, Professor of Chemistry

Kenneth Savitsky, Professor of Psychology

Ned Schaumberg, Assistant Professor, Williams-Mystic Maritime Studies Program

David C. Smith, Senior Lecturer in Biology, Emeritus

David L. Smith, Professor of English

Greta F. Snyder, Visiting Assistant Professor of Women's, Gender, and Sexuality Studies

John W. Thoman, Jr., Professor of Chemistry

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

Sofia Zepeda, Ph.D., Assistant Professor, Maritime History, Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The major and concentration in Environmental Studies are designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;

- Understand ecological principles and the nature of living systems;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Have an appreciation for the ambiguity and uncertainty inherent in many environmental issues;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, the CES is considered to be the first environmental studies center at a liberal arts college. In addition to the academic program described below, The CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. The CES offers extensive resources including databases, funding for student-organizations and student-initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area only 1.5 miles from campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. The CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other members of CES for advice. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

Advisors for 2020-2021: Ralph Bradburd, Jennifer French, Sarah Gardner, Nick Howe, and Luana Maroja.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major, but must have advance approval in writing from the Chair of Environmental Studies.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven-course major. The major has a core of seven courses, with varying amounts of choice for the various core course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 302, and one 400-level Senior Seminar. ENVI 101 – Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth's systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the junior year (or senior year under special circumstances), ENVI 302 – Environmental Planning Workshop: Community-Based Experience (offered every fall), one 400-level senior seminar. The remaining core requirements are comprised of three foundational 200-level courses, one from each of three lists of courses (see below)... These lists represent the three main branches of the environmental curriculum:

Environmental humanities, environmental social science/policy, and environmental science. Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this seven-course foundation, Environmental Studies majors devise an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, the built environment, environmental chemistry, sustainable food and agriculture, environmental ethics, etc. Students are responsible for designing their own major cluster in consultation with a faculty advisor in the spring semester of their sophomore year. One of these four electives in the cluster must be among those

listed by the Program as a research methods course, although students may petition to count another course toward this requirement.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

Submitting your Proposed Course Cluster and Plan of Study to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The individual proposals will be reviewed by the CES Advisory Committee.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (*Intro to Environmental and Natural Resource Economics*) has a prerequisite of ECON 110 (*Principles of Microeconomics*). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (*Economics of Climate Change*) has a prerequisite of ECON 251 (*Price and Allocation Theory*), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (*Communities and Ecosystems*) has a prerequisite of ENVI/BIOL 203 (*Ecology*) or ENVI/BIOL 220 (*Field Botany and Plant Natural History*). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Chair or Associate Director.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Introductory Required Courses (2 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies

ENVI 102 Introduction to Environmental Science

Foundational Required Courses for all Environmental Studies Majors (3 courses, 1 from each category)

Culture/Humanities Foundational (1 course)

Specialization Cluster (4 courses, including a Living Systems course and a Methods course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental justice, environmental planning and design, environmental literature, environmental chemistry, environmental biology, environmental geosciences, sustainable design, water and energy, sustainable food and agriculture, urban studies, and environmental economics.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Committee, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

Living Systems (1 course)

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed below. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Experiential Required Course (1 course)

In the junior year, or under special circumstances in the senior year, students will take ENVI 302 *Environmental Planning Workshop: Community-Based Experience*. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshire region involving urban or rural land use planning and environmental design.

Senior Seminar Required Course (1 course)

In the junior or senior year, students will take one 400-level seminar in Environmental Studies. These seminars will focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

ENVI 397, 398 Independent Study of Environmental Problems

ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student summer research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Other departments may also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the first Friday in March. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified before spring break whether or not their proposal has been approved.

Students doing a full-year thesis give a presentation in October to their thesis advisor, second reader, and environmental studies community. Further details on the honors program are available through the Environmental Studies website: <https://ces.williams.edu/academic-program/honors/>

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

Not offered current academic year

ENVI 101 (F)(S) Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, and more -- as well as their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course,

we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Class Format: Fall 2020: The two sections of the course will be taught entirely online (Howe) or in a hybrid format accommodating both students on campus & those learning remotely (Merleaux). Both sections will be divided into small discussion groups meeting once per week. Some meetings may be scheduled outside of the allotted time block. Course includes a mix of synchronous & asynchronous online work, including video lectures, writing workshops, virtual field trips, reading annotation, and discussion forums.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages)

Prerequisites: none

Enrollment Limit: 20/section

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 20/section

Grading: yes pass/fail option, yes fifth course option

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly short quizzes, three exams, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

ENVI 104 (F) Oceanography

Cross-listings: GEOS 104 MAST 104 ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time). All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

ENVI 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How we have arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

ENVI 201 (S) The Geoscience of Epidemiology and Public Health (DPE)

Cross-listings: ENVI 201 GEOS 207

Secondary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 201 (D3) GEOS 207 (D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

This course combines lectures & discussion with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to help students build skills in data analysis and scientific writing.

Class Format: Six hours per week. Students will view pre-class lecture videos; class meetings will focus on discussion, synthesis, and application of course content.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203 (D3) BIOL 203 (D3)

Quantative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

ENVI 204 (F) Colonialism, Capitalism and Climate Crisis

Cross-listings: ENVI 204 GBST 233 AFR 233

Secondary Cross-listing

Evolutions are part of human existence. Our collective understandings of the world, the economic realm, and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy. Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. The course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis to advance a reparatory approach that draws in experiences from social and environmental movements that advance climate justice. Students will also be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: Blog post entries; research report on an emerging green technology (10 pages); recorded video / interview of an environmental justice movement/activist in the global South; reflections paper (8 pages); community case study on an environmental project tracing its

histories (7 pages); participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over enrolled preference goes to Africana Studies and then Environmental Studies students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

ENVI 206 (S) Global Environmental Politics

This course examines the history and current status of international environmental cooperation and conflict. We will consider the interactions of nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of transnational environmental policy and treaties. We will also examine non-state approaches to global environmental challenges. After reviewing competing explanations for the causes of global environmental problems and diverse disciplinary approaches to studying those issues, we will read case studies covering a range of topics. These include fresh water conflict, fisheries and oceans, climate change, waste and pollution, agriculture, pesticides, population and development, wildlife, forestry, and consumerism. The reading assignments are drawn from the fields of environmental and foreign policy history, political science, international relations, geography, and anthropology in order to develop an interdisciplinary approach to international policy analysis. The written assignments are a series of policy briefs. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: Depending on enrollment, some discussion may be scheduled outside of the class hours, as would be the case in a tutorial.

Requirements/Evaluation: 2-3 short writing assignments based on assigned readings (3 pages each), 2 oral presentations, discussion participation, 2 policy briefing papers based on library research (5 pages each)

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 207 (F) Economic Geology and Earth Resources

Cross-listings: GEOS 205 ENVI 207

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

ENVI 208 (S) Saharan Imaginations (DPE) (WS)**Cross-listings:** ARAB 209 ENVI 208 COMP 234**Secondary Cross-listing**

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Approached mainly through the prism of adventure and exploitation, the desert is portrayed as a dead space. However, literature and film furnish a unique opportunity to engage critically with the ways Maghrebi and Middle Eastern culture production represents deserts and raises issues of fundamental importance to these societies. This course offers students the opportunity to engage in close readings of novels and film through the theme of the Sahara and Saharan space. Reading through the politics of human mobility and life in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Saharan sub-genre of African and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Deconstructing reductive Saharanisms, students will see the desert for what it is, rather than what it is portrayed to be or stand for.

Class Format: hybrid**Requirements/Evaluation:** active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper**Prerequisites:** none**Enrollment Limit:** 14**Enrollment Preferences:** Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.**Expected Class Size:** 14**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D1) (DPE) (WS)**This course is cross-listed and the prefixes carry the following divisional credit:**

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.**Difference, Power, and Equity Notes:** Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.**Attributes:** ENVI Humanities, Arts + Social Science Electives**Not offered current academic year****ENVI 209 (F) Modern Climate (QFR)****Cross-listings:** GEOS 309 ENVI 209**Secondary Cross-listing**

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes**Prerequisites:** Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor**Enrollment Limit:** 30**Enrollment Preferences:** GEOS and ENVI majors**Expected Class Size:** 20

ENVI 210 (F) Environmentalism in Contemporary Art and Politics, 1960s to Present

Cross-listings: ENVI 210 ARTH 214

Secondary Cross-listing

Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts--including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice. Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.

Requirements/Evaluation: Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)

ENVI 211 (S) Race, Environment, and the Body

Cross-listings: AMST 211 ENVI 211 AFR 211 SOC 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ENVI 212 ECON 214

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: This tutorial will be taught remotely via Zoom meetings. Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week. Individual "office hour meetings" will also occur via Zoom meetings.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 215 (F) Climate Changes

Cross-listings: GEOS 215 ENVI 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

ENVI 216 (S) Philosophy of Animals

Cross-listings: ENVI 216 PHIL 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, *what are animals such that they can be all these things?* In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: This course is wholly remote and can only be taken synchronously (i.e., students will be expected to attend seminar on zoom during the scheduled time and no recording will be made).

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.

Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

ENVI 217 (F) Landscape, Place and Power

Cross-listings: AMST 216 ENVI 217

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 214 (D1) ENVI 218 (D1)

Difference, Power, and Equity Notes: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"--economic, ecological, and cultural--informs Latin American responses to environmental degradation.

Attributes: ENVI Humanities, Arts + Social Science Electives

ENVI 219 (F) Evolution of and on Volcanic Islands (WS)

Cross-listings: GEOS 220 ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor

Requirements/Evaluation: five 5-page papers and critiques of partner's papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: Class discussion and debates will complement lecture with powerpoint presentation. In the Fall 2020, the course will have a hybrid format. In person and remote students will attend lectures or class discussions during the regular twice-a-week schedule, with an additional synchronous session for remote students to address questions. If remote students cannot attend additional Q&A session, open office hours will also be available.

Requirements/Evaluation: midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First and second years.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ENVI 225 (F) Sustainable Food & Agriculture

Cross-listings: BIOL 225 ENVI 225

Secondary Cross-listing

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Requirements/Evaluation: writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives

Not offered current academic year

ENVI 226 (S) Climate Data Analysis

Cross-listings: GEOS 227 ENVI 226

Secondary Cross-listing

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

Requirements/Evaluation: Five 3-4 page papers including figures made from analyzing data.

Prerequisites: At least one GEOS or ENVI course

Enrollment Limit: 10

Enrollment Preferences: Students with a strong interest in Geosciences and Geoscience majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 228 (F) Water as a Scarce Resource

Cross-listings: ECON 228 ENVI 228

Secondary Cross-listing

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: meeting with the instructor in pairs for an hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

ENVI 230 (S) Geographies of Food Justice (DPE)

Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, nutritious, & culturally appropriate food. Observers often call poor, segregated urban areas food *deserts*, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to these places as experiencing food *apartheid* to emphasize that the inequalities are the result of structural racism. Notably, *deserts* & *apartheid* are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does *where* people eat shape *what* they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with an exploration of the concepts of food security, sovereignty, and justice. Subsequent units include a critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term's usefulness. Next, we consider disruptions to indigenous hunting & fishing practices from settler colonialism-induced

climate change & toxic contamination. Finally, we evaluate evidence about whether local food is the solution to the social and environmental problems with our food systems. We will read works by geographers, anthropologists, sociologists, planners, & journalists, among others. Several "lab" sessions throughout the semester introduce participants to data analysis tools used by policymakers and activists working on food security and justice.

Requirements/Evaluation: 2-3 short papers on assigned topics, several lab exercises focused on data analysis, final research paper, class discussion, occasional short oral presentations

Prerequisites: ENVI 101 or permission

Enrollment Limit: 19

Enrollment Preferences: Environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.

