ENVI 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

GEOS 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Primary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

GEOS 101 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the

radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

GEOS 102 (S) An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

GEOS 202 (F) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

Class Format: Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

GEOS 212 (S) Paleobiology

Cross-listings: GEOS 212 BIOL 211

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

GEOS 214 (S) Mastering GIS

Cross-listings: ENVI 214 GEOS 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional

quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

Expected Class Size: 18

GEOS 215 (F) Climate Changes

Cross-listings: GEOS 215 ENVI 215

Primary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Primary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

GEOS 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

GEOS 301 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

GEOS 302 (S) Sedimentology (WS)

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of ancient oceans and continents, and how life evolved. Sand and dirt preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the ways in which they were deposited, and the ecosystems that they supported. Understanding sediments is also fundamental to society, for many kinds of civil engineering as well as pollution and environmental remediation. We will investigate sediment composition, fluid mechanics, bedforms, and depositional environments, building to an integrated understanding of erosion, deposition, and changes over time. We will also acknowledge and

examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

Requirements/Evaluation: lab work, writing assignments, participation in discussions, and final exam.

Prerequisites: At least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

GEOS 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Primary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

GEOS 411 (F) Geobiology

Geobiology--the study of interactions between earth and life over geologic timescales--is a new and interdisciplinary field that has grown out of exciting

advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Requirements/Evaluation: labs, short papers, final grant proposal and presentation

Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

HIST 19 (W) Fresh Purpose for Old Paper: Curating Special Collections in the 21st Century

How do our library's collections represent the past and present of the many Williams communities? What makes a library's books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing? This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable--and not just in terms of their cost. We'll consider how historical events are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and consult with booksellers and curators at a peer institution. There will be one or two field trips. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections. Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures & Book History at the Univ of Edinburgh; she recently completed her PhD in Historical Geography. Lisa Conathan is Head of Special Collections at Williams, overseeing the Chapin Library of Rare Books and the College Archives. She holds a BA in Linguistics from Dartmouth, a PhD in Linguistics from UC Berkeley, and a Master of Library Science from the University of Maryland. Lisa Conathan is Head of Special Collections at Williams College. She holds a BA in Linguistics from Dartmouth College, a PhD in Linguistics from the Univ. of California, Berkeley, & a Master of Library Science from the Univ. of Maryland.

Requirements/Evaluation: collection development proposal, class presentation to library staff (during normal course meeting times)

Prerequisites: none

HIST 259 (S) New England Environmental History (WS)

Cross-listings: AMST 259 HIST 259 ENVI 259

Secondary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

HIST 264 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Secondary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Secondary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

JAPN 25 (W) Exploring Kyoto Culture: How 1200 years of cultural history continues throughout today

Kyoto, the former imperial capital of Japan has 1200 years of history. It is referred to as Japan's cultural treasure house and thrives on its ancient heritage in architecture, gardens, religion, performing and culinary arts and craftsmanship. Yet Kyoto's appearances can be deceiving. You will find a monumental temple designated as a UNESCO World Heritage site under the shadow of ultramodern high-rising buildings. There is an enigmatic quality to the city with this juxtaposition of old and new. This unresolved tension between modernization and tradition is Kyoto's fascination. The purpose of this travel course is to explore the cultural history of Kyoto and how it is perpetuated and transformed in a modern era. Students will visit various sites and artists/artisans in Kyoto. Through these experiences, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course will be conducted on campus. Students conduct research in pairs to acquire additional in-depth knowledge on one selected area of Kyoto's art/craftsmanship. For the second and third week, the class will travel to Kyoto. We will first explore the city of Kyoto to develop an idea of how its cultural history progressed from courtly culture in the Heian period, to samurai tradition in the Medieval periods, and aspects of religious ceremonies, Noh Theater and tea ceremonies. We will also visit four to five artisan/artist studios, including hands on experiences at some studios. Students are expected to participate in all the scheduled activities, keep a daily journal, and participate in daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern art/craft/performance to the local community and to the Kyoto artists/artisans at a public forum. The class will return to campus towards

the end of the third week.

Requirements/Evaluation: post daily blog to the course website and a public PowerPoint presentation in Kyoto

Prerequisites: none

LATS 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

LEAD 18 (W) Wilderness Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM--5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience

Grading: pass/fail only

LEAD 22 (W) Ski Patrol: Outdoor Emergency Response

Cross-listings: SPEC 22 LEAD 22

Primary Cross-listing

The course will teach and develop technical and leadership skills required to effectively and efficiently provide emergency medical care in outdoor environments. Successful completion can lead to certification as a member of the National Ski Patrol (NSP). The course implements NSP's Outdoor Emergency Care and Outdoor Emergency Transport curricula in a hands-on, "on-hill" environment to address: Wounds and Burns - Musculoskeletal Trauma; Shock, Environmental and Medical emergencies. Students will practice the use of splints, bandaging, rescue equipment, methods of extrication, organization/prioritization of rescue tasks, and dealing with unusual emergencies. Emphasis will be placed on the Leadership Skills required to handle complex and stressful emergency situations. Each week there will be ~12 hours of mandatory outdoor training at Jiminy Peak ski area. Exact timing (mornings vs. afternoons; specific days; # hours/day) will be determined based on student and instructor availability. Additional homework/practice may be required. The course will culminate with a written and practical exam. Costs: Students who have taken Outdoor Emergency Care: \$20 (CPR certification). Students with WFR or EMT certification: \$145 (NSP membership and exam materials). \$20 CPR certification (if needed). These students might also want to acquire the Outdoor Emergency Care textbook (~\$100). Students need to supply their own ski/snowboard equipment. The course is limited to 15 students, chosen on the basis of ski/snowboard interest and ability. Preference given to students who completed the Outdoor Emergency Care PE class in the preceding fall term. Successful completion of a written and practical first aid exam, along with demonstrating ski/snowboard proficiency, will qualify the student to be certified as a National Ski Patroller. Pre-requisite: Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician.

Requirements/Evaluation: skill and knowledge demonstration in written and practical exam

Prerequisites: Outdoor Emergency Care OR Emergency Medical Technician OR Wilderness First Responder

Enrollment Limit: 16

Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading: pass/fail only

Unit Notes: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that

is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

MAST 311 (F)(S) Marine Ecology

Cross-listings: MAST 311 BIOL 231

Primary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

MAST 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Primary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MATH 12 (W) The Mathematics of Lego Bricks

This course is a modification of seven previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell. There may be a speed build challenge (college teams vs elementary school teams).

Requirements/Evaluation: final project or presentation

Prerequisites: appreciation of LEGO

Enrollment Limit: 40

Enrollment Preferences: conversation with the instructor

Grading: pass/fail only

Materials/Lab Fee: \$30

Attributes: EXPE Experiential Education Courses

Winter 2022

LEC Section: 01 M-F 1:00 pm - 2:50 pm Steven J. Miller

MATH 13 (W) The Mathematics of SET (and other games)

SET is a popular game where players try to find certain collections of three cards, which share or fail to share properties like color, shape, and number. This seemingly simple game gives rise to an incredible variety of mathematical ideas. These range from counting and probability, to the behavior of lines in strange models of geometry. Throughout this class we'll study these mathematical ideas, as well as those coming from other mathematically interesting games (and we'll of course play lots of SET and other games!). Previous experience with SET or with mathematics is not required! We will

be meeting for 6 hours per week in class; this time will be split between discussions and lectures covering the mathematics of SET, and Board Game Labs where students explore other games with intricate mathematics behind them. Outside-of-class work will include readings (from the book "The Joy of SET" and short mathematical readings relevant to other board games), learning and practicing other mathematically relevant board games, working on small problem sets, and as a final project either designing a new game based on mathematical ideas, or studying an existing game through a mathematical lens. These final projects will be showcased in a board game night at the end of Winter Study.

Requirements/Evaluation: final project or presentation; problem sets

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference given to students with less mathematical background

Grading: pass/fail only

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

LEC Section: 01 MWF 1:00 pm - 3:50 pm Ralph E. Morrison

MATH 25 (W) Modern Marine Science

Cross-listings: MATH 25 BIOL 26

Primary Cross-listing

This travel course will be on site in Woods Hole, MA, home to three world renowned marine science centers: the National Oceanic and Atmospheric Administration (NOAA), the Marine Biological Laboratory (MBL) and the Woods Hole Oceanographic Institution (WHOI). Time will be spent shadowing professionals in their line of work, assisting research when possible (or watching), and also listening to lectures on different topics given by this adjunct professor or other experts.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none (Or perhaps an intro biology course credit?)

Enrollment Limit: 8

Enrollment Preferences: students interested in a career in marine science will be preferred; then, students in the life sciences or other directly related field (ecological statistics, etc)

Grading: pass/fail only

Unit Notes: Jennifer Turek has a Master's in Zoology from the University of Otago in Dunedin, New Zealand studying the endangered and endemic Hector's dolphin. Recently, she has continued these marine mammal studies working with NOAA in Woods Hole, MA studying marine mammal acoustics, specifically the highly endangered North Atlantic Right Whale. She also manages the North Atlantic annual stock assessment reports as required by the Marine Mammal Protection Act and other Protected Species Branch efforts.

Materials/Lab Fee: \$1,500

MUS 104 (S) Jazz Theory and Improvisation I

Cross-listings: MUS 104 AFR 212

Primary Cross-listing

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor

keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments,(e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

MUS 174 (S) The Singing Voice: Structure, Styles and Meaning

What makes an opera singer sound different than a pop singer? How does the sound of each contribute to musical meaning for listeners? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, importantly, through singing. We examine histories of styles, cultural contexts as well as basic physiology, acoustics and techniques. We will explore the basics of yodeling, Tuvan throat singing, and belting, among other styles. Familiarity with musical notation recommended.

Class Format: studio/brief lectures

Requirements/Evaluation: Two quizzes, regular journaling, a final paper (6-8 page) and a presentation.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

MUS 204 (F) Jazz Theory and Improvisation II

Cross-listings: MUS 204 AFR 214

Primary Cross-listing

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions

Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project

Prerequisites: MUS 104b or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 5-8

MUS 309 (S) Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104B and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

NSCI 10 (W) The Neuroscience of Learning

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Students will make connections to building their own learning processes and strategies as well how to apply these to teach others. Students will engage in evaluating primary neuroscience research articles using the medical model to evaluate validity. They will apply their understanding identify valid research related to learning and the brain. Small group discussions about the reading in class will include their interpretations of the research and potential applications to learning strategies and interventions. A final project will be a class presentation, on a topic of personal relevance to each student, where they will use the strategies they've learned about and experienced to promote learning in their classmates.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: no preference

Grading: pass/fail only

Unit Notes: Dr. Judy Willis combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to become a leading authority in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles for professional journals applying neuroscience research to successful teaching strategies. Dr. Willis travels nationally and internationally doing presentations on how the brain learns best.

PHIL 25 (W) Eye Care and Culture in Nicaragua

We will spend nine days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students-in conjunction with optometrists who volunteer their time for the trip-will administer eye exams, write prescriptions and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip.

Requirements/Evaluation: class participation and journals as described above, along with on-site observation of the students' participation in the eye clinics

Prerequisites: none, though it is helpful to include three to six students who are fluent in Spanish

Enrollment Limit: 12

Enrollment Preferences: students will submit applications indicating why they want to take the course

Grading: pass/fail only

Unit Notes: Alan White was professor of philosophy at Williams from 1986 through 2021. He is currently Mark Hopkins Emeritus Professor of Philosophy.

PHLH 402 (S) Senior Seminar in Public Health

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into small research teams to interact with local organizations and investigate a contemporary real-life issue in public health. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

Prerequisites: completion of at least four courses counting towards the PHLH concentration

Enrollment Limit: 12

Enrollment Preferences: senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

POEC 22 (W) Volunteer Income Tax Assistance

Cross-listings: POEC 22 ECON 22

Secondary Cross-listing

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low-income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10-page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and Q&A sessions featuring guests from local social service organizations and the community will help orient students to the issues facing low-income families in the northern Berkshires. Note: This course satisfies the Political Economy Major Experiential Learning requirement.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: statement of interest

Grading: pass/fail only

PSCI 118 (F) Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. The current pandemic, related economic distress, and social protests have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty--the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. This class is extensively hybrid by design; it is largely remote with some in-person sessions. Remote sessions include substantial collaboration with a similarly structured first-year course being taught by a sociologist at the University of North Carolina. Williams and UNC students will work together in small groups and will present their project findings to both classes.

Requirements/Evaluation: active class participation, three 4-page essays, group assignments, and class presentation

PSCI 14 (W) JA SelCom: A Case Study in Selection Processes

In this course, we will work to build the next class of Junior Advisors! Together with JAAB and in coordination with members of The Dean's Office, we will interview applicants, discuss applications, and ultimately select the next class of JAs; SelCom members will learn from the intentional selection process, gaining interviewing (and interview) skills, an understanding of how candidates are considered and evaluated, and how to put together teams. Being a part of this selection process will give members the opportunity to use their voice to help shape the entry system; be a part of a social, collaborative team; learn and apply leadership, evaluation, and decision-making skills (which employers will love to see on your resume!); and work with a dynamic group to leave a meaningful legacy for next year's frosh!

Requirements/Evaluation: Attendance and active participation

Prerequisites: Anyone wanting to register for the SelCom Winter Study class needs to fill out this form:

https://docs.google.com/forms/d/e/1FAIpQLSeoQK_k73fHFH-OV6fVdUABTyIpEOtuSx2yBjTRR0kOEF2E0Q/viewform

Enrollment Limit: 25

Enrollment Preferences: Sophomores, Juniors, and Seniors are encouraged to apply! Individuals applying to be a JA should not register.

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service

providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience. Every year, course instructors arrange for some distinct sections of this course to provide specialized fieldwork opportunities for small groups of students. In 2022, the following sections are being offered: 1. K-12 Curriculum Development, 2. Consulting for the Berkshire County Education Task Force, 3. Aga Khan Museum Remote Internship, 4. Carceral Reentry Research, 5. Spanish Language Community Education Projects, 6. Mindfulness Programming, 7. Social Media Consulting for the Berkshire Black Economic Council, 8. Food Safety and ServSafe Certification, 9. Art with Local Youth, 10. Public Education Re: Refugees, 11. Adult Basic Education & ESL Consulting, 12. Health Coach Pilot Program and Assessment. For more information on any of these options, see the PSCI 21 page of the Center for Learning in Action website:

PSCI 22 (W) LIFT: Learning Intervention for Teens

This mentorship-based course pairs Williams students with teenagers involved in the Berkshire County juvenile justice system. LIFT is an official Commonwealth of Massachusetts probation diversion program. This is a student-led course, sponsored by Pittsfield Chief of Police Mike Wynn '93 and Professor Cheryl Shanks, but entirely run by Williams students who have served as mentors or directors in the past. Our goal is to empower the teenagers through positive peer mentorship and allow them to take ownership of an independent project of the teen's choosing. The project and other course activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting, research, and communication, which the teenagers can then carry forward to their school, work, and home lives. The course culminates with a project presentation in which each mentor/mentee pair formally presents their work to an audience that includes professionals in the juvenile court system, state elected officials, chiefs of police, district attorneys, the teens' peers and families, and faculty and community members. Williams students are expected to attend trainings, meet with their teens three times a week, co-facilitate a final presentation, and keep a weekly journal detailing their meetings. Because LIFT is an after-school program, this course meets Tuesday through Thursday from 3:30-5:30pm. If you are interested in applying, please fill out this google form (<https://forms.gle/fS3KevZZ8jvhH2Tw5>) and register on PeopleSoft.

Requirements/Evaluation: final project or presentation and journal and weekly statements

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students will be evaluated based on a statement of application, and the directors reserve the right to accept fewer than 10 applicants

Grading: pass/fail only

Unit Notes: Mike Wynn is the Chief of the Pittsfield Police Department and graduated from Williams in 1993.

PSCI 319 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: MAST 351 ENVI 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

PSYC 15 (W) Ephquilts: An Introduction to Traditional Quilting

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: *Pieces of the Past* by Nancy J. Martin; *Stitching Memories: African-American Story Quilts* by Eva Ungar Grudin; *Sunshine and Shadow: The Amish and Their Quilts* by Phyllis Haders; *A People and Their Quilts* by John Rice Irwin; *Treasury of American Quilts* by Cyril Nelson and Carter Houck; *The Quilt: New Directions for an American Tradition*, Nancy Roe, Editor. Requirements: attendance of all classes (two field trips inc), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. *Extensive time will be spent outside of class working on assigned projects.*

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniors, juniors, sophomores, first years

Grading: pass/fail only

Unit Notes: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for 40 years, and teaching classes and coordinating shows and exhibits for 25 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

PSYC 21 (W) Psychology Internships

Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or another setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Requirements/Evaluation: a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience and the supervisor's evaluation.

Prerequisites: approval by Jeremy Cone is required

Enrollment Limit: 20

Enrollment Preferences: random selection

Grading: pass/fail only

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

PSYC 352 (F) Clinical and Community Psychology

This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. **Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.**

Requirements/Evaluation: field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper

Prerequisites: PSYC 252

Enrollment Limit: 15

Enrollment Preferences: senior, then junior, Psychology majors; you **MUST** have permission of instructor to register for this course

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

PSYC 372 (F) Advanced Seminar in Teaching and Learning

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and those who plan to become teachers

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

REL 110 (S) Religion in Everyday Life (WS)

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing

data and writing an ethnographic essay.

Class Format: Semester-long community-based field research. Regular in-class peer-review exercises.

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first-year students and sophomores; students interested in Religious Studies

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will learn a specific mode of qualitative/ethnographic writing through a semester-long field-based project. This involves many scaffolded assignments of field-based research and writing, for which they receive very regular feedback from the instructor, as well as extensive peer-review exercises. There will be a number of readings on writing style and technique, as well as class discussion and workshopping activities. The final essay will itself be developed in multiple steps.

REL 228 (F)(S) Zen and the Art of American Literature

Cross-listings: REL 228 ENGL 239 AMST 238

Secondary Cross-listing

Just one hundred years ago, few Americans knew the first thing about Buddhism. But in 2021, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, *A Tale for the Time Being*. And we'll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, and Western attitudes towards death and dying. We'll also give special attention to the role that Buddhism is playing in the struggle for racial justice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week). No prior experience with meditation is necessary. Just an open mind.

Class Format: This will be a lecture class, with little to no time in-class for discussion. To create opportunities for conversation and discussion, I will offer a substantial number of office hours each week as well as small discussion group meetings (of 15 students each) every other Sunday (the discussion group meetings will be optional).

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: short reading responses and free-writing exercises for each class meeting, a 3-4 page midterm essay and a final 8- to 10-page essay.

Prerequisites: none

Enrollment Limit: 85

Enrollment Preferences: Students who preregister should fill out an expression of interest form at <https://tinyurl.com/ZenAmLitSpring2022> by Nov. 9. Preference will first go to students dropped from the Fall 2021 section of ENGL 239 and then by class year (seniors first).

REL 23 (W) Gaudino Fellowship: Immersive Engagement and Reflection

Cross-listings: REL 23

Primary Cross-listing

The Gaudino Fund is offering Gaudino Fellowships for a group of 2 to 4 students during Winter Study 2022, based upon a proposed domestic or foreign collaborative project. Student teams should organize their proposed projects around two main components: direct encounter with otherness and self-reflection. Projects will be evaluated on whether they subject the students to "uncomfortable learning", i.e. having an experience that challenges and perhaps alters one's view of what it is to live a good life and the group's commitment to incorporate separate home stays for each fellow as part of their project, either joint or separate work/engagement internships, and a structure to facilitate collaborative action and learning. The team selected will be guided and overseen by the Gaudino Scholar who will conduct appropriate preparatory discussions and follow-up sessions to optimize and help students articulate lessons learned from the overall experience. The intent of the program is to open the student to an understanding (of both the familiar and unfamiliar), and to a development of empathy, that could not be achieved without the fellowship experience. N.B. Although this course is housed in Religion, projects are not limited to religion. Each prospective team needs to meet with the Gaudino Scholar as early as possible, but no later than September, and submit their group application by September 30, 2021. Application guidelines can be found at winterstudy.williams.edu. Each student is expected to write a short (3-4 page) self-reflection before leaving for the WSP, keep a journal of their experience, as well as write a 8-10 page paper by the end of the Winter Study period reflecting on the WSP experiences and what has changed in the student's perceptions and beliefs from the opening essay. They will also meet the other members of the team on a weekly basis during Winter Study and regularly update the Gaudino Scholar by email and/or Skype calls. The team that receives the Gaudino Fellowship will give a brief presentation to the Board about their experience at the Board's spring meeting in April. The team whose project is approved will receive the Gaudino Fellow designation. In addition, students on Financial Aid will receive Gaudino funding from a minimum of 50% to a maximum of 90% of the budget for the project up to \$2,500, as determined by the Financial Aid office. No additional funding for students' projects will be provided by the College.

Requirements/Evaluation: 10-page paper

RLFR 13 (W) Creative Portraiture in the Darkroom

Cross-listings: RLFR 13 ARTS 13

Primary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (the large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 10 weekly lab or studio hours outside of regular classes.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art majors then random

Grading: pass/fail only

Unit Notes: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

RUSS 25 (W)(W) Williams in Georgia

Cross-listings: RUSS 25 SPEC 25

Primary Cross-listing

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at *The Georgian Times*, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. We will visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. Students will submit weekly reports on their work while in the country (6 pages in total or the equivalent in another medium), as well as an overall reflection (4 pages or the equivalent in another medium) upon their return from Georgia.

Requirements/Evaluation: weekly reports on their work while in Georgia (6 pages in total or equivalent in another medium); overall reflection (4 pages or equivalent in another medium) upon return

Prerequisites: none; knowledge of Georgian or Russian is not required

Enrollment Limit: 8

Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course

Grading: pass/fail only

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective

representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

SOC 240 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

SPEC 19 (W) Exploring Healthcare

Experience in a clinical environment is essential to exploring the health professions. Through this experiential learning course, students will clarify their understanding of the rewards and challenges of medicine, veterinary medicine, dentistry, allied health professions, or public health. Option A: Students will participate in a shadowing internship through a local Williams-facilitated placement or an independent placement in their location of choice.

Students will observe clinical interactions and learn about healthcare delivery systems. Students will be introduced to key concepts related to patient

interviewing and history taking, diagnosis, and medical decision making. Students will also be introduced to core concepts of population health and expand their perspective on the individual clinical interactions that they observe. Students will be encouraged to reflect on their healthcare experiences with a dual focus: from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions will focus on the experiences and/or area of expertise of healthcare professionals in the Berkshires and/or nationally. These sessions will now be offered virtually so that on-site and off-site students can attend as well as to facilitate a broad range of speakers. By the end of the course, students will demonstrate an understanding of the fundamentals of patient-provider interactions and key factors affecting the health of individuals and communities. A final reflective paper is required. Option B: Should clinical internships not be possible, this course will transition to fully virtual. This alternative course format would not include shadowing but instead 2-3 didactic sessions per week with guest speakers from the health professions to cover a similar range of topics. There would also be a weekly discussion board. In lieu of a reflective paper, students would write a research paper on a relevant topic of their choice.

Requirements/Evaluation: 5- to 10-page paper; active participation

Prerequisites: open to current sophomores, juniors, and seniors

Enrollment Limit: 40

Enrollment Preferences: Brief application required Priority will also be given to juniors and seniors who have not previously taken the course

SPEC 21 (W) Career Exploration: Winter Study Internships!

Internships amplify academic learning, empower professional development, and increase students' career options. SPEC 21 offers students the opportunity to learn beyond the classroom by providing substantive applied learning experiences focusing on issues such as racial justice/social justice, non-profit/community service, government/policy/law, environment, education & many more! Students have the option of applying to the designated SPEC 21 WS internships posted on Handshake, or to submit self-sourced WS internships. For WS 2022, remote, hybrid, and on-site internship opportunities are eligible. Each student will intern for 35 hours per week working on project(s) for 3 1/2-4 weeks. Previous WS Internship Sponsors include: Stockbridge Munsee Community Band of Mohican peoples, Berkshire County Chapter, NAACP, Vera Institute of Justice, Nuclear Age Peace Foundation, and many others! Throughout the month, students will reflect upon their experiences: Impressions about the organization and its workplace culture. Insights about the structure of their role, the organization and the industry. Professionally-What they have learned about themselves within a professional environment; solidify an interest in a particular industry and build upon this experience when pursuing future opportunities or support the decision to change direction and explore a new industry. Academically-Future course selection, selection of major, and enhanced, grounded, contributions to class discussions. Williams College Alumni/Parents and other employers will be recruited as Winter Study (WS) Internship Sponsors and create meaningful projects/experiences during the month of January. It is expected that our WS Sponsors will mentor the Williams intern(s) during the course, meet with intern(s) on a regular basis to discuss projects/goals/challenges for the week, and support students' success.

Requirements/Evaluation: short paper that will become a public record, daily journal entries reflecting upon their experiences, responses to three questions posted to EphLink WS Discussion

Prerequisites: Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if they have questions about specific WS internships listed in the SPEC 21 syllabus or self-sourced WS internships

Enrollment Limit: 150

SPEC 22 (W) Ski Patrol: Outdoor Emergency Response

Cross-listings: SPEC 22 LEAD 22

Secondary Cross-listing

The course will teach and develop technical and leadership skills required to effectively and efficiently provide emergency medical care in outdoor environments. Successful completion can lead to certification as a member of the National Ski Patrol (NSP). The course implements NSP's Outdoor Emergency Care and Outdoor Emergency Transport curricula in a hands-on, "on-hill" environment to address: Wounds and Burns - Musculoskeletal Trauma; Shock, Environmental and Medical emergencies. Students will practice the use of splints, bandaging, rescue equipment, methods of extrication, organization/prioritization of rescue tasks, and dealing with unusual emergencies. Emphasis will be placed on the Leadership Skills required to handle complex and stressful emergency situations. Each week there will be ~12 hours of mandatory outdoor training at Jiminy Peak ski area. Exact timing (mornings vs. afternoons; specific days; # hours/day) will be determined based on student and instructor availability. Additional homework/practice may be required. The course will culminate with a written and practical exam. Costs: Students who have taken Outdoor Emergency Care: \$20 (CPR certification). Students with WFR or EMT certification: \$145 (NSP membership and exam materials). \$20 CPR certification (if needed). These students might also want to acquire the Outdoor Emergency Care textbook (~\$100). Students need to supply their own ski/snowboard equipment. The course is limited to 15 students, chosen on the basis of ski/snowboard interest and ability. Preference given to students who completed the Outdoor Emergency Care PE class in the preceding fall term. Successful completion of a written and practical first aid exam, along with demonstrating ski/snowboard proficiency, will qualify the student to be certified as a National Ski Patroller. Pre-requisite: Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician.

Requirements/Evaluation: skill and knowledge demonstration in written and practical exam

Prerequisites: Outdoor Emergency Care OR Emergency Medical Technician OR Wilderness First Responder

Enrollment Limit: 16

Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading: pass/fail only

Unit Notes: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

SPEC 26 (W) Essentials for Entrepreneurship: Creative Process, Tools, & a Deep Dive into SF Start-up Culture

This course is designed to provide students with actionable insights into how to develop an idea and exposure to a variety of startups in the Bay Area. Students from all majors are encouraged to apply as creative thinking and solution building is important to every discipline. The course will begin in Williamstown with a review of idea development tools pioneered by the Stanford d.School such as the Business Model Canvas and Design Thinking. Particular focus will be on customer discovery and how one determines if an idea is worth pursuing, the "pivots" along the way, and the adaptive mentality needed in a startup. We will look at the creative process from a personal perspective--how can each student learn to think creatively and what can they do each day. We will compare the creative process in different disciplines to see what is different and what is the same. The second half of the course will take place in San Francisco where we will tap into the strong Bay Area alumni network allowing us to visit several start-ups and fast-growing tech companies. We will look at the influence of company culture, different financing models, and the entrepreneurial ecosystem of the Bay Area. Students will do a consulting project for Minted, a fast-growing consumer focused company, will present their findings to senior management during the company visit. They will also keep a journal of ideas and observations with a short summary due at the end of the course. There will be time to check out San Francisco and the surrounding area. Reading will include *Creative Confidence: Unleashing the Creative Potential Within Us All* by David and Tom Kelly, *The Lean Start-up* by Eric Ries, *Thinking Course* by Edward deBono's and *Where Good Ideas Come From* by Steven Johnson as well as articles and podcasts.

Requirements/Evaluation: presentation to executives at Minted; short paper reflecting lessons learned and best ideas they came up with during the course; daily participation in team discussions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students submit a 2-minute video on 1) why they are interested, 2) what they bring to the course and 3) past entrepreneurial experience

Grading: pass/fail only

Unit Notes: Tonio Palmer is the Associate Director/Director of Entrepreneurship at Williams. Tonio has had a long career in international business and founded a number of companies.

STS 250 (F) Environmental Justice (DPE)

Cross-listings: STS 250 ENVI 250

Secondary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: juniors, seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 250 (D2) ENVI 250 (D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

STS 370 (F) Medicine and Campus Health in Disruptive Times (DPE) (WS)

Cross-listings: STS 370 WGSS 371 ANTH 371

Secondary Cross-listing

This class applies the methods and theories of critical medical anthropology and medical sociology to help students design and pursue innovative ethnographic projects that explore campus or community health. How do disruptive moments like COVID-19 serve as focal moments in social history that reveal underlying social inequalities of access, health outcomes, and well-being? Students learn and use an array of ethnographic techniques

such as observant participation, interviewing, focus groups, and qualitative surveys building on weekly discussions, feedback, and design exercises to explore our campus and/or wider community. We situate our campus health projects by considering the wider context of power and intersectionality that inflect and structure health and well-being within our community, nation, & world. Our case ethnographies explore how structural racism shapes medical education and healthcare care in the US, how concepts of sexual citizenship can reshape debates on sexual assault on campus, how the spread of US psychiatry inflects the landscape of global mental health across Asia, and how queer activism responds to the HIV/AIDS crisis. We consider the roles of narrative, active listening, and empathy in both medicine and ethnography, while practicing skills that can benefit student researchers and interlocutors, providers as well as patients. Our goal is understand the strengths and limits of qualitative and participatory research within communities always already structured by power, privilege, and engaged practices.

Requirements/Evaluation: Three written fieldnotes, weekly attendance, writing and discussion exercises, & final oral presentations & data visualizations for fieldwork projects.

Prerequisites: A course in Anthropology, Sociology, Science & Technology Studies, or across DIV II is strongly recommended

Enrollment Limit: 20

Enrollment Preferences: Majors in Anthropology, Sociology, Women's, Gender and Sexuality Studies; Concentrators in Public Health, Science and Technology Studies

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 370 (D2) WGSS 371 (D2) ANTH 371 (D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class examines the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It theorizes and explores the ways that intersectionality and implicit bias shapes health and well-being in the community, patient/provider encounters, and efforts to 'improve' community and individual health in the US, Asia, and across the globe.

THEA 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 COMP 330 THEA 330

Primary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

THEA 335 (F) The Culture of Carnival

Cross-listings: COMP 338 THEA 335

Primary Cross-listing

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Requirements/Evaluation: regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: sophomores and first-year students

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

THEA 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: THEA 385 ARTS 385

Secondary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation: the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

WGSS 10 (W) Gym Bros and Cardio Bunnies--Constructing Gender, Body and Identity in the Gym

Cross-listings: WGSS 10 COMP 10

Secondary Cross-listing

While it may not be written on the campus map, it's common Williams knowledge that the gym on upper Lasell is called "the EstroGym." Have you ever wondered why cardio spaces, like the EstroGym, are designated as feminine while weight rooms (think Lower Lasell) seem to be filled with men? We will explore the answers to this and other questions in this hybrid physical and academic course. Half of this course will be a critical exploration of phenomena often taken for granted within the fitness industry. We will discuss the ways in which cultural understandings of gender and bodies are created and reinforced in physical activity spaces. Topics will include gender policing, whiteness and white supremacy in sport and fitness, trans and gender non-conforming athletes, masculinity and violence in athletics, and the social construction of gender. Much of our reading will be grounded in feminist and sociological theory but will also include text and visual sources from CrossFit gyms, weightlifting competitions, bodybuilding shows, and more. The other half of this course will be taught in the weight room, where students will learn how to strength train. It is a suitable introduction for novice lifters as well as an opportunity for experienced lifters to refine their technique. Students will explore the differences between powerlifting, Olympic weightlifting, and bodybuilding and will have the opportunity to practice these different forms. Outside of class meeting times, students will be expected to complete readings, brief writing assignments, gym observations, short film viewings, and gym selfies (seriously). Depending on class size and logistics, we may take 1-2 field trips to other local gyms. **NOTE: This course is open to students with any type of lifting experience (from zero physical activity background to Olympic athlete). This includes students with any form of disability, so long as they are cleared by a licensed medical provider.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none--open to those with any type of lifting experience (no experience to Olympic athlete), including students with any form of disability as long as they are cleared by a licensed medical provider

Enrollment Limit: 14

Enrollment Preferences: students will write a paragraph explaining why they want to take the course

Grading: pass/fail only

Unit Notes: Holly Crane is a competitive weightlifter, personal trainer, strength coach, and educator. She received a BA in Comparative Literature from Williams and an MS in Kinesiology from the University of Minnesota. Her graduate research focused primarily on gender in the gym. She is committed to creating inclusive gym spaces and providing access to strength for those who are frequently overlooked within the fitness industry.

WGSS 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: WGSS 113 ENGL 113 AMST 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course

employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

FILM AND MEDIA STUDIES

Advisors: Professors: B. Mladenovic, S. Rosenheim.

Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both *about* and *with* moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, professors Morgan McGuire (Computer Science), Bojana Mladenovic (Philosophy), and Shawn Rosenheim (English) have volunteered to serve as advisors to students interested in this field.

FMST Core Courses

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AFR 321 (F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently TikTok, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

AFR 325 (F) Television, Social Media, and Black Women 'Unscripted'

Cross-listings: AFR 325 WGSS 325 AFR 110 WGSS 111

Primary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household

names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Cross-listings: AFR 337 AMST 337 WGSS 346

Secondary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

AFR 339 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 AFR 339 COMP 336

Secondary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students , Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the *banlieue*), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, *Banlieue in Lit, Music, Film* fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in *banlieue* film, literature and French hip hop music.

AMST 205 (S) Chicana/o/x Film and Video

Cross-listings: AMST 205 WGSS 203 LATS 203 ARTH 203

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors; LATS concentrators

AMST 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

AMST 333 (S) An American Family and "Reality" Television (WS)

Cross-listings: ARTH 310 WGSS 312 AMST 333

Secondary Cross-listing

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: Remote seminar. The course will feature synchronous online class meetings.

Requirements/Evaluation: class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper. Student presentations will be recorded offline and posted to GLOW.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: junior Art majors, followed by senior majors

ANTH 225 (F) Ways of Seeing

This course examines the potential of images for revealing aspects of cultural normally obscured by the written word and for transmitting different, sometimes undervalued insights and knowledge of the social world. The central focus of this course is documentary film, and we will consider both the theory and practice of the documentary in the United States and abroad as it has evolved over time and as it is evident in contemporary filmmaking. In the course of the semester, we will examine some of the ways in which filmmakers, and ethnographic filmmakers in particular, have approached the task of documenting and understanding different aspects of social reality. Among the questions that we will consider are the following: What is the relationship between written texts and images? What is it that documentary films "document?" What is the relationship between images and stories, and should the techniques used in fiction films to construct voice, point of view, identification, narrative sequence, etc. apply as well in the creation of nonfiction films? What is the role of film in anthropology, and how does ethnographic filmmaking relate to anthropology and to the broader documentary film tradition? In the last part of the course, we will consider the proliferation of cell phone videos and platforms such as Youtube and Instagram and their significance for the documentary film genre more generally.

Class Format: The class will be taught remotely and will include pre-recorded lectures, conversations with filmmakers and producers, and weekly online discussions

Requirements/Evaluation: Weekly response/critiques of assigned films, a longer written paper (10-12 pages) or video essay of comparable scope

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology/Sociology majors, open to first-year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: FMST Core Courses

ANTH 330 (F) The Documentary Project: Ethnography and the Visual Narrative

The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people's lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or "engagement" between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about "truth" and "objectivity" in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

Requirements/Evaluation: develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual and audio content; participate in class critiques

Prerequisites: SOC 236 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ARAB 401 (F) Topics in Advanced Arabic: Contemporary Arab Cinema (DPE) (WS)

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: The course will be offered remotely (Final course format to be determined closer to the semester)

Requirements/Evaluation: class participation, daily writing and reflections, quizzes, blogs, leading a movie discussion, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: if the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 5-7

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, a minimum of one speech, and a 5-7 pp. final research paper. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in these societies as positioned in a region torn by political, social, and religious conflicts.

ARAB 415 (S) Examining the Arab Cultural Landscape: What does Arabic Media Actually Say (DPE) (WS)

How does Arabic media represent the Arab landscape? This course will examine Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss how issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

Class Format: This course will involve two 75-minute sessions in addition to a weekly discussion session with the TA.

Requirements/Evaluation: active participation in class, daily assignments, blogs, quizzes, presentation, final project

Prerequisites: ARAB 302

Enrollment Limit: 12

Enrollment Preferences: Arabic majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The course involves extensive writing in which learners reflect on cultural topics applicable to Arabic-speaking countries such as political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization.

Difference, Power, and Equity Notes: The course explores how Arabic media reflects how Arabic societies deal with issues such as political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. We will analyze how these societies engage in discussions around these topics, common to the region, but with different local perspectives.

ARTH 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Secondary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of

a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

ARTS 260 (S) Objects in Video, Video as Object

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

Prerequisites: 100 level video course

Enrollment Limit: 12

Enrollment Preferences: current and prospective Art majors

ASIA 153 (S) Japanese Film

Cross-listings: ASIA 153 ASST 153 COMP 153

Secondary Cross-listing

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we'll focus particularly on learning and practicing the

kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. *All texts are translated or subtitled.* All levels welcome.

Class Format: This class will have a hybrid format: on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.

Requirements/Evaluation: attendance & participation, a few short response assignments, two 5-page papers, in-class test

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228 (D1) COMP 297 (D1) CHIN 428 (D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist

dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

CHIN 226 (S) Chinese Film and Its Significant Others (DPE)

Cross-listings: CHIN 226 COMP 296 ASIA 226

Primary Cross-listing

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the \$527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2019, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: All regular course meetings will be conducted ONLINE with mostly a synchronous mode of instruction. Students are also expected to complete asynchronous preparations (view the films and Panopto lecture clips, read scholarship, and contribute to the discussion board) before the regular class hour. All materials are posted on GLOW. For full information, please contact the instructor.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading and recorded lectures (Graded as Complete or Incomplete); 3) two short papers (3-5 pages); 4) two peer review papers (1-2 pages); and 5) the final project (including a presentation, and a paper or other form of project).

Prerequisites: none

COMP 153 (S) Japanese Film

Cross-listings: ASIA 153 ASST 153 COMP 153

Primary Cross-listing

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we'll focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. *All texts are translated or subtitled.* All levels welcome.

Class Format: This class will have a hybrid format: on-campus students will meet in a classroom during the scheduled class slot (observing campus distancing protocols), while off-campus students participate simultaneously via Zoom. Off-campus students must be able to Zoom in during the scheduled class times.

Requirements/Evaluation: attendance & participation, a few short response assignments, two 5-page papers, in-class test

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students majoring or considering a major in comparative literature

COMP 298 (S) Introduction to French and Francophone Film

Cross-listings: RLFR 228 COMP 298

Secondary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 15

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

COMP 336 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 AFR 339 COMP 336

Secondary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students , Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the *banlieue*), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, *Banlieue in Lit, Music, Film* fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in *banlieue* film, literature and French hip hop music.

COMP 341 (F) Cinematic Representations of Work and Migration after the Wall

Cross-listings: WGSS 341 COMP 341

Primary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: *Illegal*, *Working Man's Death*, *NordSud.com*, *Lichter* (Lights), *Code Unknown*, *The Flower Bridge*, *Occident*, *Since Otar Left*, *Losers and Winners*, *Whore's Glory*, *Le Havre* and *Time Out*.

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: a 200-level ENGL or COMP course, or permission of instructor

ENGL 204 (S) Hollywood Film

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, *12 Years a Slave* and *Get Out*.

Requirements/Evaluation: Two 2-page essays, two editing exercises, a midterm, and a final exam

Prerequisites: None

Enrollment Limit: 60

Enrollment Preferences: English majors

ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build its contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We'll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of *This American Life*, *RadioLab*, *Love and Radio*, and *Snap Judgment*), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Requirements/Evaluation: Five short audio pieces; attendance and active participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The student version of Hindenburg audio software (\$95); students on financial aid will have this expense covered by the college.

ENGL 234 (F) The Video Essay

While people today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think *with* the medium, exploiting the resources of film and video in their efforts to understand how these media work on viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in the use of Adobe Premiere Pro, students will spend the term alternately making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required. Note that the course meets entirely online.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner. All meetings will be online.

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays.

Prerequisites: permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: sophomores; first-year students; English majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

ENGL 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

LATS 203 (S) Chicana/o/x Film and Video

Cross-listings: AMST 205 WGSS 203 LATS 203 ARTH 203

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors; LATS concentrators

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

LATS 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: LATS 346 AMST 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

MUS 149 (S) The Language of Film Music

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Class Format: This is a remote course that includes synchronous class meetings.

Requirements/Evaluation: Course evaluations include: several short writing and creative assignments, two quizzes, a midterm essay, and a final creative project. Off-campus students should consult the professor about computer hardware requirements for the completion of creative projects.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: given to juniors and seniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

MUS 276 (F) Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Requirements/Evaluation: three response papers, one short essay on film adaptation, one video essay with a student partner

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

Attributes: FMST Core Courses

Not offered current academic year

RLFR 228 (S) Introduction to French and Francophone Film

Cross-listings: RLFR 228 COMP 298

Primary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière

brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 15

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 AFR 339 COMP 336

Primary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "banlieue lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, *Banlieue in Lit, Music, Film* fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

SEM Section: 01 MW 11:00 am - 12:15 pm Sophie F. Saint-Just

SOC 212 (S) Understanding Social Media

Cross-listings: STS 214 SOC 212

Primary Cross-listing

Over just the last twenty years--beginning with Friendster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

Class Format: hybrid

Requirements/Evaluation: attendance and participation, team assignments, two 5-page writing assignments, final exam

Prerequisites: none

Enrollment Limit: 15

STS 315 (S) Blackness 2.0: Race, Film and New Technologies

Cross-listings: AFR 315 STS 315 SCST 315 AMST 315

Secondary Cross-listing

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of 'new' technologies upon the

broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the 'real' vs 'virtual' world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Requirements/Evaluation: participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

WGSS 203 (S) Chicana/o/x Film and Video

Cross-listings: AMST 205 WGSS 203 LATS 203 ARTH 203

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors; LATS concentrators

WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 AMST 283 ENGL 286 AFR 283

Primary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as

Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

WGSS 312 (S) An American Family and "Reality" Television (WS)

Cross-listings: ARTH 310 WGSS 312 AMST 333

Secondary Cross-listing

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: Remote seminar. The course will feature synchronous online class meetings.

Requirements/Evaluation: class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper. Student presentations will be recorded offline and posted to GLOW.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: junior Art majors, followed by senior majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 325 (F) Television, Social Media, and Black Women 'Unscripted'

Cross-listings: AFR 325 WGSS 325 AFR 110 WGSS 111

Secondary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: juniors and seniors

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

WGSS 341 (F) Cinematic Representations of Work and Migration after the Wall

Cross-listings: WGSS 341 COMP 341

Secondary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: *Illegal*, *Working Man's Death*, *NordSud.com*, *Lichter* (Lights), *Code Unknown*, *The Flower Bridge*, *Occident*, *Since Otar Left*, *Losers and Winners*, *Whore's Glory*, *Le Havre* and *Time Out*.

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: a 200-level ENGL or COMP course, or permission of instructor

Cross-listings: AFR 337 AMST 337 WGSS 346

Primary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

AMST 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

AMST 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: LATS 346 AMST 346

Secondary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 221 (F) History of Photography

Cross-listings: STS 221 ARTH 221

Primary Cross-listing

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Requirements/Evaluation: three to four short papers, quizzes, online presentations.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: art history majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

ARTH 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

COMP 111 (F)(S) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Primary Cross-listing

Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic and/or *The Tale of Genji*), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Garcia-Marquez, Toni Morrison, and/or James Baldwin), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Asghar Farhadi). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Students considering a major in Comparative Literature

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 232 (S) Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (DPE)

Cross-listings: WGSS 200 COMP 232

Primary Cross-listing

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), design (IKEA to H&M), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Høeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. *All readings and discussions in English.*

Class Format: This will be a remote course for all students, whether they are on campus or not. We will convene synchronously via web-conferencing, with an emphasis on group discussion. There will also be opportunities for students to engage with online activities both during and between our synchronous sessions. Remote office hours will provide even more opportunities for follow-up, questions, and further discussion.

Requirements/Evaluation: active participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Comparative Literature and Women's, Gender & Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in modern Scandinavia. The content examines the effects of class, race, ethnicity, gender, and sexuality on social (in)equalities among citizens, institutions, communities, and identities. The course also employs critical tools to teach students how to interrogate Scandinavian diversity and modernity, through reading, film analysis, discussion, and writing.

COMP 251 (F) Dolls, Puppets and Automaton (WS)**Cross-listings:** GERM 251 COMP 251**Primary Cross-listing**

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. *Conducted in English.*

Class Format: This seminar will be taught online.**Requirements/Evaluation:** active class participation, oral presentations on the reading materials, three 5- to 8-page papers**Prerequisites:** none**Enrollment Limit:** 19**Enrollment Preferences:** Comparative Literature majors, or those considering a major in Comparative Literature**Expected Class Size:** 12**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D1) (WS)**This course is cross-listed and the prefixes carry the following divisional credit:**

Writing Skills Notes: Each student will write three 5- to 8-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write two 3-4 page papers on which I will provide written feedback regarding grammar, style, and textual analysis.**Attributes:** FMST Related Courses**Not offered current academic year****COMP 271 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film****Cross-listings:** RUSS 232 COMP 271**Secondary Cross-listing**

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an oral presentation; a final paper (6 pages)**Prerequisites:** none**Enrollment Limit:** none**Enrollment Preferences:** none**Expected Class Size:** 10**Grading:** no pass/fail option, yes fifth course option

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 COMP 330 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

ENGL 214 (S) Writing for Stage and Screen

Cross-listings: THEA 214 ENGL 214

Secondary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers--as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ondine*, *Six Shooter*, *In Bruges* and *The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Requirements/Evaluation: Two long papers, regular short responses and discussion board postings, class participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

Enrollment Limit: 15

Enrollment Preferences: English majors

ENVI 368 (F) Technology and Modern Society

Cross-listings: ENVI 368 SOC 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity,

technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

LATS 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through

the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age-as they are represented in texts from France, Québec, and the Caribbean.

Requirements/Evaluation: class participation, grammar exercises, group discussion leading, two short papers, and final project

Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals' skin tone. The study showed that "Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts" (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

Requirements/Evaluation: essays, oral presentation, participation

Prerequisites: RLSP 105, placement exam results, permission from the instructor or the Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish major

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

RUSS 232 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film

Cross-listings: RUSS 232 COMP 271

Primary Cross-listing

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in

Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an oral presentation; a final paper (6 pages)

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

SOC 219 (S) Images and Society

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images--and even vision itself--are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

Requirements/Evaluation: active class participation, several short papers, a midterm paper and a take-home final

Prerequisites: none; open to all

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: SOC 236 AMST 236 ARTH 237 ENGL 237

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will

learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

SOC 368 (F) Technology and Modern Society

Cross-listings: ENVI 368 SOC 368

Primary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

STS 221 (F) History of Photography

Cross-listings: STS 221 ARTH 221

Secondary Cross-listing

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Requirements/Evaluation: three to four short papers, quizzes, online presentations.

THEA 214 (S) Writing for Stage and Screen

Cross-listings: THEA 214 ENGL 214

Primary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 COMP 330 THEA 330

Primary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

WGSS 200 (S) Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (DPE)

Cross-listings: WGSS 200 COMP 232

Secondary Cross-listing

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), design (IKEA to H&M), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Høeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. *All readings and discussions in English.*

Class Format: This will be a remote course for all students, whether they are on campus or not. We will convene synchronously via web-conferencing, with an emphasis on group discussion. There will also be opportunities for students to engage with online activities both during and between our synchronous sessions. Remote office hours will provide even more opportunities for follow-up, questions, and further discussion.

Requirements/Evaluation: active participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Comparative Literature and Women's, Gender & Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ROMANCE LANGUAGES (Div I)

FRENCH

Chair: Professor Brian Martin

Professors: B. Martin, K. Pieprzak; Assistant Professors: S. Saint-Just; Visiting Assistant Professor: K. Levine; Teaching Associates: Saléna Martine Zina El Arage, Samia Toorawa

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student's final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

at least five RLFR courses in French language, literature, film, or culture;

the RLFR senior seminar during the student's final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

AFR 360 Political Thought Frantz Fanon

ARTH 254 Manet to Matisse

HIST 390 Haitian and French Revolutions

RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 101 (F) Introduction to French Language and Francophone Cultures (DPE)

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion,

listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

Requirements/Evaluation: active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

Prerequisites: none; for students who have never formally studied French; students who have previously studied French (in any formal course, at any level) must take the French Placement Test in late August or early September

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: RLFR 101-102 is a year-long course; credit granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

Fall 2021

SEM Section: 01 M-F 9:00 am - 9:50 am Brian Martin

RLFR 102 (S) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

Class Format: This class meets 5 times a week from M-F. Students are required to attend class from Monday to Friday.

Requirements/Evaluation: participation, online homework, mid-semester and final projects, short writing assignments

Prerequisites: RLFR 101, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2022

LEC Section: 01 M-F 9:00 am - 9:50 am Katarzyna M. Pieprzak

RLFR 103 (F) Intermediate Studies in French Language and Francophone Cultures

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills

in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

Requirements/Evaluation: participation, homework, mid-semester and final projects, short writing assignments

Prerequisites: RLFR 101-102, or by Placement Test, or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Preference will go to first and second year students. Statement of interest solicited if overenrolled.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200-level and above, or if they anticipate studying in France or a Francophone country during their junior year

Distributions: (D1)

LEC Section: 02 M-F 11:00 am - 11:50 am Kathryn E Levine

RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

Class Format: Both sections of 104 will convene three times per week: two sessions with the instructor, and one session with the TA with an emphasis on speaking practice in small groups. Small group TA meetings for both sections will be scheduled at agreed-upon times once enrollment is established.

Requirements/Evaluation: short weekly readings, participation, online homework, three quizzes, three writing assignments and one final project.

Prerequisites: RLFR 103, or by placement test, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Preference will go to students who have taken 103 in Fall 2020. Statement of interest solicited if overenrolled.

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

LEC Section: 02 Cancelled

RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write a short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. The three themes love, fear, and France's colonial past will be the course's organizing principles. A small section of our course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Conducted in French

Requirements/Evaluation: class participation, grammar exercises, 2 five-page papers, 1 presentation

Prerequisites: RLFR 104, placement exam, or by permission of instructor

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction (DPE)

Cross-listings: RLFR 106 COMP 107

Primary Cross-listing

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2020, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

Requirements/Evaluation: active class participation, grammar exercises, two short papers, midterm, and final paper

Prerequisites: Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 106 (D1) COMP 107 (D1)

Difference, Power, and Equity Notes: This course centers on a critical examination of difference, power, and equity in French film & fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich & poor, soldiers & civilians, nations & colonies, men & women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

SEM Section: 01 TR 9:55 am - 11:10 am Brian Martin

RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in

French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age-as they are represented in texts from France, Québec, and the Caribbean.

Requirements/Evaluation: class participation, grammar exercises, group discussion leading, two short papers, and final project

Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)

Cross-listings: RLFR 202 COMP 292 WGSS 201

Primary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers (of 3-5 pages each)

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 202 (D1) COMP 292 (D1) WGSS 201 (D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

Fall 2021

SEM Section: 01 MW 11:00 am - 12:15 pm Brian Martin

RLFR 205 (S) On Strike: Workers and Revolutions in the French Republic

The recent "yellow vests" (*gilets jaunes*) protests in France have attracted international attention to the experiences of French workers. Yet these protests are only the latest example in a series of workers' movements that have shaped French identity. From the revolutions of 1830 and 1848, to the Popular Front of the 1930s, to the general strike that fueled the events of May 1968, workers have played a significant role in determining France's

sociocultural values and political orientation. In this course, we will study representations of workers in literary and filmic texts dating from the late nineteenth century to the present. We will consider how depictions of the worker have evolved amid changing sociocultural conditions in France: for instance, the arrival of immigrants from such countries as Spain, Italy, and Portugal, and later from the Maghreb; the entry of women into the workforce; the disappearance of the rural farm worker, or *paysan*; the creation of a nuclear power grid; and deindustrialization. Finally, we will examine how the memory of workers is preserved in twenty-first-century France. *Conducted in French.*

Requirements/Evaluation: class participation, reaction papers, group discussion leading, and a final project

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Requirements/Evaluation: three response papers, one short essay on film adaptation, one video essay with a student partner

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

Attributes: FMST Core Courses

Not offered current academic year

RLFR 207 (F) Urban Ecologies of the French-Speaking World: Sustainability and the City in the 21st Century

In the twenty-first century, urban populations around the world have continued to grow, all while the climate crisis has become ever more urgent. The fact that more than 55% of Earth's inhabitants live in urban settings today means that cities will be important actors in the fight against climate change moving forward. In this course, we will examine how cities from the French-speaking world (including in North America, Europe, and Africa, as well as along the Pacific Rim) are enacting solutions for sustainable living in their midst. Taking a cultural studies approach, we will examine a variety of sources--including literature, videos and films, press articles, government documents, academic analyses, websites, and artistic productions, among others--to understand the challenges each of these cities faces and the solutions each has introduced. In so doing, we will study how site-specific realities, such as (eco)tourism, the legacy of colonialism and imperialism, relations with indigenous populations, and inequalities (such as those of race, sex, gender expression, class, age, and ability), are interwoven with questions of sustainable development and ecological living. *Conducted in French.*

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: participation, 3 reactions papers, 1 group presentation, final project

Prerequisites: successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if overenrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 208 (S) Queens, Crusaders and Cannibals: Gender, Race and Religion in Medieval and Renaissance France

The intersection of gender, race, and religion is at the heart of contemporary political and social debates. How to build a nation and how to live together were also key questions for Medieval and Renaissance writers. In this introductory course in Early Modern Literature, we will study how literary works from the 11th to the 16th centuries represented conflicting debates on gender, race, and religion, from the Crusades opposing Christians and Muslims, to the Wars of Religion opposing Catholics and Protestants. We will explore how these concepts were intertwined in courtly love poems and chivalric novels in Europe, and how they were redefined in "humanist" writings and travel narratives during the European colonization of the Americas. Through an investigation of epic poems, allegories, tales, sonnets, novels, travel narratives, and essays by Marie de France, Christine de Pisan, Pierre de Ronsard, Louise Labé, François Rabelais, Michel de Montaigne and Marguerite de Valois, students will compare cultural, political, and ideological debates in Early Modern France with 21st-century questions on racism, sexism and discrimination.

Requirements/Evaluation: Active participation, weekly written responses (1 page), 2 oral presentations (5 min), and final project.

Prerequisites: Exceptional performance in RLFR 105, strong performance in RLFR 106, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

SEM Section: 01 Cancelled

RLFR 210 (F) Scientific Selves: Medicine, Technology, and Identity in Early Modern France

Cross-listings: STS 211 RLFR 210

Primary Cross-listing

The early modern period has long been associated with scientific discovery and shifting ideology in France. From Copernicus on, thinkers such as René Descartes, Blaise Pascal, and Antoine Lavoisier helped advance the Scientific Revolution, which led to medical and technological breakthroughs, as well as important advances in our understanding of the world and our solar system. This course examines the role that France played in pursuing such discoveries, as well as the ways newfound knowledge impacted notions of belonging and alterity. How did the Scientific Revolution and French colonization lead to the creation of social, cultural, and medical "others"? How did scientific discourse permeate verbal and visual expression and depict those who did not fit into normative paradigms of gender, sexuality, ability, ethnicity, belief, and culture? What avenues for self-expression and definition were available to those whom society excluded? What parallels can we see with twenty-first-century questions of political activism, social justice, sciences, and technology? To explore these questions, we will analyze literary texts, visual representations, and historical documents, such as medical treatises, scientific diagrams, and texts on new technologies. *Conducted in French.*

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 211 (D1) RLFR 210 (D1)

Not offered current academic year

RLFR 211 (F) Explorers, Missionaries, Colonizers: French Travel Narratives in the Age of Discovery (DPE)

Often referred to in European history as the "Age of Discovery" or the "Age of Exploration," the 15th and 16th centuries saw the rise of overseas exploration from Europe to the Americas, Asia and Africa. These travels both contributed to the expansion of the known world for Europeans and also laid the foundations for commercial routes and colonisation. French travelers played a key role in this process and documented their journeys in detailed narratives. After reading short excerpts of earlier works that built the travel narrative genre, such as Ibn Battuta's Travels and Marco Polo's Book of Marvels, we will read longer excerpts from Jacques Cartier's Brief narration of the Navigation to the Islands of Canada, Jean de Léry's History of a Voyage to the Land of Brazil, Pierre Belon's Voyage to the Levant, and study the maps that were created during this time period. We will analyze the representation of the journey itself, the descriptions of the lands traveled to and their inhabitants, and also the enunciation of the goals of such travels. We will see how a rhetoric of fascination, wonder and curiosity is intertwined with economical, political and religious agendas. There is no "official" travel narrative written by a woman in this time period: we will wonder why and study the representation of women in these texts. Conducted in French.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on speaking practice in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Participation, weekly readings, online homework, one-page written responses or audio-recorded responses every two weeks, presentation of a visual document, final project.

Prerequisites: Exceptional performance in RLFR 105, strong performance in RLFR 106, or by Placement Test, or Permission of the Instructor.

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference given to French Majors & French Certificate Students, and those with compelling justification for admission (statement of interest required).

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course qualifies for a DPE requirement because it addresses the early history of French colonization. The 15th and 16th century travel narratives we will focus on will allow students to critically engage with the first interactions of French people with indigenous populations and inhabitants of the Americas, Africa and India, with the religious and commercial projects undertaken by France vis-à-vis these territories, and with the racial and power dynamics that structure these narratives.

Not offered current academic year

RLFR 212 (S) Scandalous News: Media and Transgression in Pre-Revolutionary France

Today's twenty-four-hour news cycle bombards us with scandalous stories. On our smartphones, tablets, and screens, personal transgressions and their political consequences loom large. In this constant state of media immersion, scandal and its communication have come to define our time. Yet centuries ago in Pre-Revolutionary France, scandalous news played an even more crucial role, in a society centered on obedience to monarchy and monolithic institutions. In this course, we will consider how institutionalized codes of gender, social class, and religion shaped individual identity, how those who broke from these codes created individual autonomy, and how the scandals they caused were communicated to others. To pursue these questions, we will analyze literature, journalism, and legal texts that document scandalous figures and compare these early modern scandals with those of the twenty-first century.

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 214 (S) Everything New is Old Again: Legacies of Medieval France

In the twelfth century, the French language shifted from a mostly ephemeral spoken language to a language that deserved to be written down. Authors began recording stories that had only been told aloud, and readers of Latin begin translating classical literature for French-speaking audiences. This huge burst of creative expression remade popular culture in ways that we can still recognize today--if we know what to look for. In this course, we will explore how our twenty-first-century passion for memes on TikTok and other social media has similar roots in twelfth-century tastes, and how the literature and culture of medieval France have shaped what we now think of as literature and pop culture. We will explore four major themes: the reinvention and adaptation of classical literature, the invention of modern romantic love, the introduction of King Arthur, and hilarious short fiction (also known as twelfth-century memes). Readings to include love poetry, short narratives both funny and serious, and longer texts about adventure and love. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm paper, class presentation, and final project

Prerequisites: strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

SEM Section: 01 MR 2:35 pm - 3:50 pm Kathryn E Levine

RLFR 215 (F) The French Adventure: Word, Sound, and Image in the Digital Age

The French Adventure examines celebrated French literary texts (from the Middle Ages to Modernity) that draw on the theme of adventure, putting them into dialogue with their graphic novel and filmic adaptations (from the twentieth and twenty-first centuries). This course seeks to explore the phenomena of word (written or spoken), image (still or moving), and sound, as well as their interactions in today's environment of multimedia and digital immersion. Why have we seen an explosion of graphic novels and films depicting French literary classics in recent decades? How can these visual and audiovisual renderings enhance our appreciation for and understanding of written texts, and what aspects of the written word remain untranslatable to the world of the image? To address these questions, we will study a series of literary texts that depict historical moments from the late Middle Ages, to Absolute Monarchy, to the Belle Époque. From our visual vantage point of the twenty-first century, we will gain familiarity with the defining figures and events that these texts represent, from the fifteenth to the twentieth centuries. At the same time, we will interrogate the French-language graphic novel adaptations of each text, as well as portions of American-made filmic representations to consider questions of *patrimoine*, visual culture, and (trans)national identity. *Conducted in French.*

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, discussion leading, and final paper

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

RLFR 220 (S) Fairy Tales: Love and Politics at the Sun King's Court

This course explores the literary and historical development of love and politics in 17th-century France. These two motifs dominated courtly life at

Versailles during the reign of Louis XIV, the Sun King. Since cultural and artistic creations tend to dialogue with social circumstances, the literature of this time period--which critics have sometimes called the "Grand Siècle"---develops different schools of thought on the interactions between politics and love. Some authors approached these interactions from an idealistic or innocent perspective, while others had a more pessimistic or realistic outlook. Together, we will examine why and how each trajectory formed while also investigating the roles of literary genre and authorial gender. As part of our explorations, students will compose their own, original fairy tales and will also adapt a written tale into an in-class theatrical performance. Conducted in French.

Requirements/Evaluation: active class participation, quizzes, a midterm paper, an original fairy tale, an in-class performance of the fairy tale in groups

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

RLFR 224 (S) Sexuality and Seduction in Nineteenth and Twentieth-Century France (DPE)

Cross-listings: RLFR 224 WGSS 224

Primary Cross-listing

In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aureville, Gide, Proust, Colette, Duras, and Guibert.

Requirements/Evaluation: active class participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: French majors and certificate students, Women's, Gender, and Sexuality Studies majors, and those with compelling justification for admission; if the course is overenrolled, students will submit an online form

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 224 (D1) WGSS 224 (D1)

Writing Skills Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Cross-listings: RLFR 225 COMP 224

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. *Readings and Discussions in English.*

Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 225 (D1) COMP 224 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

Not offered current academic year

RLFR 226 (S) Black France/France Noire (DPE)

Cross-listings: AFR 226 RLFR 226

Primary Cross-listing

On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. *Conducted in French.*

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French and Africana Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 226 (D2) RLFR 226 (D1)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it focuses on "the shaping of social differences, dynamics of unequal power, and processes of change" through the lenses of historical colonial legacies, race, gender, citizenship among other questions.