ENVI 231 (S) Africa and the Anthropocene (DPE)

Cross-listings: STS 231 ENVI 231 AFR 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) ENVI 231 (D2) AFR 231 (D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

ENVI 232 (S) The Garden in the Ancient World

Cross-listings: COMP 235 REL 235 CLAS 235 ENVI 232

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

ENVI 233 (S) Latin American Environmental Literature and Cultural Production (DPE)

Cross-listings: RLSP 216 ENVI 233

Secondary Cross-listing

This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the *Popol vuh*), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

Class Format: This class will be fully remote. Students are expected to be active participants at all scheduled class meetings; there may be some additional asynchronous activities.

Requirements/Evaluation: Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: Preference given to students majoring in Spanish or Environmental Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 216 (D1) ENVI 233 (D1)

Difference, Power, and Equity Notes: This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

Attributes: ENVI Humanities, Arts + Social Science Electives EVST Culture/Humanities

Not offered current academic year

ENVI 234 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

LEC Section: 01 M 7:00 pm - 9:40 pm Michael Samson

ENVI 235 (S) Survival and Resistance: Environmental Political Theory

Cross-listings: ENVI 235 PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ENVI 238 (F) Sustainable Economic Growth

Cross-listings: ENVI 238 ECON 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: potential or declared social science majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners

responding to climate change? To what extent can local environmental management alter global trends?

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit (WS)

Writing Skills Notes: Weekly tutorial paper or response paper for which the instructor will provide feedback on writing skills as well as content. Opportunities to revise.

ENVI 241 (S) The Politics of Waste

Cross-listings: ENVI 241 PSCI 242 PSCI 270

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science--perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

Enrollment Limit: 9

Enrollment Preferences: final selection will be made on the basis of statements of interest solicited after pre-registration and interviews with the instructor

Expected Class Size: 9

Grading: no pass/fail option, no fifth course option

ENVI 242 (S) The Country and the City in the Classical World

Cross-listings: ANTH 242 ENVI 242 CLAS 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not

new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 19

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

ENVI 243 (F) Reimagining Rivers (WS)

Cross-listings: ENVI 243 ANTH 243

Primary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format: This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week. Sessions will be held in-person and remotely.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: Environmental Studies 101

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243 (D2) ANTH 243 (D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: PHIL 244 ENVI 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 244 (D2) ENVI 244 (D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Cross-listings: HIST 265 ENVI 246 AMST 245

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

ENVI 247 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one other through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.

Requirements/Evaluation: 2 short concept papers (3-4 pages); 1 research paper (10 pages); several short policy exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 251 Science and Militarism in the Modern World (WS)

In 1961, United States President Dwight D. Eisenhower warned of the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. This tutorial takes up a number of environmental themes, including the role of environmental science within military campaigns, conservation and environmental racism, nuclear waste and ecological contamination. Surveying conflicts from World War II through the present-day War on Terror, this course will investigate how environmental scientists, politicians, soldiers, activists, and artists have grappled with the intertwined legacies of science and militarism. Students will engage a range of textual materials including books, films, photographs, and news reports.

Requirements/Evaluation: Course requirements include bi-weekly response papers (5-7 pages) and tutorial discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: ENVI and STS majors and concentrators

Expected Class Size: 10

Grading:

Distributions: (D2) (WS)

Writing Skills Notes: Over the course of the semester, students will write 5 papers (5-7 pages each). They will receive bi-weekly detailed feedback on their writing from the professor and their tutorial partner. This feedback will include advice on strengthening their argumentation and use of textual evidence, as well as grammar and usage suggestions/corrections. Students will be graded on the portfolio of papers, with specific attention to how they have incorporated feedback in each subsequent paper.

ENVI 253 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 AMST 235 HIST 275 GBST 235 ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

ENVI 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Secondary Cross-listing

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

ENVI 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: ENVI 265 BIOL 165 MAST 265

Secondary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Does not count for Biology major credit.

ENVI 266 (S) Reading Water (WS)

Cross-listings: ENVI 266 MAST 266

Secondary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

Class Format: This class will be remote, meeting synchronously. The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

Requirements/Evaluation: 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference to majors, and then to sophomores and juniors, respectively.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 266 (D1) MAST 266 (D1)

Writing Skills Notes: Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

ENVI 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

Cross-listings: ENVI 268 MAST 268

Secondary Cross-listing

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore

five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

ENVI 271 (S) Theatre & Environment: Site, Nature, Ecoperformance, Utopia (DPE)

Cross-listings: THEA 272 ENVI 271

Secondary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or ecology of a performance change its meaning and reception? What role can live performance play in grassroots campaigns for climate action or environmental justice? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this combined seminar/studio course, participants will work collaboratively to create a series of mini-performances based on four categories: site, nature/ecology, ecoperformance, and utopia.

Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute *all* human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Artichoke Dance, Talking Birds, Extinction Rebellion, Greenpeace, and others. As a special project in the class, we will collaborate with The Zilkha Center to create performances that engage directly with topics relevant to the campus and surrounding community. This is a seminar and maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio and seminar course that requires deep collaboration on the creation, development, and performing of original works of live performance.

Requirements/Evaluation: Creation and presentation of a series of four mini-performance pieces; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 272 (D1) ENVI 271 (D1)

Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

ENVI 273 (F) Politics without Humans?

Cross-listings: ENVI 273 STS 273 PSCI 273

Secondary Cross-listing

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students

Enrollment Limit: 25

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

ENVI 291 (S) Religion and the American Environmental Imagination

Cross-listings: SOC 291 ENVI 291 REL 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

ENVI 297 (S) Global Sustainable Development

Cross-listings: ENVI 297 GBST 287

Primary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation: Class discussions; Policy Analysis Paper (5-7 pages); Mid-term exam; Final case study/class presentation (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators

ENVI 301 (F) Climate Changes (Latin America): Aesthetics, Politics, Science

Cross-listings: RLSP 401 ENVI 301

Secondary Cross-listing

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que sueño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers,

one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: this is the senior seminar required for all Spanish majors

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: AMST 302 ENVI 302

Primary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation: Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 303 (S) Cultures of Climate Change

Cross-listings: SOC 303 ENVI 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENVI 304 (F) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: AFR 335 ENVI 304 GBST 304 HIST 304

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 335 (D2) ENVI 304 (D2) GBST 304 (D2) HIST 304 (D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

Attributes: ENVI Humanities, Arts + Social Science Electives

ENVI 307 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

Prerequisites: ENVI 101 or permission of instructor

LEC Section: 01 M 7:00 pm - 9:40 pm David N. Cassuto

ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

ENVI 311 (S) Tropical Ecologies: Francophone Caribbean Literature and the Environment (DPE)

Cross-listings: AFR 313 RLFR 313 ENVI 311

Secondary Cross-listing

The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau--the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical texts of Caribbean of literary and political movements such as *Indigenisme*, *Négritude*, and *Créolité*. Conducted in French.

Class Format: This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

Prerequisites: Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

Not offered current academic year

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: BIOL 302 ENVI 312

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of

communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 314 (F) Nature in Crisis: The Classification Craze and The Rise of Museums

Cross-listings: RLFR 315 ENVI 314

Secondary Cross-listing

This course examines how understandings of nature evolved dramatically (and at times unsettlingly) from the 17th through the early 20th centuries and how this instability prompted a desire to classify and control natural phenomena. To analyze these issues, we will likewise consider the rise of modern museums, as well as the accompanying acts of classification and curation. We will consider how literary and philosophical texts from the aforementioned time periods depict nature, how real-world interactions with nature led to the creation of (illustrated) taxonomies, how colonization inflected notions of the natural world and also museum exhibits, and finally, how the cabinet of curiosities and later, the museum, provided a space in which to display and analyze nature's more unusual treasures. As part of our explorations, we will build a virtual exhibit of our own to reflect our understanding of nature today and our engagement with concepts of nature from previous eras. Conducted in French. Counts as an Envi Humanities Elective for the Envi Concentration.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: participation, online homework, essays, mid-semester presentation, final class project (virtual exhibit)

Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Cross-listings: ENVI 315 ENGL 312

Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: majors in English or Environmental Studies

ENVI 321 (F) Born to be Wild: Rethinking Animals in Pre-modern and Modern Texts (DPE)

Cross-listings: COMP 323 ARAB 323 ENVI 321

Secondary Cross-listing

In the past few months, images of dolphins appearing in the Venetian canals, and wild animals roaming eerie looking post-apocalyptic deserted streets have gone viral. The majority of these images have proven to be fake, however their popularity was witness to people's hope that we can "reset" the environment and a yearning to reframe animals' positionality vis-à-vis their habitats and humans. Using critical lenses from ecocriticism and animal studies, we will be exploring texts from non-Western traditions in which animals figure strongly from pre-modern times to the age of the Anthropocene. The focus will be on Arabic, Persian and Turkish texts all in translation. The course will be traversing several genres and texts from Pre-Islamic poetry, the Quran, the 10th century Ikhwan as-Safa's epistle *The Case of Animals versus Man Before the King of the Jinn*, the fables of *Kalila and Dimna*, Farid ed-Din 'Attar's *Conference of Birds*, travelogues, paintings, contemporary film till we reach recent fiction with cyborgs and drones. Throughout the course, we will be examining themes such as diverse conceptualizations of what it means to be an "animal", what constitutes' animal agency and animal subjectivity irrespective of humans and their often utilitarian lens. We will do this by investigating how animals through these texts have been represented, imagined and reconfigured whether allegorically or otherwise as communities and in relation to humans and the environment and the implications of that. Finally, we will explore what a poetics of animal studies in these cultural and literary traditions could look like. The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Class Format: This class will be offered remotely synchronously twice a week (75 minutes each session), in addition to prerecorded asynchronous material at times.

Requirements/Evaluation: The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Arabic majors, Comparative Literature Majors, Environmental Studies Majors and Arabic certificate holders.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course deals with different literary traditions and their aesthetics. The approach is both synchronic and diachronic by looking at texts and their texts from different time periods and at different genres. The course will be examining what it means to be an "animal" vis-a-vis human beings and their environment and animal agency in these literary traditions as opposed to the often utilitarian lens that animals have often been viewed through.

ENVI 322 (F) Waste and Value

Cross-listings: ENVI 322 GBST 322 ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

ENVI 323 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 323 ENGL 324

Secondary Cross-listing

Consciousness of the world's finiteness in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It* and *King Lear*; Marvell; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Wordsworth; McCarthy, *The Road*; Atwood; Alice Oswald; photography (Struth, Hutte); painting (Titian), and video installations (Pipilotti Rist). Theoretical texts include: Smith, *Against Ecological Sovereignty*; Wood, *Reoccupy Earth*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am* and *Beast and the Sovereign*.

Class Format: This course will be taught virtually, but we will make absolutely every effort to ensure that it takes the form of a genuine discussion class, including breaking periodically into smaller online groups. Requirements: two papers totaling 20 pages.

Requirements/Evaluation: two papers over the course of the semester totaling approximately 20 pages.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors

ENVI 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: AFR 347 AMST 332 ENVI 332

Secondary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of

U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENVI 341 (S) Toxicology and Cancer

Cross-listings: ENVI 341 CHEM 341

Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelsus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 346 (S) Environmental Psychology

Cross-listings: PSYC 346 ENVI 346

Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: empirical lab course

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16

ENVI 348 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience (DPE)

Cross-listings: AMST 347 ENVI 348

Primary Cross-listing

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: none

Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings: AFR 349 ENVI 349 AMST 342

Secondary Cross-listing

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in

relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%

ENVI 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 354 (F) Drugs, Empire, & Environment in Historical Perspective

This course considers the political economy & environmental impacts of licit & illicit drugs. We begin with the premise that drugs are commodities that gained global significance in the context of liberalism & empire. Imperial nations--notably Britain--consolidated political & economic power in the 19th century by promoting the opium trade against the wishes of Chinese & Indian officials. Most illicit drugs originated as plants--cannabis, poppies, & coca. The production of these internationally traded agricultural commodities helped transform rural livelihoods & landscapes in the 19th century;

attempts at suppressing drug crops in the 20th century have also had environmental impacts. After the turn of the 20th century, the United States led an international movement to end the opium trade. Since then, the War on Drugs has expanded as a means for the United States to exercise domestic & global power. Our focus is primarily illicit drugs, but historical shifts in the categories of licit/illicit are a key theme. Other themes include race & racism in drug policy, imperialism, agriculture, & debates over toxicity. The course is divided into four units, stretching from the 19th century through the present. First, we discuss British colonialism in India & China through the lens of the opium trade. Next, we study the emerging drug control regime, focusing on coca, cocaine, & Indigenous producers in the Andes in the 1940s & 1950s. The third unit looks at environmental justice activists who oppose pharmaceutical companies' waste disposal in Puerto Rico. Finally, we evaluate the environmental impacts of the recent cannabis boom. We ask whether the legal architecture on which the industry is built can overcome the colonial & racist legacies of drug control. Readings include works by historians, novelists, anthropologists, & public policy experts.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion and participation

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators; juniors and seniors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: ENVI Humanities, Arts + Social Science Electives

Fall 2021

ENVI 359 (S) Writing Animals

Cross-listings: ENGL 359 ENVI 359

Secondary Cross-listing

Animals surround us, inhabit us. We rely on them for food, for clothing, for friendship, and for ideas. We could say that the whole human enterprise rests on the shoulders of animals, except that we ourselves are, of course, animals, too. In this course, we will explore the rich and rapidly growing body of work that centers on the creatures we live among. Among the questions we will consider are: How do we imagine minds unlike our own? Can we speak for creatures that lack language (or at least our form of it)? How do we explain our love of animals -- and our crimes against them? Readings will include fiction (Kafka's "A Report to an Academy"), non-fiction (Sy Montgomery's *The Soul of an Octopus*), natural history (Helen Macdonald's *Vesper Flights*) and philosophy (Peter Singer's *Animal Liberation*). This course will emphasize student writing, and participants will be invited to experiment with different genres.

Requirements/Evaluation: Students will produce roughly twenty pages of writing in a variety of modes

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01 TF 1:10 pm - 2:25 pm John E. Kleiner

ENVI 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

Requirements/Evaluation: Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, problem sets, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 8/lab

Enrollment Preferences: Chemistry and Environmental Studies majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 368 (F) Technology and Modern Society

Cross-listings: ENVI 368 SOC 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ENVI 373 (F) Environmental Organic Chemistry

Cross-listings: CHEM 373 ENVI 373

Secondary Cross-listing

This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physicochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: Lecture/discussion; lecture, three hours per week and discussion, 75 minutes per week.

Requirements/Evaluation: weekly problem sets, two midterm exams, a final exam, participation in discussion, an independent research proposal

Prerequisites: CHEM 251 and either CHEM 155 or CHEM 256. ENVI 102 is strongly recommended.

Enrollment Limit: 15

Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 378 (S) Nature/Writing

Cross-listings: ENGL 378 ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

ENVI 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 30

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 522 (D2) ENVI 387 (D2) ECON 387 (D2)

Quantative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.

ENVI 390 (S) The Nature of Nature

Cross-listings: ENVI 390 ENGL 394

Secondary Cross-listing

"Nature" is one of the commonest words in English. And yet what does it signify? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying attention to the difficulty of narrating processes that are often too big, too small, too quick or too slow for direct human apprehension. We'll also explore the ways popular nature writing mingles scientific reporting with implicit judgments about human identity, morality, and social organization. Writers studied will include Elizabeth Kolbert, N. Scott Momaday and Charles Darwin. We'll also consider the technological mediations of nature in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page online essay incorporating audiovisual materials. Active participation in class. Note that this course will be offered exclusively online.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 16

Enrollment Preferences: English majors; Environmental Studies majors and concentrators.

Expected Class Size: 16

ENVI 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 404 MAST 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: ENVI 405 GEOS 405

Secondary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, two 10-page lab reports, lab activities, and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

ENVI 410 (S) The Cryosphere

Cross-listings: ENVI 410 GEOS 410

Secondary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

Distributions: (D3)

Not offered current academic year

ENVI 420 (F) Architecture and Sustainability in a Global World (WS)

Cross-listings: ARTH 420 GBST 420 ENVI 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: This course will be taught in a hybrid mode, with both online (lecture) and in-person (discussion) elements.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages)

with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 420 (D1) GBST 420 (D2) ENVI 420 (D1)

Writing Skills Notes: This course develops writing proficiency using a series of sequenced assignments that culminate with the formation of a well-articulated, compelling final project. Students will receive extensive feedback on these assignments via a progression-oriented evaluative system that involves both instructor and peer feedback, and will take part in a writing seminar towards gaining the necessary tools for drafting work, formulating ideas, organizing sections, and crafting an abstract.

ENVI 423 (F) Global Change Ecology

Cross-listings: ENVI 423 BIOL 413

Secondary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple

levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 430 (S) Race, Identity, Nature (DPE) (WS)

Cross-listings: ENVI 430 AFR 390 AMST 430

Secondary Cross-listing

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Class Format: This course is designated as remote. However, international students who want to take this course but need it to be designated as a hybrid course in order to do so may instead register for an independent study with Prof. Ayazi. As a hybrid course, this independent study will have the same requirements as the listed course, with the exception of a limited number of face-to-face meetings in Williamstown or Boston. Please contact Prof. Ayazi at ha5@williams.edu to discuss such an arrangement.

Requirements/Evaluation: Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%. Class will meet twice per week. Tu. meetings will be synchronous and Th. meetings will be asynchronous. Asynchronous components of the course include pre-recorded lectures, discussion boards, and other exercises that promote as much connection as possible within the constraints of remote education. Toward this end, synchronous meetings will center engaged discussion.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 430 (D2) AFR 390 (D2) AMST 430 (D2)

Writing Skills Notes: Emphasis on revision and writing process includes: One thesis paper at 15 pages (receiving critical feedback from professor and peers); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one research proposal (including thesis outline and annotated bibliography of primary texts) with critical feedback from professor; student presentations and roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: By the end of this course, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation. In order to address such issues of difference, power, and equity, this course provides students with the necessary th

ENVI 436 (S) Demigods: Nature, social theory, and visual imagination in art and literature, ancient to modern

Cross-listings: ENVI 436 ARTH 436 CLAS 436

Secondary Cross-listing

Horse-men, cat-women, goat-men, tree-women, man-bulls, fish-girls, snake-people--cross-species compound creatures are everywhere in ancient Greek and Roman art, poetry, and culture. The conceptual or cognitive value of those "demigods" has changed over time. In art, demigods have frequently been reduced to the status of decoration, and in literature, they have become generic markers of fantasy. But they are hardly without meaning. Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of nature, the origin of species, and the environment; and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. We will consider in detail ancient theories of the origins of species as well as the relationship between nature and human culture. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian, and the rediscovery of ancient materialist theories of nature and culture. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg's cultural-historical texts, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: Lecture and discussion. When possible, we will meet outdoors in person; when that is not possible, we will meet online.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: art history majors, graduate students in art history, classics majors, then any interested student

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

ENVI 450 (F) Senior Seminar: Environmental Ethnography

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term Coded fieldwork notes and summary statements (8-10 pages); Final ethnographic snapshot/presentation (13-15 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

ENVI 454 (F) Climate Change Physiology

Cross-listings: BIOL 454 ENVI 454

Secondary Cross-listing

Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

Class Format: Synchronous discussions with in-person and remote option. Satisfies the distribution requirement for the Biology major.

Requirements/Evaluation: Evaluation will be based on class participation and several short papers.

Prerequisites: BIOL 203 or BIOL 205, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Biology seniors who have not yet taken a 400 level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 460 (S) Communicating Climate Change

This course is about environmental communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who either don't care about them or who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And finally, they are thoroughly entangled with almost every other problem we face, from pandemics to racism. How do we communicate clearly, persuasively, and responsibly about something so complex? This seminar brings together students who have specialized in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. We will focus on perhaps the greatest communication challenge of them all: climate change. Over the course of the seminar, we will explore research on climate change communication in a diverse array of fields while seeking to put our findings into practice locally. To help us learn new ways to communicate, we will meet with some successful, innovative environmental professionals in diverse fields. We will work together as a team to solve concrete communication problems here in our community.

Requirements/Evaluation: One 5-7-page paper; final collaborative project; participation.

Prerequisites: Environmental Studies 101.

ENVI 478 (S) Cold War Landscapes

Cross-listings: AMST 478 ENVI 478 HIST 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

ENVI 491 (F) The Suburbs

Cross-listings: AMST 490 HIST 491 ENVI 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I'll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Winter Study -----

ENVI 10 (W) The Mohawk Trail: History Here and Everywhere

Cross-listings: HIST 10 AMST 10 ENVI 10

Secondary Cross-listing

History is everywhere, all around you, no matter where you are. That's because history happens in place, and in specific places. Some places are spoken of as particularly "historical" but every place has its stories. This Winter Study course will use the case study of the Mohawk Trail road and region to explore the ways that history happens in place. Students will learn how to see the past all around them and apply these skills to a particular place of their choosing, whether along the Mohawk Trail, in or around the local Williamstown area, their hometown, or any other place they know well. We will meet twice a week for four hours where we'll discuss readings, visit places along the Mohawk Trail, and practice the various skills of reading the landscape to better understand the past. Throughout the course students will analyze and conduct research on their particular place, present their preliminary findings to the class, and either write a traditional final research paper or produce a creative project. During the regular semester it might seem that the past is preserved in written documents and conveyed in books. That's true but there are all sorts of ways that we can see the past in place outside the classroom. This is what we'll explore together in this course.

Requirements/Evaluation: research a particular place & present findings to the class; option to write a final research paper or to produce a creative project based on their analysis & research

Prerequisites: none

Enrollment Limit: 11

Enrollment Preferences: student questionnaire

Grading: pass/fail only

Unit Notes: Chris Slaby is currently a Ph.D. candidate in the American Studies Program at the College of William & Mary, where he is writing a dissertation on the history of the Mohawk Trail and Mohican Homelands. His scholarship exists at the intersection of Native American and Indigenous Studies and the environmental humanities.

ENVI 16 (W) New England--The Wild Side!

In this course we will explore, first hand, the New England landscape to make some sense of its amazing physical and biological diversity. From the spruce-clad Berkshires to the broad Connecticut River Valley to wind-swept Cape Cod, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna and even paleontology. We'll learn the typical trees and shrubs of the region and what their presence suggests about the nature and history of the places they grow. We will make forays into the world of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. What do their tracks and behavior reveal about how they cope in their rigorous and fickle environments, and how might they be affected by climate change and other human impacts? Through hikes, field trips, visits to museums, readings, discussions, and personal observations, you will increase your awareness and appreciation of the natural heritage of the region that you have made your recent home. This class is field focused; therefore students should be prepared to spend significant

time outdoors, sometimes hiking several miles, in winter conditions. Some trips will require students to be away from campus beyond normal class hours and even overnight. No special equipment or prerequisites are required for this class.