Not offered current academic year

RLFR 228 (S) Introduction to French and Francophone Film

Cross-listings: RLFR 228 COMP 298

Primary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 15

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

RLFR 229 Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

Expected Class Size: 8

Grading:

RLFR 238 (S) *Le Moyen Âge en images: Decoding the Middle Ages*

This seminar investigates questions of visual culture and textual analysis in the Middle Ages. Although different from today's multimedia and digital environment, the Middle Ages boasted its own form of visual culture that will enable us to draw meaningful connections between medieval literature and history and modern-day debates on gender and sexuality. To explore these connections, we will study literary texts from the 12th-16th centuries in modern French translation, making comparisons to *bandes dessinées* that seek to visualize each text from a twenty-first-century perspective. We will investigate the points of overlap and divergence between the original texts and accompanying comics to ask why and how today's artists are returning to the literature and culture of the Middle Ages, especially in a time of globalization and technological immersion. For example: How might our findings inform our outlook on international politics, as well as gender-based forms of activism, such as the #MeToo movement, among other forms of social and political engagement? *Conducted in French*

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: active class participation, essays, online homework assignments, mid-semester presentation: une bande dessinée, and final paper

Prerequisites: successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 260 (F) *Francophone Graphic Novels* (DPE)

Cross-listings: RLFR 260 COMP 260

Primary Cross-listing

In this class we will read contemporary graphic novels and *bandes dessinées* from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. *Conducted in French.*

Requirements/Evaluation: weekly 1-page response papers, two short 4-5-page papers, presentation and final 7-8-page research paper

Prerequisites: RLFR 105, 106, by placement or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students, Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 260 (D1) COMP 260 (D1)

Difference, Power, and Equity Notes: The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

SEM Section: 01 TR 11:20 am - 12:35 pm Katarzyna M. Pieprzak

RLFR 300 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

Cross-listings: RLFR 300 AFR 339 COMP 336

Primary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the *banlieue*), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, *Banlieue in Lit, Music, Film* fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in *banlieue* film, literature and French hip hop music.

RLFR 302 (S) Monsters of the Renaissance

Where did monsters appear before comics and blockbusters? Before cinematic ghosts, vampires, and zombies, the French Renaissance popularized the Scythian Lamb, the Monk Fish, the Monopod, the Wind-Eaters from the Island of Ruach, and the mythic giants Gargantua and Pantagruel. The Latin word *monstrum* referred to a prodigy that did not fit the laws of nature. Thus, the monster not only generated wonder, curiosity, and fear, but both challenged and disrupted normative social values. In this course, students will analyze novels, travel narratives, medical treatises, essays, and epic

poems from 16th-century France, when writers, doctors, and travelers developed a critical reflection on monstrosity in order to deal with otherness. This encompassed fantastic creatures, non-human beings, and natural phenomena, as well as people whose gender, race, religion, and bodies deviated from established norms. In this course, students will think critically about race, gender, and disability, and study the complexities of fear, disgust, wonder, and fascination. Readings to include classical texts by Homer and Ovid, medieval texts like the Legend of Saint George and the Dragon, and Renaissance texts by Francois Rabelais, Jean de Léry, Marguerite de Navarre, Ambroise Paré, Michel de Montaigne, and Agrippa d'Aubigné.

Requirements/Evaluation: active participation, weekly written responses, midterm exam and final project

Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 305 (F) Where We Are & Where We Go: Spaces & Places of Contemporary France

How do people in France give meaning to the spaces they inhabit or move through? What does it mean to be from "here" or "there"? Through contemporary French literature and cultural analysis, we will explore these questions in the urban landscapes of major French cities, including Lyon, Marseilles, Nantes, and Angoulême. We will focus on literary representations of the home, the street, the park, the grocery store, and the train, and discuss the ways videos, press articles, photographs, and websites depict neighborhoods, festivals, and street theater. We will also examine a variety of theories that will help us conceptualize urban space and interpret these literary and cultural texts on city life in contemporary France. Readings to include texts by Annie Ernaux, Patrick Modiano, Leïla Sebbar, Didier van Cauwelaert, Yasmina Reza, Jean Rolin, Marie Darrieussecq, and Xavier Houssin. *Conducted in French.*

Requirements/Evaluation: class participation, several short essays (1-2 pages), midterm essay (5 pages), digital mapping project, and final oral presentation (based on midterm)

Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors & certificate students; those with compelling justification for admission; seniors returning from study abroad (Francophone countries) particularly welcome

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

RLFR 309 (F) Contemporary Short Stories from North Africa

Cross-listings: AFR 307 RLFR 309

Primary Cross-listing

Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maïssa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. *Conducted in French.*

Class Format: discussion

Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper

Prerequisites: RLFR 201, 202 or 203 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

RLFR 313 (S) Tropical Ecologies: Francophone Caribbean Literature and the Environment (DPE)

Cross-listings: AFR 313 RLFR 313 ENVI 311

Primary Cross-listing

The lushness of the mangroves, the flora and fauna of tropical landscapes, the intricacy of the rhizome, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, and expanse of the plateau--the natural world is an important site of Caribbean art in general and, more specifically, the francophone Caribbean novel of the 20th and 21st centuries. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between human activity and the environment. How does the novel inhabit Caribbean ecologies and topographies? How does it represent nature? In what ways do Caribbean texts meditate on nature and culture together or against one another? As the earthquake in Haiti demonstrated in 2010 with calamitous force, and the cycles of Caribbean hurricanes have shown over the years, natural disaster is also a political crisis. In view of this, we will also consider the legacies of slavery and colonialism in terms of class, gender and race politics. This investigation of the dynamics of natural and cultural phenomena will also have a theoretical frame rooted in critical texts of Caribbean of literary and political movements such as *Indigenisme*, *Négritude*, and *Créolité*. Conducted in French.

Class Format: This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via Zoom multiple times per week, with an emphasis on discussion and small group work. Students are also required to attend a monthly colloquium featuring renowned Caribbean scholars and participate in online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Students will be required to submit four 2-page position papers that incorporate critical readings with analysis of the books being read in their entirety; each student will also be responsible for making a twenty-five minute oral presentation on a critical/theoretical area related to class readings and discussion; the semester will conclude with a 6-8 page research paper to include footnotes and a bibliography. Attendance is mandatory and active, and informed class participation is required of all students. In addition, students are asked to come up with discussion questions three times throughout the semester.

Prerequisites: Successful performance in RLFR 105 or 106; or a previous RLFR 200-level or 300-level course; or by placement test; or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 313 (D1) RLFR 313 (D1) ENVI 311 (D1)

Difference, Power, and Equity Notes: As the course description show, this course critically examines difference, power, and equity in the Francophone Caribbean. The content focuses on race and ethnicity, slavery and colonialism, ecology and environmental disaster, and their effects on Caribbean histories, peoples, and cultures. The course teaches students how to critically investigate racial, cultural, and environmental in/justice(s), through texts, films, discussion, debate, and writing.

Not offered current academic year

RLFR 315 (F) Nature in Crisis: The Classification Craze and The Rise of Museums

Cross-listings: RLFR 315 ENVI 314

Primary Cross-listing

This course examines how understandings of nature evolved dramatically (and at times unsettlingly) from the 17th through the early 20th centuries and how this instability prompted a desire to classify and control natural phenomena. To analyze these issues, we will likewise consider the rise of modern museums, as well as the accompanying acts of classification and curation. We will consider how literary and philosophical texts from the aforementioned time periods depict nature, how real-world interactions with nature led to the creation of (illustrated) taxonomies, how colonization inflected notions of the natural world and also museum exhibits, and finally, how the cabinet of curiosities and later, the museum, provided a space in which to display and analyze nature's more unusual treasures. As part of our explorations, we will build a virtual exhibit of our own to reflect our understanding of nature today and our engagement with concepts of nature from previous eras. Conducted in French. Counts as an Envi Humanities Elective for the Envi Concentration.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: participation, online homework, essays, mid-semester presentation, final class project (virtual exhibit)

Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

RLFR 316 (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)

Cross-listings: WGSS 315 RLFR 316

Primary Cross-listing

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor

RLFR 360 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 460 COMP 361 ARAB 360 RLFR 360 ARTH 560

Primary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in English. All students have the option of reading selected texts in either French or English. Students taking the course for RLFR credit will read selected texts in French, participate in occasional French discussion sessions, and write the mid-term paper in French. Grad Art Students will occasionally meet as a group with the instructor and will write a longer final paper.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 12-page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Spring 2022

SEM Section: 01 Cancelled

RLFR 410 (F) Senior Seminar: Movement and Migration (DPE)

How do movement and migration produce and disrupt constructions of identity, home, and the nation? In the context of movement and migration, how is place imagined, experienced and remembered? What are the relationships between movement and containment, flight and freedom? Over the course of the semester, we will examine literary texts, film and visual art from French-speaking communities that focus on: the immigration experience in France, the construction of a Francophone Atlantic identity, internal migration between rural and urban spaces, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable or nomadic places of memory. Works by Chamoiseau, Glissant, Diome, Condé, Maffre, Pineau, and Binebine among others. *Conducted in French.*

Requirements/Evaluation: Weekly 1-page response papers, 5-page mid-term paper and a final 10-page research paper and presentation.

Prerequisites: Any 200-level RLFR course, or by permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Students will explore how literature, film and art narratives on migration and movement challenge (and also sometimes replicate) discourses of exclusion and structures of discrimination based on race and ethnic identity and gender. While the course focuses on French-speaking communities and people, we will think broadly about difference and power as they relate to movement, flight and freedom.

Fall 2021

SEM Section: 01 TF 1:10 pm - 2:25 pm Katarzyna M. Pieprzak

RLFR 412 (F) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers

Cross-listings: WGSS 408 RLFR 412

Primary Cross-listing

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 408 (D2) RLFR 412 (D1)

Not offered current academic year

RLFR 414 (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film (DPE)

Cross-listings: RLFR 414 COMP 414

Primary Cross-listing

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

Requirements/Evaluation: three, three-page response papers; thesis statement, methodology, and works cited list on one page; one script of a video essay

Prerequisites: 200-level RLFR courses

Enrollment Limit: 19

Enrollment Preferences: French and Comparative Literature majors and certificate students

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 414 (D1) COMP 414 (D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

Not offered current academic year

RLFR 416 (S) Liberté, Égalité, Fraternité? Questioning Inclusion in French Literature and Culture (DPE)

"Liberté, Égalité, Fraternité" is the national motto of France and of the Republic of Haïti. It finds its origin in the French Revolution but was institutionalized as the official symbol of the Republic in 1880. In this course, we will study literary texts and historical documents to explore these three terms, their cultural and philosophical meaning, their institutional definitions and their application in French society. Who gets to be free throughout French history? If equality is a Republican principle, what about equity? Could fraternity be replaced by a more inclusive term referring to more than one gender? Readings will include texts of multiple genres from the 16th to the 21st century addressing class, race and gender (Michel de Montaigne, Marie de Gournay, Voltaire, Montesquieu, Victor Hugo, Aimé Césaire, Léonora Miano, Paul B. Preciado), one short film, as well as other historical documents such as the "Code Noir," the "Déclaration des droits de la Femme et de la Citoyenne," the "Décret d'Abolition de l'Esclavage" and the "Constitution" of the Fifth Republic.

Class Format: Remote. This will be a remote course available to all students, whether they are on campus or completing coursework 100% remotely. We will convene synchronously via web-conferencing multiple times per week, with an emphasis on discussion in small groups. There will be many opportunities for all course members to interact via a series of varied online activities both during and in-between our synchronous sessions.

Requirements/Evaluation: Active participation, weekly readings, weekly posts on GLOW, weekly audio recordings, one presentation of a visual document (narrated PowerPoint), multiple steps towards final project: recording a podcast in French [this project, as well as the rest of the course, will take into account accessibility needs and can be modified accordingly].

Prerequisites: Any 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students in their senior year; if overenrolled: statement of interest required.

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course addresses the discrepancy between the values promoted by the national French motto and their actual application in French society throughout history. Students will investigate how inclusion within the French nation varies according to race, class, gender, sexuality and ability. They will explore the history of French Republican concepts of inclusion such as universalism and "laïcité" as well as their divisive and excluding potential.

Not offered current academic year

RLFR 493 (F) Senior Thesis: French

French senior thesis; this is part of a full-year thesis (493-494).

Grading: yes pass/fail option, yes fifth course option

RLFR 511 (F) Intensive French Grammar and Translation

This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.

Class Format: classes meet twice weekly and are conducted in English

Requirements/Evaluation: class participation, papers, a midterm, and a final examination

Prerequisites: a strong interest and need to learn French

Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor

Grading: pass/fail option only

Distributions: (D1)

Not offered current academic year

RLFR 512 (S) Readings in French Art History and Criticism

This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.

Requirements/Evaluation: evaluation is based on class participation, papers, a midterm, and a final examination

Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor

Grading: pass/fail option only

Distributions: (D1)

Not offered current academic year

Winter Study -----

RLFR 13 (W) Creative Portraiture in the Darkroom

Cross-listings: RLFR 13 ARTS 13

Primary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (the large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 10 weekly lab or studio hours outside of regular classes.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art majors then random

Grading: pass/fail only

Unit Notes: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Materials/Lab Fee: \$120

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 13 ARTS 13

Attributes: EXPE Experiential Education Courses

Winter 2022

LEC Section: 01 MTW 10:00 am - 12:50 pm Daniel Goudrouffe

RLFR 30 (W) Honors Essay: French

To be taken by candidates for honors other than by thesis route.

Class Format: honors essay

Grading: pass/fail only

Winter 2022

HON Section: 01 TBA Brian Martin

RLFR 31 (W) Senior Thesis: French

To be taken by students registered for French 493-494.

Class Format: thesis

Grading: pass/fail only

Winter 2022

HON Section: 01 TBA Brian Martin

RLFR 88 (W) French Sustaining Program

Students registered for RLFR 101-102 are required to attend and pass the French Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program. Check your class schedule to confirm enrollment.

Grading: pass/fail option only

Winter 2022

LAB Section: 01 TBA 9:00 am - 9:50 am Brian Martin

RLFR 99 (W) Independent Study: French

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2022

IND Section: 01 TBA Brian Martin

GEOSCIENCES (Div III)

Chair: Associate Professor Phoebe A. Cohen

- Alex A. Apotsos, Lecturer in Geosciences
- Alice C. Bradley, Assistant Professor of Geosciences
- Phoebe A. Cohen, Chair and Associate Professor of Geosciences
- José A. Constantine, Assistant Professor of Geosciences
- Mea S. Cook, Professor of Geosciences; on leave 2021-2022
- Rónadh Cox, Edward Brust Professor of Geology and Mineralogy
- Paul M. Karabinos, Edna McConnell Clark Professor of Geology

MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, gemology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The requirements for the Geosciences major were revised. The new requirements are immediately below, and the old requirements follow. Students who entered Williams in fall 2019 or after are under the new requirements. Students who entered Williams before fall 2019 are under the old requirements but may opt into the new requirements. Please talk to the Geosciences chair if you have questions about the major requirements.

Geosciences major requirements for students who entered Williams in fall 2019 or after:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate

GEOS 101 Co-Evolution of Earth and Life

GEOS 102 An Unfinished Planet

GEOS 103 Global Warming and Environmental Change

GEOS 104 Oceanography

GEOS 107 Astrobiology

At least two 200-level courses selected from this group:

GEOS 201 Geomorphology

GEOS 202 Mineralogy

GEOS 203 Field Methods and Structural Geology

GEOS 205 Economic Geology and Earth Resources

GEOS 210 Oceanographic Processes

GEOS 212 Paleobiology

GEOS 214 Mastering GIS

GEOS 215 Climate Changes

GEOS 217 Planets and Moons

GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

GEOS 301 Structural Geology

GEOS 302 Sedimentology

GEOS 303 Igneous and Metamorphic Petrology

GEOS 309 Modern Climate

GEOS 314 Analytical Historical Geology

GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains

GEOS 404 Coastal Processes and Geomorphology

GEOS 405 Geochemistry: Understanding Earth's Environment

GEOS 410 The Cryosphere

GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

In addition, courses taken for the major must include at least two courses from each of the following three groups:

Climate and Oceans:

GEOS 100 Introduction to Weather and Climate

GEOS 104 Oceanography

GEOS 210 Oceanographic Processes

GEOS 215 Climate Changes

GEOS 221T Climate Science and Politics

GEOS 255 Environmental Observation

GEOS 309 Modern Climate

GEOS 324 Corals and Sea Level

Sediments and Life:

GEOS 101 Co-Evolution of Earth and Life

GEOS 103 Global Warming and Environmental Change

GEOS 107 Astrobiology

GEOS 201 Geomorphology

GEOS 212 Paleobiology

GEOS 302 Sedimentology

GEOS 312T Mass Extinctions

GEOS 314 Analytical Historical Geology

Solid Earth:

GEOS 102 Unfinished Planet

GEOS 202 Mineralogy

GEOS 203 Field Methods and Structural Geology

GEOS 205 Economic Geology and Earth Resources

GEOS 217 Planets and Moons

GEOS 220T Evolution of and on Volcanic Islands

GEOS 250T Tectonic Geomorphology and Landscape Evolution

GEOS 301 Structural Geology

GEOS 303 Igneous and Metamorphic Petrology

Geosciences major requirements for students who entered Williams before fall 2019:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate
GEOS 101 The Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103 Global Warming and Environmental Change the Reshaping of Landscapes
GEOS 104 Oceanography
GEOS 107 Astrobiology

At least two 200-level courses selected from this group:

GEOS 201 Geomorphology
GEOS 202 Mineralogy
GEOS 203 Field Methods and Structural Geology
GEOS 205 Earth Resources
GEOS 210 Oceanographic Processes
GEOS 212 Paleobiology
GEOS 214 Mastering GIS
GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
GEOS 314 Analytical Historical Geology
GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth's Environment
GEOS 410 The Cryosphere
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

PREPARATION FOR GRADUATE SCHOOL

Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HONORS IN GEOSCIENCES

The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

GEOS 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Primary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change

decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 100 (D3) ENVI 100 (D3)

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

Not offered current academic year

GEOS 101 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

GEOS 102 (S) An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape Earth's surface are tied to temperature and precipitation. As those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

GEOS 106 (F) Being Human in STEM (DPE)

Cross-listings: PHYS 106 GEOS 106 STS 106

Secondary Cross-listing

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability, sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students' abilities to participate in STEM fields. Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

Class Format: class discussions, group project work (out of class time required)

Requirements/Evaluation: short response papers, class discussion participation, leading class discussions, group work, and final project

Enrollment Limit: 15

Enrollment Preferences: DIV III majors; statement of interest may be requested

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not count towards GEOS or PHYS major credit

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 106 (D3) GEOS 106 (D3) STS 106 (D2)

Difference, Power, and Equity Notes: This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

Not offered current academic year

GEOS 107 (F) Astrobiology

Cross-listings: GEOS 107 ASTR 107

Primary Cross-listing

Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

GEOS 111 (F) Radical Science- How Geology Changed the Way We See the World (WS)

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they

proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprang to life. During the 20th century, the permanence of Earth's geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: five 5-page papers and five oral critiques of partner's papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First year students then second year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Students will write five 5-page papers and will receive peer and instructor feedback on how to improve their writing skills and formulate sound arguments.

GEOS 201 (F) Field Methods and Structural Geology (WS)

Geologic history is preserved in rocks and it can be deciphered using fundamental principles such as superposition and cross-cutting relationships. Field observations are essential to understanding the rock record, and data and interpretations are encoded in geologic maps. This course introduces students to topographic and geologic maps, best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, and structures such as folds, and faults. Students will develop skills for presenting field data in papers, figures, and oral presentations. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture and discussion, three hours per week and laboratory, three hours per week

Requirements/Evaluation: short weekly writing assignments will form the basis for two 10-page papers based on field trips and a final independent project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip. The shorter assignments will be incorporated in two papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 202 (F) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

Class Format: Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

GEOS 205 (F) Economic Geology and Earth Resources

Cross-listings: GEOS 205 ENVI 207

Primary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging--all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

GEOS 207 (S) The Geoscience of Epidemiology and Public Health (DPE)

Cross-listings: ENVI 201 GEOS 207

Primary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 201 (D3) GEOS 207 (D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

GEOS 212 (S) Paleobiology

Cross-listings: GEOS 212 BIOL 211

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

GEOS 214 (S) Mastering GIS

Cross-listings: ENVI 214 GEOS 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate

environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

GEOS 215 (F) Climate Changes

Cross-listings: GEOS 215 ENVI 215

Primary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and problem sets (25%), three exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences and Environmental Studies majors

Expected Class Size: 16

GEOS 217 (S) Planets and Moons

Cross-listings: ASTR 217 GEOS 217

Primary Cross-listing

This course examines the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: Periodic short quizzes, reading journal, lab exercises, class participation

Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

GEOS 220 (F) Evolution of and on Volcanic Islands (WS)

Cross-listings: GEOS 220 ENVI 219

Primary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor

Requirements/Evaluation: five 5-page papers and critiques of partner's papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Primary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

GEOS 227 (S) Climate Data Analysis

Cross-listings: GEOS 227 ENVI 226

Primary Cross-listing

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

Requirements/Evaluation: Five 3-4 page papers including figures made from analyzing data.

Prerequisites: At least one GEOS or ENVI course

Enrollment Limit: 10

Enrollment Preferences: Students with a strong interest in Geosciences and Geoscience majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

GEOS 234 (S) Introduction to Materials Science (QFR)

Cross-listings: GEOS 234 PHYS 234

Secondary Cross-listing

Materials Science is the study of how the microscopic structure of materials--whether steel, carbon fiber, glass, wood, plastic, or mayonnaise--determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course does not count toward the Geosciences major.

Distributions: (D3) (QFR)

GEOS 250 (S) Climate, Tectonics, and Erosion (WS)

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. This course explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate. This course is in the Solid Earth group for the Geosciences major.

Class Format: After an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 103, 202, 203, 215, 302, 303, 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a strong interest in Geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 301 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 205

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 302 (S) Sedimentology (WS)

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of ancient oceans and continents, and how life evolved. Sand and dirt preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the ways in which they were deposited, and the ecosystems that they supported. Understanding sediments is also fundamental to society, for many kinds of civil engineering as well as pollution and environmental remediation. We will investigate sediment composition, fluid mechanics, bedforms, and depositional environments, building to an integrated understanding of erosion, deposition, and changes over time. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

Requirements/Evaluation: lab work, writing assignments, participation in discussions, and final exam.

Prerequisites: At least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

GEOS 303 (S) Igneous and Metamorphic Petrology

Using plate tectonics and the geologic assembly of New England as a template, this course explores the origin of crystalline rocks--volcanic, plutonic, and metamorphic--that comprise 94% of the Earth's crust. Field and lab studies are the crux of the course, supported by experimental work and thermodynamic principles. Chemical and mineralogical compositions and rock fabrics provide evidence for crystallization environments and tectonic settings, past and present. This course is in the Solid Earth group for the Geosciences major.

Class Format: Discussion, three hours per week and laboratory, two hours per week; several field trips during lab hours.

Requirements/Evaluation: lab work, one hour test, and a final exam

Prerequisites: GEOS 202 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: GEOS majors

Expected Class Size: 7

GEOS 309 (F) Modern Climate (QFR)

Cross-listings: GEOS 309 ENVI 209

Primary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 312 (S) Mass Extinctions: Patterns and Processes

Over the last 542 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life

on our planet. During some of these events, over 75% of all marine animal species went extinct and groups like the dinosaurs vanished from the planet after over 100 million years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day. This course is in the Sediments and Life group for the Geosciences major.

Requirements/Evaluation: four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set

Prerequisites: GEOS 101 or GEOS 212; or permission of instructor + any 200 level GEOS course

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: GEOS Group B Electives - Sediments + Life

GEOS 314 (S) Analytical Historical Geology (QFR)

In this course you will learn to collect, interpret, and analyze deep time paleontological, stratigraphic, and sedimentological records through readings, labs, and projects all coordinated around a week long spring break trip to explore the House Range of Utah. The Cambrian and Ordovician successions of Utah's West Desert offers an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology and stratigraphy. Labs will focus on skill building including learning basic coding in R, and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including geological mapping, measuring stratigraphic section, finding and identifying fossils, and correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will determine what data we will collect in the field. Examples might be trilobite taxonomy and phylogenetic analyses, quantitative biostratigraphic correlation using conodont fossils, reconstructing paleoenvironment based on sedimentological analyses of thin sections, or building a sequence stratigraphic framework for a subset of the field locality. This course is in the Sediments and Life group for the Geosciences major.

Class Format: weekly lectures, paper discussions, and hands-on labs

Requirements/Evaluation: short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project

Prerequisites: GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 324, GEOS 401, GEOS 302, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: junior and senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

Attributes: GEOS Group B Electives - Sediments + Life

Not offered current academic year

GEOS 317 (S) Current topics in Planetary Geology (WS)

Cross-listings: GEOS 317 ASTR 317

Primary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice

ages on Mars, the origin of Earth's moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.

Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences and Astronomy majors and prospective majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 317 (D3) ASTR 317 (D3)

Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

GEOS 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Primary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. We will read journal articles to explore how plate tectonics can help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: Remote, weekly one-hour meetings with tutorial partner and instructor

Requirements/Evaluation: five papers based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 203, 302, or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Distributions: (D3) (WS)

Writing Skills Notes: Five 5-page papers throughout the semester based on journal articles. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

GEOS 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 404 MAST 404 GEOS 404

Primary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

GEOS 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: ENVI 405 GEOS 405

Primary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, two 10-page lab reports, lab activities, and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Attributes: ENVI Natural World Electives

Not offered current academic year

GEOS 410 (S) The Cryosphere

Cross-listings: ENVI 410 GEOS 410

Primary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

GEOS 411 (F) Geobiology

Geobiology--the study of interactions between earth and life over geologic timescales--is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Requirements/Evaluation: labs, short papers, final grant proposal and presentation

Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: senior Geosciences majors, then juniors

Winter Study -----

GEOS 11 (W) Islands in Deep Time: Lost and Found

Thousands of rocky islands sit on continental shelves, where they rise above sea level as drowned monadnocks. More are scattered across the oceans, where volcanic processes prevail. Due to their smaller size and distance from the nearest mainland, islands represent fragile settings where the balance between natural colonization and extinction is easily perturbed by human interference. With a recognizable geological history tracing back 500 million years, island paleoshores represent one of the oldest ecosystems on the planet. Former shores often reveal fossils preserved in life position (i.e. barnacles and corals), as well as distinct events related to storms. This course examines the geomorphology and paleontology of former islands preserved in the rock record, but now exhumed as fixed windows in ecological time showing how islands are created, how they disappear, and how life managed to reach distant outposts. Lectures include details on Wisconsin's Baraboo Archipelago and South Dakota's Black Hills in Cambrian time, the Ordovician Munk Archipelago on Canada's Hudson Bay, Devonian Mowanbini Archipelago of Western Australia, Jurassic Saint David's Archipelago of Wales, Cretaceous Eréndira islands of Mexico's Pacific coast, ending with Pliocene and Pleistocene examples of oceanic islands in Portuguese Madeira, Azores, and the Cape Verde Islands. Since 2000, UNESCO has sponsored a system of international Geoparks, many of which feature unusual island settings and draw attention to Geoheritage. Some paleoislands have already achieved conservation as Geoparks and others are potential candidates. Course readings will be assigned from the existing scientific literature.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: priority to first-year students with a demonstrated prior interest in or experience visiting national and state parks

Grading: pass/fail only

GEOS 31 (W) Senior Thesis: Geosciences

To be taken by students registered for Geosciences 493-494.

Class Format: thesis

Grading: pass/fail only

Distributions: (D3)

Winter 2022

HON Section: 01 TBA Phoebe A. Cohen

GEOS 99 (W) Independent Study: Geosciences

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

GERMAN (Div I)

Chair: Professor Janneke van de Stadt

Professors: H. Druxes, G. Newman. Assistant Professor: C. Koné. Teaching Associates: Melanie Brantner and Mustafa Gül

STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is an intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202-209 combines advanced language study with the examination of topics in German-speaking cultures. The 202 and up course level may be taken twice with different content for major credit. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, plus conversations with the student if necessary.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case. It is not sufficient for the language of instruction in a given course to be German; the content must also have to do with the culture, history, politics, economics, etc. of Germany, Austria, or Switzerland.

THE CERTIFICATE IN GERMAN

To enhance a student's educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

Required Courses

German 101

German 102

German 103

German 104

German 201

Elective Courses

at least one course (in German or English) on German cultural history (literature, art, drama, music)

at least one course (in German or English) on German intellectual, political, or social history

THE MAJOR

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

Examples of appropriate courses in other departments are:

Art History 267 Art in Germany: 1960 to the Present

History 239 Modern German History

History 338 The History of the Holocaust

Music 108 The Symphony

Music 117 Mozart

Music 118 Bach

Music 120 Beethoven

Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

THE DEGREE WITH HONORS IN GERMAN

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

GERM 101 (F) Elementary German

German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all five language skills: listening comprehension, speaking, reading, writing, and culture. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

Class Format: Various types of instruction and learning; meets five days a week

Requirements/Evaluation: Active class participation, written homework, written and oral assessments

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: First- and second-year students

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Credit granted only if both semesters (GERM 101 and 102) are taken.

Distributions: (D1)

Fall 2021

GERM 102 (S) Elementary German

German 102 is a continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. *This language course is conducted in German.*

Requirements/Evaluation: active class participation, midterm & final exams, essays, quizzes, homework

Prerequisites: GERM 101 or equivalent

Enrollment Limit: 18

Enrollment Preferences: freshmen and sophomores

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

Distributions: (D1)

GERM 103 (F) Intermediate German I

In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts and aims to develop and consolidate students' speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The use of easy readers in the target language will also help to enhance reading comprehension. The course is taught in German. Active and dedicated participation including homework is expected.

Requirements/Evaluation: active class participation, midterm and final exams, quizzes, essays, homework

Prerequisites: GERM 102 or equivalent

Enrollment Limit: 18

Enrollment Preferences: sophomores

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

GERM 110 (F) Spies Like Us: Espionage, Surveillance, and Protest in German Cinema and Literature (WS)

Cross-listings: COMP 109 GERM 110

Primary Cross-listing

This First Year tutorial, available in English, investigates the mutual mistrust between the two Germanies in the Cold War period up until the peaceful popular protests that brought down the Berlin Wall. The political tensions between communist East Germany, the German Democratic Republic (GDR) and its capitalist Western counterpart, the Federal Republic (FRG), created a fascinating culture of governmental spying, but also led to aggravated periods of state surveillance of its own citizens. How were families affected across generations by these divisive politics, including the two states' differing treatment of the Nazi legacy? What was the involvement of the KGB and the CIA? How did East German intelligence try to destabilize the West from inside? Which locations in Berlin served as centers for spying, given that the city's terrain is quite flat and exposed? High-profile cases of conflicting loyalties include the Guillaume spy affair that brought down Willy Brandt as Chancellor of the FRG in 1974, and the Brasch family in the GDR, where the father, a communist true believer, turned his three sons over to the Stasi for their dissident activism and engaged art. We will debate filmic treatments of the recruitment of spies as double agents (*Coded Message for the Boss*, 1979), the chilling effects of police surveillance during the Baader-Meinhof radical left terrorist attacks (*The Lost Honor of Katharina Blum*, 1975; *Knife in the Head*, 1978) the afterlives of former terrorists who were offered new identities as 'ordinary' East Germans (*The Legend of Rita*, 2000), to the effects of the Stasi files becoming accessible to their victims after the fall of the wall (*Es ist nicht vorbei*, Anderson). We will also discuss popular film representations of spying in *Lives of Others* (2007) and *Bridge of Spies* (2015), and selected episodes from the popular TV-series *Germany 83 and 86* (2018). Literature will likely include: Thomas Brasch, *The Sons Die Before the Fathers* (1977), Christa Wolf, *What Remains* (1993), Monika Maron, *Flight of Ashes* (1981), Heinrich Böll, *The Lost Honour of Katharina Blum* (1974). All texts in English, films have English subtitles.

Class Format: Students in this course will be separated into small tutorial groups of 3 students, in order to promote intensive exchange of ideas. In a typical week, the students in each group will: (1) study a substantial "text" or film; (2) watch mini-lectures or power points by the instructor to supplement the assigned primary texts.

Requirements/Evaluation: 5 5-page tutorial papers and 2-page responses (in English)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: First Years, in groups of 3 students.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 109 (D1) GERM 110 (D1)

Writing Skills Notes: This tutorial will teach students to analyze visual media and fiction in German Studies in combination with secondary sources from a variety of related disciplines (History, Political Science, journalism). The toggling between these different types of sources promotes critical thinking skills.

Fall 2021

TUT Section: T1 TBA Helga Druxes

GERM 118 (F) Animal Subjects (DPE)

Cross-listings: COMP 118 GERM 118

Secondary Cross-listing

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 118 (D1) GERM 118 (D1)

Difference, Power, and Equity Notes: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight.

Not offered current academic year

GERM 120 (S) Turbodeutsch: Accelerated Elementary German

An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

Requirements/Evaluation: active participation, tests, quizzes, final exam

Prerequisites: students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German

Enrollment Limit: 12

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

SEM Section: 01 Cancelled

GERM 201 (F) Reisefieber: Germans On the Road for Adventure, Wealth, Escape

We will investigate potent myths of North America and Africa that fuelled German emigration, colonial projects, and adventurism. We will also look at inner-German travel stories, and, in a final segment, the contemporary refugee experience. Our travelers hail from diverse backgrounds and historical time periods: ranging from Glikl, a Jewish businesswoman in the seventeenth century, to fur trade and real estate tycoon Johann Jakob Astor, to contemporary emigrants and thrill-seekers. We will also analyze films and tales about the potent myth of the "Wild West" and noble Indians, promoted by nineteenth-century bestselling author Karl May, and their afterlife in contemporary movies.

Requirements/Evaluation: three short oral presentations, 4-5 pp. take-home midterm essay, regular written worksheet questions, and role play oral final project

Prerequisites: GERM 104 or contact instructor

Enrollment Limit: 15

Enrollment Preferences: German majors and German certificate students

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: GBST Borders, Exiles + Diaspora Studies Electives

Fall 2021

SEM Section: 01 MWF 12:00 pm - 12:50 pm Helga Druxes

GERM 202 (S) German Comics

The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Nora Krug, Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz and Reinhardt Kleist. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. *This course is conducted entirely in German.*

Requirements/Evaluation: three 3- to 5-page paper and one final project

Prerequisites: GERM 104 and GERM 201

Enrollment Limit: 19

Enrollment Preferences: German majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

GERM 203 (S) Hansestadt Hamburg

"Wenn Du in Hamburger Hopn platt snacken kannst, dann geht immer eine Dör mer auf". Hamburg, the second largest city in Germany (with 1.8 million inhabitants), always had a particular significance within German cultural consciousness. Part of the Hanseatic League since the Middle Ages, the Free City of Hamburg quickly became an important commercial center in Northern Europe and a prosperous city of traders and merchants.

Located on the river Elbe and in close proximity to the North Sea, the city-state Hamburg is still a major port city which has long benefited trading activities and fostered an exposure to other cultures. Called the gateway to the world (because the port was for a long time the gateway to the Americas) and the Venice of the North (the city is surrounded by water and features more canals, streams, and bridges than Amsterdam), later on completely destroyed by the World War II bombing raids, Hamburg is a city of contrasts: infamous for its dialect (Plattdeutsch) as well as its red light district (St Pauli), renowned for its journalism (Der Spiegel, Die Zeit) and culture scene, famous for its culinary specialties, (the burger might have been invented there) and its sports culture (soccer, handball, basketball), Hamburg has a rich past and a multicultural present that this course will examine. In order to gain a deeper insight into the geography, history, and culture of this fascinating city, we will read the autobiography by Hans-Jürgen Massaquoi, novels by Uwe Timm, short stories by Yoko Tawada and Siegfried Lenz, listen to songs by Hans Albers, Wolf Biermann, Udo Lindenberg, the Hip Hop band Fettes Brot, and watch movies by Fatih Akin, Sandra Nettelbeck, Christian Alvart, Özgür Yildirim, and Leander Haußmann. Taught in German.

Requirements/Evaluation: oral presentations, four 3- to 5-page papers in German, midterm and final exams

Prerequisites: GERM 201 or equivalent

Enrollment Limit: 12

Enrollment Preferences: German majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: GBST Urbanizing World Electives

GERM 204 (S) Stranger Things: The German Novella

Goethe's famous description of the novella as an "unheard of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. As we trace the development of the novella over the course of two hundred years of German literary history, we will explore how the eerie phenomena at the genre's core reflect specific historic moments only to transcend them. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? *Taught in German.*

Requirements/Evaluation: three 2-page critical responses, oral presentation, 6-page final paper

Prerequisites: GERM 201 or equivalent

Enrollment Limit: 20

Enrollment Preferences: German majors

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

GERM 205 (S) Berlin--Multicultural Metropolis Between East and West

We will examine texts and films about Berlin as a center of cultural and social transformations in the late nineteenth and twentieth centuries, with special emphasis on the post-wall period. We will move from the turn of the century (when the city's population had recently tripled in size) to the establishing of Berlin as a world capital in the 1920s, then through Nazi-era transformations, wartime destruction and the cold war division of the city. We will conclude with the reshaping of the city after the fall of the Berlin wall. Texts and films may include: Walter Benjamin, *Berliner Kindheit um 1900*, excerpts from Ulrich van der Heyden und Joachim Zeller's *Kolonialmetropole Berlin*, Walter Ruttmann, *Sinfonie einer Großstadt*, Irmgard Keun's *Das kunstseidene Mädchen*, Nazi architect Albert Speer's plans for Berlin as the fascist capital "Germania," the 1956 East German youth protest film *Ecke Schönhauser*, short fiction by Reiner Kunze, Aras Ören, Peter Schneider, Bodo Morshäuser, Irina Liebmann. Recent films to be included are: *Sonnenallee*, *Goodbye, Lenin!*, *Berlin is in Germany*, *Berlin Calling*.

Class Format: seminar/discussion

Requirements/Evaluation: frequent short writing assignments; oral presentations with partner, one 5-6pp. essay

Prerequisites: GERM 201 or equivalent

Enrollment Limit: 15

GERM 209 (S) Green Germany: Literature, Film, and the Environment

Today, Germany is known as a world-wide leader in environmental policies, sustainable energy, and conservation efforts. This "green" culture, however, is not a new phenomenon, but has long constituted an essential part of German identity. In this course, we will trace Germany's relationship with the environment over the course of 200 years of cultural production. Among other things, we will consider the Romantic fascination with the sublime powers of an uncontrollable wild nature, discuss the ecological underpinnings of Nazi ideology, analyze the effects of the nuclear disaster in Chernobyl on German society, and read about the role recycling currently plays as a practice of integration for refugees. Including texts and films by Alina Bronsky, Ilija Trojanow, Ludwig Tieck, Christa Wolf, Rainer Maria Rilke, Baran bo Odar and Jantje Friese, and Doris Dörrie. *Taught in German.*

Requirements/Evaluation: oral presentation, bi-weekly 1-page response papers, final project

Prerequisites: GERM 201 or equivalent

Enrollment Limit: none

Enrollment Preferences: German majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

GERM 210 (S) The Holocaust in the German Imagination

How do we think about an event that unsettles the very notion of representation? An indelible part of German history and culture, the Holocaust continues to challenge the artistic imagination by simultaneously calling for and resisting interpretation. This course examines the various ways in which German-speaking writers, artists, and directors have responded to this call since the 1930s. We will explore questions of memory and postmemory, the entanglements of trauma, guilt, and testimony, as well as the tensions and continuities between Germany's rich cultural heritage and portrayals of the Holocaust. Taking into consideration different forms of artistic expression, such as literature, film, and visual art, including sites of commemoration, this class will trace the relationship between past and present. What might it mean to write and think in the language of the perpetrators? How do texts by Holocaust survivors and first-hand witnesses relate to those created by later generations? What are the differences between West and East German representations of the Shoah, and how do they differ from how immigrants in Germany or Austrian artists engage with the event? Among others, we will read texts by Paul Celan, Nelly Sachs, Anna Seghers, Ruth Klüger, Ingeborg Bachmann, Elfriede Jelinek, Peter Weiss, W. G. Sebald, and Zafer Senocak, as well as watch films by Michael Haneke, Max Färberböck, Frank Beyer, Volker Schlöndorff, Stefan Ruzowitzky, and Caroline Link. *Conducted in German.*

Requirements/Evaluation: short critical papers, oral presentation

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: prospective German majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

GERM 251 (F) Dolls, Puppets and Automaton (WS)

Cross-listings: GERM 251 COMP 251

Secondary Cross-listing

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. *Conducted in English.*

Class Format: This seminar will be taught online.

Requirements/Evaluation: active class participation, oral presentations on the reading materials, three 5- to 8-page papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors, or those considering a major in Comparative Literature

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 251 (D1) COMP 251 (D1)

Writing Skills Notes: Each student will write three 5- to 8-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write two 3-4 page papers on which I will provide written feedback regarding grammar, style, and textual analysis.

GERM 276 (S) Black Europeans

Cross-listings: COMP 276 AFR 276 GERM 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none

Not offered current academic year

GERM 280 (F) Art at its Limits: Representing the Holocaust (DPE) (WS)

Cross-listings: COMP 280 JWST 280 GERM 280

Primary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Rózewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.

Requirements/Evaluation: three 2-page critical responses, oral presentation, final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: German and Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

Writing Skills Notes: Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Not offered current academic year

GERM 300 (F) Mannweiber: Masculine Women in German Culture

The German word "Mannweib" is a literal translation of the Greek "androgynous" and is a derogatory term for a woman who acts in a masculine way. This survey course examines the recurrence of "masculine femininity" in German culture with a particular focus on literary texts, operas, paintings, and films, all crafted at turning points in German history. Why does the Mannweib emerge at times of major political and historical upheavals? How does this atypical masculine woman contribute to the construction of a German national identity? These are some of the key questions this course seeks to address. We will read the Nibelungenlied epic, poems by Freiligrath, plays by Lessing, Schiller, Goethe, Kleist, and Dürrenmatt, as well as short stories by Stifter, watch operas by Wagner, and films by Sternberg and Tykwer. In all these materials featuring a Mannweib as main protagonist, we will look at the way masculine femininity is construed as unnatural and literally constructed to serve either a patriarchal or a patriotic purpose. We will also examine the misogyny underlying the artistic creation of these masculine women, either enshrined as allegories of virtue or perceived as dangerous

agents of socio-political change, and ultimately doomed to rejection from the moment these misfits step out of their assigned role. *Conducted in German.*

Requirements/Evaluation: oral presentations and three 3- to 5-page papers written in German

Prerequisites: GERM 200-level courses

Enrollment Limit: 19

Enrollment Preferences: German majors and concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall

Cross-listings: WGSS 304 GERM 304

Primary Cross-listing

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, *Die Ermittlung*, Heinrich Böll, *Und sagte kein einziges Wort*, Gisela Elsner, *Riesenzwerge*, Emine Sevgi Özdamar, *Das Leben ist eine Karawanserei*, Volker Braun, *Unvollendete Geschichte*, Alice Schwarzer, *Der kleine Unterschied und seine großen Folgen*, Christian Kracht, *Faserland*, Thomas Brussig, *Wasserfarben*. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader-Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

Class Format: remote

Requirements/Evaluation: alternating 4-page tutorial papers in German, and 2-page critiques

Prerequisites: GERM 202 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: German majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$80 books

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 304 (D1) GERM 304 (D1)

Not offered current academic year

GERM 314 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 WGSS 344 ARTH 315

Secondary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the

excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape--from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 314 (D1) WGSS 344 (D2) ARTH 315 (D1)

Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

Spring 2022

SEM Section: 01 W 1:10 pm - 3:50 pm Alena Williams

GERM 315 (F) Kafka and His/Our World (WS)

Cross-listings: COMP 316 GERM 315

Primary Cross-listing

"It's so Kafkaesque!" We love to use the most famous Austro-Hungarian-Czech-Jewish writer of all time to characterize puzzling and dispiriting situations. But close examination of Franz Kafka's work and life reveals a multi-dimensional world that goes far beyond the cliché. Jewish in an increasingly anti-Semitic environment, German-speaking surrounded by Czech-speakers, deeply alone in a family that didn't understand him, Kafka produced texts that simultaneously demand and refuse to be interpreted. In this tutorial we will begin with intensive readings of selected short stories and parables, then move on to an exploration of the Kafka's own words from diaries and letters, as well as secondary sources. The course will conclude with discussions of how Kafka's texts and their contexts might relate to contemporary conditions and/or to students' own lives and thoughts. This will be a modified tutorial, with five groups of three students apiece. Students may take the tutorial in either German or English; groups will be formed accordingly.

Class Format: The class will be divided into groups of 3. At each weekly meeting, one of the 3 will present a 5-page paper, another will present a formal response, and the third will participate actively in discussion. Students will incorporate at least one of their papers into a final project that links their discussions of Kafka to their own interests and/or to contemporary issues. Students can take the course in German or English (or a combination of the two), and groups will be formed accordingly

Requirements/Evaluation: Three 5-page papers, three 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

Prerequisites: For German speakers: GERM 202 or the equivalent preferred, though students with less experience should contact the instructor. For students taking the course in English: one college literature course.

Enrollment Limit: 15

Enrollment Preferences: German students, majors or potential majors in Comp Lit or German

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 316 (D1) GERM 315 (D1)

Writing Skills Notes: The course has a modified tutorial format, with groups of three meeting weekly instead of pairs. Each student will write three 5-page papers plus three 1-2-page responses during the semester, and will prepare a final project. Each paper will receive extensive feedback from the instructor.

Not offered current academic year

GERM 316 (S) "Wer ist wir?": Recent Debates over Multiculture in Germany

German chancellor Angela Merkel controversially claimed in 2010: "Multikulti ist gescheitert." (Multiculturalism has failed in Germany). We will investigate different perspectives on Germany's integration of minorities. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the "economic miracle." How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidids, Rita Süßmuth and others.

Requirements/Evaluation: four 5-page papers in German

Prerequisites: GERM 202 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: German majors, but open to all with appropriate language skills

GERM 317 (F) The New Woman in Weimar Culture (WS)

Cross-listings: GERM 317 WGSS 317

Primary Cross-listing

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. *Taught in German.*

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation: papers and oral presentations

Prerequisites: for students taking the course in German: GERM 202 or the equivalent; for students taking the course in English: one college-level literature course

Enrollment Limit: 19

Enrollment Preferences: juniors and seniors, students with strong analytical skills and a vivid interest in literature, art, music, and films

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 317 (D1) WGSS 317 (D2)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2021

SEM Section: 01 MW 7:00 pm - 8:15 pm Christophe A. Koné

GERM 320 (S) German Romanticism (WS)

German Romanticism is a multifaceted, even contradictory phenomenon. Its earliest practitioners Novalis (Friedrich von Hardenberg) and Friedrich Schlegel could be seen as enacting a culmination of Enlightenment optimism about the emancipatory potential of the human mind, with their advocacy of an "aesthetic revolution," equality for women and Jews, and a holistic relationship to nature. Later, some of the first feminists (Caroline Schlegel-Schelling, Bettina Brentano von Arnim) worked side-by-side with authors who essentialized women into primal lures and primal threats (Ludwig Tieck, Joseph von Eichendorff). One of the most famous Romantics of all, E. T. A. Hoffmann, combined high irony and a penchant for the irrational in his fascinating works. This course will explore the paradoxes of German Romanticism through close readings of aphorisms, stories, fairy tales, poetry, essays, and music.

Requirements/Evaluation: intensive participation, frequent written responses, two shorter papers to be written in stages, and a longer final project

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: German students

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The course will involve intensive work with writing analytical papers, including short responses to most texts, two papers that will be written in stages, and a longer final project that will include work shopping drafts in tutorial format

Not offered current academic year

GERM 321 (S) Lust, Liebe und Gewalt (WS)

In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include---if not provoke---it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Haneke and Muskala. *Conducted in German.*

Requirements/Evaluation: papers and oral presentations

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: 10

Enrollment Preferences: German majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2022

SEM Section: 01 MR 1:10 pm - 2:25 pm Christophe A. Koné

GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE)

Cross-listings: GERM 331 COMP 347

Primary Cross-listing

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers. Psychoanalytic theory, especially recent discussions of the transgenerational transmission of trauma and perpetrator guilt, will provide a conceptual framework for the literary works. Austria will serve as a case study of the psychology of right-wing populism and the resistance against it in the early 21st century; at the end of the course, we will compare the situation there with the United States.

Requirements/Evaluation: Active participation, frequent written responses, two shorter papers and a longer final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: German or Comparative Literature majors

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 331 (D1) COMP 347 (D1)

Difference, Power, and Equity Notes: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

Not offered current academic year

GERM 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)

Cross-listings: WGSS 401 COMP 401 GERM 401

Secondary Cross-listing

Western neoliberalism is a predatory excrement of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

Class Format: three hours per week

Requirements/Evaluation: three 3-page papers, a short oral presentation, a 15-page final paper

Prerequisites: 300-level course

Enrollment Limit: 25

Enrollment Preferences: Comparative Literature majors and advanced students in other fields with permission of instructor

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: course books and reader packet

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 401 (D2) COMP 401 (D1) GERM 401 (D1)

Difference, Power, and Equity Notes: This course addresses the costs to exploited groups within the neoliberal marketplace. We will discuss theoretical sources from a variety of fields (sociology, economics, philosophy, gender studies) every week that render these forms of expulsion or dispossession explicit. Far from benefiting all, the privileging of self-interest and market relations leads to increased inequality and in turn provokes violent reactions: the birth of new forms of fascism, racism and religious fundamentalism.

GERM 515 (F) Reading German for Beginners

German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for art history and criticism. Students will learn the key elements of grammar and acquire a core vocabulary. They will also practice reading and translating a variety of short texts.

Class Format: Remote

Requirements/Evaluation: regular participation, homework

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

Expected Class Size: 12

Grading: pass/fail option only

Distributions: (D1)

Not offered current academic year

GERM 516 (S) Readings in German Art History and Criticism

In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. Texts are selected from classical works of art history and criticism as well as from contemporary publications. By the end of the course the students will have a solid foundation for building proficiency in German, whether through self-study or further course work.

Class Format: Remote

Requirements/Evaluation: regular participation, homework

Prerequisites: GERM 515 or equivalent preparation (placement test)

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

GLOBAL STUDIES (Div II)

Chair: Professor Ngonidzashe Munemo

Advisory Committee

- Farid Hafez, Class of 1955 Visiting Professor of International Studies
- Ngonidzashe Munemo, Professor of Political Science, Chair of Global Studies; affiliated with: Global Studies

An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

Requirements

To complete the concentration, students must take a section of Global Studies 101; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in the track.

Global Studies 101

All students wishing to pursue the concentration should take a section of Global Studies 101 early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

TRACKS

After taking Global Studies 101, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

Area Tracks

- African Studies
- East Asian Studies
- Latin American Studies
- Middle Eastern Studies
- Russian and Eurasian Studies
- South and Southeast Asian Studies

Thematic Tracks

- Borders, Exile and Diaspora Studies
- Economic Development Studies
- Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

Senior Exercise

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators' disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class or in a Global Studies colloquium, or in both.

Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student's engagement through comparative inquiry.

Honors

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

Study Away, Research, and Internships

Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

FAQ

Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, but students should not expect to get more than 3 study abroad courses counted towards the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

Note: as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

GBST 101 (S) America and the World

Cross-listings: LEAD 120 GBST 101 PSCI 120

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to

understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: discussion

Requirements/Evaluation: short papers, class participation, and final exercise

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 120 (D2) GBST 101 (D2) PSCI 120 (D2)

Attributes: PSCI International Relations Courses

Not offered current academic year

GBST 101 (F) The Modern Middle East (DPE)

Cross-listings: HIST 207 JWST 217 REL 239 ARAB 207 GBST 101 LEAD 207

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40

Grading: yes pass/fail option, yes fifth course option

GBST 101 (S) Religion, Politics, and Society: A Global Perspective (DPE)

Cross-listings: REL 126 GBST 101 PSCI 126

Primary Cross-listing

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

GBST 116 (F) The Art of Playing: An Introduction to Theatre and Performance

Cross-listings: THEA 101 COMP 151 GBST 116

Secondary Cross-listing

This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the

performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Requirements/Evaluation: two 5-page critical essays, journal reflections, studio exercises, and active participation in all activities

GBST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: GBST 117 HIST 117 ASIA 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites: First years and sophomores only

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar.

GBST 133 (S) Plantation and the Plot: the Poetics of Caribbean Economic Thought and Struggle

Cross-listings: ECON 133 GBST 133 AFR 133

Secondary Cross-listing

This introductory course to Caribbean Economic Thought contextualizes the poetics of economic ideas, struggle and knowledge alongside popular literary works connected to Caribbean Economic Development. Using the 'plantation' and the 'plot' as a site of struggle and continuing exploitation and extraction, this course delves into Caribbean postcolonial development thinking to explore its cultural and historical roots. By examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy and society are framed, conceptualized and traversed as transplanted spaces, economic zones, and transformative perspectives to economic thinking integral to merchant and industrial capitalism and New World social formations. We will examine historical and contemporary texts of contributors to the New World Group that centers the Caribbean within global economic transformations. Some events this course covers are indigenous genocide, commercial slave trading and indenture, structural adjustment and postcolonial debt, technology to the current fragmenting of global neoliberalism. These events will help shape an appreciation for the material and socio-cultural understandings of economic phenomena from the plantation to the sea within cultural and literary works in pluralistic, productive, and powerful ways.

Requirements/Evaluation: Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/multi-page poster); critical analysis of a Caribbean economic sector or major regional report--choice made after discussion with instructor (10 pages); final project: review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultures that must raise questions for class discussion)

Prerequisites: None

GBST 162 (S) Languages of East Asia

Cross-listings: CHIN 162 ANTH 162 GBST 162 ASIA 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? And what are the prospects for their future development, including the influence of computers and digital communications? The last few class sessions will be devoted to minority languages of East Asia as well as oral presentations by the students. While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

GBST 204 (S) To See the Past: Russian and Soviet Cinema on History

Cross-listings: RUSS 204 GBST 204 COMP 204

Secondary Cross-listing

This course surveys Soviet and Russian cultural history of the 20th- and 21st-centuries through the history of the cinematic medium. We will watch and analyze key films of this period--films by Eisenstein, Vertov, Tarkovsky, Muratova, Balabanov, Zviagintsev, and Fedorchenko among others--from a double perspective. On the one hand, we will study the cultural and historical contexts of the Soviet Union and Russia; on the other hand, we will learn the formal and stylistic aspects of the cinematic medium as it developed historically (from silent, to sound, to color, to digital etc.). From this double perspective, we will try to answer a larger question that underlies this course: What kind of historical thinking can we learn through cinema as a medium? In other words, we will take cinema neither simply as a direct reflection of state ideology nor as pure aesthetic form or entertainment for the masses. Rather, we will approach the films of this period as audio-visual texts that are rich in historical content and require our informed and attentive interpretation.

Class Format: The class meets synchronously on campus twice a week. Remote students will be able to join each synchronous session via zoom. Synchronous sessions will consist of discussion and visual analysis of short clips. All films and reading materials will be available online.

Requirements/Evaluation: For each class you'll watch 1 or 2 film(s) and read typically 1 article under 20 pages. You will submit short viewing response before each class. Additionally, there will be short viewing or creative assignments to familiarize students with formal aspects of film. Evaluation will be based on participation, one presentation, short sequence analysis, and final paper or video essay

Prerequisites: none, open to all students

GBST 208 (S) The U.S. and Afghanistan: A Post-Mortem (DPE)

Cross-listings: ASIA 208 GBST 208 PSCI 220 ASST 208 ANTH 208

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 25

GBST 212 (F) Foundations of China

Cross-listings: REL 218 ANTH 212 GBST 212 HIST 214 ASIA 211 CHIN 214

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a

set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

GBST 213 (F) Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin's Russia (DPE)

Cross-listings: COMP 257 GBST 213 WGSS 214 RUSS 213

Secondary Cross-listing

Since Vladimir Putin's rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting "homosexual" propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. *All readings will be in English, and all films will have English subtitles.*

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Those majoring in Russian and/or WGSS, as well as Global Studies concentrators.

GBST 214 (S) Asian/American Identities in Motion (DPE)

Cross-listings: GBST 214 ASST 214 THEA 216 AMST 213 ASIA 214 DANC 216

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including

South-Asian) communities are cultivated, expressed, and contested. It will orient students towards "reading" and analyzing live and mediated performances within historical, social, and political frameworks. Students will explore how socio-historical contexts influence the processes through which dance performances are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies, and will engage with issues such as nation formation, race and ethnicity, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include film screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Class Format: This course will be taught in a virtual format and will be remote.

Requirements/Evaluation: reading responses, essays, in-class writing assignments, class participation, and group presentations.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance performances and practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

Not offered current academic year

GBST 215 (F) Performance Ethnography (DPE)

Cross-listings: GBST 215 DANC 214 ANTH 215 AMST 214 THEA 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 215 (D2) DANC 214 (D1) ANTH 215 (D2) AMST 214 (D1) THEA 215 (D1)

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

Not offered current academic year

GBST 216 (S) Urbanism in the Ancient World

Cross-listings: ANTH 216 GBST 216

Secondary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

GBST 217 (F) Viral Inequality: Power and Difference in Pandemics (DPE)

Cross-listings: GBST 217 STS 215

Secondary Cross-listing

From contested data to controversial containment strategies, the shape and course of pandemics are influenced at every level by the question: *Who matters? Whose lives* are prioritized and protected? *Whose expertise* is made actionable, and why? Focusing on the uneven distribution of risk and care during pandemics, this course explores how global health emergencies are not states of exception, but rather events that lay bare the priorities and interests of their host societies. Our investigation into pandemics—including Black Death, cholera, "Spanish" flu, HIV/AIDS, Ebola and novel coronaviruses—will provide a critical entry point into understanding the social, political, and economic processes that shape health interventions and outcomes, and their divergences along lines of social difference. We will ground our discussion and analysis using key concepts in Science & Technology Studies, while drawing from critical medical anthropology, disability studies, theories of capitalism and disaster studies to enrich our conversation.

Class Format: Online seminar

Requirements/Evaluation: Several short essays and reflection papers

Prerequisites: None, open to all students

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference will be given to first-years and sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 217 (D2) STS 215 (D2)

Difference, Power, and Equity Notes: This course takes an intersectional approach to understanding how global pandemics unfold. It will emphasize how power dynamics and social differences shape responses to, and outcomes of, health emergencies. Readings in social and critical race theory are designed to give students a deeper appreciation of these issues.

Attributes: PHLH Social Determinants of Health

Not offered current academic year

GBST 218 (S) Capital and Coercion (DPE)

Cross-listings: GBST 218 ECON 218

Secondary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice and distrust will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the transatlantic trade in enslaved people and the Haitian Revolution, the Dutch "cultivation system" in Java, colonial control and independence in Kenya, and the U.S.-backed dictatorial regime and its overthrow in Nicaragua. Required readings for this class will be seventy or more pages per week, and will include historical case studies, excerpts from novels, and reportage.

Requirements/Evaluation: Students will be evaluated based on class participation, weekly assignments, a midterm, and a final.

Prerequisites: Econ 110

Enrollment Limit: 25

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

GBST 221 (F) The Making of Modern South Asia: 1750-1950 CE

Cross-listings: ASST 221 HIST 221 GBST 221 ASIA 221

Secondary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: discussion

Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

Prerequisites: none; open to all

Enrollment Limit: 40

Expected Class Size: 20-25

Grading: yes pass/fail option, no fifth course option

GBST 228 (S) Performance Practices of Global Youth Cultures

Cross-listings: GBST 228 THEA 228

Secondary Cross-listing

This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined "youth" by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

Class Format: reading and discussion

Requirements/Evaluation: includes class discussions, self-reflexive presentations and papers, journal reflections, one 10-page paper based on original research with in-class presentation

Prerequisites: none

Enrollment Limit: 15

GBST 229 Performance Practices of India (DPE)

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors

Expected Class Size: 12

Grading:**Distributions:** (D1) (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism

GBST 233 (F) Colonialism, Capitalism and Climate Crisis**Cross-listings:** ENVI 204 GBST 233 AFR 233**Secondary Cross-listing**

Evolutions are part of human existence. Our collective understandings of the world, the economic realm, and our place in it also evolve. This course examines the transformations between human, nature and non-human species, specifically the relationship between the climate and the economy. Our starting point of the intellectual journey is the colonial imprint of human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class" man. We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization to natural resource extraction, exploitation, technological knowledge, industrial development and resulting greenhouse gas accumulation and climate crises. We will also explore economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective worlds. The course exposes the hierarchies of social differences and inequalities (class, race, gender, species) under climate crisis to advance a reparatory approach that draws in experiences from social and environmental movements that advance climate justice. Students will also be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: Blog post entries; research report on an emerging green technology (10 pages); recorded video / interview of an environmental justice movement/activist in the global South; reflections paper (8 pages); community case study on an environmental project tracing its histories (7 pages); participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

Prerequisites: None**Enrollment Limit:** 15**Enrollment Preferences:** If over enrolled preference goes to Africana Studies and then Environmental Studies students.**Expected Class Size:** 10**Grading:** no pass/fail option, no fifth course option**Distributions:** (D2)**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 234 (F) What is Islam? (DPE)**Cross-listings:** ARAB 234 REL 234 GBST 234 HIST 208**Secondary Cross-listing**

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments

will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 234 (D2) REL 234 (D2) GBST 234 (D2) HIST 208 (D2)

Difference, Power, and Equity Notes: This course looks role of power, in particular imperial and colonial power in the construction of religion. To that end, the course will explore how the rise of Muslim empires shaped the construction of pre-modern Islam and subsequently the role of European colonialism in shaping the emergence of modern Islam. This course will teach students critical tools in postcolonial theory about the relationship between power and the production of knowledge and the agency of the colonized.