Requirements/Evaluation: the final project could comprise a 6-page paper, journal, creative endeavor (sketches, poetry, etc), field study, or related work, plus a short presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: seniority, demonstrated interest and curiosity in the subject

Grading: pass/fail only

Unit Notes: Drew Jones has been manager of Williams College's Hopkins Memorial Forest for 21 years. There he coordinates research, education and maintenance activities. In addition, he bands saw-whet owls in the fall and boils maple sap in the spring. Previously, Drew has worked as a wildlife biologist and environmental educator from the southern Appalachians to the north woods and beyond.

ENVI 20 (W) Winter Naturalist's Journal

Cross-listings: ENVI 20 ENGL 20

Primary Cross-listing

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out-of-doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose) as well as observational drawing. Everyone will be required to keep a nature journal, which will be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. The instructor will meet with the students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten-page paper, and to read one or more of them at the final celebration.

Requirements/Evaluation: final project or presentation, daily journal and several 2 to 3 page papers

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: random selection

Grading: pass/fail only

Unit Notes: Christian McEwen is author of "World Enough & Time: On Creativity and Slowing Down" and the editor of "Jo's Girls; Tomboy Tales of High Adventure; The Alphabet of the Tress: A Guide to Nature Writing" as well as several other books. She is currently working on a book called "In Praise of Listening". Guest lecturer Barbara Bash is an artist and calligrapher who has published several books, including True Nature: An Illustrated Journal of Four Seasons in Solitude.

ENVI 25 (W) Tropical Marine Conservation

Cross-listings: ENVI 25 BIOL 25

Secondary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip.

Requirements/Evaluation: oral presentation and 5-page research paper

Prerequisites: BIOL 203 or ENVI 101 or ENVI 102 or MAST 311 or permission of instructors

Enrollment Limit: 8

Enrollment Preferences: preference will be given to BIOL and ENVI majors and concentrators

Grading: pass/fail only

Sofia Zepeda, Assistant Professor, Maritime History, Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The concentration in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;

- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Have an appreciation for the ambiguity and uncertainty inherent in many environmental issues;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, the CES is considered to be the first environmental studies center at a liberal arts college. In addition to the academic program described below, The CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. The CES offers extensive resources including databases, funding for student-organizations and student-initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area 1.5 miles from campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. The CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other members of CES for advice. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

Advisors for 2020-2021: Ralph Bradburd, Jennifer French, Sarah Gardner, Nick Howe, and Luana Maroja.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major but must have advance approval in writing from the Chair of Environmental Studies.

CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The Environmental Studies concentration is a seven-course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 302, and ENVI 412, students pursuing the concentration will take one elective from each group that represents a broad category of inquiry: Environmental Policy; Humanities, Arts and Social Sciences; and the Natural World.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven-course major. The major has a core of seven courses, with varying amounts of choice for the various core course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 302, and one 400-level Senior Seminar. ENVI 101 – Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth's systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the junior year (or senior year under special circumstances), ENVI 302 – Environmental Planning Workshop: Community-Based Experience (offered every fall), one 400-level senior seminar. The remaining core requirements are comprised of three foundational 200-level courses, one from each of three lists of courses (see below)... These lists represent the three main branches of the environmental curriculum: Environmental humanities, environmental social science/policy, and environmental science. Students choose, in consultation with their major advisor, the course they will take

from each of the three lists. Building on this seven-course foundation, Environmental Studies majors devise an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, the built environment,

environmental chemistry, sustainable food and agriculture, environmental ethics, etc. Students are responsible for designing their own major cluster in consultation with a faculty advisor in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement. The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

Submitting your Proposed Course Cluster and Plan of Study to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The individual proposals will be reviewed by the CES Advisory Committee.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (*Intro to Environmental and Natural Resource Economics*) has a prerequisite of ECON 110 (*Principles of Microeconomics*). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (*Economics of Climate Change*) has a prerequisite of ECON 251 (*Price and Allocation Theory*), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (*Communities and Ecosystems*) has a prerequisite of ENVI/BIOL 203 (*Ecology*) or ENVI/BIOL 220 (*Field Botany and Plant Natural History*). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Chair or Associate Director.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Introductory Required Courses (2 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies

ENVI 102 Introduction to Environmental Science

Specialization Cluster (4 courses, including a Living Systems course and a Methods course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental justice, environmental planning and design, environmental literature, environmental chemistry, environmental biology, environmental geosciences, sustainable design, water and energy, sustainable food and agriculture, urban studies, and environmental economics.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Committee, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

Living Systems (1 course)

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed below. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Experiential Required Course (1 course)

In the junior year, or under special circumstances in the senior year, students will take ENVI 302 *Environmental Planning Workshop: Community-Based Experience*. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshire region involving urban or rural land use planning and environmental design.

Senior Seminar Required Course (1 course)

In the junior or senior year, students will take ENVI 412, Senior Seminar, one 400-level seminar in Environmental Studies. These seminars will focus

on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

ENVI 397, 398 Independent Study of Environmental Problems

ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student summer research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Other departments may also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the first Friday in March. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified before spring break whether or not their proposal has been approved.

Students doing a full-year thesis give a presentation in October to their thesis advisor, second reader, and environmental studies community. Further details on the honors program are available through the Environmental Studies website: <https://ces.williams.edu/academic-program/honors/>

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

Not offered current academic year

ENVI 101 (F)(S) Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, and more -- as well as their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Class Format: Fall 2020: The two sections of the course will be taught entirely online (Howe) or in a hybrid format accommodating both students on campus & those learning remotely (Merleaux). Both sections will be divided into small discussion groups meeting once per week. Some meetings may be scheduled outside of the allotted time block. Course includes a mix of synchronous & asynchronous online work, including video lectures, writing workshops, virtual field trips, reading annotation, and discussion forums.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages)

Prerequisites: none

Enrollment Limit: 20/section

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 20/section

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for the Environmental Studies major and concentration

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly short quizzes, three exams, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

Distributions: (D3)

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Cross-listings: GEOS 104 MAST 104 ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time). All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

ENVI 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page

paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How we have arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives GBST Economic Development Studies Electives

Not offered current academic year

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology and the tropical environment. Each section provides the science behind the issues and ends with possible solutions. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing diversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment and climate change. This course fulfills the DPE requirement. Through lectures,

debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

Fall 2021

LEC Section: 01 MWF 11:00 am - 11:50 am Joan Edwards

ENVI 201 (S) The Geoscience of Epidemiology and Public Health (DPE)

Cross-listings: ENVI 201 GEOS 207

Secondary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 201 (D3) GEOS 207 (D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to

knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

Attributes: ENVI Natural World Electives GEOS Group B Electives - Sediments + Life PHLH Nutrition, Food Security+Environmental Health

Not offered current academic year

ENVI 203 (F) Ecology (QFR)

Cross-listings: ENVI 203 BIOL 203

Secondary Cross-listing

This course combines lectures & discussion with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to help students build skills in data analysis and scientific writing.

Class Format: Six hours per week. Students will view pre-class lecture videos; class meetings will focus on discussion, synthesis, and application of course content.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203 (D3) BIOL 203 (D3)

Quantative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

ENVI 204 (F) Colonialism, Capitalism and Climate Crisis

Cross-listings: ENVI 204 GBST 233 AFR 233

Secondary Cross-listing

Evolutions are part of human existence. Our collective understandings of the world, the economic realm, and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy. Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. The course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis to advance a reparatory approach that draws in experiences from social and

environmental movements that advance climate justice. Students will also be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: Blog post entries; research report on an emerging green technology (10 pages); recorded video / interview of an environmental justice movement/activist in the global South; reflections paper (8 pages); community case study on an environmental project tracing its histories (7 pages); participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over enrolled preference goes to Africana Studies and then Environmental Studies students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 18

ENVI 206 (S) Global Environmental Politics

This course examines the history and current status of international environmental cooperation and conflict. We will consider the interactions of nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of transnational environmental policy and treaties. We will also examine non-state approaches to global environmental challenges. After reviewing competing explanations for the causes of global environmental problems and diverse disciplinary approaches to studying those issues, we will read case studies covering a range of topics. These include fresh water conflict, fisheries and oceans, climate change, waste and pollution, agriculture, pesticides, population and development, wildlife, forestry, and consumerism. The reading assignments are drawn from the fields of environmental and foreign policy history, political science, international relations, geography, and anthropology in order to develop an interdisciplinary approach to international policy analysis. The written assignments are a series of policy briefs. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: Depending on enrollment, some discussion may be scheduled outside of the class hours, as would be the case in a tutorial.

Requirements/Evaluation: 2-3 short writing assignments based on assigned readings (3 pages each), 2 oral presentations, discussion participation, 2 policy briefing papers based on library research (5 pages each)

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 207 (F) Economic Geology and Earth Resources

Cross-listings: GEOS 205 ENVI 207

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

ENVI 208 (S) Saharan Imaginations (DPE) (WS)

Cross-listings: ARAB 209 ENVI 208 COMP 234

Secondary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Approached mainly through the prism of adventure and exploitation, the desert is portrayed as a dead space. However, literature and film furnish a unique opportunity to engage critically with the ways Maghrebi and Middle Eastern culture production represents deserts and raises issues of fundamental importance to these societies. This course offers students the opportunity to engage in close readings of novels and film through the theme of the Sahara and Saharan space. Reading through the politics of human mobility and life in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Saharan sub-genre of African and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Deconstructing reductive Saharanisms, students will see the desert for what it is, rather than what it is portrayed to be or stand for.

Class Format: hybrid

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 209 (D1) ENVI 208 (D1) COMP 234 (D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 209 (F) Modern Climate (QFR)

Cross-listings: GEOS 309 ENVI 209

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: GEOS and ENVI majors

ENVI 210 (F) Environmentalism in Contemporary Art and Politics, 1960s to Present

Cross-listings: ENVI 210 ARTH 214

Secondary Cross-listing

Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts--including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice. Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.

Requirements/Evaluation: Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)

Prerequisites: None

Enrollment Limit: 20

ENVI 211 (S) Race, Environment, and the Body

Cross-listings: AMST 211 ENVI 211 AFR 211 SOC 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to

imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ENVI 212 ECON 214

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: This tutorial will be taught remotely via Zoom meetings. Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week. Individual "office hour meetings" will also occur via Zoom meetings.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

ENVI 214 (S) Mastering GIS

Cross-listings: ENVI 214 GEOS 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

ENVI 215 (F) Climate Changes

Cross-listings: GEOS 215 ENVI 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

ENVI 216 (S) Philosophy of Animals

Cross-listings: ENVI 216 PHIL 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, *what are animals such that they can be all these things?* In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: This course is wholly remote and can only be taken synchronously (i.e., students will be expected to attend seminar on zoom during the scheduled time and no recording will be made).

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.

Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 217 (F) Landscape, Place and Power

Cross-listings: AMST 216 ENVI 217

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENVI 219 (F) Evolution of and on Volcanic Islands (WS)

Cross-listings: GEOS 220 ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor

Requirements/Evaluation: five 5-page papers and critiques of partner's papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220 BIOL 220

Secondary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the

ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: Class discussion and debates will complement lecture with powerpoint presentation. In the Fall 2020, the course will have a hybrid format. In person and remote students will attend lectures or class discussions during the regular twice-a-week schedule, with an additional synchronous session for remote students to address questions. If remote students cannot attend additional Q&A session, open office hours will also be available.

Requirements/Evaluation: midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First and second years.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ENVI 225 (F) Sustainable Food & Agriculture

Cross-listings: BIOL 225 ENVI 225

Secondary Cross-listing

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Requirements/Evaluation: writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Not offered current academic year

ENVI 226 (S) Climate Data Analysis

Cross-listings: GEOS 227 ENVI 226

Secondary Cross-listing

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

Requirements/Evaluation: Five 3-4 page papers including figures made from analyzing data.

Prerequisites: At least one GEOS or ENVI course

Enrollment Limit: 10

Enrollment Preferences: Students with a strong interest in Geosciences and Geoscience majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 228 (F) Water as a Scarce Resource

Cross-listings: ECON 228 ENVI 228

Secondary Cross-listing

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: meeting with the instructor in pairs for an hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in

alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

ENVI 230 (S) Geographies of Food Justice (DPE)

Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, nutritious, & culturally appropriate food. Observers often call poor, segregated urban areas food *deserts*, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to these places as experiencing food *apartheid* to emphasize that the inequalities are the result of structural racism. Notably, *deserts* & *apartheid* are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does *where* people eat shape *what* they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with an exploration of the

concepts of food security, sovereignty, and justice. Subsequent units include a critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term's usefulness. Next, we consider disruptions to indigenous hunting & fishing practices from settler colonialism-induced climate change & toxic contamination. Finally, we evaluate evidence about whether local food is the solution to the social and environmental problems with our food systems. We will read works by geographers, anthropologists, sociologists, planners, & journalists, among others. Several "lab" sessions throughout the semester introduce participants to data analysis tools used by policymakers and activists working on food security and justice.

Requirements/Evaluation: 2-3 short papers on assigned topics, several lab exercises focused on data analysis, final research paper, class discussion, occasional short oral presentations

Prerequisites: ENVI 101 or permission

Enrollment Limit: 19

Enrollment Preferences: Environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.

ENVI 231 (S) Africa and the Anthropocene (DPE)

Cross-listings: STS 231 ENVI 231 AFR 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) ENVI 231 (D2) AFR 231 (D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

ENVI 232 (S) The Garden in the Ancient World

Cross-listings: COMP 235 REL 235 CLAS 235 ENVI 232

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

ENVI 233 (S) Latin American Environmental Literature and Cultural Production (DPE)

Cross-listings: RLSP 216 ENVI 233

Secondary Cross-listing

This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the *Popol vuh*), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

Class Format: This class will be fully remote. Students are expected to be active participants at all scheduled class meetings; there may be some additional asynchronous activities.

Requirements/Evaluation: Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: Preference given to students majoring in Spanish or Environmental Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 216 (D1) ENVI 233 (D1)

Difference, Power, and Equity Notes: This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis

through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

Not offered current academic year

ENVI 234 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to invest proactively in health, education and social protection? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is a significant obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? How does the global COVID-19 pandemic threaten the progress developing countries have achieved, and what policy responses will be most effective in addressing the crisis? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ENVI 235 (S) Survival and Resistance: Environmental Political Theory

Cross-listings: ENVI 235 PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted

prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

ENVI 238 (F) Sustainable Economic Growth

Cross-listings: ENVI 238 ECON 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

Prerequisites: ECON 110 and ECON 120

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how

climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

ENVI 241 (S) The Politics of Waste

Cross-listings: ENVI 241 PSCI 242 PSCI 270

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science--perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

ENVI 242 (S) The Country and the City in the Classical World

Cross-listings: ANTH 242 ENVI 242 CLAS 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 19

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ENVI 243 (F) Reimagining Rivers (WS)

Cross-listings: ENVI 243 ANTH 243

Primary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format: This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week. Sessions will be held in-person and remotely.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: Environmental Studies 101

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243 (D2) ANTH 243 (D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the

semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: PHIL 244 ENVI 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 244 (D2) ENVI 244 (D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

ENVI 246 (F) Race, Power, & Food History (DPE)

Cross-listings: HIST 265 ENVI 246 AMST 245

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are

interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 247 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

Prerequisites: None

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one other through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.

Requirements/Evaluation: 2 short concept papers (3-4 pages); 1 research paper (10 pages); several short policy exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

ENVI 251 Science and Militarism in the Modern World (WS)

In 1961, United States President Dwight D. Eisenhower warned of the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. This tutorial takes up a number of environmental themes, including the role of environmental science within military campaigns, conservation and environmental racism, nuclear waste and ecological contamination. Surveying conflicts from World War II through the present-day War on Terror, this course will investigate how environmental scientists, politicians, soldiers, activists, and artists have grappled with the intertwined legacies of science and militarism. Students will engage a range of textual materials including books, films, photographs, and news reports.

Requirements/Evaluation: Course requirements include bi-weekly response papers (5-7 pages) and tutorial discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: ENVI and STS majors and concentrators

Expected Class Size: 10

Grading:

Distributions: (D2) (WS)

Writing Skills Notes: Over the course of the semester, students will write 5 papers (5-7 pages each). They will receive bi-weekly detailed feedback on their writing from the professor and their tutorial partner. This feedback will include advice on strengthening their argumentation and use of textual evidence, as well as grammar and usage suggestions/corrections. Students will be graded on the portfolio of papers, with specific attention to how they have incorporated feedback in each subsequent paper.

ENVI 253 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 AMST 235 HIST 275 GBST 235 ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)/(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as

Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

ENVI 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Secondary Cross-listing

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

ENVI 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: ENVI 265 BIOL 165 MAST 265

Secondary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

ENVI 266 (S) Reading Water (WS)

Cross-listings: ENVI 266 MAST 266

Secondary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

Class Format: This class will be remote, meeting synchronously. The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

Requirements/Evaluation: 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference to majors, and then to sophomores and juniors, respectively.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 266 (D1) MAST 266 (D1)

Writing Skills Notes: Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

ENVI 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

Cross-listings: ENVI 268 MAST 268

Secondary Cross-listing

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 271 (S) Theatre & Environment: Site, Nature, Ecoperformance, Utopia (DPE)

Cross-listings: THEA 272 ENVI 271

Secondary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or ecology of a performance change its meaning and reception? What role can live performance play in grassroots campaigns for climate action or environmental justice? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this combined seminar/studio course, participants will work collaboratively to create a series of mini-performances based on four categories: site, nature/ecology, ecoperformance, and utopia.

Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute *all* human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Artichoke Dance, Talking Birds, Extinction Rebellion, Greenpeace, and others. As a special project in the class, we will collaborate with The Zilkha Center to create performances that engage directly with topics relevant to the campus and surrounding community. This is a seminar and maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio and seminar course that requires deep collaboration on the creation, development, and performing of original works of live performance.

Requirements/Evaluation: Creation and presentation of a series of four mini-performance pieces; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 272 (D1) ENVI 271 (D1)

Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

ENVI 273 (F) Politics without Humans?

Cross-listings: ENVI 273 STS 273 PSCI 273

Secondary Cross-listing

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students

Enrollment Limit: 25

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

ENVI 291 (S) Religion and the American Environmental Imagination

Cross-listings: SOC 291 ENVI 291 REL 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENVI 297 (S) Global Sustainable Development

Cross-listings: ENVI 297 GBST 287

Primary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation: Class discussions; Policy Analysis Paper (5-7 pages); Mid-term exam; Final case study/class presentation (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ENVI 301 (F) Climate Changes (Latin America): Aesthetics, Politics, Science

Cross-listings: RLSP 401 ENVI 301

Secondary Cross-listing

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta

Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que sueño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: this is the senior seminar required for all Spanish majors

Not offered current academic year

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: AMST 302 ENVI 302

Primary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation: Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 303 (S) Cultures of Climate Change

Cross-listings: SOC 303 ENVI 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENVI 304 (F) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: AFR 335 ENVI 304 GBST 304 HIST 304

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 335 (D2) ENVI 304 (D2) GBST 304 (D2) HIST 304 (D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 307 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators, Public Health concentrators, and Political Science majors

ENVI 311 (S) Tropical Ecologies: Francophone Caribbean Literature and the Environment (DPE)

Cross-listings: AFR 313 RLFR 313 ENVI 311

Secondary Cross-listing

The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau--the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical texts of Caribbean of literary and political movements such as *Indigenisme*, *Négritude*, and *Créolité*. Conducted in French.

Class Format: This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

Prerequisites: Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 313 (D1) RLFR 313 (D1) ENVI 311 (D1)

Difference, Power, and Equity Notes: As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

Not offered current academic year

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: BIOL 302 ENVI 312

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

ENVI 314 (F) Nature in Crisis: The Classification Craze and The Rise of Museums

Cross-listings: RLFR 315 ENVI 314

Secondary Cross-listing

This course examines how understandings of nature evolved dramatically (and at times unsettlingly) from the 17th through the early 20th centuries and how this instability prompted a desire to classify and control natural phenomena. To analyze these issues, we will likewise consider the rise of modern museums, as well as the accompanying acts of classification and curation. We will consider how literary and philosophical texts from the aforementioned time periods depict nature, how real-world interactions with nature led to the creation of (illustrated) taxonomies, how colonization inflected notions of the natural world and also museum exhibits, and finally, how the cabinet of curiosities and later, the museum, provided a space in which to display and analyze nature's more unusual treasures. As part of our explorations, we will build a virtual exhibit of our own to reflect our understanding of nature today and our engagement with concepts of nature from previous eras. Conducted in French. Counts as an Envi Humanities Elective for the Envi Concentration.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: participation, online homework, essays, mid-semester presentation, final class project (virtual exhibit)

Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ENVI 315 (S) Ecocriticism

Cross-listings: ENVI 315 ENGL 312

Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: majors in English or Environmental Studies

ENVI 321 (F) Born to be Wild: Rethinking Animals in Pre-modern and Modern Texts (DPE)

Cross-listings: COMP 323 ARAB 323 ENVI 321

Secondary Cross-listing

In the past few months, images of dolphins appearing in the Venetian canals, and wild animals roaming eerie looking post-apocalyptic deserted streets have gone viral. The majority of these images have proven to be fake, however their popularity was witness to people's hope that we can "reset" the environment and a yearning to reframe animals' positionality vis-à-vis their habitats and humans. Using critical lenses from ecocriticism and animal studies, we will be exploring texts from non-Western traditions in which animals figure strongly from pre-modern times to the age of the Anthropocene. The focus will be on Arabic, Persian and Turkish texts all in translation. The course will be traversing several genres and texts from Pre-Islamic poetry, the Quran, the 10th century Ikhwan as-Safa's epistle *The Case of Animals versus Man Before the King of the Jinn*, the fables of *Kalila and Dimna*, Farid ed-Din 'Attar's *Conference of Birds*, travelogues, paintings, contemporary film till we reach recent fiction with cyborgs and drones. Throughout the course, we will be examining themes such as diverse conceptualizations of what it means to be an "animal", what constitutes animal agency and animal subjectivity irrespective of humans and their often utilitarian lens. We will do this by investigating how animals through these texts have been represented, imagined and reconfigured whether allegorically or otherwise as communities and in relation to humans and the environment and the implications of that. Finally, we will explore what a poetics of animal studies in these cultural and literary traditions could look like. The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Class Format: This class will be offered remotely synchronously twice a week (75 minutes each session), in addition to prerecorded asynchronous material at times.

Requirements/Evaluation: The course will consist of multiple forms of evaluation like participation, Glow posts, essays, experiential reflections and creative tasks.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Arabic majors, Comparative Literature Majors, Environmental Studies Majors and Arabic certificate holders.

Expected Class Size: 10

Difference, Power, and Equity Notes: This course deals with different literary traditions and their aesthetics. The approach is both synchronic and diachronic by looking at texts and their texts from different time periods and at different genres. The course will be examining what it means to be an "animal" vis-a-vis human beings and their environment and animal agency in these literary traditions as opposed to the often utilitarian lens that animals have often been viewed through.

ENVI 322 (F) Waste and Value

Cross-listings: ENVI 322 GBST 322 ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

ENVI 323 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 323 ENGL 324

Secondary Cross-listing

Consciousness of the world's finiteness in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the

boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It* and *King Lear*; Marvell; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Wordsworth; McCarthy, *The Road*; Atwood; Alice Oswald; photography (Struth, Hutte); painting (Titian), and video installations (Pipilotti Rist). Theoretical texts include: Smith, *Against Ecological Sovereignty*; Wood, *Reoccupy Earth*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am* and *Beast and the Sovereign*.