GBST 235 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 AMST 235 HIST 275 GBST 235 ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)/(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

GBST 236 (S) Reading the Qur'an

Cross-listings: ARAB 236 REL 236 COMP 213 GBST 236

Secondary Cross-listing

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

Prerequisites: none

GBST 241 (F) History of Sexuality

Cross-listings: REL 241 HIST 292 GBST 241 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

GBST 243 (F) Anti-Muslim Racism: A Global Perspective (DPE)

Cross-listings: PSCI 244 GBST 243 REL 247

Primary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Also qualifies for the GBST Urbanizing World track

GBST 244 (S) Black Mediterranean (DPE) (WS)

Cross-listings: GBST 244 COMP 244

Secondary Cross-listing

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of migrant intellectuals and artists from North Africa and the Middle East, who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Today the Mediterranean has become a graveyard where black and brown bodies transit a hostile and deadly passage. Therefore, a centerpiece of this course will be an examination of the racist discourse in Europe in the light of the *Black Lives Matter's* quest for decolonizing knowledge. In this interdisciplinary course, we read both literary works (Ali Farah, Khatibi, Lakhous, Scego), and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films, documentaries, podcasts, exhibits and museums of colonialism in Europe.

Class Format: This will be an hybrid course. Students will meet twice a week with me.

Requirements/Evaluation: weekly writing assignments, midterm and final exams, final paper, oral presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: This course is designed to be writing-intensive, as it requires weekly response papers, midterm, and final papers, and blog discussions.

Difference, Power, and Equity Notes: Within the theoretical framework of postcolonial studies, this course examines themes such as: race; Europe and its postcolonial legacy; power imbalances in the current European policies of migration; the urban space of Rome as site of conflictual representations of center/periphery.

Not offered current academic year

GBST 246 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: GBST 246 THEA 246 AMST 249

Secondary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists *do* politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 246 (D1) THEA 246 (D1) AMST 249 (D2)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will

ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

GBST 247 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)

Cross-listings: RUSS 348 SOC 248 GBST 247 RUSS 248 GBST 347 SOC 348

Secondary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, Latvia and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: The course will meet remotely for the most part, although in-person meetings with the appropriate precautions may be arranged at the tutorial partners' and instructor's discretion.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

GBST 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: COMP 273 ENGL 273 GBST 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa

Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

Writing Skills Notes: This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

Difference, Power, and Equity Notes: A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

GBST 281 (S) Contemporary African Politics (DPE)

Cross-listings: GBST 281 PSCI 281

Secondary Cross-listing

This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.

Class Format: A typical class session will be about 60% lecture and 40% discussion

Requirements/Evaluation: Class Participation, Map Quiz, 3 short papers (5 pages)

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 287 (S) Global Sustainable Development

Cross-listings: ENVI 297 GBST 287

Secondary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation: Class discussions; Policy Analysis Paper (5-7 pages); Mid-term exam; Final case study/class presentation (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

GBST 304 (F) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: AFR 335 ENVI 304 GBST 304 HIST 304

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 305 (S) A History of Health and Healing in Africa (DPE)

Cross-listings: HIST 305 AFR 304 GBST 305

Secondary Cross-listing

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will

explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 305 (D2) AFR 304 (D2) GBST 305 (D2)

Difference, Power, and Equity Notes: This course explores transformations in how Africans in the recent past have experienced, practiced and conceptualized health and healing. These transformations have been triggered by the expansion of global biomedicine, new and lethal epidemics, old diseases in changing environments, and new political and economic decisions by policymakers. The history of health and healing in Africa provides a critical lens through which to examine societal imbalances and inequalities.

GBST 312 (F) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: GBST 312 REL 312 ASIA 312 ASST 312 HIST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, response papers/short essays, one final paper

GBST 322 (F) Waste and Value

Cross-listings: ENVI 322 GBST 322 ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

GBST 330 (S) American Political Thought in Hemispheric Context

Cross-listings: PSCI 330 GBST 330

Secondary Cross-listing

Actors living during the Age of Revolutions witnessed an astounding number of social, political, and cultural changes. In the short period between 1775 and 1830 more than thirty popular insurgency movements took control of the American hemisphere, most of them by organizing around the principles of republican politics. In this course, we study the peoples, demands, and visions that comprised the popular movements of the Age of Revolutions to reconstruct the canon *American Political Thought* in hemispheric context. This course emphasizes the comparative features of post-colonial movements in the Americas and centers the contributions of indigenous, raced, gendered, and ethnicized communities. The course schedule is divided into two sections. The first half of the class situates the political and theoretical problems of American Political Thought by engaging with scholarship on post-colonial movements, decolonial thought, democratic theory, and theories of popular rule. The second half of the course contextualizes these frameworks by putting them in conversation with studies of revolutionary change, popular imagination, and case studies on revolutionary movements throughout the Americas. Students are expected to engage in archival research, as well as work with both primary and secondary sources on the Age of Revolutions. The class will meet remotely and hold synchronous discussions.

Class Format: The class will meet remotely for synchronous lecture and discussions. Recorded class sessions will be uploaded for any students who cannot meet synchronously.

Requirements/Evaluation: Regular attendance, consistent class participation, three Glow posts, three two-page reflection papers, and a final research paper of 10-12 pages

Prerequisites: At least one prior course in political theory, social theory, history of the Americas (either the United States or Latin America), or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Concentrators in political theory in Political Science, then majors or concentrators in Political Science, American Studies, Global Studies, and Latino/a Studies

GBST 342 (F) Democratic Erosion

Cross-listings: GBST 342 PSCI 343

Secondary Cross-listing

A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is *not* intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage,

critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

Class Format: As a hybrid course, the class will feature both in-person and online components. I will post 1-2 short lectures on GLOW to accompany assigned readings/media for the week. Our scheduled course time will be a mix of discussions, interactive learning exercises, and presentations. At least one class per week will be held in-person; whether the other class will be online or in-person will depend on a number of factors, including the distribution of students taking the course on campus or remotely.

Requirements/Evaluation: Active Class Participation, 3 Short Response Papers, Country Case Study (15-20 pages, written incrementally throughout semester) and Presentation.

Prerequisites: Prior coursework in political science or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Political Science Majors, Global Studies Concentrators

GBST 344 (S) Capitalism and Racism in the American Context and Beyond: A Global Approach (DPE)

Cross-listings: AMST 345 AFR 353 GBST 344

Secondary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the debate about the texts assigned and regular contribution to the seminar discussions. In-class short oral presentations, weekly short responses reacting to class discussion and texts, and a final research paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 25%; In-class short oral presentations 10%; Final Research Paper (12-15 pages) 40%

Prerequisites: None, open to all.

Enrollment Limit: 20

Enrollment Preferences: American Studies majors, sophomores, and higher

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 345 (D2) AFR 353 (D2) GBST 344 (D2)

Difference, Power, and Equity Notes: This course addresses questions of difference, power, and equity through its examination of domination, racialization, the economics of discrimination, geopolitical and epistemological inequalities at the world-system level. Students will learn how racism and capitalism produce social categories, such as race, ethnicity, and class; how they interact with issues of gender; and how they perpetuate difference, power dynamics, and inequalities across these categories.

GBST 345 (F) Wonderland(s): *Alice* in Translation

Cross-listings: ENGL 365 COMP 345 GBST 345

Secondary Cross-listing

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to *Alice*, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, *Alice* continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's *Alice* as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Requirements/Evaluation: active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE)

Cross-listings: PSCI 351 GBST 351

Secondary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

Class Format: discussion then seminar

Requirements/Evaluation: three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

GBST 352 (F) Politics in Mexico (DPE)

Cross-listings: GBST 352 PSCI 352

Secondary Cross-listing

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.

Class Format: lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

Requirements/Evaluation: map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

Prerequisites: some knowledge of Mexican history

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and seniors

GBST 356 (S) The Myth of Venice and its Modern Aftermath

Cross-listings: COMP 356 ENGL 358 GBST 356

Secondary Cross-listing

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron's *Childe Harold's Pilgrimage*, John Ruskin's *Stones of Venice*, as well as full readings of Thomas Mann's *Death in Venice*, Marinetti's Futurist manifestos, Italo Calvino's *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti's *Senso* and *Death in Venice* and Nicholas Roeg's *Don't Look Now*. This course is offered in English; all texts are provided in translation.

Requirements/Evaluation: mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

Prerequisites: familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

GBST 358 (S) Religion and Law (DPE)

Cross-listings: GBST 358 REL 358

Secondary Cross-listing

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

Requirements/Evaluation: reading response, two essays, final research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 358 (D2) REL 358 (D2)

Difference, Power, and Equity Notes: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

Not offered current academic year

GBST 366 (S) #OutofHaiti: Haiti, Black Sovereignty and the Global Political Economy

Cross-listings: GBST 366 AFR 366

Secondary Cross-listing

In the Western hemisphere, Haiti (Ayiti kreyòl) is a symbol of many extremes related to revolution, impoverishment, governance and institutional sabotage, Black liberation, artistic and cultural achievement, and underdevelopment. This course places Haiti at the center of broad global political economic transformations. Starting from the Haitian Revolution and its reverberations throughout colonial empires to the present, this course will critically interrogate these superlatives and depictions of Haiti. Recent media portrayals of a 'Haitian migrant crisis' at the United States border defy empirical facts, and whitewash imperial misadventures and harm, further exposing a narrative of Haitian anti-blackness that has been pervasive throughout US history. We will unpick these imageries and material realities to consider broader perspectives within historical and contemporary significance of struggles for Black sovereignty and liberation. Taking economic and political history as data sources, documentary films and recent academic, artistic and popular works as starting points for discussion, the course will stir debate and a broader appreciation of the political contributions of civic movements and figures within Haiti and the Haitian diaspora. From the perspective of 'connected Blackness', the course explores how Black peoples' links through global struggles for liberation and freedom and against imperialism emerge today.

Requirements/Evaluation: Journal entries (250 words each); individual essay on documentary film or media (10 pages); research report on a major contemporary social/economic/environmental issue in Haiti (10 pages); "Haiti Black Liberation Space" group public education project on the contemporary importance of Haiti to global Black liberation/ racial justice and a summative reflection on a meaningful aspect of this project (5 pages); class participation (discussion and readings)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over-enrolled, preference to AFR and Global Studies concentrators

SEM Section: 01 TF 2:35 pm - 3:50 pm Keston K. Perry

GBST 367 (S) Decolonizing International Relations (DPE)

Cross-listings: GBST 367 PSCI 367

Secondary Cross-listing

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states--the core foundation of international relations--presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing

recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g. white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g. race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

Requirements/Evaluation: Participation, 3 response/reflection papers, annotated bibliography

Prerequisites: One prior course in International Relations or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Juniors and Seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 367 (D2) PSCI 367 (D2)

Difference, Power, and Equity Notes: This class encourages students to recognize the power dynamics inherent within, and reproduced by, the study of International Relations as structured by traditionally dominant paradigms. This class provides students with the tools to critically identify, decenter, and deconstruct dominant lenses as well as the opportunity to engage with, and apply, an inclusive approach centering a more expansive range of theoretical perspectives and knowledge production.

Spring 2022

SEM Section: 01 TF 1:10 pm - 2:25 pm Elizabeth Iams Wellman

GBST 369 (S) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: GBST 369 HIST 306 COMP 369 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: Course will be offered remotely.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10 -pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 369 (D2) HIST 306 (D2) COMP 369 (D1) ARAB 369 (D1)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

Not offered current academic year

GBST 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation (DPE) (WS)

Cross-listings: ARAB 370 GBST 370 COMP 370

Secondary Cross-listing

Departing from the Arabic notions of *takaful* and *taddamun* as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

Requirements/Evaluation: Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minute oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 370 (D1) GBST 370 (D2) COMP 370 (D1)

Writing Skills Notes: Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

Difference, Power, and Equity Notes: South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

Spring 2022

GBST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean (DPE) (WS)

Cross-listings: GBST 391 ASST 391 ASIA 391 HIST 391

Secondary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Requirements/Evaluation: class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: history majors and students with demonstrable interest in maritime/Indian Ocean history

Expected Class Size: 10-12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 391 (D2) ASST 391 (D2) ASIA 391 (D2) HIST 391 (D2)

Writing Skills Notes: Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

Difference, Power, and Equity Notes: This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

GBST 412 (F) Gandhi: History, Ideas and Legacy (WS)

Cross-listings: REL 412 LEAD 412 ASIA 412 ASST 412 GBST 412 HIST 496 LEAD 322

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

GBST 420 (F) Architecture and Sustainability in a Global World (WS)

Cross-listings: ARTH 420 GBST 420 ENVI 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: This course will be taught in a hybrid mode, with both online (lecture) and in-person (discussion) elements.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

GBST 480 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: HIST 480 GBST 480 AFR 381

Secondary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of

media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

CLASSICS (Div I)

GREEK

Chair: Professor Edan Dekel

- Nicole G. Brown, Assistant Professor of Classics
- Kerry A. Christensen, Garfield Professor of Ancient Languages
- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; affiliated with: Religion Department
- Sarah E. Olsen, Assistant Professor of Classics; on leave 2021-2022
- Amanda R. Wilcox, Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department's faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

Route A: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

Route B: (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

Classics Colloquium: All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.

Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department's faculty are always available to advise students, the chair has materials to share, and students can visit the department's website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

CLGR 101 (F) Introduction to Greek

This full-year, intensive course presents the fundamentals of ancient Greek grammar, syntax, and vocabulary. While finishing the formal study of the language in the second semester, students begin reading prose and poetry of the classical period, usually works by Xenophon and Euripides.

Requirements/Evaluation: frequent quizzes, tests, and a final exam

Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: no pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Fall 2021

LEC Section: 01 MWF 11:00 am - 12:15 pm Kerry A. Christensen

CLGR 102 (S) Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: Greek 101-102 is being offered as a hybrid course. It is designed so that any student may enroll and thrive regardless of their location or mode of participation--on-campus and taking the class in person or studying remotely from any location. Students who will be taking the class remotely are encouraged to consult with the instructor about their circumstances.

Requirements/Evaluation: frequent quizzes, tests, and a final exam

Prerequisites: CLGR 101 or permission of department

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: no pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

CLGR 201 (F) Intermediate Greek

We will be reading selections from Hesiod's *Theogony* and Plato's *Republic*, combined with grammar review. While the primary goal of this course is to develop fluency in reading Greek, we will also consider the literary and cultural significance of our texts, exploring issues such as archaic conceptions of the gods and cosmos, Greek poetic forms of expression, the transition from archaic to classical thought, and literature in the life of the polis.

Requirements/Evaluation: Evaluation will be based on classroom participation, quizzes, tests, and a final exam.

Prerequisites: CLGR 101-102 or two years of Greek in secondary school

Enrollment Limit: 12

Enrollment Preferences: Classics majors and intended Classics majors

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Kerry A. Christensen

CLGR 401 (S) Homer: The Iliad

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Iliad* in Greek and the entire epic in translation.

Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 402 (S) Homer: The Odyssey

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Odyssey* in Greek and the entire epic in translation.

Requirements/Evaluation: class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2022

SEM Section: 01 MR 1:10 pm - 2:25 pm Amanda R. Wilcox

CLGR 404 (S) Tragedy

This course will focus on reading, in Greek, a complete tragedy by Sophocles or Euripides. It will thus improve your ability to read and analyze Greek poetry in a variety of styles and meters. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Requirements/Evaluation: contributions to class, exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors, students continuing the Greek sequence

Expected Class Size: 13

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 405 (F) Greek Lyric Poetry

This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

SEM Section: 01 MR 1:10 pm - 2:25 pm Edan Dekel

CLGR 409 (F) Plato

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (*Symposium*, *Phaedo*, *Republic*, *Phaedrus*), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week or at a mutually agreed-on time that does not conflict with other course work.

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 414 (F) Thucydides

This course will focus on Thucydides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

Requirements/Evaluation: class preparation and participation, a midterm exam, a final paper, and a final translation exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 6

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

Winter Study -----

CLGR 99 (W) Independent Study: Greek

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

- Scott Wong, Charles R. Keller Professor of History
- Sofia E. Zepeda, Assistant Professor at Williams-Mystic; affiliated with: History Department

GENERAL STATEMENT OF GOALS

The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students' intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students' ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

COURSE NUMBERS

The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The

different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.

First-Year Seminars and Tutorials (102-199): These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student's work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

First-year seminars and tutorials can be counted toward the History major and used to meet the department's group and concentration requirements.

Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.

Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

Advanced Tutorials (480-492, 495): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student's essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

Africa and the Middle East: 102-111, 202-211, 302-311, 402-411

Asia: 112-121, 212-221, 312-321, 412-421

Europe and Russia: 122-141, 222-241, 322-341, 422-441

Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451

United States: 152-191, 252-291, 352-387, 452-471

Transnational/Comparative: 192-199, 292-299, 388-396, 472-479

ADVISING

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department's administrative assistant.

THE MAJOR

The major consists of at least nine semester courses as follows:

Required Courses in the Major

One Major Seminar (History 301)

At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

Elective Courses

Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:

Group A: The History of Africa

Group B: The History of Asia

Group C: The History of Europe and Russia

Group D: The History of Latin America and the Caribbean

Group E: The History of the Middle East

Group F: The History of the United States and Canada

Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.

Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member's agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department's assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department's Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students' continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the

year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department's thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on "Historiography: Tacitus to Weber" that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department's administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. I'm not quite sure that I understand what "type" means here—the courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None recently.

HIST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)

Cross-listings: AFR 104 HIST 104

Primary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: active participation in discussion, map quiz, 2 short papers (3-5 pages), presentation, and one research paper (8-12 pages)

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 15

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 104 (D2) HIST 104 (D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

HIST 109 (S) The Iranian Revolution (DPE) (WS)

Cross-listings: HIST 109 ARAB 109

Primary Cross-listing

The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah

Muhammad Reza Pahlavi Shah, and how Khomeini's vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran's geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

Prerequisites: No prerequisites.

Enrollment Limit: 10

Enrollment Preferences: First Years and Sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 109 (D2) ARAB 109 (D2)

Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

HIST 110 (S) The Veil: History and Interpretations (DPE) (WS)

Cross-listings: HIST 110 WGSS 110 ARAB 215

Primary Cross-listing

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 110 (D2) WGSS 110 (D2) ARAB 215 (D2)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

HIST 111 (F) Movers and Shakers in the Middle East

Cross-listings: ARAB 111 HIST 111 LEAD 150

Primary Cross-listing

This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

Requirements/Evaluation: class participation, short essays, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

HIST 115 (F) The World of the Mongol Empire (WS)

Cross-listings: HIST 115 ASIA 115 ASST 115

Primary Cross-listing

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler's accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

Requirements/Evaluation: active participation in discussion, several short papers, and a final research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

HIST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: GBST 117 HIST 117 ASIA 117

Primary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites: First years and sophomores only

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar.

Expected Class Size: 12-15

Grading: no pass/fail option, no fifth course option

HIST 121 (F) The Two Koreas (WS)

Cross-listings: HIST 121 ASST 121 ASIA 121

Primary Cross-listing

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 121 (D2) ASST 121 (D2) ASIA 121 (D2)

Writing Skills Notes: In this tutorial, students receive substantial feedback from the professor (and from their partner) both in the sessions and in written comments about all aspects of their writing--argumentation, structure, mechanics. Such feedback is offered on five papers (of 5-7 pages in length) that they write over the course of the semester; they can also elect to receive comments on their final, synthetic paper (12-15 pages in length). Significant guidance is also given on the paper-writing process.

HIST 130 (S) Rioting in British History (WS)

Since scholars in the twentieth century turned from the bird's to the worm's-eye view of the past, scholarship on rioting and crowd actions has grown. Exploring rioting in the history of modern Britain allowed researchers a chance to learn about the values, priorities, and tactics of people not previously centered in the historical record. It also created space to raise questions about what makes something a riot and how visions of public order shape military or police responses to those riots. In this course, we will examine the causes, strategies, and consequences of riots from the 1780s to the 1980s, from bread riots to the Brixton riots. We will also develop our own definitions of what qualifies as a riot, interrogating why our present definitions may differ from those in the past. While this course is rooted in the "classic" studies of British riots, to give students a strong sense of disciplinary practices and traditions, it also allows space to see how cutting-edge scholarship has expanded the discipline. "Rioting in British History" is a remote, synchronous online history seminar designed for first- and second-year students, particularly those interested in the discipline of history. In addition to exploring the theme of rioting in great depth, this course will also provide students the chance to grow as researchers and writers. By the end of this course, students will have developed the ability to analyze and evaluate works of history, identify the kinds of primary sources necessary to answer their historical questions, and write history papers that show their ability to identify and analyze relevant scholarly works and primary source materials. Since this is a writing-intensive course, students should expect to conduct peer evaluations of their writing assignments and will get consistent feedback on their writing assignments from the instructor.

Class Format: This is a remote class with synchronous meetings held over Zoom.

Requirements/Evaluation: Students will have regular reading assignments, averaging around 50 pages per week. Students will complete four unit response papers and one 10-12 page research paper.

Prerequisites: First-year or sophomore standing--juniors and seniors with permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: First-year students will be given preference, followed by sophomores who have not yet taken a 100-level seminar.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will complete four unit response papers, two of which will receive peer evaluation and feedback in class before being revised and submitted. All papers will receive feedback from the professor. Students will also complete a 10-12 page final research paper which they will develop over the course of the semester, including a rough draft workshop.

HIST 134 (F) The Great War (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for Eastern Europe and the Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; one revised paper.

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Bi-weekly 5- to 7-page papers; one formal paper revision. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

Requirements/Evaluation: attendance and participation; three short analytical papers; a final research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 137 (F) Victorian Britain and the Anglo-Afghan Wars (WS)

Long before the US and its allies fought the recent war in Afghanistan (2001-2021), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the Second (1878-1881) generated considerable domestic discord, and the Third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of the wars Britain fought in Afghanistan, and the reasons for them, but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

Requirements/Evaluation: Evaluation will be based on regular and continuous participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and various shorter exercises leading up to a final research paper (10-12 pages) due at the end of class

Prerequisites: None. First-year or sophomore standing required.

Enrollment Limit: 19

Enrollment Preferences: First-year students, and then sophomores who have not taken a 100-level seminar or tutorial in History.

Expected Class Size: 12-16

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two document analyses (750 words each) and two guided research essays (5 pages each), all letter-graded and returned with comments. Also, students will write a final research paper (10-12 pages) in consultation with the instructor; a working bibliography and prospectus, and a rough draft, will be required in advance of submission of the final paper. Students will learn about research and writing skills and will receive timely suggestions for improving their work.

HIST 140 (S) Crime and Punishment in Russian History (WS)

Cross-listings: HIST 140 RUSS 140

Primary Cross-listing

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's *Gulag Archipelago* in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 143 (S) Soccer and History in Latin America: Making the Beautiful Game (WS)

This course examines the rise of soccer (*fútbol/futebol*) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about racial, gender, regional, and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

Requirements/Evaluation: Class participation, a series of short papers, response papers, and a research paper

Prerequisites: First-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: First year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an

application process may be developed to determine admission to the course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write three 3-papers on set topics and an 8-10 page research paper. Revision of the first short paper is mandatory, in response to instructor's comments. Students will receive timely feedback on all pieces of writing and will participate in in-class workshops on the identifying sources, formulating an argument, and presenting a compelling case.

HIST 152 (S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)

Cross-listings: HIST 152 WGSS 152

Primary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to those who have been dropped from this class previously, then to first-years, then to sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 152 (D2) WGSS 152 (D2)

Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

Not offered current academic year

HIST 155 (F) School Wars (WS)

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us

understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Prerequisites: first-years or sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 156 (F) The Manifesto in U.S. Politics (WS)

Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many radical American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across three different historical junctures in the U.S. -- the Revolutionary era, the 1830s and 1840s, and the 1960s and early 1970s -- focusing in particular on struggles over racial equality and women's rights.

Requirements/Evaluation: participation; three graded essays (3-5 pages each), handed in as drafts, given comments, and with time for revision; 3-5 very short, ungraded assignments on course content and about library research; one manifesto (any length) and a final reflection paper (3-5 pages).

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate between doing short graded and ungraded assignments in the first 8-10 weeks of the class: the 3 graded assignments (varying length, but no more than 7 pages maximum) each will involve a draft, and then a revision based on instructor comments; the ungraded assignments will be either informal, analytical responses to the reading; short, creative responses; or discussion questions. Students will also each write a manifesto and a short, final reflection paper.

HIST 158 (S) North of Jim Crow, South of Freedom (DPE) (WS)

Cross-listings: HIST 158 AFR 158

Primary Cross-listing

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs--all with an eye toward scrutinizing the freedom struggle in its northern variety.

Requirements/Evaluation: Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 158 (D2) AFR 158 (D2)

Writing Skills Notes: Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

HIST 159 (F) Crossing the Color Line: A History of Passing (DPE) (WS)

Cross-listings: AFR 159 HIST 159

Primary Cross-listing

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 159 (D2) HIST 159 (D2)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

HIST 162 (S) Unfamous Women, USA (DPE)

How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters. We will read social and cultural U.S. women's history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Tutorial pairs will spend at least one week investigating sources in the Chapin Library and perhaps looking at visual art at Williams College Museum of Art.

Requirements/Evaluation: students will write papers (4-6 pages) roughly every other week, students will also write one page critiques, students will make a formal oral presentation one week

Prerequisites: first-years and sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course investigates women whose lack of political, economic and cultural power has persisted into the historical record. We will consciously think and write about the role of historians in recovering lives and stories. How much of someone's story can we really tell? How far should historians go in deploying peoples scanty records to make an intellectual argument?

HIST 163 (S) From Wampum to Phillis Wheatley: Communications in Early America (DPE) (WS)

How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: Remote course. Class will meet synchronously on Zoom once per week for group conversation, with additional time devoted to Glow discussion posts and other activities. Students are encouraged to virtually meet with the instructor one-on-one to work on writing and projects.

Requirements/Evaluation: active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course delves into histories and experiences of diverse early Americans, including substantial focus on Native American/Indigenous and African/African American peoples. It introduces students to foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories, along with critical vantages on Euro-American settler colonialism and the complex entanglements that arose in multiracial communities.

HIST 165 (F) The Age of McCarthy: American Life in the Shadow of the Cold War (WS)

The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by a intensifying Soviet-American rivalry abroad coupled with dramatic Red baiting and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Sputnik and the space race, and links between the Cold War and Civil Rights. Using scholarly books and articles, primary sources, novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

Requirements/Evaluation: class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write several short essays (2-4 pages each) as well as a final research paper (10-12 pages). Over the course of the semester, students will submit a research proposal as well as several working drafts of the final research paper. These drafts will be discussed in small group workshops, including the professor. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 166 (F) Cold War Films (WS)

This history tutorial utilizes popular film as a vehicle to explore American Cold War culture. The Cold War was an intense period of political, ideological, cultural, and military struggle between the United States and the Soviet Union that took place after the Second World War. For every nuclear test, arms sale, or military operation, there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life--communism and capitalism; totalitarianism and democracy--an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. Given the vast cultural influence of movies, film during this era served as a vital ideological battleground. Moreover, cinema offers us a window into the cultural landscape of Cold War America, for film reflects, interprets, and shapes national identity in complex ways. The films examined in this course (for the most part, Hollywood productions from the mid-1940s to the mid-1960s) serve as unique historical documents and as cultural texts illuminating the ways filmmakers and audiences negotiated the challenges presented by the Cold War struggle. The films assigned for this course focus on a range of topics, including anticommunism, competing visions of Americanism, religion, the Hollywood Ten, J. Edgar Hoover and the FBI, the nuclear arms race, brainwashing, gender, race relations, and the eventual unravelling of the Cold War consensus. The historical analysis of film requires not only a close reading of the movies themselves, but also a clear understanding of the historical context in which they appeared. The readings paired with each film will help to clarify this context and offer interpretations of the films with which we will engage.

Requirements/Evaluation: Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. These writing assignments will be evaluated alongside preparedness for and performance in tutorial discussions.

Prerequisites: None, open to all students.

Enrollment Limit: 10

Enrollment Preferences: First and second year students will be given priority. If the course is overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. They will receive feedback on each of these papers--in writing and in person--from both the professor and their tutorial partners. Throughout the semester these writing assignments will total 25-30 pages.

HIST 167 (S) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AFR 167 HIST 167 AMST 167

Primary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 167 (D2) HIST 167 (D2) AMST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement."

HIST 205 (F) The Making of Modern Africa (DPE)

Cross-listings: AFR 203 HIST 205

Primary Cross-listing

This course traces the incorporation of Africa into an expanding global world from the middle of the 19th century to the present and examines the impact of this integration on the history of African cultures and modern nation states. It is designed to provide you with an introductory understanding of the economic, social, and political forces that have shaped Africa in recent times and continue to affect the lives of individual people across the continent. Over the course of the semester you will be introduced to major historical themes in African History from the past 150 years, including the abolition of the slave trade and its effects, African states in the 19th century, the growing integration of different regions into shifting global and economic systems, European colonization, and African resistance to imperial conquest. We will also explore the emergence of the nationalist and anti-colonial movements, and Africa's post-colonial experiences of self-governance. Within these broad historical processes, the class will cover additional key themes such as religious change and the role of Western missionaries; changing gender roles; environmental exploitation and change; the emergence of the developmental state; urbanization; military dictatorships, and war and violence in the late 20th century. We will also cover some of the issues surrounding the study of African History as a discipline. This is a challenging task as no single course can cover more than a silver of the complexity and variety of the continent. This is why we approach the study of Modern African History through a comparative prism.

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and a case study paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 203 (D2) HIST 205 (D2)

Difference, Power, and Equity Notes: This course will introduce students to how modern Africans have contended with powerful forces that have deeply affected the continent. It will examine how different societies on the continent -- in different environments and circumstances -- devised solutions to the challenges of the day. All of the readings, discussions, and assignments will ask students to center and insert African voices into histories fraught with misrepresentations.

HIST 208 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 REL 234 GBST 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 211 (S) Understanding 9/11 and the War in Iraq (DPE)

Cross-listings: HIST 211 ARAB 211

Primary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

Requirements/Evaluation: short online writings and papers and a final project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

HIST 213 (S) Modern China, 1600-Present

Cross-listings: HIST 213 ASIA 213

Primary Cross-listing

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

Requirements/Evaluation: class participation, two short papers, two essays, a midterm and a self-scheduled final exam

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: open to all; preference to History or Asian Studies majors only if overenrolled

HIST 214 (F) Foundations of China

Cross-listings: REL 218 ANTH 212 GBST 212 HIST 214 ASIA 211 CHIN 214

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

HIST 217 (F) Early Modern Japan

Cross-listings: ASIA 217 HIST 217 ASST 217

Primary Cross-listing

Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

HIST 218 (F) From Crises to Cool: Modern Japan, 1850s-Present

Cross-listings: ASIA 218 HIST 218

Primary Cross-listing

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese people from factory workers and farmers to politicians and intellectuals have understood, shaped, and lived the upheavals from the 1850s through the present day. And it will examine how the country of Japan as well as individual Japanese people have defined the identities and meanings of "modern Japan." We will ask why a modernizing revolution emerged out of the ashes of the early modern order; what democracy and its failures wrought; how world war was experienced and what legacies it left in its wake; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual treatises, fiction, films, and oral histories.

HIST 220 (S) History and Society in India and South Asia: c. 2000 to 1700s CE

Cross-listings: HIST 220 ASIA 222

Primary Cross-listing

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the urban Indus Valley civilization to the end of the Mughal Empire and will address topics such as the origins and development of the caste system and 'Hinduism', society and culture in the great epics like the *Ramayana*, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Class Format: lecture-discussion

Requirements/Evaluation: class participation, response papers and presentation, 2 essays, mid-term and a final exam

Prerequisites: none; open to all

HIST 221 (F) The Making of Modern South Asia: 1750-1950 CE

Cross-listings: ASST 221 HIST 221 GBST 221 ASIA 221

Primary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

HIST 222 (S) Greek History

Cross-listings: HIST 222 CLAS 222

Secondary Cross-listing

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest contacts with eastern cultures, and will conclude with the spread of Greek influence into Asia and the transformation of Greek culture through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the continuous influence of contacts as well as conflicts with non-Greeks, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, occasional short-writing exercises, a midterm, a final exam, and a medium-length

essay.

Prerequisites: none; open to all

Enrollment Limit: 25

Enrollment Preferences: Students majoring in Classics, History, and Art History, first-year students and sophomores.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 223 (S) Roman History

Cross-listings: CLAS 223 HIST 223 LEAD 223

Secondary Cross-listing

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

Class Format: This course will be taught in hybrid mode. Assignments will consist of readings, case studies, short writing assignments and student-led discussions both in-class and via GLOW. Some elements will be offered asynchronously and/or optionally depending on the needs of students studying remotely. Please email the instructor with any questions you have about the structure or nature of the class or about what to expect if you are studying remotely.

Requirements/Evaluation: Class preparation and participation, several short response papers, one longer 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better at the end of the semester may substitute a 10 to 15-page research paper for the final exam.

Prerequisites: None; open to all

Enrollment Limit: 20

Enrollment Preferences: Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

HIST 226 (F) Early Modern Europe

The three hundred years from the late Middle Ages to the French Revolution were Europe's formative centuries: they saw the emergence of the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and intensification of trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Readings will emphasize primary sources and include such authors as Machiavelli, Montaigne, Hobbes, Aphra Behn, Voltaire, and Mary Wollstonecraft.

HIST 228 (S) Europe in the Twentieth Century

This course will offer a survey of some of the important themes of twentieth-century European history, from the eve of World War One to the beginning of the twenty-first century. Organized topically and thematically, the course will consider European society in the fin-de-siècle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the "economic miracle" of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; the break-up of Yugoslavia; and the recent debates about Islam in Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

Class Format: the class will be taught primarily by discussion with several lectures operating to frame those discussions

Requirements/Evaluation: regular attendance and class participation, six or seven in-class quizzes, two 6-8 page interpretive essays, and a take-home final examination

Prerequisites: none; open to all

HIST 230 (F) Modern European Jewish History, 1789-1948

Cross-listings: HIST 230 JWST 230

Primary Cross-listing

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and fiction.

Class Format: discussion

Requirements/Evaluation: class participation, two papers, and a final exam

Prerequisites: none

HIST 240 (S) The Soviet Experiment

Cross-listings: RUSS 240 HIST 240

Primary Cross-listing

In 1917, the former Russian Empire became the site of the world's first socialist revolutionary government and the twentieth century's largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history's most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects' and leaders' policies left both at home and abroad, and the impact it had on the people who lived and didn't live to tell the tale.

Class Format: Format: seminar; Each week, students will watch a pre-recorded asynchronous lecture that will provide context for the readings due that week. Students will be assigned to a small group of no more than 8 students which will "meet" with the instructor for a weekly, tutorial-style discussion on Zoom.

HIST 241 (F) Imperial Russia: State and Society between Europe and Asia

Cross-listings: RUSS 241 HIST 241

Primary Cross-listing

Russia. The name alone evokes wonder, fear, romance, and history itself. Over the past ten centuries, the territory that we now call the Russian Federation has witnessed dramatic transformations that underwrote its transition from feudal backwater to global superpower. Its journey from tribalism to imperialism, feudalism to autocracy, agrarianism to industrialization, monarchism to parliamentarianism, Orthodox Christianity to revolutionary atheism, left a mark not just on the collective Russian conscious, but on a world that has grown accustomed to viewing Russia as a site for ideas, projects, and processes both exemplary and tragic. How did Russian state power borrow and depart from west European norms? How did foreign and domestic norms contribute to the creation of a "Russian" identity? How did Russian elites and ordinary people resist, collaborate with, or develop an apathy towards the Russian state, and to what success? This course will seek to answer these questions through a survey of Russian Imperial history from its founding in Kievan Rus' in the 10th century to the October Revolution of 1917.

Class Format: Each week, students will watch a pre-recorded asynchronous lecture that will provide context for the readings due that week. Students will be assigned to a small group of no more than 5 students which will "meet" with the instructor for a weekly, tutorial-style discussion on Zoom.

Requirements/Evaluation: class attendance and participation, two short papers (3-5 pages), ~80 pages of reading a week, one take-home midterm exam essay and one take-home final exam essay

HIST 242 (F) Latin America From Conquest to Independence

This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groupings to huge imperial polities-, before 1492, to the invasion of Europeans from that date forward, we will take up the question of the Iberian "conquest," looking at the often violent encounters that made up that event and analyzing its success, limits, and results. We will then study the imposition of Iberian rule from the point of view of would-be colonizers and the peoples they treated as objects of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural, political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in--and perhaps consisted of--the most normal elements of daily life in northern Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the semester.

HIST 248 (S) The Caribbean: From Slavery to Independence

Cross-listings: HIST 248 AFR 248

Secondary Cross-listing

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley 'Revolt' in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

Requirements/Evaluation: class participation, a mid-term and final paper, and a 10-12 page research paper

HIST 253 (S) Modern U.S. History

This course surveys themes and issues that inform the historical landscape of the United States after the Civil War and Reconstruction, from the late 1800s to the present. With special attention to freedom and fragmentation, the course examines the dilemmas inherent to American democracy, including: westward expansion and Indian affairs; immigration and nationalism; progressivism and domestic policy; the expanding role of the United States in the world; race, gender, and rights; and the shifting terrains of liberalism and conservatism. The course also tunes into the connections between current affairs and the American past. Course materials include a range of primary sources (letters, political speeches, autobiography, film, oral histories, fiction, and photography) and historical interpretations.

Requirements/Evaluation: a combination of quizzes, short papers, and a final exam or final paper

Prerequisites: none; open to all

HIST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: HIST 254 AMST 254 LEAD 254

Primary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

Class Format: Remote class. Class will blend short pre-recorded lectures with weekly Zoom discussion sections/seminar format, plus time for virtual one-on-one conversations with the instructor.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, (virtual) museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History or American Studies majors, followed by first- and second-year students

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

HIST 255 (S) From Sand Creek to Standing Rock: Recent Native American Histories (DPE)

This course surveys Native American/Indigenous histories from the era of the U.S. Civil War to the present as well as future. Beginning with the violences experienced by Native communities at Sand Creek in 1864, it traces how diverse Native nations navigated the tumultuous times that followed, up to the recent actions at Standing Rock and Mauna Kea in the 21st century. Topics include Indigenous perspectives on "modernities"; creation and contestation of reservation systems; connections with African-American families and communities; residential school experiences of Native youth and families; Indigenous visual and performative artistic traditions and transformations, both in North America and abroad; "urban Indians" and the relocation era; Red Power activism and Indigenous internationalism; treaty rights, American Indian Law, and federal recognition debates; environmental interventions and food sovereignty movements; and critiques of settler colonialism. The course stresses the resilience of sovereign Indigenous nations into the present, and introduces students to a wide range of methodological approaches from Native American and Indigenous Studies and history. It blends big-picture vantages on these topics with microhistorical accounts of particular individuals, communities, and events, and offers a continental view of historical changes coupled with attention to the specific area of the Native Northeast in which Williams College is situated.

Class Format: Remote course. Class will meet synchronously on Zoom once per week for group conversation, with additional time devoted to Glow discussion posts and other activities. Students are encouraged to virtually meet with the instructor one-on-one to work on writing and projects.

Requirements/Evaluation: class discussion, reading responses, short analytic essays, archival/object analysis, final essay

Prerequisites: Hist/AmSt 254: Native American Histories to 1865 is good preparation for this course, but is not required.

Enrollment Limit: 15

Enrollment Preferences: History and American Studies majors; then first- and second-year students from any major

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

HIST 256 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AFR 257 AMST 256 HIST 256

Secondary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a

final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

HIST 257 (F) Religion and American Politics

Cross-listings: REL 217 HIST 257

Secondary Cross-listing

In this course, students will explore the history of religion and American politics, from the colonial era to the present. In the process, they will tackle such questions as: Were Anglo-American colonies 'cities on a hill' or bastions of intolerance? Was the First Amendment designed to protect the state from religion, or religion from the state? Has American religion primarily served to justify the *status quo* or inspire revolutionary change? How have religious ethics shaped responses to racial, gender, and class inequality? How has religious conflict impacted civic unity and political polarization? What role *should* religion play in American political life? The course will cover such topics as: Anglo-colonial treatment of heretics and blasphemers; the meaning of the First Amendment; religious conflict over slavery; state regulation of sexuality and polygamy; state treatment of religious minorities; the Scopes Trial and scientific modernity; Christian responses to industrial capitalism; theologies of civil disobedience and nonviolence; and 20th-century religious battles over school prayer, civil rights, the military draft, abortion, and democracy itself.

Requirements/Evaluation: Class participation; five informal response papers (350-450 words); two unit papers (4-6 pages); final paper (8-10 pages).

Prerequisites: None; open to all students.

Enrollment Limit: 20

Enrollment Preferences: Religion and History majors, in order of descending seniority.

HIST 258 (S) The Petroleum Age: A Global History

We live in a world transformed by petroleum. All around us today--in global carbon emissions, transportation, the clothes we wear, everyday objects we touch, microplastics in our water--oil is there, even if we can't always see it. At the same time, the industry fuels massive flows of global capital, and provokes critical political shifts, conflicts, and resistance movements around the world. How did oil's ubiquity happen in just over 150 years? This course will chart a global, modern history by keeping this energy source always in our sight, paying particular attention to its role in the political

economy, its ecological impacts, the cultural changes it has set in motion, and its place in people's material lives. Throughout the semester, we will also foreground some of the foundational skills needed to create an historical account, which will culminate in students' completing a 5-minute video or podcast on a relevant topic of their choice.

Class Format: While this class will include brief lectures, it will largely revolve around discussion. Students do not need any experience in making videos or podcasts to enroll in the class.

Requirements/Evaluation: participation; two short graded essays (3-5 pages); two short ungraded essays (2-3 pages); short research assignments (1 page each, ungraded); final video or podcast project (graded); 24-hour take-home exam.

Prerequisites: none

Enrollment Limit: 30

HIST 260 (S) U.S. History Since the 1940s

This course surveys the history of the United States since the 1940s. It will acquaint students with the key developments that defined the postwar order, focusing especially on the history of inequality, politics and public policy, social movements, and intellectual life. As students make their way through the course, they will learn to think historically in the broadest sense--situating texts within their social context, engaging with diverse and unfamiliar perspectives, and gaining an appreciation for the complexity of human experience. In the process, students will tackle historical questions

with contemporary relevance. What forces have made American society more or less equal, and how should equality be measured in the first place? How have race, class, and gender affected opportunities and outcomes for different Americans over time? To what extent have everyday people shaped the broader history of American capitalism, democracy, and social thought? To what extent have these broader developments shaped the lives of everyday people? Are we now living in an age of fracture or an age of liberation? The course will cover such topics as Cold War culture; the mass consumer economy; racial inequality, both Southern and Northern; the changing role of women at home and in the workplace; the global dimensions of the 1960s; the origins of the New Right; and the roots of modern polarization in conflicts over such issues as--busing, abortion, and privatization.

Requirements/Evaluation: attendance and participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (10 pages max)

Prerequisites: none, open to all students

Enrollment Limit: 40

Enrollment Preferences: History majors or students with a demonstrated interest in U.S. History

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 261 (F)(S) America and the Cold War

Cross-listings: HIST 261 PSCI 262 LEAD 262

Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

Enrollment Limit: 19

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

HIST 263 (F) The United States and the World, 1898 to the Present

Cross-listings: LEAD 261 HIST 263

Primary Cross-listing

This survey course examines the United States and the World since 1898. Students will be introduced to key diplomatic developments since the Spanish-American War, when the country began its ascendance to hegemonic power from which it is now in retreat. American power reached its apex during the Cold War, but that conflict and its offshoots like the Vietnam War brought about crises over national identity and values that remain unresolved. Readings and discussions will focus on issues of ideology, empire and neo-imperialism, domestic politics and foreign policy, and the relationship between culture and foreign relations.

Class Format: discussion

Requirements/Evaluation: class participation, pop quizzes, short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first- and second-year students, then History majors

Expected Class Size: 25-30

Grading: yes pass/fail option, yes fifth course option

HIST 264 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Secondary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

HIST 265 (F) Race, Power, & Food History (DPE)

Cross-listings: HIST 265 ENVI 246 AMST 245

Secondary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

HIST 266 (F) The Roaring Twenties and the Rough Thirties

Cross-listings: AMST 267 HIST 266

Primary Cross-listing

This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America's evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.

Class Format: This course will be taught remotely and will feature both asynchronous and synchronous instruction. Virtual course meetings will revolve around synchronous discussion and remote learners will be expected to attend class regularly and participate actively in each session held via Zoom (or a similar platform).

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

HIST 270 (F) Sport and the Global Color Line (DPE)

Cross-listings: LEAD 270 HIST 270 AFR 270

Primary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format: Lecture and discussion.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites: None.

Enrollment Limit: 40

Enrollment Preferences: Open to all students with completion of course admission survey if overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 273 (F) Going Nuclear: American Culture in the Atomic Age

Cross-listings: SOC 224 HIST 273

Secondary Cross-listing

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, and the destructive effects of the bomb's initial use in Hiroshima and Nagasaki and ongoing testing in the Marshall Islands. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Preference given to sociology and history majors.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

HIST 274 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 ENVI 247 AFR 234 HIST 274

Secondary Cross-listing

This sequential course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global and Caribbean studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

HIST 275 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 AMST 235 HIST 275 GBST 235 ENVI 253

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). HIST 280 (S) Emancipation to BlackLivesMatter

Cross-listings: AFR 280 HIST 280 LEAD 280

Primary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

HIST 281 (S) African American History, 1619-1865

Cross-listings: AFR 246 HIST 281

Primary Cross-listing

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Requirements/Evaluation: class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first- and second-year students

HIST 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present (DPE)

Cross-listings: LATS 286 HIST 286

Secondary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format. It will be offered in a "hybrid" format with synchronous class meetings and group discussion sections, offered in-person and remote.

Requirements/Evaluation: Class participation with short 1-2 page writing assignments; two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

HIST 292 (F) History of Sexuality

Cross-listings: REL 241 HIST 292 GBST 241 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect

changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation: reading responses, two essays, and final research paper

Prerequisites: none

HIST 301 (F) Approaching the Past: History, Theory, Practice

This course will explore how the discipline of "History" has come to assume its present form and how a number of historians since the 1830s have understood their craft. We will begin by discussing the work of three great nineteenth-century historians (Macaulay, Marx, and Ranke) who believed that historical "truth" existed and could, with skill, be deciphered. Next we will explore the philosophy and practice of the cultural and social historians of the 1960s-1980s, comparing and contrasting their work with that of their nineteenth-century predecessors. We will then consider the writing of those more recent theorists who have tried to refute historians' claims to be able to capture the "truth" of the past, focusing on the state of the field in the wake of challenges posed to its epistemological foundations by postmodernism in the 1980s and 1990s. Finally, we will conclude with an assessment of the state of the discipline today. In general, we will be less concerned with "the past" than with what historians do with "the past." Consequently, we will focus primarily on those abstract, philosophical assumptions that have informed the various practices of history from the 1830s to the present.

Class Format: discussion

Requirements/Evaluation: class participation, a 250-word position statement ("What is History?"), two 8- to 10-page interpretive essays, and a take-home final exam

Prerequisites: restricted to History majors and to sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: junior and senior History majors

HIST 301 (S) Approaching the Past: Practices of Modern History

What is history? What is it that historians do? In this course, students will explore how and why we historians practice our craft. The first section of the course will examine how historians think about and come to know the past. Issues of historical truth, fact, and objectivity will be considered. And we will discuss what questions to ask of different types of evidence, from material objects to oral histories. Next, we will explore how historians attempt to make sense of the past. We will consider the perspectives, scale, and categories of analysis that historians can bring to bear on the past, and how history can be written. Finally, the third section of the course will pose questions about the purposes, uses, and misuses of history. We will ask how historians might engage with those outside of academe; what moral and political responsibilities historians should assume; how history is related to memory making; and why history education has been so contentious. Each week, we will focus on some theoretical material as well as readings on a broad range of topics, across time and geography, that concretely illustrate the methodological issues at stake.

Class Format: remote

Requirements/Evaluation: class participation, response papers (500 words), two practicums/short essays (5 pages), and a final project (10 pages)

Prerequisites: restricted to HIST majors and sophomores planning to major in HIST

Enrollment Limit: 15

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

HIST 301 (S) Approaching the Past: Varieties of Historical Thinking

This course is designed to acquaint students with some of the ways historians have thought about the past. Beginning with Thucydides' *The Peloponnesian War*, the work of twelve historians will be studied closely and critically over the course of the semester. In the process, students not only will become familiar with various important historical approaches but will also be encouraged to examine their own assumptions about the past and about how and why--or even if--we know it. We will meet weekly to define, understand, and assess the different ways historians considered in the course have thought about the past.

Requirements/Evaluation: in preparation for class discussion, students are required to produce a one-page reader response to the assigned reading each week, which will form the basis for class discussion. The student's grade is based on these reader responses and participation in class discussion.

Prerequisites: restricted to History majors and sophomores committed to majoring in History

Enrollment Limit: 15

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

HIST 301 (S) Approaching the Past: National, Transnational, and Postcolonial Histories

This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? How do these questions figure into histories of nations, colonialism, and anti-colonialism? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly meetings we will analyze texts and how their authors define historical subjects/actors and processes, as well as the meanings of history for different audiences and eras.

Class Format: remote

Requirements/Evaluation: class participation, 10 short (2-page) papers, final presentation

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 15

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

HIST 301 (F) Approaching the Past: The Historian's Task

What is the historian's task? In this seminar we will consider a variety of answers to this question by looking at how historians have practiced their craft from antiquity to the present. In the first half of the course, we will read historians from across the globe to see how the study of the past has differed across human societies from antiquity until the nineteenth century. What do their approaches have in common, and what distinguishes them? In the second half of the course we will investigate the modern historical tradition from the early twentieth century to the present, including the Annales school, economic and environmental history, microhistory, and subaltern studies. Throughout, we will discuss what lessons we can draw for our own practice as historians. Authors to be read include Herodotus, Ibn Khaldun, Ranke, Bloch, Guha among others.

Requirements/Evaluation: Participation, short papers, presentations, and a longer final paper.

Prerequisites: Restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: The course is designed for junior and senior History majors; sophomores may enroll with instructor consent

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2021

SEM Section: D2 MR 1:10 pm - 2:25 pm Alexander Bevilacqua

HIST 301 (S) Approaching the Past: The American Civil War

How have historians told the story of the Civil War? Even before Lee's surrender at Appomattox Court house in the spring of 1865, historians and local communities strove to craft a coherent story of a war that left 620,000 soldiers dead and set enslaved people on a long road towards freedom. Civil War historiography has been reinvented numerous times in the last century. Biographies of Lincoln, of Generals--Union and Confederate still appear regularly. Historians of gender have tried to capture women's and queer people's experiences on the homefront and on the front lines. Histories of battles, of legislation, of the era's music, literature, and art all fill rows of shelves in Sawyer. We will not attempt to "understand" the Civil War. Rather we will examine a few very different histories of the event. We will read authors who center African Americans and authors who ignore them. We will

read a biography and cultural history. We'll look at new attempts to tell local histories of the war through interactive web sites and film. We'll also study historical re-enactors, North and South. We will end with an examination of the recent struggles over Confederate Memorials. This course will be offered online. I encourage all students to schedule one on one office hour zoom meetings with me throughout the semester.

Requirements/Evaluation: Two presentations, two brief responses, one formal paper and/or a book review, and a final paper.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: senior History majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

HIST 302 (F) Islamic Law: Past and Present

Cross-listings: ARAB 243 WGSS 243 REL 243 HIST 302

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 303 (S) Food in the Middle East: A History (DPE)

Cross-listings: ARAB 303 HIST 303

Primary Cross-listing

In this course we examine the rich culinary history of the Middle East first among the three major religions in the region (Judaism, Christianity, and Islam), then during the time of major Islamic Empires such as the Abbasids and Ottomans, and finally in the modern period. Using an array of primary and secondary sources, we explore the social, religious, literary, and economic place of food. We will study the consumption of an attitudes toward specific foodstuffs, gauging the medicinal and culinary value of spices, the historical taboos against drinking coffee and alcohol, and the dispute over various dishes within modern nationalist constructions. We will also investigate how Middle Eastern peoples from different ethnic, geographic, and religious backgrounds have historically used food to express their distinct cultural, national, and gendered identities.

Requirements/Evaluation: attendance, participation, map exercise, leading discussion, 3 short essays, final paper/research project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: History and Arabic Studies majors, seniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 303 (D2) HIST 303 (D2)

Difference, Power, and Equity Notes: This course explores a variety of themes within Middle Eastern food history and their implications to different religious communities, genders, and/or socio-economic groups, across a large swath of time. Students will be asked to explore these topics in class discussions and writing assignments, using multiple comparative perspectives.

HIST 304 (F) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: AFR 335 ENVI 304 GBST 304 HIST 304

Primary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Class Format: If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section;

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and a take-home final exam.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies. If there's sufficient enrollment, this course will be taught in 2 sections, 1 in-person section and 1 remote section.

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 335 (D2) ENVI 304 (D2) GBST 304 (D2) HIST 304 (D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

HIST 305 (S) A History of Health and Healing in Africa (DPE)

Cross-listings: HIST 305 AFR 304 GBST 305

Primary Cross-listing

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 305 (D2) AFR 304 (D2) GBST 305 (D2)

Difference, Power, and Equity Notes: This course explores transformations in how Africans in the recent past have experienced, practiced and conceptualized health and healing. These transformations have been triggered by the expansion of global biomedicine, new and lethal epidemics, old diseases in changing environments, and new political and economic decisions by policymakers. The history of health and healing in Africa provides a critical lens through which to examine societal imbalances and inequalities.

HIST 306 (S) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: GBST 369 HIST 306 COMP 369 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: Course will be offered remotely.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10 -pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 369 (D2) HIST 306 (D2) COMP 369 (D1) ARAB 369 (D1)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

HIST 307 (F) To Die For? Nationalism in the Middle East (DPE)

Cross-listings: HIST 307 ARAB 307

Primary Cross-listing

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie."

This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East. Some of the more prominent questions that this course will examine include: What is a nation? What are essential characteristics of a nation? Who are a people? Why are people ready to die for the nation? And who is included and excluded in the nationalist narrative? After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Egypt, Israel, Turkey, Iran, and Iraq. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How did traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty.

Class Format: A hybrid course for students who are both on campus and remote. Depending on the number of students, the course will primarily be taught seminar style on campus following appropriate social distancing guidelines or in the tutorial format with a mix of on campus and remote groups. Some class meetings may be remote and asynchronous but this will mostly be a synchronous campus class.

Requirements/Evaluation: There will be several options to fulfill the requirements of this course including a weekly journal, oral exam or a final research paper (12-15 pages).

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors, seniors, and students with a demonstrated interest in the Middle East.

Expected Class Size: 8-10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 307 (D2) ARAB 307 (D2)

Difference, Power, and Equity Notes: This course examines the power of the state to decide who is included and not included in the nationalist

narrative. How does it seek to promote unity and how does it explain differences within and outside of society? Though nationalism can be a very powerful unifying factor, this course will also consider examples where nationalism has the opposite effect.

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

HIST 308 (S) The Nile (DPE)

Cross-listings: HIST 308 ARAB 308

Primary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 308 (D2) ARAB 308 (D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

HIST 309 (S) Fire and Ice: The History of Modern Iceland

How have a few wretched souls been able to survive on a frozen tundra in the middle of the north Atlantic for over 1100 years? This course will explore the curious history of Iceland, a small and unimportant country, that despite, or because of its geographic isolation and lack of any valuable natural resources, has been able to develop a distinct national and cultural identity. What lessons can be drawn from the historical experiences of Icelanders? The course will start with the paradigmatic sagas (Egil's and Njal's Saga) that have played an out-sized role in the development of Icelandic culture. Then we will assess the nation's independence, the impact of the world wars, the building of the modern welfare state, and how the country has fared through economic peaks and valleys. At the end of the semester, students will be able to understand the significance of the following phrases: "Fögur er hlíðin," "Deyr fé, deyr frændr," "Þetta reddast," "dugleg/ur," and "Áfram Ísland." This comprehension is, of course, very practical since 320,000 people understand the Icelandic language.

Requirements/Evaluation: short papers and final project

Prerequisites: none

HIST 311 Women Warriors, Colonial Soldiers, and Slave Armies: Soldiering and Warfare in African History (DPE)

Soldiering is one of the oldest professions in African history. Throughout the continent's long history, ordinary soldiers have risen to become kings, queens, presidents, and held other positions of significance. Soldiers in African history have hailed from diverse backgrounds, ranging from the enslaved to those from the nobility. Notable soldiers in African history have been both men and women. Certainly, in Africa as in other world regions there is a tendency to associate the military profession with men. Yet, there have been famous female military warriors in African history, some of the most famous ones being Queen Nzinga in the seventeenth century; the all-female military units in the kingdom of Dahomey, known for their rigor and being effective fighters; and, more recently, Alice Lakwena who commanded a rebellion that nearly brought down the Ugandan government in the late twentieth century. Some of the other themes which we will explore include how warfare was organized from the precolonial era to more recent times; the impact of changing technologies on warfare and the everyday life of armed soldiers; colonial conquest and the soldiers who fought for Europeans and those who resisted; recruitment criteria during the colonial period, and colonial military identities; service in the military as labor and rebellions and mutinies over pay and work conditions; the army and nationalism. Throughout the course we will challenge the enduring Western image and stereotype of Africa as a violent place by focusing on a) the changing conditions that have pushed individuals and communities to go to war, and b) by examining how Africans have initiated and resolved conflict. Students will analyze a variety of resources including soldiers' biographies, films, oral traditions, and archival sources that will help them to come up with their own arguments about the role of the soldiers and the military in Africa.

Requirements/Evaluation: active participation in discussion, map quiz, response papers, a short analytic paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 20

Grading:

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines the critical questions of how and why Africans have waged military campaigns, and how they have inspired others to join them. From the pre-colonial era to the present, all forms of military action in Africa were in many respects expressions of societal imbalances based on ethnicity, race, gender, generation, and class.

HIST 312 (F) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: GBST 312 REL 312 ASIA 312 ASST 312 HIST 312

Primary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, response papers/short essays, one final paper

HIST 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings: HIST 314 ARTH 314 ASST 314 ASIA 314

Primary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

Requirements/Evaluation: class participation and weekly responses to readings, 4-5 short papers and a final paper

Prerequisites: students who have previously taken HIST312 will not be permitted to take this course; no other prerequisites

Enrollment Limit: none

Enrollment Preferences: graduating seniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 318 (F) Nationalism in East Asia

Cross-listings: PSCI 354 ASIA 245 ASST 245 HIST 318

Secondary Cross-listing

Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to debates in Japan about the possibility of a woman ascending the Chrysanthemum Throne, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.

Requirements/Evaluation: two short papers; final exam

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: in the following order, seniors, juniors, sophomores, then first-years

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

HIST 319 (F) Gender and the Family in Chinese History (DPE)

Cross-listings: WGSS 319 ASST 319 HIST 319 ASIA 319

Primary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Class Format: Remote in Fall 2020. Emphasis will be on synchronous discussions and small group work via Zoom (or similar).

Requirements/Evaluation: active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper.

Prerequisites: none; open to first year-students with instructors permission

Enrollment Limit: 15

Enrollment Preferences: History, Asian Studies, and WGSS majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 319 (D2) ASST 319 (D2) HIST 319 (D2) ASIA 319 (D2)

Difference, Power, and Equity Notes: This course focuses on historical regimes of gender and sexuality in China and their transformations over time. Students will be asked to consider these regimes both on their own terms and in comparative perspective.

HIST 320 (S) Emotions in Modern Japanese History

Cross-listings: ASIA 320 ASST 320 HIST 320

Primary Cross-listing

Emotions have been integral to the human experience--to relationships between people, political decision making, economic behavior, individual and communal identities, international affairs, and national projects. This course will consider a full range of emotions including fear, insecurity, pride, anxiety, desire, anger, and happiness. And it will examine these emotions as both actors in history and subjects of historical inquiry. We will ask how emotions have reflected and shaped the making of modern Japan. What role have emotions played in steering the course of Japanese history, from the modernizing revolutions of the late 1800s, imperialism, colonialism, and war, to the navigation of both affluence and economic insecurity in the postwar era? How have emotions been talked about and represented in modern Japan? We will also discuss different ways of researching and writing a history of emotions.

Class Format: remote with synchronous, seminar-style discussion

Requirements/Evaluation: class discussion; response papers; research paper (12-15 pages)

Prerequisites: none; open to first-year students with instructor's permission

Enrollment Limit: 15

Enrollment Preferences: History or Asian Studies majors; prospective majors

Expected Class Size: 10-12

HIST 321 (S) History of U.S.-Japan Relations, 1853-Present (DPE)

Cross-listings: LEAD 321 ASST 321 HIST 321 ASIA 321

Primary Cross-listing

An unabating tension between conflict and compromise has been an undercurrent of U.S.-Japan relations since the 1850s, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the Difference, Power, and Equity requirement by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other.

Class Format: remote with synchronous, seminar-style discussion

Requirements/Evaluation: class participation, response papers (500 words), one short paper (5 pages), and a research paper (12-15 pages)

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 15

Enrollment Preferences: History or Asian Studies majors/prospective majors

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 321 (D2) ASST 321 (D2) HIST 321 (D2) ASIA 321 (D2)

Difference, Power, and Equity Notes: The course focuses on differences in power (economic, cultural, political, and military) between Japan and the U.S., from the 1850s through the present. It considers the ways in which Japan has been subordinate to the U.S. for much of this history, and the conflicts that have resulted when Japan has attempted to overturn this dynamic of power. Students will acquire the skills of history and international relations to examine how race, culture, and politics have shaped this relationship.

HIST 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece

Cross-listings: HIST 323 CLAS 323 LEAD 323

Secondary Cross-listing

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

Enrollment Limit: 19

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

HIST 327 (S) A History of the German Democratic Republic

This seminar is a cultural history of the German Democratic Republic that focuses on the lives and experiences of East Germans from 1949 to 1990 and beyond. The course relies heavily on primary sources, including films, works of literature and art, ego documents such as memoirs, diaries, and letters, as well as the documentary, *The Children of Golzow*, that covers the lives of a handful of East Germans from 1960 to 2007. Proceeding

chronologically, the course will consider the emergence of the GDR out of the Second World War and the Third Reich between 1945 and 1950; the GDR during the 1950s, including the workers' uprising and the brief liberalization that occurred in its aftermath; the GDR in the shadow of the Wall during the 1960s; the GDR during the 1970s under Erich Honecker with its emphasis on consumerism; the GDR during the last decade of its existence during the 1980s with increasing economic stagnation, environmental degradation, popular disillusionment, and the ascendance of the Stasi state; and, finally, the collapse of the GDR and the subsequent experience of its former citizen in the Federal Republic of Germany after 1989.