Class Format: This course will be taught virtually, but we will make absolutely every effort to ensure that it takes the form of a genuine discussion class, including breaking periodically into smaller online groups. Requirements: two papers totaling 20 pages.

Requirements/Evaluation: two papers over the course of the semester totaling approximately 20 pages.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors

ENVI 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: AFR 347 AMST 332 ENVI 332

Secondary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 347 (D2) AMST 332 (D2) ENVI 332 (D2)

Writing Skills Notes: One thesis paper at 15 pages. The writing process is staggered, with each part graded, and with critical feedback from professor and peers. Specifically, one research proposal (including thesis outline and annotated bibliography of primary texts) with feedback from professor; one thesis paper draft with feedback from peers; one letter of revision explaining the student's revision process; one final draft with critical feedback from professor; and student presentation and discussion.

Difference, Power, and Equity Notes: The course addresses issues of difference, power, and equity, and offers theoretical tools and perspectives to understand these issues. Specifically, students learn how to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

ENVI 341 (S) Toxicology and Cancer

Cross-listings: ENVI 341 CHEM 341

Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelsus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 346 (S) Environmental Psychology

Cross-listings: PSYC 346 ENVI 346

Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: empirical lab course

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

ENVI 348 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience (DPE)

Cross-listings: AMST 347 ENVI 348

Primary Cross-listing

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: none

Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 347 (D2) ENVI 348 (D2)

Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

ENVI 349 (S) Race, Development, and Food Sovereignty (DPE) (WS)**Cross-listings:** AFR 349 ENVI 349 AMST 342**Secondary Cross-listing**

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

Requirements/Evaluation: Participation: 25%; Weekly Response (350-500 words): 25%; Final Essay--Research proposal (2-3 pgs.): 10%; Final Essay--Peer review and feedback (2 pgs.): 10%; Final Essay--Presentation: 10%; Final Essay--Paper (15 pgs.): 20%**Prerequisites:** AMST 101, AFR 200, and/or ENVI 101**Enrollment Limit:** 15**Enrollment Preferences:** AMST, AFR, ENVI**Expected Class Size:** 15**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D2) (DPE) (WS)**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 351 (F)(S) Marine Policy (DPE) (WS)**Cross-listings:** MAST 351 ENVI 351 PSCI 319**Secondary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our

ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 354 (F) Drugs, Empire, & Environment in Historical Perspective

This course considers the political economy & environmental impacts of licit & illicit drugs. We begin with the premise that drugs are commodities that gained global significance in the context of liberalism & empire. Imperial nations--notably Britain--consolidated political & economic power in the 19th century by promoting the opium trade against the wishes of Chinese & Indian officials. Most illicit drugs originated as plants--cannabis, poppies, & coca. The production of these internationally traded agricultural commodities helped transform rural livelihoods & landscapes in the 19th century; attempts at suppressing drug crops in the 20th century have also had environmental impacts. After the turn of the 20th century, the United States led an international movement to end the opium trade. Since then, the War on Drugs has expanded as a means for the United States to exercise domestic & global power. Our focus is primarily illicit drugs, but historical shifts in the categories of licit/illicit are a key theme. Other themes include race & racism in drug policy, imperialism, agriculture, & debates over toxicity. The course is divided into four units, stretching from the 19th century through the present. First, we discuss British colonialism in India & China through the lens of the opium trade. Next, we study the emerging drug control regime, focusing on coca, cocaine, & Indigenous producers in the Andes in the 1940s & 1950s. The third unit looks at environmental justice activists who oppose pharmaceutical companies' waste disposal in Puerto Rico. Finally, we evaluate the environmental impacts of the recent cannabis boom. We ask whether the legal architecture on which the industry is built can overcome the colonial & racist legacies of drug control. Readings include works by historians, novelists, anthropologists, & public policy experts.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion and participation

Prerequisites: ENVI 101 or instructor permission

ENVI 359 (S) Writing Animals

Cross-listings: ENGL 359 ENVI 359

Secondary Cross-listing

Animals surround us, inhabit us. We rely on them for food, for clothing, for friendship, and for ideas. We could say that the whole human enterprise rests on the shoulders of animals, except that we ourselves are, of course, animals, too. In this course, we will explore the rich and rapidly growing body of work that centers on the creatures we live among. Among the questions we will consider are: How do we imagine minds unlike our own? Can we speak for creatures that lack language (or at least our form of it)? How do we explain our love of animals -- and our crimes against them? Readings will include fiction (Kafka's "A Report to an Academy"), non-fiction (Sy Montgomery's *The Soul of an Octopus*), natural history (Helen Macdonald's *Vesper Flights*) and philosophy (Peter Singer's *Animal Liberation*). This course will emphasize student writing, and participants will be invited to experiment with different genres.

Requirements/Evaluation: Students will produce roughly twenty pages of writing in a variety of modes

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: English majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

Requirements/Evaluation: Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, problem sets, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 8/lab

Enrollment Preferences: Chemistry and Environmental Studies majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 368 (F) Technology and Modern Society

Cross-listings: ENVI 368 SOC 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Attributes: ENVI Humanities, Arts + Social Science Electives FMST Related Courses

Not offered current academic year

ENVI 373 (F) Environmental Organic Chemistry

Cross-listings: CHEM 373 ENVI 373

Secondary Cross-listing

This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: Lecture/discussion; lecture, three hours per week and discussion, 75 minutes per week.

Requirements/Evaluation: weekly problem sets, two midterm exams, a final exam, participation in discussion, an independent research proposal

Prerequisites: CHEM 251 and either CHEM 155 or CHEM 256. ENVI 102 is strongly recommended.

Enrollment Limit: 15

Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives EVST Environmental Science

Not offered current academic year

ENVI 376 (F) Economics of Environmental Behavior (QFR)

Cross-listings: ECON 477 ENVI 376

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation: regular reading responses, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 477 (D2) ENVI 376 (D2)

Quantative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

Not offered current academic year

ENVI 378 (S) Nature/Writing

Cross-listings: ENGL 378 ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

ENVI 387 (F) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 30

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 390 (S) The Nature of Nature

Cross-listings: ENVI 390 ENGL 394

Secondary Cross-listing

"Nature" is one of the commonest words in English. And yet what does it signify? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying attention to the difficulty of narrating processes that are often too big, too small, too quick or too slow for direct human apprehension. We'll also explore the ways popular nature writing mingles scientific reporting with implicit judgments about human identity, morality, and social organization. Writers studied will include Elizabeth Kolbert, N. Scott Momaday and Charles Darwin. We'll also consider the technological mediations of nature in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page online essay incorporating audiovisual materials. Active participation in class. Note that this course will be offered exclusively online.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 16

Enrollment Preferences: English majors; Environmental Studies majors and concentrators.

Expected Class Size: 16

ENVI 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 404 MAST 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: ENVI 405 GEOS 405

Secondary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, two 10-page lab reports, lab activities, and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 410 (S) The Cryosphere

Cross-listings: ENVI 410 GEOS 410

Secondary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

Not offered current academic year

ENVI 420 (F) Architecture and Sustainability in a Global World (WS)

Cross-listings: ARTH 420 GBST 420 ENVI 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing

dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: This course will be taught in a hybrid mode, with both online (lecture) and in-person (discussion) elements.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 423 (F) Global Change Ecology

Cross-listings: ENVI 423 BIOL 413

Secondary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 430 (S) Race, Identity, Nature (DPE) (WS)

Cross-listings: ENVI 430 AFR 390 AMST 430

Secondary Cross-listing

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Class Format: This course is designated as remote. However, international students who want to take this course but need it to be designated as a hybrid course in order to do so may instead register for an independent study with Prof. Ayazi. As a hybrid course, this independent study will have the same requirements as the listed course, with the exception of a limited number of face-to-face meetings in Williamstown or Boston. Please contact Prof. Ayazi at ha5@williams.edu to discuss such an arrangement.

Requirements/Evaluation: Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%. Class will meet twice per week. Tu. meetings will be synchronous and Th. meetings will be asynchronous. Asynchronous components of the course include pre-recorded lectures, discussion boards, and other exercises that promote as much connection as possible within the constraints of remote education. Toward this end, synchronous meetings will center engaged discussion.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 430 (D2) AFR 390 (D2) AMST 430 (D2)

Writing Skills Notes: Emphasis on revision and writing process includes: One thesis paper at 15 pages (receiving critical feedback from professor and peers); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one research proposal (including thesis outline and annotated bibliography of primary texts) with critical feedback from professor; student presentations and roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: By the end of this course, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation. In order to address such issues of difference, power, and equity, this course provides students with the necessary th

ENVI 436 (S) Demigods: Nature, social theory, and visual imagination in art and literature, ancient to modern

Cross-listings: ENVI 436 ARTH 436 CLAS 436

Secondary Cross-listing

Horse-men, cat-women, goat-men, tree-women, man-bulls, fish-girls, snake-people--cross-species compound creatures are everywhere in ancient Greek and Roman art, poetry, and culture. The conceptual or cognitive value of those "demigods" has changed over time. In art, demigods have frequently been reduced to the status of decoration, and in literature, they have become generic markers of fantasy. But they are hardly without meaning. Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of nature, the origin of species, and the environment; and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. We will consider in detail ancient theories of the origins of species as well as the relationship between nature and human culture. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian, and the rediscovery of ancient materialist theories of nature and culture. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg's cultural-historical texts, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: Lecture and discussion. When possible, we will meet outdoors in person; when that is not possible, we will meet online.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: art history majors, graduate students in art history, classics majors, then any interested student

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Unit Notes: This course will satisfy the seminar requirement in art history.

ENVI 450 (F) Senior Seminar: Environmental Ethnography

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term Coded fieldwork notes and summary statements (8-10 pages); Final ethnographic snapshot/presentation (13-15 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

ENVI 454 (F) Climate Change Physiology

Cross-listings: BIOL 454 ENVI 454

Secondary Cross-listing

Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

Class Format: Synchronous discussions with in-person and remote option. Satisfies the distribution requirement for the Biology major.

Requirements/Evaluation: Evaluation will be based on class participation and several short papers.

Prerequisites: BIOL 203 or BIOL 205, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Biology seniors who have not yet taken a 400 level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 460 (S) Communicating Climate Change

This course is about environmental communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who either don't care about them or who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And finally, they are thoroughly entangled with almost every other problem we face, from pandemics to racism. How do we communicate clearly, persuasively, and responsibly about something so complex? This seminar brings together students who have specialized in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. We will focus on perhaps the greatest communication challenge of them all: climate change. Over the course of the seminar, we will explore research on climate change communication in a diverse array of fields while seeking to put our findings into practice locally. To help us learn new ways to communicate, we will meet with some successful, innovative environmental professionals in diverse fields. We will work together as a team to solve concrete communication problems here in our community.

Requirements/Evaluation: One 5-7-page paper; final collaborative project; participation.

Prerequisites: Environmental Studies 101.

Enrollment Limit: 19

Enrollment Preferences: Environmental/Maritime Studies majors and concentrators.

ENVI 478 (S) Cold War Landscapes

Cross-listings: AMST 478 ENVI 478 HIST 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

Prerequisites: none

ENVI 491 (F) The Suburbs

Cross-listings: AMST 490 HIST 491 ENVI 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I'll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Winter Study -----

ENVI 10 (W) The Mohawk Trail: History Here and Everywhere

Cross-listings: HIST 10 AMST 10 ENVI 10

Secondary Cross-listing

History is everywhere, all around you, no matter where you are. That's because history happens in place, and in specific places. Some places are spoken of as particularly "historical" but every place has its stories. This Winter Study course will use the case study of the Mohawk Trail road and region to explore the ways that history happens in place. Students will learn how to see the past all around them and apply these skills to a particular place of their choosing, whether along the Mohawk Trail, in or around the local Williamstown area, their hometown, or any other place they know well. We will meet twice a week for four hours where we'll discuss readings, visit places along the Mohawk Trail, and practice the various skills of reading the landscape to better understand the past. Throughout the course students will analyze and conduct research on their particular place, present their preliminary findings to the class, and either write a traditional final research paper or produce a creative project. During the regular semester it might seem that the past is preserved in written documents and conveyed in books. That's true but there are all sorts of ways that we can see the past in place outside the classroom. This is what we'll explore together in this course.

Requirements/Evaluation: research a particular place & present findings to the class; option to write a final research paper or to produce a creative project based on their analysis & research

Prerequisites: none

Enrollment Limit: 11

Enrollment Preferences: student questionnaire

Grading: pass/fail only

Unit Notes: Chris Slaby is currently a Ph.D. candidate in the American Studies Program at the College of William & Mary, where he is writing a dissertation on the history of the Mohawk Trail and Mohican Homelands. His scholarship exists at the intersection of Native American and Indigenous Studies and the environmental humanities.

Materials/Lab Fee: none

ENVI 16 (W) New England--The Wild Side!

In this course we will explore, first hand, the New England landscape to make some sense of its amazing physical and biological diversity. From the spruce-clad Berkshires to the broad Connecticut River Valley to wind-swept Cape Cod, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna and even paleontology. We'll learn the typical trees and shrubs of the region and what their presence suggests about the nature and history of the places they grow. We will make forays into the world of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. What do their tracks and behavior reveal about

how they cope in their rigorous and fickle environments, and how might they be affected by climate change and other human impacts? Through hikes, field trips, visits to museums, readings, discussions, and personal observations, you will increase your awareness and appreciation of the natural heritage of the region that you have made your recent home. This class is field focused; therefore students should be prepared to spend significant time outdoors, sometimes hiking several miles, in winter conditions. Some trips will require students to be away from campus beyond normal class hours and even overnight. No special equipment or prerequisites are required for this class.

Requirements/Evaluation: the final project could comprise a 6-page paper, journal, creative endeavor (sketches, poetry, etc), field study, or related work, plus a short presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: seniority, demonstrated interest and curiosity in the subject

Grading: pass/fail only

Unit Notes: Drew Jones has been manager of Williams College's Hopkins Memorial Forest for 21 years. There he coordinates research, education and maintenance activities. In addition, he bands saw-whet owls in the fall and boils maple sap in the spring. Previously, Drew has worked as a wildlife biologist and environmental educator from the southern Appalachians to the north woods and beyond.

Materials/Lab Fee: \$273

ENVI 20 (W) Winter Naturalist's Journal

Cross-listings: ENVI 20 ENGL 20

Primary Cross-listing

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out-of-doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose) as well as observational drawing. Everyone will be required to keep a nature journal, which will be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. The instructor will meet with the students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten-page paper, and to read one or more of them at the final celebration.

Requirements/Evaluation: final project or presentation, daily journal and several 2 to 3 page papers

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: random selection

Grading: pass/fail only

Unit Notes: Christian McEwen is author of "World Enough & Time: On Creativity and Slowing Down" and the editor of "Jo's Girls; Tomboy Tales of High Adventure; The Alphabet of the Tress: A Guide to Nature Writing" as well as several other books. She is currently working on a book called "In Praise of Listening". Guest lecturer Barbara Bash is an artist and calligrapher who has published several books, including True Nature: An Illustrated Journal of Four Seasons in Solitude.

Materials/Lab Fee: \$32

ENVI 25 (W) Tropical Marine Conservation

Cross-listings: ENVI 25 BIOL 25

Secondary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip.

Requirements/Evaluation: oral presentation and 5-page research paper

Prerequisites: BIOL 203 or ENVI 101 or ENVI 102 or MAST 311 or permission of instructors

Enrollment Limit: 8

Enrollment Preferences: preference will be given to BIOL and ENVI majors and concentrators

Grading: pass/fail only

Materials/Lab Fee: none

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;

- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

MAST 397, 398 Independent Study: Maritime Studies

MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student's Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 104 (F) Oceanography

Cross-listings: GEOS 104 MAST 104 ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time).

All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

Cross-listings: MAST 211 GEOS 210

Primary Cross-listing

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D3)

MAST 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: MAST 231 ENGL 231

Primary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (D1) ENGL 231 (D1)

Difference, Power, and Equity Notes: This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

MAST 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Primary Cross-listing

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: ENVI 265 BIOL 165 MAST 265

Primary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Does not count for Biology major credit.

Distributions: (D3)

MAST 266 (S) Reading Water (WS)

Cross-listings: ENVI 266 MAST 266

Primary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

Class Format: This class will be remote, meeting synchronously. The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

Requirements/Evaluation: 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference to majors, and then to sophomores and juniors, respectively.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 266 (D1) MAST 266 (D1)

Writing Skills Notes: Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

Cross-listings: ENVI 268 MAST 268

Primary Cross-listing

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

MAST 311 (F)(S) Marine Ecology

Cross-listings: MAST 311 BIOL 231

Primary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

MAST 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

MAST 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Primary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars,

and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MAST 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 404 MAST 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

EXPERIENTIAL EDUCATION

Coordinator: Paula Consolini

Experiential education, involving "learning by doing" outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor's judgment. [More information can be found on the Center for Learning in Action website.](#)

EXPE Experiential Education Courses

AFR 212 (S) Jazz Theory and Improvisation I

Cross-listings: MUS 104 AFR 212

Secondary Cross-listing

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

AFR 214 (F) Jazz Theory and Improvisation II

Cross-listings: MUS 204 AFR 214

Secondary Cross-listing

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions

Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project

Prerequisites: MUS 104b or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 5-8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: WGSS 113 ENGL 113 AMST 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AMST 238 (F)(S) Zen and the Art of American Literature

Cross-listings: REL 228 ENGL 239 AMST 238

Secondary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, *A Tale for the Time Being*. And we'll range far beyond the world of literature into

other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week). No prior experience with meditation is necessary. Just an open mind.

Class Format: This will be a lecture class, with little to no time in-class for discussion. To create opportunities for conversation and discussion, I will offer a substantial number of office hours each week as well as small discussion group meetings (of 15 students each) every other Sunday (the discussion group meetings will be optional).

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: short reading responses and free-writing exercises for each class meeting, a 3-4 page midterm essay and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 85

Enrollment Preferences: Students who preregister should fill out an expression of interest form at <https://tinyurl.com/ZenAmLitSpring2022> by Nov. 9. Preference will first go to students dropped from the Fall 2021 section of ENGL 239 and then by class year (seniors first).

Expected Class Size: 85

AMST 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

AMST 259 (S) New England Environmental History (WS)

Cross-listings: AMST 259 HIST 259 ENVI 259

Secondary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

AMST 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: AMST 302 ENVI 302

Secondary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation: Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 COMP 330 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

ANSO 205 (S) Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? How do qualitative and quantitative approaches to social inquiry differ? How are they similar? What is the importance of history to sociological and anthropological research? How do social researchers use archival and other documentary materials to interpret society? What is the relationship between empirical data and the generation of social theory? What are the ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? We will approach these problems both abstractly and concretely, through readings in epistemology as well as a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from both inside and outside the academy. The course will also feature hands-on training in field methods, in which students design and undertake their own pilot field projects.

Requirements/Evaluation: full participation in the seminar, several short written assignments, and a final research essay/proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

ANSO 402 (S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: Anthropology and Sociology majors

ANTH 371 (F) Medicine and Campus Health in Disruptive Times (DPE) (WS)

Cross-listings: STS 370 WGSS 371 ANTH 371

Primary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20

Enrollment Preferences: Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students, then students in art history or studio art

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

ARTS 13 (W) Creative Portraiture in the Darkroom

Cross-listings: RLFR 13 ARTS 13

Secondary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (the large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 10 weekly lab or studio hours outside of regular classes.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art majors then random

Grading: pass/fail only

Unit Notes: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

ARTS 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: THEA 385 ARTS 385

Primary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation: the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES

BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, Lanesborough and North Adams Elementary schools for a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation throughout one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week, students will learn to set up fish matings and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd-grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Time commitment: Week 1--approx. 6 hours total for program training and lesson preparation with additional outside-of-class time needed to create teaching posters, dates and times TBD Weeks 2 & 3--approx. 4 hours per day, times TBD dependent on elementary school schedules during regular school day between 8:30 am and 3:00 pm. Week 4--TBD; 4 hours per day if running a school program; minimal hours if not running an elementary school program. Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering. Martha Marvin is a Lecturer in Neuroscience at Williams College whose research focuses on heart development and stress responses in developing zebrafish embryos. She has facilitated Project BioEyes at Williams College since 2010.

Requirements/Evaluation: final project or presentation

BIOL 13 (W) Introduction to Animal Tracking

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their observation skills, their knowledge and awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show. The course will meet twice a week for 4- to 5-hour sessions, primarily in the field. One field trip to a nearby state forest is scheduled for the fourth or fifth class meeting day. This day may extend to 4 p.m. Students are expected to have appropriate outdoor gear for winter. Aside from class time students are expected to: create journals and site maps of their team study areas, including all major features of the landscape, flora and fauna activity; visit their study spots everyday for a minimum of 2 hour of tracking journaling and data collection; Write a 3 page paper. Topic TBA; Make a group presentation of findings from their team study area; Complete assigned readings; Complete a field test of their tracking skills

Requirements/Evaluation: short paper and final project or presentation; field test of animal tracking skills

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference given to seniors

Grading: pass/fail only

Unit Notes: Dan has been teaching animal tracking and other primitive living skills for almost two decades. He holds a level 3 Track and Sign certification from Cyber tracker international and works at nature centers and schools throughout New York and Massachusetts as well as running his own wilderness programs at Tamakoce Wilderness Programs in upstate NY.

Materials/Lab Fee: \$15

BIOL 211 (S) Paleobiology

Cross-listings: GEOS 212 BIOL 211

Secondary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

BIOL 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220 BIOL 220

Primary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

BIOL 231 (F)(S) Marine Ecology

Cross-listings: MAST 311 BIOL 231

Secondary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

BIOL 25 (W) Tropical Marine Conservation

Cross-listings: ENVI 25 BIOL 25

Primary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip.

Requirements/Evaluation: oral presentation and 5-page research paper

Prerequisites: BIOL 203 or ENVI 101 or ENVI 102 or MAST 311 or permission of instructors

Enrollment Limit: 8

Enrollment Preferences: preference will be given to BIOL and ENVI majors and concentrators

BIOL 302 (F) Communities and Ecosystems (QFR)

Cross-listings: BIOL 302 ENVI 312

Primary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, preventative medicine, mindfulness and meditation, healthy eating and meal planning, deconstructing cravings, sugar addiction, and finding happiness. Evaluation will be based on completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course. In the event of over-subscription, these statements will be used in the selection process. We will meet twice a week for three-hour sessions as a group. The course will include two individual sessions--an initial health assessment plus an additional session designed to personalize the course and assist the student in applying the learned techniques. There will be several books required for this class.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students must email a statement of interest to Nicole@zentreewellness.com

Grading: pass/fail only

Unit Notes: Nicole Anagnos is health coach and director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Klo Organic Beauty. She also holds a master's degree in education.