Requirements/Evaluation: The course will be taught in a discussion format. Evaluation will be based upon participation in class discussion, two interpretative essays, each of approximately five pages, and a final eight-page paper due at the end of the semester.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: History majors, seniors, and then juniors

HIST 328 (S) The Making and Unmaking of the United Kingdom

England may be a very old country, but the United Kingdom (technically the United Kingdom of Great Britain and Northern Ireland) is a relatively new concoction, newer in fact than the United States of America. Although James VI of Scotland ascended both the English and Irish thrones as James I in 1603, it was only in 1707 that the Acts of Union united the two separate kingdoms of Scotland and England into one nation, Great Britain. And it was only in 1800 that further Acts of Union brought Ireland into the fold, creating the United Kingdom of Great Britain and Ireland. This would itself only last until 1922 when, after bloody civil war, Ireland was partitioned, leaving only the northern six counties remaining in the United Kingdom. Largely through discussion, this course will explore the troubled making and unmaking of the United Kingdom since 1689. After considering the meaning of the nation, nationalism, and national identity, it will focus on specific moments in the history of that making and unmaking. Topics will include: the revolution of 1688-89 and subsequent Scottish Highland support for the discredited Jacobites (followers of ousted monarch, James II); Anglo-Scottish commercial interests that fueled the Acts of Union in 1707; the defeat of the Jacobites in the last battle on British soil in 1746; Anglo-Irish relations in the eighteenth century that fueled the creation of the United Kingdom in 1800 against the backdrop of the French Revolution; the nineteenth-century movement for Irish Home Rule, culminating in the Easter Rising in 1916 and the partition of the island; the more recent resurgence of Scottish and Welsh nationalism, leading to the establishment of the Welsh and Scottish parliaments and a referendum on Scottish independence; and, finally, the current dilemma of Northern Ireland. Although primarily a political history of the four nations that comprise the United Kingdom, the course will also focus on the cultural meanings of Britishness in the eighteenth century, the imperial dimensions of national belonging in the nineteenth century, multi-racial attempts to recast Britishness against the backdrop of postwar imperial decline, and recent, right-wing formations of Englishness in the context of the fragmentation of the United Kingdom and Britain's exit from the European Union.

Class Format: this is primarily a discussion course with the occasional lecture that will frame the material for discussion

Requirements/Evaluation: course evaluation will be based on regular attendance and participation in discussion, the preparation of four response papers/discussion agendas, the writing of two 6-8 page interpretive essays, and a final, take-home examination

Prerequisites: no prerequisites, although some familiarity with the contours of modern European history would be useful

Enrollment Limit: 25

Enrollment Preferences: preference given to History majors

Expected Class Size: 12-20

Grading: no pass/fail option, yes fifth course option

HIST 329 (S) The History of Witch-Hunting and Witchcraft in Medieval and Early Modern Europe

Between the fifteenth and eighteenth centuries, some 50,000 people--overwhelmingly women, but also some men and children--were hunted, prosecuted and executed for witchcraft all over Europe and its colonies. In this seminar, we investigate through the reading of primary and secondary sources why and how this phenomenon developed in the early middle ages, and then erupted and subsided in the early modern period. We also examine the various methodologies and arguments that historians have employed and debated over the past decades to try and explain why and how witch hunting, witchcraft beliefs and prosecutions influenced and impacted European cultures and societies. Lastly, the study of witch-hunting and witchcraft will also inform our understanding of its place in the religious, political, legal, social, and cultural development of medieval and early modern Europe, as well as of its connections to the histories of European persecution, heresy, antisemitism, gender and state formations, demonology, magic, and race.

Requirements/Evaluation: Participation. Three essays (750 words) on a primary source, a secondary source, and witchcraft trial. A 15 minute presentation to the class on a historical work of witchcraft scholarship. A research-paper prospectus and preliminary bibliography. A final 10-12 page research paper on a witchcraft topic of choice in consultation with the instructor.

Prerequisites: No prerequisites. Open to first-year students with permission of instructor.

Enrollment Limit: 16

Enrollment Preferences: History majors and students with demonstrated interest in European history.

HIST 330 (S) Reformations: Faith, Politics, and the World

Cross-listings: HIST 330

Primary Cross-listing

The Protestant Reformation of the sixteenth century was one of the major transformations in the history of Christianity, a faith whose 2.2 billion adherents make it the largest religion in the world today. Martin Luther and his followers sparked a schism that changed what it meant to be a Christian, and, by various reckonings, helped to create the state as we know it, the modern self, capitalism and even, as an unintended consequence, secularism. As inhabitants of a post-Protestant society, we have much to learn about the world in which we live from studying the Reformation and its legacies. While considering classic interpretations, this seminar will also probe recent research on the plural Reformations: not just Protestant but also Catholic, and not solely the elite movement of Luther and John Calvin but also the Reformation of women and peasants. What was at stake in these sweeping transformations of what it meant to be a Christian? We will consider theological debates about human agency, the changing relationship of religion and the state, female mysticism, religious warfare, iconoclasm, the arrival of Protestantism in New England, and toleration. We will work intensively in Chapin Library, examining books of hours, Bibles, missals, psalters, and primers. The seminar will also visit WCMA and the Hancock Shaker Village. Authors to be read include Luther, Calvin, Teresa of Ávila, Jean Bodin, Ignatius of Loyola, and John Winthrop. Note: due to the constraints of rare-book research, enrollment is capped at 12.

Requirements/Evaluation: two short papers (5-7 pages) and a longer final paper (10-12 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: History majors

HIST 331 (F) European Intellectual History from Aquinas to Kant

The scholars and philosophers of early modern Europe set the agenda for much of modern thought concerning epistemology, morality, religion, and politics. Many of their debates still inform our intellectual world: How do we know what we know? Is human nature intrinsically selfish? What is the nature of God, and of His revelation? Should we prefer individual freedom or political stability? Our seminar will retrace the long and winding path from the intellectual culture of late medieval Europe to that of the Enlightenment. We will try to understand how a Christian culture of manuscript books, whose inquiries were conducted in Latin, transformed into a secular culture of public debate in new printed publications such as journals and newspapers in vernacular languages (English, French, German, etc.). In the process, we will encounter the foundational movements that structured European thought and the making of knowledge in these centuries: scholasticism, humanism, the new philosophy and the Enlightenment. Ultimately, we will recover the arguments of major thinkers and consider what they can teach us today. Authors to be read include Petrarch, Christine de Pizan, Thomas More, Descartes, Leibniz, Montesquieu and Rousseau.

Requirements/Evaluation: attendance and participation; two short papers; a longer final paper

HIST 332 (F) Queer Europe: Sexualities and Politics since 1850 (DPE)

Cross-listings: HIST 332 WGSS 331

Primary Cross-listing

This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context, the course examines the ways in which sexuality has become central to questions of identity, both personal and national, in modern European society. Topics include: ways of thinking about the queer past; women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist and Nazi regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but with some detours to Italy and Russia. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians and theorists. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

Class Format: This will hopefully be a 'hybrid' class, taught in person on campus, primarily as a discussion course. After Thanksgiving, the final course readings will be discussed remotely via Zoom. Depending on the numbers, if both on-campus and off-campus students enroll in the course -- or if masks and in-class social distance interfere with fruitful discussions -- instruction may shift to an all-remote format.

Requirements/Evaluation: The class will be taught entirely in discussion mode and students will be expected regularly to contribute to the discussion of the readings and films for the course. Evaluation will be based on the quality of those contributions, the posting of four 500-word response papers on the readings (chosen by the students), two 7- to 8-page interpretive essays, and a final research paper of 12- to 15-pages.

Prerequisites: None; open to all students.

Enrollment Limit: 15

Enrollment Preferences: Junior and Senior History majors, along with Women's, Gender and Sexuality Studies majors, will be given enrollment preference if the class is over-enrolled. But other students are welcome if space is available.

Expected Class Size: 8-12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 332 (D2) WGSS 331 (D2)

Difference, Power, and Equity Notes: "Queer Europe" is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

Attributes: HIST Group C Electives - Europe and Russia

Not offered current academic year

HIST 335 (F) Weimar Germany

The Weimar Republic has been examined and re-examined, not only in an effort to account for the failure of democracy and the rise of Hitler in Germany but also for its remarkable artistic achievements. Using a variety of primary documents, including movies, works of art and literature, as well as more traditional historical sources and the writings of historians, this course will consider the social, political, and cultural history of the Weimar Republic. At issue in the course will be the relationship between the political and social instability and the cultural blossoming that characterized Germany during the 1920s. We will also consider whether the Weimar Republic in general, and Weimar culture, in particular are better understood as the product of Germany's past or as harbingers of its future.

Class Format: This course will be taught via discussion conducted entirely remotely in bi-weekly Zoom class meetings.

Requirements/Evaluation: participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students with background in European history, or History majors

Expected Class Size: 10-12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: HIST Group C Electives - Europe and Russia

Not offered current academic year

HIST 336 (S) National-Socialist Germany

This course is a history of National-Socialist Germany based to a considerable extent on primary documents. Students will use the documents to reconstruct the history of the Third Reich and to articulate and assess some of the principal historiographical debates relating to National-Socialist Germany. The course will consider the following topics: the failure of the Weimar Republic and the rise of National Socialism; the consolidation of Nazi rule; the experiential reality of the *Volksgemeinschaft*; the popularity of National Socialism; youth and women in the Third Reich; Nazi culture; Nazi racism and image of the Jew; Gestapo terror; the pre-war persecution of Jews; popular German anti-Semitism; the regime's euthanasia program; the Nazi Empire; the experience of war in Russia; the implementation of the "Final Solution to the Jewish Problem"; German knowledge of and complicity in the "Final Solution"; the experience of "total war" on the home front; resistance to National Socialism; and the collapse of the Third Reich. The course will focus especially on how ordinary Germans experienced and participated in the history through which they lived. We will take an empathic approach to National-Socialist Germany and to the Germans who lived through this period, attempting to understand why they felt, thought, and acted as they did. We will also consider the epistemological and ethical problems involved in attempting to empathize with Nazis.

Class Format: discussion

Requirements/Evaluation: active and effective participation in class discussion, two 5-page analytic essays on two of the topics considered in the course, and a final 7-page interpretative essay: the two analytic essays on an assigned course topic (50%); the final interpretative essay (30%); class participation (20%)

Prerequisites: none; open to all

Enrollment Limit: 25

Expected Class Size: 20-25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

HIST 337 (F) After Stalin: Soviet History from "Thaw" to Collapse

Cross-listings: HIST 337 RUSS 337

Primary Cross-listing

When Joseph Stalin died in 1953, the crowd of people that gathered to view his embalmed body on Moscow's Red Square grew so large, it provoked a stampede that killed nearly 500 people. This moment embodies the uncertainty and challenges that ordinary citizens and state officials faced when they imagined what a post-Stalin future might bring to the Soviet Union. For all the suffering that his rule inflicted on the Soviet people, Stalin remained for many a reliable constant in a life dominated by revolution and war. Stalin's successors faced a classic dilemma: how to reform and breathe new life into a system without disturbing the foundation it needs to stand intact? Despite superpower status and some stunning achievements at home and abroad, the fault lines in Soviet society ran deep. This course will consider the experiences that grew out of the uncertainty that emerged after Stalin's death. We will examine how the "Soviet experiment" evolved - politically, legally, socially, culturally - once the last of the original Bolshevik revolutionaries left the Kremlin. What opportunities did the post-Stalin moment open up for political elites, members of the professional class, the intelligentsia, and citizens from Soviet republics and satellite states? What obstacles did they face, and how successful were they at overcoming them? In what ways did the spirit of the October and Stalinist Revolutions persist or erode from 1953 until 1991? Most importantly, how did the "children of the revolution" participate in, check out of, or contest the socialist system whose birth their parents witnessed first hand? After all, more generations experienced the Soviet Union without Stalin as their leader than generations who only knew a life with the "Vozhd" in power. Through secondary and primary source readings, we will attempt to recover the voices of those whose lives both shaped and were shaped by the nearly four decades after Joseph Stalin's death.

Requirements/Evaluation: active class participation, two short essays (2-3 pages), and three long essay (5-7 pages)

Prerequisites: none

HIST 338 (F) The History of the Holocaust

Cross-listings: HIST 338 JWST 338 REL 296

Primary Cross-listing

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

Class Format: mostly discussion

Requirements/Evaluation: class participation, weekly reading responses, a map quiz, two papers (5-7 pages) on class readings, a final research paper (10-12 pages)

HIST 341 (F) Collapse: The Fall and Afterlife of the Soviet Union

Cross-listings: HIST 341 RUSS 341

Primary Cross-listing

On Christmas Day 1991, Mikhail Gorbachev ended two things: his tenure as President of the Soviet Union, and the Soviet Union itself. In the years that followed, the Soviet Union's fifteen national republics splintered overnight into more than a dozen nation states along uneven and highly contest ethnic lines. In Russia, Boris Yeltsin assumed office as the first president of the Russian Federation, and without delay, began to institute radical economic and social reforms. Under his watch, the country privatized national industry, cut the state budget, and courted foreign multinational businesses. The world most commonly used to describe Russia in the early 1990s is "disappear": money, jobs, food, and people. The very things that Soviet-style socialism had committed itself to providing for started to vanish as a result of invisible and market forces. Russian nationalism replaced Soviet internationalism as a guiding national idea. This course will explore what emerged in the spaces left empty after Soviet-style socialism's demise in three parts. The first part of the semester will examine the origins of the Soviet Union's collapse and its breakup into fifteen successor states. The second part of the semester will survey the political, economic, and social processes that followed the collapse. Finally, the third part of the course will focus on Putin's ascendancy to the presidency and its consequences for Russian citizens at home and Russia's image abroad. Three themes will occupy a prominent place in the course: political-economy, nationalism, and identity. By semester's end, students will have acquired the content and analytical literacy to place the former Soviet Union in its specific historical context and identify multiple sources of causation that may help explain Russia's transition from socialism to capitalism to Putinism during the past quarter century.

Class Format: Each week, students will watch a pre-recorded asynchronous lecture that will provide context for the readings due that week. Students will be assigned to a small group of no more than 5 students which will "meet" with the instructor for a weekly, tutorial-style discussion on Zoom.

Requirements/Evaluation: active class participation, three short essays (3-5 pages), and one long essay (10-12 pages)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

HIST 342 (S) Sounds and Pressures: Music in the 1970s Caribbean

Cross-listings: AFR 327 HIST 342 MUS 327

Secondary Cross-listing

For the Caribbean the 1970s was a decade of cultural excitement and political tragedy. 1960s radical consciousness contributed to rapidly changing music styles that formed by the early seventies and blossomed on the world stage as the decade progressed. This was the period when Jamaican Reggae, Haitian Konpa, and Spanish Caribbean Salsa, asserted their presence in the mainstream. But the countries that birthed these popular music forms were locked in political crisis. In Jamaica, political violence escalated, Haiti faced a brutal dictatorship and Cuba was caught in the midst of Cold War strain. A common response to these challenges was massive emigration from the Caribbean to the United States. This course will examine the music produced in the 1970s Caribbean and its relationship to the forces of migration, national politics, and inter-regional contact. After a background on Cuban and Haitian music, the course will give greatest focus to Jamaican politics its relationship with Reggae, which reached further than any other Caribbean music form in the 1970s. It will explore the journeys of the music as it accompanied and oftentimes preceded the arrival of large numbers of Caribbean immigrants. In the process, the US imaginary of the Caribbean was reshaped by the popularization of Caribbean commercial music.

HIST 346 (F) Modern Brazil (DPE)

Cross-listings: AFR 346 HIST 346

Primary Cross-listing

Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity-for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History majors, Latino/a Studies concentrators

Expected Class Size: 20-25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 346 (D2) HIST 346 (D2)

Difference, Power, and Equity Notes: The course--in all of its readings, discussion, papers--centers on the formation of different and dynamic identities in 19th- through 21st-century Brazil. Throughout the semester we examine how Brazilians created, recreated, and/or rejected categories of difference and how these resulting actions connected to broad political and cultural changes. Links to current questions--like the struggles of communities of quilombolas (descendants of runaway or freed slaves)--receive particular attention

HIST 347 (S) Democracy and Dictatorship in Latin America (DPE)

The scarcity of stable and democratic governments in Latin America has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies as well as diverse forms of pro-democratic and social justice activism. Our main cases will be Brazil, Argentina, Mexico, Peru, and the countries of Central America, but we will address the region as a whole. In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes "democratic" or "dictatorial"--and the implications of our choice of criteria.

Class Format: remote

Requirements/Evaluation: class participation, response papers, two short papers, and a longer (10-page) final essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors

Expected Class Size: 12-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines the production of unequal power relations along racial/ethnic, gender, national, and regional lines. Furthermore, it analyzes the creation of diverse--and biased--categories by which Latin Americans and their political movements and systems have been evaluated since the nineteenth century.

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Secondary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

HIST 353 (F) Controversies in American Thought

This course will explore some of the most explosive controversies to shape modern America -- from debates over Darwinism to the so-called 'culture wars' -- through the lens of intellectual history. Students will examine how the emergence of new ideas about science, capitalism, democracy, race, and gender have fueled divisive conflict in the United States since the mid-19th century. In the process, they will wrestle with invigorating intellectual critiques of American life, while thinking historically about the transformative power of ideas, both academic and popular. The course will cover debates over such topics as: the purpose of higher education; eugenics and evolutionary theory; 'madness' and femininity; the nature of truth; social democracy and modern capitalism; immigration and nationalism; racial identity and inequality; and the state of intellectual life today.

Requirements/Evaluation: Participation in group discussion; five informal response papers (350-450 words); two short essays (4-6 pp); final paper (8-10 pp).

Prerequisites: None, open to all students.

Enrollment Limit: 25

Enrollment Preferences: History majors, and students with a demonstrated interest in the history of American thought.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

HIST 354 (F) The Revolutionary Generation: Galaxy of Leaders

Cross-listings: LEAD 285 PSCI 285 HIST 354

Secondary Cross-listing

The American Revolution produced a galaxy of brilliant and creative statesmen and intellectuals: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments--a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Requirements/Evaluation: three papers, weekly class presentations, and active participation in all discussions

Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

Enrollment Limit: 12

Enrollment Preferences: students with a background in Leadership Studies, American History or American Political Science

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

HIST 355 (F) The CIA and American Foreign Policy

Cross-listings: PSCI 361 LEAD 361 HIST 355

Secondary Cross-listing

Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. Still, it took the shock of Pearl Harbor for the United States to establish a permanent peacetime civilian intelligence service independent of another federal department--the Central Intelligence Agency. Since then, the agency and others which comprise the loose entity called the Intelligence Community (IC) have played a pivotal albeit intensely controversial role in US foreign and national security policies. Yet their roles and missions remain largely misunderstood and divisive, as attested to by recent debates surrounding the multiple investigations of the 9/11 tragedy, the flawed pre-war estimates of Iraq's Weapons of Mass Destruction (WMD) capabilities, the reporting on Benghazi, the Snowden revelations, and much more. This course seeks to provide greater understanding of the relationship between intelligence and US foreign and national security policy by examining the CIA's and IC's roles and responsibilities, illuminating their history alongside the history of America and the World, assessing their successes and failures, evaluating their reforms, and correlating their behavior and capabilities with US values and institutions.

Requirements/Evaluation: Midterm, several short papers, and a research paper.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Political Science and History Majors, prior coursework in American foreign policy.

HIST 358 (S) The Roosevelt Style of Leadership

Cross-listings: LEAD 325 HIST 358

Secondary Cross-listing

In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were the ideas behind TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor Roosevelt play? In addition to studying biographies and especially the writings and speeches of TR, FDR, and ER, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.

Requirements/Evaluation: Participation in class discussions, oral reports, several short papers and one research paper.

Prerequisites: Courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar

Enrollment Limit: 12

Enrollment Preferences: Leadership Studies concentrators and students with a background in American history and Political Science

HIST 360 (F) Mapping North America: Critical Cartographies (DPE)

This course examines histories of mapping: what maps show, and what places the practices of cartography have tended to erase, distort, or conceal. Focusing on North America, it examines how Native Americans, African-Americans, and Euro-colonial peoples strongly contested the meanings and representations of "place." Course topics include Indigenous mapping traditions and concepts of homelands spaces; European navigational strategies and colonialism; urban planning; and scientific as well as military depictions of particular lands and waters, especially west of the Mississippi River. The course teaches strategies for employing maps as primary sources, and ways of understanding the historical and ideological circumstances of their production and circulation. It will offer opportunities to critically engage cartographic materials in Williams College's archival and museum collections, and to develop independent research projects.

Class Format: Remote class. Class will center on weekly Zoom discussions in a seminar format, plus virtual one-on-one discussions with the instructor about writing projects.

Requirements/Evaluation: class discussion, response papers, short analytic essays, final project

Prerequisites: one History or American Studies course

Enrollment Limit: 15

Enrollment Preferences: sophomore, junior, and senior History and American Studies majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course offers critical perspectives on mapping and the close connections between representations of space/place and the exercise as well as contestation of power. Particular attention is devoted to Native American/Indigenous mapping and "counter-mapping" projects and methodologies, as well as scholarship from the African diaspora that stresses the active role of mapping in creating and also resisting racialized social regimes.

HIST 361 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: HIST 361 AMST 360

Primary Cross-listing

Early Americans inhabited an interconnected world through which people, beliefs, and objects circulated. This course explores the "Atlantic World" as both a place and a concept: an ocean surrounded by diverse communities and empires, and an imagined space of shared or competing affiliations. Moving from the tenth century to the nineteenth, it examines ecological, cultural, political, economic, intellectual, and religious exchanges among Native Americans, Europeans and colonizers, and Africans and African Americans. It introduces both conceptual dimensions of this Atlantic paradigm and case studies that investigate its human subtleties, with the goal of examining early American history through a transnational lens. The course will take up the stories of Wabanaki mariners and Norse/Viking expansionists; Pocahontas, a trio of Inuit people, and myriad other Indigenous travelers to Europe; West African survivors of the Middle Passage and their enslaved descendants who pushed for survival and recognition of their humanity overseas; New England religious dissidents, intellectuals, and profiteers from Caribbean slavery; Touissant L'Ouverture and the reverberations of the Haitian Revolution; and whaling ship crews who pursued cetaceans ever farther out at sea, among other topics. The course also delves into new methodologies for telling histories that have been unevenly presented or seemingly silenced in traditional documentary archives, probing ways that oral traditions, songs, archaeology, material culture, and other forms of expression and representation can help recast the nature and meanings of these connected spaces and histories. Additionally, it provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: will alternate with seminar-type discussion of readings

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: sophomore, junior, and senior History majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 361 (D2) AMST 360 (D2)

Difference, Power, and Equity Notes: This course examines the formation, expression, and articulation of racial, ethnic, cultural, and other forms of difference in the historical Atlantic World, and the ways that peoples of Indigenous and African descent engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in older literatures, and helps students build fluencies in recovering and analyzing these lives.

HIST 362 (S) Indigenous Women's History (DPE) (WS)

Cross-listings: WGSS 324 AMST 324 HIST 362

Secondary Cross-listing

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women's lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and artists.

Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated

bibliography, 15-page final paper and presentation)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies, History, and Women's Studies, Gender and Sexuality majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 324 (D2) AMST 324 (D2) HIST 362 (D2)

Writing Skills Notes: With substantial focus on students' development of independent research papers, this course satisfies the Writing Skills requirement.

Difference, Power, and Equity Notes: We examine the lives of indigenous women in the Americas across a span of more than 500 years, asking how and why we come to know these stories through archival records, oral histories, popular culture, and autobiographies. By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives.

HIST 367 (S) Black History is Labor History (DPE) (WS)

Cross-listings: AFR 367 HIST 367

Primary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and

labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation: Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites: recommended for students with sophomore standing or above

Enrollment Limit: 25

Enrollment Preferences: HIST and AFR majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 367 (D2) HIST 367 (D2)

Writing Skills Notes: Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages.

Difference, Power, and Equity Notes: This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

HIST 368 (F) Framing American Slavery (DPE)

Cross-listings: AFR 363 AMST 368 HIST 368

Primary Cross-listing

Readings in American Slavery This course will delve into how and what historians have written about US slavery for the last century or so. Rather than marching through time, like we might in a survey course, we'll explore the nooks and crannies of slavery's history. We'll consider gender and sexuality, labor and capitalism, regional difference, maritime culture, and every day life. We'll compare histories produced well before the Civil Rights Movement to books written afterward. We'll consider the obstacles and challenges Black scholars faced in the academy and consider the significance of their work. Finally, we'll examine slavery's role in today's world, beginning with the institution's relationship with American universities and continuing on to the recent protests against monuments and statues.

Requirements/Evaluation: Four written essays/reviews, final paper. Students must also complete reading and contribute to class discussions.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Priority given to History, American Studies, and Africana Studies concentrators/ majors.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 363 (D2) AMST 368 (D2) HIST 368 (D2)

Difference, Power, and Equity Notes: This course will explicitly examine how power worked and changed during the centuries of legal slavery in the United States. Since lawmakers joined power and violence to definitions of whiteness and blackness, we will study how these definitions emerged and changed over time. Students will address issues of violence, legal and extra legal means of continuing slavery through changing political and economic conditions. Additionally, the course will consider the racial barriers in the academy.

HIST 370 (F) The Caribbean and the World: 1945-1968

Cross-listings: AFR 370 HIST 370

Secondary Cross-listing

The ending of the Second World War in 1945 coincided with the dawn of a new nationalism in the modern Caribbean. The British territories were beginning their shift away from colonialism and charting a path toward independence that would arrive in the early 1960s. Their independent neighbors contended with US imperialism which greatly shaped questions of race, nationalism, and sovereignty. By the 1960s much of the region faced crises that grew out of the tensions of the postwar period. This course examines closely these transformations in the Caribbean. It is divided into three parts. The course begins with an examination of the ideas about race, state development and empire that dominated Caribbean intellectual discourse of the 1940s. Key texts for this period include the works of Caribbean intellectuals such as Roger Mais, Una Marson, CLR James, and Jacques Roumain who considered the possibilities of racial equality and democracy in the postcolonial Caribbean. The course then looks more closely at 1950s attempts to forge greater Caribbean unity during the early Cold War years. West Indian Federation and the circuits of travel within the Caribbean are given special focus. Finally, the course will discuss challenges of the postcolonial Caribbean by looking at the circumstances and wider responses to regional radicalism in the 1960s. The key events that will be examined in this section include the Duvalier dictatorship, the Cuban Missile Crisis, and black power in Jamaica in 1968.

Requirements/Evaluation: class participation, 3-4 short papers (5-7 pages)

HIST 372 (F) The North American West: Histories and Meanings

This course will explore the various and contested histories of the geographical region in North America that Americans often call "the West." With porous boundaries; changing empires and national borders; an extraordinarily diverse mix of peoples; and most importantly, continuous Indigenous presence to the present day, this region poses foundational questions about the construction of American history. What if, from the vantage point of the 1780s, we look not at the founding of the United States in the East but at the elaboration of the Spanish mission system in California and other parts of the Southwest? What if, instead of understanding "the West" as a place that people migrated "to" from "the East," we think about "the West" as a place diversely inhabited for thousands of years that experienced very sudden and violent forms of military conquest and settler colonialism, as well as waves of migration from many different compass points around the globe? And where do Americans narratives of western "individualism" fit into the histories of massive federal interventions in "the West"? We will take up these and many other questions as we examine topics from the era before Europeans arrived in North America to the present day.

Class Format: In Fall 2021, history majors may take this course for 400-level credit with the permission of the instructor. Students who do so will be expected to complete a major research project instead of the shorter research paper that students taking the class at the 300-level will complete. Please contact Prof. Merrill for more information on this option.

Requirements/Evaluation: class participation; 3 brief writing assignments (2-4 pages); one 6-8 page research paper, based on a primary source; 24-hour take-home exam.

HIST 373 (S) Sites of Memory and American Wars

This course will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. We will ask such questions as: How and why have the memorializations of wars in America changed over time? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do sites of memory tell us about history, about society's views of wars and of soldiers, and about America? We will look at these questions both throughout U.S. history and through case studies, including the American Civil War, the wars against indigenous nations, World Wars I and II, and Vietnam.

Requirements/Evaluation: short papers, one longer research paper, and presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 376 (S) Sex, Gender, and the Law in U.S. History (DPE)

This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

Requirements/Evaluation: four papers, including three 4- to 6-page papers, and one final paper of 8-10 pages

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors, Women's, Gender and Sexuality Studies majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 378 (F) American Conservatism

Cross-listings: HIST 378 REL 258

Primary Cross-listing

This course traces the history of modern conservatism in the United States, from the early 20th century to the present. Students will examine the key ideas, leaders, and social movements that fueled and defined the rise of the modern right, broadly construed. In the process, they will go beyond electoral politics, exploring the relationship between conservatism and American life more broadly - especially in the realms of race relations, gender and sexuality, religion, and capitalism. Students will be asked to think historically, considering how the right rose from obscurity to political ascendance over the course of the 20th century. And they will be asked to engage theoretically, considering what (if anything) has defined conservatism in principle and in practice. In the process, they will examine such topics as Christian fundamentalism; anti-New Deal organizing; Cold War nationalism; the GOP's 'Southern Strategy;' law and order politics; anti-feminism and the culture wars; neoliberal economics; and neoconservative foreign policy.

Class Format: This course will be hybrid -- accessible to both on-campus and fully remote students. It is designed as a seminar, in which course meetings will revolve around synchronous discussion. Remote learners will be expected to digitally attend and participate in those meetings through Zoom (or a similar program).

Requirements/Evaluation: Participation in group discussion; five response papers (300-400 words); two essays (4-6 pp); final research paper (8-10 pp).

Prerequisites: None, open to all students.

Enrollment Limit: 15

Enrollment Preferences: History and Religion majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

HIST 379 (S) Black Women in the United States (DPE)

Cross-listings: HIST 379 WGSS 379 AFR 379

Primary Cross-listing

As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

Class Format: discussion

Requirements/Evaluation: student participation, three papers, and a brief oral presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, WGSS, and American Studies Majors, and Africana Concentrators.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 379 (D2) WGSS 379 (D2) AFR 379 (D2)

Difference, Power, and Equity Notes: This course meets the Difference, Power, and Equity requirement. The course focuses on empathetic understanding, power, and privilege, especially in relation to class, gender, and race within a U.S. context. We will study the ways in which the conflicts arose within the Black community and how Black women, usually without official positions as leaders, emerged as organizers and leaders in political and social movements.

HIST 380 (F) Comparative American Immigration History (DPE)

This course covers the history of immigration to the U.S. from the 1800s to the present. It compares the experiences of immigrants from Europe, Asia, Latin America, and the Middle East.

Class Format: This class will be REMOTE

Requirements/Evaluation: a series of papers and a final oral history or family history

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: I am hoping to teach this course in two sections of 10-12 students.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: By examining American history through immigration law and texts (novels, census materials, legal cases, oral histories, and secondary sources) this class will reveal a constant tension in American society that vacillates between welcoming and shunning immigrants, depending on their race, religion, class, gender, and sexuality. The power to include and exclude various people wishing to become part of our society has been a conflict that has played out for nearly all of our national history.

HIST 383 (F) Religion and American Capitalism

Cross-listings: REL 283 HIST 383

Secondary Cross-listing

Was Jesus a revolutionary socialist or a savvy salesman? Does capitalism bring prosperity to the virtuous or breed selfishness and sin? Shall the meek inherit the earth or should the hand of the diligent rule? Is it holier to renounce worldly wealth or crusade against poverty? These questions have long preoccupied religious believers, and their changing answers have transformed the history of American capitalism. This course invites students to study that history, from the early 19th century to the present. It will cover such topics as: utopian communes; the political economy of slavery; working-class religion and labor organizing; Christian and Jewish socialism; big business and the Prosperity Gospel; 'New Age' spirituality and the counterculture; and conservative Christianity in the age of Wal-Mart and Chick-Fil-A.

Class Format: This course will be hybrid -- accessible to both on-campus and fully remote students. It is designed as a seminar, in which course meetings will revolve around synchronous discussion. Remote learners will be expected to digitally attend and participate in those meetings through Zoom (or a similar program).

Requirements/Evaluation: Participation in group discussion; five response papers (300-400 words); two essays (4-6 pp); final research paper (8-10 pp).

Prerequisites: None; open to all students.

Enrollment Limit: 15

Enrollment Preferences: Religion and History majors.

HIST 385 (S) Latinx Politics in New York City and Beyond (DPE)

Cross-listings: LATS 385 HIST 385

Primary Cross-listing

Latinas and Latinos have long sought inclusion in the U.S. polity and society. The meanings and terms of inclusion have shifted historically, as have the methods for seeking that inclusion. This course explores activism that has included community building to meet immediate needs, social service approaches, community-based organizing, political and social movements, and participation in pre-existing unions and political groups, as well as electoral politics. At times working within existing structures, Latinx communities have also questioned and challenged those existing structures. Activists have addressed a wide variety of often intersecting issues including education, workers' rights, women's rights and feminism, immigration rights and legal status, environmental justice, LBGTQ+ visibility and rights, as well as others. New York City has long been home to a diverse group of Latinas and Latinos, and provides an important lens to Latinidades and to the politics of recognition, inclusion, and radical transformation. For final projects, students will select a contemporary issue to explore in greater depth and/or explore Latinx politics in another community.

Class Format: This is a discussion-based course, so reading and full participation is important. Taught hybrid style, the format of the course will depend on enrollments and be flexible. My initial plan is to teach one class session all remote and then divide the class into two discussion sections--one in person and one remote. The remote discussion section will have a day and time to be determined based on schedules.

Requirements/Evaluation: Class participation including short writing assignments, two essays of 4-5 pages each, final project of 7 to 10 pages, and final presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Latina/o Studies concentrators, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 385 (D2) HIST 385 (D2)

Difference, Power, and Equity Notes: This course explores how Latinx communities have sought inclusion in the U.S. polity and society, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. At times working within existing structures, Latinx communities also challenged those structures and power relations. Questions of difference, power and equity are explored at the structural, community, and individual levels.

HIST 386 (S) Latinas in the Global Economy: Work, Migration, and Households

Cross-listings: HIST 386 WGSS 386 LATS 386

Secondary Cross-listing

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies

shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

Class Format: discussion

Requirements/Evaluation: class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

Prerequisites: open to first-year students with instructor's permission

Enrollment Limit: 25

HIST 388 (F) Decolonization and the Cold War

The second half of the twentieth century came to be defined by two distinct, yet overlapping and intertwined phenomena: the Cold War and decolonization. In the two decades that followed the end of WWII, forty new nation-states were born amidst the bipolar struggle for global supremacy between the Soviet Union and the United States. Those new nations were swept up in the Cold War competition in ways that profoundly influenced their paths to independence and their postcolonial orders, but they often had transformative effects on the Soviet-American rivalry as well. In this course, students will focus on two related questions: How did decolonization influence the Cold War and the international behavior and priorities of the two superpowers? And what impact did the Cold War exert on the developing states and societies of Asia, Africa, the Middle East, and Latin America? Course materials will consist of scholarly texts, primary sources, memoirs, films, and fiction.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors; juniors and seniors

HIST 389 (S) The Vietnam Wars (DPE)

Cross-listings: LEAD 389 HIST 389 ASIA 389 ASST 389

Primary Cross-listing

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Class Format: This course will be fully remote. The course format will prioritize synchronous discussions and small group work via Zoom.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: History and Asian Studies majors

HIST 390 (S) Race, gender and science: A Black, Brown, and Queer inquiry into Science and Technology Studies (DPE)

Cross-listings: HIST 390 STS 302

Secondary Cross-listing

The protests that followed the murder of George Floyd have brought to the fore the realities of racism and violence that Black, Indigenous and People of Color experience daily. They also motivated a long overdue reckoning in various fields and institutions with the legacy of structural racism, and of colonial history. The history of modern science, technology and medicine is intractably connected to questions of race, gender, sexuality and colonialism. Scientific knowledge has been influenced by debates related to human difference and to colonialism, and has also contributed to the production of ideas around difference and distinction as well as around equality and equity. In this course, we will take a deeper look into different episodes in the history of modern science, technology and medicine, and will engage in a Black, Brown and Queer reading and investigation of science and technology. The course will offer a deep historical and methodological introduction to STS, as well as to a number of critical disciplines, such as Critical Race Theory, Postcolonial and decolonial theory, queer theory, in relation to science, technology and medicine. This course can serve as an alternative to STS 101.

Class Format: The course will be held remotely

Requirements/Evaluation: 2 response papers (3-5pages each) + final project (could be a 10-15p paper or creative project of any kind)

Prerequisites: Previous courses in STS, history, CRT, WGS, or similar disciplines is preferred but not necessary.

Enrollment Limit: 10

Enrollment Preferences: Juniors and Seniors

HIST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean (DPE) (WS)

Cross-listings: GBST 391 ASST 391 ASIA 391 HIST 391

Primary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd,

a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Requirements/Evaluation: class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: history majors and students with demonstrable interest in maritime/Indian Ocean history

Expected Class Size: 10-12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 391 (D2) ASST 391 (D2) ASIA 391 (D2) HIST 391 (D2)

Writing Skills Notes: Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

Difference, Power, and Equity Notes: This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

HIST 393 (S) Sister Revolutions in France and America

Cross-listings: LEAD 212 HIST 393

Secondary Cross-listing

In the late-eighteenth century, two revolutions burst forth--they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

Requirements/Evaluation: three papers, several class presentations, and active participation in class discussions

HIST 394 (S) The History of Panics

What is a panic? This course takes up questions of what has defined, caused, and shaped panics of various kinds-political, societal, moral, medical, and financial. We will consider what has fueled panics, what has prevented them, what their effects have been, how they have ended, who has panicked, who has been the victim of panics, and what has distinguished premodern from modern incarnations of the phenomenon. Central themes will include the relationship between panics and emotions (anxiety, fear, insecurity, irrationality, hysteria), communication (rumor, gossip, mass media), technology (electricity, vaccines, the computer), and violence (persecution, revolution, psychological torment). With a multidisciplinary approach informed by sociology, economics, psychology, and history, our examination will span different times and different places and will encompass witch hunts of many sorts, infectious diseases, financial crises, cultural scares, and more.

Requirements/Evaluation: class participation, response papers, one short 5-page paper, and a research paper

Prerequisites: none

HIST 395 (F) Signs of History

Cross-listings: HIST 395 ENGL 395 COMP 395

Secondary Cross-listing

What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Requirements/Evaluation: two papers, one 6 and one 10-12 pages in length, and general participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

HIST 411 (F) Happy Holidays! A Comparative History of Commemorations and Festivals

Cross-listings: REL 321 HIST 411 ARAB 411

Primary Cross-listing

What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Requirements/Evaluation: several short response papers and a 20- to 25-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniors, especially History and Arabic Studies majors

HIST 416 (F) The Many Lives of Tokyo (WS)

Cross-listings: ASIA 317 HIST 416

Primary Cross-listing

The city of Tokyo has had many lives from its early modern founding as the shogun's capital of Edo to its contemporary incarnation as a global megacity. This seminar explores how and why the city has changed--how an unassuming fishing village was transformed over four centuries into a vibrant early modern city of over a million people, the heart of a modern nation and metropole of an expansive empire, an emblem of urban cosmopolitanism, and a sprawling metropolis. Our focus will be on how people have lived, conceived, and shaped Edo/Tokyo. We will consider how

different and various people have moved through the city; where and how they have lived, worked, and enjoyed themselves; how they have interacted with the natural and built environments; and how they have expressed their discontents with, and aspirations for, the city. Topics to be examined include: physical expansion, urbanization, and suburbanization; destruction and reconstruction from fires, earthquakes, and war; cultivation of opportunities to consume; and creation of urban popular cultures. The centerpiece of the seminar is the research and writing of a substantial and original paper that delves into a question of interest to you about the history of Tokyo.

Requirements/Evaluation: class participation, discussion posts, response papers, and a research paper (20-25 pages)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Asian Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)

Cross-listings: REL 335 HIST 434 JWST 434

Primary Cross-listing

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews' diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper

HIST 443 (S) Race and Ethnicity in Latin America

Cross-listings: AFR 383 HIST 443

Primary Cross-listing

Race and ethnicity have been central to the formation of national identities in Latin America, as well as to the creation of transnational networks that include Latin Americans. This seminar will critically examine familiar characterizations of Brazil and other countries as "racial democracies" and look at the historical roots and political impact of both "positive" and "negative" stereotypes of race relations in the region. To do this we will explore the rise and decline of slavery, the changing constructions of indigenous and Afro-Latin American identities at national and transnational levels, and to the emergence of new Black Movements and other racial and ethnic activism in Colombia, Guatemala, Brazil, and elsewhere.

Requirements/Evaluation: class participation, one short paper, and a substantial (20-25 page) research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Latino/a Studies concentrators

HIST 453 (S) Women, Gender, and Social Movements in U.S. History

Cross-listings: HIST 453 WGSS 453

Primary Cross-listing

This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women's groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

Requirements/Evaluation: 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: senior History majors

HIST 454 (F) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts (DPE)

Cross-listings: ARTH 561 HIST 454

Secondary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty, as well as of decolonizing museums; the complex dynamics of collaboration; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Class members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

Class Format: The course will feature seminar discussions as well as local field trips to museums, libraries, and archives with pertinent collections.

Requirements/Evaluation: Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project

Prerequisites: For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats will be reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 561 (D1) HIST 454 (D1)

Difference, Power, and Equity Notes: The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

HIST 455 (S) The Afterlives of Objects: Telling American Histories through Material Culture and Museums (DPE)

Cross-listings: HIST 455 AMST 455

Primary Cross-listing

Material culture studies examine relationships between people and objects. Tangible artifacts like furniture, clothing, ceramics, tools, and buildings give insight into communities' identities, aspirations, and struggles. This course approaches American histories through objects, and considers how interdisciplinary methodologies can reveal alternative understandings of the past. The course traces changing theories and practices of preservation, curation, and display; shifting conceptions of "heritage" among diverse peoples; and ethical challenges posed by Native American and African American items held in museums, particularly in relation to repatriation considerations. The course involves a staged set of class visits to work with collections at the Williams College Archives/Special Collections and Art Museum as well as local/regional repositories and historic sites. While the scope of the course is continental and at times transoceanic, it includes substantial focus on the Northeast/New England and the material assemblages and landscapes that shape western Massachusetts. Students will build familiarity with appropriate techniques for handling objects, cultivate skills for developing and carrying out an original research project, and explore diverse modes of analysis and expression for telling the stories of objects and their associated communities.

Requirements/Evaluation: active participation in class discussion and museum visits, in-class presentation about one week's readings, research project prospectus, research project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: junior and senior History and American Studies majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 455 (D2) AMST 455 (D2)

Difference, Power, and Equity Notes: This course examines diverse historical experiences of North American peoples, including Native Americans and African Americans, in conjunction with responses to Euro-American settler colonialism. It introduces students to foundational methodologies in object studies including decolonizing approaches, and explores key debates about possession, interpretation, and repatriation of objects to descendant communities, such as the Native American Graves Protection and Repatriation Act (NAGPRA).

HIST 456 (S) Civil War and Reconstruction

Cross-listings: AMST 456 HIST 456 AFR 385

Primary Cross-listing

An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. The seminar begins with the build up of sectional antagonism culminating in the secession of the lower South in 1860-61 and the outbreak of civil war. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

Class Format: This seminar will be a discussion course. This era was the formative period for many of the issues we face as a society today, and the roots of these present-day problems must be discussed openly and thoroughly by all members of the seminar.

Requirements/Evaluation: class participation, two short essays during the semester, and a substantial research paper based at least in part on primary source materials due at the completion of the seminar.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Preference given to History majors needing a 400-level course to complete their major requirements.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

HIST 457 (S) Floridas (DPE) (WS)

Florida, the sunshine state with 1350 miles of coastline was once an outpost of Spain's 17th century empire. Its history comprises Disney World, the largest Cuban community outside of Cuba, a haven for enslaved Catholics in the 17th century and for an aging, largely white middle class in the 20th. It is the site of the nation's oldest city, and the home to range of Native peoples. A land of swamps, plantations, cities, islands, strip malls and theme parks is now ground zero in climate change discussions. This "purple state" has decided more than one presidential election. This course will explore the history of the many Floridas. We will move roughly through time as we seek to understand Florida and its place in United States culture. Why do people often think of Florida as "not quite southern" although it borders Georgia and Alabama? When and why did Spain colonize the area? How did they lose it? What is the history of the original inhabitants of Florida and how does that story help us understand it now?

Requirements/Evaluation: class discussion, three short writing assignments and a final research paper of 15-20 pages on a topic that grows out of our reading

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: seniors and History majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will be writing three shorter papers throughout the semester. Two of these will be building up towards the final research paper. The third will be more "experimental"... perhaps a piece of historical fiction or eye witness account. The final paper should exceed 15 pages. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: We will consider how Florida has defined itself, and been defined throughout American history largely based on various groups that occupied space with combinations of military, technological and economic power. This class will investigate the histories and dynamics of these various occupations and settlements, paying close attention the conflicts over space in rural and urban areas. Histories of African Americans and Native people will be central to our investigation.

HIST 462 (F) For the Soul of Mankind: The Cold War and American Foreign Relations

The United States emerged from the Second World War with unprecedented power and influence; for the first time it was poised to take on a level of global leadership that it had long shirked. Yet the U.S. faced an uncertain world, marked by the ascendance of the communist-led Soviet Union as a rival superpower, the impending decolonization of European empires, the emergence of a nuclear arms race, and a host of changes to domestic American life. What ensued was a 45-year Cold War--a battle for the soul of mankind--marked by American officials' relentless determination to combat the threat of communism at home and abroad. This course explores a range of scholarly approaches to that conflict, focusing on high-level diplomacy, hot wars, propaganda, the cultural cold war, and more. In addition to reading and discussing works that exemplify key approaches to studying America's Cold War, students will develop an original research topic and research and write a 20- to 25- page paper, based in primary sources, on a Cold War-related topic of their choosing.

Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a 20- to 25-page research paper

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Advanced history majors

Expected Class Size: 10-20

Grading: no pass/fail option, no fifth course option

HIST 471 (S) Comparative Latina/o Migrations

Cross-listings: HIST 471 LATS 471

Secondary Cross-listing

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

Class Format: discussion

Requirements/Evaluation: class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources

Prerequisites: none

HIST 476 (F) CAPSTONE: Black Radicalism

Cross-listings: AFR 476 HIST 476

Secondary Cross-listing

Amandla! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery--brought about by the Haitian Revolution, slave rebellions, maroons, Quilombos, Civil War and various other means of resistance--transatlantic people of African descent have demanded radical change in the organization of modern societies. Their struggles and ideas have changed the ways we think and study--through the formation of Africana/African-American/Black-Studies--and the ways in which we express ideas--through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960's, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, and Caribbean and African radical movements, with an eye to examining their relevance to Black radical movements today.

Requirements/Evaluation: student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork, etc.

HIST 478 (S) Cold War Landscapes

Cross-listings: AMST 478 ENVI 478 HIST 478

Primary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the

stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

HIST 480 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: HIST 480 GBST 480 AFR 381

Primary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

TUT Section: T1 TBA Benjamin Twagira

HIST 481 (S) History of Taiwan (WS)

Cross-listings: ASIA 413 HIST 481

Primary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Prerequisites: none

HIST 482 (F) Race and American Foreign Relations (WS)

From its origins, American society has been suffused with notions of white superiority and racial hierarchies that have underpinned the nation's foreign policy. Ideologies of race factored heavily into the nineteenth century process by which the United States expanded its territorial control across the North American continent and established an empire of its own. Racialized thinking persisted at the heart of U.S. foreign relations in the twentieth century, influencing everything from the administration of empire in the Caribbean and the Pacific and commercial expansion into central America to the decision to use nuclear weapons against Japan, the diplomatic path to war in Vietnam, and more. The defeat of fascism and Nazism in World War II posed serious challenges to the premises of white supremacy, while ushering in a Cold War that would become inextricably bound with the process of decolonization. American diplomats were forced to reckon with the challenges domestic racism posed to their foreign policy goals, while black internationalists became increasingly involved with global struggles for liberation and equality. While the global color line grew more hotly contested, white supremacist thinking proved as enduring as it was mutable. This upper division tutorial surveys leading scholarship on a range of topics that centers race as a category for understanding American foreign relations.

Class Format: This tutorial can be taken entirely remotely. On campus students may request in-person tutorial sessions, pending the agreement of other students and the availability of appropriate rooms.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: None, open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior coursework related to U.S. foreign relations. If the course

is overenrolled, students may be asked to complete a questionnaire to determine enrollment.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

HIST 483 (S) Sport and Diplomacy (DPE) (WS)

Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the-field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

Class Format: This course will be remote. If conditions allow, I may set up in-person tutorial sessions for on-campus students.

Requirements/Evaluation: Students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-3 page written critique

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with some prior course work in foreign relations and/or international history

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will each write six (6) tutorial papers of 5-7 pages and six (6) critiques of 2-3 pages. The professor will provide weekly written feedback on each of these papers, and they will be discussed at length in tutorial sessions.

Difference, Power, and Equity Notes: Modern sport emerged in a colonial context as a means of asserting and maintaining control and has become a key site of contestation over the color line in both domestic and international contexts. International sport competitions like the Olympics and the World Cup have served as proxies for military power and showcases for national cultures in ways that have both revealed and concealed ongoing racial tensions. This course explores diversity, power, and equity in international sport.

HIST 484 (F) Victorian Psychology from the Phrenologists to Freud (WS)

Although the Victorian era has traditionally been considered a psycho-social model of emotional inhibition and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This course will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course will concentrate on the close reading and analysis of primary documents from the era.

Class Format: Once they have been selected, student pairs will meet with the professor for an hour at a regularly scheduled time each week.

Requirements/Evaluation: Students will meet with the instructor in pairs once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Junior and senior History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: Fulfills the department's seminar requirement for graduation with a degree in History

Distributions: (D2) (WS)

Writing Skills Notes: As a tutorial, with each student writing a paper every other week, this course meets the writing skills requirement.

HIST 485 (S) Freud: A Tutorial (WS)

Cross-listings: PSYC 158 HIST 485

Primary Cross-listing

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, *Civilization and Its Discontents*. In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was "right" or "wrong" or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

Class Format: students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

Requirements/Evaluation: student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: fulfills History's 400-level graduation requirement

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 158 (D2) HIST 485 (D2)

Writing Skills Notes: As a tutorial, this course is by definition writing skills, both in terms of the number of papers that students will produce (six) and in terms of the focus on writing during every tutorial session. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 486 (F) Islam in European Culture from Muhammad to Modernity

From the Crusades to modern colonialism, the relationship between Muslims and Western Christians has often been recounted as the clash of two

opposing civilizations, a history of warfare and of incompatible values. This tutorial takes a different point of departure, namely the recent scholarly recognition that relationships between Muslims and Western Christians were often rooted in the intimacy of frequent interaction. We will delve into the many ways in which Muslim peoples shaped European culture from the Middle Ages to the present. We will explore different domains, from one of the first translations of the Qur'an into any language, the Latin version done in Toledo in 1143, to the many goods made by Muslim craftsmen that filled the homes of Renaissance Europe, and the roles of early modern Muslims as captives, slaves, diplomats, travelers, and converts. In the modern period, Muslims continued to inflect European culture both as colonial subjects and as domestic minorities, producing and inspiring art, imaginative literature, and critiques of European power. Our investigation will encompass music, visual art and film in addition to written works. How do we make sense of this intricately interwoven history? And what are its legacies for the present? Sources both primary and secondary will include Leo Africanus, Lady Montagu, Montesquieu, Mozart, al-Tahtawi, Flaubert, Sayyid Qutb and Fatima Mernissi.

Requirements/Evaluation: Five tutorial papers (5-7 pages.) and five shorter responses; occasional presentations.

Prerequisites: History majors; juniors and seniors.

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, a statement of interest will be requested.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

HIST 487 (S) Archive Stories (WS)

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, *Archive Fever*, historians, archivists, and cultural theorists have been asking questions *about* the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is *not* a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

Requirements/Evaluation: each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final paper about their work on the Williams archives

Prerequisites: open to all junior and senior History majors and others with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 6- to 7-page essays (one every other week) that will be critiqued, both in writing and orally, by the instructor and the student's tutorial partner. The student will also write a final 6- to 7-page essay reflecting on the nature of Williams archival practices in the context of the readings undertaken during the course of the tutorial. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 488 (F) Fictions of African American History (DPE) (WS)

Cross-listings: HIST 488 AMST 488

Primary Cross-listing

This course examines African American fiction, largely from the late 19th and very early 20th century. These Black authors, none of them professional historians, try to bring African American History to light in an era before this history was taken seriously by the white academy. Many of the authors we examine were activists and journalists who set their novels and short stories during Slavery and Emancipation. We will consider inherently radical act of reading and writing in a society where black literacy was illegal until after the Civil War. Alongside the fiction we will read modern historiography of the era. We will also delve into some of slave narratives published after Emancipation. Readings will include works by Booker T. Washington, James Weldon Johnson, Charles Chesnutt, Paul Laurence Dunbar, and Sutton Griggs. This is a tutorial and will be taught online.

Requirements/Evaluation: Every week a student will write either an essay or a critique. For the final assignment students may either write a review of 2-3 works of historiography OR substantially revise an essay or critique they did during the semester.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History, Africana, and American Studies Majors will have preference. As well as students who have never taken a tutorial.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 488 (D2) AMST 488 (D2)

Writing Skills Notes: Students will write every week (essays and critiques) and receive feedback from their partners and from the professors. The final assignment of the semester is major revision of a one essay or critique. Students will receive feedback on their paper's organization and argument as well as points of style. Since we will be reading both fiction and historiography, we will discuss as a group the different challenges each form poses to essay writing.

Difference, Power, and Equity Notes: African Americans writing during this time lived under the laws and customs of Jim Crow and White Supremacy. Lacking political power, they turned to the power of the written word. We will evaluate the way writing and fiction helped ameliorate (or not) the racial power structures.

HIST 489 (F) Appropriating History. Who Owns the Past? (DPE) (WS)

Cross-listings: HIST 489 ARAB 408

Primary Cross-listing

Who owns the past? How have modern states appropriated history? The political use of history is a critical ingredient in any nationalist discourse. In such narratives, the selective utilization of archaeology and ancient history often serves important functions in articulating a conscious and deliberate national history. Thus, in nationalist renderings, archaeological sites and artifacts are not merely relics of the past; they can also be potent and conspicuous symbols of national identity for the modern nation-state. In the Middle East, with its rich archaeological heritage, the relationship among politics, nationalism, and archeology has been particularly strong and interesting. This tutorial addresses the powerful nexus between history and nationalism with a special emphasis on the Middle East. It will explore the battle over who controls history and the "stuff" of history such as antiquities, land, heritage sites, and museum exhibitions and how that control has expressed itself in several Middle Eastern countries, including Iraq, Israel, Turkey, Egypt, Lebanon, and Iran. Furthermore, it will discuss how archaeology entered the political discourse, the ethics of repatriation and appropriation, and archaeology's role in contested terrains and political disputes.

Class Format: This tutorial can be taken entirely Remote. On campus students may request in-person tutorial sessions, pending the agreement of other students and the availability of appropriate rooms.

Requirements/Evaluation: Format: tutorial. Requirements: 5-7 page essays or 2-3 response papers due each week

Prerequisites: None, though a demonstrated interest in the Middle East is important.

Enrollment Limit: 10

Enrollment Preferences: Seniors and to History and Arabic Studies majors.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 489 (D2) ARAB 408 (D2)

Writing Skills Notes: As a tutorial, students will receive extensive feedback on their writing each week both from the professor and their partner. Further, students will be given the opportunity to rewrite two of their papers in light of the criticism that they receive during the semester.

Difference, Power, and Equity Notes: This is a tutorial on a particular form of power, namely how the powerful seek to control the past. The ultimate question that this tutorial seeks to answer is: who owns the past? Which history is emphasized and which histories are overlooked? How do modern nation states in different Middle Eastern states cherry-pick the past in order to maintain and develop a national narrative that is suitable to the political and economic powers often at the expense of religious or linguistic minorities.

HIST 490 (S) Memory, History, and the Extermination of the Jews of Europe (WS)

Cross-listings: HIST 490 JWST 490

Primary Cross-listing

This course is about the postwar legacy of the Holocaust. Nazi Germany's extermination of European Jews has become a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.

Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

Requirements/Evaluation: Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written paper on the issues raised in the tutorial to cap off the semester's work.

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

TUT Section: T1 TBA Alexandra Garbarini

HIST 491 (F) The Suburbs

Cross-listings: AMST 490 HIST 491 ENVI 491

Primary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Remote for fall 2020. As in a regular semester, I'll work with enrolled students to set up a schedule for our tutorial meetings, which will occur online. At a couple junctures during the semester, we will also try to meet online as a whole class, as well as have a few small group discussions.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

HIST 492 (S) Revolutionary Thought in Latin America

For much of Latin America's postcolonial history, political and business elites in the United States have viewed the region as a source of revolutionary threats. Too often histories of actual revolutionary movements and the ideas they promulgated have followed either the self-serving narratives that the revolutionaries have laid out or the similarly limited stories composed by their opponents. This tutorial, by contrast, will delve into the complex, contingent, and at times counterintuitive history of revolutionary thought in modern Latin America. Our readings and discussions will carry us from the nineteenth century to the rise of the "New Left" in the last few years. Throughout the course our principle goal will be to examine the internal logic of the most influential programs of revolutionary thought as well as their relationship to circumstances external to them, both in their home regions and globally. At the same time, we will consider the human or moral promise and price of revolutionary options: did the proposed or alleged aims of revolutionary ideals justify the costs they would impose?

Class Format: students will meet with the instructor in pairs for an hour each week

Requirements/Evaluation: each student will write and present a 5- to 7- page essay on the readings or offer an oral critique of the work of their partner each week; evaluation will be based on written work and analysis of their partner's work

HIST 493 (F) Senior Thesis: Research Seminar

This seminar is intended solely for writers of senior theses during their first semester. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

Requirements/Evaluation: class participation and completed written work, and will determine if a student will continue in the thesis program

Prerequisites: limited to seniors accepted into the History Department's Thesis Program

Enrollment Limit: none

HIST 495 (S) Stalinism (WS)

The quarter century during which Joseph Stalin ruled the Soviet Union witnessed some of the twentieth century's most dramatic events: history's fastest plunge into modernity, an apocalyptic world war, and the emergence of a socialist state as a competitive world power. This tutorial will offer students a deep dive not only into the historical depths of the Stalin era but into the gloriously complex historiographical debates that surround it. Some of the questions that will animate the readings, writings, and discussions that tutorial students will engage in are as follows: Did Stalin depart from or represent a continuation of the policies introduced by his predecessor Vladimir Lenin? Did he rule in a totalitarian fashion or in ways comparable to

other twentieth century regimes? Were his policies destructive or possibly productive? And perhaps most boggling of all: why did no one resist Stalinist rule?

Class Format: TBD

Requirements/Evaluation: Each week, a student either will write a 5-7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work. Both tutorial partners will be responsible for completing 200-300 pages of reading each week.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 5-to-7-page papers on which the instructor will provide written feedback regarding grammar, style, and argument. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 496 (F) Gandhi: History, Ideas and Legacy (WS)

Cross-listings: REL 412 LEAD 412 ASIA 412 ASST 412 GBST 412 HIST 496 LEAD 322

Primary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 10 (W) The Mohawk Trail: History Here and Everywhere

Cross-listings: HIST 10 AMST 10 ENVI 10

Primary Cross-listing

History is everywhere, all around you, no matter where you are. That's because history happens in place, and in specific places. Some places are spoken of as particularly "historical" but every place has its stories. This Winter Study course will use the case study of the Mohawk Trail road and region to explore the ways that history happens in place. Students will learn how to see the past all around them and apply these skills to a particular place of their choosing, whether along the Mohawk Trail, in or around the local Williamstown area, their hometown, or any other place they know well. We will meet twice a week for four hours where we'll discuss readings, visit places along the Mohawk Trail, and practice the various skills of reading the landscape to better understand the past. Throughout the course students will analyze and conduct research on their particular place, present their preliminary findings to the class, and either write a traditional final research paper or produce a creative project. During the regular semester it might seem that the past is preserved in written documents and conveyed in books. That's true but there are all sorts of ways that we can see the past in place outside the classroom. This is what we'll explore together in this course.

Requirements/Evaluation: research a particular place & present findings to the class; option to write a final research paper or to produce a creative project based on their analysis & research

Prerequisites: none

Enrollment Limit: 11

Enrollment Preferences: student questionnaire

Grading: pass/fail only

Unit Notes: Chris Slaby is currently a Ph.D. candidate in the American Studies Program at the College of William & Mary, where he is writing a dissertation on the history of the Mohawk Trail and Mohican Homelands. His scholarship exists at the intersection of Native American and Indigenous Studies and the environmental humanities.

HIST 12 (W) Civil Disobedience

Cross-listings: HIST 12 REL 12

Primary Cross-listing

Are citizens obligated to obey unjust laws? When are they justified in breaking them? Is civil disobedience an effective political strategy? Does it matter, or is bearing witness against injustice enough? And who gets to determine whether a law is 'unjust' in the first place? Such questions have long bedeviled those looking to transform our world. In this course, students will grapple with their many answers. In a seminar-style format, we will explore case studies of civil disobedience in the United States, reflecting on the history of its theory and practice. In the process, we will pay particular attention to how religion has shaped civil disobedience in the U.S. context. Sources will include classic texts, films, and guest speakers. We will meet two mornings per week, for a total of six hours. Students will be evaluated based on their participation and a final project.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: in order of seniority, with a preference for History and Religion majors

Grading: pass/fail only

Materials/Lab Fee: none

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 13 (W) Eyewitness to the Civil Rights Movement: Mississippi 1964-65

During sixteen months in 1964-65 I worked as a civil rights organizer in rural Mississippi with the Student Non-violent Coordinating Committee (SNCC). I witnessed and aided in the heroic efforts by black citizens to dismantle the pervasive structure of Jim Crow that had oppressed them for generations. I met relatively uneducated people with the stature of giants. What I encountered was an apartheid America--a vicious police state reinforced by government and vigilante violence--beyond the understanding of most Americans and certainly beyond the imagination of young people today. The course will explore this transformative moment in recent American history thru documentary film, popular music of the time and class discussion. Topics include nonviolence and armed self-defense, the role of the black church, women and whites, Malcolm X and Black Power and the third party politics of the Mississippi Freedom Democratic Party. Students will read and discuss three books. It is the intent of the instructor to convey the immediacy that only first person experience can convey.

Requirements/Evaluation: final project or presentation; participation in class discussion

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: random drawing

Grading: pass/fail only

Unit Notes: Chris Williams worked as the college architect for many years. Now retired, he lives with his wife and hound dog on the backroads of Vermont.