Materials/Lab Fee: none

CHEM 16 (W) Glass and Glassblowing

Cross-listings: CHEM 16 ARTS 16

Primary Cross-listing

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Grading: pass/fail only

Materials/Lab Fee: \$75

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese.

All readings in English with some examples in Chinese.

Class Format: discussion

Requirements/Evaluation: class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

COMP 10 (W) Gym Bros and Cardio Bunnies--Constructing Gender, Body and Identity in the Gym

Cross-listings: WGSS 10 COMP 10

Primary Cross-listing

While it may not be written on the campus map, it's common Williams knowledge that the gym on upper Lasell is called "the EstroGym." Have you ever wondered why cardio spaces, like the EstroGym, are designated as feminine while weight rooms (think Lower Lasell) seem to be filled with men? We will explore the answers to this and other questions in this hybrid physical and academic course. Half of this course will be a critical exploration of phenomena often taken for granted within the fitness industry. We will discuss the ways in which cultural understandings of gender and bodies are created and reinforced in physical activity spaces. Topics will include gender policing, whiteness and white supremacy in sport and fitness, trans and gender non-conforming athletes, masculinity and violence in athletics, and the social construction of gender. Much of our reading will be grounded in feminist and sociological theory but will also include text and visual sources from CrossFit gyms, weightlifting competitions, bodybuilding shows, and more. The other half of this course will be taught in the weight room, where students will learn how to strength train. It is a suitable introduction for novice lifters as well as an opportunity for experienced lifters to refine their technique. Students will explore the differences between powerlifting, Olympic weightlifting, and bodybuilding and will have the opportunity to practice these different forms. Outside of class meeting times, students will be expected to complete readings, brief writing assignments, gym observations, short film viewings, and gym selfies (seriously). Depending on class size and logistics, we may take 1-2 field trips to other local gyms. ****NOTE:** This course is open to students with any type of lifting experience (from zero physical activity background to Olympic athlete). This includes students with any form of disability, so long as they are cleared by a licensed medical provider.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none--open to those with any type of lifting experience (no experience to Olympic athlete), including students with any form of disability as long as they are cleared by a licensed medical provider

Enrollment Limit: 14

Enrollment Preferences: students will write a paragraph explaining why they want to take the course

Grading: pass/fail only

Unit Notes: Holly Crane is a competitive weightlifter, personal trainer, strength coach, and educator. She received a BA in Comparative Literature from Williams and an MS in Kinesiology from the University of Minnesota. Her graduate research focused primarily on gender in the gym. She is committed to creating inclusive gym spaces and providing access to strength for those who are frequently overlooked within the fitness industry.

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 COMP 330 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

COMP 338 (F) The Culture of Carnival

Cross-listings: COMP 338 THEA 335

Secondary Cross-listing

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Requirements/Evaluation: regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: sophomores and first-year students

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 28 (W) Product Management and Solution Design

Cross-listings: ECON 28 CSCI 28

Secondary Cross-listing

In this course, students will work in small teams to design a software product that solves a problem of their choosing. To support this endeavor, we will examine, critique, and apply methodologies intended to solve these problems, including those developed by Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Students will learn to act as effective product managers, achieving alignment between business, technology, and UI/UX design. Such alignment is crucial given that technology projects often fail not because of the quality of technical engineering but due to misalignment in these three areas. Google Glass failed to account for its price tag, fashion, and the privacy panic. The initial Obamacare website failed to address management issues and predict the volume of website visitors. Flexcube failed to update and incorporate users into the design of their product, resulting in a \$500 M UX mistake for Citi bank. These organizations did not identify the right problem, or did not build the right solution. The underlying conflict is IT teams like to be told what to build, but users often do not know what they want or how to express it. We will learn how product managers and their interdisciplinary teams can bridge that gap.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students will be asked to submit a letter describing why they are interested in the course and what they hope to get out of it

Grading: pass/fail only

Unit Notes: Allan joined DataArt in 2014 through the acquisition of AW Systems, where he was a founding partner, and instrumental in developing the Solution Design Framework Methodology, a process designed to guide large-scale/complex technology projects to success. Allan now heads DataArt's Solution Design consulting group as well as their product management competency.

ECON 21 (W) Fieldwork in International Development

This course involves an internship, volunteer work, or a research project in a developing economy and an academic analysis of the relevant development issues. The instructors will work with interested students to help arrange a placement and to help secure funding through Williams Financial Aid or other sources. Such arrangements must be made well in advance of Winter Study. Spanish speakers are especially encouraged to apply as there will likely be a few fieldwork possibilities in coffee-growing areas of Latin America. Students will read relevant background articles distributed at the end of fall term and must agree to keep a journal, maintain contact with the instructors, and write a final paper on development issues raised by their specific internship. A group meeting of all students will occur after Winter Study to reflect on individual experiences. Students are also encouraged to attend development talks at the Center for Development Economics throughout the academic year. Requirements: 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; 10-page final paper or equivalent; participation in final meeting. Interested students should send a resume and letter of interest to Paula Consolini by November 1. Each student's internship provider should send a confirmation letter by December 1 verifying the placement and describing the nature of the work to be performed by the intern. Paula Consolini is Director of the Center for

Learning in Action.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: Resume and Letter of Interest will be used to select students if over-enrolled

ECON 22 (W) Volunteer Income Tax Assistance

Cross-listings: POEC 22 ECON 22

Primary Cross-listing

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low-income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10-page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and Q&A sessions featuring guests from local social service organizations and the community will help orient students to the issues facing low-income families in the northern Berkshires. Note: This course satisfies the Political Economy Major Experiential Learning requirement.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: statement of interest

ECON 23 (W) Investing with Purpose: The Planning and Practice of Endowment Investing

Are you eager to learn about investing? Or perhaps you are interested in non-profits and want to understand how endowments support their mission? Maybe you've thought about a potential career in finance, but want to know the difference between asset management and investment banking? ECON 23 is open to students of all majors and backgrounds; students with no prior experience are welcome and encouraged to apply. ECON 23 is designed to introduce students to investing and equip students with key industry knowledge and skills. The course is taught by members of the Williams College Investment Office which oversee the College's \$3.2 billion endowment. We'll start with an introduction to the role that the endowment plays in supporting the College's mission. Next, the course will cover different investment assets including equity, hedge funds, venture capital, private equity, fixed income, and impact investing. Students will receive a brief overview of accounting and will have the opportunity to learn about different career paths in finance. Through discussions, readings, and a group case study, students will apply skills learned. Students will learn from practicing investment professionals through guest speakers and will gain practical skills in excel through training and project work. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, weekly journal entries, an introductory excel course, and a group case study exercise. Students are required to attend a day-long field trip to Boston to meet the Investment Office team and other guest

speakers. The course is open to first-years, sophomores, and juniors. Email investmentoffice@williamsedu with a resume (if available) and short statement discussing why you are interested and what you hope to gain from this course by 11:59 PM ET October 24, 2021. If no resume, write a short paragraph about yourself.

Requirements/Evaluation: class attendance, participation, and completion of assignments, which include a group case study, weekly journal entries, and an excel workbook

Prerequisites: none

Enrollment Limit: 12

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: WGSS 113 ENGL 113 AMST 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 20 (W) Winter Naturalist's Journal

Cross-listings: ENVI 20 ENGL 20

Secondary Cross-listing

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out-of-doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose) as well as observational drawing. Everyone will be required to keep a nature journal, which will be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. The instructor will meet with the students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will

conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten-page paper, and to read one or more of them at the final celebration.

Requirements/Evaluation: final project or presentation, daily journal and several 2 to 3 page papers

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: random selection

Grading: pass/fail only

Unit Notes: Christian McEwen is author of "World Enough & Time: On Creativity and Slowing Down" and the editor of "Jo's Girls; Tomboy Tales of High Adventure; The Alphabet of the Tress: A Guide to Nature Writing" as well as several other books. She is currently working on a book called "In Praise of Listening". ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

ENGL 239 (F)(S) Zen and the Art of American Literature

Cross-listings: REL 228 ENGL 239 AMST 238

Primary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, *A Tale for the Time Being*. And we'll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week). No prior experience with meditation is necessary. Just an open mind.

Class Format: This will be a lecture class, with little to no time in-class for discussion. To create opportunities for conversation and discussion, I will offer a substantial number of office hours each week as well as small discussion group meetings (of 15 students each) every other Sunday (the discussion group meetings will be optional).

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: short reading responses and free-writing exercises for each class meeting, a 3-4 page midterm essay and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 85

Enrollment Preferences: Students who preregister should fill out an expression of interest form at <https://tinyurl.com/ZenAmLitSpring2022> by Nov. 9. Preference will first go to students dropped from the Fall 2021 section of ENGL 239 and then by class year (seniors first).

ENGL 25 (W) Journalism Today

This course will give students an in-depth view of the inner workings of journalism today, featuring the perspectives of several Williams alumni who work in print, broadcast, and new media. Our guests -- who will visit in person and online -- will discuss how to report and write the news, as well as their own experience in the profession. In addition to reading and watching the work of our guests, there will be required texts about issues in journalism and students will complete several small reporting and writing exercises in addition to one feature-length news story on a topic chosen at the beginning of the course. In previous years, guests have included journalists from CNN, the New York Times, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: priority will be given to seniors and juniors, preference for students with a demonstrated interest in journalism (as expressed in a statement of interest, if needed)

Grading: pass/fail only

Unit Notes: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle.

Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. He graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly short quizzes, three exams, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

ENVI 214 (S) Mastering GIS

Cross-listings: ENVI 214 GEOS 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

ENVI 215 (F) Climate Changes

Cross-listings: GEOS 215 ENVI 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner

consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 221 (D3) ENVI 222 (D3) LEAD 221 (D3)

Writing Skills Notes: You will learn to write in a variety of policy-focused formats

Attributes: ENVI Environmental Policy EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

Not offered current academic year

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 250 (F) Environmental Justice (DPE)

Cross-listings: STS 250 ENVI 250

Primary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: juniors, seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 250 (D2) ENVI 250 (D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 259 (S) New England Environmental History (WS)

Cross-listings: AMST 259 HIST 259 ENVI 259

Primary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 259 (D2) HIST 259 (D2) ENVI 259 (D2)

Writing Skills Notes: Six response papers for which the instructor will provide consistent feedback on writing skills as well as content. Sequenced writing workshops that lead toward a final research paper.

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: AMST 302 ENVI 302

Primary Cross-listing

In this interdisciplinary, experiential workshop students effect environmental change through hands-on community projects. Environmental Planning includes a range of disciplines pertaining to the natural and built landscape such as city planning, environmental management, affordable housing, food system planning, climate resiliency planning, habitat restoration, alternative transportation, renewable energy, farmland, open space and recreation, municipal services (recycling, composting, parks, playgrounds, schools etc), ecological site design, green buildings, landscape architecture, neighborhood design, economic development, and community development, to list a few. Each year, the projects focus on the most pressing issues in the region and in the planning field. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, legal framework, and case studies. Labs include site visits, GIS mapping, hands-on planning exercises and project development. Part 2 involves project work: in small teams, you will work with a community organization or local government on a current project. The includes primary research, conducting interviews with policymakers, stakeholders and residents, site visits, attending meetings, and other activities as

demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative solutions to thorny problems. Labs will be small group work and project work. The course includes several class presentations; students will gain skills in interacting with public officials, interviewing, preparing presentations, public speaking, report-writing, and teamwork. The class culminates in a public presentation.

Requirements/Evaluation: Response papers (about four 1-page papers), planning exercises, class discussion, reports submitted in segments (total about 30 pp), collaborative small group work, class presentations frequently during semester, final public presentation.

Prerequisites: ENVI 101; open to seniors; in certain circumstances open to juniors with permission.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: BIOL 302 ENVI 312

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week