Materials/Lab Fee: none

HIST 14 (W) Game of Thrones, ca. 850 BCE: Empire, Religion, & Palace Intrigue in the Neo-Assyrian Reliefs @ WCMA

Two mysterious stone reliefs at WCMA once decorated Ashurnasirpal II's palace at ancient Kalhu in the heart of the world's first empire. They

prompted one scholar to remark on their "calculated frightfulness," yet religion, scholarship, fashion, epic poetry, love, sex, and court intrigue also kept company with the reliefs in their original setting. Using Williams' own Mesopotamian collection, this multidisciplinary course explores the reliefs in both ancient and modern contexts: the 3rd millennium BCE clay "cones" of Gudea of Lagash, celebrating the construction of a new temple; the missionary movement that led Williams alum D. W. Marsh (class of 1842) to Iraq, friendship with the archaeologist A.H. Layard (who excavated the palace); and Marsh's donation of the reliefs to Williams. We consider the ethics of museum collection, the artistic heritage of the Iraqi people, the devastation of Nimrud by ISIS, and coming full circle, the 2019 WCMA exhibit in which Iraqi-American artist Michael Rakowitz recreated reliefs that had been lost, stolen or destroyed. The course emphasizes hands-on experience--from reading the "Epic of Gilgamesh" (for literary and cultural clues), studying Ashurnasirpal's "Banquet Stele" (describing the ancient world's most lavish party), writing cuneiform on clay, and a celebratory Mesopotamian feast. The course closes with an overnight field trip for a private tour of Yale's Babylonian Collection, the Yale University Museum of Art, and New Haven pizza. A three-part "Flash Akkadian" course, offered separately and open to the community, teaches students to decipher and completely translate the cuneiform inscription on a Shalmaneser III brick from the palace. HIST 14 meets for 2-hour sessions twice-weekly. Wide-ranging final projects, which may include attending "Flash Akkadian," will be chosen in consultation with the instructor.

Class Format: afternoons

Requirements/Evaluation: multiple short, written class presentations count toward the final project of a 10-page paper or its equivalent on a subject chosen in consultation with the instructor

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in consultation with the instructor

Grading: pass/fail only

Unit Notes: Alison Acker Gruseke is a Williams graduate (1982), former book editor, and now holds a PhD from Yale's department of Religious Studies. She specializes in the study of the Hebrew Bible (Old Testament), including its ancient religious, political, literary, cultural, historical, and geographical contexts. She has taught and lectured in both undergraduate and graduate settings, including at Williams.

Materials/Lab Fee: \$420

HIST 15 (W) Homer in Vietnam

This course will examine the impact of combat trauma on American soldiers during the war in Vietnam, and how that trauma affected their return to the United States. We will read two books that explore these issues through lens of Homer's *Iliad* and *Odyssey*, Jonathan Shay's *Achilles in Vietnam* and *Odysseus in America*. We will discuss how Homer's classics have come to represent the trauma of war and coming home from the Trojan War to the current wars in the Middle East and beyond. In addition to discussing these two books, we will also view a number of films that address these issues. The class will be primarily based on the readings and films.

Class Format: afternoons

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: military veterans will be given priority should the class be overenrolled

Grading: pass/fail only

Materials/Lab Fee: none

LEC Section: 01 TR 1:00 pm - 2:50 pm Scott Wong

HIST 16 (W) Grey Matter

Cross-listings: HIST 16 DANC 16 ARTS 15

Primary Cross-listing

Students will work collaboratively to contribute to an episode of *Grey Matter*, an experimental video series which weaves together past and present stories of Williamstown MA, as creative disruption to the settler colonial mythologies that shape it. Blending narrative and documentary, *Grey Matter* takes its name from both the local Greylock Mountain and the material in the brain that controls memory and perception, asking hyper-local questions about race, class, and belonging in white-majority small New England towns. The show is co-created by artist Sacha Yanow, a white jewish queer whose parents moved from NYC to Williamstown to raise kids; and Bilal Ansari, a Black Muslim chaplain and community organizer whose family goes back three generations in Williamstown. The show is set in 1905 Williamstown and tells the story of White Oaks--a once vibrant enclave for formerly enslaved people, Indigenous peoples and multiracial residents--and the church founded by Williams College professor Albert Hopkins to "clean up the neighborhood". The first three episodes were filmed in June 2021. This winter study course will engage students in the research and envisioning of the next episode of the series. It will focus on the overall themes the show, and will involve hybrid forms of storytelling. Required Readings will be excerpts from: Butler, Judith *Frames of War: When Is Life Grievable?*; Appadura, Arjun *Fear of Small Numbers*; Jones, R. William *Is God A White Racist?*; Stoler, Ann *Along the Archival Grain: Epistemic Anxieties and Colonial Common Sense*; Wilder, Craig Steven *Ebony and Ivy: Race, Slavery, and the Troubled History of America's Universities*; Hendrick Aupaumut *History of the Muh-he-con-nuk Indians*; Dorothy Winona Davids *A Brief History of the Mohican Nation, Stockbridge-Munsee Band*; Video: Stockbridge-Munsee Band of Mohicans, Words of Our Ancestors: Revisiting Indiantown.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: If the course is over-enrolled, students will be chosen based on responses to an emailed questionnaire

Grading: pass/fail only

Unit Notes: Bilal Ansari is an organizer whose family history in Williamstown goes back three generations. He currently serves as Assistant Vice President for Campus Engagement at the Office of Institutional Diversity Equity and Inclusion at Williams College. Sacha Yanow is a NYC-based performance artist and actor, born and raised in Williamstown. Their work has been presented by venues including MoMA PS1, Danspace Project, Joe's Pub, and the New Museum in NYC; and Festival Theaterformen in Germany.

Materials/Lab Fee: none

HIST 17 (W) The 16th- to 17th-Century World of Printed Texts and Images

Imagine yourself back in a time without the computer technology that enables you to create, print out or distribute instantaneously innumerable illustrated texts with the click of a few buttons. In this multifaceted course, we will explore the 16th- to 17th-century world of printed books and images. Your eyes will be trained to recognize and appreciate the primary techniques in which printed images were made at this time. While becoming acquainted with the ways in which texts were printed by hand, you will learn how to examine rare books and evaluate how they were put together. Finally, you will be taught to think like a savvy publisher, endeavoring to earn a living by profiting from the rapidly expanding, international market for a diverse range of illustrated texts. In order to achieve these goals and fully appreciate what entrepreneurial artists, printers, and publishers accomplished centuries ago, lectures and assigned readings will be complemented by visits to local print collections and the consultation of illustrated rare books in the Chapin Library. For your final project, you will be expected to select an illustrated book from the Chapin collection and prepare a presentation on it for the class in which you highlight the topics addressed during the lectures. Evaluation will be based upon this presentation, in addition to class participation. I look forward to delving into the fascinating world of hand-crafted books and prints with you.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by class year (oldest students first), and otherwise randomly

Grading: pass/fail only

Unit Notes: Karen Bowen is an art historian, specialized in the study of prints, printmaking, and book illustration in the early modern period. She is currently preparing a book on the European print trade in the 16th and 17th centuries.

Materials/Lab Fee: none

Winter 2022

HIST 19 (W) Fresh Purpose for Old Paper: Curating Special Collections in the 21st Century

How do our library's collections represent the past and present of the many Williams communities? What makes a library's books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing? This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable--and not just in terms of their cost. We'll consider how historical events are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and consult with booksellers and curators at a peer institution. There will be one or two field trips. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections. Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures & Book History at the Univ of Edinburgh; she recently completed her PhD in Historical Geography. Lisa Conathan is Head of Special Collections at Williams, overseeing the Chapin Library of Rare Books and the College Archives. She holds a BA in Linguistics from Dartmouth, a PhD in Linguistics from UC Berkeley, and a Master of Library Science from the University of Maryland. Lisa Conathan is Head of Special Collections at Williams College. She holds a BA in Linguistics from Dartmouth College, a PhD in Linguistics from the Univ. of California, Berkeley, & a Master of Library Science from the Univ. of Maryland.

HIST 30 (W) Workshop in Independent Research

This course is designed for junior majors and sophomores who are considering pursuing a senior thesis in History. It can either provide students greater experience in independent research or allow for an in-depth exploration of a specific topic under consideration for the thesis. The course will focus on key methods of historical research, such as defining a topic, familiarizing oneself with historiography, and finding and using primary sources. Students may pursue any topic, and assignments may be modified to fit students' particular needs and interests. The majority of class time will consist of individual meetings with the professor as well as consultations with librarians and other experts in your field. Students are expected to devote considerable time outside of class to independent research. The final assignment will be a 10-page paper, which can either be a detailed prospectus for a senior thesis or a research paper.

Class Format: independent research

Requirements/Evaluation: 10-page paper; weekly short assignments

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: instructor will send students questions over email about their research plans; students with evidence of more formulated plans will receive preference

Expected Class Size: 5

INTERDISCIPLINARY STUDIES (No Div)

This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar's deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

INTR 219 (F) Women and Girls in (Inter)National Politics (DPE)

Cross-listings: INTR 219 AFR 217 WGSS 219 AMST 217 LEAD 219

Primary Cross-listing

This tutorial focuses on the writings and autobiographies of women who have shaped national politics through social justice movements in the 20th-21st centuries. Women and girls studied include: Fannie Lou Hamer, Shirley Chisholm, Safiya Bukhari, Erica Garner, Greta Thunberg, Malala Yousafzai, Marielle Franco, Winnie Mandela.

Requirements/Evaluation: Weekly 5-page primary analytical papers and 2-page response papers.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Juniors and seniors, sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

ROMANCE LANGUAGES (Div I)

ITALIAN

Chair: Professor Brian Martin

Visiting Assistant Professor: M. Monserrati

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cflc.williams.edu/italian.

RLIT 101 (F) Elementary Italian

This course is designed for beginners. Its goal is to give students the opportunity to develop a basic oral/aural and reading/writing proficiency in Italian. During the semester, you will be given training in grammar, pronunciation, aural-oral skills, reading, and writing in Italian by studying a wide range of communication patterns and real-life situations. At the end of the semester, you will be able to use Italian to talk about yourself, describe your family, town, friends, and discuss your interests. You will also be able to talk in Italian about the present and past events and converse with your peers about your daily activities. Your listening skills will allow you to understand short dialogues and conversations, watch clips from mainstream Italian films, and write short compositions. *Conducted entirely in Italian.* The course is taught in person.

Class Format: five hours a week with the professor

Requirements/Evaluation: participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Prerequisites: none; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: students registered for RLIT 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken

Distributions: (D1)

Fall 2021

SEM Section: 01 M-F 10:00 am - 10:50 am Michele Monserrati

RLIT 102 (S) Elementary Italian

This course is designed for beginners who already have some basic knowledge of Italian. Its goal is to give students the opportunity to review and expand their oral/aural and reading/writing proficiency in Italian. During the semester, you will continue to learn grammar, vocabulary, pronunciation while improving your aural-oral skills, reading, and writing in Italian. The instructor will present you with a wide range of communication patterns and real-life situations to achieve these goals. At the end of the semester, you will be able to use Italian to talk about yourself, your life, describe your town and history, dreams and interests, and express your opinion on complex topics. You will also be able to talk in Italian about the present, past, and future events and express doubts and hopes. You will understand more complex conversations and clips from mainstream Italian films and write more extended compositions. *Conducted entirely in Italian.*

Class Format: This will be an hybrid course. Students will meet four times a week with me and once a week with the TA in small groups of 2-3 students.

Requirements/Evaluation: participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Prerequisites: RLIT 101; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

Distributions: (D1)

SEM Section: 01 M-F 10:00 am - 10:50 am Michele Monserrati

RLIT 105 (F) Pathway to Proficiency

The course taught in Italian aims primarily to fine-tune the student's speaking, reading, and writing ability while introducing the formal study of Italian culture and society by analyzing short literary texts, articles, films, and plays. This course will also explore Italy's lesser-known cultural and natural sites in an attempt to highlight what Italy has to offer in terms of eco-friendly and sustainable tourism and cultural diversity. In the wake of *Black Lives Matter's* quest for social justice, a part of this course will be dedicated to Italian black writers and artists to explore how the Italian colonial past affects Italy's racial discourse and the construction of its national identity. Students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. The course is taught in person.

Requirements/Evaluation: oral presentations, midterm and final exams, tests, compositions, participation

Prerequisites: RLIT 101/102 or by permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Students from 101/102 classes, as well as study-abroad returnees.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

Winter Study -----

RLIT 88 (W) Italian Sustaining Program

Students registered for RLIT 101-102 are required to attend and pass the Italian Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

Grading: pass/fail option only

Winter 2022

LAB Section: 01 TBA 9:00 am - 9:50 am Michele Monserrati

RLIT 99 (W) Independent Study: Italian

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES
CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES

(Div I & II, see explanation below)

Chair: Professor Li Yu

- Cecilia Chang, Frederick Latimer Wells Professor of Chinese; on leave 2021-22
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese
- Cornelius C. Kubler, Stanfield Professor of Asian Studies
- Christopher M. B. Nugent, Professor of Chinese
- Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; on leave 2021-22
- Li Yu, Professor of Chinese

Visitors:

- Eun Young Seong, Visiting Assistant Professor of Japanese

Language Fellows:

Yi-Zhi Chen

Tianwen Han

Teaching Associate:

Xian Fung

Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China's diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take approved electives related to Chinese language and culture (including additional CHIN core electives, additional Asian language courses, or Chinese studies courses offered in art, comparative literature, history, music, political science, religion, etc.) to replace the language course requirement. Potential electives can be found under the course listings for the [program in Asian Studies](#).

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential electives can be found under the course listings for [the program in Asian Studies](#).

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Potential

electives can be found under the course listings for [the program in Asian Studies](#).

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

PLACEMENT TEST

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their studies of these languages at the college should take a placement test before they pre-register for a language course. Students who wish to take the Chinese placement test can self-enroll in a GLOW course at <https://glow.williams.edu/enroll/JTHENA>. Students who wish to take the Japanese placement test should contact the Japanese Coordinator.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student's grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

COVID-19 CHANGES

Due to the pandemic, the department has reduced the number of courses required for its majors for the graduating classes of '21, '22, and '23. For these years, the minimum requirements are nine courses as follows:

Chinese major: CHIN 101, 102, 201, 202, 301, 302, 401, 402, 312.

Japanese major: JAPN 101, 102, 202, 202, 301, 302, 401, 402, one approved elective.

East Asian Languages and Cultures major: at least six CHIN/JAPN language courses (or a minimum proficiency equivalent to the completion of 302), two CHIN/JAPN core electives, and one approved elective.

Students with higher language proficiency who are placed out of any of the core language courses (101 through 402) can take an equal number of faculty-approved electives taught either in Chinese/Japanese or in English on literature, linguistics, culture studies or related Chinese or Japanese

studies disciplines (e.g., art history, history, political science) to fulfill the core language requirement.

Students who plan to study abroad either during the summer or during their junior year MUST consult with department faculty for advice.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Grants for Summer Study in Asia which fund selected students' summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar's office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

- "DALLC Majors and Faculty" (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):

JAPN 101 (F) Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily classroom performance, homework, quizzes, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

Distributions: (D1)

JAPN 131 (F) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: Linguistics

Not offered current academic year

JAPN 201 (F) Intermediate Japanese

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 101-102 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

JAPN 220 (S) Being Korean in Japan (DPE)

Cross-listings: JAPN 220 ASST 220 ASIA 220

Primary Cross-listing

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

Requirements/Evaluation: attendance/participation; short written responses; midterm essay; group presentation; final essay

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to Asian Studies and Japanese majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 220 (D1) ASST 220 (D1) ASIA 220 (D1)

Difference, Power, and Equity Notes: This course looks at the dynamics of unequal power in the social marginality of Korean immigrants in Japan. Exploring historical contexts, students will analyze how the ethnic particularity of the Korean minority has engaged with and against Japanese society. Students will also examine how we might associate the minority culture and history with extensive global issues, including the relationships between environmental problems and minorities, wars and women, and imperialism and migration.

Attributes: GBST Borders, Exiles + Diaspora Studies Electives GBST East Asian Studies Electives

Not offered current academic year

JAPN 223 (S) Japanese Food Culture in a Global Context

Cross-listings: JAPN 223 COMP 223

Primary Cross-listing

The burgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

Requirements/Evaluation: active class participation, three response papers, two small projects (including descriptions and class presentations), and one research paper and presentation

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 223 (D1) COMP 223 (D1)

Not offered current academic year

JAPN 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)

Cross-listings: ASIA 240 JAPN 240

Primary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 240 (D1) JAPN 240 (D1)

Difference, Power, and Equity Notes: This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

Spring 2022

SEM Section: 01 MR 2:35 pm - 3:50 pm Eun Young Seong

JAPN 258 (S) Language and Literacy Development

Cross-listings: PSYC 258 JAPN 258

Primary Cross-listing

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: Linguistics

Not offered current academic year

JAPN 260 (F) Japanese Theatre and its Contemporary Context

Cross-listings: THEA 262 COMP 262 JAPN 260

Primary Cross-listing

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? *All readings and discussion will be in English.*

Class Format: discussion

Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper

Prerequisites: none; open to all

Enrollment Limit: 20

Expected Class Size: 15

Attributes: GBST East Asian Studies Electives

Not offered current academic year

JAPN 274 (F) Confronting Japan

Cross-listings: JAPN 274 COMP 274

Primary Cross-listing

This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post 3-11 recovery, and international issues, related to Japan's shifting roles within East Asia and beyond. Discussions will untangle the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested.

Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Japanese majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

LEC Section: 01 MWF 8:30 am - 9:45 am Shinko Kagaya

JAPN 302 (S) Upper-Intermediate Japanese

This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while

consolidating the foundations built in Elementary and Intermediate Japanese. In this course, students work on the reading skills for comprehending primary source materials and expository prose of intermediate difficulty; the communication skills for conducting practical conversations and presentations; and the listening skills for interpreting various types of information.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 301 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

LEC Section: 01 MWF 8:30 am - 9:45 am Shinko Kagaya

JAPN 401 (F) Advanced Japanese

This course is a continuation of Japanese 301 and 302. Students will develop the four skills of speaking, listening, reading, and writing in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

Class Format: three 75-minute classes (hybrid)

Requirements/Evaluation: daily performance, homework, quizzes and projects (presentations)

Prerequisites: JAPN 302 or permission of instructor

Enrollment Limit: 8

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

LEC Section: 01 MWF 11:00 am - 12:15 pm Shinko Kagaya

JAPN 402 (S) Advanced Japanese

A continuation of Japanese 401, developing speaking, listening, reading, and writing skills in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes and projects (presentations)

Prerequisites: JAPN 401 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2022

LEC Section: 01 MWF 11:00 am - 12:15 pm Shinko Kagaya

JAPN 406 (F) Advanced Japanese: JLPT 1, 2 or 3

This course is for advanced students, especially for those who would aim to pass Level 1, 2, or 3 of the Japanese Language Proficiency Test (JLPT) offered by the Japan Foundation and Japan Educational Exchanges and Services. JLPT not only measures examinees' skill level, but has been used as a form of qualification, and also often for employment screening and evaluation. Students will work on all five areas of chōkai (listening comprehension), dokkai (reading comprehension), bunpō (grammar), goi (vocabulary) and kanji, based on their skill level.

Requirements/Evaluation: daily preparation and in-class performance, a weekly journal, and taking the JLPT exam suited to your level in December

Prerequisites: any one of Japanese 300- or 400-level courses or permission of instructor

Enrollment Limit: 5

Expected Class Size: 4

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

JAPN 407 (F) An Exploration of Japanese Language and Culture

Cross-listings: JAPN 407 ASIA 207 ASST 207

Primary Cross-listing

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

Prerequisites: none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

Distributions: (D1)

Winter Study -----

JAPN 25 (W) Exploring Kyoto Culture: How 1200 years of cultural history continues throughout today

Kyoto, the former imperial capital of Japan has 1200 years of history. It is referred to as Japan's cultural treasure house and thrives on its ancient heritage in architecture, gardens, religion, performing and culinary arts and craftsmanship. Yet Kyoto's appearances can be deceiving. You will find a monumental temple designated as a UNESCO World Heritage site under the shadow of ultramodern high-rising buildings. There is an enigmatic quality to the city with this juxtaposition of old and new. This unresolved tension between modernization and tradition is Kyoto's fascination. The purpose of this travel course is to explore the cultural history of Kyoto and how it is perpetuated and transformed in a modern era. Students will visit various sites and artists/artisans in Kyoto. Through these experiences, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course will be conducted on campus. Students conduct research in pairs to acquire additional in-depth knowledge on one selected area of Kyoto's art/craftsmanship. For the second and third week, the class will travel to Kyoto. We will first explore the city of Kyoto to develop an idea of how its cultural history progressed from courtly culture in the Heian period, to samurai tradition in the Medieval periods, and aspects of religious ceremonies, Noh Theater and tea ceremonies. We will also visit four to five artisan/artist studios, including hands on experiences at some studios. Students are expected to participate in all the scheduled activities, keep a daily journal, and participate in daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern art/craft/performance to the local community and to the Kyoto artists/artisans at a public forum. The class will return to campus towards the end of the third week.

Requirements/Evaluation: post daily blog to the course website and a public PowerPoint presentation in Kyoto

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: personal statements and completion of course(s) related to Japan

Grading: pass/fail only

Materials/Lab Fee: \$3,670

JEWISH STUDIES (Div II)

Chair: Professor Edan Dekel

Advisory Committee

- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; affiliated with: Religion Department
- Alexandra Garbarini, Professor of History
- Jeffrey I. Israel, Chair and Associate Professor of Religion

THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

Gateway Courses (can also count as core courses):

Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

Croghan Professorship

Each year, in addition to the regular course offerings listed above, Williams sponsors the Croghan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity

OVERSEAS STUDIES

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad program towards up to two core requirements.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Gateway course and Capstone course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

FUNDING

The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman '50, Samuel Bronfman II '75, and Matthew Bronfman '80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College's formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener '56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener '56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.

JWST 101 (F) Judaism: Before The Law

Cross-listings: REL 203 JWST 101

Secondary Cross-listing

This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Kafka's *The Trial* with his parable "Before The Law," Woody Allen's film *Crimes and Misdemeanors*, and ethnographic accounts of contemporary Jewish observance. *All readings will be in translation.*

Requirements/Evaluation: class participation, three short papers, and a final longer paper

JWST 201 (F) The Hebrew Bible

Cross-listings: JWST 201 COMP 201 REL 201

Secondary Cross-listing

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: discussion

Requirements/Evaluation: class participation, short written assignments, and two to three longer papers

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Jewish Studies concentrators, Religion and Comparative Literature majors

Expected Class Size: 40

JWST 202 (S) Moses: Stranger in a Strange Land

Cross-listings: COMP 214 REL 202 JWST 202

Secondary Cross-listing

As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. *All readings are in translation.*

Requirements/Evaluation: class participation, short written assignments, and two or three longer papers

JWST 205 (S) Ancient Wisdom Literature

Cross-listings: JWST 205 CLAS 205 REL 205 COMP 217

Secondary Cross-listing

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of *hokhmah*, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's *Works and Days*, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's *Poor Richard's Almanack*. *All readings are in translation.*

JWST 206 (S) The Book of Job and Joban Literature

Cross-listings: REL 206 JWST 206 COMP 206

Secondary Cross-listing

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. *All readings are in translation.*

Class Format: For the spring of 2021, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.

Requirements/Evaluation: Evaluation will be based on class participation, weekly short written assignments, and two longer papers.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled, preference will be given to students who have already taken a course in biblical literature.

Not offered current academic year

JWST 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis

Cross-listings: COMP 250 REL 207 JWST 207 CLAS 207

Secondary Cross-listing

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to some continuations of these variant traditions in medieval literature, with particular attention to the material on the figures of Cain and Noah. *All readings are in translation.*

Class Format: For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.

Requirements/Evaluation: Class participation and several writing assignments.

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: If the class is overenrolled, preference will be given to students who have already taken a course in Biblical literature.

Expected Class Size: 12

JWST 208 (S) Genesis: The Family Saga

Cross-listings: COMP 207 REL 208 JWST 208

Secondary Cross-listing

The Book of Genesis has rightly been described as the masterpiece of Hebrew biblical narrative. In particular, the continuous tale that begins with Abraham and Sarah and extends four generations to the children of Jacob, Leah, and Rachel is one of the most extraordinary examples of literary artistry in any time or tradition. As one family wrestles with the promise of becoming a chosen people, the narrative explores themes of marriage, parenthood, sibling rivalry, land, violence, wandering, and, above all, the complex relationship between humanity and God. This course will examine those themes through a close reading of Genesis in translation, from Abraham and Sarah's first appearance on the scene to the death of Jacob. We will consider the text from multiple perspectives with an eye toward understanding the literary, philosophical, and psychological dimensions that continue to amaze and perplex readers to this day.

Requirements/Evaluation: class participation, a series of short writing assignments, and two longer papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students who have already taken a course in Biblical literature

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

JWST 209 (S) Jewish America

Cross-listings: REL 209 JWST 209

Secondary Cross-listing

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like *The Jazz Singer* (1927 and 1980), *Exodus* and *Annie Hall*; read John Updike's *Bech: A Book*, Philip Roth's *Operation Shylock* or Cynthia Ozick's *The Puttermesser Papers*; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's *Dearborn Independent*, the *Menorah Journal* or *Commentary*; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of *Bridget Loves Bernie*, *Northern Exposure* and *Curb Your Enthusiasm*. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and students who are interested in either of these options

JWST 219 (S) Judaism Under Ancient Greek and Roman Imperialisms

Cross-listings: CLAS 219 REL 219 JWST 219

Secondary Cross-listing

How did ancient Greek and Roman empires shape the beginnings of Judaism? In this course, we will examine how Greek and Roman imperial systems of identity, ethnicity, law, religion, and knowledge affected Judaism as a religious and cultural system. We will pay particular attention to the ways that Jews/Judaeans responded to these imperial pressures, especially as those responses articulated "hybrid" versions of Judaism that were informed both by resistance to imperial centers as well as the sheer hegemony of those cultural systems. The course thus uses (and introduces students to) postcolonial theory to study the history of Judaism under Greek and Roman empires. Readings for this course will include a wide array of ancient Jewish works, such as the books of Maccabees, Flavius Josephus, Philo of Alexandria, the Dead Sea Scrolls, and the Mishnah. The course will also include select readings from early Christian texts and postcolonial theory.

Requirements/Evaluation: active participation and preparation, papers

JWST 222 (F) The Jewish Art of Interpretation

Cross-listings: JWST 222 REL 222 COMP 211

Secondary Cross-listing

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

JWST 230 (F) Modern European Jewish History, 1789-1948

Cross-listings: HIST 230 JWST 230

Secondary Cross-listing

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and fiction.

Class Format: discussion

Requirements/Evaluation: class participation, two papers, and a final exam

JWST 249 (S) Anti-Semitism (DPE)

Cross-listings: JWST 249 REL 249

Secondary Cross-listing

This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin,

and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Requirements/Evaluation: Three 5-7 page papers, class participation

JWST 259 (S) Ethics of Jewish American Fiction

Cross-listings: ENGL 259 JWST 259 REL 259

Secondary Cross-listing

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and English majors

JWST 268 (F) Where are all the Jews? (DPE) (WS)

Cross-listings: REL 268 ARAB 363 COMP 363 JWST 268

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Class Format: The course will be offered both in-person and remotely. Students enrolled remotely are required to watch the recorded videos of the in-person sessions in order to stay abreast of the discussions that take place in the classroom and enrich their engagement with the materials assigned in the course.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 280 (F) Art at its Limits: Representing the Holocaust (DPE) (WS)

Cross-listings: COMP 280 JWST 280 GERM 280

Secondary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Rózewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.

Requirements/Evaluation: three 2-page critical responses, oral presentation, final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: German and Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

Writing Skills Notes: Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

JWST 334 (S) Imagining Joseph

Cross-listings: REL 334 JWST 334 COMP 334 ANTH 334

Secondary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of

peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: 3- to 5-page weekly response papers; 15-page final paper; class participation

JWST 339 (F)(S) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: PSCI 339 JWST 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through--and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the

Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities--as some recent commentators have--that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

JWST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)

Cross-listings: REL 335 HIST 434 JWST 434

Secondary Cross-listing

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews' diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper

JWST 490 (S) Memory, History, and the Extermination of the Jews of Europe (WS)

Cross-listings: HIST 490 JWST 490

Secondary Cross-listing

This course is about the postwar legacy of the Holocaust. Nazi Germany's extermination of European Jews has become a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.

Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

Requirements/Evaluation: Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written paper on the issues raised in the tutorial to cap off the semester's work.

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 490 (D2) JWST 490 (D2)

Writing Skills Notes: Bi-weekly 5- to 7-page- papers. Students will receive regular and individualized feedback on their writing to help them work on different writing issues throughout the semester.

JWST 492 (S) Modern Jewish Political Theory

Cross-listings: JWST 492 PSCI 375 REL 330

Secondary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

JUSTICE AND LAW STUDIES (Div II)

Chair: Lecturer in Humanities Alan Hirsch

Advisory Committee

- Melissa J. Barry, Professor of Philosophy
- Justin Crowe, Chair of Leadership Studies and Professor of Political Science; affiliated with: Leadership Studies Program
- Sara Dubow, Associate Dean of the Faculty, Professor of History; affiliated with: History Department
- William M. Gentry, Professor of Economics; on leave Fall 2021
- Nimu Njoya, Lecturer in Political Science
- James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
- Cheryl Shanks, Professor of Political Science

Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

THE CONCENTRATION

The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Other courses, not listed below, may be approved by the Chair.

Students may declare a program concentration at any point during their academic career.

Senior Seminar

In 2018-19, the senior seminar will be *The Unwritten Constitution* taught by Professor Hirsch.

STUDY ABROAD

Students who study abroad should consult with the program chair to ensure that they can complete the requirements. Courses abroad may qualify as JLST electives if appropriate.

JLST 101 (F) Introduction to Justice and Law

This course will examine various aspects of America's legal system, including its historical and constitutional underpinnings; the processes of resolving disputes, e.g., trials, plea-bargaining, and civil settlement; and the roles of diverse participants in the system, e.g., judges, jurors, litigants, lawyers, and legislators. The course will emphasize the deeply interdisciplinary nature of law, exploring the law's intersections with politics, history, economics, anthropology, statistics, psychology, philosophy, art, sports, science, religion, and cyberspace.

Class Format: lecture-discussion

Requirements/Evaluation: three papers, a final exam, and class participation; attendance is mandatory; Williams' honor code applies to all assignments

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2021

LEC Section: 01 MWF 11:00 am - 12:15 pm Alan Hirsch

JLST 272 (S) Free Will and Responsibility (WS)

Cross-listings: PHIL 272 JLST 272

Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Class Format: This tutorial will meet remotely by Zoom on a fixed weekly schedule agreed to by the instructor and participants.

Requirements/Evaluation: Five tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

Prerequisites: one PHIL course

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 272 (D2) JLST 272 (D2)

Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

IND Section: 01 TBA Alan Hirsch

JLST 401 (S) The Unwritten Constitution

"The eight thousand words of America's written constitution only begin to map out the basic ground rules that actually govern our land." So begins Akhil Amar's book *America's Unwritten Constitution*. Amar recasts the debate over whether America has a "living Constitution," a debate usually revolving around whether change in constitutional meaning requires resort to the formal amendment process or can be achieved through judicial interpretation. Amar supports the latter view, but proposes something far-reaching: history itself effectively amends the Constitution. Thus, for example, he argues that speeches by Martin Luther King and precedents set by George Washington, as well as the daily activities and assumptions of ordinary Americans, have become constitutional subtext requiring consideration when we interpret the Constitution. Is that notion convincing? Preposterous? A healthy way of understanding the inevitable intersection of law, history, and politics? A transparent excuse to read one's own views into the Constitution? Through a careful reading of Amar, and other important constitutional theorists, we will probe different ways of thinking about the supreme law of the land.

Requirements/Evaluation: three papers and class participation

Prerequisites: PSCI 216 or PSCI 217 (or consent of the instructor)

Enrollment Limit: 19

Enrollment Preferences: Justice and Law Studies concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Spring 2022

SEM Section: 01 MWF 11:00 am - 12:15 pm Alan Hirsch

JLST 403 (S) Senior Seminar in Human Rights in International Politics and Law

Cross-listings: JLST 403 PSCI 420 PSCI 422

Secondary Cross-listing

The idea that all humans have rights simply because they are human-independent of anything they might do or achieve-has transformed local and international politics, probably permanently. This concept's place in international politics, its strengths and limitations, depend on how people use it. Beginning with the 18th-century's transatlantic movement to abolish slavery, we will examine international movements and institutions that have affected what human rights mean, to whom, and where. Readings draw on philosophy, history, sociology, and international relations, but as a political science class we emphasize politics. Who benefits from the idea of universal human rights? Who loses? How does this idea about individual value liberate and entrap? Does this idea ultimately reinforce American hegemony, or plant the seeds of a non-American order?

Requirements/Evaluation: three lead essays, three critique essays, and one final essay

Prerequisites: PSCI 202, senior standing, permission of instructor

Enrollment Limit: 18

Enrollment Preferences: PSCI majors, senior JLST concentrators; seniors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: PSCI International Relations Courses

Not offered current academic year

Winter Study -----

JLST 10 (W) Policing the Police

Public scrutiny of police activity has intensified in the wake of the high-profile killing of George Floyd. Attacks on law enforcement have also received much publicity. In this course, we will analyze current doctrines addressing police misconduct and potential avenues for future reform by using case law, articles, and films. We will begin by looking at the historical responses to police misconduct, including internal affairs investigations, private civil lawsuits, and criminal prosecution of individual officers. We will also examine the affirmative privileges provided to law enforcement, and the impact of these procedural protections on accountability. We will then explore current appeals for structural reform by examining recent federal investigations of police departments, including Oakland, CA and Ferguson, MO. Class will meet twice per week, and students will choose an aspect of the issues engaged with as a subject for their final research paper.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: sophomores and juniors

Grading: pass/fail only

Unit Notes: Samantha Soto is a civil rights and employment attorney whose practice includes advising police departments on discipline of officers and conducting investigations into discrimination claims. She is a graduate of Williams College and Columbia Law School.

Materials/Lab Fee: \$15

Winter 2022

LEC Section: 01 TR 1:00 pm - 3:50 pm Samantha A. Soto

JLST 17 (W) State Constitutions, State Courts, and Individual Rights

Cross-listings: JLST 17 PSCI 17

Secondary Cross-listing

Most people are familiar with the idea that the federal constitution, as interpreted by the U.S. Supreme Court, can serve as an important (albeit controversial) tool for protecting individual rights. Cases involving rights to same-sex marriage, abortion, and gun ownership are just a few recent examples of the U.S. Supreme Court and the federal constitution taking center stage in battles over individual rights. But there is another, equally important, source of individual rights that is sometimes overlooked and understudied: state constitutions. Each state has its own constitution, which may contain different rights and protections from those in the federal constitution. In this class, we'll take a look at the role of state constitutions and courts in protecting individual rights and influencing federal constitutional interpretation. From assessing the constitutionality of compelled sterilization to protecting citizens from unreasonable searches and seizures, we'll examine the interplay between state and federal courts and constitutions. To do this, we'll work through *51 Imperfect Solutions: States and the Making of American Constitutional Law*, by Judge Jeffrey S. Sutton (class of 1983). As a final project, students will choose a legal issue, evaluate its chances of success under the federal constitution and their home state constitution (or state constitution of their choosing), develop a basic litigation strategy aimed at achieving their objectives, and present that evaluation and strategy to the class.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: by seniority

Grading: pass/fail only

Unit Notes: Susan Yorke is an appellate attorney in the Bay Area and teaches at Berkeley Law. Erin Lagesen is a judge on the Oregon Court of Appeals. Both Susan and Erin went to Williams, where they double majored in English and Mathematics.

Materials/Lab Fee: approximately \$35 for books

This course is cross-listed and the prefixes carry the following divisional credit:

CLASSICS (Div I)

LATIN

Chair: Professor Edan Dekel

- Nicole G. Brown, Assistant Professor of Classics
- Kerry A. Christensen, Garfield Professor of Ancient Languages
- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; affiliated with: Religion Department
- Sarah E. Olsen, Assistant Professor of Classics; on leave 2021-2022
- Amanda R. Wilcox, Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department's faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

Route A: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

Route B: (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

Classics Colloquium: All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.

Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS

101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department's faculty are always available to advise students, the chair has materials to share, and students can visit the department's website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

CLLA 101 (F) Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's *Metamorphoses*) and prose (e.g., Piny's *Letters*).

Requirements/Evaluation: frequent quizzes, classroom exercises, two midterms, a final project

Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken

Distributions: (D1)

Fall 2021

LEC Section: 01 MWF 11:00 am - 12:15 pm Nicole G. Brown

CLLA 102 (S) Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's *Metamorphoses*) and prose (e.g., Piny's *Letters*).

Class Format: recitation/discussion

Requirements/Evaluation: frequent quizzes, tests, classroom exercises, and a final exam

Prerequisites: CLLA 101 or permission of department

Enrollment Limit: 18

Enrollment Preferences: Students who have completed CLLA 101

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken

Distributions: (D1)

Spring 2022

LEC Section: 01 MWF 11:00 am - 12:15 pm Nicole G. Brown

CLLA 201 (F) Intermediate Latin: The Late Republic

This course aims to strengthen skills gained in previous study. In order to develop greater fluency and familiarity with classical Latin, we will read, translate, and analyze Cicero's *Pro Caelio* and selected short poems of Catullus. Both authors are brilliant stylists, though each writes in a very different mode. Taken together, these texts offer an excellent introduction to the expressive capacity of Latin in prose and verse. They also open up intriguing overlapping perspectives on the social, sexual, and political mores of late Republican Rome. We will consider the cultural context and implications of these texts as time permits.

Requirements/Evaluation: Engaged participation in class, occasional quizzes and short written assignments, a midterm and final exam

Prerequisites: CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

Enrollment Limit: 12

Enrollment Preferences: Classics majors and prospective majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

SEM Section: 01 MWF 10:00 am - 10:50 am Amanda R. Wilcox

CLLA 302 (S) Vergil's Aeneid

This course is a comprehensive introduction to Vergil's *Aeneid*. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem's literary, social, and political dimensions with special attention to Vergil's consummate poetic craftsmanship.

Requirements/Evaluation: Class participation, a midterm exam, a final paper, and a final exam.

Prerequisites: CLLA 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled, preference will be given to Classics majors and prospective majors.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2022

SEM Section: 01 TF 1:10 pm - 2:25 pm Edan Dekel

CLLA 403 (S) The Invention of Love: Catullus and the Roman Elegists

This course will explore the development of Latin love poetry in the first century BCE. Beginning with Catullus, we will examine the influence of Greek lyric poetry on the evolution of the genre as well as Roman attitudes toward love exhibited in other literature of the Late Republic. We will then turn to the full development of the elegiac form in the love poems of Propertius, Tibullus, and Sulpicia. Finally, we will explore the transformation of the genre in Ovid's *Amores*. The goal throughout is to investigate the conventions, innovations, and problems of expressing personal desire and longing amid the social and political upheaval of the transition from Republic to Principate.

Class Format: This course will be offered hybrid, with remote and in-person students joining synchronous meetings together over zoom. The exact logistics of this format may be adjusted in consultation with enrolled students.

Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 406 (F) Horace's Odes

This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 407 (S) Caesar and Cicero

The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries and Cicero's speeches and

correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

Class Format: discussion

Requirements/Evaluation: class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 6-9

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2022

LEC Section: 01 TF 1:10 pm - 2:25 pm Amanda R. Wilcox

CLLA 408 (F) Roman Comedy

The comic plays that still survive all had their first productions within roughly forty years between 200 and 160 BCE, as Rome rapidly expanded its military, economic, and political reach beyond the Apennine peninsula. They present critically important evidence for how Roman literature and cultural identity developed in the second century, and they document formulas for slapstick action and low-brow jokes that remain in use even today. Staged in Greek costume and featuring ostensibly Greek characters, the comedies revel in mocking stereotypical Roman values but ultimately reassert them. Sometimes what the Romans found funny is all too familiar; sometimes it's shocking. Our main focus will be on the *Mostellaria* of Plautus, often translated as "The Haunted House." Characteristic of its genre, the *Mostellaria* focuses on generational conflict within a household, especially between father and son. To enrich our conversation, we will read several other comedies in translation as well as selected scholarly investigations of this play, its genre, and the historical context.

Class Format: Discussion/recitation. For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice per week.

Requirements/Evaluation: Evaluation will be based on class participation, several written assignments of varying length, and possibly short quizzes as well as a midterm exam and a final exam and/or essay.

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: If the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 409 (S) Seneca and the Self

This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero's *De Officiis*. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

Requirements/Evaluation: class participation, several short written and oral assignments, midterm and final exams, and a final paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 414 (F) Vergil's Eclogues and Georgics

This course will explore the two major works of Vergil that precede the *Aeneid*: the *Eclogues*, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the *Georgics*, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

CLLA 415 (S) Ovid's *Metamorphoses*

This course will explore Ovid's greatest work, an epic poem in fifteen books entitled *Metamorphoses*. Ovid's poem narrates the story of the world from its beginning down to his own day, the reign of Augustus, via a series of tales closely woven together through the theme of change. We will translate and discuss large portions of the Latin text along with selections from contemporary scholarship in order to consider the poem in its original political and cultural context as well as its relationship to earlier models and its post-classical reception.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

LATINA/O STUDIES (Div II)

Chair: Professor Jackie Hidalgo

- Efrain Agosto, Croghan Bicentennial Professor in Biblical and Early Christian Studies; affiliated with: Latina/o Studies Program
- Maria Elena Cepeda, Professor of Latina/o Studies; affiliated with: Women, Gender & Sexuality Study, American Studies Program; on leave Spring 2022
- C. Ondine Chavoya, Professor of Art; affiliated with: Latina/o Studies Program; on leave 2021-2022
- Jacqueline Hidalgo, Associate Dean for Institutional Diversity, Equity and Inclusion, Chair and Professor of Latina/o Studies and Professor of Religion; affiliated with: Latina/o Studies Program, Religion Department
- Roger A. Kittleson, Chair and Professor of History; affiliated with: Latina/o Studies Program
- Nelly A. Rosario, Associate Professor of Latina/o Studies
- Alberto Sandoval-Sanchez, Visiting Professor of Latina/o Studies
- Edgar Sandoval, Gaius Charles Bolin Fellow in Latina/o Studies
- Carmen T. Whalen, Carl W. Vogt '58 Professor of History; affiliated with: Latina/o Studies Program; on leave 2021-2022

Latina/o Studies is an interdisciplinary and comparative field of study that explores the histories, representations, and experiences of Latinas and Latinos in the United States. Latinas and Latinos include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as more recent migrations from a wide variety of Central and South American countries. Courses, most of which use a comparative approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest growing populations in the contemporary era, provides an opportunity to explore complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION

The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:

One of the following 400-level seminars:

THE DEGREE WITH HONORS

Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by her/his advisor and two other faculty readers. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

The honors project will be completed over one semester plus winter study. It may consist of a conventional research thesis of 40-70 pages or of other forms of presentation (e.g., video, art, theater). It may also combine a shorter research thesis with another medium.

To be accepted as a candidate for honors in Latina/o Studies, a student must meet these criteria:

Submit and earn approval of a project proposal in April of the junior year. The proposal should be no longer than 5 pages and should lay out the project's aim and methodology, identify the student's advisor for the work, and include evidence of competence in the necessary media for projects that include non-thesis forms.

Achieve a grade point average generally of at least 3.33 in LATS courses at the time of application.

Students admitted to the honors program must submit a 5-to 8-page revised proposal, with an annotated bibliography, by the second week of classes in the fall semester of her/his senior year. They should register either for LATS 493 in the fall semester and LATS 031 in Winter Study, or for LATS 031 in Winter Study and LATS 494 in the spring semester. These courses will be in addition to the 5 courses that make up the regular concentration.

STUDY ABROAD

Study abroad and other off-campus programs offer excellent opportunities for students to build on, and expand, the intellectual interests they develop as part of the Latina/o Studies concentration. Through their connections to various institutions in the U.S. and other nations, Latina/o Studies faculty can help place students in U.S. borderlands programs as well as programs in Mexico, Cuba, and other "countries of origin." Any student seeking to include courses as part of a concentration in Latina/o Studies should feel free to contact the Program chair or other faculty. A maximum of 1 course taken away from Williams can count (as an elective) toward the completion of the concentration.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description. Although syllabus and description, including readings and assignments, would be preferable.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. 1 of 5 for the concentration and can only count as an elective.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

LATS 105 (F) Latina/o Identities: Constructions, Contestations, and Expressions

What, or who, is a Hispanic or Latina/o? At present, individuals living in the United States who are classified as such number approximately 57 million, constituting the country's largest "minority" group. In this course, we will study the interdisciplinary field that has emerged in response to this growing population, as we focus on the complex nature of "identity." Viewing identities as historically and socially constructed, we begin with a brief assessment of how racial, ethnic, class, and gendered identities take shape in the Hispanic Caribbean and Latin America. We then examine the impact of (im)migration and the rearticulation of identities in the United States, as we compare each group's unique history, settlement patterns, and transnational activity. Identity is also a contested terrain. As immigrants and migrants arrive, the United States' policymakers, the media, and others seek to define the "newcomers" along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. In this light, we conclude the course with an exploration of these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

Class Format: The course will feature synchronous online class meetings with some small discussion groups.

Requirements/Evaluation: participation and several short papers (1-5 pages) throughout the semester

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for concentration in Latina/o Studies

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora

Fall 2021

LATS 114 (S) Of Caravans and Narcos: U.S. Media Narratives about Central and South America (DPE)

Cross-listings: AMST 114 LATS 114

Primary Cross-listing

What do contemporary U.S. media discourses about Central and South America reveal about relationships of power in the Americas? How does the systematic analysis of visual, textual, and sonic media discourse enhance our comprehension of broader social dynamics? How do South and Central Americans in the diaspora actively counter dominant media narratives about their communities? And what does it mean to center the unique histories, cultures, and political contexts of diasporic Central and South Americans within Latina/o/x Studies? Drawing from a wide range of scholarly materials

and media platforms, this interdisciplinary course assumes a transnational approach to these issues, with an emphasis on how to conduct effective discourse analysis of everyday media texts. Above all, we will highlight the ways in which ethno-racial identity, gender, sexuality, class, and nation intersect to inform mainstream U.S. media narratives and our understandings of past and present modes of representation.

Class Format: discussion

Requirements/Evaluation: two short (5- to 7-page) essays; one class presentation; final take-home examination (5-7 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: LATS concentrators by seniority; AMST majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 114 (D2) LATS 114 (D2)

Difference, Power, and Equity Notes: This course encourages students to develop critical thinking skills regarding the intersection of categories of difference (including ethno-racial identity, gender, sexuality, class, and nation) employing a variety of scholarly materials and every day media texts. Students will be encouraged to consider past and current relationships of power across the Americas with an eye towards how attitudes towards Central and South Americans shape representations of these communities in the Global North.

Attributes: LATS Core Electives

Not offered current academic year

LATS 203 (S) Chicana/o/x Film and Video

Cross-listings: AMST 205 WGSS 203 LATS 203 ARTH 203

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: Remote. Discussion-oriented lecture class. The course will feature synchronous online class meetings. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors; LATS concentrators

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

LATS 222 (F) Ficciones: A Course on Fiction (DPE)

Cross-listings: ENGL 252 LATS 222

Primary Cross-listing

This course is focused on the art and practice of writing fiction. We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers of the Global South, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students strengthen their own narrative skills.

Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

LATS 224 (F) U.S. Latinx Religions

Cross-listings: AMST 224 REL 224 LATS 224

Primary Cross-listing

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. Given the plurality of Latinx communities and religious lives in the U.S.A., we can only consider select contexts that help us understand the challenges of studying and defining the "religious" and "hybridity" in Latinx contexts. We will survey certain selected religious traditions and practices --such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería--by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film.

Class Format: discussion

Requirements/Evaluation: class participation, short writing exercises, a 3-page essay, a 5-page essay, and an 8-12-page final review essay/project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: LATS concentrators and AMST and REL majors

LATS 228 (F) Revolt and Revelation in 20th-Century Americas

Cross-listings: AFR 228 AMST 228 REL 223 LATS 228

Primary Cross-listing

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?" Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

LATS 230 (S) Cities, Suburbs, and Rural Places

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for (im)migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course considers economic, social and cultural, environmental, and political approaches through a range of textual materials (academic, literary, popular). Rooted in urban, suburban, and rural geographies, as well as critical race geographies, we explore what these approaches are and what they add to our understanding of "new" im/migrant destinations and to Latinx lived experiences in these various spaces.

Class Format: This is a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation with short discussion post responses, two 4-5 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators

LATS 232 (S) We the People in the Stacks: Democracy and Literatures of Archives

Cross-listings: LATS 232 ENGL 232

Primary Cross-listing

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." --Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives--their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

Requirements/Evaluation: attendance and class participation, short writing exercises, midterm project, final creative project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: LATS concentrators

LATS 234 (S) From Conga to Hip Hop: Center-staging Latinidades on Broadway

Carmen Miranda and Desi Arnaz caused a sensation when they appeared on Broadway musicals in 1939 and 1940 respectively. Little did they know that their spectacular performances would inaugurate the stereotypes of the Latin Bombshell and the Latin Lover within the American national imaginary. In this course, we will examine Latina/o representation in The Great White Way at the intersection between identity, ethnicity, race, class, and gender. The course will introduce students to the Broadway musical genre and focus on the politics of Latina/o Otherness and Difference across time and space within the framing of a chronological and hemispheric/domestic perspective. Emphasis will be placed on how stereotypes are constructed, mobilized, and circulated and how Latinidades, agency, and empowerment result from the entanglement between ideology and given structures of feeling. In so doing, students will critically explore the cultural dynamics, historical contexts, and power relations at work in West Side Story, A Chorus Line, The Capeman, Rent, In the Heights, and other musicals.

Class Format: discussion

Requirements/Evaluation: attendance, class presentations, 2-page essays; 5-page take-home midterm essay, 10-page final researched archival project on a topic of interest

LATS 240 (F) Latina/o Language Politics: Hybrid Voices

Cross-listings: AMST 240 COMP 210 LATS 240

Primary Cross-listing

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x

communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching, bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Requirements/Evaluation: participation, two essays, final take-home examination

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

LATS 241 (S) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: THEA 241 WGSS 240 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity journal, mid-term essay exam, visual rhetorical analyses of pop culture images

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 14

LATS 253 (S) Religion and Politics in the Caribbean and the Diaspora: Puerto Rico and Cuba

Cross-listings: REL 292 LATS 253

Primary Cross-listing

This course explores the role of religion in Caribbean history and politics, with a focus on Puerto Rico and Cuba. These Caribbean islands have lived out contested colonized histories and experiences, as well as diasporic realities on the US mainland. The US government and military have played a significant role in both since the turn of the last century, forcibly shaping their economies and politics. Religion, particularly the Protestant missionary enterprise since the US invasions in 1898, has also shaped histories and politics on the islands and throughout their diasporas. We will explore the role and impact of Protestant religion in these historically indigenous, African descendent, and Roman Catholic religious spaces, as well as how these religious engagements and theologies impacted migration and the creation of diasporic communities in the US. We will analyze the role of religion in imperialist endeavors, as well as in solidarity movements. Puerto Rican and Cuban historical luminaries, such as Pedro Albizu Campos and Jose Marti, who struggled against Spanish colonialism in Puerto Rico and Cuba respectively, had not only political but religious visions for better prospects for their homelands. By understanding the intertwining of religion and politics in Puerto Rico, Cuba and their diasporic communities, we will have the tools to consider the implications for other Caribbean nations, such as the Dominican Republic, as well as other Latin American countries that have experienced US interventions and the creation of diasporic communities.

Class Format: This course will follow a discussion format, in which students are expected to come to class prepared to address the assigned readings, to have completed short assignments in preparation for discussions, to make presentations to the class, and/or to lead discussions.

Requirements/Evaluation: Evaluation in this course will be based on class participation, short 1 to 2-page writing assignments every other week based on readings and assigned videos/films; a five-page midterm essay on an aspect of Puerto Rican or Cuban political/religious reality discussed in class, and final 7-page research essay on a theme in the course agreed upon by student and professor.

LATS 285 (F) The Bible and Migration: Latinx Perspectives

Cross-listings: REL 286 LATS 285

Secondary Cross-listing

This course seeks to understand migration in the current historical moment, around the globe but especially on the US border. The lenses through which we will explore migration include Religion, with special focus on the Christian Bible. We will explore instances of and reflections on migration in the Bible, as well as various interpretations of the Bible emerging today in debates over migration. The course will approach US migration from the perspective of Latinx communities in the US - historically, culturally, politically, and religiously. Readings will include: The Bible, monographs and essays on the Bible and Migration, especially from the perspectives of Latinx authors and thinkers.

Requirements/Evaluation: Participation in class discussions; two to three short essays (3-5 pages each) analyzing selected readings; a longer final research paper (7-10 pages) on an aspect of Bible and Migration of interest to the student defined in consultation with the professor.

Prerequisites: none

Enrollment Limit: 25

LATS 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present (DPE)

Cross-listings: LATS 286 HIST 286

Primary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format. It will be offered in a "hybrid" format with synchronous class meetings and group discussion sections, offered in-person and remote.

Requirements/Evaluation: Class participation with short 1-2 page writing assignments; two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 20

LATS 309 (S) Scriptures and Race

Cross-listings: REL 309 AFR 309 LATS 309

Secondary Cross-listing

This course focuses on the relationships between constructions of race in the post-1492 American world and "Christian scriptures." The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage "scriptures"? In what ways have "scriptures" informed how people imagine themselves, their communities, and their relationship to religious and racial "others"? How did "scriptures" and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Requirements/Evaluation: participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay

LATS 313 (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: WGSS 313 AFR 326 AMST 313 LATS 313

Primary Cross-listing

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina/x," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: This remotely taught, synchronous course follows a discussion format.

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final oral exam.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

LATS 316 (F) The Graphic Narrative: A "Global South" Perspective (DPE)

"[I]n a media-saturated world in which a huge preponderance of the world's news images are controlled and diffused by a handful of men' a stream of comic book images and words, assertively etched' can provide a remarkable antidote." --Edward Said, *Introduction to Palestine* by Joe Sacco. This course examines graphic narratives (and related texts and film) rooted in the "Global South," with particular emphasis on Latina/o and Latin American experiences. We will focus on how each author/artist deploys visual and narrative elements to express social, political, economic, and cultural realities. Regular assignments will offer students opportunities to create their own graphic narratives.

Requirements/Evaluation: attendance and class participation, short writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

LATS 320 (F) The Latina/o AIDS Archive: A Cultural Recovery and Revisionary Project in Progress

The AIDS crisis is not over. The protease inhibitors made HIV/AIDS a treatable, chronic disease since 1996, but we must ask who has access to the health care system and the cocktail. The official story only showcased the experience of urban privileged white middle-class gay men. Minorities and women were marginalized and ignored. Puerto Rico and the Mexican Borderlands must be included in the AIDS archive since Latino/a bodies continually inhabited transnational spaces and circuits of migration that propagated the transmission of the virus since the beginning of the AIDS crisis. For many, addressing AIDS four decades into the epidemic, its effects on the Latina/o communities and families is nothing but an anachronism. In this course students will visit alternative archives in order to recover the silenced history of the Latino/a AIDS crisis toward a revisioning of the hegemonic cultural narrative and rhetorical representation of the epidemic. Given that the Latino/a AIDS crisis remains untold, students will piece together the fragmentary narratives and images, reconsider critical moments, and collect the relegated voices of those who died and are still unaccounted for---los/as desaparecidos/as. Can the SIDA cultural production, material conditions, and lived experiences be recovered, touched, and felt to honor the dead? From an interdisciplinary perspective, this course will critically analyze film, documentaries, video, theater, solo performances, artwork, testimonials, interviews, poems, novels, memorials, the AIDS Quilt, and obituaries that document the Latino/a AIDS everyday experiences, survival practices, and artistic expressions. Among the topics to be covered are: the temporality of illness, mourning, memorialization, activism, and aesthetic intervention. The students will be introduced to the notions of "AmnesiAIDS" and "NostalgiaAIDS" to theoretically understand a wide spectrum of conceptual issues such as memory, canonization, temporality, and historicism.

Class Format: discussion

Requirements/Evaluation: attendance, class presentations, 2-page critical essays; a 5-page take-home midterm essay and a 10-page final researched archival project essay

LATS 327 (S) Racial and Religious Mixture (DPE)

Cross-listings: REL 314 LATS 327 AFR 357 AMST 327

Primary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion

Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper

LATS 335 (S) Contemporary Immigration Landscapes

What is the relationship between racial formations, transnational migrations, and power? How do geometries of power shape our relationship to place? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, Indigenous studies, and postcolonial theories to enrich our understanding of human geography. We will look at the use of ethnic and racial formations as a bridge between cultural and political geography in the contemporary US immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of experiences of migrants and how these communities' lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and environmental justice, among others. Through materials that embrace both historical and contemporary perspectives, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities' cultural place-making practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of transnational racial formations to case studies that focus on political interventions for

social justice (such as UndocuQueers in the immigrant justice movement).

Class Format: Hybrid format. Remote a possibility. Meetings will occur synchronously.

Requirements/Evaluation: Class Participation (20%): Preparation for, and active participation in, class discussions. Short writing assignments weekly around class readings. Pair share (10%): Two engage class with thoughts for one 30 minute class segment. Essays (20% each): Two 4-5 page essays. Final Paper (30%): An examination of the articulation of Latinx migrations and belonging in a case study that interrogates and builds on a major course theme, approximately 12 pages double-spaced, plus references / endnotes / images.

LATS 338 (S) Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality (WS)

Cross-listings: LATS 338 AMST 339 WGSS 338

Primary Cross-listing

In this class we will investigate a wide variety of Latina/o/x popular musical forms, with particular attention to issues of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o/x popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are hybrid Latina/o/x identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 338 (D2) AMST 339 (D2) WGSS 338 (D2)

Writing Skills Notes: Students are required to complete a semester-long research paper in steps, each of which is evaluated and completed again as needed. These include an abstract (1-2 pages), annotated bibliography (2-5 pages), outline (2-7 pages), rough draft (2 at 6-10 pages), peer editing exercise, and final draft (10-12 pages). The intention is that students learn practical skills related to effective writing and to encourage them to engage in writing in planned stages with consistent feedback.

LATS 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: LATS 346 AMST 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best

understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

LATS 347 (S) Feeling Latinx Cinema: No Popcorn Included

When we consider going *to the movies* to be pure entertainment and escapism, we may be wrong. This course will introduce students to Latinx films through a critical practice showcasing the experience of feeling, especially when matters of *Latinidades*, identity formation, and transculturation are at stake. If watching a film constitutes an affective and ideological transaction for spectators in the domain of the national cultural imaginary, how does the actual viewing materialize a lived and felt experience through interpellation and reception? Students will embark on a film festival to examine the history of Latinx representation and structures of feeling on the silver screen from the silent era to *In the Heights* and Spielberg's *West Side Story*. Each film will be approached and tackled from specific points of entry and theoretical frames, such as border crossing and migration, education and assimilation, hegemonic stereotyping and cultural citizenship, fiction and history, race and ethnicity, the geo-politics of emplacement in the *barrio* and gentrification, feminist and queer subjectivity, and fame and the American Dream. Among the films to be analyzed in class are: *El Norte*, *Coco*, *Sleep Dealer*, *La Ofrenda*, *La Mission*, *Popi*, *Chicago Boricua*, *Selena*, *Nothing Like the Holidays*, and *Vivo*.

Class Format: discussion

Requirements/Evaluation: Evaluation will be based on attendance, class participation; short writing assignments; individual presentations and group discussions; a 12 page final paper.

Prerequisites: none

LATS 358 (S) Latinx Installation and Site-Specific Art

Cross-listings: LATS 358 ARTH 358

Primary Cross-listing

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

Class Format: discussion

Requirements/Evaluation: two short papers, periodic research reports, final research paper, and presentation

Prerequisites: LATS 105 or ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

LATS 385 (S) Latinx Politics in New York City and Beyond (DPE)

Cross-listings: LATS 385 HIST 385

Secondary Cross-listing

Latinas and Latinos have long sought inclusion in the U.S. polity and society. The meanings and terms of inclusion have shifted historically, as have the methods for seeking that inclusion. This course explores activism that has included community building to meet immediate needs, social service approaches, community-based organizing, political and social movements, and participation in pre-existing unions and political groups, as well as electoral politics. At times working within existing structures, Latinx communities have also questioned and challenged those existing structures.

Activists have addressed a wide variety of often intersecting issues including education, workers' rights, women's rights and feminism, immigration rights and legal status, environmental justice, LGBTQ+ visibility and rights, as well as others. New York City has long been home to a diverse group of Latinas and Latinos, and provides an important lens to Latinidades and to the politics of recognition, inclusion, and radical transformation. For final projects, students will select a contemporary issue to explore in greater depth and/or explore Latinx politics in another community.

Class Format: This is a discussion-based course, so reading and full participation is important. Taught hybrid style, the format of the course will depend on enrollments and be flexible. My initial plan is to teach one class session all remote and then divide the class into two discussion sections--one in person and one remote. The remote discussion section will have a day and time to be determined based on schedules.

Requirements/Evaluation: Class participation including short writing assignments, two essays of 4-5 pages each, final project of 7 to 10 pages, and final presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Latina/o Studies concentrators, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 385 (D2) HIST 385 (D2)

Difference, Power, and Equity Notes: This course explores how Latinx communities have sought inclusion in the U.S. polity and society, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. At times working within existing structures, Latinx communities also challenged those structures and power relations. Questions of difference, power and equity are explored at the structural, community, and individual levels.

LATS 386 (S) Latinas in the Global Economy: Work, Migration, and Households

Cross-listings: HIST 386 WGSS 386 LATS 386

Primary Cross-listing

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

Class Format: discussion

Requirements/Evaluation: class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

LATS 403 (S) New Asian American, African American, Native American, and Latina/o Writing

Cross-listings: AMST 403 LATS 403 AFR 333

Secondary Cross-listing

The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it be divorced from history and politics, even, or especially, a radical politics.

LATS 409 (F) Transnationalism and Difference: Comparative Perspectives

Cross-listings: WGSS 409 LATS 409 AMST 411

Primary Cross-listing

In the age of digital communications and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary seminar we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the intersections of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes Central American, Colombia, the Dominican Republic, Haiti, Indonesia, Jamaica, Mexico, the Middle East, and Peru.

Class Format: This course will follow a discussion format.

Requirements/Evaluation: student participation, an original 12-15 page semester-long research paper conducted in stages, and student presentation

Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority. If the course is overenrolled students may be asked to submit a brief writing sample.

LATS 410 (S) Arquivistas: An Archival Storytelling Course (WS)

Archival storytelling: the "creative practice of resurfacing hidden, untapped, and untold historical treasures and reimagining that content in various storytelling presentations that speak to modern-day audiences" (Arbo Radiko). In this generative writing and critical-practice course, students explore/inhabit the role of writers and storytellers as preservers of history and culture. With a focus on documenting and/or reimagining Latinidades, the course invites students to address: the unique narrative forms archives may take beyond collections of artifacts; how archives can inform the creation--and definition--of literary work; the relationship between archives and power; information the archivist/storyteller may choose to include or omit, reveal or conceal; how the archivist/storyteller might practice what scholars Michelle Caswell and Marika Cifor call "radical empathy," one that takes into account the diverse affective roles and responsibilities of the: archivist, records creator, records subject, records user, and community member. The course is designed to help students address the above through assignments that build towards final projects. Through the creative process, students learn to: research, compile, and analyze materials from various open-access repositories; identify and write emergent stories from collected material; and present these stories to the public using narrative elements and tools in the digital humanities. Projects may include virtual exhibits, data stories, annotated maps, historical fiction, ekphrastic poetry, finding aids, and interactive timelines. Projects may also examine the Latinx experience on campus, building on archival efforts initiated by students for the LATS Program 15th Anniversary Exhibit at Williams College Library. Guests will include artist Mark Menjivar (Texas State University) and archivist/librarian Jensen Ortiz (CUNY Dominican Studies Institute).

Requirements/Evaluation: Assignments and in-class exercises; attendance; participation; peer review

Prerequisites: n/a

Enrollment Limit: 19

Enrollment Preferences: LATS concentrators; students who haven't taken creative-writing courses but are interested in the topic; students interested

in the digital humanities; students who have met their other curricular requirements

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

LATS 420 (S) Latinx Ecologies

Cross-listings: LATS 420 ENVI 421

Primary Cross-listing

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes' *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez's theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

LATS 428 (F) Performing Latina/o Cultural Citizenship (WS)

Being conscious of citizenship is a commonplace preoccupation for most Latinas/os in the United States of America. How can Latinas/os belong to the national imagined community when many are reminded daily that they are second-class citizens, and even presumed to be criminals, rapists, and drug dealers? How do Latinas understand and negotiate an imperialist and colonial past of violence and deterritorialization? How do Latinas/os feel when they historicize citizenship and discover hidden archival scripts documenting how their ancestors' land was stolen, or how they were forced to migrate in response to military interventions or invasions that caused economic devastation and death? In this course students will critically think about past and present everyday performances and transactions of citizenship, its many embodiments, and structures of feeling. Most important, students will embark on a theoretical journey of research and readings to make sense of how citizenship is experienced and felt and how it is historically situated en el aquí y ahora. Students will explore, within an interdisciplinary perspective and a critical cultural studies framework, the many forms of citizenship, including sexual citizenship, intimate citizenship, economic citizenship, diasporic citizenship, transnational citizenship, academic citizenship and others.

Requirements/Evaluation: none

LATS 440 (F) Contemporary Exhibitions: Los Angeles and Latin America (DPE)

Cross-listings: LATS 440 ARTH 440

Secondary Cross-listing

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

Prerequisites: ARTH 102 (graduate students are exempt from the prerequisite)

LATS 471 (S) Comparative Latina/o Migrations

Cross-listings: HIST 471 LATS 471

Primary Cross-listing

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

LEADERSHIP STUDIES (Div II)

Chair: Professor Justin Crowe

Advisory Committee

- Magnús T. Bernhardtsson, Brown Professor of History and Faculty Affiliate in Arabic Studies, Leadership Studies and Religion; affiliated with: Religion Department, Leadership Studies Program; on leave Fall 2021
- Justin Crowe, Chair of Leadership Studies and Professor of Political Science; affiliated with: Leadership Studies Program
- Susan Dunn, Massachusetts Professor of Humanities; affiliated with: Leadership Studies Program
- James McAllister, Fred Greene Third Century Professor of Political Science; affiliated with: Leadership Studies Program
- Nicole E. Mellow, Professor of Political Science; affiliated with: Leadership Studies Program; on leave Spring 2022
- Mason B. Williams, Assistant Professor of Leadership Studies and Political Science; affiliated with: Political Science Department; on leave Fall 2021

Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation-state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, the curriculum addresses a number of questions. How do we define leadership? What are the bases of leaders' legitimacy in different historical contexts? How should we understand the variation between leaders emerging through tradition, charisma, and legal sanction? How do different types of leaders exercise and maintain their authority? What are the distinctive habits of mind of leaders in different cultural settings? What are the moral dilemmas that leaders across all settings face? What are the typical challenges to established leadership? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year and contact the chair if they wish to suggest additional courses that might count toward the concentration.

LEADERSHIP STUDIES—TRADITIONAL TRACK

The introductory course:

LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on ethical issues related to leadership, typically:

[PHIL 119\(S\) SEM Justice, Democracy and Freedom: Plato with Footnotes](#)

Taught by: [Jana Sawicki](#)

[Catalog details](#)

[PSCI 203\(F, S\) SEM Introduction to Political Theory](#)

Taught by: [Nimu Njoya](#), [Laura Ephraim](#)

[Catalog details](#)

Two core courses dealing with specific facets or domains of leadership, such as:

[ARTH 501 / LEAD 301 / ARTH 401\(S\) SEM Museums: History and Practice](#)

Taught by: [Michael Conforti](#)

[Catalog details](#)

[ASTR 240 / LEAD 240 / STS 240 SEM Great Astronomers and Their Original Publications](#)

Taught by: [Jay Pasachoff](#)

[Catalog details](#)

[CLAS 323 / HIST 323 / LEAD 323 LEC From Achilles to Alexander: Leadership and Community in Ancient Greece](#)

Taught by: [Kerry Christensen](#)

[Catalog details](#)

[HIST 111 / ARAB 111 / LEAD 150 SEM Movers and Shakers in the Middle East](#)

Taught by: [Magnús Bernhardtsson](#)

[Catalog details](#)

[HIST 207 / GBST 101 / ARAB 207 / LEAD 207 / JWST 217 / REL 239 LEC The Modern Middle East](#)

Taught by: [Magnús Bernhardsson](#)

[Catalog details](#)

[LEAD 205 / PSCI 212 LEC From Tocqueville to Trump: Leadership and the Making of American Democracy](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

[LEAD 212 / HIST 393 SEM Sister Revolutions in France and America](#)

Taught by: [Susan Dunn](#)

[Catalog details](#)

[LEAD 285 / PSCI 285 / HIST 354\(F\) SEM The Revolutionary Generation: Galaxy of Leaders](#)

Taught by: [Susan Dunn](#)

[Catalog details](#)

[LEAD 320 / PSCI 320 SEM Heroes and Villains: Iconic Leadership and the Politics of Memory](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

[LEAD 402 SEM The Art of Presidential Leadership](#)

Taught by: [Susan Dunn](#)

[Catalog details](#)

[LEAD 425 / PSCI 357\(S\) SEM Leadership and the Anxieties of Democracy](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

[PSCI 206 / LEAD 206 TUT Dangerous Leadership in American Politics](#)

Taught by: [Nicole Mellow](#)

[Catalog details](#)

[PSCI 215 / LEAD 215 SEM Race and Inequality in the American City](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

[PSCI 216 / LEAD 216\(F\) LEC American Constitutionalism I: Structures of Power](#)

Taught by: [Justin Crowe](#)

[Catalog details](#)

[PSCI 217 / LEAD 217\(S\) LEC American Constitutionalism II: Rights and Liberties](#)

Taught by: [Justin Crowe](#)

[Catalog details](#)

[PSCI 218 / LEAD 218 SEM The American Presidency](#)

Taught by: [Nicole Mellow](#)

[Catalog details](#)

[PSCI 310 / LEAD 332 SEM New York City Politics from the Blackout to Bloomberg](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

[PSCI 312 / LEAD 312 TUT American Political Thought](#)

Taught by: [Justin Crowe](#)

[Catalog details](#)

[PSCI 314 / LEAD 314\(F\) TUT How Change Happens in American Politics](#)

Taught by: [Nicole Mellow](#)

[Catalog details](#)

[PSCI 345 / ASIA 345 SEM The Meaning of Life and Politics in Ancient Chinese Thought](#)

Taught by: [George Crane](#)

[Catalog details](#)

One Leadership Studies Winter Study course (listed separately in the catalog)

Capstone course:

LEAD 425 Leadership and the Anxieties of Democracy

LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK

An introductory course:

HIST 262 The United States and the World, 1776 to 1914

HIST 263 The United States and the World, 1914 to the Present

PSCI/LEAD 120 America and the World

LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on issues related to American domestic leadership, such as:

[LEAD 125 / PSCI 125\(S\) SEM Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies](#)

Taught by: [Mason Williams](#)
[Catalog details](#)

[LEAD 205 / PSCI 212 LEC From Tocqueville to Trump: Leadership and the Making of American Democracy](#)

Taught by: [Mason Williams](#)
[Catalog details](#)

[LEAD 258 / PSCI 258\(F\) SEM The Media and American Democracy](#)

Taught by: [Ted Gup](#)
[Catalog details](#)

[LEAD 285 / PSCI 285 / HIST 354\(F\) SEM The Revolutionary Generation: Galaxy of Leaders](#)

Taught by: [Susan Dunn](#)
[Catalog details](#)

[LEAD 320 / PSCI 320 SEM Heroes and Villains: Iconic Leadership and the Politics of Memory](#)

Taught by: [Mason Williams](#)
[Catalog details](#)

[LEAD 369 / PSCI 369 SEM The Crisis of Leadership](#)

Taught by: [Mason Williams](#)
[Catalog details](#)

[PSCI 206 / LEAD 206 TUT Dangerous Leadership in American Politics](#)

Taught by: [Nicole Mellow](#)
[Catalog details](#)

[PSCI 218 / LEAD 218 SEM The American Presidency](#)

Taught by: [Nicole Mellow](#)
[Catalog details](#)

[PSCI 310 / LEAD 332 SEM New York City Politics from the Blackout to Bloomberg](#)

Taught by: [Mason Williams](#)
[Catalog details](#)

Three required courses dealing with specific facets of American foreign policy leadership, such as:

[HIST 263 / LEAD 261 LEC The United States and the World, 1898 to the Present](#)

Taught by: [Jessica Chapman](#)
[Catalog details](#)

[HIST 388 SEM Decolonization and the Cold War](#)

Taught by: [Jessica Chapman](#)
[Catalog details](#)

[HIST 389 / ASIA 389 / LEAD 389 SEM The Vietnam Wars](#)

Taught by: [Jessica Chapman](#)
[Catalog details](#)

[PSCI 225 / LEAD 225 LEC International Security](#)

Taught by: [Galen E Jackson](#)
[Catalog details](#)

[PSCI 262 / HIST 261 / LEAD 262\(F, S\) LEC America and the Cold War](#)

Taught by: [James McAllister](#), [Richard Immerman](#)
[Catalog details](#)

[PSCI 266\(S\) LEC The United States and Latin America](#)

Taught by: [James Mahon](#)
[Catalog details](#)

[PSCI 364\(F\) TUT Noam Chomsky and the Radical Critique of American Foreign Policy](#)

Taught by: [James McAllister](#)
[Catalog details](#)

One capstone course:

LEAD/PSCI 327 Leadership and Strategy

LEAD 330/PSCI 420 The Nuclear Revolution

LEAD/PSCI 365 U.S. Grand Strategy

PSCI 361 The CIA and American Foreign Policy

LEAD 425 Leadership and the Anxieties of Democracy

(There is no official Winter Study component to the American Foreign Policy Leadership track; students who wish to count a Winter Study course

toward that track should contact the chair.)

For either track, students should check with the program chair to see if other courses not listed here might count as electives.

HONORS IN LEADERSHIP STUDIES

Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the program chair.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Not formally, but, typically, one course per semester abroad is counted toward the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes: the introductory course and the senior capstone.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes: the introductory course has historically been taught only in one semester (usually the fall).

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

LEAD 120 (S) America and the World

Cross-listings: LEAD 120 GBST 101 PSCI 120

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: discussion

Requirements/Evaluation: short papers, class participation, and final exercise

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 120 (D2) GBST 101 (D2) PSCI 120 (D2)

Attributes: PSCI International Relations Courses

Not offered current academic year

LEAD 125 (S) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

Cross-listings: LEAD 125 PSCI 125

Primary Cross-listing

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality-can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

LEAD 127 (S) America First? The Trump Era and the Future of World Politics

Cross-listings: LEAD 127 PSCI 127

Secondary Cross-listing

"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindbergh in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free trade, and conflicts in the Middle East.

Requirements/Evaluation: two analytical essays, short response papers, and final group project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: potential political science majors and leadership studies concentrators (foreign policy track)

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

LEAD 150 (F) Movers and Shakers in the Middle East

Cross-listings: ARAB 111 HIST 111 LEAD 150

Secondary Cross-listing

This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

Requirements/Evaluation: class participation, short essays, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

LEAD 205 (S) From Tocqueville to Trump: Leadership and the Making of American Democracy (DPE)

Cross-listings: LEAD 205 PSCI 212

Primary Cross-listing

America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy

elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams

Prerequisites: none

LEAD 206 (F) Dangerous Leadership in American Politics

Cross-listings: LEAD 206 PSCI 206

Secondary Cross-listing

"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

Requirements/Evaluation: six 5-page essays; six 2-page response papers; and one final 5-page rewritten essay

LEAD 212 (S) Sister Revolutions in France and America

Cross-listings: LEAD 212 HIST 393

Primary Cross-listing

In the late-eighteenth century, two revolutions burst forth--they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

Requirements/Evaluation: three papers, several class presentations, and active participation in class discussions

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students with backgrounds in American history, French history or Political Science

LEAD 214 (F) The Economics of National Defense

Cross-listings: ECON 217 LEAD 214

Secondary Cross-listing

National defense is one of the largest components of the US Federal Budget (~15%) and remains a significant part of the nation's GDP (~3%). The study of defense economics in this course will apply principles of microeconomics and macroeconomics to analyze, within the context of national security strategy and policy, issues concerning resource allocation in wartime and peacetime, labor supply and demand, industrial organization and defense acquisition, and the formation and maintenance of alliances. While the focus of the course will be on economics, to provide context on what makes defense economics a special topic, we will also consider questions unique to the military such as how to deter conflict, how to fight wars, how to provide humanitarian assistance and protection to civilians in conflict or disaster areas, and how the national defense may adapt to issues like climate change. We will also consider historical examples from America's wars--e.g., the Civil War, World War 2, Vietnam, and the more recent conflicts in Iraq and Afghanistan. The plan is to use a variety of sources--academic materials, popular media such as news footage and films, and guest speakers--to provide a full-range of perspective on the course topics.

Class Format: Mix of lecture and discussion

Requirements/Evaluation: Individual Papers, Group Paper and Presentation, Midterm and Final Exam

LEAD 215 (S) Race and Inequality in the American City

Cross-listings: LEAD 215 PSCI 215

Secondary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services--social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

LEAD 216 (F) American Constitutionalism I: Structures of Power

Cross-listings: PSCI 216 LEAD 216

Secondary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the contemporary conservative ascendancy. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: discussion

Requirements/Evaluation: three 5- to 7-page essays, a final exam, and class participation

LEAD 217 (S) American Constitutionalism II: Rights and Liberties

Cross-listings: LEAD 217 PSCI 217

Secondary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on rights and liberties -- freedom of speech and religion, property, criminal process, autonomy and privacy, and equality. The specific disputes under these rubrics range from abortion to affirmative action, hate speech to capital punishment, school prayer to same-sex marriage; the historical periods to be covered include the early republic, the ante-bellum era, the Civil War and Reconstruction, World Wars I and II, the Warren Court, and contemporary America. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional rights and constitutional meaning in American history.

Requirements/Evaluation: three 5- to 7-page essays, a final exam, and class participation

Prerequisites: none

LEAD 218 (S) The American Presidency

Cross-listings: PSCI 218 LEAD 218

Secondary Cross-listing

Many argue that the presidency has been fundamentally changed by the tenure of Donald Trump. Is this right? To study the presidency is to study human nature and individual personality, constitution and institution, rules and norms, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with the protection of civil rights and liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? Exploration of these and other questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership issues, congressional-executive interactions, social movement and interest group relations, and the media. Attention will focus largely on the modern presidency, though older historical examples will also be used to help us gain perspective on these problems.

Class Format: This course will be taught as a hybrid class, with a mixture of in-person and remote sessions for all students. The course will feature both seminar discussion and several small group research projects.

Requirements/Evaluation: three 5 to 7 page papers, small group projects, and class participation involving weekly writing

LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

LEAD 223 (S) Roman History

Cross-listings: CLAS 223 HIST 223 LEAD 223

Secondary Cross-listing

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

Class Format: This course will be taught in hybrid mode. Assignments will consist of readings, case studies, short writing assignments and student-led discussions both in-class and via GLOW. Some elements will be offered asynchronously and/or optionally depending on the needs of students studying remotely. Please email the instructor with any questions you have about the structure or nature of the class or about what to expect if you are studying remotely.

Requirements/Evaluation: Class preparation and participation, several short response papers, one longer 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better at the end of the semester may substitute a 10 to 15-page research paper for the final exam.

Prerequisites: None; open to all

Enrollment Limit: 20

Enrollment Preferences: Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

This course deals with basic questions about war and peace. What are the major causes of war? Why do leaders choose to use violence in the pursuit of political objectives? How does the threat of war shape international politics and diplomatic outcomes? How are wars fought? What are their consequences? And why do states sometimes seek to cooperate to achieve their objectives and other times settle disputes through force or the threat of force? To address these questions, this course covers a number of specific topics: the causes, conduct, and consequences of the two world wars; the origins, course, and end of the Cold War; the influence of nuclear weapons on international security; regional conflicts and rivalries; regime type and international conflict; alliances and patron-client relationships; diplomacy; crisis decision-making; asymmetric conflicts; and great power politics, grand strategy, and international order.

Requirements/Evaluation: class participation, one 6- to 8-page paper, midterm, final

LEAD 227 (S) International Relations of the Middle East

Cross-listings: PSCI 227 LEAD 227

Secondary Cross-listing

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. Classes will be taught remotely. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Class Format: This course will be taught remotely. There will be brief lectures, which will be either put on the work website prior to class or given at

the start of each class. But the class will mainly consist of in-depth, synchronous classroom discussions.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Political Science majors with an International Relations concentration, History majors

Expected Class Size: 12

LEAD 239 (S) Music in the Global Cold War (WS)

Cross-listings: MUS 239 LEAD 239

Secondary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

Class Format: Hybrid, meeting twice per week. Class discussion will be central to this course.

Requirements/Evaluation: 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students with relevant experience in Political Science, History, or Music studies.

LEAD 240 (F) Great Astronomers and Their Original Publications (WS)

Cross-listings: ASTR 240 STS 240 HSCI 240 LEAD 240

Secondary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider

their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams's Chapin Library of rare books, and facsimiles or digital copies will be provided for remote learning. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the *Gutenberg Bible* (c. 1450) and a Shakespeare *First Folio* (1623, with a discussion of astronomical references in Shakespeare's plays). We evaluate a trove of books and papers about historic transits of Venus. We discuss matters of fraud and authenticity, especially the case of a purported *Sidereus Nuncius*, shown to be a modern construction. The course will be taught in collaboration between an astronomer and a rare books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452) or remotely; students who are not on campus can visit the original books at a later time/year.

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

LEAD 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: HIST 254 AMST 254 LEAD 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

Class Format: Remote class. Class will blend short pre-recorded lectures with weekly Zoom discussion sections/seminar format, plus time for virtual one-on-one conversations with the instructor.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, (virtual) museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History or American Studies majors, followed by first- and second-year students

LEAD 258 (F) The Media and American Democracy

Cross-listings: PSCI 258 LEAD 258

Primary Cross-listing

The course examines the relationship between the press and government, its watchdog function, how social media and the Internet are changing its role, the emergence of independent investigative bodies such as Pro Publica, and the myriad ways in which the press has helped shape American history, for better or worse. The course goes behind the headlines to examine the delicate interplay between government and press, peels back the familiar classics of American journalism, but also incorporates the current conflicts and tensions between the press and government. In the new age, how does the press define or redefine balance, neutrality, the quest for objectivity, and restraint. Who is a journalist, a once relatively easy question, but one now fraught with complexity? There has been a tectonic shift in the fundamental standards and practices of the press in recent years. What are those changes and how does it augur for the future of the press and democratic institutions?

LEAD 262 (F)(S) America and the Cold War

Cross-listings: HIST 261 PSCI 262 LEAD 262

Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

Enrollment Limit: 19

LEAD 270 (F) Sport and the Global Color Line (DPE)

Cross-listings: LEAD 270 HIST 270 AFR 270

Secondary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success

within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format: Lecture and discussion.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites: None.

Enrollment Limit: 40

Enrollment Preferences: Open to all students with completion of course admission survey if overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

LEAD 280 (S) Emancipation to BlackLivesMatter

Cross-listings: AFR 280 HIST 280 LEAD 280

Secondary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students with demonstrated interest in material

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

LEAD 285 (F) The Revolutionary Generation: Galaxy of Leaders

Cross-listings: LEAD 285 PSCI 285 HIST 354

Primary Cross-listing

The American Revolution produced a galaxy of brilliant and creative statesmen and intellectuals: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments--a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Requirements/Evaluation: three papers, weekly class presentations, and active participation in all discussions

Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

Enrollment Limit: 12

Enrollment Preferences: students with a background in Leadership Studies, American History or American Political Science

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

LEAD 301 (S) Museums: History and Practice

Cross-listings: LEAD 301 ARTH 501 ARTH 401

Secondary Cross-listing

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in today's institutions. Looking at museums past and present internationally, seminar participants will envision the future of museums as we recognize programmatic and re-organizational developments in our own moment of civic and social unrest. The class will consider this future while examining existing governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning of works of art, and issues in repatriation and restitution of cultural property. Surveying museums ranging in size and type from the "encyclopedic" to newly established contemporary arts institutions and alternative spaces, we will investigate current trends in acquisition, exhibition and educational programming in light of a changing canon. In addition, class discussions will have a special focus on how museums might strive to balance their traditional scholarly and artistic roles with their future civic and social responsibilities, doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 10

Enrollment Preferences: graduate students, then senior art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

LEAD 311 (F) Congress

Cross-listings: LEAD 311 PSCI 311

Secondary Cross-listing

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

Class Format: For fall of 2020, this class will be remote, with twice weekly synchronous discussion sessions. A few brief lectures will be put up on Glow to review before the relevant class section. Class discussion will draw on student questions posted on Glow as well as the process of developing and conducting original research.

Requirements/Evaluation: class participation, two short papers, and a final research paper

From democracy to liberty, equality to community, foundational *ideas* -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Class Format: For spring 2021, this course will be taught remotely, with a few synchronous seminar classes at the start and end of the course bookending weekly synchronous tutorial sessions.

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

LEAD 314 (F) How Change Happens in American Politics

Cross-listings: PSCI 314 LEAD 314

Secondary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, a volatile economy, racial reckoning, and rapidly evolving environmental crises have all rocked American politics in the last year. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that political leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, war, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor advances, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

LEAD 315 (S) Parties in American Politics

Cross-listings: LEAD 315 PSCI 315

Secondary Cross-listing

Is the American party system bankrupt? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy and organizing power. But their worth is a continuing subject of debate. Parties have been celebrated for linking citizens to their government and providing the coherency and unity needed to govern in a political system of separated powers. Yet they have also been disparaged for inflaming divisions among people and grid-locking the government. Other critics take aim at the two-party system itself, claiming that

the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? This semester, we will explore answers to these questions in a tutorial-style seminar format.

Class Format: This course will be taught remotely in a quasi-tutorial style format with students meeting with the instructor weekly in small discussion groups.

Requirements/Evaluation: Students will be responsible for writing three 5-page papers and three 2-page critiques. Students will also be asked to take responsibility for managing discussion and presenting work at different points in the semester.

Prerequisites: PSCI course at the 200 or 300 level or permission of instructor

LEAD 320 (F) Heroes and Villains: Iconic Leadership and the Politics of Memory

Cross-listings: PSCI 320 LEAD 320

Primary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the \$20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Requirements/Evaluation: two short (5- to 6-page) essays and a 10- to 12-page research paper

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

LEAD 321 (S) History of U.S.-Japan Relations, 1853-Present (DPE)

Cross-listings: LEAD 321 ASST 321 HIST 321 ASIA 321

Secondary Cross-listing

An unabating tension between conflict and compromise has been an undercurrent of U.S.-Japan relations since the 1850s, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the Difference, Power, and Equity requirement by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other.

Class Format: remote with synchronous, seminar-style discussion

Requirements/Evaluation: class participation, response papers (500 words), one short paper (5 pages), and a research paper (12-15 pages)

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 15

Enrollment Preferences: History or Asian Studies majors/prospective majors

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 321 (D2) ASST 321 (D2) HIST 321 (D2) ASIA 321 (D2)

Difference, Power, and Equity Notes: The course focuses on differences in power (economic, cultural, political, and military) between Japan and the U.S., from the 1850s through the present. It considers the ways in which Japan has been subordinate to the U.S. for much of this history, and the conflicts that have resulted when Japan has attempted to overturn this dynamic of power. Students will acquire the skills of history and international relations to examine how race, culture, and politics have shaped this relationship.

LEAD 322 (F) Gandhi: History, Ideas and Legacy (WS)

Cross-listings: REL 412 LEAD 412 ASIA 412 ASST 412 GBST 412 HIST 496 LEAD 322

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: REMOTE. This tutorial will be taught remotely but will otherwise follow the usual tutorial format of weekly hour-long meetings, pairing students who will alternatively write papers and critiques each week.

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

LEAD 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece

Cross-listings: HIST 323 CLAS 323 LEAD 323

Secondary Cross-listing

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one,

arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

LEAD 330 (F) Senior Seminar: The Nuclear Revolution

Cross-listings: LEAD 420 PSCI 420 LEAD 330

Secondary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. Classes will be taught remotely. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Class Format: This course will be taught remotely. All class discussions will be synchronous.

Requirements/Evaluation: class participation, three 8- to 10-page papers

Prerequisites: PSCI 202

LEAD 332 (F) New York City Politics from the Blackout to Bloomberg (WS)

Cross-listings: PSCI 310 LEAD 332 PSCI 332

Secondary Cross-listing

This course examines New York City's political history from the 1970s to the present--a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth--but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy--how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Cross-listings: LEAD 336 ASTR 336 HSCI 336

Secondary Cross-listing

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in *Fads and Fallacies in the Name of Science*, and using such recent journals as *The Skeptical Inquirer* and *The Scientific Review of Alternative Medicine*, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's *Arcadia* and Michael Frayn's *Copenhagen*.

Requirements/Evaluation: biweekly 5-page papers, participation in discussions, and a 15-page final paper

Prerequisites: none

LEAD 348 (S) The Black Radical Tradition

Cross-listings: PSCI 348 AFR 348 PSCI 377 LEAD 348

Secondary Cross-listing

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Requirements/Evaluation: attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

Prerequisites: none; open to all

Enrollment Limit: 10

Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

LEAD 360 (F) The Political Thought of Frantz Fanon (WS)

Cross-listings: PSCI 370 PHIL 360 AFR 360 LEAD 360

Secondary Cross-listing

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Requirements/Evaluation: attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

LEAD 361 (F) The CIA and American Foreign Policy

Cross-listings: PSCI 361 LEAD 361 HIST 355

Secondary Cross-listing

Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. Still, it took the shock of Pearl Harbor for the United States to establish a permanent peacetime civilian intelligence service independent of another federal department--the Central Intelligence Agency. Since then, the agency and others which comprise the loose entity called the Intelligence Community (IC) have played a pivotal albeit intensely controversial role in US foreign and national security policies. Yet their roles and missions remain largely misunderstood and divisive, as attested to by recent debates surrounding the multiple investigations of the 9/11 tragedy, the flawed pre-war estimates of Iraq's Weapons of Mass Destruction (WMD) capabilities, the reporting on Benghazi, the Snowden revelations, and much more. This course seeks to provide greater understanding of the relationship between intelligence and US foreign and national security policy by examining the CIA's and IC's roles and

responsibilities, illuminating their history alongside the history of America and the World, assessing their successes and failures, evaluating their reforms, and correlating their behavior and capabilities with US values and institutions.

Requirements/Evaluation: Midterm, several short papers, and a research paper.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Political Science and History Majors, prior coursework in American foreign policy.

LEAD 369 (S) The Crisis of Leadership

Cross-listings: PSCI 369 LEAD 369

Primary Cross-listing

It is now a commonplace that the liberal democracies of Europe and North America (and beyond) are facing a "crisis of leadership." In country after country, champions of cosmopolitan values and moderate reform are struggling to build sufficient popular support for their programs. These failures have created space for a politics of populism, ethno-nationalism, and resentment--an "anti-leadership insurgency" which, paradoxically, has catapulted charismatic (their critics would say demagogic) leaders to the highest offices of some of the largest nations on earth. In this course, we will seek to understand the challenges liberal, cosmopolitan leadership has encountered in the 21st century and the reasons why populist, nationalist leadership has proven resurgent. We will begin by examining institutional constraints facing political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment. Then we will look at some important factors which shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. Our primary questions will be these: Why is transformative leadership so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world?

Requirements/Evaluation: class participation, regular response papers, research proposal, research paper; this is a research course; the primary written assignment will be a research paper which students will develop over the course of the semester

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors, Leadership Studies concentrators

Expected Class Size: 14

LEAD 389 (S) The Vietnam Wars (DPE)

Cross-listings: LEAD 389 HIST 389 ASIA 389 ASST 389

Secondary Cross-listing

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict

involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Class Format: This course will be fully remote. The course format will prioritize synchronous discussions and small group work via Zoom.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: History and Asian Studies majors

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 389 (D2) HIST 389 (D2) ASIA 389 (D2) ASST 389 (D2)

Difference, Power, and Equity Notes: This course traces Vietnam's anti-colonial movements from colonization to liberation. Students will examine power struggles among Vietnamese nationalists from a variety of different religious, class, ideological, and regional backgrounds, as well as Vietnam's diplomatic and military rivalries with France, China, the Soviet Union, and the United States. Readings will focus on Vietnamese voices to explore how the country surmounted seemingly impossible international power dynamics.

LEAD 402 (S) The Art of Presidential Leadership

In this seminar, we will focus on the leadership skills, strategies, successes and failures of some of the greatest American presidents--Washington, Jefferson, Theodore Roosevelt, FDR, Reagan--as well as some of the most controversial--Lyndon Johnson and Nixon. We will investigate how these presidents developed as leaders before as well as after their election to the presidency. How did they determine their goals and assemble their leadership teams? How did they mobilize followers and connect with them? What challenges did they face and what principles guided them? What failures did they meet and why? Readings will include correspondence, speeches, and biographies. Students will make extensive use the Proquest

data base of historical newspapers to study history as it was being made.

Class Format: Remote via Zoom

Requirements/Evaluation: three papers, many class presentations, and active participation in all discussions

Prerequisites: LEAD 125 or permission of instructor

LEAD 425 (S) Leadership and the Anxieties of Democracy

Cross-listings: PSCI 357 LEAD 425

Primary Cross-listing

This capstone course examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by surveying institutional constraints confronting contemporary political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment, among others. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. While the course will focus primarily on the United States, our conceptual framework will be global; though our main interest will be contemporary, we will also examine previous eras in which democratic leadership has come under great pressure. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: LEAD 125 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Winter Study -----

LEAD 12 (W) Principles of Effective Leadership

This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held

leadership roles in government, business, philanthropy and healthcare. Probing our guests' approaches to organizational leadership is the primary goal of this Winter Study. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 5-page final paper and 5-minute presentation which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals.

Requirements/Evaluation: Short paper and final project or presentation; Other: In-Class Discussions

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Leadership Studies concentrators

Grading: pass/fail only

Unit Notes: William E. Simon, Jr., '73. Businessman, lawyer, and philanthropist, Mr. Simon is Partner Emeritus of Simon Quick Advisors and Co-Chairman of the William E. Simon Foundation. Early in his career he was Assistant U.S. Attorney in the Southern District of New York and later was the 2002 Republican gubernatorial nominee in California. Mr. Simon is a Trustee Emeritus of Williams College.

LEAD 16 (W) Effective Advocacy and Public Speaking

Clear and persuasive public speaking, whether before a small group or a much larger audience, is essential to effective leadership and career development. This course is designed to enhance a student's ability to develop a position on a significant issue and to advance and defend that position orally. This course will give students, either singly or in pairs, numerous opportunities to make presentations and receive immediate feedback from the Instructors. The course will consist of three sessions per week lasting approximately 120 minutes, with an initial organizational session to select a topic to be presented or debated. Students may choose either to present individually or in a debate format with another individual. Students may select their own presentation topic or choose from a list of suggested issues.

Requirements/Evaluation: oral presentations of 3-10 minutes throughout the course, but no less than once a week; listen to and critique each other's presentations throughout the course

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors

Grading: pass/fail only

Unit Notes: David Olson and Stephen Brown are experienced trial lawyers, having spent decades litigating antitrust, commercial, civil rights & other types of civil cases in state and federal courts. For several years, they have jointly taught a Mock Trial Winter Study course. Robert Schwed is a corporate lawyer who specialized in private equity and venture capital transactions for domestic & international clients. He was an adjunct law school professor for 9 years and has also taught a Winter Study course.

LEAD 17 (W) Mindful Leadership

What are you doing to strengthen your ability to lead, focus, embody compassion, and perform at your best? Training our minds with mindfulness can shift our baseline level of happiness, help us to navigate upheaval in our lives, and enable us to lead compellingly through uncertainty. In this experiential learning course--blending (still and moving) meditation with leadership development--we will: explore mindfulness and performance challenges, heighten our ability to understand and work with intense emotions, bring more resilience to our relationships, and gain strategies to work with our inner critics. Through exercises, we will also explore storytelling, decision-making, debriefing, dance, privilege, and compassion. You will integrate what we've explored and then lead your own exercise/experience near the end of the course--facilitating an experience for the group that you believe will contribute to our collective learning. You will also facilitate the debrief of another student-led exercise/experience--to draw out lessons learned. Through readings, podcasts, and videos we will be inspired by leadership practitioners and mindfulness teachers such as: Amy Edmondson,

Jim Detert, Zander Grashow, Ruth King, Mark Coleman, Jamie Wheal, Sharon Salzberg, and Mooji. To explore the mindbody connection through art, we'll venture off-campus to meet for one class at the Clark and one class at MASS MoCA. We will meet 2 times per week for 3 hours. One (minimum) individual meeting with the instructor will be scheduled during the course to support each student to lead their own exercise/experience and student-led debrief. If you have any questions about this course, feel free to contact the instructor at: hunt.jamie@gmail.com.

Requirements/Evaluation: final project or presentation, evaluation will be based on class participation, completion of assignments, engagement with pod group, as well as student-led debrief and final student-led exercise/experience that demonstrates engagement with class material (or final 10-page paper if that is what you prefer). We will meet 2 times per week for 3 hours. One (minimum) individual meeting with the instructor will be scheduled during the course to support each student to lead their own exercise/experience and student-led debrief. If you have any questions about this course, feel free to contact the instructor at: hunt.jamie@gmail.com

Prerequisites: open to all students; no previous mindfulness, leadership development, nor movement experience required

Enrollment Limit: 16

Enrollment Preferences: statement of interest (share a bit about yourself and your interest in the course)

Grading: pass/fail only

Unit Notes: Jamie Hunt '03 helps changemakers transform themselves, their organizations, and the world--through coaching, mindful leadership, and organizational development. He has worked with clients such as: The Gates Foundation, Google, Greenpeace, Purpose, MIT Solve, and the Williams Ski Team. Still curious? Learn more: www.jamiehunt.org

LEAD 18 (W) Wilderness Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM--5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience

Grading: pass/fail only

Materials/Lab Fee: \$450

Winter 2022

LEC Section: 01 M-F 9:00 am - 5:00 pm Scott A. Lewis

LEAD 21 (W) Wilderness Leadership

This Winter Study course is for students who would like to participate in a nationally recognized outdoor skills program, in example NOLS (National Outdoor Leadership School) or Outward Bound program. The individual student would meet with the current Director of the Williams Outing Club to identify a program that best fits the student's needs and meets the minimum criteria of at least a 14 day instructed program. The potential student would also meet to discuss the educational goals of learning about leadership and group dynamics in a wilderness setting.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Grading: pass/fail only

Materials/Lab Fee: none

Winter 2022

LEC Section: 01 Cancelled

LEAD 22 (W) Ski Patrol: Outdoor Emergency Response

Cross-listings: SPEC 22 LEAD 22

Primary Cross-listing

The course will teach and develop technical and leadership skills required to effectively and efficiently provide emergency medical care in outdoor environments. Successful completion can lead to certification as a member of the National Ski Patrol (NSP). The course implements NSP's Outdoor Emergency Care and Outdoor Emergency Transport curricula in a hands-on, "on-hill" environment to address: Wounds and Burns - Musculoskeletal Trauma; Shock, Environmental and Medical emergencies. Students will practice the use of splints, bandaging, rescue equipment, methods of extrication, organization/prioritization of rescue tasks, and dealing with unusual emergencies. Emphasis will be placed on the Leadership Skills required to handle complex and stressful emergency situations. Each week there will be ~12 hours of mandatory outdoor training at Jiminy Peak ski area. Exact timing (mornings vs. afternoons; specific days; # hours/day) will be determined based on student and instructor availability. Additional homework/practice may be required. The course will culminate with a written and practical exam. Costs: Students who have taken Outdoor Emergency Care: \$20 (CPR certification). Students with WFR or EMT certification: \$145 (NSP membership and exam materials). \$20 CPR certification (if needed). These students might also want to acquire the Outdoor Emergency Care textbook (~\$100). Students need to supply their own ski/snowboard equipment. The course is limited to 15 students, chosen on the basis of ski/snowboard interest and ability. Preference given to students who completed the Outdoor Emergency Care PE class in the preceding fall term. Successful completion of a written and practical first aid exam, along with demonstrating ski/snowboard proficiency, will qualify the student to be certified as a National Ski Patroller. Pre-requisite: Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician.

Requirements/Evaluation: skill and knowledge demonstration in written and practical exam

Prerequisites: Outdoor Emergency Care OR Emergency Medical Technician OR Wilderness First Responder

Enrollment Limit: 16

Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading: pass/fail only

Unit Notes: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

Materials/Lab Fee: \$165

LINGUISTICS

Advisor: Professor Gail Newman

How is language structured? What are the social forces associated with the development of language? How does the mind process and produce language? What are the best methods for teaching and learning a new language? Linguistics is a vibrant and multifaceted field that bridges the academic and the everyday. From Sociolinguistics to Linguistic Anthropology to Applied Linguistics, each of the various disciplines associated with the general area of Linguistics provides an illuminating perspective on the ways in which language works.

At Williams, students can gain insight into the intricacies of linguistic functions in courses located in several different academic units.

Linguistics

ANTH 162 (S) Languages of East Asia

Cross-listings: CHIN 162 ANTH 162 GBST 162 ASIA 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? And what are the prospects for their future development, including the influence of computers and digital communications? The last few class sessions will be devoted to minority languages of East Asia as well as oral presentations by the students. While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores

ANTH 227 (F) Language and Society: What Does Your Speech Say About You?

Cross-listings: ANTH 227 ARAB 227

Secondary Cross-listing

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the

inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ANTH 262 (S) Language and Power

"A language is a dialect with an army." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained or subverted by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to the partition of Hindi and Urdu in colonial South Asia. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in our local community.

Requirements/Evaluation: Regular postings of critical response papers and an ethnographic final project.

Prerequisites: None.

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome. If overenrolled, priority will be given to Anthropology or Sociology majors or final-year students.

ARAB 224 (F) Second Language Learning: The Learner, the Classroom, and the Social World

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers' feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner's identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Requirements/Evaluation: active class participation, assignments, article presentation and leading a class discussion, language learner interview, a

research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the course is overenrolled preference will be first given to majors, then seniors, then juniors

In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings: CHIN 162 ANTH 162 GBST 162 ASIA 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? And what are the prospects for their future development, including the influence of computers and digital communications? The last few class sessions will be devoted to minority languages of East Asia as well as oral presentations by the students. While this course is not intended as a comprehensive introduction to linguistics, it

does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: six quizzes, three 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ASIA 207 (F) An Exploration of Japanese Language and Culture

Cross-listings: JAPN 407 ASIA 207 ASST 207

Secondary Cross-listing

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

Prerequisites: none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. *All readings in English with some examples in Chinese.*

Class Format: discussion

CHIN 272 (S) The History and Mythology of Chinese Scripts

Cross-listings: STS 272 CHIN 272 COMP 272

Primary Cross-listing

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: discussion

Requirements/Evaluation: quizzes, short writing assignments, a midterm, and a final exam

JAPN 131 (F) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: Linguistics

Not offered current academic year

JAPN 258 (S) Language and Literacy Development

Cross-listings: PSYC 258 JAPN 258

Primary Cross-listing

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

MATH 338 (F) Intermediate Logic (QFR)

Cross-listings: MATH 338 PHIL 338

Secondary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have taken PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to

cover.

Requirements/Evaluation: problem sets and exams

Prerequisites: some class in which student has studied formal reasoning

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors; juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 338 (D3) PHIL 338 (D2)

Quantative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

Attributes: Linguistics

Not offered current academic year

PHIL 203 (F) Logic and Language (QFR)

Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

Class Format: discussion

Requirements/Evaluation: a midterm, a final, frequent homework and problem sets

Prerequisites: none

Enrollment Limit: 40/sect

Enrollment Preferences: Philosophy majors, seniors, juniors, sophomores, first-years in that order.

Expected Class Size: 40/sect

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The main part of the course is learning two formal languages of logic: sentential logic predicate logic

PHIL 308 (F) Wittgenstein's "Philosophical Investigations"

Bertrand Russell claimed that Ludwig Wittgenstein was "perhaps the most perfect example I have ever known of genius as traditionally conceived--passionate, profound, intense, and dominating." Wittgenstein's two masterpieces, the *Tractatus Logico-Philosophicus* and the *Philosophical Investigations*, stand like opposing poles around which schools of twentieth-century analytic philosophy revolve. The Wittgenstein of the *Tractatus* is known as the "earlier Wittgenstein," the Wittgenstein of the *Investigations* is known as the "later Wittgenstein." This course is an intensive, line-by-line study of the *Investigations*--one of the greatest (and thus, one of the most controversial) books in the history of philosophy. Aside from its overwhelming influence on 20th and 21st century philosophy and intellectual culture, any book which contains the remark, "if a lion could talk, we could not understand him," deserves serious attention.

Requirements/Evaluation: one short midterm paper (5-7 pages) and one longer final paper (12-15 pages)

Prerequisites: at least two Philosophy Courses, PHIL 202 highly recommended

Enrollment Limit: 19

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: Linguistics PHIL History Courses

Not offered current academic year

PHIL 310 (F) Wittgenstein's Later Philosophy (WS)

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published *Philosophical Investigations*, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's *Philosophical Investigations*, one of the greatest books ever written. In the second part of the course, we will read *On Certainty*, and selections from other of Wittgenstein's posthumously published works: *Zettel*, *Philosophical Grammar*, *Remarks on the Philosophy of Psychology*, *Culture and Value*, *Lectures and Conversations on Aesthetics*, *Psychology and Religious Belief*, and *The Big Typescript*. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.

Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly

oral responses to the paper of the tutorial partner

Prerequisites: two Philosophy courses

Enrollment Limit: 10

Enrollment Preferences: preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two short (about 800 words) seminar papers; five 5-7 pages long papers; five 2-3 pages long comments on their tutorial partner's papers; and a final paper (also 5-7 pages long) which will be a revision of one of the previously written papers. Students will get regular feedback from their tutorial partner and from the instructor on the substance of their work as well as on their oral and writing skills, with suggestions for improvement.

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition,

problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Requirements/Evaluation: midterm and final exams, and weekly exercises

Prerequisites: PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended.

Enrollment Limit: 20

Enrollment Preferences: sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 222 (D3) PHIL 222 (D2) COGS 222 (D2)

PSYC 258 (S) Language and Literacy Development

Cross-listings: PSYC 258 JAPN 258

Secondary Cross-listing

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: Linguistics

Not offered current academic year

STS 272 (S) The History and Mythology of Chinese Scripts

Cross-listings: STS 272 CHIN 272 COMP 272

Secondary Cross-listing

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: discussion

Requirements/Evaluation: quizzes, short writing assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

John W. Thoman, Jr., Professor of Chemistry

Chad M. Topaz, Professor of Mathematics

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;

- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

[AFR 248 / HIST 248 SEM The Caribbean: From Slavery to Independence](#)

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

MAST 397, 398 Independent Study: Maritime Studies

MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student's Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 104 (F) Oceanography

Cross-listings: GEOS 104 MAST 104 ENVI 104

Secondary Cross-listing

In this wide-ranging and integrated introduction to the oceans we will examine formation and history of the ocean basins; composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; marine resources; and human impacts. We will discuss current research, and address issues of colonialism and racism in oceanographic science. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: 3 50-minute lecture/discussion meetings each week; 2-hour lab every second week. 3 mini-symposia (during scheduled class time).

All-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: 6 graded lab exercises, mini-symposium participation, a 4-page term paper, and final exam.

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

MAST 211 (F)(S) Oceanographic Processes

Cross-listings: MAST 211 GEOS 210

Primary Cross-listing

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: offered only at Mystic Seaport

MAST 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: MAST 231 ENGL 231

Primary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (D1) ENGL 231 (D1)

Difference, Power, and Equity Notes: This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

MAST 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Primary Cross-listing

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: ENVI 265 BIOL 165 MAST 265

Primary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, offered remotely, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Does not count for Biology major credit.

Distributions: (D3)

Attributes: ENVI Natural World Electives

Not offered current academic year

MAST 266 (S) Reading Water (WS)

Cross-listings: ENVI 266 MAST 266

Primary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

Class Format: This class will be remote, meeting synchronously. The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

Requirements/Evaluation: 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference to majors, and then to sophomores and juniors, respectively.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 266 (D1) MAST 266 (D1)

Writing Skills Notes: Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy

Cross-listings: ENVI 268 MAST 268

Primary Cross-listing

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

Class Format: Remote, including Zoom seminar meetings twice a week

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

MAST 311 (F)(S) Marine Ecology

Cross-listings: MAST 311 BIOL 231

Primary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 324 (S) Corals and Sea Level

Cross-listings: GEOS 324 MAST 324 ENVI 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings: MAST 351 ENVI 351 PSCI 319

Primary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars,

and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies (WS)

Cross-listings: MAST 402 ENVI 412

Secondary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 402 No divisional credit ENVI 412 No divisional credit

Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. There will be a multi-step capstone project that emphasizes writing, and there will be opportunities to revise and resubmit work.

MAST 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 404 MAST 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

MATERIALS SCIENCE STUDIES (Div III)

Advisory Committee: Professors: D. Aalberts, S. Goh, L. Park. Assistant Professor: K. Jensen.

Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.

MTSC Courses

CHEM 336 (F) Materials Chemistry

Materials have defined much of what is possible in our daily lives. Materials scientists are at the center of imagining and delivering progress, as they improve existing materials and develop new ones to meet today's needs. Materials science focuses on the relationships between the structure, processing, properties, and performance of materials. In this course, we will explore how the properties and potential applications of a solid are related to its atomic and molecular structure, as well as to its organization on larger length scales than are traditionally considered in chemistry. We will cover a variety of different types of materials including metals, ceramics, polymers, and composites. We will examine some of the latest developments in materials science, including new strategies for the synthesis of materials on different length scales, as well as a variety of potential applications of emerging technologies.

Class Format: three hours per week

Requirements/Evaluation: problem sets, reviews of research articles, two exams, and oral presentations

Prerequisites: CHEM 155 or 256 and 251/255

Enrollment Limit: 20

Enrollment Preferences: Chemistry majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Fall 2021

LEC Section: 01 TR 9:55 am - 11:10 am Amnon G Ortoll-Bloch

CHEM 348 (F) Polymer Chemistry

From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: weekly literature discussions, two exams, and a final project

Prerequisites: CHEM 251/255

Enrollment Limit: 12

Enrollment Preferences: Chemistry majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

CHEM 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Primary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

Requirements/Evaluation: Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, problem sets, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 8/lab

Enrollment Preferences: Chemistry and Environmental Studies majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

GEOS 202 (F) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

Class Format: Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

GEOS 234 (S) Introduction to Materials Science (QFR)

Cross-listings: GEOS 234 PHYS 234

Secondary Cross-listing

Materials Science is the study of how the microscopic structure of materials--whether steel, carbon fiber, glass, wood, plastic, or mayonnaise--determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course does not count toward the Geosciences major.

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 234 (D3) PHYS 234 (D3)

Attributes: MTSC Courses

Not offered current academic year

PHYS 451 (F) Condensed Matter Physics

Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Requirements/Evaluation: weekly readings and problem sets, and exams

Prerequisites: PHYS 301 (may be taken simultaneously); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Physics majors

Expected Class Size: 4-6

Grading: yes pass/fail option, yes fifth course option

- Daniel B. Turek, Assistant Professor of Statistics
- Elizabeth M. Upton, Assistant Professor of Statistics

MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses taken at Williams plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.

Calculus (2 courses)

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus

Applied/Discrete Mathematics/Statistics (1 course)

or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)

or Mathematics 200 Discrete Mathematics

or Statistics 201 Statistics and Data Analysis

Mathematics 309 Differential Equations

or a more advanced applied/discrete/statistics course with prior department approval

Core Courses (3 courses)

Mathematics 250 Linear Algebra

Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis

Mathematics 355 Abstract Algebra

Completion (3 courses plus colloquium)

Two mathematics or statistics electives from courses numbered 300 and above

One Senior Seminar: Any mathematics or statistics course numbered between 400 and 479, taken in the junior or senior year.

Participation in the Department Colloquium, in which all senior majors present a talk on a mathematical or statistical topic of their choice. Each major must attend at least 20 colloquia (reduced to 15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

Pass/Fail policies during the Academic Year 2020-2021

Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found [here](#).

ADVANCED PLACEMENT

Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

CALCULUS PLACEMENT

Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:

BC 1, 2 or AB 2, 3 Math 140

AB 4 or 5 Math 150

BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the "Budapest Semester in Mathematics" are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away.

Double Counting: No course may count towards two different majors.

Planning Courses: Core courses Mathematics 350/351 and 355, are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.

Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

THE DEGREE WITH HONORS IN MATHEMATICS

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a "minithesis" and a presentation. Note that during the Academic Year 2020-2021 the winter study requirement for thesis and "minithesis" is waived. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

APPLIED MATHEMATICS TRACK

Students interested in applied mathematics, engineering, or other sciences should consider:

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus

Statistics 201 Statistics and Data Analysis

Mathematics 250 Linear Algebra

Mathematics 351 Applied Real Analysis

Mathematics 355 Abstract Algebra

Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you've had CSCI 134)

MATH 309 or Post-core Differential Equations/Numerical Methods

Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

GRADUATE SCHOOL TRACK

Students interested in continuing their study of mathematics in graduate school should consider:

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus

Mathematics 250 Linear Algebra

Mathematics 350 Real Analysis

Mathematics 355 Abstract Algebra

Complex Analysis

Topology

Some second semester analysis

Some second semester algebra

Some post-core geometry

Thesis

[With prior permission, in unusual circumstances, senior seminar can be waived in favor of harder post-core electives.]

Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.

Students interested in studying statistics in graduate school should take STAT 201, 346, 360, a 400 level statistics course and MATH 350/351 and 341 in addition to their other math requirements.

OTHER CAREER PATHS

Other Graduate and Professional Schools: An increasing number of graduate and professional schools require mathematics and statistics as a prerequisite to admission or to attaining their degree. Students interested in graduate or professional training in business, medicine, economics, or psychology are advised to find out the requirements in those fields early in their college careers.

Statistics and Actuarial Science: Students interested in statistics or actuarial science should consider Mathematics 341, Statistics courses, and Economics 255. Additionally, students should consider taking some number of the actuarial exams given by the Society of Actuaries, which can constitute part of an honors program in actuarial studies (see section on honors above).

Teaching: Students interested in teaching mathematics at the elementary or secondary school level should consider courses on teaching, number theory, geometry, statistics, and practice as a tutor or teaching assistant. Winter study courses that provide a teaching practicum are also highly recommended. Consult the Program in Teaching (Professor Susan Engel) and the Office of Career Counseling.

Business and Finance: Students interested in careers in business or finance should consider Mathematics 333 and Statistics courses. Since these courses address different needs, students should consult with the instructors to determine which seem to be most appropriate for individuals.

There are three types of 300-level courses. There are the core courses: Real Analysis, MATH 350/351, and Abstract Algebra Math 355. There are the "precore" courses, which do not have the core courses as prerequisites and have numbers 300-349. Finally, there are those courses that have an Abstract Algebra or Real Analysis prerequisite, which are numbered 360-399.

MATH 100 (W) Mathematics Immersion: The Beauty of Numbers (QFR)

This course will be an introduction to logic and number theory, with emphasis throughout on mathematics as a way of thinking. Have you ever wondered what keeps your credit card information safe every time you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

Class Format: Students will attend lecture Monday - Thursday mornings from 10am - noon. In the afternoons, students will attend interactive math labs from approximately 1 - 3 pm Monday - Thursday.

Requirements/Evaluation: Evaluation will be based on daily homework and activities, exams, projects, and participation in class and math labs.

Prerequisites: Permission of a dean.

Enrollment Limit: 20

Enrollment Preferences: Students who need to make up a deficiency.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester, Winter Study, and QFR credit. Once a dean approves enrollment, the Registrar's Office will register students in both MATH 100 and MATH 40.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: We will be proving theorems and learning mathematical logic.

Winter 2022

LEC Section: 01 MTWR 10:00 am - 12:00 pm MTWR 1:00 pm - 3:00 pm Allison Pacelli

MATH 102 (F) Foundations in Quantitative Skills

This course will strengthen a student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will be at the college algebra/precalculus level, and covered in a tutorial format with students working in small groups with the professor. Access to this course is limited to placement by a quantitative skills counselor.

Requirements/Evaluation: homework, presentations during the tutorial meetings, and projects

Prerequisites: access to the course is limited to placement by a quantitative skills counselor

Enrollment Limit: 10

Enrollment Preferences: students who need most help with the quantitative reasoning

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Fall 2021

TUT Section: T1 TBA Mihai Stoiciu

MATH 110 (F) Logic and Likelihood (QFR)

How best can we reason in the face of uncertainty? We will begin with an examination of rationality and the reasoning process including a survey of formal logic. Starting with uncertainty from a psychological and philosophical viewpoint, we will move to a careful theory of likelihood and how to reason with probabilistic models. The course will conclude with a consideration of observation and information, how to test hypotheses, and how we

update our beliefs to incorporate new evidence.

Requirements/Evaluation: homework, essays, presentations, exams, and participation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-year students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course will be covering formal logic and probability theory at sufficient depth to place this course on level with other QFR designated courses.

Not offered current academic year

MATH 113 (S) The Beauty of Numbers (QFR)

Have you ever wondered what keeps your credit card information safe everytime you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization.

Requirements/Evaluation: projects, homework assignments, and exams

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 119 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation: Homework, writing, class participation.

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: all students will have an equal chance; if possible none will be turned away.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.

Not offered current academic year

MATH 130 (F)(S) Calculus I (QFR)

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process

also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation: Weekly homework and quizzes, 2 exams during the semester, and one final

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

Enrollment Limit: 30

Enrollment Preferences: first-year students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This a calculus course.

Fall 2021

LEC Section: 01 TR 9:55 am - 11:10 am Pamela E. Harris

LEC Section: 02 TR 11:20 am - 12:35 pm Pamela E. Harris

Spring 2022

LEC Section: 01 TR 8:30 am - 9:45 am Pamela E. Harris

MATH 140 (F)(S) Calculus II (QFR)

Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration. and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams

Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit: 50

Enrollment Preferences: based on who needs calculus the soonest

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a math class

Fall 2021

Spring 2022

LEC Section: 01 MWF 9:00 am - 9:50 am Steven J. Miller

MATH 150 (F)(S) Multivariable Calculus (QFR)

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential

equations.

Requirements/Evaluation: Problem sets and exams

Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

Enrollment Limit: 50

Enrollment Preferences: Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: mathematics

MATH 151 (F) Multivariable Calculus (QFR)

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Requirements/Evaluation: homework, quizzes, and exams

Prerequisites: AP BC 3 or higher or integral calculus with infinite series

Enrollment Limit: 50

Enrollment Preferences: First-years, sophomores, and juniors

Expected Class Size: 45

Grading: yes pass/fail option, yes fifth course option

Unit Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course builds quantitative skills

MATH 200 (F)(S) Discrete Mathematics (QFR)

In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Requirements/Evaluation: The grade will be based on homework, quizzes and 4 exams.

Prerequisites: Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

Enrollment Limit: 50

Enrollment Preferences: Preference given to first and second year students intending to major in mathematics or computer science.

Expected Class Size: 50

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

MATH 210 (S) Mathematical Methods for Scientists (QFR)**Cross-listings:** PHYS 210 MATH 210**Secondary Cross-listing**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week**Requirements/Evaluation:** several exams and weekly problem sets, all of which have a substantial quantitative component**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131**Enrollment Limit:** 50**Enrollment Preferences:** sophomores and juniors**Expected Class Size:** 30**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D3) (QFR)**This course is cross-listed and the prefixes carry the following divisional credit:**

Spring 2022

LEC Section: 01 TR 9:55 am - 11:10 am David R. Tucker-Smith

MATH 250 (F)(S) Linear Algebra (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Requirements/Evaluation: homework and exams**Prerequisites:** MATH 150/151 or MATH 200**Enrollment Limit:** 40**Enrollment Preferences:** Students who have officially declared a major that requires Math 250.**Expected Class Size:** 40**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D3) (QFR)**Quantative/Formal Reasoning Notes:** In this course, students will engage in both quantitative and formal reasoning.**Attributes:** COGS Related Courses

MATH 303 (F) Introduction to Dynamics, p-Adics, and Measure (QFR)

At its most basic level a dynamical system consists of a set of points and a transformation or map acting on the set (i.e., sending points in the set to other points in the set). In this setting we can already ask about the existence, and prevalence, of periodic points (points that come back to themselves). One can also ask about the orbit of a point: the set of points that is obtained as one iteratively applies the transformation the point. An important dynamical notion that comes up here is that of chaos. The course will start by studying basic dynamical systems using notions from calculus. Then we will introduce the p-adic numbers and use them to study dynamical systems. The course will end with an exploration of the notion of measure and its connection with dynamical systems.

Requirements/Evaluation: Homework, class participation, exams.

Prerequisites: Math 250.

Enrollment Limit: 30

Enrollment Preferences: Juniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Mathematics

Fall 2021

MATH 306 (S) Fractals and Chaos (QFR)

Early in the course we introduce the notion of dynamical systems. Then we will develop the mathematics behind iterated function systems and study the notions of fractals and chaos. There will be a lot of computer experimentation with various programs and resources which the students are expected to use to learn and discover properties of fractals. The final topics will include dimension complex dynamics and the Mandelbrot set.

Requirements/Evaluation: homework, projects and exams

Prerequisites: MATH 250

Enrollment Limit: 30

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 307 (S) Computational Linear Algebra (QFR)

Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; data scraping; singular value decomposition; and more. This course could also be considered a course in numerical analysis or computational science.

Class Format: This course is taught in a flipped classroom format. Students read and watch lecture videos prior to each class session. The instructor uses class time for discussion and collaborative learning activities. This course will be a good fit for students with a strong interest in applied mathematics and a willingness to devote significant effort to learning/doing computer programming.

Requirements/Evaluation: Students will complete checkpoint quizzes, regularly assigned homework problems and projects, and reflective writing assignments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: MATH 250; COMP 134 or equivalent prior experience with computer programming (in any language)

Enrollment Limit: 30

Enrollment Preferences: Preference given to majors and prospective majors.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course involves developing the formal mathematical language of linear algebra. It also involves using quantitative tools to solve problems relating to a wide range of applications in the physical and social sciences.

Spring 2022

MATH 308 (S) Mathematical and Computational Approaches to Social Justice (DPE) (QFR)

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this research-based tutorial, students will bring the vanguard of quantitative approaches to bear on issues of social justice. Each tutorial pair will carry out a substantial project in one of the following areas: criminal justice, education equity, environmental justice, health care equity, and inclusion in arts/media. All students should expect to invest substantial effort in reading social justice literature and in acquiring new skills in data science, mathematics, and computation.

Class Format: This is a research-based tutorial.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of

"ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: Across each tutorial pair: multivariable calculus (e.g., Math 150/151), linear algebra (e.g., Math 250), statistics (e.g., Stat 161/201), computer programming (e.g., Comp 134), some working knowledge of or interest in social justice issues.

Enrollment Limit: 10

Enrollment Preferences: This is a tutorial and hence is capped at 10 students. Students interested in enrolling should contact the instructor as soon as possible. The instructor will ask for a brief statement of interest and selected other information.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (DPE) (QFR)

Difference, Power, and Equity Notes: Students study issues of equity, diversity, and inclusion in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantative/Formal Reasoning Notes: Students use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Spring 2022

TUT Section: T1 TBA Chad M. Topaz

MATH 309 (S) Differential Equations (QFR)

Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

Requirements/Evaluation: quizzes/exams, problem sets, participation

Prerequisites: MATH 150/151 and MATH 250

Enrollment Limit: 40

Enrollment Preferences: discretion of the instructor

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Spring 2022

LEC Section: 01 MWF 12:00 pm - 12:50 pm Julie C. Blackwood

MATH 310 (F) Mathematical Biology (QFR)

Cross-listings: BIOL 210 MATH 310

Primary Cross-listing

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: Unless circumstances change, students will have the option of taking the course in person or remotely

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper

Prerequisites: MATH 250 and MATH 309, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 210 (D3) MATH 310 (D3)

Quantative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.

Attributes: PHLH Methods in Public Health

Not offered current academic year

MATH 312 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation: Class participation, writing, homework problems.

Prerequisites: Linear algebra recommended.

Enrollment Limit: none

Enrollment Preferences: all students will have an equal chance; if possible none will be turned away.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.

Not offered current academic year

MATH 313 (S) Introduction to Number Theory (QFR)

The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of numbers and primes in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will be held virtually using an active learning method, an instructional strategy reversing the traditional learning environment by supplying instructional content outside of class time. This will include reading the textbook and completing problem sets prior to attending class. Class time will be spent clarifying concepts and working in small groups through challenging problems with the support of the professor, teaching assistants, and your peers. Building positive collaborative working relationships and public speaking skills will be added benefits of this class.

Class Format: This course will employ an active learning method rather than the traditional lecture. Please see the course description for details.

Requirements/Evaluation: The course will be graded on a mastery-based system. The final course grade will be a combination of quarterly participation in self-reflections, daily reading assignments, and weekly problem sets.

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: All are welcome regardless of major or year. In case of over-enrollment, preference will be given to those needing the course for graduation.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Not offered current academic year

MATH 314 (S) Cryptography (QFR)

An introduction to the techniques and practices used to keep secrets over non-secure lines of communication, including classical cryptosystems, the data encryption standard, the RSA algorithm, discrete logarithms, hash functions, and digital signatures. In addition to the specific material, there will also be an emphasis on strengthening mathematical problem solving skills, technical reading, and mathematical communication.

Requirements/Evaluation: exams, homework, and quizzes

Prerequisites: MATH 250

Enrollment Limit: 30

Enrollment Preferences: graduating seniors and Math majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course will contain mathematical proofs.

Not offered current academic year

MATH 315 (S) Methods for Solving Diophantine Equations (QFR)

A Diophantine equation is an equation with integer (or rational) coefficients that is to be solved in integers (or rational numbers). A focus of study for hundreds of years, Diophantine analysis remains a vibrant area of research. It has yielded a multitude of beautiful results and has wide ranging applications in other areas of mathematics, in cryptography, and in the natural sciences. In this project-based tutorial, we will focus on studying and implementing various methods for solving previously unsolved infinite families of Diophantine equations. Depending on their interests, students may choose one or several methods to apply to open problems in the field. Please note that this tutorial will be held virtually.

Requirements/Evaluation: The grade for this course will be a combination of weekly problem sets, weekly oral presentations (approx. 15 min. each), quarterly self-reflections, and a final written project manuscript that will be continually edited throughout the semester (minimum of 5 pages).

Prerequisites: MATH 250 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Sophomores, Juniors, and Seniors based on a short questionnaire of interests. In the event of over-enrollment, preference will be given to those that need the course to graduate.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Not offered current academic year

MATH 317 (F) Introduction to Operations Research (QFR)

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its

limitations. For those wishing to take this as a Stats course, the final project must have a substantial stats component approved by the instructor.

Prerequisites: Linear Algebra (MATH 250) and one other 200-level or higher CSCI, MATH or STATS course.

Requirements/Evaluation: homework, exams, projects

Prerequisites: MATH 150, MATH 250 and one other 200-level or higher CSCI, MATH or STATS course

Enrollment Limit: 40

Enrollment Preferences: Computer Science, Mathematics and Statistics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: http://web.williams.edu/Mathematics/sjmillier/public_html/317/

Distributions: (D3) (QFR)

Not offered current academic year

MATH 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week. In most weeks, we will meet one day for lecture discussions.

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

Quantative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

Attributes: BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year

MATH 321 (S) Knot Theory (QFR)

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it

open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

Requirements/Evaluation: problem sets, midterms, a paper and a final exam

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: seniors, junior, sophomores, first year

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a quantitative course.

Spring 2022

LEC Section: 01 TR 9:55 am - 11:10 am Colin C. Adams

MATH 325 (F) Set Theory (QFR)

Set theory is the traditional foundational language for all of mathematics. We will be discussing the Zermelo-Fraenkel axioms, including the Axiom of Choice and the Continuum Hypothesis, basic independence results and, if time permits, incompleteness theorems. At one time, these issues tore at the foundations of mathematics. They are still vital for understanding the nature of mathematical truth.

Requirements/Evaluation: exams and homework

Prerequisites: MATH 250

Enrollment Limit: 30

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: textbook cost

Distributions: (D3) (QFR)

Not offered current academic year

MATH 328 (S) Combinatorics (QFR)

Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.

Class Format: interactive activities and discussion

Requirements/Evaluation: quizzes/exams, homework, activities

Prerequisites: MATH 200 and MATH 250

Enrollment Limit: 30

Enrollment Preferences: discretion of the instructor

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 329 (F) Discrete Geometry (QFR)

Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of antiquity to the modern day applications of convex optimization and linear programming. In this course we will learn about polygons and their higher-dimensional

cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as "posted to the internet yesterday."

Requirements/Evaluation: Problem sets, exams, and a final project

Prerequisites: MATH 200 or Math 250, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Sophomores, juniors, and seniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: All of the content in this course is quantitative or formal reasoning.

Fall 2021

LEC Section: 01 MWF 12:00 pm - 12:50 pm Ralph E. Morrison

MATH 331 (F) The little Questions (QFR)

Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/331/

Distributions: (D3) (QFR)

Not offered current academic year

MATH 334 (S) Graph Theory (QFR)

A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

Requirements/Evaluation: problem sets and exams

Prerequisites: MATH 200 or MATH 250

Enrollment Limit: 20

Enrollment Preferences: Math majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course involves the writing of mathematical proofs.

Not offered current academic year

MATH 335 (F) Decisions, Games, and Evolutionary Dynamics (QFR)

Given goals, options, and uncertainty, how does one make a rational choice? What happens when we interact with others who are also choosing? How might this play out over time? We will first cover the principles of decision theory including preference, uncertainty, utility, imperfect information, and rational choice. The majority of the course will be spent on the main topics of game theory: sequential games, bimatrix games, parlor games, Nash equilibria, bargaining, repeated games, Bayesian belief, and signaling. Applying these principles to populations that evolve over time through variation, selection, and copying, we will develop basic models of the dynamics of evolution.

Class Format: lecture

Requirements/Evaluation: Weekly homework, midterm exams, and a final.

Prerequisites: Math 150/151 and Math 250. Some background in probability and differential equations is highly recommended.

Enrollment Limit: 35

Enrollment Preferences: Math majors.

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Lots of math.

Fall 2021

LEC Section: 01 MWF 11:00 am - 11:50 am Stewart D. Johnson

MATH 337 (F) Electricity and Magnetism for Mathematicians (QFR)

Maxwell's equations are four simple formulas, linking electricity and magnetism, that are among the most profound equations ever discovered. These equations led to the prediction of radio waves, to the realization that a description of light is also contained in these equations and to the discovery of the special theory of relativity. In fact, almost all current descriptions of the fundamental laws of the universe are deep generalizations of Maxwell's equations. Perhaps even more surprising is that these equations and their generalizations have led to some of the most important mathematical discoveries (where there is no obvious physics) of the last 25 years. For example, much of the math world was shocked at how these physics generalizations became one of the main tools in geometry from the 1980s until today. It seems that the mathematics behind Maxwell is endless. This will be an introduction to Maxwell's equations, from the perspective of a mathematician.

Requirements/Evaluation: performance on homework and exams

Prerequisites: MATH 250; no physics background required

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 338 (F) Intermediate Logic (QFR)

Cross-listings: MATH 338 PHIL 338

Secondary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have taken PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the

foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation: problem sets and exams

Prerequisites: some class in which student has studied formal reasoning

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors; juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 338 (D3) PHIL 338 (D2)

Quantative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

Attributes: Linguistics

Not offered current academic year

MATH 340 Applications of Mathematics to the Real World (QFR)

Often for real world applications one does not need to find the optimal solution, which can be extremely difficult, but instead just find something close, or at least better than what is currently being done. We will develop material and techniques from mathematics, statistics and allied fields with an eye to applications. In addition to standard homework assignments and exams there will be a group project where students will work with a local business, write a report and present the results. Pre-requisites are multivariable calculus and linear algebra, or permission of the instructor. Knowledge of some statistics or programming is beneficial but not required.

Class Format: In addition to standard lectures and assignments, we will be partnering with local businesses to apply mathematics to solve real world problems.

Requirements/Evaluation: Lectures and class participation, homework, exams and encouragement to do a project. We already have several local businesses with projects for students. Working on a project will entail meeting with officials from the company, clearly defining what the problem is, and writing a solution. This will include a presentation, a write-up, and potentially implementable code. Based on previous similar courses, these papers typically run from 10 to 40 pages.

Prerequisites: Mathematics 150 or 151, and Linear Algebra, or permission of the instructor.

Enrollment Limit: 40

Enrollment Preferences: Students who have taken at least one statistics or computer science class

Expected Class Size: 25

Grading:

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a 300 level mathematics class

Not offered current academic year

MATH 341 (F)(S) Probability (QFR)

Cross-listings: STAT 341 MATH 341

Primary Cross-listing

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 150 and MATH 250 or permission of the instructor

Enrollment Limit: 30

Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2022

LEC Section: 01 MWF 11:00 am - 11:50 am Cesar E. Silva

MATH 351 (S) Applied Real Analysis (QFR)

Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what does that actually mean? More fundamentally, what is the definition of a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions on them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. This course is excellent preparation for graduate studies in mathematics, statistics, and economics. Math 350 and Math 351 will cover the same material for the first part of the course. Math 350 will then delve deeper into the abstract structures of topological and metric spaces, while Math 351 will closely examine some foundational constructs from differential equations, probability, and optimization.

Class Format: Hybrid format. There may be class meetings; remote students will be fully accommodated.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 250 or permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Seniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

MATH 361 (F)(S) Theory of Computation (QFR)

Cross-listings: MATH 361 CSCI 361

Secondary Cross-listing

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: Lecture content will be delivered through asynchronously viewed video modules. Conference sections meeting twice per week will be used for synchronous discussions. Students should sign up for lecture and one conference section.

Requirements/Evaluation: online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 24(12/con)

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 361 (D3) CSCI 361 (D3)

MATH 368 (S) Positive Characteristic Commutative Algebra (QFR)

In commutative algebra, one of the most basic invariants of a ring is its characteristic. This is the smallest multiple of 1 that equals 0. Working over a ring of characteristic zero, versus a ring of characteristic $p > 0$, dramatically changes the proof techniques available to us. This realization has had tremendous consequences in commutative algebra. One of the most useful tools in characteristic p is the Frobenius homomorphism. In this course we will study several standard notions in commutative algebra, such as regularity of a ring, Cohen-Macaulayness, and being normal and we will see how various "splittings" of the Frobenius allow us to easily detect these properties. Many of these methods are not only applicable to commutative algebra, but also to number theory and algebraic geometry.

Requirements/Evaluation: homework and a final exam

Prerequisites: MATH 355 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Math majors primarily, and juniors and seniors secondarily

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 374 (S) Topology (QFR)

In Real Analysis you learned about metric spaces -- any set of objects endowed with a way of measuring distance -- and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it has become a vital part of data analysis and is also connected to many areas of math and physics. This course is excellent preparation for graduate programs in mathematics.

Class Format: Taught remotely, but synchronously. While recordings of lectures will be made available, all participants are expected to make their best effort to attend the class over Zoom. In addition to class meetings, there will be tutorial sessions with a TA once per week.

Requirements/Evaluation: homework, tutorials, and exams

Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323. Familiarity with basic group theory recommended, but not required.

Enrollment Limit: 20

Enrollment Preferences: Juniors and seniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It's math.

Not offered current academic year

MATH 383 (F) Complex Analysis (QFR)

The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: 40

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Advanced mathematics course with weekly or daily problem sets.

Fall 2021

LEC Section: 01 MWF 11:00 am - 11:50 am Steven J. Miller

MATH 390 Undergraduate Research Topics in Algebra (QFR)

The well-known trace map on matrices can be generalized to a map on other algebraic objects. Undergraduates, graduates students and experts in Representation Theory, Commutative Algebra and Algebraic Geometry have been driving recent developments in the theory of trace modules and finding exciting new applications in all of these these fields. This course will serve as an introduction to mathematical research with the aim of producing original research in modern trace theory. Students in this tutorial will read and synthesize research papers, discuss the formation of research questions in pure mathematics, and engage in original mathematical research.

Requirements/Evaluation: oral presentations; writing assignments (summarizing papers, reflections on mathematical research, original research); participation in the course project

Prerequisites: Math 355

Enrollment Limit: 10

Enrollment Preferences: Juniors and Seniors

Expected Class Size: 7

Grading:

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is post-core math class; students will be required to produce mathematical proofs.

Not offered current academic year

MATH 391 (F) Introduction to computer algebra (QFR)

Students will learn new mathematics in the context of computer-based exposition, experimentation, and interaction. They will gain proficiency with Sage, GAP, Macaulay2, or Mathematica, and possibly one of the more-specialized systems SnapPea, kenzo, magma, MATLAB, Perseus, coq, etc. Individuals and teams will build interactive demonstrations of mathematical theorems, which will then be appreciated by the instructor and the rest of the class. No prior programming experience is expected.

Class Format: Class will be held online, but there will be recorded components, asynchronous interactive components, and outside-of-class

small-group online meetings.

Requirements/Evaluation: exams, homework, projects

Prerequisites: Math 355 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: math majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Mathematical programming requires complete synthesis of abstract concepts to produce computer code, which is necessarily formal.

Not offered current academic year

MATH 392 (S) Undergraduate Research Topics in Graph Theory (WS) (QFR)

Graph theory is a vibrant area of research with many applications to the social sciences, psychology, and economics. In this project-based tutorial, students will select among the presented topics and will develop research questions and undertake original research in the field. Student assessment is based on drafts of research project manuscript and presentations.

Requirements/Evaluation: presentations and written project manuscript

Prerequisites: MATH 355 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: programming experience, students with interests in the intersection of combinatorics and graph theory

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: This course will require multiple revisions of a manuscript related to the research project at hand. The final result will be a 10-20 page research article and the course will be designed as a writing intensive course.

Quantative/Formal Reasoning Notes: The course deals with mathematical research in graph theory and is a quantitative and formal reasoning course.

Not offered current academic year

MATH 394 (S) Galois Theory (QFR)

Some equations--such as $x^5 - 1 = 0$ --are easy to solve. Others--such as $x^5 - x - 1 = 0$ --are very hard, if not impossible (using standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

Requirements/Evaluation: written homeworks and exams

Prerequisites: MATH 355

Enrollment Limit: 50

Enrollment Preferences: discretion of the instructor

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a math class

MATH 401 (S) Functional Analysis (QFR)

Functional analysis can be viewed as linear algebra on infinite-dimensional spaces. It is a central topic in Mathematics, which brings together and extends ideas from analysis, algebra, and geometry. Functional analysis also provides the rigorous mathematical background for several areas of theoretical physics (especially quantum mechanics). We will introduce infinite-dimensional spaces (Banach and Hilbert spaces) and study their properties. These spaces are often spaces of functions (for example, the space of square-integrable functions). We will consider linear operators on Hilbert spaces and investigate their spectral properties. A special attention will be dedicated to various operators arising from mathematical physics, especially the Schrodinger operator.

Class Format: lecture

Requirements/Evaluation: weekly problem sets, two midterm exams, final exam

Prerequisites: MATH 350 or 351 or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: Mathematics and Physics majors; seniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is an advance course in Mathematical Analysis.

Spring 2022

LEC Section: 01 MWF 10:00 am - 10:50 am Mihai Stoiciu

MATH 402 (F) Measure Theory and Hilbert Spaces (QFR)

How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this set? What's the dimension? In this course we'll come up with precise ways to measure size -- length, area, volume, dimension -- that apply to a broad array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and

the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields like quantum mechanics and machine learning. This material provides good preparation for graduate studies in mathematics, statistics and economics.

Class Format: Discussion-based course held remotely.

Requirements/Evaluation: performance on homework assignments and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Seniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Math

Not offered current academic year

MATH 403 (S) Measure and Ergodic Theory (QFR)

An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesgue and Borel measures, measurable functions, and Lebesgue integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, and Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Mathematics majors

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: senior major course

Distributions: (D3) (QFR)

Not offered current academic year

MATH 404 (F) Random Matrix Theory (QFR)

Initiated by research in multivariate statistics and nuclear physics, the study of random matrices is nowadays an active and exciting area of mathematics, with numerous applications to theoretical physics, number theory, functional analysis, optimal control, and finance. Random Matrix Theory provides understanding of various properties (most notably, statistics of eigenvalues) of matrices with random coefficients. This course will provide an introduction to the basic theory of random matrices, starting with a quick review of Linear Algebra and Probability Theory. We will continue with the study of Wigner matrices and prove the celebrated Wigner's Semicircle Law, which brings together important ideas from analysis and combinatorics. After this, we will turn our attention to Gaussian ensembles and investigate the Gaussian Orthogonal Ensemble (GOE) and the Gaussian Unitary Ensemble (GUE). The last lectures of the course will be dedicated to random Schrodinger operators and their spectral properties (in particular, the phenomenon called Anderson localization). Applications of Random Matrix Theory to theoretical physics, number theory, statistics, and finance will be discussed throughout the semester.

Requirements/Evaluation: homework assignments and exams

Prerequisites: experience with Real Analysis (MATH 350 or MATH 351) and with Probability (MATH 341 or STAT 201)

Enrollment Limit: 40

Enrollment Preferences: Mathematics and Statistics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course expands ideas in probability and statistics from random variables (1x1 random matrices) to $n \times n$ random matrices. The students will learn to model complex physical phenomena using random matrices and study them using rigorous mathematical tools and concepts.

Not offered current academic year

MATH 405 (S) Representation Theory and Special Functions (QFR)

Representation theory is at the heart of much of modern mathematics. It provides a link between ideas of symmetries, groups and matrices. It has applications from number theory to Fourier Analysis to elementary particle theory. In part, representation theory is a method for producing interesting functions. While not having a single definition, special functions are "functions that have names." Over the last few hundred years, scientists have needed to define and develop certain families of functions, in order to describe different physical phenomena. These families started to be named, and include Bessel functions, Hermite functions, Laguerre functions and more generally hypergeometric functions. In recent years it has been seen that these different types of functions are best understood through the lens of symmetry and in particular via representation theory. This course will be an introduction to representation theory, starting with finite groups, while at the same time being an introduction to special functions. Thus the course will be a mix of abstract algebra, matrices, calculus and analysis.

Requirements/Evaluation: By exams and homework

Prerequisites: Math 350 or Math 351, and Math 355

Enrollment Limit: 50

Enrollment Preferences: By instructor preference

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Spring 2022

LEC Section: 01 MWF 11:00 am - 11:50 am Thomas A. Garrity

MATH 407 (F) Dance of the Primes (QFR)

Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

Requirements/Evaluation: exams and weekly homework assignments

Prerequisites: MATH 350 or MATH 351, and MATH 355

Enrollment Limit: 30

Enrollment Preferences: seniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It is a math course.

Not offered current academic year

MATH 408 (F) L-Functions and Sphere Packing (QFR)

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

Requirements/Evaluation: Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

Prerequisites: Math 350 or 351

Enrollment Limit: 40

Enrollment Preferences: Senior math majors, students planning on graduate study in a STEM field

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a 400 level math class

Not offered current academic year

MATH 411 (F) Commutative Algebra (QFR)

Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of "prime ideals," and how they generalize the well-known notion of primality in the set of integers. Commutative algebra has applications ranging from algebraic geometry to coding theory. For example, one can use commutative algebra to create error correcting codes. It is perhaps most often used, however, to study curves and surfaces in different spaces. To understand these structures, one must study polynomial rings over fields. This course will be an introduction to commutative algebra. Possible topics include polynomial rings, localizations, primary decomposition, completions, and modules.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 355 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Math majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Fall 2021

LEC Section: 01 MWF 9:00 am - 9:50 am Susan R. Loepf

MATH 419 (S) Algebraic Number Theory (QFR)

We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.

Requirements/Evaluation: homework assignments and exams

Prerequisites: MATH 355, or permission of instructor

Enrollment Limit: 25

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 420 (S) Analytic Number Theory (QFR)

How many primes are smaller than x ? How many divisors does an integer n have? How many different numbers appear in the $N \times N$ multiplication table? Precise formulas for these quantities probably don't exist, but over the past 150 years tremendous progress has been made towards understanding these and similar questions using tools and methods from analysis. The goal of this tutorial is to explain and motivate the ubiquitous appearance of analysis in modern number theory--a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc). Topics to be covered will include some subset of the following: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method, the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and the circle method, and sieve methods and gaps between primes.

Requirements/Evaluation: Regularly preparing lectures and writing expository essays in LaTeX. No exams.

Prerequisites: MATH 350 or MATH 351 and familiarity with basic modular arithmetic are hard prerequisites. Familiarity with complex analysis and abstract algebra recommended, but not required.

Enrollment Limit: 10

Enrollment Preferences: Students with complex analysis background will be given priority.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It's math.

Not offered current academic year

MATH 421 (S) Quandles, Knots and Virtual Knots (QFR)

A quandle is an algebraic object that, like a group, has a "multiplication" of pairs of elements that satisfies certain axioms. But the quandle axioms are very different from the group axioms, and quandles turn out to be incredibly useful when considering the mathematical theory of knots. In this course, we will learn about this relatively new area of research (1982) and learn some knot theory and see how quandles apply to both classical knot theory and the relatively new area of virtual knot theory (1999).

Requirements/Evaluation: problem sets, tests, and a 3-page paper

Prerequisites: MATH 355

Enrollment Limit: 40

Enrollment Preferences: discretion of the instructor

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 422 (F) Algebraic Topology (QFR)

Is a sphere really different from a torus? Can a sphere be continuously deformed to a point? Algebraic Topology concerns itself with the classification and study of topological spaces via algebraic methods. The key question is this: How do we really know when two spaces are different and in what senses can we claim they are the same? Our answer will use several algebraic tools such as groups and their normal subgroups. In this course we will develop several notions of "equality" starting with the existence of homeomorphisms between spaces. We will then explore several weakenings of this notion, such as homotopy equivalence, having isomorphic homology or fundamental groups, and having homeomorphic universal covers.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 355 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Math majors primarily, the juniors and seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 426 (F) Differential Topology (QFR)

Differential topology marries the rubber-like deformations of topology with the computational exactness of calculus. This sub field of mathematics asks and answers questions like "Can you take an integral on the surface of doughnut?" and includes far-reaching applications in relativity and robotics. This tutorial will provide an elementary and intuitive introduction to differential topology. We will begin with the definition of a manifold and end with a generalized understanding of Stokes Theorem.

Requirements/Evaluation: weekly homework, weekly presentations, and final paper

Prerequisites: MATH 350 (students who have not taken MATH 250 may enroll only with permission of the instructor)

Enrollment Limit: 10

Enrollment Preferences: seniors, majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: There will be weekly math problem sets.

Not offered current academic year

MATH 427 (S) Tiling Theory (QFR)

Since humans first used stones and bricks to tile the floors of their domiciles, tiling has been an area of interest. Practitioners include artists, engineers, designers, architects, crystallographers, scientists and mathematicians. This course will be an investigation into the mathematical theory of tiling. The course will focus on tilings of the plane, including topics such as the symmetry groups of tilings, the topology of tilings, the ergodic theory of tilings, the classification of tilings and the aperiodic Penrose tilings. We will also look at tilings in higher dimensions, including "knotted tilings".

Requirements/Evaluation: problem assignments, exams and a presentation/paper

Prerequisites: MATH 250 Linear Algebra and MATH 355 Abstract Algebra

Enrollment Limit: 30

Enrollment Preferences: senior majors, seniors, juniors, sophomores, first-year students (this is a senior seminar, one of which is required for all senior majors, so they have first preference)

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: cost of book which will be under \$50

Distributions: (D3) (QFR)

Not offered current academic year

MATH 428 (S) Catching Robbers and Spreading Information (QFR)

Cops and robbers is a widely studied game played on graphs that has connections to searching algorithms on networks. The cop number of a graph is the smallest number of cops needed to guarantee that the cops can catch a robber in the graph. Similar combinatorial games such as "zero forcing" can be used to model the spread of information. The idea of "throttling" is to spread the information (or catch the robber) as efficiently as possible. This course will survey some of the main results about cops and robbers and the cop number. We will also explore recent research on throttling for cops and robbers, zero forcing, and other variants.

Class Format: interactive activities and discussion

Requirements/Evaluation: problem sets, investigation journal, final presentation

Prerequisites: MATH 200 and MATH 355

Enrollment Limit: 25

Enrollment Preferences: seniors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course will involve mathematical proofs.

Not offered current academic year

MATH 433 (S) Mathematical Modeling (QFR)

Mathematical modeling means (1) translating a real-life problem into a mathematical object, (2) studying that object using mathematical techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology, economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for students who have strong enthusiasm for applied mathematics, data science, and collaborative teamwork.

Class Format: To afford students flexibility during the COVID pandemic, this course is taught online, largely asynchronously. There is no lecture component. Students will read research literature, work on structured and open-ended projects, and participate in synchronous small-group meetings with the instructor via videoconference. The vast majority of work in this course requires students to collaborate with each other.

Requirements/Evaluation: Students will complete reading assignments, writing assignments, modeling activities, research projects, and will record several presentations to be shared with the rest of the class. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: MATH 250; MATH 309 or similar; and some experience with computer programming (equivalent to CSCI 134 or MATH 307).

Enrollment Limit: 20

Enrollment Preferences: Professor's discretion

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course focuses substantially on using mathematical and statistical tools and frameworks to describe, predict, and understand real-world systems.

Not offered current academic year

MATH 434 (F) Applied Dynamics and Optimal Control (QFR)

We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin's maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study.

Requirements/Evaluation: exams and homework assignments

Prerequisites: MATH 209 or PHYS 210, and MATH 350 or 351, or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to senior math majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a 400 level math course.

Not offered current academic year

MATH 435 (F) Chip-firing Games on Graphs (QFR)

Starting with a graph (a collection of nodes connected by edges), place an integer number of poker chips on each vertex. Move these chips around according to "chip-firing moves", where a vertex donates a chip along each edge. These simple and intuitive games quickly lead to challenging mathematics with applications ranging from dynamical systems to algebraic geometry. In this course we'll build up a mathematical framework for studying chip-firing games, drawing on linear algebra and group theory. We'll discover algorithms for winning these games, and study their complexity; and we'll prove graph-theoretic versions of famous results like the Riemann-Roch theorem. A key component of this course will be research projects that draw on open questions about chip-firing.

Requirements/Evaluation: Weekly homework for the first eight weeks, four quizzes spaced evenly throughout the semester, and a cumulative project worked on throughout the semester (10-20 pages)

Prerequisites: Math 250 and Math 355

Enrollment Limit: 25

Enrollment Preferences: Math majors who need the course to graduate

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: All topics are quantitative

Fall 2021

SEM Section: 01 MWF 10:00 am - 10:50 am Ralph E. Morrison

MATH 441 (F) Information Theory and Applications

Cross-listings: MATH 441 CSCI 441 STAT 441

Secondary Cross-listing

What is information? And how do we communicate information effectively? This course will introduce students to the fundamental ideas of Information Theory including entropy, communication channels, mutual information, and Kolmogorov complexity. These ideas have surprising connections to a fields as diverse as physics (statistical mechanics, thermodynamics), mathematics (ergodic theory and number theory), statistics and machine learning (Fisher information, Occam's razor), and electrical engineering (communication theory).

Requirements/Evaluation: Weekly homeworks, midterm(s), final exam.

Prerequisites: Math/Stat 341; Math 150 or 151; or permission of instructor.

Enrollment Limit: 30

Enrollment Preferences: Seniors; mathematics and statistics majors.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 441 (D3) CSCI 441 (D3) STAT 441 (D3)

Fall 2021

LEC Section: 01 MR 2:35 pm - 3:50 pm Richard D. De Veaux, Mihai Stoiciu

MATH 453 (F) Partial Differential Equations (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, fluid dynamics, neuroscience, thermodynamics, and more. We introduce PDE models and develop techniques for studying them. Topics include: derivation, classification, and physical interpretation of canonical PDE; solution techniques, including separation of variables, series solutions, integral transforms,

and characteristics; and application to problems in the natural and social sciences.

Requirements/Evaluation: quizzes/exams, problem sets, projects and activities

Prerequisites: MATH 150-151; MATH 209 or MATH/PHYS 210 or MATH 309

Enrollment Limit: 30

Enrollment Preferences: Professor's discretion

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 456 (F) Representation Theory (QFR)

Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.

Requirements/Evaluation: evaluation will be based primarily on homework, in class presentations, and exams

Prerequisites: MATH 355

Enrollment Limit: 40

Enrollment Preferences: junior and senior Math majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a 400-level Math course.

Not offered current academic year

MATH 458 (S) Algebraic Combinatorics (WS) (QFR)

Algebraic combinatorics is a branch of mathematics at the intersection of combinatorics and algebra. On the one hand, we study combinatorial structures using algebraic techniques, while on the other we use combinatorial arguments and methods to solve problems in algebra. In this collaborative project-based course, students will select among the presented topics, develop research questions, and undertake original research in the field. Student assessment is based building positive and supportive collaborative working relationships with their peers, drafts of research project manuscript, and oral presentations.

Requirements/Evaluation: Drafts of manuscript, oral presentations, reflections, peer collaboration skills

Prerequisites: MATH 200 and MATH 355

Enrollment Limit: 25

Enrollment Preferences: Senior mathematics majors, students with programming experience, students with interests in algebra and combinatorics.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: This course will require multiple revisions of a manuscript on the mathematical text and collaborative work. The final result will be a 10-20 page research article and the course will be designed as a writing intensive course.

Quantative/Formal Reasoning Notes: This is a mathematics course in the area of algebraic combinatorics and is a quantitative and formal reasoning course.

Spring 2022

SEM Section: 01 Cancelled

MATH 459 (S) Applied Partial Differential Equations (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today's cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

Requirements/Evaluation: participation, problem sets, oral presentations, oral exams, and a final project

Prerequisites: MATH 209 or MATH/PHYS 210 or MATH 309 or permission of instructor; students who have taken MATH 453 may not enroll in MATH 458 without permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: students with an interest in applied mathematics, selected to create a diverse set of tutorial participants

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This tutorial involves regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Not offered current academic year

MATH 466 (F) Advanced Applied Analysis (QFR)

This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field, as well as applications in industry. Topics include Benford's law of digit bias, random matrix theory, and Fourier analysis, and as time permits additional areas based on student interest from analytic number theory, generating functions and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will assist in writing both reviews for MathSciNet and referee reports for papers for journals, write programs to investigate and conjecture, and read classic and current research papers, and possibly apply these and related methods to real world problems.

Requirements/Evaluation: homework, exams, possible paper/presentation

Prerequisites: MATH 350 or MATH 351

Enrollment Limit: 40

Enrollment Preferences: discretion of the instructor

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

MATH 474 (S) Tropical Geometry (QFR)

This course offers an introduction to tropical geometry, a young subject that has already established deep connections between itself and pure and applied mathematics. We will study a rich variety of objects arising from polynomials over the min-plus semiring, where addition is defined as taking a minimum, and multiplication is defined as usual addition. We will learn how these polyhedral objects connect to other areas of mathematics like algebraic geometry, and how they can be applied to solve problems in scheduling theory, phylogenetics, and other diverse fields.

Class Format: Hybrid; if possible we will have classes in person, with remote students attending via Zoom.

Requirements/Evaluation: participation, problem sets, quizzes, exams, and a final project

Prerequisites: MATH 355 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Senior math majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course builds quantitative skills

Not offered current academic year

MATH 482 (F) Homological Algebra (QFR)

Though a relatively young subfield of mathematics, Homological Algebra has earned its place by supplying powerful tools to solve questions in the much older fields of Commutative Algebra, Algebraic Geometry and Representation Theory. This class will introduce theorems and tools of Homological Algebra, grounding its results in applications to polynomial rings and their quotients. We will focus on some early groundbreaking results and learn some of Homological Algebra's most-used constructions. Possible topics include tensor products, chain complexes, homology, Ext, Tor and Hilbert's Syzygy Theorem.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 355

Enrollment Limit: 20

Enrollment Preferences: junior and senior math majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

Distributions: (D3) (QFR)

Not offered current academic year

MATH 487 (S) Computational Algebraic Geometry (QFR)

Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.

Requirements/Evaluation: homework, exams, and final project

Prerequisites: MATH 355

Enrollment Limit: 40

Enrollment Preferences: instructor decision

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

Distributions: (D3) (QFR)

Not offered current academic year

MATH 493 (F) Senior Honors Thesis: Mathematics

Mathematics senior honors thesis; this is part of a full-year thesis (493-494). Each student carries out an individual research project under the direction of a faculty member that culminates in a thesis. See description under *The Degree with Honors in Mathematics*.

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Fall 2021

HON Section: 01 TBA Mihai Stoiciu

MATH 494 (F)(S) Senior Honors Thesis: Mathematics

Mathematics senior honors thesis; this is part of a full-year thesis (493-494). Each student carries out an individual research project under the direction of a faculty member that culminates in a thesis. See description under *The Degree with Honors in Mathematics*.

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Fall 2021

HON Section: 01 TBA Mihai Stoiciu

Spring 2022

HON Section: 01 TBA Mihai Stoiciu

MATH 497 (F) Independent Study: Mathematics

Directed 400-level independent study in Mathematics.

Prerequisites: permission of department

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Fall 2021

IND Section: 01 TBA Mihai Stoiciu

MATH 498 (S) Independent Study: Mathematics

Directed 400-level independent study in Mathematics.

Prerequisites: permission of department

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Spring 2022

IND Section: 01 TBA Mihai Stoiciu

MATH 499 (F)(S) Senior Colloquium

Mathematics senior colloquium. Meets every week for two hours both fall and spring. Senior majors must participate at least one hour a week. This colloquium is in addition to the regular four semester-courses taken by all students.

Class Format: colloquium

Grading: non-graded

Distributions: No divisional credit

Fall 2021

Winter Study -----

MATH 11 (W) The Deluge--Redesigning Sustainable Towns and Cities

The Intergovernmental Panel on Climate Change has predicted that without controlling greenhouse gas emissions, the average world temperature will increase, and as a result sea levels are going to rise. What does this mean, and how can we control climate change from the perspective of built environment? In this course we will get familiar with and explore concepts such as energy efficiency, smart societies, circulatory economy, sustainability, renewable energies, building certificates, and building systems, as well as their impacts on built environment. We will also learn how building sustainable communities will help societies to fight climate change, to address social justice issues, and to be more climate resilient, among other benefits. We will use Williams College's campus as our real-life laboratory. This course is a good fit for everyone, including those interested in social justice, engineering, sustainability, regional development, urban studies, architecture, and arts. Students from different backgrounds are encouraged to enroll. No prior experience needed. The course will be tailored towards students' interests and will include group work, field trips, and readings. Readings: a book of choice, and at least two academic papers. Students are expected to read a book and at least two academic papers. Work load (20 h/week): - In-class meeting time: Tuesdays and Thursdays afternoon (2 x 3 h/week) - Outside-of-class time: reading, group work and independent assignment (14 h/week) - Field trip (mandatory)

Requirements/Evaluation: participation, final project, small papers, group work

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: based on a statement of interest

Grading: pass/fail only

Unit Notes: Ksenia Ruuska is currently a PhD student at the University of Massachusetts Amherst in the department of Environmental Conservation, majoring in Sustainable Building Systems, and since January 2020 has done dissertation work in cooperation work with Umass Facilities to improve energy efficiency in a university-owned residential complex, working to reduce its carbon footprint and energy consumption. She also holds Bachelor's and Master's degrees in Engineering.

Materials/Lab Fee: \$33

Winter 2022

LEC Section: 01 TR 1:00 pm - 3:50 pm Ksenia Ruuska

MATH 12 (W) The Mathematics of Lego Bricks

This course is a modification of seven previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell. There may be a speed build challenge (college teams vs elementary school teams).

Requirements/Evaluation: final project or presentation

Prerequisites: appreciation of LEGO

Enrollment Limit: 40

Enrollment Preferences: conversation with the instructor

Grading: pass/fail only

Materials/Lab Fee: \$30

Attributes: EXPE Experiential Education Courses

Winter 2022

LEC Section: 01 M-F 1:00 pm - 2:50 pm Steven J. Miller

MATH 13 (W) The Mathematics of SET (and other games)

SET is a popular game where players try to find certain collections of three cards, which share or fail to share properties like color, shape, and number. This seemingly simple game gives rise to an incredible variety of mathematical ideas. These range from counting and probability, to the behavior of lines in strange models of geometry. Throughout this class we'll study these mathematical ideas, as well as those coming from other mathematically

interesting games (and we'll of course play lots of SET and other games!). Previous experience with SET or with mathematics is not required! We will be meeting for 6 hours per week in class; this time will be split between discussions and lectures covering the mathematics of SET, and Board Game Labs where students explore other games with intricate mathematics behind them. Outside-of-class work will include readings (from the book "The Joy of SET" and short mathematical readings relevant to other board games), learning and practicing other mathematically relevant board games, working on small problem sets, and as a final project either designing a new game based on mathematical ideas, or studying an existing game through a mathematical lens. These final projects will be showcased in a board game night at the end of Winter Study.

Requirements/Evaluation: final project or presentation; problem sets

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference given to students with less mathematical background

Grading: pass/fail only

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2022

LEC Section: 01 MWF 1:00 pm - 3:50 pm Ralph E. Morrison

MATH 14 (W) Flow Yoga

This class will teach the practice of yoga based on a fusion of Ashtanga, Vinyasa and Iyengar methodologies. This course is open to all levels from those who have never done a pose to those who have practicing yoga for years. The students will learn how to connect movement to breath in a sequence of vigorous yoga poses, or asanas. The flow classes will introduce yoga sequences in an alignment-based curriculum appropriate to each student's experience. In addition to the physical work out of practicing yoga, there will be short discussions on the assigned reading of handouts that explore various topics pertinent to yoga, such as an introduction to yogic philosophy, the essential of the human anatomy, the historical background of yoga, and a basic of knowledge of Sanskrit. The rudiments of meditation will begin and end every session. Students who are admitted to this course are required to have their own yoga mat. Students who don't own a mat can swipe for one at the College Bookstore. Aided students will have the cost covered by the book grant.

Requirements/Evaluation: daily practice of yoga, journal, and class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: enrollment preference is for those who have already been introduced to Yoga

Grading: pass/fail only

Unit Notes: Sylvia has brought her love of movement to the yoga mat. After a career of performing as a professional dancer, then full time mother of 4 and teaching ballet and modern dance, Sylvia dived into the study of yoga 20 years ago. Intensive workshops with David Swenson, Shiva Rea, Patricia Walden, and Tasha Judson introduced her to the rigors of Ashtanga, the dynamic joy of Vinyasa, and the importance of precise alignment in asanas. Sylvia completed her 200 hour Teaching Training last month.

Materials/Lab Fee: none

Winter 2022

LEC Section: 01 MWF 10:00 am - 12:50 pm Sylvia I. Logan

LEC Section: 02 MTR 1:30 pm - 3:30 pm Sylvia I. Logan

MATH 16 (W) The Science of Star Trek

Cross-listings: MATH 16 PHYS 16

Secondary Cross-listing

Comprising thirteen motion pictures and six major television series, totaling over 500 hours of film, Star Trek has had a profound impact on pop culture and the scientific imagination. In this Winter Study course, we will board Star Trek as vehicle towards a critical discussion of science, technology, and their consequences to society. We will boldly question topics such as the nature of reality, the (uni/multi)verse according to quantum theory and

general relativity, the origins of consciousness and the possibility and consequences of extraterrestrial and artificial intelligence. We will view select episodes and films from the franchise, discussing their basis in actual science and using them as a prism to understand issues facing us on Earth.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: selection based on a small assignment and/or conversations with the instructors

Grading: pass/fail only

Materials/Lab Fee: none

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 16 PHYS 16

Winter 2022

LEC Section: 01 TR 1:00 pm - 3:50 pm Frederick W. Strauch

MATH 19 (W) A Taste of Austria

This course introduces students to elements of the Austrian culture around the turn of the 19th century up to today. Students will learn and prepare presentations about significant contributions to the arts and sciences from Austrians such as musician Gustav Mahler, artist Gustav Klimt, scientist Karl Landsteiner or poet Stefan Zweig (the chess novella). Other activities include learning how to dance the Viennese waltz composed by Johann Strauss (in case you want to attend Austria's main annual society event, the Opernball in Vienna) or how to prepare Wiener Schnitzel or bake Sachertorte (the delicious cake offered by the Hotel Sacher in Vienna). If time and weather permits, we will also pursue typical Austrian winter activities such as down hill or cross country skiing, sledding or skating. The course will be conducted mainly in English, with some German intermingled.

Requirements/Evaluation: Evaluation will be based on attendance, a paper and class presentations on a topic with an Austrian connection (possible topics will be suggested, but students can choose their own) and class discussions. The class will end with a final exam and the screening of the movie A Sound of Music.

Prerequisites: No pre-requisites necessary although some knowledge of German is welcome

Enrollment Limit: 24

Enrollment Preferences: random selection

Grading: pass/fail only

Unit Notes: Sophia Klingenberg was born in Graz, Austria. She graduated from the Vienna University Medical School with a doctorate in Medicine in 2004, finished her residency in general medicine in Graz, Austria in 2014 and worked at the University of Florida, Dept. of Pathobiology as a research scholar for three years.

Materials/Lab Fee: \$90 (optional; Lift ticket plus equipment rental for skiing)

Winter 2022

LEC Section: 01 TR 10:00 am - 12:50 pm Sophie C. Klingenberg

MATH 25 (W) Modern Marine Science

Cross-listings: MATH 25 BIOL 26

Primary Cross-listing

This travel course will be on site in Woods Hole, MA, home to three world renowned marine science centers: the National Oceanic and Atmospheric Administration (NOAA), the Marine Biological Laboratory (MBL) and the Woods Hole Oceanographic Institution (WHOI). Time will be spent shadowing professionals in their line of work, assisting research when possible (or watching), and also listening to lectures on different topics given by this adjunct professor or other experts.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none (Or perhaps an intro biology course credit?)

Enrollment Limit: 8

Enrollment Preferences: students interested in a career in marine science will be preferred; then, students in the life sciences or other directly related field (ecological statistics, etc)

Grading: pass/fail only

Unit Notes: Jennifer Turek has a Master's in Zoology from the University of Otago in Dunedin, New Zealand studying the endangered and endemic Hector's dolphin. Recently, she has continued these marine mammal studies working with NOAA in Woods Hole, MA studying marine mammal acoustics, specifically the highly endangered North Atlantic Right Whale. She also manages the North Atlantic annual stock assessment reports as required by the Marine Mammal Protection Act and other Protected Species Branch efforts.

Materials/Lab Fee: \$1,500

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 40 (W) Mathematics Immersion: The Beauty of Numbers

This course will be an introduction to logic and number theory, with emphasis throughout on mathematics as a way of thinking. Have you ever wondered what keeps your credit card information safe every time you buy something online Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

Class Format: Students will attend lecture Monday - Thursday mornings from 10am - noon. In the afternoons, students will attend interactive math labs from approximately 1 - 3 pm Monday - Thursday.

Requirements/Evaluation: Evaluation will be based on daily homework and activities, exams, projects, and participation in class and math labs.

Prerequisites: Permission of a dean.

Enrollment Limit: 20

Enrollment Preferences: Students who need to make up a deficiency.

Expected Class Size: 15

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester, Winter Study, and QFR credit. Once a dean approves enrollment, the Registrar's Office will register students in both MATH 100 and MATH 40.

Winter 2022

LEC Section: 01 MTWR 10:00 am - 12:00 pm MTWR 1:00 pm - 3:00 pm Allison Pacelli

MATH 41 (W) Introduction to Data Science - Intensive

Data science brings together techniques from computing, mathematics, and statistics to extract knowledge from data in fields of application as diverse as climate science, particle physics, electoral politics, literary analysis, and countless others. This course provides an introduction to data science techniques. First, using the computational package R, students will learn how to acquire, clean, explore, summarize, visualize, and communicate data. Second, in a series of nontechnical guest lectures, professional data scientists will share the types of work they do. Finally, students will carry out a small project, applying their data science skills to problems that interest them. This course requires no background in computer programming, mathematics, or statistics. However, this is an intensive course, and students must have enthusiasm to learn programming and a willingness to practice this skill for several hours per day.

Class Format: To afford students flexibility during the COVID pandemic, this course is taught online. Students will watch videos and complete data science modules asynchronously, and will participate in occasional synchronous lectures.

Requirements/Evaluation: Students will complete data science modules and a final project. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the term, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: Willingness to learn a new field; willingness to practice computer programming intensively.

Enrollment Limit: 20

Enrollment Preferences: Contact the Office of the Dean of the College.

Expected Class Size: 20

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester, Winter Study, and QFR credit. Once a dean approves enrollment, the Registrar's Office will register students in both MATH 101 and MATH 41.

Not offered current academic year

MATH 99 (W) Independent Study: Mathematics

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2022

IND Section: 01 TBA Mihai Stoiciu

MATHEMATICS AND STATISTICS (Div III)

STATISTICS

Chair of the Department of Mathematics and Statistics: C. Carlisle and Margaret Tippit Professor of Statistics, Richard De Veaux

- Colin C. Adams, Thomas T. Read Professor of Mathematics
- Julie C. Blackwood, Associate Professor of Mathematics
- Xizhen Cai, Assistant Professor of Statistics; on leave 2021-2022
- Richard D. De Veaux, Chair & C. Carlisle and Margaret Tippit Professor of Statistics
- Thomas A. Garrity, Webster Atwell Class of 1921 Professor of Mathematics
- Leo Goldmakher, Associate Professor of Mathematics; on leave 2021-2022
- Pamela E. Harris, Associate Professor of Mathematics, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion; affiliated with: The Davis Center, InstDiversity,Equity&Inclusion
- Stewart D. Johnson, Professor of Mathematics
- Bernhard Klingenberg, Professor of Statistics
- Susan R. Loepp, William R. Kenan, Jr. Professor of Mathematics
- Steven J. Miller, Professor of Mathematics
- Ralph E. Morrison, Assistant Professor of Mathematics
- Shaoyang Ning, Assistant Professor of Statistics
- Allison Pacelli, Professor of Mathematics; on leave Spring 2022
- Lori A. Pedersen, Lecturer in Mathematics
- Anna M. Plantinga, Assistant Professor of Statistics; on leave 2021-2022
- Cesar E. Silva, Hagey Family Professor of Mathematics
- Mihai Stoiciu, Professor of Mathematics
- Annie Tang, Visiting Lecturer of Statistics
- Chad M. Topaz, Professor of Mathematics
- Laurie L. Tupper, Assistant Professor of Statistics; on leave 2021-2022
- Daniel B. Turek, Assistant Professor of Statistics
- Elizabeth M. Upton, Assistant Professor of Statistics

MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics. Students interested in continuing their study of statistics in graduate school should strongly consider taking Math 350/351 in addition to the other requirements.

Mathematics (2 courses)

MATH 150 or 151 Multivariable Calculus or equivalent high school course

MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151) before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

Computer Science (1 course)

CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

Core Courses (4 courses)

STAT 201 Statistics and Data Analysis, STAT 202 Introduction to Statistical Modeling or STAT 302 Applied Statistical Modeling

STAT 346 Regression and Forecasting

STAT 341 Probability

STAT 360 Inferential Statistics

Continuation (2 courses)

Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

Capstone Course (1 course)

The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

Pass/Fail policies during the Academic Year 2020-2021

Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found [here](#).

Colloquium Requirement

Participation in the Department Colloquium, in which each senior major presents a talk on a mathematical or statistical topic of their choice. Each major must also attend at least 20 colloquia (15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Up to 5 colloquia in mathematics or computer science may also be counted. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

PLACEMENT

Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

Double Counting: No course may count towards two different majors.

Early Senior Capstone Course: In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

Planning Courses: Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. During the Academic Year 2020-2021 the winter study requirement for the honors program in Statistics is waved. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)

It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Requirements/Evaluation: weekly homework, quizzes, exams, and a project

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 50

Enrollment Preferences: juniors and seniors

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with MATH130 but no statistics should enroll in STAT161; students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161/201 should enroll in STAT 202.

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It is a quantitative course.

STAT 161 (F)(S) Introductory Statistics for Social Science (QFR)

This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation: students complete homework, quizzes, exams (including take-home exams), and a project. Students will need to get familiar with the statistical software STATA.

Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent

Enrollment Limit: 40

Enrollment Preferences: Economics majors, sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Unit Notes: Students with calculus background should consider STAT 201 or 202. Students without any calculus background should consider STAT 101. Please refer to the placement chart on the Math&Stat department website for more information.

STAT 201 (F)(S) Statistics and Data Analysis (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Requirements/Evaluation: weekly homework and projects, midterm exams, and a final exam.

Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

Enrollment Limit: 45

Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors

Expected Class Size: 45

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202. Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Students will learn to interpret, choose, carry out, and communicate analyses of data.

STAT 202 (F)(S) Introduction to Statistical Modeling (QFR)

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: Class meetings will discuss questions from lecture, dive further into the material, and work on examples. You'll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. The professor and TAs will also offer optional synchronous office hours/review sessions.

Requirements/Evaluation: Homework problems; quizzes; a final project (on a topic that interests you!); midterm and final exams. You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.

Prerequisites: AP Statistics 4 or 5, or STAT 101, or STAT 161, or STAT 201, or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: Prospective Statistics majors and more senior students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with a 4 on the AP Stats exam should contact the department for proper placement

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 302 (S) Applied Statistical Modeling (QFR)

Data may come from various sources and studies with different purpose of analysis. Statistical modeling provides a unified framework to embrace different data types, and focuses on the goals of understanding relationships, assessing differences and making predictions. We will explore different types of statistical models (linear regression, ANOVA, logistic regression etc), and focus on their conditions, the interactive modeling process, as well as the statistical inference tools for drawing conclusions from them. Throughout the course, real datasets will be modeled for interesting questions about the world, and the limitations will be addressed as well.

Class Format: Hybrid format

Requirements/Evaluation: weekly homework assignments, quizzes, exams and a course project.

Prerequisites: One of the following: i) STAT 201; ii) MATH 140 and STAT 101/161/AP Statistics 4/5; iii) Permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Students interested in statistics who have background in calculus and intro stat. Students cannot take STAT 302 either simultaneously or after STAT 346.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It is an intermediate statistics class with prerequisites that are QFR courses

Not offered current academic year

STAT 310 (F) Data Visualization (QFR)

This course is about preparing, visualizing, reporting and presenting different types of data. We will start with creating common plots (e.g., barcharts, histograms, density plots, boxplots, time series and lattice plots), but also discuss visualizing results of statistical models, such as linear or logistic regression models. We will use the ggplot library in R but then switch to the plotly library for interactive graphs with mouse-over and click events. Using R's shiny and DT libraries, we will learn how to create and publish web-apps and dashboards that explore datasets and support online filtering. We will end the class with creating web apps that contain multiple graphs or maps which react to user inputs (such as selecting which variables to plot) or provide real time monitoring of streaming data. Throughout, we will use version control software (Github) to organize and keep track of our code. This course will be taught in a semi-flipped style. While the instructor will introduce certain topics, students will often be responsible for reading material ahead of time and then work individually or in pairs to reproduce material or implement it on their own data.

Requirements/Evaluation: Grading will almost entirely be based on class participation, individual and team-work, project presentations and the student's portfolio.

Prerequisites: Stat 201/202/302; Good knowledge of R

Enrollment Limit: 15

Enrollment Preferences: Preference may be given to stats majors who need the course in order to graduate, but then random selection.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course teaches how to organize and present data graphically, but also how to critique existing data visualizations.

Not offered current academic year

STAT 315 (S) Applied Machine Learning (QFR)

How does Netflix recommend films based on your viewing history? How does Facebook group its users and send out targeted ads? How did Google select from thousands of search terms to predict flu? Machine learning (ML) is a rapidly growing field that is concerned with algorithms and models to find patterns in data and solve these practical problems at the intersection between statistics, data science and computer science. This course provides a broad introduction to ideas and methods in machine learning, with emphasis on statistical intuitions and practical data analysis. Topics including regularized regression, SVM, supervised/unsupervised learning, text analysis, neural networks will be covered. Students will use R extensively throughout the course while getting introduced to some ML tools in Python.

Class Format: Hybrid format. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Requirements/Evaluation: weekly homework, one class project, and two or three exams

Prerequisites: MATH 140, and STAT 201/202, or equivalent; or permission of instructor. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Enrollment Limit: 15

Enrollment Preferences: Seniors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods

Not offered current academic year

STAT 319 (S) Statistical Computing (QFR)

This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating, visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats, techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will be project-based.

Requirements/Evaluation: based primarily on projects, homework, and exams

Prerequisites: STAT 201 or 202 and CSCI 134, 135, or 136

Enrollment Limit: 30

Enrollment Preferences: juniors and seniors, Statistics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course uses statistical tools and programming techniques to acquire data, create visualizations, and make future predictions.

Spring 2022

LEC Section: 01 TF 1:10 pm - 2:25 pm Daniel B. Turek

STAT 335 (S) Biostatistics and Epidemiology (QFR)

Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and a brief introduction to regression with correlated data.

Class Format: Hybrid format

Requirements/Evaluation: evaluation will be primarily based on weekly homework, two midterm exams, a final exam, and a data analysis project

Prerequisites: STAT 201, STAT 202 and MATH 140, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Junior and senior statistics majors; public health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics course with a focus on quantitative methods relevant to public health studies.

Attributes: PHLH Statistics Courses

STAT 341 (F)(S) Probability (QFR)

Cross-listings: STAT 341 MATH 341

Secondary Cross-listing

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 150 and MATH 250 or permission of the instructor

Enrollment Limit: 30

Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STAT 342 (S) Introduction to Stochastic Processes (QFR)

Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time t or the accumulated claims paid by an insurance company in an interval of time t . This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

Requirements/Evaluation: weekly homework/labs, classwork, and exams

Prerequisites: STAT 341

Enrollment Limit: 30

Enrollment Preferences: senior Statistics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

Spring 2022

LEC Section: 01 TF 2:35 pm - 3:50 pm Elizabeth M. Upton

STAT 344 (F) Statistical Design of Experiments (QFR)

When you hear the word experiment you might be picturing white lab coats and pipettes, but businesses, especially, e-commerce are constantly experimenting as well. How do you get the most out of both scientific and business investigations? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound. We'll learn how to analyze the data that come from these experiments and the conclusions we can draw from that analysis. We'll look both classical tools like fractional factorial designs as well as optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of both R and JMP software to work with real-world data.

Requirements/Evaluation: Homework problems--both individual and in groups, midterm, final, and projects (on topics that interest you!).

Prerequisites: STAT 161, 201, 202, or equivalent, and Math 140 or equivalent, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Statistics majors, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to design experiments, analyze their results, and assess their effectiveness. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Fall 2021

LEC Section: 01 MWF 12:00 pm - 12:50 pm Richard D. De Veaux

STAT 346 (F)(S) Regression Theory and Applications (QFR)

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear, logistic and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Requirements/Evaluation: Weekly homework, midterm exam, final exam, end-of-year project.

Prerequisites: MATH 250, MATH/STAT 341 (may be taken concurrently) and at least one of STAT 201 or 202. Or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Statistics Majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

Spring 2022

LEC Section: 01 TR 9:55 am - 11:10 am Elizabeth M. Upton

STAT 355 (F) Multivariate Statistical Analysis (QFR)

To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data

sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

Class Format: This will be a hybrid course for students who are both remote and in-person, with a mix of synchronous and asynchronous elements

Requirements/Evaluation: homework, project/presentations, possibly one or two exams.

Prerequisites: MATH 250, and STAT 346 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: students interested in statistics which have solid background in math and stat

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Not offered current academic year

STAT 356 (S) Time Series Analysis (QFR)

Time series -- data collected over time -- crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including descriptive methods and checking for significance, and a foray into the frequency domain. We will emphasize applications to a variety of real data, explored using R.

Class Format: Introductory lectures will be available asynchronously as text and video; synchronous sessions will discuss questions from lecture, dive further into the material, and work on examples. You'll use chat and discussion boards to build community, study with classmates, and ask questions outside of class time. There will also be optional synchronous office hours/review sessions.

Requirements/Evaluation: Evaluation is primarily based on quizzes and projects (on topics that interest you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While most assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Statistics majors, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Not offered current academic year

STAT 358 (S) Introduction to Categorical Data Analysis (QFR)

This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis (such as linear regression) are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed for modeling categorical data, with applications in the social and biological sciences as well as in medical research, engineering and economics. This course has two parts. The first part will discuss statistical inference for parameters of categorical distributions (Bernoulli, Binomial, Multinomial, Poisson) and for measures of association arising in contingency tables (difference and ratio of proportions and odds ratios). Inferential methods covered include Wald, score and likelihood ratio tests and confidence intervals, as well as the bootstrap. The longer second part will focus on statistical modeling of categorical response data via generalized linear models, with a heavy focus on logistic regression models with both quantitative and categorical predictors and their interactions. Model fitting and inference will be based on maximum likelihood and carried out via R.

Requirements/Evaluation: Weekly homework assignments consisting of exercises from the textbook as well as data analysis problems, carried out

using R. Occasional short in-class quizzes at the beginning of class. One Midterm (with both in-class and take-home component). Final Project with presentation. Final exam. Homework accounts for roughly 15% of the grade, quizzes for another 15%, midterm (in-class and take-home combined) and final for about 30% each, and project for the remaining 10%.

Prerequisites: STAT 346: Regression and Forecasting

Enrollment Limit: 15

Enrollment Preferences: stats majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Students learn how to analyze data and communicate results.

Spring 2022

LEC Section: 01 TR 11:20 am - 12:35 pm Bernhard Klingenberg

STAT 360 (S) Statistical Inference (QFR)

How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Class Format: For the Spring 2021 semester, synchronous zoom lectures are planned, where the instructor uses Google's jamboard to interact with students

Requirements/Evaluation: Homework, Quizzes, Exams

Prerequisites: MATH 250, STAT 201 or 202, STAT 341

Enrollment Limit: 15

Enrollment Preferences: Statistics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: A rigorous mathematical course laying the foundation for reasoning with data

Spring 2022

LEC Section: 01 TR 8:30 am - 9:45 am Bernhard Klingenberg

STAT 362 (F) Design of Experiments (QFR)

How do you get informative research results? By doing the right experiment in the first place. We'll look at the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. Using a framework of optimal design, we'll examine the theory both of classical designs and of alternatives when those designs aren't appropriate. On the applied side, we'll make extensive use of R to work with real-world data.

Requirements/Evaluation: based primarily on projects, homework, and exams

Prerequisites: STAT 346

Enrollment Limit: 30

Enrollment Preferences: seniors/juniors and Statistics majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

STAT 365 (F) Bayesian Statistics (QFR)

The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Requirements/Evaluation: homework and exams

Prerequisites: STAT 201 and MATH 150 and 250, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: juniors and seniors, Statistics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course utilizes mathematics and computer-based tools for the Bayesian approach for analyzing data and making statistical inferences.

Fall 2021

LEC Section: 01 TF 1:10 pm - 2:25 pm Daniel B. Turek

STAT 368 (S) Modern Nonparametric Statistics (QFR)

Many statistical procedures and tools are based on a set of assumptions, such as normality or other parametric models. But, what if some or all of these assumptions are not valid and the adopted models are misspecified? This question leads to an active and fascinating field in modern statistics called nonparametric statistics, where few assumptions are made on data's distribution or the model structure to ensure great model flexibility and robustness. In this course, we start with a brief overview of classic rank-based tests (Wilcoxon, K-S test), and focus primarily on modern nonparametric inferential techniques, such as nonparametric density estimation, nonparametric regression, selection of smoothing parameter (cross-validation), bootstrap, randomization-based inference, clustering, and nonparametric Bayes. Throughout the semester we will examine these new methodologies and apply them on simulated and real datasets using R.

Requirements/Evaluation: performance on exams, homework, and a project

Prerequisites: STAT 201 and STAT 346, or permission of instructor.

Enrollment Limit: 30

Enrollment Preferences: senior Statistics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods.

Not offered current academic year

STAT 372 (F) Longitudinal Data Analysis: Modeling Change over Time (QFR)

This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Class Format: Hybrid format. Approximately 2/3 of class time will be lecture (in person for students who are on campus, recorded for remote students). All synchronous students (whether in person or online) will attend a remote lab/discussion section each week. Asynchronous options will be provided for students unable to participate synchronously.

Requirements/Evaluation: performance on exams, homework, and a project

Prerequisites: STAT 201 and STAT 346

Enrollment Limit: 15

Enrollment Preferences: junior and senior Statistics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course will cover a variety of statistical analysis methods for longitudinal data.

Enrollment Preferences: seniors and Statistics Majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Attributes: PHLH Statistics Courses

Not offered current academic year

STAT 441 (F) Information Theory and Applications

Cross-listings: MATH 441 CSCI 441 STAT 441

Primary Cross-listing

What is information? And how do we communicate information effectively? This course will introduce students to the fundamental ideas of Information Theory including entropy, communication channels, mutual information, and Kolmogorov complexity. These ideas have surprising connections to a fields as diverse as physics (statistical mechanics, thermodynamics), mathematics (ergodic theory and number theory), statistics and machine learning (Fisher information, Occam's razor), and electrical engineering (communication theory).

Requirements/Evaluation: Weekly homeworks, midterm(s), final exam.

Prerequisites: Math/Stat 341; Math 150 or 151; or permission of instructor.

Enrollment Limit: 30

Enrollment Preferences: Seniors; mathematics and statistics majors.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 441 (D3) CSCI 441 (D3) STAT 441 (D3)

Fall 2021

LEC Section: 01 MR 2:35 pm - 3:50 pm Richard D. De Veaux, Mihai Stoiciu

STAT 442 (S) Statistical Learning and Data Mining (QFR)

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Requirements/Evaluation: weekly homework, exams and an end-of-term project

Prerequisites: STAT 346 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Statistics majors, juniors and seniors. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is an advanced statistics class involving theory and application of statistical methods to data.

Spring 2022

LEC Section: 01 MR 2:35 pm - 3:50 pm Shaoyang Ning

STAT 458 (F) Spatio-Temporal Data (QFR)

Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information--introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Requirements/Evaluation: project work, homework, exams, and contribution to discussion

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Not offered current academic year

STAT 465 (F) Bayesian Statistics (QFR)

Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. Indeed, the Bayesian approach is now recognized across scientific disciplines as a modern and powerful tool. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to performing Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods, before moving on to multivariate sampling methods and methodology. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing. The course will culminate in an independent Bayesian research project.

Requirements/Evaluation: Homework, exams, and project

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Juniors and Seniors, and Statistics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course mandates significant mathematical and statistical prowess.

MUSIC (Div I)

Chair: W. Anthony Sheppard, Marilyn & Arthur Levitt Professor of Music

- Kris Allen, Lyell B. Clay Artist in Residence in Jazz Activities/Lecturer in Music, Director of the Jazz Ensemble
- M. Jennifer Bloxam, Herbert H Lehman Professor of Music
- Corinna S. Campbell, Associate Professor of Music; on leave Fall 2021
- Ronald L. Feldman, Artist in Residence in Orchestral and Instrumental Activities/Lecturer in Music, Director of the Berkshire Symphony
- Matthew A. Gold, Artist in Residence in Percussion and Contemporary Music Performance
- Ed Gollin, Professor of Music; on leave 2021-2022
- Wang Guowei, Artist in Residence in Chinese Music Performance and Director of the Williams College Chinese Music Ensemble
- Marjorie W. Hirsch, Professor of Music
- Noah Horn, Visiting Artist in Residence and Director of Choral Activities
- Joanna Kurkowicz, Lyell B. Clay Artist in Residence, Violin and Concertmaster, Berkshire Symphony
- Edwin Lawrence, Artist Associate in Harpsichord, Piano and Organ and Lecturer in Music
- Tendai Muparutsa, Artist in Residence in African Music Performance, Lecturer in Music, Director of Zambezi, Co-Director of Kusika
- Ileana Perez Velazquez, Professor of Music; on leave Spring 2022
- Daniel E. Prindle, Lecturer in Music
- W. Anthony Sheppard, Chair and Marilyn & Arthur Levitt Professor of Music
- Doris J. Stevenson, Lyell B. Clay Artist in Residence, Piano
- Zachary Wadsworth, Associate Professor of Music
- Brad Wells, Lyell B. Clay Artist in Residence and Director of Choral/Vocal Activities, Lecturer in Music

COURSES AND COURSE-NUMBERING

100-level courses are introductory in nature. They aim to acquaint students with a variety of topics in music, ranging from the materials of music (introductory music theory and musicianship) to various musical cultures (African, American, Asian, Caribbean, and European) and styles within those cultures (classical, folk, and popular). Most 100-level courses are designed for the general student and have no prerequisites; they assume no prior musical training, and are open to all students interested in increasing their understanding and appreciation of music. The two 100-level courses that can serve to satisfy specific music theory requirements for the music major (MUS 103 and 104a or 104b) require a working knowledge of musical notation; these courses are geared to potential majors and students with strong instrumental or vocal background, and are particularly suitable for first-year students interested in taking more advanced courses in music.

200-level courses offer students the opportunity to explore a range of more specialized musical topics, from performance, technology, and musicianship-based classes to courses focused on specific styles, periods, composers, and examinations of meaning in music. Most regular 200-level courses have no prerequisites but do require the ability to read music, and are usually open to all students who can do so, regardless of class year. Some 200-level tutorials and writing intensive courses have no prerequisites and do not require the ability to read music, but the workload and more advanced approach to the subject matter makes these courses best suited to sophomores, juniors, and seniors. The two 200-level courses that complete the music theory requirements for the music major (MUS 201 and 202) have prerequisites; these courses are geared to potential majors, majors, and students with strong instrumental or vocal background.

300-level courses are designed for sophomores, juniors, and seniors with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. All require at least one semester of music theory or its equivalent. Some 300-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

400-level courses are intended for advanced juniors and seniors, usually music majors, wishing to pursue thesis, independent study, or small seminar coursework in composition, theory and analysis, musicology, ethnomusicology, or performance, under the guidance of an individual faculty

advisor.

MAJOR

A minimum of ten courses are required for the major, as detailed below.

Four courses in Music Theory and Musicianship to be taken in sequence:

Music 103

Music 104a (Music Theory and Musicianship I) or Music 104b (Jazz Theory and Improvisation I)

Music 201

Music 202

Three courses in European and American Music History:

Music 231

Music 232

Music 233

Majors may choose to replace a maximum of one of these three specific courses with a course in music history covering aspects of the same period. The courses that may substitute for MUS 231, 232, and 233 are listed below:

Music 231: 163, 164, or 261

Music 232: 165, 166, 236, or 266T

Music 233: 118, 119, 138, 150, 151, 238, 239, 244, 251, 252 or 254

One course in World Music/Ethnomusicology from the following:

[AFR 239 / MUS 215\(F\) LEC Music Migration, Blues People, and Wayward Women: Case Studies in DJ Scholarship](#)

Taught by: [Lynnée D Bonner](#)

[Catalog details](#)

[DANC 201 / AFR 201 / MUS 220\(F\) STU African Dance and Percussion](#)

Taught by: [Sandra Burton](#), [Tendai Muparutsa](#)

[Catalog details](#)

[DANC 202 / AFR 206 / MUS 221\(S\) STU African Dance and Percussion](#)

Taught by: [Sandra Burton](#), [Tendai Muparutsa](#)

[Catalog details](#)

[DANC 330 / AFR 330 / MUS 330 STU Modern Folklore: Postcolonial Dance and Music in Africa](#)

Taught by: [Sandra Burton](#)

[Catalog details](#)

[MUS 111\(S\) LEC Music in Global Circulation](#)

Taught by: [Corinna Campbell](#)

[Catalog details](#)

[MUS 120 / AFR 113 LEC Musics of Africa](#)

Taught by: [Corinna Campbell](#)

[Catalog details](#)

[MUS 177 / WGSS 177 SEM Gender and Sexuality in Music](#)

Taught by: [Corinna Campbell](#)

[Catalog details](#)

[MUS 211 SEM Music, Nationalism, and Popular Culture](#)

Taught by: [Corinna Campbell](#)

[Catalog details](#)

[MUS 222 / AFR 223 SEM Politics of Performance/Performing Politics in Contemporary Africa](#)

Taught by: [Corinna Campbell](#)

[Catalog details](#)

[MUS 323 / THEA 321 / DANC 323 SEM Arts Organizing in Africa and the Diaspora](#)

Taught by: [Corinna Campbell](#)

[Catalog details](#)

Two electives:

One must be taken in the senior year and at the 400-level to serve as a capstone course. The second semester of a year-long honors thesis, MUS 494, will satisfy the 400-level elective requirement; for students in the class of 2024 and subsequent years, Advanced Musical Performance, MUS 491

or 492, will not satisfy the 400-level capstone elective. The other elective may be fulfilled in any semester by any Music course but must be taken in addition to courses selected to satisfy the history, theory, and world music/ethnomusicology requirements detailed above.

Majors are required to participate in faculty-directed departmental ensembles for at least four semesters.

Majors must enroll in partial credit music lessons for at least two semesters.

THE DEGREE WITH HONORS IN MUSIC

Three routes provide the opportunity for honors or highest honors consideration in the Music major:

Composition: A Composition thesis must include one major work completed during the senior year supported by a 10- to 15-page discussion of the student's work or analysis of a major 20th century or contemporary work. The student's general portfolio of compositions completed during the junior and senior years will also be considered in determining honors.

Performance: A Performance thesis must include an honors recital given during the spring of the senior year supported by a 15- to 20-page discussion of one or more of the works performed. The student's general performance career will also be considered in determining honors.

History, Theory and Analysis, or Ethnomusicology: A written Historical, Theoretical/Analytical, or Ethnomusicological thesis between 65 and 80 pages in length. A written thesis should offer new insights based on original research. A public oral thesis defense is also required.

In order for a thesis proposal to be approved, a student must have at least a 3.3 GPA in Music courses (this GPA must be maintained in order to receive honors), and must have demonstrated outstanding ability and experience through coursework and performance in the proposed thesis area. Students are encouraged to seek the advice of their potential thesis advisor early in the junior year and no later than the first month of the second semester. A 1- to 2-page proposal written in consultation with the faculty advisor must be received by the Music chair by the end of spring break.

Honors candidates must enroll in Music 493(F)-W31-494(S) during their senior year. A student who is highly qualified for honors work, but is unable to pursue a year-long project for compelling reasons, may petition the department for permission to pursue a WS/one-semester thesis. The standards for evaluating such a thesis remain the same. Completed thesis is due by April 15.

LESSONS

Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the lesson commitment. (See Music 281-288 and Advanced Musical Performance 391, 392, 491, 492). For further information, check the Music Department webpage or contact the Department of Music.

STUDY ABROAD

One study abroad course may satisfy the one free elective requirement for the major, if approved by the department. A second study abroad course might satisfy any one of the specific required courses if the proposed course is clearly equivalent and if the substitution is approved by the department. Majors planning to study abroad should meet with the department chair to propose specific study abroad courses that might be approved to satisfy major requirements under this policy. No more than two courses taken abroad may count toward the major. Music lesson courses and ensemble participation pursued while studying abroad may count toward the performance requirements with approval of the department.

MUS 101 (F) Listening to Music: An Introduction to the Western Classical Tradition

When you listen to music -- on your phone or computer, on the radio, at a concert -- how much do you really hear? This course refines students' listening skills through study of the major composers, styles, and genres of the Western classical tradition. We will explore music from the Baroque, Classical, Romantic, and Modern eras, including works by Bach, Mozart, Beethoven, Chopin, Tchaikovsky, Brahms, Stravinsky, and other composers. Genres to be covered include the symphony, string quartet, sonata, opera, song, and choral music.

Requirements/Evaluation: Grades will be based on participation, GLOW posts, several quizzes, a midterm exam, and a final exam. Attendance at two Williams concerts required if conditions permit.

Prerequisites: none; intended for non-major students with little or no formal training in music

Enrollment Limit: 19

Enrollment Preferences: first-years, sophomores and any student who expresses a strong interest in the course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

LEC Section: 01 MWF 8:30 am - 9:45 am Marjorie W. Hirsch

MUS 102 (F) Introduction to Music Theory

The course presents an introduction to the materials and structures of music. Through a variety of practical exercises and daily worksheets, students will develop an understanding of the elements of music (e.g. pitch, scales, triads, rhythm, meter, and their notation) and explore their combination and interaction in the larger-scale organization of works of classical, jazz and popular music (i.e. harmony, counterpoint, form, rhetoric). Practical musicianship skills will be developed through singing, keyboard, and rhythmic exercises.

Requirements/Evaluation: regular homework assignments (1-2 pages), written and applied musicianship quizzes, three model composition projects, midterm and final exam, participation

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: first-year students

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2021

LEC Section: 01 MR 1:10 pm - 2:25 pm Tim Pyper

MUS 103 (F) Music Theory and Musicianship I

MUS 103 and 104 are designed for potential majors and for students with strong instrumental or vocal backgrounds. Students entering MUS 103 should have a solid understanding of musical rudiments (intervals, scales, keys) and reading proficiency in both bass and treble clefs. A short diagnostic exam will be administered at the first class meeting of MUS 103 to determine if a student requires any additional work to complement and fortify course work during the early weeks of the semester, or whether placement in MUS 102 would be more appropriate. Students with a strong background in music theory may take a placement exam during First Days to see whether they can pass out of one or both semesters. MUS 103 and 104 are required for the music major. MUS 103 presents the materials, structures and procedures of tonal music, with an emphasis on the harmonic and contrapuntal practice of the baroque and classical periods (ca. 1650-1825). The course explores triadic harmony, voice leading, and counterpoint with an emphasis on the chorale style of J.S. Bach and his predecessors. Keyboard harmony and figured bass exercises, sight singing, dictation, analysis of repertoire, written exercises and emulation projects will develop both an intellectual and an aural understanding of music of the period. Projects include chorale harmonization, arranging, and the composition of canons.

Class Format: In addition to the two lecture meetings each week, the class requires three weekly lab meetings (for keyboard skills, music writing skills, and aural skills).

Requirements/Evaluation: weekly written work, written and applied quizzes, and midyear and final projects

Enrollment Limit: 24

Enrollment Preferences: first-years, potential Music majors, and those with strong musicianship backgrounds

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2021

LEC Section: 01 TR 11:20 am - 12:35 pm Zachary Wadsworth

LAB Section: 02 MWF 9:00 am - 9:50 am Daniel E. Prindle, Edwin I. Lawrence

LAB Section: 03 MWF 10:00 am - 10:50 am Daniel E. Prindle, Edwin I. Lawrence

LAB Section: 04 MWF 11:00 am - 11:50 am Daniel E. Prindle, Edwin I. Lawrence

MUS 104 (S) Music Theory and Musicianship I

Music 104a continues the practical musicianship work of Music 103, while expanding the scope of harmonic topics to include seventh chords and chromatic harmony. Music 104a further explores the transformation of chorale harmony in contrapuntal works of the eighteenth century. Projects include the composition of preludes and fugues on baroque models.

Class Format: lecture two days a week; lab meetings (for keyboard skills, music writing skills, and ear training) three days a week

Requirements/Evaluation: weekly written work, written and applied quizzes, and midterm and final projects

Prerequisites: MUS 103

Enrollment Limit: 24

Enrollment Preferences: first-year students, potential or declared Music majors, and those with strong musicianship backgrounds

Expected Class Size: 21

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104b; students considering taking this course should consult the lab times and plan their schedules accordingly

Distributions: (D1)

Spring 2022

LEC Section: A1 TR 11:20 am - 12:35 pm Zachary Wadsworth

LAB Section: A2 MWF 9:00 am - 9:50 am Daniel E. Prindle, Edwin I. Lawrence

LAB Section: A3 MWF 10:00 am - 10:50 am Daniel E. Prindle, Edwin I. Lawrence

LAB Section: A4 MWF 11:00 am - 11:50 am Daniel E. Prindle, Edwin I. Lawrence

MUS 104 (S) Jazz Theory and Improvisation I

Cross-listings: MUS 104 AFR 212

Primary Cross-listing

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 104 (D1) AFR 212 (D1)

LAB Section: B8 MWF 11:00 am - 11:50 am Daniel E. Prindle, Edwin I. Lawrence

MUS 110 (S) Electronic Music Genres, a Creative Approach

In this course, students will study the theoretical and practical fundamentals of audio technology, MIDI production, and interactive composition. Students are not required to have any background in Music Technology. We will start by covering the basics of Electronic Music but the class will move at a fast pace covering more advanced subjects in a short period of time. We will go over concepts of Physics acoustic, MIDI (sequencing, etc), Sound editing, Digital Signal Processing Effects, Sound Synthesis, and Interactive electronic music composition using Ableton Live, Max4Live, as well as Max MSP for students to learn how to program their own virtual synthesizers and/ or algorithmic composition to create interactive music in real time. Electronic Music Composition is a central part of the class. Students can choose any aesthetic of their choice for the composition projects, since the focus of the class is on teaching students the technological tools to create the music of their choice. Students will be encouraged to mix different styles of music creating fusion.

Class Format: Remote. Access to the software used in class will be provided for all the students registered in class

Requirements/Evaluation: Four fusion composition projects and weekly presentation of students mini-projects focused on the electronic music techniques studied in class, and based on student research of musical styles chosen for their projects.

Prerequisites: One of the following: MUS 102, MUS 103, or permission of instructor for those students that have taken music lessons in their previous school: please contact iperez@williams.edu

Enrollment Limit: 10

Enrollment Preferences: Music majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 111 (S) Music in Global Circulation (DPE)

(Formerly Music Cultures of the World.) This course introduces a variety of musical genres and practices from around the world, alongside a discussion of the processes and politics of their global circulation. Through learning about a combination of contemporary styles and longstanding musical traditions spanning a broad geographical range, students will develop a working knowledge of musical terms, concepts, and influential musicians. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. In particular, we will consider music's global circulation, and how its contents and meanings reflect those processes. Genres covered in the course vary intermittently but often include: "throat singing" genres in Tuva and Sardinia, Zimbabwean mbira and Chimurenga music, Argentine Tango, Ghanaian azonto and highlife, Balinese gamelan, and North Indian classical music. No prior musical training is required.

Requirements/Evaluation: class attendance and participation, three 5-7 page written assignments, and an 8-10 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Music, upperclassmen.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music's potential in situations of political unrest.

Attributes: MUS World Music/Ethnomusicology

Spring 2022

LEC Section: 01 TR 9:55 am - 11:10 am Corinna S. Campbell

MUS 118 (S) Hearing Race in America, 1890-1955 (DPE)

The rise of Rock 'n' Roll in the mid-1950s has typically been viewed as a temporary confluence in American culture, suggesting possibilities for musical and racial integration even as various forms of appropriation and exclusion were perpetuated. This course will explore the earlier multiple musical streams that merged at this moment. We will start by engaging with contemporary and historical perspectives on race, adopting a radically interdisciplinary approach. Our focus will then be on several of the most prominent vernacular and commercial forms of American music during this period: ragtime, blues, early jazz, rhythm and blues, Tin Pan Alley, country and western, bluegrass, Tex-Mex/Tejano conjunto, "Latin jazz," and Cajun/zydeco. Prior to the 1950s, these musical styles were segregated, at least in terms of production and marketing. How did racial assumptions and histories shape the creation, dissemination, and reception of this music? Can we hear the multiple ways in which race played out in American music in the first half of the twentieth century?

Class Format: lecture/discussion

Requirements/Evaluation: Evaluation will be based on a 5-page paper, a midterm, a 7-page paper, a final exam, and on class participation.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Random selection.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will focus on how racial imagination and systemic racism shaped the creation, marketing, and reception of multiple genres and styles in American popular music from 1890 to 1955. Before embarking on this historical study, we will first become familiar with current theories of race and with dominant American perceptions of race c. 1900. Perceptions of difference (in multiple forms), realities of market power, and issues of artistic and financial equity directly impacted music in this period.

Spring 2022

LEC Section: 01 MR 1:10 pm - 2:25 pm W. Anthony Sheppard

MUS 120 (S) Musics of Africa

Cross-listings: AFR 113 MUS 120

Primary Cross-listing

This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chants, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: discussion

Requirements/Evaluation: grade based on a listening journal, bi-weekly short assignments, a final paper, and class participation

Prerequisites: no prerequisites: prior musical background is not essential for this class

Enrollment Limit: 20

Enrollment Preferences: current or prospective Music majors and Africana Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

MUS 141 (F) Opera

Cross-listings: THEA 141 MUS 141

Primary Cross-listing

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass and Adams. This course may involve a trip to the Metropolitan Opera.

Class Format: discussion

Requirements/Evaluation: a midterm, a brief paper, an 8-page paper, and a final exam

Prerequisites: none

Enrollment Limit: 30

MUS 149 (S) The Language of Film Music

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Class Format: This is a remote course that includes synchronous class meetings.

Requirements/Evaluation: Course evaluations include: several short writing and creative assignments, two quizzes, a midterm essay, and a final creative project. Off-campus students should consult the professor about computer hardware requirements for the completion of creative projects.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: given to juniors and seniors

MUS 150 (S) The Broadway Musical (DPE)

Cross-listings: MUS 150 THEA 150

Primary Cross-listing

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

MUS 150 (D1) THEA 150 (D1)

Difference, Power, and Equity Notes: We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped, and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."

Not offered current academic year

MUS 151 (F) History of Jazz

"There are only three things that America will be remembered for 200 years from now when they study the civilization: The Constitution, Jazz Music and Baseball. These are the three most beautiful things this culture's ever created."--(Gerald Early) Jazz is the most common name for a great African American Art form that still defies definition. Over the past century this elastic tradition has laid down firm roots for numerous other American and World musics, while itself in the throes of a seemingly permanent identity crisis. Jazz is perennially declared dead or dying yet consistently summoned by advertisers to lend vitality and sex appeal to liquor or automobiles. By any name and regardless of its health status, jazz has a rich history of conservative innovators, at once restless and reverent, who made fascinating leaps of creativity out of inspiration or necessity. This "listening intensive" class will look at the past century of jazz music through ideas, "what-if" questions and movements that changed the way the music was created, presented and perceived. Both musical concepts (such as syncopation and cross instrumental-influence) and cultural connections (racial, technological and economic) will be examined, giving us freedom to link similar kinds of musical thought across disparate settings and decades. Our inquiry will include (but not be limited to) the lives and music of Louis Armstrong, Fletcher Henderson, Mary Lou Williams, Duke Ellington, Charlie Parker, Thelonious Monk, Dizzy Gillespie, Art Blakey, John Lewis, Miles Davis, John Coltrane, and Wayne Shorter.

Class Format: All meetings online. Some meetings will be in smaller discussion groups

Requirements/Evaluation: class participation including regular reading and listening assignments; 4 quizzes, two short papers/projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first-years and sophomores

MUS 164 (F) Bach and Handel: Their Music in High Baroque Culture

This course explores the lives and music of two great composers of the High Baroque, Johann Sebastian Bach and George Frideric Handel. We will examine their dramatically contrasting life experiences and musical pursuits within the larger social and cultural framework of the period: Bach as a provincial composer, servant to minor German aristocrats and the Lutheran Church, virtuoso organist and pedagogue; Handel as a cosmopolitan celebrity and entrepreneur, creator of operatic and instrumental entertainments for both the Italian and English nobility and the paying public. Development of listening skills and understanding of Baroque music styles, genres, and forms will be stressed. Bach's *Brandenburg Concerti* and *Mass in B-minor*, and Handel's opera *Giulio Cesare* and *Water Music Suite* are just a few of the works to be discussed and enjoyed.

Class Format: discussion, two meetings per week, and a field trip may be required

Requirements/Evaluation: participation, two papers, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

MUS 165 (F) Mozart

This course will examine the extraordinary life and musical genius of Wolfgang Amadeus Mozart. Through lectures, discussion, readings, and guided listening, students will gain appreciation of Mozart's classical compositional style and familiarity with many of his greatest works. The class will explore Mozart's pivotal position as a musician in Viennese society; his strange combination of bawdy behavior and sublime artistry; his relationship with his domineering father Leopold, as well as with Haydn, Beethoven, and Salieri; and the myths about Mozart that have sprung up in the two centuries since his death.

Class Format: discussion

Requirements/Evaluation: class participation, listening quizzes, two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with demonstrated interest in music

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 166 (S) Beethoven

This course provides an introduction to the life and music of Ludwig van Beethoven. The composer's difficult childhood, loss of hearing, secret affair with his "Immortal Beloved," tempestuous relationship with his suicidal nephew, along with political, philosophical, social, and cultural developments of the late 18th and early 19th centuries, will provide context for our study of his artistic achievements. Students will listen to a broad selection of Beethoven's music, including sonatas, string quartets, symphonies, overtures, concertos, choral works, and opera. Some of the topics we will discuss include the nature of his genius, his compositional methods, his influence on later composers such as Schubert, Wagner, and Brahms, Beethoven in popular culture, and the continuing impact of his music around the globe.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, two 5-7 page papers, several listening quizzes, midterm and final exams

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music

Expected Class Size: 15

MUS 171 (S) Music and Spirituality: Cross-Cultural Perspectives

Cross-listings: REL 171 MUS 171

Primary Cross-listing

How does the sacred sound? Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music reflect and produce spiritual experience? This team-taught course will take a comparative approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, music and dance in spiritual practice, and the role of music created in the face of death and its aftermath. Working from both musicological and ethnomusicological perspectives, we will explore the possibilities of sensory ethnography for better understanding the role of perception and the body in spiritual experiences with music. Our comparisons will draw from Western and world Christian traditions from medieval to modern times, and on conversations with musicians immersed in the music of other faith traditions (including Jewish, Hindu, and Muslim). We will explore connections between music and spirituality through a wide variety of repertoires, including plainchant and Renaissance sacred choral music; the music and dance of traditional West African religions like vodun and orisa; music from the Western classical tradition by such composers as Bach, Beethoven, and Messiaen; American hymnody and spirituals; gospel music in the U.S. and Africa; and selected artists from the world of jazz and popular music, such as John Coltrane and Leonard Cohen.

Requirements/Evaluation: class participation; class journal; presentation with annotated bibliography; ethnographic field study; final project with presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music, religion, and/or anthropology/sociology

Expected Class Size: 15

MUS 174 (S) The Singing Voice: Structure, Styles and Meaning

What makes an opera singer sound different than a pop singer? How does the sound of each contribute to musical meaning for listeners? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, importantly, through singing. We examine histories of styles, cultural contexts as well as basic physiology, acoustics and techniques. We will explore the basics of yodeling, Tuvan throat singing, and belting, among other styles. Familiarity with musical notation recommended.

Class Format: studio/brief lectures

Requirements/Evaluation: Two quizzes, regular journaling, a final paper (6-8 page) and a presentation.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

MUS 175 (F) Sound Art, Public Music

Cross-listings: MUS 175 ARTS 273

Primary Cross-listing

Western music performance traditionally occurs within contained spaces in which performer and audience adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and expectations of performance and reception have loosened, often moving into public spaces: from sound art installations to ambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course examines the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Hildegard Westerkamp, Brian Eno and John Luther Adams, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of sound art works inspired by ideas and creators we are studying.

Requirements/Evaluation: class participation, three short (2- to 4-page) essays, a response journal and the creation of four sound art works

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

SEM Section: 01 MR 2:35 pm - 3:50 pm Brad Wells

MUS 177 (S) Gender and Sexuality in Music (DPE)

Cross-listings: WGSS 177 MUS 177

Primary Cross-listing

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, intermittent GLOW posts and short assignments (2 pgs or less), midterm project, and either a 12-page final paper or a project with supplementary paper (length to be determined in consultation with the instructor).

Prerequisites: open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit: 15

Enrollment Preferences: WGSS and MUSC majors/prospective majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This is a hybrid course, with the majority of the classes taking place remotely. The character and frequency of in-person class sessions will depend on the size of the class and the number of students taking part in the in-person option.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 177 (D1) MUS 177 (D1)

Difference, Power, and Equity Notes: This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as 'natural,' and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources--elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

MUS 179 (F) James Baldwin's Song

Cross-listings: AFR 128 COMP 129 MUS 179

Secondary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in *Notes of a Native Son* in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel *Go Tell It on the Mountain*, the metaphor of the blues in the play written during the civil-rights movement *Blues for Mr. Charlie*, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in *A Lover's Question* set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

Requirements/Evaluation: Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

MUS 201 (F) Music Theory and Musicianship II

Music 201 continues to greater degrees the study of music techniques from the common practice period by means of analysis, composition, written exercises, sight-singing, and dictation. We will expand our understanding of chromaticism. We will learn how chromaticism is used as a voice-leading tool, and how it participates in music even at deeper levels of the structure. We will learn about innovations that occurred from the early 19th century through the beginning of the 20th century and will trace the origins for these new harmonic tendencies. We will also learn how composers create larger formal structures.

Class Format: Remote. In addition to the scheduled lecture block, the class requires a weekly aural-skills meeting, to be scheduled in the first week of class. The one-on-one meeting will take place with a lab instructor for approximately 10-15 minutes

Requirements/Evaluation: homework, theory quizzes, analysis papers, compositional projects, final project, class attendance, preparation, participation, and on the results of the lab portion of the class

Prerequisites: MUS 104

MUS 207 (S) Jazz Improvisation

This class is for the intermediate and advanced player with {some} experience improvising. The goal is to build on each student's existing improvisational abilities, and the coursework will be somewhat tailored to the needs of the students enrolled. Students will study intermediate and advanced concepts for improvisation and learn the essentials of the jazz language through solo transcription and analysis. There will be time spent learning important jazz compositions and a focus on using improvisational devices and techniques learned in class on these compositions. Much of class time will be spent playing through exercises and patterns, playing ideas in twelve keys and implementing the learned class material into solos over standard jazz compositions.

Class Format: combining theory and performance

Requirements/Evaluation: completion of two to three solo transcription assignments, composition assignments, and short quizzes

Prerequisites: some experience improvising in jazz contexts on a pitched instrument, a basic understanding of jazz nomenclature

Enrollment Limit: 19

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 210 (S) Music Technology I

Designed for students with some music background who wish to learn basic principles of Musical Technology and practical use of current software and hardware. Topics include acoustics, MIDI sequencing, digital recording and editing, sampling, analog and digital synthesis, digital signal processing, and instrument design. Lectures will provide technical explanations on those topics covered in class and an historical overview of electronic music.

Requirements/Evaluation: weekly assignments, a midterm exam, a final paper and two composition projects

Prerequisites: MUS 102 or 103, or permission of instructor; knowledge of and proficiency with musical notation is required; some background in acoustics/physics is desirable

Enrollment Limit: 8

Enrollment Preferences: Music majors and those planning to major

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 211 (F) Music, Nationalism, and Popular Culture (DPE)

This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel), international forums for the expression of national sentiment (the Olympics, Miss Universe and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Ernest Gellner, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

Class Format: This course is a hybrid model, involving a combination of exclusively remote all-class meetings and small group meetings in which remote students and in-person students will meet separately.

Requirements/Evaluation: Class participation, regular short (1 page) written responses, two 5- to 6-page papers, a Final Paper/Project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Upperclass students and music majors, international students who need to fulfill in-person requirement.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the DPE requirement. Topics include the use of music for social control and subversion in Mobutu's Zaire, its affective power in U.S. campaign ads, and the ways in which constructions of 'folk music' impact power differentials in a national political structure. Assignments help students develop an awareness of the specific strategies whereby music mobilizes national ideologies.

MUS 215 (F) Music Migration, Blues People, and Wayward Women: Case Studies in DJ Scholarship

Cross-listings: AFR 239 MUS 215

Secondary Cross-listing

Music Migration explores migration patterns vis-à-vis the movement of music, people, and ideas. Students will explore DJ culture as an interdisciplinary practice, both performative and subversive in its ability to shape and define social experiences. Students will employ creative research skills to examine the social context of DJ culture related to the music of the Black diaspora and its makers' interior lives and genius, enacting what the instructor calls "DJ Scholarship." The course will follow flows of music migrations between various regions within the United States. Instead of providing a linear history, this course connects and tunes into fundamental political-cultural movements and musical interventions across geographies. Specific attention will be paid to how sound travels within the context of the blues and what this tells us about the relationship between the sonic, race, gender, and sexuality. Using Black feminist thought as a guide to understand Blues, funk and soul women, we will draw from Saidiya Hartman's conceptual framework "wayward women" to understand a working-class feminist practice. In turn, we will examine what kind of worlds are produced by sound cultures during significant political and social change.

Requirements/Evaluation: Class participation, ten 2 to 3-page responses to reading/film/music, Final project: presentation of a mock syllabus

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is overenrolled, preference given to Africana studies concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

We will examine two forms that embody continuity of tradition or the impact of societal, political or economic change. Lamban was created by the Djeli, popularly called Griots served many roles in the kingdoms of Ghana and Old Mali from the 12th century to current times. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it is practiced by the Mandinka people. Bira is an ancient and contemporary spiritual practice of Zimbabwe's Shona people. While these forms are enduring cultural practices, Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth and their aspirations for independence at the end of the 1950s. We

will also consider the introduction of these forms outside of their origin. This course can be taken for academic and/or PE credit

Class Format: class hours will be used to learn and use the dance and music of at least two forms including historical context, a group and individual research project or paper. When possible, our process will include guest artists and field trips to see live performance as well as use of the archives at Jacob's Pillow Dance Festival.

Requirements/Evaluation: discussion of assignments, group response performances, and short research paper. Students enrolled for PE credit are responsible only for the performance-based projects

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students who have taken a 100 level dance course of DANC 202; have experience in a campus-based performance ensemble; or have permission of the instructors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated new physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

Class Format: class hours will be divided among discussion of media and readings; rehearsal of dance and music techniques; field trips to view performances; research at the Jacob Pillow's archives; and interaction with visiting artists

Requirements/Evaluation: a series of discussion, research, and individual and group projects; all of which will inform collaboration on mid-term and final projects

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: students who have taken DANC 107 ,108 or DANC 201; have experience in a campus based performance ensemble; or have permission of the instructors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

MUS 222 (F) Politics of Performance/Performing Politics in Contemporary Africa (DPE) (WS)

Cross-listings: MUS 222 AFR 223

Primary Cross-listing

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQIA community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres-among them Afrobeat, kwaito, soukous, raï, mbalax, Chimurenga music, and a variety of rap and hip-hop styles-are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: this class places a strong emphasis on discussion

Requirements/Evaluation: in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project

Prerequisites: some familiarity with music terminology encouraged

Enrollment Limit: 15

Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 231 (S) Music in History I: Bach and Before

This course explores 1000 years of music-making in Western Europe, beginning with the philosophical and theoretical origins of this music in ancient Greece and extending to the life and music of J.S. Bach. Topics covered include how the sound of music changed over a millennium; the different functions it served and how genres developed to serve these functions; the lives of the men and women who composed, performed, and wrote about music; and how the changing notation and theory of music related to its practice over the centuries. At the same time, the course provides an introduction to the modern study of music history, sampling a broad range of recent scholarship reflecting an array of critical approaches to the study of early music in our own day.

Class Format: lecture-discussion

Requirements/Evaluation: in-class and online participation, two medium length papers, unit tests and final exam

Prerequisites: ability to read music; open to qualified non-majors with the permission of instructor

Enrollment Limit: 10

Enrollment Preferences: music majors, those planning to major in music, and any student with a strong interest in music.

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Required course for Music majors. Music majors may not take MUS 231 as pass/fail or 5th course option if they are using it to fulfill the

Medieval/Renaissance/Baroque music history requirement for the music major.

MUS 232 (S) Music in History II: Classical and Romantic Music

This course traces the development of Western art music from 1750-1900. We will explore the works of many eighteenth- and nineteenth-century composers, probing the music's connections with Classical and Romantic aesthetics, as well as political, philosophical, social, and cultural developments of the time. Composers to be studied include Haydn, Mozart, Beethoven, Schubert, Robert Schumann, Clara Schumann, Felix Mendelssohn, Fanny Mendelssohn Hensel, Berlioz, Chopin, Verdi, Wagner, Tchaikovsky, Brahms, Mahler, and others. Topics for discussion include the changing role of composers in society, music's relation to the other arts, challenges faced by nineteenth-century female composers, controversies surrounding music and meaning, the interaction of music and drama in opera, and musical nationalism.

Class Format: lecture-discussion

Requirements/Evaluation: class participation, two 5-6 page papers, GLOW posts, midterm and final exams

Prerequisites: ability to read music

Enrollment Limit: 15

Enrollment Preferences: Music majors, those planning to major, and any student with a strong interest in music

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Music majors may not take MUS 232 as pass/fail or 5th course option if they are using it to fulfill the Classical-Romantic music history requirement for the music major.

MUS 233 (F) Music in History III: Musics of the Twentieth Century

A survey of musics in both Western and non-Western society from the close of the nineteenth century to the present. Emphasis will be on the contextual study of the music of major composers of Western art music, on the musical expressions of selected areas of world music such as Africa, Asia, India, and the Americas, and on the intermingling of musical influences of pop, jazz, and art music. Our study will focus on issues of exoticism and globalization.

Class Format: discussion

Requirements/Evaluation: class participation, two papers, a midterm, and a final exam

Prerequisites: ability to read music

Enrollment Limit: 12

Enrollment Preferences: Music majors or students with some musical background.

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

MUS 238 (F) Music in Modernism

The synthesis of the arts was a primary pursuit of modernist composers, artists, choreographers, and writers. Seeking either to realize Wagner's "total work of art" in the theater, or to uncover the more general correspondences celebrated by Baudelaire, modernists consistently looked beyond their own media. Collaborations on works of "total theater" were common: Satie, Cocteau, Massine, Picasso; Brecht, Hindemith, Weill; Stravinsky, Nijinsky, Bakst; Claudel, Honegger, Rubinstein. Modernists explored new connections between music and color (Scriabin, Kandinsky), music and literature (Joyce, Mann), and music and dance (Duncan, Graham). Occasionally, modernists attempted to unite the arts on their own: Schoenberg painted, Pound composed, and Kokoschka wrote. Our focus will be on those works of music, art, dance, and literature that explored new relationships between the arts. One goal will be to investigate whether specific equivalents exist between techniques of modernist painting, poetics, choreography, and composition. Aware of the risks and rewards of interdisciplinary study, we will attempt our own theories of artistic synthesis. This course is designed to bring multiple perspectives to the study of music in modernism.

Class Format: discussion

Requirements/Evaluation: three papers (6, 8, and 12 pages in length) and on class participation; drafts of two of these papers will be required; students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments

Prerequisites: none

Enrollment Limit: 15

MUS 239 (S) Music in the Global Cold War (WS)

Cross-listings: MUS 239 LEAD 239

Primary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

Class Format: Hybrid, meeting twice per week. Class discussion will be central to this course.

Requirements/Evaluation: 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students with relevant experience in Political Science, History, or Music studies.

MUS 249 (S) Black British Music and Visual Culture 1970s-1990s

Cross-listings: MUS 249 AFR 253

Secondary Cross-listing

Taking the original 1988 Black Film, British Cinema conference as a starting point, this class will draw on independent film, music, and literature to ask more important questions about the Black British cultural landscape and media politics. We will specifically engage this conference to ask what 'Black Britishness' means in Britain as an imperial nation and to examine the aesthetics strategies used by Black filmmakers and cultural producers. In honing radical and Leftist filmmaking, Thatcherism (in conversation with Reaganomics), and the race riots in London, Birmingham, Leeds, and Liverpool throughout the 1980s, this course explores how Black audiovisual cultures disrupted the British landscape and affectively engaged the spectator by showing diasporic conditions. We will look at the impact of Reggae Sound Systems and the role of sound as a mode of knowledge production. By looking at collectives such as Black Audio Film Collective, Sankofa Film and Video Collective, and Ceddo Film and Video Workshop, we delve into broader questions of identity formation, documentary realism, and the mixture of conventional and avant-garde styles in cinema and music. John Akomfrah, DJ Norman Jaye, Jazzy B, Isaac Julien, Joan Armatrading, Horace Ové, Martina Attile, and Ngozi Onwerah will be used to show how Black British cultural production makes a more considerable contribution to global perspectives on Black music, film, and cinema.

Requirements/Evaluation: Class participation, ten 2 to 3-page responses to reading/film/music. Final project: presentation of a mock syllabus.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If course is overenrolled, preference given to Africana studies concentrators.

MUS 254 (F) Bebop: The (R)evolution of Modern Jazz

Cross-listings: AFR 254 MUS 254

Primary Cross-listing

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study and guided listening assignments, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and its evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Requirements/Evaluation: weekly reading, listening, short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Music majors, Jazz Ensemble members, Africana Studies concentrators

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 261 (S) Lost Voices of Medieval and Renaissance Women (WS)

Cross-listings: MUS 261 WGSS 261

Primary Cross-listing

Remarkably few female voices from the first 1500 years of music in the West are audible today; most of the extant music and poetry of these centuries was composed by men to communicate male perspectives on matters worldly and divine. In this course we will listen to the experiences and viewpoints of medieval and Renaissance women as expressed through their poetry and song. We will ask how these women, whose lives were shaped either by the requirements of monastic culture or by the complex dynamics of aristocratic court culture, negotiated their places and made their voices heard within the patriarchal society of their time. We will examine how the contrasting environments of church and court informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way, we will critically assess how these lost voices have been recreated to speak to us today through recordings and film. Our exploration begins in Byzantium and travels through Germany to France, Spain, and Italy. Along the way we encounter the Greek chant of the 9th century Byzantine abbess Kassia, the Latin poetry, chant, and sacred music drama of the 12th century German polymath St. Hildegard of Bingen, and the elegant poems and courtly melodies of the Countess of Dia and Queen Blanche of Castile in 12th and 13th century France. Heading south, we explore 14th century sacred polyphony at the royal convent of Las Huelgas in northern Spain, and voyage cross the Mediterranean to sample the lively musical life of 15th and 16th century cloistered female communities in northern Italy. We conclude our journey with a comparison of three remarkable 16th century women: the archduchess Margaret of Austria, Governor of the Hapsburg Netherlands, and poet-composer of French chansons; Sister Leonora d'Este, an Italian princess who spent her life enclosed in a Venetian convent, and likely authored a collection of anonymous Latin motets; and Maddelena Casulana, a northern Italian composer of madrigals, and the first woman to publish music under her own name. Her introduction to her first book of madrigals encapsulates the aim of this course: "I want to show the world, as much as I can in this profession of music, the vain error of men that they alone possess the gifts of intellect and artistry, and that such gifts are never given to women."

Requirements/Evaluation: Evaluation based on participation, three essays totaling 20-25 pages, three short peer reviews, and a final project presentation.

Prerequisites: Ability to read music helpful but not required.

Enrollment Limit: 10

Enrollment Preferences: Current or prospective Music and Women's Gender & Sexuality Studies majors, then seniors, juniors, and sophomores.

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 261 (D1) WGSS 261 (D2)

Writing Skills Notes: Students will write three essays totaling 20-25 pages, each of which will be revised in response to peer and instructor feedback.

MUS 271 (F) Sonic Art

Cross-listings: ARTS 271 MUS 271

Primary Cross-listing

The course explores sound art through research and hands-on creative projects. Students will create original sound works, working collaboratively with partners from complementary disciplines. Precedents for sound installation, sonic pavilions, sound performance and artist-made instruments will be reviewed. Example works include texts on an ancient Greek Chythonic cult, instruments created by contemporary Brazilian transdisciplinary artists, the collaborative group Experiments in Art and Technology (E.A.T.) as well as works by artists showing at Mass MoCa and Documenta 14.

Requirements/Evaluation: presentation of students mini projects (20%), four artistic projects (20%)

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students with either Studio Art or Music experience

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 271 (D1) MUS 271 (D1)

Not offered current academic year

MUS 272 (S) Music and Meaning (WS)

Nearly everyone finds music meaningful, but what exactly does it mean? Without the help of words, this largely non-referential art presents special challenges to interpretation. While most would agree that musical sounds can do such things as mimic the rumbling of thunder, evoke the countryside, suggest the act of chasing, or express rage, the capacity of music to convey meaning remains controversial among scholars, performers, and listeners. Some, following music critic Eduard Hanslick, assert that musical works are essentially "tonally moving forms"--patterns of sound with no reference to the world outside themselves; a work's meaning derives solely from the interplay of musical elements. Others counter that music can signify aspects of human experience, its sounds and structures not merely referring to the outside world but even relating complex narratives. Certain writers have argued that, without the assistance of language, what music signifies remains vague, while others insist that the meaning of music is actually more precise than that of words. In this tutorial course, we will explore a range of questions regarding musical meaning. How can combinations of pitches, rhythms, and instrumental timbres signify something beyond themselves? Is the subject of musical meaning more relevant to some historical styles or genres than others? How can we determine the meaning(s) of a work? Should we concentrate on formal processes within the music? Consider socially constructed meanings? Seek the composer's intentions? Emphasize our personal responses? What makes some interpretations more convincing than others? In grappling with these questions, students will engage with writings by Agawu, Cone, Hanslick, Kramer, Langer, Lewin, Newcomb, and Schopenhauer, among others. Music to be studied includes works by Beethoven, Schubert, Chopin, Brahms, Mahler, Tchaikovsky, Ravel, Stravinsky, Glass, and Adams.

Class Format: This course will be taught remotely. During the first and last weeks of the semester, students will attend one or two online group classes; in the other weeks, students will meet with the instructor in pairs for a one-hour, online session at a mutually convenient time.

Requirements/Evaluation: Students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks; evaluation will be based on five papers/presentations, and five responses.

Prerequisites: Ability to read music, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Any student who expresses a strong interest in the course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this tutorial course, students will write and present a 5- to 6-page paper every other week (five papers total) and a 1- to 2-page response to their partner's paper in the alternate weeks (five responses total). Through discussion in the tutorial sessions and comments on the papers, the course will place strong emphasis on developing students' critical thinking and writing skills.

Not offered current academic year

MUS 273 (F) Dangerous Music (WS)

As a largely non-referential art whose meanings are far from transparent, music might seem to pose little danger. How could mere sounds represent a threat? Yet precisely because its meanings can be obscure, enabling it to achieve its ends surreptitiously, music has intertwined with danger throughout history. With its power to stir the emotions, stimulate bodily movement, encode messages, and foment rebellion, music has often been perceived as an agent of harm. Plato claimed that too much music could make a man effeminate or neurotic, and warned that certain musical modes, melodies, and rhythms promote licentious behavior and anarchic societies. Puritans, Victorians, and totalitarians, as well as opponents of ragtime, rock 'n roll, and rap, have also accused certain musical genres or styles of exerting dangerous influences, and sought to limit or suppress them. In Afghanistan, the Taliban banned music altogether. While music has often been unfairly accused, its potential for placing people in actual danger is undeniable. Works that are played at ear-splitting decibel levels, that call upon performers to injure themselves, that are used as a form of psychological torture, or that incite violence demand reconsideration of the widely shared view that music is fundamentally a form of entertainment.

Requirements/Evaluation: evaluation will be based on participation, five 5-6-page papers/presentations, and five 1-2 page responses

Prerequisites: an ability to read music is desirable but not required

Enrollment Limit: 10

Enrollment Preferences: students with demonstrated interest in music

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write five 5-6 page papers and five 1-2 page responses, and will receive extensive feedback on their writing.

Fall 2021

TUT Section: T1 TBA Marjorie W. Hirsch

MUS 275 (F) Shakespeare through Music

The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies *Romeo and Juliet* and *Othello*, and the comedy *Midsummer Night's Dream*--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

Requirements/Evaluation: each student will write five 6- to 7-page essays, and provide five peer reviews; evaluation will be based on the quality of written work and discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: second-year students

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

MUS 276 (F) Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

MUS 278 (S) Carmen, 1845 to Now (DPE) (WS)

Cross-listings: MUS 278 WGSS 248

Primary Cross-listing

The story of the gypsy *femme fatale* Carmen has endured for over 150 years. In Western culture and beyond, she exemplifies the seductive, exotic, independent, and dangerous woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal and problematic narrative, starting with Prosper Mérimée's 1845 novella on which Bizet based his famous 1875 opera *Carmen*. We will consider various staged and film versions of the opera itself, including Francesco Rosi's stunning 1984 movie, and discuss various other film transformations of the story, from DeMille's 1915 silent film through Hammerstein's 1954 all-black musical *Carmen Jones*, to the MTV version *A Hip Hopera* of 2004. Comic approaches will also be assessed, from Charlie Chaplin's *Carmen Burlesque* of 1915 through Spike Jones' 1952 *Carmen Murdered!* and *The Naked Carmen* of 1970. We will explore provocative dance interpretations ranging from Carlos Saura's 1983 flamenco version through David Bourne's choreography in his 2001 gay reading called *The Car Man*. Our journey concludes with a comparison of two post-colonial sub-Saharan African films--the Senegalese director Ramaka's *Karmen Gei* (2001) and *U-Carmen eKhayelitsha* (2005) by the South African director Dornford-May--that push critical reaction to Bizet's story and music beyond Western cultural boundaries.

Class Format: Remote format. After four initial 75-minute group meetings to discuss Mérimée's novella and Bizet's music, students will meet with the instructor in pairs for one hour each week. The scheduled class time is obligatory only for the first two weeks, after which weekly pair meetings will be individually scheduled.

Requirements/Evaluation: Each student will write a 5- to 6-page essay every other week (five in all), and provide 2-page written and oral peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation.

Prerequisites: None; ability to read music useful but not necessary

Enrollment Limit: 10

Enrollment Preferences: Preference given to current or prospective Music and Women's Gender & Sexuality Studies majors, then seniors and

juniors.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 278 (D1) WGSS 248 (D2)

Writing Skills Notes: Students will write five short essays of 5-6 pages each, and receive oral and written feedback addressing structure, argumentation, and style from their tutorial partner and the instructor on every essay.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement through a critical examination of the ways in which the Carmen story has served as a stage on which multifaceted textual and musical constructions and conflicts express the power dynamics between individual and group identities, encompassing gender and sexuality, nationality, race, ethnicity, and class.

Not offered current academic year

MUS 279 (F) American Pop Orientalism (DPE) (WS)

This tutorial will investigate the representation of Asians and Asian Americans in American popular culture since the late nineteenth century. Our focus will be on music's role in Orientalist representation in a wide variety of media and genres, including Hollywood film, television, popular song, music videos, Broadway musicals, hip hop, and novels. We will begin with major texts in cultural theory (Said, Bhabha) and will attempt throughout the semester to revise and refine their tenets. Can American Orientalism be distinguished in any fundamental way from nineteenth-century European imperialist thought? How does Orientalist representation calibrate when the "exotic others" being represented are themselves Americans? Our own critical thought will be sharpened through analysis and interpretation of specific works, such as *Madame Butterfly*, "Chinatown, My Chinatown," *Sayonara*, *Flower Drum Song*, *Miss Saigon*, *Rising Sun*, *M. Butterfly*, *Aladdin*, and Weezer's *Pinkerton*. We will end the semester by considering the current state of Orientalism in American popular culture.

Requirements/Evaluation: five 5- to 6-page essays and five critical oral responses

Prerequisites: previous related coursework and/or musical experience is desirable, but is not required

Enrollment Limit: 10

Enrollment Preferences: students with prior related course experience

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students will develop analytical and interpretive skills applicable to their future engagements with a wide range of art forms as we investigate the musical, literary, and visual techniques employed in works of exotic representation. We will focus on how popular culture has shaped and reflected perceptions of race and gender in American history since the late 19th century.

MUS 280 (S) Dancing the Score/Scoring the Dance

Cross-listings: MUS 280 DANC 280

Primary Cross-listing

This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to

articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire music as well as music inspiring dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one's group is central, sharing responsibility for the development of others' as well as one's own work.

Class Format: each student choreographer will work with a student composer; they will share responsibility choosing, creating, developing, completing, and presenting their projects

Requirements/Evaluation: 10% class participation, 20% written assignments, 70% composition assignments

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: composition students and student choreographers

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 280 (D1) DANC 280 (D1)

MUS 281 (F)(S) Individual Vocal and Instrumental Instruction

Individual vocal or instrumental lessons offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade. (Note: partial credit music lessons taken pass/fail do not count as one of the three pass/fail options available to students for regular semester courses.) Students are required to prepare for 10 lessons during the semester with a minimum expectation of one hour practice per day and to perform publicly on at least one departmental studio recital during the semester. Lessons are scheduled TBA based upon instructor schedule. Make-up lessons are given at the discretion of the instructor. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 10 lesson commitment. There is no registration via Williams Student Records. To register for the course, a student must first contact the appropriate teacher; they may do this using the inquiry form. The inquiry form, an outline of the registration process, and the lesson registration deadlines are available on the Music Department website at <https://music.williams.edu/courses/#individual-vocal-and-instrumental-instruction>. Students will be reassigned to course numbers 281-288 based on the number of semesters of instruction already taken in one particular section. Specific instrument or voice sections are as follows: 01 Bassoon, 02 Cello, 03 Clarinet, 04 Bass, 05 Flute, 06 Guitar, 07 Harpsichord, 08 Horn, 09 Jazz Piano, 10 Oboe, 11 Organ, 12 Percussion, 13 Piano, 14 Classical Saxophone, 15 Trumpet, 16 Viola, 17 Violin, 18 Voice, 19 Jazz Bass, 20 Jazz Vocal, 21 Trombone, 22 Harp, 23 Jazz Drum, 24 Jazz Saxophone, 25 Jazz Trumpet, 26 Euphonium, 27 Tuba, 28 African Drumming, 29 Jazz Guitar, 30 Mbira, 31 Vocal/Songwriting, 32 Jazz Trombone 33 Sitar, 34 Tabla, 35 Erhu, 36 Yangqin, 37 Zheng, 38 Liuqin/Pipa, 39 Zhongruan

Requirements/Evaluation: Lesson preparation, public performance, and progress throughout the semester.

Prerequisites: permission of the individual instructor; enrollment limits apply to each section based upon studio space and student qualifications

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: NA

Grading: yes pass/fail option, half credit fifth course option

Unit Notes: Enrollment in more than one studio must be approved each semester by the chair beforehand.

MUS 291 (F)(S) Chamber Music Workshop

Classical and Jazz Chamber Music and other small departmental ensembles (including Chamber Choir, Percussion Ensemble, Chinese Music Ensemble, and Brass Ensemble) coached by faculty on a weekly basis culminating in a performance. Offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade, but as with all fifth courses, pass/fail is also an option. Students in ad hoc groups organized each semester by the director of the chamber music or jazz programs are required to prepare for 10 one-hour coaching sessions during the semester. It is recommended that each group rehearse a minimum of 2 hours each week in preparation of the coaching. Each ensemble is responsible for keeping a weekly log of rehearsal times and attendance. The logs are to be handed in to the coaches at the end of the semester. In addition students are expected to practice the assigned music individually and are required to perform on the Classical or Jazz Chamber Music concert at the end of the semester. For students in continuing departmental small ensembles, students are expected to practice the assigned music individually and keep a log of their practices, attend all rehearsals, and participate in all concerts presented during the semester. To register for the course, a student must contact the Chamber Music Performance Coordinator, and fill out a registration contract to be signed by the Coordinator, the coach, and the student. Information on the registration process is available on the Music Department website <https://music.williams.edu/courses> under "Chamber Music Workshop." The ensembles will be organized based on skill levels and the instruments represented.

Requirements/Evaluation: preparation for weekly coachings

Prerequisites: permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability

Enrollment Limit: 12

Enrollment Preferences: more advanced students, to be determined by audition as necessary

Expected Class Size: 12

Grading: yes pass/fail option, half credit fifth course option

Unit Notes: students should register for 291 for their first semester enrolled in this course and should use the numbers 292-298 for subsequent semesters; registration is through the Music department

MUS 301 (F) Counterpoint

Counterpoint, the study of the ways independent melodic lines can be joined in music, has been essential to musical and compositional instruction for centuries. Counterpoint was taught by Mozart, studied by Beethoven, and to this day remains an integral part of compositional training. The course will introduce students to species counterpoint in two and three voices--exercises that develop discipline in polyphonic writing, hearing, and thinking. The exercises will focus on the constraints of sixteenth-century vocal polyphony (music of Palestrina and Lassus) but will illustrate how such contrapuntal discipline is also manifest in music of Corelli, Bach, Brahms and Debussy.

Class Format: Hybrid--lectures will be a mix of pre-recorded video content, and working through sample exercises in person or online as conditions require.

Requirements/Evaluation: written exercises and emulation projects

Prerequisites: MUS 103 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Music majors and those with previous music theory training

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 307 (F)(S) Composition III

Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Requirements/Evaluation: satisfactory completion of student-initiated projects

Prerequisites: MUS 205, 206 and permission of instructor

Enrollment Limit: 4

Enrollment Preferences: Music majors

Expected Class Size: 2

Grading: yes pass/fail option, yes fifth course option

MUS 309 (S) Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104B and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

MUS 323 (S) Arts Organizing in Africa and the Diaspora (DPE)

Cross-listings: THEA 321 MUS 323 DANC 323

Primary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls' education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Class Format: This is a remote course.

Requirements/Evaluation: Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If the course exceeds the maximum enrollment, selection will be made based on students explanations for why they want to take the class.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities' interactions with multinational corporations, and representational politics in performance.

MUS 327 (S) Sounds and Pressures: Music in the 1970s Caribbean

Cross-listings: AFR 327 HIST 342 MUS 327

Secondary Cross-listing

For the Caribbean the 1970s was a decade of cultural excitement and political tragedy. 1960s radical consciousness contributed to rapidly changing music styles that formed by the early seventies and blossomed on the world stage as the decade progressed. This was the period when Jamaican

Reggae, Haitian Konpa, and Spanish Caribbean Salsa, asserted their presence in the mainstream. But the countries that birthed these popular music forms were locked in political crisis. In Jamaica, political violence escalated, Haiti faced a brutal dictatorship and Cuba was caught in the midst of Cold War strain. A common response to these challenges was massive emigration from the Caribbean to the United States. This course will examine the music produced in the 1970s Caribbean and its relationship to the forces of migration, national politics, and inter-regional contact. After a background on Cuban and Haitian music, the course will give greatest focus to Jamaican politics its relationship with Reggae, which reached further than any other Caribbean music form in the 1970s. It will explore the journeys of the music as it accompanied and oftentimes preceded the arrival of large numbers of Caribbean immigrants. In the process, the US imaginary of the Caribbean was reshaped by the popularization of Caribbean commercial music.

MUS 330 (S) Modern Folklore: Postcolonial Dance and Music in Africa

Cross-listings: AFR 330 MUS 330 DANC 330

Secondary Cross-listing

"Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old." --Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950's-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final projects

Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors

MUS 352 (S) Interplay: Collaborative Traditions in Jazz

"Meaningful theorizing about jazz improvisation at the level of the ensemble must take the interactive, collaborative context of musical invention as a point of departure"- Ingrid Monson, *Saying Something*. Collaboration gives birth to specific musical moments, shapes the dramatic arc of whole pieces

and performances, and is the foundation out of which the styles and larger artistic identities of individuals and groups arise. This class is an opportunity for advanced students of jazz music to investigate the uniquely collaborative nature of jazz language assimilation and communication. Participants will transcribe and analyze examples of musical interplay from the recorded works of the Miles Davis Quintet of the 1960's, the John Coltrane Quartet of the 1960's, and other notable jazz ensembles. They will also undertake a thorough profile of a modern-day ensemble, including a performance-based final project. Essays on jazz aesthetics by Berliner, Monson, Hobson and Rinzier among others will serve to broaden our discussions as we examine the ideas of musical collaboration and group identity through social and commercial lenses.

Class Format: hybrid

Requirements/Evaluation: an assortment of weekly writing/listening/transcription/analysis/composition/performance projects

Prerequisites: advanced jazz theory and performance skills, permission of instructor, MUS 104b, 204 highly suggested

Enrollment Limit: 10

Enrollment Preferences: Music majors, jazz ensemble members

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

MUS 381 (S) Choral Conducting

Choral conducting techniques will be developed through exercises and projects that encompass the many facets of this activity. Using the class as the primary practice choir, students will focus on conducting patterns applied to elements of interpretation, keyboard and vocal skills, issues of tuning and blend, rehearsal techniques, score study, and style and repertoire. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.

Class Format: coaching sessions

Requirements/Evaluation: regular conducting assignments and final projects

Prerequisites: MUS 103 and 104

Enrollment Limit: 6

Enrollment Preferences: upperclass students

Expected Class Size: 4

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 382 (F) Orchestral Conducting

This course will introduce and develop a broad range of subjects associated with conducting, including: leadership, rehearsal techniques, physical and aural skills, interpretation, performance practices, and programming. Related areas to be discussed include: balance, intonation, rhythm, articulation, bowings, and complex meters. Weekly conducting and score reading assignments will form the core of the workload. Larger projects may include conducting existing instrumental ensembles, and along with score reading, will be the basis of the midterm and final exams. This course includes instrument demos, and conducting videos.

Class Format: lab

Requirements/Evaluation: class participation, regular conducting assignments, midterm and final projects

Prerequisites: membership in a Music Department ensemble preferred, permission of instructor

Enrollment Limit: 6

Enrollment Preferences: Music department ensemble members/upperclass students

MUS 471 (S) Timbre

Timbre is central to the experience of all music and often enables us to identify styles and cultures nearly instantaneously. However, timbre is not commonly discussed in detail since our technical vocabulary for describing this musical element has been comparatively limited. Our work in this seminar will involve readings in music theory and history, ethnomusicology, and cognitive studies as well as in the emerging field of sound studies as we attempt to define timbre, explore its manifestations in a wide variety of music, and develop an analytical approach and descriptive vocabulary tooled specifically to this musical element. We will consider how composers and performers of both art and popular musics have wielded timbre as an expressive device and how technology may allow us to analyze details of timbral performance and perception. We will investigate the relationship between timbre and orchestration, from the rise of Haydn's orchestra to the Klangfarbenmelodie of Schoenberg. We will consider extremes of timbral distortion in both vocal and electric guitar effects in rock music as well in such traditions as Korean p'ansori and will explore various forms of speech music and the work of composers of spectral music to expand our case studies. Finally, our own experiments with timbral effects will bring our seminar to bear on our musical performance.

Class Format: Hybrid.

Requirements/Evaluation: evaluation will be based on papers, presentations, and class participation

Prerequisites: MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents). MUS 201-202 are also recommended but not required.

Enrollment Limit: 10

Enrollment Preferences: senior Music majors, junior Music majors

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 472 (S) Bach's Legacy

How have composers after Bach engaged with his legacy? This seminar will trace the course of the Classical and early Romantic period "Bach Revival" through Mozart, Beethoven, Mendelssohn, and Clara and Robert Schumann, and explore how he was venerated in the later Romantic era by Brahms and Busoni. Our main focus, however, will be on how composers of the modern era have viewed him and used his music. We will test critical conceptual frameworks offered by David Lowenthal's "The Past is a Foreign Country" and Harold Bloom's "The Anxiety of Influence," using them as lenses through which to view contemporary classical composers' Bach-inspired creations, ranging from Schoenberg and Webern through Sophia Gubaidulina, George Crumb, and David Lang. Finally, we will consider both the musical techniques and meanings of reworkings and quotations of Bach's music in film, jazz and popular music.

Requirements/Evaluation: several papers totaling at least 20 pages, presentations, and class participation

Prerequisites: MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents); MUS 201-202 and MUS 231 and/or 233 highly recommended

Enrollment Limit: 12

Enrollment Preferences: junior and senior Music majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

MUS 473 (S) Process Music

The course explores process music--music organized by the unfolding of various mathematical or mechanistic procedures--as defined by Steve

Reich's "Music as Gradual Process." The seminar centers upon Reich's process music, placing it in the context of its intellectual and musical precursors, the process and minimalist music of his contemporaries, and the subsequent generations of composers who built on Reich's foundation. The course will develop analytical tools to both define the processes that composers use in their music and to explore the particular relation between the musical materials (melodic, rhythmic) a composer chooses and the processes to which those materials are subject. Reich's process music and its techniques will serve as both a lens and mirror to examine and reflect upon precursor repertoires, including the contrapuntal music of Bach, isorhythmic motets of the middle ages and their cyclic counterparts in the music of Messiaen, serial procedures of the 1950s, and Ghanaian ensemble drumming. Contemporary musicians/composers to be explored as lecture topics and student projects will include Riley, Glass, Tenney, Lang, Tom Johnson, and Radiohead.

Class Format: weekly 3-hour meeting

Requirements/Evaluation: analysis and composition projects, and a final paper

Prerequisites: MUS 202

Enrollment Limit: 12

Enrollment Preferences: Music majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

MUS 474 (S) Music and Corporeality (WS)

Music is often said to derive its own special quality from the fact that it exists outside of visual representation and is not contained within a physical form, yet musical sound and practice are created through and act upon bodies in numerous ways. This course aims to address how music and bodies shape and respond to one another. Drawing from sources across musical sub-disciplines and extending to fields including cognitive science, sound studies, performance studies, and anthropology, we will follow four lines of inquiry related to music and corporeality: 1.) **Embodied practices:** techniques and pedagogies in performance and in listening (including praxis [Bourdieu], Deep Listening [Oliveros, Becker], Alexander Technique); 2.) **Music's physical effects and affects:** pleasure and pain, the vocalic body [Bonefant, Connor, Barthes], cognitive processes; 3.) **Ideological moves:** questioning the universality of music and of bodies and Cartesian dualism; 4.) **Music and bodies at their limits:** cyberfeminism, futurism, disembodiment, ecstasy, questions of artificiality/virtuality. Musical examples will be drawn from classical and popular sources from Euro/American idioms and beyond, predominantly from the late 20th and 21st centuries.

Requirements/Evaluation: midterm project, final paper (including rough draft and final copy) and presentation, intermittent 1- to 3-page papers and exercises

Prerequisites: familiarity with music terminology and the ability to read music notation is expected; questions can be directed to the instructor

Enrollment Limit: 12

Enrollment Preferences: senior and junior Music majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course culminates in a final presentation and paper, meant to showcase the student's critical achievements, including their ability to formulate and substantiate their argument. Assignments and exercises throughout the course are aimed at honing students' ability to write and present effectively.

Spring 2022

SEM Section: 01 W 1:10 pm - 3:50 pm Corinna S. Campbell

MUS 491 (F)(S) Advanced Musical Performance

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons can be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391,

392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student.

Class Format: individual instruction

Requirements/Evaluation: lesson preparation, public performance, and progress throughout the semester.

Prerequisites: completed application, registration and instructor recommendation must be submitted by the instructor by the Tuesday before the first Friday of the semester

Enrollment Limit: none

Enrollment Preferences: intended primarily for music majors; students must obtain the application and registration forms from the Music Department Office

Expected Class Size: NA

Grading: no pass/fail option, yes fifth course option

Unit Notes: Music majors may register for a total of four semesters, non-majors may register for two semesters: the specific name of the project elected is to be specified after the title "Music Performance Studies"

Distributions: (D1)
